AXA IM EQUITY TRUST

Statement of Manager's Responsibilities

AXA Investment Managers Paris ("Manager"), as Manager of AXA IM Equity Trust (the "Trust"), is responsible for preparing the Annual Report and the financial statements in accordance with applicable Irish law and the requirements of Financial Reporting Standards ("FRS") 102 issued by the Financial Reporting Council (FRC) and promulgated by the Institute of Chartered Accountants in Ireland (Generally Accepted Accounting Practice in Ireland).

In preparing these financial statements, the Manager is required to:

- Select suitable accounting policies and apply them consistently;
- Make judgements and estimates that are reasonable and prudent;
- Prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Trust and/or its Funds will continue in operation; and
- State whether the financial statements have been prepared in accordance with the applicable accounting standards, identify those standards, and note the effect and reasons for any material departure from those standards.

The Manager is responsible for keeping adequate accounting records which disclose with reasonable accuracy at any time the financial position of the Trust and to enable it to ensure that the financial statements are prepared in accordance with accounting standards generally accepted in Ireland and comply with the provisions of the Trust Deed and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) and the Central Bank of Ireland's (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulation 2019 (collectively the "UCITS Regulations").

The Manager has appointed State Street Fund Services (Ireland) Limited (the "Administrator") for the purpose of maintaining proper accounting records. Accordingly, the accounting records are kept at State Street Fund Services (Ireland) Limited, 78 Sir John Rogerson's Quay, Dublin 2, Ireland. Under the UCITS Regulations, the Manager is also responsible for safeguarding the assets of the Trust. In this regard it has entrusted the assets of the Trust to State Street Custodial Services (Ireland) Limited (the "Trustee") for safekeeping in accordance with the Trust Deed. The Manager is also responsible with respect to its duties under the UCITS Regulations to take reasonable steps for the prevention and detection of fraud and other irregularities.

The Manager is responsible for the maintenance and integrity of the corporate and financial information included on the AXA Investment Managers UK Limited's ("Investment Manager") website. Legislation in the Republic of Ireland governing the preparation and dissemination of the financial statements may differ from legislation in other jurisdictions.

Transactions with Connected Persons

In accordance with Regulation 43 of the UCITS Regulations "Restrictions of transactions with connected persons" states that "A responsible person shall ensure that any transaction between a UCITS and a connected person is conducted a) at arm's length, and b) in the best interest of the unit-holders of the UCITS". Such transactions must be in the best interests of the Trust's Unitholders.

Unitholders should refer to the Prospectus which identifies in the Conflicts of Interest section, many of the transactions with connected persons and the general nature of the contractual arrangements with the principal connected persons but it is not exhaustive of all transactions with connected persons.

As required under UCITS Regulation 81.4, the Board of Directors of the Manager, as responsible persons, are satisfied that there are arrangements in place, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 43(1) are applied to all transactions with a connected person; and all transactions with connected persons that were entered into during the period to which the report relates, complied with the obligations that are prescribed by Regulation 43(1).

The Board of Directors is not aware of any transactions with connected persons during the year ended March 31, 2025, other than those disclosed in these financial statements.

Note 12 to the financial statements details related party transactions in the period as required by the financial reporting standards. However, Unitholders should understand that not all "connected persons" are related parties as such latter expression is defined by those financial reporting standards. Details of fees paid to related parties and certain connected persons are set out in Notes 5 and 12 to the financial statements.

The following transactions are transactions with connected persons:

- Foreign exchange transactions with State Street Bank and Trust Company;
- Equity transactions with State Street Corporation;
- Stock lending activity with AXA Investment Managers GS Limited as agent for the Manager;
- Belgian paying agent fees paid to AXA Bank Europe SA and
- the production of Key Information Documents in respect of the Fund by Deloitte Luxembourg.

AXA IM EQUITY TRUST

Trustee's Report to the Unitholders of AXA IM Equity Trust

Report of the Trustee to the Unitholders of AXA IM Equity Trust

We have enquired into the conduct of the Manager in respect of AXA IM Equity Trust for the year ended March 31, 2025, in our capacity as Trustee to the Trust.

This report including the opinion has been prepared for and solely for the Unitholders in the Trust, in accordance with Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations, and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Trustee

Our duties and responsibilities are outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations. One of those duties is to enquire into the conduct of the Manager in each annual accounting period and report thereon to the Unitholders.

Our report shall state whether, in our opinion, the Trust has been managed in that period in accordance with the provisions of the Trust's Trust Deed and the UCITS Regulations. It is the overall responsibility of the Manager to comply with these provisions. If the Manager has not so complied, we as Trustee must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Trustee Opinion

The Trustee conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations and to ensure that, in all material respects, the Trust has been managed (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of the Trust Deed and the appropriate regulations and (ii) otherwise in accordance with the Trust's constitutional documentation and the appropriate regulations.

Opinion

In our opinion, the Trust has been managed during the year, in all material respects:

(i) in accordance with the limitations imposed on the investment and borrowing powers of the Manager and the Trustee by the Trust Deed, by the UCITS Regulations and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019, (the "Central Bank UCITS Regulations"); and

(ii) otherwise in accordance with the provisions of the Trust Deed, the UCITS Regulations and the Central Bank UCITS Regulations.

Independent auditors' report to the unitholders of the Funds of AXA IM Equity Trust

Report on the audit of the financial statements

Opinion

In our opinion, AXA IM Equity Trust's financial statements:

- give a true and fair view of the Funds' assets, liabilities and financial position as at 31 March 2025 and of their results for the year then ended;
- have been properly prepared in accordance with Generally Accepted Accounting Practice in Ireland (accounting standards issued by the Financial Reporting Council of the UK, including Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" and Irish law); and
- have been properly prepared in accordance with the requirements of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended).

We have audited the financial statements, included within the Annual Report and Audited Financial Statements, which comprise:

- the Statement of Financial Position as at 31 March 2025;
- the Statement of Comprehensive Income for the year then ended;
- the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Units for the year then ended;
- the Schedule of Investments for each of the Funds as at 31 March 2025; and
- the notes to the financial statements for each of the Funds, which include a description of the accounting policies.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) ("ISAs (Ireland)") and applicable law.

Our responsibilities under ISAs (Ireland) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the Trust in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, which includes IAASA's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Conclusions relating to going concern

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Funds' ability to continue as a going concern for a period of at least twelve months from the date on which the financial statements are authorised for issue.

In auditing the financial statements, we have concluded that the manager's use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the Funds' ability to continue as a going concern.

Our responsibilities and the responsibilities of the manager with respect to going concern are described in the relevant sections of this report.

Reporting on other information

The other information comprises all of the information in the Annual Report and Audited Financial Statements other than the financial statements and our auditors' report thereon. The manager is responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion on, except to the extent otherwise explicitly stated in this report, any form of assurance thereon. In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

Responsibilities for the financial statements and the audit

Responsibilities of the manager for the financial statements

As explained more fully in the Statement of Manager's Responsibilities set out on page 2, the manager is responsible for the preparation of the financial statements in accordance with the applicable framework giving a true and fair view.

The manager is also responsible for such internal control as the manager determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the manager is responsible for assessing the Funds' ability to continue as going concerns, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the manager intends to cease operations, or has no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Our audit testing might include testing complete populations of certain transactions and balances, possibly using data auditing techniques. However, it typically involves selecting a limited number of items for testing, rather than testing complete populations. We will often seek to target particular items for testing based on their size or risk characteristics. In other cases, we will use audit sampling to enable us to draw a conclusion about the population from which the sample is selected.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA website at:

https://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8f-a98202dc9c3a/Description_of_auditors_responsibilities_for_audit.pdf.

This description forms part of our auditors' report.

Use of this report

This report, including the opinion, has been prepared for and only for the unitholders of each of the Funds as a body in accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

AXA IM EQUITY TRUST

Investment Manager's Report (unaudited)

Summary

Investment Manager's Report for each sub-fund ("Fund" or "Funds") is disclosed on pages 7 to 36.

All performance commentary is based on the performance of the primary A share class of each Fund in the Fund's base currency over the review period. Relative performance is therefore net of all fees and expenses.

Performance calculations are net of fees, based on the reinvestment of dividends.

The benchmark, when there is one could be calculated on the basis of net or gross dividend. Please refer to the Prospectus for more information.

Data Source: Benchmark prices are obtained from the relevant benchmark provider. Net Asset Values ("NAVs") are calculated by the Administrator of the Trust.

The historical performance is not an indicator of the current or future performance. Commissions and costs incurred when issuing and redeeming of units are not taken into account.

AXA IM ALL COUNTRY ASIA PACIFIC EX-JAPAN SMALL CAP EQUITY QI

Investment Manager's Report (unaudited) As at March 31, 2025

Asia Pacific smaller companies kept pace with Global Emerging Market smaller companies over the period in review, with both ending the period a little below where they started. Asia Pacific small cap companies underperformed developed market small cap companies, which were buoyed by the strength of European small cap companies. Asia Pacific small cap companies held up well until the re-election of President Trump in the US where protectionist policies and rhetoric led to Global Emerging Market and Asia Pacific small companies to reverse course.

In this backdrop the Fund delivered positive absolute returns and outperformed its benchmark by a significant margin. From a factor standpoint, the Fund's focus on companies with positive earnings and price momentum was rewarded, as was exposure to companies with attractive valuations and those with high earnings quality.

From a country standpoint, the Fund benefitted from the modest active risk positions taken, including the overweight allocation to international Chinese companies and being slightly underweight the Indian and Thai markets.

At the industry level the Fund benefitted from its overweight exposure to the Gold industry and underweight exposure to Chemicals industries. Outweighing the negative return contribution from being overweight the Pharmaceuticals and Life Sciences industry.

Stock selection also contributed positively in most sectors – particularly in the materials, information technology and healthcare sectors. A position in Chinese biotechnology company 3SBio delivered the strongest contribution to performance over the period under review as the share price skyrocketed in anticipation of strong annual results and analyst earnings upgrades. Australian buy-now-pay-later company Zip Co. was also a strong contributor over the period as it showed a turnaround in the business from prior years and announcing a strategic partnership with US technology payment company Stripe.

Performance Summary

Performance summary – Class A Units	Fiscal year 2024/2025	3 Years Annualised	5 Years Annualised	Inception Date
AXA IM All Country Asia Pacific Ex-Japan Small Cap Equity QI (USD)	3.28%	4.43%	17.64%	30-Sept-99
MSCI AC Asia Pacific Ex-Japan Small Cap	0.11%	0.18%	14.90%	
Alpha	3.17%	4.25%	2.74%	

Performance calculations are net of fees, based on the reinvestment of dividends.

The benchmark, when there is one could be calculated on the basis of net or gross dividend. Please refer to the Prospectus for more information.

Data Source: Benchmark prices are obtained from the relevant benchmark provider. NAV is calculated by the Administrator of the Trust.

The historical performance is not an indicator of the current or future performance. Commissions and costs incurred when issuing and redeeming of units are not taken into account.

AXA IM EUROBLOC EQUITY

Investment Manager's Report (unaudited) As at March 31, 2025

Eurobloc equities finally delivered positive returns over 1 year thanks to an acceleration over the last quarter. During the first 9 months, softening inflation opened the door for a more accommodative monetary policy from central banks, worries over a greater than expected weakening of the economy has started to pop up here and there especially on discretionary consumption and on technology across the globe. In Europe side to the persistent German PMIs weakness, the political uncertainty come back after French parliament dissolution has also contributed to make the European landscape even more complicated. From January, investor sentiment shifted totally on the back of increasing worries around Trump's economics on US GDP, while in Europe, the new coalition was announcing a massive support plan.

Despite positive sector allocation thanks to the Utility Overweight and Energy consumer discretionary underweights, the Fund underperformed, penalized partly by the underweight on German names such as SAP, Rheinmetal, Siemens and Siemens Energy. It is worth noting that the underperformance has started with US elections. While we thought that the Trump victory was opening a window of massive uncertainty, we wanted to increase the visibility and the earning predictability, increasing the long duration component of the portfolio through Utilities or consumer staples. This has proven to be detrimental with the raising interest on the back of inflation worries.

Quarterly results published so far by European groups are mostly above consensus expectations, with the help of anticipatory purchases ahead of the application of higher tariffs. In any case, the market is revising downwards its earnings estimates for the current year, due on the one hand to the sharp depreciation of the US dollar in the first quarter, which should penalize exporting groups, and on the other hand to the increase in the probability of an economic recession starting in the United States.

At this stage, it is important to remain balanced in our exposures, while favouring companies with good earnings predictability, because, as we saw during the month of May, the markets react violently to negative news but are quick to hope for a quick resolution of problems and to recover just as quickly. We remain faithful to our investment strategy by focusing on companies that combine the ability to adjust prices, have visibility and/or growth prospects through exposure to long-term themes, as well as a solid financial structure.

Performance Summary

Performance summary – Class A Units	Fiscal year 2024/2025	3 Years Annualised	5 Years Annualised	Inception Date

AXA IM GLOBAL EMERGING MARKETS EQUITY QI

Investment Manager's Report (unaudited) As at March 31, 2025

Global Emerging Markets delivered stronger returns than their developed market counterparts over the period in review. Markets reacted favourably to the bold stimulus package from China towards the end of 2024, lowering interest rates and injecting liquidity into the banking system. Despite increased market volatility brought on by the election of President Trump in the US and his protectionist trade policies, Emerging Markets withstood the volatility and recovered as Chinese tech stocks rallied in 2025 on the back of the release of AI app DeepSeek challenging the dominance of the US tech giants in the AI space.

Against this backdrop the Fund increased in value and delivered positive active returns relative to the benchmark over the period in review.

From a factor standpoint, the Fund's focus on companies with positive earnings and price momentum, and companies with attractive valuations were well-rewarded, as was the Fund's exposure to companies with high earnings quality.

From a country standpoint, the Fund benefitted from the modest active risk positions taken. Overweight allocation to domestic Chinese companies was rewarded, as was being slightly under-exposed to the South Korean and Indonesian markets.

At the industry level the Fund benefitted from its overweight exposure to the IT Services and Software industry, but being underweight the Internet Software and Services, and Gold industries weighed negatively on returns over the period.

At the stock level, a nil position in Tencent provided the Fund with its largest negative contributor. The stock is excluded for ESG considerations but performed well over the period as it executed a HK\$100 billion share buyback plan, and was buoyed alongside other Chinese tech companies in early 2025 with the release of AI app DeepSeek. The Fund benefitted from its exposure to Emerging Market banks, including Turkiye Garanti Bankasi, Standard Bank, China Construction Bank and CIMB Group Holdings.

AXA IM GLOBAL EQUITY QI

Investment Manager's Report (unaudited) As at March 31, 2025

Global equities delivered positive returns over the period under review. This period was marked by a significant evolution in market dynamics, transitioning from concentrated leadership dominated by technology stocks through much of 2024 to a broader, more defensive posture and a notable rotation away from US equities and technology in the first quarter of 2025.

Against this backdrop the Fund increased in value but underperformed its benchmark over the period after the application of fees and expenses. The fundamental risk factor profile of the Fund was rewarded, particularly the Fund's exposure to companies with positive earnings and price momentum. The Fund's tilt towards stocks trading on attractive valuations contributed positively to returns, while exposure to profitable companies with strong balance sheets was not rewarded over the period.

Country exposures contributed positively to returns, supported by overweight exposure to Singapore and underweight exposures to France and the UK over this period.

Among industries, the Fund benefitted from its above benchmark exposure within Insurance and IT services and software industries, but was hurt from being underexposed to the Aerospace and Defense industries and over-exposed to Automobiles and Components. Industry exposure was not rewarded overall.

Stock selection weighed particularly negatively on returns. For most of the period under review the Fund suffered from the narrow leadership in market returns, problematic in the context of a highly diversified portfolio. In particular, underweight positions to some of the largest US names such as Tesla, Broadcom and Amazon held back returns. Elsewhere positions in Japanese automobile companies including Mazda Motor, Nissan Motor, Subaru Corporation detracted as they announced weak earnings outlooks in the backdrop of weak global demand, increased competition from Chinese rivals and the overhang of policy uncertainty in the US arising from President Trump's protectionist rhetoric.

AXA IM GLOBAL SMALL CAP EQUITY QI

Investment Manager's Report (unaudited) As at March 31, 2025

Smaller companies perceived as being more sensitive to macroeconomic risk, lagged their larger cap peers. The benchmark over the period in review delivered slightly negative absolute returns. European small caps outperformed US small caps over the period, holding up better in 2025 with the US market selling off as Donald Trump's return to the White House brought with it a new era of geopolitical tension, trade wars, and economic concern.

Nevertheless, the Fund delivered positive absolute returns and strongly positive active returns driven by stock selection and exposures to style factors. From a factor standpoint, the Fund's focus on companies with positive earnings and price momentum, companies with attractive valuations and with high earnings quality were all well-rewarded.

Country exposures detracted from returns. While being under-exposed to Denmark and Australia was rewarded, being underweight Israel and Singapore weighed more heavily on returns over the period.

Among industries, the Fund benefitted from its above benchmark exposure within Gold and IT services and software industries, but was hurt from being underexposed to the Aerospace and Defense industries and over-exposed to Consumer Durables and Apparel. Industry exposure was rewarded overall.

Stock selection was strongly rewarded, and proved particularly strong among Information Technology and Healthcare sectors. In the former, the Fund benefitted from software companies, particularly off-benchmark position AppLovin Corp. (a software-based platform for advertisers to enhance the marketing and monetization of their content) which saw very strong revenue growth, beating the high end of management's guidance and surpassing market estimates by a considerable margin. In the latter, the Fund benefitted from exposure to the biotechnology industry, including owning United Therapeutics and Biogen.

AXA IM JAPAN EQUITY

Investment Manager's Report (unaudited) As at March 31, 2025

Japanese equities were largely flat over the reporting period, although there was significant volatility during the year. Concerns over monetary tightening in Japan and the direction of the Yen created headaches for investors and flows into Japan reversed. This had largely run its course by the end of the reporting year and we remain confident on the medium term outlook for Japanese equities as valuations are low and the self help stories of share buybacks and rising shareholder returns continue.

The Japanese holdings in the Fund kept up with the market rally in the period and actually outperformed over the annual term. Sampo, the non-life insurance company mentioned above, rose on its plans to sell down its cross holdings. Semiconductor equipment maker Tokyo Electron, rose on optimism for a pick-up in orders. They also mentioned to us recently about a promising new product line in cryogenic semiconductor processing equipment. This ultra-low temperature process allows for a faster throughput, and the company is confident that it can regain market share as a result of this new innovation.

The portfolio has a number of financial positions including non-life insurance group Sampo, Orix, a financial leasing business, and Resona Bank. All have been performing well reflecting the strength in the broader financial sector. Interest rates are still expected to rise as inflation becomes more entrenched in Japanese consumers' minds. We would expect further outperformance of Financial stocks with this backdrop.

Technology related names also delivered good returns for the Fund. Tokyo Electron, the leading Japanese semiconductor equipment maker in Japan rose sharply in the first half of the year. As valuations became stretched, we switched into back end, testing company Advantest. It had done extremely well last year after a stunning rally but had seen a more muted performance during the early part of the period. Given the strong outperformance of Tokyo Electron, we took the opportunity to switch back into Advantest, which we believe will deliver positive surprises in coming earnings announcements.

AXA IM JAPAN SMALL CAP EQUITY

Investment Manager's Report (unaudited) As at March 31, 2025

Overall the Japanese small cap market delivered a small rise in local currency terms during the reporting period. The confidence in Japanese equities took a knock in the summer of 2024 as investors panicked over the outlook for Japanese interest rates. The flash crash that followed has taken a number of months to see flows into Japanese equities show signs of recovery. We remain comfortable with valuation levels and would expect sentiment to improve into the new fiscal period.

The performance over the first half part of the reporting year remained difficult due to the growth bias in the strategy. We took the decision to reconstruct the stock holdings during the second half of the year in order to try and recover some of the lost ground of the last three years. To this end, the style of the portfolio has become more valuation aware, essentially a Growth At A Reasonable Price Approach. Also, we have reduced all sector biases, meaning that the risk in the portfolio is mostly at the stock level and not based on specific sector biases. For example, financials including banks, REITs, and a number of industrial areas were historically major underweights in the Fund. This has now changed and we have brought sector bets to an almost neutral level. The intention going forward is to maintain a large degree of sector neutrality, and focus on stock picking. Early results heading into 2025 have been encouraging, and we hope to update at the next review with better news regarding performance improvements.

Among specific stock examples added to the Fund, we would like to highlight several areas of change: Furukawa Electric and Fujikura are two examples of companies with a leading position in optical components that are used in data centre construction. This area has seen strong growth as the World has seen an increasing focus on supporting infrastructure to help the spread of Artificial Intelligence investment. Both Furukawa and Fujikura are at the forefront in terms of their market share in this space and the stocks look attractive still on a valuation perspective.

Another area of investment where previously the Fund was underweight is in the financial area. Specifically we have added to two banks: Rakuten Bank and SBI Sumishin Net Bank are two banks that are seen as disruptors to the traditional banking model in Japan. They both benefit from their lower cost base and high customer evaluations. There is also added sensitivity to the ongoing rise in Japanese interest rates, and we have high optimism for their ability to grow profits over the coming three years.

Real Estate Investment Trusts are another area more broadly in financials that we have bought into for the first time in the history of the Fund. Historically this was a major underweight for the portfolio, but actually REITs offer significant dividend attractions as well as coming at low valuations. Performance has been relatively weak over the last three years as interest rate expectations have been rising. However, we see this juncture as a good entry point into the sector and have added several names in this space.

Performance Summary

Performance summary – Class A Units	Fiscal year 2024/2025	3 Years Annualised	5 Years Annualised	Inception Date

AXA IM PACIFIC EX-JAPAN EQUITY QI

Investment Manager's Report (unaudited) As at March 31, 2025

The Pacific ex Japan region rose and kept up with global equity markets over the period in review, outperforming other developed European markets. Singapore was the strongest market over the period, while New Zealand was the weakest.

In this context, the Fund increased in value but underperformed its benchmark over the period under review. From a factor standpoint, the Fund's focus on companies with positive earnings and price momentum was rewarded, while exposure to companies with attractive valuations and those with high earnings quality were not.

At the industry level the Fund benefitted from its overweight exposure to the Gold and Insurance industries, despite underweight exposure to Telecommunication Services weighing on returns over the period.

Stock selection was strong in the materials, healthcare and consumer sectors, though it was weak in the communication services, industrials and real estate sectors. Underweight exposure to the communication services and industrials sectors also weighed negatively on returns. The Fund benefitted from its overweight allocation in Singaporean bank DBS Group as the stock benefitted from strong earnings announcements and a share buyback program designed to return capital to investors. Conversely, taking an underweight position in Singaporean Sea Ltd was the largest negative contributor over the period. Sea operates Shopee, the largest e-commerce platform in Southeast Asia, in addition to digital-payments provider SeaMoney and Garena, a global online games developer. The stock delivered accelerating growth in its core businesses benefiting from domestic consumption in Southeast Asia, including in its e-commerce business which struggled in prior years.

Performance Summary

AXA IM US ENHANCED INDEX EQUITY QI

Investment Manager's Report (unaudited) As at March 31, 2025

US equities rose over the period. The US market was buoyed for much of 2024 by a combination of positive macro conditions, expectations of falling interest rates and ongoing positive AI sentiment driving strong returns in technology and parts of the consumer discretionary market. This optimism was pared back in early 2025 as Donald Trump's return brought with it a new era of political tension, trade wars and economic concern. While markets were buoyed at first by hopes of deregulation and a business-friendly administration, the mood soured as President Trump ramped up protectionist trade policies.

In this context, the Fund increased in value but underperformed its benchmark over the period under review, driven by weak stock contribution. From a factor standpoint, the Fund's focus on companies with positive earnings and price momentum was rewarded, while exposure to companies with attractive valuations and those with high earnings quality were not rewarded.

At the industry level the Fund benefitted from its overweight exposure to the IT Services and Software, and Communications Equipment industries, despite underweight exposure to the Aerospace and Defense, and Banks industries weighing on returns over the period.

Stock selection though held back returns and was the primary driver of the underperformance of the benchmark over the period in review. While stock selection struggled to add value across most sectors, it was particularly weak in the Consumer Staples, Consumer Discretionary and Energy sectors. Not owning tobacco manufacturer Philip Morris International for ESG reasons was the largest single negative contributor over the period. Walgreens Boots Alliance was the second most significant detractor over the period in review. The consumer company has saw significant share price weakness following a cut in profits, store closures and an increase in margin pressure.

AXA IM US EQUITY QI

Investment Manager's Report (unaudited) As at March 31, 2025

US equities rose over the period. The US market was buoyed for much of 2024 by a combination of positive macro conditions, expectations of falling interest rates and ongoing positive AI sentiment driving strong returns in technology and parts of the consumer discretionary market. This optimism was pared back in early 2025 as Donald Trump's return brought with it a new era of political tension, trade wars and economic concern. While markets were buoyed at first by hopes of deregulation and a business-friendly administration, the mood soured as President Trump ramped up trade tariffs.

In this context, the Fund increased in value but underperformed its benchmark over the period under review, driven by weak stock contribution. From a factor standpoint, the Fund's focus on companies with positive earnings and price momentum was rewarded, while exposure to companies with attractive valuations and those with high earnings quality were not rewarded.

At the industry level the Fund benefitted from its overweight exposure to the IT Services and Software, and Communications Equipment industries, despite underweight exposure to the Aerospace and Defense, and Banks industries weighing on returns over the period.

Stock selection though held back returns and was the primary driver of the underperformance of the benchmark over the period in review. While stock selection struggled to add value across most sectors, it was particularly weak in the Consumer Staples, Financials and Industrials sectors. An underweight exposure to Broadcom was the largest single negative contributor over the period. The company's earnings announcement at the end of 2024 surprised the market with just how greatly the company was benefitting from the AI revolution and customised chip designs with an expanding client base. Elsewhere, positions Merck & Co and Baxter International operating in the more defensive healthcare sector detracted as Merck cut earnings projections to account for acquisition costs and weak sales of its human papillomavirus vaccine Gardasil due to lower sales in China, and Baxter International cut dividends due to concerns about financial leverage following the Hill-Rom acquisition and a weakening renal business.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended March 31, 2025

1. Organisation

AXA IM Equity Trust (the "Trust") was created on September 17, 1999 as an open-ended umbrella structure Unit Trust with segregated liability between its sub-funds ("Fund" or "Funds") under a Deed of Trust and is authorised by the Central Bank of Ireland (the "Central Bank") as an Undertaking for Collective Investment in Transferable Securities ("UCITS"). The Trust may be divided into different Funds with one or more class of unit. Creation of any new Fund or class of unit will require the prior approval of the Central Bank.

The following Funds were trading during the year ended March 31, 2025:

AXA IM All Country Asia Pacific Ex-Japan Small Cap Equity QI
AXA IM Eurobloc Equity
AXA IM Global Emerging Markets Equity QI
AXA IM Global Equity QI
AXA IM Global Small Cap Equity QI
AXA IM Japan Equity
AXA IM Japan Small Cap Equity
AXA IM Pacific Ex-Japan Equity QI
AXA IM US Enhanced Index Equity QI
AXA IM US Equity QI

2. Significant Accounting Policies

Basis of Preparation

These annual audited Financial Statements have been prepared in accordance with Financial Reporting Standard 102 ("FRS 102") and Irish statute comprising the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) and the Central Bank's (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings For Collective Investment In Transferable Securities) Regulations 2019 (collectively the "UCITS Regulations"). The Financial Statements have been prepared on a going concern basis.

The Trust has continued to avail of the exemption available to open-ended investment funds ("IF") under FRS 102 and is not presenting a Cash Flow Statement.

Critical Accounting Estimates and Assumptions

Management makes fair value estimation and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results.

The principal accounting policies and estimation techniques applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated in the following text.

Accounting Period

The accounting period end is March 31 each year. These financial statements cover the twelve month period to March 31, 2025.

Historical Cost Convention

The financial statements have been prepared under the historical cost convention as modified by the revaluation of financial assets and financial liabilities (including derivative financial instruments) at fair value through profit or loss.

Financial Instruments

(i) Classification

The Trust classifies its investments in equity securities as financial assets or financial liabilities at fair value through profit or loss. These financial assets and financial liabilities are designated by the Board of Directors of the Manager at fair value through profit or loss at inception. Derivatives (forwards) are classified as held for trading. Financial assets and financial liabilities designated at fair value through profit or loss at inception are those that are managed and their performance evaluated on a fair value basis in accordance with the Trust's documented investment strategy. The Trust's policy is for the Investment Manager and the Directors of the Manager to evaluate the information about these financial assets or financial liabilities on a fair value basis together with other related financial information.

(ii) Recognition/Derecognition

The Trust recognises financial assets and financial liabilities on the date it becomes a party to the contractual provisions of the instrument. A regular purchase of financial assets is recognised using trade date accounting. From this date any gains and losses arising from changes in fair value of the financial assets or financial liabilities are recorded.

Financial instruments are derecognised when the rights to receive cash flows from the investments have expired or the Trust has transferred substantially all risks and rewards of ownership.

(iii) Measurement

Financial assets and financial liabilities at fair value through profit and loss are measured initially at fair value (transaction price). Subsequent to initial recognition, all financial assets and financial liabilities are classified at fair value through profit or loss.

