Certain information contained in this report represents the opinion of the investment adviser which may change at any time. This information is not intended to be a forecast of future events, a guarantee of future results or investment advice. Current market conditions may not continue. The information contained herein regarding each index has been provided by the relevant index provider. Also, unless otherwise specifically noted, any discussion of the Funds' holdings, the Funds' performance, and the views of the investment adviser are as of December 31, 2020.

## Dear Fellow Shareholders:

The level of stimulus from the U.S. Federal Reserve (Fed) in 2020 was almost unprecedented and had investment consequences that endure into the new year of 2021. Financial markets benefited from the Fed stimulus and the case for gold investing solidified further.
As 2020 ends, the global economy continues to grow surprisingly well, supporting the markets, despite the social distancing that we all continue to feel in our personal lives. Important commodities like copper regained and passed pre-COVID-19 highs. In addition, in China, not only are higher real policy interest rates a sign of economic strength, but the country's industrial recovery also points to all-time highs in activity, even though consumer activity lags a little.
We do, however, see two risks to markets in 2021: 1) an unforeseen rise in interest rates in the U.S. triggered by higher global growth or other factors; and 2) a bump in the return to full employment. As to the first risk, several assets like gold, commodities and bitcoin may not be fully reflecting inflationary risks which could be a consequence of the huge stimulus of 2020.
An incredible number of people have been laid off in the U.S. and, regardless of GDP numbers, people are unlikely to return quickly to work at pre-COVID-19 levels. Despite signature into law on December 27, 2020 of the Consolidated Appropriations Act, 2021, concern may remain high enough for policy makers to take additional steps (any of which, however, are, as yet, uncertain) that may impact the financial recovery.
The investing outlook sometimes does change suddenly, as it certainly did in 2020. To get our quarterly investment outlooks, please subscribe to "VanEck News \& Insights". Should you have any questions regarding fund performance, please contact us at 800.826 .2333 or visit our website.
We sincerely thank you for investing in VanEck's investment strategies. On the following pages, you will find a performance discussion and financial statements for each of the funds for the twelve month period ended December 31, 2020. As always, we value your continued confidence in us and look forward to helping you meet your investment goals in the future.

Jan F. van Eck CEO and President VanEck Vectors ETF Trust

January 15, 2021
Investing involves substantial risk and high volatility, including possible loss of principal. An investor should consider the investment objective, risks, charges and expenses of the Funds carefully before investing. MANAGEMENT DISCUSSION
December 31, 2020 (unaudited)

## Market Review

All funds were to some extent affected not only by both the wide market sell off beginning in late-February and ensuing market volatility, sparked by the COVID-19 pandemic as it evolved globally, but also by the resulting destruction of the demand for many hard assets. However, remedial measures, both financial and fiscal, taken by central governments around the world in response to the crisis (including the asset purchasing program of the U.S. Federal Reserve), resulted in a positive "bounce back" in markets starting in April. By the end of 2020, the extent of the recovery, not least in demand for hard assets, varied considerably sector by sector and geographically.

## Agribusiness

From highs at the very start of the year, the Fund plummeted in March, along with the market, to hit a low toward the end of the month. Thereafter, agribusiness stocks moved upward through the rest of the year. The Fund gained $14.73 \%$ for the 12 month period. All sectors contributed to the Fund's positive performance, with the primary drivers being companies in the industrial and healthcare sectors. In the former, they were, in particular, those in the machinery segment. In the latter, they were those in the healthcare equipment and supplies segment involved in the wellbeing, health and safety of livestock, pets and also people. Companies in the consumer staples sector contributed the least. By far the greatest positive returns came from companies in the U.S., while the greatest negative returns came from those in Germany and Australia.

## Gold Miners

The stocks of both major gold miners and their junior peers hit lows in mid-March. However, thereafter, on the back of falling U.S. interest rates, the many uncertainties that abounded in the market and a rise in the price of gold, they rose, albeit fitfully, over the rest of 2020. The larger gold miners (VanEck Vectors Gold Miners ETF) posted a gain of $23.30 \%$ and junior gold miners (VanEck Vectors Junior Gold Miners ETF) posted a gain of $30.07 \%$ for the 12 month period.

Among the larger mining stocks, Canadian companies, with the largest average country weighting, contributed by far the most to performance. Companies in Australia detracted the most from performance.
The situation was similar among the juniors, with Canada the strongest contributor, followed by Australia. Peru detracted the most from performance.

## Low Carbon Energy

The performance of low carbon energy stocks during the 12 month period was very encouraging, with the Fund recording a gain of $118.65 \%$. Companies in the consumer discretionary, information technology and industrial sectors contributed by far the most to performance. Only the energy sector detracted from performance and then only minimally. The U.S. was by far the best performing country. Only Singapore and Brazil detracted from performance and then only minimally.

## Natural Resources

Having plummeted in mid-March, natural resources stocks staged a rally over the remainder of 2020 and the Fund gained $6.73 \%$ over the 12 months period under review. The materials and industrial sectors contributed most to performance and the energy sector was by far the greatest detractor from performance. Australian companies contributed the most to performance, while UK companies detracted the most.

