Report of the Board of Directors

Annual report 2024

Macroeconomic overview

In 2024 geopolitical tensions persisted and the initially expected global manufacturing recovery did not take place. However, inflation globally receded, and the key central banks started to adopt an easing stance. Among countries there were striking differences. The US economy is estimated to have experienced real GDP growth of 2.8% in 2024, outpacing long-term growth potential. Activity was primarily driven by consumer spending, which continued to be robust. The labour market showed signs of slowing but remained relatively strong. Approximately 2.2 mn new jobs were created in 2024, the unemployment rate advanced slightly and was at 4.1% by December 2024, stabilizing above the 4.0% threshold for the first time since 2021. Inflation had fallen from an average of 4.1% in 2023 to 3.0% in 2024. The Federal Reserve had cut interest rates three times in 2024, bringing the federal funds rate to a range of 4.25% to 4.50%.

In contrast, the euro area economy had shown signs of recovery in 2024 but with GDP growth expected at 0.8% activity clearly remained below potential. Activity remained fragile as continued contraction in the manufacturing sector largely offset a modest recovery in services. That said, the labour market in the euro area remained strong and stable, with the unemployment rate even having receded well into autumn towards 6.3% in November. Inflation had fallen from 5.5% in 2023 to 2.4% in 2024. The European Central Bank had turned towards a dovish policy stance lowering its key interest rate by 100 bps to 3.0%.

Financial markets

In 2024, market activity was initially dominated by inflation rates that remained high and the expectation of a broad-based recovery. This changed in the middle of the year and the ECB, as the first of the globally important central banks, began to lower its key interest rates in June, followed by the Fed in September. Over the course of the year, it also became clear that the US economy was likely to make a so-called soft landing and continue to grow significantly faster than the euro area. Moreover, in the aftermath of the Trump election victory US markets were driven by the expectation of huge stimulus measures.

In this environment, the yield on 10-year German government bonds initially rose to values of up to 2.68% by the middle of the year. The withdrawal of liquidity by the ECB and the halt to reinvestment of expiring government bonds purchased under the asset purchase program were also noticeable. However, as inflation rates fell and the economy showed signs of weakness, this yield began to fall again. At the end of the year, it was at 2.36%, down from 2.03% a year earlier. In the euro area, the yield difference between government bonds from Southern European countries and Bunds narrowed. Some of the latter benefited from upgrades by rating agencies, among other things, and proved to be much stronger economically than Germany. 10-year US government bond yields advanced by 71 bps to 4.57% in 2024 resulting in an increase of the transatlantic yield differential by 38 bps.

The stock markets trended upwards in a volatile manner throughout the year. After the US election, expectations of fiscal stimulus in the US and US import tariffs on European products contributed to a divergent development in both markets. The S&P500 gained 23.3% over the year, while the European market increased significantly less at 6.9%. The euro lost value against the US dollar over the year.

Outlook 2025

Macroeconomy

The outlook for 2025 is again burdened by considerable uncertainty factors: In addition to the geopolitical conflict zones of Ukraine and the Middle East, this primarily affects the course of the new US government. The main focus is on the question of whether, as announced during the election campaign, widespread import tariffs will be introduced in the USA - especially since this could be the starting point for a trade war. If the US actually withdraws from existing environmental agreements, as already announced by Trump before, this is likely to put additional pressure on non-American companies in terms of competition. Further pressure for the other NATO countries to act in terms of financial policy could result from the significant reduction or even cutting of US aid to Ukraine and the demand for an expansion of European defense spending.

The gap between the more robust economic development in the USA and the eurozone will probably grow even further if the future US administration implements extensive expansionary measures as announced. In contrast, the requirements of the Stability and Growth Pact are likely to contribute to a much more restrictive fiscal policy in the eurozone. Moreover, activity in the euro area will be dampened by an only slowly improving global manufacturing outlook.

The expected decline in inflation, on the other hand, should support general economic activity: We expect underlying inflation rates to continue to fall in the US and the euro area. This should enable central banks on both sides of the Atlantic to further reduce their key interest rates. We expect the ECB to cut its key interest rate by 125 basis points to 1.75% and the Fed to reduce its monetary policy target corridor by the end of 2025. We expect gross domestic product growth of 2.6% in the US in 2025, but only 0.8% in the euro area.

Financial markets

In 2025, key interest rate cuts and the further normalization of inflation trends are likely to support the valuation ratios of risky investments. The extent, timing and likelihood of US import tariffs are likely to be particularly relevant for the market development of equity markets outside the United States. In the USA, on the other hand, the prospect of large-scale economic stimulus programs and inflation risks from possible tariffs are likely to continue to weigh on government bonds.

Over the year, however, we expect a slight decline in yields because of the Fed's key interest rate cuts. In the euro area, too, monetary easing and declining inflation are likely to cause German government bond yields to fall moderately. The US dollar is likely to maintain its strength against the euro. As in the past year, we expect political, economic and geopolitical uncertainties to lead to phases of increased market volatility in 2025.

Remuneration Policy (Unaudited)

Generali Investments Luxembourg S.A. has designed and implemented a remuneration policy which is consistent with and promotes sound and effective risk management by having a business model which by its nature does not promote excessive risk taking that is inconsistent with the risk profile of the SICAV. The Management Company's remuneration policy integrates governance, pay structure and risk alignment rules that are designed to be consistent with the business strategy, objectives, values and interests of the Management Company, the SICAV and the shareholders of the SICAV, and includes measures to avoid conflicts of interest.

Description of the calculation of the remuneration and benefits

The amount of the fixed remuneration of the employees is determined in the respective individual contracts. The level of fixed remuneration may be, without being required thereto, oriented on the basis of market value and any other applicable standards, as for instance, a statutory minimum social wage or the indications of a collective bargaining agreement as it may be applicable from time to time.

The Management Company will, in principle, attribute to eligible employees, a variable compensation if the Management Company has made (for the concerned calendar/financial year) a gross profit, whereby the gross profit is determined at a stage before the payment of taxes and elements of the variable remuneration.

A specific personnel evaluation tool is used in order to determine the amount of variable remuneration to be attributed to each eligible employee. Performance criteria are established for each individual with goals according to performance, effectiveness and engagement perspectives.

Remuneration Committee

The Management Company has appointed a remuneration committee which reports to the Board of Directors of the Management Company.

Remuneration disclosure

During its last accounting year ended December 31, 2024, the Management Company remunerated staff members as follows:

| Total fixed remuneration | 6,127,170.84 |
|---|--------------|
| Total variable remuneration* | 1,085,577.63 |
| Total remuneration | 7,212,748.47 |
| Number of beneficiaries | 52 |
| Aggregate amount of remuneration for senior management, risk takers, control | 1,385,606.88 |
| functions and any employee receiving total remuneration that falls within the | |
| remuneration bracket of senior management and risk takers whose professional | |
| activities have a material impact on the risk profile of the Management Company | |
| Aggregate amount of remuneration for other members of staff | 5,827,141.59 |

^{*}Paid after year end.

Remuneration Policy by sub-fund

Pursuant to Article 69(3)(a) of the UCITS Directive and referring to the last available situation, the remuneration details for the various investment managers are as follows:

Central & Eastern European Equity

For the management of the Central & Eastern European Equity sub-fund, Generali Asset Management S.p.A.'s structures are equal to 0.14 units expressed in terms of full time equivalent, whose gross overall remuneration is 0.03% of the gross total remuneration of the Company's staff. Therefore, the gross total remuneration paid during 2024 by the Company to the personnel involved in the management of the specific sub-fund is equal to EUR 14,769 (gross total amount), split respectively into the fixed component equal to EUR 11,092 and in the estimated variable component equal to EUR 3,677.

Euro Equity

For the management of the Euro Equity sub-fund, Generali Asset Management S.p.A.'s structures are equal to 0.35 units expressed in terms of full time equivalent, whose gross overall remuneration is 0.14% of the gross total remuneration of the Company's staff. Therefore, the gross total remuneration paid during 2024 by the Company to the personnel involved in the management of the specific sub-fund is equal to EUR 69,485 (gross total amount), split respectively into the fixed component equal to EUR 49,061 and in the estimated variable component equal to EUR 20,424.

Euro Equity Controlled Volatility

For the management of the Euro Equity Controlled Volatility sub-fund, Generali Asset Management S.p.A.'s structures are equal to 0.41 units expressed in terms of full time equivalent, whose gross overall remuneration is 0.10% of the gross total remuneration of the Company's staff. Therefore, the gross total remuneration paid during 2024 by the Company to the personnel involved in the management of the specific sub-fund is equal to EUR 49,529 (gross total amount), split respectively into the fixed component equal to EUR 35,213 and in the variable component equal to EUR 14,316.

Euro Future Leaders

For the management of the Euro Future Leaders sub-fund, Generali Asset Management S.p.A.'s structures are equal to 0.40 units expressed in terms of full time equivalent, whose gross overall remuneration is 0.10% of the gross total remuneration of the Company's staff. Therefore, the gross total remuneration paid during 2024 by the Company to the personnel involved in the management of the specific sub-fund is equal to EUR 48,242 (gross total amount), split respectively into the fixed component equal to EUR 34,320 and in the estimated variable component equal to EUR 13,922.

World Equity*

For the management of the World Equity sub-fund, Generali Asset Management S.p.A.'s structures are equal to 0.86 units expressed in terms of full time equivalent, whose gross overall remuneration is 0.22% of the gross total remuneration of the Company's staff. Therefore, the gross total remuneration paid during 2024 by the Company to the personnel involved in the management of the specific sub-fund is equal to EUR 107,464 (gross total amount), split respectively into the fixed component equal to EUR 75,416 and in the estimated variable component equal to EUR 32,048.

SRI Ageing Population

For the management of the SRI Ageing Population sub-fund, Sycomore Asset Management's structures are equal to 1.5 units expressed in terms of full time equivalent, representing a gross total remuneration paid for 2024 by the Company to the personnel involved in the management of the specific sub-fund equal to EUR 200,000 (gross total amount), split respectively into the fixed component equal to EUR 138,000 and in the variable component equal to EUR 62,000.

SRI European Equity

For the management of the SRI European Equity sub-fund, Sycomore Asset Management's structures are equal to 1.5 units expressed in terms of full time equivalent, representing a gross total remuneration paid for 2024 by the Company to the personnel involved in the management of the specific sub-fund equal to EUR 200,000 (gross total amount), split respectively into the fixed component equal to EUR 138,000 and in the variable component equal to EUR 62,000.

Central & Eastern European Bond

For the management of the Central & Eastern European Bond sub-fund, Generali Asset Management S.p.A.'s structures are equal to 0.40 units expressed in terms of full time equivalent, whose gross overall remuneration is 0.10% of the gross total remuneration of the Company's staff. Therefore, the gross total remuneration paid during 2024 by the Company to the personnel involved in the management of the specific sub-fund is equal EUR 48,242 (gross total amount), split respectively into the fixed component equal to EUR 34,320 and in the estimated variable component equal to EUR 13,922.

^{*}Please refer to Note 1.

Euro Subordinated Debt Fund*

For the management of the Convertible Bond sub-fund, Generali Asset Management S.p.A.'s structures are equal to 0.56 units expressed in terms of full time equivalent, whose gross overall remuneration is 0.14% of the gross total remuneration of the Company's staff. Therefore, the gross total remuneration paid during 2024 by the Company to the personnel involved in the management of the specific sub-fund is equal to EUR 68,841 (gross total amount), split respectively into the fixed component equal to EUR 48,614 and in the estimated variable component equal to EUR 20,227.

Euro Bond

For the management of the Euro Bond sub-fund, Generali Asset Management S.p.A.'s structures are equal to 0.36 units expressed in terms of full time equivalent, whose gross overall remuneration is 0.09% of the gross total remuneration of the Company's staff. Therefore, the gross total remuneration paid during 2024 by the Company to the personnel involved in the management of the specific sub-fund is equal to EUR 43,092 (gross total amount), split respectively into the fixed component equal to EUR 30,746 and in the estimated variable component equal to EUR 12,346.

Euro Bond 1-3 Years

For the management of the Euro Bond 1-3 Years sub-fund, Generali Asset Management S.p.A.'s structures are equal to 0.26 units expressed in terms of full time equivalent, whose gross overall remuneration is 0.06% of the gross total remuneration of the Company's staff. Therefore, the gross total remuneration paid during 2024 by the Company to the personnel involved in the management of the specific sub-fund is equal to EUR 30,218 (gross total amount), split respectively into the fixed component equal to EUR 21,813 and in the estimated variable component equal to EUR 8,405.

Euro Aggregate Bond

For the management of the Euro Aggregate Bond, Generali Asset Management S.p.A.'s structures are equal to 0.61 units expressed in terms of full time equivalent, whose gross overall remuneration is 0.16% of the gross total remuneration of the Company's staff. Therefore, the gross total remuneration paid during 2024 by the Company to the personnel involved in the management of the specific sub-fund is equal to EUR 75,278 (gross total amount), split respectively into the fixed component equal to EUR 53,081 and in the estimated variable component equal to EUR 22,197.

Euro Corporate Bond

For the management of the Euro Corporate Bond sub-fund, Generali Asset Management S.p.A.'s structures are equal to 0.28 units expressed in terms of full time equivalent, whose gross overall remuneration is 0.07% of the gross total remuneration of the Company's staff. Therefore, the gross total remuneration paid during 2024 by the Company to the personnel involved in the management of the specific sub-fund is equal to EUR 32,793 (gross total amount), split respectively into the fixed component equal to EUR 23,599 and in the estimated variable component equal to EUR 9,194.

SRI Euro Corporate Short-Term Bond

For the management of the Euro Corporate Short Term Bond sub-fund, Generali Asset Management S.p.A.'s structures are equal to 0.28 units expressed in terms of full time equivalent, whose gross overall remuneration is 0.07% of the gross total remuneration of the Company's staff. Therefore, the gross total remuneration paid during 2024 by the Company to the personnel involved in the management of the specific sub-fund is equal to EUR 32,793 (gross total amount), split respectively into the fixed component equal to EUR 23,599 and in the estimated variable component equal to EUR 9,194.

SRI Euro Green Bond

For the management of the SRI Euro Green Bond sub-fund, Generali Asset Management S.p.A.'s structures are equal to 0.76 units expressed in terms of full time equivalent, whose gross overall remuneration is 0.20% of the gross total remuneration of the Company's staff. Therefore, the gross total remuneration paid during 2024 by the Company to the personnel involved in the management of the specific sub-fund is equal to EUR 94,589 (gross total amount), split respectively into the fixed component equal to EUR 66,482 and in the estimated variable component equal to EUR 28,107.

Euro Short Term Bond

For the management of the Euro Short Term Bond sub-fund, Generali Asset Management S.p.A.'s structures are equal to 0.26 units expressed in terms of full time equivalent, whose gross overall remuneration is 0.06% of the gross total remuneration of the Company's staff. Therefore, the gross total remuneration paid during 2024 by the Company to the personnel involved in the management of the specific sub-fund is equal to EUR 30,218 (gross total amount), split respectively into the fixed component equal to EUR 21,813 and in the estimated variable component equal to EUR 8,405.

^{*}Please refer to Note 1.

SRI Euro Premium High Yield

For the management of the SRI Euro Premium High Yield sub-fund, Generali Asset Management S.p.A.'s structures are equal to 0.44 units expressed in terms of full time equivalent, whose gross overall remuneration is 0.11% of the gross total remuneration of the Company's staff. Therefore, the gross total remuneration paid during 2024 by the Company to the personnel involved in the management of the specific sub-fund is equal to EUR 52,748 (gross total amount), split respectively into the fixed component equal to EUR 37,447 and in the estimated variable component equal to EUR 15,301.

Fixed Maturity Bond I*

For the management of the Fixed Maturity Bond I sub-fund, Generali Asset Management S.p.A.'s structures are equal to 0.11 units (number of personnel) expressed in terms of full time equivalent, whose gross overall remuneration is 0.02% of the gross total remuneration of the Company's staff. Therefore, the gross total remuneration paid during 2024 by the Company to the personnel involved in the management of the specific sub-fund is equal to EUR 10,907 (gross total amount), split respectively into the fixed component equal to EUR 8,412 and in the estimated variable component equal to EUR 2,495.

Absolute Return Multi Strategies

For the management of the Absolute Return Multi Strategies sub-fund, Generali Asset Management S.p.A.'s structures are equal to 0.29 units expressed in terms of full time equivalent, whose gross overall remuneration is 0.07% of the gross total reuneration of the Company's staff. Therefore, the gross total remuneration paid during 2024 by the Company to the personnel involved in the management of the specific sub-fund is equal to EUR 34,080 (gross total amount), split respectively into the fixed component equal to EUR 24,493 and in the estimated variable component equal to EUR 9,587.

Global Multi Asset Income

For the management of the Global Multi Asset Income sub-fund, Generali Asset Management S.p.A.'s structures are equal to 0.49 units expressed in terms of full time equivalent, whose gross overall remuneration is 0.12% of the gross total remuneration of the Company's staff. Therefore, the gross total remuneration paid during 2024 by the Company to the personnel involved in the management of the specific sub-fund is equal to EUR 59,829 (gross total amount), split respectively into the fixed component equal to EUR 42,361 and in the estimated variable component equal to EUR 17,468.

Global Opportunities*

For the management of the Global Opportunities sub-fund, the company's structures are equal to 0.10 units expressed in terms of full time equivalent, whose gross overall remuneration is 0.02% of the gross total remuneration of the Company's staff. Therefore, the gross total remuneration paid during 2024 by the Company to the personnel, including the staff involved in the management of the specific sub-fund Generali Global Opportunities is equal to EUR 9,297 (gross total amount), split respectively into the fixed component equal to EUR 7,295 and in the estimated variable component equal to EUR 2,002.

Income Partners Asian Debt Fund

For the management of the Income Partners Asian Debt Fund sub-fund, the company's structures are equal to 0.05 units (number of personnel) expressed in terms of full time equivalent, whose gross overall remuneration is 5% of the gross total remuneration of the Company's staff. Therefore, the gross total remuneration paid during 2024 by the Company to the personnel, including the staff involved in the management of the specific sub-fund Income Partners Asian Debt Fund is equal to EUR 110,361 (gross total amount), split respectively into the fixed component equal to EUR 110,361 and in the estimated variable component equal to EUR 0.

Luxembourg, April 2, 2025.

Report of the Investment Managers

Equity Sub-funds

Despite mixed performance across CEE equities, especially in Poland, the **Central & Eastern European Equity** sub-fund ended 2024 with a positive return (9.31%, C EUR Accumulation Share class), outperforming its benchmark. The sub-fund saw notable gains in Hungarian and Czech stocks, particularly in the banking sector. Hungarian stocks like Magyar Telecom, Richter Gedeon, and OTP Bank were standout performers due to monetary easing. Czech banks, including Erste, Moneta, and Komerční Banka, also contributed significantly, supported by resilient financial results and favorable market conditions.

Polish equities presented a mixed picture. Technology stocks like CD Projekt saw significant gains, while consumer stocks like Pepco and Dino Polska ended the year in the red due to weak demand, rising costs, and price wars. Polish banks experienced fluctuations due to profit-taking.

The **Euro Equity** sub-fund is up +4.26% over the year (B EUR Accumulation Share class), where its benchmark performed +9.26%. The portfolio was rather diversified with 113 direct equity lines at the end of the year.

During 2024, the portfolio was focused on Cyclicals, with an overweight in Industrials and Energy. On the other hand, the allocation was underweighted in Healthcare and Consumer Staples. At the geographical level, the sub-fund was overweight France and underweight Netherlands. During the year, the direct equity exposure remained stable at around 98%.

In 2024, the **Euro Equity Controlled Volatility** sub-fund posted a total net return of 9.18% (B EUR Accumulation Share class) The risk exposure of the sub-fund was managed dynamically during the year fluctuating between 82% and 99%. The sub-fund began 2024 almost fully invested with a net equity exposure close to 96%. During the first quarter exposure marginally increased, reaching its peak of 99% in March and maintained until early August, when recession fears put pressure on markets, increasing the market volatility. Consequently, equity exposure decreased to 82.5%, reaching its minimum yearly level. During the fourth quarter of the year, volatility was stable, so equity exposure of the sub-fund was kept almost stable around 84% until year end.

At sector level, the sub-fund was more exposed to Financials and Energy while the opposite applies for Information Technology and Industrials. At geographical level, Italy and Germany had a slightly overweight compared to Euro Stoxx 50 Index while Belgium and the Netherlands were kept underweight.

The **Euro Future Leaders** sub-fund (A EUR Accumulation Share class) performed 4.60% in 2024, underperforming its benchmark that returned 8.01%. The sub-fund was penalized during the first half of the year by its underweight positions in Rheinmetal and the banking sector. Its performance was in line with that of the benchmark in the second half, then benefited from rises in Esker (takeover bid announced by the private equity fund Bridgepoint), Alstom, Nexity, Leonardo, Aroundtown and Finecobank. During the 2nd half of the year, the exposure to French small caps was significantly reduced as considered to be particularly weakened by the local political situation. At the same time, a number of cyclical stocks positions have been strengthened at low valuations, such as Pirelli, a leader in the tire industry, Bekaert, a world leader in the production of steel wire used in a wide range of industries (automotive, construction, energy, consumer goods, etc.), Flatexdegiro, a leading online broker in Europe offering services at very competitive prices, and Metso, a global leader offering a large range of products and services for customers in aggregates, minerals and metals refining industries.

In 2024, the **World Equity*** sub-fund (formerly called "SRI World Equity") posted a gain of 22.56% (B EUR Accumulation Share class), underperforming its benchmark (+26.60%).

The ESG framework heavily weighed on performance. Ethical filter restrictions and the selectivity approach criteria had a negative impact of 126 bps until the new Prospectus entered into force (August 14, 2024). This figure increased to 151 bps at year end. The new Prospectus reduced the restrictions on the US market and in sectors like Communication Services and Consumer Discretionary (the major sources of underperformance since 2023).

In anticipation and following the victory of Donald Trump at the US presidential election, the ESG thematic suffered a massive underperformance, and this further weighed on the sub-fund's relative performance. Since the change in the Prospectus, the sub-fund posted a gain of 11.80% lagging the MSCI World but beating the MSCI World ESG Leaders.

The **SRI Ageing Population** sub-fund delivered a positive +6.01% total return (B EUR Accumulation Share class) in comparison to its benchmark at +8.59% (MSCI Europe Net Total Return). Large part of the underperformance can be explained by sector allocation, with notably the underweight to technology in the first half of the year. From a selection standpoint, stock-picking was positive in the consumer space, but was negative in the healthcare sector mainly due to positions in med-tech sector. In terms of positioning, the sub-fund remains concentrated with 49 portfolio holdings. By sector, the largest exposures are to healthcare, financials and consumer discretionary. By country, France, Germany and United Kingdom are the most represented.

The **SRI European Equity** sub-fund delivered a positive total return at +9.78% (B EUR Accumulation Share class) in comparison to its benchmark at +8.59% (MSCI Europe Net Total Return). The active management and sustainable investment strategies employed played a crucial role in achieving these results. The outperformance was mainly driven by selected names in industrials (Prysmian up 49.77%), consumer discretionary (Renault up 27.49%), telecommunications (Deutsche Telekom up 32.83%) and utilities (Iberdrola up 12.05%). The sector allocation also contributed positively with the overweight position in telecommunications and the underweight one in energy (for ESG reasons). At the end of 2024, the sub-fund was mainly invested in mid and large cap and from a sectoral standpoint, overweight in healthcare, consumer discretionary, real estate and utilities.

Bond/ Debt Sub-funds

In 2024, the **Central & Eastern European Bond** sub-fund (B EUR Accumulation Share class) posted a gain of 3.37%, outperforming its composite benchmark (2.79%).

The sub-fund outperformed thanks to a dynamic approach to duration and FX exposure, along with a sizable out-of-benchmark position in EUR-denominated Romanian government bonds instead of RON-denominated ones. On Hungary, the sub-fund invested in out-of-benchmark 5-year securities in the central part of the year, before turning more defensive after the summer. On Czech Republic, the allocation maintained a broadly-neutral-to-marginally-negative position in duration terms, while shorted the currency. On Poland, the portfolio stayed neutral-to-constructive on the currency for most of the period and lengthened duration progressively, as the pick-up in yield vs Czech bonds became more attractive. The portfolio was tactically short German Bunds future to manage duration risk and took a long dollar position in the final part of the year to hedge against possible Trump election, which benefitted the sub-fund.

In 2024, the **Euro Subordinated Debt Fund*** (formerly called "Convertible Bond") achieved an absolute performance of +8.40% (B EUR Accumulation Share class), slightly underperforming its benchmark (8.46%) In terms of positioning, the sub-fund maintained a slight bias towards long duration and credit risk. The portfolio remained fairly diversified throughout the year, with an average of around 100 positions. The main exposures were to French and Spanish issuers, while the main sectors were banks and utilities. As far as the European subordinated bond market is concerned, 2024 was a positive year thanks to carry and a sharp spread tightening. Yield curves steepened, and the contribution from rates negatively affected longer maturities. In terms of sectors, Real Estate was the top performer, while Automotive lagged.

