The value of the following assets is determined as follows:

a) The value of any cash in hand or on deposit, bills and demand notes and accounts receivable, prepaid expenses, cash dividends and interest declared or accrued as aforesaid and not yet received is deemed to be the full amount thereof, unless in any case the same is unlikely to be paid or received in full, in which case the value thereof is arrived at after making such discount as may be considered appropriate in such case to reflect the true value thereof.

b) The value of securities and/or financial derivative instruments, which are listed or dealt in on any stock exchange, is based on the last available price on the stock exchange, which is normally the principal market for such assets.

c) The value of assets dealt in any other Regulated Market is based on the last available price.

d) In the event that any assets are not listed or dealt in on any stock exchange or on any other Regulated Market, or if, with respect to assets listed or dealt in on any stock exchange, or other Regulated Market as aforesaid, the price as determined pursuant to sub-paragraph (b) or (c) is not representative of the fair market value of the relevant assets, the value of such assets are based on the reasonably foreseeable sales price determined prudently and in good faith of the Board of Directors of the Fund.

e) The liquidating value of options contracts not traded on stock exchanges or on other Regulated Markets means their net liquidating value determined, pursuant to the policies established by the Board of Directors of the Fund, on a basis consistently applied for each different variety of contracts. The liquidating value of futures, forward or options contracts traded on exchanges or on other Regulated Markets is based upon the last available closing or settlement prices of these contracts on exchanges and Regulated Markets on which the particular futures, forward or options contracts are traded by the Fund; provided that if a futures, forward or options contract cannot be liquidated on the day with respect to which net assets are being determined, the basis for determining the liquidating value of such contract shall be such value as the Board of Directors of the Fund may deem fair and reasonable.

f) Investments in UCITS and other UCIs are taken at their latest official net asset values or their latest unofficial net asset values (i.e. which are not generally used for the purposes of subscription and redemption of Shares of the target funds) as provided by the relevant administrators if more recent than their official net asset values and for which the Administrative Agent has sufficient assurance that the valuation method used by the relevant administrator for said unofficial net asset values is coherent as compared to the official one.

If events have occurred which may have resulted in a material change of the net asset value of such Shares or units of UCITS and/or other UCI since the day on which the latest official net asset value was calculated, the value of such Shares or units may be adjusted in order to reflect, in the reasonable opinion of the Board of Directors, such change of value.

g) Non-listed money market instruments held by the Fund with a remaining maturity of ninety days or less are valued at the amortised cost method which approximates market value.

h) All other securities and other assets are valued at fair market value as determined in good faith pursuant to the procedures established by the Board of Directors of the Fund.

i) Contracts for Difference ("CFD") are over-the-counter financial instruments which allow an investor to take advantage of the share price movements without having to hold such Shares or to manage the holding constraints (custody, financing, loan for shorts). Indeed, a "CFD" is a contract entered into between two parties to exchange, at the end of this contract, the difference between the opening and the closing prices of the contract, multiplied by the number of units of the underlying asset as specified in the contract. The settlement of these differences is completed through a cash payment, not through a physical delivery of the underlying assets. Contracts for Difference are valued at their market value according to the closing price of the underlying securities on the valuation day. The market value of the corresponding line indicates the difference between the market value and the strike price of the underlying securities.

Net realised gain or (loss) and net change in unrealised appreciation or (depreciation) on CFD are recorded in the Statement of Operations and Changes in Net Assets. The net unrealised appreciation or (depreciation) are recorded in the Statement of Net Assets. The valuation of a CFD shall reflect at all times the difference between the latest known price of the underlying security and the valuation that was taken into account when determining the transactions. Net realised gain or (loss) and the net changes in unrealised appreciation or (depreciation) are included in the Statement of Operations and Changes in Net Assets.

j) Futures contracts are valued based on the last available market price. Net realised gain or (loss) and net change in unrealised appreciation or (depreciation) on futures contracts are included in the Statement of Operations and Changes in Net Assets. The net unrealised appreciation or (depreciation) are recorded in the Statement of Net Assets. For the calculation of net holdings by currency on financial instruments, the holdings are converted at the exchange rate prevailing at the period-end.