Gains and losses arising from changes in the fair value of the financial assets or financial liabilities at fair value through profit or loss category are presented in the Statement of Comprehensive Income in the period in which they arise. Dividend income from financial assets at fair value through profit or loss is recognised in the Statement of Comprehensive Income within dividend income when the Trust's right to receive payments is established.

(iv) Fair Value Estimation

Financial Instruments Traded in Active Markets

The fair value of financial instruments traded in active markets (such as publicly traded derivatives and trading securities) is based on quoted market prices at the Statement of Financial Position date. The quoted market price used for financial assets held by the Trust is the closing mid-market price.

IF

Investments in IF are valued at the unaudited fair value for the units obtained from the administrator of the IF. The change in the NAV of these units is recognised within net (loss)/gain on investments and foreign currency in the Statement of Comprehensive Income (calculated by reference to the unaudited NAV on the valuation date as calculated by the administrator of the IF).

NOTES TO THE FINANCIAL STATEMENTS

For the year ended March 31, 2025

2. Significant Accounting Policies (continued)

Financial Instruments that are not Quoted or Listed

The Funds may, from time to time, hold financial instruments that are not quoted, listed or normally dealt in on a regulated market such as over-the-counter derivatives. Fair values of such instruments are determined by using valuation techniques estimated by a competent person, firm or association making a market in such investments (approved for the purpose by State Street Custodial Services (Ireland) Limited (the "Trustee")).

(v) Forward Foreign Currency Exchange Contracts

A forward foreign currency exchange contract is a commitment between a Fund and a counterparty to make or take delivery of a fixed amount of a specified foreign currency at a predetermined future date at a specific price. At each valuation, the difference between the contract price and the current forward rate for contracts of the same maturity is used to calculate the unrealised gain or loss of the Fund's forward currency exchange contracts. The counterparty for forward foreign currency exchange contracts is State Street Bank and Trust Company.

Foreign Exchange Translation

(a) Functional and Presentation Currency

The functional and presentation currency of each Fund is the base currency of each Fund which is determined by the Manager and will be described in the relevant Fund details in the Prospectus. Items included in the Funds' financial statements are measured using the currency of the primary economic environment in which it operates (the "functional currency"). The functional currency, which is either United States Dollar ("USD"), Euro ("EUR") or Japanese Yen ("JPY"), is shown in the Statement of Financial Position for each of the Funds.

(b) Transactions and Balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the Statement of Comprehensive Income.

Proceeds from subscriptions and amounts paid on redemption of redeemable participating preference units are translated at the exchange rates at the date of the actual trade.

Cash at Bank and Bank Overdraft

Cash at bank and bank overdrafts, which include cash in hand and overdraft facilities, are held with State Street Bank and Trust Company. The cash balances used for collection of subscriptions, payment of redemptions and dividends for the Trust that were redesignated, and are deemed assets of the Trust are held with Bank of America Merrill Lynch.

Transaction Costs

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the Fund had not acquired, issued or disposed of the financial instrument. When a financial asset or financial liability is recognised initially, a Fund shall measure it at its fair value through profit or loss plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Transaction costs on forwards cannot be practically or reliably gathered as they are embedded in the transaction and cannot be separately verified or disclosed. Transaction costs on the purchase and sale of equity investments are included in net (loss)/gain on investments and foreign currency in the Statement of Comprehensive Income.

Custody transaction costs include transaction costs paid to the sub-custodian and are included in the Statement of Comprehensive Income. Purchases and sales transaction costs include identifiable brokerage charges, commissions, transaction related taxes and other market charges.

Redeemable Participating Units

The NAV per unit of each Fund is determined by dividing the NAV of the relevant class of units in the relevant Fund by the total number of units outstanding in the relevant class of units of the relevant Fund in issue.

Redeemable participating units are redeemable at the Unitholders option and are classified as financial liabilities. The redeemable participating units can be put back to the Trust at any time for cash equal to a proportionate unit of the Trust's NAV. The redeemable participating units are carried at the redemption amount that is payable at the Statement of Financial Position date if the unitholder exercises the right to put the units back to the Trust.

Redeemable participating units are issued and redeemed at the holder's option at prices based on the Trust's NAV per unit at the time of issue or redemption.

The Unitholders are entitled to payment of the proportionate unit value based on the Trust's NAV per unit on the redemption date and with the exception of accumulating units, they are entitled to dividends. The movement in net assets from operations attributable to holders of redeemable participating units, issue and redemption of redeemable units during the year are shown on the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Units.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended March 31, 2025

2. Significant Accounting Policies (continued)

Dilution and Swing Pricing

In certain circumstances, and at the Manager's discretion, the Manager applies a dilution adjustment in the calculation of the subscription and redemption price, a policy known as "swing pricing". The level of a dilution adjustment for each Fund is calculated using an estimate for duties and charges and spreads that may accrue to the Fund when buying or selling investments to satisfy net purchases or redemptions of units. The need to make a dilution adjustment for a Fund will depend on the volume of purchases or redemptions of units in the Fund on any given dealing day. There was no swing pricing applied by any Fund as at the financial year ended March 31, 2025 and the year ended March 31, 2024.

Income and Expenses

Dividend income arising from investments is credited to the Statement of Comprehensive Income on an ex-dividend basis. Interest income is accrued on an effective yield basis. Dividend income is shown gross of any non-recoverable withholding taxes, which are disclosed separately in the Statement of Comprehensive Income and net of any tax credits.

Securities lending income is received net of fees and is recognised in the Statement of Comprehensive Income. Income receivable on securities lending activities is accounted for on an accruals basis.

Other income is recognised in the Statement of Comprehensive Income and is accounted for on an accruals basis.

Administration fees, Management fees, Trustee fees and other expenses, as applicable, are accounted for on an accruals basis.

Taxation

The Funds currently incur withholding taxes imposed by certain countries on dividends and other investment income and capital gains taxes. Such income or gains are recorded gross of the taxes in the Statement of Comprehensive Income. Withholding taxes and capital gains taxes are shown as separate items in the Statement of Comprehensive Income.

3. Management

The Manager of the Trust is AXA Investment Managers Paris. Under the Trust Deed, the Manager is entitled to fees, details of which are contained in Note 5.

The Manager has delegated the performance of the investment management functions of the Trust to the Investment Manager, who in turn has outsourced some of these functions to the Sub-Investment Managers, details of which are contained in Note 5 to the financial statements.

NOTES TO THE FINANCIAL STATEMENTS

NOTES TO THE FINANCIAL STATEMENTS

For the year ended March 31, 2025

5. Fees and Expenses

Management Fees

The Manager has entered into a Trust Deed with the Trustee. Under this Trust Deed, the Manager is entitled to a fee expressed as a percentage of the daily NAV of each respective unit class for the period where the relevant unit class was active during the year, which is calculated daily and payable monthly in arrears. The Manager will be responsible for discharging, from this fee, all fees of the Investment Manager (who will in turn, discharge from its fees, the fees of any sub-investment managers). The out of pocket expenses of the Manager, Investment Manager and Sub-Investment Managers will be borne by the Trust.

The annual rates below apply to the year ended March 31, 2025

NOTES TO THE FINANCIAL STATEMENTS

For the year ended March 31, 2025

5. Fees and Expenses (continued)

Administration Fees

State Street Fund Services (Ireland) Limited, the Administrator, shall be entitled to a fee calculated as a percentage per annum of the NAV of each Fund paid out of the assets of the applicable Fund. This annual fee is calculated based upon each Fund's daily average net assets and payable monthly in arrears in an amount of 0.03% for those Funds with less than USD100 million of average net assets. For those Funds with over USD100 million of average net assets, the rate is 0.0365% on the first USD200 million of average net assets, 0.02% on the next USD300 million of average net assets and 0.01% of average net assets above USD500 million.

The Administrator shall also be entitled to receive a transfer agency fee of USD10 for each automated, or USD25 for each manual, transfer agency transaction including each subscription, redemption, transfer, conversion and distribution.

The Administrator shall also be entitled to be reimbursed for all properly vouched reasonable expenses incurred by the Administrator on behalf of the Trust.

Transaction Costs

For the years ended March 31, 2025 and March 31, 2024 each Fund incurred transactions costs, as defined in Note 2 to the financial statements as follows:

Fund	Currency	Transaction Costs for the year ended March 31, 2025	Transaction Costs for the year ended March 31, 2024
AXA IM All Country Asia Pacific Ex-Japan Small Cap Equity QI	USD	363,648	302,494
AXA IM Eurobloc Equity	EUR	108,143	56,298
AXA IM Global Emerging Markets Equity QI	USD	296,670	237,866
AXA IM Global Equity QI	USD	753,140	590,791
AXA IM Global Small Cap Equity QI	USD	146,772	58,238
AXA IM Japan Equity	JPY	12,125,544	5,613,926
AXA IM Japan Small Cap Equity	JPY	4,117,434	3,626,580
AXA IM Pacific Ex-Japan Equity QI	USD	126,341	114,888
AXA IM US Enhanced Index Equity QI	USD	337,051	332,295
AXA IM US Equity QI	USD	108,673	254,716

Distribution Fees

The Manager has appointed the Investment Manager as Master Distributor for the Trust. The Distributor is entitled to a distribution fee in respect of all the active classes of units (except for class E), which will be payable by the Manager out of its own assets. The fee payable in respect of class E units shall be payable out of the assets attributable to the class E units of the relevant Fund only. This distribution fee is calculated daily and paid monthly in arrears, at an annual rate of up to a maximum of 0.75% per annum on the relevant Units and calculated on the average daily NAV of the relevant units.

6. Distributions

The Directors of the Manager are empowered to declare dividends on any class of units in respect of any Fund. Generally, it is intended that the classes of units shall be accumulating classes and, therefore, it is not intended to distribute dividends to Unitholders in these classes. In the absence of such a declaration, the net revenue from these classes will be accumulated and reinvested on behalf of Unitholders.

The Administrator fee will not be more than 0.25% of average net assets per annum.

Trustee and Custody Fees

The Trustee shall be entitled to fees calculated as a percentage per annum of the NAV of each Fund payable out of the assets of each Fund based on the average NAV of each Fund of 0.01% of average net assets per annum, which is calculated daily and payable monthly in arrears.

The Trustee shall be entitled to be reimbursed for all agreed sub-custodian fees, expenses and transaction charges (which will be charged at normal commercial rates), together with reasonable and properly vouched out-of-pocket expenses incurred by the Trustee in the performance of its duties under the Trust Deed out of the assets of each Fund.

However, the Directors may create classes of units that are distributing units. In respect of these units, the Directors have resolved that distributions should be paid out of the interest and dividends earned by the relevant Funds, which are attributable to the relevant distributing unit class. These dividends will be declared and paid as set out in the relevant Funds' details (in the Trust's Prospectus) which will also set out the relevant distribution dates and payment frequencies. Any distribution or other monies payable in respect of any unit (excluding any fees) will be paid by CHAPS, SWIFT, telegraphic or federal wire transfer to the bank account of the relevant unitholder as indicated on the Application Form for the units or as otherwise advised or agreed between the Manager and the unitholder.

7. Soft Commissions and Directed Brokerage Services

During the year ended March 31, 2025 and the year ended March 31, 2024 the Trust did not enter into any soft commission or directed brokerage services arrangements.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended March 31, 2025

8. Securities Lending

The Trust may employ techniques and instruments relating to transferable securities for efficient portfolio management purposes including security lending arrangements.

The Funds may utilise stock lending agreements. In such a transaction, the Funds may temporarily transfer their securities to a borrower, with agreement by the borrower to return equivalent securities to the Funds. In entering into such a transaction a Fund will be endeavouring to increase the returns of its portfolio of securities by receiving a fee for lending its securities to the borrower, while retaining the securities potential for capital appreciation.

The Manager on behalf of the Funds has appointed AXA Investment Managers GS Ltd to act as its agent for the purpose of lending securities to brokers, dealers and other financial institutions. The agent earns a fee equal to 20% of the security lending income earned on the transaction.

As of March 31, 2025 the value of outstanding securities on loan, the value of collateral received and the % of collateral of value of securities on loan recorded by the Funds were as follows:

Fund	Currency	Value of Outstanding Securities on Loan	Value of Collateral	% of Collateral of Value of Securities on Loan
AXA IM Eurobloc Equity	EUR	520,438	566,502	109
AXA IM Global Emerging Markets Equity QI	USD	2,503,014	2,730,679	109
AXA IM Global Equity QI	USD	7,913,829	8,656,528	109
AXA IM Global Small Cap Equity QI	USD	2,767,389	3,019,423	109
AXA IM US Enhanced Index Equity QI	USD	25,970,227	28,484,020	110

Details of exposure by counterparty is disclosed in Note 14 to the financial statements.

As of March 31, 2024 the value of outstanding securities on loan, the value of collateral received and the % of collateral of value of securities on loan recorded by the Funds were as follows:

Fund	Currency	Value of Outstanding Securities on Loan	Value of Collateral	% of Collateral of Value of Securities on Loan
AXA IM Global Equity QI	USD	5,211,885	5,732,497	110
AXA IM US Enhanced Index Equity QI	USD	43,789,172	47,946,127	109
AXA IM US Equity QI	USD	12,246,130	13,048,327	107

Details of exposure by counterparty is disclosed in Note 14 to the financial statements.

Securities lending income is received net of fees as shown in the Statement of Comprehensive Income for each Fund. Securities lending income receivable is accounted for on an accruals basis and shown in the Statement of Financial Position.

Collateral received can take the form of cash and highly-rated government debt. The collateral is maintained for the Funds at a minimum margin of 105% of the value of the security on loan and marked to market daily. There was no cash collateral received as at March 31, 2025 and March 31, 2024.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended March 31, 2025

10. Taxation

Under current law and practice the Trust qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis, it is not chargeable to Irish tax on its income or gains.

However, Irish tax may arise on the happening of a "chargeable event". A chargeable event includes any distribution payments to Unitholders, any encashment, redemption, cancellation or transfer of units and the holding of units at the end of each eight year period beginning with the acquisition of such units. No Irish tax will arise on the Trust in respect of chargeable events in respect of:

- a unitholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Trust or the Trust has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and
- certain exempted Irish tax resident Unitholders who have provided the Trust with the necessary signed statutory declarations.

Dividends, interest and capital gains (if any) received on investments made by the Trust may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Trust or its Unitholders.

The Organisation for Economic Co-operation and Development (OECD) released the Pillar Two model rules (the Global Anti-Base Erosion Proposal, or 'GloBE') to reform international corporate taxation. The legislation is effective for the Trust's financial year beginning on 1 April 2024.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended March 31, 2025

10. Taxation (continued)

As the Trust qualifies as an investment entity:

- (a) any Fund not consolidated by an investor will be excluded from the scope of the Pillar Two rules;
- (b) any Fund consolidated by an investor, which is excluded from the scope of the Pillar Two rules, will be excluded from the scope of the Pillar Two rules;
- (c) any Fund consolidated by an investor, which falls within the scope of the Pillar Two rules, will be excluded from the QDMTT implemented by the Irish legislation.

To date, we have not been made aware by any investor that it would give another qualification to the Trust or one of its Funds. As such, any potential Pillar Two exposure and liability will be at the level of the investor or its ultimate parent company. The Pillar 2 model rules will not impact the 2025 financial statements of the Trust.

11. Accessibility to Information

Month-end portfolio listings can be made available to Unitholders 30 days after that date, in line with the Investment Manager's disclosure policy.

12. Transactions with Related Parties

In accordance with FRS 102 the following note summarises the related parties and related party transactions during the year ended March 31, 2025 and the year ended March 31, 2024.

All Directors noted in the directory are also considered a related party.

Transactions with Parties who have significant influence

The Manager has entered into a Trust Deed with the Trustee. Under this Trust Deed, the Manager is entitled to a fee expressed as a percentage of the daily NAV of each respective class, which is calculated daily and payable monthly in arrears. The Manager will be responsible for discharging, from this fee, all fees of the Investment Manager (who will in turn, discharge from its fees, the fees of any Sub-Investment Managers). The Manager earned USD21,480,593 (March 31, 2024: USD21,387,188) for the year ended March 31, 2025, of which USD1,719,696 (March 31, 2024: USD3,625,104) was payable at year end. Please refer to Note 5 to the financial statements for additional information.

Transactions with Securities Lending Agent

Please refer to Note 8 to the financial statements for details of balances at year end with the securities lending agent, AXA Investment Managers GS Limited. Please refer to the Statement of Comprehensive Income for details on the securities lending income balances and to the Statement of Financial Position for details on the securities lending receivable balances.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended March 31, 2025

12. Transactions with Related Parties (continued)

Transactions with Other Related Parties

*The subscription and redemption figures include transfers between unitholder accounts within the unit classes. The transfers are not included in the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Units.

There was no income distribution in relation to the transactions for the year ended March 31, 2025 and year ended March 31, 2024.

There was no investments in investment funds that are also managed by AXA during year ended March 31, 2025 and year ended March 31, 2024.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended March 31, 2025

13. Efficient Portfolio Management (“EPM”) Techniques

Each Fund may use techniques and instruments for efficient portfolio management purposes or to provide protection against exchange rate risk including investing in Financial Derivative Instruments (“FDIs”). Certain Funds, where stated in the investment policy, may invest in FDIs for direct investment purposes. The types and degrees of risk associated with such techniques and instruments vary depending upon the characteristics of the particular instrument and the assets of a Fund as a whole. Use of these instruments may entail investment exposures that are greater than their cost would suggest, meaning that a small investment in derivatives could have a large impact on a Fund’s performance.

Use of forward currency contracts, as a method of protecting the value of a Fund’s assets against a decline in the value of a currency, establishes a rate of exchange which can be achieved at some future point in time, but does not eliminate fluctuations in the underlying prices of securities. Use of forward currency contracts may also reduce any potential gain, which may have otherwise occurred had the currency value increased above the settlement price of the contract. Successful use of forward contracts depends on the Investment Manager’s skill in analysing and predicting relative currency values. Forward contracts alter the Fund’s exposure to currency exchange rate activity and could result in losses to the Fund in the event that the currencies do not perform in the manner that the Investment Manager anticipated.

Realised and unrealised gains or losses arising from FDIs or EPM techniques and instruments are disclosed in Net (loss)/gain on investments and foreign currency in the Statement of Comprehensive Income.

Revenue from securities lending arrangements is disclosed in Securities lending income in the Statement of Comprehensive Income.

Transaction costs relating to the securities lending transactions in relation to third parties to the agreement are embedded in the income received, therefore they are not separately identifiable for disclosure within the financial statements.

Details of the value of collateral received is detailed in Securities Lending Note 8 to the financial statements.

14. Financial Risk Management Process

Oversight and Implementation

The Trust’s risk management process has been delegated by the Manager to the Investment Manager and whose duties are overseen by the Board of Directors of the Manager and the Trustee. The Manager of the Trust operates a 100% delegated model. There have been no significant changes to the risk policies and procedures during the year.

The Investment Manager measures risk in terms of standard deviation of active return and manages that risk through careful stock selection and diversification of the portfolio. While the returns the Investment Manager produces for the Investment Manager’s clients are targeted to be superior to the returns of their respective benchmarks over time, the total risk of the Investment Manager’s portfolios is targeted to generally approximate that of the Funds’ benchmarks.

The active risk the Investment Manager explicitly takes is driven by the Investment Manager’s bottom-up stock selection process. The Investment Manager’s process allows for the decomposition of total risk into proprietary risk factors, industry risk and stock specific risk. Overall, the Investment Manager manages risk primarily through diversification. Portfolios hold a large number of stocks and in all cases, the Investment Manager trades off expected return with expected risk in an effort to maximise the information ratio of the strategy.

The Investment Manager’s portfolios are constructed to represent the return to risk trade-off as identified by the Investment Manager’s investment models within the strategy’s investment guide lines and other applicable constraints.

The Funds are required to adhere to the investment and borrowing restrictions laid down by UCITS Regulations.

Investment Risk

The Funds are exposed to market risk, credit risk and liquidity risk arising from the instruments and markets in which they invest. The Investment Manager’s portfolio optimisation aims to identify a diversified combination of holdings which, in its estimation aims at maximising return under pre-defined risk limits and exposures to certain risk factors.

Investment Risk is limited by the investment and borrowing restrictions. The investment objective and policy of each Fund contains specific investment parameters and these are set out in detail in the Prospectus. Among other restrictions, the Funds are restricted to holding a maximum of 10% of the total NAV of the Fund in any one particular transferable security.

Day-to-day investment issues are reported to the Manager’s relevant governance oversight bodies, thus notified to the Investment Manager’s Compliance and Risk functions. In partnership with the Manager, the Trustee is responsible for independent restriction monitoring and other responsibilities relating to the oversight of the administration of the Funds. The Trustee carries out an independent review on a monthly basis of the investment, borrowing and efficient portfolio management restrictions according to the UCITS Regulations.

Global Exposure

The commitment approach is used to calculate global exposure for all Funds. This approach converts any Fund’s derivative financial position into an equivalent position of the underlying asset based on the market value of the underlying asset. The unrealised appreciation/(depreciation) value of any derivatives held is disclosed in Note 14 (d) to the financial statements.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended March 31, 2025

14. Financial Risk Management Process (continued)

(a) Market Risk

This is the risk that the fair value of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: market price risk, currency risk and interest rate risk.

(i) Market Price Risk

Market price risk is the risk that the fair value of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk and currency risk), whether those changes are caused by factors specific to individual financial instruments or its issuer, or other factors affecting similar financial instruments traded in the market.

The Funds invest primarily in securities traded in equity markets. The investment of the Funds is subject to market fluctuations and there can be no assurance that investments will appreciate in value, therefore presenting a risk of loss of capital. Due to the nature of each Fund's investment objectives, their key component of market risk is market price risk. Each Fund's investment objective is provided in the Funds' Prospectus.

The table below sets out the realised beta for the Funds as at March 31, 2025 and March 31, 2024 and the monetary impact on the NAV of each Fund should the market (using the Fund's benchmark for illustrative purposes) have moved upwards by 5% assuming all other variables remain constant. Beta is a measure of the Fund's securities volatility in relation to the market or index. Conversely, the Investment Manager assumes the NAV for each Fund would have been impacted by the same monetary amount should the market have moved downwards by 5%.

Fund (base currency)	Benchmark	Beta	Monetary Impact	Beta	Monetary Impact
		as at March 31, 2025	on NAV as at March 31, 2025	as at March 31, 2024	on NAV as at March 31, 2024
AXA IM All Country Asia Pacific Ex-Japan Small Cap Equity QI (USD)	MSCI AC Asia Pacific Ex-Japan Small Cap	0.902	5,171,149	0.891	5,655,722
AXA IM Eurobloc Equity (EUR)	MSCI EMU	1.048	5,090,161	1.036	7,030,078
AXA IM Global Emerging Markets Equity QI (USD)	MSCI Emerging Markets Index	0.964	4,398,086	0.919	4,064,684
AXA IM Global Equity QI (USD)	MSCI World	1.015	33,377,441	0.914	31,379,927
AXA IM Global Small Cap Equity QI (USD)	MSCI World Small Cap	0.978	4,807,763	0.861	1,970,153
AXA IM Japan Equity (JPY)	TOPIX	1.154	1,056,894,751	1.154	1,145,607,116
AXA IM Japan Small Cap Equity (JPY)	MSCI Japan Small Cap	1.092	340,639,796	1.141	386,545,860
AXA IM Pacific Ex-Japan Equity QI (USD)	MSCI Pacific ex-Japan	1.027	4,962,654	0.979	4,703,751
AXA IM US Enhanced Index Equity QI (USD)	S&P 500	0.991	71,942,788	1.003	97,188,992
AXA IM US Equity QI (USD)	S&P 500	0.966	19,833,054	1.018	28,697,122

Some limitations of sensitivity analysis are:

- the methodology is based on historical data and cannot take account of the fact that, future market price movements, correlations between markets and levels of market liquidity in conditions of market stress, may bear no relation to historical patterns;
- the market price risk information is a relative estimate of risk rather than a precise and accurate number;
- the market price information represents a hypothetical outcome and is not intended to be predictive; and
- future market conditions could vary significantly from those experienced in the past.

The Investment Manager manages other price risk through building highly diversified investment portfolios, in accordance with UCITS Regulations and each Fund's investment objectives.

(ii) Currency Risk

Currency risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. This risk arises on financial instruments that are denominated in a currency other than the functional currency in which they are measured.

Each Fund may hold assets denominated in currencies other than the functional currency.

For each Fund, the Investment Manager regularly monitors the following main deliverables amongst others:

- significant stock level contributors to active risk;
- significant factor level contributors to active risk (e.g. common risk factor, industry or country exposures);
- exposure to market news and macro events;
- performance of Investment Manager's proprietary stock selection models.

The Investment Manager reviews overall market price risk on a monthly basis, with issues being reported to the Manager's relevant governance oversight bodies.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended March 31, 2025

14. Financial Risk Management Process (continued)

(a) Market Risk (continued)

(ii) Currency Risk (continued)

The currency exposures of the Funds as at March 31, 2025 and March 31, 2024 are as follows:

For the year ended March 31, 2025

14. Financial Risk Management Process (continued)

(a) Market Risk (continued)

(ii) Currency Risk (continued)

None of the Funds enter into forward foreign currency exchange contracts at a portfolio level. The below Funds enter into forward foreign exchange contracts on behalf of the investors in Hedged classes, as a way of managing foreign exchange risk at a class level and with no further impact to the financial instruments held. These forward foreign currency exchange contracts as at March 31, 2025 are detailed in the Schedule of Investments and Note 14 (d) to the financial statements. The counterparty for forward foreign currency exchange contracts is State Street Bank and Trust Company. The long term credit rating of the State Street Bank and Trust Company, as at March 31, 2025 is AA- per Standard & Poor's (March 31, 2024: AA-).

AXA IM US Equity QI	Class A EUR Hedged Class B EUR Hedged Class E EUR Hedged

Currency position is monitored by the Investment Manager on a daily basis and reviewed on a monthly basis.

Given the limited use of Foreign Direct Investments, the methodology chosen is the commitment approach to calculate global exposure. The risk limits of unit classes subject to currency hedging have a target hedge ratio of 100% with a tolerance of +/-4%.

(iii) Interest rate risk

Interest rate risk is defined as the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market interest rates.

The financial assets and financial liabilities of the Funds with exception of cash at bank balances are not exposed to interest rate risk. The Funds' exposure to interest rate risk on cash at bank balances held as at the year end March 31, 2025 or March 31, 2024 is not considered to be significant.

(b) Credit Risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. This includes counterparty risk and issuer risk.

Counterparties are selected by various bodies across the AXA Investment Manager Group after a thorough analysis. Monitoring by Risk Management is done periodically and includes among others a review of the exposure level by counterparty, agencies ratings and credit default spreads. Any issue is immediately escalated to the relevant team and/or committee.

The Funds are exposed to counterparty risk on parties with whom they trade and may also bear the risk of settlement default. The Funds minimise concentration of counterparty risks by undertaking transactions with counterparties on recognised and reputable exchanges and by trading only a small percentage of each Fund's portfolio at any time with any one approved broker. All transactions in listed securities are affected within a clearinghouse framework. Therefore, the risk of default is considered small, as delivery of securities sold are only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker.

In terms of forward foreign currency exchange contracts for hedging purposes at class level, counterparty risk is minimised by undertaking transactions with State Street Bank and Trust Company. A daily quotation of the value of forward foreign currency exchange contracts is reported to the Investment Manager. The Trustee monitors forwards foreign currency exchange contracts and counterparty risk on a monthly basis.

Those Funds engaging in securities lending arrangements are also open to counterparty risk. To minimise such risk, collateral is held, in excess of the value of the securities on loans. In order to further reduce the risk of collateral default, the Manager has decided to receive collateral in the form of cash and highly-rated government debt. There was no cash collateral held by the Funds for year end March 31, 2025 and year end March 31, 2024. In accordance with the UCITS Regulations, collateral accepted for securities lending transactions must be transferred to the Trustee of the Funds and must be immediately available to the Funds, without recourse to the counterparty, in the event of a default by that entity. While it is intended that the value of the collateral received will exceed the value of securities loaned at all times, in the event of a sudden upward market movement, there is a risk that the value of the collateral may fall below the value of the securities transferred. There is also the risk that while cash is recovered in event of default the actual stock cannot be repurchased.

Collateral is marked to market daily and as such, it is reported to the Trustee and Investment Manager on a daily basis. Details of collateral and amount of securities on loan are provided in Note 8 to the financial statements.

NOTES TO THE FINANCIAL STATEMENTS

For the year ended March 31, 2025

NOTES TO THE FINANCIAL STATEMENTS

For the year ended March 31, 2025

14. Financial Risk Management Process (continued)

(b) Credit Risk (continued)

Overall counterparty risk exposure is monitored by the Investment Manager on a daily basis. Issues are reported to the Manager's relevant governance oversight bodies.

Custody Risk

Substantially all of the assets and cash of the Funds are held within the custodial network of the Trustee. Bankruptcy or insolvency of the Trustee or of its parent company State Street Corporation may cause the Funds' rights with respect to their investments held by the Trustee to be delayed or limited.

The long term credit rating of the parent company of the Trustee, State Street Corporation, as at March 31, 2025 is A per Standard & Poor's (March 31, 2024: A).

The maximum exposure to this risk at March 31, 2025 is the total value of investments disclosed in Note 14 (d) to the financial statements. The Funds engage in securities lending as detailed in Note 8 to the financial statements. The risk associated with this is managed through receipt of collateral in excess of 105% of the value of the securities on loan.