The **Euro Bond** sub-fund finished 2024 with a return of 3.07% (B EUR Accumulation Share class), overperforming its benchmark by +129 bps.

In the first quarter of the year the sub-fund increased duration in January from a short position to a neutral level at the end of January. In February it was moved 1 year overweight and unchanged in the next months.

In the second quarter the sub-fund kept a clearly long relative duration exposure, with a broadly unchanged exposure to the different buckets of the yield curve. In July and August, the relative duration was reduced and, up to the end of September, was managed slightly overweight vs benchmark. The sub-fund continued to implement a neutral duration in October, before increasing it again when bund rates moved over 2.3% at the end of month. It was moved back to neutral in the second half of November, after the rally of rates observed post Trump election. The sub-fund had no credit exposure and used futures on rates for hedging purposes or managing the exposure to interest rate risks.

The **Euro Bond 1-3 Years** sub-fund finished 2024 with a return of +3.76% (B EUR Accumulation Share class), overperforming its benchmark by +62 bps.

In the first quarter of the year the sub-fund increased duration in January from a short position to a neutral level at the end of January. In February it was moved 1 year overweight and unchanged in the next months. In the second quarter the sub-fund kept a clearly long relative duration exposure, with a broadly unchanged exposure to the different buckets of the yield curve. In July and August, the relative duration was reduced and, up to the end of September, was managed slightly overweight vs benchmark. The sub-fund continued to implement a neutral duration in October, before increasing it again when bund rates moved over 2.3% at the end of month. It was moved back to neutral in the second half of November, after the rally of rates observed post Trump election.

The fund had no credit exposure and used futures on rates for hedging purposes or managing the exposure to interest rate risks.

The **Euro Aggregate Bond** sub-fund finished 2024 with a return of 4.59% (B EUR Accumulation Share class), overperforming its benchmark by +137bps (net of fees).

In the first quarter of the year the sub-fund increased duration in January from a short position to a neutral level at the end of January. In February it was moved 1 year overweight and unchanged in the next months. In the second quarter the sub-fund kept a long relative duration exposure, with a broadly unchanged exposure to the different buckets of the yield curve. In July and August, the relative duration was reduced and, up to the end of September, was managed slightly overweight vs benchmark. The sub-fund continued to implement a neutral duration in October, before increasing it again when bund rates moved over 2.3% at the end of month. It was moved back to neutral in the second half of November, after the rally of rates observed post Trump election. The exposure to corporate bonds at the beginning of the year represented around 55% of the total. The exposure was managed in the area 53-55% during the whole year. The sub-fund used futures on rates for hedging purposes or managing the exposure to interest rate risks and invested in CDS to manage credit risk.

The **Euro Corporate Bond** sub-fund (A EUR Accumulation Share class) performed 5.79% in 2024, better than its benchmark LECPTREU that returned 4.74% thanks to a substantial overweight to financials, Insurance and RE in particular, and a moderate overweight to T2 and T1 bonds (CoCos always in the 2-3% range). Within non-financials, consumers were kept in underweight, while the other sectors (Industrials, telecoms, utilities) were almost neutral but making a strong selection bottom-up. The duration was managed using interest rate futures capturing positive momentum trends. CDS and CDS options have also been used to model credit risk and mitigate part of the excessive exposure to high beta segments.

The **SRI Euro Corporate Short Term Bond** sub-fund (A EUR Accumulation Share class) performed 5.08% in 2024, better than its benchmark that returned 4.18%. The sub-fund outperformed the market thanks to a significant allocation to Financials, banks and real estate in particular, and a moderate overweight to T2 and T1 bonds (CoCos always in the 2-3% range). Within non-financials, Consumers were kept in underweight and Energy in overweight, while the other sectors (Industrials, Telecoms, Utilities) were almost neutral but making a strong selection bottom-up. Duration was managed using interest rate futures capturing positive momentum trends. CDS and CDS options have also been used to model credit risk and mitigate part of the excessive exposure to high beta segments.

The **SRI Euro Green Bond** sub-fund recorded a total return of +3.55% (B EUR Accumulation Share class) and an overperformance of +0.88% compared to its benchmark. Along the course of 2024 the sub-fund was managed in order to improve its ESG profile investing into new opportunities both in rates and credit space. This allowed also to differentiate more by issuer and capture more aspects of the green taxonomy. Looking at the asset allocation, the credit component has been overweighted up to 10% in the second part of the year, with a clear tilt in financial sector. Considering the duration exposure, the interest rate risk has been managed via overlay strategy implemented by listed bond futures, following a tactical approach focused on rates market levels trend. The neutral duration approach during the last month of the year helped to consolidate the relative overperformance. Finally, the drivers of the sub-fund's overperformance were duration management approach, maturity bucket allocation, sector allocation and selective bond picking carry oriented.

The **Euro Short Term Bond** sub-fund finished 2024 with a return of +3.56% (B EUR Accumulation Share class), underperforming its benchmark by -23 bps. In the first quarter, the sub-fund was managed with a relatively long duration exposure, around 0.8 years, with a short position on the 2-years core bucket, which remained unchanged during the quarter, and a long exposure to Italian BTPs. The long overall duration was confirmed also in the second quarter, with a slightly longer position in Italian bonds. In the third quarter the portfolio was managed between 0.6 and 0.8 years duration, but with a larger exposure to BTPs, in front of a short position in core rates. This investment strategy was also maintained in the last months of the year.

The sub-fund invested in Inflation linked bonds and had no credit exposure. It used futures on rates for hedging purposes or managing the exposure to interest rate risks.

The **SRI Euro Premium High Yield** managed to closely track its reference index and posted a performance of 8.34% (B EUR Accumulation Share class), where its benchmark performed 8.48%. The market moves in 2024 have been much more driven by "technical" and positioning rather than fundamentals changing drastically. The sub-fund privileged relative value trades while actively monitoring and acting on special situations. Overall, the portfolio remained positioned with: 1) longs in BBs vs Bs, balancing the beta with a long banks via AT1s and an overweight on Real Estate, 2) skew towards larger-cap HY names over smaller peers, 3) analytical duration somewhat shorter than the benchmark.

This **Fixed Maturity Bond I*** sub-fund was launched during the fourth quarter of 2024 and performed -0.43% (D EUR Accumulation Share class). It is a target maturity sub-fund with maturity January 2029. It has a strategy based on a basket of cash bonds, bullet and senior, with an overlay in credit derivatives to generate extra yield but avoiding any extension risk beyond the maturity date.

Absolute return Sub-funds

In 2024, the **Absolute Return Multi Strategies** sub-fund posted a gain of 5.00% (A EUR Accumulation Share class), overperforming its benchmark by +1.20%. Gains accelerated after the summer, driven by the good performance of credit and EM government bonds, with equities also contributing positively. In the quarter, the sub-und suffered somewhat from the renewed upward movement in interest rates.

Equity allocation (10.0% at year-end) favored US stocks over European ones, while keeping a presence on Japan and Emerging Markets via ETFs. In the fixed income complex, diversification remained elevated. The sub-und had an exposure of 33.1% to credit (focusing on short-to-medium dated bonds), 29.1% to EM government bonds (18.0% in hard currencies, 11.1% in EM local currencies including HUF, BRL, COP, MXN, ZAR) and 20.1% to developed government bonds (in particular Italian bills, inflation-linkers and fixed-coupon bonds). Activity on interest rates derivatives was focused on relative trades and curve steepening trades, and it contributed positively (around 55 bps). Duration was managed dynamically, with an extension into year-end (3.92 years).

Multi-Asset Sub-fund

The GIS Global Multi-Asset Income sub-fund posted a 7.06% (B EUR Accumulation Share class) performance in 2024.

The sub-fund benefited from the overall positive performances of global equity markets. Within this equity bucket, the sub-fund particularly benefited from the strong performance of US equity markets in which was overweight. The European market was more choppy but the fund took advantage of its overweight in European banks, also invested through dividend futures. On the other hand, the luxury sector exposure was detrimental for the sub-fund. The Japanese exposure was also positive due to robust performance of the market. The credit bucket was another source of performance over the year, particularly the Euro High Yield, while the performance in US investment grade was much more muted.

This was due to the duration component that suffered from the rise in yields over the year. On the opposite, peripherals and in particular Italy that was in overweight contributed positively to the fund performance.

^{*}Please refer to Note 1.

Sub-funds dedicated to Generali Group

The **Global Opportunities*** sub-fund (formerly called "Global Income Opportunities") achieved a performance of +1.81% over the year 2024 (A EUR Distributing Share class). The portfolio consisted of investment grade and high yield corporate bonds issued in USD, EUR and GBP by companies in developed and emerging markets. In addition to corporate issuers, the portfolio also held USD-denominated collateralized loan obligations (CLOs). The objective of the portfolio was to generate an attractive rate of return driven primarily by income. Given the unconstrained/non-benchmark relative nature of the portfolio, security selection was driven by relative valuation comparisons across the allowable investment opportunity set. At the geographical level, the sub-fund was particularly exposed to United States, Netherlands, United Kingdom and Cayman Islands.

A rebalancing of the sub-fund occurred between September 17 to December 10, 2024 due to the change of strategy and delegated investment manager from Wellington to Generali Asset Management. The sub-fund therefore gradually invested in underlying funds managed by Global Evolution (GE), the majority of which are emerging sovereign strategies.

At the end of December, the sub-fund was invested in seven funds. The residual portion being a position in a money market fund (0.99%) and cash. Over the holding period, the best-performing fund was the Frontier market local debt fund which posted a positive performance in contrast to the other EMD funds.

The **Income Partners Asian Debt Fund** finished 2024 with a return of +2.55% (A EUR Distribution Share class). Carry and credit spread tightening were the main positive contributors to the sub-fund, which was partially offset by the move in US rates.

Throughout the year the portfolio was well diversified, with 144 positions as of year-end. Geographically, Chinese credit accounted for the largest allocation at 25.0%, followed by South Korea and Indonesia at 12.5% and 11.0% respectively. The portfolio's average credit rating as of December was A- with duration of 3.8.

KPMG Audit S.à r.l. 39, Avenue John F. Kennedy L-1855 Luxembourg Tel: +352 22 51 51 1 Fax: +352 22 51 71 E-mail: info@kpmg.lu Internet:www.kpmg.lu

To the Shareholders of Generali Investments SICAV 60, avenue J.F. Kennedy L-1855 Luxembourg Luxembourg

REPORT OF THE REVISEUR D'ENTREPRISES AGREE

Opinion

We have audited the financial statements of Generali Investments SICAV ("the Fund") and of each of its sub-funds, which comprise the statement of net assets and the statement of investments as at 31 December 2024, and the statement of operations and changes in net assets for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Fund and of each of its sub-funds as at 31 December 2024, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (the "Law of 23 July 2016") and with International Standards on Auditing ("ISAs") as adopted for Luxembourg by the Commission de Surveillance du Secteur Financier ("CSSF"). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the « Responsibilities of "réviseur d'entreprises agréé" for the audit of the financial statements » section of our report. We are also independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our report of the "réviseur d'entreprises agréé" thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and of each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the "réviseur d'entreprises agréé" that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit
 procedures that are appropriate in the circumstances, but not for the purpose of expressing
 an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund.

- Conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the "réviseur d'entreprises agréé" to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the "réviseur d'entreprises agréé". However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Luxembourg, 17 April 2025

Notes to the Financial Statements as at 31.12.2024

1. Organisation

GENERALI INVESTMENTS SICAV (the "SICAV") is an investment company, qualifying as a "Société d'Investissement à Capital Variable" incorporated on March 14, 2002 for an unlimited duration pursuant to the law of August 10, 1915 on commercial companies, as amended, and under part I of the Luxembourg law of December 17, 2010 on undertakings for collective investment, as amended. The SICAV is registered at the Luxembourg Commercial Register under the number B86432 and is established at 60, avenue J.F. Kennedy L - 1855 Luxembourg. The SICAV has an umbrella structure.

Generali Investments Luxembourg S.A., the "Management Company", a limited liability company, "société anonyme", having its registered office at 4, rue Jean Monnet L - 2180 Luxembourg has been designated to serve as Management Company of the SICAV.

Change in the name of sub-funds

With effective date September 16, 2024, the Board of Directors decided to rename the sub-fund "SRI World Equity" into "World Equity", the sub-fund "Convertible Bond" into "Euro Subordinated Debt Fund", and the sub-fund "Global Income Opportunities" into "Global Opportunities".

Sub-funds launched

One sub-fund was launched during the year ended December 31, 2024:

Sub-fund nameCurrencyEffective launch dateGENERALI INVESTMENTS SICAV – Fixed Maturity Bond I ("Fixed Maturity Bond I")EURSeptember 26, 2024

As at December 31, 2024, twenty-two sub-funds were available to the investors:

| Sub-funds name | <u>Currency</u> |
|---|--|

| 2. Bond / Debt Sub-funds GENERALI INVESTMENTS SICAV - Central & Eastern European Bond ("Central & Eastern European Bond") GENERALI INVESTMENTS SICAV - Euro Subordinated Debt Fund ("Euro Subordinated Debt Fund") GENERALI INVESTMENTS SICAV - Euro Bond ("Euro Bond") GENERALI INVESTMENTS SICAV - Euro Bond 1-3 Years ("Euro Bond 1-3 Years") GENERALI INVESTMENTS SICAV - Euro Aggregate Bond ("Euro Aggregate Bond") GENERALI INVESTMENTS SICAV - Euro Corporate Bond ("Euro Corporate Bond") GENERALI INVESTMENTS SICAV - SRI Euro Corporate Short Term Bond ("SRI Euro Corporate Short Term Bond") GENERALI INVESTMENTS SICAV - SRI Euro Green Bond ("SRI Euro Green Bond") GENERALI INVESTMENTS SICAV - Euro Short Term Bond ("Euro Short Term Bond") GENERALI INVESTMENTS SICAV - SRI Euro Premium High Yield ("SRI Euro Premium High Yield") GENERALI INVESTMENTS SICAV - Fixed Maturity Bond I ("Fixed Maturity Bond I") | EUR EUR EUR EUR EUR EUR EUR EUR |
| 3. Absolute Return Sub-fund GENERALI INVESTMENTS SICAV - Absolute Return Multi Strategies ("Absolute Return Multi Strategies") | EUR |
| 4. Multi-Asset Sub-fund GENERALI INVESTMENTS SICAV - Global Multi Asset Income ("Global Multi Asset Income") | EUR |
| 5. Sub-funds dedicated to Generali Group GENERALI INVESTMENTS SICAV - Global Opportunities ("Global Opportunities") GENERALI INVESTMENTS SICAV - Income Partners Asian Debt Fund ("Income Partners Asian Debt Fund") | EUR EUR |

The SICAV may issue different classes of shares (class A-B-C-D-D1-E-G-R-Z), as determined by the Board of Directors of the SICAV, which may differ inter alia in their fee structure and distribution policy applying to them. These classes of shares are sub-divided into accumulation of income or distribution of income categories. Classes of shares B, C and G are reserved for institutional investors and classes of shares D, D1, and E for retail investors.

Class of shares A is reserved only for investments made by the Insurance Companies of Generali Group and also for other investors designated by the Board of Directors of the SICAV. Class of shares G is reserved only for investments made by the institutional investors approved by the Board of Directors of the SICAV. Class of shares R is reserved to investors in certain jurisdictions and are either themselves or their appointed nominees registered holders of R shares. Class of shares Z is reserved only for Investments made by the investment funds of Generali Group and also for other investors designated by the Board of Directors of the SICAV.

Classes of shares in currencies other than the base currency of a sub-fund are available for the sub-fund Global Opportunities. The hedged shares are covered largely by hedging financial instruments. The objective of the hedging of financial instruments is to cover the exchange-related risks between the currency of a sub-fund and the share's currency. The shares hedged against currency risk are denominated with the letter "H".

The investment policy of the SICAV is to invest in a range of diversified securities, conforming to the investment policy of each particular sub-fund, with the objective of long term capital growth.

2. Summary of significant accounting policies

The SICAV's financial statements are prepared in accordance with the Luxembourg regulations relating to undertakings for collective investment in transferable securities. These financial statements have been prepared on a going concern basis.

a) Presentation of the financial statements

The Fund maintains the books and records of each individual sub-fund in their respective currency and prepares combined statements in Euro ("EUR").

The combined statement of operations and changes in net assets is the sum of the statements of each Sub-fund.

b) Securities portfolio

The value of financial assets listed on an official stock exchange or dealt in on another regulated market is determined according to their last available price, or in the event that there should be several such markets, on the basis of the latest available price on the main market for the relevant asset.

In the event that the assets are neither listed on a stock exchange nor dealt in on another regulated market or if the price as determined above is not representative of the fair market value in the opinion of the Board of Directors of the SICAV, the value of such assets shall be assessed on the basis of their foreseeable sales prices estimated prudently and in good faith by the Board of Directors of the SICAV.

All investments with a known short term maturity date may be valued by using the amortised cost method. This involves valuing an investment at its cost and thereafter assuming a constant amortisation to maturity of any discount or premium, regardless of the impact of fluctuating interest rates on the market value of the investments. The Board of Directors of the SICAV will continually assess this method of valuation and recommend changes, where necessary, to ensure that the relevant sub-fund's investments are valued at their fair value as determined in good faith by the Board of Directors of the SICAV. If the Board of Directors of the SICAV believes that a deviation from the amortised cost per share may result in material dilution or other unfair results to shareholders, the Board of Directors of the SICAV shall take such corrective action, if any, as they deem appropriate to eliminate or reduce, to the extent reasonably practicable, the dilution or unfair results.

Units or shares issued by open-ended investment funds are valued at their last available net asset value per share/unit or in accordance with the below paragraph where such securities are listed.

Shares or units in exchange traded funds which are listed or quoted on a recognised securities exchange are determined according to their last available price.

c) Cash and cash equivalents & Bank overdrafts

The value of any cash on hand and broker accounts are deemed to be the full amount thereof, unless in any case the same is unlikely to be paid or received in full, in which case the value thereof derived at after making such discount as may be considered appropriate in such case to reflect the true value.

Cash and cash equivalents balances are held by following entities:

| SRI Euro Green Bond | (557,438.96) | (557,438.96) |

d) Conversion of items expressed in foreign currencies

The SICAV's financial statements are expressed in Euro ("EUR"). Net assets of each sub-fund expressed in foreign currencies are therefore converted and combined in EUR at the exchange rate in force at the close of the financial year.

Transactions and acquisition costs denominated in foreign currencies are converted into the accounting currency of each sub-fund based on the exchange rate in force on the date of the transaction or acquisition.

Assets and liabilities denominated in foreign currencies are converted into the accounting currency of each sub-fund based on the exchange rate in force at the end of the financial year. Any resulting gains or losses are recognised in the Statement of Operations and Changes in Net Assets.

The exchanges rates used at the year-end were the following:

| 1EUR = | 1.67245 AUD | 1EUR = | 25.17500 | CZK | 1EUR = | 21.53090 MX | KN 1EUR = | 36.61580 TRY |
|--------|-----------------|--------|-----------|-----|--------|-------------|-----------|--------------|

| 1EUR = | 4,561.93705 COP | 1EUR = | 162.73920 | JPY | 1EUR = | 11.44150 SE | K | |

^{*}Please refer to Note 1.

e) Dividend and interest income

Dividend income is accounted for on an ex-dividend basis, net of withholding tax. Interest income is recognised on an accrual basis. The amounts of tax reclaimed received are recorded in the Statement of Operations and Changes in Nets Assets in the account "Net dividends".

f) Allocation of costs and expenses

Specific costs or expenses are charged to each sub-fund. Non-specific costs and expenses are usually distributed between the sub-funds in proportion to their respective net assets.

g) Transaction costs

The transaction costs, i.e. fees charged by the brokers and the Custodian for securities transactions and similar transactions are recorded separately in the Statement of Operations and Changes in Net Assets in the account "Transaction costs".

h) Securities lending

The SICAV may lend portions of its securities portfolio to third parties. In general, lendings may only be effected via recognised clearing houses, or through the intermediary of prime financial institutions that specialise in such activities and in the modus specified by them. The income earned from the securities lending program is detailed in the Statement of Operations and Changes in Net Assets in the account "Net securities lending income".

i) Option contracts

Option contracts are valued at their last known price on the valuation date or on the closing date. Options purchased at market value are disclosed in the Statements of Net Assets.

j) Forward foreign exchange contracts

Outstanding forward foreign exchange contracts are valued at the closing date by reference to the rate of exchange applicable to the outstanding life of the contract. The unrealised appreciation or depreciation on forward foreign exchange contracts is disclosed in the statement of Net Assets.

k) Financial future contracts

Open financial future contracts are valued at their last known price on the valuation date or on the closing date. The unrealised appreciation or depreciation on financial future contracts is disclosed in the statement of Net Assets.

I) Credit default swaps

A credit default swap is a credit derivative transaction in which two parties enter into an agreement, whereby one party pays the other a fixed periodic coupon for the specified life of the agreement. The other party makes no payments unless a credit event, relating to a predetermined reference asset or basket of assets, occurs. If such an event occurs, the party will then make a payment to the first party, and the swap will terminate. The credit default swaps are revalued at each net asset value calculation. The unrealised appreciation or depreciation on credit default swaps is disclosed in the financial statements.

m) Total return swaps

A total return swap is a bilateral agreement in which each party agrees to exchange payments based on the performance of an underlying instrument (security, commodity, index.) thereof for a fixed or variable rate. The total performance will include gains and losses on the underlying, as well as any interest or dividend during the contract period according to the type of underlying. The total return swaps are revalued at each net asset value calculation. The unrealised appreciation or depreciation on total return swaps is disclosed in the Statements of Net Assets.

n) Interest rate swaps

An interest rate swap is an agreement to exchange interest rate cash flows, calculated on a notional principal amount, at specified intervals (payment dates during the life of the agreement).

o) Receivable on investments/ Payable on investments

Receivable on investments consists primarily of cash receivable for investments. Payable on investments consists primarily of cash payable for investments.

p) Formation expenses

Set-up costs and expenses are written-off over a period of five years on a straight-line basis.

3. Determination of net asset value of shares

The financial statements were prepared on the basis of the latest net asset value calculated during the financial year ended December 31, 2024. The official NAV has been used for the sole purposes of the financial statements.

The net asset value presented in the financial statements was calculated based on the last market price available at the time the calculation was performed.

The net asset value per share of each class of shares in each sub-fund is determined by dividing the value of the total net assets of sub-fund properly allocable to such class by the total number of shares of such class outstanding on such valuation day.

4. Taxation

The SICAV is registered in Luxembourg and as a result, is exempt from tax except for the "taxe d'abonnement". Under current legislation, institutional classes of shares (classes A, B, C, G, R and Z) or monetary sub-funds are subject to a tax rate of 0.01% per annum, those reserved to retail investors (classes D, D1, and E) are subject to a tax rate of 0.05% per annum. The tax is calculated and payable quarterly on the net assets of the SICAV at the end of the relevant quarter.

The value of assets represented by investments in other Luxembourg UCIs/UCITS which have already been subject to the "taxe d'abonnement" is exempt.

5. Management fees

The SICAV pays for the various sub-funds and by class of shares an annual aggregate fee (the "Aggregate Fee") accrued on each valuation day as a percentage of the net assets and payable quarterly in arrears. The Aggregate Fee may be used to pay the Management Company for the portfolio management, the Investment Managers, any Distributors and/or any permanent representatives in places of registration of the SICAV or any sub-fund.

For the year ended December 31, 2024, Aggregate Fees were detailed as follows:

| GENERALI INVESTMENTS SICAV | Class A | Class B | | | Class D1 | Class E | Class G | Class R | Class Z |
|------------------------------------|---------|---------|--------|--------|----------|---------|---------|---------|---------|

6. Administration fees

The Management Company is entitled to receive administrative fees (including fees related to the Depositary and the Central Administration and the fees to be paid to the correspondents of the Depositary) of up to 0.15% p.a. out of the relevant Sub-fund's average net assets. Such fees are calculated and accrued on each Valuation Day are payable monthly in arrears.

7. Performance fees

As set out in the prospectus of the SICAV, the Investment Manager is entitled to receive from the net assets of certain sub-funds or classes, an annual performance fee equal to the difference between the performance of the net asset value per share over the performance period and the performance of the benchmark provided that the net asset value per share at the end of the performance period exceeds the historical highest net asset value per share at the end of any prior performance period since the launch date of the sub-fund.

The performance fees were as follows:

| GENERALI INVESTMENTS SICAV | Share class | Performance Fee | Mechanism | Performance Fee Benchmark | Performance Fee Period |
|-------------------------------------|-------------|--------------------|---|------------------------------|---------------------------|
| | Class A | 20% | High Water Mark with Performance fee Benchmark | €STER + 0.90% per annum | Calendar year |
| | Class C | 20% | High Water Mark with Performance fee Benchmark | €STER + 0.50% per annum | Calendar year |
| Absolute Return Multi Strategies | Class D | 20% | High Water Mark with Performance fee Benchmark | €STER + 0.10% per annum | Calendar year |
| | Class E | 20% | High Water Mark with Performance fee Benchmark | €STER | Calendar year |
| | Class R | 20% | High Water Mark with Performance fee Benchmark | €STER + 0.75% per annum | Calendar year |

No performance fee has been incurred for year ending December 31, 2024.