## Oil Refiners

Along with so many others, oil refining stocks hit low in March. Although they recovered somewhat thereafter, ending down from their highs at the start of 2020. The Fund recorded a loss of $11.50 \%$ over the 12 month period. Increasing prices for crude oil and continuing concerns around demand both contributed to a challenging environment for refiners.

Exposure to refiners in the U.S. contributed by far the most negatively to Fund's total return. The only significant positive contributors were: Finland, India and South Korea.

## Oil Services

From a high on January 6, oil services stocks fell precipitously over the next two months to hit a low on March 18. Thereafter, however, with drilling activity having slowed substantially, the Baker Hughes U.S. rig count fell over $56 \%$ from 805 at the end of 2019 to 351 at the close of $2020,{ }^{1}$ they failed to make any significant recovery and the Fund ended the full 12 month period down $41.31 \%$.

The oil service stocks in the U.S., with the largest average country weighting, detracted the most from performance and the Netherlands detracted the least.

## Rare Earth and Strategic Metals

The Fund had a firm year in 2020, gaining 63.22\%. Having hit a low on February 23, the Fund recovered steadily through the third quarter and then experienced a particularly strong final quarter for the year. The majority of the companies in Fund's portfolio contributed positively to returns. Of the companies contributing positively, those involved in the mining of lithium and/or production of lithium contributed the most. The greatest detractors from performance were three companies with mining operations and/or production involving either titanium, or lithium or molybdenum. Small-cap companies performed much better than either their large- or mid-cap peers during the period under review.

## Steel

Having hit lows toward the end of March, as demand recovered for steel recovered, steel stocks climbed during the rest of the year, ending it with a noticeable surge in the last two months. The Fund ended the year under review recording a gain of $20.57 \%$. Australia and Brazil were the greatest contributors to performance. While no country detracted from performance, India contributed the least.

## Unconventional Oil \& Gas

From a peak for the year at the end of its first week, unconventional oil and gas stocks hit a trough on March 18, having fallen a little over $70 \%$. Thereafter, as oil prices firmed from their significant (negative) low at the end of April, stocks benefited from a fitful, if partial, recovery over the remainder of the year, with a surge in the last two months. The Fund lost $30.65 \%$ over the period under review. Having started 2020 at $\$ 61.18$ a barrel, and hit a low of - $\$ 37.63$ on April 20, by the end of the year the front month ${ }^{2}$ West Texas Intermediate (WTI) crude oil price stood at $\$ 48.52$. Consequently, unconventional oil and gas, particularly shale oil, companies had a challenging year. Both U.S. companies (on average approximately $86 \%$ of the Fund by weight during the period under review) and Canadian contributed negatively to performance.

## MANAGEMENT DISCUSSION

(unaudited) (continued)

## Uranium+Nuclear Energy

Having hit a high on February 21, stocks in the Fund plummeted nearly $35 \%$ over the next two months to hit a low on March 23. Thereafter, it clawed its way back up, but still ended the 12 month period only slightly up with a gain of $3.59 \%$. Energy companies were the greatest contributors to the Fund's positive total return, with only the industrial and utilities sectors detracting from performance. Geographically, companies in the Canada contributed the most to performance, while those in Japan and the U.S. were the greatest detractors from performance. According to the World Nuclear Association figures, in December 2020, there were some 441 operable nuclear power reactors in 32 countries and 54 power reactors currently under construction in 19 countries, notably China, India, South Korea and the UAE. ${ }^{3}$

|  | Share Price | NAV | MVNLRTR $^{\mathbf{1}}$ | SPTR $^{2}$ |
| :--- | :---: | :---: | :---: | :---: |
| One Year | $3.49 \%$ | $3.59 \%$ | $3.19 \%$ | $18.40 \%$ |
| Five Year | $5.24 \%$ | $5.22 \%$ | $4.79 \%$ | $15.22 \%$ |
| Ten Year | $(0.38) \%$ | $(0.33) \%$ | $(0.76) \%$ | $13.88 \%$ |

${ }^{1}$ MVIS® Global Uranium \& Nuclear Energy Index (MVNLRTR) is a rules based, modified capitalization weighted, float adjusted index intended to give investors a means of tracking the overall performance of companies involved in uranium and nuclear energy.

Index data prior to March 24, 2014 reflects that of the DAXglobal® Nuclear Energy Index (DXNE). From March 24, 2014, forward, the index data reflects that of the MVIS® Global Uranium \& Nuclear Energy Index (MVNLRTR). All index history reflects a blend of the performance of the aforementioned Indexes.
${ }^{2}$ The S\&P 500 Index (SPTR) is a market-value weighted index consisting of 500 stocks chosen for market size, liquidity, and industry group representation, with each stock's weight in the index proportionate to its market value.

This chart shows the value of a hypothetical \$10,000 investment in the Fund at NAV over the past 10 years. The result is compared with the Fund's benchmark and a broad-based index.

Hypothetical Growth of $\mathbf{\$ 1 0 , 0 0 0}$

Past performance is no guarantee of future results. Performance results do not reflect the deduction of taxes that a shareholder would pay on fund distributions or on the redemption or sale of fund shares.
See "About Fund Performance" on page 16 for more information.

