### Robeco

Where reference is made to 'Robeco', it should be read Robeco Institutional Asset Management B.V. including the activities of the other entities which are in the scope of Robeco's management.

# Report of the Board of Directors

## General

### Website

An information update on the sub-fund's investment policies, returns and investment portfolio can be found on [www.robeco.com/riam](http://www.robeco.com/riam).

### Market Impact Covid-19

Robeco considers the ongoing Covid-19 pandemic as a significant event which may impact the investment funds under management. The impact of the pandemic on people, companies and the economy at large has been significant. While the link between Covid-19 cases and hospitalisation has significantly weakened thanks to vaccinations, the outlook remains uncertain. Pending herd immunity as a result of a substantial vaccination rate, the global economy will, however, still be impacted by opening and closing of (business) operations. Furthermore, a slowdown in the trajectory towards herd immunity as a result of risks relating to vaccine logistics, vaccine side effects, reduced effectiveness, or public resistance to (mandatory) vaccination, may have a negative impact on markets.

### Operational measures for business continuity by Robeco

In response to the ongoing Covid-19 crisis, Robeco is constantly monitoring the latest developments and has taken all measures necessary to manage the situation and to ensure business continuity, while ensuring the health and safety of our clients, our employees and our suppliers. Our operational measures and capabilities are such that Robeco remains fully functional in managing client portfolios and serving clients. Our systems and platforms are designed to enable our staff, most of whom have worked from home throughout the crisis based on their local health and safety measures, to operate as normal. Our approach is one of vigilance and flexibility, allowing us to implement new or revised measures smoothly and as necessary.

## Report of the investment manager

### Important financial and economical events

The first half of the year 2021 saw a firming global economic recovery from the Covid-19 pandemic induced recession. Key to this recovery has been the swift availability of effective vaccines, allowing for an easing of the policy trilemma between kickstarting the economy, solving the health crisis and preserving personal freedom. At the end of June around 25% of the global population had at least one dose of a Covid-19 vaccine. However, there is a strong dispersion in vaccination rates across the globe which also creates divergent economic recovery paths. In the developed economies vaccination rates are between 50%-60% at the time of writing whereas in emerging economies vaccination rates have lagged developed economies in the first half year. The recovery in the manufacturing sector began in 2020, reflected by the leading ISM manufacturing producer confidence indicators in the US reaching the highest level since December 1983. Given prevailing lockdown restrictions during the second and third wave of Covid-19 cases, services activity lagged manufacturing activity in developed economies but made a strong comeback from April onwards as lockdown intensities eased and social mobility increased.

With the IMF forecasting an expansion of the global economy by 6.0% in 2021 and 4.4% in 2022, the global economy is expected to remain firmly in expansion mode. However, output in the manufacturing and services sectors continues to be challenged by persisting supply shortages, though logistical bottlenecks and shipping fees have been moderating in the second quarter of 2021. In reflection of base rate effects and rising input costs, US headline consumer price index in May rose to the highest level observed since May 1991.

The powerful policy response to this crisis has clearly spurred the recovery in consumer demand. The interaction between central banks acting as fiscal financiers is creating positive multiplier effects, as a low interest rate environment alleviates the need to raise taxes while enabling fiscal expansion without endangering debt sustainability. However, further down the road, if inflation does show to be more persistent than currently expected by central banks, the alignment of interests between central banks and governments could be challenged.

### Performance analysis

#### Robeco BP Global Premium Equities

The sub-fund outperformed the index in the first half of 2021 by a wide margin, with strong results across nearly all sectors and primarily driven by stock picking. The sub-fund performed best within consumer discretionary and industrials. Regionally, the majority of the outperformance was driven by stock picking in North America, but European, UK and Japanese holdings also added value. Finally, across the market capitalization spectrum, relative outperformance has been added in all areas with an outsize focus on mid and large stocks.

#### Robeco QI Global Conservative Equities

The principal objective of the sub-fund is to achieve a high Sharpe ratio (i.e. an optimal relationship between absolute return and absolute risk). Using a combination of factors (low risk, value and momentum), the model identifies broad groups of stocks that are likely to outperform on a risk-adjusted basis. The sub-fund underperformed its index in the first half of 2021. While the low risk and momentum factors contributed negatively to the relative performance, the value factor made a positive contribution. The risk profile of the sub-fund, as measured by the volatility, was lower than that of the index. Sustainability, based on RobecoSAM Smart ESG scores, is integrated into the investment policy. These scores take into account environmental, social and governance (ESG) factors. The investment process is highly disciplined and ensures that the sub-fund's overall sustainability score is higher than or equal to the overall sustainability score of the index.

#### Robeco Sustainable Global Stars Equities

The sub-fund began the new year with a strong absolute return. It showed a return of +15.1% (gross of fees, in euros), underperforming the MSCI World Developed Index by 1.5%. There was a significant positive contribution to performance from the healthcare and consumer staples sectors, while there was a negative performance contribution from the energy, materials and industrials sectors. Large overweight positions in Eli Lilly, Alphabet, AstraZeneca and Microsoft added to performance, while the sub-fund lost performance in Neste Oyj, Vestas and Intel. During the first part of the year, the portfolio managers continued to rotate out of more expensive names in information technology and communication services and into better valued opportunities in materials, industrials, healthcare and financials. The portfolio managers have continued to strengthen the overall sustainability profile of the sub-fund and reduced the environmental footprint of the portfolio even further.

### Performance analysis (continued)

#### Robeco Emerging Stars Equities

In the first half of 2021, emerging equity markets rose by 10.9% in euros, yet lagged developed markets. The sub-fund performed in line with the MSCI Emerging Markets Index. Key positive contributions came from a relatively low weight in China, and from the positions in South Korea, Brazil and Hungary. Stock selection in China and India, and having no position in Saudi Arabia contributed negatively. During the half year, the sub-fund reduced its position in China and added to South Korea and Taiwan, where good new investment opportunities were present. The sub-fund maintained its investment policy, which combines active country allocation and stock selection based on fundamental research and supported by quantitative models, while ESG factors are fully integrated into the investment process.

#### Robeco Emerging Markets Equities

In the first half of 2021, emerging equity markets rose by 10.9% in euros, yet lagged developed markets. The sub-fund slightly underperformed the MSCI Emerging Markets Index. Key positive contributions came from a relatively low weight in China, and from the positions in Mexico, Brazil and Hungary. On the other hand, the stock selection in China and South Africa, and having no position in Saudi Arabia contributed negatively. During the half year, the sub-fund reduced its positions in China and added to South Korea and Taiwan, where good new investment opportunities were present. The sub-fund maintained its investment policy, which combines active country allocation and stock selection based on fundamental research and supported by quantitative models, while ESG factors are fully integrated into the investment process.

#### Robeco QI Emerging Markets Active Equities

The investment objective of the sub-fund is to outperform its index, the MSCI Emerging Markets Index, with the aid of a quantitative stock selection model. Using a combination of factors (value, quality, momentum and analyst revisions), the model identifies broad groups of stocks that are likely to outperform in the long run. The sub-fund's relative performance was positive over the reporting period. The value, quality, momentum and analyst revisions factors all made a positive contribution to the sub-fund's relative performance. The volatility of the sub-fund was in line with the volatility of the index, with a medium level of active risk. Sustainability, based on RobecoSAM Smart ESG scores, is integrated into the investment policy of the sub-fund. The portfolio-construction process is highly disciplined and ensures that the overall sustainability score of the portfolio is better than or equal to the overall sustainability score of the index.

#### Robeco QI Global Momentum Equities

The investment objective of the sub-fund is to outperform the MSCI All Country World Index by using a quantitative stock-selection model. The model identifies broad groups of stocks that have positive momentum characteristics, while at the same time taking valuation, quality and low-risk characteristics into account. The sub-fund outperformed the index in a highly volatile rising market. The momentum factor made a positive contribution to the relative performance of the sub-fund. Controlling for risk, quality and value made a positive contribution. The risk profile of the sub-fund, as measured by the volatility, was higher than that of the index. Sustainability, based on RobecoSAM Smart ESG scores, is integrated into the investment policy. These scores take ESG factors into account. The investment process is highly disciplined and ensures that the sub-fund's overall sustainability score is higher than or equal to the overall sustainability score of the index.

#### Robeco QI Global Developed Sustainable Enhanced Index Equities

The investment objective of the sub-fund is to outperform its index, the MSCI World Index, with the aid of a quantitative stock selection model. Using a combination of alpha factors (value, quality, momentum and analyst revisions) and sustainability factors, the model identifies broad groups of stocks that are likely to deliver sustainable market-like returns. The sub-fund's relative performance was positive. The alpha factors made a positive, and the sustainability factors a negative contribution to the sub-fund's relative performance. The volatility of the sub-fund was in line with the volatility of the index, with a low level of active risk. Sustainability, based on RobecoSAM Smart ESG scores, is integrated into the investment policy of the sub-fund. The sub-fund aims to achieve a 30% higher sustainability score and a 20% lower environmental footprint on four dimensions versus its index while excluding controversial companies.

#### Robeco QI Emerging Markets Enhanced Index Equities

The investment objective of the sub-fund is to outperform its index, the MSCI Emerging Markets Index, with the aid of a quantitative stock selection model. Using a combination of factors (value, quality, momentum and analyst revisions), the model identifies broad groups of stocks that are likely to outperform in the long run. The sub-fund's relative performance was positive. The value, momentum, quality and analyst revisions factors made a positive contribution to the sub-fund's relative performance. The volatility of the sub-fund was in line with the volatility of the index, with a low level of active risk. Sustainability, based on RobecoSAM Smart ESG scores, is integrated into the investment policy of the sub-fund. The portfolio construction process is highly disciplined and ensures that the overall sustainability score of the portfolio is better than or equal to the overall sustainability score of the index.

#### Robeco QI Emerging Conservative Equities

The principal objective of the sub-fund is to achieve a high Sharpe ratio (i.e. an optimal relationship between absolute return and absolute risk). Using a combination of factors (low risk, value, and momentum), the model identifies broad groups of stocks that are likely to outperform on a risk-adjusted basis. The sub-fund outperformed its index in the first half of 2021. The low risk, momentum and value factors made a positive contribution to the relative performance. The risk profile of the sub-fund, as measured by the volatility, was lower than that of the index.

Sustainability, based on RobecoSAM Smart ESG scores, is integrated into the investment policy. These scores take ESG factors into account. The investment process is highly disciplined and ensures that the sub-fund's overall sustainability score is higher than or equal to the overall sustainability score of the index.

#### Robeco Emerging Markets Smaller Companies Equities

In the first half of 2021, emerging equity markets closed the period in positive territory from a return perspective. The sub-fund underperformed its reference index (MSCI EM Midcap Index), driven by stock selection. The contribution from country allocation was positive, driven by the overweight in China and Taiwan and the underweights in Turkey and Malaysia. Stock selection was particularly weak in Taiwan and India. During the first half of the year, the sub-fund decreased its weight in South Korea, China and South Africa, while increasing its position in Brazil, Vietnam and Greece. The sub-fund maintained its investment policy, which combines active country allocation, stock selection based on fundamental research and supported by quantitative models, and the inclusion of ESG factors. The team assesses shareholder, board, management, government and environmental factors, and input from RobecoSAM sustainable investing research analysts is used for further ESG integration into the investment process.

#### Robeco QI Global Value Equities

The investment objective of the sub-fund is to outperform the MSCI All Country World Index by using a quantitative stock-selection model. The model identifies broad groups of stocks that have positive value characteristics, while at the same time taking momentum, quality and low-risk characteristics into account. The sub-fund outperformed the index in the first half of 2021. The value factor was the main positive contributor to the relative performance of the sub-fund. Controlling for low risk, quality and momentum made a positive contribution. The risk profile of the sub-fund, as measured by the volatility, was higher than that of the index.

Sustainability, based on RobecoSAM Smart ESG scores, is integrated into the investment policy. These RobecoSAM Smart ESG scores take ESG factors into account. The portfolio construction process is highly disciplined and ensures that the overall sustainability score of the portfolio is better than or equal to the overall sustainability score of the index.

#### Robeco QI Global Developed Multi-Factor Equities

The investment objective of the sub-fund is to outperform the MSCI World Index by using a quantitative stock selection model. The strategy allocates to subsets of companies that have positive value, momentum, quality and low-risk characteristics.

The sub-fund outperformed the index in the first half of 2021. The value portfolio was the main positive contributor to the relative performance, and the momentum, quality and low-risk portfolios also contributed positively. The risk profile of the sub-fund, as measured by the volatility, was higher than that of the index.

Sustainability, based on RobecoSAM Smart ESG scores, is integrated into the investment policy. These RobecoSAM Smart ESG scores take ESG factors into account. The portfolio construction process is highly disciplined and ensures that the overall sustainability score of the portfolio is better than or equal to the overall sustainability score of the index.

#### Robeco QI Global Developed Conservative Equities ex Japan

The principal objective of the sub-fund is to achieve a high Sharpe ratio (i.e. an optimal relationship between absolute return and absolute risk). Using a combination of factors (low risk, value and momentum), the model identifies broad groups of stocks that are likely to outperform on a risk-adjusted basis. The sub-fund underperformed its index in the first half year of 2021. The low risk and momentum factors contributed negatively to the relative performance. The value factor made a positive contribution to the relative performance. The risk profile of the sub-fund, as measured by the volatility, was lower than that of the index. Sustainability, based on RobecoSAM Smart ESG scores, is integrated into the investment policy. These scores take ESG factors into account. The investment process is highly disciplined and ensures that the sub-fund's overall sustainability score is higher than or equal to the overall sustainability score of the index.