k) The forward foreign exchange contracts represent obligations of purchase or the sale of foreign currency on the basis of future exchange rates determined at a fixed price at the time of conclusion of the contracts. The unexpired forward foreign exchange contracts are valued at the last "forward" rate available on the valuation dates or at the balance sheet date and unrealised appreciation or (depreciation) are recorded. Net realised gain or (loss) and the net changes in unrealised appreciation or (depreciation) are included in the Statement of Operations and Changes in Net Assets. The net unrealised appreciation or (depreciation) are recorded in the Statement of Net Assets.

l) Interest rate swaps contracts (IRS) and Inflation linked swaps contracts (ILS) are bilateral agreements in which each party agrees to exchange a series of interest payments for another series of interest payments on the basis of a notional amount serving as the basis of calculation that is generally not exchanged. Interest rate swaps contracts and Inflation linked swaps contracts are valued at their last known closing price of the underlying security. Net realised gain or (loss) and net change in unrealised appreciation or (depreciation) are included in the Statement of Operations and Changes in Net Assets under caption net realised gain or (loss) on options contracts and swaps contracts and net change in unrealised appreciation or (depreciation) on options contracts and swaps contracts. The net realised gain or (loss) and net change in unrealised appreciation or (depreciation) on Interest rate swaps and Inflation linked swaps contracts are included in the Statement of Operations and Changes in Net Assets under the caption swaps contracts. The net unrealised appreciation or (depreciation) are recorded in the Statement of Net Assets.

m) Credit default swap (CDS) is a credit derivative transaction in which two parties enter into an agreement, whereby one party (the protection buyer) pays the other (the protection seller) a fixed periodic coupon for the specified life of the agreement in return for a payment contingent on a credit event related to the underlying reference obligation. A credit default swap are marked to market at each NAV calculation date. Net realised gain or (loss) and net change in unrealised appreciation or (depreciation) are included in the Statement of Operations and Changes in Net Assets under caption net realised gain or (loss) on options contracts and swaps contracts and net change in unrealised appreciation or (depreciation) on options contracts and swaps contracts. The net realised gain or (loss) and net change in unrealised appreciation or (depreciation) on Interest rate swaps and Inflation linked swaps contracts are included in the Statement of Operations and Changes in Net Assets under the caption swaps contracts. The net unrealised appreciation or (depreciation) are recorded in the Statement of Net Assets.

2.3 Foreign currency translation

The accounts of each Sub-Fund of the Fund are denominated in the currency in which its net asset value is calculated.

The cost of investments denominated in currencies other than the Sub-Fund's accounting currency is converted into that currency at the exchange rate prevailing at the purchase date.

Income and expenses in currencies other than the Sub-Fund's accounting currency are converted into that currency at the exchange rate prevailing at the transaction date.

The foreign exchange gains and losses on investments are included in the net realised gain or (loss) on investments, in the Statement of Operations and Changes in Net Assets.

At the end of the period, the investments' market value (determined as noted previously), the receivables, cash at banks and liabilities denominated in currencies other than the Sub-Fund's accounting currency are converted into that currency at the exchange rates prevailing at that date. The net realised gain or (loss) and net change in unrealised appreciation or (depreciation) on foreign currencies transactions are included in the Statement of Operations and Changes in Net Assets.

2.4 Net realised gain or (loss) on investments

The net realised gain or (loss) on sales of investments is calculated on an average cost basis and is included in the Statement of Operations and Changes in Net Assets.

2.5 Expenses

Interest expenses are accounted for on accrual basis. Expenses are included in the Statement of Operations and Changes in Net Assets.

2.6 Dividends and interests

Dividends and interest received or paid by the Fund on its investments are in many cases subject to recoverable withholding taxes at source. The value of any dividends and interest declared or accrued as aforesaid and not yet received or paid is deemed to be the full amount thereof, unless in any case the same is unlikely to be paid or received in full. Dividends are recognised as income net of withholding tax on the date the securities are first quoted ex-dividend to the extent the information is reasonably available to the Fund. Interest is accrued at each net asset valuation.

2.7 Transaction costs

The Fund incurred transaction costs which have been defined as brokerage fees, certain taxes and certain depositary fees relating to the purchase and sale of transferable securities, money market instruments or other eligible assets. The global amounts of transaction costs are all taken into account through the Statement of Operations and Changes in Net Assets.