## VANECK VECTORS ETF TRUST

## ABOUT FUND PERFORMANCE

(unaudited)
The price used to calculate market return (Share Price) is determined by using the closing price listed on its primary listing exchange. Since the shares of each Fund did not trade in the secondary market until after each Fund's commencement, for the period from commencement to the first day of secondary market trading in shares of each Fund, the NAV of each Fund is used as a proxy for the secondary market trading price to calculate market returns.
The performance data quoted represents past performance. Past performance is not a guarantee of future results. Performance information for certain Funds reflect temporary waivers of expenses and/or fees. Had these Funds incurred all expenses, investment returns would have been reduced. These returns do not reflect the deduction of taxes that a shareholder would pay on Fund dividends and distributions or the sale of Fund shares.
Investment return and value of the shares of each Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Fund returns reflect reinvestment of dividends and capital gains distributions. Performance current to the most recent month-end is available by calling 800.826.2333 or by visiting vaneck.com.
All indices are unmanaged and include the reinvestment of all dividends, but do not reflect the payment of transaction costs, advisory fees or expenses that are associated with an investment in the Fund. Certain indices may take into account withholding taxes. An index's performance is not illustrative of the Fund's performance. Indices are not securities in which investments can be made.
The Gold Miners Index and Steel Index are published by ICE Data Indices, LLC (ICE Data). The Agribusiness Index, Junior Gold Miners Index, Oil \& Gas Index, Oil Refiners Index, Oil Services Index, Rare Earth/Strategic Metals Index and Uranium \& Nuclear Energy Index are published by MV Index Solutions GmbH (MVIS®), which is a wholly owned subsidiary of the Adviser, Van Eck Associates Corporation. The Natural Resources Index and the Ardour Global Index are published by S-Network Global Indexes, LLC (S-Network).
ICE Data, MVIS, S-Network, and Ardour are referred to herein as the "Index Providers". The Index Providers do not sponsor, endorse, or promote the Funds and bear no liability with respect to the Funds or any security.

## EXPLANATION OF EXPENSES

(unaudited)

## Hypothetical \$1,000 investment at beginning of period

As a shareholder of a Fund, you incur operating expenses, including management fees and other Fund expenses. This disclosure is intended to help you understand the ongoing costs (in dollars) of investing in your Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The disclosure is based on an investment of $\$ 1,000$ invested at the beginning of the period and held for the entire period, July 1, 2020 to December 31, 2020.

## Actual Expenses

The first line in the table below provides information about account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by $\$ 1,000$ (for example, an $\$ 8,600$ account value divided by $\$ 1,000=8.6$ ), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During the Period."

## Hypothetical Example for Comparison Purposes

The second line in the table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of $5 \%$ per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Fund and other funds. To do so, compare this $5 \%$ hypothetical example with the $5 \%$ hypothetical examples that appear in the shareholder reports of other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as brokerage commissions paid on purchases and sales. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

(a) Calculated based upon average shares outstanding
(b) Total return is calculated assuming an initial investment made at the net asset value at the beginning of year, reinvestment of any dividends and distributions at net asset value on the dividend/distributions payment date and a redemption at the net asset value on the last day of the year. The return includes adjustments in accordance with U.S. generally accepted accounting principles and as such, the net asset values for financial reporting purposes and the returns based upon those net asset values may differ from the net asset values and returns for shareholder transactions. The return does not reflect the deduction of taxes that a shareholder would pay on Fund dividends/distributions or the redemption of Fund shares.
(c) Portfolio turnover rates exclude securities received or delivered as a result of processing in-kind capital share transactions.
(d) The ratios presented do not reflect the Fund's proportionate share of income and expenses from the Fund's investment in underlying funds.

(a) Calculated based upon average shares outstanding
(b) Total return is calculated assuming an initial investment made at the net asset value at the beginning of year, reinvestment of any dividends and distributions at net asset value on the dividend/distributions payment date and a redemption at the net asset value on the last day of the year. The return includes adjustments in accordance with U.S. generally accepted accounting principles and as such, the net asset values for financial reporting purposes and the returns based upon those net asset values may differ from the net asset values and returns for shareholder transactions. The return does not reflect the deduction of taxes that a shareholder would pay on Fund dividends/distributions or the redemption of Fund shares.
(c) Portfolio turnover rates exclude securities received or delivered as a result of processing in-kind capital share transactions.
\# On April 15, 2020, The Fund effected a 1 for 10 reverse share split (See Note 11). Per share data prior to April 15, 2020 has been adjusted to reflect the reverse share split.