In accordance with the requirements of the Trust Deed and the UCITS Regulations the Funds' securities are held in fiduciary or custodial capacity, segregated from State Street's assets with ownership remaining with the customers. Cash, unlike securities is fungible and cannot be registered in the name of, or identified as beneficially owned by a client, nor can it practically be held in physical segregation. The Trustee will ensure that any agents it appoints to assist in safekeeping the assets of the Funds will segregate the assets of the Funds. Thus in the event of insolvency or bankruptcy of the Trustee, the Funds' assets are segregated and protected subject to local sub-custodian arrangements and this further reduces counterparty risk. The Funds will, however, be exposed to the risk of the Trustee or certain sub-depositories used by the Trustee, in relation to the Funds' cash held by the Trustee. In event of the insolvency or bankruptcy of the Trustee, the Funds will be treated as a general creditor of the Trustee in relation to cash holdings of the Funds.

The Funds' investments may be registered in the name of a sub-custodian where, due to the nature of the law or market practice of jurisdictions, it is common market practice, not feasible to do otherwise, or a more efficient manner of holding such Investments.

In certain circumstances a default of a sub-custodian will result in a loss of the assets custodied with this sub-custodian.

(c) Liquidity Risk

Liquidity risk is the risk that a fund may have difficulty raising the cash necessary to meet redemptions or liabilities. Each Fund is exposed to daily cash redemptions of redeemable units. Each Fund therefore invests the majority of its assets in investments that are traded in an active market and can be readily disposed of; it invests only a limited proportion of its assets in investments not actively traded on a stock exchange.

Each Fund's listed securities are considered readily realisable, as they are listed on a regulated stock exchange (as defined in the investment objectives in the Funds' Prospectus). The Funds have the ability to borrow in the short term to ensure settlement. Each Fund may borrow money from a bank up to a limit of 10% of the NAV of the Fund and provided that this borrowing is on a temporary basis.

In some cases the Investment Manager may make use of access products or exchange traded funds (ETFs) to allow exposure to selected markets whilst maintaining sufficient liquidity. In addition, the provisions in the Funds' Prospectus gives discretion to the Directors to defer settlement of a redemption of significant size to facilitate an orderly disposition of securities as is in the interests of the remaining Unitholders. In summary, if total redemption trades received on any dealing day for any of the Funds exceed 10% of the total number of units outstanding in that Fund, then the Directors of the Manager has discretion to defer to the next dealing day any redemption request, so that the total number of units being redeemed do not exceed 10% of total number of units issued.

Liquidity positions are monitored by the Investment Manager on an ongoing basis, reviewed by Risk Management on a monthly basis. Issues are reported to the Manager's relevant governance oversight bodies.

The Funds' financial liabilities due for payment within one month relate in most part, to security purchases awaiting settlement, redemptions of redeemable participating units, payment of expenses, bank overdraft interest and the NAV attributable to Unitholders. Details of these amounts where relevant, can be found in the Statement of Financial Position for each Fund. There are no financial liabilities that fall due over 1 month at March 31, 2025 or March 31, 2024. Please refer to the Schedule of Investments for gross settlement amounts on open foreign currency exchange contracts.

(d) Fair Value Estimation

The Trust is required to classify financial assets and financial liabilities using a three-level fair value hierarchy for the inputs used in valuation techniques to measure fair value.

The Funds classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The daily implementation of the fair value policy is delegated to the Administrator by the Manager. The fair value hierarchy has the following levels:

- Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).
- Level 3 - Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

NOTES TO THE FINANCIAL STATEMENTS

For the year ended March 31, 2025

14. Financial Risk Management Process (continued)

(d) Fair Value Estimation (continued)

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes 'observable' requires significant judgement by the Manager. The Manager considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

As at March 31, 2025, all of the Funds' holdings are classified as Level 1 except for the following Funds:

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within Level 2. For the Trust these are over-the-counter derivatives.

Investments classified within Level 3 have significant unobservable inputs. Level 3 instruments may include suspended or unlisted equities, private equity and IFs. As observable prices are not available for these securities, the Investment Manager has used valuation techniques to derive the fair value. The Investment Manager also considers original transaction price, recent transactions in the same or similar instruments and completed third-party transactions in comparable instruments. It adjusts the model as deemed necessary.

The Level 3 investments were fair valued in accordance with procedures established by the Manager under the supervision of the Board of Directors of the Manager and reviewed by the Administrator in conjunction with the Depository. Please see details of these investments in the tables on the previous pages. In addition, there are investments held on certain Funds fair valued to a Nil value, as disclosed in the Schedule of Investments, which are classified as Level 3 at 31 March, 2025 and 31 March, 2024.

(e) Other risks

Other material risks relating to the Trust are disclosed in the Trust's Prospectus.

15. Reconciliation to dealing NAV

For certain Funds, the last pre-year end dealing net asset value differs from the net asset value per the financial statements. In line with the terms of the prospectus for the Trust, the last pre-year end Valuation Point for the Funds' was 28 March 2025, due to a Fund holiday on 31 March 2025. The prices of certain securities held by certain Funds which were priced on markets open on 31 March 2025 have been amended to reflect the most up-to-date price at year end in these financial statements.

The table below reconciles the net asset value as at 31 March 2025 as per the financial statements to the latest dealing net asset value pre-year end for these Funds.

	Currency	NAV per financial statements	Valuation adjustment	NAV as calculated in accordance with the Prospectus (dealing NAV)
AXA IM All Country Asia Pacific Ex-Japan Small Cap Equity QI	USD	114,659,621	(2,034,356)	116,693,977
AXA IM Global Emerging Markets Equity QI	USD	91,246,589	(1,381,099)	92,627,688
AXA IM Pacific Ex-Japan Equity QI	USD	96,643,695	(2,071,573)	98,715,268

NOTES TO THE FINANCIAL STATEMENTS

For the year ended March 31, 2025

15. Reconciliation to dealing NAV (continued)

For certain Funds, the last pre-year end dealing net asset value differs from the net asset value per the financial statements. In line with the terms of the prospectus for the Trust, the last pre-year end Valuation Point for the Funds' was 28 March 2024, due to an Irish bank holiday on 29 March 2024. A limited number of markets were open globally on 29 March 2024. The prices of certain securities held by certain Funds which were priced on markets open on 29 March 2024 have been amended to reflect the most up-to-date price at year end in these financial statements.

The table below reconciles the net asset value as at 31 March 2024 as per the financial statements to the latest dealing net asset value pre-year end for these Funds.

	Currency	NAV per financial statements	Valuation adjustment	NAV as calculated in accordance with the Prospectus (dealing NAV)
AXA IM Japan Equity	JPY	19,854,542,743	115,644,908	19,738,897,835
AXA IM Japan Small Cap Equity	JPY	6,775,562,838	64,962,610	6,710,600,228

16. Significant Events and Material Changes to Prospectus During the Year

There have been no significant events or material changes to Prospectus during the year that would require disclosure or adjustment to these financial statements.

17. Post Statement of Financial Position Events

There have been no material post Statement of Financial Position events that would require disclosure or adjustment to these financial statements.

18. Approval of Financial Statements

The financial statements were approved by the Directors of the Manager on July 17, 2025.

European Union Taxation of Savings Income Directive

The investment policy of the Funds in the Prospectus state that the Funds are intended to be "fully invested" in equities. Any potential direct or indirect investment in interest bearing securities (see Schedule of Investments) remain below the 15% and 25% thresholds stipulated by the Directive.

Remuneration Policy (unaudited)

For the year ended March 31, 2025

According to regulatory requirements on remuneration disclosure applicable to asset management companies, this disclosure provides an overview of the approach on remuneration taken by AXA Investment Managers (hereafter "AXA IM"). Further information on the composition of the Remuneration Committee and driving principles of the Remuneration Policy is available on AXA IM website: www.axa-im.com/remuneration. A copy of this information is available upon request free of charge.

Governance - AXA IM's Remuneration Policy, which is reviewed and approved by the AXA IM Remuneration Committee every year, sets out the principles relating to remuneration within all entities of AXA IM and takes into account AXA IM's business strategy, objectives, and risk tolerance, as well as the long-term interests of AXA IM's shareholders, clients and employees. The AXA IM Remuneration Committee, in line with the remuneration policies and procedures set and validated at AXA Group level, ensures consistency and fair application of the Remuneration Policy within AXA IM, as well as compliance with applicable regulations.

The central and independent review that the effective implementation of the AXA IM's Remuneration Policy complies with the procedures and policies adopted by AXA IM Group level, is performed by the AXA IM Internal Audit Department, who present each year its conclusions to the AXA IM Remuneration Committee to enable it to perform its diligences.

These conclusions did not mention any particular comments regarding the compliance of the effective implementation of the AXA IM's Remuneration Policy.

The result of the annual exam by the AXA IM Remuneration Committee is presented to the Board of Directors of AXA Investment Managers Paris (hereafter "AXA IM PARIS") along with the amendments implemented into the AXA IM's Remuneration Policy.

These changes mainly concern the updating of the global principles of the remuneration policy in the context of (i) the reinforcement of the principle of equity and gender equality, (ii) the consideration of ESG criteria in the context of deferred variable remuneration, (iii) proposals on the treatment of co-investments and carried interest and (iv) specific adjustments to certain entities of the AXA IM Group in accordance with specific regulatory requirements.

Quantitative information - Data provided below are those of AXA Investment Managers covering all subsidiaries of the AXA IM Group and types of portfolios as at 31 December 2024 after application on remuneration data of the Trust's weighted Asset Under Management allocation key.

Total amount of remuneration paid and / or allocated to all staff for the year ended December 31, 2024 ⁽¹⁾

Sustainable Finance Disclosure Regulation and Taxonomy Regulation Disclosure (unaudited)

This appendix includes disclosures as required by SFDR and taxonomy regulations disclosure.

SFDR Article 8:

SFDR Level 1 : ESG integrated eg. applying Sectorial & normative exclusion policies

Beyond AXA IM's climate and biodiversity strategies, the fund has implemented a specific responsible investing framework.

The fund uses an approach that embeds sustainability risks assessments derived from the integration of ESG (Environment, Social and Governance) criteria within its research and investment processes. The fund has implemented a framework to integrate sustainability risks in investment decisions based on sustainability factors. It relies notably on those policies that applied bindingly on a continuous basis:

(i) sectorial exclusion policies covering controversial weapons, soft commodities, climate risks, and ecosystem protection & deforestation. In 2021, AXA IM extended this policy to cover investments incorporating significant land use controversies and responsible for biodiversity loss in relation to soy, cattle and timber.

(ii) ESG standards (covering normative exclusions with the tobacco sector, white phosphorus weapons producers, companies in violation of international norms and standards, severe controversies and low ESG quality based on ESG scoring) were upgraded in 2021 with more demanding rules on human rights violations and on compliance to international norms and standards.

ESG scoring methodology has been revamped in 2021 towards a single-provider ESG scoring model which is coupled with an overlay of AXA IM's own qualitative analysis. Entitled Q², this new and enhanced qualitative and quantitative approach offers increased coverage as well as fine-tuned fundamental analysis.

The most up to date version of our policies can be found on our website at the following link: <https://www.axa-im.com/our-policies>

The "do no significant harm" principle according to SFDR regulation that aims to ensure limiting adverse impact on sustainability factors, is considered through exclusion policies of the most material ESG risks. Stewardship policies are an additional risk mitigation on Principal Adverse Impacts through direct dialogue with companies on sustainability and governance issues.

Furthermore, through our engagement activities, we have used our influence as investors to encourage companies to mitigate environmental and social risks relevant to their sectors. Voting at general meetings has been an important element of our dialogue with investee companies in order to foster sustainably long-term value of the companies in which we invest.

The implementation of responsible investment's frameworks had the following results:

Latest engagement and voting reports are available at the fund center website: <https://funds.axa-im.com/>

A reporting on main ESG indicators measured for the fund is available at the at the fund center website: <https://funds.axa-im.com/>

EU Taxonomy:

The European Union (EU) regulation designed to harmonise the classification of sustainable economic activities came into force from 1 January 2022. Known as the 'EU Taxonomy' it covers multiple themes related to environmental sustainability. Climate mitigation and climate adaptation are the first two objectives covered, with another four (water, pollution, biodiversity, and circular economy) expected to be included from 2023.

We'd like to inform you that the investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: AXA IM AC Asia Pacific ex Japan **Legal Entity Identifier:** 213800SZ58OTSMCA9T31
Small Cap Equity QI (the “Financial Product”)

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> YES	● <input checked="" type="checkbox"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 16.04 % of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon Intensity
- Water Intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil & gas activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization’s (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period
- Protection of human rights avoiding investing in debt instruments issued by countries where the worst forms of human right violations are observed.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● How did the sustainability indicators perform?

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to Benchmark during the reference period.

Sustainability KPI Name	Value	Benchmark	Coverage
Carbon Intensity	262.38 Metric tonnes of carbon dioxide equivalents per million \$ of revenue (for corporates only) - Scope 1+2	462.09 Metric tonnes of carbon dioxide equivalents per million \$ of revenue (for corporates only) - Scope 1+2	97.67 %
Water Intensity	8484.2 Thousands of cubic meters per million \$ of revenue (for corporates only)	13711.44 Thousands of cubic meters per million \$ of revenue (for corporates only)	97.67 %

N.B.: KPIs and benchmarks are reported based on an average of the data available at each end of month of the reference period.

● ... And compared to previous periods?

Sustainability KPI Name	Year	Value	Benchmark	Coverage
Carbon Intensity	2024	310.94 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	416.25 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	97.33 %
Water Intensity	2024	15113.98 Thousands of cubic meters for corporates	20405.8 Thousands of cubic meters for corporates	97.33 %
Carbon intensity	2023	333.89 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	524.65 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	98 %
Water intensity	2023	6658.12 Thousands of cubic meters for corporates	32486.55 Thousands of cubic meters for corporates	98 %

N.B.: While Sustainability KPIs are reported based on an average of the data available at each end of quarter of the reference period, for technical reasons benchmarks are reported based on end of year data only. Therefore, the comparison should not be taken as such at face value and should not be interpreted as a breach of the binding elements disclosed into the Financial Product's legal documentation, as figures disclosed for the benchmark are not based on the same accounting approach than for those disclosed for the Financial Product.

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

1. UN Sustainable Development Goals alignment (SDG) of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2. Integration of issuers engaged in a solid Transition Pathway consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product took into consideration the criteria of the EU Taxonomy environmental objectives, and the "do not significantly harm" principles. It is invested in activities aligned with the objectives of the EU Taxonomy. The Taxonomy alignment of the Financial Product has been provided by an external data provider and have been consolidated at portfolio level by AXA IM. Nevertheless, it has not been subject to an audit or a review by a third party.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below –5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to ‘significantly contributing’ to -10 corresponding to ‘significantly obstructing’, unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM’s sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through (i) AXA IM sectorial exclusion policies and AXA IM ESG standards that have been applied bindingly at all times by the Financial Product, as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

Relevant AXA IM policies	PAI indicator	Units	Measurement	Coverage in % based on Total AUM	Coverage in % based on eligible assets

For Sovereign and supnationals:

¹ The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively. Not all high impact climate sectors are targeted by the exclusion policy for the time being.

² The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

Relevant AXA IM policies	PAI indicator	Units	Measurement	Coverage in % based on Total AUM	Coverage in % based on eligible assets
<ul style="list-style-type: none"> AXA IM ESG Standards policy, through the exclusion of investee countries with severe social violations Compliance black-list based on international and EU sanctions 	PAI 16: Sovereign Investee countries subject to social violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	N/A	Absolute number: 0 Relative number: 0	N/A

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

Relevant AXA IM policies	PAI indicator	Units	Measurement	Coverage in % based on Total AUM	Coverage in % based on eligible assets
Climate Risk policy	PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)	Metric tonnes of carbon dioxide equivalents (tCO2e)	Scope 1: 24184.584	Scope 1: 96 Scope 2: 96 Scope 3: 95 Scope 1+2: 96 Scope 1+2+3: 95	Scope 1: 97 Scope 2: 97 Scope 3: 97 Scope 1+2: 97 Scope 1+2+3: 97
Ecosystem protection & Deforestation policy			Scope 2: 6290.545		
			Scope 3: 101198.555 Scope 1+2: 30475.131 Scope 1+2+3: 130901.727		
Climate Risk policy	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/€M)	Scope 1+2: 259.399	Scope 1+2: 96 Scope 1+2+3: 95	Scope 1+2: 97 Scope 1+2+3: 97

Source: S&P Trucost, 2024

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

N.B.: PAIs are reported based on an average of the impacts at each end of quarter of the reference period where data is available.

Figures disclosed on PAI indicators can either be based on the "current value of all investments" as defined by the Regulation, or on "eligible assets with available data only" where relevant. For the purpose of this document, "eligible assets with available data only" refers to all investments (i.e., investee companies, or sovereign and supranational, or real estate assets, depending on the PAI), excluding derivatives, cash and cash equivalent and eligible assets without available data. "Eligible assets without available data" refers to assets that have insufficient data and/or low data quality for a specific investment.

The attention of the recipient is drawn to the fact that for some specific PAIs (i.e., PAIs which are relative i) to investee companies' revenue or ii) to non-monetary units such as physical flows), the calculation is rebased on eligible assets with available data only for data quality and comparability purposes. Such exclusion at the denominator is reflected and disclosed through the coverage ratios for the relevant indicators: the coverage disclosed reflects the proportion of eligible assets for which data is available and provided in this document; in addition, to ensure full transparency on the scope of assets where PAIs are disclosed, the coverage based on the current value of all investments is also disclosed.

Reported PAI indicators based on the current value of all investments	Reported PAI indicators based on eligible assets, excluding eligible assets with no available data
PAI indicators 2, 4, 7, 10, 11 and 14	PAI indicators 3 and 6

N.B.: PAI indicators 1 and 16 are not based neither on any of these two approaches as being PAIs in absolute values (noting that the PAI 16 is also relative to the number of invested countries in addition to the absolute value number), i.e., having no denominator in their formula.

More details on our methodologies to account and disclose PAIs are available in AXA IM ESG Methodologies Handbook available on AXA IM website: <https://www.axa-im.com/our-policies-and-reports>

What were the top investments of this financial product?

The top investments of the Financial Product (based on the NACE classification's divisions: NACE level 2) are detailed below:

Largest investments	Sector (NACE level 2)	% Assets	Country
LIC HOUSING FINANCE LTD XNSE INR	Financial service activities, except insurance and pension funding	1.21%	IN
KING YUAN ELECTRONICS CO LTD XTAI TWD	Manufacture of machinery and equipment n.e.c.	1.19%	TW
RADIANT OPTO-ELECTRONICS COR XTAI TWD	Manufacture of computer, electronic and optical products	1.13%	TW
POWERTECH TECHNOLOGY INC XTAI TWD	Manufacture of machinery and equipment n.e.c.	1.1%	TW
KARUR VYSYA BANK LTD XNSE INR	Financial service activities, except insurance and pension funding	1.09%	IN
THE UNITED LABORATORIES INTE XHKG HKD	Manufacture of basic pharmaceutical products and pharmaceutical preparations	1.07%	HK
SINO-AMERICAN SILICON PRODUC ROCO TWD	Manufacture of machinery and equipment n.e.c.	1.03%	TW
ORACLE FINANCIAL SERVICES XNSE INR	Publishing activities	1.03%	IN
YUE YUEN INDUSTRIAL HLDG XHKG HKD	Manufacture of wearing apparel	1.03%	HK
STELLA INTERNATIONAL XHKG HKD	Manufacture of leather and related products	1%	HK
FUFENG GROUP LTD XHKG HKD	Manufacture of chemicals and chemical products	0.98%	CN
NATCO PHARMA LTD XNSE INR	Manufacture of basic pharmaceutical products and pharmaceutical preparations	0.98%	IN
CHINA COMMUNICATIONS SERVI-H XHKG HKD	Civil engineering	0.98%	CN
ZENSAR TECHNOLOGIES LTD XNSE INR	Publishing activities	0.97%	IN
KING SLIDE WORKS CO LTD XTAI TWD	Manufacture of fabricated metal products, except machinery and equipment	0.96%	TW

The portfolio proportions of investments presented above are an average over the reference period.

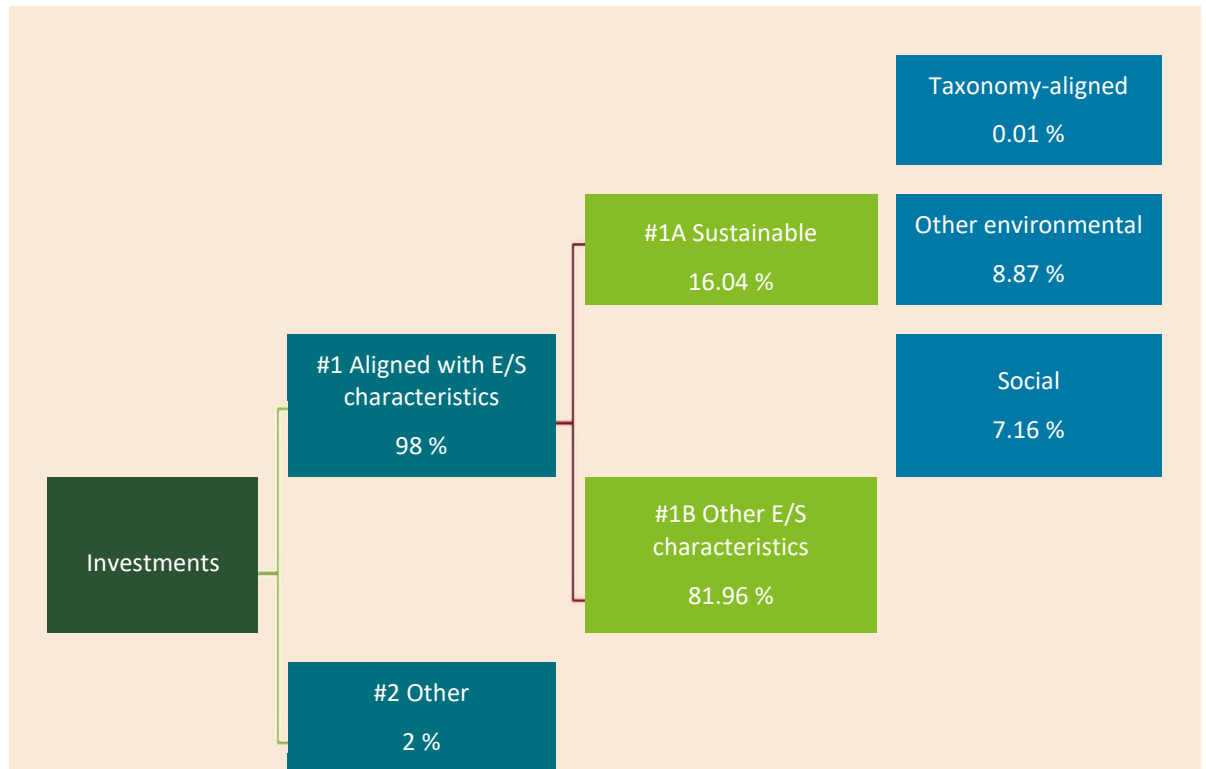

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/04/2024-31/03/2025

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The actual asset allocation has been reported based on an average of the data available at end of each quarter of the reference period.

Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

In which economic sectors were the investments made?

Financial product's investments were made in the economic sectors (based on NACE level 2) detailed below:

Top sector (NACE level 2)	Proportion
Manufacture of computer, electronic and optical products	9.52%
Financial service activities, except insurance and pension funding	9.5%
Manufacture of basic pharmaceutical products and pharmaceutical preparations	6.72%
Manufacture of machinery and equipment n.e.c.	6.14%
Activities auxiliary to financial services and insurance activities	5.52%
Publishing activities	4.56%
Real estate activities	4.02%
Manufacture of chemicals and chemical products	3.55%
Mining of metal ores	3.16%

Retail trade, except of motor vehicles and motorcycles	3.13%
Manufacture of motor vehicles, trailers and semi-trailers	2.94%
Insurance, reinsurance and pension funding, except compulsory social security	2.88%
Manufacture of basic metals	2.71%
Warehousing and support activities for transportation	2.55%
Civil engineering	2.24%
Manufacture of fabricated metal products, except machinery and equipment	1.79%
Manufacture of wearing apparel	1.75%
Wholesale trade, except of motor vehicles and motorcycles	1.66%
Manufacture of rubber and plastic products	1.55%
Manufacture of leather and related products	1.52%
Electricity, gas, steam and air conditioning supply	1.46%
Manufacture of food products	1.35%
Other	1.35%
Wholesale and retail trade and repair of motor vehicles and motorcycles	1.28%
Other manufacturing	1.19%
Computer programming, consultancy and related activities	1.17%
Mining support service activities	1.14%
Architectural and engineering activities, technical testing and analysis	1.08%
Scientific research and development	1.01%
Security and investigation activities	0.96%
Manufacture of electrical equipment	0.9%
Residential care activities	0.83%
Telecommunications	0.73%
Land transport and transport via pipelines	0.72%
Education	0.67%
Motion picture, video and television programme production, sound recording and music publishing activity	0.64%
Gambling and betting activities	0.59%
Water transport	0.56%
Human health activities	0.54%
Employment activities	0.52%
Crop and animal production, hunting and related service activities	0.51%
Manufacture of other non-metallic mineral products	0.49%
Construction of buildings	0.47%
Manufacture of paper and paper products	0.44%
Information service activities	0.43%
Manufacture of coke and refined petroleum products	0.31%
Advertising and market research	0.26%
Legal and accounting activities	0.21%
Mining of coal and lignite	0.2%
Food and beverage service activities	0.15%
Manufacture of beverages	0.14%
Water collection, treatment and supply	0.09%
Manufacture of other transport equipment	0.08%
Printing and reproduction of recorded media	0.05%
Manufacture of textiles	0.03%
Fishing and aquaculture	0.02%

The portfolio proportions of investments presented above are an average over the reference period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product took into consideration the criteria of the EU Taxonomy environmental objectives, and the “do not significantly harm” principles. It is invested in activities aligned with the objectives of the EU Taxonomy. The Taxonomy alignment of the Financial Product has been provided by an external data provider and have been consolidated at portfolio level by AXA IM. Nevertheless, it has not been subject to an audit or a review by a third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?³

Yes

In fossil gas In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

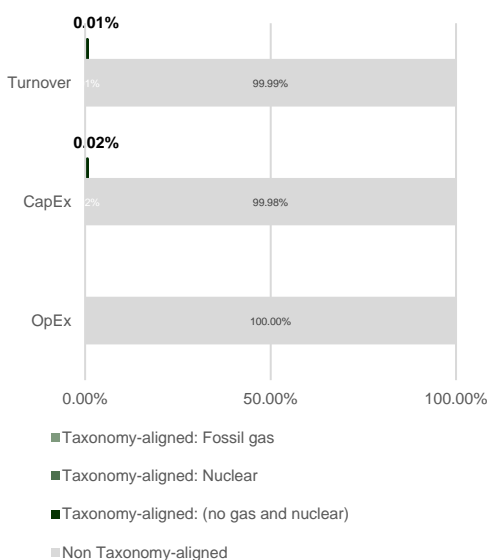

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.

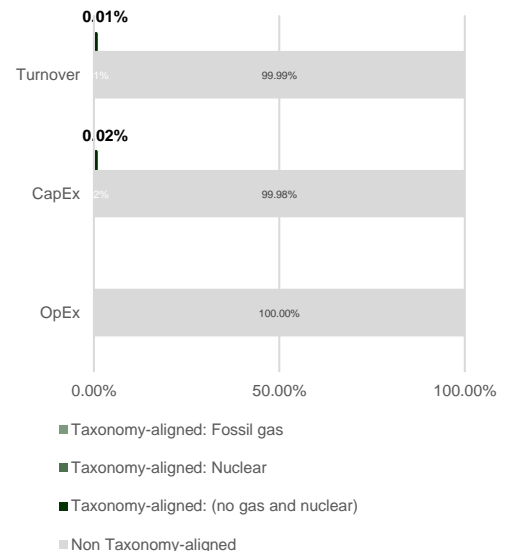

- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

This graph represents 100 % of the total investments.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

³ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product has invested 0% of its Net Asset Value in transitional activities and 0% of its Net Asset Value in enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of EU Taxonomy-aligned investments			
	2025	2024	2023
Revenue-based	0.01%	0.00%	0.00%
CapEx-based	0.02%	0.00%	0.00%
OpEx-based	0.00%	0.00%	0.00%

Source: AXA IM, based on S&P Trucost, 2024

 are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 8.87% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

● **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 7.16% of sustainable investments with a social objective.

● **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 2% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be transferable securities such as equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the Financial Product continued to apply all AXA IM exclusion policies, for which the exclusion criteria were updated - for the most recent updates - in 2023, but which exclusion lists were updated in 2024. More details on AXA IM exclusion policies are available under the following link: [Sustainability Policies and Reports | AXA IM Corporate](#)

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: AXA IM Eurobloc Equity (the “Financial Product”)

Legal Entity Identifier: 213800EID8L1ORZQXT77

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> YES	● <input checked="" type="checkbox"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 90.03 % of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon Intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil & gas activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization’s (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period
- Protection of human rights avoiding investing in debt instruments issued by countries where the worst forms of human right violations are observed.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

How did the sustainability indicators perform?

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to Benchmark during the reference period.

