BACKGROUND TO THE ICAV

The following information is derived from and should be read in conjunction with the full text and interpretation section of the most recent Prospectus and supplements for AXA IM World Access Vehicle ICAV (the "ICAV").

The ICAV is organised as an open ended umbrella type Irish collective asset-management vehicle registered by the Central Bank of Ireland (the "Central Bank") on 12 May 2016 and authorised to carry on business as an ICAV, pursuant to Part 2 of the Irish Collective Asset-management Vehicles Act, 2015 and established as an undertaking for collective investment in transferable securities pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended), and under the Central Bank (Supervision & Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (together the "UCITS Regulations").

The ICAV is structured as an umbrella fund with segregated liability between sub-funds and comprises several funds (each a "Fund", together the "Funds") each representing a separate portfolio of assets. The ICAV has the following active Funds as at 31 December 2024:

| Name | Inception Date |
|--|-------------------|
| AXA IM ACT US Short Duration High Yield Low Carbon | 12 September 2016 |
| AXA IM WAVe Cat Bonds Fund | 20 January 2017 |
| AXA IM Multi Asset Target 2026 | 5 June 2018 |
| AXA IM Wave Biotech Fund | 8 April 2019 |
| Delegio Privilege Ambitious Fund | 2 June 2020 |
| Delegio Privilege Balanced Fund | 2 June 2020 |
| Delegio Privilege Cautious Fund | 2 June 2020 |
| Delegio Privilege Entrepreneurial Fund | 2 June 2020 |
| AXA IM Euro Yield Target 2028 | 14 June 2023 |
| Target Yield 2028 | 2 April 2024 |
| Target Yield June 2028 | 11 September 2024 |
| USD Credit 2027 | 12 September 2024 |
| | |

Additional Funds, in respect of which a Supplement or Supplements will be issued, may, with the prior approval of the Central Bank, the Board of Directors (the "Directors") and the consent of State Street Custodial Services (Ireland) Limited (the "Depositary"), be added by AXA Investment Managers Paris (the "Manager").

The shares of the Funds are not listed on any stock exchange.

Past performance is not a guide for future performance.

Investment Objective of the Funds

Each Fund is managed in accordance with the investment objective and policy as set out in the relevant supplement. The assets of a Fund will be invested separately in accordance with the specific investment objective and policies of the relevant Fund. As at 31 December 2024, the ICAV had fifteen Funds approved by the Central Bank, of which there were twelve active Funds. The following Funds are in the process of being revoked: AXA IM Sunshine 2023/1 terminated on 9 February 2023, AXA IM Sunshine 2023/2 terminated on 17 May 2023 and AXA IM Maturity 2023 Fund terminated on 26 October 2023. The investment objectives of each of the twelve active Funds are set out below.

AXA IM ACT US Short Duration High Yield Low Carbon

The objective of the Fund is to seek high income by investing in US high yield debt securities whose carbon footprint is at least 30% lower than that of the ICE BofA US High Yield Index (the "Benchmark"). As a secondary extra-financial objective, the water intensity of the portfolio aims at being at least 30% lower than the Benchmark.

AXA IM WAVe Cat Bonds Fund

The investment objective of the Fund is to achieve a long-term, risk-adjusted, absolute rate of return and capital growth and/or income from investment in catastrophe bonds, also referred to as "cat bonds" ("insurance-linked securities" or "ILS").

BACKGROUND TO THE ICAV (continued)

Investment Objective of the Funds (continued)

AXA IM Multi Asset Target 2026

The investment objective of the Fund is to seek, over the period until 30 March 2026, being the maturity date of the Fund or such other business days as may be determined by the Directors in consultation with the Manager and notified to Shareholders in advance, and through a discretionary tactical allocation of investments between several asset classes (being international equities, emerging market bonds and high yield bonds), long term capital growth and a lower volatility compared to a well-diversified portfolio of liquid equities representing a broad spread of the largest OECD equity markets (including the EU and US), in order to achieve an annualised return between 2% and 6%, net of management fees, in EUR. This annualised return is an objective based on normal market conditions and is not guaranteed.

AXA IM Wave Biotech Fund

The investment objective of the Fund is to seek to provide long term capital growth. The Fund will seek to achieve its investment objective by investing in equity securities and equity-related securities (such as preferred stocks as well as depository receipts for such securities) of listed companies, principally in the biotechnology, genomic and medical research industry, which the Manager and AXA Investment Managers UK Limited (the "Sub-Investment Manager") believe have the potential to provide above-average returns based on the higher growth nature of the biotechnology sector. Further, the Fund targets companies that are offering the highest probability of clinical, regulatory and commercial success. The Manager and the Sub-Investment Manager has full discretion to select investments for the Fund in line with the investment policy and in doing so may take into consideration the NASDAQ Biotechnology index.

Delegio Privilege Cautious Fund

The investment objective of the Fund is to seek to provide long term capital growth. The Fund will seek to achieve its investment objective by investing directly or indirectly (in particular through the use of eligible investment funds and derivatives) in a diversified portfolio of global equity and fixed income securities. The Fund will have a cautious approach with a preference towards lower risk assets, such as bonds. This approach means that the investments will be mainly in investment grade fixed income securities, which are less volatile securities with high credit quality rating and the potential equity allocation is capped at 32.5% of the Fund's net assets.

Delegio Privilege Balanced Fund

The investment objective of the Fund is to seek to provide long term capital growth. The Fund will seek to achieve its investment objective by investing directly or indirectly (in particular through the use of eligible investment funds and derivatives) in a diversified portfolio of global equity and fixed income securities. Equity allocation is capped at 55% of the Fund's net assets.

Delegio Privilege Entrepreneurial Fund

The investment objective of the Fund is to seek to provide long term capital growth by investing a higher portion of the portfolio in equities. The Fund will seek to achieve its investment objective by seeking new opportunities and investing directly or indirectly (in particular through the use of eligible investment funds and derivatives) in a diversified portfolio of global equity and fixed income securities. The Fund is expected to achieve an entrepreneurial style by investing a higher portion of the portfolio in equities and will seek to purchase securities when it believes the market has not already reflected these expectations for these securities in the current stock price, considering factors such as: growth that exceeds the wider economy; identifiable competitive advantages; ability to take market share from competitors; attractive and improving margins; and sustainable above-average revenue and earnings growth. Equity allocation is capped at 77.5% of the Fund's net assets.

Delegio Privilege Ambitious Fund

The investment objective of the Fund is to seek to provide long term capital growth. The Fund will seek to achieve its investment objective by investing directly or indirectly (in particular through the use of eligible investment funds and derivatives) in a diversified portfolio of global equity and fixed income securities. Equity allocation is capped at 100% of the Fund's net assets.

AXA IM Euro Yield Target 2028

The investment objective of the Fund is to seek to generate performance through exposure to the fixed income universe to achieve an average annualised return, net of ongoing charges, over the life of the Fund of between 4% to 6%. The investment objective is not guaranteed and the potential return may be negatively impacted among others by the potential default risk and recovery rate of one or several issuers within the portfolio.

BACKGROUND TO THE ICAV (continued)

Investment Objective of the Funds (continued)

Target Yield 2028

The investment objective of the Fund is to aim to generate income by investing primarily in debt securities based on the assumption of a holding period by the Shareholder up to the Maturity Date. The investment objective is not guaranteed and the potential return may be negatively impacted among others by the potential default risk and recovery rate of one or several issuers within the portfolio.

Target Yield June 2028

The investment objective of the Fund is to aim to generate income by investing primarily in debt securities based on the assumption of a holding period by the Shareholder up to the Maturity Date. The investment objective is not guaranteed and the potential return may be negatively impacted among others by the potential default risk and recovery rate of one or several issuers within the portfolio.

USD Credit 2027

The investment objective of the Fund is to aim to generate income by investing primarily in debt securities based on the assumption of a holding period by the Shareholder up to the Maturity Date. The investment objective is not guaranteed and the potential return may be negatively impacted among others by the potential default risk and recovery rate of one or several issuers within the portfolio.

Calculation of Net Asset Value ("NAV") per Share

The NAV per share will be expressed in the local currency of the relevant share class as a per share figure. It shall be calculated by dividing the net assets attributable to the holders of redeemable participating shares by the total number of outstanding redeemable participating shares.

Distribution Policy

Classes are available as either Accumulation Classes or Distribution Classes. Accumulation Classes capitalise income. Distribution Classes may pay a dividend to the relevant Shareholders. In case of payment of dividends, payment frequency will be annual ("Distribution" Classes) or quarterly ("Distribution Quarterly" Classes). In such case, dividends shall be paid out of the net investment income (i.e. investment income less expenses) available for distribution. The interest income in the Statement of Comprehensive Income only includes interest from assets classified at amortised cost. The interest income from assets classified as fair value through profit or loss along with net realised gains and losses and movement in unrealised gains and losses is disclosed in net (loss)/income on investments and foreign currency in the Statement of Comprehensive Income.

The Directors may determine annually, after the end of the relevant financial year, if and to what extent the Fund will pay dividends. Any dividend payments will be confirmed in writing to the Shareholders of Distribution or Distribution Quarterly Classes.

The Directors, in consultation with the Manager, may at any time determine to change the policy of the Funds with respect to dividend distribution. If the Directors, in consultation with the Manager, so determine, full details of any such change will be disclosed in an updated Prospectus or Supplement and Shareholders will be notified in advance.

DIRECTORS' REPORT

Directors' Report for the financial year ended 31 December 2024

The Directors of the ICAV present herewith their annual report together with the audited financial statements for the financial year ended 31 December 2024. The financial statements of the ICAV have been prepared in accordance with IFRS and Irish statute comprising the ICAV Act and the UCITS Regulations.

Statement of Directors' Responsibilities

The Directors are responsible for preparing the annual report and the ICAV's financial statements in accordance with International Financial Reporting Standards as adopted by the European Union ("IFRS"), with the Irish Collective Asset-Management Vehicle Act 2015 (the "ICAV Act") and the UCITS Regulations.

The ICAV Act requires the Directors to prepare financial statements for each financial period which give a true and fair view of the assets and liabilities and financial position of the ICAV and of the profit or loss of the ICAV for that period and to otherwise comply with the ICAV Act. In preparing these financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- · make judgements and estimates that are reasonable and prudent;
- state whether the financial statements have been prepared in accordance with IFRS and ensure that they
 contain the additional information required by the ICAV Act; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the ICAV will continue in business.

The Directors are responsible for ensuring the maintenance of adequate accounting records which correctly explain and record the transactions of the ICAV, enable at any time the assets, liabilities, financial position and profit or loss of the ICAV and its Funds to be determined with reasonable accuracy, enable them to ensure that the financial statements and Directors report comply with the ICAV Act and enable the financial statements to be audited in accordance with IFRS, the ICAV Act and the UCITS Regulations. The accounting records are kept by State Street Fund Services (Ireland) Limited (the "Administrator"), at 78 Sir John Rogerson's Quay, Dublin 2, Ireland. The Directors believe that they have complied with the requirement with regard to adequate accounting records by employing an experienced Administrator with appropriate expertise and adequate resources to prepare the financial statements. The Directors are responsible for safeguarding the assets of the ICAV. In this regard, they have entrusted the assets of the ICAV to State Street Custodial Services (Ireland) Limited who has been appointed as Depositary to the ICAV pursuant to the terms of a Depositary Agreement in accordance with the requirements of the UCITS Regulations. The Directors have a general responsibility for taking such steps as are reasonably open to them to prevent and detect fraud and other irregularities.

The Directors are responsible for ensuring that the financial statements are published to investors in a durable medium that ensures the integrity of the financial information on the website. The financial statements are available on www.axa-im.com.

Transactions with connected persons

Regulation 43 of the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations") requires that any transaction between a UCITS and a connected person is conducted at arm's length and be in the best interests of the shareholders of the UCITS.

For the purpose of Regulation 42 of the Central Bank UCITS Regulations, a "connected person" means the management company or depositary to a UCITS; and the delegates, or sub-delegates of such a management company or depositary (excluding any non-group company sub-custodians appointed by a depositary); and any associated or group company of such a management company, depositary, delegate or sub-delegate.

Transactions with connected persons (continued)

The Directors are satisfied that (i) there are in place arrangements, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 43(1) of the Central Bank UCITS Regulations are applied to all transactions with a connected party (as defined in Regulation 42 of the Central Bank UCITS Regulations) and (ii) all transactions with connected parties entered into during the period to which the report relates complied with the obligations that are prescribed by Regulation 43(1) of the Central Bank UCITS Regulations.

Statement of Compliance on Corporate Governance

The ICAV has adopted in full the voluntary Corporate Governance Code for Investment Funds and Management Companies (the "Code") as published by the Irish Funds, the text of which is available from the Irish Funds website, www.irishfunds.ie. The ICAV has been fully compliant with the Code for the year ended 31 December 2024.

Distributions

The following distributions totalling USD12,571,376 (31 December 2023: USD3,968,675) were declared during the financial year ended 31 December 2024: USD2,456,830 in respect of AXA IM ACT US Short Duration High Yield Low Carbon (31 December 2023: USD2,616,037), USD4,691,424 in respect of AXA IM WAVE Cat Bonds Fund (31 December 2023: USD963,350), EURNil in respect of AXA IM Maturity 2023 Fund (31 December 2023: EUR72,440 in respect of Delegio Privilege Ambitious Fund (31 December 2023: EUR77,278), EUR108,776 in respect of Delegio Privilege Balanced Fund (31 December 2023: EUR116,831), EUR24,667 in respect of Delegio Privilege Cautious Fund (31 December 2023: EUR31,025), EUR128,615 in respect of Delegio Privilege Entrepreneurial Fund (31 December 2023: EUR130,011) and EUR4,678,092 in respect of AXA IM Euro Yield Target 2028. There were no distributions payable as at 31 December 2024 (31 December 2023: Nil).

Business Review, Results and Future Developments

The results of operations for the financial year are set out in the Statement of Comprehensive Income. A detailed review of the development of the business and future developments is included in the Manager's Reports on pages 12 to 24. The Directors do not anticipate any significant change in the structure or investment objective of the Funds. The ICAV will continue to act as an investment vehicle as set out in the Prospectus.

Risk Management Objectives and Policies

Details of the ICAV risk management objectives and policies are included in Note 13 to the financial statements.

Key Performance Indicators

The Directors consider that the change in NAV per share of each share class are key indicators of the performance of each Fund of the ICAV. Key performance indicators ("KPIs") monitored by the Directors for each Fund include the month to month movement in the NAV per share of each share class and the share capital movements.

Future Developments

Please see the Outlook sections in the Manager's Report for information of likely future developments in the business of the ICAV.

Employees

The ICAV had no employees during the financial year ending 31 December 2024 or 31 December 2023.

The following distributions were declared with an ex-date of 2 January 2025: USD301,651 in respect of AXA IM ACT US Short Duration High Yield Low Carbon and USD1,532,731 in respect of AXA IM WAVE Cat Bonds Fund.

The following distributions were declared with an ex-date of 1 April 2025: USD1,718,791 in respect of AXA IM ACT US Short Duration High Yield Low Carbon, USD1,408,404 in respect of AXA IM WAVE Cat Bonds Fund, EUR178,370 in respect of Delegio Privilege Ambitious Fund, EUR574,066 in respect of Delegio Privilege Balanced Fund, EUR142,577 in respect of Delegio Privilege Cautious Fund, EUR463,875 in respect of Delegio Privilege Entrepreneurial Fund, EUR3,577,996 in respect of Target Yield 2028, EUR478,922 in respect of Target Yield June 2028, USD74,738 in respect of USD Credit 2027 and EUR7,066,440 in respect of AXA IM Euro Yield Target 2028.

Trump administration's policy on global tariffs and the back-forth have led to a sharp correction of the US and global equity markets since Q1 2025, fueling fears of a global trade war. Volatility risk remains elevated. Economic and geopolitical uncertainties continue to pose with persistent inflation concerns, exacerbated by global tariffs and rising protectionism. Performance & asset price risk, volatility risk and liquidity risk are key market risk factors that the Manager has been closely monitoring.

There were no other significant events after the year ended 31 December 2024 that have an impact on these financial statements.

Directors

The names and nationalities of persons who were Directors during the financial year ended 31 December 2024, unless otherwise stated, are set out below and all are non-executive:

Joseph Keane (Irish)‡ Kevin O'Brien (Irish)‡ Jean Louis Laforge (French) Ouajnat Karim (French)

‡ Denotes Independent Director.

Secretary

On 12 May 2016, Tudor Trust Limited (the "ICAV Secretary") was appointed secretary on incorporation of the ICAV.

Directors and ICAV's Secretary's interest in shares and contracts

The Directors of the ICAV, the ICAV Secretary and their families had no beneficial interest in the shares of the ICAV at 31 December 2024. None of the Directors has or has had any direct interest in the promotion of the ICAV or in any transaction effected by the ICAV which is unusual in its nature or conditions or is significant to the business of the ICAV or in any contracts or arrangements of the ICAV other than:

Jean Louis Laforge is an executive officer, and also an employee of the Manager, and a Director of AXA World Funds.

Ouajnat Karim is a CEO of AXA Investment Managers UK Limited which has been appointed as a sub-investment manager to certain Funds.

Directors and ICAV's Secretary's interest in shares and contracts (continued)

Kevin O'Brien, Jean Louis Laforge and Ouajnat Karim are directors of other entities managed by the Manager or other entities within the AXA Group.

No present Director or any connected person has any interests beneficial or non-beneficial in the share capital of the ICAV.

Joseph Keane Director

Independent auditors

PricewaterhouseCoopers were reappointed in accordance with Section 125(2) of the ICAV Act 2015.

On behalf of the Board of Directors

Kevin O'Brien Director (

16 April 2025

MANAGER'S REPORTS

AXA IM ACT US Short Duration High Yield Low Carbon

The High Yield market posted a positive result in the twelve months ending on 31 December 2024, as the ICE BofA Merrill Lynch U.S. High Yield Index generated a total return of +8.20% for the period. The solid total return was driven by strong corporate performance, cooling inflation data and an overall resilient economy. Although the amount and pace of rate cutting from the Fed turned out to be less than expected, inflation showed signs of deceleration over the course of the year, which was a positive catalyst for most fixed income assets. On the technical side, 2024 saw strong inflows of \$16.4 billion into high yield and an increase in capital markets activity. The primary market increased 64% year-over-year pricing roughly \$288 billion of bonds in 2024. The high yield market experienced approximately \$4.7 billion of defaults, which was much lower than the roughly \$27.5 billion of defaults during the twelve-month period ending 31 December 2023. The par-weighted default rate ended the year at 0.36%, down sharply from 2.08% in December 2023.

During the year ending on 31 December 2024, U.S. High Yield outperformed US Corporates (+2.76%) and US Treasuries (+0.51%), but underperformed US Equities (S&P 500 +25.02%). Within U.S. High Yield, CCC and lower-rated issues (+18.18%) outperformed both BB-rated credits (+6.28%) and single B-rated credits (+7.55%). From a sector perspective, all the 18 sectors posted positive total returns over the period. Healthcare (+11.22%), Technology & Electronics (+9.59%) and Transportation (+9.53%) were the best performing sectors. On a relative basis, Utility (+6.01%), Capital Goods (+6.52%), and Automotive (+7.10%) were the worst performing sectors. During the period, the High Yield Index's Option Adjusted Spread tightened from 339 basis points to 292 basis points. The yield-to-worst of the High Yield Index decreased from 7.69% at the beginning of the period to 7.47% at the end of the period. The High Yield Index's average price was \$95.48 on 31 December 2024, up from the \$92.86 average price at the start of the year.

The AXA IM ACT US Short Duration High Yield Low Carbon Fund delivered another solid year of performance in 2024, capturing over 80% (gross, USD) of the overall market's +12.39% return. Performance benefitted from our lack of exposure to the utility and energy sectors, offset by our up-in-quality positioning, the shorter duration nature of our holdings, and negative security selection within the healthcare sector. Short duration high yield also benefitted from the continued flatness of the high yield-curve, consistently capturing roughly 85-90% of the overall market's yield. During 2024, the yield-to-worst of the Fund tightened by 2bps to 6.30%, while the market yield tightened by 22bps to 7.47%. The Option Adjusted Spread of the Fund widened by 30bps to 188bps. The overall Fund duration (using a calculation of modified duration-to-worst) was unchanged at 1.9, while the market duration decreased from 3.7 to 3.4.

Position count increased during the year and the Fund remains well diversified. We believe that diversification of portfolio holdings is important for the Fund and helps to manage credit risk. One of our top holdings at year-end, a 2.05% position, was Outfront Media Capital LLC. At year-end, approximately 24% of the portfolio was invested in securities in excess of three years but which we expect to be redeemed early. This is down roughly 16% from the previous year-end. Market technicals were positive throughout most of the year as flows were solidly positive, and the primary market, while much more active than the previous year, was predominately refinancing focused. Inflation data, Fed rate cuts, slowing economic growth, and the impact of the new Republican administration remain the primary drivers of market movements, however we still believe that corporate credit fundamentals remain healthy and the high yield default rate will continue to be benign. Valuations from a yield perspective remain attractive and offer a coupon-like return, and with markets focused on the trajectory of interest rates and the impact of a modest US slowdown, we believe the Short Duration Low Carbon Fund remains well positioned in this market environment.

AXA IM WAVe Cat Bonds Fund

Performance Commentary - December 2024

The AXA IM WAVe Cat Bonds Fund has the investment objective of achieving a long-term, risk-adjusted, absolute rate of return and capital growth and/or income from investment in catastrophe bonds.

The fund invests in various insurance-linked securities (ILS). The main strategy is to create a diversified portfolio of insurance risks.

In terms of catastrophes, 2024 has been once again unfavourable for the (re)insurance markets with more than USD 154 billion of insured losses related to a series of natural and man-made catastrophes as reported by Gallagher Re. While the economic losses reached USD 417 billion (USD 361 billion in 2023), the insured losses were higher than in 2023 (circa USD 121 billion). There were some significant events in 2024 especially hurricanes Helene and Milton which are currently estimated at USD 20 billion each and could increase in the future, but these events will not be as large as hurricane Ian (2022) which reached nearly USD 50 billion. The other losses were largely driven by a significant series of convective storms in the United States and Europe for total insured losses above USD 64 billion. Thirty events (including Helene and Milton) led to insured losses above USD 1 billion and nine of them have insured losses above USD 3 billion. Some other hurricanes like Beryl and Debby in the Gulf of Mexico led to some significant damages and market insured losses at more than USD 3 billion each. Some typhoons hit Asia including Yagi with current insured losses estimated at more than USD 1 billion. 2024 was marked by a large number of significant floods in different regions: the Middle East was impacted by some floods that could cost USD 3 billion, Brazil suffered floods in the Rio Grande do Sul for an insured cost of USD 1.5 billion, Europe was impacted as well by several events: Boris led to some significant damages in Central Europe with insured losses at more than USD 2 billion, earlier in the year Germany and some other countries suffered some floods which will cost more than USD 1.5 billion, Spain was as well impacted by some floods in the Valence region for a cost of more than USD 3.5 billion mainly born by the Consortio de Compensacio de Seguros. France was impacted by some floods too and Mayotte, a French territory, was impacted by cyclone Chido which led to some significant damages and deaths. The insured losses could reach nearly EUR 1 billion mainly born by the Caisse Centrale de Réassurance (CCR) for this cyclone.

The ILS space saw the highest primary market issuance year ever with slightly more than USD 17.1 billion of cat bonds issued in 2024, higher than 2023's previous record of USD 15.3 billion. As a consequence, the market size has increased compared to the end of last year with an outstanding amount of more than USD 47 billion. The spreads have globally tightened in 2024 despites the still very high primary activity. The year was marked as well by more volatility in the spreads than previous years. The spreads dynamic can be split in mainly four phases corresponding roughly to the quarters. During the first part of the year, many cat bonds redeemed and ILS managers were able to raise money from new or existing investors thanks to the very good 2023 performance. At the same time the primary market started relatively slowly (even if it was more active than in many previous years). The cash level was high in the ILS funds leading to a spread tightening. As the cash was absorbed by the very active primary market, this cash started to decrease. In addition, in Q2, some investors decided to postpone their investments in the ILS asset class partially due to the forecasts of a very active 2024 US hurricane season. Despites the high coupon. ILS managers had low level of cash remaining to invest in the primary market leading to a significant spread widening until the start of the US hurricane season. As usual in Q3, the primary market stopped (hurricane season and holidays) but the cash level increased, due to some redemptions and coupon payments, leading to a spread tightening again. The primary market started anew in Q4 with a tightening at the beginning and some stabilization towards the end of the year as the cash decreased into the funds. Indeed, the primary market remained very busy until the end of the year and even beginning of 2025. In the traditional reinsurance market, the spreads tightened a little bit in 2024. The needs for additional capacity kept on growing partially due to some inflation, but as well due to some perils more covered by insurers (floods in Germany for natural catastrophes or cyber for examples) or due to the growth of the population. The capacity to take risks grew as well in the traditional reinsurance and ILS markets as the impact of natural catastrophes was limited for these market players both in 2023 and 2024. Indeed, the lion share of the insured losses were kept by primary insurers. Some balance between offer and demand was found but at lower spreads (or Rate-on-Line) compared to the previous year. Some ceding companies (insurers and reinsurers) were willing to find some alternative capacity hence boosting the cat bonds offer to record high. In 2024 we have thus seen many sponsors in the US. We have not seen a lot of activity on cyber risks with only one repeat sponsor which came twice in 2024.

AXA IM WAVe Cat Bonds Fund (continued)

The secondary market was active mainly in Q2 when ILS managers were making room for the deals marketed in the primary market. It was more difficult to buy assets the rest of the year as the cash level of the funds was relatively high. As usual most of the trades were for assets exposed to US perils (hurricane and earthquake) but some other perils traded as well (Japan earthquake and typhoon, life deals). As usual at the end of the year there were some buyers of off-risk bonds too.

The performance of the AXA IM WAVe Cat Bonds Fund was very good for the reference "I USD Capi" share class. This is explained by the same three reasons as last year even if not to the same magnitude:

- 1. The coupons remained high in 2024 despites the tightening overall of the spread/discount margin during the year and the floating rate part remained high as well even if it slightly decreased at the end of the year.
- 2. The spread tightening led to some mark-to-market gains on many assets (especially those exposed in the US) even if the spread duration is rather short for the fund. The mark-to-market gain was lower than in 2023 because the distressed assets (due to lan) which recovered in 2023 did not benefit from any additional recoveries in 2024 (they already converged to the prices of non-distressed assets end of 2023).
- 3. The fund was ultimately not impacted by the two hurricanes Helene and Milton and by other 2024 events thanks to its diversified risk exposure and investments in more senior assets.