[^9]December 31, 2020

Note 1-Fund Organization—VanEck Vectors ETF Trust (the "Trust") is registered under the Investment Company Act of 1940, as amended, as an open-end management investment company. The Trust was incorporated in Delaware as a statutory trust on March 15, 2001. The Trust operates as a series fund, and offers multiple investment portfolios, each of which represents a separate series of the Trust. These financial statements relate only to the investment portfolios listed in the diversification table below (each a "Fund" and, collectively, the "Funds").

| Fund | Diversification Classification |
| :--- | :--- |
| Agribusiness ETF | Non-Diversified |
| Gold Miners ETF | Non-Diversified |
| Junior Gold Miners ETF | Non-Diversified |
| Low Carbon Energy ETF | Non-Diversified |
| Natural Resources ETF | Diversified |
| Oil Refiners ETF | Non-Diversified |
| Oil Services ETF | Non-Diversified |
| Rare Earth/Strategic Metals ETF | Non-Diversified |
| Steel ETF | Non-Diversified |
| Unconventional Oil \& Gas ETF | Non-Diversified |
| Uranium+Nuclear Energy ETF | Non-Diversified |

Each Fund was created to provide investors with the opportunity to purchase a security representing a proportionate undivided interest in a portfolio of securities consisting of substantially all of the common stocks in approximately the same weighting as their index.
Note 2-Significant Accounting Policies-The preparation of financial statements in conformity with U.S. generally accepted accounting principles ("GAAP") requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates.
The Funds are investment companies and follow accounting and reporting requirements of Accounting Standards Codification ("ASC") 946 Financial Services -Investment Companies.
The following summarizes the Funds' significant accounting policies.
A. Security Valuation - The Funds value their investments in securities and other assets and liabilities at fair value daily. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date. Securities traded on national exchanges are valued at the closing price on the markets in which the securities trade. Securities traded on the NASDAQ Stock Market LLC ("NASDAQ") are valued at the NASDAQ official closing price. Over-the-counter securities not included on NASDAQ and listed securities for which no sale was reported are valued at the mean of the bid and ask prices. To the extent these securities are actively traded they are categorized as Level 1 in the fair value hierarchy (described below). Certain foreign securities, whose values may be affected by market direction or events occurring before the Funds' pricing time (4:00 p.m. Eastern Time) but after the last close of the securities' primary market, are fair valued using a pricing service and are categorized as Level 2 in the fair value hierarchy. The pricing service, using methods approved by the Board of Trustees, considers the correlation of the trading patterns of the foreign security to intraday trading in the U.S. markets, based on indices of domestic securities and other appropriate indicators such as prices of relevant ADR's and futures contracts. The Funds may also fair value securities in other situations, such as when a particular foreign market is closed but the Fund is open. Short-term obligations with sixty days or less to maturity are valued at amortized cost, which with accrued interest approximates fair value. Money market fund investments are valued at net asset value and are categorized as Level 1 in the fair value hierarchy. The Pricing Committee of Van Eck Associates Corporation (the "Adviser") provides oversight of the Funds' valuation policies and procedures, which are approved by the Funds' Board of Trustees. Among other things, these procedures allow the Funds to utilize independent pricing services, quotations from securities dealers, and other market sources to determine fair value. The Pricing Committee convenes regularly to review the fair value of financial instruments or other assets. If market quotations for a security or other asset are not readily available, or if the Adviser believes they do not otherwise reflect the fair value of a security or asset, the security or asset will be fair valued by the Pricing Committee in accordance with the Funds' valuation policies and procedures. The Pricing Committee employs various methods for calibrating the valuation approaches utilized to determine fair value, including a regular review

## VANECK VECTORS ETF TRUST

## NOTES TO FINANCIAL STATEMENTS

(continued)
of key inputs and assumptions, periodic comparisons to valuations provided by other independent pricing services, transactional back-testing and disposition analysis.
Certain factors such as economic conditions, political events, market trends, the nature of and duration of any restrictions on disposition, trading in similar securities of the issuer or comparable issuers and other security specific information are used to determine the fair value of these securities. Depending on the relative significance of valuation inputs, these securities may be categorized either as Level 2 or Level 3 in the fair value hierarchy. The price which the Funds may realize upon sale of an investment may differ materially from the value presented in the Schedules of Investments.
The Funds utilize various methods to measure the fair value of their investments on a recurring basis, which includes a hierarchy that prioritizes inputs to valuation methods used to measure fair value. The fair value hierarchy gives highest priority to unadjusted quoted prices in active markets for identical assets and liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The inputs or methodologies used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The three levels of the fair value hierarchy are described below:

