Dear Shareholder,

This annual report covers the 12-month reporting period ended 31 December 2024 (the “Reporting Period”). On the subsequent pages you will find details regarding investment results and a discussion of certain factors that affected performance during the Reporting Period.

With inflation moderating, several central banks lowered interest rates. Meanwhile, election results from around the globe and geopolitical issues impacted the markets.

Several central banks adjusted monetary policy

Inflation eased over the Reporting Period and moved closer to central bank targets for many major economies. The U.S. Federal Reserve (the “Fed”) cut rates in September 2024 (the first reduction since June 2020) and again in November and December 2024. However, at its December meeting, the Fed scaled back its expectations for rate cuts in 2025, as the U.S. job market appeared to stabilize and amid inflation uncertainties given President-elect Donald Trump’s pro-domestic growth platform and proposed tariffs. The European Central Bank cut interest rates in June, September, October and December 2024, as inflation progress continued and growth stagnated. The Bank of England followed suit in August 2024 with its first rate cut since 2020, and a second one in November 2024. The Bank of Japan was an outlier among major developed markets by raising its short-term policy rate in March and July 2024, marking its exit from a prolonged period of a slightly negative policy rate setting.

Financial markets generally delivered positive returns

The yield on the 10-year U.S. Treasury rose during the Reporting Period. In many other developed markets, yields on 10-year government bonds also increased. The global bond market experienced periods of volatility but delivered positive returns, with lower-rated and higher-rated bonds generally posting gains. Returns from global equities were strong in many markets, led by the U.S. and Japan. Commodity returns were mixed. The U.S. dollar strengthened against the euro, British pound and Japanese yen.

With our time-tested investment process, PIMCO aims to leverage the structural advantages of active bond management for the benefit of our clients. We continue to work diligently to navigate dynamic global markets and manage the assets that you have entrusted with us. We encourage you to speak with your financial advisor about your goals and visit global.pimco.com for our latest insights.

Sincerely,

Important Information About the Funds

This material is authorised for use only when preceded or accompanied by the current PIMCO Funds: Global Investors Series plc Prospectus. Investors should consider the investment objectives, risks, charges and expenses of these Funds carefully before investing. This and other information is contained in the Prospectus. Please read the Prospectus carefully before you invest or send money.

We believe that bond funds have an important role to play in a well-diversified investment portfolio. It is important to note, however, that in an environment where interest rates may trend upward, rising rates will negatively impact the performance of most bond funds, and fixed income securities held by a Fund are likely to decrease in value. The price volatility of fixed income securities can also increase during periods of rising interest rates, resulting in increased losses to a Fund. Bond funds and individual bonds with a longer duration (a measure used to determine the sensitivity of a security's price to changes in interest rates) tend to be more sensitive to changes in interest rates, usually making them more volatile than securities or funds with shorter durations. The longer-term performance of most bond funds has benefited from capital gains in part resulting from an extended period of declining interest rates. In the event interest rates increase, these capital gains should not be expected to recur.

The Funds may be subject to various risks in addition to those described above, in the Funds' Prospectus and in the Financial Risks section of the Notes to Financial Statements. Some of these risks may include, but are not limited to, the following: real rate risk, derivative risk, small company risk, foreign security risk, high-yield security risk, specific sector investment risks and epidemic/pandemic related risk. The Funds may use derivative instruments for hedging purposes or as part of an investment strategy. The use of these instruments may involve certain costs and risks such as liquidity risk, interest rate risk, market risk, credit risk, management risk and the risk that a Fund could not close out a position when it would be most advantageous to do so. Funds investing in derivatives could lose more than the principal amount invested in these instruments. Investing in foreign securities may entail risk due to foreign economic and political developments; this risk may be enhanced when investing in emerging markets. High-yield bonds typically have a lower credit rating than other bonds. Lower rated bonds generally involve a greater risk to principal than higher rated bonds. Smaller companies may be more volatile than larger companies and may entail more risk. Concentrating investments in individual sectors may add additional risk and volatility compared to a diversified fund.