Sustainability KPI Name	Value	Benchmark	Coverage
Carbon Intensity	120.02 Metric tonnes of carbon dioxide equivalents per million \$ of revenue (for corporates only) - Scope 1+2	127.13 Metric tonnes of carbon dioxide equivalents per million \$ of revenue (for corporates only) - Scope 1+2	98.61 %

N.B.: KPIs and benchmarks are reported based on an average of the data available at each end of month of the reference period.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

... **And compared to previous periods?**

Sustainability KPI Name	Year	Value	Benchmark	Coverage
Carbon Intensity	2024	148.26 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	133.74 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	99.49 %
Carbon intensity	2023	156.06 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	180.06 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	99 %

N.B.: While Sustainability KPIs are reported based on an average of the data available at each end of quarter of the reference period, for technical reasons benchmarks are reported based on end of year data only. Therefore, the comparison should not be taken as such at face value and should not be interpreted as a breach of the binding elements disclosed into the Financial Product's legal documentation, as figures disclosed for the benchmark are not based on the same accounting approach than for those disclosed for the Financial Product.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

1.UN Sustainable Development Goals alignment (SDG) of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2.Integration of issuers engaged in a solid Transition Pathway consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product took into consideration the criteria of the EU Taxonomy environmental objectives, and the "do not significantly harm" principles. It is invested in activities aligned with the objectives of the EU Taxonomy. The Taxonomy alignment of the Financial Product has been provided by an external data provider and have been consolidated at portfolio level by AXA IM. Nevertheless, it has not been subject to an audit or a review by a third party.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through (i) AXA IM sectorial exclusion policies and AXA IM ESG standards that have been applied bindingly at all times by the Financial Product, as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

For Sovereign and supranationals:

Relevant AXA IM policies	PAI indicator	Units	Measurement	Coverage in % based on Total AUM	Coverage in % based on eligible assets
<ul style="list-style-type: none"> AXA IM ESG Standards policy, through the exclusion of investee countries with severe social violations Compliance black-list based on international and EU sanctions 	PAI 16: Sovereign Investee countries subject to social violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	N/A	Absolute number: 0 Relative number: 0	N/A

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance,

² The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

Relevant AXA IM policies	PAI indicator	Units	Measurement	Coverage in % based on Total AUM	Coverage in % based on eligible assets
Climate Risk policy	PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)	Metric tonnes of carbon dioxide equivalents (tCO2e)	Scope 1: 3001.673 Scope 2: 1681.231 Scope 3: 83882.531 Scope 1+2: 4682.904 Scope 1+2+3: 88564.539	Scope 1: 97 Scope 2: 97 Scope 3: 97 Scope 1+2: 97 Scope 1+2+3: 97	Scope 1: 99 Scope 2: 99 Scope 3: 98 Scope 1+2: 99 Scope 1+2+3: 98
Ecosystem protection & Deforestation policy					
Climate Risk policy	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/€M)	Scope 1+2: 41.904 Scope 1+2+3: 738.893	Scope 1+2: 97 Scope 1+2+3: 97	Scope 1+2: 98 Scope 1+2+3: 98
Ecosystem protection & Deforestation policy					
Climate Risk policy	PAI 3: GHG intensity of investee companies	Metric tonnes of carbon dioxide equivalents per million euro of revenue (tCO2e/€M)	Scope 1+2+3: 1137.063	Scope 1+2+3: 97	Scope 1+2+3: 98
Ecosystem protection & Deforestation policy					
Climate Risk policy	PAI 4: Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector (% of AuM)	10.56	97	99
Climate Risk policy (engagement only)	PAI 5: Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)	Energy Consumption: 46.73 Energy Production: 54.56	Energy Consumption: 96 Energy Production: 6	Energy Consumption: 98 Energy Production: 6
Ecosystem protection & Deforestation policy	PAI 7: Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas (% of AuM)	46.19	88	90
ESG standard policy / violation of international norms and standards	PAI 10: Violation of UN Global Compact principles & OECD Guidelines for	Share of investments in investee companies that have been involved in violations of the	0%	98	100

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

	Multinational Enterprises	UNGC principles or OECD Guidelines for Multinational Enterprises (% of AuM)			
Voting and Engagement policy with systematic voting criteria linked with board gender diversity	PAI 13: Board Gender diversity	Average ratio of female board members in investee companies, expressed as a percentage of all board members (%)	44.92	97	99
Controversial weapons policy	PAI 14: Exposure to controversial weapons	Share of investments in investee companies involved in the manufacture or selling of controversial weapons (% of AuM)	0	98	100

For Sovereign and supranationals:

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

N.B.: PAIs are reported based on an average of the impacts at each end of quarter of the reference period where data is available.

Figures disclosed on PAI indicators can either be based on the "current value of all investments" as defined by the Regulation, or on "eligible assets with available data only" where relevant. For the purpose of this document, "eligible assets with available data only" refers to all investments (i.e., investee companies, or sovereign and supranational, or real estate assets, depending on the PAI), excluding derivatives, cash and cash equivalent and eligible assets without available data. "Eligible assets without available data" refers to assets that have insufficient data and/or low data quality for a specific investment. The attention of the recipient is drawn to the fact that for some specific PAIs (i.e., PAIs which are relative i) to investee companies' revenue or ii) to non-monetary units such as physical flows), the calculation is rebased on eligible assets with available data only for data quality and comparability purposes. Such exclusion at the denominator is reflected and disclosed through the coverage ratios for the relevant indicators: the coverage disclosed reflects the proportion of eligible assets for which data is available and provided in this document; in addition, to ensure full transparency on the scope of assets where PAIs are disclosed, the coverage based on the current value of all investments is also disclosed.

Reported PAI indicators based on the current value of all investments	Reported PAI indicators based on eligible assets, excluding eligible assets with no available data
PAI indicators 2, 4, 7, 10, 11 and 14	PAI indicators 3 and 6

N.B.: PAI indicators 1 and 16 are not based neither on any of these two approaches as being PAIs in absolute values (noting that the PAI 16 is also relative to the number of invested countries in addition to the absolute value number), i.e., having no denominator in their formula.

More details on our methodologies to account and disclose PAIs are available in AXA IM ESG Methodologies Handbook available on AXA IM website: <https://www.axa-im.com/our-policies-and-reports>

What were the top investments of this financial product?

The top investments of the Financial Product (based on the NACE classification's divisions: NACE level 2) are detailed below:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/04/2024-31/03/2025

Largest investments	Sector (NACE level 2)	% Assets	Country
ASML HOLDING NV XAMS EUR	Manufacture of machinery and equipment n.e.c.	7.53%	NL
SCHNEIDER ELECTRIC SE XPAR EUR	Manufacture of electrical equipment	5.16%	FR
INTESA SANPAOLO MTAA EUR	Financial service activities, except insurance and pension funding	4.98%	IT
IBERDROLA SA XMAD EUR	Electricity, gas, steam and air conditioning supply	4.13%	ES
LVMH MOET HENNESSY LOUIS VUI XPAR EUR	Manufacture of leather and related products	3.98%	FR
ALLIANZ SE-REG XETR EUR	Insurance, reinsurance and pension funding, except compulsory social security	3.82%	DE
PUBLICIS GROUPE XPAR EUR	Advertising and market research	3.73%	FR
AIR LIQUIDE SA XPAR EUR	Manufacture of chemicals and chemical products	3.13%	FR
INDUSTRIA DE DISENO TEXTIL XMAD EUR	Retail trade, except of motor vehicles and motorcycles	3.04%	ES
FINCOBANK SPA MTAA EUR	Financial service activities, except insurance and pension funding	2.94%	IT
BNP PARIBAS XPAR EUR	Financial service activities, except insurance and pension funding	2.88%	FR
BANCO BILBAO VIZCAYA ARGENTA XMAD EUR	Financial service activities, except insurance and pension funding	2.87%	ES
COMPAGNIE DE SAINT GOBAIN XPAR EUR	Manufacture of other non-metallic mineral products	2.74%	FR
SANOFI XPAR EUR	Manufacture of basic pharmaceutical products and pharmaceutical preparations	2.72%	FR
L'OREAL XPAR EUR	Manufacture of chemicals and chemical products	2.41%	FR

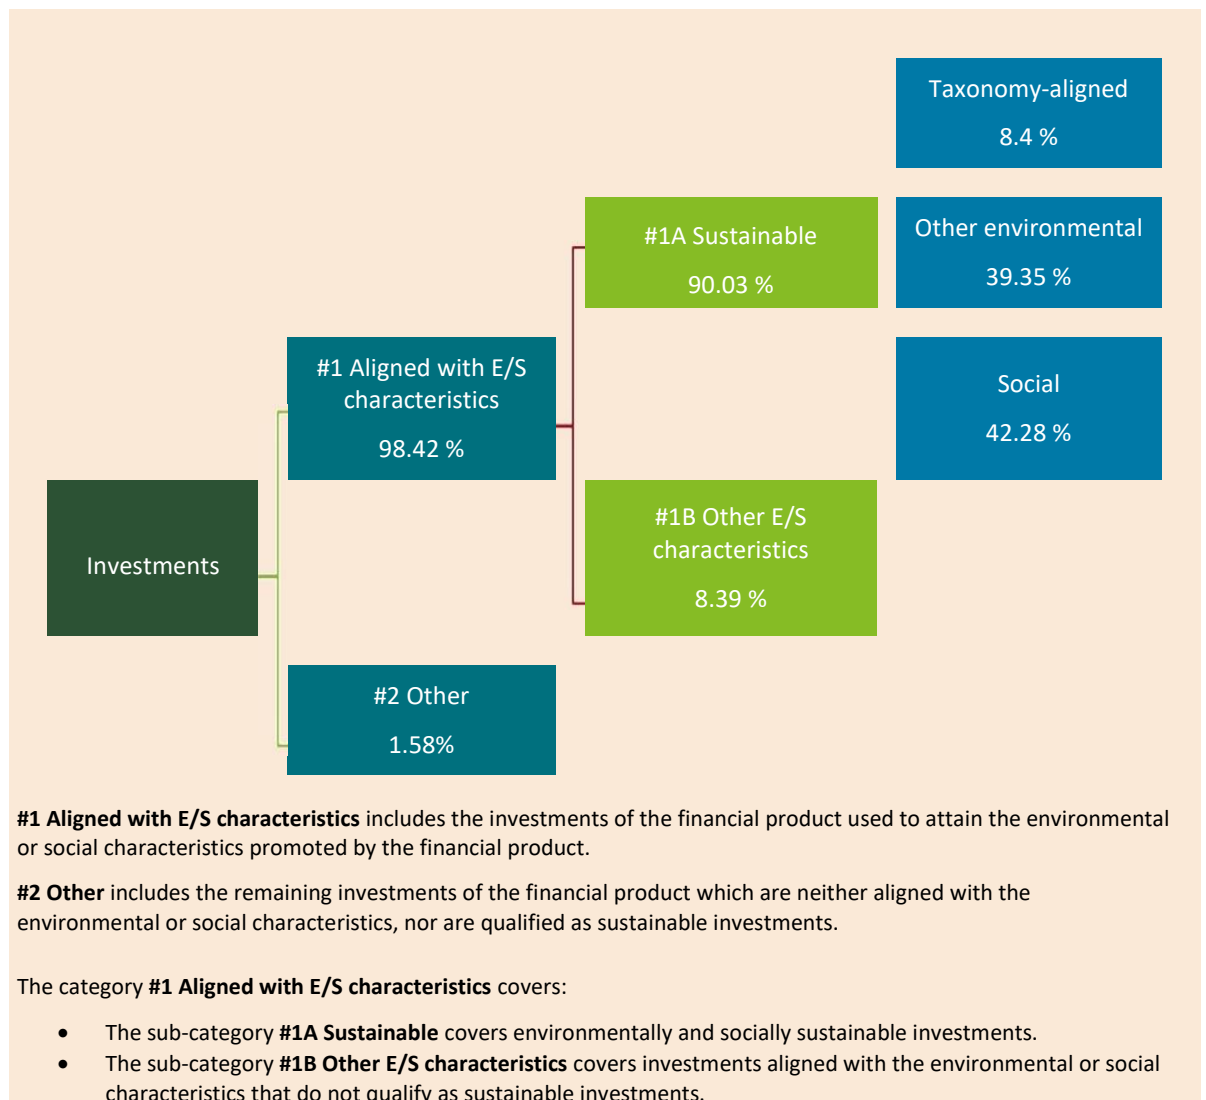

The portfolio proportions of investments presented above are an average over the reference period.

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The actual asset allocation has been reported based on an average of the data available at end of each quarter of the reference period.

Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

In which economic sectors were the investments made?

Financial product's investments were made in the economic sectors (based on NACE level 2) detailed below:

Top sector (NACE level 2)	Proportion
Financial service activities, except insurance and pension funding	16.59%
Manufacture of machinery and equipment n.e.c.	10.39%
Manufacture of chemicals and chemical products	8.05%
Electricity, gas, steam and air conditioning supply	5.79%
Manufacture of electrical equipment	5.57%
Retail trade, except of motor vehicles and motorcycles	4.26%
Manufacture of leather and related products	3.98%
Insurance, reinsurance and pension funding, except compulsory social security	3.82%
Advertising and market research	3.73%

Manufacture of basic pharmaceutical products and pharmaceutical preparations	3.73%
Civil engineering	2.96%
Publishing activities	2.77%
Manufacture of other non-metallic mineral products	2.74%
Manufacture of fabricated metal products, except machinery and equipment	2.37%
Telecommunications	2.35%
Other manufacturing	2.27%
Manufacture of motor vehicles, trailers and semi-trailers	1.77%
Water collection, treatment and supply	1.72%
Architectural and engineering activities, technical testing and analysis	1.68%
Manufacture of beverages	1.64%
Computer programming, consultancy and related activities	1.46%
Travel agency, tour operator reservation service and related activities	1.42%
Other	1.42%
Scientific research and development	1.34%
Legal and accounting activities	1.33%
Activities auxiliary to financial services and insurance activities	1.17%
Manufacture of food products	1.16%
Food and beverage service activities	1.03%
Manufacture of computer, electronic and optical products	0.93%
Manufacture of rubber and plastic products	0.35%
Manufacture of paper and paper products	0.19%

The portfolio proportions of investments presented above are an average over the reference period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product took into consideration the criteria of the EU Taxonomy environmental objectives, and the “do not significantly harm” principles. It is invested in activities aligned with the objectives of the EU Taxonomy. The Taxonomy alignment of the Financial Product has been provided by an external data provider and have been consolidated at portfolio level by AXA IM. Nevertheless, it has not been subject to an audit or a review by a third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?³

- Yes
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

³ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product has invested 0% of its Net Asset Value in transitional activities and 0% of its Net Asset Value in enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of EU Taxonomy-aligned investments			
	2025	2024	2023
Revenue-based	8.40%	0.00%	0.00%
CapEx-based	12.14%	0.00%	0.00%
OpEx-based	0.00%	0.00%	0.00%

Source: AXA IM, based on S&P Trucost, 2025

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 39.35% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

● **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 42.28% of sustainable investments with a social objective.

● **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The remaining "Other" investments represented 1.58% of the Financial Product's Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be transferable securities such as equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the Financial Product continued to apply all AXA IM exclusion policies, for which the exclusion criteria were updated - for the most recent updates - in 2023, but which exclusion lists were updated in 2024. More details on AXA IM exclusion policies are available under the following link: [Sustainability Policies and Reports | AXA IM Corporate](#)

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: AXA IM Global Emerging Markets Equity QI (the “Financial Product”)

Legal Entity Identifier: 213800TFOH1NO4ZNUK75

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> YES	● <input checked="" type="checkbox"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 36.23 % of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon Intensity
- Water Intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil & gas activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization’s (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period
- Protection of human rights avoiding investing in debt instruments issued by countries where the worst forms of human right violations are observed.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● How did the sustainability indicators perform?

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to Benchmark during the reference period.

Sustainability KPI Name	Value	Benchmark	Coverage
Carbon Intensity	150.83 Metric tonnes of carbon dioxide equivalents per million \$ of revenue (for corporates only) - Scope 1+2	402.06 Metric tonnes of carbon dioxide equivalents per million \$ of revenue (for corporates only) - Scope 1+2	99.9 %
Water Intensity	7713.61 Thousands of cubic meters per million \$ of revenue (for corporates only)	12240.49 Thousands of cubic meters per million \$ of revenue (for corporates only)	99.9 %

N.B.: KPIs and benchmarks are reported based on an average of the data available at each end of month of the reference period.

● ... And compared to previous periods?

Sustainability KPI Name	Year	Value	Benchmark	Coverage
Carbon Intensity	2024	177.1 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	430.96 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	99.87 %
Water Intensity	2024	5467.25 Thousands of cubic meters for corporates	10288.76 Thousands of cubic meters for corporates	99.87 %
Carbon intensity	2023	166.6 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	399.6 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	100 %
Water intensity	2023	3775.86 Thousands of cubic meters for corporates	12200.06 Thousands of cubic meters for corporates	100 %

N.B.: While Sustainability KPIs are reported based on an average of the data available at each end of quarter of the reference period, for technical reasons benchmarks are reported based on end of year data only. Therefore, the comparison should not be taken as such at face value and should not be interpreted as a breach of the binding elements disclosed into the Financial Product's legal documentation, as figures disclosed for the benchmark are not based on the same accounting approach than for those disclosed for the Financial Product.

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

1. UN Sustainable Development Goals alignment (SDG) of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2. Integration of issuers engaged in a solid Transition Pathway consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product took into consideration the criteria of the EU Taxonomy environmental objectives, and the "do not significantly harm" principles. It is invested in activities aligned with the objectives of the EU Taxonomy. The Taxonomy alignment of the Financial Product has been provided by an external data provider and have been consolidated at portfolio level by AXA IM. Nevertheless, it has not been subject to an audit or a review by a third party.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below –5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to ‘significantly contributing’ to -10 corresponding to ‘significantly obstructing’, unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM’s sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through (i) AXA IM sectorial exclusion policies and AXA IM ESG standards that have been applied bindingly at all times by the Financial Product, as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

Relevant AXA IM policies	PAI indicator	Units	Measurement	Coverage in % based on Total AUM	Coverage in % based on eligible assets

Voting and Engagement policy with systematic voting criteria linked with board gender diversity	PAI 13: Board gender diversity	Average ratio of female board members in investee companies, expressed as a percentage of all board members (%)	19.86	95	100
Controversial weapons policy	PAI 14: Exposure to controversial weapons	Share of investments in investee companies involved in the manufacture or selling of controversial weapons (% of AuM)	0	95	100

For Sovereign and supnationals:

¹ The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively. Not all high impact climate sectors are targeted by the exclusion policy for the time being.

² The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

Relevant AXA IM policies	PAI indicator	Units	Measurement	Coverage in % based on Total AUM	Coverage in % based on eligible assets
<ul style="list-style-type: none"> AXA IM ESG Standards policy, through the exclusion of investee countries with severe social violations Compliance black-list based on international and EU sanctions 	PAI 16: Sovereign Investee countries subject to social violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	N/A	Absolute number: 0 Relative number: 0	N/A

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

Relevant AXA IM policies	PAI indicator	Units	Measurement	Coverage in % based on Total AUM	Coverage in % based on eligible assets
Climate Risk policy	PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)	Metric tonnes of carbon dioxide equivalents (tCO2e)	Scope 1: 6144.197	Scope 1: 95 Scope 2: 95 Scope 3: 95 Scope 1+2: 95 Scope 1+2+3: 95	Scope 1: 100 Scope 2: 100 Scope 3: 100 Scope 1+2: 100 Scope 1+2+3: 100
Ecosystem protection & Deforestation policy			Scope 2: 2369.682		
Climate Risk policy			Scope 3: 37987.047		
Ecosystem protection & Deforestation policy	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/€M)	Scope 1+2: 111.469	Scope 1+2: 93 Scope 1+2+3: 95	Scope 1+2: 98 Scope 1+2+3: 100
Climate Risk policy			Scope 1+2+3: 525.995		
Ecosystem protection & Deforestation policy	PAI 3: GHG intensity of investee companies	Metric tonnes of carbon dioxide equivalents per million euro of revenue (tCO2e/€M)	Scope 1+2+3: 936.816	Scope 1+2+3: 95	Scope 1+2+3: 100
Climate Risk policy	PAI 4: Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector (% of AuM)	5.45	95	100
Climate Risk policy (engagement only)	PAI 5: Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable	Energy Consumption: 70.83 Energy Production: 50.15	Energy Consumption: 91 Energy Production: 1	Energy Consumption: 96 Energy Production: 1

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

		energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)			
Ecosystem protection & Deforestation policy	PAI 7: Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas (% of AuM)	20.16	69	73
ESG standard policy / violation of international norms and standards	PAI 10: Violation of UN Global Compact principles & OECD Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (% of AuM)	0%	95	100

Source: S&P Trucost, 2025

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

N.B.: PAIs are reported based on an average of the impacts at each end of quarter of the reference period where data is available.

Figures disclosed on PAI indicators can either be based on the "current value of all investments" as defined by the Regulation, or on "eligible assets with available data only" where relevant. For the purpose of this document, "eligible assets with available data only" refers to all investments (i.e., investee companies, or sovereign and supranational, or real estate assets, depending on the PAI), excluding derivatives, cash and cash equivalent and eligible assets without available data. "Eligible assets without available data" refers to assets that have insufficient data and/or low data quality for a specific investment.

The attention of the recipient is drawn to the fact that for some specific PAIs (i.e., PAIs which are relative i) to investee companies' revenue or ii) to non-monetary units such as physical flows), the calculation is rebased on eligible assets with available data only for data quality and comparability purposes. Such exclusion at the denominator is reflected and disclosed through the coverage ratios for the relevant indicators: the coverage disclosed reflects the proportion of eligible assets for which data is available and provided in this document; in addition, to ensure full transparency on the scope of assets where PAIs are disclosed, the coverage based on the current value of all investments is also disclosed.

Reported PAI indicators based on the current value of all investments	Reported PAI indicators based on eligible assets, excluding eligible assets with no available data
PAI indicators 2, 4, 7, 10, 11 and 14	PAI indicators 3 and 6

N.B.: PAI indicators 1 and 16 are not based neither on any of these two approaches as being PAIs in absolute values (noting that the PAI 16 is also relative to the number of invested countries in addition to the absolute value number), i.e., having no denominator in their formula.

More details on our methodologies to account and disclose PAIs are available in AXA IM ESG Methodologies Handbook available on AXA IM website: <https://www.axa-im.com/our-policies-and-reports>

What were the top investments of this financial product?

The top investments of the Financial Product (based on the NACE classification's divisions: NACE level 2) are detailed below:

Largest investments	Sector (NACE level 2)	% Assets	Country
TAIWAN SEMICONDUCTOR MANUFAC XTAI TWD	Manufacture of machinery and equipment n.e.c.	8.91%	TW
INVECO MSCI SAUDI ARABIA	Financial service activities, except insurance and pension funding	3.84%	IE
SAMSUNG ELECTRONICS CO LTD XKRX KRW	Manufacture of computer, electronic and optical products	3.67%	KR
SK HYNIX INC XKRX KRW	Manufacture of computer, electronic and optical products	1.96%	KR
INFOSYS LTD XNSE INR	Computer programming, consultancy and related activities	1.87%	IN
MEDIATEK INC XTAI TWD	Manufacture of computer, electronic and optical products	1.79%	TW

TATA CONSULTANCY SVCS LTD XNSE INR	Computer programming, consultancy and related activities	1.6%	IN
CHINA CONSTRUCTION BANK-H XHKG HKD	Financial service activities, except insurance and pension funding	1.57%	CN
HON HAI PRECISION INDUSTRY XTAI TWD	Manufacture of computer, electronic and optical products	1.5%	TW
PING AN INSURANCE GROUP CO-H XHKG HKD	Insurance, reinsurance and pension funding, except compulsory social security	1.38%	CN
JD.COM INC-ADR XNGS USD	Retail trade, except of motor vehicles and motorcycles	1.3%	CN
PETROBRAS - PETROLEO BRAS-PR BVMF BRL	Manufacture of coke and refined petroleum products	1.23%	BR
HCL TECHNOLOGIES LTD XNSE INR	Computer programming, consultancy and related activities	1.09%	IN
STANDARD BANK GROUP LTD XJSE ZAR	Financial service activities, except insurance and pension funding	1.08%	ZA

The portfolio proportions of investments presented above are an average over the reference period.

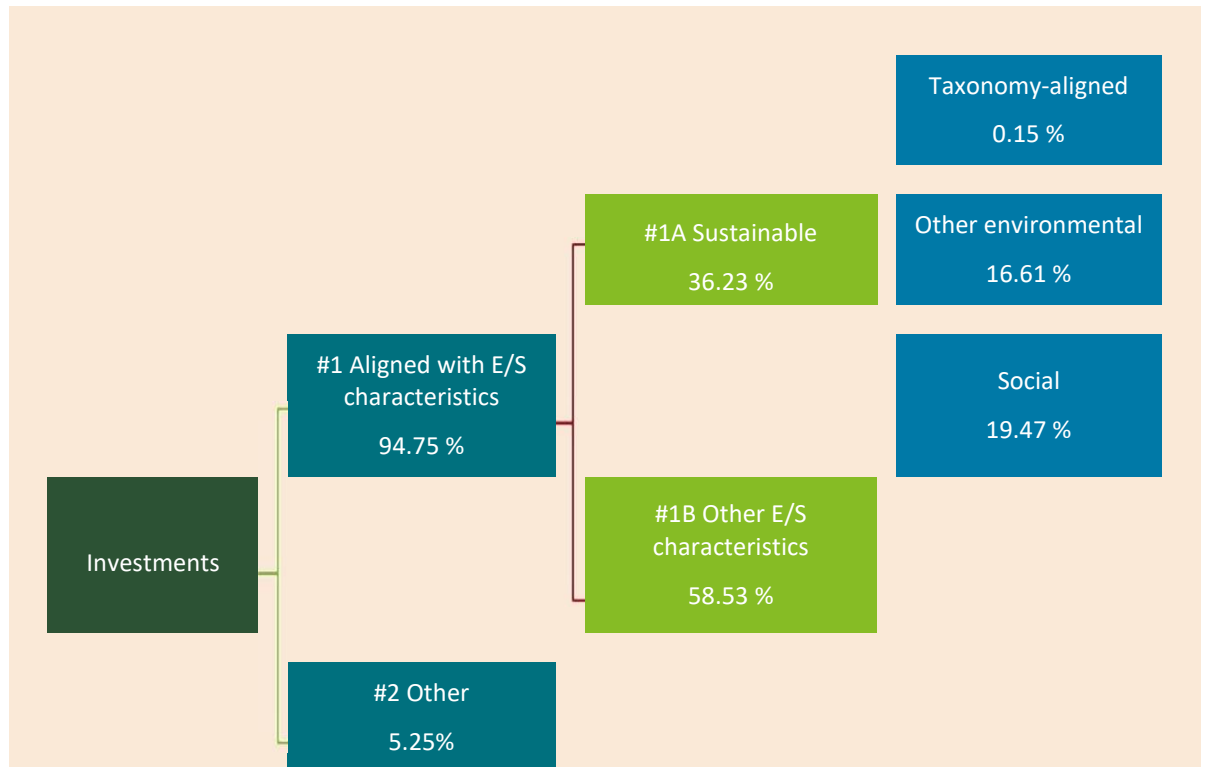

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/04/2024-31/03/2025

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The actual asset allocation has been reported based on an average of the data available at end of each quarter of the reference period.

Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

In which economic sectors were the investments made?

Financial product's investments were made in the economic sectors (based on NACE level 2) detailed below:

Top sector (NACE level 2)	Proportion
Financial service activities, except insurance and pension funding	25.72%
Manufacture of computer, electronic and optical products	10.99%
Manufacture of machinery and equipment n.e.c.	10.47%
Computer programming, consultancy and related activities	5.65%
Retail trade, except of motor vehicles and motorcycles	5.38%
Insurance, reinsurance and pension funding, except compulsory social security	4.39%
Manufacture of motor vehicles, trailers and semi-trailers	3.79%
Manufacture of basic pharmaceutical products and pharmaceutical preparations	3.6%
Manufacture of coke and refined petroleum products	3.11%

Information service activities	2.72%
Electricity, gas, steam and air conditioning supply	2.6%
Water transport	2.24%
Real estate activities	1.75%
Manufacture of electrical equipment	1.58%
Wholesale trade, except of motor vehicles and motorcycles	1.41%
Human health activities	1.36%
Other	1.33%
Activities auxiliary to financial services and insurance activities	1.3%
Food and beverage service activities	1.14%
Publishing activities	1.05%
Telecommunications	0.92%
Manufacture of food products	0.86%
Civil engineering	0.82%
Warehousing and support activities for transportation	0.74%
Manufacture of other transport equipment	0.73%
Manufacture of paper and paper products	0.52%
Mining of metal ores	0.5%
Manufacture of beverages	0.49%
Construction of buildings	0.35%
Other manufacturing	0.33%
Manufacture of rubber and plastic products	0.29%
Manufacture of basic metals	0.27%
Manufacture of chemicals and chemical products	0.27%
Manufacture of other non-metallic mineral products	0.22%
Accommodation	0.21%
Manufacture of fabricated metal products, except machinery and equipment	0.18%
Manufacture of wearing apparel	0.18%
Scientific research and development	0.18%
Manufacture of leather and related products	0.11%
Gambling and betting activities	0.1%
Mining support service activities	0.08%
Water collection, treatment and supply	0.08%
Wholesale and retail trade and repair of motor vehicles and motorcycles	0.03%
Architectural and engineering activities, technical testing and analysis	0%

The portfolio proportions of investments presented above are an average over the reference period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product took into consideration the criteria of the EU Taxonomy environmental objectives, and the “do not significantly harm” principles. It is invested in activities aligned with the objectives of the EU Taxonomy. The Taxonomy alignment of the Financial Product has been provided by an external data provider and have been consolidated at portfolio level by AXA IM. Nevertheless, it has not been subject to an audit or a review by a third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?³

- Yes
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The Financial Product has invested 0% of its Net Asset Value in transitional activities and 0% of its Net Asset Value in enabling activities.

³ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of EU Taxonomy-aligned investments			
	2025	2024	2023
Revenue-based	0.15%	0.00%	0.00%

Source: AXA IM, based on S&P Trucost, 2025

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 16.61% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

 **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 19.47% of sustainable investments with a social objective.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 5.25% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be transferable securities such as equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the Financial Product continued to apply all AXA IM exclusion policies, for which the exclusion criteria were updated - for the most recent updates - in 2023, but which exclusion lists were updated in 2024. More details on AXA IM exclusion policies are available under the following link: [Sustainability Policies and Reports | AXA IM Corporate](#)

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: AXA IM Global Equity QI (the “Financial Product”)

Legal Entity Identifier: 213800DTKFJLOJGCQU20

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> YES	● <input checked="" type="checkbox"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 65.44 % of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon Intensity
- Water Intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil & gas activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization’s (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period
- Protection of human rights avoiding investing in debt instruments issued by countries where the worst forms of human right violations are observed.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● How did the sustainability indicators perform?

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to Benchmark during the reference period.

Sustainability KPI Name	Value	Benchmark	Coverage
Carbon Intensity	69.23 Metric tonnes of carbon dioxide equivalents per million \$ of revenue (for corporates only) - Scope 1+2	129.76 Metric tonnes of carbon dioxide equivalents per million \$ of revenue (for corporates only) - Scope 1+2	99.97 %
Water Intensity	1080.61 Thousands of cubic meters per million \$ of revenue (for corporates only)	5124.93 Thousands of cubic meters per million \$ of revenue (for corporates only)	99.97 %

N.B.: KPIs and benchmarks are reported based on an average of the data available at each end of month of the reference period.

● ... And compared to previous periods?

Sustainability KPI Name	Year	Value	Benchmark	Coverage
Carbon Intensity	2024	103.96 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	134.25 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	100 %
Water Intensity	2024	1419.18 Thousands of cubic meters for corporates	3211.75 Thousands of cubic meters for corporates	100 %
Carbon intensity	2023	132.58 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	188.03 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	100 %
Water intensity	2023	1758.03 Thousands of cubic meters for corporates	7008.71 Thousands of cubic meters for corporates	100 %

N.B.: While Sustainability KPIs are reported based on an average of the data available at each end of quarter of the reference period, for technical reasons benchmarks are reported based on end of year data only. Therefore, the comparison should not be taken as such at face value and should not be interpreted as a breach of the binding elements disclosed into the Financial Product's legal documentation, as figures disclosed for the benchmark are not based on the same accounting approach than for those disclosed for the Financial Product.

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

1. UN Sustainable Development Goals alignment (SDG) of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2. Integration of issuers engaged in a solid Transition Pathway consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product took into consideration the criteria of the EU Taxonomy environmental objectives, and the "do not significantly harm" principles. It is invested in activities aligned with the objectives of the EU Taxonomy. The Taxonomy alignment of the Financial Product has been provided by an external data provider and have been consolidated at portfolio level by AXA IM. Nevertheless, it has not been subject to an audit or a review by a third party.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below –5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to ‘significantly contributing’ to -10 corresponding to ‘significantly obstructing’, unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM’s sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through (i) AXA IM sectorial exclusion policies and AXA IM ESG standards that have been applied bindingly at all times by the Financial Product, as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

For Sovereign and supnationals:

¹ The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively. Not all high impact climate sectors are targeted by the exclusion policy for the time being.

² The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

Relevant AXA IM policies	PAI indicator	Units	Measurement	Coverage in % based on Total AUM	Coverage in % based on eligible assets
<ul style="list-style-type: none"> AXA IM ESG Standards policy, through the exclusion of investee countries with severe social violations Compliance black-list based on international and EU sanctions 	PAI 16: Sovereign Investee countries subject to social violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	N/A	Absolute number: 0 Relative number: 0	N/A

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

Relevant AXA IM policies	PAI indicator	Units	Measurement	Coverage in % based on Total AUM	Coverage in % based on eligible assets
Climate Risk policy	PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)	Metric tonnes of carbon dioxide equivalents (tCO2e)	Scope 1: 20860.584	Scope 1: 99 Scope 2: 99 Scope 3: 98 Scope 1+2: 99 Scope 1+2+3: 98	Scope 1: 100 Scope 2: 100 Scope 3: 99 Scope 1+2: 100 Scope 1+2+3: 99
Ecosystem protection & Deforestation policy			Scope 2: 5027.167 Scope 3: 265833.313 Scope 1+2: 25887.75 Scope 1+2+3: 291719.813		
Climate Risk policy	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/€M)	Scope 1+2: 40.35	Scope 1+2: 99 Scope 1+2+3: 98	Scope 1+2: 100 Scope 1+2+3: 99
Ecosystem protection & Deforestation policy			Scope 1+2+3: 443.101		
Climate Risk policy	PAI 3: GHG intensity of investee companies	Metric tonnes of carbon dioxide equivalents per million euro of revenue (tCO2e/€M)	Scope 1+2+3: 1146.137	Scope 1+2+3: 98	Scope 1+2+3: 99
Ecosystem protection & Deforestation policy					
Climate Risk policy	PAI 4: Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector (% of AuM)	3.75	99	100
Climate Risk policy (engagement only)	PAI 5: Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable	Energy Consumption: 56.9 Energy Production: 58.97	Energy Consumption: 97 Energy Production: 1	Energy Consumption: 98 Energy Production: 1

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

		energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)			
Ecosystem protection & Deforestation policy	PAI 7: Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas (% of AuM)	42.81	91	91
ESG standard policy / violation of international norms and standards	PAI 10: Violation of UN Global Compact principles & OECD Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (% of AuM)	0%	99	100

<ul style="list-style-type: none"> AXA IM ESG Standards policy, through the exclusion of investee countries with severe social violations Compliance black-list based on international and EU sanctions 	PAI 16: Sovereign Investee countries subject to social violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	N/A	Absolute number: 0 Relative number: 0	N/A

Source: S&P Trucost, 2025

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

N.B.: PAIs are reported based on an average of the impacts at each end of quarter of the reference period where data is available.

Figures disclosed on PAI indicators can either be based on the "current value of all investments" as defined by the Regulation, or on "eligible assets with available data only" where relevant. For the purpose of this document, "eligible assets with available data only" refers to all investments (i.e., investee companies, or sovereign and supranational, or real estate assets, depending on the PAI), excluding derivatives, cash and cash equivalent and eligible assets without available data. "Eligible assets without available data" refers to assets that have insufficient data and/or low data quality for a specific investment.

The attention of the recipient is drawn to the fact that for some specific PAIs (i.e., PAIs which are relative i) to investee companies' revenue or ii) to non-monetary units such as physical flows), the calculation is rebased on eligible assets with available data only for data quality and comparability purposes. Such exclusion at the denominator is reflected and disclosed through the coverage ratios for the relevant indicators: the coverage disclosed reflects the proportion of eligible assets for which data is available and provided in this document; in addition, to ensure full transparency on the scope of assets where PAIs are disclosed, the coverage based on the current value of all investments is also disclosed.

Reported PAI indicators based on the current value of all investments	Reported PAI indicators based on eligible assets, excluding eligible assets with no available data
PAI indicators 2, 4, 7, 10, 11 and 14	PAI indicators 3 and 6

N.B.: PAI indicators 1 and 16 are not based neither on any of these two approaches as being PAIs in absolute values (noting that the PAI 16 is also relative to the number of invested countries in addition to the absolute value number), i.e., having no denominator in their formula.

More details on our methodologies to account and disclose PAIs are available in AXA IM ESG Methodologies Handbook available on AXA IM website: <https://www.axa-im.com/our-policies-and-reports>

What were the top investments of this financial product?

The top investments of the Financial Product (based on the NACE classification's divisions: NACE level 2) are detailed below:

Largest investments	Sector (NACE level 2)	% Assets	Country
APPLE INC XNGS USD	Manufacture of computer, electronic and optical products	5.14%	US
NVIDIA CORP XNGS USD	Manufacture of computer, electronic and optical products	4.82%	US
MICROSOFT CORP XNGS USD	Publishing activities	4.05%	US
ALPHABET INC-CL A XNGS USD	Information service activities	2.37%	US
AMAZON.COM INC XNGS USD	Retail trade, except of motor vehicles and motorcycles	2.33%	US
META PLATFORMS INC-CLASS A XNGS USD	Information service activities	1.7%	US
PROCTER & GAMBLE CO/THE XNYS USD	Manufacture of paper and paper products	1.19%	US
CISCO SYSTEMS INC XNGS USD	Manufacture of computer, electronic and optical products	1.13%	US
NOVARTIS AG-REG XSWX CHF	Manufacture of basic pharmaceutical products and pharmaceutical preparations	1.1%	CH
ABBVIE INC XNYS USD	Manufacture of basic pharmaceutical products and pharmaceutical preparations	1.01%	US
MERCK & CO. INC. XNYS USD	Manufacture of basic pharmaceutical products and pharmaceutical preparations	1.01%	US
PFIZER INC XNYS USD	Manufacture of basic pharmaceutical products and pharmaceutical preparations	0.99%	US
MEDTRONIC PLC XNYS USD	Manufacture of computer, electronic and optical products	0.99%	IE
CATERPILLAR INC XNYS USD	Manufacture of machinery and equipment n.e.c.	0.98%	US
GILEAD SCIENCES INC XNGS USD	Scientific research and development	0.97%	US

The portfolio proportions of investments presented above are an average over the reference period.

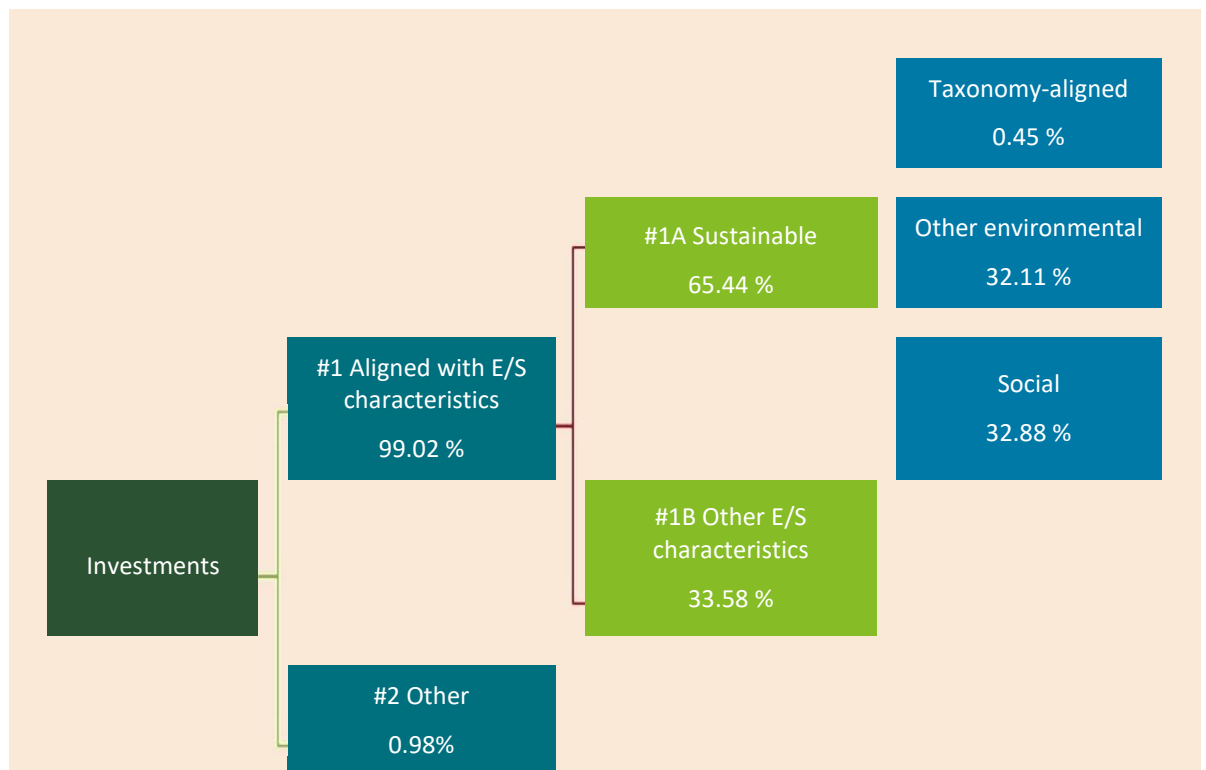

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/04/2024-31/03/2025

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The actual asset allocation has been reported based on an average of the data available at end of each quarter of the reference period.

Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

In which economic sectors were the investments made?

Financial product's investments were made in the economic sectors (based on NACE level 2) detailed below:

Top sector (NACE level 2)	Proportion
Manufacture of computer, electronic and optical products	19.49%
Publishing activities	11.02%
Manufacture of basic pharmaceutical products and pharmaceutical preparations	9.41%
Insurance, reinsurance and pension funding, except compulsory social security	7.51%
Retail trade, except of motor vehicles and motorcycles	5.96%
Information service activities	4.94%
Financial service activities, except insurance and pension funding	4.3%
Manufacture of machinery and equipment n.e.c.	4.26%
Manufacture of motor vehicles, trailers and semi-trailers	3.65%

Activities auxiliary to financial services and insurance activities	3.28%
Manufacture of paper and paper products	2.24%
Telecommunications	2.22%
Computer programming, consultancy and related activities	2.05%
Construction of buildings	1.85%
Scientific research and development	1.53%
Legal and accounting activities	1.32%
Extraction of crude petroleum and natural gas	1.3%
Electricity, gas, steam and air conditioning supply	1.28%
Wholesale trade, except of motor vehicles and motorcycles	1.08%
Other	0.93%
Motion picture, video and television programme production, sound recording and music publishing activity	0.91%
Gambling and betting activities	0.86%
Manufacture of wearing apparel	0.83%
Manufacture of basic metals	0.81%
Other manufacturing	0.7%
Manufacture of chemicals and chemical products	0.7%
Manufacture of coke and refined petroleum products	0.66%
Manufacture of other transport equipment	0.57%
Postal and courier activities	0.52%
Water transport	0.44%
Manufacture of beverages	0.43%
Manufacture of electrical equipment	0.42%
Manufacture of fabricated metal products, except machinery and equipment	0.42%
Manufacture of food products	0.32%
Human health activities	0.32%
Advertising and market research	0.31%
Food and beverage service activities	0.25%
Manufacture of other non-metallic mineral products	0.19%
Security and investigation activities	0.14%
Office administrative, office support and other business support activities	0.12%
Architectural and engineering activities, technical testing and analysis	0.12%
Real estate activities	0.11%
Air transport	0.1%
Manufacture of leather and related products	0.09%

The portfolio proportions of investments presented above are an average over the reference period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product took into consideration the criteria of the EU Taxonomy environmental objectives, and the “do not significantly harm” principles. It is invested in activities aligned with the objectives of the EU Taxonomy. The Taxonomy alignment of the Financial Product has been provided by an external data provider and have been consolidated at portfolio level by AXA IM. Nevertheless, it has not been subject to an audit or a review by a third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?³

- Yes
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

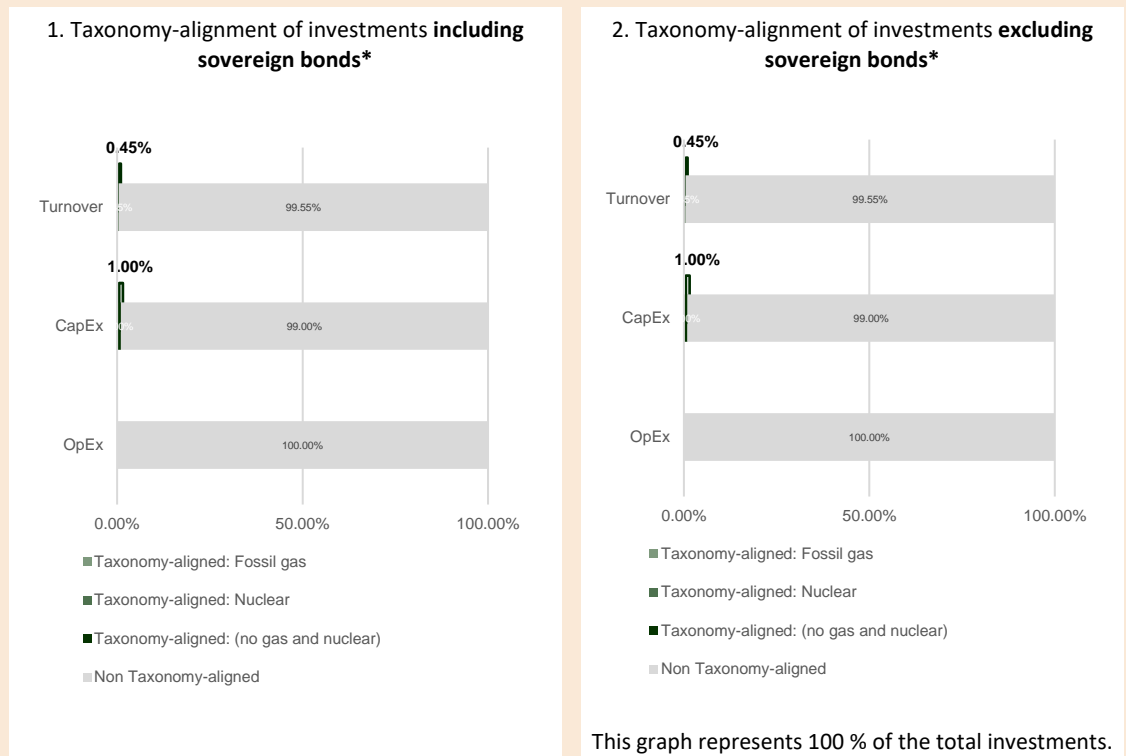

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The Financial Product has invested 0% of its Net Asset Value in transitional activities and 0% of its Net Asset Value in enabling activities.

³ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of EU Taxonomy-aligned investments			
	2025	2024	2023
Revenue-based	0.45%	0.00%	0.00%
CapEx-based	1.00%	0.00%	0.00%
OpEx-based	0.00%	0.00%	0.00%

Source: AXA IM, based on S&P Trucost, 2025

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 32.11% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

- **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 32.88% of sustainable investments with a social objective.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 0.98% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be transferable securities such as equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

During the reference period, the Financial Product continued to apply all AXA IM exclusion policies, for which the exclusion criteria were updated - for the most recent updates - in 2023, but which exclusion lists were updated in 2024. More details on AXA IM exclusion policies are available under the following link: [Sustainability Policies and Reports | AXA IM Corporate](#)

- **How did this financial product perform compared to the reference benchmark?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: AXA IM Global Small Cap Equity **Legal Entity Identifier:** 21380050B6LSRNHZ9E68
QI (the “Financial Product”)

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> YES	●● <input checked="" type="checkbox"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 37.17 % of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon Intensity
- Water Intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil & gas activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization’s (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period
- Protection of human rights avoiding investing in debt instruments issued by countries where the worst forms of human right violations are observed.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● How did the sustainability indicators perform?

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to Benchmark during the reference period.

Sustainability KPI Name	Value	Benchmark	Coverage
Carbon Intensity	111.83 Metric tonnes of carbon dioxide equivalents per million \$ of revenue (for corporates only) - Scope 1+2	180.58 Metric tonnes of carbon dioxide equivalents per million \$ of revenue (for corporates only) - Scope 1+2	99.44 %
Water Intensity	4344.68 Thousands of cubic meters per million \$ of revenue (for corporates only)	8811.18 Thousands of cubic meters per million \$ of revenue (for corporates only)	99.44 %

N.B.: KPIs and benchmarks are reported based on an average of the data available at each end of month of the reference period.

● ... And compared to previous periods?

Sustainability KPI Name	Year	Value	Benchmark	Coverage
Carbon Intensity	2024	165.77 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	176.59 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	99.36 %
Water Intensity	2024	5743.49 Thousands of cubic meters for corporates	7766.38 Thousands of cubic meters for corporates	99.36 %
Carbon intensity	2023	170.86 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	225.49 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	100 %
Water intensity	2023	7030.48 Thousands of cubic meters for corporates	12724.04 Thousands of cubic meters for corporates	100 %

N.B.: While Sustainability KPIs are reported based on an average of the data available at each end of quarter of the reference period, for technical reasons benchmarks are reported based on end of year data only. Therefore, the comparison should not be taken as such at face value and should not be interpreted as a breach of the binding elements disclosed into the Financial Product's legal documentation, as figures disclosed for the benchmark are not based on the same accounting approach than for those disclosed for the Financial Product.

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

1. UN Sustainable Development Goals alignment (SDG) of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2. Integration of issuers engaged in a solid Transition Pathway consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product took into consideration the criteria of the EU Taxonomy environmental objectives, and the "do not significantly harm" principles. It is invested in activities aligned with the objectives of the EU Taxonomy. The Taxonomy alignment of the Financial Product has been provided by an external data provider and have been consolidated at portfolio level by AXA IM. Nevertheless, it has not been subject to an audit or a review by a third party.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below –5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to ‘significantly contributing’ to -10 corresponding to ‘significantly obstructing’, unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM’s sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through (i) AXA IM sectorial exclusion policies and AXA IM ESG standards that have been applied bindingly at all times by the Financial Product, as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

For Sovereign and supnationals:

¹ The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively. Not all high impact climate sectors are targeted by the exclusion policy for the time being.

² The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

Relevant AXA IM policies	PAI indicator	Units	Measurement	Coverage in % based on Total AUM	Coverage in % based on eligible assets
<ul style="list-style-type: none"> AXA IM ESG Standards policy, through the exclusion of investee countries with severe social violations Compliance black-list based on international and EU sanctions 	PAI 16: Sovereign Investee countries subject to social violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	N/A	Absolute number: 0 Relative number: 0	N/A

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

Relevant AXA IM policies	PAI indicator	Units	Measurement	Coverage in % based on Total AUM	Coverage in % based on eligible assets
Climate Risk policy	PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)	Metric tonnes of carbon dioxide equivalents (tCO2e)	Scope 1: 3711.866	Scope 1: 98 Scope 2: 98 Scope 3: 97 Scope 1+2: 98 Scope 1+2+3: 97	Scope 1: 100 Scope 2: 100 Scope 3: 98 Scope 1+2: 100 Scope 1+2+3: 98
Ecosystem protection & Deforestation policy			Scope 2: 1513.232 Scope 3: 64398.824 Scope 1+2: 5225.099 Scope 1+2+3: 69613.445		
Climate Risk policy	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/€M)	Scope 1+2: 70.653	Scope 1+2: 98 Scope 1+2+3: 97	Scope 1+2: 99 Scope 1+2+3: 98
Ecosystem protection & Deforestation policy			Scope 1+2+3: 921.676		
Climate Risk policy	PAI 3: GHG intensity of investee companies	Metric tonnes of carbon dioxide equivalents per million euro of revenue (tCO2e/€M)	Scope 1+2+3: 1118.956	Scope 1+2+3: 97	Scope 1+2+3: 98
Ecosystem protection & Deforestation policy					
Climate Risk policy	PAI 4: Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector (% of AuM)	5.86	98	100
Climate Risk policy (engagement only)	PAI 5: Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable	Energy Consumption: 73.61 Energy Production: 97.21	Energy Consumption: 94 Energy Production: 1	Energy Consumption: 95 Energy Production: 1

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

		energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)			
Ecosystem protection & Deforestation policy	PAI 7: Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas (% of AuM)	21.28	65	66
ESG standard policy / violation of international norms and standards	PAI 10: Violation of UN Global Compact principles & OECD Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (% of AuM)	0%	99	100

Controversial weapons policy	PAI 14: Exposure to controversial weapons	Share of investments in investee companies involved in the manufacture or selling of controversial weapons (% of AuM)	0	99	100

For Sovereign and supranationals:

Relevant AXA IM policies	PAI indicator	Units	Measurement	Coverage in % based on Total AUM	Coverage in % based on eligible assets
<ul style="list-style-type: none"> AXA IM ESG Standards policy, through the exclusion of investee countries with severe social violations Compliance black-list based on international and EU sanctions 	PAI 16: Sovereign Investee countries subject to social violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	N/A	Absolute number: 0 Relative number: 0	N/A

Source: S&P Trucost, 2025

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

N.B.: PAIs are reported based on an average of the impacts at each end of quarter of the reference period where data is available.

Figures disclosed on PAI indicators can either be based on the "current value of all investments" as defined by the Regulation, or on "eligible assets with available data only" where relevant. For the purpose of this document, "eligible assets with available data only" refers to all investments (i.e., investee companies, or sovereign and supranational, or real estate assets, depending on the PAI), excluding derivatives, cash and cash equivalent and eligible assets without available data. "Eligible assets without available data" refers to assets that have insufficient data and/or low data quality for a specific investment.

The attention of the recipient is drawn to the fact that for some specific PAIs (i.e., PAIs which are relative i) to investee companies' revenue or ii) to non-monetary units such as physical flows), the calculation is rebased on eligible assets with available data only for data quality and comparability purposes. Such exclusion at the denominator is reflected and disclosed through the coverage ratios for the relevant indicators: the coverage disclosed reflects the proportion of eligible assets for which data is available and provided in this document; in addition, to ensure full transparency on the scope of assets where PAIs are disclosed, the coverage based on the current value of all investments is also disclosed.

Reported PAI indicators based on the current value of all investments	Reported PAI indicators based on eligible assets, excluding eligible assets with no available data
PAI indicators 2, 4, 7, 10, 11 and 14	PAI indicators 3 and 6

N.B.: PAI indicators 1 and 16 are not based neither on any of these two approaches as being PAIs in absolute values (noting that the PAI 16 is also relative to the number of invested countries in addition to the absolute value number), i.e., having no denominator in their formula.

More details on our methodologies to account and disclose PAIs are available in AXA IM ESG Methodologies Handbook available on AXA IM website: <https://www.axa-im.com/our-policies-and-reports>

What were the top investments of this financial product?

The top investments of the Financial Product (based on the NACE classification's divisions: NACE level 2) are detailed below:

Largest investments	Sector (NACE level 2)	% Assets	Country
Portfolio 1918 USD SET STT	Other	1.04%	N/A

ACI WORLDWIDE INC XNGS USD	Publishing activities	0.58%	US

The portfolio proportions of investments presented above are an average over the reference period.

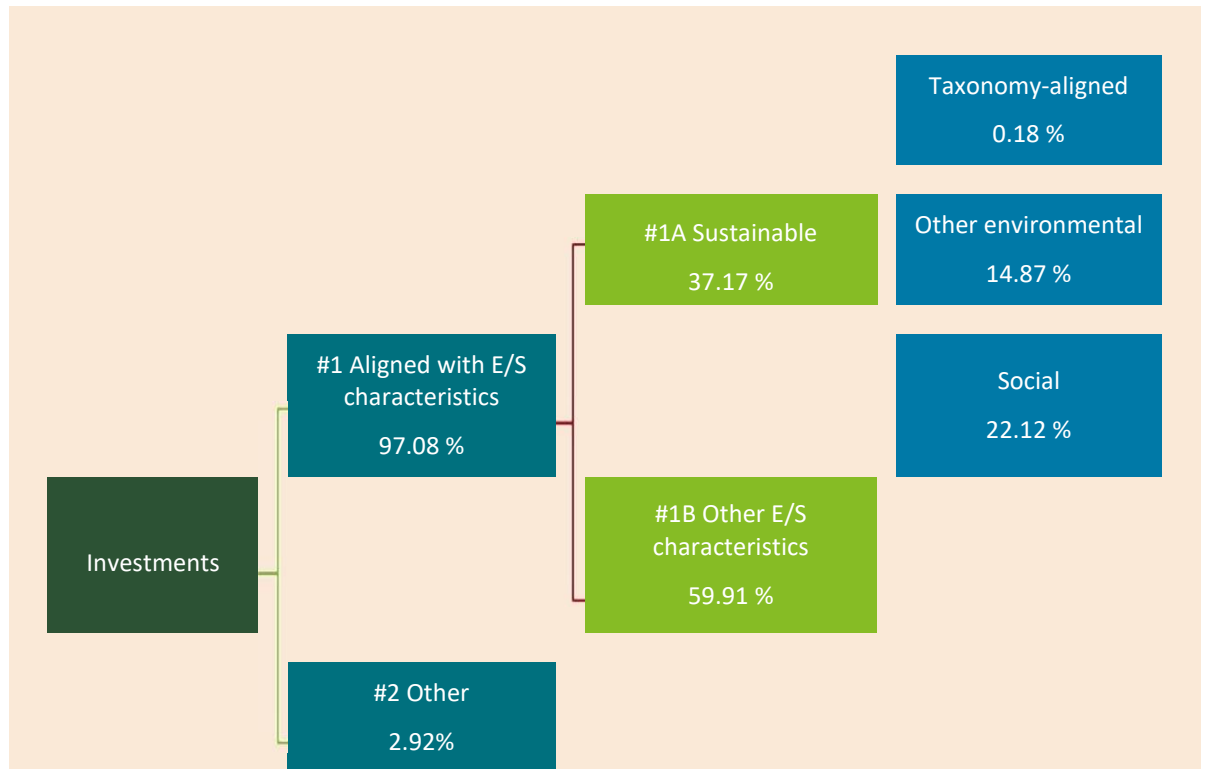

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/04/2024-31/03/2025

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The actual asset allocation has been reported based on an average of the data available at end of each quarter of the reference period.

Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

In which economic sectors were the investments made?

Financial product's investments were made in the economic sectors (based on NACE level 2) detailed below:

Top sector (NACE level 2)	Proportion
Publishing activities	9.25%
Financial service activities, except insurance and pension funding	8.36%
Retail trade, except of motor vehicles and motorcycles	7.47%
Manufacture of computer, electronic and optical products	6.28%
Real estate activities	4.33%
Construction of buildings	4.28%
Manufacture of machinery and equipment n.e.c.	3.93%
Activities auxiliary to financial services and insurance activities	3.66%
Insurance, reinsurance and pension funding, except compulsory social security	3.38%

Manufacture of electrical equipment	2.76%
Other manufacturing	2.72%
Manufacture of motor vehicles, trailers and semi-trailers	2.59%
Mining of metal ores	2.54%
Manufacture of basic pharmaceutical products and pharmaceutical preparations	2.46%
Human health activities	2.18%
Computer programming, consultancy and related activities	2.05%
Manufacture of chemicals and chemical products	1.96%
Extraction of crude petroleum and natural gas	1.53%
Wholesale trade, except of motor vehicles and motorcycles	1.48%
Electricity, gas, steam and air conditioning supply	1.47%
Other	1.25%
Scientific research and development	1.2%
Security and investigation activities	1.19%
Manufacture of other non-metallic mineral products	1.03%
Manufacture of beverages	0.98%
Motion picture, video and television programme production, sound recording and music publishing activity	0.92%
Civil engineering	0.86%
Information service activities	0.84%
Education	0.84%
Food and beverage service activities	0.8%
Manufacture of rubber and plastic products	0.77%
Manufacture of wearing apparel	0.74%
Manufacture of leather and related products	0.69%
Manufacture of basic metals	0.69%
Rental and leasing activities	0.66%
Manufacture of paper and paper products	0.66%
Manufacture of food products	0.65%
Legal and accounting activities	0.63%
Mining support service activities	0.63%
Warehousing and support activities for transportation	0.61%
Manufacture of furniture	0.58%
Employment activities	0.55%
Programming and broadcasting activities	0.53%
Wholesale and retail trade and repair of motor vehicles and motorcycles	0.52%
Manufacture of fabricated metal products, except machinery and equipment	0.52%
Residential care activities	0.51%
Activities of head offices, management consultancy activities	0.5%
Manufacture of other transport equipment	0.42%
Land transport and transport via pipelines	0.41%
Gambling and betting activities	0.39%
Manufacture of wood and of products of wood and cork, except furniture, manufacture of articles of straw and plaiting materials	0.36%
Telecommunications	0.36%
Accommodation	0.35%
Services to buildings and landscape activities	0.33%
Crop and animal production, hunting and related service activities	0.27%
Architectural and engineering activities, technical testing and analysis	0.26%

Water transport	0.26%
Air transport	0.23%
Printing and reproduction of recorded media	0.22%
Other personal service activities	0.15%
Fishing and aquaculture	0.15%
Mining of coal and lignite	0.14%
Office administrative, office support and other business support activities	0.13%
Other professional, scientific and technical activities	0.11%
Manufacture of textiles	0.11%
Sports activities and amusement and recreation activities	0.09%
Waste collection, treatment and disposal activities, materials recovery	0.07%
Other mining and quarrying	0.06%
Travel agency, tour operator reservation service and related activities	0.04%
Advertising and market research	0.03%
Manufacture of coke and refined petroleum products	0.03%
Public administration and defence, compulsory social security	0.02%

The portfolio proportions of investments presented above are an average over the reference period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product took into consideration the criteria of the EU Taxonomy environmental objectives, and the “do not significantly harm” principles. It is invested in activities aligned with the objectives of the EU Taxonomy. The Taxonomy alignment of the Financial Product has been provided by an external data provider and have been consolidated at portfolio level by AXA IM. Nevertheless, it has not been subject to an audit or a review by a third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?³

- Yes
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

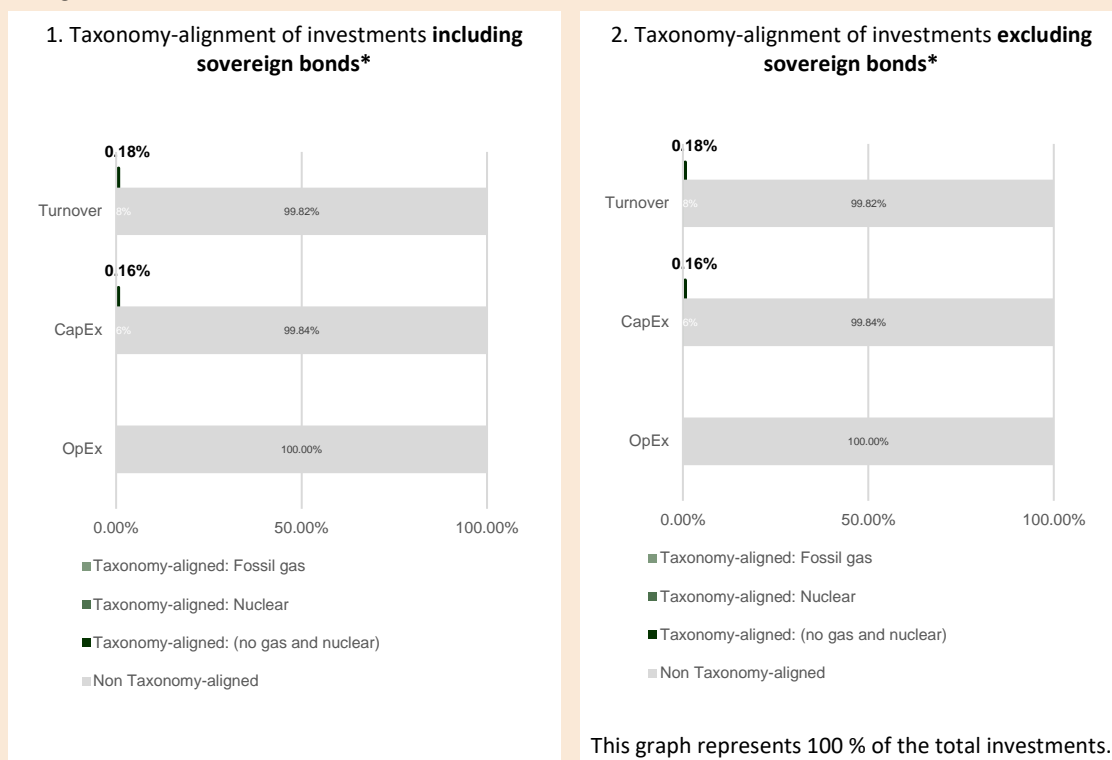

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

³ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change (“climate change mitigation”) and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product has invested 0% of its Net Asset Value in transitional activities and 0% of its Net Asset Value in enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of EU Taxonomy-aligned investments			
	2025	2024	2023
Revenue-based	0.18%	0.00%	0.00%
CapEx-based	0.16%	0.00%	0.00%
OpEx-based	0.00%	0.00%	0.00%

Source: AXA IM, based on S&P Trucost, 2025

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 14.87% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

● **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 22.12% of sustainable investments with a social objective.

● **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The remaining "Other" investments represented 2.92% of the Financial Product's Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be transferable securities such as equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the Financial Product continued to apply all AXA IM exclusion policies, for which the exclusion criteria were updated - for the most recent updates - in 2023, but which exclusion lists were updated in 2024. More details on AXA IM exclusion policies are available under the following link: [Sustainability Policies and Reports | AXA IM Corporate](#)

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: AXA IM Japan Equity (the “Financial Product”)

Legal Entity Identifier: 213800W1TW7UE2C1YR70

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> YES	● <input checked="" type="checkbox"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 56.54 % of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon Intensity
- Water Intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil & gas activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization’s (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period
- Protection of human rights avoiding investing in debt instruments issued by countries where the worst forms of human right violations are observed.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to Benchmark during the reference period.

Sustainability KPI Name	Value	Benchmark	Coverage
Carbon Intensity	92.01 Metric tonnes of carbon dioxide equivalents per million \$ of revenue (for corporates only) - Scope 1+2	130.58 Metric tonnes of carbon dioxide equivalents per million \$ of revenue (for corporates only) - Scope 1+2	99.59 %
Water Intensity	1978.25 Thousands of cubic meters per million \$ of revenue (for corporates only)	4324.55 Thousands of cubic meters per million \$ of revenue (for corporates only)	99.59 %

N.B.: KPIs and benchmarks are reported based on an average of the data available at each end of month of the reference period.

● **... And compared to previous periods?**

Sustainability KPI Name	Year	Value	Benchmark	Coverage
Carbon Intensity	2024	136.32 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	137.52 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	99.71 %
Water Intensity	2024	6107.87 Thousands of cubic meters for corporates	5199.29 Thousands of cubic meters for corporates	99.71 %
Carbon intensity	2023	187.95 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	162.45 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	100 %
Water intensity	2023	12316.88 Thousands of cubic meters for corporates	6466.6 Thousands of cubic meters for corporates	100 %

N.B.: While Sustainability KPIs are reported based on an average of the data available at each end of quarter of the reference period, for technical reasons benchmarks are reported based on end of year data only. Therefore, the comparison should not be taken as such at face value and should not be interpreted as a breach of the binding elements disclosed into the Financial Product's legal documentation, as figures disclosed for the benchmark are not based on the same accounting approach than for those disclosed for the Financial Product.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

1. UN Sustainable Development Goals alignment (SDG) of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2. Integration of issuers engaged in a solid Transition Pathway consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below –5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to ‘significantly contributing’ to -10 corresponding to ‘significantly obstructing’, unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM’s sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through (i) AXA IM sectorial exclusion policies and AXA IM ESG standards that have been applied bindingly at all times by the Financial Product, as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

Relevant AXA IM policies	PAI indicator	Units	Measurement	Coverage in % based on Total AUM	Coverage in % based on eligible assets
Climate Risk policy Ecosystem Protection & Deforestation policy	PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023)	Metric tonnes of carbon dioxide equivalents (tCO2e)	Scope 1: 5788.448 Scope 2: 1596.927 Scope 3: 302946.469 Scope 1+2: 7385.375 Scope 1+2+3: 310291.656	Scope 1: 99 Scope 2: 99 Scope 3: 97 Scope 1+2: 99 Scope 1+2+3: 97	Scope 1: 100 Scope 2: 100 Scope 3: 97 Scope 1+2: 100 Scope 1+2+3: 97

For Sovereign and supnationals:

Relevant AXA IM policies	PAI indicator	Units	Measurement	Coverage in % based on Total AUM	Coverage in % based on eligible assets
• AXA IM ESG Standards policy, through the	PAI 16: Sovereign Investee countries	Number of investee countries subject to social violations	N/A	Absolute number: 0 Relative number: 0	N/A

² The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

exclusion of investee countries with severe social violations • Compliance black-list based on international and EU sanctions	subject to social violations	(absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law			
--	------------------------------	--	--	--	--

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

Relevant AXA IM policies	PAI indicator	Units	Measurement	Coverage in % based on Total AUM	Coverage in % based on eligible assets
Climate Risk policy	PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)	Metric tonnes of carbon dioxide equivalents (tCO ₂ e)	Scope 1: 5788.448	Scope 1: 99 Scope 2: 99 Scope 3: 97 Scope 1+2: 99 Scope 1+2+3: 97	Scope 1: 100 Scope 2: 100 Scope 3: 97 Scope 1+2: 100 Scope 1+2+3: 97
Ecosystem protection & Deforestation policy			Scope 2: 1596.927 Scope 3: 302946.469 Scope 1+2: 7385.375 Scope 1+2+3: 310291.656		
Climate Risk policy	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO ₂ e/€M)	Scope 1+2: 60.925	Scope 1+2: 99 Scope 1+2+3: 97	Scope 1+2: 100 Scope 1+2+3: 97
Ecosystem protection & Deforestation policy			Scope 1+2+3: 2620.209		
Climate Risk policy	PAI 3: GHG intensity of investee companies	Metric tonnes of carbon dioxide equivalents per million euro of revenue (tCO ₂ e/€M)	Scope 1+2+3: 3564.824	Scope 1+2+3: 97	Scope 1+2+3: 97
Ecosystem protection & Deforestation policy

Source: S&P Trucost, 2025

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

N.B.: PAIs are reported based on an average of the impacts at each end of quarter of the reference period where data is available.

Figures disclosed on PAI indicators can either be based on the "current value of all investments" as defined by the Regulation, or on "eligible assets with available data only" where relevant. For the purpose of this document, "eligible assets with available data only" refers to all investments (i.e., investee companies, or sovereign and supranational, or real estate assets, depending on the PAI), excluding derivatives, cash and cash equivalent and eligible assets without available data. "Eligible assets without available data" refers to assets that have insufficient data and/or low data quality for a specific investment. The attention of the recipient is drawn to the fact that for some specific PAIs (i.e., PAIs which are relative i) to investee companies' revenue or ii) to non-monetary units such as physical flows), the calculation is rebased on eligible assets with available data only for data quality and comparability purposes. Such exclusion at the denominator is reflected and disclosed through the coverage ratios for the relevant indicators: the coverage disclosed reflects the proportion of eligible assets for

which data is available and provided in this document; in addition, to ensure full transparency on the scope of assets where PAIs are disclosed, the coverage based on the current value of all investments is also disclosed.

Reported PAI indicators based on the current value of all investments	Reported PAI indicators based on eligible assets, excluding eligible assets with no available data
PAI indicators 2, 4, 7, 10, 11 and 14	PAI indicators 3 and 6

N.B.: PAI indicators 1 and 16 are not based neither on any of these two approaches as being PAIs in absolute values (noting that the PAI 16 is also relative to the number of invested countries in addition to the absolute value number), i.e., having no denominator in their formula.

More details on our methodologies to account and disclose PAIs are available in AXA IM ESG Methodologies Handbook available on AXA IM website: <https://www.axa-im.com/our-policies-and-reports>

What were the top investments of this financial product?

The top investments of the Financial Product (based on the NACE classification's divisions: NACE level 2) are detailed below:

Largest investments	Sector (NACE level 2)	% Assets	Country
TOYOTA MOTOR CORP XTKS JPY	Manufacture of motor vehicles, trailers and semi-trailers	4.35%	JP
SONY GROUP CORP XTKS JPY	Manufacture of computer, electronic and optical products	3.83%	JP
MITSUBISHI UFJ FINANCIAL GRO XTKS JPY	Financial service activities, except insurance and pension funding	3.41%	JP
KEYENCE CORP XTKS JPY	Manufacture of machinery and equipment n.e.c.	3.39%	JP
SOFTBANK GROUP CORP XTKS JPY	Telecommunications	3.23%	JP
FUJIFILM HOLDINGS CORP XTKS JPY	Other manufacturing	3.16%	JP
MITSUBISHI HEAVY INDUSTRIES XTKS JPY	Manufacture of electrical equipment	2.94%	JP
SOMPO HOLDINGS INC XTKS JPY	Insurance, reinsurance and pension funding, except compulsory social security	2.86%	JP
RECRUIT HOLDINGS CO LTD XTKS JPY	Employment activities	2.77%	JP
HITACHI LTD XTKS JPY	Manufacture of electrical equipment	2.76%	JP
TOKIO MARINE HOLDINGS INC XTKS JPY	Insurance, reinsurance and pension funding, except compulsory social security	2.62%	JP
NINTENDO CO LTD XTKS JPY	Manufacture of computer, electronic and optical products	2.43%	JP
TOYOTA INDUSTRIES CORP XTKS JPY	Manufacture of motor vehicles, trailers and semi-trailers	2.06%	JP
ADVANTEST CORP XTKS JPY	Manufacture of machinery and equipment n.e.c.	1.94%	JP
FAST RETAILING CO LTD XTKS JPY	Retail trade, except of motor vehicles and motorcycles	1.9%	JP

The portfolio proportions of investments presented above are an average over the reference period.

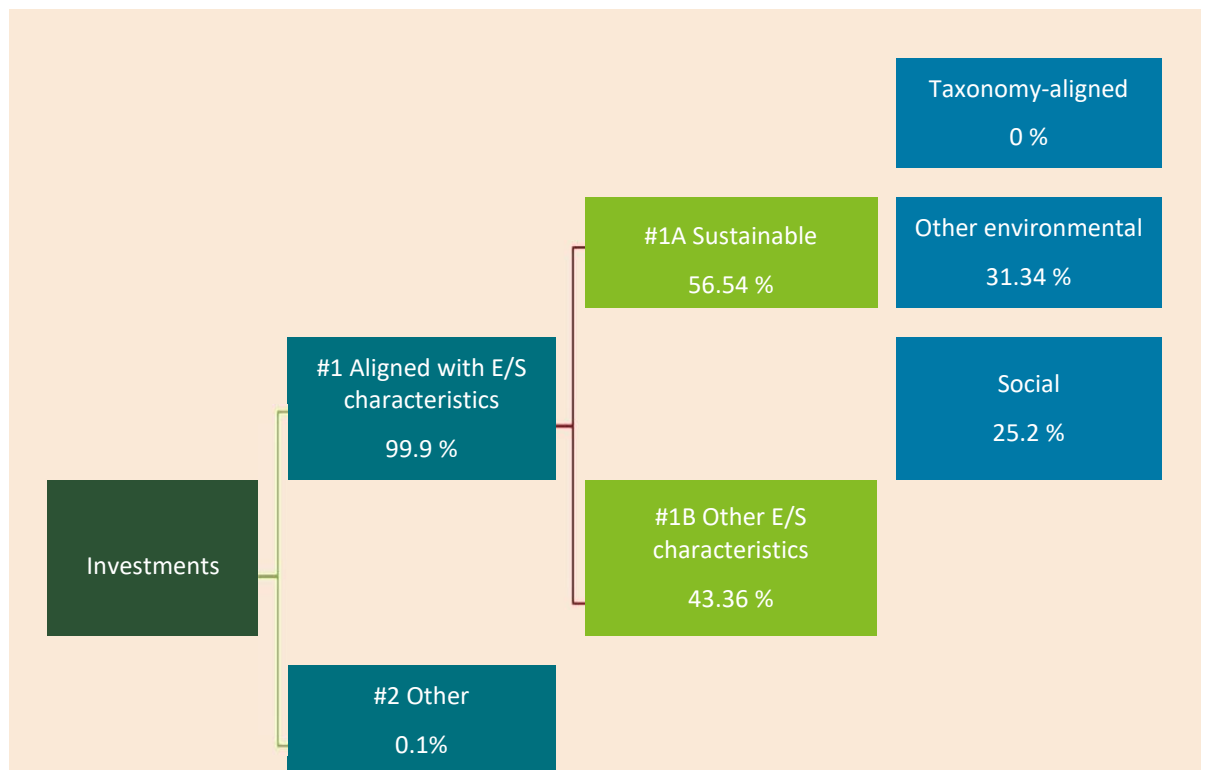

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/04/2024-31/03/2025

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The actual asset allocation has been reported based on an average of the data available at end of each quarter of the reference period.

Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

In which economic sectors were the investments made?

Financial product's investments were made in the economic sectors (based on NACE level 2) detailed below:

Top sector (NACE level 2)	Proportion
Manufacture of computer, electronic and optical products	13.03%
Manufacture of machinery and equipment n.e.c.	12.68%
Manufacture of electrical equipment	9.4%
Manufacture of motor vehicles, trailers and semi-trailers	7.95%
Financial service activities, except insurance and pension funding	7.41%
Insurance, reinsurance and pension funding, except compulsory social security	5.48%
Telecommunications	4.7%
Retail trade, except of motor vehicles and motorcycles	4.65%
Computer programming, consultancy and related activities	4.27%

Manufacture of food products	4.03%
Manufacture of basic pharmaceutical products and pharmaceutical preparations	3.39%
Other manufacturing	3.16%
Employment activities	2.77%
Real estate activities	2.28%
Wholesale trade, except of motor vehicles and motorcycles	2.14%
Construction of buildings	2.06%
Publishing activities	1.32%
Advertising and market research	1.05%
Activities auxiliary to financial services and insurance activities	1%
Security and investigation activities	0.91%
Manufacture of chemicals and chemical products	0.9%
Food and beverage service activities	0.88%
Waste collection, treatment and disposal activities, materials recovery	0.84%
Manufacture of paper and paper products	0.68%
Air transport	0.65%
Electricity, gas, steam and air conditioning supply	0.52%
Warehousing and support activities for transportation	0.46%
Sports activities and amusement and recreation activities	0.34%
Civil engineering	0.3%
Other	0.29%
Land transport and transport via pipelines	0.26%
Activities of head offices, management consultancy activities	0.13%
Information service activities	0.06%

The portfolio proportions of investments presented above are an average over the reference period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?³

Yes

In fossil gas In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

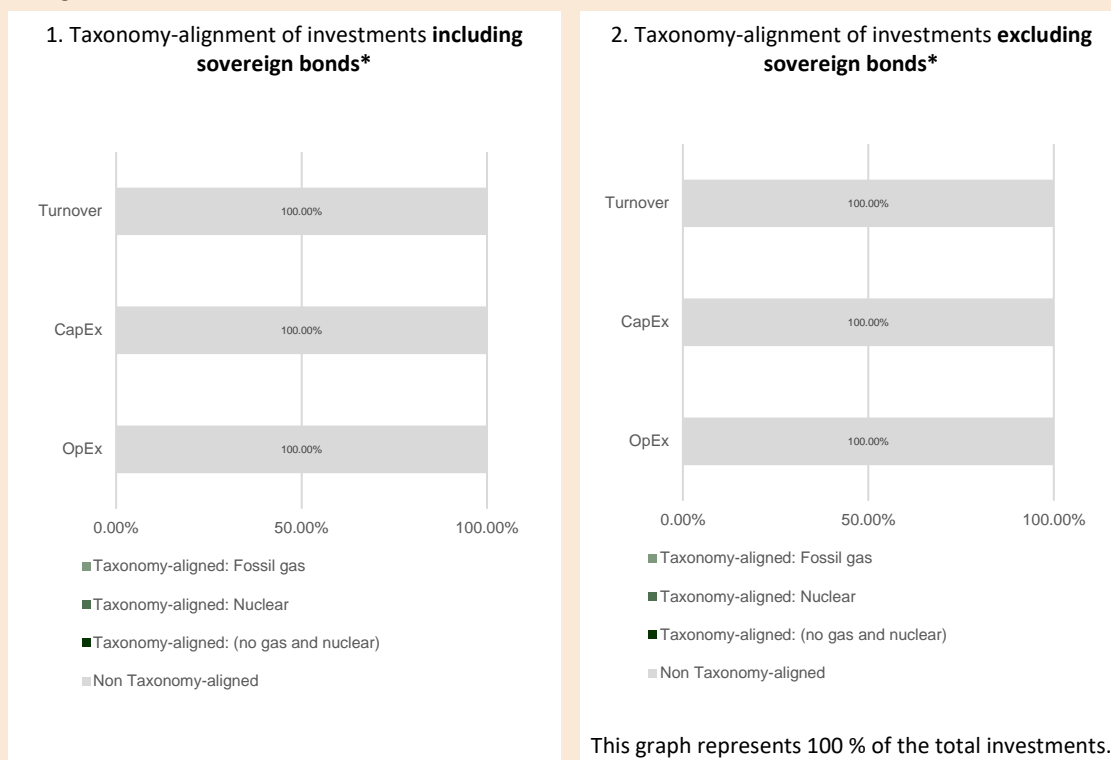

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

³ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the “do not significantly harm” criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of EU Taxonomy-aligned investments			
	2025	2024	2023
Revenue-based	0.00%	0.00%	0.00%
CapEx-based	0.00%	0.00%	0.00%
OpEx-based	0.00%	0.00%	0.00%

Source: AXA IM, based on S&P Trucost, 2025

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 31.34% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

● **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 25.2% of sustainable investments with a social objective.

● **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 0.1% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be transferable securities such as equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the Financial Product continued to apply all AXA IM exclusion policies, for which the exclusion criteria were updated - for the most recent updates - in 2023, but which exclusion lists were updated in 2024. More details on AXA IM exclusion policies are available under the following link: [Sustainability Policies and Reports | AXA IM Corporate](#)

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: AXA IM Japan Small Cap Equity **Legal Entity Identifier:** 2138004CBMR82UN7BD86
(the “Financial Product”)

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> YES	●● <input checked="" type="checkbox"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 24.45 % of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon Intensity
- Water Intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil & gas activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization’s (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period
- Protection of human rights avoiding investing in debt instruments issued by countries where the worst forms of human right violations are observed.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to Benchmark during the reference period.

Sustainability KPI Name	Value	Benchmark	Coverage
Carbon Intensity	135.33 Metric tonnes of carbon dioxide equivalents per million \$ of revenue (for corporates only) - Scope 1+2	207.84 Metric tonnes of carbon dioxide equivalents per million \$ of revenue (for corporates only) - Scope 1+2	98.83 %
Water Intensity	2255.45 Thousands of cubic meters per million \$ of revenue (for corporates only)	10986.63 Thousands of cubic meters per million \$ of revenue (for corporates only)	98.83 %

N.B.: KPIs and benchmarks are reported based on an average of the data available at each end of month of the reference period.

● **... And compared to previous periods?**

Sustainability KPI Name	Year	Value	Benchmark	Coverage
Carbon Intensity	2024	124.93 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	217.99 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	96.64 %
Water Intensity	2024	1687.8 Thousands of cubic meters for corporates	11251.14 Thousands of cubic meters for corporates	96.64 %
Carbon intensity	2023	130.71 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	240.31 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	98 %
Water intensity	2023	1581.99 Thousands of cubic meters for corporates	13536.81 Thousands of cubic meters for corporates	98 %

N.B.: While Sustainability KPIs are reported based on an average of the data available at each end of quarter of the reference period, for technical reasons benchmarks are reported based on end of year data only. Therefore, the comparison should not be taken as such at face value and should not be interpreted as a breach of the binding elements disclosed into the Financial Product's legal documentation, as figures disclosed for the benchmark are not based on the same accounting approach than for those disclosed for the Financial Product.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

1. UN Sustainable Development Goals alignment (SDG) of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2. Integration of issuers engaged in a solid Transition Pathway consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below –5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to ‘significantly contributing’ to -10 corresponding to ‘significantly obstructing’, unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM’s sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through (i) AXA IM sectorial exclusion policies and AXA IM ESG standards that have been applied bindingly at all times by the Financial Product, as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

Relevant AXA IM policies	PAI indicator	Units	Measurement	Coverage in % based on Total AUM	Coverage in % based on eligible assets
Climate Risk policy Ecosystem Protection & Deforestation policy	PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023)	Metric tonnes of carbon dioxide equivalents (tCO2e)	Scope 1: 2891.099 Scope 2: 1194.838 Scope 3: 86649.25 Scope 1+2: 4085.937 Scope 1+2+3: 90719.0	Scope 1: 97 Scope 2: 97 Scope 3: 96 Scope 1+2: 97 Scope 1+2+3: 96	Scope 1: 99 Scope 2: 99 Scope 3: 98 Scope 1+2: 99 Scope 1+2+3: 98

• AXA IM ESG Standards policy, through the	PAI 16: Sovereign Investee countries	Number of investee countries subject to social violations	N/A	Absolute number: 0 Relative number: 0	N/A

² The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

exclusion of investee countries with severe social violations • Compliance black-list based on international and EU sanctions	subject to social violations	(absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law			
--	------------------------------	--	--	--	--

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

Relevant AXA IM policies	PAI indicator	Units	Measurement	Coverage in % based on Total AUM	Coverage in % based on eligible assets
Climate Risk policy	PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)	Metric tonnes of carbon dioxide equivalents (tCO2e)	Scope 1: 2891.099	Scope 1: 97	Scope 1: 99
Ecosystem protection & Deforestation policy			Scope 2: 1194.838 Scope 3: 86649.25 Scope 1+2: 4085.937 Scope 1+2+3: 90719.0	Scope 2: 97 Scope 3: 96 Scope 1+2: 97 Scope 1+2+3: 96	Scope 2: 99 Scope 3: 98 Scope 1+2: 99 Scope 1+2+3: 98
Climate Risk policy	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/€M)	Scope 1+2: 111.759	Scope 1+2: 97	Scope 1+2: 99
Ecosystem protection & Deforestation policy			Scope 1+2+3: 2367.246	Scope 1+2+3: 96	Scope 1+2+3: 98
Climate Risk policy	PAI 3: GHG intensity of investee companies	Metric tonnes of carbon dioxide equivalents per million euro of revenue (tCO2e/€M)	Scope 1+2+3: 2324.234	Scope 1+2+3: 96	Scope 1+2+3: 98
Ecosystem protection & Deforestation policy					
Climate Risk policy	PAI 4: Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector (% of AuM)	4.21	97	99
Climate Risk policy (engagement only)	PAI 5: Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to	Energy Consumption: 86.46 Energy Production: 85.77	Energy Consumption: 96 Energy Production: 1	Energy Consumption: 98 Energy Production: 1

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

		renewable energy sources, expressed as a percentage of total energy sources (%)			
Ecosystem protection & Deforestation policy	PAI 7: Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas (% of AuM)	25.1	53	54
ESG standard policy / violation of international norms and standards	PAI 10: Violation of UN Global Compact principles & OECD Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (% of AuM)	0%	98	100
Voting and Engagement policy with systematic voting criteria linked with board gender diversity	PAI 13: Board Gender diversity	Average ratio of female board members in investee companies, expressed as a percentage of all board members (%)	16.8	97	99
Controversial weapons policy	PAI 14: Exposure to controversial weapons	Share of investments in investee companies involved in the manufacture or selling of controversial weapons (% of AuM)	0	98	100

Source: S&P Trucost, 2025

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

N.B.: PAIs are reported based on an average of the impacts at each end of quarter of the reference period where data is available.