8. Placement fees

The Placement Fee will be calculated on the first Valuation Day and shall serve as a compensation for the initial distribution activity for such Class. The Placement Fee is paid once at the initial Valuation Day and is amortised over the life of the Share Class until the Maturity Date.

| GENERALI INVESTMENTS SICAV | Placement fees |
|----------------------------|--------------------------|
| Fixed Maturity Bond I | Up to 2.00% for class D1 |

9. Changes in portfolio composition

The details of the changes in portfolio composition for the year ended December 31, 2024, are at the disposal of the shareholders at the registered office of the SICAV and are available upon request free of charge.

| SRI European Equity | EUR | 162,780,392.24 | 174,551,518.96 | Equity & Government Bonds | Investment Grade |

BNP Paribas has acted as principal and exclusive borrower. The counterparty for securities lending transactions is BNP Paribas.

For the year ended December 31, 2024, the direct-indirect costs and fees are detailed below:

| GENERALI INVESTMENTS SICAV | Sub-fund currency | Direct-indirect costs and fees (in sub-fund currency) |
|-----------------------------------|----------------------|---|
| Absolute return Multi Strategies | EUR | 2,340.69 |
| Central & Eastern European Equity | EUR | 2,761.53 |
| Euro Equity Controlled Volatility | EUR | 8,552.94 |
| Euro Bond | EUR | 20,574.79 |
| Euro Bond 1-3 Years | EUR | 14,241.89 |

^{*}Please refer to Note 1.

| GENERALI INVESTMENTS SICAV | Sub-fund currency | Direct-indirect costs and fees (in sub-fund currency) |
|------------------------------------|-------------------|---|
| Euro Aggregate Bond | EUR | 13,887.62 |
| Euro Subordinated Debt Fund* | EUR | 13,293.55 |
| Euro Corporate Bond | EUR | 12,239.00 |
| Euro Short Term Bond | EUR | 6,894.48 |
| Euro Equity | EUR | 2,246.68 |
| SRI Euro Corporate Short Term Bond | EUR | 2,352.12 |
| Euro Future Leaders | EUR | 8,140.78 |
| Income Partners Asian Debt Fund | EUR | 8,186.58 |
| Global Opportunities* | EUR | 29,153.89 |
| Global Multi Asset Income | EUR | 8,337.31 |
| SRI Euro Green Bond | EUR | 22,427.69 |
| World Equity* | EUR | 37,968.54 |
| SRI Euro Premium High Yield | EUR | 10,994.00 |
| SRI European Equity | EUR | 12,247.76 |

Direct-indirect costs and fees are incurred when securities lending transactions are placed through the securities lending program organised by BNP Paribas.

When lending the securities is made through the BNP Program, the Management Company receives a fee up to 15% of the gross revenue received from the borrower for the monitoring of the securities lending program. The remainder of the gross revenue, that is at least 85%, is received by the lending Sub-funds.

The net amount of securities lending income generated by the SICAV for the whole period is disclosed in the Statement of Operations and Changes in Net Assets in the account "Net Securities lending income".

17. Dividend distributions

On January 17, 2024, the Board of Directors of the SICAV has decided to pay dividends with an ex-dividend date on January 26, 2024, and a payment date on January 31, 2024. The amounts were as follows:

| GENERALI INVESTMENTS SICAV | Share classes | Currency | Dividend per share |

^{*}Please refer to Note 1.

18. SFDR information

The information on the environmental and/or social characteristics for the sub-fund(s) disclosing under article 8(1) of SFDR as required by the article 50 (2) of SFDR RTS are disclosed in the Other information (unaudited) in the section 5. Sustainable Finance Disclosure Regulation ("SFDR")"

19. Subsequent events

On January 21, 2025, the Board of Directors of the SICAV has decided to pay dividends with an ex-dividend date on February 7, 2025, and a payment date on February 12, 2025. The amounts were as follows:

| GENERALI INVESTMENTS SICAV | Share classes | Currency | Dividend per share |
|----------------------------|----------------|----------|--------------------|
| Global Multi Asset Income | A Distribution | EUR | 1.01 |
| Global Multi Asset Income | D Distribution | EUR | 0.94 |
| Global Multi Asset Income | E Distribution | EUR | 0.93 |

Other Information (unaudited)

1. Securities Financing Transactions and of Reuse Regulation ("SFTR")

The Regulation (EU) 2015/2365 on transparency of securities financing transactions and of reuse "SFTR" ("Regulation") was published in the Official Journal of the European Union on 23 December 2015 and entered into force on 12 January 2016.

Its purpose is to enhance transparency on the market (i) of securities financing transactions (i.e. mainly securities or commodities lending or borrowing, repurchase and reverse repurchase agreements as well as lending margin transaction) ("SFT") and (ii) of the reuse of financial instruments.

a) Global

As at December 31, 2024 the market value of assets engaged in securities lending activities as a proportion of NAV and as a proportion of total lendable assets were as follows:

| GENERALI INVESTMENTS SICAV | Lending transactions on securities (NAV %) | Lending transactions on securities (Total Lendable Assets - % of portfolio at market value) |
|------------------------------------|--|---|
| Central & Eastern European Equity | 33.02% | 33.99% |
| Euro Equity Controlled Volatility | 46.73% | 47.77% |
| Euro Bond | 17.10% | 18.02% |
| Euro Bond 1-3 Years | 12.71% | 13.48% |
| Euro Aggregate Bond | 14.94% | 16.49% |
| Euro Subordinated Debt Bond | 19.54% | 21.06% |
| Euro Corporate Bond | 20.30% | 21.01% |
| Euro Short Term Bond | 16.69% | 18.20% |
| Euro Equity | 26.86% | 26.92% |
| World Equity* | 30.84% | 30.98% |
| SRI Euro Corporate Short Term Bond | 17.50% | 18.35% |
| Euro Future Leaders | 46.69% | 49.16% |
| Income Partners Asian Debt Fund | 12.08% | 12.76% |
| SRI Euro Premium High Yield | 24.15% | 25.84% |
| Absolute Return Multi Strategies | 20.64% | 22.11% |
| Global Multi Asset Income | 11.44% | 13.18% |
| SRI Euro Green Bond | 15.60% | 15.94% |
| SRI European Equity | 38.19% | 40.69% |

^{*}Please refer to Note 1.

As at December 31, 2024 the assets engaged in TRS as an absolute value and as a proportion of NAV were as follows:

| GENERALI INVESTMENTS SICAV | Assets engaged in absolute terms (in EUR) | Assets engaged (NAV %) |
|----------------------------|---|------------------------|
| Global Multi Asset Income | 462,674.38 | 0.27% |

b) Concentration data

As at December 31, 2024, the top ten issuers of collateral received for securities lending activities were as follows:

| SRI European Equity | EUR | - | - | - | 162,780,392.24 | 162,780,392.24 |

Regardless of the maturity tenor, all securities lending activities could be recalled at all times by the Management Company, Generali Investments Luxembourg S.A..

All TRS have the following maturity tenor as detailed in the below table:

| GENERALI INVESTMENTS SICAV | Sub-fund | One month to three | Three months to one | Total |
|----------------------------|----------|--------------------|---------------------|------------|
| | currency | months | year | |
| Global Multi Asset Income | EUR | (16,194.08) | 235,378.40 | 219,184.32 |

^{*}Please refer to Note 1.

d) Data on reuse of collateral

There was no cash collateral reinvested as part of the securities lending activities, excluding as a result of any reinvestment made by BNP Paribas.

Returns generated from reinvested cash collateral, if any, are part of the securities lending income as disclosed in the Statement of Operations and Changes in Net Assets in the account "Net securities lending income".

There was no reuse of cash collateral related to TRS transactions.

e) Safekeeping of collateral received

The collateral received for securities lending activities is safe-kept by the custodian, BNP Paribas, Luxembourg Branch, as at December 31, 2024.

f) Safekeeping of collateral granted

There was no collateral granted by the sub-funds for securities lending activities as at December 31, 2024.

There was collateral granted by the sub-funds for TRS as at December 31, 2024, which was held at JP Morgan Chase Bank, Société Générale, Bank of America Securities Europe and BNP Paribas Paris.

g) Data on return and cost for each type of SFTs

The total return of the securities lending activities is apportioned between GENERALI INVESTMENTS SICAV and the Management Company, Generali Investments Luxembourg S.A..

For the year ended December 31, 2024, the return amount in EUR and as a percentage of total return is as follows:

| | Amount (in EUR) | % of overall returns* |
|--------------------------------------|--------------------|-----------------------|
| GENERALI INVESTMENTS SICAV | 1,666,190.84 | 86.58% |
| Generali Investments Luxembourg S.A. | 258,181.48 | 13.42% |

^{*} Contractual rates are respectively set at 85% and 15%.

For TRS held by the sub-fund GENERALI INVESTMENTS SICAV - Global Multi Asset Income, the return, identified as the net realised profit / loss, movement in net unrealised appreciation/depreciation, and interest received on TRS during the year, was EUR 7,921,331.29. The costs, identified as interest paid on TRS during the year, were included in the net realised profit/loss on Swaps.

The accounting principle applied to the flows linked to the TRS have been defined as such that quarterly coupons or premium income received by the TRS be booked separately from the TRS realised performance (loss or profit). It is to be noted that interest on bonds and dividends on equities are equally processed on separate accounts.

The absolute VaR approach

GENERALI INVESTMENTS SICAV - Absolute Return Multi Strategies

The limit was set at 2.5%

The VaR figures have been calculated based on the following input data:

- Model used: Monte-Carlo Simulations- Confidence level: 99% with 0.98 decay factor

Holding period: 20 days Length of data history: 2 years

The utilisation of the VaR limits was as follows:

- Lowest utilisation: 1.27%- Highest utilisation: 2.50%- Average utilisation: 1.88%

The average level of leverage calculated using the sum of notional approach for the financial year was 71.24%.

GENERALI INVESTMENTS SICAV - Global Multi Asset Income

The limit was set at 6.0%

The VaR figures have been calculated based on the following input data:

Model used: Monte-Carlo Simulations
 Confidence level: 99% with 0.98 decay factor

Holding period: 20 daysLength of data history: 2 years

The utilisation of the VaR limits was as follows:

Lowest utilisation: 2.91%Highest utilisation: 10.84%Average utilisation: 4.43%

The average level of leverage calculated using the sum of notional approach for the financial year was 579.74%.

5. Sustainable Finance Disclosure Regulation ("SFDR") (unaudited)

The investments underlying below financial products do not take into account the EU criteria for environmentally sustainable economic activities:

- Absolute Return Multi Strategies
- Central & Eastern European Bond
- Central & Eastern European Equity
- Euro Equity
- Euro Equity Controlled Volatility
- Euro Future Leaders
- Global Opportunities
- Income Partners Asian Debt Fund

Out of the 22 active Sub-Funds at year end, the following Sub-Fund disclosed take into consideration the EU criteria for environmentally sustainable economic activities:

- World Equity
- SRI Ageing Population
- SRI European Equity
- Euro Bond
- Euro Subordinated Debt Fund
- Euro Short Term Bond
- Euro Bond 1-3 Years
- Euro Aggregate Bond
- Euro Corporate Bond
- SRI Euro Corporate Short Term Bond
- SRI Euro Premium High Yield
- SRI Euro Green Bond
- Fixed Maturity Bond I
- Global Multi Asset Income

Generali Investment SICAV – World Equity ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:

Sustainable

practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852,

establishing a list of environmentally sustainable

economic activities. That Regulation does not lay down a list of socially sustainable

economic activities.

investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable

investment means

an investment in an economic activity that contributes to

an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

Generali Investment SICAV - World Equity

Legal entity identifier: 549300DFDBRB6H5WXR24

Environmental and/or social characteristics

| Did this financial product have a sustain | nable investment objective? |
|--|---|
| Yes | ● ○ 🗶 No |
| It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 35.1% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective |
| It made sustainable investments with a social objective:% | It promoted E/S characteristics, but did not make any sustainable investments |

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-fund promotes environmental and social characteristics pursuant to Article 8 of the Regulation (EU) 2019/2088 through the application of a Responsible investment process.

The Investment Manager actively managed the Sub-fund and selected, from the MSCI World Index (the "Initial Investment Universe"), equity securities which presented positive environmental, social and governance ("ESG") criteria relative to the Initial Investment Universe provided that the issuers followed good corporate governance practices.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-fund.

How did the sustainability indicators perform? ...and compared to previous periods?

The sustainability indicators used to measure the attainment of the environmental and social characteristics promoted by the Sub-fund are as follows:

• The carbon intensity compared to that of the Initial Investment Universe;

| | 31/12/2024 | 31/12/2023 | 31/12/2022 |
|---|------------|------------|------------|
| Carbon intensity of the fund | 79.7 | 71.03 | 106.7 |
| Carbon intensity of the investment universe | 102.9 | 105.5 | 149.3 |

• The ESG score compared to that of the Initial Investment Universe;

| | 31/12/2024 |
|--------------------------------------|------------|
| ESG score of the fund | 7.4 |
| ESG score of the investment universe | 6.9 |

• The minimum percentage of the Sub-fund's investments allocated to environmentally and socially sustainable investments;

| | 31/12/2024 |
|---------------------------------------|------------|
| Percentage of sustainable investments | 35.1% |

• The share of issuers within the portfolio with exposure to economic activities set out in the exclusions list.

The investment manager excluded investments if they match one or more of the following criteria:

- Production of weapons violating fundamental humanitarian principles (antipersonnel landmines, cluster bombs and nuclear weapons),
- Severe environmental damages,
- Serious or systematic violation of human rights,
- Cases of gross corruption,
- Significant involvement in coal and tar sand-sector activities, or
- Exclusions defined by the International Labor Organization (ILO).

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the Sub-fund partially intended to make include being linked to an environmental or social objective through the use of proceeds of the issuer, assessed via any individual or combination of the following indicators:

The internal Green/Social/ Sustainability classification of the bonds (GSS bond);

- The revenues of the companies categorised as having ESG rating A and derived from sustainable impact solution or aligned with the European Taxonomy;
- The alignment of the company with a credible greenhouse gases emissions transition pathway. It is considered that the companies with relevant and credible greenhouse gases emissions reduction approved by the Science Based Targets initiative (SBTi) can meet the Sustainable investment criteria if they have already achieved a significant reduction of their scope 1 & 2 greenhouse gases intensity of 7% per year over the past three years, in line with the rate implied by the Paris agreement.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In order to ensure that the sustainable investments did not cause significant harm to any environmental or social objective, those investments were subject to a screening process against the mandatory Principal Adverse Impacts and relevant optional Principal Adverse Impacts, as befitting each asset type, and as can be found, respectively, in Annex I Tables I, II and III of the European Commission delegated Regulation 2022/1288 (PAIs). PAIs were assessed in a quantitative or qualitative manner based on the Investment Manager's research.

The Investment Manager also applied a screen to align with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights as provided for under the minimum Safeguards in the EU Taxonomy.

How were the indicators for adverse impacts on sustainability factors taken into account?

As required by the regulation and as described above, the Principal Adverse Impact (PAI) indicators listed in Annex I of the European Commission delegated Regulation 2022/1288 were the reference to be considered as described in the section above.

Further additional adverse sustainability indicators, such as indicators 9 and 22 (in relation to investments in companies producing chemical and non-cooperative tax as set out in the EU SFDR Regulatory Technical Standards (table II and table III of Annex 1) were considered as part of the do no significant harm screen.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The norms-based exclusions as described under "What investment strategy does this financial product follow?" seeked alignment with these guidelines and principles. Third party data were used to identify violators and prohibit relevant investments in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

☑ Yes, the Sub-fund considers principal adverse impacts ("PAIs") on sustainability factors.

The main focus is on the following PAIs with reference to Annex I of the Commission Delegated Regulation (EU) 2022/1288. Those indicators are considered and will be monitored continuously:

o Table 1, indicator 3 – GHG Intensity of investee companies: In addition to the monitoring of issuers' GHG intensity, Investments in companies who are involved in Coal activities are excluded.

The Carbon Intensity of the fund as of 31/12/2024 was: 79.7

During the reference period, investments in companies who are involved in Coal activities were excluded if one or more of the following criteria occured:

Coal-related business: more than 20% of the revenues deriving from coal; Coal power generation: more than 20% of power generated from coal; Companies with an installed coal power capacity of more than 5 GW.

Issuers classified in the restricted list were excluded and no new investment were carried in any asset class. Existing exposure (if any) included in the restricted list has been promptly sold in full.

o Table 1, indicator 10 – Violations of the UN Global Compact ("UNGC") principles and the Organisation for Economic Co-operation and Development ("OECD") Guidelines for Multinational Enterprises – through the application of the exclusion criteria, no investment can be made in funds that invest in companies where there are violations or serious suspicions of possible violations of the OECD Guidelines for Multinational Enterprises or the UNGC principles.

During the reference period, no investments have been made in funds that invest in companies where there were violations or serious suspicions of possible violations of the OECD Guidelines for Multinational Enterprises or the UNGC principles.

Issuers classified in the restricted list were excluded and no new investment were carried in any asset class. Existing exposure (if any) included in the restricted list has been promptly sold in full.

○ Table 1, indicator 14 – Exposure to controversial weapons: Investments in companies whose main turnover is generated by controversial weapons are excluded.

Principal adverse impacts are the most significant negative impacts of investment

investment
decisions on
sustainability factors
relating to
environmental,
social and employee
matters, respect for
human rights, anticorruption and anti-

bribery matters.

During the reference period, no investments have been made in companies directly involved in armament and weapons that violate fundamental humanitarian principles through their normal use (cluster bombs, antipersonnel landmines, nuclear weapons, biological and chemical weapons). Issuers classified in the restricted list were excluded and no new investment were carried in any asset class. Existing exposure (if any) included in the restricted list has been promptly sold in full.

□ No

What were the top investments of this financial product?

As of 31/12/2024, the top investments were as follows:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/01/2024 – 31/12/2024

| Largest Investments | Sector | % Assets | Country |
|--------------------------------------|------------------------|----------|----------------------|
| APPLE INC (AAPL UW) | InformationTechnology | 5.36% | United States |

Asset allocation

describes the

investments in

specific assets.

share of

What was the proportion of sustainability-related investments?

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| Sectors | %AuM |
|------------------------|--------|
| Information Technology | 26.48% |
| Financials | 15.60% |
| Consumer Discretionary | 12.03% |
| Health Care | 10.47% |
| Communication Services | 8.89% |
| Industrials | 8.61% |
| Consumer Staples | 5.52% |
| Energy | 4.06% |
| Materials | 3.63% |
| Utilities | 1.98% |
| Real Estate | 1.44% |
| Funds | 0.62% |
| Cash | 0.56% |
| Fees | 0.11% |

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

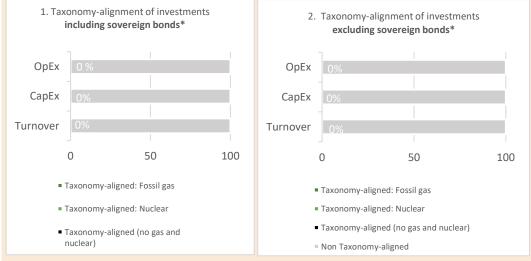

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy. However, the position will be kept under review as the underlying rules are finalised and the availability of reliable data increases over time.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

^{*}For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are
sustainable
investments with an
environmental
objective that do
not take into
account the criteria
for environmentally
sustainable

economic activities under Regulation

(EU) 2020/852.

- What was the share of investments made in transitional and enabling activities? As the Sub-fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as the sub-fund does not commit to invest in any "sustainable investment".

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investment with an environmental objective not aligned with the EU Taxonomy was: 24.8%.

What was the share of socially sustainable investments?

The share of socially sustainable investment was: 9.9%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The "other" investments and/or holdings of the Sub-fund are comprised, directly or indirectly, of securities whose issuers did not meet the ESG criteria described above to qualify as exhibiting positive environmental or social characteristics. This includes (i) Ancillary Liquid Assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets or for a period of time strictly necessary in case of unfavourable market conditions, and (ii) cash equivalents (i.e., bank deposits, Money Market Instruments, money market fund), pursuant to the Sub-fund Investment Policy, and (iii) debt securities, equity-linked securities such as, but not limited to, debt securities convertible into common shares, preference shares and warrants on Transferable Securities, as well as shares or units of other UCITS or UCIs compliant with the provisions set out in Article 41 (1) e) of the UCI Law. No minimum environmental or social safeguards are applied to these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

- Application of a rating upgrade approach. The average ESG rating of the Sub-fund was constantly higher than the average ESG rating of its Initial Investment Universe.
- Application of a rating upgrade approach. The average carbon intensity of the Sub-fund was constantly higher than the average carbon intensity of its Initial Investment Universe.
- Application of the Ethical filter, the investment manager excluded investments if they match one or more of the following criteria:
 - Production of weapons violating fundamental humanitarian principles (antipersonnel landmines, cluster bombs and nuclear weapons),
 - Severe environmental damages,
 - Serious or systematic violation of human rights,
 - Cases of gross corruption,
 - Significant involvement in coal and tar sand-sector activities, or
 - Exclusions defined by the International Labor Organization (ILO)

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. How did this financial product perform compared to the reference benchmark?

N/A

- How does the reference benchmark differ from a broad market index?
 N/A
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

N/A

- How did this financial product perform compared with the reference benchmark?
 N/A
- How did this financial product perform compared with the broad market index?
 N/A

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: GIS SRI AGEING POPULATION Legal entity identifier: 5493 00XF06RKOKO6H4 87

Environmental and/or social characteristics

| Did this financial product have a sustain | nable investment objective? |
|--|---|
| Yes | ● ○ 🗶 No |
| It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 84 % of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy |
| It made sustainable investments with a social objective:% | X with a social objective It promoted E/S characteristics, but did not make any sustainable investments |

Sustainable investment means an investment in an economic activity that contributes to environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good

governance practices.

The **EU Taxonomy** is a classification

system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

As indicated in the prospectus, the fund invests with a Socially and Responsible Investment (SRI) process, in listed equities from European companies that that contribute to the social objectives linked to the long-term trend of ageing population, those social objectives being: Health, Ageing Well, Better Living and Social solutions to the challenges of an ageing world.

The investment universe of the fund is built according to specific criteria described below.

Eligible companies are identified through:

- A. A Societal contribution [1] of products and services strictly above 0%
- B. An overall better result at a Sub-fund level compared to the Benchmark on the Net Environmental Contribution (NEC [2]) and the percentage of women in key management roles indicators.

[1] The Societal Contribution is a quantitative metric, on a scale of -100% to +100%, which combines the positive and negative societal contributions of a company's products and services. The methodology draws on the societal aspects of the United Nations' 17 Sustainable Development Goals (SDGs) and their 169 sub-goals (or targets), which provide a shared roadmap for private and public sector players for 2030, designed to create a better and more sustainable future. The methodology also includes macroeconomic and scientific data sourced from public research institutions, and from independent organizations such as the Access to Medicine Foundation or the Access to Nutrition Initiative. More details on the metric can be found on Sycomore AM's website: https://en.sycomore-am.com/esg-research-material?category=policies

[2] The NEC is a metric that measures the extent to which a company's business model is aligned with the ecological transition and the climate change mitigation objectives. It ranges from -100% for businesses that are highly damaging to natural capital, to +100% for companies with a strong positive net impact, offering clear solutions to environmental and climate-related challenges. The NEC covers five impact categories (issues: climate, waste, biodiversity, water, air quality) by group of activities (contributing areas: ecosystems, energy, mobility, construction, production). More details on the metric can be found on the NEC initiative's website: https://nec-initiative.org/

How did the sustainability indicators perform?

The fund aims at outperforming the MSCI Europe index, a broad market index, regarding [1]:

- The NEC: in 2024, the financial product had a weighted average NEC equal to 1%, while MSCI Europe had a weighted average NEC equal to -2%.
- The percentage of women in key management roles: in 2024, the financial product had a weighted average share of women in key management roles equal to 27%, to be compared to 26% on MSCI Europe.

[1] Objectives set out in Sycomore's transparency code: https://en.sycomore-am.com/download/810745380

...and compared to previous periods?

In 2023, the fund:

- Had a weighted average NEC equal to 0%.
- Had a weighted average percentage of women in key management roles equal to +28%.
- What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In 2024, the financial product made the following investments with a sustainable objective:

• 84% of the portfolio's investments were sustainable investments with a social objective filling one of those criteria:i. A Societal Contribution of products and services above or equal to 30% and thus contributed positively to societal challenges identified by the United Nations' Sustainable Development Goals.ii. A good job rating equal or above 55/100. The Good Jobs Rating which is a quantitative metric designed to assess – on a scale of 0 to 100 – a company's overall ability to create durable and quality jobs for all, and particularly in areas (regions or countries) where employment is relatively scarce and therefore needed to ensure sustainable and inclusive

economic growth.iii. A happy at work rating equal or above 4.5/5. The analysis framework provides a complete and objective assessment of the level of well-being at work.