### Performance analysis (continued)

#### **Robeco QI Emerging Markets Sustainable Active Equities**

The investment objective of the sub-fund is to outperform its index, the MSCI Emerging Markets Index, with the aid of a quantitative stock selection model. Using a combination of factors (value, quality, momentum and analyst revisions), the model identifies broad groups of stocks that are likely to outperform in the long run. The sub-fund's relative performance was positive over the reporting period. The value, momentum, and analyst revisions factors made a positive contribution to sub-fund's relative performance and the quality factor made a negative contribution. The volatility of the sub-fund was in line with the volatility of the index, with a medium level of active risk. Sustainability, based on RobecoSAM Smart ESG scores, is integrated into the investment policy of the sub-fund. The sub-fund aims to achieve a 20% higher sustainability score and a 20% lower environmental footprint on four dimensions versus its index while excluding controversial companies.

#### **Robeco QI Global Developed Conservative Equities**

The principal objective of the sub-fund is to achieve a high Sharpe ratio (i.e. an optimal relationship between absolute return and absolute risk). Using a combination of factors (low risk, value and momentum), the model identifies broad groups of stocks that are likely to outperform on a risk-adjusted basis. The sub-fund underperformed the index in the first six months of 2021. The low risk and momentum factors contributed negatively to the relative performance, and the value factor positively. The risk profile of the sub-fund, as measured by the volatility, was lower than that of the index.

Sustainability, based on RobecoSAM Smart ESG scores, is integrated into the investment policy. These scores take ESG factors into account. The investment process is highly disciplined and ensures that the sub-fund's overall sustainability score is higher than or equal to the overall sustainability score of the index.

#### **Robeco QI Global Developed Active Equities**

The investment objective of the sub-fund is to outperform its index, the MSCI World Index, with the aid of a quantitative stock selection model. Using a combination of factors (value, quality, momentum and analyst revisions), the model identifies broad groups of stocks that are likely to outperform in the long run. The sub-fund's relative performance was positive over the reporting period. The value, quality, momentum and analyst revisions factors made a positive contribution to the sub-fund's relative performance. The volatility of the sub-fund was in line with the volatility of the index, with a medium level of active risk. Sustainability, based on RobecoSAM Smart ESG scores, is integrated into the investment policy of the sub-fund. The portfolio construction process is highly disciplined and ensures that the overall sustainability score of the portfolio is better than or equal to the overall sustainability score of the index.

#### **Robeco QI Customized Emerging Markets Enhanced Index Equities I**

The investment objective of the sub-fund is to outperform its index, the MSCI Emerging Markets Index, with the aid of a quantitative stock selection model. Using a combination of factors (value, quality, momentum and analyst revisions), the model identifies broad groups of stocks that are likely to outperform in the long run. The sub-fund's relative performance was positive. The value and analyst revisions factors made a positive contribution to the sub-fund's relative performance, while the quality and momentum factors made a neutral contribution. The volatility of the sub-fund was in line with the volatility of the index, with a low level of active risk. Sustainability, based on RobecoSAM Smart ESG scores, is integrated into the investment policy of the sub-fund. The portfolio construction process is highly disciplined and ensures that the overall sustainability score of the portfolio is better than or equal to the overall sustainability score of the index.

#### **Robeco QI Global Quality Equities**

The investment objective of the sub-fund is to outperform the MSCI All Country World Index by using a quantitative stock-selection model. The model identifies broad groups of stocks that have positive quality characteristics, while at the same time taking valuation and momentum characteristics into account. The sub-fund outperformed its index in the first half of 2021. The value, risk, quality and momentum factors contributed positively to the relative performance. The risk profile of the sub-fund, as measured by the volatility, was higher than that of the index.

Sustainability, based on RobecoSAM Smart ESG scores, is integrated into the investment policy. These RobecoSAM Smart ESG scores take ESG factors into account. The portfolio construction process is highly disciplined and ensures that the overall sustainability score of the portfolio is better than or equal to the overall sustainability score of the index.

### Performance analysis (continued)

#### **Robeco QI Global Developed Enhanced Index Equities**

The investment objective of the sub-fund is to outperform its index, the MSCI World Index, with the aid of a quantitative stock selection model. Using a combination of factors (value, quality, momentum and analyst revisions), the model identifies broad groups of stocks that are likely to outperform in the long run. The sub-fund's relative performance was positive. The value and analyst revisions factors made a positive contribution to the sub-fund's relative performance, while the quality and momentum factors made a neutral contribution. The volatility of the sub-fund was in line with the volatility of the index, with a low level of active risk. Sustainability, based on RobecoSAM Smart ESG scores, is integrated into the investment policy of the sub-fund. The portfolio construction process is highly disciplined and ensures that the overall sustainability score of the portfolio is better than or equal to the overall sustainability score of the index.

#### **Robeco Sustainable Emerging Stars Equities**

In the first half of 2021, emerging equity markets rose by 10.9% in euros, yet lagged developed markets. The sub-fund performed in line with the MSCI Emerging Markets Index. Key positive contributions came from a relatively low weight in China and from the positions in Hungary. Stock selection in China and India and having no position in Saudi Arabia contributed negatively. During the half year, the sub-fund added to South Korea, and bought new positions in Greece and in two companies that are well-positioned to support growth in electric vehicles.

The sub-fund follows the same investment process and philosophy as the Emerging Stars Fund, yet has a significantly better sustainability profile. It excludes companies that score poorly on several dimensions of sustainability and selects more sustainable companies instead. As a consequence, the sub-fund has a significantly lower environmental impact than the MSCI Emerging Markets Index and significantly higher sustainability ratings.

#### **Robeco QI Emerging Markets Sustainable Enhanced Index Equities**

The investment objective of the sub-fund is to outperform its index, the MSCI Emerging Markets Index, with the aid of a quantitative stock selection model. Using a combination of factors (value, quality, momentum and analyst revisions), the model identifies broad groups of stocks that are likely to outperform in the long run. The sub-fund's relative performance was positive. The value, momentum and analyst revisions factors made a positive contribution to the sub-fund's relative performance and the quality factor made a negative contribution. The volatility of the sub-fund was in line with the volatility of the index, with a low level of active risk.

Sustainability, based on RobecoSAM Smart ESG scores, is integrated into the investment policy of the sub-fund. The sub-fund aims to achieve a 20% higher sustainability score and a 20% lower environmental footprint on four dimensions versus its index while excluding controversial companies.

#### **Robeco QI Global Sustainable Conservative Equities**

The principal objective of the sub-fund is to achieve a high Sharpe ratio (i.e. an optimal relationship between absolute return and absolute risk). Using a combination of factors (low risk, value, and momentum), the model identifies broad groups of stocks that are likely to outperform on a risk-adjusted basis. The sub-fund performed in line with its index in the first half year of 2021. The low risk factor contributed negatively and the value and momentum factors made a positive contribution to the relative performance. The risk profile of the sub-fund, as measured by the volatility, was lower than that of the index. Sustainability, based on RobecoSAM Smart ESG scores, is integrated into the investment policy. These scores take ESG factors into account. The investment process is highly disciplined and ensures that the sub-fund's overall sustainability score is higher than or equal to the overall sustainability score of the index.

#### **RobecoSAM Global Gender Equality Impact Equities**

The sub-fund returned positively in absolute terms, but underperformed relative to the MSCI World Index. The strategy has a lower volatility and beta than the index. The sub-fund focuses on companies' quality aspects such as balance sheet strength, profitability and returns. Stock selection is a function of a bottom-up process which focuses on companies' quality of business, valuation and gender equality performance. High conviction names in the healthcare and materials sectors yielded the largest positive contributors to relative return. Not having any exposure to the energy sector and stock selection in industrials and communication services had a negative effect on relative returns. The sub-fund exhibits a higher gender equality performance in terms of female representations at the workforce and a lower environment footprint versus MSCI World Index.

## Global Equity sub-funds (continued)

### Performance analysis (continued)

#### **RobecoSAM Global SDG Equities**

The sub-fund underperformed its index, the MSCI World Index, by roughly 5% during the reporting period. The underperformance mainly stemmed from an underweight in cyclical value companies in energy, materials and financials that benefited from a very supportive macroeconomic environment. Having no exposure to the big US technology and internet companies that continued to perform strongly detracted additional performance. These companies do not qualify for the strategy. On the positive side, the overweight in pharmaceutical, analytics & testing and the healthy food companies added value. The portfolio construction aims for a broad global and sectorial diversification to limit the fund's risk (volatility) and reduce drawdown in market corrections. The sub-fund follows a fundamental investment process, investing in a concentrated portfolio of companies that receive a superior rating with Robeco's proprietary SDG research framework. All holdings contribute positively to the achievement of the SDGs.

### Performance analysis

#### Robeco Asia-Pacific Equities

After a strong start in January and early February, Asia-Pacific markets mainly moved sideways from March to June. The region lagged global markets due mostly to a correction in Chinese stocks. The best markets were Taiwan and Australia and ample opportunities were found in Japan. The sub-fund performed 5.9% better (gross of fees in EUR) than its index, the MSCI AC Asia Pacific Index. Fund beta stayed close to 1, while tracking error crept up towards 5%. The sub-fund benefited from the markets' rotation towards more value after an excessive adverse move against value stocks in the year 2020. A general rise in interest rates supported this rotation. Earnings for large listed companies recovered very quickly as demand for goods came back. Stock picks from Japan and China contributed most to the strong relative result. Corporate engagement resulted in positive results for some holdings in Japan. While ESG factors are fully integrated in the investment process, the corporate engagement resulted in positive results for some holdings in Japan.

#### Robeco Sustainable European Stars Equities

The sub-fund underperformed the MSCI Europe Index over the performance period by around 2.8% (gross of fees, in euros). Selection effects contributed to the underperformance, while the effect from sector allocation was slightly positive. Stock selection in the communication services and real estate sectors was positive, while consumer staples and materials yielded the largest negative contributions. The position in BT Group posted strong gains, while the position in Fuchs Petrolub detracted from performance. The strong performance of large polluters in the metals and mining and construction materials industries presented a heavy headwind to stock picking in the materials sector. Specialty chemical companies with strong ESG credentials such as Croda International or DSM, which the sub-fund holds, generated materially lower returns. Despite a high active share of around 80%, the sub-fund's risk was lower compared to the index. The tracking error remained around 4%. While ESG factors are fully integrated in the investment process, the strategy also seeks to improve the environmental footprint versus the index.

#### Robeco QI European Conservative Equities

The principal objective of the sub-fund is to achieve a high Sharpe ratio (i.e. an optimal relationship between absolute return and absolute risk). Using a combination of factors (low risk, value and momentum), the model identifies broad groups of stocks that are likely to outperform on a risk-adjusted basis. The sub-fund underperformed the index in the first half of 2021. The low risk factor made a negative contribution to the relative performance and the value factor and momentum factors contributed positively. The risk profile of the sub-fund, as measured by the volatility, was lower than that of the index. Sustainability, based on RobecoSAM Smart ESG scores, is integrated into the investment policy. These scores take ESG factors into account. The investment process is highly disciplined and ensures that the sub-fund's overall sustainability score is higher than or equal to the overall sustainability score of the index.

# Report of the Board of Directors (continued)

## Regional & Country Equity sub-funds (continued)

### Performance analysis (continued)

#### Robeco QI US Conservative Equities

The principal objective of the sub-fund is to achieve a high Sharpe ratio (i.e. an optimal relationship between absolute return and absolute risk). Using a combination of factors (low risk, value and momentum), the model identifies broad groups of stocks that are likely to outperform on a risk-adjusted basis. The sub-fund underperformed the index in the first half of 2021. The low risk and momentum factors contributed negatively to the relative performance and the value factor made a positive contribution. The risk profile of the sub-fund, as measured by the volatility, was lower than that of the index. Sustainability, based on RobecoSAM Smart ESG scores, is integrated into the investment policy. These scores take ESG factors into account. The investment process is highly disciplined and ensures that the sub-fund's overall sustainability score is higher than or equal to the overall sustainability score of the index.

#### Robeco BP US Premium Equities

The sub-fund outperformed the index in the first half of 2021, with markets moving higher on the back of a reopening economy and cyclical stocks expected to do well. The sub-fund saw performance driven by consumer discretionary, consumer staples, communication services and utilities. The sub-fund added value through stock picking and sector allocation. Only healthcare detracted notably, with the sector lagging market returns. Energy stocks performed best, recovering from the volatile 2020 period, and the sub-fund has done well in this area.

#### Robeco Chinese Equities

The Chinese equities market showed volatile performance in the first half of 2021. The sub-fund outperformed the MSCI China Index driven by positive stock selections in the consumer discretionary, communication services and utilities sectors. A sudden spike in the US 10-year treasury yield led to a violent style rotation from growth to value in the global equity markets; China is a growth market and suffered as a result. Domestically, the policies also shifted from pro-growth to tightening, as the global economy started to normalize in a V-shaped recovery. Credit tightening coupled with harsh policies on various industries (internet, education, property) added to the volatility in the China equity markets. The sub-fund focused on near-term earnings visibility; we reduced companies with deteriorating earnings outlook and added to those with earnings improving as the economy normalizes. The sub-fund has fully integrated ESG into the investment process and maintained a better-than-index Sustainability risk score and RobecoSAM Smart ESG score.

#### Robeco Chinese A-share Equities

The China A-shares market went through a very volatile period in the first half of 2021. Supported by strong liquidity from local mutual fund subscriptions, the year started with a strong rally in the first month leading towards the Chinese New Year, but saw a big correction immediately afterwards, due to rising concerns about potentially accelerated Fed tapering. The market recovered gradually in Q2 on the back of resilient earnings results. The sub-fund's strategy outperformed the index with an underweight in financials and an overweight in the EV supply chain and solar industry. The focus on themes such as industrial upgrade, and technology and innovation worked well. In particular, our positions that benefited from the structural growth supported by China's carbon neutrality push performed well. ESG integration is fully incorporated into the investment process and the sub-fund achieved a better overall ESG risk score than the reference index.

