## **GENERAL INFORMATION (continued)**

### **Establishment and Organisation**

The following information is derived from and should be read in conjunction with the full text and definitions section of the Prospectus.

TENDERCAPITAL FUNDS PLC (the "Company") is an open ended investment company with variable capital incorporated on 8 November 2012 under the Companies Acts 1963 to 2012. The Company has been authorised by the Central Bank pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 ('UCITS Regulations 2011').

As at 8 March 2013, the Sub-Fund Tendercapital US Turnaround was launched.

As at 28 June 2013, four new Sub-Funds were launched as outlined below:

Tendercapital Secular Euro (TCSE)

Tendercapital Bond Two Steps (TCBTS)

Tendercapital Cash 12 Months (TCCM)

Tendercapital Income Premium (TCIP)

Effective 28 June 2013, TENDERCAPITAL FUNDS PLC acquired all of the assets of the following Plurima Sub-Funds for which Tendercapital Limited was already the Investment Manager:

Plurima Tender Capital Crystal Premium Fund (PPCP)

Plurima Tender Capital Bond Premium Fund (PPBP)

Plurima Tender Capital Cash Premium Fund (PTCCP)

Plurima Tender Capital Income Fund (PTCID)

Launched 12 August 2009

Launched 13 July 2010

Launched 23 January 2012

Launched 1 March 2012

As at 28 June 2013, Plurima acquired Sub-Funds were merged with the newly launched Tendercapital Sub-Funds as outlined below:

Plurima Tender Capital Crystal Premium Fund merged with Tendercapital Secular Euro Plurima Tender Capital Bond Premium Fund merged with Tendercapital Bond Two Steps Plurima Tender Capital Cash Premium Fund merged with Tendercapital Cash 12 Months Plurima Tender Capital Income Fund merged with Tendercapital Income Premium

At 30 June 2013, five separate active investment portfolios ('Sub-Funds') were authorised by the Central Bank of Ireland. These Sub-Funds are:

Tendercapital Secular Euro (TCSE)

Launched 28 June 2013

Tendercapital Bond Two Steps (TCBTS)

Launched 28 June 2013

Tendercapital Cash 12 Months (TCCM)

Launched 28 June 2013

Tendercapital Income Premium (TCIP)

Launched 28 June 2013

Launched 28 June 2013

Launched 28 June 2013

Launched 8 March 2013

Additional Sub-Funds may, with the prior consent of the Central Bank of Ireland and approval of the Trustee, be added by the Manager.

#### **Investment Objectives**

The assets of a Sub-Fund will be invested separately in accordance with the investment objectives and policies of that Sub-Fund, which are set out in a Supplement to the Prospectus.

### **INVESTMENT MANAGERS' REPORTS**

#### Tendercapital Secular Euro\*

### Semi-Annual performance

Tendercapital Secular Euro Class A +9.12% Tendercapital Secular Euro Class B +9.65%

#### Fund manager Comment:

The first 6 months of 2013 were characterised by high volatility in the stock markets especially in emerging markets due to the ongoing European debt crisis in the peripheral countries which are struggling with structural reforms in a weak political context. Europe accounts for 25% of world GDP and is the main trading partner of the United States of America and a reference point for many emerging states. In this economic environment European and U.S. stock markets reacted positively thanks to the stimulus of monetary policy which achieved lower costs of borrowing in the major economies of the world while waiting for a durable and sustainable economic recovery. The European stock market represented by the Eurostoxx 600 reported a half-year gain of 1.91% with the best sector, pharmaceuticals with a gain of 22.12% and the worst, basic resources with a loss of 27.4%. The U.S. stock market represented by the S&P 500 reported a half-year gain of 14.25% with the best sector, computers and electronics with a gain of 102.62% and the worst sector, gold with a loss of 34.58%. The Fund adopts mainly a European Secular approach, but also US Turnaround approach, without a reference benchmark, and reported a half-year gain of 9.12% for Class A and 9.65% for Class B.

Tendercapital Limited Date: 17 August 2013

#### Tendercapital Bond Two Steps\*

## **Semi-Annual performance**

Tendercapital Bond Two Steps +0.13%

## Fund manager Comment:

The European bond market in the first six months of 2013 showed high volatility and diversified yields according to the different maturities, issuers, credit ratings and the countries of issuance, such as core and non-core. In detail, the core government bonds reported an average loss around 1.5%, while government bonds non-core gained on average 3%, and investment grade corporate bonds managed a performance between -0.5% and +0.5%. The Tendercapital bond two steps fund sought capital appreciation primarily by investing in financials, corporate bonds, and steepeners, seeking to achieve a positive performance in a market trend characterized by rising interest rates. The fund recorded a semi-annual gain of 0.13%.

\*Effective 28 June 2013 Plurima Tender Capital Bond Premium Fund merged with Tendercapital Bond Two Steps. Tendercapital Bond Two Steps launched on this date.

Tendercapital Limited Date: 17 August 2013

<sup>\*</sup> Effective 28 June 2013 Plurima Tender Capital Crystal Premium Fund merged with Tendercapital Secular Euro. Tendercapital Secular Euro launched on this date.

## **INVESTMENT MANAGERS' REPORTS (continued)**

#### **Tendercapital Cash 12 Months\***

#### **Semi-Annual performance**

Tendercapital Cash 12 Months +0.68%

#### Fund manager Comment:

The European bond market in the first six months of 2013 showed high volatility and diversified yields according to the different maturities, issuers, credit ratings and the countries of issuance, such as core and non-core. In detail, the core government bonds reported an average loss around 1.5%, while government bonds non-core gained on average 3%, and investment grade corporate bonds managed a performance between -0.5% and +0.5%. The fund Tendercapital cash 12 months invested in bonds with maturities within a 12 month rolling range, which produced low volatility and a half-year gain of 0.68%, achieved mainly by investing in investment grade financials (banks) bonds.

\*Effective 28 June 2013 Plurima Tender Capital Cash Premium Fund merged with Tendercapital Cash 12 Months. Tendercapital Cash 12 Months launched on this date.

Tendercapital Limited Date: 17 August 2013

#### Tendercapital Income Premium\*

#### **Semi-Annual performance**

Tendercapital Income Premium +1.28%

## Fund manager Comment:

The European bond market in the first six months of 2013 showed high volatility and diversified yields according to the different maturities, issuers, credit ratings and the countries of issuance, such as core and non-core. In detail, the core government bonds reported an average loss around 1.5%, while government bonds non-core gained on average 3%, and investment grade corporate bonds managed a performance between -0.5% and +0.5%. The Tendercapital Income premium fund sought price stability and achieved an annual coupon of around 1.5% by investing primarily in industrial corporate bonds and steepener bonds. The fund posted a semi-annual gain of 1.28%.