Certain Funds may pursue an environmental, social and governance (ESG) investing strategy, which typically selects or excludes securities of certain issuers for reasons other than financial performance. Such strategy carries the risk that a Fund's performance will differ from similar funds that do not utilise an ESG investing strategy. For example, the application of this strategy could affect a Fund's exposure to certain sectors or types of investments, which could negatively impact a Fund's performance. There is no guarantee that the factors utilised by the Investment Advisor will reflect the opinions of any particular investor, and the factors utilised by the Investment Advisor may differ from the factors that any particular investor considers relevant in evaluating an issuer's ESG practices. Future ESG development and regulation may impact a Fund's implementation of its investment strategy. In addition, there may be cost implications arising from ESG related due diligence, increased reporting and use of third-party ESG data providers.

Classifications of Fund portfolio holdings in this report are made according to financial reporting standards. The classification of a particular portfolio holding as shown in the Schedule of Investments and other sections of this report may differ from the classification used for the Fund's compliance calculations, including those used in the Fund's Prospectus, investment objectives, regulatory, and other investment limitations and policies, which may be based on different asset class, sector or geographical classifications. All Funds are separately monitored for compliance with respect to the Prospectus and regulatory requirements. Within the Schedule of Investments specific portfolio holdings may be aggregated where investments have the same attributes (i.e. coupon rates and maturity dates).

The geographical classifications of securities in this report are classified by the country of incorporation of a holding. In certain instances, a security's country of incorporation may be different from its country of economic exposure.

Certain securities and instruments in which a Fund may invest rely in some fashion upon the London Interbank Offered Rate ("LIBOR"). LIBOR is an average interest rate, determined by the ICE Benchmark Administration, that banks charge one another for the use of short-term money. In light of the phasing out of the use of LIBOR, relevant Funds will need to transition to another benchmark (e.g., the Secured Overnight Financing Rate, which is to replace U.S. Dollar LIBOR and measures the cost of overnight borrowings through repurchase agreement transactions collateralised with U.S. Treasury securities). Any potential effects of the transition away from LIBOR on a Fund or on certain securities and instruments in which a Fund invests can be difficult to ascertain, and they may vary depending on factors. The transition may also result in a reduction in the value of certain investments held by a Fund or a reduction in the effectiveness of related Fund transactions such as hedges. Any such effects of the transition away from LIBOR, as well as other unforeseen effects, could result in losses to a Fund.

On each individual Fund Summary page in this Annual Report, the net performance chart measures performance assuming that all dividend and capital gain distributions were reinvested. Returns do not reflect the deduction of taxes that a shareholder would pay on: (i) Fund distributions; or (ii) the redemption of Fund shares. The net performance chart measures each Fund's performance against the performance of a broad-based securities market index (benchmark index). Each Fund's past performance, before and after taxes, is not necessarily an indication of how the Fund will perform in the future. An investment in a Fund is not a deposit in a bank and is not guaranteed or insured by any government agency. The value of and income from shares in the Fund may go up or down and you may not get back the amount you have invested in the Funds.

Investment Objective and Strategy Overview

PIMCO Balanced Income and Growth Fund seeks to maximise total return, consistent with preservation of capital and prudent investment management, by taking exposure to a wide range of asset classes, including equities, fixed income, commodities and property (as described in the Fund Supplement). The Fund can also invest in other PIMCO Funds and other collective investment schemes (in accordance with the Prospectus).

Fund Insights

The following affected performance (on a gross basis) during the reporting period:

- » Long exposure to U.S. equities contributed to performance, as U.S. equities had positive returns during the period.
- » Exposure to the cash interest rate in the U.S. contributed to performance through carry, as U.S. cash rates remained positive during the period.
- » Long exposure to eurozone equities contributed to performance, as eurozone equities had positive returns during the period.
- » U.S. duration and curve positioning, particularly long exposure to the 3-year, 5-year, and 12- through 20-year portions of the curve, detracted from performance, as these interest rates rose during the period.
- » Long exposure to the Japanese yen (JPY) detracted from performance, as the JPY depreciated against the U.S. dollar (USD) during the period.
- » Long exposure to the euro (EUR) detracted from performance, as the EUR depreciated against the U.S. dollar (USD) during the period.

Investment Objective and Strategy Overview

Commodity Real Return Fund seeks to maximise total return consistent with prudent investment management by investing in derivative instruments (which may be listed or OTC), including swap agreements, futures, options on futures and structured notes and commodity index-linked notes, which enable it to gain exposures to any of the indices and sub-indices referencing commodities (including but not limited to any index within the Bloomberg Commodity family of indices) which meet with the requirements of and have, where necessary, been cleared by the Central Bank of Ireland. Details of any indices utilised by the Fund and the types of commodities they reference will be available from the Investment Advisor upon request. These instruments will provide exposure to the investment returns of the commodities markets without investing directly in physical commodities, and will be backed by an actively managed portfolio of global Fixed Income Instruments (as defined in the Prospectus). The Fund may also invest in common and preferred stocks as well as convertible securities of issuers in commodity-related industries.