The cushion of some aggregate deals was partially eroded leading to some limited mark-to-market decrease for some deals exposed to convective storms and hurricanes in the US. Share classes hedged in other currencies than USD (EUR, CHF...) have had a lower performance than the reference USD share class (Class I USD Capi) due to the adverse USD FX hedging cost.

Our strategy continues to perform very well both for years with some exceptional loss activity such as 2022 and for relatively quiet years like 2023 and 2024, thanks to a sound portfolio management and asset picking process.

There should be nearly USD 13.0 billion of assets to redeem in 2025, this is more than the circa USD 11.8 billion which redeemed in 2024. Even though we expect some distressed bonds either due to hurricanes Helene and Milton or to an excess mortality in Canada and the UK to be extended over the course of 2025, the volume of new issuance could still be higher than what we observed in 2024 which was the best year ever for the cat bond market. Inflation pressure is contained in most of the countries (except in some specific region such as Türkiye) but could start again due to some geopolitical components and so the needs from insurers to cede some of their risks should keep on growing as well. We expect to have a very active primary market in 2025 with new sponsors coming into the cat bonds market in the next months. 2025 started very early with many cat bonds marketed in January which is rather unusual. The spreads may slightly tighten in the short term as many cat bonds redeemed beginning of January 2025 and so the cash level in the ILS funds is higher than end of 2024 and we are expecting some cash inflows in the market as the performance of the ILS asset class was very good in the last two years (2023 and 2024). As for previous years, the fund will prefer investing in per occurrence deals rather than aggregate or cascading deals in order to reduce the volatility of the NAV even if many deals issued end of 2024 were aggregate. The preference will remain as well for assets exposed to named and modelled perils. Our selection process will continue screening the best transactions in term of structure, modelling, timing, and quality of the reporting.

AXA IM Multi Asset Target 2026, Delegio Privilege Ambitious Fund, Delegio Privilege Balanced Fund, Delegio Privilege Cautious Fund and Delegio Privilege Entrepreneurial Fund

Economic overview

Central banks continued to keep pressure on reducing inflation at the start of the year, with upside US inflation surprises resulting in a delay to the expected Federal Reserve easing cycle. However, inflation continued to fall in most regions and most developed economy central banks eased policy over 2024 as concerns shifted from upside inflation risks to more balanced price outlook risks or even outright growth support. Concerns grew over the scope for Chinese growth – resulting in significant official stimulus – and persisted across the Eurozone, despite improved activity. However, the US continued to expand at a strong pace. 2024 was a year of elections. The most important being the re-election of Donald Trump as US President in November.

In Europe inflation continued to fall, and while activity improved, it remained subdued – this increasingly reflecting demand deficiency, rather than supply constraints and opening the way for monetary policy support. Quarterly GDP recovered from stagnation across 2024, rising by 0.3% in Q1, 0.2% in Q2 and 0.4% in Q3 – although this looked more temporary due to such factors as the Paris Olympics and we expect a softer Q4. Growth remained mixed across states, Germany was expected to post a second year of outright contraction. By contrast, Spanish growth continued at a strong 0.8/0.9% pace in each quarter. More generally Eurozone industrial activity continued to contract, but services and consumer spending improved. Specifically, growth headwinds appear to have shifted more towards demand deficiency from supply constrained – although unemployment remained at record lows (6.3% in November). As such, the ECB saw more scope to support growth with easier monetary policy. The ECB cut its main deposit facility rate from the 4.00% high in June by 0.25% and reduced rates by 0.25% at successive meetings for the rest of the year, a pace we expect to persist.

By contrast, the US continued to grow robustly. Growth continued to be underpinned by solid consumer spending, showing few signs of softening and in turn buoyed in part by gains to wealth. Yet despite still strong growth – expected to repeat 2023's just below 3% pace - the labour market eased somewhat, and inflation fell. This combination of strong growth and continued disinflation owed much to supply-side improvement. In the face of softer inflation, the Federal Reserve (Fed) eased policy. Stronger services inflation at the start of 2024 delayed the start of Fed easing from mid-year. The Fed then appeared to overreact to signs of labour market weakness over the summer with a surprise 50bps rate cut in September. It followed up with more modest, but successive rate cuts for the rest of the year taking the Fed Funds Rate to 4.50-4.25% from a peak 5.50-5.25% rate. The US also focused on Presidential Elections in 2024 with a late change of Democratic candidate, who lost to former President Donald Trump.

In Asia, China continued to dominate concerns. The Chinese housing market saw its third successive year of contraction, falling by 5% to take the total contraction to 15% to date - with further declines expected. This has weighed both on household spending – housing a key source of household wealth – and on China's intertwined local governments and banking system. Both have slowed economic activity. China's annual GDP growth looks likely to come out close to the official target of "around 5%". This reflected significant stimulus on behalf of the Chinese government and central bank. China continues to skirt outright deflation; inflation averaged 0.2% in 2024 the same as in 2023.

Japanese growth improved across 2024. A weak start, where regulatory-related drops in industrial output resulted in a sharp initial GDP contraction, were unwound with stronger growth in Q2 and Q3, mirroring consumer spending. Japan appears to have moved more decisively away from deflation. Inflation expectations have risen, and wages posted a multi-decade high increase in 2024. The Bank of Japan (BoJ) raised its main policy rate from its decade long low of -0.1% in March and again to 0.25% in July. Although the BoJ's communication over its intention for further hikes is non commital, we expect more hikes in 2025.

Market Performance 2024

The MSCI global equity index posted another strong year of gains, appreciating by 25% in 2024. However, individual markets saw markedly different paths. In the US, the S&P 500 index posted another strong year – the headline up 23.3% (USD) to end 2024. The year saw some sector rotation, but technology stocks continued to perform strongly. By contrast, European equities continued to rise in early 2024, but broadly flatlined from Q2 as economic growth slowed. The Eurostox 50 index posted gains of just 8.3% over the year. Italian stocks performed very well led by financial stocks. In France, the performance of the CAC 40 was worse, stocks suffering under the political and fiscal uncertainty surrounding the mid-year election, which saw markets fall from highs made in May.

AXA IM Multi Asset Target 2026, Delegio Privilege Ambitious Fund, Delegio Privilege Balanced Fund, Delegio Privilege Cautious Fund and Delegio Privilege Entrepreneurial Fund (continued)

Asia also saw mixed performance. The Japanese Nikkei 225 index posted gains of 19.2% across 2024 following strong 28.2% gains, the index supported by the renewed weak value of the yen boosting the impact of overseas earnings. By contrast, China's CSI 300 recovered from the drop in 2023, rising by 16.5% over 2024. In total, the MSCI emerging market index rose by 5.1% following gains of 7.0% in 2023.

Bond markets have generally seen yields stable over 2024 in the US and Europe but rise in Japan. In the US, a combination of inflation, fiscal and policy rate concerns saw 10-year Treasury yields peak at 5% in 2024, but yields fall back reaching a low of 3.62% in September after dovish guidance from the Federal Reserve. A stronger economy and stickier inflation saw the Fed revise its guidance later in the year. Combined with the election of Donald Trump as US President, yields closed the year at 4.57%, 70bps higher than end-2023. German yields softened in early H2 2024 reflecting weak growth conditions, but the collapse of the coalition government and impending fresh elections raised concerns about fiscal easing, which saw yields rise to close 2024 at 2.36%, up 36bps from end-2023. This despite expectations for ECB policy easing accelerating in the final months of the year. French OAT yields rose by more, up 66bps to 3.12% by year-end as the government formed after President Macron's surprise mid-year elections collapsed and the 2024 deficit was expected around 6% of GDP. However, Italian BTP yields fell by 11bps to 3.42%.

Credit spreads continued to tighten through 2024 across markets and credit quality. In the US spreads have continued to narrow to their tightest levels since pre-2007, below post-pandemic tights. European credit has narrowed more sharply still. In Investment Grade (IG), spreads narrowed by 34bps in 2024 to 1.01% (after 31bps last year), while high yield narrowed 84bps to 3.11% (after 99bps last year).

AXA IM Multi Asset Target 2026

Performance 2024

The fund delivered a good level of performance over 2024 (+5.74% net of fees). Given the strong equity rally over the year, the allocation to equity funds (AXA IM Euro Selection and AXA World Funds - Evolving Trends) showed the best contribution to performance (+3%). We have decreased allocation from equities to money market instruments over 2024 as we are approaching the maturity date of the fund. However, we kept a slightly positive tilt to equities. Given the strong allocation to fixed income, the fund benefited from the carry offered by government bonds and credit (Investment Grade and High Yield) at low risk as we maintained a low level of duration close to two years. Hence, the risk adjusted return of the fund was very interesting in 2024. Eventually, the allocation to diversification assets such as the AXA IM WAVe Cat Bonds Fund provided again some good performance, the best of fixed income assts within the portfolio.

Delegio Privilege Ambitious Fund, Delegio Privilege Balanced Fund, Delegio Privilege Cautious Fund and Delegio Privilege Entrepreneurial Fund

Performance 2024

All 4 funds delivered good absolute performance. In terms of contribution to performance, the best performing asset classes were Large Cap Global Equities (24%). All 4 funds finished the year well, fully participating in the global equity rally and finishing first quartile for all 4. In 2024 the Direct Line equity buckets performed in line with the MSCI AC World – no mean feat given the volatility. Thematic/Al/semi-conductor related stocks excelled, and the rally expanded to include Financials and cyclicals. Top-performing stocks included Amazon, Broadcom, Trip.com, TSMC, Unilever, Tesla, Visa American Express and Nvidia. Diversification in Eurozone Banks contributed to gains. Real Estate and Infrastructure did not add value relative to Large Cap Equities. Real Estate was particularly volatile given sensitivity to duration and got hit at the end of the year.

We kept an overweight position on equities for most of the year, but we actively used futures (S&P 500, Nasdaq, RTY, FTSE and Eurostoxx 50) during the year to tactically adjust equity exposure and to take advantage of volatility. Active management of Credit bucket added value (@5,06% versus 4,73% for universe). A slightly shorter duration bias in EURO Government bond bucket and an underweight position was slightly positive. Diversification into Short Duration Strategies for European High Yield and Emerging Market Debt also worked quite well given flat yield curves. We did not invest in US Treasuries either which also helped relative to Peers.

AXA IM Wave Biotech Fund

A review of 2024

There was a record high number of biopharma M&A deals in 2023 and the trends continued into 2024, and fundamental developments were sufficiently positive to fuel renewed interest in the sector in the first half of 2024. However, in the second half, especially in the last quarter of the year, heightened macroeconomic and political uncertainty dampened the sentiment for the sector. Biotech became a constant source of funds for investors looking to reallocate to other sectors; investors punished and often over-reacted to any negative news, even good news led to stocks selling off as it became a liquidity event in the name.

While 2024 was a strong year for follow-ons, the initial public offering (IPO) market was mixed. Out of 18 biotech IPOs, merely 2 are above the deal price currently [Bloomberg, as of 24/03/2025]. The "higher-for-longer" narrative with interest rates has persisted. This increases cost of capital for a sector that relies on debt and equity financing to survive, which also has a knock-on effect on M&A. Moreover, higher rates reduce risk appetites as safer investments are more attractive.

The generalists were fully onboard with obesity names until mid-2024, Eli Lilly and Novo Nordisk had been a sure thing beating and raising every quarter. Then suddenly they started missing quarters and stock moves were brutal while competing pipeline products began to emerge, the duopoly narrative began to shake as did the never-ending growth in scripts for obesity drugs. Generalists don't often need much to run away from biotech and artificial intelligence technology names were on a charge at the time of the obesity names wavering.

High profile disappointments such as Amgen's MariTide and Novo Nordisk's Cagrisema obesity data, one could argue if either was a true failure but the impact on the stock was visible nonetheless. There are a total of 18 stocks in the NASDAQ Biotechnology Index (NBI) that have fallen more than 40% since mid-November. Again, any negative news is being punished hard by investors in this market.

The new Trump administration in the US brings with it some uncertainty, and what could the newly appointed Secretary of Health and Human Services Robert F. Kennedy (RFK) do? This will remain an overhang on the sector. With regards to China, the Biosecure Act hasn't gone away and tariff wars swirl round daily. The Act passed Congress but never got attached to a bill for the Senate to vote on. It's likely that it will be resurrected but potentially in a revised form. On the other hand, China is also drawing up its own 'unreliable entity' blacklist in retaliation, with Illumina added to that list thus far. There are certainly concerns that US-China relations are reshaping the biotech sector.

The AXA IM WAVe Framlington Biotech Fund was up 0.84% before fees in 2024, outperforming its NBI Benchmark by 2.2% due to stock picking, especially in the small and mid-capitalised biotech companies. Vera Therapeutics, Insmed, Verona Pharma, and NewAmsterdam Pharma contributed meaningfully to the outperformance over the period as clinical updates and drug launches support valuation upside and investors look ahead to expected material catalysts.

The Fund continues to look to invest in high quality, well-run, and innovative biotech equities. The Fund is balanced across market cap to offer profitable, commercial stage exposure which is typically more defensive alongside earlier stage R&D innovation led investments.

Current outlook

Biotech, despite its overhangs discussed above, is cheap on a valuation basis, with the EV/cash ratio at all-time lows. There are over 20% of the SMID cap biotech names that are trading at or below cash. While in some cases this is due to a past disappointment, in many cases – it is because there is a significant amount of time until the next key catalyst. The sector is unlikely to become hotly attractive overnight; however, if we see some economic indicators starting to trend towards a lower rate environment, any change in language from the Fed around that would be an immediate boost to the sector.

Furthermore, in time we will see what changes RFK will implement, get more clarity on what happens with China and how that may affect the sector, and have a better idea of Trump's intentions around drug pricing. It may take another significant trend or easily understood theme like obesity before we get large scale participations from generalists, but biotech can and does work without them. Finally and importantly, biotech innovation remains strong, and we continue to see exciting breakthroughs across therapeutic areas. We are cautiously pleased with

AXA IM Wave Biotech Fund (continued)

the absolute and relative performance of the Fund over the last year amid market difficulties and over the longer term. We are passionate advocates and strong believers that advances across basic science, technology platforms and drug development will continue to have meaningful impact on lives of patients. Medicines with strong efficacy and safety profiles most likely will always have a material commercial opportunity. There still exists a high number of diseases and therapeutics areas where novel products are desperately needed while patient numbers continue to rise. Companies led by quality management team with innovative products to fill this unmet medical need are those we are looking to invest in within the AXA IM Wave Biotechnology Fund to continue to deliver above market share price appreciation over the longer term.

AXA IM Euro Yield Target 2028, Target Yield 2028 and Target Yield June 2028

Market review

After a very strong end to 2023, during which most serious recessionary and inflationary fears seemed to have been left behind, our and most people's base case for 2024 was for a so-called "soft-landing." That is, a year that would (finally) see lower interest rates and, at worst, a mild recession in developed economies. Looking at the total return figures in various markets, it's clear this this scenario is the one that broadly played out: European and US high yield were up +8.7% (EUR-hedged) and +8.2% respectively; European investment grade rose +4.6%; the Eurostoxx 600 added +9.6%; and the S&P 500 gained an impressive +25%. On the back of the +12.2% rise posted in 2023, for our asset class this caps a remarkable recovery (and then some!) from the -11.5% lost in 2022.

The figures above do not necessarily tell the whole story, though. Government bond indices fell as 10yr Treasury, Bund and Gilt yields rose for the fourth straight year. And the period was not without bouts of underperformance for risky assets either – in April, an increase in tensions in the Middle East caused markets to sell-off. And after causing widespread volatility in early June, French risk continued to fare particularly poorly after President Macron's gamble of snap legislative elections left politics gridlocked. Indeed, right at the end of the year in December, the first successful no-confidence vote since 1962 brought down the government and pushed the Franco-German 10yr spread to its widest level since 2012 (+88bps).

Still, through all of the above European high yield simply kept chalking up steady returns. Only one negative month, in April, and that only at -0.05%. Partly, of course, this was a direct function of the high level of carry – the yield on our universe having started the year at 6.6%. But the total return figure of +8.7% also reflected a spread tightening of over 50bps. Interestingly, this year the different ratings cohorts ended up in a very similar place +8.3% for BBs, +9.1% for Bs and +8.0% for CCCs. Also in a similar place was US high yield: though a rates-driven fall of -0.4% in December meant the European market just edged in front for the 12-month period, it's final total return of +8.2% was very much in-line with ours.

Outlook

As mentioned at the top, the base case scenario of a soft landing does seem to be the one which played out in 2024. And as we projected this time a year ago, returns for European High Yield were comprised mainly of carry, with the additional benefit of some spread tightening.

But what we didn't correctly anticipate was that, rolling forwards 12 months, the policy uncertainties which existed at the end of 2023 would largely still be in place in December 2024. We thought that by now, it would be possible to rule out either a deeper recession or persistently elevated levels of inflation – respectively, the 'hard landing' and 'no landing' tail-risks which we flagged a year ago. And at the end of Q3, this was basically the case. The Federal Reserve ('Fed') had just cut rates by 50 basis points ('bps') at its September meeting; investors were pricing almost continual reductions until the middle of next year; and the ability of the monthly inflation figures to roil markets seemed to have, at least in this cycle, firmly passed.

But in a year of geopolitical shocks, Donald Trump's convincing victory in the US election still took markets by surprise. With an economic agenda based on tariffs and tax cuts, more inflation and higher rates are therefore firmly back on the table. And whilst the policy picture in Europe appears rather different, the ability of the Fed to influence interest rates worldwide should not be underestimated.

The above serves as a rather long way of saying that, as was the case for 2024, we see three possible paths for our asset class in 2025:

- 1. Still favoured by the market, our central forecast is again that a soft-landing occurs. But with spreads and front-end interest rates having less room to rally further, carry will dominate returns for European high yield. We would expect these to be of the order of the starting level of yield, currently +5.9%.
- 2. Now firmly back on the agenda, a Fed which has less room for easing, and interest rates which stay higher. High yield should of course be somewhat protected by its naturally shorter duration and healthy levels of income. Though some of the challenges to fundamentals that this would represent would inevitably have to be reflected in wider spreads. We project gains a little lower than in the first scenario.

AXA IM Euro Yield Target 2028, Target Yield 2028 and Target Yield June 2028 (continued)

3. There is still a chance that central banks are behind the curve and developed economies tip into a more severe recession. Spreads would clearly have to widen even more in such an instance, impacting returns. But as detailed below, we do not think all would be doom-and-gloom in our market.

Though valuations in European high yield appear less compelling than they were 12 months ago, viewed through the lens of the possible outcomes above we think the balance of risk and reward remains very attractive. And ultimately, the events of early November actually give us even more conviction that 2025 will be a year for defensive carry as we wait to see how this cycle ends.

In such a scenario, we might describe AXA IM Euro Yield Target 2028 a fund for 'extra-defensive' carry. With spread curves flat, and government bond curves still inverted, the fund's characteristics screen well compared to the European high yield market in general. It offers most of the yield, but for less duration and a higher credit quality – the former in particular now looks like a shrewd hedge against a Trump-induced resurgence in rates volatility. And with the market fairly priced, the opportunity cost of further upside is limited.

AXA IM Euro Yield Target 2028

Performance

During 2024, the Fund generated a total return of +6.00% (net of fees, A share class) and +7.41% (gross of fees, A share class). In comparison, for the same period the European High Yield universe, (the ICE BofA European Currency High Yield Index) delivered a performance of +8.68% (EUR hedged).

Unsurprisingly, the Fund lagged the broader European high yield universe. It is shorter in duration and more defensively positioned than the index – resulting in less carry and a smaller upside from the fall in short-term interest rates seen during the year. Still, it remains on track to achieve the targeted 4-6% net-of-fees annualised return during its lifetime.

In terms of attribution, the Fund benefited from its c. 15% allocation to Sterling. The ICE BofA Sterling High Yield Index rose +9.20%, on a EUR hedged basis. Sector-wise, the strongest performers were Financial Services and Retail. One area of the market where we missed out on the possibility of very strong returns was Real Estate. After two years of difficult conditions, this sector staged a remarkable recovery in 2024 – the total return, at an index level, was +38.61%. Still, the volatility inherent in many of these names, as well as their perpetual nature, meant that they were not suitable for our strategy.

On a single name basis, two of our top contributors were Arrow Global (Financial Services) and Constellation Automotive (Retail). Indeed, our holdings of both were what really drove the strong performances of their respective sectors. From a purchase price of around 80c at the launch of the Fund, falling interest rates and an improved fundamental outlook meant both names rallied very strongly into the end of the year.

Target Yield 2028

Performance

Since launch in April, the Fund generated a total return of +4.64% (net of fees, A share class) and +5.63% (gross of fees, A share class). In comparison, for the same period the European High Yield universe, (the ICE BofA European Currency High Yield Index) delivered a performance of +6.91% (EUR hedged).

Unsurprisingly, the Fund lagged the broader European high yield universe. It is shorter in duration and more defensively positioned than the index – resulting in less carry and a smaller upside from the fall in short-term interest rates seen during the year. It was also invested entirely in short-dated government bonds during the initial 3-month subscription period.

In terms of attribution, the Fund's c. 15% allocation to Sterling was broadly neutral. The ICE BofA Sterling High Yield Index rose +6.74%, on a EUR hedged basis. Sector-wise, the strongest performers were Financial Services and Insurance. One area of the market where we missed out on the possibility of very strong returns was Real Estate. After two years of difficult conditions, this sector staged a remarkable recovery in 2024 – the total return, at an index level, was +38.61% for the year as a whole. Still, the volatility inherent in many of these names, as well as their perpetual nature, meant that they were not suitable for our strategy.

On a single name basis, two of our top contributors were Arrow Global (Financial Services) and Constellation Automotive (Retail). Indeed, our holding of the former was what really drove the strong performance of that sector. Both fitted with a theme which was particularly effective in 2023 and which we still thought presented some select opportunities during 2024 – that is, single-B issuers with near-term maturities. We thought the market remained unfairly sceptical of these credits' ability to issue new replacement debt, especially since interest rates were on a downwards path. At the start of the summer, when they were purchased, both bonds traded with cash prices in a range of 85c to 90c – by December, Arrow had issued new debt, Constellation was heavily rumoured to be close to doing likewise and both notes had rallied to near par.

Target Yield June 2028

Performance

Since launch in September, the Fund generated a total return of +2.79% (net of fees, A share class) and +3.17% (gross of fees, A share class). In comparison, for the same period the European High Yield universe, (the ICE BofA European Currency High Yield Index) delivered a performance of +2.84% (EUR hedged).

Unsurprisingly, the Fund performed in-line with the European high yield universe. It has a similar level of credit risk and, though duration is shorter, front-end government bonds were broadly unchanged during this period.

In terms of attribution, the Fund's c. 15% allocation to Sterling was a slight drag. The ICE BofA Sterling High Yield Index rose +2.36%, on a EUR hedged basis. Sector-wise, the strongest performers were Retail and Technology & Electronics. One area of the market where we missed out on the possibility of very strong returns was Real Estate. After two years of difficult conditions, this sector staged a remarkable recovery in 2024 – the total return, at an index level, was +38.61% for the year as a whole. Still, the volatility inherent in many of these names, as well as their perpetual nature, meant that they were not suitable for our strategy.

On a single name basis, two of our top contributors were Engineering Group (Technology & Electronics) and Constellation Automotive (Retail). Indeed, our holdings of both were what really drove the strong performances of these sector. Both fitted with a theme which was particularly effective in 2023 and which we still thought presented some select opportunities during 2024 – that is, single-B issuers with near-term maturities. We thought the market remained unfairly sceptical of these credits' ability to issue new replacement debt, especially since interest rates were on a downwards path. In September, when they were first purchased, both bonds traded with yields of over 10% – by December, they had rallied significantly.

USD Credit 2027

Market

Financial markets experienced significant shifts in the final months of 2024, driven by monetary policy, economic data, and political developments. The Federal Reserve's proactive 50bp rate cut in September fuelled a broad rally in risk assets, reinforcing the soft-landing narrative amid stabilizing economic indicators. However, October brought a sharp sell off in Treasuries, as stronger-than-expected economic data, persistent inflation concerns, and shifting political expectations pushed yields sharply higher. Despite some weaker corporate earnings reports, fundamentals remained resilient. Market sentiment turned positive in November following a decisive U.S. election outcome, with expectations of pro-growth policies supporting equities and credit. The Fed maintained a dovish stance, and markets increasingly priced in additional rate cuts, providing further tailwinds for risk assets. Treasury yields, which initially spiked post-election, ultimately declined into year-end amid softer economic data and the nomination of a market-friendly Treasury Secretary. Credit spreads tightened across investment-grade and high-yield markets, while primary issuance remained active despite month-to-month fluctuations. Equities ended the year on a strong note, with the S&P 500 posting gains in three of the last four months, while corporate bond markets benefited from steady inflows.

Portfolio/Performance

The USD Credit 2027 portfolio delivered a gross return of 0.44% from its inception on 12 September 2024, through year-end. The portfolio closed the year with a yield-to-worst of 5.7% and a duration-to-worst of 2.3 years. Credit quality remained stable, with an average rating of BBB3, and the allocation between investment-grade (60%) and high-yield (40%) securities remained unchanged since the inception of the portfolio in September. Market dynamics favoured lower-rated credits over the same period, with higher-quality segments underperforming. The ICE BofA US Corporate Index declined -2.67%, lagging the ICE BofA US High Yield Index, which posted a modest gain of 1.32%. Sector positioning remained broadly consistent throughout the year. Industrials represented the largest allocation at 61%, followed by Financials (33%) and Utilities (5%). The Media sector remained the top exposure at 15.5%, with Insurance (11.3%) and Banking (11.05%) as the next most significant sector weights. The portfolio's average maturity of 2.6 years remains closely aligned with its final maturity date of 15 December 2027.

Outlook

The outlook remains impacted by a decent macro environment, anticipating a soft landing and potential for further Fed easing, along with benign technicals that should be supportive of corporate spreads. We still believe that corporate credit fundamentals remain healthy, and the high yield default rate will continue to be below historical average. Valuations from a yield perspective remain attractive and with markets focused on the trajectory of interest rates and the impact of a modest US slowdown, we believe the strategy remains well positioned in this market environment.