\*Effective 28 June Plurima Tender Capital Income Fund merged with Tendercapital Income Premium. Tendercapital Income Premium launched on this date.

Tendercapital Limited Date: 17 August 2013

## **INVESTMENT MANAGERS' REPORTS (continued)**

### Tendercapital US Turnaround\*

#### **Semi-Annual performance**

Tendercapital US Turnaround Class A +3.39% Tendercapital US Turnaround Class AI +4.81%

## Fund manager Comment:

The first 6 months of 2013 were characterised by high volatility in the stock markets especially in emerging markets due to the ongoing European debt crisis in the peripheral countries which are struggling with structural reforms in a weak political context. Europe accounts for 25% of world GDP and is the main trading partner of the United States of America and a reference point for many emerging states. In this economic environment European and U.S. stock markets reacted positively thanks to the stimulus of monetary policy which achieved lower costs of borrowing in the major economies of the world while waiting for a durable and sustainable economic recovery. The European stock market represented by the Eurostoxx 600 reported a half-year gain of 1.91% with the best sector, pharmaceuticals with a gain of 22.12% and the worst, basic resources with a loss of 27.4%. The U.S. stock market represented by the S&P 500 reported a half-year gain of 14.25% with the best sector, computers and electronics with a gain of 102.62% and the worst sector, gold with a loss of 34.58%. The US Turnaround Fund adopts a thematic approach on the American market, which is mainly investing in turnaround companies, and has no reference benchmark. The Fund started in 8 March 2013, and reported a quarterly gain of 3.39% for Class A and 4.81% for Class AI.

Tendercapital Limited Date: 17 August 2013

<sup>\*</sup> The Sub-Fund launched 8 March 2013.

TCIP\*\*\*\* - Effective 28 June 2013 Plurima Tender Capital Income Fund merged with Tendercapital Income Premium. Tendercapital Income Premium launched on this date.

TCUT\*\*\*\*\* - Tendercapital US Turnaround launched 8 March 2013.

## 1. Principal Accounting Policies

#### a) Basis of Accounting

The financial statements are prepared in accordance with accounting standards generally accepted in Ireland and the provisions of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 ('UCITS Regulations 2011') and the Irish Companies Acts, 1963 to 2012. The financial statements are prepared under the historical cost convention as modified by the revaluation of financial assets and liabilities held at fair value through profit or loss. The financial statements are prepared in Euro (€).

The Fund has availed of certain exemptions contained in FRS 1 (revised) 'Cash Flow Statements' and has presented a Statement of Changes in Net Assets Attributable to Shareholders in place of a cash flow statement. The format and certain wordings of the financial statements have been adapted from those contained in the Financial Reporting Standard No.3 ("FRS 3") "Reporting Financial Performance" so that; in the opinion of the Directors, they more appropriately reflect the nature of the Trust's investment business.

### b) Financial Instruments

The significant accounting policies followed by the Company are as follows;

#### (i) Classification

The Fund classified its assets and liabilities into the categories below in accordance with FRS 26.

Financial assets and liabilities at fair value through profit or loss: The category of financial assets and liabilities at fair value through profit or loss is sub-divided into two categories (designated at fair value through profit or loss and held for trading) per FRS 26. The Fund has classified all its investments as held for trading for the period ended 30 June 2013. These include equities and investment funds. Financial Assets and Liabilities at fair value through profit or loss are measured at fair value at the period end with changes in fair value recognised in the Statement of Operations.

## (ii) Initial Measurement

Purchases and sales of financial instruments are accounted for at trade date. Realised gains and losses on disposals of financial instruments are calculated using average cost.

Financial instruments categorised at fair value through profit or loss are measured initially at fair value, with transaction costs for such instruments being recognised directly in the Statement of Operations.

## (iii) Subsequent measurement

Listed securities – any asset listed and regularly traded on a Recognised Exchange and for which market quotations are readily available is valued at the bid market quotation on 30 June 2013.

Collective investment schemes - Shares in other collective investment schemes not valued pursuant to paragraph above are valued by reference to the latest available Net Asset Value of the shares of the relevant collective investment scheme.

*Unlisted securities* - Assets not listed, or traded on any stock exchange or over-the-counter market are valued at their probable realisation value as determined on the basis of broker quotes by the Administrator in consultation with the relevant Portfolio Manager.

Derivative instruments – exchange traded derivative instruments are valued at the close of business on 30 June 2013 at the settlement price for such instruments on relevant markets. Off-exchange derivative instruments are valued at the close of business on the Valuation Day at the settlement price as provided by the counterparty and the counterparty values these instruments daily. Realised and unrealised gains and losses on derivatives are accounted for in the Statement of Operations.

Cash balances comprise current deposits with banks.

## 1. Principal Accounting Policies (continued)

#### b) Financial Instruments (continued)

#### (iii) Subsequent measurement (continued)

When fair values of listed equity and debt securities, as well as publicly traded derivatives at the reporting date, are based on quoted market prices or binding dealer price quotations (bid price for long positions and ask price for short positions), without any deduction for transaction costs, the instruments are included within level 1 of the hierarchy. When the Company has assets and liabilities with offsetting market risks, it uses mid-market prices as a basis for establishing fair values for the off-setting risk positions and applies the bid or ask price to the net open position as appropriate.

#### (iv) Derecognition

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire. It also derecognises a financial asset when it transfers the financial assets and the transfer qualifies for derecognition in accordance with FRS 26. The Company derecognises a financial liability when the obligation specified in the contract is discharged, cancelled or expires.

#### c) Net Asset Value

The Net Asset Value of a Sub-Fund and the Net Asset Value per Share of each class of a Sub-Fund are calculated on each Dealing Day by ascertaining the value of the assets of the Sub-Fund and deducting from such value the liabilities of the Sub-Fund on such Dealing Day.

#### d) Interest Income and Interest Expense

Interest revenue is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount.

The effective interest method is a method of calculating the amortised cost of a financial asset and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset, or, where appropriate, a shorter period. Income is recognised on an effective interest basis for debt instruments other than those financial assets classified as at fair value through profit or loss.

## e) Operating Expenses

The Company pays out of the assets of each Sub-Fund all normal operating expenses including Trustee fees, Administration fees, Portfolio Manager fees, Management fees, Performance fees, NAV publication and Circulation fees, Audit and other professional fees and stamp duties and charges incurred on the acquisition and realisation of investments. Such costs are generally expensed in the period to which they relate.

All expenses, including management fees are recognised in the statement of operations on an accrual basis.

### f) Dividend Income

Dividends are credited to the Statement of Operations on the dates on which the relevant securities are listed as "ex-dividend". Income is shown gross of any non-recoverable withholding taxes, which is disclosed separately in the Statement of Operations, and net of any tax credits.