In addition, c. 13% of the fund's investments in companies were eligible according to the aforementioned selection criteria (A, B), or , but not meeting the above sustainable objective criteria (I, II.i, II.ii, II.ii), and are therefore reported here as "not sustainable".

Finally, c. 3% of the fund's assets under management were cash and cash equivalent maintained for liquidity purposes, or instruments held for hedging purposes, and therefore reported here as "not sustainable".

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and anti-

bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Two safeguards are implemented across all investments of the fund to ensure sustainable investments do not cause significant harm to any sustainable investment objective:

- The SPICE methodology is structured around the five stakeholders (Society & Suppliers, People, Investors, Clients and the Environment). Investments causing significant harm to one or more sustainable investment objectives are meant to be excluded through:
 - A minimum threshold, set at 3/5 for each investment of the financial product;
 - Consideration of controversies associated with issuers, monitored daily based on various sources of external data as well as controversy analyses run by an external provider. All controversies impact the SPICE rating of the issuer. Severe controversies can lead to an exclusion from the financial product;

The exclusion policy [1] adds restrictions on activities that are regarded as causing significant harm to at least one sustainable investment objective.

How were the indicators for adverse impacts on sustainability factors taken into account?

^[1] The exclusion policy is available on Sycomore AM's website - https://en.sycomore-am.com/esg-research-material?category=policies

The SPICE methodology covers all environmental, social and governance issues targeted by the indicators for adverse impacts on sustainability factors listed within the Regulatory Technical Standards.

The financial product invested exclusively in equities of listed companies. Out of the 46 adverse impact indicators applicable to companies and excluding one item dedicated to bond investments (14 principal adverse impact indicators listed in Table 1, as well as 32 additional adverse impact indicators listed in Table 2 and Table 3), 42 indicators (23 environmental indicators and 19 social indicators) are covered during SPICE analysis, and 4 indicators (1 environmental indicator and 3 social indicators) are targeted by Sycomore AM's exclusion policy.

More specifically, Sycomore AM's fundamental analysis model SPICE, is an integrated model, allowing to get a holistic view of companies of the investment universe. It was built taking into account OECD guidelines for Multinational Enterprises. It fully integrates ESG factors to capture how companies are managing adverse impacts as well as key sustainable opportunities.

Examples of matching between adverse impact indicators and SPICE items include *inter alia*:

Society & Suppliers (S): The S rating reflects the performance of the company with respect to its suppliers and civil society. Analysis relates to the societal contribution of products and services, corporate citizenship, and the outsourcing chain. Adverse sustainability indicators including lack of a supplier code of conduct, insufficient whistleblower protection, lack of a human rights policy, lack of due diligence, risks related to human beings trafficking, child labour or compulsory labour, cases of severe human rights issues, and risks related to anti-corruption and anti-bribery policies, are taken into account in that Society & Suppliers section.

People (P): The P rating focuses on a company's employees and its management of human capital. The assessment of the People pillar covers the integration of people-related issues, employees' fulfilment (Happy@Work environment), and measurement of employee engagement. Adverse sustainability indicators including unadjusted gender pay gap, board gender diversity, workplace accident prevention policies and health & safety indicators, employee's grievance mechanisms, discrimination, and CEO pay ratios are addressed in that People section.

Investors (I): The I rating focuses on the relation between companies and their shareholders. The rating is assigned based on an in-depth analysis of the company's shareholder and legal structure and of the interactions and power balance between different players: management, shareholders and their representatives, directors. Analysis targets the business model and

governance. Among adverse sustainability indicators, lack of diversity at board level and excessive CEO pay-ratio are also addressed in that section.

Clients (C): The C rating focuses on the company's clients as stakeholders, analyzing the offer made to clients as well as customer relationship.

Environment (E): The E rating assesses how the company stands with regards to natural capital. It accounts for management of environmental issues as well as positive or negative externalities of the company's business model. The operations environmental footprint subsection encompasses adverse sustainability impact indicators including greenhouse gas emission indicators, energy consumption, air pollution indicators, water, waste and material emissions, as well as biodiversity indicators. Sustainability impact indicators including carbon reduction initiatives and fossil fuel activities are addressed by the Transition Risk subsection of that E section.

Exclusion policy: finally, Sycomore AM's exclusion policy targets adverse sustainability impact indicators including controversial weapons, exposure to fossil fuel sector, chemical pesticide production, and more broadly was drafted to target companies in breach of the UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

Once the analysis – SPICE analysis including review of controversies, exclusion policy compliance – is performed, it impacts investment decisions in the following ways:

- As indicated in the previous question, it provides a safeguard against significant harm to any sustainable investment objective, by excluding companies not meeting minimum safeguard requirements;
- It also impacts the financial investment case in two ways: 1. assumptions related to
 the company's prospects (growth and profitability forecasts, liabilities, M&A, etc.)
 can be fed by certain SPICE outputs as relevant, and 2. some core assumptions of
 valuation models are systematically linked to SPICE outputs.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The development of Sycomore AM's analysis framework "SPICE" as well as the exclusion policy have been inspired by the OECD's Guiding Principles for multinational companies, the United Nations' Global Compact, the International Labour Organization's international standards and the UN Guiding Principles on Business and Human Rights. To assess the fundamental

value of a company, analysts systematically examine how a firm interacts with its stakeholders. This fundamental analysis is designed to understand strategic challenges, business models, management quality and degree of involvement, and the risks and opportunities faced by the company. Sycomore AM has also defined its Human Rights Policy [1] in compliance with the UN Guiding Principles on Business and Human Rights.

Despite the above-described due diligence set to detect potential breaches of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, actual compliance of the analyzed issuers can never be guaranteed.

[1] Sycomore AM's human rights policy is available at: https://en.sycomore-am.com/5fe1d50d-Sycomore AM s Human Rights Commitment FINAL.pdf

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As indicated in the previous sub-section, principal adverse impacts, as well as all other adverse sustainability impact indicators, are considered through SPICE analysis and outputs, complemented by Sycomore AM's exclusion policy.

Among 14 principal adverse sustainability impact indicators, 9 are environmental indicators addressed within the E section of SPICE analysis, 2 are social indicators addressed within the P section of SPICE analysis, and 3 are targeted by the company's exclusion policy.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference

period which is:

FY2024

What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remainings investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environemental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or lowcarbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. Enabling activities directly enable other activities to make a substantial contribution to environmental objective. **Transitional** activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best

performance.

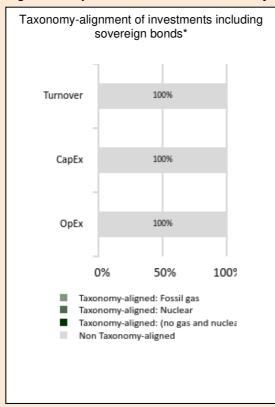

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

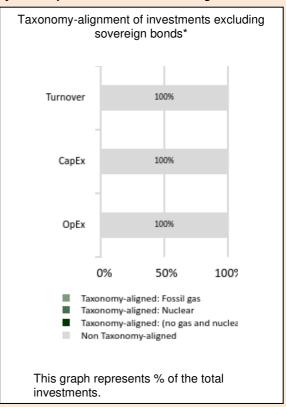

As indicated previously, all sustainable investments of the financial product were made with a social objective.

| Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with EU Taxonomy ? ¹ |
|---|
| Yes |
| In fossil gas In nuclear energy |
| X No |

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

As indicated previously, all sustainable investments of the financial product were made with a social objective.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

Not Applicable.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentall y sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As indicated previously, all sustainable investments of the financial product were made with a social objective.

What was the share of socially sustainable investments?

As indicated previously, 84% of the portfolio's investments were sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

3% was cash and cash equivalents maintained for liquidity purposes, are therefore reported here as "not sustainable".

Cash, by nature, is not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the lifetime of an investment made by the fund:

- On an ex ante basis (prior to investment into a company): investments are made under condition of meeting one of the criteria of the fund, all identified as solutions to sustainable development challenges. Identifying whether the investment allows to attain an environmental objective or to a social objective is a prerequisite of the analysis.
- On an ongoing and ex post basis (during and after investment holding period):
 - O During the investment lifetime, analyses outputs can vary alongside events related to the underlying's development. Any event that would make the

investment no longer eligible to one of the criteria of the fund, or that would be subject to the exclusion policy, would trigger portfolio movements according to our internal procedures.

- Engagement and exercising voting rights during the shareholding period also adds sustainability added value. The engagement strategy of the fund involves:
 - Engaging in discussions with companies held in our portfolios to fully grasp their ESG challenges;
 - Encouraging companies to publicly disclose their ESG strategies, policies and performance;
 - Calling upon companies to be transparent and instigate adequate and sustainable corrective measures following a controversy;
 - Getting involved in collective engagement initiatives on a case-by-case basis;
 - Asking questions, refusing to approve some resolutions or supporting external resolutions by exercising our voting rights.

How did this financial product perform compared to the reference benchmark?

The fund does not have any ESG benchmark.

How does the reference benchmark differ from a broad market index?

The fund does not have any ESG benchmark.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The fund does not have any ESG benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

| How did this financial product perform compared with the reference benchmark? |
|---|
| The fund does not have any ESG benchmark. |
| How did this financial product perform compared with the broad market index? |
| The fund underperformed the broad market index. |

Sustainable investment means an investment in an economic activity that contributes to environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

practices.

system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

Taxonomy or not.

The **EU Taxonomy** is a classification

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

As indicated in the prospectus, the fund invests with a Socially and Responsible Investment (SRI) process, in listed equities from European companies that demonstrate superior ESG performance based on the Investment Manager's proprietary methodology and a positive Societal Contribution of its products and services (equal or above 10%).

The investment universe of the fund is built so that at least one of the selection criteria below is met.

Eligible companies are identified through:

- A Their products and services, which requires either:i. a Net Environmental Contribution (NEC [1]) equal or above 10% orii. a Societal contribution [2] of products and services equal or above 10%; or
- B Their practices, with a specific focus on one of the following themes: i. Either Employment: Good Jobs Rating [3] equal or above 45 or leadership (≥ 70) in one of the Good Jobs Rating's constituents (Job Quantity, Job Quality, Job Geography).ii. Gender Diversity: Women in key management roles equal or above European equities investment universe average

^[1] The NEC is a metric that measures the extent to which a company's business model is aligned with the ecological transition and the climate change mitigation objectives. It ranges from -100% for businesses that are highly damaging to natural capital, to +100% for companies with a strong positive net impact, offering clear solutions to environmental and climate-related challenges. The NEC covers five impact categories (issues: climate, waste, biodiversity, water, air quality) by group of activities (contributing areas: ecosystems, energy, mobility, construction, production). More details on the metric can be found on the NEC initiative's website: https://nec-initiative.org/

^[2] The Societal Contribution is a quantitative metric, on a scale of -100% to +100%, which combines the positive and negative societal contributions of a company's products and services. The methodology draws on the societal aspects of the United Nations' 17 Sustainable Development Goals (SDGs) and their 169 sub-goals (or targets), which provide a shared roadmap for private and public sector players for 2030, designed to create a better and more sustainable future. The methodology also includes macroeconomic and scientific data sourced from public research institutions, and from independent organizations such as the Access to Medicine Foundation or the Access to Nutrition Initiative. More details on the metric can be found on Sycomore AM's website: https://en.sycomore-am.com/esg-research-material?category=policies

[3] The Good Jobs Rating is a quantitative metric designed to assess – on a scale of 0 to 100 – a company's overall ability to create durable and quality jobs for all, and particularly in areas (regions or countries) where employment is relatively scarce and therefore needed to ensure sustainable and inclusive economic growth

[4] SPICE stands for Suppliers&Society, People, Investors, Clients and Environment. This tool assesses the sustainable performance of companies. It integrates the analysis of economic, governance, environmental, social and societal risks and opportunities in business practices and in the products and services offering of companies. The analysis takes into account 90 criteria from which a score between 1 to 5 per letter of SPICE is obtained. These 5 scores are weighted according to the company's most material impacts. More information on the tool can be found on Sycomore AM's website: https://en.sycomore-am.com/esg-research-material?category=policies

How did the sustainability indicators perform?

The fund aims at outperforming the MSCI Europe index, a broad market index, regarding [1]:

- The NEC: in 2024, the financial product had a weighted average NEC equal to +4%, while MSCI Europe had a weighted average NEC equal to -2%. This reflects the choices made to meet the first out of five objectives of the fund: investing in companies delivering a significantly positive environmental contribution. In 2024, this was achieved by overweighting investments toward renewable energy and sustainable packaging.
- The percentage of women in key management roles: in 2024, the financial product had a weighted average share of women in key management roles equal to 29%, to be compared to 26% on MSCI Europe. This reflects the choices made to address aforementioned Gender Diversity target, with strong portfolio weight set on some companies with high percentages of women on the Board (Roche, Hermès, Air Liquide, L'Oréal, AstraZeneca...)

[1] Objectives set out in Sycomore's transparency code: https://en.sycomore-am.com/download/810745380

...and compared to previous periods?

In 2023, the fund:

Had a weighted average NEC equal to +7%.

- Had a weighted average percentage of women in key management roles equal to +24%.
- What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

In 2024, the financial product made the following investments with a sustainable objective:

- 24% of the portfolio's investments were sustainable investments with an environmental objective: associated issuers had a NEC above or equal to 10%, and were thus meant to contribute positively to the energy and environmental transition and climate change mitigation.
- 52% of the portfolio's investments were sustainable investments with a social objective:i. A Societal Contribution of products and services above or equal to 30% and thus contributed positively to societal challenges identified by the United Nations' Sustainable Development Goals.ii. A good job rating equal or above 55/100. The Good Jobs Rating which is a quantitative metric designed to assess on a scale of 0 to 100 a company's overall ability to create durable and quality jobs for all, and particularly in areas (regions or countries) where employment is relatively scarce and therefore needed to ensure sustainable and inclusive economic growth.iii. A happy at work rating equal or above 4.5/5. The analysis framework provides a complete and objective assessment of the level of well-being at work.

In addition, c. 18% of the fund's investments in companies were eligible according to the aforementioned selection criteria (A, B), or , but not meeting the above sustainable objective criteria (I, II.i, II.iii or II.iv), and are therefore reported here as "not sustainable".

Finally, c. 6% of the fund's assets under management were cash and cash equivalent maintained for liquidity purposes, and therefore reported here as "not sustainable".

impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Two safeguards are implemented across all investments of the fund to ensure sustainable investments do not cause significant harm to any sustainable investment objective:

- The SPICE methodology involves the analysis of over 90 criteria, structured around the five stakeholders (Society & Suppliers, People, Investors, Clients and the Environment). Investments causing significant harm to one or more sustainable investment objectives are meant to be excluded through:
 - o A minimum threshold, set at 3/5 for each investment of the financial product;
 - Consideration of controversies associated with issuers, monitored daily based on various sources of external data as well as controversy analyses run by an external provider. All controversies impact the SPICE rating of the issuer. Severe controversies can lead to an exclusion from the financial product;

The exclusion policy [1] adds restrictions on activities that are regarded as causing significant harm to at least one sustainable investment objective.

[1] The exclusion policy is available on Sycomore AM's website - https://en.sycomore-am.com/esg-research-material?category=policies

How were the indicators for adverse impacts on sustainability factors taken into account?

The financial product invested exclusively in equities of listed companies. Out of the 46 adverse impact indicators applicable to companies and excluding one item dedicated to bond investments (14 principal adverse impact indicators listed in Table 1, as well as 32 additional adverse impact indicators listed in Table 2 and Table 3), 42 indicators (23 environmental indicators and 19 social indicators) are covered during SPICE analysis, and 4 indicators (1 environmental indicator and 3 social indicators) are targeted by Sycomore AM's exclusion policy.

More specifically, Sycomore AM's fundamental analysis model SPICE, is an integrated model, allowing to get a holistic view of companies of the investment universe. It was built taking into account OECD guidelines for Multinational Enterprises. It fully integrates ESG factors to capture how

companies are managing adverse impacts as well as key sustainable opportunities.

Examples of matching between adverse impact indicators and SPICE items include *inter alia*:

Society & Suppliers (S): The S rating reflects the performance of the company with respect to its suppliers and civil society. Analysis relates to the societal contribution of products and services, corporate citizenship, and the outsourcing chain. Adverse sustainability indicators including lack of a supplier code of conduct, insufficient whistleblower protection, lack of a human rights policy, lack of due diligence, risks related to human beings trafficking, child labour or compulsory labour, cases of severe human rights issues, and risks related to anti-corruption and anti-bribery policies, are taken into account in that Society & Suppliers section.

People (P): The P rating focuses on a company's employees and its management of human capital. The assessment of the People pillar covers the integration of people-related issues, employees' fulfilment (Happy@Work environment), and measurement of employee engagement. Adverse sustainability indicators including unadjusted gender pay gap, board gender diversity, workplace accident prevention policies and health & safety indicators, employee's grievance mechanisms, discrimination, and CEO pay ratios are addressed in that People section.

Investors (I): The I rating focuses on the relation between companies and their shareholders. The rating is assigned based on an in-depth analysis of the company's shareholder and legal structure and of the interactions and power balance between different players: management, shareholders and their representatives, directors. Analysis targets the business model and governance. Among adverse sustainability indicators, lack of diversity at board level and excessive CEO pay-ratio are also addressed in that section.

Clients (C): The C rating focuses on the company's clients as stakeholders, analyzing the offer made to clients as well as customer relationship.

Environment (E): The E rating assesses how the company stands with regards to natural capital. It accounts for management of environmental issues as well as positive or negative externalities of the company's business model. The operations environmental footprint subsection encompasses adverse sustainability impact indicators including greenhouse gas emission indicators, energy consumption, air pollution indicators, water, waste and material emissions, as well as biodiversity indicators. Sustainability impact indicators including carbon reduction initiatives and fossil fuel activities are addressed by the Transition Risk subsection of that E section.

Exclusion policy: finally, Sycomore AM's exclusion policy targets adverse sustainability impact indicators including controversial weapons, exposure to fossil fuel sector, chemical pesticide production, and more broadly was drafted to target companies in breach of the UN Global Compact principles and

Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises.

Once the analysis – SPICE analysis including review of controversies, exclusion policy compliance – is performed, it impacts investment decisions in the following ways:

- As indicated in the previous question, it provides a safeguard against significant harm to any sustainable investment objective, by excluding companies not meeting minimum safeguard requirements;
- It also impacts the financial investment case in two ways: 1. assumptions related to the company's prospects (growth and profitability forecasts, liabilities, M&A, etc.) can be fed by certain SPICE outputs as relevant, and 2. some core assumptions of valuation models are systematically linked to SPICE outputs.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The development of Sycomore AM's analysis framework "SPICE" as well as the exclusion policy have been inspired by the OECD's Guiding Principles for multinational companies, the United Nations' Global Compact, the International Labour Organization's international standards and the UN Guiding Principles on Business and Human Rights. To assess the fundamental value of a company, analysts systematically examine how a firm interacts with its stakeholders. This fundamental analysis is designed to understand strategic challenges, business models, management quality and degree of involvement, and the risks and opportunities faced by the company. Sycomore AM has also defined its Human Rights Policy[1] in compliance with the UN Guiding Principles on Business and Human Rights.

Despite the above-described due diligence set to detect potential breaches of the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, actual compliance of the analyzed issuers can never be guaranteed.

^[1] Sycomore AM's human rights policy is available at: https://en.sycomore-am.com/5fe1d50d-Sycomore AM s Human Rights Commitment FINAL.pdf

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As indicated in the previous sub-section, principal adverse impacts, as well as all other adverse sustainability impact indicators, are considered through SPICE analysis and outputs, complemented by Sycomore AM's exclusion policy.

Among 14 principal adverse sustainability impact indicators, 9 are environmental indicators addressed within the E section of SPICE analysis, 2 are social indicators addressed within the P section of SPICE analysis, and 3 are targeted by the company's exclusion policy.

What were the top investments of this financial product?

The list includes

tho

investments constituting the

greatest proportion of investments of the financial product during the reference period which is:

FY2024

| Largest Investments | Sector | % Assets | Country |
|-----------------------------------|---------------------------|-------------|-------------------|
| Renault | Consumer Discretionary | 4.49 | FRANCE |
| ASML | Information Technology | 4.11 | NETHERLANDS |
| Société Générale | Financials | 4.00 | FRANCE |
| Novo Nordisk | Health Care | 3.98 | DENMARK |
| Novartis | Health Care | 3.95 | SWITZERLAND |
| KPN | Communication Services | 3.24 | NETHERLANDS |
| Siemens | Industrials | 3.17 | GERMANY |
| Prysmian | Industrials | 2.89 | ITALY |
| ASSA ABLOY | Industrials | 2.71 | SWEDEN |
| Nestle Finance International Ltd. | Consumer Staples | 2.62 | SWITZERLAND |
| AstraZeneca | Health Care | 2.60 | UNITED KINGDOM |
| Unilever | Consumer Staples | 2.53 | UNITED KINGDOM |
| Santander | Financials | 2.43 | SPAIN |
| Iberdrola | Utilities | 2.34 | SPAIN |

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remainings investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environemental or social characteristics that do not qualify as sustainable investments.

Taxonomyaligned activities are expressed as a share of:

 turnover reflecting the share of revenue from green activities of investee companies

companies

capital
expenditur
e (CapEx)
showing
the green
investment
s made by
investee
companies,
e.g. for a
transition
to a green
economy.

In which economic sectors were the investments made?

| Sector | % |
|------------------------|-------|
| Health Care | 19.80 |
| Industrials | 13.62 |
| Consumer Discretionary | 12.26 |
| Financials | 11.28 |
| Consumer Staples | 6.98 |
| Information Technology | 6.52 |
| Communication Services | 5.54 |
| Materials | 5.47 |
| Utilities | 4.33 |
| Real Estate | 1.29 |

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to renewable power or lowcarbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules. Enabling activities directly enable other activities to make a substantial contribution to environmental objective. **Transitional** activities are activities for which lowcarbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding

to the best performance.

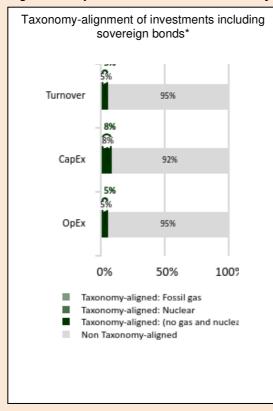

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

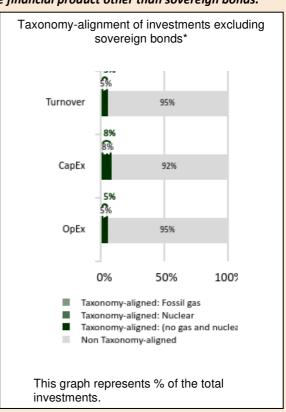

5% of the sustainable investments were taxonomy aligned.

| Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with EU Taxonomy ?1 |
|---|
| Yes |
| In fossil gas In nuclear energy |
| X No |

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Source: MSCI reported and estimated data

Turnover coverage: 100%

Capex coverage: 61%

Opex coverage: 58%

What was the share of investments made in transitional and enabling activities?

As the Sub-fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

The EU Taxonomy alignment figures remain stable since last year. (5% for 2023)

are sustainable investments with an environmental objective that do not take into account the criteria for environmentall y sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy represents 19%.

What was the share of socially sustainable investments?

As indicated previously, 52% of the portfolio's investments were sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

6% was cash and cash equivalents maintained for liquidity purposes and are therefore reported here as "not sustainable".

Cash, by nature, is not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the lifetime of an investment made by the fund:

- On an ex ante basis (prior to investment into a company): investments are made under condition of meeting one of the criteria of the fund, all identified as solutions to sustainable development challenges. Identifying whether the investment allows to attain an environmental objective or to a social objective is a prerequisite of the analysis.
- On an ongoing and ex post basis (during and after investment holding period):
 - During the investment lifetime, analyses outputs can vary alongside events related to the underlying's development. Any event that would make the investment no longer eligible to one of the criteria of the fund, or that would be subject to the exclusion policy, would trigger portfolio movements according to our internal procedures.
 - Engagement and exercising voting rights during the shareholding period also adds sustainability added value. The engagement strategy of the fund involves:
 - Engaging in discussions with companies held in our portfolios to fully grasp their ESG challenges;
 - Encouraging companies to publicly disclose their ESG strategies, policies and performance;
 - Calling upon companies to be transparent and instigate adequate and sustainable corrective measures following a controversy;
 - Getting involved in collective engagement initiatives on a case-by-case basis;
 - Asking questions, refusing to approve some resolutions or supporting external resolutions by exercising our voting rights.

How did this financial product perform compared to the reference benchmark?