Fund Insights

The following affected performance (on a gross basis) during the reporting period:

- » Active commodity strategies within the Energy and Agriculture sectors, including underweight to corn and natural gas, contributed to relative performance as corn and natural gas posted negative returns.
- » Exposure to securitised assets, including non-agency mortgage-backed securities (MBS) and collateralised loan obligations (CLO), contributed to relative performance, as spreads broadly tightened across these securities.
- » Duration strategies in Europe, including an overweight to the intermediate and underweight to the long parts of the Eurozone curve and an overweight to Italian interest rates versus French interest rates, contributed to relative performance, as intermediate yields declined, while long-term yields rose, and as the spread between Italy and France narrowed.
- » Overweight to U.S. and Japanese breakeven inflation contributed to relative performance, as U.S. and Japanese breakeven inflation rose.
- » The structural allocation to global short-term Inflation-Linked Bonds (ILBs) as collateral backing the Fund's commodity exposure detracted from relative performance, as global short-term ILBs, as measured by the Bloomberg Barclays World Government Inflation-Linked Bond 1-5 Year Index (USD Hedged), underperformed the U.S. 3-Month Treasury Bill collateral within the commodity index.
- » Exposure to California Carbon Allowances (CCAs) detracted from relative performance, as CCAs posted negative returns.
- » Active commodity strategies within the Metals sector, including underweight to base and precious metals, detracted from relative performance as base and precious metals posted positive returns.
- » Overweight exposure to U.S. interest rates detracted from relative performance, as U.S. interest rates rose.

Investment Objective and Strategy Overview

Emerging Markets Short-Term Local Currency Fund seeks maximum total return, consistent with preservation of capital and prudent investment management, by investing at least 80% of its assets in currencies of, or in Fixed Income Instruments (as defined in the Prospectus) denominated in currencies of, emerging markets. The Investment Advisor has a broad discretion to identify countries that it considers to qualify as emerging markets. The Investment Advisor will select the Fund’s country and currency composition based on its evaluation of relative interest rates, inflation rates, exchange rates, monetary and fiscal policies, trade and current account balances, and other specific factors the Investment Advisor believes to be relevant. The Fund is likely to concentrate its investments in Asia, Africa, the Middle East, Latin America and the emerging countries of Europe. The Fund may invest in instruments whose return is based on the return of an emerging market security such as a derivative instrument, rather than investing directly in emerging market securities. The average portfolio duration of this Fund varies based on the Investment Advisor’s forecast for interest rates and, under normal market conditions, is not expected to exceed two years. The Fund may invest all of its assets in high yield securities, subject to a maximum of 15% of its assets in securities rated lower than B by Moody’s or S&P or equivalently rated by Fitch (or, if unrated, determined by the Investment Advisor to be of comparable quality).

Investment Objective and Strategy Overview

Euro Income Bond Fund seeks to maximise current income, consistent with prudent investment management. Long-term capital appreciation is a secondary objective. The Fund invests at least two-thirds of its assets in a diversified portfolio of Euro-denominated bonds and other Fixed Income Instruments (as defined in the Prospectus) of varying maturities. The Fund will seek to maintain a high level of dividend income by investing in a broad array of fixed income sectors which in the Investment Advisor's view typically generate elevated levels of income. The Fund promotes environmental and social characteristics but does not have sustainable investment as its objective.

Investment Objective and Strategy Overview

Global Investment Grade Credit ESG Fund seeks to maximise total return, consistent with preservation of capital, prudent investment management and sustainable investing (by explicitly integrating environmental, social and governance factors into the investment process as further outlined in the Supplement). The Fund seeks to achieve its investment objective by investing at least two-thirds of its assets in a diversified portfolio of investment grade corporate Fixed Income Instruments (as defined in the Prospectus).