#### Robeco QI Chinese A-share Active Equities

The investment objective of the sub-fund is to outperform its index, the MSCI China A International Index, with the aid of a quantitative stock selection model. Using a combination of factors (value, quality, momentum and analyst revisions), the model identifies broad groups of stocks that are likely to outperform in the long run. The sub-fund's relative performance was positive over the reporting period. The value, quality, momentum and analyst revision factors made a positive contribution to the sub-fund's relative performance. The volatility of the sub-fund was in line with the volatility of the index with a medium level of active risk. Sustainability, based on RobecoSAM Smart ESG scores, is integrated into the investment policy of the sub-fund. The portfolio construction process is highly disciplined and ensures that the overall sustainability score of the portfolio is better than or equal to the overall sustainability score of the index.

#### Robeco QI US Enhanced Index Equities

The investment objective of the sub-fund is to outperform its index, the S&P 500 Index, with the aid of a quantitative stock selection model. Using a combination of factors (value, quality, momentum and analyst revisions), the model identifies broad groups of stocks that are likely to outperform in the long run. The sub-fund's relative performance was positive. The value, quality and momentum factors made a positive contribution to the sub-fund's relative performance, while the analyst revisions factor made a negative contribution. The volatility of the sub-fund was in line with the volatility of the index, with a low level of active risk. Sustainability, based on RobecoSAM Smart ESG scores, is integrated into the investment policy. The portfolio construction process is highly disciplined and ensures that the overall sustainability score of the portfolio is better than or equal to the overall sustainability score of the index.

# Report of the Board of Directors (continued)

## Regional & Country Equity sub-funds (continued)

### Performance analysis (continued)

#### Robeco QI European Enhanced Index Equities

The investment objective of the sub-fund is to outperform its index, the MSCI Europe Index, with the aid of a quantitative stock selection model. Using a combination of factors (value, quality, momentum and analyst revisions) the model identifies broad groups of stocks that are likely to outperform in the long run. The sub-fund's relative performance was positive. The value, momentum, and analyst revisions factors made a positive contribution to the sub-fund's relative performance and the quality factor made a negative contribution. The quality factor performed in line with the index. Sustainability, based on RobecoSAM Smart ESG scores, is integrated into the investment policy of the sub-fund. The volatility of the sub-fund was in line with the volatility of the index, with a low level of active risk. The portfolio construction process is highly disciplined and ensures that the overall sustainability score of the portfolio is better than or equal to the overall sustainability score of the index.

#### Robeco Indian Equities

Indian equity markets rose strongly in the first half of 2021 even in the face of a second wave of Covid-related lockdowns in April and May. After a few years of weak earnings, the corporate earnings of large companies started to grow in 2020 and strong growth is also in the forecast for 2021 and beyond. The sub-fund outperformed its index (MSCI India Index) by 7.8%. The strong relative return came mostly from the technology and financial sectors. The beta of the sub-fund rose over the reporting period from 0.95 to 1.05 and the tracking error climbed from 5% to about 7%. The Indian rupee was quite volatile around the pandemic news, but only depreciated by 2% versus the US dollar over the reporting period.

#### Robeco Asian Stars Equities

After a strong start, Asian markets mainly moved sideways from March to June. The region lagged global markets, due mostly to a correction in Chinese stocks from mid-February. The best markets were Vietnam and Taiwan on their strong earnings outlook, while most of the ASEAN markets lagged behind on recurrence of Covid-related lockdowns. Strong stock selection in China, Taiwan and South Korea resulted in a return for the sub-fund that exceeded the reference index (MSCI AC Asia ex Japan) by 6.2% (gross of fees in EUR). The sub-fund's high conviction management style was maintained with around 40 holdings and VaR just above 100%. Technology stocks contributed most to the strong relative returns, but the sector weight over the reporting period was cut. The sub-fund with its strong value focus also received a tailwind from the rotation towards value stocks after it suffered a strong headwind in 2019 and 2020. The sub-fund intensified engagement with some of its holdings in China and South Korea. While ESG factors are fully integrated in the investment process, the sub-fund intensified engagement with some of its holdings in China and South Korea.

#### Robeco Sustainable Asian Stars Equities

In the first quarter of 2021, the sub-fund showed strong absolute (+10.7%) and relative (+3.8%) performance driven by stock selection, especially a few of our sustainability thematic stocks with good value such as KB Financial, Weichai Power and Hyundai Mobis. That added up to an absolute return of +47.9% since inception of the sub-fund in April 2020 and a relative performance of +1.1%. In the second quarter, the growth momentum trade returned to Asian markets, while interest rate-sensitive stocks corrected as the Fed upheld its dovish stance despite rising inflation. The sustainability thematic stocks in the region exhibited high volatility, as structural positives met with near-term uncertainties. For the first half of 2021, the sub-fund returned 10.4% absolute return and +0.7% relative performance (gross of fees in EUR), while maintaining a better overall ESG profile and significantly lower environmental footprint compared to the index. The portfolio managers continue to find exciting ideas with good value and momentum that benefit from the powerful sustainability transformation happening in Asia across various sectors and industries. In an effort to gain a better understanding of water emissions at Asian semiconductor companies, the investment team conducted a comprehensive research project and engaged with portfolio companies on their water strategy.

#### Robeco BP US Large Cap Equities

The sub-fund outperformed the index in the first half of 2021, as markets moved higher on the back of a reopening US economy. The sub-fund added value in a variety of sectors, through both stock picking and sector allocation. Technology, communication services and industrials were best from a stock selection standpoint, with exposures aimed towards low valuation stocks that have recovered and did not participate in the growth focus of 2020. Remaining underweight utilities and staples also helped returns, with defensive sectors lagging in a pro-cyclical environment.

# Report of the Board of Directors (continued)

## Regional & Country Equity sub-funds (continued)

### Performance analysis (continued)

#### **Robeco BP US Select Opportunities Equities**

The sub-fund performed in line with the index in the first half of the year, with markets moving higher on the back of a reopening economy. The sub-fund added value through both stock picking and sector allocation, driven by a multitude of sectors led by technology, healthcare, consumer staples and utilities. Only finance and consumer discretionary had a negative impact over the six-month period. The sub-fund continues to find new investment opportunities across a variety of areas with wide valuation spreads still present in the market.

#### **Robeco QI Continental European Conservative Equities**

The principal objective of the sub-fund is to achieve a high Sharpe ratio (i.e. an optimal relationship between absolute return and absolute risk). Using a combination of factors (low risk, value and momentum), the model identifies broad groups of stocks that are likely to outperform on a risk-adjusted basis. The sub-fund underperformed its index in the first half year of 2021. The low risk and momentum factors made a negative contribution to the relative performance and the value factor contributed positively. The risk profile of the sub-fund, as measured by the volatility, was lower than that of the index. Sustainability, based on RobecoSAM Smart ESG scores, is integrated into the investment policy. These scores take ESG factors into account. The investment process is highly disciplined and ensures that the sub-fund's overall sustainability score is higher than or equal to the overall sustainability score of the index.

#### **Robeco QI European Value Equities**

The investment objective of the sub-fund is to outperform the MSCI Europe Index by using a quantitative stock-selection model. The model identifies broad groups of stocks that have positive value characteristics, while at the same time taking momentum, quality and low-risk characteristics into account. The sub-fund outperformed the index in the first half of 2021. The value factor was the main positive contributor to the relative performance of the sub-fund. The low risk, momentum and quality factors also made a positive contribution. The risk profile of the sub-fund, as measured by the volatility, was higher than that of the index. Sustainability, based on RobecoSAM Smart ESG scores, is integrated into the investment policy. These RobecoSAM scores take ESG factors into account. The portfolio-construction process is highly disciplined and ensures that the overall sustainability score of the portfolio is better than or equal to the overall sustainability score of the index.

#### **Robeco QI Chinese A-share Conservative Equities**

The principal objective of the sub-fund is to achieve a high Sharpe ratio (i.e. an optimal relationship between absolute return and absolute risk). Using a combination of factors (low risk, value and momentum), the model identifies broad groups of stocks that are likely to outperform on a risk-adjusted basis. The sub-fund outperformed its index the first half year of 2021. The low risk factor contributed negatively to the relative performance and the value and momentum factors made a positive contribution. The risk profile of the sub-fund, as measured by the volatility, was lower than that of the index. Sustainability, based on RobecoSAM Smart ESG scores, is integrated into the investment policy. These scores take ESG factors into account. The investment process is highly disciplined and ensures that the sub-fund's overall sustainability score is higher than or equal to the overall sustainability score of the index.

### Performance analysis

#### Robeco New World Financials

The sub-fund underperformed the index during the reporting period. All three trends contributed negatively to performance, with digital finance making the worst contribution. With the shift from growth to value and higher multiple tech investments struggling, the relative performance was not surprising. On an industry level especially, the banks showed a tremendous rebound, with lower-quality banks outperforming. Long-term interest rates are out of sync with rising inflation expectations. Many emerging markets have struggled year-to-date. Fund investments are contributing positively to financial inclusion, while digitization continues strongly in 2021. Attention for ESG investing and carbon footprints has increased substantially, including active discussions on digital currencies. The 10% lowest-ranked financials are excluded from the investable universe using Sustainalytics data. However, in reality the fund mostly invests in the better-ranked financials, while actively engaging with all investments to improve their ESG performance and carbon footprints. Carbon footprint reduction by active management is preferred to simply selling loan portfolios.

#### Robeco Sustainable Property Equities

The global pandemic and the speed of vaccination programs had a significant effect on the performance of the real estate sector. Performance dispersion was notable in terms of both subsector and regional performance, with the US and retail REITs outperforming the broader market. The pandemic accelerated structural trends that support fundamentals in the e-commerce logistics and datacenter sectors. The sub-fund outperformed the index, driven by stock selection across all regions except for Asia. Performance was mainly driven by a significant contribution from stock selection within the Prime Retail and Prime Office trend portfolios. Fundamentals in the commercial real estate sector will be dependent on the reopening of economies globally and the lasting impact Covid-19 will have on corporate and consumer behavior. The sub-fund integrates ESG factors (RobecoSAM, Sustainalytics, GRESB) into its investment process and actively monitors and engages companies on GHG emissions. Based on these data, the sub-fund has an above-average ESG score.

#### Robeco Global Consumer Trends

The sub-fund generated a positive return during the reporting period but underperformed the MSCI All Countries World Index. Global markets performed strongly due to the reopening, as vaccination programs got underway globally. Employees started to return to the office, and shops and restaurants were ready to receive customers again. Cyclical value stocks from energy to financials did relatively well as investors took profits in last year's winners. The Health and Wellbeing trend was the worst-performing trend during the reporting period, as defensive consumer staples firms lagged on concerns about rising interest rates and input cost inflation. Emerging markets exposure contributed negatively, as increased regulatory scrutiny of Chinese technology firms pressured valuations. The Digital Transformation of Consumption trend made a small negative contribution. With regard to sustainable investing, the sub-fund has integrated ESG factors into its investment process and Robeco specifically engaged with portfolio companies in the video gaming space on social risks like addiction.

### Performance analysis (continued)

#### Robeco MegaTrends

The sub-fund generated a return of 13.1% (measured in euros, gross of fees) over the first half of 2021. Largely due to a distinct rotation away from so-called growth into value stocks and a regulatory crackdown in China that negatively affected our Chinese holdings, our growth-oriented strategy lagged the MSCI AC World Index (+15.9%, measured in euros). Of the four trends, Connected Enterprise and Healthy Aging clearly outpaced the index, but Digital World and especially Emerging Middle Class lagged substantially. The sub-fund's performance over longer periods is still significantly above index. Ashtead Group, Alphabet and PayPal contributed most to performance, while New Oriental Education, StoneCo and Alibaba Health Information detracted most. With respect to sustainable investing, the sub-fund uses insights from both RobecoSAM and Sustainalytics in its investment process, with a particular focus on governance and human rights risks. Robeco is currently actively engaging with eighteen of our holdings on these issues.

#### Robeco Digital Innovations

In one of the best half-year results in a long time, the sub-fund has generated a return of 15.5% (measured in euros, gross of fees) over the first half of 2021. Despite a distinct rotation away from so-called growth into value stocks, our growth-oriented strategy only slightly lagged the MSCI AC World Index (+15.9%, measured in euros). Of the three trends, Digital Enablers and Secure Digital Infrastructure managed to outpace the index, while Robotics & Automation could not keep up. The sub-fund's performance over longer periods is still significantly above index. Fortinet, Zebra Technologies and Capgemini contributed most to performance, while Daifuku, Keyence and CyberArk detracted most. With respect to sustainable investing, the sub-fund uses insights from both RobecoSAM and Sustainalytics in its investment process, with a particular focus on governance and human rights. Robeco is currently actively engaging with four of its holdings on these issues.

#### Robeco FinTech

The sub-fund saw a lower return than the index during the reporting period. The 'enablers' and 'winners' categories contributed negatively to performance, while the 'challengers' category made a strong positive contribution. On an industry level, consumer finance made the strongest positive contribution, while IT services and software were the biggest performance detractors. IT services includes mostly investments in payment companies, which struggled to perform even as economies reopened and earnings expectations were being upgraded. With the shift from growth to value and higher multiple tech investments struggling, the relative performance was not surprising. Attention for ESG investing and carbon footprints has increased substantially, including active discussions on digital currencies, which are of significant importance for every fintech fund. Many of the sub-fund's investments help to improve financial inclusion, especially as digitization will continue strongly this year. ESG factors are included in the analysis of fund investments. Robeco will also actively engage with companies in which the sub-fund invests in 2021.