The fund does not have any ESG benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

| | How does the reference benchmark differ from a broad market index? |
|--|--|
| | The fund does not have any ESG benchmark. |
| | How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted? |

Taxonomy or not.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852,

Sustainable

practices.

investment means an investment in an

economic activity
that contributes to
an environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or
social objective and
that the investee
companies follow
good governance

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-fund promotes environmental and social characteristics pursuant to Article 8 of the Regulation (EU) 2019/2088 by applying on an ongoing basis a Responsible investment process on the portion of the Sub-fund's invested in government bonds. Characteristics promoted in the investment process are based on positive environmental, social and governance ("ESG") criteria relative to its initial investment universe, defined as the J.P. Morgan EMU Index (the "Initial Investment Universe"). These characteristics include:

On the environmental pillar: global warming;

• On the social and governance pillars: the fight against money laundering and financing of terrorism, tax practices, human rights violation and corruption.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-fund.

How did the sustainability indicators perform?

...and compared to previous periods?

The sustainability indicators used to measure the attainment of the environmental and social characteristics promoted by the Sub-fund are:

• The number of Sovereign issuers found to be in breach of one or more of the proprietary "Sovereign Ethical Filter" criteria;

No investments have been made in Sovereign issuers in breach of one or more of the "Sovereign Ethical Filter" criteria; and

• The Sub-fund's weighted average "Sovereign Warming Potential" compared to the Initial Investment Universe's "Warming Potential" is as follows:

| | 31/12/2024 | 31/12/2023 | 31/12/2022 |
|---------------------------------------|------------|------------|------------|
| Sovereing Warming fund | 2.50 | 2.57 | 2.62 |
| Sovereign Warming investment universe | 2.82 | 2.79 | 2.82 |
| Coverage | 91.8% | 95.92% | 92.83% |

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

N/A

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

2

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

☑ Yes, the Sub-fund considers principal adverse impacts ("PAIs") on sustainability factors.

Through the application of the proprietary Sovereign Ethical Filter defined in the investment strategy below, the Sub-fund considers the following PAI indicator, with reference to Annex I of the Delegated Regulation (EU) 2022/1288:

Table 1, indicator 16 – Investee countries subject to social violation - Social exclusion criteria
that excluded countries who are responsible of severe violations of human rights, based on
"Freedom House" data.

During the reference period, no investments have been made in Investee countries subject to social violation - Social exclusion criteria that excluded countries who are responsible of severe violations of human rights, based on "Freedom House" data.

Issuers classified in the restricted list were excluded and no new investment were carried in any asset class.

□ No

Principal adverse

impacts are the

most significant

What were the top investments of this financial product?

As of 31/12/2024, the top investments were as following:

| Large Investments | Sector | % Assets | Country |
|------------------------------|----------------|----------|---------|
| SPANISH GOV'T 3.55 10/31/33 | Sovereigns | 2.81% | Spain |
| BTPS 4.2 03/01/34 | Sovereigns | 2.45% | Italy |
| SPANISH GOV'T 1.85 07/30/35 | Sovereigns | 2.21% | Spain |
| SPANISH GOV'T 0.5 04/30/30 | Sovereigns | 2.06% | Spain |
| EUROPEAN UNION 3.25 07/04/34 | Supranationals | 1.98% | Belgium |

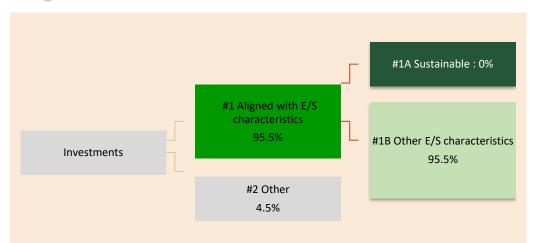

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/01/2024 – 31/12/2024

| SPANISH GOV'T 0.1 04/30/31 | Sovereigns | 1.96% | Spain |
|---------------------------------|----------------|-------|----------|
| BTPS 0.5 02/01/26 | Sovereigns | 1.88% | Italy |
| PORTUGUESE OT'S 3.875 02/15/30 | Sovereigns | 1.65% | Portugal |
| EUROPEAN UNION 0 07/04/31 | Supranationals | 1.62% | Belgium |

| HELLENIC REPUBLI 1.875 02/04/35 | Sovereigns | 1.52% | Greece |
| BTPS 1.85 07/01/25 | Sovereigns | 1.53% | Italy |
| BTPS 1.5 06/01/25 | Sovereigns | 1.53% | Italy |
| SPANISH GOV'T 2.8 05/31/26 | Sovereigns | 1.47% | Spain |
| SPANISH GOV'T 1.45 04/30/29 | Sovereigns | 1.47% | Spain |

What was the proportion of sustainability-related investments?

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

Asset allocation describes the share of

investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling
activities directly
enable other
activities to make
a substantial
contribution to
an environmental
objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

In which economic sectors were the investments made?

| Sectors | %AuM |
|----------------|--------|
| Sovereigns | 87.69% |
| Supranationals | 7.84% |
| Cash | 4.22% |
| Derivatives | 0.24% |
| Fees | 0.01% |

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy. However, the position will be kept under review as the underlying rules are finalised and the availability of reliable data increases over time.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

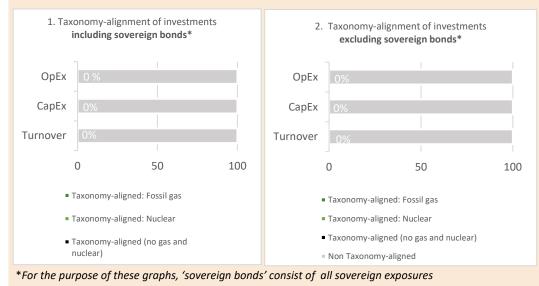

| | Yes: | | |
|---|------|---------------|-------------------|
| | | In fossil gas | In nuclear energy |
| X | No | | |

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomyaligned activities are expressed as a share of:

- turnover
 reflecting the
 share of revenue
 from green
 activities of
 investee
 companies.
- capital
 expenditure
 (CapEx) showing
 the green
 investments
 made by investee
 companies, e.g.
 for a transition to
 a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

As the Sub-fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-fund promotes environmental and social characteristics but does not commit to making any sustainable investments. As a consequence, the Sub-Fund does not commit to a minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not Applicable

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The "other" investments and/or holding of the Sub-fund are comprised of securities, directly or indirectly, whose issuers did not meet the ESG criteria described above to qualify as exhibiting positive environmental or social characteristics.

This includes (i) Ancillary Liquid Assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets or for a period of time strictly necessary in case of unfavourable market conditions, and (ii) cash equivalents (i.e., bank deposits, Money Market Instruments, money market fund), pursuant to the Sub-fund Investment Policy, and (iii) UCITS, UCIS compliant with the provisions set out in Article 41 (1) e) of the UCI Law.

No minimum environmental or social safeguards are applied to these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

- No investments in Sovereign issuers found to be in breach of one or more of the "Sovereign Ethical Filter" criteria;
- The Sub-fund's average weighted Sovereign Warming Potential has been lower (meaning "better") than that of the Initial Investment Universe.

How did this financial product perform compared to the reference benchmark?

N/A

- How does the reference benchmark differ from a broad market index?
 N/A
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

N/A

- How did this financial product perform compared with the reference benchmark?
 N/A
- How did this financial product perform compared with the broad market index?
 N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Generali Investment SICAV – Euro Subordinated Debt Fund

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:

Generali Investment SICAV – Euro Subordinated Debt Fund

Legal entity identifier:

5493009UMEZPLR4UCK13

Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective? | | | |
|--|---|--|--|
| Yes | • No | | |
| It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 36.4% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective | | |
| It made sustainable investments with a social objective:% | It promoted E/S characteristics, but did not make any sustainable investments | | |

Sustainable **investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation

does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The Sub-fund promotes environmental and social characteristics pursuant to Article 8 of the Regulation (EU) 2019/2088 through the application of a Responsible investment process.

When selecting securities, the Investment Manager considered both financial and extrafinancial criteria. The Sub-fund promotes environmental and social characteristics by investing in securities of issuers with ESG characteristics, which are assessed through a Responsible investment process, provided that the issuers follow good corporate governance practices.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-fund.

How did the sustainability indicators perform? ...and compared to previous periods?

The sustainability indicators used to measure the attainment of the environmental and social characteristics promoted by the Sub-fund are as follows:

• The ESG Score compared to that of the Initial Investment Universe;

| | 31/12/2024 |
|--------------------------------------|------------|
| ESG Score of the fund | 7.8 |
| ESG Score of the investment universe | 7.5 |

Sustainability

how the

social

indicators measure

environmental or

characteristics

promoted by the financial product are attained.

• The minimum percentage of the Sub-fund's investments allocated to environmentally and socially sustainable investments;

| | 31/12/2024 |
|---------------------------------------|------------|
| Percentage of sustainable investments | 36.4% |

• The share of issuers within the portfolio with exposure to economic activities set out in the exclusions list.

The investment manager excluded investments if they match one or more of the following criteria:

- Production of weapons violating fundamental humanitarian principles (antipersonnel landmines, cluster bombs and nuclear weapons),
- Severe environmental damages,
- Serious or systematic violation of human rights,
- Cases of gross corruption,
- Significant involvement in coal and tar sand-sector activities, or
- Exclusions defined by the International Labor Organization (ILO).

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the Sub-fund partially intended to make include being linked to an environmental or social objective through the use of proceeds of the issuer, assessed via any individual or combination of the following indicators:

- The internal Green/Social/ Sustainability classification of the bonds (GSS bond);
- The revenues of the companies categorised as having ESG rating A and derived from sustainable impact solution or aligned with the European Taxonomy;
- The alignment of the company with a credible greenhouse gases emissions transition
 pathway. It is considered that the companies with relevant and credible greenhouse
 gases emissions reduction approved by the Science Based Targets initiative (SBTi) can
 meet the Sustainable investment criteria if they have already achieved a significant

reduction of their scope 1 & 2 greenhouse gases intensity of 7% per year over the past three years, in line with the rate implied by the Paris agreement.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In order to ensure that the sustainable investments did not cause significant harm to any environmental or social objective, those investments were subject to a screening process against the mandatory Principal Adverse Impacts and relevant optional Principal Adverse Impacts, as befitting each asset type, and as can be found, respectively, in Annex I Tables I, II and III of the European Commission delegated Regulation 2022/1288 (PAIs). PAIs were assessed in a quantitative or qualitative manner based on the Investment Manager's research.

The Investment Manager also applied a screen to align with the OECD Guidelines for Multinational Entprises and the UN Guiding Principles on Business and Human Rights as provided for under the minimum Safeguards in the EU Taxonomy.

How were the indicators for adverse impacts on sustainability factors taken into account?

As required by the regulation and as described above, the Principal Adverse Impact (PAI) indicators listed in Annex I of the European Commission delegated Regulation 2022/1288 were the reference to be considered as described in the section above.

Further additional adverse sustainability indicators, such as indicators 9 and 22 (in relation to investments in companies producing chemical and non-cooperative tax as set out in the EU SFDR Regulatory Technical Standards (table II and table III of Annex 1) were considered as part of the do no significant harm screen.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The norms-based exclusions as described under "What investment strategy does this financial product follow?" seeked alignment with these guidelines and principles. Third party data were used to identify violators and prohibit relevant investments in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

☑ Yes, the Sub-fund considers principal adverse impacts ("PAIs") on sustainability factors.

The main focus is on the following PAIs with reference to Annex I of the Commission Delegated Regulation (EU) 2022/1288. Those indicators are considered and will be monitored continuously:

o Table 1, indicator 3 – GHG Intensity of investee companies: In addition to the monitoring of issuers' GHG intensity, Investments in companies who are involved in Coal activities are excluded.

The Carbon Intensity of the fund as of 31/12/2024 was: 131.6

During the reference period, investments in companies who are involved in Coal activities were excluded if one or more of the following criteria occured:

Coal-related business: more than 20% of the revenues deriving from coal; Coal power generation: more than 20% of power generated from coal; Companies with an installed coal power capacity of more than 5 GW.

Issuers classified in the restricted list were excluded and no new investment were carried in any asset class. Existing exposure (if any) included in the restricted list has been promptly sold in full.

O Table 1, indicator 10 – Violations of the UN Global Compact ("UNGC") principles and the Organisation for Economic Co-operation and Development ("OECD") Guidelines for Multinational Enterprises – through the application of the exclusion criteria, no investment can be made in funds that invest in companies where there are violations or serious suspicions of possible violations of the OECD Guidelines for Multinational Enterprises or the UNGC principles.

During the reference period, no investments have been made in funds that invest in companies where there were violations or serious suspicions of possible violations of the OECD Guidelines for Multinational Enterprises or the UNGC principles.

Issuers classified in the restricted list were excluded and no new investment were carried in any asset class. Existing exposure (if any) included in the restricted list has been promptly sold in full.

 Table 1, indicator 14 – Exposure to controversial weapons: Investments in companies whose main turnover is generated by controversial weapons are excluded.

During the reference period, no investments have been made in companies directly involved in armament and weapons that violate fundamental humanitarian principles through their normal use (cluster bombs, antipersonnel landmines, nuclear weapons, biological and chemical weapons). Issuers classified in the restricted list were excluded and no new investment were carried in any asset class. Existing exposure (if any) included in the restricted list has been promptly sold in full.

Through the application of the proprietary Sovereign Ethical Filter defined in the investment strategy below, the Sub-fund considered the following PAI indicator, with reference to Annex I of the Delegated Regulation (EU) 2022/1288:

o Table 1, indicator 16 Investee countries subject to social violation Social exclusion criteria that excluded countries who are responsible of severe violations of human rights, based on Freedom House data.

During the reference period, no investments have been made in companies directly involved in armament and weapons that violate fundamental humanitarian principles through their normal use (cluster bombs, antipersonnel landmines, nuclear weapons, biological and chemical weapons). Issuers classified in the restricted list were excluded and no new investment were carried in any asset class. Existing exposure (if any) included in the restricted list has been promptly sold in full.

□ No

What were the top investments of this financial product?

As of 31/12/2024, the top investments were as following:

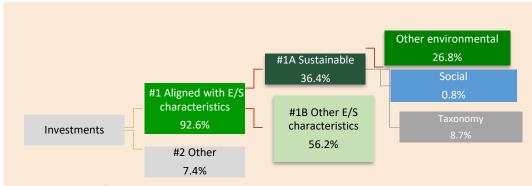

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/01/2024 – 31/12/2024

| Large Investments | Sector | % Assets | Country |
|-----------------------------|------------------------|----------|---------------|
| BARCLAYS PLC 05/31/36 | Financials | 1.50% | Great Britain |
| ORANGE PERP | Communication Services | 1.48% | France |
| SOGECAP SA PERP | Financials | 1.44% | France |
| TOTALENERGIES SE PERP | Energy | 1.46% | France |
| REPSOL INTL FIN PERP | Energy | 1.44% | Netherlands |
| BP CAPITAL PLC PERP | Energy | 1.43% | Great Britain |
| OMV AG PERP | Energy | 1.41% | Austria |
| NATWEST GROUP 02/28/34 | Financials | 1.28% | Great Britain |
| BANCO SANTANDER 5 04/22/34 | Financials | 1.25% | Spain |
| ENGIE PERP | Utilities | 1.25% | France |
| IBERDROLA FIN SA PERP | Utilities | 1.23% | Spain |
| SWISS LIFE 4.5 PERP | Financials | 0.74% | Liechtenstein |
| MAPFRE 4.375 03/31/47 | Financials | 1.22% | Spain |
| COMMERZBANK AG 10/16/34 | Financials | 1.25% | Germany |
| CNP ASSURANCES 4.5 06/10/47 | Financials | 1.22% | France |

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| Sectors | %AuM |
|------------------------|--------|
| Financials | 46.00% |
| Utilities | 19.77% |
| Energy | 13.99% |
| Cash | 5.48% |
| Communication Services | 3.88% |
| Consumer Discretionary | 3.04% |
| Consumer Staples | 2.32% |
| Not Available | 1.41% |
| Real Estate | 1.39% |
| Industrials | 0.85% |
| Information Technology | 0.73% |
| Fees | 0.65% |
| Materials | 0.25% |
| Health Care | 0.24% |

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

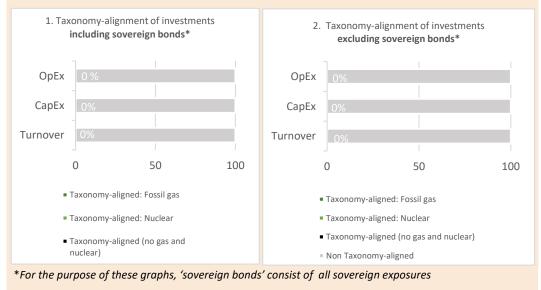

- turnover reflects the "greenness" of investee companies today.
- capital
 expenditure
 (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

The Sub-fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy. However, the position will be kept underreview as the underlying rules are finalised and the availability of reliable dataincreases over time.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- What was the share of investments made in transitional and enabling activities?

 As the Sub-fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments transitional and enabling activities within the meaning of the EU Taxonomy therefore also set at 0%.
 - How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

There is no previous period.

sustainable

sustainable

investments with an environmental

objective that **do not take into**

account the criteria for environmentally

economic activities under Regulation

(EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investment with an environmental objective not aligned with the EU Taxonomy was: 26.8%.

What was the share of socially sustainable investments?

The share of socially sustainable investment was: 0.8%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The "other" investments and/or holdings of the Sub-fund are comprised, directly or indirectly, of securities whose issuers did not meet the ESG criteria described above to qualify as exhibiting positive environmental or social characteristics. This includes (i) Ancillary Liquid Assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets or for a period of time strictly necessary in case of unfavourable market conditions, and (ii) cash equivalents (i.e., bank deposits, Money Market Instruments, money market fund), pursuant to the Sub-fund Investment Policy, and (iii) funds and ETFs (iv) securities and derivatives not rated. No minimum environmental or social safeguards are applied to these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

- Application of a rating upgrade approach. The average ESG rating of the Sub-fund was constantly higher than the average ESG rating of its Initial Investment Universe.
- Application of the Ethical filter The investment manager excluded investments if they match one or more of the following criteria:
 - Production of weapons violating fundamental humanitarian principles (antipersonnel landmines, cluster bombs and nuclear weapons),
 - Severe environmental damages,
 - Serious or systematic violation of human rights,
 - Cases of gross corruption,
 - Significant involvement in coal and tar sand-sector activities, or
 - Exclusions defined by the International Labor Organization (ILO)

How did this financial product perform compared to the reference benchmark?

N/A

How does the reference benchmark differ from a broad market index?

N/A

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

Taxonomy or not.

Sustainable

practices.

investment means an investment in an

economic activity
that contributes to
an environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or
social objective and
that the investee
companies follow
good governance

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-fund promotes environmental and social characteristics pursuant to Article 8 of the Regulation (EU) 2019/2088 by applying on an ongoing basis a Responsible investment process on the portion of the Sub-fund's invested in government bonds. Characteristics promoted in the investment process are based on positive environmental, social and governance ("ESG") criteria relative to its initial investment universe, defined as the J.P. Morgan EMU Index (the "Initial Investment Universe"). These characteristics include:

• On the environmental pillar: global warming;

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

• On the social and governance pillars: the fight against money laundering and financing of terrorism, tax practices, human rights violation and corruption.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-fund.

How did the sustainability indicators perform? ...and compared to previous periods?

The sustainability indicators used to measure the attainment of the environmental and social characteristics promoted by the Sub-fund are:

 The number of Sovereign issuers found to be in breach of one or more of the proprietary "Sovereign Ethical Filter" criteria;

No investments have been made in Sovereign issuers in breach of one or more of the "Sovereign Ethical Filter" criteria; and

• The Sub-fund's weighted average "Sovereign Warming Potential" compared to the Initial Investment Universe's "Warming Potential" is as follows:

| | 31/12/2024 | 31/12/2023 | 31/12/2022 |
|---------------------------------------|------------|------------|------------|
| Sovereing Warming fund | 2.59 | 2.42 | 2.16 |
| Sovereign Warming investment universe | 2.81 | 2.83 | 2.82 |
| Coverage | 90.43% | 94.56% | 96.98% |

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

N/A

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

☑ Yes, the Sub-fund considers principal adverse impacts ("PAIs") on sustainability factors

Through the application of the proprietary Sovereign Ethical Filter defined in the investment strategy below, the Sub-fund considers the following PAI indicator, with reference to Annex I of the Delegated Regulation (EU) 2022/1288:

Table 1, indicator 16 – Investee countries subject to social violation - Social exclusion criteria that excluded countries who are responsible of severe violations of human rights, based on "Freedom House" data.

During the reference period, no investments have been made in Investee countries subject to social violation - Social exclusion criteria that excluded countries who are responsible of severe violations of human rights, based on "Freedom House" data. Issuers classified in the restricted list were excluded and no new investment were carried in

any asset class.

☐ No

Principal adverse impacts are the

most significant negative impacts of

investment

decisions on

relating to

environmental,

sustainability factors

social and employee

matters, respect for

human rights, anti-

corruption and antibribery matters.

What was the proportion of sustainability-related investments?

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

In which economic sectors were the investments made?

| Sectors | %AuM | | | |
|----------------|--------|--|--|--|
| Sovereigns | 83.50% | | | |
| Supranationals | 8.83% | | | |
| Cash | 7.54% | | | |
| Derivatives | 0.12% | | | |

share of investments in specific assets.

Asset allocation

describes the

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- expenditure
 (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

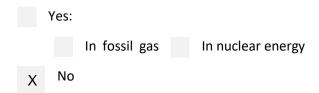

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

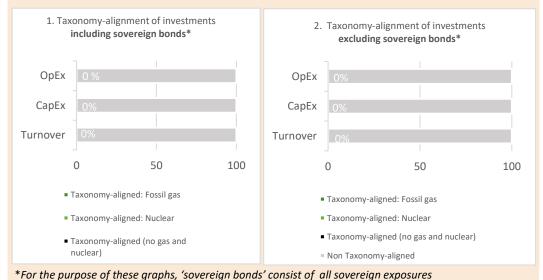

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy. However, the position will be kept under review as the underlying rules are finalised and the availability of reliable data increases over time.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

As the Sub-fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as the Sub-fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-fund promotes environmental and social characteristics but does not commit to making any sustainable investments. As a consequence, the Sub-Fund does not commit to a minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable as the Sub-fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The "other" investments and/or holding of the Sub-fund are comprised of securities, directly or indirectly, whose issuers did not meet the ESG criteria described above to qualify as exhibiting positive environmental or social characteristics.

This includes (i) Ancillary Liquid Assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets or for a period of time strictly necessary in case of unfavourable market conditions, and (ii) cash equivalents (i.e., bank deposits, Money Market Instruments, money market fund), pursuant to the Sub-fund Investment Policy, and (iii) UCITS, UCIS compliant with the provisions set out in Article 41 (1) e) of the UCI Law.

No minimum environmental or social safeguards are applied to these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

- No investments in Sovereign issuers found to be in breach of one or more of the "Sovereign Ethical Filter" criteria;
- The Sub-fund's average weighted Sovereign Warming Potential has been lower (meaning "better") than that of the Initial Investment Universe.

How did this financial product perform compared to the reference benchmark?

N/A

- How does the reference benchmark differ from a broad market index?

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-fund promotes environmental and social characteristics pursuant to Article 8 of the Regulation (EU) 2019/2088 by applying on an ongoing basis a Responsible investment process on the portion of the Sub-fund's invested in government bonds. Characteristics promoted in the investment process are based on positive environmental, social and governance ("ESG") criteria relative to its initial investment universe, defined as the J.P. Morgan EMU Index (the "Initial Investment Universe"). These characteristics include:

• On the environmental pillar: global warming;

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product

are attained.

• On the social and governance pillars: the fight against money laundering and financing of terrorism, tax practices, human rights violation and corruption.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-fund.

How did the sustainability indicators perform? ...and compared to previous periods?

The sustainability indicators used to measure the attainment of the environmental and social characteristics promoted by the Sub-fund are:

 The number of Sovereign issuers found to be in breach of one or more of the proprietary "Sovereign Ethical Filter" criteria;

The Sub-fund's average weighted Sovereign Warming Potential must be lower (meaning "better") than that of the Initial Investment Universe.

• The Sub-fund's weighted average "Sovereign Warming Potential" compared to the Initial Investment Universe's "Warming Potential" is as follow:

| | 31/12/2024 | 31/12/2023 | 31/12/2022 |
|---------------------------------------|------------|------------|------------|
| Sovereing Warming fund | 2.50 | 2.57 | 2.4 |
| Sovereign Warming investment universe | 2.80 | 2.79 | 2.81 |
| Coverage | 91.34% | 95.92% | 90.70% |

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

N/A

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

N/A

How did this financial product consider principal adverse impacts on sustainability factors?

☑ Yes, the Sub-fund considers principal adverse impacts ("PAIs") on sustainability factors

Through the application of the proprietary Sovereign Ethical Filter defined in the investment strategy below, the Sub-fund considers the following PAI indicator, with reference to Annex I of the Delegated Regulation (EU) 2022/1288:

Table 1, indicator 16 – Investee countries subject to social violation - Social exclusion criteria that excluded countries who are responsible of severe violations of human rights, based on "Freedom House" data.

During the reference period, no investments have been made in Investee countries subject to social violation - Social exclusion criteria that excluded countries who are responsible of severe violations of human rights, based on "Freedom House" data.