Level 1 - Quoted prices in active markets for identical securities.
Level 2 - Significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3 - Significant unobservable inputs (including each Fund's own assumptions in determining the fair value of investments).
A summary of the inputs and the levels used to value the Funds' investments are located in the Schedules of Investments. Additionally, tables that reconcile the valuation of the Funds' Level 3 investments and that present additional information about valuation methodologies and unobservable inputs, if applicable, are located in the Schedules of Investments.
B. Federal Income Taxes-It is each Fund's policy to comply with the provisions of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its taxable income to its shareholders. Therefore, no federal income tax provision is required.
C. Distributions to Shareholders—Dividends to shareholders from net investment income and distributions from net realized capital gains, if any, are declared and paid annually by each Fund. Income dividends and capital gain distributions are determined in accordance with U.S. income tax regulations, which may differ from such amounts determined in accordance with GAAP.
D. Currency Translation-Assets and liabilities denominated in foreign currencies and commitments under foreign currency contracts are translated into U.S. dollars at the closing prices of such currencies each business day as quoted by one or more sources. Purchases and sales of investments are translated at the exchange rates prevailing when such investments are acquired or sold. Foreign denominated income and expenses are translated at the exchange rates prevailing when accrued. The portion of realized and unrealized gains and losses on investments that result from fluctuations in foreign currency exchange rates is not separately disclosed in the financial statements. Such amounts are included with the net realized and unrealized gains and losses on investment securities in the Statements of Operations. Recognized gains or losses attributable to foreign currency fluctuations on foreign currency denominated assets, other than investments, and liabilities are recorded as net realized gain (loss) and net change in unrealized appreciation (depreciation) on foreign currency transactions and foreign denominated assets and liabilities in the Statements of Operations.
E. Restricted Securities-The Funds may invest in securities that are subject to legal or contractual restrictions on resale. These securities generally may be resold in transactions exempt from registration or to the public if the securities are registered. Disposal of these securities may involve time-consuming negotiations and expense, and prompt sale at an acceptable price may be difficult. Information regarding restricted securities, if any, is included at the end of each Fund's Schedule of Investments.
F. Offsetting Assets and Liabilities-In the ordinary course of business, the Funds enter into transactions subject to enforceable master netting or other similar agreements. Generally, the right of offset in those agreements allows the Funds to offset any exposure to a specific counterparty with any collateral received or delivered to that counterparty based on the terms of the agreements. The Funds may pledge or receive cash and or securities as collateral for securities lending. For financial reporting purposes, the Funds present securities lending assets and liabilities on a gross basis in the Statements of Assets and Liabilities. Cash collateral received for securities lending in the form of money market fund investments, if any, at December 31, 2020 is presented in the Schedules of Investments and in the Statements of Assets and Liabilities. Non-cash collateral is disclosed in Note 9 (Securities Lending).
G. Other-Security transactions are accounted for on trade date. Realized gains and losses are determined based on the specific identification method. Dividend income is recorded on the ex-dividend date except that certain dividends from foreign securities are recognized upon notification of the ex-dividend date. Interest income, including amortization of premiums and discounts, is accrued as earned.

The Funds earn interest income on uninvested cash balances held at the custodian bank. Such amounts, if any, are presented as interest income in the Statements of Operations.

In the normal course of business, the Funds enter into contracts that contain a variety of general indemnifications. The Funds' maximum exposure under these agreements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Adviser believes the risk of loss under these arrangements to be remote.
Note 3-Investment Management and Other Agreements-The Adviser is the investment adviser to the Funds. The Adviser receives a management fee, calculated daily and payable monthly based on an annual rate of $0.50 \%$ of each Fund's average daily net assets (except for Oil Services ETF). The management fee rate for Oil Services ETF is $0.35 \%$. The Adviser has agreed, until at least May 1,2021 to waive management fees and assume expenses to prevent each Fund's total annual operating expenses (excluding acquired fund fees and expenses, interest expense, trading expenses, taxes and extraordinary expenses) from exceeding expense limitations listed in the table below.
The current expense limitations for the year ended December 31, 2020 are as follows:

| Fund | Expense <br> Limitations |
| :--- | :---: |
|  | $0.56 \%$ |
| Gold Miners ETF | 0.53 |
| Junior Gold Miners ETF | 0.56 |
| Low Carbon Energy ETF | 0.62 |
| Natural Resources ETF | 0.49 |
| Oil Refiners ETF | 0.59 |
| Oil Services ETF | 0.35 |
| Rare Earth/Strategic Metals ETF | 0.57 |
| Steel ETF | 0.55 |
| Unconventional Oil \& Gas ETF | 0.54 |
| Uranium+Nuclear Energy ETF | 0.60 |

Refer to Statement of Operations for the amounts waived/assumed by the Adviser.
In addition, Van Eck Securities Corporation, an affiliate of the Adviser, acts as the Funds' distributor (the "Distributor"). Certain officers and a Trustee of the Trust are officers, directors or stockholders of the Adviser and Distributor.

At December 31, 2020, the Adviser owned 2,500 shares of Gold Miners ETF.
Note 4-Capital Share Transactions-As of December 31, 2020, there were an unlimited number of capital shares of beneficial interest authorized by the Trust with no par value. Fund shares are not individually redeemable and are issued and redeemed at their net asset value per share only through certain authorized broker-dealers ("Authorized Participants") in blocks of shares ("Creation Units").

## VANECK VECTORS ETF TRUST

## NOTES TO FINANCIAL STATEMENTS

(continued)
The consideration for the purchase or redemption of Creation Units of the Funds generally consists of the in-kind contribution or distribution of securities constituting the Funds' underlying index ("Deposit Securities") plus a balancing cash component to equate the transaction to the net asset value per share of the Fund on the transaction date. Cash may also be substituted in an amount equivalent to the value of certain Deposit Securities, generally as a result of market circumstances, or when the securities are not available in sufficient quantity for delivery, or are not eligible for trading by the Authorized Participant. The Funds may issue Creation Units in advance of receipt of Deposit Securities subject to various conditions, including, for the benefit of the Funds, a requirement to maintain cash collateral on deposit at the custodian equal to at least $115 \%$ of the daily marked to market value of the missing Deposit Securities.

Authorized Participants purchasing and redeeming Creation Units may pay transaction fees directly to transfer agent. In addition, the Funds may impose variable fees on the purchase or redemption of Creation Units for cash, or on transactions effected outside the clearing process, to defray certain transaction costs. These variable fees, if any, are reflected in share transactions in the Statements of Changes in Net Assets.