AXA Investment Managers Paris 16 April 2025

REPORT OF THE DEPOSITARY TO THE SHAREHOLDERS

We have enquired into the conduct of AXA IM World Access Vehicle ICAV ("the ICAV") for the financial year ended 31 December 2024 in our capacity as Depositary to the ICAV.

This report including the opinion has been prepared for and solely for the shareholders in the ICAV as a body, in accordance with Regulation 34, (1), (3) and (4) in Part 5 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended, ("the UCITS Regulations"), and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depositary

Our duties and responsibilities are outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations. One of those duties is to enquire into the conduct of the ICAV in each annual accounting period and report thereon to the shareholders.

Our report shall state whether, in our opinion, the ICAV has been managed in that period in accordance with the provisions of the ICAV's Instrument of Incorporation and the UCITS Regulations. It is the overall responsibility of the ICAV to comply with these provisions. If the ICAV has not so complied, we as Depositary must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Depositary Opinion

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations and to ensure that, in all material respects, the ICAV has been managed (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of the ICAV's Instrument of Incorporation and the UCITS Regulations and (ii) otherwise in accordance with the ICAV's constitutional documentation and the appropriate regulations.

Opinion

In our opinion, the ICAV has been managed during the financial year, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the ICAV by the Instrument of Incorporation, the UCITS Regulations and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 ("the Central Bank UCITS Regulations"); and
- (ii) otherwise in accordance with the provisions of the Instrument of Incorporation, the UCITS Regulations and the Central Bank UCITS Regulations.

Date: 16 April 2025

Independent auditors' report to the shareholders of the Funds of AXA IM World Access Vehicle ICAV

Report on the audit of the financial statements

Opinion

In our opinion, AXA IM World Access Vehicle ICAV's financial statements:

- give a true and fair view of the Funds' assets, liabilities and financial position as at 31 December 2024 and of their results and cash flows for the year then ended;
- have been properly prepared in accordance with International Financial Reporting Standards ("IFRSs") as adopted by the European Union; and
- have been properly prepared in accordance with the requirements of the Irish Collective Asset-management Vehicles Act 2015 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended).

We have audited the financial statements, included within the Annual Report and Audited Financial Statements, which comprise:

- the Statement of Financial Position as at 31 December 2024;
- the Statement of Comprehensive Income for the year then ended;
- the Statement of Cash Flows for the year then ended;
- the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares for the year then ended;
- the Schedule of Investments for each of the Funds as at 31 December 2024; and
- the notes to the financial statements for each of the Funds, which include a description of the accounting policies.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) ("ISAs (Ireland)") and applicable law.

Our responsibilities under ISAs (Ireland) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the ICAV in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, which includes IAASA's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Emphasis of matter - financial statements prepared on a basis other than going concern

In forming our opinion on the financial statements, which is not modified, we draw attention to note 2 to the financial statements which describes the reasons why the financial statements of AXA IM Multi Asset Target 2026 have been prepared on a basis other than going concern.

Independent auditors' report to the shareholders of the Funds of AXA IM World Access Vehicle ICAV (continued)

Conclusions relating to going concern

With the exception of AXA IM Multi Asset Target 2026 where a basis of accounting other than going concern has been adopted as set out in the Emphasis of matter - financial statements prepared on a basis other than going concern above, based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Funds' ability to continue as a going concern for a period of at least twelve months from the date on which the financial statements are authorised for issue.

With the exception of AXA IM Multi Asset Target 2026 where a basis of accounting other than going concern has been adopted as set out in the Emphasis of matter - financial statements prepared on a basis other than going concern above, in auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the Funds' ability to continue as a going concern.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Reporting on other information

The other information comprises all of the information in the Annual Report and Audited Financial Statements other than the financial statements and our auditors' report thereon. The directors are responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon. In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material misstatement of the financial statement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

Based on the responsibilities described above and our work undertaken in the course of the audit, the Irish Collective Asset-management Vehicles Act 2015 requires us to also report the opinion as described below:

• In our opinion, based on the work undertaken in the course of the audit, the information given in the Directors' Report for the year ended 31 December 2024 is consistent with the financial statements.

Responsibilities for the financial statements and the audit

Responsibilities of the directors for the financial statements

As explained more fully in Statement of Directors' Responsibilities set out on page 7, the directors are responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view.

The directors are also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Funds' ability to continue as going concerns, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the ICAV or to cease operations, or have no realistic alternative but to do so.

Independent auditors' report to the shareholders of the Funds of AXA IM World Access Vehicle ICAV (continued)

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Our audit testing might include testing complete populations of certain transactions and balances, possibly using data auditing techniques. However, it typically involves selecting a limited number of items for testing, rather than testing complete populations. We will often seek to target particular items for testing based on their size or risk characteristics. In other cases, we will use audit sampling to enable us to draw a conclusion about the population from which the sample is selected.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA website at:

https://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8f-a98202dc9c3a/Description of auditors responsibilities for audit.pdf.

This description forms part of our auditors' report.

Use of this report

This report, including the opinions, has been prepared for and only for the shareholders of each of the Funds as a body in accordance with section 120 of the Irish Collective Asset-management Vehicles Act 2015 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Other required reporting

Irish Collective Asset-management Vehicles Act 2015 exception reporting

Directors' remuneration

Under the Irish Collective Asset-management Vehicles Act 2015 we are required to report to you if, in our opinion, the disclosures of directors' remuneration specified by section 117 of that Act have not been made. We have no exceptions to report arising from this responsibility.

^{*} Fund commenced operations on 14 June 2023.

1. ORGANISATION

AXA IM World Access Vehicle ICAV (the "ICAV") is an open-ended umbrella type Irish collective asset management vehicle with limited liability and segregated liability between Funds, registered by the Central Bank on 12 May, 2016 to carry on business as an ICAV pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) and under the Central Bank (Supervision & Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (together the "UCITS Regulations").

2. BASIS OF PREPARATION & SUMMARY OF MATERIAL ACCOUNTING POLICIES

This annual report and financial statements have been prepared for the financial year ended 31 December 2024.

Basis of Preparation

The financial statements have been prepared in accordance with IFRS, the UCITS Regulations and the ICAV Act. The financial statements of each Fund, except for AXA IM Multi Asset Target 2026, have been prepared on a going concern basis as the Directors are of the view that each Fund can continue in operational existence for twelve months from the date of approval of these financial statements. The Directors anticipate each Fund's financial assets will continue to generate enough cash flows on an ongoing basis to meet each Fund's liabilities as they fall due. The financial statements for AXA IM Multi Asset Target 2026 has been prepared on a basis other than going concern. No adjustments were necessary in the financial statements to reduce assets of the Fund to their realisable value. Liabilities which are expected to arise due to the decision to terminate the Fund have been reflected in the financial statements.

The financial statements have been prepared under the historical cost convention as modified by the revaluation of financial assets and financial liabilities held at fair value through profit or loss.

All references to net assets throughout the annual report and financial statements refers to net assets attributable to holders of redeemable participating shares or equity as applicable unless otherwise stated.

Critical Accounting Estimates, Judgements and Assumptions

In preparation of financial statements in conformity with IFRS, the ICAV is required to make certain accounting estimates, judgements and assumptions. Actual results may differ from these estimates and assumptions. The Directors believe that any estimate used in preparing the financial statements are reasonable and prudent. Critical accounting estimates are those which involve the most complex or subjective judgments or assessments. The area of the ICAV's business that typically requires such estimates is the determination of the fair value of financial assets and financial liabilities as discussed in the financial instruments section above. The area of the ICAV's business that typically requires judgement is the determination of functional currency as discussed in the Foreign Exchange Translation section below.

New standards, amendments and interpretations issued and effective for the financial year beginning 1 January 2024

There are a number of standards, amendments to standards or interpretations that are effective for annual periods beginning on 1 January 2024.

The following new and amended standards and interpretations did not have a material impact on the ICAV's financial statements:

- IFRS 17 Insurance Contracts.
- Disclosure of Accounting Policies (Amendments to IAS 1 and IFRS Practice Statement 2).
- Definition of Accounting Estimates (Amendments to IAS 8).
- Deferred Tax related to Assets and Liabilities arising from a Single Transaction (Amendments to IAS 12).
- International Tax Reform Pillar II Model Rules (Amendments to IAS 12).
- Classification of Liabilities as Current or Non-Current (Amendments to IAS 1).

2. BASIS OF PREPARATION & SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

New standards, amendments and interpretations issued and effective for the financial year beginning 1 January 2024 (continued)

- Lease Liability in a Sale and Leaseback (Amendments to IFRS 16).
- Disclosure of Supplier Finance Arrangements (Amendments to IAS 7 and IFRS 7).
- IFRS S1 General Requirements for Disclosure of Sustainability-related Financial Information.
- IFRS S2 Climate-related disclosures.

New standards, amendments or interpretations issued but not effective for the financial year beginning 1 January 2024

IFRS 18 "Presentation and Disclosure in Financial Statements" was issued in April 2024 and applies to an annual reporting period beginning on or after 1 January 2027. IFRS 18 replaces IAS 1 "Presentation of Financial Statements". IFRS 18 aims to improve financial reporting by requiring additional defined subtotals in the statement of profit or loss, requiring disclosures about management-defined performance measures and adding new principles for grouping (aggregation and disaggregation) of information. The ICAV is still in the process of assessing the impact of the new accounting standard.

The following new standards, amendments to standards or interpretations are effective for annual periods beginning after 1 January 2024, and have not been early adopted in preparing these financial statements. Of those standards that are not yet effective, none are expected to have a material impact on the ICAV's financial statements in the period of initial application.

- Lack of Exchangeability (Amendments to IAS 21, effective for reporting periods beginning on or after 1 January 2025).
- Classification and Measurement of Financial Instruments (Amendments to IFRS 9 and IFRS 7, effective for reporting periods beginning on or after 1 January 2026).
- IFRS 19 Subsidiaries without Public Accountability: Disclosures (effective for reporting periods beginning on or after 1 January 2027).

Material Accounting Policies

The material accounting policies and estimation techniques applied in the preparation of these financial statements are set out below.

The accounting standards have been applied consistently by the ICAV.

Financial Instruments

(i) Classification

The classification (and subsequent measurement) of a financial instrument is based on the business model in which a financial instrument is managed and on its contractual cash flow characteristics. Since each Fund of the ICAV manages and evaluates the performance of all of its financial instruments on a fair value basis, each Fund classifies its investments as financial assets and financial liabilities at fair value through profit or loss.

(ii) Recognition, derecognition and measurement

Regular purchases and sales of investments are recognised on the trade date, the date on which the Funds of the ICAV commits to purchase or sell the investment. Transaction costs are expensed as incurred in the Statement of Comprehensive Income.

Financial assets are derecognised when the rights to receive cash flows from the investments have expired or the Funds of the ICAV has transferred substantially all risks and rewards of ownership and a realised gain or loss is recognised. Financial liabilities are derecognised when they are extinguished, that is, when the obligation specified in the contract is discharged, cancelled or expires. Realised gains and losses are presented in the Statement of Comprehensive Income within Net income/(loss) on investments and foreign currency.

2. BASIS OF PREPARATION & SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Financial Instruments (continued)

(ii) Recognition, derecognition and measurement (continued)

Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value of the financial assets or financial liabilities at fair value through profit or loss category are presented in the Statement of Comprehensive Income within Net income/(loss) on investments and foreign currency.

(iii) Fair value estimation

Securities which are listed or traded on a regulated market for AXA IM WAVe Cat Bonds Fund (except for ILS), Target Yield June 2028 and USD Credit 2027 are valued at the official closing prices. The valuation prices for ILS held by AXA IM WAVe Cat Bonds Fund are median of the relevant quotes based on mid prices from authorised brokers and dealers.

Securities which are listed or traded on a regulated market for AXA IM Multi Asset Target 2026, AXA IM Euro Yield Target 2028 and Target Yield 2028 are valued at the bid prices.

Securities which are listed or traded on a regulated market for AXA IM Wave Biotech Fund are valued for US securities are priced at the opening prices; Asian securities are priced at the closing price; all other markets are priced at last trade at 2.30pm Irish Time. This pricing methodology is different to the pricing methodology required by IFRS which requires investment valuation to be considered as official closing price. The dealing NAV has been adjusted to be consistent with IFRS requirement as of 31 December 2023. No valuation adjustment was required as of 31 December 2024.

Securities which are listed or traded on a regulated market for AXA IM ACT US Short Duration High Yield Low Carbon, Delegio Privilege Ambitious Fund, Delegio Privilege Balanced Fund, Delegio Privilege Cautious Fund and Delegio Privilege Entrepreneurial Fund are valued at the closing mid-price for equity like securities and evaluated mean pricing for fixed income type securities.

Where a security is listed or dealt in one or more exchange or market, the relevant exchange or market shall be the principal stock exchange or market on which the security is listed or dealt on or the exchange or market which the Directors determine provides the fairest criteria in determining a value for the relevant investment. Securities which are listed on an exchange or traded on a market, but acquired or traded at a premium or at a discount outside of the relevant exchange or market may be valued taking into account the level of premium or discount at the valuation point provided that the Depositary shall be satisfied that the adoption of such a procedure is justifiable in the context of establishing the probable realisation value of the security.

The value of any instrument which is not normally quoted, listed or traded on or under the rules of a regulated market, will be valued at its probable realisation value estimated with care and in good faith by the Manager in consultation with the Administrator, or by a competent person, firm or corporation appointed by the Manager, and approved for such purpose by the Depositary.

Investment Funds

Investments in open-ended investment fund schemes are valued at fair value at the latest available unaudited NAV for the shares or units obtained from the relevant administrator of the investment fund. The changes in the NAV of these shares or units are recognised within Net income/(loss) on investments and foreign currency in the Statement of Comprehensive Income.

Futures Contracts

Initial margin deposits are made upon entering into futures contracts and are generally made in cash or cash equivalents. The fair value of futures contracts is based upon their current quoted settlement prices on the relevant exchange as of the Statement of Financial Position date. Changes in the value of open futures contracts are recognised as unrealised gains or losses on futures contracts until the contracts are terminated, at which time realised gains and losses are recognised. Unrealised gains or losses on open futures contracts, if any, are included in financial assets or liabilities at fair value through profit or loss, as appropriate, in the Statement of Financial Position and the Schedule of Investments of the relevant Funds.

2. BASIS OF PREPARATION & SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Financial Instruments (continued)

Forward and Spot Foreign Currency Exchange Contracts

The fair value of open forward foreign currency exchange contracts and open foreign currency exchange spot contracts, is calculated as the difference between the contracted rate and the current forward rate that would close out the contract on the Statement of Financial Position date. The Funds' unrealised gains or losses on open foreign currency exchange spot contracts, if any held, are included in cash and cash equivalents in the Statement of Financial Position and, unrealised gains or losses on open forward foreign currency exchange contracts, if any, are included in financial assets at fair value through profit or loss ("FVTPL") and financial liabilities at FVTPL, as appropriate, in the Statement of Financial Position and the Schedule of Investments of the relevant Funds.

Realised Gains and Losses on Investments

Realised gains and losses on sales of investments arising during the financial year are calculated based on the average book cost of the investment and are included in Net income/(loss) on investments and foreign currency in the Statement of Comprehensive Income.

Unrealised Gains and Losses on Investments

Unrealised gains and losses on investments arising from changes in fair value of financial assets and financial liabilities are included in Net income/(loss) on investments and foreign currency in the Statement of Comprehensive Income.

Interest and Dividend Income

Interest income generated from assets classified as FVTPL is disclosed in Net income/(loss) on investments and foreign currency.

Interest income in the Statement of Comprehensive Income includes interest income generated from cash and cash equivalents.

Interest and dividends receivable in the Statements of Financial Position is measured initially at fair value and subsequently at amortised cost, includes interest and dividends receivable from assets classified as fair value through profit or loss and interest receivable from cash.

Dividend income arising on the underlying equity investments of the Funds of the ICAV is disclosed in the Statement of Comprehensive Income on the date on which the relevant securities are listed as "ex-dividend". Income is accounted for gross of any non-recoverable withholding taxes and net of any tax credits. The withholding tax is shown separately in the Statement of Comprehensive Income.

Foreign Exchange Translation

Functional and Presentation Currency

Items included in the financial statements of the ICAV are measured in the currency of the primary economic environment in which the Fund operates (the "functional currency"). The ICAV has also adopted these functional currencies as the presentation currency of each of the Funds.

The functional and presentation currency of AXA IM ACT US Short Duration High Yield Low Carbon, AXA IM WAVE Cat Bonds Fund, AXA IM Wave Biotech Fund and USD Credit 2027 is US Dollar and the functional and presentation currency of AXA IM Multi Asset Target 2026, Delegio Privilege Ambitious Fund, Delegio Privilege Balanced Fund, Delegio Privilege Cautious Fund, Delegio Privilege Entrepreneurial Fund, AXA IM Euro Yield Target 2028, Target Yield 2028 and Target Yield June 2028 is Euro. Transactions in foreign currencies are translated into the reporting currency at exchange rates ruling at the transaction dates. Gains and losses on foreign exchange transactions are recognised in the Statement of Comprehensive Income in determining the result for the financial year.

2. BASIS OF PREPARATION & SUMMARY OF MATERIAL ACCOUNTING POLICIES (continued)

Cash and cash equivalents

Cash and cash equivalents held comprises cash and short-term deposit accounts, which are liquid and readily realisable. Cash and bank balances, including bank overdrafts held by State Street Bank and Trust Company are detailed in Note 5 to these financial statements. The balances on cash accounts for collection of subscriptions, payment of redemptions and dividends for the Funds that were re-designated, and are deemed assets of the Funds held with Bank of America Merrill Lynch detailed in Note 5 to these financial statements.

Cash due from/to broker

Cash due from/to broker is margin cash and cash collateral. Margin cash is held by or due to brokers for open futures contracts and represents the exchange traded futures contracts' margin deposits held with brokers. Cash collateral is held by or due to brokers for open forward foreign currency exchange contracts.

Expenses

Expenses are recognised in the Statement of Comprehensive Income on an accruals basis.

Taxation

As disclosed in Note 10 to the financial statements, generally the ICAV is not subject to Irish tax on income, profits or capital gains or other taxes payable. However, income from investments held by the Funds may be subject to withholding taxes or capital gains taxes in jurisdictions other than the Funds' country of domicile. Taxes incurred by the Funds are recorded in the Statement of Comprehensive Income within withholding tax.

Redeemable Participating Shares

Redeemable participating shares are issued and redeemed at the holder's option at prices based on the Fund's NAV per share at the time of issue or redemption.

At 31 December 2023 with the exception of AXA IM Sunshine 2023/1 and AXA IM Sunshine 2023/2, the Funds issue redeemable participating shares, which are redeemable at the holder's option and are classified as financial liabilities. AXA IM Sunshine 2023/1 and AXA IM Sunshine 2023/2 issued redeemable participating shares which are classified as equity. The redeemable participating share is carried at the redemption amount that is payable at the financial year end date if the holder exercises the right to put the share back into the Fund.

Anti-Dilution Levy

Participating shareholders may be required to pay an anti-dilution levy to be determined from time to time by the Manager on the market value of the relevant subscription and redemption amounts. The anti-dilution levy is paid to the Fund and is used to defray the cost related to the associated purchase or sale of securities within the Fund as a result of the shareholder transactions. Anti-dilution levies are disclosed in the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares.

Swing pricing

Subscriptions or redemptions in a Fund or share class can create dilution of the Fund's or the share class's assets if shareholders subscribe or redeem at a price that does not necessarily reflect the real dealing and other costs that arise when the Manager buys or sells assets to accommodate net subscriptions or net redemptions. In order to protect the interests of the existing shareholders of a Fund or a share class, a swing pricing mechanism may be adopted as appropriate if disclosed, and as further described, in the Supplement of the Fund. If the net subscriptions and redemptions based on the last available NAV on any valuation day exceed a certain threshold of the value of a Fund or a share class on that valuation day, as determined and reviewed on a periodic basis by the Manager, the asset value may be adjusted respectively upwards or downwards to reflect the dealing and other costs that may be deemed to be incurred in buying or selling assets to satisfy net daily transactions. The Manager may apply a swing pricing mechanism across any Fund or share class as described in the Supplement of the relevant Fund. The extent of the price adjustment will be set by the Manager to reflect estimated dealing and other costs and will not exceed 2% of the NAV. There was no swing pricing adjustment applied to the Funds as at 31 December 2024 and 31 December 2023.

Management fees earned for the financial year are disclosed in the Statement of Comprehensive Income and management fees payable at the financial year end are disclosed in the Statement of Financial Position.

Administrator's and Depositary's Fee

The Funds shall discharge the Administrator's and Depositary's fees and expenses (including any reasonable out of pocket expenses incurred on behalf of the Fund) (the "Service Provider Fees"). The total Service Provider Fees shall be assessed at the annual rates (the "Service Fee Rates") or a fee at the appropriate rate for the period where a Fund is in operation during the year, as set forth below based on the NAV of the Funds:

| NAV | Maximum Service Fees Rates |
|----------------------------|-----------------------------------|
| FUD 4 000 000 004 and also | 0.000/ |

| EUR 1,000,000,001 and above | 0.02% |
|--------------------------------------|-------|
| EUR 200,000,001 to EUR 1,000,000,000 | 0.03% |
| Up to EUR 200,000,000 | 0.05% |

Administrator and Depositary fees for the financial year are disclosed in the Statement of Comprehensive Income and Administrator and Depositary fees payable at the financial year end are disclosed in the Statement of Financial Position.

Auditor's remuneration

Audit fees charged for the year amounted to EUR130,645 (including out of pocket expenses and excluding VAT) (31 December 2023: EUR122,255 including out of pocket expenses and excluding VAT). Taxation service fees charged for the year amounted to EUR14,000 (excluding VAT) (31 December 2023: EUR20,400 excluding VAT). There were no other assurance services or other non-audit services in respect of the current or prior financial year.

Directors' Fees

The Instrument of incorporation authorises the Directors to charge a fee for their services at the rate determined by the Directors. Each independent Director shall receive a fee for their services up to a maximum of EUR 32,500 per annum or such other amount as may from time to time be disclosed in the annual report and audited Financial Statements. Directors who are employees of AXA are not entitled to receive Directors' fees.

Directors' fees for the financial year are disclosed in the Statement of Comprehensive Income and Directors' fees payable at the financial year end are disclosed in the Statement of Financial Position.

6. FEES AND EXPENSES (continued)

Transaction Costs

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of the financial asset or financial liability. Due to operational challenges in extracting the transaction costs on the purchase and sale of bonds and forward foreign exchange currency contracts, transaction costs on these instruments cannot be separately identified. They are included in the purchase and sale price of the investment, and therefore not disclosed separately in this note. Purchases and sales transaction costs are included in Net income/(loss) on investments and foreign currency in the Statement of Comprehensive Income. Purchases and sales transaction costs for the financial year ended 31 December 2024 and 31 December 2023 are disclosed in below table:

| Fund | Base Currency | Transaction Costs for the year ended 31 December 2024 | Transaction Costs for the year ended 31 December 2023 |
|--|------------------|---|---|
| AXA IM Sunshine 2023/1* | EUR | - | 953 |

| Delegio Privilege Cautious Fund | EUR | 24,667 | 31,025 |
| Delegio Privilege Entrepreneurial | | | |
| Fund | EUR | 128,615 | 130,011 |
| AXA IM Euro Yield Target 2028 | EUR | 4,678,092 | - |

^{*} The Fund terminated during the financial year ended 31 December 2023.

There were no distributions payable as at 31 December 2024 (31 December 2023: Nil).

10. TAXATION

Under current law and practice the ICAV qualifies as an Investment Undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997 ("the TCA"), as amended. Provided the ICAV continues to be resident for tax purposes in Ireland and is authorised by the Central Bank of Ireland, the ICAV should not be chargable to Irish tax on its relevant income or gains.

However, Irish tax may arise on the happening of a "chargeable event". A chargeable event includes any distribution payment to shareholders, any encashment, redemption, cancellation or transfer of shares, and any deemed disposal of shares for Irish tax purposes arising as a result of holding shares in the ICAV for a period of eight years or more.

No Irish tax will arise in respect of chargeable events in respect of a Shareholder who is an Exempt Irish Investor (as defined in Section 739D of the TCA) or who is neither Irish resident nor ordinarily resident in Ireland for tax purposes at the time of the chargeable event, provided, in each case, that an appropriate valid declaration in accordance with Schedule 2B of the TCA is held by the ICAV and the ICAV is not in possession of any information which would reasonably suggest that the information contained therein is no longer materially correct or where the ICAV has been authorised by Irish Revenue to make gross payments in the absence of appropriate declarations.

Distributions, interest and capital gains (if any) received on investments made by the ICAV may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by the ICAV or its Shareholders.

The Organisation for Economic Co-operation and Development (OECD) released the Pillar Two model rules (the Global Anti-Base Erosion Proposal, or 'GloBE') to reform international corporate taxation. The legislation is effective for the ICAV's financial year beginning on 1 January 2024. As the ICAV qualifies as an investment entity:

- (i) any Funds not consolidated by an investor will be excluded from the scope of the Pillar Two rules;
- (ii) any Funds consolidated by an investor will be excluded from the QDMTT implemented by the Irish legislation.

To date, we have not been made aware by any investor that it would give another qualification to the ICAV or one of its Funds. As such, any potential Pillar Two exposure and liability will be at the level of the investor or its ultimate parent company. The Pillar Two model rules will not impact the 2024 financial statements of the ICAV.

11. TRANSACTIONS WITH RELATED PARTIES AND CONNECTED PERSONS

AXA Investment Managers Paris has been appointed as Manager to the ICAV. Management fees earned for the financial year are disclosed in the Statement of Comprehensive Income and Management fees payable at the financial year end are disclosed in the Statement of Financial Position. There were no Service Fees borne by the Manager during the financial year ended 31 December 2024 and 31 December 2023.

11. TRANSACTIONS WITH RELATED PARTIES AND CONNECTED PERSONS (continued)

As at 31 December 2024, there were two management shares in issue. The management shares are held by AXA Investment Managers S.A. and AXA Investment Managers Paris.

Kevin O'Brien, Jean Louis Laforge and Ouajnat Karim are directors of other entities managed by the Manager or other entities within the AXA Group.