Issuers classified in the restricted list were excluded and no new investment were carried in any asset class.

□ No

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/01/2024 – 31/12/2024

What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- expenditure
 (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure
 (OpEx) reflects the green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

In which economic sectors were the investments made?

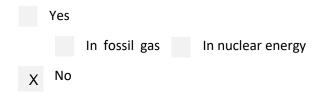

| Sectors | %AuM |
|----------------|--------|
| Sovereigns | 86.64% |
| Supranationals | 8.21% |
| Cash | 4.83% |
| Derivatives | 0.33% |

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy. However, the position will be kept under review as the underlying rules are finalised and the availability of reliable data increases over time.

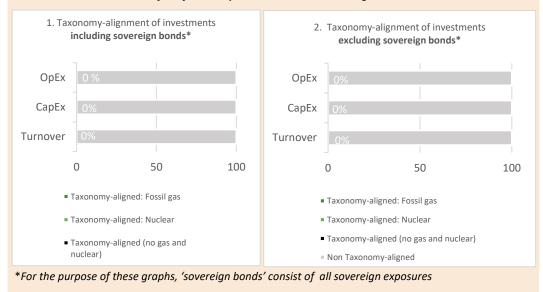

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are
sustainable
investments with
an environmental
objective that do
not take into
account the
criteria for
environmentally
sustainable
economic
activities under
Regulation (EU)
2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

As the Sub-fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as the Sub-fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-fund promotes environmental and social characteristics but does not commit to making any sustainable investments. As a consequence, the Sub-Fund does not commit to a minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The "other" investments and/or holding of the Sub-fund are comprised of securities, directly or indirectly, whose issuers did not meet the ESG criteria described above to qualify as exhibiting positive environmental or social characteristics.

This includes (i) Ancillary Liquid Assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets or for a period of time strictly necessary in case of unfavourable market conditions, and (ii) cash equivalents (i.e., bank deposits, Money Market Instruments, money market fund), pursuant to the Sub-fund Investment Policy, and (iii) UCITS, UCIS compliant with the provisions set out in Article 41 (1) e) of the UCI Law.

No minimum environmental or social safeguards are applied to these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

- No investments in Sovereign issuers found to be in breach of one or more of the "Sovereign Ethical Filter" criteria;
- The Sub-fund's average weighted Sovereign Warming Potential has been lower (meaning "better") than that of the Initial Investment Universe.

How did this financial product perform compared to the reference benchmark?

N/A

- How does the reference benchmark differ from a broad market index?
 N/A
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

N/A

- How did this financial product perform compared with the reference benchmark?
 N/A
- How did this financial product perform compared with the broad market index?
 N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Generali Investment SICAV – Euro Aggregate Bond

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:

Generali Investment SICAV – Euro Aggregate Bond

Legal entity identifier:

549300EWTK21BY8IE137

Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective? | | | |
|--|---|--|--|
| Yes | • No | | |
| It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 17.9% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective | | |
| It made sustainable investments with a social objective:% | It promoted E/S characteristics, but did not make any sustainable investments | | |

Sustainable **investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially

does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The Sub-fund promotes environmental and social characteristics pursuant to Article 8 of the Regulation (EU) 2019/2088 through the application of a Responsible investment process.

When selecting corporate and government bonds, the Investment Manager considered both financial and extra-financial criteria. The Sub-fund promoted environmental and social characteristics by investing in securities of issuers with ESG characteristics, which were assessed through a Responsible investment process that included (but is not limited to) a carbon intensity and sovereign warming potential score, provided that the issuers followed good corporate governance practices.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-fund.

How did the sustainability indicators perform? ...and compared to previous periods?

The sustainability indicators used to measure the attainment of the environmental and social characteristics promoted by the Sub-fund are as follows:

• The carbon intensity compared to that of the Initial Investment Universe;

| | 31/12/2024 |
|---|------------|
| Carbon intensity of the fund | 94.3 |
| Carbon intensity of the investment universe | 118.91 |

Sustainability

how the

social

indicators measure

environmental or

characteristics

promoted by the financial product are attained.

• The Sovereign Warming Potential score compared to that of the Initial Investment Universe;

| | 31/12/2024 |
|--|------------|
| Sovereign Warming Potential score of the fund | 2.70 |
| Sovereign Warming Potential score of the investment universe | 2.84 |

• The minimum percentage of the Sub-fund's investments allocated to environmentally and socially sustainable investments;

| | 31/12/2024 |
|---------------------------------------|------------|
| Percentage of sustainable investments | 17.9% |

• The share of issuers within the portfolio with exposure to economic activities set out in the exclusions list.

The investment manager excluded investments if they match one or more of the following criteria:

- Production of weapons violating fundamental humanitarian principles (antipersonnel landmines, cluster bombs and nuclear weapons),
- Severe environmental damages,
- Serious or systematic violation of human rights,
- Cases of gross corruption,
- Significant involvement in coal and tar sand-sector activities, or
- Exclusions defined by the International Labor Organization (ILO).

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the Sub-fund partially intended to make include being linked to an environmental or social objective through the use of proceeds of the issuer, assessed via any individual or combination of the following indicators:

The internal Green/Social/ Sustainability classification of the bonds (GSS bond);

- The revenues of the companies categorised as having ESG rating A and derived from sustainable impact solution or aligned with the European Taxonomy;
- The alignment of the company with a credible greenhouse gases emissions transition pathway. It is considered that the companies with relevant and credible greenhouse gases emissions reduction approved by the Science Based Targets initiative (SBTi) can meet the Sustainable investment criteria if they have already achieved a significant reduction of their scope 1 & 2 greenhouse gases intensity of 7% per year over the past three years, in line with the rate implied by the Paris agreement.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In order to ensure that the sustainable investments did not cause significant harm to any environmental or social objective, those investments were subject to a screening process against the mandatory Principal Adverse Impacts and relevant optional Principal Adverse Impacts, as befitting each asset type, and as can be found, respectively, in Annex I Tables I, II and III of the European Commission delegated Regulation 2022/1288 (PAIs). PAIs were assessed in a quantitative or qualitative manner based on the Investment Manager's research.

The Investment Manager also applied a screen to align with the OECD Guidelines for Multinational Entprises and the UN Guiding Principles on Business and Human Rights as provided for under the minimum Safeguards in the EU Taxonomy.

How were the indicators for adverse impacts on sustainability factors taken into account?

As required by the regulation and as described above, the Principal Adverse Impact (PAI) indicators listed in Annex I of the European Commission delegated Regulation 2022/1288 were the reference to be considered as described in the section above.

Further additional adverse sustainability indicators, such as indicators 9 and 22 (in relation to investments in companies producing chemical and non-cooperative tax as set out in the EU SFDR Regulatory Technical Standards (table II and table III of Annex 1) were considered as part of the do no significant harm screen.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The norms-based exclusions as described under "What investment strategy does this financial product follow?" seeked alignment with these guidelines and principles. Third party data were used to identify violators and prohibit relevant investments in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

☑ Yes, the Sub-fund considers principal adverse impacts ("PAIs") on sustainability factors.

The main focus is on the following PAIs with reference to Annex I of the Commission Delegated Regulation (EU) 2022/1288. Those indicators are considered and will be monitored continuously:

o Table 1, indicator 3 – GHG Intensity of investee companies: In addition to the monitoring of issuers' GHG intensity, Investments in companies who are involved in Coal activities are excluded.

The Carbon Intensity of the fund as of 31/12/2024 was: 94.3

During the reference period, investments in companies who are involved in Coal activities were excluded if one or more of the following criteria occured:

Coal-related business: more than 20% of the revenues deriving from coal; Coal power generation: more than 20% of power generated from coal; Companies with an installed coal power capacity of more than 5 GW.

Issuers classified in the restricted list were excluded and no new investment were carried in any asset class. Existing exposure (if any) included in the restricted list has been promptly sold in full.

o Table 1, indicator 10 – Violations of the UN Global Compact ("UNGC") principles and the Organisation for Economic Co-operation and Development ("OECD") Guidelines for Multinational Enterprises – through the application of the exclusion criteria, no investment can be made in funds that invest in companies where there are violations or serious suspicions of possible violations of the OECD Guidelines for Multinational Enterprises or the UNGC principles.

During the reference period, no investments have been made in funds that invest in companies where there were violations or serious suspicions of possible violations of the OECD Guidelines for Multinational Enterprises or the UNGC principles.

Issuers classified in the restricted list were excluded and no new investment were carried in any asset class. Existing exposure (if any) included in the restricted list has been promptly sold in full.

○ Table 1, indicator 14 – Exposure to controversial weapons: Investments in companies whose main turnover is generated by controversial weapons are excluded.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors

investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-

corruption and anti-

bribery matters.

During the reference period, no investments have been made in companies directly involved in armament and weapons that violate fundamental humanitarian principles through their normal use (cluster bombs, antipersonnel landmines, nuclear weapons, biological and chemical weapons). Issuers classified in the restricted list were excluded and no new investment were carried in any asset class. Existing exposure (if any) included in the restricted list has been promptly sold in full.

Through the application of the proprietary Sovereign Ethical Filter defined in the investment strategy below, the Sub-fund considered the following PAI indicator, with reference to Annex I of the Delegated Regulation (EU) 2022/1288:

o Table 1, indicator 16 Investee countries subject to social violation Social exclusion criteria that excluded countries who are responsible of severe violations of human rights, based on Freedom House data.

During the reference period, no investments have been made in companies directly involved in armament and weapons that violate fundamental humanitarian principles through their normal use (cluster bombs, antipersonnel landmines, nuclear weapons, biological and chemical weapons). Issuers classified in the restricted list were excluded and no new investment were carried in any asset class. Existing exposure (if any) included in the restricted list has been promptly sold in full.

☐ No

What were the top investments of this financial product?

As of 31/12/2024, the top investments were as following:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/01/2024 – 31/12/2024

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- $\hbox{- The sub-category \#1A Sustainable covers environmentally and socially sustainable investments.}\\$
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| Sectors | %AuM |
|------------------------|--------|
| Sovereigns | 41.72% |
| Financials | 18.58% |
| Cash | 8.02% |
| Industrials | 4.89% |
| Real Estate | 4.47% |
| Communication Services | 4.02% |
| Utilities | 2.97% |
| Energy | 2.88% |
| Health Care | 2.87% |
| Consumer Discretionary | 2.67% |
| Consumer Staples | 2.62% |
| Materials | 2.26% |
| Regionals | 0.84% |
| Derivatives | 0.54% |
| Others | 0.66% |

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- capital
 expenditure
 (CapEx) shows the
 green investments
 made by investee
 companies,
 relevant for a
 transition to a
 green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

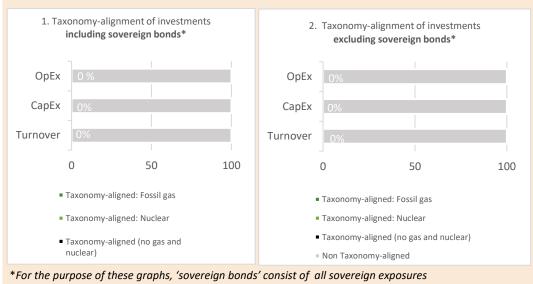

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy. However, the position will be kept underreview as the underlying rules are finalised and the availability of reliable dataincreases over time.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

As the Sub-fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments transitional and enabling

activities within the meaning of the EU Taxonomyis therefore also set at 0%.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There is no previous period.

Reference benchmarks are

indexes to

social

measure whether the financial

product attains the environmental or

characteristics that

they promote.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investment with an environmental objective not aligned with the EU Taxonomy was: 14.8%

What was the share of socially sustainable investments?

The share of socially sustainable investment was: 1.37%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The "other" investments and/or holdings of the Sub-fund are comprised, directly or indirectly, of securities whose issuers did not meet the ESG criteria described above to qualify as exhibiting positive environmental or social characteristics. This includes (i) Ancillary Liquid Assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets or for a period of time strictly necessary in case of unfavourable market conditions, and (ii) cash equivalents (i.e., bank deposits, Money Market Instruments), pursuant to the Sub-fund Investment Policy. (iii) UCITS or UCIs compliant with the provisions set out in Article 41 (1) e) of the UCI Law(iv) securities and derivatives not rated. No minimum environmental or social safeguards are applied to these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

- Application of a rating upgrade approach. The average carbon intensity of the Sub-fund was constantly higher than the average carbon intensity of its Initial Investment Universe.
- Application of the Ethical filter, the investment manager excluded investments if they match one or more of the following criteria:
 - Production of weapons violating fundamental humanitarian principles (antipersonnel landmines, cluster bombs and nuclear weapons),
 - Severe environmental damages,
 - Serious or systematic violation of human rights,
 - Cases of gross corruption,
 - Significant involvement in coal and tar sand-sector activities, or
 - Exclusions defined by the International Labor Organization (ILO)

Generali Investment SICAV – Euro Corporate Bond

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:

Legal entity identifier: 5493000Z5KNERTSNSU75

Generali Investment SICAV - Euro Corporate Bond

Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective? | | | |
|--|--|--|--|
| Yes | • No | | |
| investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 34.9% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective | | |
| It made sustainable investments with a social objective:% | It promoted E/S characteristics, but did not make any sustainable investments | | |

Sustainable **investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation

does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The Sub-fund promotes environmental and social characteristics pursuant to Article 8 of the Regulation (EU) 2019/2088 through the application of a Responsible investment process.

The Investment Manager actively managed the Sub-fund and selected, from the Bloomberg Euro Aggregate Corporate Index (the "Initial Investment Universe"), securities which presented positive environmental, social and governance ("ESG") criteria relative to the Initial Investment Universe provided that the issuers followed good corporate governance practices.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-fund.

How did the sustainability indicators perform? ...and compared to previous periods?

The sustainability indicators used to measure the attainment of the environmental and social characteristics promoted by the Sub-fund are as follows:

• The carbon intensity compared to that of the Initial Investment Universe;

| | 31/12/2024 |
|---|------------|
| Carbon intensity of the fund | 99.0 |
| Carbon intensity of the investment universe | 107.7 |

Sustainability

how the

social

indicators measure

environmental or

characteristics promoted by the financial product are attained.

• The minimum percentage of the Sub-fund's investments allocated to environmentally and socially sustainable investments;

| | 31/12/2024 |
|---------------------------------------|------------|
| Percentage of sustainable investments | 34.9% |

• The share of issuers within the portfolio with exposure to economic activities set out in the exclusions list.

The investment manager excluded investments if they match one or more of the following criteria:

- Production of weapons violating fundamental humanitarian principles (antipersonnel landmines, cluster bombs and nuclear weapons),
- Severe environmental damages,
- Serious or systematic violation of human rights,
- Cases of gross corruption,
- Significant involvement in coal and tar sand-sector activities, or
- Exclusions defined by the International Labor Organization (ILO).

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the Sub-fund partially intended to make include being linked to an environmental or social objective through the use of proceeds of the issuer, assessed via any individual or combination of the following indicators:

- The internal Green/Social/ Sustainability classification of the bonds (GSS bond);
- The revenues of the companies categorised as having ESG rating A and derived from sustainable impact solution or aligned with the European Taxonomy;
- The alignment of the company with a credible greenhouse gases emissions transition
 pathway. It is considered that the companies with relevant and credible greenhouse
 gases emissions reduction approved by the Science Based Targets initiative (SBTi) can
 meet the Sustainable investment criteria if they have already achieved a significant

reduction of their scope 1 & 2 greenhouse gases intensity of 7% per year over the past three years, in line with the rate implied by the Paris agreement.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In order to ensure that the sustainable investments did not cause significant harm to any environmental or social objective, those investments were subject to a screening process against the mandatory Principal Adverse Impacts and relevant optional Principal Adverse Impacts, as befitting each asset type, and as can be found, respectively, in Annex I Tables I, II and III of the European Commission delegated Regulation 2022/1288 (PAIs). PAIs were assessed in a quantitative or qualitative manner based on the Investment Manager's research.

The Investment Manager also applied a screen to align with the OECD Guidelines for Multinational Entprises and the UN Guiding Principles on Business and Human Rights as provided for under the minimum Safeguards in the EU Taxonomy.

How were the indicators for adverse impacts on sustainability factors taken into account?

As required by the regulation and as described above, the Principal Adverse Impact (PAI) indicators listed in Annex I of the European Commission delegated Regulation 2022/1288 were the reference to be considered as described in the section above.

Further additional adverse sustainability indicators, such as indicators 9 and 22 (in relation to investments in companies producing chemical and non-cooperative tax as set out in the EU SFDR Regulatory Technical Standards (table II and table III of Annex 1) were considered as part of the do no significant harm screen.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The norms-based exclusions as described under "What investment strategy does this financial product follow?" seeked alignment with these guidelines and principles. Third party data were used to identify violators and prohibit relevant investments in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

🖾 Yes, the Sub-fund considers principal adverse impacts ("PAIs") on sustainability factors.

The main focus is on the following PAIs with reference to Annex I of the Commission Delegated Regulation (EU) 2022/1288. Those indicators are considered and will be monitored continuously:

o Table 1, indicator 3 – GHG Intensity of investee companies: In addition to the monitoring of issuers' GHG intensity, Investments in companies who are involved in Coal activities are excluded.

The Carbon Intensity of the fund as of 31/12/2024 was: 99.0

During the reference period, investments in companies who are involved in Coal activities were excluded if one or more of the following criteria occured:

Coal-related business: more than 20% of the revenues deriving from coal; Coal power generation: more than 20% of power generated from coal; Companies with an installed coal power capacity of more than 5 GW.

Issuers classified in the restricted list were excluded and no new investment were carried in any asset class. Existing exposure (if any) included in the restricted list has been promptly sold in full.

○ Table 1, indicator 10 – Violations of the UN Global Compact ("UNGC") principles and the Organisation for Economic Co-operation and Development ("OECD") Guidelines for Multinational Enterprises – through the application of the exclusion criteria, no investment can be made in funds that invest in companies where there are violations or serious suspicions of possible violations of the OECD Guidelines for Multinational Enterprises or the UNGC principles.

During the reference period, no investments have been made in funds that invest in companies where there were violations or serious suspicions of possible violations of the OECD Guidelines for Multinational Enterprises or the UNGC principles.

Issuers classified in the restricted list were excluded and no new investment were carried in any asset class. Existing exposure (if any) included in the restricted list has been promptly sold in full.

 Table 1, indicator 14 – Exposure to controversial weapons: Investments in companies whose main turnover is generated by controversial weapons are excluded.

During the reference period, no investments have been made in companies directly involved in armament and weapons that violate fundamental humanitarian principles through their normal use (cluster bombs, antipersonnel landmines, nuclear weapons, biological and chemical weapons). Issuers classified in the restricted list were excluded and no new investment were carried in any asset class. Existing exposure (if any) included in the restricted list has been promptly sold in full.

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| Sectors | %AuM |
|------------------------|--------|
| Financials | 43.19% |
| Real Estate | 8.23% |
| Utilities | 8.15% |
| Industrials | 7.91% |
| Communication Services | 5.44% |
| Energy | 5.33% |
| Consumer Staples | 5.29% |
| Materials | 4.41% |
| Health Care | 3.98% |
| Consumer Discretionary | 3.29% |
| Cash | 1.84% |
| Information Technology | 1.46% |
| Derivatives | 1.08% |
| Agencies | 0.37% |
| Fees | 0.02% |

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-fund does not currently commit to invest in any "sustainable investment "within the meaning of the EU Taxonomy. However, the position will be kept under review as the underlying rules are finalised and the availability of reliable data increases over time.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Taxonomy-aligned

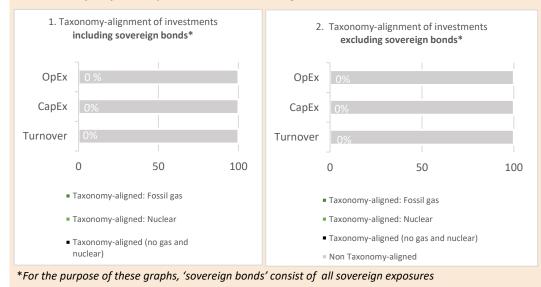

activities are

 turnover reflects the "greenness" of investee companies today.

expressed as a share

- capital
 expenditure
 (CapEx) shows the
 green investments
 made by investee
 companies,
 relevant for a
 transition to a
 green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- What was the share of investments made in transitional and enabling activities?

 As the Sub-fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There is no previous period.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investment with an environmental objective not aligned with the EU Taxonomy was: 26.2%.

What was the share of socially sustainable investments?

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The "other" investments and/or holdings of the Sub-fund are comprised, directly or indirectly, of securities whose issuers did not meet the ESG criteria described above to qualify as exhibiting positive environmental or social characteristics. This includes (i) Ancillary Liquid Assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets or for a period of time strictly necessary in case of unfavourable market conditions, and (ii) cash equivalents (i.e., bank deposits, Money Market Instruments), pursuant to the Sub-fund

Investment Policy. (iii) UCITS or UCIs compliant with the provisions set out in Article 41 (1) e) of the UCI Law, (iv) securities and derivatives not rated. No minimum environmental or social safeguards are applied to these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

- Application of a rating upgrade approach. The average carbon intensity of the Sub-fund was constantly higher than the average carbon intensity of its Initial Investment Universe.
- Application of the Ethical filter, the investment manager excluded investments if they match one or more of the following criteria:
 - Production of weapons violating fundamental humanitarian principles (antipersonnel landmines, cluster bombs and nuclear weapons),
 - Severe environmental damages,
 - Serious or systematic violation of human rights,
 - Cases of gross corruption,
 - Significant involvement in coal and tar sand-sector activities, or
 - Exclusions defined by the International Labor Organization (ILO)

How did this financial product perform compared to the reference benchmark?

N/A

How does the reference benchmark differ from a broad market index?

N/A

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

N/A

- How did this financial product perform compared with the reference benchmark?
 N/A
- How did this financial product perform compared with the broad market index?
 N/A

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:

Legal entity identifier:

Generali Investment SICAV – SRI Euro Corporate Short Term Bond

549300EED9376Q5XK934

Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective? | | | |
|--|---|--|--|
| Yes | • No | | |
| investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 40.1% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective | | |
| It made sustainable investments with a social objective:% | It promoted E/S characteristics, but did not make any sustainable investments | | |

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

Taxonomy or not.

Sustainable

practices.

investment means an investment in an

economic activity
that contributes to
an environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or
social objective and
that the investee
companies follow
good governance

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-fund promotes environmental and social characteristics pursuant to Article 8 of the Regulation (EU) 2019/2088. through the application of Responsible investment process. The Sub fund benefits from the SRI label in France.

The Investment Manager actively manages the Sub-fund, and selects from the Euro-denominated short term corporate debt securities (the "Initial Investment Universe"), securities which present positive Environmental, Social & Governance ("ESG") criteria relative to the Initial Investment Universe provided that the issuers follow good corporate governance practices.

Furthermore, the Investment Manager aims to select issuers that demonstrate a better result, on average, on at least two of the following factors, carbon intensity, women in workforce, independent board directors, labour rights severe controversies compared to the Initial Investment Universe.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-fund.

How did the sustainability indicators perform?... and compared to previous periods?

The sustainability indicators used to measure the attainment of the environmental and social characteristics promoted by the Sub-fund are:

• The carbon intensity compared to that of the Initial Investment Universe;

| | 31/12/2024 | 31/12/2023 | 31/12/2022 |
|---|------------|------------|------------|
| Carbon intensity of the fund | 74.8 | 29.51 | 38.85 |
| Carbon intensity of the investment universe | 98.8 | 89.76 | 116.83 |

■ The percentage of women in the workforce compared to that of the Initial Investment Universe;

| | 31/12/2024 | 31/12/2023 | 31/12/2022 |
|---|------------|------------|------------|
| Percentage of women in the worforce fund | 43% | 46.62% | 46.1% |
| Percentage of women in the workfoce investment universe | 40.7% | 41.92% | 40.8% |

• The percentage of independent directors within the board compared to that of the Initial Investment Universe;

| | 31/12/2024 | 31/12/2023 | 31/12/2022 |
|--|------------|------------|------------|
| Independency of board of directors fund | 83.2% | 85.04% | 84.7% |
| Independency of board of directors investment universe | 82.4% | 82.83% | 84.2% |

• The labor rights severe controversies compared to that of the Initial Investment Universe;

| | 31/12/2024 | 31/12/2023 | 31/12/2022 |
|--|------------|------------|------------|
| Severe controversies related to labour | 3.8% | 3.84% | 5.80% |
| management fund | 0.075 | 0.0.70 | 3.307 |
| Severe controversies related to labour | 3.6% | 3.66% | 11.60% |
| management investment universe | 3.076 | 3.00% | 11.00% |

characteristics promoted by the financial product are attained.