Figures disclosed on PAI indicators can either be based on the "current value of all investments" as defined by the Regulation, or on "eligible assets with available data only" where relevant. For the purpose of this document, "eligible assets with available data only" refers to all investments (i.e., investee companies, or sovereign and supranational, or real estate assets, depending on the PAI), excluding derivatives, cash and cash equivalent and eligible assets without available data. "Eligible assets without available data" refers to assets that have insufficient data and/or low data quality for a specific investment. The attention of the recipient is drawn to the fact that for some specific PAIs (i.e., PAIs which are relative i) to investee companies' revenue or ii) to non-monetary units such as physical flows), the calculation is rebased on eligible assets with available data only for data quality and comparability purposes. Such exclusion at the denominator is reflected and disclosed through the coverage ratios for the relevant indicators: the coverage disclosed reflects the proportion of eligible assets for

which data is available and provided in this document; in addition, to ensure full transparency on the scope of assets where PAIs are disclosed, the coverage based on the current value of all investments is also disclosed.

Reported PAI indicators based on the current value of all investments	Reported PAI indicators based on eligible assets, excluding eligible assets with no available data
PAI indicators 2, 4, 7, 10, 11 and 14	PAI indicators 3 and 6

N.B.: PAI indicators 1 and 16 are not based neither on any of these two approaches as being PAIs in absolute values (noting that the PAI 16 is also relative to the number of invested countries in addition to the absolute value number), i.e., having no denominator in their formula.

More details on our methodologies to account and disclose PAIs are available in AXA IM ESG Methodologies Handbook available on AXA IM website: <https://www.axa-im.com/our-policies-and-reports>

What were the top investments of this financial product?

The top investments of the Financial Product (based on the NACE classification's divisions: NACE level 2) are detailed below:

Largest investments	Sector (NACE level 2)	% Assets	Country
SWCC CORP XTKS JPY	Manufacture of electrical equipment	1.76%	JP
Portfolio 2644 JPY SET SSI	Other	1.7%	N/A
EBARA CORP XTKS JPY	Manufacture of machinery and equipment n.e.c.	1.51%	JP
CKD CORP XTKS JPY	Manufacture of machinery and equipment n.e.c.	1.48%	JP
NISSHA CO LTD XTKS JPY	Manufacture of computer, electronic and optical products	1.47%	JP
ARCLANDS CORP XTKS JPY	Retail trade, except of motor vehicles and motorcycles	1.45%	JP
ULVAC INC XTKS JPY	Manufacture of machinery and equipment n.e.c.	1.45%	JP
ZENKOKU HOSHO CO LTD XTKS JPY	Financial service activities, except insurance and pension funding	1.44%	JP
KAWASAKI HEAVY INDUSTRIES XTKS JPY	Manufacture of electrical equipment	1.42%	JP
DIGITAL ARTS INC XTKS JPY	Publishing activities	1.41%	JP
KUREHA CORP XTKS JPY	Manufacture of chemicals and chemical products	1.4%	JP
NIPPON GAS CO LTD XTKS JPY	Electricity, gas, steam and air conditioning supply	1.37%	JP
SANKYU INC XTKS JPY	Warehousing and support activities for transportation	1.36%	JP
KANADEVIA CORP XTKS JPY	Manufacture of machinery and equipment n.e.c.	1.35%	JP
DIP CORP XTKS JPY	Information service activities	1.33%	JP

The portfolio proportions of investments presented above are an average over the reference period.

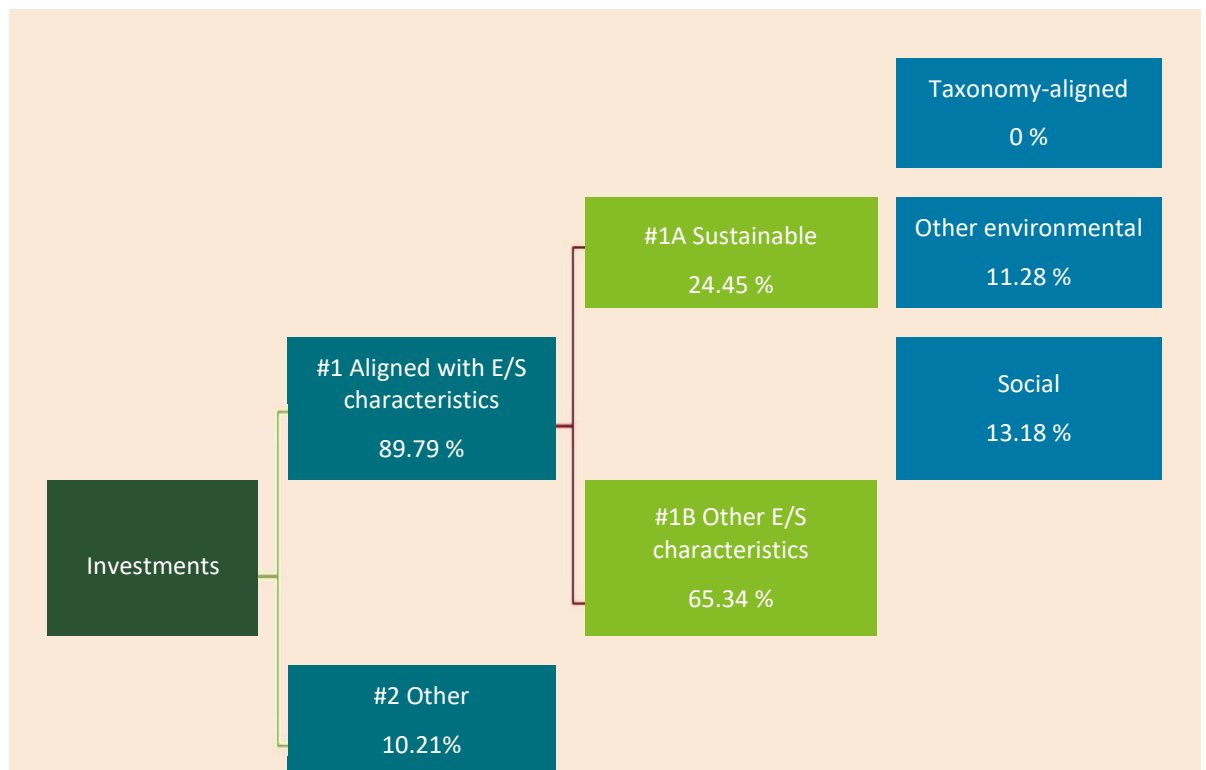

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/04/2024-31/03/2025

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The actual asset allocation has been reported based on an average of the data available at end of each quarter of the reference period.

Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

In which economic sectors were the investments made?

Financial product's investments were made in the economic sectors (based on NACE level 2) detailed below:

Top sector (NACE level 2)	Proportion
Manufacture of chemicals and chemical products	9.95%
Manufacture of machinery and equipment n.e.c.	8.94%
Manufacture of computer, electronic and optical products	8.47%
Retail trade, except of motor vehicles and motorcycles	7.74%
Financial service activities, except insurance and pension funding	7.63%
Manufacture of electrical equipment	7.43%
Real estate activities	5.63%
Wholesale trade, except of motor vehicles and motorcycles	4.53%
Construction of buildings	4.19%

Publishing activities	3.97%
Warehousing and support activities for transportation	3.48%
Information service activities	3.02%
Civil engineering	2.4%
Human health activities	2.09%
Electricity, gas, steam and air conditioning supply	1.9%
Manufacture of motor vehicles, trailers and semi-trailers	1.82%
Computer programming, consultancy and related activities	1.81%
Other	1.7%
Activities auxiliary to financial services and insurance activities	1.43%
Manufacture of other non-metallic mineral products	1.34%
Sports activities and amusement and recreation activities	1.22%
Waste collection, treatment and disposal activities, materials recovery	1.1%
Manufacture of textiles	1.03%
Manufacture of food products	1.02%
Manufacture of beverages	0.95%
Manufacture of paper and paper products	0.78%
Land transport and transport via pipelines	0.77%
Manufacture of basic pharmaceutical products and pharmaceutical preparations	0.76%
Food and beverage service activities	0.61%
Advertising and market research	0.49%
Manufacture of basic metals	0.41%
Manufacture of rubber and plastic products	0.41%
Manufacture of fabricated metal products, except machinery and equipment	0.29%
Motion picture, video and television programme production, sound recording and music publishing activity	0.26%
Manufacture of wearing apparel	0.26%
Activities of head offices, management consultancy activities	0.15%

The portfolio proportions of investments presented above are an average over the reference period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?³

- Yes
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

³ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments made in transitional and enabling activities?**

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the “do not significantly harm” criteria of the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of EU Taxonomy-aligned investments			
	2025	2024	2023
Revenue-based	0.00%	0.00%	0.00%
CapEx-based	0.00%	0.00%	0.00%
OpEx-based	0.00%	0.00%	0.00%

Source: AXA IM, based on S&P Trucost, 2025

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 11.28% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

● **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 13.18% of sustainable investments with a social objective.

● **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 10.21% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be transferable securities such as equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the Financial Product continued to apply all AXA IM exclusion policies, for which the exclusion criteria were updated - for the most recent updates - in 2023, but which exclusion lists were updated in 2024. More details on AXA IM exclusion policies are available under the following link: [Sustainability Policies and Reports | AXA IM Corporate](#)

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: AXA IM Pacific ex Japan Equity **Legal Entity Identifier:** 213800ZRPOICP3T5A150
QI (the “Financial Product”)

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> YES	●● <input checked="" type="checkbox"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 57.65 % of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/> with a social objective
	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon Intensity
- Water Intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil & gas activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization’s (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period
- Protection of human rights avoiding investing in debt instruments issued by countries where the worst forms of human right violations are observed.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to Benchmark during the reference period.

Sustainability KPI Name	Value	Benchmark	Coverage
Carbon Intensity	117.26 Metric tonnes of carbon dioxide equivalents per million \$ of revenue (for corporates only) - Scope 1+2	179.51 Metric tonnes of carbon dioxide equivalents per million \$ of revenue (for corporates only) - Scope 1+2	99.88 %
Water Intensity	2901.89 Thousands of cubic meters per million \$ of revenue (for corporates only)	4601.14 Thousands of cubic meters per million \$ of revenue (for corporates only)	99.88 %

N.B.: KPIs and benchmarks are reported based on an average of the data available at each end of month of the reference period.

● **... And compared to previous periods?**

Sustainability KPI Name	Year	Value	Benchmark	Coverage
Carbon Intensity	2024	160.37 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	193.99 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	99.72 %
Water Intensity	2024	2704.92 Thousands of cubic meters for corporates	6101.42 Thousands of cubic meters for corporates	99.72 %
Carbon intensity	2023	171.26 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	247.48 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	100 %
Water intensity	2023	1080.56 Thousands of cubic meters for corporates	4746.65 Thousands of cubic meters for corporates	100 %

N.B.: While Sustainability KPIs are reported based on an average of the data available at each end of quarter of the reference period, for technical reasons benchmarks are reported based on end of year data only. Therefore, the comparison should not be taken as such at face value and should not be interpreted as a breach of the binding elements disclosed into the Financial Product's legal documentation, as figures disclosed for the benchmark are not based on the same accounting approach than for those disclosed for the Financial Product.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

1. UN Sustainable Development Goals alignment (SDG) of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2. Integration of issuers engaged in a solid Transition Pathway consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below –5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to ‘significantly contributing’ to -10 corresponding to ‘significantly obstructing’, unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM’s sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through (i) AXA IM sectorial exclusion policies and AXA IM ESG standards that have been applied bindingly at all times by the Financial Product, as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

Relevant AXA IM policies	PAI indicator	Units	Measurement	Coverage in % based on Total AUM	Coverage in % based on eligible assets

For Sovereign and supnationals:

Relevant AXA IM policies	PAI indicator	Units	Measurement	Coverage in % based on Total AUM	Coverage in % based on eligible assets
• AXA IM ESG Standards policy, through the	PAI 16: Sovereign Investee countries	Number of investee countries subject to social violations	N/A	Absolute number: 0 Relative number: 0	N/A

² The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

exclusion of investee countries with severe social violations • Compliance black-list based on international and EU sanctions	subject to social violations	(absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law			
--	------------------------------	--	--	--	--

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

Relevant AXA IM policies	PAI indicator	Units	Measurement	Coverage in % based on Total AUM	Coverage in % based on eligible assets
Climate Risk policy	PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)	Metric tonnes of carbon dioxide equivalents (tCO2e)	Scope 1: 4198.857	Scope 1: 98 Scope 2: 98 Scope 3: 98 Scope 1+2: 98 Scope 1+2+3: 98	Scope 1: 100 Scope 2: 100 Scope 3: 100 Scope 1+2: 100 Scope 1+2+3: 100
Ecosystem protection & Deforestation policy			Scope 2: 1073.465 Scope 3: 35642.684 Scope 1+2: 5272.322 Scope 1+2+3: 40914.535		
Climate Risk policy	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/€M)	Scope 1+2: 48.891	Scope 1+2: 98 Scope 1+2+3: 98	Scope 1+2: 100 Scope 1+2+3: 100
Ecosystem protection & Deforestation policy			Scope 1+2+3: 436.208		
Climate Risk policy	PAI 3: GHG intensity of investee companies	Metric tonnes of carbon dioxide equivalents per million euro of revenue (tCO2e/€M)	Scope 1+2+3: 1310.528	Scope 1+2+3: 98	Scope 1+2+3: 100
Ecosystem protection & Deforestation policy					
Climate Risk policy	PAI 4: Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector (% of AuM)	11.64	98	100
Climate Risk policy (engagement only)	PAI 5: Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to	Energy Consumption: 62.21 Energy Production: 70.87	Energy Consumption: 70 Energy Production: 0	Energy Consumption: 71 Energy Production: 0

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

		renewable energy sources, expressed as a percentage of total energy sources (%)			
Ecosystem protection & Deforestation policy	PAI 7: Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas (% of AuM)	15.8	84	85
ESG standard policy / violation of international norms and standards	PAI 10: Violation of UN Global Compact principles & OECD Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (% of AuM)	0%	99	100
Voting and Engagement policy with systematic voting criteria linked with board gender diversity	PAI 13: Board Gender diversity	Average ratio of female board members in investee companies, expressed as a percentage of all board members (%)	38.06	98	100
Controversial weapons policy	PAI 14: Exposure to controversial weapons	Share of investments in investee companies involved in the manufacture or selling of controversial weapons (% of AuM)	0	99	100

For Sovereign and supranationals:

Relevant AXA IM policies	PAI indicator	Units	Measurement	Coverage in % based on Total AUM	Coverage in % based on eligible assets
<ul style="list-style-type: none"> AXA IM ESG Standards policy, through the exclusion of investee countries with severe social violations Compliance black-list based on international and EU sanctions 	PAI 16: Sovereign Investee countries subject to social violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	N/A	Absolute number: 0 Relative number: 0	N/A

Source: S&P Trucost, 2025

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

N.B.: PAIs are reported based on an average of the impacts at each end of quarter of the reference period where data is available.

Figures disclosed on PAI indicators can either be based on the "current value of all investments" as defined by the Regulation, or on "eligible assets with available data only" where relevant. For the purpose of this document, "eligible assets with available data only" refers to all investments (i.e., investee companies, or sovereign and supranational, or real estate assets, depending on the PAI), excluding derivatives, cash and cash equivalent and eligible assets without available data. "Eligible assets without available data" refers to assets that have insufficient data and/or low data quality for a specific investment. The attention of the recipient is drawn to the fact that for some specific PAIs (i.e., PAIs which are relative i) to investee companies' revenue or ii) to non-monetary units such as physical flows), the calculation is rebased on eligible assets with available data only for data quality and comparability purposes. Such exclusion at the denominator is reflected and disclosed through the coverage ratios for the relevant indicators: the coverage disclosed reflects the proportion of eligible assets for

which data is available and provided in this document; in addition, to ensure full transparency on the scope of assets where PAIs are disclosed, the coverage based on the current value of all investments is also disclosed.

Reported PAI indicators based on the current value of all investments	Reported PAI indicators based on eligible assets, excluding eligible assets with no available data
PAI indicators 2, 4, 7, 10, 11 and 14	PAI indicators 3 and 6

N.B.: PAI indicators 1 and 16 are not based neither on any of these two approaches as being PAIs in absolute values (noting that the PAI 16 is also relative to the number of invested countries in addition to the absolute value number), i.e., having no denominator in their formula.

More details on our methodologies to account and disclose PAIs are available in AXA IM ESG Methodologies Handbook available on AXA IM website: <https://www.axa-im.com/our-policies-and-reports>

What were the top investments of this financial product?

The top investments of the Financial Product (based on the NACE classification's divisions: NACE level 2) are detailed below:

Largest investments	Sector (NACE level 2)	% Assets	Country
COMMONWEALTH BANK OF AUSTRAL XASX AUD	Financial service activities, except insurance and pension funding	8.92%	AU
BHP GROUP LTD XASX AUD	Mining of metal ores	5.94%	AU
AIA GROUP LTD XHKG HKD	Insurance, reinsurance and pension funding, except compulsory social security	5.62%	HK
DBS GROUP HOLDINGS LTD XSES SGD	Financial service activities, except insurance and pension funding	4.66%	SG
OVERSEA-CHINESE BANKING CORP XSES SGD	Financial service activities, except insurance and pension funding	3.33%	SG
CSL LTD XASX AUD	Scientific research and development	3.26%	AU
Portfolio 2653 USD SET STT	Other	3.19%	N/A
HONG KONG EXCHANGES & CLEAR XHKG HKD	Activities auxiliary to financial services and insurance activities	3.04%	HK
ANZ GROUP HOLDINGS LTD XASX AUD	Financial service activities, except insurance and pension funding	2.92%	AU
GOODMAN GROUP XASX AUD	Real estate activities	2.79%	AU
NATIONAL AUSTRALIA BANK LTD XASX AUD	Financial service activities, except insurance and pension funding	2.66%	AU
ARISTOCRAT LEISURE LTD XASX AUD	Gambling and betting activities	2.57%	AU
WESTPAC BANKING CORP XASX AUD	Financial service activities, except insurance and pension funding	2.34%	AU
WOODSIDE ENERGY GROUP LTD XASX AUD	Extraction of crude petroleum and natural gas	2.33%	AU
UNITED OVERSEAS BANK LTD XSES SGD	Financial service activities, except insurance and pension funding	2.29%	SG

The portfolio proportions of investments presented above are an average over the reference period.

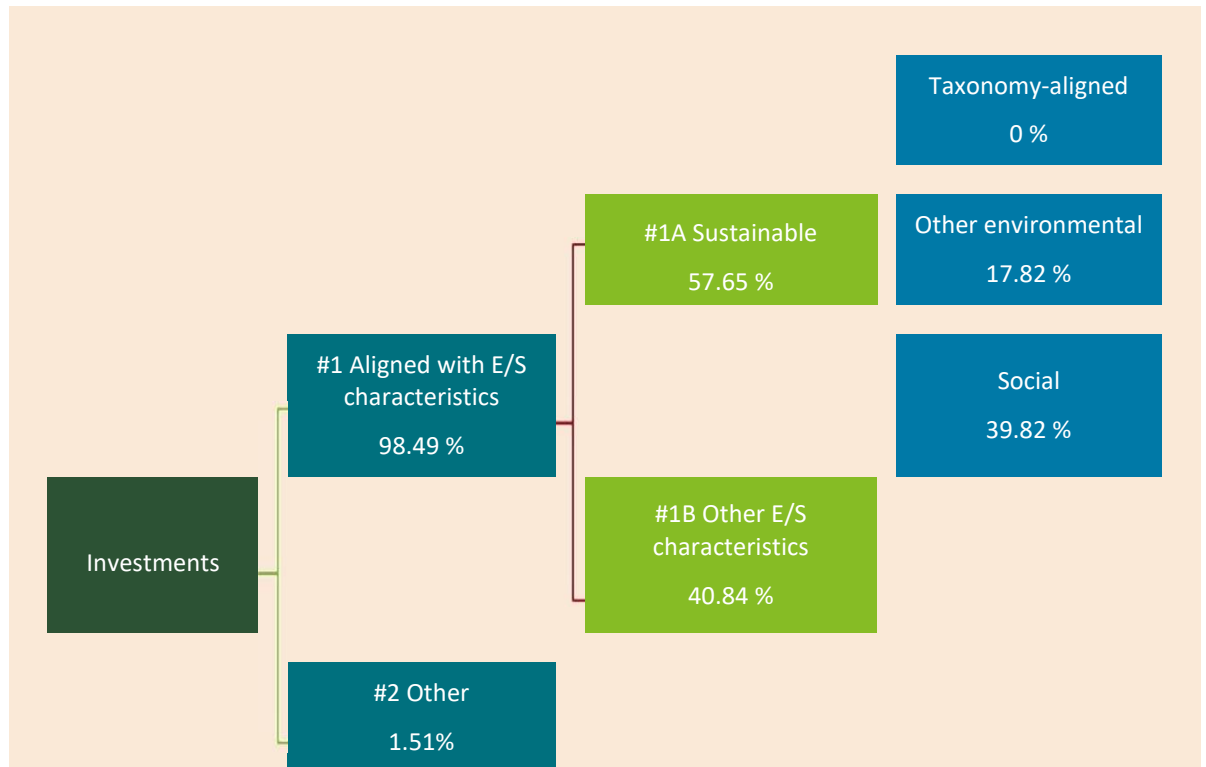

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/04/2024-31/03/2025

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The actual asset allocation has been reported based on an average of the data available at end of each quarter of the reference period.

Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

In which economic sectors were the investments made?

Financial product's investments were made in the economic sectors (based on NACE level 2) detailed below:

Top sector (NACE level 2)	Proportion
Financial service activities, except insurance and pension funding	31.24%
Mining of metal ores	10.21%
Insurance, reinsurance and pension funding, except compulsory social security	8.81%
Activities auxiliary to financial services and insurance activities	8.1%
Real estate activities	6.81%
Retail trade, except of motor vehicles and motorcycles	5.26%
Scientific research and development	3.29%
Gambling and betting activities	2.78%
Extraction of crude petroleum and natural gas	2.48%

Information service activities	2.32%
Publishing activities	2.22%
Wholesale trade, except of motor vehicles and motorcycles	1.72%
Office administrative, office support and other business support activities	1.62%
Other	1.4%
Manufacture of computer, electronic and optical products	1.4%
Warehousing and support activities for transportation	0.99%
Land transport and transport via pipelines	0.95%
Air transport	0.69%
Manufacture of wearing apparel	0.64%
Manufacture of basic pharmaceutical products and pharmaceutical preparations	0.62%
Manufacture of other non-metallic mineral products	0.57%
Manufacture of food products	0.57%
Other manufacturing	0.56%
Electricity, gas, steam and air conditioning supply	0.45%
Manufacture of basic metals	0.43%
Wholesale and retail trade and repair of motor vehicles and motorcycles	0.42%
Human health activities	0.41%
Security and investigation activities	0.34%
Manufacture of leather and related products	0.33%
Mining support service activities	0.28%
Waste collection, treatment and disposal activities, materials recovery	0.27%
Legal and accounting activities	0.25%
Telecommunications	0.24%
Civil engineering	0.22%
Travel agency, tour operator reservation service and related activities	0.2%
Manufacture of electrical equipment	0.2%
Rental and leasing activities	0.17%
Mining of coal and lignite	0.11%
Architectural and engineering activities, technical testing and analysis	0.09%
Manufacture of other transport equipment	0.08%
Accommodation	0.07%
Manufacture of machinery and equipment n.e.c.	0.06%
Advertising and market research	0.05%
Postal and courier activities	0.04%
Crop and animal production, hunting and related service activities	0.04%
Computer programming, consultancy and related activities	0.02%

The portfolio proportions of investments presented above are an average over the reference period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?³

- Yes
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

³ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of EU Taxonomy-aligned investments			
	2025	2024	2023
Revenue-based	0.00%	0.00%	0.00%
CapEx-based	0.00%	0.00%	0.00%
OpEx-based	0.00%	0.00%	0.00%

Source: AXA IM, based on S&P Trucost, 2025

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 17.82% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

- **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 39.82% of sustainable investments with a social objective.

- **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 1.51% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be transferable securities such as equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

During the reference period, the Financial Product continued to apply all AXA IM exclusion policies, for which the exclusion criteria were updated - for the most recent updates - in 2023, but which exclusion lists were updated in 2024. More details on AXA IM exclusion policies are available under the following link: [Sustainability Policies and Reports | AXA IM Corporate](#)

- **How did this financial product perform compared to the reference benchmark?**

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: AXA IM US Enhanced Index Equity QI (the “Financial Product”)

Legal Entity Identifier: 2138005TBUBJV5MTZ147

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

YES

NO

It made **sustainable investments with an environmental objective**: ___%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 63.15 % of sustainable investments

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It made **sustainable investments with a social objective**: ___%

It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon Intensity
- Water Intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil & gas activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization’s (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period
- Protection of human rights avoiding investing in debt instruments issued by countries where the worst forms of human right violations are observed.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to Benchmark during the reference period.

Sustainability KPI Name	Value	Benchmark	Coverage
Carbon Intensity	74.22 Metric tonnes of carbon dioxide equivalents per million \$ of revenue (for corporates only) - Scope 1+2	128.52 Metric tonnes of carbon dioxide equivalents per million \$ of revenue (for corporates only) - Scope 1+2	99.97 %
Water Intensity	964.03 Thousands of cubic meters per million \$ of revenue (for corporates only)	5695.35 Thousands of cubic meters per million \$ of revenue (for corporates only)	99.97 %

N.B.: KPIs and benchmarks are reported based on an average of the data available at each end of month of the reference period.

● **... And compared to previous periods?**

Sustainability KPI Name	Year	Value	Benchmark	Coverage
Carbon Intensity	2024	98.03 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	127.81 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	99.87 %
Water Intensity	2024	1712.77 Thousands of cubic meters for corporates	3328.35 Thousands of cubic meters for corporates	99.87 %
Carbon intensity	2023	118.68 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	188.87 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	99 %
Water intensity	2023	2451.6 Thousands of cubic meters for corporates	8681.05 Thousands of cubic meters for corporates	99 %

N.B.: While Sustainability KPIs are reported based on an average of the data available at each end of quarter of the reference period, for technical reasons benchmarks are reported based on end of year data only. Therefore, the comparison should not be taken as such at face value and should not be interpreted as a breach of the binding elements disclosed into the Financial Product's legal documentation, as figures disclosed for the benchmark are not based on the same accounting approach than for those disclosed for the Financial Product.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

1. UN Sustainable Development Goals alignment (SDG) of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2. Integration of issuers engaged in a solid Transition Pathway consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below –5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to ‘significantly contributing’ to -10 corresponding to ‘significantly obstructing’, unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM’s sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through (i) AXA IM sectorial exclusion policies and AXA IM ESG standards that have been applied bindingly at all times by the Financial Product, as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

Relevant AXA IM policies	PAI indicator	Units	Measurement	Coverage in % based on Total AUM	Coverage in % based on eligible assets
Climate Risk policy Ecosystem Protection & Deforestation policy	PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023)	Metric tonnes of carbon dioxide equivalents (tCO2e)	Scope 1: 24555.359 Scope 2: 9876.347 Scope 3: 463391.656 Scope 1+2: 34431.707 Scope 1+2+3: 497821.5	Scope 1: 99 Scope 2: 99 Scope 3: 99 Scope 1+2: 99 Scope 1+2+3: 99	Scope 1: 100 Scope 2: 100 Scope 3: 99 Scope 1+2: 100 Scope 1+2+3: 99

• AXA IM ESG Standards policy,	PAI 16: Sovereign Investee countries	Number of investee countries subject to	N/A	Absolute number: 0 Relative number: 0	N/A

² The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

through the exclusion of investee countries with severe social violations • Compliance black-list based on international and EU sanctions	subject to social violations	social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law			
--	------------------------------	--	--	--	--

The Financial Product is also taking into account the environmental optional indicator PAI 6 ‘Water usage and recycling’ and the social optional indicator PAI 15 ‘Lack of anti-corruption and anti-bribery policies’.