Jean Louis Laforge is an executive officer, also employee of the Manager and a Director of AXA World Funds.

Ouajnat Karim is a CEO of AXA Investment Managers UK Limited which has been appointed as a sub-investment manager to certain Funds.

Investors will not be charged a subscription fee on the subscription of Shares for Delegio Privilege Ambitious Fund, Delegio Privilege Balanced Fund, Delegio Privilege Cautious Fund and Delegio Privilege Entrepreneurial Fund.

There is no minimum holding in place for shares held in the Funds except AXA IM WAVe Cat Bonds Fund. Please refer to the Supplement for details regarding minimum holding.

The Manager may waive the subscription fee in whole or in part in respect of any investor, which may include an AXA Group investor for AXA IM Maturity 2023 Fund, AXA IM ACT US Short Duration High Yield Low Carbon, AXA IM Multi Asset Target 2026, AXA IM Wave Biotech Fund and AXA IM Euro Yield Target 2028.

The Directors may waive the subscription fee in whole or in part in respect of any investor, which may include an AXA Group investor for Target Yield 2028, Target Yield June 2028 and USD Credit 2027.

Where the total requests for redemption on any Dealing Day exceed at least 10% of the total number of Shares in the Funds or at least 10% of the NAV of the Funds and the Directors decide to refuse to redeem any Shares in excess of 10% of the total number of Shares in the Funds or 10% of the NAV of the Funds or such higher percentage that the Directors may determine, the ICAV shall reduce pro rata any request for redemption on that Dealing Day and shall treat the redemption requests as if they were received on each subsequent Dealing Day until all the Shares to which the original request related have been redeemed.

Swing pricing

13. FINANCIAL RISK MANAGEMENT PROCESS

As an ICAV, the management of financial instruments is fundamental to the management of its business. The Manager is responsible, subject to the overall supervision and control of the Directors, for managing the assets and investments of the Funds of the ICAV in accordance with the investment objectives and guidelines approved by the Directors and policies set forth in the Prospectus and Supplements. There are no changes in the risk management processes during the financial year ended 31 December 2024.

Investment Risk

The ICAV's activities expose it to a variety of financial risks: market risk (including market price risk, foreign exchange risk and interest rate risk), liquidity risk and credit risk.

a) Market Risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: market price risk, currency risk and interest rate risk.

Global exposure

In accordance with the UCITS Regulations, the Manager is required to employ a risk management process to monitor the exposure to the Funds from derivatives. The Central Bank requires exposure to be measured in one of two ways, either using the Commitment Approach or Value at Risk ("VaR"). During the financial year, the Commitment Approach was used. The Commitment Approach is a methodology that aggregates the underlying notional values of derivatives to determine the exposure of the Fund to derivatives. In accordance with the UCITS Regulations, exposure to derivatives for Funds which use the Commitment Approach must not exceed 100% of the Fund's NAV.

(i) Sensitivity analysis

The sensitivity analysis is a relative estimate of risk and is not intended to be a precise and accurate number. The calculations are based on historical data. Future movements in inflation rates, currency rates and interest rates and correlations between securities could vary significantly from those experienced in the past.

(ii) Market price risk

Market price risk is the risk that the value of the instrument will fluctuate as a result of changes in market prices (other than those arising from interest rate risk or currency risk), whether caused by factors specific to an individual investment, its issuer or all factors affecting all instruments traded in the market. The Manager considers the asset allocation of the portfolio in order to manage the risk associated with particular countries or industry sectors whilst continuing to follow the Fund's investment objectives.

At 31 December 2024, the fair value of fixed income bonds, equities and investment funds expose the Funds to price risk. The movements in the prices of these investments result in movements in the performance of the Funds.

13. FINANCIAL RISK MANAGEMENT PROCESS (continued)

Investment Risk (continued)

a) Market Risk (continued)

(ii) Market price risk (continued)

The AXA IM WAVe Cat Bonds Fund's investments are subject to relatively infrequent but severe losses resulting from the occurrence of one or more catastrophic events. The occurrence or non-occurrence of insured events can be expected to result in volatility with respect to the Fund's assets. A major loss or series of losses as a result of insured events may occur from time to time and, if affecting one or more or the Fund's investments, could result in material loss.

Cat bonds are valued based on broker market prices. In a case where a catastrophic event occurs, price depth and price dispersion can be impacted. Managing concentration risk, through internal guidelines, is a way to limit exposure to a single catastrophic event.

If the market price of each security held by the Fund had increased by 5% at 31 December 2024 and 31 December 2023, with all other variables remaining constant, this would have increased the net assets attributable to holders of redeemable participating shares/equity by the following amounts:

| | Currency | 31 December 2024 | 31 December 2023 |
|--|----------|------------------|------------------|
| AXA IM ACT US Short Duration High | _ | | |
| Yield Low Carbon | USD | 6,607,071 | 7,777,934 |
| AXA IM WAVe Cat Bonds Fund | USD | 12,712,363 | 9,226,711 |
| AXA IM Multi Asset Target 2026 | EUR | 1,210,875 | 1,227,921 |
| AXA IM Wave Biotech Fund | USD | 976,729 | 1,106,982 |
| Delegio Privilege Ambitious Fund | EUR | 5,153,299 | 4,360,658 |
| Delegio Privilege Balanced Fund | EUR | 18,146,928 | 17,532,519 |
| Delegio Privilege Cautious Fund | EUR | 4,038,503 | 4,012,358 |
| Delegio Privilege Entrepreneurial Fund | EUR | 14,868,104 | 13,477,846 |
| AXA IM Euro Yield Target 2028 | EUR | 8,859,640 | 8,911,751 |
| Target Yield 2028* | EUR | 7,035,596 | - |
| Target Yield June 2028** | EUR | 3,421,113 | - |
| USD Credit 2027*** | USD | 2,296,673 | - |

^{*} Fund commenced operations on 2 April 2024. Therefore, there are no comparatives in these financial statements.

Conversely, if the price of each security held by the Fund would have decreased by 5% at 31 December 2024, with all other variables remaining constant, this would have decreased the net assets attributable to holders of redeemable participating shares/equity by the same amounts.

(iii) Currency risk

Assets and liabilities of Funds may be denominated in a currency other than the base currencies of the Funds and changes in the exchange rate between the base currency and the currency of the asset may lead to a depreciation of the value of the Funds' assets as expressed in the base currency.

Classes of Shares in the Fund may be denominated in currencies other than the base currency of the Fund and changes in the exchange rate between the base currency and the denominated currency of the Class may lead to a depreciation of the value of the investor's holding as expressed in the base currency.

Where the Class is unhedged a currency conversion will take place on subscription, redemption, exchange and distributions at prevailing exchange rates.

Accordingly, the value of the shares may be affected by any currency movement between the currency of the financial assets and financial liabilities and the base currency.

^{**} Fund commenced operations on 11 September 2024. Therefore, there are no comparatives in these financial statements.

^{***} Fund commenced operations on 12 September 2024. Therefore, there are no comparatives in these financial statements.

13. FINANCIAL RISK MANAGEMENT PROCESS (continued)

Investment Risk (continued)

a) Market Risk (continued)

(iii) Currency risk (continued)

The table below summarises the significant foreign currency risk exposure of the Fund's assets and liabilities, monetary and non-monetary, and reflects the way the risk is monitored and managed. The tables also summarise the impact on currency risk exposure from a 5% increase in the relevant foreign currency exchange. A 5% decrease in exchange rates would have an equal and opposite effect.

The currency exposure of the Funds as at 31 December 2024 is as follows:

| AXA IM ACT US Short Duration High Yield Low Carbon Currency CHF EUR GBP | Net Monetary Liabilities USD - - - | Net Monetary Assets USD 596,830 88,352,868 65,850 | Net Non-Monetary Assets USD - - | Sensitivity USD |

^{*}Fund commenced operations on 14 June 2023.

(iv) Interest rate risk

Interest rate risk arises from the possibility that changes in interest rates will affect future cash flows or the fair values of financial instruments, cash and cash equivalents, cash due to/from broker. Changes to prevailing interest rates or changes in expectations of future rates may result in an increase or decrease in the value of the securities held. In general, if interest rates rise, the value of fixed income securities will decline. A decline in interest rates will in general have the opposite effect. Other assets and liabilities bear no interest rate risk.

The tables below summarise each relevant Fund's exposure to interest rate risks.

The table on the pages 184 - 186 contains interest rate sensitivity analysis. This analysis is a relative estimate of risk and is not intended to be a precise and accurate number. The calculations are based on historical data. Future price movements and correlations between securities could vary significantly from those experienced in the past.

^{*} Fund commenced operations on 14 June 2023.

The Manager determines interest rate and credit spread as the two main factors which will impact changes in the fair value of financial assets and financial liabilities. Credit spread is discussed on pages 190 - 192. Cat bonds are floating rate assets only with low interest rate sensitivity. Portfolio managers use key rate durations provided by their Portfolio management tool to monitor their interest rate risk.

At a second level, interest rates risk is mitigated by internal guidelines such as limits on active interest rates durations. It is monitored on a daily basis and any breach is notified to portfolios managers and risk management teams.

The table below sets out the impact to the Fund's net assets at 31 December 2024 in the event that interest rates on long term bonds and notes increase by 1bps. A 1bps decrease would have an equal and opposite effect. Interest rate risk on cash and cash equivalents is not deemed significant.

b) Credit Risk

Credit risk is the risk that counterparty to a financial instrument will fail to discharge an obligation or commitment that it entered into with the ICAV on behalf of the Funds.

There can be no assurance that issuers of the securities or other instruments in which a Fund invests will not be subject to credit difficulties leading to the loss of some or all of the sums invested in such securities or instruments or payments due on such securities or instruments (as well as any appreciation of sums invested in such securities).

In addition to the credit risk associated with the derivatives held by the Funds, there is also credit risk associated with cash and securities held by the Funds which are held via the Depositary. State Street Bank and Trust Company acts as the global Sub-Custodian for the Depositary. Bankruptcy or insolvency of the Depositary or Sub-Custodian may cause the Funds' rights with respect to cash and securities held by them to be delayed or limited. The Funds' securities are separately identified on the books and records of State Street Bank and Trust Company, therefore the rights, with respect to those securities, are preserved insofar as possible.

Thus in the event of insolvency or bankruptcy of the Depositary or Sub-Custodian, the Funds' investments are segregated and protected. However, in the case of a credit event, access to assets may be delayed. Cash, unlike securities is fungible and cannot be registered in the name of, or identified as beneficially owned by a client, nor can it practically be held in physical segregation. Therefore the Funds will remain a general creditor with respect to cash balances in the event of default. The cash at the Sub-Custodian is maintained in correspondent accounts of State Street Bank and Trust Company. As at 31 December 2024, the credit rating of the Sub-Custodian was Aa1 per Moody's (31 December 2023: Aa2).

The credit rating of Bank of America Merrill Lynch that held the balances on cash accounts for collection of subscriptions, payment of redemptions and dividends for the Funds that were re-designated, and are deemed assets of the Funds as at 31 December 2024 was Aa1 (31 December 2023: Aa1).

The credit rating of Citigroup, Natixis, BNP Paribas and State Street Bank and Trust Company in relation to open forward foreign currency exchange contracts as at 31 December 2024 were A3, A1, A1 and Aa1 per Moody's respectively (31 December 2023: Bank of America Merrill Lynch, Citigroup, Natixis, Societe Generale and State Street Bank and Trust Company were Aa1, A3, Aa3, A1 and Aa2 respectively). Please refer to the Schedule of Investments for each Fund for details regarding investments in open forward foreign currency exchange contracts.

The credit rating of Goldman Sachs in relation to open futures contracts as at 31 December 2024 was A1 per Moody's (31 December 2023: Goldman Sachs was A1). Please refer to the Schedule of Investments for each Fund for details regarding investments in open futures contracts.

Certain Funds also invest in investment funds and are subject to the credit risk associated with the investments these investment funds invest in. Please refer to the Schedule of Investments for each Fund for details regarding investments in investment funds.

Investment Risk (continued)

b) Credit Risk (continued)

In addition, the AXA IM WAVe Cat Bonds Fund invests in ILS. The investment risk of a portfolio that is concentrated in such risks is greater than if the portfolio is invested in a more diversified manner among various risks. When rated, the rating of ILS is typically in the BB range. The Fund may therefore hold a significant proportion of its portfolio in ILS which are below investment grade. This may increase the likelihood of issuers of such ILS defaulting on their obligations which may have a material detrimental impact on the performance of the Fund.

Cat bond issuance is usually non-rated as rating agencies do not have their own models to calibrate losses and therefore rating agency rating is perceived as having little value for ILS investors. However, unrated bonds may not be eligible for some investors.

At 31 December 2024 and 31 December 2023, the Funds held investments with the following ratings:

The Manager calculates the net credit spread. This indicator measures the impact of a shock to the portfolio considering a variation of 1bps of the credit spread of the long term bonds value which management consider a reasonable estimate.

As at 31 December 2024 and 31 December 2023 the results of the above risk measures were as follows considering a variation of +1bps. A -1bps variation would have an equal but opposite effect:

AXA IM ACT US Short Duration High Yield Low Carbon

c) Liquidity Risk

Liquidity risk is identified as the possibility that a Fund may not be able to meet its financial liabilities as they fall due.

The Manager has established a liquidity management policy which enables it to identify, monitor and manage the liquidity risks of the Funds and to ensure the liquidity profile of the investments of the Funds will facilitate compliance with its underlying obligations.

The Manager's liquidity policy takes into account the investment strategy, the liquidity profile, redemption policy and other underlying obligations of the Funds. The liquidity management systems and procedures include appropriate escalation measures to address anticipated or actual liquidity shortages or other distressed situations of the Funds.

Internal liquidity monitoring model measures adequacy between liquidity of the assets and liquidity of the Funds on a weekly basis. Simulations are performed both on standard conditions and stressed conditions. Internal limits and alerts are set up for the Funds in order to mitigate liquidity risk at Fund level.

In summary, the liquidity management policy monitors the profile of investments held by a Funds and ensures that such investments are appropriate to the redemption policy of the Funds and will facilitate compliance with the Fund's underlying obligations.

The ICAV may only borrow on a temporary basis and the aggregate amount of such borrowings may not exceed 10% of the NAV of each Fund. Subject to this limit, the Directors may exercise all borrowing powers on behalf of the ICAV. In accordance with the provisions of the UCITS Regulations, the Directors may instruct the Depositary to give a charge over the assets of the ICAV as security for such borrowings.

Securities and/or instruments invested in by the Funds may not be listed or rated and consequently liquidity may be low. The volume of transactions effected in respect of OTC instruments may be low or non-existent, depending on market conditions, resulting in a lack of liquidity and/or in price volatility in relation to OTC instruments in which a Fund proposes to invest. Moreover, the accumulation and disposal of holdings in some investments may be time consuming and may need to be conducted at unfavourable prices. The Funds may also encounter difficulties in disposing of assets at their fair price due to adverse market conditions leading to limited liquidity and/or to the suspension of the valuation of the Funds' NAV and dealings in the Funds' shares.

The Funds also invest in investment funds and are subject to the liquidity risk associated with the investments in which these investment funds invest in. The underlying investment funds operate as open-ended funds. Usually investors can redeem on each redemption day based on the redemption price as of such redemption day, provided the redemption request is received by the redemption notice deadline for that redemption day. Some Funds invest in exchange-traded funds ("ETFs") and therefore the liquidity risk associated to the investments are less.

13. FINANCIAL RISK MANAGEMENT PROCESS (continued)

Investment Risk (continued)

c) Liquidity Risk (continued)

The AXA IM WAVe Cat Bonds Fund may invest also in ILS which may be relatively illiquid or the volume of trading, the volatility of prices and the liquidity of these securities may vary, making it difficult to acquire or dispose of them at the prices quoted on the various exchanges or indicative secondary pricing sheets. Accordingly, the Fund's ability to respond to market movements may be impaired and the Fund may experience adverse price movements upon liquidation of its investments. Settlement of transactions may be subject to delay and operational uncertainties. Following the occurrence of an insured event, the liquidity of the impacted instruments may be strongly limited which could lead in certain circumstances to a suspension of the determination of the NAV per Share of the Fund and/or the issue and redemption of its Shares.

All liabilities of the Funds at 31 December 2024 are due within one month with the exception of the following:

^{*} Fund commenced operations on 14 June 2023.

In order to protect the liquidity position of the Funds, as discussed in Note 12, the following redemption limit is in place:

Where the total requests for redemption on any Dealing Day exceed at least 10% of the total number of Shares in a Fund or at least 10% of the NAV of a Fund and the Directors, in consultation with the Manager, decide to refuse to redeem any Shares in excess of 10% of the total number of Shares in a Fund or 10% of the NAV of a Fund or such higher percentage that the Directors may determine, the Fund shall reduce pro rata any request for redemption on that Dealing Day and shall treat the redemption requests as if they were received on each subsequent Dealing Day until all the Shares to which the original request related have been redeemed.

d) Fair Value Estimation

The ICAV classifies fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements.

The fair value hierarchy has the following levels:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).

Level 3: Certain inputs for the asset or liability are not based on observable market data (that is, unobservable inputs).

13. FINANCIAL RISK MANAGEMENT PROCESS (continued)

Investment Risk (continued)

d) Fair Value Estimation (continued)

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety.

If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes "observable" requires significant judgement by the Manager. The Manager considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

Transfers between levels of the fair value hierarchy are deemed to have occurred at the end of the financial period and are deemed to have occurred when the pricing source or methodology used to price an investment has changed which triggers a change in level as defined under IFRS 13. There was no transfer between Level 2 and Level 3 during the financial year (31 December 2023: One).

There was no investment classified as Level 3 as at 31 December 2024 (31 December 2023: one investment, Caelus V 5.57% 05/06/2024 held on AXA IM WAVe Cat Bonds Fund).

The following table summarises the Funds' fair value hierarchy at 31 December 2024:

14. FINANCIAL DERIVATIVE INSTRUMENTS

The Funds may employ techniques and instruments for the purposes of efficient portfolio management and to provide protection against exchange rate risks in accordance with the conditions and limits as set down by the UCITS Regulations. As at and during the financial year ended 31 December 2024 and 31 December 2023 the Funds had investments in open forward foreign currency exchange contracts and open futures contracts. The forward foreign currency exchange contracts are employed for both investment and hedging purposes. The

14. FINANCIAL DERIVATIVE INSTRUMENTS (continued)

income arising from these contracts cannot practically be split from the total return of the forward currency contracts. The realised and unrealised gains and losses on forward currency contracts are included within Net income/(loss) on investments and foreign currency in the Statement of Comprehensive Income.

The exposure obtained through financial derivative instruments and the identity of the counterparty to these instruments are disclosed in the Schedule of Investments for the relevant Fund. There was no collateral received as at 31 December 2024. There was collateral pledged held by AXA IM WAVe Cat Bonds Fund as at 31 December 2024. There was no collateral received or collateral pledged as at or during the financial year ended 31 December 2023.

The Funds did not employ techniques for the purposes of efficient portfolio management as at or during the financial year ended 31 December 2024 and 31 December 2023.

15. CONTINGENT ASSETS AND CONTINGENT LIABILITIES

There were no contingent assets and liabilities as at 31 December 2024 and 31 December 2023.

16. RECONCILIATION TO DEALING NAV

For the year ended 31 December 2023 for AXA IM Wave Biotech Fund, the year end dealing NAV differed from the NAV per the financial statements. In line with the terms of the Prospectus and relevant agreements in place, the investment valuation for dealing NAV purposes was calculated based on a pricing methodology that included valuation at opening prices for certain equities. This pricing methodology was different to the pricing methodology required by IFRS which requires investment valuation to be considered as at close of business on 31 December 2023. The table below reconcile the NAV as per the financial statements to the dealing NAV for this Fund.

31 December 2024

No valuation adjustment was required as of 31 December 2024.

18. SIGNIFICANT EVENTS AFTER THE FINANCIAL YEAR END

The following distributions were declared with an ex-date of 2 January 2025: USD301,651 in respect of AXA IM ACT US Short Duration High Yield Low Carbon and USD1,532,731 in respect of AXA IM WAVE Cat Bonds Fund.

The following distributions were declared with an ex-date of 1 April 2025: USD1,718,791 in respect of AXA IM ACT US Short Duration High Yield Low Carbon, USD1,408,404 in respect of AXA IM WAVE Cat Bonds Fund, EUR178,370 in respect of Delegio Privilege Ambitious Fund, EUR574,066 in respect of Delegio Privilege Balanced Fund, EUR142,577 in respect of Delegio Privilege Cautious Fund, EUR463,875 in respect of Delegio Privilege Entrepreneurial Fund, EUR3,577,996 in respect of Target Yield 2028, EUR478,922 in respect of Target Yield June 2028, USD74,738 in respect of USD Credit 2027 and EUR7,066,440 in respect of AXA IM Euro Yield Target 2028.

Trump administration's policy on global tariffs and the back-forth have led to a sharp correction of the US and global equity markets since Q1 2025, fueling fears of a global trade war. Volatility risk remains elevated. Economic and geopolitical uncertainties continue to pose with persistent inflation concerns, exacerbated by global tariffs and rising protectionism. Performance & asset price risk, volatility risk and liquidity risk are key market risk factors that the Manager has been closely monitoring.

There were no other significant events after the year ended 31 December 2024 that have an impact on these financial statements.

19. APPROVAL OF FINANCIAL STATEMENTS

The financial statements were approved by the Board of Directors on 16 April 2025.

| Murphy Oil | 5.88 | 01/12/2027 | 156,967 |

Listed above are aggregate purchases and sales of securities exceeding 1 per cent of the total value of purchases and sales for the financial year ended 31 December 2024. At a minimum the largest 20 purchases and sales are required to be disclosed, if applicable.

^{*} Fund launched on 12 September 2024.

INFORMATION ON REMUNERATION (unaudited)

According to regulatory requirements on remuneration disclosure applicable to asset management companies, this disclosure provides an overview of the approach on remuneration taken by AXA Investment Managers (hereafter "AXA IM"). Further information on the composition of the Remuneration Committee and driving principles of the Remuneration Policy is available on AXA IM website: www.axa-im.com/remuneration A copy of this information is available upon request free of charge.

Governance - AXA IM's Remuneration Policy, which is reviewed and approved by the AXA IM Remuneration Committee every year, sets out the principles relating to remuneration within all entities of AXA IM and takes into account AXA IM's business strategy, objectives, and risk tolerance, as well as the long-term interests of AXA IM's shareholders, clients and employees. The AXA IM Remuneration Committee, in line with the remuneration policies and procedures set and validated at AXA Group level, ensures consistency and fair application of the Remuneration Policy within AXA IM, as well as compliance with applicable regulations.

The central and independent review that the effective implementation of the AXA IM's Remuneration Policy complies with the procedures and policies adopted by AXA IM Group level, is performed by the AXA IM Internal Audit Department, who present each year its conclusions to the AXA IM Remuneration Committee to enable it to perform its diligences.

These conclusions did not mention any particular comments regarding the compliance of the effective implementation of the AXA IM's Remuneration Policy.

The result of the annual exam by the AXA IM Remuneration Committee is presented to the Board of Directors of AXA Investment Managers Paris (hereafter "AXA IM PARIS") along with the amendments implemented into the AXA IM's Remuneration Policy.

These changes mainly concern (i) specific adjustments to certain entities of the AXA IM group, including the application of MIFID guidelines for entities where this became necessary and (ii) minor updates.

Quantitative information – Data provided below are those of AXA Investment Managers covering all subsidiaries of the AXA IM Group and types of portfolios as at 31 December 2024 after application on remuneration data of the ICAV's weighted Asset Under Management allocation key.

| Total amount of remuneration paid and/or awarded to staff for the year ended 31 December 2024 ⁽¹⁾ | | |
|--|--------------------------------|--|
| Fixed Pay (2) ('000 EUR) | 832.82 | |
| Variable Pay (3) (2000 EUR) | 506.02 | |
| Number of employees (4) | 2,944 among which 770 for AXA | |
| | Investment Managers Paris, | |
| | management company of the ICAV | |

- (1) Excluding social charges, after application of the SPPICAV's (Investment company with variable capital and a preponderance of real estate assets) weighted Asset Under Management allocation key.
- (2) Fixed Pay amount is based on Fixed Pay effective for all staff at AXA IM on 1 January 2024
- (3) Variable Pay, composed of discretionary, upfront and deferred items, includes:
 - Amounts awarded for the performance of the previous year and fully paid over the financial year under review (non-deferred variable pay)
 - Amounts awarded for the performance of previous years and the performance of the year under review (deferred variable pay),
 - Long-Term Incentives awarded by the AXA Group.
- (4) Number of employees includes Permanent and Temporary contracts excluding interns as at 31 December 2024.

INFORMATION ON REMUNERATION (unaudited) (continued)

(5) Number of identified employees within AXA IM Group level and AXA IM Paris as at 31 December 2024.

Total Expense Ratio

The TER is equal to the ratio of the total operating costs to the average NAV. Total operating costs are expenses deducted from the assets for the relevant fiscal period.

The average NAV is calculated using the NAV as at each valuation point.

SUSTAINABLE FINANCE DISCLOSURE REGULATION ("SFDR") AND TAXONOMY REGULATION DISCLOSURE (unaudited)

This appendix includes disclosures as required by SFDR and taxonomy regulations disclosure.

The following table outlines the SFDR classification for each of the Funds of the ICAV as of 31 December 2024. The disclosures for each classification are outlined in the following pages.

| Fund name | SFDR classification |
|--|---------------------|
| AXA IM ACT US Short Duration High Yield Low Carbon | Article 8 |
| AXA IM WAVe Cat Bonds Fund | Article 8 |
| AXA IM Multi Asset Target 2026 | Article 6 |
| AXA IM Wave Biotech Fund | Article 6 |
| Delegio Privilege Ambitious Fund | Article 8 |

| Target Yield 2028 | Article 6 |
| Target Yield June 2028 | Article 8 |
| USD Credit 2027 | Article 8 |

SFDR Article 6:

SFDR Level 1:

The Fund is a financial product that neither promotes environmental and/or social characteristics nor has a sustainable investment objective within the meaning of the articles 8 and 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector.

EU Taxonomy:

The European Union (EU) regulation designed to harmonise the classification of sustainable economic activities came into force from 1 January 2022. Known as the 'EU Taxonomy' it covers multiple themes related to environmental sustainability. Climate mitigation and climate adaptation are the first two objectives covered, with another four (water, pollution, biodiversity, and circular economy) expected to be included from 2023.