Note 5-Investments-For the year ended December 31, 2020, purchases and sales of investments (excluding short-term investments and in-kind capital share transactions) and purchases and sales of investments resulting from in-kind capital share transactions (excluding short-term investments) were as follows:

| Fund | Purchases | Sales | In-kind Capital Share Transactions |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  |  | Purchases | Sales |

During the year ended December 31, 2020, Junior Gold Miners ETF and Low Carbon Energy ETF, utilized $\$ 128,602,802$ and $\$ 41,917,163$ of their capital loss carryovers available from prior years.

## VANECK VECTORS ETF TRUST

## NOTES TO FINANCIAL STATEMENTS

(continued)
During the year ended December 31, 2020, as a result of permanent book to tax differences, primarily due to the tax treatment of gains/losses from securities redeemed in-kind, the Funds incurred differences that affected distributable earnings and aggregate paid in capital by the amounts in the table below. Net assets were not affected by these reclassifications.

The Funds recognize the tax benefits of uncertain tax positions only where the position is "more-likely-than-not" to be sustained assuming examination by applicable tax authorities. Management has analyzed the Funds' tax positions, and has concluded that no liability for unrecognized tax benefits should be recorded related to uncertain tax positions taken on return filings for all open tax years. The Funds do not have exposure for additional years that might still be open in certain foreign jurisdictions. Therefore, no provision for income tax is required in the Funds' financial statements. However, the Funds are subject to foreign taxes on the appreciation in value of certain investments. The Funds provide for such taxes on both realized and unrealized appreciation.

The Funds recognize interest and penalties, if any, related to uncertain tax positions as income tax expense in the Statements of Operations. During the year ended December 31, 2020, the Funds did not incur any interest or penalties.

Note 7-Principal Risks—Non-diversified funds generally hold securities of fewer issuers than diversified funds (See Note 1) and may be more susceptible to the risks associated with these particular issuers, or to a single economic, political or regulatory occurrence affecting these issuers. The Funds may purchase securities on foreign exchanges. Securities of foreign issuers involve special risks and considerations not typically associated with investing in U.S. issuers. These risks include devaluation of currencies, currency controls, less reliable information about issuers, different securities transaction clearance and settlement practices, future adverse economic developments and political conflicts, or natural or other disasters, such as the recent coronavirus outbreak. Additionally, certain Funds may invest in securities of emerging market issuers, which are exposed to a number of risks that may make these investments volatile in price or difficult to trade. Political risks may include unstable governments, nationalization, restrictions on foreign ownership, laws that prevent investors from getting their money out of a country, sanctions and investment restrictions and legal systems that do not protect property risks as well as the laws of the United States. These and other factors can make emerging market securities more volatile and potentially less liquid than securities issued in more developed markets. Certain securities of Chinese issuers are, or may in the future become restricted, and the Funds may be forced to sell such restricted securities and incur a loss as a result.
The respiratory disease caused by a novel coronavirus, which has spread internationally and declared as a pandemic by the World Health Organization, has resulted in closing borders, quarantines, disruptions to supply chains and customer activity, loss of life, as well as general concern and uncertainty. The coronavirus has already negatively impacted the economies of many nations, individual companies, and the market. This pandemic is expected to have a continued impact in ways that cannot necessarily be foreseen presently.

A more complete description of risks is included in each Fund's Prospectus and Statement of Additional Information.
Note 8-Trustee Deferred Compensation Plan—The Trust has a Deferred Compensation Plan (the "Plan") for Trustees under which the Trustees can elect to defer receipt of their trustee fees until retirement, disability or termination from the Board of Trustees. The fees otherwise payable to the participating Trustees are deemed invested in shares of the Funds as directed by the Trustees.

The expense for the Plan is included in "Trustees' fees and expenses" in the Statements of Operations. The liability for the Plan is shown as "Deferred Trustee fees" in the Statements of Assets and Liabilities.
Note 9-Securities Lending-To generate additional income, each of the Funds may lend its securities pursuant to a securities lending agreement with the securities lending agent. Each Fund may lend up to $33 \%$ of its investments requiring that the loan be continuously collateralized by cash, cash equivalents, U.S. government securities, or any combination of cash and such securities at all times equal to at least $102 \%$ ( $105 \%$ for foreign securities) of the market value of securities loaned. Daily market fluctuations could cause the value of loaned securities to be more or less than the value of the collateral received. When this occurs, the collateral is adjusted and settled on the next business day. During the term of the loan, the Funds will continue to receive any dividends, interest or amounts equivalent thereto, on the securities loaned while receiving a fee from the borrower and or earning interest on the investment of the cash collateral. Such fees and interest are shared with the securities lending agent under the terms of the securities lending agreement. Securities lending income is disclosed as such in the Statements of Operations. Cash collateral is maintained on the Funds' behalf by the lending agent and is invested in the State Street Navigator Securities Lending Government Money Market Portfolio. Non-cash collateral consists of U.S. Treasuries and U.S. Government Agency securities, and is not disclosed in the Funds' Schedules of Investments or Statements of Assets and Liabilities as it is held by the agent on behalf of the Funds. The Funds do not have the ability to re-hypothecate those securities. Loans are subject to termination at the option of the borrower or the Funds. Upon termination of the loan, the borrower will return to the Fund securities identical to the securities loaned. The Funds bear the risk of delay in recovery of, or even loss of rights in, the securities loaned should the borrower of the securities fail financially. The value of loaned securities and related cash collateral, if any, at December 31, 2020 is presented on a gross basis in the Schedules of Investments and Statements of Assets and Liabilities. The following is a summary of the Funds' securities on loan and related collateral as of December 31, 2020:

| Fund | Market Value of Securities on Loan | Cash Collateral | Non-Cash Collateral | Total Collateral |
| :---: | :---: | :---: | :---: | :---: |