#### RobecoSAM Circular Economy Equities

The secular growth opportunities stemming from the transition to the circular economy have not only withstood the current pandemic crisis, but were well-positioned to have a head start in the economic recovery during the reporting period as political initiatives such as the European Green Deal and the US infrastructure spending plan created demand for sustainable and circular solutions. The Circular Economy strategy recorded a high-teens positive return in the reporting period, outperforming the MSCI World Index. Many holdings in the Circular Economy strategy enjoyed some tailwind from the extraordinarily high growth in the construction sector and by the solid recovery of the industrial sector. On an individual stock level, Valmet, the provider of machinery and services for the pulp, paper and energy industries, and the LED lighting solutions provider Signify performed best and are good illustrations for the high demand for solutions to make the economy more resource-efficient.

#### RobecoSAM Smart Energy Equities

Following a very strong year 2020, the strategy slightly underperformed the broader indices such as the MSCI World in the first half of 2021. The companies in the energy efficiency investment cluster contributed particularly strong performance, with all the four subclusters industrial processes, transportation, buildings and big data contributing positively. In addition, the performance from the energy management cluster was also very positive. On an individual stock level, the 'energy efficiency of big data' player Marvell Technology made the strongest contribution to performance, followed by the building efficiency company Johnson Controls. The hydrogen fuel cells company Plug Power also contributed positively, as the sub-fund's management locked in profits, selling the whole position during the Jan/Feb 2021 time frame. The list of negative performance contributors was more limited, with notably Nio, Ballard Power and Azbil showing a negative performance.

## Theme Equity sub-funds (continued)

### Performance analysis (continued)

#### RobecoSAM Smart Materials Equities

The sub-fund outperformed its index, the MSCI World Index TRN, during the reporting period. Strong contributions came from the new subcluster efficient building materials which benefited from companies such as Rockwool and Saint Gobain. Recycling and disposal was also doing well, with Renewi raising its recycling rates even higher. Also, lightweight aluminum companies such as Kaiser Aluminum and carbon fiber specialist Hexcel were able to grow nicely. Smart manufacturing was slightly below average with some headwinds in 3D printing but strength in lasers with the takeover bid for Coherent. In circular systems, steel dust recycler Befesa continued strong on rising zinc prices and its expansion strategy to North America. With regard to sustainable investing, ESG criteria for exclusions and theme-specific suitability are applied during universe construction. The strategy furthermore deploys proprietary ESG data and research throughout the investment process.

#### RobecoSAM Smart Mobility Equities

Following the very strong return of the last years, the strategy could again report absolute performance gains in the first half of 2021, whilst slightly underperforming the broader indices such as the MSCI World Index.

The secular growth trends underlying the Smart Mobility strategy maintained their momentum in the first half of 2021, with Europe remaining the strongest driver for EV sales, followed by China. It still appears within reach of global EV sales to double in 2021, even though component shortages impacted vehicle sales in the first half of the year.

On an individual stock level, the connectivity and electric powertrain companies NXP Semiconductor and ON Semiconductor showed the strongest performance, both benefiting from the tight supply situation. The hydrogen player Plug Power also contributed positively, as the sub-fund's management took profits during the January/February 2021 time frame. The list of negative contributors was led by the electric step van developer Workhorse, followed by Nio and TDK.

#### RobecoSAM Sustainable Healthy Living Equities

The pandemic brought issues around health and lifestyle to the attention of the broad public with increased urgency. This continued as the pandemic abated in the reporting period, when some of the healthier consumer choices proved permanent.

The Healthy Living strategy recorded a very solid double digit positive performance. It lagged the broad MSCI World Index only slightly, despite an overrepresentation of the underperforming healthcare, consumer staples and consumer discretionary sectors. The portfolio benefited mainly from the reopening of the hospitality sectors, general demand from economic normalization, the reopening of sportswear brick and mortar shops and the ability of hospitals to perform elective surgeries. Thus, sportswear holdings, salmon farming and medical technology stocks performed strongly. In addition, the holdings in diagnostics and life science analytics companies continued their strong performance streak.

#### RobecoSAM Sustainable Water Equities

The RobecoSAM Sustainable Water Equities Fund outperformed the MSCI World Index again in H1 2021. All four water investment clusters showed absolute positive performance. Capital goods & chemicals and construction & materials further benefited from the economic rebound after Covid-19. Within quality & analytics, the subclusters water analytics and resource protection showed equally positive returns. Water utilities as a group also performed positively, though not as strongly as the rest of the water investments.

### Performance analysis

#### Robeco High Yield Bonds

The sub-fund achieved a gross total return of 3.1% (US dollar hedged), underperforming its index, the Bloomberg Barclays US Corporate HY & Pan European HY ex Financials 2.5% Issuer Cap (hedged into US dollars), by 0.6%. The main driver behind this underperformance was the conservative beta positioning in a period where credit spreads continued to tighten to levels equivalent to the historic tightness for the asset class. In this strong market environment, the riskiest rating classes performed best, which was also detrimental to the relative performance, since the sub-fund was overweight the safer BB-rated companies at the expense of the riskier CCC-basket. Also, due to rising prices for commodities such as oil, the energy and metals & mining sector outperformed, sectors the sub-fund was underweight.

With respect to sustainable investing, the sub-fund has integrated ESG factors into the investment process. The prime goal of integrating ESG factors into the analysis is to strengthen the ability to assess the downside risk of the credit investments. RobecoSAM sustainability data and external sources are used to make an ESG assessment as part of the fundamental analysis.

#### Robeco Emerging Credits

The sub-fund posted a gross return of +1.5% hedged in US dollars in 2020, outperforming the JP Morgan Corporate EMBI Index (US dollar hedged) by 0.2%. The outperformance was the result of issuer selection, while the contribution from beta management was zero. The sub-fund started the year with a neutral position. Valuations in emerging markets are slightly more attractive than developed markets. With commodity prices moving up, many emerging markets are expected to benefit despite the headwinds from Covid-19. The sub-fund was overweight in the energy and commodity sectors, which outperformed. The sub-fund was underweight in Asian agency issuers such as Chinese asset management companies. This sector underperformed due to the issues at Huarong. ESG factors are taken into account when assessing the sub-fundamental credit quality of individual issuers.

#### Robeco Global Credits

The sub-fund posted a gross return of -1.0% hedged in euros in the first half of 2021, outperforming the Bloomberg Barclays Global Aggregate Corporates (euro hedged) by +0.3%. The outperformance was the result of issuer selection, while beta management detracted from performance. The sub-fund started the year with a cautious position based on tight valuation. That position has been maintained since and increased the underweight as spreads ground tighter. The sub-fund has been able to compensate for the underperformance from beta management with issuer selection. The energy sector, airlines and cruise liners have been among the best performers in the last six months. The overweight in several energy issuers and cruise liners was maintained. There is no exposure to airlines, as they are considered too risky. ESG factors are taken into account when assessing the sub-fundamental credit quality of individual issuers.

# Report of the Board of Directors (continued)

## Global Bond sub-funds (continued)

### Performance analysis (continued)

#### Robeco QI Dynamic High Yield

The sub-fund's return of 3.7% outperformed the 2.9% return of the Bloomberg Barclays Global High Yield Corporate Index, euro hedged, in the first half of 2021. The sub-fund's exposure to high yield is through liquid high yield credit default swap (CDS) indices on top of a portfolio of liquid government bonds. The position in CDS indices is based on a quantitative model: the position is increased by 50% to 150% when the model is positive and vice versa when negative. The sub-fund started the year with an overweight position and kept the overweight position throughout the end of June. The overweight added to the performance, as high yield spreads continued to grind tighter. The CDS indices underperformed the cash high yield bond index by -0.6%. The sub-fund's 0.8% outperformance in the year can be explained by this negative contribution and a positive contribution of 1.4% from the model-based active positions. No structural return differences between CDS indices and bonds is expected in the long run.

#### Robeco QI Global Multi-Factor Credits

This sub-fund offers balanced exposure to the value, momentum, low-risk, quality, and size factors in the global investment grade corporate bond market by using a highly systematic investment process. Analysts perform a fundamental check on additional downside risks beyond the scope of the quantitative multi-factor model, including ESG risks, using RobecoSAM sustainability data and other sources. The portfolio construction aims to make the portfolio's RobecoSAM ESG score better than the index, the portfolio's carbon footprint lower than the index and – recently introduced – the water consumption and waste disposal footprints lower than the index.

In the first half of 2021, the sub-fund generated a return of -0.5% (gross, euro hedged) compared to -1.3% for its index, the Bloomberg Barclays Global Aggregate Corporates Index (euro hedged). The majority of the relative performance was driven by positive issue(r) selection, as beta allocation contributed negligibly. The value factor contributed most positively to performance, followed by the size factor. The momentum factor contributed neutrally. The low risk/quality factor detracted, mostly driven by the underperformance of longer-dated bonds. Sector allocation made a positive contribution, thanks particularly to the overweight in the consumer cyclical and energy sectors and despite the underweight in REITs. Allocations to currency denominations also contributed positively, in particular the underweight in CAD bonds. Country allocation contributed neutrally. Rating allocation within investment grade made a small positive contribution and the off-index position in BBs also contributed positively.

#### Robeco QI Global Multi Factor Bonds

This sub-fund offers balanced exposure to the value, momentum, low risk, quality and size factors. The bottom-up selection of bonds aims to systematically harvest factor premiums with a risk profile similar to the index and with the weighted average ESG scores and carbon emissions of the government bonds and the credits in portfolio better than in the index. The sub-fund's active duration overlay is fully driven by the outcomes of our quantitative duration model.

In the first half of 2021, the sub-fund generated a return of -1.5% (gross, hedged to euro) compared to -1.9% for its index, the Bloomberg Barclays Global Aggregate Index. The systematic duration overlay and the factor-based credit selection contributed positively to the performance. The duration overlay positioned for rising yields. Within credits, the value and size factors contributed positively to the performance, while the low risk/quality factor detracted. The factor-based government bond selection detracted from the performance. The momentum factor detracted within government bonds, while the value factor contributed positively.

#### Robeco Global Credit - Short Maturity

The sub-fund posted a gross return of +0.5% hedged in euros in the first half of 2021, outperforming the Bloomberg Barclays Global Aggregate Corporates 1-5 (euro hedged) by +0.1%. The outperformance was the result of issuer selection, while the contribution from beta management was zero. The sub-fund started the year with a neutral position. That position has been maintained since, despite tight valuations. Spread curves remained sufficiently steep for attractive roll-down returns. The energy sector, airlines and cruise liners have been among the best performers in the last six months. The overweight positions in several energy issuers and cruise liners were maintained. There is no exposure to airlines, as they are considered too risky. ESG factors are taken into account when assessing the fundamental credit quality of individual issuers.

## Global Bond sub-funds (continued)

### Performance analysis (continued)

#### Robeco Corporate Hybrid Bonds

The gross return in the base currency for the Corporate Hybrid Bonds Fund was 1.2% in the first half of 2021. The sub-fund slightly underperformed its index, the Bloomberg Barclays Global Corporate Hybrids 3% issuer cap (euro hedged). Credit spreads on hybrid bonds tightened during the period as the search for yield continued. The sub-fund's beta position was reduced from a small overweight to a more neutral level. As a result, our beta policy made a neutral return contribution. Issuer selection made a negative contribution to the sub-fund's relative return. The sub-fund was underweight in China, which resulted in underperformance relative to the index. Chinese hybrid issuers outperformed the market, as bonds recovered from last year's losses driven by the US ban on investments in certain Chinese companies. The sub-fund's holdings in companies that benefit from a reopening of the economy made positive performance contributions. The analysis of ESG factors is fully integrated into our assessment of the fundamental credit quality of individual issuers.

#### Robeco QI Global Multi-Factor High Yield

This sub-fund offers balanced exposure to the value, momentum, low risk, quality and size factors in the global high yield corporate bond market by using a highly systematic investment process. Analysts perform a fundamental check on additional downside risks beyond the scope of the quantitative multi-factor model, including ESG risks, using RobecoSAM sustainability data and other sources. The portfolio construction aims to make the portfolio's RobecoSAM ESG score better than the index, the portfolio's carbon intensity lower than the index and – recently introduced – the water consumption and waste disposal footprints lower than the index.

In the first half of 2021, the sub-fund generated a return of 4.0% (gross, euro-hedged) compared to 3.0% for its index, the Bloomberg Barclays Global High Yield Corporates ex Financials Index (euro hedged). The majority of the relative performance was driven by positive issue(r) selection. Beta allocation detracted because the beta hedge, implemented with CDS indices, contributed insufficiently positively to offset the negative contribution from the underweight beta position in the bond portfolio. The value factor contributed most positively, followed by the momentum and low risk/quality factors. The size factor contributed neutrally. Sector allocation contributed quite positively, in particular the underweights in electric utilities and communication companies. Country allocation also contributed positively, driven by the positive contribution from the underweight in emerging market issuers and despite the negative effect from the underweight in US issuers. Allocations to subordination types detracted, mostly due to the overweight in corporate hybrids. Rating allocation also detracted, as the portfolio was underweight in the outperforming CCC rating category. Issuer selection was strongly positive in all market segments.