Sustainability

how the

social

indicators measure

environmental or

• The average ESG Rating of the Sub-fund and the ESG Rating of the Initial Investment Universe;

| | 31/12/2024 | 31/12/2023 | 31/12/2022 |
|-------------------------------|------------|------------|------------|
| ESG Score fund | 7.92 | 8.14 | 8.12 |
| ESG Score investment universe | 7.13 | 7.2 | 7.27 |
| Coverage | 98.3% | 98.44% | 95.06% |

 The minimum percentage of the Sub-fund's investments allocated to environmentally and socially sustainable investments;

| | 31/12/2024 |
|---------------------------------------|------------|
| Percentage of sustainable investments | 40.1% |

• The share of issuers within the portfolio with exposure to economic activities set out in the exclusions list.

The investment manager excluded investments if they match one or more of the following criteria:

- Production of weapons violating fundamental humanitarian principles (antipersonnel landmines, cluster bombs and nuclear weapons),
- Severe environmental damages,
- Serious or systematic violation of human rights,
- Cases of gross corruption,
- Significant involvement in coal and tar sand-sector activities, or
- Exclusions defined by the International Labor Organization (ILO)
- What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the Sub-fund partially intended to make include being linked to an environmental or social objective through the use of proceeds of the issuer, assessed via any individual or combination of the following indicators:

- The internal Green/Social/ Sustainability classification of the bonds (GSS bond);
- The revenues of the companies categorised as having ESG rating A and derived from sustainable impact solution or aligned with the European Taxonomy;
- The alignment of the company with a credible greenhouse gases emissions transition pathway. It is considered that the companies with relevant and credible greenhouse gases emissions reduction approved by the Science Based Targets initiative (SBTi) can meet the Sustainable investment criteria if they have already achieved a significant reduction of their scope 1 & 2 greenhouse gases intensity of 7% per year over the past three years, in line with the rate implied by the Paris agreement.
- How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In order to ensure that the sustainable investments did not cause significant harm to any environmental or social objective, those investments were subject to a screening process

against the mandatory Principal Adverse Impacts and relevant optional Principal Adverse Impacts, as befitting each asset type, and as can be found, respectively, in Annex I Tables I, II and III of the European Commission delegated Regulation 2022/1288 (PAIs). PAIs were assessed in a quantitative or qualitative manner based on the Investment Manager's research.

The Investment Manager also applied a screen to align with the OECD Guidelines for Multinational Entprises and the UN Guiding Principles on Business and Human Rights as provided for under the minimum Safeguards in the EU Taxonomy.

How were the indicators for adverse impacts on sustainability factors taken into account?

As required by the regulation and as described above, the Principal Adverse Impact (PAI) indicators listed in Annex I of the European Commission delegated Regulation 2022/1288 were the reference to be considered as described in the section above.

Further additional adverse sustainability indicators, such as indicators 9 and 22 (in relation to investments in companies producing chemical and non-cooperative tax as set out in the EU SFDR Regulatory Technical Standards (table II and table III of Annex 1) were considered as part of the do no significant harm screen.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The norms-based exclusions as described under "What investment strategy does this financial product follow?" seeked alignment with these guidelines and principles. Third party data were used to identify violators and prohibit relevant investments in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

☑ Yes, the Sub-fund considers principal adverse impacts ("PAIs") on sustainability factors

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

The main focus is on the following PAIs with reference to Annex I of the Commission Delegated Regulation (EU) 2022/1288. Those indicators are considered and will be monitored continuously:

• Table 1, indicator 3 – GHG Intensity of investee companies: in addition to the monitoring of issuers'GHG intensity, investments in companies who are involved in Coal activities are excluded.

The Carbon Intensity of the fund as of 31/12/2024 was: 74.8

During the reference period, investments in companies who are involved in Coal activities were excluded if one or more of the following criteria occured:

Coal-related business: more than 20% of the revenues deriving from coal; Coal power generation: more than 20% of power generated from coal; Companies with an installed coal power capacity of more than 5 GW.

Issuers classified in the restricted list were excluded and no new investment were carried in any asset class.

• Table 1, indicator 10 – Violations of the UN Global Compact ("UNGC") Principles and the Organisation for Economic Co-operation and Development ("OECD") Guidelines for Multinational Enterprises: Through the application of the exclusion criteria, no investment can be made in companies where there are violations or serious suspicions of possible violations of the OECD Guiding Principles for Multinational Enterprises or the UNGC Principles.

During the reference period, no investments have been made in funds that invest in companies where there were violations or serious suspicions of possible violations of the OECD Guidelines for Multinational Enterprises or the UNGC principles.

Issuers classified in the restricted list were excluded and no new investment were carried in any asset class.

• Table 1, indicator 14 – Exposure to controversial weapons: Investments in companies whose main turnover is generated by controversial weapons are excluded.

During the reference period, no investments have been made in companies directly involved in armament and weapons that violate fundamental humanitarian principles through their normal use (cluster bombs, antipersonnel landmines, nuclear weapons, biological and chemical weapons). Issuers classified in the restricted list were excluded and no new investment were carried in any asset class.

□ No

What were the top investments of this financial product?

As of 31/12/2024, the top investments were as follows:

| Large Investments | Sector | % Assets | Country |
|--------------------------------------|--------|----------|----------------|
| NYKREDIT 0.25% 20-13/01/2026 | | 3.61% | Denmark |
| NESTLE FIN INTL 0.875% 22-29/03/2027 | | 3.31% | Luxembourg |
| TELIA CO AB 20-11/05/2081 FRN | | 3.22% | Sweden |
| COCA-COLA HBC BV 1% 19-14/05/2027 | | 2.79% | Netherlands |
| UBS AG LONDON 0.01% 21-29/06/2026 | | 2.46% | United Kingdom |

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/01/2024 -31/12/2024

Asset allocation describes the share of

investments in

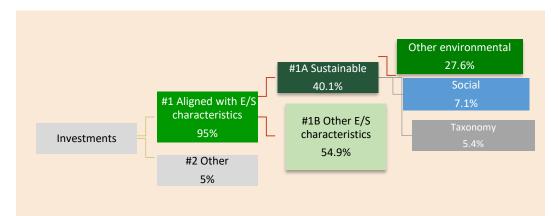

specific assets.

| ARVAL SERVICE 4.125% 23-13/04/2026 | 2.31% | France |
|--|-------|-----------------------------|
| REPSOL INTL FIN 2.25% 14-10/12/2026 | 2.27% | Netherlands |
| BANQ FED CRD MUT 0.1% 20-08/10/2027 | 2.11% | France |
| SOLVAY SA 3.875% 24-03/04/2028 | 2.04% | Belgium |
| CRD MUTUEL ARKEA 1.625% 19-15/04/2026 | 1.96% | France |
| REPSOL INTL FINANCE COMPANY GUAR REGS 12/99 VAR | 1.95% | Netherlands |
| TRANSURBAN FIN 2% 15-28/08/2025 | 1.87% | Australia |

| UNIBAIL-RODAMCO 18-31/12/2049 FRN | 1.70% | France |

What was the proportion of sustainability-related investments?

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| Sectors | %AuM |
|------------------|--------|
| Financials | 54.70% |
| Consumer Staples | 7.67% |

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- capital
 expenditure
 (CapEx) shows the
 green investments
 made by investee
 companies,
 relevant for a
 transition to a
 green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

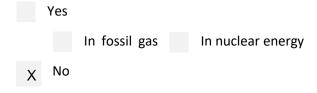

| Communication Services | 5.65% |
|------------------------|-------|
| Energy | 5.45% |
| Utilities | 5.38% |
| Real Estate | 5.22% |
| Health Care | 4.39% |
| Industrials | 3.42% |
| Materials | 3.30% |
| Cash | 2.42% |
| Consumer Discretionary | 1.70% |
| Derivatives | 0.39% |
| Information Technology | 0.30% |

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy. However, the position will be kept underreview as the underlying rules are finalised and the availability of reliable dataincreases over time.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

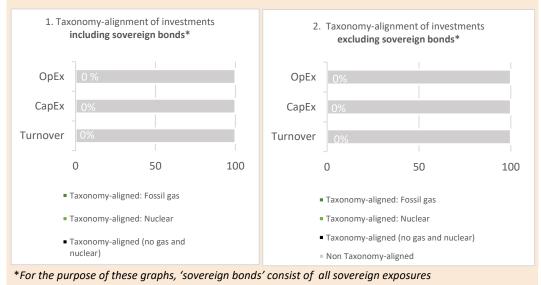

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are
sustainable
investments with an
environmental
objective that do
not take into
account the criteria
for environmentally
sustainable
economic activities
under Regulation

(EU) 2020/852.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- What was the share of investments made in transitional and enabling activities? As the Sub-fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments transitional and enabling activities within the meaning of the EU Taxonomy therefore also set at 0%.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as the sub-fund does not commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investment with an environmental objective not aligned with the EU Taxonomy was: 27.6%.

What was the share of socially sustainable investments?

The share of socially sustainable investment was: 7.1%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The "other" investments and/or holdings of the Sub-fund are comprised, directly or indirectly, of securities whose issuers did not meet the ESG criteria described above to qualify as exhibiting positive environmental or social characteristics.

This includes (i) Ancillary Liquid Assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets or for a period of time strictly necessary in case of unfavourable market conditions, and (ii) cash equivalents (i.e., bank deposits, Money Market Instruments, money market fund), pursuant to the Sub-fund Investment Policy, and (iii) UCITS or UCIs compliant with the provisions set out in Article 41 (1) e) of the UCI Law.

No minimum environmental or social safeguards are applied to these investments.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period,

- The average ESG rating of the Sub-fund was constantly be higher than the average ESG rating of its Initial Investment Universe after eliminating 20% of the initial securities ranking the worst in terms of ESG scoring (rating upgrade approach).
- Application of the Ethical filter The investment manager excluded investments if they match one or more of the following criteria:
 - Production of weapons violating fundamental humanitarian principles (antipersonnel landmines, cluster bombs and nuclear weapons),
 - Severe environmental damages,
 - Serious or systematic violation of human rights,
 - Cases of gross corruption,
 - Significant involvement in coal and tar sand-sector activities, or
 - Exclusions defined by the International Labor Organization (ILO)
- Furthermore, the Investment Manager selected issuers that demonstrate a better result, on average, on at least two of the following factors, carbon intensity, women in workforce, independent board directors, labour rights severe controversies compared to the Initial Investment Universe.

How did this financial product perform compared to the reference benchmark?

N/A

How does the reference benchmark differ from a broad market index?

Generali Investment SICAV - SRI Euro Premium High Yield

ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:

Generali Investment SICAV - SRI Euro Premium High Yield

Legal entity identifier: 5493005X80FT6ALTC445

Environmental and/or social characteristics

| Did this financial product have a sustain | nable investment objective? |
|--|---|
| Yes | • No |
| investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 29.2% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective |
| It made sustainable investments with a social objective:% | It promoted E/S characteristics, but did not make any sustainable investments |

establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental

objective might be aligned with the Taxonomy or not.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852,

Sustainable

practices.

investment means an investment in an

economic activity
that contributes to
an environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or
social objective and
that the investee
companies follow
good governance

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-fund promotes environmental and social characteristics pursuant to Article 8 of the Regulation (EU) 2019/2088 through applying a Responsible investment process. The Sub-fund benefits from the SRI label in France. The Investment Manager actively manages the Sub-fund and selects, from the ICE BofA BB-B Euro High Yield Total Return (the "Initial Investment Universe"), securities which present positive

Environmental, Social & Governance ("**ESG**") criteria relative to its Initial Investment Universe provided that the issuers follow good corporate governance practices.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Furthermore, the Investment Manager aims to select issuers that demonstrate a better result on at least two of the following factors, carbon intensity, women in workforce, independent board directors, labour rights severe controversies compared to the Initial Investment Universe.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-fund.

How did the sustainability indicators perform? ...and compared to previous periods?

The sustainability indicators used to ensure the attainment of the environmental and social characteristics promoted by the Sub-fund are:

o The carbon intensity compared to that of the Initial Investment Universe;

| | 31/12/2024 | 31/12/2023 | 31/12/2022 |
|---|------------|------------|------------|
| Carbon intensity of the fund | 139.9 | 120.5 | 142.56 |
| Carbon intensity of the investment universe | 169.6 | 163.25 | 220.78 |

 The percentage of women in the workforce compared to that of the Initial Investment Universe;

| | 31/12/2024 | 31/12/2023 | 31/12/2022 |
|--|------------|------------|------------|
| Percentage of women in the worforce fund | 40.2% | 39.80% | 40.0% |
| Percentage of women in the workfoce | 38.8% | 38.92% | 36.0% |
| investment universe | | | |

 The percentage of independent directors within the board compared to that of the Initial Investment Universe;

| | 31/12/2024 | 31/12/2023 | 31/12/2022 |
|--|------------|------------|------------|
| Independency of board of directors fund | 81.6% | 81.67% | 78.8% |
| Independency of board of directors investment universe | 75.2% | 77.86% | 76.9% |

o The labor rights severe controversies compared to that of the Initial Investment Universe;

| | 31/12/2024 | 31/12/2023 | 31/12/2022 |
|--|------------|------------|------------|
| Severe controversies related to labour | 3.88% | 3.84% | 3.4% |
| management fund | 3.00/0 | 3.64% | 5.4/0 |
| Severe controversies related to labour | 3.89% | 3.88% | 2.7% |
| management investment universe | 3.63/0 | 3.86% | 2.770 |

 The average ESG Rating of the Sub-fund and the ESG Rating of the Initial Investment Universe;

| | 31/12/2024 | 31/12/2023 | 31/12/2022 |
|-------------------------------|------------|------------|------------|
| ESG Score fund | 7.0 | 7 | 6.8 |
| ESG Score investment universe | 6.0 | 5.99 | 5.63 |
| Coverage | 91.3% | 94.99% | 95.06% |

 The minimum percentage of the Sub-fund's investments allocated to environmentally and socially sustainable investments;

| | 31/12/2024 |
|---------------------------------------|------------|
| Percentage of sustainable investments | 29.2% |

 The share of issuers within the portfolio with exposure to economic activities set out in the exclusions list.

The investment manager excluded investments if they match one or more of the following criteria:

- Production of weapons violating fundamental humanitarian principles (antipersonnel landmines, cluster bombs and nuclear weapons),
- Severe environmental damages,
- Serious or systematic violation of human rights,
- Cases of gross corruption,
- Significant involvement in coal and tar sand-sector activities, or
- Exclusions defined by the International Labor Organization (ILO)
- What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the Sub-fund partially intended to make include being linked to an environmental or social objective through the use of proceeds of the issuer, assessed via any individual or combination of the following indicators:

- The internal Green/Social/ Sustainability classification of the bonds (GSS bond);
- The revenues of the companies categorised as having ESG rating A and derived from sustainable impact solution or aligned with the European Taxonomy;
- The alignment of the company with a credible greenhouse gases emissions transition pathway. It is considered that the companies with relevant and credible greenhouse gases emissions reduction approved by the Science Based Targets initiative (SBTi) can meet the Sustainable investment criteria if they have already achieved a significant reduction of their scope 1 & 2 greenhouse gases intensity of 7% per year over the past three years, in line with the rate implied by the Paris agreement.
- How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In order to ensure that the sustainable investments did not cause significant harm to any environmental or social objective, those investments were subject to a screening process against the mandatory Principal Adverse Impacts and relevant optional Principal Adverse Impacts, as befitting each asset type, and as can be found, respectively, in Annex I Tables I, II and III of the European Commission delegated Regulation 2022/1288 (PAIs). PAIs were assessed in a quantitative or qualitative manner based on the Investment Manager's research.

The Investment Manager also applied a screen to align with the OECD Guidelines for Multinational Entprises and the UN Guiding Principles on Business and Human Rights as provided for under the minimum Safeguards in the EU Taxonomy.

How were the indicators for adverse impacts on sustainability factors taken into account?

As required by the regulation and as described above, the Principal Adverse Impact (PAI) indicators listed in Annex I of the European Commission delegated Regulation 2022/1288 were the reference to be considered as described in the section above.

Further additional adverse sustainability indicators, such as indicators 9 and 22 (in relation to investments in companies producing chemical and non-cooperative tax as set out in the EU SFDR Regulatory Technical Standards (table II and table III of Annex 1) were considered as part of the do no significant harm screen.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The norms-based exclusions as described under "What investment strategy does this financial product follow?" seeked alignment with these guidelines and principles. Third party data were used to identify violators and prohibit relevant investments in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

☑ Yes, the Sub-fund considers principal adverse impacts ("PAIs") on sustainability factors. The main focus is on the following PAIs with reference to Annex I of the Commission Delegated Regulation (EU) 2022/1288. Those indicators are considered and will be monitored continuously:

o Table 1, indicator 3 – GHG Intensity of investee companies: In addition to the monitoring of issuers' GHG intensity, Investments in companies who are involved in Coal activities are excluded.

The Carbon Intensity of the fund as of 31/12/2024 was: 139.9

O Table 1, indicator 10 – Violations of the UN Global Compact ("UNGC") principles and the Organisation for Economic Co-operation and Development ("OECD") Guidelines for Multinational Enterprises – through the application of the exclusion criteria, no investment can be made in funds that invest in companies where there are violations or serious suspicions of possible violations of the OECD Guidelines for Multinational Enterprises or the UNGC principles.

During the reference period, no investments have been made in funds that invest in companies where there were violations or serious suspicions of possible violations of the OECD Guidelines for Multinational Enterprises or the UNGC principles.

Issuers classified in the restricted list were excluded and no new investment were carried in any asset class. For existing exposure (if any), opportunistic sales have been applied.

 Table 1, indicator 14 – Exposure to controversial weapons: Investments in companies whose main turnover is generated by controversial weapons are excluded.

During the reference period, no investments have been made in companies directly involved in armament and weapons that violate fundamental humanitarian principles through their normal use (cluster bombs, antipersonnel landmines, nuclear weapons, biological and chemical weapons). Issuers classified in the restricted list were excluded and no new investment were carried in any asset class.

□ No

What were the top investments of this financial product?

| Large Investments | Sector | % Assets | Country |
|--------------------------------|------------------------|----------|---------------|
| RCI BANQUE 02/18/30 | Consumer Discretionary | 1.60% | France |

| Energy | 1.82% |
| Information Technology | 1.58% |
| · | |

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- capital
 expenditure
 (CapEx) shows the
 green investments
 made by investee
 companies,
 relevant for a
 transition to a
 green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

| Derivatives | 0.63% |
|-------------|-------|
| Fees | 0.18% |

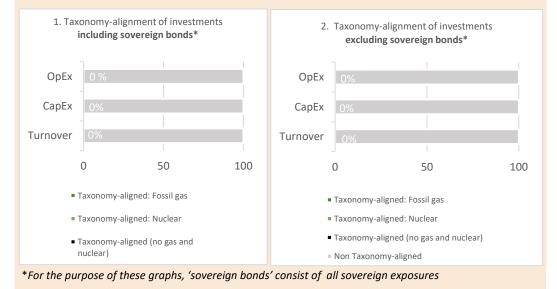

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy. However, the position will be kept underreview as the underlying rules are finalised and the availability of reliable dataincreases over time.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

As the Sub-fund does not commit to invest any "sustainable investment" within the meaning

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

of the EU Taxonomy , the minimum share of investmentsin transitional and enabling activities within the meaning of the EU Taxonomyis therefore also set at 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as the Sub-fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy.

sustainable

investments with an

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investment with an environmental objective not aligned with the EU Taxonomy was: 19.9%.

What was the share of socially sustainable investments?

The share of socially sustainable investment was: 1.2%

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The "other" investments and/or holdings of the Sub-fund are comprised, directly or indirectly, of securities whose issuers did not meet the ESG criteria described above to qualify as exhibiting positive environmental or social characteristics.

This includes (i) Ancillary Liquid Assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets or for a period of time strictly necessary in case of unfavourable market conditions, and (ii) cash equivalents (i.e., bank deposits, Money Market Instruments, money market fund), pursuant to the Sub-fund Investment Policy, and (iii) equities, government bonds, UCITS or UCIs compliant with the provisions set out in Article 41 (1) e) of the UCI Law.

No minimum environmental or social safeguards are applied to these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period,

- The average ESG rating of the Sub-fund was constantly be higher than the average ESG rating of its Initial Investment Universe after eliminating 20% of the initial securities ranking the worst in terms of ESG scoring (rating upgrade approach).
- Application of the Ethical filter: The investment manager excluded investments if they match one or more of the following criteria:
 - Production of weapons violating fundamental humanitarian principles (antipersonnel landmines, cluster bombs and nuclear weapons),
 - Severe environmental damages,
 - Serious or systematic violation of human rights,
 - Cases of gross corruption,
 - Significant involvement in coal and tar sand-sector activities, or

- Exclusions defined by the International Labor Organization (ILO)
- Furthermore, the Investment Manager selected issuers that demonstrate a better result, on average, on at least two of the following factors, carbon intensity, women in workforce, independent board directors, labour rights severe controversies compared to the Initial Investment Universe.

Generali Investment SICAV – SRI Euro Green Bond ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Generali Investment SICAV – SRI Furo Green Bond

Legal entity identifier: 549300ANXLBQ6ODJ8E78

Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective? | | | | |
|---|---|--|--|--|
| Yes | • No | | | |
| in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 89.0% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective | | | |
| It made sustainable investments with a social objective:% | It promoted E/S characteristics, but did not make any sustainable investments | | | |

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation

That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This Sub-fund promotes environmental and social characteristics pursuant to Article 8 of the Regulation (EU) 2019/2088 pursuant to Article 8 of the Regulation (EU) 2019/2088 through applying a Responsible investment process. The Sub-fund benefits from the SRI label in France.

The Investment Manager actively manages the Sub-fund and selects, an Environmental, Social and Governance ("ESG") criteria selection process on at least 90% of its portfolio, while investing 75% of its net assets in Green and Sustainable Bonds denominated in EUR, with an investment Grade Rating.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Manager will be applying an ESG process on an ongoing basis to select securities from the initial investment universe as defined by the Bloomberg MSCI Euro Green bond index , and to a lesser extent, the Euro-denominated Investment Grade corporate and sovereign debt, based on established Green Bond Principles and covering, among others, the use of proceeds for environmental projects, including but not limited to, alternative energy, energy efficiency, pollution prevention, sustainable water, green building, and climate adaptation (the "Initial Investment Universe").

Furthermore, the Investment Manager aims to select issuers that demonstrate a better result, on average, on at least two of the following factors, carbon intensity, women in workforce, independent board directors, labour rights severe controversies compared to the Initial Investment Universe. No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-fund.

How did the sustainability indicators perform? ...and compared to previous periods?

The sustainability indicators used to measure the attainment of the environmental and social characteristics promoted by the Sub-fund are:

o The carbon intensity compared to that of the Initial Investment Universe;

| | 31/12/2024 | 31/12/2023 | 31/12/2022 |
|---|------------|------------|------------|
| Carbon intensity of the fund | 103.5 | 67.88 | 64.63 |
| Carbon intensity of the investment universe | 321.5 | 138.35 | 148.09 |

• The percentage of women in the workforce compared to that of the Initial Investment Universe;

| | 31/12/2024 | 31/12/2023 | 31/12/2022 |
|--|------------|------------|------------|
| Percentage of women in the worforce fund | 42.3% | 44.76% | 43.8% |
| Percentage of women in the workfoce | 40.0% | 41.15% | 39.7% |
| investment universe | 40.0% | 41.13/0 | 33.770 |

o The percentage of independent directors within the board compared to that of the Initial Investment Universe;

| | 31/12/2024 | 31/12/2023 | 31/12/2022 |
|--|------------|------------|------------|
| Independency of board of directors fund | 85.2% | 86.88% | 86.2% |
| Independency of board of directors investment universe | 84.7% | 84.85% | 84.1% |

o The labor rights severe controversies compared to that of the Initial Investment Universe;

| | 31/12/2024 | 31/12/2023 | 31/12/2022 |
|---|------------|------------|------------|
| Severe controversies related to labour management fund | 3.89% | 3.88% | 1.9% |
| Severe controversies related to labour management investment universe | 3.75% | 3.81% | 3.1% |

• The average ESG Rating of the Sub-fund and the ESG Rating of the Initial Investment Universe;

| | 31/12/2024 | 31/12/2023 | 31/12/2022 |
|-------------------------------|------------|------------|------------|
| ESG Score fund | 7.57 | 7.29 | 7.47 |
| ESG Score investment universe | 7.34 | 7.27 | 7.27 |
| Coverage | 99.2 | 97.92% | 96.70% |

 The minimum percentage of the Sub-fund's investments allocated to environmentally and socially sustainable investments;

| | 31/12/2024 |
|---------------------------------------|------------|
| Percentage of sustainable investments | 89% |

o The share of issuers within the portfolio with exposure to economic activities set out in the exclusions list.