Fund Insights

The following affected performance (on a gross basis) during the reporting period:

- » Overweight exposure to and security selection within banking and brokerage contributed to relative performance, as the sector as well as select overweight U.S. and European issuers outperformed.
- » Overweight exposure to and security selection within REITs contributed to relative performance, as the sector as well as the ESG bonds of select overweight issuers outperformed the broader market.
- » Security selection within emerging markets external debt, as overweight exposure to the ESG bonds of select issuers outperformed.
- » Currency positioning, and in particular modest long exposures to select developed market and emerging market currencies, detracted from relative performance.
- » Interest rate positioning, and in particular modest overweights to U.K and Australian duration, detracted from relative performance.

Investment Objective and Strategy Overview

Global Low Duration Real Return Fund seeks to maximise real return, consistent with preservation of real capital and prudent investment management, by investing at least 70% of its assets in a diversified portfolio of inflation-indexed Fixed Income Instruments (as defined in the Prospectus) of varying maturities issued by governments, their agencies or instrumentalities and corporations. Inflation-indexed bonds are Fixed Income Instruments that are structured to provide protection against inflation. The Fund promotes environmental and social characteristics but does not have sustainable investment as its objective.

Fund Insights

The following affected performance (on a gross basis) during the reporting period:

- » Breakeven inflation (BEI) strategies, including overweight exposure to U.S. BEI, contributed to relative performance as U.S. BEI rose.
- » Exposure to securitised assets, including collateralised loan obligations ("CLO") and U.S. agency mortgage-backed securities ("MBS") contributed to relative performance, as spreads broadly tightened across these sectors.
- » Duration strategies in Europe, including underweight overall exposure to Eurozone duration as well as overweight to the intermediate and underweight to the long parts of the Eurozone curve, contributed to relative performance, as Eurozone rates broadly rose while the curve steepened.
- » Overweight exposure to U.K. interest rates detracted from relative performance, as U.K. interest rates rose.
- » There were no other material detractors for this Fund.

Investment Objective and Strategy Overview

Global Real Return Fund seeks to maximise real return, consistent with preservation of real capital and prudent investment management. The Fund seeks to achieve its investment objective by investing at least two-thirds of its assets in a diversified portfolio of inflation-indexed Fixed Income Instruments (as defined in the Prospectus) of varying maturities issued by governments, their agencies, or instrumentalities and corporations. The Fund promotes environmental and social characteristics but does not have sustainable investment as its objective.

Fund Insights

The following affected performance (on a gross basis) during the reporting period:

- » Duration strategies in Europe, including an overweight to the intermediate and underweight to the long parts of the Eurozone curve and an overweight to Italian interest rates versus French interest rates, contributed to relative performance, as intermediate yields declined, while long-term yields rose, and as the spread between Italy and France narrowed.
- » Exposure to non-agency mortgage-backed securities (MBS) and collateralised loan obligations (CLOs) contributed to relative performance, as spreads broadly tightened across these sectors.
- » Overweight to U.S. and Japanese breakeven inflation contributed to relative performance, as U.S. and Japanese breakeven inflation rose.
- » Overweight exposure to U.K. interest rates detracted from relative performance, as U.K. interest rates rose.
- » There were no other material detractors for this Fund.

Investment Objective and Strategy Overview

Inflation Multi-Asset Fund seeks to preserve the real value of capital through prudent investment management. The Fund will be managed actively and will predominantly invest in a diversified portfolio of inflation-related assets. The Fund seeks to achieve its objective by investing in a combination of global inflation-related Fixed Income Instruments (as defined in the Prospectus), emerging market bonds and currencies, equities and equity-related securities, and commodity and property-related instruments. Exposure to such assets may be achieved through direct investment or through the use of financial derivative instruments as detailed in the Prospectus. The Fund will pursue a multi-asset-oriented investment strategy in accordance with its investment policies. The objective of the strategy is to achieve real capital preservation over time by allocating to a range of inflation-related asset classes. As part of its investment strategy, the Investment Advisor will use a global secular forecast of interest and inflation rates across economies and an integrated investment process as set out in the Prospectus.