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider’s change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as “non compliant” to UN’s Global Compact Principles, International Labor Organization’s (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

Relevant AXA IM policies	PAI indicator	Units	Measurement	Coverage in % based on Total AUM	Coverage in % based on eligible assets
Climate Risk policy	PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)	Metric tonnes of carbon dioxide equivalents (tCO2e)	Scope 1: 24555.359	Scope 1: 99 Scope 2: 99 Scope 3: 99 Scope 1+2: 99 Scope 1+2+3: 99	Scope 1: 100 Scope 2: 100 Scope 3: 99 Scope 1+2: 100 Scope 1+2+3: 99
Ecosystem protection & Deforestation policy			Scope 2: 9876.347		
Climate Risk policy			Scope 3: 463391.656		
Ecosystem protection & Deforestation policy			Scope 1+2: 34431.707 Scope 1+2+3: 497821.5		
Climate Risk policy	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/€M)	Scope 1+2: 19.799	Scope 1+2: 99 Scope 1+2+3: 99	Scope 1+2: 100 Scope 1+2+3: 99
Ecosystem protection & Deforestation policy			Scope 1+2+3: 297.749		
Climate Risk policy	PAI 3: GHG intensity of investee companies	Metric tonnes of carbon dioxide equivalents per million euro of revenue (tCO2e/€M)	Scope 1+2+3: 1092.471	Scope 1+2+3: 99	Scope 1+2+3: 99
Ecosystem protection & Deforestation policy					
Climate Risk policy	PAI 4: Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector (% of AuM)	4.35	99	100
Climate Risk policy (engagement only)	PAI 5: Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable	Energy Consumption: 54.85 Energy Production: 65.11	Energy Consumption: 99 Energy Production: 2	Energy Consumption: 99 Energy Production: 2

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

		energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)			
Ecosystem protection & Deforestation policy	PAI 7: Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas (% of AuM)	44.96	93	93
ESG standard policy / violation of international norms and standards	PAI 10: Violation of UN Global Compact principles & OECD Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (% of AuM)	0%	99	100
Voting and Engagement policy with systematic voting criteria linked with board gender diversity	PAI 13: Board Gender diversity	Average ratio of female board members in investee companies, expressed as a percentage of all board members (%)	36.02	99	100
Controversial weapons policy	PAI 14: Exposure to controversial weapons	Share of investments in investee companies involved in the manufacture or selling of controversial weapons (% of AuM)	0	99	100

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

N.B.: PAIs are reported based on an average of the impacts at each end of quarter of the reference period where data is available.

Figures disclosed on PAI indicators can either be based on the "current value of all investments" as defined by the Regulation, or on "eligible assets with available data only" where relevant. For the purpose of this document, "eligible assets with available data only" refers to all investments (i.e., investee companies, or sovereign and supranational, or real estate assets, depending on the PAI), excluding derivatives, cash and cash equivalent and eligible assets without available data. "Eligible assets without available data" refers to assets that have insufficient data and/or low data quality for a specific investment. The attention of the recipient is drawn to the fact that for some specific PAIs (i.e., PAIs which are relative i) to investee companies' revenue or ii) to non-monetary units such as physical flows), the calculation is rebased on eligible assets with

available data only for data quality and comparability purposes. Such exclusion at the denominator is reflected and disclosed through the coverage ratios for the relevant indicators: the coverage disclosed reflects the proportion of eligible assets for which data is available and provided in this document; in addition, to ensure full transparency on the scope of assets where PAIs are disclosed, the coverage based on the current value of all investments is also disclosed.

Reported PAI indicators based on the current value of all investments	Reported PAI indicators based on eligible assets, excluding eligible assets with no available data
PAI indicators 2, 4, 7, 10, 11 and 14	PAI indicators 3 and 6

N.B.: PAI indicators 1 and 16 are not based neither on any of these two approaches as being PAIs in absolute values (noting that the PAI 16 is also relative to the number of invested countries in addition to the absolute value number), i.e., having no denominator in their formula.

More details on our methodologies to account and disclose PAIs are available in AXA IM ESG Methodologies Handbook available on AXA IM website: <https://www.axa-im.com/our-policies-and-reports>

What were the top investments of this financial product?

The top investments of the Financial Product (based on the NACE classification's divisions: NACE level 2) are detailed below:

Largest investments	Sector (NACE level 2)	% Assets	Country
APPLE INC XNGS USD	Manufacture of computer, electronic and optical products	7.15%	US
MICROSOFT CORP XNGS USD	Publishing activities	6.61%	US
NVIDIA CORP XNGS USD	Manufacture of computer, electronic and optical products	6.49%	US
ALPHABET INC-CL A XNGS USD	Information service activities	3.76%	US
AMAZON.COM INC XNGS USD	Retail trade, except of motor vehicles and motorcycles	3.75%	US
META PLATFORMS INC-CLASS A XNGS USD	Information service activities	2.59%	US
BROADCOM INC XNGS USD	Manufacture of computer, electronic and optical products	1.63%	US
TESLA INC XNGS USD	Manufacture of motor vehicles, trailers and semi-trailers	1.41%	US
BERKSHIRE HATHAWAY INC-CL B XNYS USD	Insurance, reinsurance and pension funding, except compulsory social security	1.41%	US
ELI LILLY & CO XNYS USD	Manufacture of basic pharmaceutical products and pharmaceutical preparations	1.26%	US
JPMORGAN CHASE & CO XNYS USD	Financial service activities, except insurance and pension funding	1.14%	US
PROCTER & GAMBLE CO/THE XNYS USD	Manufacture of paper and paper products	1.11%	US
PFIZER INC XNYS USD	Manufacture of basic pharmaceutical products and pharmaceutical preparations	1.05%	US
CISCO SYSTEMS INC XNGS USD	Manufacture of computer, electronic and optical products	1.04%	US
VISA INC-CLASS A SHARES XNYS USD	Activities auxiliary to financial services and insurance activities	1%	US

The portfolio proportions of investments presented above are an average over the reference period.

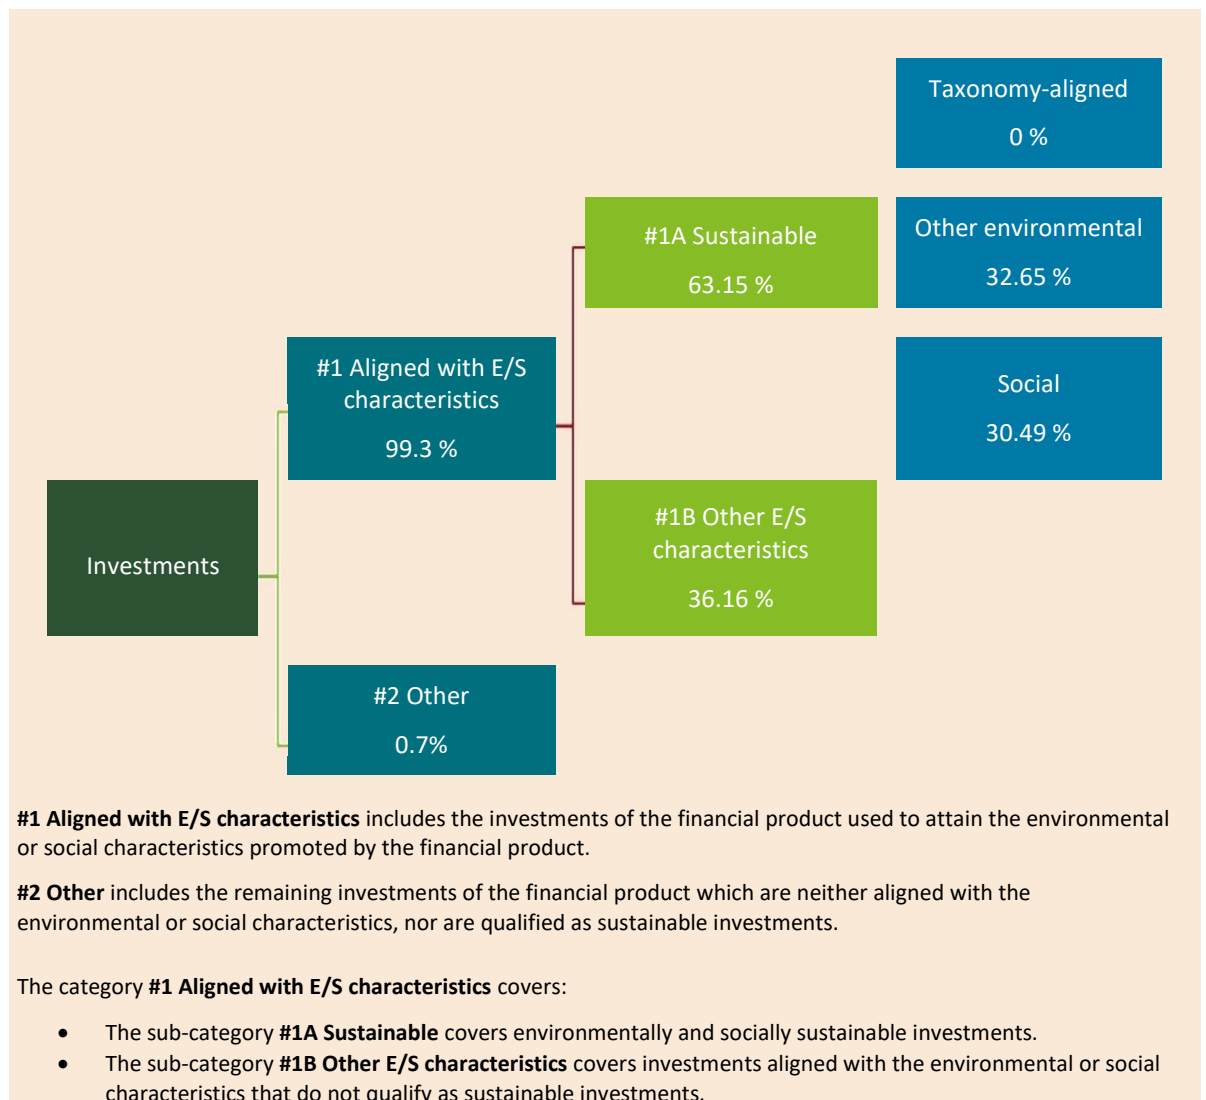

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/04/2024-31/03/2025

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

The actual asset allocation has been reported based on an average of the data available at end of each quarter of the reference period.

Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

In which economic sectors were the investments made?

Financial product's investments were made in the economic sectors (based on NACE level 2) detailed below:

Top sector (NACE level 2)	Proportion
Manufacture of computer, electronic and optical products	22.43%
Publishing activities	11.83%
Retail trade, except of motor vehicles and motorcycles	8.25%
Information service activities	7.65%
Manufacture of basic pharmaceutical products and pharmaceutical preparations	6.07%
Activities auxiliary to financial services and insurance activities	5.52%
Insurance, reinsurance and pension funding, except compulsory social security	5.2%
Financial service activities, except insurance and pension funding	2.86%
Manufacture of motor vehicles, trailers and semi-trailers	2.49%

Manufacture of paper and paper products	2.15%
Wholesale trade, except of motor vehicles and motorcycles	1.92%
Computer programming, consultancy and related activities	1.85%
Manufacture of machinery and equipment n.e.c.	1.77%
Other manufacturing	1.76%
Scientific research and development	1.75%
Telecommunications	1.37%
Motion picture, video and television programme production, sound recording and music publishing activity	1.18%
Manufacture of beverages	1.17%
Manufacture of food products	1.15%
Manufacture of chemicals and chemical products	1.03%
Extraction of crude petroleum and natural gas	1.01%
Manufacture of electrical equipment	0.98%
Other	0.73%
Manufacture of wearing apparel	0.72%
Manufacture of coke and refined petroleum products	0.65%
Food and beverage service activities	0.61%
Manufacture of fabricated metal products, except machinery and equipment	0.58%
Legal and accounting activities	0.49%
Manufacture of other transport equipment	0.45%
Construction of buildings	0.43%
Electricity, gas, steam and air conditioning supply	0.4%
Postal and courier activities	0.4%
Advertising and market research	0.36%
Real estate activities	0.35%
Human health activities	0.31%
Manufacture of basic metals	0.28%
Water transport	0.27%
Wholesale and retail trade and repair of motor vehicles and motorcycles	0.26%
Land transport and transport via pipelines	0.18%
Waste collection, treatment and disposal activities, materials recovery	0.17%
Manufacture of rubber and plastic products	0.16%
Mining support service activities	0.14%
Security and investigation activities	0.13%
Architectural and engineering activities, technical testing and analysis	0.1%
Air transport	0.08%
Creative, arts and entertainment activities	0.08%
Manufacture of leather and related products	0.07%
Other personal service activities	0.05%
Civil engineering	0.05%
Manufacture of other non-metallic mineral products	0.04%
Rental and leasing activities	0.03%
Mining of metal ores	0.03%
Gambling and betting activities	0.02%

The portfolio proportions of investments presented above are an average over the reference period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?³

- Yes
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

³ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Percentage of EU Taxonomy-aligned investments			
	2025	2024	2023
Revenue-based	0.00%	0.00%	0.00%
CapEx-based	0.00%	0.00%	0.00%
OpEx-based	0.00%	0.00%	0.00%

Source: AXA IM, based on S&P Trucost, 2025

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 32.65% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

 **What was the share of socially sustainable investments?**

During the reference period, the Financial Product invested in 30.49% of sustainable investments with a social objective.

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

The remaining “Other” investments represented 0.7% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be transferable securities such as equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the Financial Product continued to apply all AXA IM exclusion policies, for which the exclusion criteria were updated - for the most recent updates - in 2023, but which exclusion lists were updated in 2024. More details on AXA IM exclusion policies are available under the following link: [Sustainability Policies and Reports | AXA IM Corporate](#)

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: AXA IM US Equity QI (the “Financial Product”)

Legal Entity Identifier: 213800C6RZ6JS9AOG834

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> YES	● <input checked="" type="checkbox"/> NO
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 69.13 % of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon Intensity
- Water Intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil & gas activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization’s (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period
- Protection of human rights avoiding investing in debt instruments issued by countries where the worst forms of human right violations are observed.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to Benchmark during the reference period.

Sustainability KPI Name	Value	Benchmark	Coverage
Carbon Intensity	48.7 Metric tonnes of carbon dioxide equivalents per million \$ of revenue (for corporates only) - Scope 1+2	128.52 Metric tonnes of carbon dioxide equivalents per million \$ of revenue (for corporates only) - Scope 1+2	100 %
Water Intensity	685.38 Thousands of cubic meters per million \$ of revenue (for corporates only)	5695.35 Thousands of cubic meters per million \$ of revenue (for corporates only)	100 %

N.B.: KPIs and benchmarks are reported based on an average of the data available at each end of month of the reference period.

● **... And compared to previous periods?**

Sustainability KPI Name	Year	Value	Benchmark	Coverage
Carbon Intensity	2024	82.75 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	127.81 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	100 %
Water Intensity	2024	626.64 Thousands of cubic meters for corporates	3328.35 Thousands of cubic meters for corporates	100 %
Carbon intensity	2023	112.18 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	188.87 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	100 %
Water intensity	2023	807.47 Thousands of cubic meters for corporates	8681.05 Thousands of cubic meters for corporates	100 %

N.B.: While Sustainability KPIs are reported based on an average of the data available at each end of quarter of the reference period, for technical reasons benchmarks are reported based on end of year data only. Therefore, the comparison should not be taken as such at face value and should not be interpreted as a breach of the binding elements disclosed into the Financial Product's legal documentation, as figures disclosed for the benchmark are not based on the same accounting approach than for those disclosed for the Financial Product.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

1.UN Sustainable Development Goals alignment (SDG) of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:

a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2.Integration of issuers engaged in a solid Transition Pathway consistently with the European Commission's ambition to help fund the transition to a 1.5°C world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

i

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below –5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to ‘significantly contributing’ to -10 corresponding to ‘significantly obstructing’, unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM’s sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts (“PAIs”) indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through (i) AXA IM sectorial exclusion policies and AXA IM ESG standards that have been applied bindingly at all times by the Financial Product, as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to ‘significant contributing impact’ to – 10 corresponding to ‘significant obstructing impact’), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

exclusion of investee countries with severe social violations • Compliance black-list based on international and EU sanctions	subject to social violations	(absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law			
--	------------------------------	--	--	--	--

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies :

Relevant AXA IM policies	PAI indicator	Units	Measurement	Coverage in % based on Total AUM	Coverage in % based on eligible assets
Climate Risk policy	PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)	Metric tonnes of carbon dioxide equivalents (tCO2e)	Scope 1: 2368.515	Scope 1: 99 Scope 2: 99 Scope 3: 98 Scope 1+2: 99 Scope 1+2+3: 98	Scope 1: 100 Scope 2: 100 Scope 3: 99 Scope 1+2: 100 Scope 1+2+3: 99
Ecosystem protection & Deforestation policy			Scope 2: 1723.437 Scope 3: 96255.852 Scope 1+2: 4091.952 Scope 1+2+3: 100346.906		
Climate Risk policy	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/€M)	Scope 1+2: 9.016	Scope 1+2: 99 Scope 1+2+3: 98	Scope 1+2: 100 Scope 1+2+3: 99
Ecosystem protection & Deforestation policy			Scope 1+2+3: 234.511		
Climate Risk policy	PAI 3: GHG intensity of investee companies	Metric tonnes of carbon dioxide equivalents per million euro of revenue (tCO2e/€M)	Scope 1+2+3: 1028.159	Scope 1+2+3: 98	Scope 1+2+3: 99
Ecosystem protection & Deforestation policy					
Climate Risk policy	PAI 4: Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector (% of AuM)	0.76	99	100
Climate Risk policy (engagement only)	PAI 5: Share of non-renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to	Energy Consumption: 51.38	Energy Consumption: 98 Energy Production: 0	Energy Consumption: 99

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

		renewable energy sources, expressed as a percentage of total energy sources (%)			
Ecosystem protection & Deforestation policy	PAI 7: Activities negatively affecting biodiversity-sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas (% of AuM)	45.18	92	93
ESG standard policy / violation of international norms and standards	PAI 10: Violation of UN Global Compact principles & OECD Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (% of AuM)	0%	99	100

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

N.B.: PAIs are reported based on an average of the impacts at each end of quarter of the reference period where data is available.

Figures disclosed on PAI indicators can either be based on the "current value of all investments" as defined by the Regulation, or on "eligible assets with available data only" where relevant. For the purpose of this document, "eligible assets with available data only" refers to all investments (i.e., investee companies, or sovereign and supranational, or real estate assets, depending on the PAI), excluding derivatives, cash and cash equivalent and eligible assets without available data. "Eligible assets without available data" refers to assets that have insufficient data and/or low data quality for a specific investment. The attention of the recipient is drawn to the fact that for some specific PAIs (i.e., PAIs which are relative i) to investee companies' revenue or ii) to non-monetary units such as physical flows), the calculation is rebased on eligible assets with available data only for data quality and comparability purposes. Such exclusion at the denominator is reflected and disclosed through the coverage ratios for the relevant indicators: the coverage disclosed reflects the proportion of eligible assets for

which data is available and provided in this document; in addition, to ensure full transparency on the scope of assets where PAIs are disclosed, the coverage based on the current value of all investments is also disclosed.

Reported PAI indicators based on the current value of all investments	Reported PAI indicators based on eligible assets, excluding eligible assets with no available data
PAI indicators 2, 4, 7, 10, 11 and 14	PAI indicators 3 and 6

N.B.: PAI indicators 1 and 16 are not based neither on any of these two approaches as being PAIs in absolute values (noting that the PAI 16 is also relative to the number of invested countries in addition to the absolute value number), i.e., having no denominator in their formula.

More details on our methodologies to account and disclose PAIs are available in AXA IM ESG Methodologies Handbook available on AXA IM website: <https://www.axa-im.com/our-policies-and-reports>

What were the top investments of this financial product?

The top investments of the Financial Product (based on the NACE classification's divisions: NACE level 2) are detailed below:

Largest investments	Sector (NACE level 2)	% Assets	Country
APPLE INC XNGS USD	Manufacture of computer, electronic and optical products	7.49%	US
NVIDIA CORP XNGS USD	Manufacture of computer, electronic and optical products	6.72%	US
MICROSOFT CORP XNGS USD	Publishing activities	6.38%	US
ALPHABET INC-CL A XNGS USD	Information service activities	4.12%	US
AMAZON.COM INC XNGS USD	Retail trade, except of motor vehicles and motorcycles	3.4%	US
META PLATFORMS INC-CLASS A XNGS USD	Information service activities	2.49%	US
PROCTER & GAMBLE CO/THE XNYS USD	Manufacture of paper and paper products	2.18%	US
CISCO SYSTEMS INC XNGS USD	Manufacture of computer, electronic and optical products	1.94%	US
ABBVIE INC XNYS USD	Manufacture of basic pharmaceutical products and pharmaceutical preparations	1.88%	US
MERCK & CO. INC. XNYS USD	Manufacture of basic pharmaceutical products and pharmaceutical preparations	1.79%	US
PFIZER INC XNYS USD	Manufacture of basic pharmaceutical products and pharmaceutical preparations	1.71%	US
VERIZON COMMUNICATIONS INC XNYS USD	Telecommunications	1.68%	US
BRISTOL-MYERS SQUIBB CO XNYS USD	Manufacture of basic pharmaceutical products and pharmaceutical preparations	1.6%	US
COMCAST CORP-CLASS A XNGS USD	Telecommunications	1.55%	US
GILEAD SCIENCES INC XNGS USD	Scientific research and development	1.53%	US

The portfolio proportions of investments presented above are an average over the reference period.

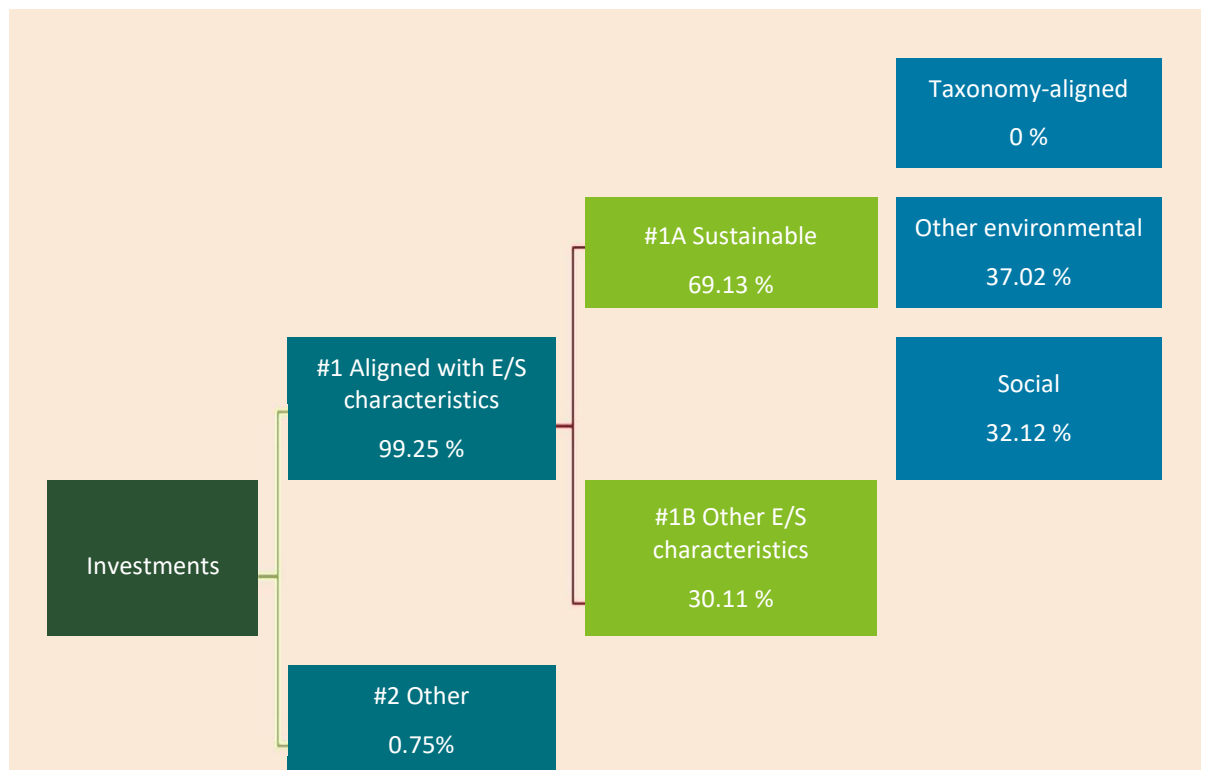

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 01/04/2024-31/03/2025

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The actual asset allocation has been reported based on an average of the data available at end of each quarter of the reference period.

Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

In which economic sectors were the investments made?

Financial product's investments were made in the economic sectors (based on NACE level 2) detailed below:

Top sector (NACE level 2)	Proportion
Manufacture of computer, electronic and optical products	24.11%
Publishing activities	12.86%
Manufacture of basic pharmaceutical products and pharmaceutical preparations	8.5%
Information service activities	7.57%
Activities auxiliary to financial services and insurance activities	7.46%
Retail trade, except of motor vehicles and motorcycles	5.46%
Telecommunications	3.58%
Computer programming, consultancy and related activities	2.94%
Manufacture of machinery and equipment n.e.c.	2.92%

Manufacture of paper and paper products	2.49%
Insurance, reinsurance and pension funding, except compulsory social security	2.42%
Scientific research and development	2.13%
Manufacture of motor vehicles, trailers and semi-trailers	2.1%
Other manufacturing	1.87%
Financial service activities, except insurance and pension funding	1.57%
Wholesale trade, except of motor vehicles and motorcycles	1.49%
Manufacture of wearing apparel	1.34%
Construction of buildings	1.23%
Motion picture, video and television programme production, sound recording and music publishing activity	1.19%
Legal and accounting activities	1.03%
Postal and courier activities	0.93%
Extraction of crude petroleum and natural gas	0.81%
Other	0.77%
Manufacture of food products	0.75%
Manufacture of fabricated metal products, except machinery and equipment	0.48%
Manufacture of coke and refined petroleum products	0.32%
Manufacture of beverages	0.32%
Manufacture of basic metals	0.31%
Food and beverage service activities	0.26%
Manufacture of electrical equipment	0.25%
Water transport	0.23%
Manufacture of chemicals and chemical products	0.11%
Architectural and engineering activities, technical testing and analysis	0.11%
Advertising and market research	0.1%

The portfolio proportions of investments presented above are an average over the reference period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?³

- Yes
- In fossil gas In nuclear energy
- No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

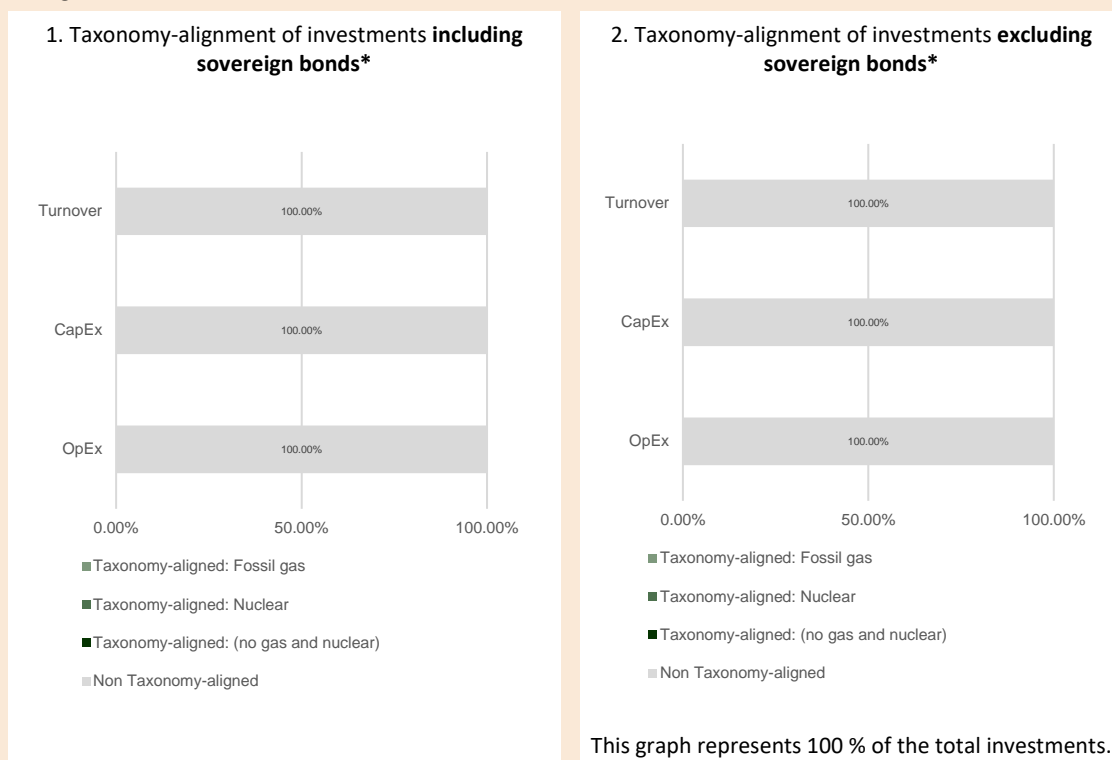

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

³ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the “do not significantly harm” criteria of the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Percentage of EU Taxonomy-aligned investments			
	2025	2024	2023
Revenue-based	0.00%	0.00%	0.00%
CapEx-based	0.00%	0.00%	0.00%
OpEx-based	0.00%	0.00%	0.00%

Source: AXA IM, based on S&P Trucost, 2025

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 37.02% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 32.12% of sustainable investments with a social objective.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The remaining “Other” investments represented 0.75% of the Financial Product’s Net Asset Value.

The “other” assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments, and ;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be transferable securities such as equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all “other” assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the Financial Product continued to apply all AXA IM exclusion policies, for which the exclusion criteria were updated - for the most recent updates - in 2023, but which exclusion lists were updated in 2024. More details on AXA IM exclusion policies are available under the following link: [Sustainability Policies and Reports | AXA IM Corporate](#)

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.