#### RobecoSAM SDG Credit Income

The sub-fund posted a gross return of 1.2% hedged in US dollars in the first six months of 2021. After the strong rally in the last months of 2020, the sub-fund started the year with a more cautious positioning. BB-rated corporates and AT1 bonds still offered attractive yields, hence these subcategories were preferred in the asset allocation. In line with the outcome of the March Credit Quarterly Outlook, the risk profile of the portfolio was further reduced in the second quarter by lowering the exposure to AT1 bonds and corporate hybrids. As emerging markets lagged developed markets, the allocation to these markets was increased. The sub-fund's top-down positioning remained cautious. In the investment process, the sub-fund focuses on issuers that contribute positively to the UN Sustainable Development Goals. That means that companies that contribute negatively to one or more SDGs, such as brewing companies, oil companies or certain automotive manufacturers which are lagging in the EV transition are excluded from the portfolio.

#### RobecoSAM Global SDG Credits

The sub-fund posted a gross return of -1.4% hedged in euros in the first half of 2021, underperforming the Bloomberg Barclays Global Aggregate Corporates (euro hedged) by -0.1%. This underperformance was the result of active beta management. The sub-fund started the year with a cautious risk position based on tight valuation. That position was maintained and the underweight credit risk was increased as spreads ground tighter. The sub-fund has been unable to compensate for the underperformance from beta management with issuer selection. The sub-fund is not allowed to invest in SDG negative issuers from the energy sector, airlines and cruise liners for example. These issuers have been the best performers in the last six months. In the investment process, the sub-fund focuses on issuers that contribute positively to the UN Sustainable Development Goals. That means that companies that contribute negatively to one or more SDGs, are excluded from the portfolio.

## Global Bond sub-funds (continued)

### Performance analysis (continued)

#### RobecoSAM SDG High Yield Bonds

The sub-fund achieved a gross total return of 1.9%, underperforming its index, the Bloomberg Barclays Global High Yield Corporate Index (hedged into euros) by 1.1%. Two main drivers behind this underperformance can be identified. Firstly, the conservative beta-positioning was a source of underperformance, as this first half year was a period where credit spreads continued to tighten to levels equivalent to the historic tightness for the asset class. In this strong market environment, the riskiest rating classes performed best, which was also detrimental to the relative performance, since the sub-fund was overweight the safer BB-rated companies at the expense of the riskier CCC-basket. Secondly, due to rising prices for commodities such as oil, the energy and metals & mining sector outperformed strongly. These sectors are mostly populated by SDG-negative companies and are therefore large underweights for the sub-fund.

With respect to sustainable investing and in the investment process, the sub-fund focuses on issuers that contribute positively to the UN Sustainable Development Goals. That means that companies that contribute negatively to one or more SDGs, such as tobacco companies, certain mining companies and coal-powered utilities are excluded from the portfolio.

#### RobecoSAM Global Green Bonds

The sub-fund posted a gross return of -2.4% over the first six months of 2021, outperforming its Bloomberg Barclays MSCI Global Green Bond Index. The return was negatively impacted by rising bond yields. The sub-fund has a bearish tilt on duration and has a 2-5 year steepener in euro rates. The underweight duration and curve policy added to relative performance. The sub-fund's credit beta position was reduced to a more neutral level. The beta policy had a small but positive effect on performance; issuer selection made a neutral contribution. The sub-fund participated in 20 new green bond issues from corporate, government-related and government issuers using our proprietary five-step eligibility screening process. The green bonds are checked for alignment with the green bond principles and reviewed on the use of proceeds in relation to the EU taxonomy. The new issues included the debut green bond from Italy. At the end of June, investments in green bonds amounted about 97%.

#### RobecoSAM Climate Global Bonds

The gross return for the sub-fund was -2.1% (euro hedged). The sub-fund performed in line with its Solactive Paris Aware Global Aggregate Index. The strategy aims for a lower carbon footprint relative to the global investment grade bond universe with 7% annual self-decarbonization, while outperforming its Paris Aware index. Climate change considerations are fully integrated into the investment process and portfolio construction. Versus a market index, the sub-fund has a preference for low emitting countries. Overweight duration positions in carbon-attractive countries such as Italy contributed to returns, offset by underweight duration positions in worst polluters such as the United States. Within corporates, the sub-fund does not invest in high-polluting sectors such as energy and fossil fuel-based utilities. Given historical tight valuations, the beta decreased over the period and ended below 0.50 in June. Weighted average carbon intensity for both countries and corporates remained better than the index.

#### RobecoSAM Climate Global Credits

The sub-fund posted a gross return of -1.5% hedged in euros during the first half of 2021, outperforming the Solactive Paris Aligned Global Corporate Index (euro hedged) by 0.1%. Total returns were mainly driven by interest rates moving higher, while credit spreads tightened. The sub-fund was positioned for wider spreads, with an underweight beta position relative to the index. As corporate bonds outperformed treasuries, the beta policy made a negative return contribution. Issuer selection made a positive contribution to the sub-fund's performance, more than offsetting the beta effect. Positions in the banking, automotive (e.g. Volkswagen), and leisure sectors were among the winners, as vaccination programs gathered momentum, allowing the global economy to reopen.

The analysis of ESG factors is fully integrated into our assessment of the sub-fundamental credit quality of individual issuers. This assessment includes a climate risk analysis based on the carbon intensity of an issuer and its strategy to reduce its carbon footprint going forward.

### Performance analysis

#### Robeco Euro Government Bonds

The return in the base currency of the sub-fund was -2.8% (before fees) over the first six months of 2021 versus -3.0% for its index, the Bloomberg Barclays Euro Aggregate Treasury Index. The sub-fund generated a relative return of +0.2% versus the index over the period. Positions in duration, curve, inflation-linked bonds and countries contributed. The underweight duration position benefited from rising yields. The overweight in Italian BTPs added, as BTPs outperformed after former ECB President Mario Draghi was appointed as Italy's new PM in February. Exposure to French inflation linked bonds also added to performance as break-even inflation rates rose. Allocation to government-related bonds detracted slightly, as markets anticipated the start of the large Next Generation EU issuance program. The sub-fund actively participated in sustainable bond issuance. Amongst others, the sub-fund participated in Italy's large inaugural green bond and in social bonds issued by the EU. At the end of June, circa 24% of the sub-fund was invested in green, social and sustainable bonds.

#### Robeco Euro Credit Bonds

The sub-fund posted a gross return of -0.1% in the first half of 2021, which is better than the performance of the Bloomberg Barclays Euro Aggregate Corporates Index (euro hedged). The negative return of the portfolio was driven by an increase in underlying government bond yields. The negative impact of higher yields was only partially offset by a tightening of credit spreads. The performance contribution of the top-down positioning was negative, as the credit beta of the portfolio was below one. The sub-fund is positioned cautiously, as credit spreads are close to multi-year lows. Issuer selection made a positive contribution to the performance. The sub-fund benefited from overweight positions in Covid-recovery names in the auto, hotel and cruise line business. Another positive contributor to the performance were positions in BB-rated bonds.

ESG factors are taken into account when assessing the sub-fundamental credit quality of individual issuers.

#### Robeco All Strategy Euro Bonds

The gross return in the base currency of the sub-fund was -2.3% over the first half of the year 2021, which is in line with the return on the index, the Bloomberg Barclays Euro Aggregate Index. Curve positioning contributed to relative performance as the sub-fund correctly anticipated on steeper curves as a result of the gradual reopening of economies. Country positioning also contributed as Italian government bonds, an overweight position, outperformed after former ECB President Mario Draghi was appointed as Italy's new PM to form a government of national unity. Positions that detracted from performance were currency positioning, with the South African rand strengthening in particular, despite very weak and deteriorating fundamentals, and the below-index allocation to corporate bonds as the average spread relative to government bonds declined.

## Regional Bond sub-funds (continued)

### Performance analysis (continued)

#### Robeco All Strategy Euro Bonds (continued)

ESG factors are taken into account when assessing the fundamental credit quality of individual issuers. At the end of June, around 18% of the sub-fund was invested in green, social and sustainable bonds.

#### Robeco European High Yield Bonds

The sub-fund achieved a gross total return of 2.5%, underperforming its index, the Bloomberg Barclays Pan-European HY Corporate ex Fin. 2.5% Issuer Cap hedged into euros, by 0.5%. The main driver behind this underperformance was the conservative beta positioning in a period where credit spreads continued to tighten to levels equivalent to the historic tightness for the asset class. In this strong market environment, the riskiest rating classes performed best, which was also detrimental to our relative performance, since the sub-fund was overweight the safer BB-rated companies at the expense of the riskier CCC-basket. Also, due to rising prices of commodities such as oil, the energy and metals & mining sector outperformed, sectors the sub-fund was underweight.

With respect to sustainable investing, the sub-fund has integrated ESG factors into the investment process. The prime goal of integrating ESG factors into the analysis is to strengthen the ability to assess the downside risk of the credit investments. RobecoSAM sustainability data and external sources are used to make an ESG assessment as part of the fundamental analysis.

#### RobecoSAM Euro SDG Credits

The sub-fund posted a gross return of -0.4% in the first half of 2021, which is in line with the performance of the Bloomberg Barclays Euro Aggregate Corporates Index (euro hedged). The negative return of the portfolio was driven by an increase in underlying government bond yields. The negative impact of higher yields was only partially offset by a tightening of credit spreads. The performance contribution of the top-down positioning was negative, as the credit beta of the portfolio was below one. The sub-fund is positioned cautiously, as credit spreads are close to multi-year lows. Issuer selection made a positive contribution to the performance. The sub-fund benefited from overweight positions in subordinated bonds that outperformed on a risk-adjusted basis.

In the investment process, the sub-fund focuses on issuers that contribute positively to the UN Sustainable Development Goals. That means that companies that contribute negatively to one or more SDG's are excluded from the portfolio.

#### Robeco Financial Institutions Bonds

The sub-fund posted a gross return of 1.2% in the first half of 2021, outperforming the Bloomberg Barclays Euro Aggregate Corporate Financials Subordinated 2% Issuer Cap Index (euro hedged) by 0.4%. The positive return of the portfolio was driven by tightening credit spreads. Underlying government bond yields rose, which contributed negatively to the return of the portfolio. The outperformance of the sub-fund versus the index was driven by our top-down positioning and by issuer selection. The sub-fund started the year with a beta of circa 1.15, but this was reduced during the month of January to 1.05. Valuation was the key driver to reducing the beta overweight. This also means that issuer selection contributed most to the relative performance in the first six months of the year.

ESG factors are taken into account when assessing the sub-fundamental credit quality of individual issuers.

#### Robeco Investment Grade Corporate Bonds

The gross return for the sub-fund was -0.4% in the first half of 2021. The sub-fund outperformed its index, the Bloomberg Barclays Euro Aggregate Corporate ex financials 2% issuer cap, by +0.2%. Total returns were mainly driven by government bond yields moving up, while credit spreads showed a modest tightening. The sub-fund's beta position was reduced further from a neutral stance to below index risk. As a result, our beta policy made a small negative return contribution. Issuer selection made a positive contribution to the sub-fund's relative return. Automotive, energy and leisure companies were among the winners, as vaccination programs gathered momentum, allowing the economy to reopen.

The analysis of ESG factors is fully integrated into our assessment of the fundamental credit quality of individual issuers.

### Performance analysis

#### Robeco QI Multi Factor Absolute Return

The sub-fund harvests factor premiums in credit and equity markets through bottom-up selection and at the market level through top-down factor-based allocation. The sub-fund targets a low correlation with equity and bond markets and targets market-agnostic returns. Over the first half of H1 2021, the sub-fund realized excess returns over cash at 3.3% (ICE BofA Merrill Lynch EUR Currency Overnight Deposit Offered Rate Index). Momentum and low risk added most to performance, followed by carry and value. Flow and quality detracted. Equity selection, equity allocation, commodity allocation and credit allocation were the main positive contributors. Credit selection was slightly positive, while government bond allocation and currency allocation detracted.

Environmental footprint and ESG factors are systematically integrated. The equity sleeve incorporates advanced ESG and climate improvements, whereas the credit sleeve incorporates the regular ESG considerations. The average ESG score of the portfolios is significantly better than the ESG score of their respective index. The same applies to impact metrics such as carbon emissions.

## Sustainable investing

All Robeco's investment activities comply with the Principles for Responsible Investing (PRI). Responsibility for implementing Sustainable investing lies with Robeco's CIO Fixed Income and Sustainability, who has a seat on Robeco's Executive Committee.

Fulfilling our responsibilities in the field of stewardship forms an integral part of Robeco's approach to Sustainable investing. We publish our own stewardship policy on our website. This policy describes how we deal with possible conflicts of interest, how we monitor the companies in which we invest, how we conduct activities in the field of engagement and voting, and how we report on our stewardship activities.

Robeco has research available from leading sustainability experts, including own proprietary research from the sustainable investing research team. This dedicated Sustainable Investing research team works together very closely with the investment teams to provide them with in-depth sustainability information. The investment analysis focuses on the most material ESG factors (Environment, Social and Governance) and the connection with the financial performance of a company. We can then focus on the most relevant information in performing our investment-analysis and can reach enhanced investment decisions.

To help customers contribute to the objectives, Robeco worked on analyzing the contribution to Sustainable Development Goals (SDG) of companies and developing SDG investment solutions. Furthermore, Robeco contributes to the SDG by integrating ESG factors in its decision-making process for investments and encourages companies to act in support of these goals by means of a constructive dialogue.

Robeco's climate change policy is focused on integrating climate issues in investments when financially material and engaging with companies. Furthermore Climate risks for our funds are being assessed and monitored by Robeco's financial risk management department.

Robeco pursues an exclusion policy for companies that are involved in the production of or trade in controversial weapons such as cluster munition and anti-personnel mines, for tobacco companies and for companies that seriously and habitually violate either the United Nations Global Compact (UNGC) or OECD Guidelines for Multinational Enterprises. Robeco applies strict criteria for this last category and if a dialogue fails the company can be excluded. Robeco publishes its exclusion policy and the list of exclusions on its website.