Fund Insights

The following affected performance (on a gross basis) during the reporting period:

- » Active commodity strategies within the Energy and Agriculture sectors, including underweight to corn and natural gas, contributed to relative performance as corn and natural gas posted negative returns.
- » Duration strategies in Europe, including an overweight to the intermediate and underweight to the long parts of the Eurozone curve and an overweight to Italian interest rates versus French interest rates, contributed to relative performance, as intermediate yields declined, while long-term yields rose, and as the spread between Italy and France narrowed.
- » Overweight to U.S. and Japanese breakeven inflation contributed to relative performance, as U.S. and Japanese breakeven inflation rose.
- » Exposure to securitised assets, including U.S. agency and non-agency mortgage-backed securities (MBS), contributed to relative performance, as spreads broadly tightened across these securities.
- » Active currency strategies, including short exposure to the Korean won (KRW) and the new Taiwanese dollar (TWD) contributed to relative performance, as these currencies depreciated relative to the U.S. dollar (USD).
- » Tactical underweight allocation to broad commodities and gold detracted from relative performance, as broad commodities and gold generated positive returns.
- » Overweight exposure to U.S., U.K. and Australian interest rates detracted from relative performance, as interest rates in those regions rose.

Low Duration Global Investment Grade Credit Fund seeks to maximise total return, consistent with preservation of capital and prudent investment management, by investing at least two-thirds of its assets in a diversified portfolio of investment grade corporate Fixed Income Instruments (as defined in the Prospectus).

Fund Insights

The following affected performance (on a gross basis) during the reporting period:

- » Underweight exposure to the government-related sector contributed to performance, as the sector underperformed the broader market on an excess return basis.
- » Overweight exposure to and security selection within the finance companies sector contributed to performance, as the sector as well as a select overweight issuer outperformed.
- » Security selection within the pipeline sector contributed to performance, as a select overweight issuer outperformed.
- » Macro strategies, and in particular overweight exposure to Brazilian and U.K. duration, detracted from performance, as interest rates rose.
- » Security selection within the utility sector detracted from performance, as exposure to a select European issuer underperformed amid concerns over weakening operating fundamentals.

Investment Objective and Strategy Overview

PIMCO MLP & Energy Infrastructure Fund seeks to maximise total return, consistent with prudent investment management. The “total return” sought by the Fund consists of income and capital appreciation. The Fund seeks to achieve its investment objective by investing under normal circumstances at least two-thirds of its net assets either directly or indirectly in a portfolio of equity investments which are linked to (i) publicly traded partnerships, which are also known as master limited partnerships (“MLPs”), (ii) the general partners that own or manage MLPs, (iii) spin-offs (companies which separate from the MLPs or general partner after divestitures or restructuring) from MLPs, (iv) companies that are similar to MLPs by virtue of operating in the same industry or competing with MLPs (v) other entities that may not be structured as a publicly traded partnership but operate in the mid-stream energy sector (the transportation component of the energy infrastructure sector such as pipeline, rail and oil tankers) and (vi) special purpose entities (i.e., entities established for a specific purpose which may be used as an investment vehicle to gain access to investments outlined herein). The Fund may invest in these instruments either in the secondary market or during an initial public offering.

Fund Insights

The following affected performance (on a gross basis) during the reporting period:

- » Overweight exposure to the pipeline transportation — natural gas sector added to relative returns as the sector outperformed the broad index; security selection within the sector also contributed.
- » Underweight exposure to the marketing and distribution sector contributed to relative returns as the sector underperformed the broad index; however, security selection within the sector detracted as the fund’s holdings underperformed the sector.
- » Security selection within the gathering and processing sector contributed to relative returns as the fund’s holdings outperformed the sector.
- » Security selection within the pipeline transportation — petroleum sector added to relative returns as the fund’s holdings outperformed the sector.
- » Underweight exposure to the liquefaction sector contributed to relative returns as the sector underperformed the broad index; security selection within the sector also contributed.
- » Underweight exposure to the compression sector contributed to relative returns as the sector underperformed the broad index.
- » Underweight exposure to the midstream energy equities, as measured by the Alerian MLP Total Return Index, detracted from relative returns as the index generated positive returns.
- » Exposure to off-benchmark equity names detracted from relative returns as these companies underperformed the broad index.

Investment Objective and Strategy Overview

US Short-Term Fund seeks maximum current income consistent with the preservation of capital and daily liquidity. The Fund invests at least two-thirds of its total assets in a diversified portfolio of Fixed Income Instruments (as defined in the Prospectus) of varying maturities issued by various U.S. and non-U.S. public- or private-sector entities. The average portfolio duration of this Fund will normally vary based on the Investment Advisor's forecast for interest rates and is not expected to exceed one year. The Fund will reference its performance against a benchmark rate of the FTSE 3-Month U.S. Treasury Bill Index. The FTSE 3-Month U.S. Treasury Bill Index is an unmanaged index representing monthly return equivalents of yield averages of the last 3-month Treasury Bill issues.