- b. managed by a company to which it is linked:
 1. by common management,
 2. by common control, or

Performance fees

For all Sub-Funds subject to receive a performance fee, the performance period is the period running from 1 January to December 31 each year. The Performance Fee will be accrued daily and is paid yearly only if the Net Asset Value per Share as of the last Valuation Day of the relevant Performance Period would not fall below the Net Asset Value per Share as of the last Valuation Day of the last Performance Period. An example provided under section MANAGEMENT AND FUND CHARGES of the Prospectus illustrate the potential difference in returns between a Class with a Performance Fee and a Class without a Performance Fee in different scenarios over the year. The returns shown are for illustrative purposes only and there is no guarantee that the Sub-Fund will achieve these returns.

DNCA INVEST - CREDIT CONVICTION: The Management Company will be entitled to a Performance Fee calculated daily on the positive performance of the Sub-Fund compared to the performance of the Bloomberg Euro-Aggregate Corporate Index with High Water Mark.

The High Water Mark is the Net Asset Value per Share at the last Valuation Day of any performance period where a Performance Fee has been paid or failing that, the initial offer price per Share for unlaunched Classes.

The daily Reference Asset Value for each Class equals the total net assets of the relevant Class as of the previous Valuation Day, plus additional subscriptions and minus redemptions multiplied by the Bloomberg Euro-Aggregate Corporate Index. In case of redemptions, corresponding Performance Fee (if any) will be crystallised. In order to calculate daily the performance for each Class, the total Net Asset Value before Performance Fee is compared to the Reference Asset Value.

The Performance Fee will be accrued in case the Net Asset Value before Performance Fee of the relevant Class is greater than the Reference Asset Value (the "Net Performance") and under the High Water Mark condition.

This performance fee calculation is capped, the NAV after Performance Fee can't be under the NAV Reference per share as of the last Valuation Day of the last Performance Period and the High Water Mark.

The Sub-Fund uses a performance fee model based on a comparison of the performance of the Net Asset Value before Performance Fee and the performance of the Reference Asset Value which follows the Bloomberg Euro-Aggregate Corporate Index performance and ensure that any underperformance of the Sub-Fund compared to the above-mentioned benchmark and the High Water Mark over a minimum period of five years (or since launch of the Sub-Fund if it has been in existence for less than five years) is clawed back before any Performance Fee becomes payable.

The performance fee is equal to 20% (none for the Class Q Shares EUR) of the positive performance net of any fees above Bloomberg Euro-Aggregate Corporate Index with High Water Mark.

DNCA INVEST - EUROSE: This Sub-Fund is not subject to receive performance fee.

DNCA INVEST - EVOLUTIF: The Management Company is entitled to a performance fee calculated daily on the positive performance of the Sub-Fund compared to the performance of the following composite index net return: 25% MSCI World NR EUR + 25% MSCI Europe NR EUR + 50% Bloomberg Euro Govt Inflation Linked 1-10 years.

The daily Reference Asset Value for each Class equals the total net assets of the relevant Class as of the previous Valuation Day, plus additional subscriptions and minus redemptions multiplied by the composite index. In case of redemptions, corresponding Performance Fee (if any) will be crystallised. The Performance Fee is paid and crystallised yearly.

In order to calculate daily the performance for each Class, the total Net Asset Value before Performance Fee is compared to the Reference Asset Value.

The Performance Fee will be accrued in case the Net Asset Value before Performance Fee of the relevant Class is greater than the Reference Asset Value (the "Net Performance").

This performance fee calculation is capped, the NAV after Performance Fee can't be under the NAV Reference per share as of the last Valuation Day of the last Performance Period.

Our Responsible Investor and SRI Management Philosophy

The socially responsible investment (SRI) doctrine is multifaceted and in constant flux, which sits at the crossroads of economic and social standards. SRI made a major shift in the 1990s from mainly based on ethical concerns towards an integration of the sustainable development concept. This is how the extra-financial ESG (Environment, Social and Governance) criteria were gradually worked into financial management, while being embraced by an informal framework that has now been regulated.