#### g) Functional and Presentation Currency

The functional currencies of the Company are based on the primary economic environment in which the Fund operates. It is determined by the currency in which funds from financing activities are generated.

## 1. Principal Accounting Policies (continued)

#### g) Functional and Presentation Currency (continued)

The financial statements are presented in Euro, the functional currency of the Company. Assets and liabilities in all other currencies different from the functional currency are translated into Euro based on the exchange rates in effect at the period end. As at 30 June 2013 all Sub-Funds are presented in Euro.

Income and expenses denominated in all other currencies different from the functional currency are translated based on the exchange rates in effect at the date of the transaction. Foreign currency translation gains or losses are credited or charged to the Statement of Operations.

The Company does not isolate that portion of the results of operations resulting from changes in foreign exchange rates on investments from the portion resulting from changes in market prices. Such fluctuations are included in the net realised and unrealised gains or losses on investments.

## h) Classification of Shares

The Company provides its Shareholders with the right to redeem their interest in the Company at any dealing date for cash equal to their proportionate share of the net asset value of the Company. Under FRS 25, this right represents in substance a liability of the Company to Shareholders. The liability to Shareholders is presented in the Statement of Assets and Liabilities as "Net Assets attributable to Shareholders" and is determined based on the net assets of the Sub-Fund after deducting all other liabilities.

## i) Transaction costs

Transaction costs, including brokerage fees, are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument. When a financial asset or financial liability is recognised initially, an entity shall measure it at its fair value through profit or loss with transaction costs for such instruments being recognised directly in the Statement of Operations. Transaction costs charged by the Custodian on the settlement of purchases and sales of investments are disclosed within sub-custodian fees in the Statement of Operations for each Sub-Fund.

#### 2. Taxation

Under current Irish law and practice, on the basis that the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, it is not chargeable to Irish tax on its relevant income or relevant gains. However, tax can arise on the happening of a Chargeable Event in the Company. A Chargeable Event includes any distribution or dividend payments to Shareholders, disposals, redemptions, cancellations, encashment or assignment of Shares in the Company. No tax will arise on the Company in respect of Chargeable Events in respect of a Shareholder who is neither Irish resident nor Irish ordinarily resident at the time of the Chargeable Event provided that a Relevant Declaration in the form authorised by the Irish tax authorities is in place. In the absence of a Relevant Declaration, there is a presumption that the investor is Irish resident or Irish ordinarily resident.

Dividends, interest and capital gains (if any) which the Company receive with respect to its investments (other than securities of Irish issuers) may be subject to taxes, including withholding taxes, in the countries in which the issuers of investments are located.

Dividends received by the Company from investment in Irish equities may be subject to Irish dividend withholding tax at the standard rate of corporation tax (currently 12.5%). However, the Company can make a declaration to the payer that it is a collective investment undertaking beneficially entitled to the dividends which will entitle the Company to receive such dividends without deduction of Irish dividend withholding tax.

#### 3. Fees

## **Investment Manager's Fees**

Tendercapital Limited has been appointed Investment Manager to the Company. The Investment Manager is responsible for the general management and administration of the Company's affairs.

## Tendercapital Secular Euro

The Investment Manager shall be entitled to receive out of the assets of the Sub-Fund an annual fee, accrued on each Dealing Day and payable monthly in arrears, at an annual rate of up to and not exceeding (i) 1.8% of the Net Asset Value of the Retail Accumulating Share Class; and (ii) 1.2% of the Net Asset Value of the Retail Accumulating B Share Class (the Capped Fee). The Investment Manager is also entitled to be reimbursed out of the assets of the Sub-Fund for the reasonable out-of-pocket costs and expenses incurred by the Investment Manager in the performance of its duties (plus VAT thereon, if any).

#### Tendercapital Bond Two Steps

The Investment Manager shall be entitled to receive out of the assets of the Sub-Fund an annual fee, accrued on each Dealing Day and payable monthly in arrears, at an annual rate of up to and not exceeding 1% of the Net Asset Value of each Share Class (the Capped Fee). The Investment Manager is also entitled to be reimbursed out of the assets of the Sub-Fund for the reasonable out-of-pocket costs and expenses incurred by the Investment Manager in the performance of its duties (plus VAT thereon, if any).

#### Tendercapital Cash 12 Months

The Investment Manager shall be entitled to receive out of the assets of the Sub-Fund an annual fee, accrued on each Dealing Day and payable monthly in arrears, at an annual rate of up to and not exceeding 0.35% of the Net Asset Value of each Share Class (the Capped Fee). The Investment Manager is also entitled to be reimbursed out of the assets of the Sub-Fund for the reasonable out-of-pocket costs and expenses incurred by the Investment Manager in the performance of its duties (plus VAT thereon, if any).

## Tendercapital Income Premium

The Investment Manager shall be entitled to receive out of the assets of the Sub-Fund an annual fee, accrued on each Dealing Day and payable monthly in arrears, at an annual rate of up to and not exceeding 1% of the Net Asset Value of each Share Class (the Capped Fee). The Investment Manager is also entitled to be reimbursed out of the assets of the Sub-Fund for the reasonable out-of-pocket costs and expenses incurred by the Investment Manager in the performance of its duties (plus VAT thereon, if any).

#### Tendercapital US Turnaround

The Investment Manager shall be entitled to receive out of the assets of the Sub-Fund an annual fee, accrued on each Dealing Day and payable monthly in arrears, at an annual rate of up to and not exceeding (i) 1.8% of the Net Asset Value of the Retail Accumulating Share Class; and (ii) 0.6% of the Net Asset Value of the Institutional Accumulating Share Class (the Capped Fee). The Investment Manager is also entitled to be reimbursed out of the assets of the Sub-Fund for the reasonable out-of-pocket costs and expenses incurred by the Investment Manager in the performance of its duties (plus VAT thereon, if any).

Subject to the Capped Fee, the Investment Manager may, with the agreement of the Directors and with prior notification to the Administrator, waive, reduce or increase all or part of the investment management fee charged to certain Shareholders and accordingly may differentiate between Shareholders in the Sub-Fund in that regard. Any such waiver or reduction shall be effected by way of a cash rebate paid by or on behalf of the Investment Manager to the relevant Shareholder's account. The Investment Manager will determine the rebate amount in each case, which will not exceed the Capped Fee, based on the assets invested in the Sub-Fund or a Share Class thereof, and accordingly, the investment management fee charged to certain Shareholders may be reduced or increased in accordance with the amount of fees rebated to the relevant Shareholders subject to the applicable Capped Fee.

## 3. Fees (continued)

#### **Performance Fee**

The Investment Manager will be entitled to receive out of the assets of the Company a performance fee in respect of each Share Class (the Performance Fee) calculated on a per Share basis so that each Share is only charged a Performance Fee which equates with that Share's performance. Generally this method of calculation is intended to ensure so far as possible (and with respect to each Class of Shares) that (i) any Performance Fee paid to the Investment Manager is charged only to those Shares which have appreciated in value, (ii) all holders of Shares of the same Class have the same amount of capital per Share at risk in the Company and (iii) all Shares of the same Class have the same Net Asset Value per Share.