## VANECK VECTORS ETF TRUST

## NOTES TO FINANCIAL STATEMENTS

 (continued)Note 10-Bank Line of Credit—The Funds may participate in a $\$ 200$ million committed credit facility (the "Facility") to be utilized for temporary financing until the settlement of sales or purchases of portfolio securities, the repurchase or redemption of shares of the Funds at the request of the shareholders and other temporary or emergency purposes. The Funds have agreed to pay commitment fees, pro rata, based on the unused but available balance. Interest is charged to the Funds based on prevailing market rates in effect at the time of borrowings. During the year ended December 31, 2020, the following Funds borrowed under this Facility:

| Fund | Days Outstanding | Average Daily Loan Balance | Average Interest Rate |
| :---: | :---: | :---: | :---: |
| Agribusiness ETF | 146 | \$ 946,165 | 1.67\% |
| Gold Miners ETF | 149 | 5,734,792 | 1.75 |
| Junior Gold Miners ETF | 69 | 13,078,780 | 2.66 |
| Low Carbon Energy ETF | 94 | 311,430 | 1.43 |
| Natural Resources ETF | 157 | 148,344 | 1.76 |
| Oil Refiners ETF | 29 | 162,825 | 2.07 |
| Oil Services ETF | 127 | 1,068,194 | 1.93 |
| Rare Earth/Strategic Metals ETF | 265 | 1,177,800 | 1.83 |
| Steel ETF | 143 | 170,802 | 2.00 |

Outstanding loan balances as of December 31, 2020, if any, are reflected in the Statements of Assets and Liabilities.
Note 11-Share Split-The Board of Trustees approved a 1 for 20 reverse share split for Oil Services ETF, a 1 for 3 reverse share split for Rare Earth/Strategic Metals ETF, and a 1 for 10 reverse share split for Unconventional Oil \& Gas ETF. On April 15, 2020, shares began trading on a split-adjusted basis. The Statements of Changes in net Assets and Financial Highlights prior to April 15, 2020 have been adjusted to reflect these reverse share splits.
Note 12-Recent Accounting Pronouncements-The Funds adopted all provisions of the Accounting Standards Update No. 2018-13, Disclosure Framework-Changes to the Disclosure Requirements for Fair Value Measurement ("ASU 2018-13") that eliminate and modify certain disclosure requirements for fair value measurements. Based on management's evaluation, the adoption of the ASU 2018-13 had no material impact on the financial statements and related disclosures.

Note 13-Subsequent Event Review-The Funds have evaluated subsequent events and transactions for potential recognition or disclosure through the date the financial statements were issued.

At a meeting held on February 24, 2021, the Board of Trustees of the Trust approved changing VanEck Vectors Low Carbon Energy ETF benchmark index from the Ardour Global Index (Extra Liquid) to the MVIS Global Low Carbon Energy Index effective on or after April 26, 2021. As a result of this change they also approved changing the Funds investment objective and its principal investment strategy. The Fund will seek to replicate as closely as possible, before fees and expenses, the price and yield performance of the MVIS Global Low Carbon Energy Index.

To the Shareholders of VanEck Vectors Agribusiness ETF, VanEck Vectors Gold Miners ETF, VanEck Vectors Junior Gold Miners ETF, VanEck Vectors Low Carbon Energy ETF, VanEck Vectors Natural Resources ETF, VanEck Vectors Oil Refiners ETF, VanEck Vectors Oil Services ETF, VanEck Vectors Rare Earth/Strategic Metals ETF, VanEck Vectors Steel ETF, VanEck Vectors Unconventional Oil \& Gas ETF and VanEck Vectors Uranium+Nuclear Energy ETF and the Board of Trustees of VanEck Vectors ETF Trust

## Opinion on the Financial Statements

We have audited the accompanying statements of assets and liabilities of VanEck Vectors Agribusiness ETF, VanEck Vectors Gold Miners ETF, VanEck Vectors Junior Gold Miners ETF, VanEck Vectors Low Carbon Energy ETF, VanEck Vectors Natural Resources ETF, VanEck Vectors Oil Refiners ETF, VanEck Vectors Oil Services ETF, VanEck Vectors Rare Earth/Strategic Metals ETF, VanEck Vectors Steel ETF, VanEck Vectors Unconventional Oil \& Gas ETF and VanEck Vectors Uranium+Nuclear Energy ETF (collectively referred to as the "Funds") (eleven of the series constituting VanEck Vectors ETF Trust (the "Trust")), including the schedules of investments, as of December 31, 2020, and the related statements of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, the financial highlights for each of the five years in the period then ended and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of each of the Funds (eleven of the series constituting VanEck Vectors ETF Trust) at December 31, 2020, the results of their operations for the year then ended, the changes in their net assets for each of the two years in the period then ended and their financial highlights for each of the five years in the period then ended, in conformity with U.S. generally accepted accounting principles.