We would like to inform you that the investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

SFDR Article 8:

SFDR Level 1: ESG integrated e.g. applying Sectorial & normative exclusion policies

Beyond AXA IM's climate and biodiversity strategies, the fund has implemented a specific responsible investing framework.

The fund uses an approach that embeds sustainability risks assessments derived from the integration of ESG (Environment, Social and Governance) criteria within its research and investment processes. The fund has implemented a framework to integrate sustainability risks in investment decisions based on sustainability factors. It relies notably on those policies that applied bindingly on a continuous basis:

- sectorial exclusion policies covering controversial weapons, soft commodities, climate risks, and ecosystem protection & deforestation. In 2021, AXA IM extended this policy to cover investments incorporating significant land use controversies and responsible for biodiversity loss in relation to soy, cattle and timber.
- (ii) ESG standards (covering normative exclusions with the tobacco sector, white phosphorus weapons producers, companies in violation of international norms and standards, severe controversies and low ESG quality based on ESG scoring) were upgraded in 2021 with more demanding rules on human rights violations and on compliance to international norms and standards.

SUSTAINABLE FINANCE DISCLOSURE REGULATION ("SFDR") AND TAXONOMY REGULATION DISCLOSURE (unaudited) (continued)

ESG scoring methodology was revamped in 2021 towards a single-provider ESG scoring model which is coupled with an overlay of AXA IM's own qualitative analysis. Entitled Q, this new and enhanced qualitative and quantitative approach offers increased coverage as well as fine-tuned fundamental analysis.

The most up to date version of AXA IM's policies can be found on AXA IM's website at the following link: https://www.axa-im.com/our-policies

The "do no significant harm" principle according to SFDR regulation that aims to ensure limiting adverse impact on sustainability factors, is considered through exclusion policies of the most material ESG risks. Stewardship policies are an additional risk mitigation on Principal Adverse Impacts through direct dialogue with companies on sustainability and governance issues.

Furthermore, through their engagement activities, AXA IM has used its influence as investors to encourage companies to mitigate environmental and social risks relevant to their sectors. Voting at general meetings has been an important element of our dialogue with investee companies in order to foster sustainably long-term value of the companies in which it invests.

The implementation of responsible investment's frameworks had the following results:

- Latest engagement and voting reports are available at the fund center website: https://funds.axa-im.com/
- A reporting on main ESG indicators measured for the fund is available at the at the fund center website: https://funds.axa-im.com/

EU Taxonomy:

The European Union (EU) regulation designed to harmonise the classification of sustainable economic activities came into force from 1 January 2022. Known as the 'EU Taxonomy' it covers multiple themes related to environmental sustainability. Climate mitigation and climate adaptation are the first two objectives covered, with another four (water, pollution, biodiversity, and circular economy) were expected to be included from 2023.

We would like to inform you that the investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

SFDR Level 2:

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: AXA IM ACT US Short Duration Legal Entity Identifier: 21380016844YDDKHVW28 High Yield Low Carbon (the "Financial Product")

Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective? | | | | | | | |
|---|---|--|--|--|--|--|--|
| •• | ●) ⊠ NO | | | | | | |
| It made sustainable investments with an environmental objective:% | It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 27.31 % of sustainable investments | | | | | | |
| in economic activities that qualify as environmentally sustainable under the EU Taxonomy | with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy | | | | | | |
| in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | | | | | | |
| | with a social objective | | | | | | |
| It made sustainable investments with a social objective:% | It promoted E/S characteristics, but did not make any sustainable investments | | | | | | |

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon Intensity
- Water Intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil & gas activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of
 international norms and standards such as the United Nations Global Compact Principles, International Labor
 Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and
 ESG standards have been applied bindingly at all times during the reference period
- Protection of human rights avoiding investing in debt instruments issued by countries where the worst forms of human right violations are observed.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

During the reference period, the Financial Product has applied a ESG Score Upgrade Approach approach on its investment universe, according to which the ESG scoring of the Financial Product has been higher than the scoring of the investment universe after removing at least the 20% worst ESG Scores, on a weighted average basis.

| Sustainability KPI Name | Value | Coverage |
|-------------------------|---|----------|
| Carbon Intensity | 118.79 Metric tonnes of carbon dioxide equivalents per million \$ of revenue (for corporates only) - Scope 1+2 | 90.4 % |
| Water Intensity | 709.57 Thousands of cubic meters per million \$ of revenue (for corporates only) | 90.4 % |

N.B.: KPIs and benchmarks are reported based on an average of the data available at each end of month of the reference period.

... And compared to previous periods?

| Sustainability KPI Name | Year | Value | Coverage |
|-------------------------|------|---|----------|
| Carbon intensity | 2023 | 125.1 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 90.86 % |
| Water Intensity | 2023 | 1019.54 Thousands of cubic meters for corporates | 90.86 % |
| Carbon intensity | 2022 | 131.55 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign | 92.26 % |
| Water intensity | 2022 | 1189.35 Thousands of cubic meters for corporates | 92.26 % |

N.B.: While Sustainability KPIs are reported based on an average of the data available at each end of quarter of the reference period, for technical reasons benchmarks are reported based on end of year data only. Therefore, the comparison should not be taken as such at face value and should not be interpretated as a breach of the binding elements disclosed into the Financial Product's legal documentation, as figures disclosed for the benchmark are not based on the same accounting approach than for those disclosed for the Financial Product.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

- 1.UN Sustainable Development Goals alignment (SDG) of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:
- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2.Integration of issuers engaged in a solid Transition Pathway consistently with the European Commission's ambition to help fund the transition to a 1.5°c world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:

a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.

b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below –5 based on a quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through (i) AXA IM sectorial exclusion policies and AXA IM ESG standards that have been applied bindingly at all times by the Financial Product, as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under -5 on any SDG (on a scale from +10 corresponding to 'significant contributing impact' to -10 corresponding to 'significant obstructing impact'), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies | PAI indicator | Units | Measurement | Coverage in % based on Total AUM | Coverage in % based on eligible assets |
|--|--|---|--|---|---|
| | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes of carbon dioxide equivalents (tCO2e) | Scope 1: 5193.439 Scope 2: 1883.684 Scope 3: 67211.758 Scope 1+2: 7077.124 Scope 1+2+3: 73533.258 | Scope 1: 78 Scope 2: 78 Scope 3: 73 Scope 1+2: 78 Scope 1+2+3: 73 | Scope 1: 80 Scope 2: 80 Scope 3: 75 Scope 1+2: 80 Scope 1+2+3: 75 |

Social and Governance:

| Relevant AXA IM | PAI indicator | Units | Measurement | Coverage in % based | Coverage in % based |
|--|---|---|-------------|---------------------|---------------------|
| ESG standards policy: violation of international norms and standards | PAI 10: Violation of UN Global Compact principles & OECD Guidelines for Multinational Enterprises | Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (% of AuM) | 0.0% | on Total AUM 97 | on eligible assets |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) ² | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for Multinational Enterprises | Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance /complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (% of AuM) | 67.6 % | 84 | 86 |
| SDG no significantly negative score | PAI 12: Unadjusted gender pay gap | Average unadjusted gender pay gap of investee companies (%) | 16.16% | 85 | 88 |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board gender diversity | Average ratio of female board members in investee companies, expressed as a | 27.05 | 84 | 86 |

The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively. Not all high impact climate sectors are targeted by the exclusion policy for the time being.

The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

| | | percentage of all board members (%) | | | |
|---------------------------------|---|---|-----|----|-----|
| Controversial weapons policy | PAI 14: Exposure to controversial weapons | Share of investments in investee companies involved in the manufacture or selling of controversial weapons (% of AuM) | 0.0 | 97 | 100 |

For Sovereign and supranationals:

| Relevant AXA IM policies | PAI indicator | Units | Measurement | Coverage in % based on Total AUM | Coverage in % based on eligible assets |
|---|--|--|-------------|--|---|
| AXA IM ESG Standards policy, through the exclusion of investee countries with severe social violations Compliance black- list based on international and EU sanctions | PAI 16: Sovereign Investee countries subject to social violations | Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law | N/A | Absolute number: 0 Relative number: 0 | N/A |

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

...Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies:

| Relevant AXA IM policies | PAI indicator | Units | Measurement | Coverage in % based on Total AUM | Coverage in % based on eligible assets |
|---|---|--|--|---|---|
| Ecosystem protection & Deforestation policy | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023) | Metric tonnes of carbon dioxide equivalents (tCO2e) | Scope 1: 5193.439 Scope 2: 1883.684 Scope 3: 67211.758 Scope 1+2: 7077.124 Scope 1+2+3: 73533.258 | Scope 1: 78 Scope 2: 78 Scope 3: 73 Scope 1+2: 78 Scope 1+2+3: 73 | Scope 1: 80 Scope 2: 80 Scope 3: 75 Scope 1+2: 80 Scope 1+2+3: 75 |
| Ecosystem protection & Deforestation policy | PAI 2: Carbon Footprint | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/€M) | Scope 1+2: 51.787 Scope 1+2+3: 524.791 | Scope 1+2: 82 Scope 1+2+3: 73 | Scope 1+2: 85 Scope 1+2+3: 75 |
| Climate Risk policy | | | | Scope 1+2+3: 81 | Scope 1+2+3: 83 |

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

| Ecosystem protection & Deforestation policy | PAI 3: GHG intensity of investee companies | Metric tonnes of carbon dioxide equivalents per million euro of revenue (tCO2e/€M) | Scope 1+2+3: 815.365 | | |
|--|--|--|------------------------------|---|---------------------------|
| Climate Risk policy | PAI 4: Exposure to companies active in the fossil fuel sector | Share of investments in companies active in the fossil fuel sector (% of AuM) | 0.68 | 86 | 88 |
| Climate Risk policy (engagement only) | PAI 5: Share of non- renewable energy consumption and production | Share of non- renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%) | Energy Consumption: 84.93 | Energy Consumption: 69 Energy Production: 0 | Energy Consumption: 72 |
| Ecosystem protection & Deforestation policy | PAI 7: Activities negatively affecting biodiversity- sensitive areas | Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas (% of AuM) | 16.8 | 17 | 17 |
| ESG standard policy / violation of international norms and standards | PAI 10: Violation of UN Global Compact principles & OECD Guidelines for Multinational Enterprises | Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (% of AuM) | 0.0% | 97 | 100 |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board Gender diversity | Average ratio of female board members in investee companies, expressed as a percentage of all board members (%) | 27.05 | 84 | 86 |
| Controversial weapons policy | PAI 14: Exposure to controversial weapons | Share of investments in investee companies involved in the manufacture or selling of controversial weapons (% of AuM) | 0.0 | 97 | 100 |

|---|--|--|-------------|--|---|
| AXA IM ESG Standards policy, through the exclusion of investee countries with severe social violations Compliance black- list based on international and EU sanctions | PAI 16: Sovereign Investee countries subject to social violations | Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law | N/A | Absolute number: 0 Relative number: 0 | N/A |

Source: S&P Trucost, 2024

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

N.B.: PAIs are reported based on an average of the impacts at each end of quarter of the reference period where data is available.

Figures disclosed on PAI indicators can either be based on the "current value of all investments" as defined by the Regulation, or on "eligible assets with available data only" where relevant. For the purpose of this document, "eligible assets with available data only" refers to all investments (i.e., investee companies, or sovereign and supranational, or real estate assets, depending on the PAI), excluding derivatives, cash and cash equivalent and eligible assets without available data. "Eligible assets without available data" refers to assets that have insufficient data and/or low data quality for a specific investment. The attention of the recipient is drawn to the fact that for some specific PAIs (i.e., PAIs which are relative i) to investee companies' revenue or ii) to non-monetary units such as physical flows), the calculation is rebased on eligible assets with available data only for data quality and comparability purposes. Such exclusion at the denominator is reflected and disclosed through the coverage ratios for the relevant indicators: the coverage disclosed reflects the proportion of eligible assets for which data is available and provided in this document; in addition, to ensure full transparency on the scope of assets where PAIs are disclosed, the coverage based on the current value of all investments is also disclosed.

| Reported PAI indicators based on the current value of all investments | Reported PAI indicators based on eligible assets, excluding eligible assets with no available data | |
|---|--|--|
| PAI indicators 2, 4, 7, 10, 11 and 14 | PAI indicators 3 and 6 | |

N.B.: PAI indicators 1 and 16 are not based neither on any of these two approaches as being PAIs in absolute values (noting that the PAI 16 is also relative to the number of invested countries in addition to the absolute value number), i.e., having no denominator in their formula.

More details on our methodologies to account and disclose PAIs are available in AXA IM ESG Methodologies Handbook available on AXA IM website: https://www.axa-im.com/our-policies-and-reports

What were the top investments of this financial product?

The top investments of the Financial Product (based on the NACE classification's divisions: NACE level 2) are detailed below:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/01/2024-31/12/2024

| Largest investments | Sector (NACE level 2) | % Assets | Country | |
|--|---|----------|---------|--|
| Portfolio 54892 USD SET SSI | Other | 2.12% | N/A | |
| NXST 5.625% - 15/07/2027 Call | Programming and broadcasting activities | 1.9% | US | |
| OUT 5% - 15/08/2027 Call | Advertising and market research | 1.9% | US | |
| SIRI 5% - 01/08/2027 Call | Telecommunications | 1.83% | US | |
| OI 6.625% - 13/05/2027 Call | Manufacture of other non-metallic mineral products | 1.74% | US | |
| THC 6.25% - 01/02/2027 Call | Human health activities | 1.69% | US | |
| ZIGGO 6% - 15/01/2027 Call Telecommunications | | 1.61% | NL | |
| WLSC 6.125% - 15/06/2025 Call | Office administrative, office support and other business support activities | 1.54% | US | |
| CHTR 5.125% - 01/05/2027 Call Telecommunications | | 1.53% | US | |
| BCO 4.625% - 15/10/2027 Call | Security and investigation activities | 1.3% | US | |
| RLJ 3.75% - 01/07/2026 Call | Real estate activities | 1.3% | US | |
| ARMK 5% - 01/04/2025 Call | Food and beverage service activities | 1.29% | US | |
| ACIW 5.75% - 15/08/2026 Call | Publishing activities | 1.27% | US | |
| CHTR 5.5% - 01/05/2026 Call | Telecommunications | 1.27% | US | |
| BERY 5.625% - 15/07/2027 Call Manufacture of rubber and plastic products | | 1.26% | US | |

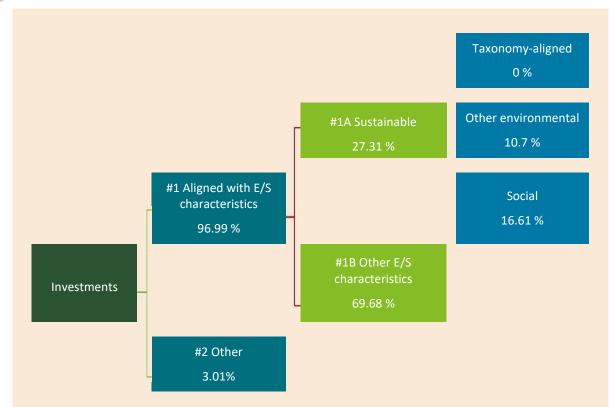

The portfolio proportions of investments presented above are an average over the reference period.

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The actual asset allocation has been reported based on an average of the data available at end of each quarter of the reference period.

Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

In which economic sectors were the investments made?

Financial product's investments were made in the economic sectors (based on NACE level 2) detailed below:

| Top sector (NACE level 2) | Proportion |
|--|------------|
| Telecommunications | 9.91% |
| Security and investigation activities | 5.99% |
| Publishing activities | 5.85% |
| Human health activities | 4.6% |
| Gambling and betting activities | 4.38% |
| Financial service activities, except insurance and pension funding | 4.12% |
| Food and beverage service activities | 3.9% |
| Programming and broadcasting activities | 3.79% |
| Real estate activities | 3.67% |

| Office administrative, office support and other business support activities | 3.13% |
|--|-------|
| Other | 2.94% |
| Manufacture of electrical equipment | 2.72% |
| Retail trade, except of motor vehicles and motorcycles | 2.69% |
| Other manufacturing | 2.52% |
| Manufacture of rubber and plastic products | 2.45% |
| Manufacture of food products | 2.39% |
| Wholesale trade, except of motor vehicles and motorcycles | 2.37% |
| Activities auxiliary to financial services and insurance activities | 2.24% |
| Manufacture of motor vehicles, trailers and semi-trailers | 2.2% |
| Water transport | 2.09% |
| Manufacture of paper and paper products | 2.04% |
| Land transport and transport via pipelines | 1.92% |
| Advertising and market research | 1.9% |
| Manufacture of other non-metallic mineral products | 1.79% |
| Manufacture of chemicals and chemical products | 1.75% |
| Creative, arts and entertainment activities | 1.65% |
| Manufacture of machinery and equipment n.e.c. | 1.6% |
| Other personal service activities | 1.5% |
| Sports activities and amusement and recreation activities | 1.48% |
| Manufacture of wearing apparel | 1.45% |
| Manufacture of other transport equipment | 1.23% |
| Motion picture, video and television programme production, sound recording and music publishing acti | 1.17% |
| Manufacture of computer, electronic and optical products | 1.06% |
| Information service activities | 0.99% |
| Manufacture of wood and of products of wood and cork, except furniture, manufacture of articles of s | 0.98% |
| Accommodation | 0.9% |
| Rental and leasing activities | 0.88% |
| Wholesale and retail trade and repair of motor vehicles and motorcycles | 0.45% |
| Architectural and engineering activities, technical testing and analysis | 0.41% |
| Waste collection, treatment and disposal activities, materials recovery | 0.4% |
| Manufacture of fabricated metal products, except machinery and equipment | 0.32% |
| Education | 0.11% |
| Computer programming, consultancy and related activities | 0.08% |
| Manufacture of basic pharmaceutical products and pharmaceutical preparations | 0.01% |

The portfolio proportions of investments presented above are an average over the reference period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

| □Yes | • |
|-----------------|-----------------------------|
| ☐ In fossil gas | \square In nuclear energy |
| ⊠No | |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

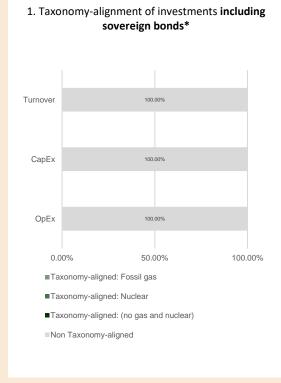

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

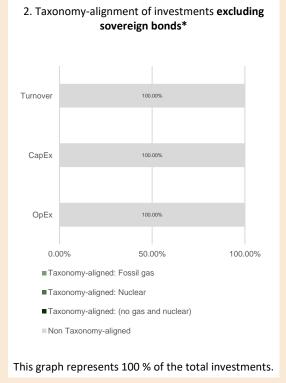

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

³ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

| Percentage of EU Taxonomy-aligned investments | | | | | |
|---|-------|-------|-------|--|--|
| 2024 2023 2022 | | | | | |
| Revenue-based | 0.00% | 0.00% | 0.00% | | |
| CapEx-based | 0.00% | 0.00% | 0.00% | | |
| OpEx-based | 0.00% | 0.00% | 0.00% | | |

Source: AXA IM, based on S&P Trucost, 2024

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 10.7% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 16.61% of sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining "Other" investments represented 3.01% of the Financial Product's Net Asset Value.

The "other" assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments, and;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria
 described in this appendix. Such assets may be transferable securities such as debt instruments, derivatives
 investments and investment collective schemes that do not promote environmental or social characteristics and
 that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging
 purposes.

Environmental or social safeguards were applied and assessed on all "other" assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the Financial Product continued to apply all AXA IM exclusion policies, for which the exclusion criteria were updated - for the most recent updates - in 2023, but which exclusion lists were updated in 2024. More details on AXA IM exclusion policies are available under the following link: Sustainability Policies and Reports | AXA IM Corporate

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. Pre-contractual disclosure for the Financial Products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph of Regulation (EU) 2020/852

Sustainable
investment means
an investment in an
economic activity
that contributes to
an environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental
or social objective
and that the
investee companies

follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: AXA IM WAVe Cat Bonds Fund

(Sub-Financial Product of the Irish umbrella AXA IM WORLD ACCESS VEHICLE ICAV)

(the "Financial Product")

Legal entity identifier: 2138003OJPJBUG1SY484

Environmental and/or social characteristics

| Does this Financial Product have a sustainable investment objective? | | | | |
|--|---|--|--|--|
| Yes | • No | | | |
| It will make a minimum of sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective | | | |
| It will make a minimum of sustainable investments with a social objective:% | It promotes E/S characteristics, but will not make any sustainable investments | | | |

Capitalised terms used but not defined in this document shall have the meaning given to them in the section DEFINITIONS of the Supplement to the Prospectus of the Financial Product.

What environmental and/or social characteristics are promoted by this Financial Product?

The Financial Product aims at promoting environmental and social characteristics within the meaning of Article 8 of SFDR through the integration of Environmental, Social and Governance (**ESG**) consideration in its investment process as described in the paragraph below.

In that context, the Financial Product promotes specific environmental and social characteristics, mainly:

- preservation of climate with the consideration in our ESG Score of the Sponsor's exposure to Coal and Tar sand activities;
- protection of ecosystem and prevention of deforestation with the consideration in our ESG Score of the Sponsor's exposure to Palm Oil;
- better health with an exclusion on Tobacco companies and the consideration in our ESG Score of the Sponsor's exposure to this activity;
- labor rights, society and human rights, business ethics, anti-corruption with an exclusion on companies involved in the trade of Controversial Weapons or in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's conventions or the OECD guidelines for multinational enterprises. We also take into consideration in our ESG Score the Sponsor's exposure to companies active in the trade of Controversial Weapons and its involvement with such international standards.

Furthermore, as part of the due diligence process undertaken by the Manager in order to select investment opportunities for the Financial Product, the Manager shall use commercially reasonable efforts to take into account ESG considerations that are relevant to each investment of the Financial Product, primarily by performing at the time of investment an ESG scoring and analysis on the investments (hereinafter, the "ESG Scoring Process") based on a proprietary methodology.

The purpose of the ESG Scoring Process is to evaluate each investment with respect to certain Environmental (E), Social (S) and Governance (G) criteria selected by the Manager in its discretion, in each case based on the information available to the Manager during the investment process (including by collecting questionnaires-based information).

1- For the ILS investments

In determining the ESG Scoring Process for the ILS, the Manager shall aim to assess the outcome from an ESG perspective of the application of the ESG approach of notably the ILS Sponsor as an operating company, considering factors such as, without limitation, the environmental impact of the ILS Sponsor as a corporate through its carbon footprint, the quality of social relations within the firm through the promotion of employee diversity and the existence of a robust governance in relation to ethical matters, the selection of the assets held in a collateral account to secure the payments obligations under the ILS and any other outcome which the Manager considers relevant.

The Manager shall take into account factors such as, without limitation, the application by the ILS Sponsors of sectorial exclusions policies (e.g., Climate risks, Ecosystem protection & Deforestation, Soft Commodities, Controversial Weapons, etc.).

When computing the ESG Scoring Process for an ILS, the relevance and importance of each factor shall be assessed on a 0 to 10 scale and the ILS will be assigned a global scoring ranging from 0 to 10 based on the aggregation of the input for each factor. The Manager shall determine, in its discretion, the weighting of each assessed factor and the weighting of each score attributed to the ILS Sponsor and to the portfolio (i.e., collateral assets under the ILS) and/or the underlying ultimate beneficiary of the ILS respectively.

While such methodology will allow the Manager to weight each factor when determining the ESG score of the ILS, the weighting of each assessed factor shall be applied consistently to all ILS within the Financial Product Portfolio.

2- For the Money Market Instruments, Eligible CIS and other liquid financial instruments

As part of the due diligence undertaken by the Manager in order to select the investment opportunities of the Financial Product, the Manager will take into account the ESG considerations considered by the Manager as relevant for each investment mainly by carrying out at the time of the investment an evaluation with regard to certain ESG criteria selected at the discretion of the Manager, in each case on the basis of the information available to the Manager during the investment process (including by collecting information on the basis of questionnaires), in order to determine, according to the ESG Scoring Process, an ESG score on a scale ranging from 0 to 10.

At the level of the Financial Product, the ESG scores for the ILS and the Money Market Instruments, Eligible CIS and other liquid financial instruments shall be aggregated in order to have a synthetic view of the ESG score of the entire Financial Product's portfolio.

While the Manager will aim at performing its ESG Scoring Process with reasonable care, based on available data and relevant proxies and estimates, any assessment of the promotion of environmental or social characteristics by the Manager is necessarily indicative and subjective.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this Financial Product?

As of the date of the Supplement to the Issuing Document, the Manager intends to monitor the following sustainability indicators to measure the attainment of the environmental or social characteristics promoted by the Financial Product:

- the proportion of the investments comprised within the Financial Product's portfolio that have been granted an ESG score by the Manager,
- the proportion in the Financial Product's portfolio of ILS, for which an ESG score have been granted by the Manager, having an ESG score greater than 5 according to the ESG Scoring Process;
- the proportion in the Financial Product's portfolio of the ILS, for which an ESG score have been granted by the Manager, having an ESG score greater than 1.43 according to the ESG Scoring Process;
- the proportion in the Financial Product's portfolio of the ILS Sponsors having
 put in place an active program to limit its carbon footprint or have adhered
 to the Greenhouse gas (GHG) reduction related program such as the "NetZero Insurance Alliance" initiative following the twenty-first session of the
 Conference of the Parties ("COP 21") or to any equivalent program; and
- the proportion in the Financial Product of ILS under which ILS Sponsors meet the ESG Eligibility Criteria at the time of investment.

Sustainability indicators measure how the environmental or social characteristics promoted by the Financial Product are attained.

What are the objectives of the sustainable investments that the Financial Product

partially intends to make and how does the sustainable investment contribute to such objectives?

The Financial Product promotes environmental and/or social characteristics but will not make any sustainable investments within the meaning of Regulation (EU) 2019/2088, this question is therefore non applicable to the Financial Product.

How do the sustainable investments that the Financial Product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

The Financial Product promotes environmental and/or social characteristics but will not make any sustainable investments within the meaning of Regulation (EU) 2019/2088, this question is therefore non applicable to the Financial Product.