As of the first Dealing Day following the close of the Initial Offer Period for the relevant Share Class (First Calculation Period) and for each subsequent Dealing Day (each Dealing Day being a Calculation Period), for each Calculation Period, the Investment Manager shall be entitled to receive out of the assets of the Company attributable to the relevant Share Class a Performance Fee equal to 20% of the amount by which the Gross Asset Value per Share (1) exceeds the Relevant Index (2) as outlined below and accordingly, the positive difference between:

- the percentage increase in the Gross Asset Value per Share (expressed in the Base Currency) on the relevant Dealing Day for the Calculation Period (i) from the Initial Issue Price during the first calendar month from the First Calculation Period (the First Month); (ii) with effect from the first Calculation Period following the First Month, from the Gross Asset Value per Share on the corresponding Dealing Day which is one calendar month immediately preceding the relevant Dealing Day for the Calculation Period; and
- 2. the percentage increase in the value of the EONIA Total Return Index + 2% (the Relevant Index) (expressed in the Base Currency) on the relevant Dealing Day for the Calculation Period (i) from the value of the Relevant Index (expressed in the Base Currency) on the closing date of the Initial Offer Period during the First Month; (ii) with effect from the first Calculation Period following the First Month, from the value of the Relevant Index on the corresponding Dealing Day which is one calendar month immediately preceding the relevant Calculation Period, calculated as follows:
- (i) the percentage increase in the Gross Asset Value per Share of the relevant Share Class for each Calculation Period is computed (i) during the First Month, by comparing the Gross Asset Value per Share on the Dealing Day for the Calculation Period to the Initial Issue Price per Share; (ii) for each Calculation Period following the First Month, by comparing the Gross Asset Value per Share for the relevant Dealing Day to the Gross Asset Value per Share on the corresponding Dealing Day which is one calendar month immediately preceding the relevant Calculation Period (A);
- (ii) the percentage increase in the Relevant Index for each Calculation Period for the relevant Share Class is computed (i) during the First Month, by comparing the value of the Relevant Index (converted into the Base Currency) on each Dealing Day to the value of the Relevant Index (converted into the Base Currency) on the closing date of the Initial Offer Period; (ii) for each Calculation Period following the First Month, by comparing the value of the Relevant Index (converted into the Base Currency) on the Dealing Day for the Calculation Period to the value of the Relevant Index (converted into the Base Currency) on the corresponding Dealing Day which is one calendar month immediately preceding the relevant Calculation Period (B);

### 3. Fees (continued)

## Performance Fees (continued)

- (iii) A is then compared to B and the Investment Manager is only entitled to a Performance Fee if A is a positive figure and if A is greater than B. Furthermore, where a Performance Fee is payable and B is a negative figure, B is deemed to be equal to zero;
- (iv) Where A is a positive figure and is greater than B for a Calculation Period, as A and B will reflect the performance of the Gross Asset Value and the Relevant Index respectively over the course of the preceding calendar month, in order to ascertain the amount of the Performance Fee to be accrued on the Dealing Day or the Calculation Period, the difference between A and B will be annualised by multiplying the amount of the difference by 12 and diving the amount by the number of Dealing Days in a calendar year (250) and that amount shall be multiplied by the number of Shares in the Class determined as at the relevant Dealing Day and by the Net Asset Value per Share determined as at Valuation Point for the relevant Dealing Day;
- the Performance Fee shall be calculated by the Administrator (subject to the verification by the Custodian);
- (vi) the Performance Fee determined in this manner is accrued daily on a pro quota basis from the Class, starting from the First Calculation Period and shall be payable to the Investment Manager monthly in arrears;

Included in the calculation shall be net realised and unrealised capital gains plus net realised and unrealised capital losses as at the end of each Calculation Period. As a result, Performance Fees may be paid on unrealised gains which may subsequently never be realised.

In calculating the Performance Fee, under-performance in any previous Calculation Period against the Relevant Index is not carried forward and, therefore, does not have to be made up before a Performance Fee can be paid.

Gross Asset Value per Share is calculated using the following formula suggested by the Association of Italian Company Management Companies (Assogestioni):

Q1(t) = Q1(t-1) x ( 
$$[NAV(t) \times N(t)] + OG(t) + CG(t)$$
 ) (  $[NAV(t-1) \times N(t)] + OG(t-1)$  )

Where:

Q1(t) is the Company's Gross Asset Value per Share on the previous Dealing Day;

NAV(t) is the Net Asset Value per Share on the previous Dealing Day; N(t) is the number of Shares in issue on the previous Dealing Day;

OG(t) is the cumulative amount of the investment management fees from the beginning of

the month to the previous Dealing Day;

CG(t) is the amount of the investment management fees paid on the previous Dealing

Day.

CG(t) is always equal to zero except in the day in which the investment management fees

are effectively paid (the second Business Day of each month).

## **Custodian Fee**

The Custodian shall be entitled to receive out of the assets of the Company an annual fee, accrued on each Dealing Day and calculated and payable monthly in arrears, at an annual rate of up to 0.02% of the Net Asset Value of the Company (plus VAT thereon, if any) subject to a minimum annual fee of €10,000. The Custodian shall also be entitled to be reimbursed for the fees paid by the Custodian to any subcustodian and agreed upon transactions charges (which in all cases shall be charged at normal commercial rates) sand other out-of-pocket expenses out of the assets of the Company (plus VAT thereon, if any).

## 3. Fees (continued)

#### **Audit Fees**

Audit fees for the period amounted to €2,343.

#### **Directors Fees**

Unless and until determined from time to time by the Company in general meeting, the ordinary remuneration of each Director shall be determined from time to time by resolution of the Directors. The Directors will be entitled to remuneration for their services as directors provided however that the aggregate emoluments of such Directors shall not exceed €50,000 (excluding VAT) or such other amount as may be approved by a resolution of the Directors or the Shareholders in general meeting. It is expected that for the first 12 months following the launch of the Company, the aggregate remuneration of the Directors will not exceed €25,000 (excluding VAT). In addition, all of the Directors will be entitled to be reimbursed out of the assets of each Fund for their reasonable out of pocket expenses incurred in discharging their duties as directors, including all travelling, hotel and other out of pocket expenses properly incurred by them in connection with their attendance at meetings of Directors or committees established by the Directors or separate meetings of the holders of any Class of Shares of the Company or otherwise in connection with the discharge of their duties.