The investment manager excluded investments if they match one or more of the following criteria:

- Production of weapons violating fundamental humanitarian principles (antipersonnel landmines, cluster bombs and nuclear weapons),
- Severe environmental damages,
- Serious or systematic violation of human rights,
- Cases of gross corruption,
- Significant involvement in coal and tar sand-sector activities, or
- Exclusions defined by the International Labor Organization (ILO)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the Sub-fund partially intended to make include being linked to an environmental or social objective through the use of proceeds of the issuer, assessed via any individual or combination of the following indicators:

- The internal Green/Social/ Sustainability classification of the bonds (GSS bond);
- The revenues of the companies categorised as having ESG rating A and derived from sustainable impact solution or aligned with the European Taxonomy;
- The alignment of the company with a credible greenhouse gases emissions transition
 pathway. It is considered that the companies with relevant and credible greenhouse
 gases emissions reduction approved by the Science Based Targets initiative (SBTi) can
 meet the Sustainable investment criteria if they have already achieved a significant
 reduction of their scope 1 & 2 greenhouse gases intensity of 7% per year over the past
 three years, in line with the rate implied by the Paris agreement.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In order to ensure that the sustainable investments did not cause significant harm to any environmental or social objective, those investments were subject to a screening process against the mandatory Principal Adverse Impacts and relevant optional Principal Adverse Impacts, as befitting each asset type, and as can be found, respectively, in Annex I Tables I, II and III of the European Commission delegated Regulation 2022/1288 (PAIs). PAIs were assessed in a quantitative or qualitative manner based on the Investment Manager's research.

The Investment Manager also applied a screen to align with the OECD Guidelines for Multinational Entprises and the UN Guiding Principles on Business and Human Rights as provided for under the minimum Safeguards in the EU Taxonomy.

How were the indicators for adverse impacts on sustainability factors taken into account?

As required by the regulation and as described above, the Principal Adverse Impact (PAI) indicators listed in Annex I of the European Commission delegated Regulation 2022/1288 were the reference to be considered as described in the section above.

Further additional adverse sustainability indicators, such as indicators 9 and 22 (in relation to investments in companies producing chemical and non-cooperative tax as set out in the EU SFDR Regulatory Technical Standards (table II and table III of Annex 1) were considered as part of the do no significant harm screen.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The norms-based exclusions as described under "What investment strategy does this financial product follow?" seeked alignment with these guidelines and principles. Third party data were used to identify violators and prohibit relevant investments in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

☑ Yes, the Sub-fund considers principal adverse impacts ("PAIs") on sustainability factors

The main focus is on the following PAIs with reference to Annex I of the Commission Delegated Regulation (EU) 2022/1288. Those indicators are considered and will be monitored continuously:

• Table 1, indicator 3 - GHG Intensity of investee companies: in addition to the monitoring of issuers'GHG intensity, investments in companies who are involved in Coal activities are excluded.

The Carbon Intensity of the fund as of 31/12/2024 was: 103.5

During the reference period, investments in companies who are involved in Coal activities were excluded if one or more of the following criteria occured:

Coal-related business: more than 20% of the revenues deriving from coal;

Coal power generation: more than 20% of power generated from coal;

Companies with an installed coal power capacity of more than 5 GW.

Issuers classified in the restricted list were excluded and no new investment were carried in any asset class.

• Table 1, indicator 10 - Violations of the UN Global Compact ("UNGC") Principles and the Organisation for Economic Co-operation and Development ("OECD") Guidelines for Multinational

Enterprises: Through the application of the exclusion criteria, no investment can be made in companies where there are violations or serious suspicions of possible violations of the OECD

Guiding Principles for Multinational Enterprises or the UNGC Principles.

During the reference period, no investments have been made in funds that invest in companies where there were violations or serious suspicions of possible violations of the OECD Guidelines for Multinational Enterprises or the UNGC principles.

Issuers classified in the restricted list were excluded and no new investment were carried in any asset class.

• Table 1, indicator 14 – Exposure to controversial weapons: Investments in companies whose main turnover is generated by controversial weapons are excluded.

During the reference period, no investments have been made in companies directly involved in armament and weapons that violate fundamental humanitarian principles through their normal use (cluster bombs, antipersonnel landmines, nuclear weapons, biological and chemical weapons). Issuers classified in the restricted list were excluded and no new investment were carried in any asset class.

What was the proportion of sustainability-related investments?

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- capital
 expenditure
 (CapEx) shows the
 green investments
 made by investee
 companies,
 relevant for a
 transition to a
 green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

In which economic sectors were the investments made?

| Sectors | %AuM |
|------------------------|--------|
| Sovereigns | 31.50% |
| Financials | 29.02% |
| Utilities | 13.22% |
| Supranationals | 5.47% |
| Real Estate | 5.22% |
| Government Guaranteed | 3.67% |
| Industrials | 2.30% |
| Consumer Staples | 2.00% |
| Regionals | 1.32% |
| Cash | 1.28% |
| Materials | 0.92% |
| Covered Bonds | 0.85% |
| Information Technology | 0.70% |
| Communication Services | 0.69% |
| Others | 1.84% |

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

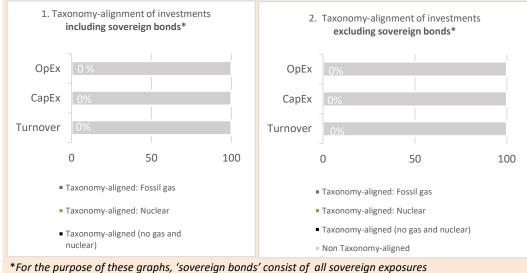

The Sub-fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy. However, the position will be kept underreview as the underlying rules are finalised and the availability of reliable dataincreases over time.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

| | Yes | | |
|---|-----|---------------|-------------------|
| | | In fossil gas | In nuclear energy |
| X | No | | |

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- What was the share of investments made in transitional and enabling activities?

 As the Sub-fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.
- How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable as the Sub-fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy.

sustainable

environmental

not take into

sustainable economic activities under Regulation

(EU) 2020/852.

objective that do

investments with an

account the criteria for environmentally

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investment with an environmental objective not aligned with the EU Taxonomy was: 80.0%.

What was the share of socially sustainable investments?

The share of socially sustainable investment was: 1.5%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The "other" investments and/or holdings of the Sub-fund are comprised, directly or indirectly, of securities whose issuers did not meet the ESG criteria described above to qualify as exhibiting positive environmental or social characteristics.

This includes (i) Ancillary Liquid Assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets or for a period of time strictly necessary in case of unfavourable market conditions, and (ii) cash equivalents (i.e., bank deposits, Money Market Instruments, money market fund), pursuant to the Sub-fund Investment Policy, and (iii) UCITS or UCIs compliant with the provisions set out in Article 41 (1) e) of the UCI Law.

No minimum environmental or social safeguards are applied to these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period,

- The average ESG rating of the Sub-fund was constantly be higher than the average ESG rating of its Initial Investment Universe after eliminating 20% of the initial securities ranking the worst in terms of ESG scoring (rating upgrade approach).
- Application of the Ethical filter: The investment manager excluded investments if they match one or more of the following criteria:
 - Production of weapons violating fundamental humanitarian principles (antipersonnel landmines, cluster bombs and nuclear weapons),
 - Severe environmental damages,
 - Serious or systematic violation of human rights,
 - Cases of gross corruption,
 - Significant involvement in coal and tar sand-sector activities, or
 - Exclusions defined by the International Labor Organization (ILO)
- Furthermore, the Investment Manager selected issuers that demonstrate a better result, on average, on at least two of the following factors, carbon intensity, women in workforce, independent board directors, labour rights severe controversies compared to the Initial Investment Universe.

Generali Investment SICAV – Fixed Maturity Bond I ANNEX IV

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:

Sustainable

practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852,

establishing a list of environmentally sustainable

economic activities. That Regulation does not lay down a list of socially sustainable

economic activities.

investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable

investment means an investment in an economic activity that contributes to

an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

Generali Investment SICAV - Fixed Maturity Bond I

Legal entity identifier: 3912005D54LDHP75KM27

Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective? | | |
|--|--|--|
| Yes | ● ○ 🗶 No | |
| investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 27.4% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective | |
| It made sustainable investments with a social objective:% | It promoted E/S characteristics, but did not make any sustainable investments | |

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-fund promotes environmental and social characteristics pursuant to Article 8 of the Regulation (EU) 2019/2088 through the application of a Responsible investment process.

When selecting securities, the Investment Manager considered both financial and extrafinancial criteria. The Sub-fund promotes environmental and social characteristics by investing in securities of issuers with ESG characteristics, which are assessed through a Responsible investment process, provided that the issuers follow good corporate governance practices.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-fund.

How did the sustainability indicators perform? ...and compared to previous periods?

The sustainability indicators used to measure the attainment of the environmental and social characteristics promoted by the Sub-fund are as follows:

• The carbon intensity compared to that of the Initial Investment Universe;

| | 31/12/2024 |
|---|------------|
| Carbon intensity of the fund | 12.9 |
| Carbon intensity of the investment universe | 107.8 |

• The minimum percentage of the Sub-fund's investments allocated to environmentally and socially sustainable investments;

| | 31/12/2024 |
|---------------------------------------|------------|
| Percentage of sustainable investments | 27.4% |

• The share of issuers within the portfolio with exposure to economic activities set out in the exclusions list.

The investment manager excluded investments if they match one or more of the following criteria:

- Production of weapons violating fundamental humanitarian principles (antipersonnel landmines, cluster bombs and nuclear weapons),
- Severe environmental damages,
- Serious or systematic violation of human rights,
- Cases of gross corruption,
- Significant involvement in coal and tar sand-sector activities, or
- Exclusions defined by the International Labor Organization (ILO).

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments that the Sub-fund partially intended to make include being linked to an environmental or social objective through the use of proceeds of the issuer, assessed via any individual or combination of the following indicators:

- The internal Green/Social/ Sustainability classification of the bonds (GSS bond);
- The revenues of the companies categorised as having ESG rating A and derived from sustainable impact solution or aligned with the European Taxonomy;
- The alignment of the company with a credible greenhouse gases emissions transition
 pathway. It is considered that the companies with relevant and credible greenhouse
 gases emissions reduction approved by the Science Based Targets initiative (SBTi) can
 meet the Sustainable investment criteria if they have already achieved a significant

reduction of their scope 1 & 2 greenhouse gases intensity of 7% per year over the past three years, in line with the rate implied by the Paris agreement.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

In order to ensure that the sustainable investments did not cause significant harm to any environmental or social objective, those investments were subject to a screening process against the mandatory Principal Adverse Impacts and relevant optional Principal Adverse Impacts, as befitting each asset type, and as can be found, respectively, in Annex I Tables I, II and III of the European Commission delegated Regulation 2022/1288 (PAIs). PAIs were assessed in a quantitative or qualitative manner based on the Investment Manager's research.

The Investment Manager also applied a screen to align with the OECD Guidelines for Multinational Entprises and the UN Guiding Principles on Business and Human Rights as provided for under the minimum Safeguards in the EU Taxonomy.

How were the indicators for adverse impacts on sustainability factors taken into account?

As required by the regulation and as described above, the Principal Adverse Impact (PAI) indicators listed in Annex I of the European Commission delegated Regulation 2022/1288 were the reference to be considered as described in the section above.

Further additional adverse sustainability indicators, such as indicators 9 and 22 (in relation to investments in companies producing chemical and non-cooperative tax as set out in the EU SFDR Regulatory Technical Standards (table II and table III of Annex 1) were considered as part of the do no significant harm screen.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The norms-based exclusions as described under "What investment strategy does this financial product follow?" seeked alignment with these guidelines and principles. Third party data were used to identify violators and prohibit relevant investments in these issuers.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

☑ Yes, the Sub-fund considers principal adverse impacts ("PAIs") on sustainability factors.

The main focus is on the following PAIs with reference to Annex I of the Commission Delegated Regulation (EU) 2022/1288. Those indicators are considered and will be monitored continuously:

o Table 1, indicator 3 – GHG Intensity of investee companies: In addition to the monitoring of issuers' GHG intensity, Investments in companies who are involved in Coal activities are excluded.

The Carbon Intensity of the fund as of 31/12/2024 was: 12.9

During the reference period, investments in companies who are involved in Coal activities were excluded if one or more of the following criteria occured:

Coal-related business: more than 20% of the revenues deriving from coal; Coal power generation: more than 20% of power generated from coal; Companies with an installed coal power capacity of more than 5 GW.

Issuers classified in the restricted list were excluded and no new investment were carried in any asset class. Existing exposure (if any) included in the restricted list has been promptly sold in full.

O Table 1, indicator 10 – Violations of the UN Global Compact ("UNGC") principles and the Organisation for Economic Co-operation and Development ("OECD") Guidelines for Multinational Enterprises – through the application of the exclusion criteria, no investment can be made in funds that invest in companies where there are violations or serious suspicions of possible violations of the OECD Guidelines for Multinational Enterprises or the UNGC principles.

During the reference period, no investments have been made in funds that invest in companies where there were violations or serious suspicions of possible violations of the OECD Guidelines for Multinational Enterprises or the UNGC principles.

Issuers classified in the restricted list were excluded and no new investment were carried in any asset class. Existing exposure (if any) included in the restricted list has been promptly sold in full.

 Table 1, indicator 14 – Exposure to controversial weapons: Investments in companies whose main turnover is generated by controversial weapons are excluded.

During the reference period, no investments have been made in companies directly involved in armament and weapons that violate fundamental humanitarian principles through their normal use (cluster bombs, antipersonnel landmines, nuclear weapons, biological and chemical weapons). Issuers classified in the restricted list were excluded and no new investment were carried in any asset class. Existing exposure (if any) included in the restricted list has been promptly sold in full.

Through the application of the proprietary Sovereign Ethical Filter defined in the investment strategy below, the Sub-fund considered the following PAI indicator, with reference to Annex I of the Delegated Regulation (EU) 2022/1288:

o Table 1, indicator 16 Investee countries subject to social violation Social exclusion criteria that excluded countries who are responsible of severe violations of human rights, based on Freedom House data.

During the reference period, no investments have been made in companies directly involved in armament and weapons that violate fundamental humanitarian principles through their normal use (cluster bombs, antipersonnel landmines, nuclear weapons, biological and chemical weapons). Issuers classified in the restricted list were excluded and no new investment were carried in any asset class. Existing exposure (if any) included in the restricted list has been promptly sold in full.

 \square No

What were the top investments of this financial product?

During the year, the top investments were as following:

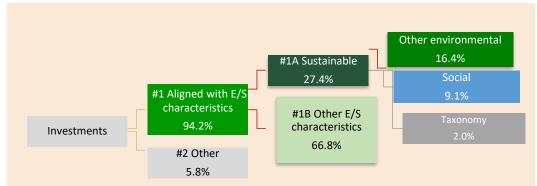

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/01/2024 – 31/12/2024

| Largest Investments | Sector | % Assets | Country |

What was the proportion of sustainability-related investments?

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- $\hbox{- The sub-category \#1A Sustainable covers environmentally and socially sustainable investments.}\\$
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| Sectors | %AuM |
|------------------------|--------|
| Financials | 37.23% |
| Sovereigns | 23.57% |
| Consumer Staples | 8.27% |
| Industrials | 7.67% |
| Real Estate | 5.40% |
| Communication Services | 4.80% |
| Consumer Discretionary | 4.42% |
| Health Care | 3.51% |
| Cash | 3.33% |
| Utilities | 1.80% |

Asset allocation describes the share of investments in specific assets.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

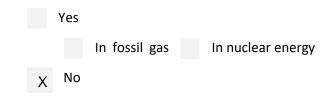

- turnover reflects the "greenness" of investee companies today.
- capital
 expenditure
 (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

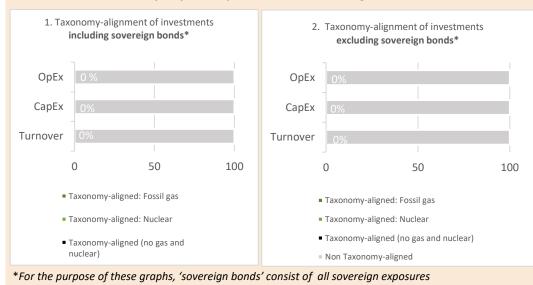

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy. However, the position will be kept underreview as the underlying rules are finalised and the availability of reliable dataincreases over time.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

As the Sub-fund does not commit to invest any "sustainable investment" within the meaning

As the Sub-fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set at 0%.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There is no previous period.

sustainable

environmental objective that **do**

not take into

sustainable

investments with an

account the criteria for environmentally

economic activities

under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investment with an environmental objective not aligned with the EU Taxonomy was: 16.4%.

What was the share of socially sustainable investments?

The share of socially sustainable investment was: 9.1%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The "other" investments and/or holdings of the Sub-fund are comprised, directly or indirectly, of securities whose issuers did not meet the ESG criteria described above to qualify as exhibiting positive environmental or social characteristics. This includes (i) Ancillary Liquid Assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets or for a period of time strictly necessary in case of unfavourable market conditions, and (ii) cash equivalents (i.e., bank deposits, Money Market Instruments, money market fund), pursuant to the Sub-fund Investment Policy, and (iii) funds and ETFs (iv) securities and derivatives not rated. No minimum environmental or social safeguards are applied to these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

- Application of a rating upgrade approach. The average carbon intensity of the Sub-fund was constantly higher than the average carbon intensity of its Initial Investment Universe.
- Application of the Ethical filter The investment manager excluded investments if they match one or more of the following criteria:
 - Production of weapons violating fundamental humanitarian principles (antipersonnel landmines, cluster bombs and nuclear weapons),
 - Severe environmental damages,
 - Serious or systematic violation of human rights,
 - Cases of gross corruption,
 - Significant involvement in coal and tar sand-sector activities, or
 - Exclusions defined by the International Labor Organization (ILO)

Sustainable

practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852,

establishing a list of environmentally sustainable

economic activities. That Regulation

investment means

an investment in an economic activity that contributes to

an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Sub-fund promotes environmental and social characteristics pursuant to Article 8 of the Regulation (EU) 2019/2088 through the application of a Responsible investment process.

The Investment Manager actively managed the Sub-fund and selected financial instruments which presented positive ESG criteria from the eligible investment universe, including equities and equity-linked securities, REITs, debt instruments of any kind, UCITS, UCIs, derivative instruments such as, but not limited to, index or single name futures, dividend futures, TRS, CDS and equity options. For

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

the purposes of this Sub-fund, REITs shall mean equity securities of closed ended real estate investment trusts.

The Sub-fund assessed the degree of sustainability of the financial instruments with an ESG score provided by external sources, which takes into account also the good governance practices of the investee companies.

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Sub-fund.

How did the sustainability indicators perform? ...and compared to previous periods?

The sustainability indicators used to measure the attainment of the environmental and social characteristics promoted by the Sub-fund are as follows:

• The ESG Score compared to that of the Initial Investment Universe;

| | 31/12/2024 |
|--------------------------------------|------------|
| ESG Score of the fund | 7.2 |
| ESG Score of the investment universe | 6.7 |

• The share of issuers within the portfolio with exposure to economic activities set out in the exclusions list.

The investment manager excluded investments if they match one or more of the following criteria:

- Production of weapons violating fundamental humanitarian principles (antipersonnel landmines, cluster bombs and nuclear weapons),
- Severe environmental damages,
- Serious or systematic violation of human rights,
- Cases of gross corruption,
- Significant involvement in coal and tar sand-sector activities, or
- Exclusions defined by the International Labor Organization (ILO).
- What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

N/A

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

☑ Yes, the Sub-fund considers principal adverse impacts ("PAIs") on sustainability factors.

The main focus is on the following PAIs with reference to Annex I of the Commission Delegated Regulation (EU) 2022/1288. Those indicators are considered and will be monitored continuously:

○ Table 1, indicator 3 – GHG Intensity of investee companies: In addition to the monitoring of issuers' GHG intensity, Investments in companies who are involved in Coal activities are excluded.

During the reference period, investments in companies who are involved in Coal activities were excluded if one or more of the following criteria occured:

Coal-related business: more than 20% of the revenues deriving from coal; Coal power generation: more than 20% of power generated from coal; Companies with an installed coal power capacity of more than 5 GW.

Issuers classified in the restricted list were excluded and no new investment were carried in any asset class. Existing exposure (if any) included in the restricted list has been promptly sold in full.

o Table 1, indicator 10 – Violations of the UN Global Compact ("UNGC") principles and the Organisation for Economic Co-operation and Development ("OECD") Guidelines for Multinational Enterprises – through the application of the exclusion criteria, no investment can be made in funds that invest in companies where there are violations or serious suspicions of possible violations of the OECD Guidelines for Multinational Enterprises or the UNGC principles.

During the reference period, no investments have been made in funds that invest in companies where there were violations or serious suspicions of possible violations of the OECD Guidelines for Multinational Enterprises or the UNGC principles.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Issuers classified in the restricted list were excluded and no new investment were carried in any asset class. Existing exposure (if any) included in the restricted list has been promptly sold in full.

 Table 1, indicator 14 – Exposure to controversial weapons: Investments in companies whose main turnover is generated by controversial weapons are excluded.

During the reference period, no investments have been made in companies directly involved in armament and weapons that violate fundamental humanitarian principles through their normal use (cluster bombs, antipersonnel landmines, nuclear weapons, biological and chemical weapons). Issuers classified in the restricted list were excluded and no new investment were carried in any asset class. Existing exposure (if any) included in the restricted list has been promptly sold in full.

Through the application of the proprietary Sovereign Ethical Filter defined in the investment strategy below, the Sub-fund considered the following PAI indicator, with reference to Annex I of the Delegated Regulation (EU) 2022/1288:

o Table 1, indicator 16 Investee countries subject to social violation Social exclusion criteria that excluded countries who are responsible of severe violations of human rights, based on Freedom House data.

During the reference period, no investments have been made in companies directly involved in armament and weapons that violate fundamental humanitarian principles through their normal use (cluster bombs, antipersonnel landmines, nuclear weapons, biological and chemical weapons). Issuers classified in the restricted list were excluded and no new investment were carried in any asset class. Existing exposure (if any) included in the restricted list has been promptly sold in full.

□ No

What were the top investments of this financial product?

As of 31/12/2024, the top investments were as following:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/01/2024 – 31/12/2024

| | <u>Largest</u> Investment | Sector | % Assets | Country |

Asset allocation

describes the

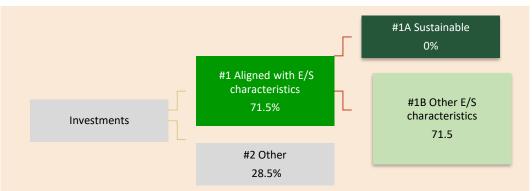

investments in

specific assets.

share of

What was the proportion of sustainability-related investments?

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| Sectors | %AuM |
|------------------------|--------|
| Funds | 54.51% |
| Financials | 16.26% |
| Derivatives | 10.64% |
| Sovereigns | 5.57% |
| Cash | 2.20% |
| Communication Services | 2.20% |
| Information Technology | 1.90% |
| Consumer Discretionary | 1.85% |
| Industrials | 1.01% |
| Real Estate | 0.92% |
| Energy | 0.92% |
| Utilities | 0.62% |
| Not Available | 0.52% |
| Health Care | 0.34% |
| Others | 0.53% |

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- capital
 expenditure
 (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

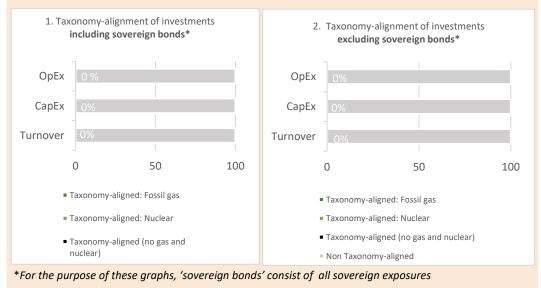

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Sub-fund does not currently commit to invest in any "sustainable investment" within the meaning of the EU Taxonomy. However, the position will be kept under review as the underlying rules are finalized and the availability of reliable data increases over time.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities? As the Sub-fund does not commit to invest any "sustainable investment" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy is therefore also set to 0%.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

N/A

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Sub-fund promotes environmental and social characteristics but does not commit to making any sustainable investments. As a consequence, the Sub-fund does not commit to a minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The "other" investments and/or holdings of the Sub-fund are comprised, directly or indirectly, of securities whose issuers did not meet the ESG criteria described above to qualify as exhibiting positive environmental or social characteristics. This includes (i) Ancillary Liquid Assets in order to cover current or exceptional payments, or for the time necessary to reinvest in eligible assets or for a period of time strictly necessary in case of unfavourable market conditions, and (ii) cash equivalents (i.e., bank deposits, Money Market Instruments, money market fund), pursuant to the Sub-fund Investment Policy, and (iii) funds and ETFs (iv) securities and derivatives not rated. No minimum environmental or social safeguards are applied to these investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

- Application of a rating upgrade approach. The average ESG rating of the Sub-fund was constantly higher than the average ESG rating of its Initial Investment Universe.
- Application of the Ethical filter The investment manager excluded investments if they match one or more of the following criteria:
 - Production of weapons violating fundamental humanitarian principles (antipersonnel landmines, cluster bombs and nuclear weapons),
 - Severe environmental damages,
 - Serious or systematic violation of human rights,
 - Cases of gross corruption,
 - Significant involvement in coal and tar sand-sector activities, or
 - Exclusions defined by the International Labor Organization (ILO)

How did this financial product perform compared to the reference benchmark?