## Basis for Opinion

These financial statements are the responsibility of the Trust's management. Our responsibility is to express an opinion on each of the Funds' financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Trust in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.
We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Trust is not required to have, nor were we engaged to perform, an audit of the Trust's internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting, but not for the purpose of expressing an opinion on the effectiveness of the Trust's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 2020, by correspondence with the custodian and brokers or by other appropriate auditing procedures where replies from broker were not received. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

We have served as the auditor of one or more of the VanEck investment companies since 1999.
New York, New York
February 25, 2021

* Expressed as a percentage of the ordinary income distribution grossed up for foreign taxes.
** The foreign taxes paid represent taxes incurred by the Fund on income received by the Fund from foreign sources. Foreign taxes paid may be included in taxable income with an offsetting deduction from gross income or may be taken as a credit for taxes paid to foreign governments.
(a) A return of capital is not considered taxable income to shareholders. The portion of a distribution which is a dividend is includable in gross income while the portion of the distribution which is not a dividend shall be applied against and reduces the adjusted basis of the stock. Accordingly, shareholders who received these distributions should not include these amounts in taxable income, but instead should treat them as a reduction of the cost basis of the applicable shares upon which these distributions were paid.

Please consult your tax advisor for proper treatment of this information.

[^10]This report is intended for the Funds' shareholders. It may not be distributed to prospective investors unless it is preceded or accompanied by a VanEck Vectors ETF Trust (the "Trust") prospectus and summary prospectus, which includes more complete information. Investing involves substantial risk and high volatility, including possible loss of principal. An investor should consider the investment objective, risks, charges and expenses of the Fund carefully before investing. To obtain a prospectus and summary prospectus, which contains this and other information, call 800.826 .2333 or visit vaneck.com. Please read the prospectus and summary prospectus carefully before investing.

Additional information about the Trust's Board of Trustees/Officers and a description of the policies and procedures the Trust uses to determine how to vote proxies relating to portfolio securities are provided in the Statement of Additional Information. The Statement of Additional Information and information regarding how the Trust voted proxies relating to portfolio securities during the most recent twelve month period ending June 30 is available, without charge, by calling 800.826.2333, or by visiting vaneck.com, or on the Securities and Exchange Commission's website at http://www.sec.gov.

The Trust files its complete schedule of portfolio holdings with the Securities and Exchange Commission for the first and third quarters of each fiscal year on Form N-PORT. The Trust's Form N-PORT Filings are available on the Commission's website at http://www.sec.gov and may be reviewed and copied at the Commission's Public Reference Room in Washington, D.C. Information on the operation of the Public Reference Room may be obtained by calling 202.942.8090. The Funds' complete schedules of portfolio holdings are also available by calling 800.826.2333 or by visiting vaneck.com.

[^5]:    (a) Share activity has been adjusted to reflect the 1 for 20 reverse share split which took place on April 15, 2020 (See Note 11).
    (b) Share activity has been adjusted to reflect the 1 for 3 reverse share split which took place on April 15, 2020 (See Note 11).
    (c) Share activity has been adjusted to reflect the 1 for 10 reverse share split which took place on April 15, 2020 (See Note 11)

[^6]:    (a) Calculated based upon average shares outstanding
    (b) Total return is calculated assuming an initial investment made at the net asset value at the beginning of year, reinvestment of any dividends and distributions at net asset value on the dividend/distributions payment date and a redemption at the net asset value on the last day of the year. The return includes adjustments in accordance with U.S. generally accepted accounting principles and as such, the net asset values for financial reporting purposes and the returns based upon those net asset values may differ from the net asset values and returns for shareholder transactions. The return does not reflect the deduction of taxes that a shareholder would pay on Fund dividends/distributions or the redemption of Fund shares.
    (c) Portfolio turnover rates exclude securities received or delivered as a result of processing in-kind capital share transactions.

[^7]:    (a) Calculated based upon average shares outstanding
    (b) Total return is calculated assuming an initial investment made at the net asset value at the beginning of year, reinvestment of any dividends and distributions at net asset value on the dividend/distributions payment date and a redemption at the net asset value on the last day of the year. The return includes adjustments in accordance with U.S. generally accepted accounting principles and as such, the net asset values for financial reporting purposes and the returns based upon those net asset values may differ from the net asset values and returns for shareholder transactions. The return does not reflect the deduction of taxes that a shareholder would pay on Fund dividends/distributions or the redemption of Fund shares.
    (c) Portfolio turnover rates exclude securities received or delivered as a result of processing in-kind capital share transactions.
    (d) The amount shown for a share outstanding does not correspond with the aggregate net gain (loss) on investments for the year due to the timing of sales and repurchases of shares in relation to fluctuating market values of the investments of the Fund.

[^8]:    (a) Calculated based upon average shares outstanding