#### 4. Administrator's Fees

The Administrator shall be entitled to receive out of the assets of the Company an annual fee, accrued on each Dealing Day and calculated and payable monthly in arrears, at an annual rate of up to 0.45% of the Net Asset Value of the Company (plus VAT thereon), if any subject to an annual minimum fee of €20,000. The Administrator is also entitled to a fee of €10,000 for the provision of registrar and transfer agency services to the Company plus additional fees charged at normal commercial rates where the scope of the services exceeds the thresholds initially agreed. The Administrator is also entitled to be repaid all of its reasonable agreed upon transaction and other charges (which will be at normal commercial rates) and other out-of-pocket expenses out of the assets of the Company (plus VAT thereon, if any).

#### 5. Related Parties

Financial Reporting Standard 8 'Related Party Transactions' requires the disclosure of information relating to material transactions with parties who are deemed to be related to the reporting entity.

Alessandro Chiarini and Moreno Zani are Directors of Tendercapital Limited, which is the Company's Investment Manager. As such, these two Directors have a business interest in services provided to the Company. During the period, Director fees of €9,041 were charged to the Company. Director's fees payable at 30 June 2013 amounted to €9,041.

Although not deemed to be related parties under Irish GAAP as they do not exercise significant influence over the activities of the Company, UCITS Notice 14 also deems a "Custodian" and its "associated or group companies" to be related parties to the Company. As such, RBC Investor Services Bank S.A, the Custodian, and RBC Investor Services Ireland Limited, the Administrator, are related parties to the Company. During the period, RBC Investor Services Bank S.A. and RBC Investor Services Ireland Limited earned fees for provision of custody and administration services to the Company as disclosed in the Statement of Operations.

#### 6. Efficient Portfolio Management

Where considered appropriate, a Sub-Fund may utilise financial derivative techniques and instruments for efficient portfolio management and/or to protect against foreign exchange risks, subject to the conditions and within the limits laid down by the Central Bank of Ireland. These techniques and instruments include, but are not limited to futures, options, swaps and forward foreign exchange contracts.

During the period, the Company entered into forwards. The purpose of these forwards contracts was to provide a cross currency hedge whereby the Sub-Funds denominated in Euro but investing in other currencies were partially protected against adverse movements in the exchange rate with those currencies or as an alternative to investing in the cash market, details of which are disclosed in Note 12.

#### 7. Financial Instruments and Associated Risks

The principal risks arising from the Sub-Funds financial instruments are set out as follows.

#### Market risk

Some of the recognised exchanges on which the Sub-Fund may invest may prove to be illiquid or highly volatile from time to time and this may affect the price at which the Sub-Fund may liquidate positions to meet repurchase requests or other funding requirements. The trading and settlement practices on some of the recognised exchanges on which the Sub-Fund may invest may not be the same as those in more developed markets, which may increase settlement risk and/or result in delays in realising investments made by the Sub-Fund. Where the Sub-Fund acquires or values securities on the over-the-counter market there is no guarantee that the Sub-Fund will be able to realise such securities at that valuation price due to the nature of the over-the-counter market.

Market risk embodies the potential for both losses and gains and includes currency risk, interest rate risk and price risk.

### **Tendercapital Secular Euro**

The Sub-Fund seeks to produce positive returns with medium/high volatility. The primary investment strategy of the Sub-Fund is to seek to identify and understand trends regarding, but not limited to, humanity (such as demographic trends, population growth/decline, immigration/emigration), production cycles (low, mid, high business production cycles), economic developments (technological enhancements, new technologies, internet, cloud computing, green technology) or country specific (gross domestic product (GDP) growth rates), with the objective of identifying and investing in those companies that could potentially benefit from the trends analysed. The strategy for allocating the Sub-Fund's investments will also be based on the Investment Manager's assessment of the market and the assets to which exposure is sought.

The Sub-Fund intends to seek to achieve its investment objective primarily through investing up to 100% of its Net Asset Value in Euro denominated equities and equity related securities, across all industries and capitalizations, but may also invest in liquid assets and as further outlined below.

The Sub-Fund may, directly or indirectly, invest in a diversified portfolio of equity and equity-related securities (including, options, index option strategies, convertible bonds, shares, warrants, and depository receipts) primarily listed or traded on a Regulated Market in Europe.

The Fund may also directly invest up to 10% of its Net Asset Value in aggregate in (i) equity and equity related securities, which may be listed or traded on other Regulated Markets and may or may not be denominated in Euro; and/or (ii) collective investment schemes (CIS), including exchange traded funds. The CIS in which the Fund may invest will be compatible with the investment objective and policy of the Fund and any such investment will be in accordance with the Central Bank's requirements.

#### **Tendercapital Bond Two Steps**

The investment objective of the Sub-Fund is to achieve a positive return over the medium term, primarily through investments in a diversified portfolio of debt securities mainly denominated in Euro and listed or traded on one or more Recognised Exchanges but with some limited capacity to take equity exposures, as outlined below.

The Sub-Fund will invest typically in (a) fixed income and variable rate debt securities including senior notes, subordinated debt and structured notes; and (b) fixed and variable rate convertible and non-convertible bonds, bonds with warrants, negotiable credit securities (traded on the French markets for titres de creances negotiables, the over-the counter markets in negotiable debt instruments), commercial paper, bankers acceptances, certificates of deposit, medium term notes, asset and mortgage backed securities, collateralised debt and other securitisation instruments and securities or instruments of a similar nature issued or guaranteed by any OECD government and/or by corporate or other issuers (including special purpose vehicles). Structured notes in which the Sub-Fund may invest are floaters (i.e. floating rate notes or "FRNs"), step up floaters, (FRNs where the coupon payment can be increased upon certain occurrences) and convertible bonds and may embed a derivative component with the derivative component being on debt or equity securities, a basket or baskets of or indices of debt or equity securities or on interest rates.

## 7. Financial Instruments and Associated Risks (continued)

#### Market risk (continued)

### **Tendercapital Bond Two Steps (continued)**

The Sub-Fund may invest up to 10% of its net asset value in a diversified portfolio of equity securities, directly and/or indirectly (indirectly would include, for example, convertible bonds, warrants, collective investment schemes or financial derivative instruments of the type referred to under "Use of Derivatives" below). The primary means of obtaining equity exposure will be through convertible bonds and warrants. The use of financial derivatives to generate equity exposure will not leverage the Sub-Fund and the 10% of net asset value limit is the aggregate limit on equity investment both direct and indirect. All of the securities in which the Sub-Fund invests will be listed or traded on one or more Recognised Exchanges. No more than 30% of the net asset value of the Sub-Fund shall be invested in debt securities rated below investment grade. All remaining debt securities in which the Sub-Fund may invest will be rated investment grade.

The Sub-Fund may also hold or maintain ancillary liquid assets, including but not limited to, time deposits and variable rate demand notes with a maturity of less than one week issued by an entity with a credit rating of at least minimum credit rating of A2/P2 or equivalent.