Constructive and effective activities under active ownership encourage companies to improve their management of risks and opportunities in the field of ESG. This in turn establishes a better competitive position and improved profitability and moreover has a positive impact on the community. Active ownership involves voting and engagement. Robeco exercises its voting rights for the shares in its investment funds all over the world. The primary focus of this engagement is to address strategic ESG issues that might affect value creation in the long term.

Luxembourg, 31 August 2021

The Board of Directors

Past performance is no indication of current or future performance. These performance data do not take account of the commissions and costs incurred on the issue and redemption of shares.

## Other data

### Savings directive information

The bond sub-funds of the Company are subject to the EU savings directive.

### Stock exchange listing

All the Robeco Capital Growth Funds share-classes D and DH, the IExH of Robeco High Yield Bonds, the B EUR of Robeco QI Emerging Conservative Equities, the IH USD of Robeco Financial Institutions Bonds, the Z EUR of Robeco QI Chinese A-Share Conservative Equities, the D2 USD of Robeco Global Consumer Trends and the F EUR of Robeco MegaTrends are listed on the Luxembourg Stock Exchange.

### Auditors

No external audit has been conducted.

### Remuneration policy and remuneration paid

The fund itself does not employ any personnel and is managed by Robeco Institutional Asset Management B.V. ('RIAM'). The remuneration for persons working for RIAM comes out of the management fee.

#### Remuneration policy

RIAM's remuneration policy, which applies to all staff working under its responsibility, complies with the applicable requirements laid down in the European framework documents of the UCITS Directive and the ESMA guidelines for a responsible remuneration policy under the UCITS Directive.

The remuneration policy of RIAM can be obtained free of charge at the offices of the Company.

This remuneration policy applies to all staff of RIAM, including individuals who may have a material impact on the risk profile of the fund. These persons are designated to be 'Identified Staff'.

#### Responsibility for and application of the policy

RIAM's Remuneration Policy is determined, applied and annually reviewed by and on behalf of RIAM with the approval of its shareholder, the (Board of) Robeco Holding B.V. For each review (the Board of) Robeco Holding B.V. shall obtain prior advice from the Supervisory Board of RIAM, which acts as its Supervisory Board. In the application and evaluation of the remuneration policy, RIAM occasionally makes use of the services of various external advisers.

#### Maturity tenor of securities lending transactions

All securities on loan can be recalled at any point. The Fund's securities lending transactions have open maturity.

#### Settlement and clearing

The Company's securities lending transactions, including related collateral, are settled and cleared on a tri-party basis.

#### Re-use of collateral

Non cash collateral, received in a securities lending transaction may not be sold, re-invested or pledged. Cash collateral received from such transactions is re-used in a reverse repurchase transaction.

## Other data (continued)

### Additional information Securities Financing Transaction (continued)

#### Safekeeping of collateral

##### Collateral received

J.P. Morgan Bank Luxembourg S.A., as securities lending agent of the Funds, is responsible for the safekeeping of the collateral received in respect of securities lending transactions as at the reporting date. The Custodian J.P. Morgan Bank Luxembourg S.A. is ultimately liable for any loss of instruments held in custody or by a third party to whom custody had been delegated (the sub-custody).

##### Collateral granted

No collateral is granted by the Company as part of their securities lending activities.

##### Return and cost

The total income earned from securities lending transactions is split between the fund and the securities lending agent. Details of this split are disclosed in notes to the financial statements on pages 224. Income earned during the year by the Funds from securities lending transactions is disclosed in the statement of operations and changes in net assets on page 153.

# Notes to the financial statements as at 30 June 2021

## 1. General

Robeco Capital Growth Funds (the 'Company') was incorporated on 2 May 1997 for an undetermined period of time as an open ended investment company based in Luxembourg, issuing and redeeming its shares on demand at prices based on the respective Net Asset Values per share. Its Articles of Incorporation were published in the 'Memorial, Recueil des Societes et Associations' of the Grand Duchy of Luxembourg (the 'Memorial') on 6 June 1997. The Articles of Incorporation were last amended on 28 June 2012 and such amendments were published on 3 August 2012 in the Memorial. Robeco Capital Growth Funds is a 'Societe d'Investissement a Capital Variable' (SICAV) pursuant to the law of 10 August 1915, as amended, on commercial companies and to part I of the law of 17 December 2010, on undertakings for collective investment of the Grand Duchy of Luxembourg.

The Company takes the form of an umbrella fund. It is made up of several sub-funds each representing an investment portfolio and other assets and liabilities corresponding to a different investment policy. Each sub-fund is therefore represented by different types of shares with one or more classes of shares. The Board of Directors has authority to issue different categories of shares within each of the sub-funds. The Directors of the Company may at any time establish new sub-funds and/or may decide upon the issue of class A, AH, D, D2, D2H, DH, DHL, DL, F, FH, FHL, FL, I, IH, IHL, IL, IM, IMH, J, K, KH, M, M2, M2H, MH, ML, S, SH, Z, Z2H, ZH, 0DH, 0MH, 0FH, 0IH, 2FH, 2IH and IHHi shares (accumulating classes) and class A1, A1H, B, Ba, BaH, BH, Bx, BxH, C, CH, Cx, CxH, D3, D3H, E, EH, G, GH, IB, IBH, IBx, IBxH, IE, IEH, IEx, IExH, KE, M3, M3H, MB, MBx, MBxH, ZB, ZBH, ZEH, 0BxH, 0CH, 0D3H, 0EH, 0IEH, 2CH and 2EH shares (distributing classes) in existing or new sub-funds. The reference currency of the classes of shares may be the Euro (EUR), the US Dollar (USD), the British Pound (GBP), the Swiss Franc (CHF), the Japanese Yen (JPY), the Canadian Dollar (CAD), the Chinese Renminbi (RMB), the Mexican Peso (MXN), the Hong Kong Dollar (HKD), the Singapore Dollar (SGD), the Swedish Crown (SEK), the Norwegian Crown (NOK), the Danish Crown (DKK), the Australian Dollar (AUD), the South African Rand (ZAR), the Brazilian Real (BRL) and the Israeli Shekel (ILS).

### Legal entity

The Company as a whole constitutes a single legal entity however the assets of any one sub-fund will only be available to satisfy the rights of investors in relation to that sub-fund and the rights of creditors whose claims have arisen in connection with the creation, operation or liquidation of the sub-fund. For the purpose of the relations as between shareholders, each sub-fund is deemed to be a separate entity.

### Dividend policy

The general policy regarding the appropriation of net income and capital gains is as follows:

Class D, D2, D2H, DH, DL, F, FH, FL, I, IH, IL, IM, IMH, J, K, KH, M, M2, M2H, MH, ML, Z, Z2H, ZH, 0DH, 0MH, 0FH, 0IH, 2FH, 2IH and IHHi shares (accumulating)

Income is reinvested and added to the relevant sub-funds and contributes to a further increase in value of the total net assets.

Class A1, A1H, B, Ba, BaH, BH, Bx, BxH, C, CH, Cx, CxH, D3, D3H, E, EH, G, GH, IB, IBH, IBx, IBxH, IE, IEH, IEx, IExH, KE, M3, M3H, MB, MBx, MBxH, ZB, ZBH, ZEH, 0BxH, 0CH, 0D3H, 0EH, 0IEH, 2CH and 2EH shares (distributing)

After the end of the reporting period, the Company can recommend what distribution shall be made from the net investment income and net capital gains attributable to the Class A1, A1H, B, Ba, BaH, BH, Bx, BxH, C, CH, Cx, CxH, D3, D3H, E, EH, G, GH, IB, IBH, IBx, IBxH, IE, IEH, IEx, IExH, IMB, KE, M3, M3H, MB, MBx, MBxH, ZB, ZBH, ZEH, 0BxH, 0CH, 0D3H, 0EH, 0IEH, 2CH and 2EH shares. The Annual General Meeting of Shareholders will determine the dividend payment. The Board of Directors of the Company may decide to distribute interim dividends, in accordance with Luxembourg law.

### General remarks

As provided by the 2010 law, the Company may decide to distribute dividends with no other limit than the obligation that any such dividend distribution does not reduce the net asset value of the Company below the legal minimum amount. Similarly, the Company may distribute interim dividends and may decide to pay dividends in shares. If dividends are distributed, payments of cash dividends to registered shareholders will be made in the currency of the relevant share class to such shareholders at the addresses they have given to the Registrar Agent. Dividend announcements (including names of paying agents) and all other financial notices concerning Robeco Capital Growth Funds shall be published on [www.robeco.com/riam](http://www.robeco.com/riam) and published in those newspapers as the Board of Directors shall determine from time to time. Dividends not collected within five years will lapse and accrue for the benefit of the Company in accordance with Luxembourg law.

### Open-ended fund

The Company is an open-ended investment Company, meaning that, barring exceptional circumstances, the Company issues and purchases its shares on a daily basis at prices at net asset value per share. The Company reserves the right to refuse any subscription request at any time.

# Notes to the financial statements as at 30 June 2021 (continued)

## 1. General (continued)

### Swing pricing

Shares are issued and redeemed on the basis of the net asset value per share. However, the actual costs of purchasing or selling assets and investments for a sub-fund may deviate from the latest available prices, as appropriate, in calculating the net asset value per share. This deviation can be caused by duties and charges and spread from buying and selling prices of the underlying investments ('spreads'). These costs have an adverse effect on the value of a sub-fund and its underlying share classes and are known as dilution. To mitigate the effects of dilution, the Directors may, at their discretion, make a dilution adjustment to the net asset value per share. The Directors will retain the discretion in relation to the circumstances under which to make such a dilution adjustment.

The dilution adjustment will involve adding to, when the Sub-fund is in a net subscription position, and deducting from, when the Sub-fund is in a net redemption position, the Net Asset Value per Share such figure as the Company considers representing an appropriate figure to meet the Cash Flow Costs. The resultant amount will be the Price rounded to such number of decimal places as the Company deems appropriate. The dilution adjustments may vary depending on the order type (net subscription or net redemption), on the underlying asset classes for any Sub-fund or on the market conditions. The dilution adjustments as well as the dealing levels from which they become applicable may be amended from time to time depending on market conditions or any other situation where the Company is of the opinion that the interests of the Shareholders require such amendment(s).

Additional details on the anti-dilution/swing pricing adjustments and actual swing factors can be found on [www.robeco.com/riam](http://www.robeco.com/riam).

For the avoidance of doubt, Shareholders placed in the same situation will be treated in an identical manner.

Where a dilution adjustment is made, it will increase the Price where the Sub-fund is in a net subscription position and decrease the Price where the Sub-fund is in a net redemption position. The Price of each Class in the Sub-fund will be calculated separately but any dilution adjustment will in percentage terms affect the Price of each Class in an identical manner. The dilution adjustment is made on the capital activity at the level of the Sub-fund and does not address the specific circumstances of each individual investor transaction.

The NAV's of the share classes which have been subject to dilution adjustment (swung NAV) as at 30 June 2021 are disclosed below:

### Pooling and co-management

For the purpose of efficient management and to reduce administrative costs and if the investment policies of the sub-funds allow such, the Board of Directors may decide to co-manage some or all of the assets of certain sub-funds with assets of other Luxembourg UCIs of the Robeco Group (co-managed units). In this case, the assets from different co-managed units will be jointly managed using the technique of pooling. Assets that are co-managed will be referred to using the term 'pool'. Such pools will only be used for the purposes of internal management. They will not constitute distinct legal entities and will not be directly accessible to investors. Each co-managed unit will have its own assets allocated to it. During the reporting period no pooling or co-management took place.

### Affiliated parties

Robeco is affiliated with ORIX Corporation Europe N.V. ORIX Corporation Europe N.V. is part of ORIX Corporation. The management structure of ORIX Corporation Europe N.V. is such that ORIX Corporation does not have any say in or influence on the Company's business policy. ORIX Corporation Europe N.V. pursues an independent investment policy on behalf of its affiliated investment companies, taking into account the interest of the investors involved. Besides services of other market parties, the Company may also utilize the services of one or more of these affiliated entities including transactions relating to securities, treasury, derivatives, securities lending, and subscriptions and redemptions of its own shares, as well as management activities. Transactions are executed at market rates.

As per 1 January 2021, the affiliated entities Robeco Luxembourg S.A. and Robeco Institutional Asset Management B.V. merged. Subsequently, Robeco Luxembourg S.A. ceased to exist. The Board of Directors of the Company have appointed Robeco Luxembourg S.A. (until 1 January 2021) and Robeco Institutional Asset Management B.V. (since 1 January 2021) as the Management Company to be responsible on a day-to-day basis for providing administration, marketing and investment management services in respect of the sub-funds. The Management Company has delegated the administration functions and registrar agent functions to J.P. Morgan Bank Luxembourg S.A. The different sub-funds and share-classes will incur an annual management fee which reflects all expenses related to the management of the Company which is payable to the Management Company. The Directors of the Company are also Director of Robeco QI Global Dynamic Duration, Robeco Global Total Return Bond Fund, Robeco All Strategies Funds and Robeco (LU) Funds III.

### Financial instruments

#### Risks

Transactions in financial instruments may lead the sub-funds to be subject to the risks described below or to the sub-funds transferring these risks to another party.