Fund Insights

The following affected performance (on a gross basis) during the reporting period:

FTSE Euro Broad Investment-Grade Index	FTSE Euro Broad Investment-Grade Index is an index of the Euro-based investment-grade fixed-income market that is accessible to institutional investors (in Euro terms). It is not possible to invest directly in an unmanaged index.
ICE BB-B Rated Developed Markets High Yield ESG Tilt Constrained Index (USD Hedged)	ICE BB-B Rated Developed Markets High Yield ESG Tilt Constrained Index (USD Hedged) contains all securities in the ICE BofA Global High Yield Index (the "Parent Index") provided all securities: 1) are rated BB1 through B3 based on average of Moody's, S&P and Fitch; 2) have a developed markets country of risk. Developed markets is defined as an FX-G10 member, a Western European nation, or a territory of the US or a Western European nation. The FX-G10 includes all Euro members, the US, Japan, the UK, Canada, Australia, New Zealand, Switzerland, Norway, and Sweden. The security weightings of the resulting screen Parent Index are adjusted to improve the overall environmental, social, governance risk score of the index.
ICE BofA 3-Month German Treasury Bill Index	ICE BofA 3-Month German Treasury Bill Index is comprised of a single issue purchased at the beginning of the month and held for a full month. At the end of the month that issue is sold and rolled into a newly selected issue. The issue selected at each month-end rebalancing is the outstanding German Treasury Bill that matures closest to three months from the rebalancing date, but not less than one month. To qualify for selection, the bill must have settled on or before the month-end rebalancing date.
ICE BofA 1-3 Year U.S. Treasury Index	The ICE BofA 1-3 Year U.S. Treasury Index is an unmanaged index comprised of U.S. Treasury securities, other than inflation-protection securities and STRIPS, with at least \$1 billion in outstanding face value and a remaining term to final maturity of at least one year and less than three years. It is not possible to invest directly in an unmanaged index.