The Sub-Fund may invest up to 10% of net assets, in aggregate, in collective investment schemes in accordance with the Central Bank's Guidance Note 2/03 where the exposures provided through such investment is consistent with the Sub-Fund's objective as outlined above. The Sub-Fund may also, subject to the conditions and limits laid down by the Central Bank, utilise repurchase/reverse repurchase agreements

## **Tendercapital Cash 12 Months**

The investment objective of the Sub-Fund is to generate income while preserving the value of capital.

The Sub-Fund aims to achieve its investment objective by investing, inter alia, directly or indirectly (through investment in collective investment schemes or financial derivative instruments), in the following types of instruments:

- Short-term (with a maturity of less than 12 months) Euro fixed income and variable rate securities (such as treasury bills, commercial paper and certificates of deposit) issued or guaranteed by EU or non/EU corporate entities and/or EU sovereign and supranational entities;
- Short-term (with a maturity of less than 12 months) fixed and variable rate bonds, convertible bonds, commercial paper, bankers acceptances, certificates of deposit, medium term notes, asset and mortgage backed securities, collateralised debt, exchange rate obligations and other securitisation instruments and securities or instruments of a similar nature issued or guaranteed by any OECD government and/or by corporate or other issuers (including special purpose vehicles); and
- Short term Euro deposits

In seeking to achieve its objective, the Fund may also invest in collective investment schemes (CIS), including exchange traded funds or financial derivative instruments (FDI) as further described below. Investment in CIS shall be in accordance with Central Bank requirements, the Fund's investment objective and policies and shall be limited to 10% of the Net Asset Value of the Fund.

The performance of the Sub-Fund's portfolio of investments will be measured against EONIA (or any other rate which replaces it or is considered by the Manager to be the market standard in place of it and any such change in that index will be notified to Shareholders in the semi-annual and annual accounts). EONIA (Euro Overnight Index Average) is an effective overnight rate computed as a weighted average of all overnight unsecured lending transactions in the interbank market, initiated within the euro area by the contributing panel banks.

#### 7. Financial Instruments and Associated Risks (continued)

#### Market risk (continued)

#### **Tendercapital Income Premium**

The investment objective of the Fund is to generate both income and capital appreciation over a long term horizon.

The Sub-Fund intends to seek to achieve its investment objective by investing in a global and diversified portfolio of debt securities as described below, primarily denominated in Euro. Investments may be made directly or indirectly. Indirect investments made by way of investment in collective investment schemes, including exchange traded funds (CIS) will amount to a maximum of 10% of the Sub-Fund's NAV. Indirect investments may also be made through investing in financial derivative instruments (FDI), such as futures and options and as further described below. No more than 20% of the Sub-Fund's Net Asset Value will be invested in debt securities issued by issuers located in countries which the Investment Manager considers to be emerging markets. This limit excludes any exposure to such emerging markets which may be held indirectly in the portfolios of CIS in which the Sub-Fund invests.

The Sub-Fund may invest in fixed income, debt and debt related securities (such as notes, preferred securities, debentures), which may be issued by corporate and/or sovereign issuers or guaranteed by sovereign governments, supranational entities, their agencies or instrumentalities, may offer fixed or variable interest rates, may be rated or unrated, including but not limited to convertible and non-convertible bonds, money market instruments, municipal, state, local authority and supranational issues, floating rate notes, medium term notes, promissory notes, commercial paper, debentures, bankers acceptances, certificates of deposit, asset and mortgage backed securities, collateralised debt and exchange rate obligations. Convertible bonds may embed a derivative component being on debt or equity securities, a basket or baskets of or indices of debt or equity securities or on interest rates.

The securities in which the Sub-Fund invests will typically be listed or traded on one or more Regulated Markets and any investment in such securities which are unlisted will comply with the investment restrictions in the Prospectus. No more than 30% of the Sub-Fund's Net Asset Value will be directly invested at the time of purchase in debt securities or bonds rated below investment grade.

The exposure of the Sub-Fund to currencies other than Euro through direct investment in securities denominated in such other currencies will not exceed 10% of the NAV.

#### **Tendercapital US Turnaround**

The Sub-Fund seeks to produce positive returns with medium/high volatility. The primary investment strategy of the Sub-Fund is to seek exposure to companies that are currently in difficulty or facing difficult times, with the objective of identifying those companies which could overcome the difficulties and recover in the future (turnaround companies). The strategy for allocating the Sub-Fund's investments will also be based on the Investment Manager's assessment of the market and the assets to which exposure is sought.

The Sub-Fund intends to seek to achieve its investment objective primarily through investing up to 100% of its Net Asset Value in US Dollar denominated equities and equity related securities across all industries and capitalizations but may also invest in liquid assets and as further outlined below.

The Sub-Fund may, directly or indirectly, invest in a diversified portfolio of equity and equity-related securities (including, options, index option strategies, convertible bonds, shares, warrants, and depository receipts, such as American Depositary Receipts (ADRs) and Global Depositary Receipts (GDRs)), primarily listed or traded on a Regulated Market in the US.

The securities held directly by the Sub-Fund will typically be listed or traded on one or more Regulated Markets and any investment in such securities which are unlisted will comply with the investment restrictions in the Prospectus.

### 7. Financial Instruments and Associated Risks (continued)

## **Currency risk**

### **Tendercapital Secular Euro**

The Sub-Fund may invest its assets in securities denominated in a wide range of currencies, some of which may not be freely convertible. The Net Asset Value of the Sub-Fund will fluctuate in accordance with the changes in the foreign exchange rate between the functional currency and the currencies in which the Sub-Fund's investments are denominated.

The Sub-Fund's currency risk is managed on a daily basis by the Portfolio Manager in accordance with policies and procedures which are in place. The Sub-Fund's overall currency positions and exposures are monitored on a daily basis by the Manager.

<sup>\*</sup>The Sub-Fund launched 8 March 2013.

#### Interest rate risk

The Sub-Fund may invest in interest bearing securities. Any change to the interest rates relevant for the particular securities may result in the relevant Portfolio Manager being unable to secure positive returns on the expiry of contract or the sale of securities. In addition, changes to prevailing rates or changes in expectations of future rates may result in an increase or decrease in the value of the securities held. In general, if interest rates rise, the value of the fixed interest securities will decline (along with certain expenses calculated by reference to the assets of the Sub-Fund). A decline in interest rates will in general have the opposite effect.

### Tendercapital Secular Euro\*

As of 30 June 2013 the majority of the Sub-Fund's financial assets were held in non-interest-bearing assets. Interest-bearing financial assets are debt securities listed in regulated markets. As a result, the Sub-Fund is subject to exposure to fair value interest rate risk due to fluctuations in the prevailing levels of market interest rates.