#### General investment risk

The value of the investments may fluctuate. Past performance is no guarantee of future results. The net asset value of the sub-funds is affected by developments in the financial markets and may both rise and fall. Shareholders run the risk that their investments may end up being worth less than the amount invested or even worth nothing. Bonds or other debt securities involve credit risk to the issuer which may be evidenced by the issuer's credit rating. Securities which are subordinated and/or have a lower credit rating are generally considered to have a higher credit risk and a greater possibility of default than more highly rated securities. In the event that any issuer of bonds or other debt securities experiences financial or economic difficulties, this may affect the value of the relevant securities and any amounts paid on such securities. This may in turn affect the NAV per share. General investment risk can be broken down into market risk, concentration risk and currency risk:

#### Market risk

The net asset value of the sub-funds is sensitive to market movements. In addition, investors should be aware of the possibility that the value of investments may vary as a result of changes in political, economic or market circumstances. No assurance can, therefore, be given that the sub-fund's investment objective will be achieved. It cannot be guaranteed either that the value of a share in a sub-fund will not fall below its value at the time of acquisition.

#### Concentration risk

Based on its investment policies, each sub-fund may invest in financial instruments from issuing institutions that (mainly) operate within the same sector or region, or in the same market. If this is the case, the concentration of the investment portfolio of the sub-fund may cause events that have an effect on these issuing institutions to have a greater effect on the sub-fund's assets than would occur with a less concentrated investment portfolio.

#### Currency risk

All or part of the investment portfolio of a sub-fund may be invested in currencies or financial instruments denominated in currencies other than its reference currency. As a result, fluctuations in exchange rates may have both a negative and a positive effect on the investment result of the sub-fund. The Equity sub-funds minimize the risks by investing mainly in well-known companies and by making a balanced selection with regard to distribution across regions, sectors, individual stocks and currencies. The risk relative to their index is minimized by using quantitative techniques. The Bond sub-funds minimize the risks by making a balanced selection with regard to distribution across regions, sectors, individual bonds and currencies and by investing in bonds with a minimum rating depending on the sub-funds investment policy. The risk relative to their index is minimized by using quantitative techniques.

#### Counterparty risk

A counterparty of a sub-fund may fail to fulfil its obligations towards that sub-fund. In case of hedging transactions in classes of shares, the relevant sub-fund carries the counterparty risk. This risk is limited as much as possible by taking every possible care in the selection of counterparties. Wherever it is customary in the market, the sub-funds will demand and obtain collateral. The sub-funds minimize this risk by trading exclusively with reputable counterparties with a minimum rating of A in the Standard & Poor's or other recognized credit rating agencies lists.

# Notes to the financial statements as at 30 June 2021 (continued)

## 1. General (continued)

### Financial instruments (continued)

#### Risks (continued)

##### Risk of lending financial instruments

In the case of financial instrument lending transactions, the Company and its respective sub-funds concerned run the risk that the borrower cannot comply with its obligation to return the financial instruments on the agreed date or furnish the requested collateral. The lending policy of the Company is designed to control these risks as much as possible.

The credit worthiness of counterparties in securities-lending transactions is assessed on the basis of how independent rating agencies regard their short-term credit worthiness and on the basis of their net assets. Guarantees given by parent companies are also taken into account. The fund only accepts collateral from OECD countries in the form of:

- government bonds with a minimum credit rating of BBB;
- the bonds of supranational bodies with a minimum credit rating of BBB-;
- stocks listed on the main indexes of stock markets in OECD countries; and to a limited extent in the form of
- index trackers;
- stocks issued by financial institutions;
- cash.

As of balance-sheet date, the fund had received collateral ensuing from securities-lending transactions. More information can be found on page 224.

##### Liquidity risk

The actual buying and selling prices of financial instruments in which the sub-funds invest partly depend upon the liquidity of the financial instruments in question. It is possible that a position taken on behalf of a sub-fund cannot be quickly liquidated in a good time at a reasonable price due to a lack of liquidity in the market in terms of supply and demand. The sub-funds minimize this risk by mainly investing in financial instruments that are tradable on a daily basis.

##### Euro currency risk

All or part of the assets of the sub-funds may be invested in securities denominated in Euro. In the event of any adjustments, including a full break-up, an exit of individual countries or other circumstances that may result in the emergence or reintroduction of national currencies, each sub-fund runs the risks that the value of its investments is reduced and/or the liquidity of its investments is (temporarily) reduced, regardless of the measures the Company may seek to reduce this risk.

##### Operational risk

The operational risk is the non inherent risk remaining after determining the risks as detailed above (general investment risk, counterparty risk, liquidity risk, Euro currency risk or risk of lending financial instruments). It mainly includes risks resulting from breakdowns in internal procedures, people and systems.

##### Insight into actual risks

The report of the Board of Directors, the Statement of net assets, the Notes to the financial statements and the Schedule of Investments, which include currency classification of the investments, give an insight into the actual risks at the end of the reporting period.

##### Risk management

Managing risk is a part of the investment process as a whole and with the help of advanced systems, the risks outlined above are limited, measured and monitored on the basis of fixed risk measures.

##### Policy regarding the use of derivatives

Investing implies that positions are taken. As it is possible to use various instruments, including derivative instruments, to construct an identical position, the selection of derivatives is subordinate to the positioning of an investment portfolio. In our published information, attention is given primarily to the overall position, and secondarily to the nature and volume of the financial instruments employed.

##### Derivative instruments

The unrealized results of derivative instruments are reported in the Statement of net assets. Commitments to derivatives are not included in the Statement of net assets. They are, however, explained in the Schedule of Investments. The unrealized results presented in the Statement of net assets are disclosed by contract in the Schedule of Investments.

The derivative instruments listed in the Notes are transacted through third party brokers. Those brokers hold/paid collateral as described on page 222. The Company is exposed to counterparty risk in respect of all amounts including collateral due to it from such brokers.

## 2. Summary of significant accounting principles

### General

Unless stated otherwise, the items shown in the financial statements are included at their nominal value and expressed in the reference currency of the sub-fund. This semi-annual report covers the reporting period from 1 January 2021 until 30 June 2021.

# Notes to the financial statements as at 30 June 2021 (continued)

## 2. Summary of significant accounting principles (continued)

### Preparation and presentation of financial statements

The financial statements are prepared on the basis of the last NAV calculated during the reporting period (30 June 2021 for all sub-funds except Robeco Chinese Equities, Robeco Asian Stars Equities and Robeco Sustainable Asian Stars Equities which is 29 June 2021) and presented in accordance with Luxembourg generally accepted accounting principles for investment funds. The going concern basis was applied for the preparation of the financial statements of the Fund and its sub-funds, except for the sub-funds liquidated during the period.

### Combined figures

The combined figures are expressed in Euro and are presented for information purpose only. The Combined Statement of net assets is presented in EUR at the exchange rates prevailing at the end of the reporting period, while the Combined Statement of operations and changes in net assets is presented in EUR at the average exchange rates during the period.

### Foreign currencies

Transactions in currencies other than the reference currency of the relevant sub-fund are converted into the reference currency at the exchange rates prevailing at the time of the transaction. The market value of the investments, assets and liabilities expressed in currencies other than the reference currency of the sub-fund are converted into the sub-fund's reference currency at the exchange rates prevailing at the end of the reporting period. Any positive or negative exchange differences arising are accounted for in the Statement of operations and changes in net assets. The table on page 289 shows the exchange rates as at 30 June 2021.

### Valuation of investments

Transferable securities, money market instruments and financial derivative instruments listed on an official stock exchange listing

These instruments are valued at their last available market price; in the event that there should be several such markets, on the basis of the last available price of the main market for the relevant security or asset. Should the last available market price for a given transferable security, money market instrument or financial derivative instrument not truly reflects its fair market value, then that transferable security, money market instrument or financial derivative instrument is valued on the basis of the probable sales price which the Board of Directors deems prudent to assume. Fixed income securities not traded on such markets are generally valued at the last available price or yield equivalents obtained from one or more dealers or pricing services approved by the Board of Directors or any other price deemed appropriate by the Board of Directors. According to the valuation policy which is approved by the Fund Board a fair value adjustment will be made to reflect the current market values for securities traded in markets with a different timezone (mainly Asia Pacific) where new market information surfaces after the close of the local market but before the calculation of the NAV.

### Transferable securities and/or money market instruments dealt in on another regulated market

These instruments are valued on the basis of their last available market price. Should the last available market price for a given transferable security and/or money market instrument not truly reflects its fair market value, then that transferable security and/or money market instrument is valued by the Board of Directors on the basis of the probable sales price which the Board of Directors deems prudent to assume.

### Transferable securities and/or money market instruments not listed or dealt in on any stock exchange or on any regulated market

In the event that any assets are not listed or dealt in on any stock exchange or on any regulated market, or if, with respect to assets listed or dealt in on any stock exchange, or on any regulated market as aforesaid, where the above valuation methods are inappropriate or misleading, the Board of Directors may adopt any other appropriate valuation principles for the assets of the Company.

### Shares in underlying open-ended investment funds

These shares or units are valued at their latest available net asset value per share. In the event that such valuation method is inappropriate or misleading, the Board of Directors may adopt any other appropriate valuation principles for the assets of the Company.

Sub-funds primarily invested in markets which are closed for business at the time of valuation of the sub-fund are normally valued using the prices at the previous close of business.

Market volatility may result in the latest available prices not accurately reflecting the fair value of the sub-fund's investments. This situation could be exploited by investors who are aware of the direction of market movements, and who might deal to exploit the difference between the next published Net Asset Value and the fair value of the sub-fund's investments. By these investors paying less than the fair value for shares on issue, or receiving more than the fair value for shares on redemption, other shareholders may suffer a dilution in the value of their investment. To prevent this, the Company may, during periods of market volatility, adjust the Net Asset Value per Share prior to publication to reflect more accurately the fair value of the sub-fund's investments. Adjustment will be made provided that such change exceeds the threshold as determined by the Board of Directors for the relevant sub-fund. If an adjustment is made, it will be applied consistently to all classes of shares in the same sub-fund. At the end of the reporting period, adjustment for fair value was made for the following sub-funds:

Robeco BP Global Premium Equities  
Robeco QI Global Conservative Equities  
Robeco Sustainable Global Stars Equities

Robeco Capital Growth Funds 220

### Investment transactions and investment income

Securities are initially recorded at cost, and where applicable on the basis of exchange rates prevailing on the date they are purchased. Results on sales of securities are determined on the basis of the average cost method (for futures first in first out method). Investment transactions are accounted for on the trade date. Dividends are accounted for on the ex-dividend date. Interest income is recorded on an accrual basis. Discounts/Premiums on zero coupon bonds are accreted as adjustments to interest income. Interest and capital gains on securities may be subject to withholding or capital gains taxes in certain countries.

### 3. Open forward exchange transactions

Open forward exchange transactions are valued with market practice valuation models using forwards rates based on exchange and interest rates applicable at 30 June 2021. The unrealized results of these transactions have been recorded gross in the Statement of net assets under the heading 'Unrealised gain/loss on forward currency exchange contracts' and changes in unrealized results are recorded in the Statement of operations and changes in net assets under the heading 'Net change in unrealised appreciation/(depreciation) on forward currency exchange contracts'. The contracts outstanding as at 30 June 2021 are disclosed in the Schedule of Investments. Information on the collateral received or paid on these positions is stated in the table on page 222. The paid collateral is restricted cash and is included in the Statement of net assets under the Assets 'Cash at bank and at brokers'. The received collateral is included in the Statement of net assets under the liabilities 'Due to brokers'.

### 4. Interest rate swaps

Interest rate swaps are valued with market practice valuation models using exchange and interest rates applicable at 30 June 2021. The unrealized gains/losses on interest rate swaps are recorded gross in the Statement of net assets under the heading 'Swap contracts at fair value' and changes in unrealized results are recorded in the Statement of operations and changes in net assets under the heading 'Net change in unrealised appreciation/(depreciation) on Swaps contracts'. The contracts outstanding as at 30 June 2021 are disclosed in the Schedule of Investments. Information on the collateral on these positions is stated in the table on page 222. The paid collateral is restricted cash and is included in the Statement of net assets under the Assets 'Cash at bank and at brokers'. The received collateral is included in the Statement of net assets under the liabilities 'Due to brokers'.

# Notes to the financial statements as at 30 June 2021 (continued)

## 5. Credit default swaps

Credit default swaps are valued at fair value under procedures approved by the Board of Directors. The valuation is based on recognised market models with observable market inputs used to perform the valuation. The unrealized gains/losses on credit default swaps are recorded gross in the Statement of net assets under the heading 'Swap contracts at fair value' and changes in unrealized results are recorded in the Statement of operations and changes in net assets under the heading 'Net change in unrealised appreciation/(depreciation) on Swaps contracts'. The contracts outstanding as at 30 June 2021 are disclosed in the Schedule of Investments. Information on the collateral on these positions is stated in the table on page 222. The paid collateral is restricted cash and is included in the Statement of net assets under the Assets 'Cash at bank and at brokers'. The received collateral is included in the Statement of net assets under the liabilities 'Due to brokers'.

## 6. Financial futures contracts

Regulated futures contracts are valued at their exchange quoted settlement price. Initial margin deposits are made upon entering into futures contracts. Variation margin payments are made or received, depending on the daily fluctuation in market value of the contract and are recorded by the fund as unrealized appreciation or depreciation. When the contract is closed, the Company records a realized gain or loss equal to difference between the value of the contract at the time it was opened and the value at the time it was closed. All margin deposits are included in the Statement of net assets under the heading 'Cash at bank and at brokers'.

Changes in unrealized results and realized results during the period are both recorded in the Statement of operations and changes in net assets. The contracts outstanding as at 30 June 2021 are disclosed in the Schedule of Investments.