Our values:

DNCA Finance is an asset management firm established in 2000 by specialists of a wealth-management approach to managing assets on behalf of private and institutional investors. Over the years, the founders have brought together a team of experienced and renowned managers to develop a simple, easy-to-understand and high-performance range of funds around a conviction-based management approach. We make our investment choices on the basis of in-depth research into companies. Before investing, we review a company on a comprehensive basis in order to select those bonds and shares having the best risk-weighted performance potential. Naturally, the research and ongoing dialogue that we maintain with companies are informed by societal challenges. Our investments are turned resolutely towards long-term performance, which also reflects all risks and challenges that companies face. This is why governance has always been a decisive criterion, as it is now unthinkable to invest in a company without verifying the quality of its managers, the independence of its supervisory bodies, and the respect of its minority shareholder rights. We have gradually integrated social and environmental challenges into our approach, as we are convinced that they are relevant to our business of selecting tomorrow's winners. ESG criteria have accordingly been integrated into DNCA's strategies, as they complement financial research and create value.

Our conviction:

In 2017, DNCA Finance signed the United Nations Principles for Responsible Investment (UNPRI) to provide a structural framework to our approach and take part in local discussions in our capacity as an active and long-term investor. This highlighted our conviction that we are responsible managers to both our investor clients and to the companies that we finance. Our ambition is to offer a differentiating and innovative approach that evolves as new challenges arise. With this in mind, our socially responsible investment role distinguishes two concepts: corporate social responsibility (CSR) and the sustainable economic transition. These two dimensions are evaluated on the basis of an in-depth analysis of economic and social trends, as well as recognised expertise in SRI. Below, we detail the emergence of these two concepts and how we address them within an SRI management framework.

Our Responsible Investor and SRI Management Philosophy (continued)

The investment process and the SRI approach presented below is applicable to the "BEYOND" range, with consists of the four Sub-Funds of the DNCA Invest listed below:

DNCA INVEST - BEYOND GLOBAL LEADERS
 DNCA INVEST - BEYOND ALTEROSA

Corporate Social Responsibility

Evaluating risks in all sectors:

While corporate social responsibility no longer offers real investment opportunities, it continues to play a whistleblowing role and is an excellent proxy for assessing the quality of corporate management, particularly in risk management. The many indicators in annual reports (e.g., the 49 basic indicators and 30 additional ones in the Global Reporting Initiative (GRI) benchmark) actually provide a second reading of companies' health. They are now comparable in absolute terms within a sector and, more importantly, over time. Trends in certain indicators offer additional datapoints that in many cases are not yet reflected in companies' financial statements. An abnormal increase in turnover, work-related accidents or absenteeism, for example could be signs that all is not right within a company or that labour relations have worsened to a point of undermining its competitiveness and economic performance (1% of absenteeism results in 1% additional payroll costs).

With this in mind, we believe that corporate social responsibility is no longer an investment opportunity but a tremendous source of information in assessing risks that companies face, particularly in their interactions with their stakeholders, including employees, suppliers, customers, local communities, shareholders and others, regardless of their sector of activity.

The Sustainable Economic Transition

The 17 UN Sustainable Development Goals:

Our conviction is based on a long-term view of how the economy is financed. As a responsible asset manager, our role is to select companies offering the best strategic and economic advantages to meet tomorrow's challenges. We are convinced that these companies' ability to anticipate their market will be crucial for winning or retaining leadership. That is how we achieve robust outperformance in our portfolios, by identifying companies' exposure to the sustainable economic transition.

Identifying investment opportunities

The sustainable economic transition is above all a source of investment opportunities. Our task is to identify those themes that are relevant to the sustainable economic transition and to select those companies that contribute to it. Our proprietary research model presented below is based on five major sustainable transition avenues and their material themes. We have agreed that each company's contribution to the sustainable transition will be assessed gradually based on its level of exposure, ranging from no exposure at all to pure player status. We revise our list of themes each year, based on ongoing shifts in societal trends. Our ambition is a pragmatic and innovative one in order to retain the most comprehensive understanding possible of the various performance drivers.

All the criteria analysed for the purposes of Our Responsible Investor and SRI Management Philosophy, are described in our website: <https://www.dnca-investments.com/en/areas-of-expertise/sri>.