<sup>\*</sup>The Sub-Fund launched 8 March 2013.

## **Equity price risk**

Equity price risk is the risk that the value of the instrument will fluctuate as a result of changes in market prices (other than those arising from interest rate risk or currency risk), whether caused by factors specific to an individual investment, its issuer or all factors affecting all instruments traded in the market. As the majority of the Sub-Fund's financial instruments are carried at fair value with fair value changes recognised in the Income Statement, all changes in market conditions will directly affect net investment income.

## **Tendercapital Secular Euro**

Price risk is managed by the Sub-Fund's Portfolio Manager by constructing a diversified portfolio of instruments traded on various markets. In addition, price risk may be hedged using derivative financial instruments such as options or futures contracts although this is currently not being carried out.

Under normal circumstances the Sub-Fund will invest in the following instruments:

| UCITS Collective Investment Schemes                                                            | Up to 100% of net assets |
|------------------------------------------------------------------------------------------------|--------------------------|
| Regulated non-UCITS Collective Investment                                                      | Up to 30% of net assets  |
| Schemes                                                                                        |                          |
| Real Estate Investment Trusts (REITS) and closed ended Collective Investment Schemes listed on | Up to 10% of net assets  |
| organized exchanges                                                                            |                          |

#### Credit risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Sub-Fund.

The carrying amounts of financial assets other than equity securities which are addressed in the previous note Equity Price risk best represent the maximum credit risk exposure at the period end. This relates also to financial assets carried at amortised cost, as they have a short-term to maturity.

Substantially all of the assets of the Sub-Funds are held by the Custodian. Bankruptcy or insolvency of the Custodian may cause the Sub-Funds' rights with respect to securities and cash held by the Custodian to be delayed or limited. RBC Investor Services Bank S.A. does not have a credit rating. The credit rating for

| Other Receivables         | 10,034       |

<sup>\*</sup>The Sub-Fund launched 8 March 2013.

### **Liquidity Risk**

Liquidity risk is the risk that an entity will encounter difficulty in realising assets or otherwise raising funds to meet commitments associated with financial instruments. Generally the Company's assets are composed of actively traded and liquid securities. The liquidity risks associated with the need to satisfy shareholders' requests for redemptions are mitigated by maintaining a level of cash to satisfy the usual level of demand.

If the value of Shares of any of the Sub-Funds falling to be redeemed on any Dealing Day is equal to 10% or more of the Net Asset Value of that Sub-Fund on such Dealing Day, then the Manager may in its discretion refuse to redeem any Shares in excess of 10% of the Net Asset Value of that Sub-Fund as aforesaid and, if the Manager so refuses, the requests for redemption on such Dealing Day shall be reduced rateably and the Shares to which each request relates which are not redeemed by reason of such refusal shall be treated as if a request for redemption had been made in respect of each subsequent Dealing Day until all the Shares to which the original request related have been redeemed. Requests for redemption which have been carried forward from an earlier Dealing Day shall (subject always to the foregoing limits) be complied with in priority to later requests.

## 7. Financial Instruments and Associated Risks (continued)

## **Liquidity Risk (continued)**

## Tendercapital Secular Euro\*

The Sub-Fund's Prospectus provides for the daily creation and cancellation of shares and it is therefore exposed to the liquidity risk of meeting Shareholder redemptions at any time.

The Sub-Fund's listed securities are considered to be readily realisable as they are all listed on major European stock exchanges.

The Sub-Fund's liquidity risk is managed on a daily basis by the Portfolio Manager in accordance with policies and procedures which are in place. The Sub-Fund's redemption policy allows for redemptions on each day of each month and Shareholders must provide at least one days notice.

The Sub-Fund maintains short-term deposits. At the report date such investments amounted to €70,366.

<sup>\*</sup>The Sub-Fund launched 8 March 2013.

## 7. Financial Instruments and Associated Risks (continued)

## **Risk Analysis**

The Investment Manager is responsible for the following risk management functions:

- a) Implementation of the Risk Management Process (RMP) and procedures which enable it to measure and monitor the risk of the positions in the portfolio and compliance with each Sub-Fund's risk limit system as determined by the Board of Directors and in accordance with the Regulations;
- b) pre-trade compliance and monitoring risk on a day-to-day basis;
- c) calculating and monitoring levels of global exposure, position/ issuer risk, leverage, counter-party risk, Financial Derivative Instruments (FDI) cover requirements and other risk parameters of relevance in accordance with the risk limit system of the Sub-Funds;
- d) post-trade checking of breaches of investment limits whether due to market movement or otherwise;
- e) review and support, where appropriate, the arrangements and procedures for the valuation of OTC derivatives and liaising with the Administrator in the setting of policies relating to FDI pricing and dealing with any pricing issues that have been escalated in accordance with agreed escalation procedures or requiring a decision;
- f) providing advice to the Board as regards the identification of or changes to the risk profile of the Company and Sub-Funds.

#### **Commitment Approach**

Consistent with its risk profile and the expected proportion of each Sub-Fund's portfolio composition comprising of FDI, repurchase and reverse repurchase agreements, each Sub-Fund will use the commitment approach for the purpose of calculating global exposure. This approach converts the UCITS FDI positions into the market value of equivalent positions in the underlying assets, and seeks to ensure that the UCITS FDI risk is monitored in terms of any future "commitments" to which it is (or may be) obligated.

The global exposure of each Sub-Fund through the use of FDI, including embedded FDI, and repurchase or reverse repurchase agreements will, at all times, be limited to 100% of the net asset value of the relevant Fund.

## Leverage

Leverage has the effect of gearing a Sub-Fund's expected performance by allowing the Sub-Fund to gain a greater exposure to underlying investment opportunities. Each Sub-Fund will not be leveraged (save on a short term basis as where the Sub-Fund may borrow) other than through the use of FDI (including embedded FDI). Each Sub-Fund is subject to a limitation that simple Leverage may not exceed 100% of the NAV, thus total exposure cannot exceed 200% of Net Asset Value.

Simple leverage is calculated as being global exposure divided by the Sub-Fund's Net Asset Value. The Investment Manager will measure global exposure and leverage daily. The calculation of global exposure is calculated after the application of the netting and hedging.

If the Company undertakes repurchase transactions pursuant to which additional leverage is generated through the re-investment of collateral, the repurchase transaction must be taken into consideration for the determination of global exposure.