## 7. Collateral

Several sub-funds received or paid collateral to cover the unrealized results on derivative instruments. Collaterals are calculated and settled on a daily basis per counterparty. The collateral is primarily cash held at the broker in the name of the sub-fund. The paid collateral is restricted cash and is included in the Statement of net assets under the Assets 'Cash at bank and at brokers'. The received collateral is included in the Statement of net assets under the liabilities 'Due to brokers'. No cash collateral has been reinvested. The amounts per sub-fund and counterparty are shown in the table below.

| Sub-fund name                              | Currency | Counterparty       | Type of collateral | Collateral received | Collateral pledged |
|--|----------|--------------------|--------------------|---------------------|--------------------|
| Robeco BP Global Premium Equities          | EUR      | HSBC               | Cash               | –                   | 2,340,000          |
| Robeco BP Global Premium Equities          | EUR      | Rabobank Nederland | Cash               | –                   | 500,000            |
| Robeco Sustainable Global Stars Equities   | EUR      | HSBC               | Cash               | –                   | 810,000            |
| Robeco BP US Premium Equities              | USD      | Citi               | Cash               | –                   | 308,333            |
| Robeco BP US Premium Equities              | USD      | Rabobank Nederland | Cash               | –                   | 3,379,816          |
| Robeco BP US Premium Equities              | USD      | J.P. Morgan        | Cash               | –                   | 23,750,000         |
| Robeco BP US Premium Equities              | USD      | BNP Paribas        | Cash               | –                   | 550,000            |

## 8. Schedule of Investments

The Schedule of Investments of the sub-funds are included at the end of this report.

## 9. Securities lending

J.P. Morgan Bank Luxembourg S.A. is lending agent for all Robeco Capital Growth Funds securities lending transactions. J.P. Morgan is authorized to retain a fee in an amount equal to (A) 25% for any loans which generate a return of 0.5% or less and (B) 10% for any loans which generate a return greater than 0.5% of the sum of (i) earnings derived from Authorised Investments (as adjusted for any Rebate paid or received by J.P. Morgan) (ii) any fee, paid or payable by Borrower with respect to loans (including any loan fee but excluding any compensation payable by borrower under the MSLA in connection with a loan (net, however, of any other amount payable by Lender in connection with such loan). Gains and losses on Cash Collateral investments shall not be taken into account in calculating earnings for the purpose of J.P. Morgan's fees. The following table shows the position of the collateralized securities lending transactions with first-class financial institutions as described in the prospectus at the end of the reporting period as well as the income from securities lending over the reporting period for the Company and the income for J.P. Morgan Bank Luxembourg S.A. Income on securities lending transactions is recorded under the heading 'Securities lending income' in the Statement of operations and changes in net assets. Collateral received in the frame of the lending activity, primarily securities, is held in the name of the fund on an escrow account with external agents. In exceptional cases, the collateral is received in cash, which is not subject to reinvestment. More information on collateral received can be found on page 60 and further.

# Notes to the financial statements as at 30 June 2021 (continued)

## 10. Taxes

The classes of shares of the sub-funds are liable in Luxembourg to an annual duty ('taxe d'abonnement'/'subscription tax') at the rate of 0.05% of their net assets calculated and payable at the end of each quarter. This rate is 0.01% per annum for institutional classes of shares such as class I, IB, IBH, IBxH, IH, OIH, 2IH, IE, IEH, OIEH, IHHi, IL, IExH, IMH, IMBxH, J, K, KE, KH, Y, YH, Z2H, ZB, ZBH, and ZH shares. To the extent that the assets of the sub-funds are invested in investment funds which are established in Luxembourg, no such tax is payable, provided that the relevant investment funds have been subject to this tax. The sub-funds will receive income from their investments after deduction of applicable withholding taxes in the country of origin. There are no Luxembourg income, withholding, capital gains, estate or inheritance taxes payable by the sub-funds.

### Taxation of Chinese A shares:

Capital gains derived from the transfer of Chinese A shares on or after 17 November 2014 are (temporarily) exempt from the 10% capital withholding tax ('CWT').

### Taxation Indian listed stocks

Capital gains realized on the disposal of Indian listed stocks within 12 months after purchase (short term gains) are subject to a 15% Indian capital gains tax. The disposal of Indian listed stocks after 12 months after purchase (long term gains) were exempt until 1 April 2018. Starting 1 April 2018 India also introduced a capital gains tax on long term gains at a rate of 10%. Until 17 December 2019, the capital gains taxes were taken into account on an arisen basis at the applicable rates for a short term gain or a long term gain without taking a provision into account. Since 17 December 2019, the capital gains taxes are accrued in the Net Asset Value and included in the Statement of net assets under the heading 'Other liabilities'.

## 11. Management Company

The Board of Directors of the Company have appointed Robeco Luxembourg S.A. (until 1 January 2021) and Robeco Institutional Asset Management B.V. (since 1 January 2021) as the Management Company to be responsible on a day-to-day basis for providing administration, marketing and investment management services in respect of the sub-funds.

Robeco Luxembourg S.A. was incorporated as a 'Société anonyme' under the laws of the Grand Duchy of Luxembourg on 7 July 2005 and its Articles of Association were published in the Mémorial on 26 July 2005. The Robeco Luxembourg S.A. is approved as Management Company regulated by chapter 15 of the Luxembourg law of 17 December 2010 relating to undertakings for collective investment.

Robeco Institutional Asset Management ("RIAM") is incorporated under the laws of The Netherlands on 21 May 1974 and at that time called Rotrusco B.V. On 25 February 1997, the name was changed into RIAM. RIAM holds an AIFMD license as referred to in Section 2:65 Wft. In addition, RIAM is licensed as a manager of UCITS (2:69b Wft, the Dutch Financial Supervision Act). RIAM is moreover authorized to manage individual assets and give advice with respect to financial instruments. RIAM is subject to supervision by the Dutch Authority for the Financial Markets (Stichting Autoriteit Financiële Markten, "AFM").

The Management Company has delegated the administration functions and registrar agent functions to J.P. Morgan Bank Luxembourg S.A.

RIAM is part of ORIX Corporation Europe N.V. and also acts as the Management Company for Robeco QI Global Dynamic Duration, Robeco Global Total Return Bond Fund, Robeco All Strategies Funds and Robeco (LU) Funds III.

## 12. Portfolio Manager

Robeco Institutional Asset Management B.V. (RIAM), an investment management company forming part of the Robeco Group in Rotterdam, the Netherlands, manages the assets of the sub-funds on a day-to-day basis.

The Management company has appointed Boston Partners Global Investors Inc. as its Portfolio Manager for the sub-funds Robeco BP Global Premium Equities, Robeco BP US Premium Equities, Robeco BP US Large Cap Equities and Robeco BP US Select Opportunities Equities.

The Portfolio Manager for the sub-funds Robeco Asia-Pacific Equities, Robeco Chinese Equities, Robeco Indian Equities, Robeco Asian Stars Equities, Robeco Sustainable Asian Stars Equities and Robeco Chinese A-Share Equities is Robeco Hong Kong Ltd.

The Portfolio Manager for the sub-funds RobecoSAM Global Gender Equality Impact Equities, RobecoSAM Global SDG Equities, Robeco Sustainable European Stars Equities, RobecoSAM Circular Economy Equities RobecoSAM Smart Energy Equities, RobecoSAM Smart Materials Equities, RobecoSAM Smart Mobility Equities, RobecoSAM Sustainable Healthy Living Equities and RobecoSAM Sustainable Water Equities is Robeco Schweiz AG.

# Notes to the financial statements as at 30 June 2021 (continued)

## 13. Cross investment between sub-funds

The Company is permitted to engage in cross investment between sub-funds within the umbrella structure. In case there are management fees or service fees charged on the cross investments, these fees are returned to the investor sub-fund. The following information pertains to the cross-investment between sub-funds within the Company as at 30 June 2021:

# Notes to the financial statements as at 30 June 2021 (continued)

## 13. Cross investment between sub-funds (continued)

If the sub-funds invest in UCITS/UCI's that are not part of the Robeco Group, all costs at the level of these UCITS/UCI's (including the non recoverable management fees, service fees, performance fees and/or transactions costs) shall be borne by the sub-funds ultimately and therefore by the shareholders. The management fee and service fee paid in the Robeco funds is restituted to the sub-funds and recorded in the Statement of operations and changes in net assets. During the period, the cross investments between the sub-funds mainly occurred in share-class Z of Robeco sub-fund which does not pay any management fees.

## 14. Management, service and performance fees

The different sub-funds or class of shares incur an annual management fee payable to the Management Company, which reflects all expenses related to the management of the sub-funds. Furthermore the different sub-funds or classes of shares incur an annual service fee payable to the Management Company reflecting all remaining expenses such as the fees of the administration agent, the registrar agent, auditors and legal advisers, the costs of custody (including custody fees and bank charges), the costs of depositary services, the costs of preparing, printing and distributing all prospectuses, memorandums, reports and other necessary documents concerning the Company, any fees and expenses involved in the registration of the Company with any governmental agency and stock exchange, the costs of publishing prices and operational expenses, and the cost of holding shareholders' meetings.

The annual charges, both management fee and service fee, are expressed as a percentage of the net asset value. The charges, paid quarterly, are based on the net asset value of the relevant period and are reflected in the share price.

The share classes Z do not pay management fees. For some sub-funds the Management Company is entitled to a performance fee, payable annually in arrears after the end of the reporting period. A performance fee for the relevant class of shares of the sub-fund is only due at the end of the financial year when the relevant class of shares of the sub-fund outperforms the relevant index or hurdle rate as indicated in the prospectus. Note that an outperformance of the relevant class of shares of the sub-fund does not imply a positive return of the of the relevant class of shares of the sub-fund, a performance fee is also due when the relevant class of shares of the sub-fund has a negative return but an outperformance over the relevant index or hurdle rate as indicated in the prospectus. This outperformance must have taken place since inception of the relevant class of share of the sub-fund or since the time that a performance fee was due. In the event that payment of the performance fee is due, the basis for the performance fee calculation for the next financial year will start at 0 (reset). In the event that no payment of the performance fee is due no reset will take place. In addition if a shareholder redeems or switches all or part of their shares before the end of a performance period, any accrued performance fee with respect to such shares will crystallize on that Valuation Day and will then become payable to the Management Company. The basis for the performance fee calculation will not reset on those valuation days at which performance fees crystallize following the redemption or switch of shares.

The following table shows the maximum percentages for the different outstanding classes of shares on an annual basis.

If the net asset value per share class exceeds EUR 1 billion the service fee will be reduced by 0.02% for the portion above 1 billion. If the net asset per share class value exceeds EUR 5 billion, the service fee will be reduced by a further 0.02% for the portion above EUR 5 billion.

# Notes to the financial statements as at 30 June 2021 (continued)

## 15. Depositary fees

The Depositary bank is remunerated in accordance with the agreement between J.P. Morgan Bank Luxembourg S.A. (acting as the depositary) and the Company.

## 16. Other operating expenses

The sub-funds and their classes of shares pay directly banking fees relating to the assets of the sub-funds or expenses incurred thereof, such as proxy voting. The costs of establishing the Company have been paid entirely. If additional sub-funds are created in the future, these sub-funds will bear, in principle, their own formation expenses.

## 17. Transaction costs

The sub-funds and their classes of shares pay directly commissions, brokerage fees and taxes resulting from financial transactions. Transaction costs are included in the purchase/sale price of the securities.

## 18. Total Expense Ratio (TER)

The Total Expense Ratio ('TER') expresses the operational costs (e.g. management fee, service fee, performance fee, taxe d'abonnement, depositary fee and bank charges) charged to the sub-funds as a percentage of the average assets entrusted, calculated on a daily basis, during the reporting period. The TER as shown below do not include transaction costs. The other costs concern mainly bank charges, depositary fees and taxe d'abonnement. Total Expense Ratio are annualized for periods less than one year.

# Notes to the financial statements as at 30 June 2021 (continued)

## 19. Broker commission

Robeco will ensure that the selection of counterparties for trade execution ('Brokers') will take place according to defined procedures and criteria to ensure best execution, taking into account execution capability and - where applicable - quality of investment research ('Research').

Under the influence of the MIFID II regulation RIAM decided to bear the research costs for most of the sub-funds of Robeco Capital Growth Funds from 2018. Only for the funds for which the American based asset manager Boston Partners is the Portfolio Manager, the research costs are charged to the fund. Below text on research costs is only applicable to the funds in the table below.

Brokers may charge execution only fees (excluding a fee for Research) and brokers may also charge a transaction fee consisting of two elements: a fee for the execution of an order and a fee for Research. Robeco will only pay a fee for Research if such Research is directly instrumental for improving the investment decision-making process within Robeco (via full service fees and via Commission Sharing Agreements ('CSA')). Having CSAs enables Robeco to unbundle research and execution services to fulfill best execution criteria. By using CSAs, we can obtain research services from those providers who do not have an execution business or do not fit our best execution criteria. It is Robeco's policy that the abovementioned arrangements are only allowed as long as the research services under consideration research, securities advice, etc.) are related to the enhancement of our investment process. Robeco makes use of:

1. Execution only fees for quantitatively managed equity sub-funds;
2. Full services fees for fundamentally managed equity sub-funds; and
3. CSAs for fundamentally managed equity sub-funds.

### Research costs paid

| <b>Sub-Fund</b>                            | <b>Sub-Fund Currency</b> | <b>Total research costs paid</b> |
|--|--------------------------|----------------------------------|
| Robeco BP Global Premium Equities          | EUR                      | 469,620                          |

## 20. Portfolio Turnover Ratio (PTR)

This is the turnover ratio of the investments, against the average assets entrusted and this is a measure of the incurred transaction costs resulting from the investment portfolio policies pursued and the ensuing investment transactions. In the calculation method that is used the amount of turnover is determined by the sum of purchases and sales of investments, excluding derivative and liquidity instruments, less the sum of issuance and repurchase of own shares, divided by the daily average of the net assets. The portfolio turnover ratio is determined by expressing the amount of turnover as a percentage of the average assets entrusted. The following table shows the portfolio turnover ratios of the sub-funds.