How have the indicators for principal adverse impacts on sustainability factors been taken into account?

The Financial Product promotes environmental and/or social characteristics but will not make any sustainable investments within the meaning of Regulation (EU) 2019/2088, this question is therefore non applicable to the Financial Product.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Financial Product promotes environmental and/or social characteristics but will not make any sustainable investments within the meaning of Regulation (EU) 2019/2088, this question is therefore non applicable to the Financial Product.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the Financial Product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this Financial Product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Does this Financial Product consider principal adverse impacts on sustainability factors?

Principal adverse impacts ("PAI") are considered with both (i) qualitative and (ii) quantitative approaches:

(i) Qualitative approach

Qualitative approach to consider principal adverse impact is based on exclusion on direct investments. Exclusion policies as part of the AXA IM exclusions policies and sectorial exclusions cover the most material sustainability factors' risks and are applied bindingly on a continuous basis.

Exclusion policies:

- Sectorial exclusions: Climate risks, ecosystem protection &deforestation, Soft Commodities, Controversial Weapons;
- AXA IM exclusions policies on Tobacco, white phosphorus weapons, UNGC violations, Human Rights.

(ii) Quantitative approach

Principal adverse impacts are also considered quantitatively through the measurement and annual report of the following principal adverse impacts:

- GHG intensity (PAI 3); and
- Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) - (PAI 14)

Exclusion policies are applicable on direct investments and have specific limitations of application on alternative investments.

Additionally, the Manager is measuring and incorporating several ESG indicators, directly in its ESG Scoring Process with the objective to identify, assess and monitor principal adverse impact on sustainability factors.

The Manager will use its reasonable efforts to collect all mandatory above-mentioned PAIs..

Information on principal adverse impacts on sustainability factors considered by the Financial Product is available in the Financial Product's financial annual report.

What investment strategy does this Financial Product follow?

As part of the due diligence process undertaken by the Manager in order to select investment opportunities for the Financial Product, the Manager selects investments by applying an extra-financial approach based on the AXA IM's Environmental, Social and Governance exclusions policy in the investment process by applying specific sectorial exclusions.

Those sectorial exclusions cover areas such as Climate risks, ecosystem protection & deforestation, Soft Commodities, Controversial Weapons.

The AXA IM exclusions policies encompass exclusions such as Tobacco, white phosphorus

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance. weapons, United Nations Global Compact Principles violations, Human Rights. Exclusion policies are applicable on direct investments and have specific limitations of application on alternative investments.

In addition, the Manager shall use commercially reasonable efforts to take into account ESG considerations that are relevant to each investment of the Financial Product by performing at the time of investment the ESG Scoring Process (as described above) based on a proprietary methodology, each investment being scored on a scale ranging from 0 to 10.

Specifically for the ILS, the Manager will take into consideration the application by the ILS sponsor of the sectorial exclusions and, in particular, for the ESG Scoring Process for the ILS, the environmental impact of the ILS Sponsor as a corporate through its carbon footprint, the quality of social relations within the firm through the promotion of employee diversity and the existence of a robust governance in relation to ethical matters.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this Financial Product?

The binding elements of the investment strategy consist in (i) the implementation of exclusion policies and (ii) the use of sustainability metrics:

(i) Exclusion policies

The Manager bindingly applies a first exclusion filter, encompassing areas such as Controversial Weapons, Climate risks, Soft Commodities and Ecosystem Protection & Deforestation. The Financial Product also applies the AXA IM's Environmental, Social and Governance exclusions policy in the investment process by applying specific sectorial exclusions such as Tobacco and White Phosphorus Weapons, as defined in the section DEFINITIONS of the Supplement to the Prospectus of the Financial Product.

Exclusion policies are applicable on direct investments and have specific limitations of application on alternative investments.

(ii) Metrics

As of the date of the Supplement to the Issuing Document, the Manager shall use commercially reasonable efforts to ensure that, until the first date where the Financial Product enters into its liquidation phase:

- at least, 75% of the investments comprised within the Financial Product's portfolio have been granted an ESG score by the Manager;
- 100% of the ILS comprised within the Financial Product's portfolio, which has been granted an ESG score by the Manager, have an ESG score equal or greater than 1.43 according to the ESG Scoring Process;
- at least, 50% of the ILS comprised within the Financial Product's portfolio which
 has been granted an ESG score by the Manager has an ESG score granted by the
 Manager equal to or greater than 5 according to the ESG Scoring Process; and

 at least, 70% of the ILS Sponsors of the invested ILS respect the ESG Eligibility Criteria as defined in the section DEFINITIONS of the Supplement to the Prospectus

These metrics are assessed based on the Financial Product's NAV.

At least, on an annual basis, the Manager shall review the ESG score of each investment and the aggregate ESG score of the Financial Product's portfolio on the basis of reasonably available data at the time of the assessment, using as appropriate relevant proxies and estimates when necessary.

While the Manager reserves the right to adjust from time to time and without notice the ESG Scoring Process, the ESG criteria taken into account, its processes and analyses, in order to better adapt them to its ESG objectives, the ESG Scoring Process shall be applied consistently to all investments comprised within the Financial Product's portfolio and any such adjustments shall ensure that the application of the ESG Scoring Process remains comparable through the lifecycle of the Financial Product.

The above metrics will be achieved until the date on which the Financial Product enters into its liquidation phase. While the Manager shall aim at achieving these metrics as described above, it may be affected notably by new subscription, repayment and prepayment of Investments, or delays in distributions. The Manager may also decide on a temporary basis to retain cash for reinvestment purposes. Therefore, the above metrics may temporarily deviate from the objectives described above, including before the liquidation phase. Should the Financial Product deviate from the above metrics, the Manager shall use reasonable efforts to bring the Financial Product back within these ratios except where the Manager reasonably believes that this would be against the interest of the Financial Product.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This Financial Product does not commit to a minimum rate to reduce the scope of the investments.

What is the policy to assess good governance practices of the investee companies?

The Manager assesses the good practices of the investee companies through the application of the exclusions policies described above to direct investments.

However, as the exclusions policies described above are applied only to direct investments, the Manager, in determining the ESG Scoring Process for the ILS, shall aim also at assessing the quality and relevance of the ESG approach of the ILS Sponsor as an operating company, notably through the assessment of its good governance practices (in particular with respect to sound management structures, employee relations, remuneration of staff and tax compliance).

In doing so, the Manager will, as of the date of the Supplement, consider factors such as, the environmental impact of the ILS Sponsor as a corporate through its carbon footprint, the quality of social relations within the firm through the promotion of employee diversity and the existence of a robust governance in relation to ethical matters

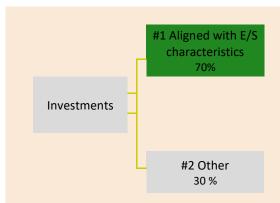

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the asset allocation planned for this Financial Product?

The Financial Product aims to plan its assets' allocation as presented in the graph below. The planned asset allocation indicated below may be revised from time to time at the discretion of the Manager.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The planned minimum proportion of the investments of the Financial Product aligned with Environmental or social characteristics in category #1 is expected to be 70% of the Financial Product's Net Asset Value.

The remaining "Other" investments in category #2 is expected not to represent more than 30% of the Financial Product's Net Asset Value.

The above planned asset allocation will be achieved until the date on which the Financial Product enters into its liquidation phase. While the Manager shall aim at achieving the planned asset allocation described above, it may be affected notably by any new subscription, repayment and prepayment of Investments, or delays in distributions. The Manager may also decide on a temporary basis to retain cash for reinvestment purposes. Therefore, the asset allocation may temporarily deviate from the planned asset allocation described above, including before the liquidation phase. Should the Financial Product deviate from the planned asset, the Manager shall use reasonable efforts to bring the Financial Product back within these ratios except where the Manager reasonably believes that this would be against the interest of the Financial Product.

How does the use of derivatives attain the environmental or social characteristics promoted by the Financial Product?

The Financial Product does not use derivatives to attain the environmental or social characteristics it promotes; therefore this question is not applicable.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product does not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product is not considering the "do not significantly harm" criteria of the EU Taxonomy.

Does the Financial Product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy¹?

Yes,

In fossil gas

In nuclear energy

the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds. 2. Taxonomy-alignment of investments 1.Taxonomy-alignment of investments including sovereign bonds* excluding sovereign bonds* ■ Taxonomy-aligned: Fossil ■ Taxonomy-aligned: Fossil 0% ■ Taxonomy-aligned: ■ Taxonomy-aligned: Nuclear Nuclear 100% 100% ■ Taxonomy-aligned (no ■ Taxonomy-aligned (no fossil gas & nuclear) fossil gas & nuclear) ■ Non Taxonomy-aligned ■ Non Taxonomy-aligned

The two graphs below show in green the minimum percentage of investments that are aligned with

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of investments in transitional and enabling activities?

The minimum share of investments in transitional and enabling activities is 0 % of the Financial Product's Net Asset value

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Not applicable

¹ Fossil Gas and/or nuclear related activities will comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU taxonomy objective – see explanatory note in the left had margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in commission Delegated Regulation (EU) 2022/1214.

What is the minimum share of socially sustainable investments?

Not applicable

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

The "Other" assets may consist in:

- cash and cash equivalent investments being bank deposits, eligible money market instruments and money market used for managing the liquidity of the Financial Product (being specified that any money market instrument with an ESG score of minimum 1.43 and any money market fund qualified as article 8 under SFDR shall be included under #1 Aligned E/S characteristics);
- derivatives (except derivatives used for hedging purpose);
- other instruments eligible to the Financial Product and that are not covered by the ESG Scoring Process mentioned above or the ESG score of which is < 1.43

Environmental or social safeguards (i.e., exclusion policies as part of the AXA IM exclusions policies) are applied and assessed on all "Other" assets except on (i) non single name derivatives and (ii) cash and cash equivalent investments described above.

Is a specific index designated as a reference benchmark to determine whether this Financial Product is aligned with the environmental and/or social characteristics that it promotes?

There is no specific index designated as a reference benchmark to determine whether this Financial Product is aligned with the environmental and/or social characteristics.

Reference benchmarks are indexes to measure whether the Financial Product attains the environmental or social characteristics that they promote.

Where can I find more product specific information online?

More product-specific information can be found on the website: Sustainable Finance | SFDR | AXA IM Corporate (axa-im.com).

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators
measure how the environmental

or social characteristics

product are attained.

promoted by the financial

Product Name: Delegio Privilege Ambitious Fund **Legal Entity Identifier:** 2138009DTLX54VCQXE65 (the "Financial Product")

Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective? | | | | | |
|---|---|--|--|--|--|
| •• □ YES | ● | | | | |
| It made sustainable investments with an environmental objective:% | It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 69.14 % of sustainable investments | | | | |
| in economic activities that qualify as environmentally sustainable under the EU Taxonomy | with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy | | | | |
| in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | | | | |
| | with a social objective | | | | |
| It made sustainable investments with a social objective:% | It promoted E/S characteristics, but did not make any sustainable investments | | | | |

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil & gas activities
- · Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of
 international norms and standards such as the United Nations Global Compact Principles, International Labor
 Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and
 ESG standards have been applied bindingly at all times during the reference period
- Protection of human rights avoiding investing in debt instruments issued by countries where the worst forms of human right violations are observed.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

| Sustainability KPI Name | Value | Coverage | |
|-------------------------|-----------|----------|--|
| ESG Score | 7.35 / 10 | 99.16 % | |

N.B.: KPIs and benchmarks are reported based on an average of the data available at each end of month of the reference period.

... And compared to previous periods?

| Sustainability KPI Name | Year | Value | Coverage |
|-------------------------|------|-------|----------|
|-------------------------|------|-------|----------|

| ESG Score | 2023 | 7.34 / 10 | 100 % |
|-----------|------|-----------|-------|
| ESG Score | 2022 | 7.05 / 10 | 100 % |

N.B.: While Sustainability KPIs are reported based on an average of the data available at each end of quarter of the reference period, for technical reasons benchmarks are reported based on end of year data only. Therefore, the comparison should not be taken as such at face value and should not be interpretated as a breach of the binding elements disclosed into the Financial Product's legal documentation, as figures disclosed for the benchmark are not based on the same accounting approach than for those disclosed for the Financial Product.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

- 1.UN Sustainable Development Goals alignment (SDG) of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:
- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2.Integration of issuers engaged in a solid Transition Pathway consistently with the European Commission's ambition to help fund the transition to a 1.5°c world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

3.Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product took into consideration the criteria of the EU Taxonomy environmental objectives, and the "do not significantly harm" principles. It is invested in activities aligned with the objectives of the EU Taxonomy. The Taxonomy alignment of the Financial Product has been provided by an external data provider and have been consolidated at portfolio level by AXA IM. Nevertheless, it has not been subject to an audit or a review by a third party.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a
 quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly
 contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively
 overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

-----: How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through (i) AXA IM sectorial exclusion policies and AXA IM ESG standards that have been applied bindingly at all times by the Financial Product, as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to 'significant contributing impact' to – 10 corresponding to 'significant obstructing impact'), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies | PAI indicator | Units | Measurement | Coverage in % based on Total AUM | Coverage in % based on eligible assets |
|--|--|--|---|---|--|
| | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes of carbon dioxide equivalents (tCO2e) | Scope 1: 1918.32 Scope 2: 631.062 Scope 3: 20176.088 Scope 1+2: 2549.382 Scope 1+2+3: 22725.352 | Scope 1: 83 Scope 2: 83 Scope 3: 82 Scope 1+2: 83 Scope 1+2+3: 82 | Scope 1: 89 Scope 2: 89 Scope 3: 89 Scope 1+2: 89 Scope 1+2+3: 89 |

| | PAI 3: GHG intensity of investee companies | Metric tonnes of carbon dioxide equivalents per million euro of revenue (tCO2e/€M) | Scope 1+2+3: 824.822 | Scope 1+2+3: 92 | Scope 1+2+3: 99 |
| Climate Risk policy | PAI 4: Exposure to Companies active in the fossil fuel sector | Share of investments in companies active in the fossil fuel sector (% of AuM) | 5.85 | 92 | 100 |
| Climate Risk policy (engagement only) | PAI 5 : Share of non- renewable energy consumption and production | Share of non- renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%) | Energy Consumption: 54.16 Energy Production: 59.89 | Energy Consumption: 91 Energy Production: 2 | Energy Consumption: 99 Energy Production: 2 |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) ¹ | PAI 6: Energy consumption intensity per high impact climate sector | Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector (GWh/€M) | Sector NACE C: 0.198 Sector NACE D: 1.553 Sector NACE E: 0.33 Sector NACE F: 0.057 Sector NACE G: 0.271 Sector NACE H: 0.007 Sector NACE L: 0.206 | Sector NACE A: 0 Sector NACE B: 0 Sector NACE C: 34 Sector NACE D: 2 Sector NACE E: 3 Sector NACE F: 0 Sector NACE G: 5 Sector NACE H: 1 Sector NACE L: 2 | Sector NACE C: 84 Sector NACE D: 46 Sector NACE E: 76 Sector NACE F: 9 Sector NACE G: 76 Sector NACE H: 75 Sector NACE L: 75 |
| Ecosystem Protection & Deforestation policy | PAI 7: Activities negatively affecting biodiversity-sensitive areas | Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas (% of AuM) | 38.7 | 39 | 42 |
| SDG no significantly negative score | PAI 8: Emissions to water | Tonnes of emissions to water generated by investee companies per million EUR invested, expressed as a | 0.011 | 32 | 35 |

¹ The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively. Not all high impact climate sectors are targeted by the exclusion policy for the time being.

| | | weighted average (t/€M) | | | |
|--|---|--|-------|----|----|
| SDG no significantly negative score | PAI 9: Hazardous waste and radioactive waste ratio | Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average (t/€M) | 0.094 | 42 | 45 |

Social and Governance:

| Relevant AXA IM | PAI indicator | Units | Measurement | Coverage in % based | Coverage in % based |
|--|---|---|--------------|---------------------|---------------------|
| policies | 1 Al malcator | | Wicasurement | on Total AUM | on eligible assets |
| ESG standards policy: violation of international norms and standards | PAI 10: Violation of UN Global Compact principles & OECD Guidelines for Multinational Enterprises | Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (% of AuM) | 0.0% | 92 | 100 |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) ² | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for Multinational Enterprises | Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance /complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (% of AuM) | 47.42 % | 91 | 98 |
| SDG no significantly negative score | PAI 12: Unadjusted gender pay gap | Average unadjusted gender pay gap of investee companies (%) | 16.42% | 90 | 98 |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board gender diversity | Average ratio of female board members in investee companies, expressed as a percentage of all board members (%) | 35.06 | 92 | 100 |
| Controversial weapons policy | PAI 14: Exposure to controversial weapons | Share of investments in investee companies involved in the manufacture or selling of controversial weapons (% of AuM) | 0.0 | 92 | 100 |

For Sovereign and supranationals:

| Relevant AXA IM policies | PAI indicator | Units | Measurement | Coverage in % based on Total AUM | Coverage in % based on eligible assets |
|---|--|--|--|--|---|
| AXA IM ESG Standards policy, through the exclusion of investee countries with severe social violations Compliance black- list based on international and EU sanctions | PAI 16: Sovereign Investee countries subject to social violations | Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law | Absolute number: 0 Relative number: 0.0 | Absolute number: 3 Relative number: 3 | Absolute number: 100 Relative number: 100 |

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

² The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

.Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies:

| Relevant AXA IM policies | PAI indicator | Units | Measurement | Coverage in % based on Total AUM | Coverage in % based on eligible assets |
|--|---|---|--|---|---|
| Climate Risk policy Ecosystem protection & Deforestation policy | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023) | Metric tonnes of carbon dioxide equivalents (tCO2e) | Scope 1: 1918.32 Scope 2: 631.062 Scope 3: 20176.088 Scope 1+2: 2549.382 Scope 1+2+3: 22725.352 | Scope 1: 83 Scope 2: 83 Scope 3: 82 Scope 1+2: 83 Scope 1+2+3: 82 | Scope 1: 89 Scope 2: 89 Scope 3: 89 Scope 1+2: 89 Scope 1+2+3: 89 |
| Climate Risk policy Ecosystem protection & Deforestation policy | PAI 2: Carbon Footprint | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/€M) | Scope 1+2: 24.945 Scope 1+2+3: 226.763 | Scope 1+2: 92 Scope 1+2+3: 82 | Scope 1+2: 100 Scope 1+2+3: 89 |
| Climate Risk policy Ecosystem protection & Deforestation policy | PAI 3: GHG intensity of investee companies | Metric tonnes of carbon dioxide equivalents per million euro of revenue (tCO2e/€M) | Scope 1+2+3: 824.822 | Scope 1+2+3: 92 | Scope 1+2+3: 99 |
| Climate Risk policy | PAI 4: Exposure to companies active in the fossil fuel sector | Share of investments in companies active in the fossil fuel sector (% of AuM) | 5.85 | 92 | 100 |
| Climate Risk policy (engagement only) | PAI 5: Share of non- renewable energy consumption and production | Share of non- renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%) | Energy Consumption: 54.16 Energy Production: 59.89 | Energy Consumption: 91 Energy Production: 2 | Energy Consumption: 99 Energy Production: 2 |
| Ecosystem protection & Deforestation policy | PAI 7: Activities negatively affecting biodiversity- sensitive areas | Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect | 38.7 | 39 | 42 |

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Source: S&P Trucost, 2024

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

N.B.: PAIs are reported based on an average of the impacts at each end of quarter of the reference period where data is available.

Figures disclosed on PAI indicators can either be based on the "current value of all investments" as defined by the Regulation, or on "eligible assets with available data only" where relevant. For the purpose of this document, "eligible assets with available data only" refers to all investments (i.e., investee companies, or sovereign and supranational, or real estate assets, depending on the PAI), excluding derivatives, cash and cash equivalent and eligible assets without available data. "Eligible assets without available data" refers to assets that have insufficient data and/or low data quality for a specific investment. The attention of the recipient is drawn to the fact that for some specific PAIs (i.e., PAIs which are relative i) to investee companies' revenue or ii) to non-monetary units such as physical flows), the calculation is rebased on eligible assets with available data only for data quality and comparability purposes. Such exclusion at the denominator is reflected and disclosed through the coverage ratios for the relevant indicators: the coverage disclosed reflects the proportion of eligible assets for which data is available and provided in this document; in addition, to ensure full transparency on the scope of assets where PAIs are disclosed, the coverage based on the current value of all investments is also disclosed.

| Reported PAI indicators based on the current value of all investments | Reported PAI indicators based on eligible assets, excluding eligible assets with no available data |
|---|--|
| PAI indicators 2, 4, 7, 10, 11 and 14 | PAI indicators 3 and 6 |

N.B.: PAI indicators 1 and 16 are not based neither on any of these two approaches as being PAIs in absolute values (noting that the PAI 16 is also relative to the number of invested countries in addition to the absolute value number), i.e., having no denominator in their formula.

More details on our methodologies to account and disclose PAIs are available in AXA IM ESG Methodologies Handbook available on AXA IM website: https://www.axa-im.com/our-policies-and-reports

What were the top investments of this financial product?

The top investments of the Financial Product (based on the NACE classification's divisions: NACE level 2) are detailed below:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/01/2024-31/12/2024

| Largest investments | Sector (NACE level 2) | % Assets | Country |
|---|--|----------|---------|
| MICROSOFT CORP XNGS USD | Publishing activities | 4.15% | US |

The portfolio proportions of investments presented above are an average over the reference period.

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The actual asset allocation has been reported based on an average of the data available at end of each quarter of the reference period.

Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

In which economic sectors were the investments made?

Financial product's investments were made in the economic sectors (based on NACE level 2) detailed below:

| Top sector (NACE level 2) | Proportion |
|--|------------|
| Manufacture of computer, electronic and optical products | 13% |
| Publishing activities | 10.83% |
| Manufacture of machinery and equipment n.e.c. | 8.67% |
| Information service activities | 7.96% |
| Financial service activities, except insurance and pension funding | 7.4% |
| Activities auxiliary to financial services and insurance activities | 6.14% |
| Retail trade, except of motor vehicles and motorcycles | 4.64% |
| Manufacture of basic pharmaceutical products and pharmaceutical preparations | 4.24% |
| Public administration and defence, compulsory social security | 3.45% |

| Manufacture of electrical equipment | 3.29% |
|--|-------|
| Insurance, reinsurance and pension funding, except compulsory social security | 3.26% |
| Manufacture of chemicals and chemical products | 2.93% |
| Electricity, gas, steam and air conditioning supply | 2.82% |
| Other manufacturing | 2.8% |
| Other | 2.58% |
| Manufacture of paper and paper products | 2.32% |
| Waste collection, treatment and disposal activities, materials recovery | 1.9% |
| Manufacture of leather and related products | 1.77% |
| Manufacture of coke and refined petroleum products | 1.21% |
| Real estate activities | 1.18% |
| Legal and accounting activities | 1.04% |
| Food and beverage service activities | 0.89% |
| Motion picture, video and television programme production, sound recording and music publishing acti | 0.81% |
| Manufacture of beverages | 0.79% |
| Manufacture of motor vehicles, trailers and semi-trailers | 0.77% |
| Other personal service activities | 0.72% |
| Manufacture of food products | 0.7% |
| Telecommunications | 0.53% |
| Wholesale trade, except of motor vehicles and motorcycles | 0.52% |
| Manufacture of other non-metallic mineral products | 0.51% |
| Manufacture of rubber and plastic products | 0.22% |
| Scientific research and development | 0.1% |

The portfolio proportions of investments presented above are an average over the reference period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product took into consideration the criteria of the EU Taxonomy environmental objectives, and the "do not significantly harm" principles. It is invested in activities aligned with the objectives of the EU Taxonomy. The Taxonomy alignment of the Financial Product has been provided by an external data provider and have been consolidated at portfolio level by AXA IM. Nevertheless, it has not been subject to an audit or a review by a third party. The Taxonomy alignment of the Financial Product has been provided by an external data provider and have been consolidated to the portfolio level by AXA IM. Nevertheless, it has not been subject to an audit or a review by a third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?3

| □Yes | |
|-----------------|---------------------|
| ☐ In fossil gas | ☐ In nuclear energy |
| ⊠No | |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

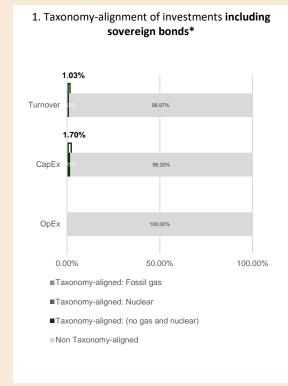

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

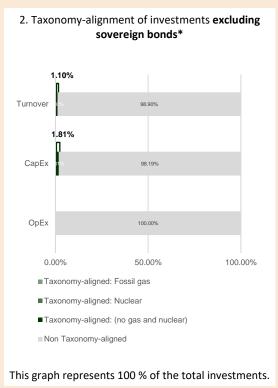

³ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The Financial Product has invested 0% of its Net Asset Value in transitional activities and 0% of its Net Asset Value in enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

| Percentage of EU Taxonomy-aligned investments | | | | | | |
|---|-------|-------|-------|--|--|--|
| 2024 2023 2022 | | | | | | |
| Revenue-based | 1.03% | 0.00% | 0.00% | | | |
| CapEx-based | 1.70% | 0.00% | 0.00% | | | |
| OpEx-based | 0.00% | 0.00% | 0.00% | | | |

Source: AXA IM, based on S&P Trucost, 2024

investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 34.68% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 33.43% of sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining "Other" investments represented 4.93% of the Financial Product's Net Asset Value.

The "other" assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments, and;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria
 described in this appendix. Such assets may be transferable securities such as equity or debt instruments,
 derivatives investments and investment collective schemes that do not promote environmental or social
 characteristics and that are used to attain the financial objective of the Financial Product and / or for
 diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all "other" assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the Financial Product continued to apply all AXA IM exclusion policies, for which the exclusion criteria were updated - for the most recent updates - in 2023, but which exclusion lists were updated in 2024. More details on AXA IM exclusion policies are available under the following link: Sustainability Policies and Reports | AXA IM Corporate

How did this financial product perform compared to the reference benchmark?