#### 8. Fair Value Measurements

The Company adopted the amendments to FRS 29, "Financial Instruments: Disclosures", effective 1 January, 2009. FRS 29 establishes a fair value hierarchy for inputs used in measuring fair value. The fair value hierarchy is categorised into three levels based on the inputs as follows:

Level 1 - Valuations based on quoted prices in active markets for identical assets or liabilities (level 1):

Level 2 - Valuations based on quoted prices in markets that are not active or based on inputs other than quoted prices for which all significant inputs are observable, either directly (as prices) or indirectly (derived from prices) (level 2) and;

Level 3 - Valuations based on inputs that are unobservable and significant to the overall fair value measurement

Inputs are used in applying the various valuation techniques and broadly refer to the assumptions that market participants use to make valuation decisions, including assumptions about risk. Inputs may include price information, volatility statistics, specific and broad credit data, liquidity statistics, and other factors. A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement (lowest being level 3). Observable inputs are those that market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Company. Unobservable inputs reflect Company management's assumptions, made in good faith, about the inputs market participants would use in pricing the asset or liability developed based on the best information available in the circumstances.

The determination of what constitutes "observable" requires significant judgment by Company management. Company management considers observable data to be that market data which is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The categorisation of a financial instrument within the hierarchy is based upon the pricing transparency of the instrument and does not necessarily correspond to Company management's perceived risk of that instrument.

Fair value is a market-based measure considered from the perspective of a market participant rather than an entity-specific measure. Therefore, even when market assumptions are not readily available, Company management's own assumptions are set to reflect those that market participants would use in pricing the asset or liability at the measurement date. Company management uses prices and inputs that are current as of the measurement date, including periods of market dislocation. In periods of market dislocation, the observability of prices and inputs may be reduced for many securities. This condition could cause a security to be reclassified to a lower level within the fair value hierarchy.

The following tables presents information about the Company's assets and liabilities measured at fair value as of 30 June 2013 (in Euro):

<sup>\*\*\*\*</sup>The Sub-Fund launched 8 March 2013.

### 8. Fair Value Measurements (continued)

#### **Valuation Techniques**

When fair values of listed equity and debt securities, as well as publicly traded derivatives at the reporting date, are based on quoted market prices or binding dealer price quotations (bid price for long positions and ask price for short positions), without any deduction for transaction costs, the instruments are included within level 1 of the hierarchy. When the Company has assets and liabilities with offsetting market risks, it uses mid-market prices as a basis for establishing fair values for the off-setting risk positions and applies the bid or ask price to the net open position as appropriate.

For all other financial instruments, fair value is determined using valuation techniques. Valuation techniques include net present value techniques, comparison to similar instruments for which market observable prices exist, options pricing models and other relevant valuation models.

The Company uses widely recognised valuation models for determining fair values of over-the-counter derivatives. For these financial instruments, inputs into models are market observable and are therefore included within level 2.

The fair values of currency exchange contracts (forwards and swaps) are calculated by reference to current exchange rates for contracts with similar maturity and risk profiles.

The fair values of any investments in any open ended collective investment schemes (CIS) are based on the net asset value (market value of the Company's assets less liabilities / number of shares) calculated by the administrator of the underlying CIS. The net asset value of the underlying CIS are adjusted for any factors that indicate that the net asset value per share, as calculated by the administrator of the underlying CIS, may not be the fair value. Investments in CIS are categorised in level 2, except for any ETF (Exchange Traded Funds), which may be classified as level 1.

#### 9. Foreign Exchange Translation

The exchange rates as at 30 June 2013, which were used to convert assets and liabilities denominated in foreign currencies back to EUR were as follows:

| Currency | 30 June 2013 |
|----------|--------------|
| CHF      | 1.229853     |
| GBP      | 0.857025     |
| NOK      | 7.936949     |
| NZD      | 1.683089     |
| SEK      | 8.773286     |
| USD      | 1.299850     |

### 10. Soft Commissions

The Manager and Portfolio Managers may effect transactions with or through the agency of another person with whom the Manager and Portfolio Managers have arrangements under which that party will from time to time provide or procure for the Manager and Portfolio Managers, goods, services or other benefits, such as research and advisory benefits, the nature of which must be such that their provision will assist in the provision of investment services to the Sub-Fund and for which no direct payment is made, but instead the Manager and Portfolio Managers undertake to place business with that party.

The Manager and Portfolio Managers will not retain the benefit of any commission rebate (being repayment of a cash commission made by a broker or dealer to the Manager) paid or payable from any such broker or dealer to the Manager and Portfolio Managers for or on behalf of the Sub-Fund.

There were no soft commission arrangements affecting any of the Sub-Funds during the period ended 30 June 2013.

#### 11. Cash at Bank

Cash balances are held by RBC Investor Services Bank S.A. As at 30 June 2013, the following are the cash held at bank:

#### 15. Net Assets Value

A reconciliation of the valuation of the financial assets at fair value through profit or loss under FRS 26 versus the methodology as per the Fund prospectus is depicted in the table below. The FRS 26 valuation adjustment is a result of financial assets at fair value through profit or loss being shown at their bid market values, which is their fair value under financial reporting standards. This is different to the valuation used in the dealing or published Net Asset Values which use mid market values (i.e. close of business values).

<sup>^\*</sup>Effective 28 June 2013 Plurima Tender Capital Income Fund merged with Tendercapital Income Premium. Tendercapital Income Premium launched on this date.

<sup>^\*\*</sup>The Sub-Fund launched 8 March 2013.

<sup>^</sup> The net assets value in the consolidated financial statements as at 30 June 2013 differs from that included in the published valuations as at 30 June 2013. The difference is due to the change in methodology in accounting for organisation costs as prescribed by IFRS, and the methodology indicated in the most recent Prospectus.

#### 16. Security Lending

There was no securities lending for the period 1 January 2013 to 30 June 2013.

#### 17. Significant Events during the Period

As at 8 March 2013, the Sub-Fund Tendercapital US Turnaround was launched.

As at 28 June 2013, 4 Sub-Funds were launched; Tendercapital Secular Euro, Tendercapital Bond Two Steps, Tendercapital Cash 12 Months and Tendercapital Income Premium.

Effective 28 June 2013, Tendercapital Limited acquired all of the assets of the following Plurima Sub-Funds for which Tendercapital was already the Investment Manager. These Sub-Funds were merged with the newly launched Tendercapital sub funds as at 28 June 2013, as outlined below

Plurima Tender Capital Crystal Premium Fund merged with Tendercapital Secular Euro Plurima Tender Capital Bond Premium Fund merged with Tendercapital Bond Two Steps Plurima Tender Capital Cash Premium Fund merged with Tendercapital Cash 12 Months Plurima Tender Capital Income Fund merged with Tendercapital Income Premium

### 18. Events after the Period End

There are no events after the period end to be reported.

### 19. Material Changes to Prospectus

The Prospectus was amended to include information on 5 new Sub-Funds launched during the period namely, Tendercapital Secular Euro, Tendercapital Bond Two Steps, Tendercapital Cash 12 Months, Tendercapital Income Premium and Tendercapital US Turnaround.

#### 20. Approval of Financial Statements

The financial statements were approved and authorised for issue, by the Directors on 23 August 2013.