Legal Benchmark Name	Index Description
ICE BofA 3-Month Treasury Bill Index (EUR Hedged)	The ICE BofA 3-Month Treasury Bill Index (EUR Hedged) is comprised of a single issue purchased at the beginning of the month and held for a full month. At the end of the month that issue is sold and rolled into a newly selected issue. The issue selected at each month-end rebalancing is the outstanding Treasury Bill that matures closest to, but not beyond, three months from the rebalancing date. To qualify for selection, an issue must have settled on or before the month-end rebalancing date. While the index will often hold the Treasury Bill issued at the most recent 3-month auction, it is also possible for a seasoned 6-month Treasury Bill to be selected.
ICE BofA BB-B European Currency High Yield Constrained Index	The ICE BofA BB-B European Currency High Yield Constrained Index is designed to track the performance of Euro and British pound sterling-denominated below investment grade corporate debt publicly issued in the eurobond, sterling domestic or euro domestic markets. To be eligible for Index inclusion bonds must be rated below investment grade but at least B3 based on an average of Moody's, S&P, and Fitch. Individual issuer exposure within the Index is capped at 3%.
ICE BofA BB-B Rated Developed Markets High Yield Constrained Index Hedged into USD	ICE BofA BB-B Rated Developed Markets High Yield Constrained Index Hedged into USD tracks the performance of below investment grade bonds of corporate issuers domiciled in developed market countries having an investment grade foreign currency long term debt rating (based on a composite of Moody's, S&P, and Fitch). The Index includes bonds denominated in U.S. dollars, Canadian dollar, British pound sterling, Euro (or Euro legacy currency), but excludes all multicurrency denominated bonds. Bonds must be rated below investment grade but at least B3 based on a composite of Moody's, S&P, and Fitch. Qualifying bonds are capitalisation-weighted provided the total allocation to an individual issuer (defined by Bloomberg tickers) does not exceed 2%. Issuers that exceed the limit are reduced to 2% and the face value of each of their bonds is adjusted on a pro-rata basis. Similarly, the face value of bonds of all other issuers that fall below the 2% cap are increased on a pro-rata basis. Prior to 25 September 2009, the ICE BofA Merrill Lynch Indices were known as the Merrill Lynch Indices.
ICE BofA Sterling Non-Gilts 10+ Index	The ICE BofA Sterling Non-Gilts 10+ Index is made up of investment grade Sterling-denominated bonds, excluding Sterling-denominated bonds issued by the British government. All bonds in the index must be rated investment grade by at least one of the major rating agencies. It is not possible to invest directly in an unmanaged index.
ICE BofA Sterling Non-Gilts Index	ICE BofA Sterling Non-Gilts Index tracks the performance of Sterling-denominated investment grade public debt of Corporate, quasi-government and non-UK sovereign issuers. It is not possible to invest directly in an unmanaged index.
ICE BofA U.S. High Yield Constrained Index	The ICE BofA U.S. High Yield Constrained Index tracks the performance of U.S. dollar-denominated below investment grade rated corporate debt publically issued in the U.S. domestic market. To qualify for inclusion in the index, securities must have a below investment grade rating (based on an average of Moody's, S&P, and Fitch) and an investment grade rated country of risk (based on an average of Moody's, S&P, and Fitch foreign currency long term sovereign debt ratings).
ICE BofA SARON Overnight Rate Index	ICE BofA SARON Overnight Rate Index tracks the performance of a synthetic asset paying SARON to a stated maturity. The index is based on the assumed purchase at par of a synthetic instrument having exactly its stated maturity and with a coupon equal to that day's fixing rate. That issue is assumed to be sold the following business day (priced at a yield equal to the current day fixing rate) and rolled into a new instrument.
ICE BofA SOFR Overnight Rate Index	ICE BofA SOFR Overnight Rate Index tracks the performance of a synthetic asset paying SOFR to a stated maturity. The index is based on the assumed purchase at par of a synthetic instrument having exactly its stated maturity and with a coupon equal to that days fixing rate. That issue is assumed to be sold the following business day (priced at a yield equal to the current day fixing rate) and rolled into a new instrument. It is not possible to invest directly in an unmanaged index.
ICE BofA SONIA Overnight Rate Index	ICE BofA SONIA Overnight Rate Index tracks the performance of a synthetic asset paying SONIA to a stated maturity. The index is based on the assumed purchase at par of a synthetic instrument having exactly its stated maturity and with a coupon equal to that day's fixing rate. That issue is assumed to be sold the following business day (priced at a yield equal to the current day fixing rate) and rolled into a new instrument.
JPMorgan Asia Credit Index	The JPMorgan Asia Credit Index measures the performance of Asia ex-Japan U.S. dollar-denominated bond market. Index provides a benchmark for investment opportunities in U.S. dollar-denominated fixed income instruments issued by Asia ex-Japan sovereigns, quasi-sovereigns, and corporates.
JPMorgan Corporate Emerging Markets Bond Index Diversified (CEMBI)	The JPMorgan Corporate Emerging Markets Bond Index Diversified (CEMBI) is a uniquely weighted version of the CEMBI index. It limits the weights of those index countries with larger corporate debt stocks by only including a specified portion of these countries' eligible current face amounts of debt outstanding. The CEMBI Diversified results in well-distributed, more balanced weightings for countries included in the index. The countries covered in the CEMBI Diversified are identical to those covered by the CEMBI. It is not possible to invest directly in an unmanaged index.
JPMorgan Emerging Local Markets Index Plus (Unhedged)	JPMorgan Emerging Local Markets Index Plus (Unhedged) tracks total returns for local-currency-denominated money market instruments in 22 emerging markets countries with at least US\$10 billion of external trade. ⁽¹⁾ If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.

⁽²⁾ The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.

⁽³⁾ This instrument has a forward starting effective date. See Note 2, Securities Transactions and Investment Income, in the Notes to Financial Statements for further information.

- ⁽¹⁾ If the Fund is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation or underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- ⁽²⁾ If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- ⁽³⁾ The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.

- (1) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (2) The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.
- (3) This instrument has a forward starting effective date. See Note 2, Securities Transactions and Investment Income, in the Notes to Financial Statements for further information.

⁽¹⁾ If the Fund is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation or underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.

- (2) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (3) The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.

(1) If the Fund is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation or underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.

(2) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.

(3) The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.

Schedule of Investments Emerging Markets Short-Term Local Currency Fund (cont.)

- (1) If the Fund is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the referenced obligation or underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (2) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (3) The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.

- (1) If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash, securities or other deliverable obligations equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.
- (2) The maximum potential amount the Fund could be required to pay as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.
- (3) This instrument has a forward starting effective date. See Note 2, Securities Transactions and Investment Income, in the Notes to Financial Statements for further information.