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators
measure how the environmental

or social characteristics

product are attained.

promoted by the financial

Product Name: Delegio Privilege Balanced Fund **Legal Entity Identifier:** 213800DSMMX3W2SLPJ75 (the "Financial Product")

Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective? | | | | | |
|---|---|--|--|--|--|
| •• □ YES | ● | | | | |
| It made sustainable investments with an environmental objective:% | It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 61.84 % of sustainable investments | | | | |
| in economic activities that qualify as environmentally sustainable under the EU Taxonomy | with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy | | | | |
| in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | | | | |
| | with a social objective | | | | |
| It made sustainable investments with a social objective:% | It promoted E/S characteristics, but did not make any sustainable investments | | | | |

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil & gas activities
- · Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of
 international norms and standards such as the United Nations Global Compact Principles, International Labor
 Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and
 ESG standards have been applied bindingly at all times during the reference period
- Protection of human rights avoiding investing in debt instruments issued by countries where the worst forms of human right violations are observed.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

| Sustainability KPI Name | Value | Coverage |
|-------------------------|-----------|----------|
| ESG Score | 7.39 / 10 | 99.14 % |

N.B.: KPIs and benchmarks are reported based on an average of the data available at each end of month of the reference period.

... And compared to previous periods?

| Sustainability KPI Name | Year | Value | Coverage |
|-------------------------|------|-------|----------|
|-------------------------|------|-------|----------|

| ESG Score | 2023 | 7.42 / 10 | 99.75 % |
|-----------|------|-----------|---------|
| ESG Score | 2022 | 7.19 / 10 | 99.63 % |

N.B.: While Sustainability KPIs are reported based on an average of the data available at each end of quarter of the reference period, for technical reasons benchmarks are reported based on end of year data only. Therefore, the comparison should not be taken as such at face value and should not be interpretated as a breach of the binding elements disclosed into the Financial Product's legal documentation, as figures disclosed for the benchmark are not based on the same accounting approach than for those disclosed for the Financial Product.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

- 1.UN Sustainable Development Goals alignment (SDG) of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:
- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2.Integration of issuers engaged in a solid Transition Pathway consistently with the European Commission's ambition to help fund the transition to a 1.5°c world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

3.Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product took into consideration the criteria of the EU Taxonomy environmental objectives, and the "do not significantly harm" principles. It is invested in activities aligned with the objectives of the EU Taxonomy. The Taxonomy alignment of the Financial Product has been provided by an external data provider and have been consolidated at portfolio level by AXA IM. Nevertheless, it has not been subject to an audit or a review by a third party.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a
 quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly
 contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively
 overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

-----: How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through (i) AXA IM sectorial exclusion policies and AXA IM ESG standards that have been applied bindingly at all times by the Financial Product, as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under -5 on any SDG (on a scale from +10 corresponding to 'significant contributing impact' to -10 corresponding to 'significant obstructing impact'), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies | PAI indicator | Units | Measurement | Coverage in % based on Total AUM | Coverage in % based on eligible assets |
|---|--|--|--|--|--|
| Climata Dial, nalinu | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes of carbon dioxide equivalents (tCO2e) | Scope 1: 9637.687 Scope 2: 2252.565 Scope 3: 76202.875 Scope 1+2: 11890.252 Scope 1+2+3: 87949.992 | Scope 1: 70 Scope 2: 70 Scope 3: 69 Scope 1+2: 70 Scope 1+2+3: 69 | Scope 1: 87 Scope 2: 87 Scope 3: 86 Scope 1+2: 87 Scope 1+2+3: 86 |

| Ecosystem Protection & Deforestation policy | PAI 7: Activities negatively affecting biodiversity-sensitive areas | Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas (% of AuM) | 30.69 | 31 | 38 |
| SDG no significantly negative score | PAI 8: Emissions to water | Tonnes of emissions to water generated by investee companies per million EUR invested, expressed as a | 0.011 | 21 | 26 |

¹ The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively. Not all high impact climate sectors are targeted by the exclusion policy for the time being.

| | | weighted average (t/€M) | | | |
|--|---|--|-------|----|----|
| SDG no significantly negative score | PAI 9: Hazardous waste and radioactive waste ratio | Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average (t/€M) | 3.258 | 39 | 49 |

Social and Governance:

| Relevant AXA IM | PAI indicator | Units | Measurement | Coverage in % based | Coverage in % based |
|--|---|---|---------------|---------------------|---------------------|
| policies | PAI IIIUICATOI | | ivieasurement | on Total AUM | on eligible assets |
| ESG standards policy: violation of international norms and standards | PAI 10: Violation of UN Global Compact principles & OECD Guidelines for Multinational Enterprises | Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (% of AuM) | 0.0% | 81 | 100 |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) ² | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for Multinational Enterprises | Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance /complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (% of AuM) | 28.68 % | 75 | 93 |
| SDG no significantly negative score | PAI 12: Unadjusted gender pay gap | Average unadjusted gender pay gap of investee companies (%) | 15.32% | 71 | 88 |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board gender diversity | Average ratio of female board members in investee companies, expressed as a percentage of all board members (%) | 36.4 | 76 | 94 |
| Controversial weapons policy | PAI 14: Exposure to controversial weapons | Share of investments in investee companies involved in the manufacture or selling of controversial weapons (% of AuM) | 0.0 | 81 | 100 |

For Sovereign and supranationals:

| Relevant AXA IM policies | PAI indicator | Units | Measurement | Coverage in % based on Total AUM | Coverage in % based on eligible assets |
|---|--|--|--|--|---|
| AXA IM ESG Standards policy, through the exclusion of investee countries with severe social violations Compliance black- list based on international and EU sanctions | PAI 16: Sovereign Investee countries subject to social violations | Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law | Absolute number: 1 Relative number: 2.62 | Absolute number: 16 Relative number: 16 | Absolute number: 100 Relative number: 100 |

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

² The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

.Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies:

| Relevant AXA IM policies | PAI indicator | Units | Measurement | Coverage in % based on Total AUM | Coverage in % based on eligible assets |
|--|---|--|---|---|---|
| Climate Risk policy Ecosystem protection & Deforestation policy | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023) | Metric tonnes of carbon dioxide equivalents (tCO2e) | Scope 1: 9637.687 Scope 2: 2252.565 Scope 3: 76202.875 Scope 1+2: 11890.252 Scope 1+2+3: | Scope 1: 70 Scope 2: 70 Scope 3: 69 Scope 1+2: 70 Scope 1+2+3: 69 | Scope 1: 87 Scope 2: 87 Scope 3: 86 Scope 1+2: 87 Scope 1+2+3: 86 |
| Climate Risk policy Ecosystem protection & Deforestation policy | PAI 2: Carbon Footprint | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/€M) | 87949.992 Scope 1+2: 36.969 Scope 1+2+3: 241.378 | Scope 1+2: 75 Scope 1+2+3: 69 | Scope 1+2: 93 Scope 1+2+3: 86 |
| Climate Risk policy Ecosystem protection & Deforestation policy | PAI 3: GHG intensity of investee companies | Metric tonnes of carbon dioxide equivalents per million euro of revenue (tCO2e/€M) | Scope 1+2+3: 983.118 | Scope 1+2+3: 75 | Scope 1+2+3: 93 |
| Climate Risk policy | PAI 4: Exposure to companies active in the fossil fuel sector | Share of investments in companies active in the fossil fuel sector (% of AuM) | 7.79 | 76 | 94 |
| Climate Risk policy (engagement only) | PAI 5: Share of non- renewable energy consumption and production | Share of non- renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%) | Energy Consumption: 54.5 Energy Production: 62.47 | Energy Consumption: 74 Energy Production: 3 | Energy Consumption: 92 Energy Production: 4 |
| Ecosystem protection & Deforestation policy | PAI 7: Activities negatively affecting biodiversity- sensitive areas | Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect | 30.69 | 31 | 38 |

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

N.B.: PAIs are reported based on an average of the impacts at each end of quarter of the reference period where data is available.

Figures disclosed on PAI indicators can either be based on the "current value of all investments" as defined by the Regulation, or on "eligible assets with available data only" where relevant. For the purpose of this document, "eligible assets with available data only" refers to all investments (i.e., investee companies, or sovereign and supranational, or real estate assets, depending on the PAI), excluding derivatives, cash and cash equivalent and eligible assets without available data. "Eligible assets without available data" refers to assets that have insufficient data and/or low data quality for a specific investment. The attention of the recipient is drawn to the fact that for some specific PAIs (i.e., PAIs which are relative i) to investee companies' revenue or ii) to non-monetary units such as physical flows), the calculation is rebased on eligible assets with available data only for data quality and comparability purposes. Such exclusion at the denominator is reflected and disclosed through the coverage ratios for the relevant indicators: the coverage disclosed reflects the proportion of eligible assets for which data is available and provided in this document; in addition, to ensure full transparency on the scope of assets where PAIs are disclosed, the coverage based on the current value of all investments is also disclosed.

| Reported PAI indicators based on the current value of all investments | Reported PAI indicators based on eligible assets, excluding eligible assets with no available data |
|---|--|
| PAI indicators 2, 4, 7, 10, 11 and 14 | PAI indicators 3 and 6 |

N.B.: PAI indicators 1 and 16 are not based neither on any of these two approaches as being PAIs in absolute values (noting that the PAI 16 is also relative to the number of invested countries in addition to the absolute value number), i.e., having no denominator in their formula.

More details on our methodologies to account and disclose PAIs are available in AXA IM ESG Methodologies Handbook available on AXA IM website: https://www.axa-im.com/our-policies-and-reports

What were the top investments of this financial product?

The top investments of the Financial Product (based on the NACE classification's divisions: NACE level 2) are detailed below:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/01/2024-31/12/2024

| Largest investments | Sector (NACE level 2) | % Assets | Country |
|---|---|----------|---------|
| AXA IM FIIS Europe Short Duration High Yield M Cap | Financial service activities, except insurance and pension funding | 2.3% | LU |
| MICROSOFT CORP XNGS USD | Publishing activities | 2.15% | US |
| AXA WF ACT Emerging Markets Short Duration Bonds L | Financial service activities, except insurance and pension funding | 1.99% | LU |
| ALPHABET INC-CL C XNGS USD | Information service activities | 1.82% | US |
| NVIDIA CORP XNGS USD | Manufacture of computer, electronic and optical products | 1.75% | US |
| AMAZON.COM INC XNGS USD | Retail trade, except of motor vehicles and motorcycles | 1.35% | US |

| SALESFORCE INC XNYS USD | Publishing activities | 0.79% | US |

The portfolio proportions of investments presented above are an average over the reference period.

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The actual asset allocation has been reported based on an average of the data available at end of each quarter of the reference period.

Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

In which economic sectors were the investments made?

Financial product's investments were made in the economic sectors (based on NACE level 2) detailed below:

| Top sector (NACE level 2) | Proportion |
|---|------------|
| Financial service activities, except insurance and pension funding | 19.74% |
| Public administration and defence, compulsory social security | 15.51% |
| Manufacture of computer, electronic and optical products | 6.75% |
| Electricity, gas, steam and air conditioning supply | 5.9% |
| Publishing activities | 5.62% |
| Manufacture of machinery and equipment n.e.c. | 4.72% |
| Activities auxiliary to financial services and insurance activities | 4.21% |
| Information service activities | 4.16% |
| Insurance, reinsurance and pension funding, except compulsory social security | 3.96% |

| Manufacture of basic pharmaceutical products and pharmaceutical preparations | 2.72% |
|--|-------|
| Real estate activities | 2.61% |
| Retail trade, except of motor vehicles and motorcycles | 2.48% |
| Telecommunications | 2.47% |
| Manufacture of electrical equipment | 2.33% |
| Manufacture of chemicals and chemical products | 1.76% |
| Other | 1.72% |
| Other manufacturing | 1.59% |
| Manufacture of paper and paper products | 1.35% |
| Warehousing and support activities for transportation | 1.22% |
| Manufacture of motor vehicles, trailers and semi-trailers | 1.22% |
| Manufacture of coke and refined petroleum products | 1.03% |
| Waste collection, treatment and disposal activities, materials recovery | 0.99% |
| Manufacture of leather and related products | 0.92% |
| Manufacture of food products | 0.77% |
| Manufacture of beverages | 0.66% |
| Legal and accounting activities | 0.58% |
| Food and beverage service activities | 0.52% |
| Manufacture of other non-metallic mineral products | 0.43% |
| Motion picture, video and television programme production, sound recording and music publishing acti | 0.42% |
| Other personal service activities | 0.37% |
| Land transport and transport via pipelines | 0.27% |
| Wholesale trade, except of motor vehicles and motorcycles | 0.27% |
| Manufacture of rubber and plastic products | 0.2% |
| Scientific research and development | 0.13% |
| Manufacture of other transport equipment | 0.11% |
| Programming and broadcasting activities | 0.08% |
| Air transport | 0.06% |
| Travel agency, tour operator reservation service and related activities | 0.06% |
| Manufacture of wearing apparel | 0.05% |
| Water collection, treatment and supply | 0.04% |
| | |

The portfolio proportions of investments presented above are an average over the reference period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product took into consideration the criteria of the EU Taxonomy environmental objectives, and the "do not significantly harm" principles. It is invested in activities aligned with the objectives of the EU Taxonomy. The Taxonomy alignment of the Financial Product has been provided by an external data provider and have been consolidated at portfolio level by AXA IM. Nevertheless, it has not been subject to an audit or a review by a third party. The Taxonomy alignment of the Financial Product has been provided by an external data provider and have been consolidated to the portfolio level by AXA IM. Nevertheless, it has not been subject to an audit or a review by a third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?3

| | • |
|-----------------|-----------------------------|
| □Yes | |
| ☐ In fossil gas | \square In nuclear energy |
| ⊠No | |

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

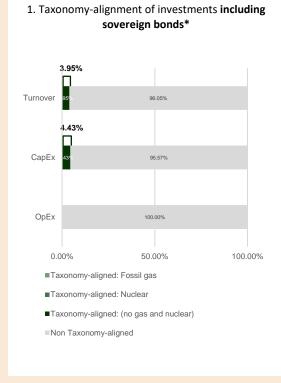

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

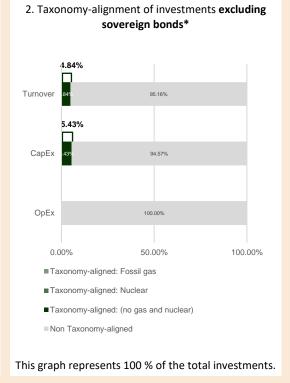

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

³ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

The Financial Product has invested 0% of its Net Asset Value in transitional activities and 0% of its Net Asset Value in enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

| Percentage of EU Taxonomy-aligned investments | | | | |
|---|-------|-------|-------|--|
| | 2024 | 2023 | 2022 | |
| Revenue-based | 3.95% | 0.00% | 0.00% | |
| CapEx-based | 4.43% | 0.00% | 0.00% | |
| OpEx-based | 0.00% | 0.00% | 0.00% | |

Source: AXA IM, based on S&P Trucost, 2024

2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 30.25% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 27.63% of sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining "Other" investments represented 3.8% of the Financial Product's Net Asset Value.

The "other" assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments, and;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be transferable securities such as equity or debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all "other" assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the Financial Product continued to apply all AXA IM exclusion policies, for which the exclusion criteria were updated - for the most recent updates - in 2023, but which exclusion lists were updated in 2024. More details on AXA IM exclusion policies are available under the following link: <u>Sustainability Policies and Reports | AXA IM Corporate</u>

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators
measure how the environmental

or social characteristics

product are attained.

promoted by the financial

Product Name: Delegio Privilege Cautious Fund **Legal Entity Identifier:** 213800PYDQ6GHQDSRO08 (the "Financial Product")

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? ☐ YES **⋈** NO It made sustainable investments with an It promoted Environmental/Social (E/S) characteristics and while it did not have as its environmental objective: ____% objective a sustainable investment, it had a proportion of 60.64 % of sustainable investments in economic activities that qualify as with an environmental objective in economic environmentally sustainable under the EU activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as with an environmental objective in economic environmentally sustainable under the EU activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective It made sustainable investments with a social It promoted E/S characteristics, but did not make objective: ___% any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil & gas activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of
 international norms and standards such as the United Nations Global Compact Principles, International Labor
 Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and
 ESG standards have been applied bindingly at all times during the reference period
- Protection of human rights avoiding investing in debt instruments issued by countries where the worst forms of human right violations are observed.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

| Sustainability KPI Name | Value | Coverage |
|-------------------------|-----------|----------|
| ESG Score | 7.45 / 10 | 99.14 % |

N.B.: KPIs and benchmarks are reported based on an average of the data available at each end of month of the reference period.

... And compared to previous periods?

| Sustainability KPI Name | Year | Value | Coverage |
|-------------------------|------|-------|----------|
|-------------------------|------|-------|----------|

| ESG Score | 2023 | 7.55 / 10 | 99.78 % |
|-----------|------|-----------|---------|
| ESG Score | 2022 | 7.2 / 10 | 99.66 % |

N.B.: While Sustainability KPIs are reported based on an average of the data available at each end of quarter of the reference period, for technical reasons benchmarks are reported based on end of year data only. Therefore, the comparison should not be taken as such at face value and should not be interpretated as a breach of the binding elements disclosed into the Financial Product's legal documentation, as figures disclosed for the benchmark are not based on the same accounting approach than for those disclosed for the Financial Product.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

- 1.UN Sustainable Development Goals alignment (SDG) of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:
- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2.Integration of issuers engaged in a solid Transition Pathway consistently with the European Commission's ambition to help fund the transition to a 1.5°c world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

3.Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product took into consideration the criteria of the EU Taxonomy environmental objectives, and the "do not significantly harm" principles. It is invested in activities aligned with the objectives of the EU Taxonomy. The Taxonomy alignment of the Financial Product has been provided by an external data provider and have been consolidated at portfolio level by AXA IM. Nevertheless, it has not been subject to an audit or a review by a third party.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a
 quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly
 contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively
 overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

-----: How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through (i) AXA IM sectorial exclusion policies and AXA IM ESG standards that have been applied bindingly at all times by the Financial Product, as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to 'significant contributing impact' to – 10 corresponding to 'significant obstructing impact'), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies | PAI indicator | Units | Measurement | Coverage in % based on Total AUM | Coverage in % based on eligible assets |
|--|--|--|---|---|---|

| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) ² | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for Multinational Enterprises | Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance /complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (% of AuM) | 19.73 % | 66 | 91 |
| SDG no significantly negative score | PAI 12: Unadjusted gender pay gap | Average unadjusted gender pay gap of investee companies (%) | 14.66% | 60 | 83 |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board gender diversity | Average ratio of female board members in investee companies, expressed as a percentage of all board members (%) | 37.63 | 66 | 92 |
| Controversial weapons policy | PAI 14: Exposure to controversial weapons | Share of investments in investee companies involved in the manufacture or selling of controversial weapons (% of AuM) | 0.0 | 72 | 100 |

For Sovereign and supranationals:

| Relevant AXA IM policies | PAI indicator | Units | Measurement | Coverage in % based on Total AUM | Coverage in % based on eligible assets |
|---|--|--|--|--|---|
| AXA IM ESG Standards policy, through the exclusion of investee countries with severe social violations Compliance black- list based on international and EU sanctions | PAI 16: Sovereign Investee countries subject to social violations | Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law | Absolute number: 1 Relative number: 2.58 | Absolute number: 26 Relative number: 26 | Absolute number: 100 Relative number: 100 |

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

² The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

.Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies:

| Relevant AXA IM policies | PAI indicator | Units | Measurement | Coverage in % based on Total AUM | Coverage in % based on eligible assets |
|--|---|---|---|---|---|
| Climate Risk policy Ecosystem protection & Deforestation policy | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023) | Metric tonnes of carbon dioxide equivalents (tCO2e) | Scope 1: 2187.305 Scope 2: 447.557 Scope 3: 17697.658 Scope 1+2: 2634.862 Scope 1+2+3: 20244.227 | Scope 1: 62 Scope 2: 62 Scope 3: 61 Scope 1+2: 62 Scope 1+2+3: 61 | Scope 1: 86 Scope 2: 86 Scope 3: 84 Scope 1+2: 86 Scope 1+2+3: 84 |
| Climate Risk policy Ecosystem protection & Deforestation policy | PAI 2: Carbon Footprint | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/€M) | Scope 1+2: 40.924 Scope 1+2+3: 244.694 | Scope 1+2: 65 Scope 1+2+3: 61 | Scope 1+2: 90 Scope 1+2+3: 84 |
| Climate Risk policy Ecosystem protection & Deforestation policy | PAI 3: GHG intensity of investee companies | Metric tonnes of carbon dioxide equivalents per million euro of revenue (tCO2e/€M) | Scope 1+2+3: 912.621 | Scope 1+2+3: 65 | Scope 1+2+3: 90 |
| Climate Risk policy | PAI 4: Exposure to companies active in the fossil fuel sector | Share of investments in companies active in the fossil fuel sector (% of AuM) | 8.25 | 66 | 92 |
| Climate Risk policy (engagement only) | PAI 5: Share of non- renewable energy consumption and production | Share of non- renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%) | Energy Consumption: 53.14 Energy Production: 64.33 | Energy Consumption: 65 Energy Production: 4 | Energy Consumption: 90 Energy Production: 5 |
| Ecosystem protection & Deforestation policy | PAI 7: Activities negatively affecting biodiversity- sensitive areas | Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect | 25.57 | 26 | 35 |

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Source: S&P Trucost, 2024

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

N.B.: PAIs are reported based on an average of the impacts at each end of quarter of the reference period where data is available.

Figures disclosed on PAI indicators can either be based on the "current value of all investments" as defined by the Regulation, or on "eligible assets with available data only" where relevant. For the purpose of this document, "eligible assets with available data only" refers to all investments (i.e., investee companies, or sovereign and supranational, or real estate assets, depending on the PAI), excluding derivatives, cash and cash equivalent and eligible assets without available data. "Eligible assets without available data" refers to assets that have insufficient data and/or low data quality for a specific investment. The attention of the recipient is drawn to the fact that for some specific PAIs (i.e., PAIs which are relative i) to investee companies' revenue or ii) to non-monetary units such as physical flows), the calculation is rebased on eligible assets with available data only for data quality and comparability purposes. Such exclusion at the denominator is reflected and disclosed through the coverage ratios for the relevant indicators: the coverage disclosed reflects the proportion of eligible assets for which data is available and provided in this document; in addition, to ensure full transparency on the scope of assets where PAIs are disclosed, the coverage based on the current value of all investments is also disclosed.

| Reported PAI indicators based on the current value of all investments | Reported PAI indicators based on eligible assets, excluding eligible assets with no available data |
|---|--|
| PAI indicators 2, 4, 7, 10, 11 and 14 | PAI indicators 3 and 6 |

N.B.: PAI indicators 1 and 16 are not based neither on any of these two approaches as being PAIs in absolute values (noting that the PAI 16 is also relative to the number of invested countries in addition to the absolute value number), i.e., having no denominator in their formula.

More details on our methodologies to account and disclose PAIs are available in AXA IM ESG Methodologies Handbook available on AXA IM website: https://www.axa-im.com/our-policies-and-reports

What were the top investments of this financial product?

The top investments of the Financial Product (based on the NACE classification's divisions: NACE level 2) are detailed below:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/01/2024-31/12/2024

| Largest investments | Sector (NACE level 2) | % Assets | Country |
|---|--|----------|---------|
| AXA IM FIIS Europe Short Duration High Yield M Cap | Financial service activities, except insurance and pension funding | 3.58% | LU |
| AXA WF ACT Emerging Markets Short Duration Bonds L | Financial service activities, except insurance and pension funding | 2.9% | LU |

 $\label{thm:controlled} The \ portfolio \ proportions \ of \ investments \ presented \ above \ are \ an \ average \ over \ the \ reference \ period.$

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The actual asset allocation has been reported based on an average of the data available at end of each quarter of the reference period.

Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

In which economic sectors were the investments made?

Financial product's investments were made in the economic sectors (based on NACE level 2) detailed below:

| Top sector (NACE level 2) | Proportion |
|---|------------|
| Public administration and defence, compulsory social security | 24.77% |
| Financial service activities, except insurance and pension funding | 24.41% |
| Electricity, gas, steam and air conditioning supply | 7.28% |
| Insurance, reinsurance and pension funding, except compulsory social security | 4.37% |
| Manufacture of computer, electronic and optical products | 3.75% |
| Real estate activities | 3.37% |
| Publishing activities | 3.26% |
| Manufacture of machinery and equipment n.e.c. | 2.91% |
| Activities auxiliary to financial services and insurance activities | 2.68% |

| Telecommunications | 2.65% |
|--|-------|
| Information service activities | 2.38% |
| Manufacture of basic pharmaceutical products and pharmaceutical preparations | 1.8% |
| Warehousing and support activities for transportation | 1.75% |
| Manufacture of motor vehicles, trailers and semi-trailers | 1.65% |
| Retail trade, except of motor vehicles and motorcycles | 1.53% |
| Other manufacturing | 1.22% |
| Manufacture of electrical equipment | 1.2% |
| Manufacture of chemicals and chemical products | 1.17% |
| Manufacture of food products | 1.06% |
| Other | 0.87% |
| Manufacture of paper and paper products | 0.74% |
| Manufacture of coke and refined petroleum products | 0.59% |
| Waste collection, treatment and disposal activities, materials recovery | 0.55% |
| Manufacture of leather and related products | 0.51% |
| Food and beverage service activities | 0.44% |
| Scientific research and development | 0.44% |
| Manufacture of other non-metallic mineral products | 0.4% |
| Legal and accounting activities | 0.34% |
| Manufacture of beverages | 0.32% |
| Land transport and transport via pipelines | 0.25% |
| Manufacture of rubber and plastic products | 0.25% |
| Motion picture, video and television programme production, sound recording and music publishing acti | 0.23% |
| Other personal service activities | 0.21% |
| Air transport | 0.17% |
| Wholesale trade, except of motor vehicles and motorcycles | 0.15% |
| Manufacture of other transport equipment | 0.13% |
| Travel agency, tour operator reservation service and related activities | 0.12% |
| Water collection, treatment and supply | 0.09% |
| | |

The portfolio proportions of investments presented above are an average over the reference period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product took into consideration the criteria of the EU Taxonomy environmental objectives, and the "do not significantly harm" principles. It is invested in activities aligned with the objectives of the EU Taxonomy. The Taxonomy alignment of the Financial Product has been provided by an external data provider and have been consolidated at portfolio level by AXA IM. Nevertheless, it has not been subject to an audit or a review by a third party. The Taxonomy alignment of the Financial Product has been provided by an external data provider and have been consolidated to the portfolio level by AXA IM. Nevertheless, it has not been subject to an audit or a review by a third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

| □Yes | • |
|-----------------|---------------------|
| ☐ In fossil gas | ☐ In nuclear energy |
| ⊠No | |

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

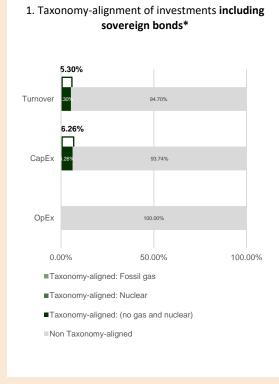

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

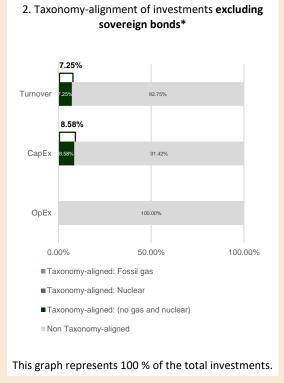

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

³ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

The Financial Product has invested 0% of its Net Asset Value in transitional activities and 0% of its Net Asset Value in enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

| Percentage of EU Taxonomy-aligned investments | | | | | | |
|---|-------|-------|-------|--|--|--|
| 2024 2023 2022 | | | | | | |
| Revenue-based | 5.30% | 0.00% | 0.00% | | | |
| CapEx-based | 6.26% | 0.00% | 0.00% | | | |
| OpEx-based | 0.00% | 0.00% | 0.00% | | | |

Source: AXA IM, based on S&P Trucost, 2024

2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 31.6% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 23.74% of sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining "Other" investments represented 2.28% of the Financial Product's Net Asset Value.

The "other" assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments, and;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be transferable securities such as equity or debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all "other" assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the Financial Product continued to apply all AXA IM exclusion policies, for which the exclusion criteria were updated - for the most recent updates - in 2023, but which exclusion lists were updated in 2024. More details on AXA IM exclusion policies are available under the following link: <u>Sustainability Policies and Reports | AXA IM Corporate</u>

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators
measure how the environmental

or social characteristics

product are attained.

promoted by the financial

Product Name: Delegio Privilege Entrepreneurial **Legal Entity Identifier:** 213800EOPYAC4A8N8826 Fund (the "Financial Product")

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? ☐ YES **⋈** NO It made sustainable investments with an It promoted Environmental/Social (E/S) characteristics and while it did not have as its environmental objective: ____% objective a sustainable investment, it had a proportion of 65.23 % of sustainable investments in economic activities that qualify as with an environmental objective in economic environmentally sustainable under the EU activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as with an environmental objective in economic environmentally sustainable under the EU activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective It made sustainable investments with a social It promoted E/S characteristics, but did not make objective: ___% any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil & gas activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of
 international norms and standards such as the United Nations Global Compact Principles, International Labor
 Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and
 ESG standards have been applied bindingly at all times during the reference period
- Protection of human rights avoiding investing in debt instruments issued by countries where the worst forms of human right violations are observed.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

| Sustainability KPI Name | Value | Coverage |
|-------------------------|-----------|----------|
| ESG Score | 7.42 / 10 | 99.14 % |

N.B.: KPIs and benchmarks are reported based on an average of the data available at each end of month of the reference period.

... And compared to previous periods?

| Sustainability KPI Name | Year | Value | Coverage |
|-------------------------|------|-------|----------|
|-------------------------|------|-------|----------|

| ESG Score | 2023 | 7.41 / 10 | 99.86 % |
|-----------|------|-----------|---------|
| ESG Score | 2022 | 7.13 / 10 | 99.81 % |

N.B.: While Sustainability KPIs are reported based on an average of the data available at each end of quarter of the reference period, for technical reasons benchmarks are reported based on end of year data only. Therefore, the comparison should not be taken as such at face value and should not be interpretated as a breach of the binding elements disclosed into the Financial Product's legal documentation, as figures disclosed for the benchmark are not based on the same accounting approach than for those disclosed for the Financial Product.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

- 1.UN Sustainable Development Goals alignment (SDG) of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:
- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2.Integration of issuers engaged in a solid Transition Pathway consistently with the European Commission's ambition to help fund the transition to a 1.5°c world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

3.Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product took into consideration the criteria of the EU Taxonomy environmental objectives, and the "do not significantly harm" principles. It is invested in activities aligned with the objectives of the EU Taxonomy. The Taxonomy alignment of the Financial Product has been provided by an external data provider and have been consolidated at portfolio level by AXA IM. Nevertheless, it has not been subject to an audit or a review by a third party.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a
 quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly
 contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively
 overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

-----: How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through (i) AXA IM sectorial exclusion policies and AXA IM ESG standards that have been applied bindingly at all times by the Financial Product, as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to 'significant contributing impact' to – 10 corresponding to 'significant obstructing impact'), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies | PAI indicator | Units | Measurement | Coverage in % based on Total AUM | Coverage in % based on eligible assets |

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

² The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

.Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Relevant AXA IM

How did this financial product consider principal adverse impacts on sustainability factors?

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies:

| policies | PAI indicator | Units | Measurement | on Total AUM | on eligible assets |
|--|---|--|---|---|---|
| Climate Risk policy Ecosystem protection & Deforestation policy | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023) | Metric tonnes of carbon dioxide equivalents (tCO2e) | Scope 1: 6234.493 Scope 2: 1723.117 Scope 3: 64360.602 Scope 1+2: 7957.61 Scope 1+2+3: 72311.234 | Scope 1: 76 Scope 2: 76 Scope 3: 75 Scope 1+2: 76 Scope 1+2+3: 75 | Scope 1: 88 Scope 2: 88 Scope 3: 87 Scope 1+2: 88 Scope 1+2+3: 87 |
| Climate Risk policy Ecosystem protection & Deforestation policy | PAI 2: Carbon Footprint | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/€M) | Scope 1+2: 29.836 Scope 1+2+3: 247.694 | Scope 1+2: 83 Scope 1+2+3: 75 | Scope 1+2: 96 Scope 1+2+3: 87 |
| Climate Risk policy Ecosystem protection & Deforestation policy | PAI 3: GHG intensity of investee companies | Metric tonnes of carbon dioxide equivalents per million euro of revenue (tCO2e/€M) | Scope 1+2+3: 884.352 | Scope 1+2+3: 83 | Scope 1+2+3: 96 |
| Climate Risk policy | PAI 4: Exposure to companies active in the fossil fuel sector | Share of investments in companies active in the fossil fuel sector (% of AuM) | 6.7 | 84 | 97 |
| Climate Risk policy (engagement only) | PAI 5: Share of non- renewable energy consumption and production | Share of non- renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%) | Energy Consumption: 53.65 Energy Production: 63.3 | Energy Consumption: 82 Energy Production: 2 | Energy Consumption: 95 Energy Production: 3 |

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

N.B.: PAIs are reported based on an average of the impacts at each end of quarter of the reference period where data is available.

Figures disclosed on PAI indicators can either be based on the "current value of all investments" as defined by the Regulation, or on "eligible assets with available data only" where relevant. For the purpose of this document, "eligible assets with available data only" refers to all investments (i.e., investee companies, or sovereign and supranational, or real estate assets, depending on the PAI), excluding derivatives, cash and cash equivalent and eligible assets without available data. "Eligible assets without available data" refers to assets that have insufficient data and/or low data quality for a specific investment. The attention of the recipient is drawn to the fact that for some specific PAIs (i.e., PAIs which are relative i) to investee companies' revenue or ii) to non-monetary units such as physical flows), the calculation is rebased on eligible assets with available data only for data quality and comparability purposes. Such exclusion at the denominator is reflected and disclosed through the coverage ratios for the relevant indicators: the coverage disclosed reflects the proportion of eligible assets for which data is available and provided in this document; in addition, to ensure full transparency on the scope of assets where PAIs are disclosed, the coverage based on the current value of all investments is also disclosed.

| Reported PAI indicators based on the current value of all investments | Reported PAI indicators based on eligible assets, excluding eligible assets with no available data | | |
|---|--|--|--|
| PAI indicators 2, 4, 7, 10, 11 and 14 | PAI indicators 3 and 6 | | |

N.B.: PAI indicators 1 and 16 are not based neither on any of these two approaches as being PAIs in absolute values (noting that the PAI 16 is also relative to the number of invested countries in addition to the absolute value number), i.e., having no denominator in their formula.

More details on our methodologies to account and disclose PAIs are available in AXA IM ESG Methodologies Handbook available on AXA IM website: https://www.axa-im.com/our-policies-and-reports

What were the top investments of this financial product?

The top investments of the Financial Product (based on the NACE classification's divisions: NACE level 2) are detailed below:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/01/2024-31/12/2024

| Largest investments | Sector (NACE level 2) | % Assets | Country |
|---|--|----------|---------|
| MICROSOFT CORP XNGS USD | Publishing activities | 3.11% | US |

The portfolio proportions of investments presented above are an average over the reference period.

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The actual asset allocation has been reported based on an average of the data available at end of each quarter of the reference period.

Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

In which economic sectors were the investments made?

Financial product's investments were made in the economic sectors (based on NACE level 2) detailed below:

| Top sector (NACE level 2) | Proportion |
|---|------------|
| Financial service activities, except insurance and pension funding | 14.4% |
| Manufacture of computer, electronic and optical products | 9.74% |
| Public administration and defence, compulsory social security | 9.66% |
| Publishing activities | 8.15% |
| Manufacture of machinery and equipment n.e.c. | 6.63% |
| Information service activities | 5.99% |
| Activities auxiliary to financial services and insurance activities | 4.76% |
| Electricity, gas, steam and air conditioning supply | 4.41% |
| Insurance, reinsurance and pension funding, except compulsory social security | 3.69% |

| Manufacture of basic pharmaceutical products and pharmaceutical preparations | 3.52% |
|--|-------|
| Retail trade, except of motor vehicles and motorcycles | 3.51% |
| Manufacture of electrical equipment | 2.86% |
| Manufacture of chemicals and chemical products | 2.23% |
| Other manufacturing | 2.18% |
| Real estate activities | 2.04% |
| Manufacture of paper and paper products | 1.81% |
| Other | 1.66% |
| Waste collection, treatment and disposal activities, materials recovery | 1.42% |
| Telecommunications | 1.37% |
| Manufacture of leather and related products | 1.32% |
| Manufacture of coke and refined petroleum products | 1.26% |
| Manufacture of motor vehicles, trailers and semi-trailers | 1.01% |
| Manufacture of food products | 0.79% |
| Legal and accounting activities | 0.79% |
| Warehousing and support activities for transportation | 0.75% |
| Food and beverage service activities | 0.74% |
| Manufacture of beverages | 0.62% |
| Motion picture, video and television programme production, sound recording and music publishing acti | 0.6% |
| Other personal service activities | 0.54% |
| Manufacture of other non-metallic mineral products | 0.46% |
| Wholesale trade, except of motor vehicles and motorcycles | 0.39% |
| Manufacture of rubber and plastic products | 0.22% |
| Land transport and transport via pipelines | 0.13% |
| Scientific research and development | 0.13% |
| Manufacture of other transport equipment | 0.07% |
| Air transport | 0.05% |
| Water collection, treatment and supply | 0.04% |
| Travel agency, tour operator reservation service and related activities | 0.03% |
| Advertising and market research | 0.03% |
| | |

The portfolio proportions of investments presented above are an average over the reference period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product took into consideration the criteria of the EU Taxonomy environmental objectives, and the "do not significantly harm" principles. It is invested in activities aligned with the objectives of the EU Taxonomy. The Taxonomy alignment of the Financial Product has been provided by an external data provider and have been consolidated at portfolio level by AXA IM. Nevertheless, it has not been subject to an audit or a review by a third party. The Taxonomy alignment of the Financial Product has been provided by an external data provider and have been consolidated to the portfolio level by AXA IM. Nevertheless, it has not been subject to an audit or a review by a third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

| □Yes | • |
|-----------------|---------------------|
| ☐ In fossil gas | ☐ In nuclear energy |
| ⊠No | |

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

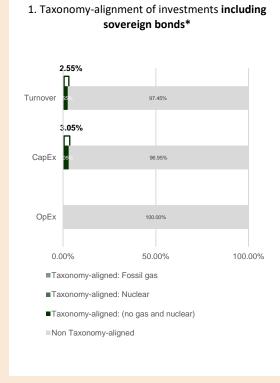

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

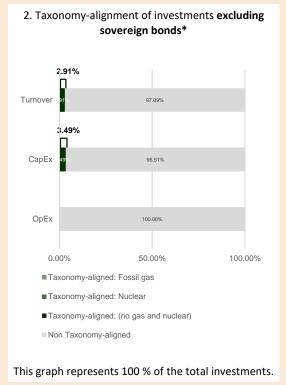

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

³ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

The Financial Product has invested 0% of its Net Asset Value in transitional activities and 0% of its Net Asset Value in enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

| Percentage of EU Taxonomy-aligned investments | | | | | | |
|---|-------|-------|-------|--|--|--|
| 2024 2023 2022 | | | | | | |
| Revenue-based | 2.55% | 0.00% | 0.00% | | | |
| CapEx-based | 3.05% | 0.00% | 0.00% | | | |
| OpEx-based | 0.00% | 0.00% | 0.00% | | | |

Source: AXA IM, based on S&P Trucost, 2024

are sustainable

investments with an environmental objective that **do**

not take into account the

under Regulation (EU)

2020/852.

criteria for environmentally sustainable economic activities

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 32.76% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 29.92% of sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining "Other" investments represented 3.83% of the Financial Product's Net Asset Value.

The "other" assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments, and;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be transferable securities such as equity or debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all "other" assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the Financial Product continued to apply all AXA IM exclusion policies, for which the exclusion criteria were updated - for the most recent updates - in 2023, but which exclusion lists were updated in 2024. More details on AXA IM exclusion policies are available under the following link: <u>Sustainability Policies and Reports | AXA IM Corporate</u>

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they

promote.

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: AXA IM Euro Yield Target 2028 **Legal Entity Identifier:** 213800BFLORTZFBT1Z13 (the "Financial Product")

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? ☐ YES **⋈** NO It made sustainable investments with an It promoted Environmental/Social (E/S) characteristics and while it did not have as its environmental objective: ____% objective a sustainable investment, it had a proportion of 44.6 % of sustainable investments in economic activities that qualify as with an environmental objective in economic environmentally sustainable under the EU activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as with an environmental objective in economic environmentally sustainable under the EU activities that do not qualify as Taxonomy environmentally sustainable under the EU Taxonomy with a social objective It made sustainable investments with a social It promoted E/S characteristics, but did not make objective: ___% any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil & gas activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of
 international norms and standards such as the United Nations Global Compact Principles, International Labor
 Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and
 ESG standards have been applied bindingly at all times during the reference period
- Protection of human rights avoiding investing in debt instruments issued by countries where the worst forms of human right violations are observed.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to Parallel comparison portfolio during the reference period.

| Sustainability KPI Name | Value | Parallel comparison portfolio | Coverage |
|-------------------------|-----------|-------------------------------|----------|
| ESG Score | 6.34 / 10 | 6.26 / 10 | 96.95 % |

N.B.: KPIs and benchmarks are reported based on an average of the data available at each end of month of the reference period.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

... And compared to previous periods?

| Sustainability KPI Name | Year | Value | Parallel comparison portfolio | Coverage |
|-------------------------|------|-----------|-------------------------------|----------|
| ESG Score | 2023 | 6.22 / 10 | 6.27 / 10 | 97.73 % |

N.B.: While Sustainability KPIs are reported based on an average of the data available at each end of quarter of the reference period, for technical reasons benchmarks are reported based on end of year data only. Therefore, the comparison should not be taken as such at face value and should not be interpretated as a breach of the binding elements disclosed into the Financial Product's legal documentation, as figures disclosed for the benchmark are not based on the same accounting approach than for those disclosed for the Financial Product.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

- 1.UN Sustainable Development Goals alignment (SDG) of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:
- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2.Integration of issuers engaged in a solid Transition Pathway consistently with the European Commission's ambition to help fund the transition to a 1.5°c world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product took into consideration the criteria of the EU Taxonomy environmental objectives, and the "do not significantly harm" principles. It is invested in activities aligned with the objectives of the EU Taxonomy. The Taxonomy alignment of the Financial Product has been provided by an external data provider and have been consolidated at portfolio level by AXA IM. Nevertheless, it has not been subject to an audit or a review by a third party.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a
 quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly
 contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively
 overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through (i) AXA IM sectorial exclusion policies and AXA IM ESG standards that have been applied bindingly at all times by the Financial Product, as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under -5 on any SDG (on a scale from +10 corresponding to 'significant contributing impact' to -10 corresponding to 'significant obstructing impact'), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies | PAI indicator | Units | Measurement | Coverage in % based on Total AUM | Coverage in % based on eligible assets |
|--|--|--|---|---|--|
| Climate Risk policy | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes of carbon dioxide equivalents (tCO2e) | Scope 1: 15999.648 Scope 2: 1982.678 Scope 3: 93754.813 Scope 1+2: 17982.326 Scope 1+2+3: 110569.68 | Scope 1: 51 Scope 2: 51 Scope 3: 47 Scope 1+2: 51 Scope 1+2+3: 47 | Scope 1: 51 Scope 2: 51 Scope 3: 47 Scope 1+2: 51 Scope 1+2+3: 47 |
| Ecosystem Protection & Deforestation policy | PAI 2: Carbon Footprint | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/€M) | Scope 1+2: 95.128 Scope 1+2+3: 612.075 | Scope 1+2: 47 Scope 1+2+3: 47 | Scope 1+2: 48 Scope 1+2+3: 47 |
| | PAI 3: GHG intensity of investee companies | Metric tonnes of carbon dioxide equivalents per million euro of revenue (tCO2e/€M) | Scope 1+2+3: 1407.509 | Scope 1+2+3: 48 | Scope 1+2+3: 48 |
| Climate Risk policy | PAI 4: Exposure to Companies active in the fossil fuel sector | Share of investments in companies active in the fossil fuel sector (% of AuM) | 2.58 | 52 | 52 |
| Climate Risk policy (engagement only) | PAI 5 : Share of non- renewable energy consumption and production | Share of non- renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%) | Energy Consumption: 61.16 Energy Production: 78.24 | Energy Consumption: 48 Energy Production: 1 | Energy Consumption: 48 Energy Production: 1 |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) ¹ | PAI 6: Energy consumption intensity per high impact climate sector | Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector (GWh/€M) | Sector NACE C: 0.722 Sector NACE D: 4.249 Sector NACE G: 0.049 Sector NACE H: 0.256 | Sector NACE A: 0 Sector NACE B: 0 Sector NACE C: 18 Sector NACE D: 1 Sector NACE E: 0 Sector NACE F: 0 Sector NACE G: 3 Sector NACE H: 1 Sector NACE L: 0 | Sector NACE C: 48 Sector NACE D: 10 Sector NACE G: 50 Sector NACE H: 34 |
| Ecosystem Protection & Deforestation policy | PAI 7: Activities negatively affecting biodiversity-sensitive areas | Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas (% of AuM) | 15.27 | 15 | 15 |

¹ The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively. Not all high impact climate sectors are targeted by the exclusion policy for the time being.

| SDG no significantly negative score | PAI 8: Emissions to water | Tonnes of emissions to water generated by investee companies per million EUR invested, expressed as a weighted average (t/€M) | 0.002 | 17 | 17 |
|--|---|--|-------|----|----|
| SDG no significantly negative score | PAI 9: Hazardous waste and radioactive waste ratio | Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average (t/€M) | 1.15 | 26 | 26 |

Social and Governance:

| Relevant AXA IM policies | PAI indicator | Units | Measurement | Coverage in % based on Total AUM | Coverage in % based on eligible assets |
|--|---|---|-------------|----------------------------------|--|
| ESG standards policy: violation of international norms and standards | PAI 10: Violation of UN Global Compact principles & OECD Guidelines for Multinational Enterprises | Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (% of AuM) | 0.0% | 100 | 100 |
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) ² | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for Multinational Enterprises | Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance /complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (% of AuM) | 19.93 % | 52 | 52 |
| SDG no significantly negative score | PAI 12: Unadjusted gender pay gap | Average unadjusted gender pay gap of investee companies (%) | 11.43% | 47 | 47 |
| Voting and Engagement policy with systematic voting criteria linked with board gender diversity | PAI 13: Board gender diversity | Average ratio of female board members in investee companies, expressed as a percentage of all board members (%) | 34.22 | 52 | 52 |
| Controversial weapons policy | PAI 14: Exposure to controversial weapons | Share of investments in investee companies involved in the manufacture or selling of controversial weapons (% of AuM) | 0.0 | 100 | 100 |

For Sovereign and supranationals:

| Relevant AXA IM policies | PAI indicator | Units | Measurement | Coverage in % based on Total AUM | Coverage in % based on eligible assets |
|---|--|--|-------------|--|--|
| AXA IM ESG Standards policy, through the exclusion of investee countries with severe social violations Compliance black- list based on international and EU sanctions | PAI 16: Sovereign Investee countries subject to social violations | Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law | N/A | Absolute number: 0 Relative number: 0 | N/A |

² The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

.Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies:

| Relevant AXA IM policies | PAI indicator | Units | Measurement | Coverage in % based on Total AUM | Coverage in % based on eligible assets |
|--|---|--|---|---|---|
| Climate Risk policy Ecosystem protection & Deforestation policy | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023) | Metric tonnes of carbon dioxide equivalents (tCO2e) | Scope 1: 15999.648 Scope 2: 1982.678 Scope 3: 93754.813 Scope 1+2: 17982.326 Scope 1+2+3: 110569.68 | Scope 1: 51 Scope 2: 51 Scope 3: 47 Scope 1+2: 51 Scope 1+2+3: 47 | Scope 1: 51 Scope 2: 51 Scope 3: 47 Scope 1+2: 51 Scope 1+2+3: 47 |
| Climate Risk policy Ecosystem protection & Deforestation policy | PAI 2: Carbon Footprint | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/€M) | Scope 1+2: 95.128 Scope 1+2+3: 612.075 | Scope 1+2: 47 Scope 1+2+3: 47 | Scope 1+2: 48 Scope 1+2+3: 47 |
| Climate Risk policy Ecosystem protection & Deforestation policy | PAI 3: GHG intensity of investee companies | Metric tonnes of carbon dioxide equivalents per million euro of revenue (tCO2e/€M) | Scope 1+2+3: 1407.509 | Scope 1+2+3: 48 | Scope 1+2+3: 48 |
| Climate Risk policy | PAI 4: Exposure to companies active in the fossil fuel sector | Share of investments in companies active in the fossil fuel sector (% of AuM) | 2.58 | 52 | 52 |
| Climate Risk policy (engagement only) | PAI 5: Share of non- renewable energy consumption and production | Share of non- renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%) | Energy Consumption: 61.16 Energy Production: 78.24 | Energy Consumption: 48 Energy Production: 1 | Energy Consumption: 48 Energy Production: 1 |
| Ecosystem protection & Deforestation policy | PAI 7: Activities negatively affecting biodiversity- sensitive areas | Share of investments in investee companies with sites/operations located in or near to | 15.27 | 15 | 15 |

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Source: S&P Trucost, 2024

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

N.B.: PAIs are reported based on an average of the impacts at each end of quarter of the reference period where data is available.

Figures disclosed on PAI indicators can either be based on the "current value of all investments" as defined by the Regulation, or on "eligible assets with available data only" where relevant. For the purpose of this document, "eligible assets with available data only" refers to all investments (i.e., investee companies, or sovereign and supranational, or real estate assets, depending on the PAI), excluding derivatives, cash and cash equivalent and eligible assets without available data. "Eligible assets without available data" refers to assets that have insufficient data and/or low data quality for a specific investment. The attention of the recipient is drawn to the fact that for some specific PAIs (i.e., PAIs which are relative i) to investee companies' revenue or ii) to non-monetary units such as physical flows), the calculation is rebased on eligible assets with available data only for data quality and comparability purposes. Such exclusion at the denominator is reflected and disclosed through the coverage ratios for the relevant indicators: the coverage disclosed reflects the proportion of eligible assets for which data is available and provided in this document; in addition, to ensure full transparency on the scope of assets where PAIs are disclosed, the coverage based on the current value of all investments is also disclosed.

| Reported PAI indicators based on the current value of all investments | Reported PAI indicators based on eligible assets, excluding eligible assets with no available data | |
|---|--|--|
| PAI indicators 2, 4, 7, 10, 11 and 14 | PAI indicators 3 and 6 | |

N.B.: PAI indicators 1 and 16 are not based neither on any of these two approaches as being PAIs in absolute values (noting that the PAI 16 is also relative to the number of invested countries in addition to the absolute value number), i.e., having no denominator in their formula.

More details on our methodologies to account and disclose PAIs are available in AXA IM ESG Methodologies Handbook available on AXA IM website: https://www.axa-im.com/our-policies-and-reports

What were the top investments of this financial product?

The top investments of the Financial Product (based on the NACE classification's divisions: NACE level 2) are detailed below:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/01/2024-31/12/2024

| Largest investments | Sector (NACE level 2) | % Assets | Country |
|--|--|----------|---------|
| ISPIM 6.5% Var - 14/03/2029 Call | Financial service activities, except insurance and pension funding | 1.37% | IΤ |
| PAPREC 3.5% - 01/07/2028 Call | Waste collection, treatment and disposal activities, materials recovery | 1.29% | FR |
| CONGLO 3.125% - 01/01/2028 Call | Electricity, gas, steam and air conditioning supply | 1.28% | LU |
| BANIJA 7% - 01/05/2029 Call | Motion picture, video and television programme production, sound recording and music publishing acti | 1.26% | FR |
| GRFSM 3.875% - 15/10/2028 Call | Scientific research and development | 1.26% | ES |
| INVPLN 1.875% Var - 16/07/2028 Call | Financial service activities, except insurance and pension funding | 1.25% | ZA |
| EMPARQ 1.875% - 01/02/2028 Call | Office administrative, office support and other business support activities | 1.22% | LU |
| RCSRDS 3.25% - 05/02/2028 Call | Telecommunications | 1.22% | RO |

| CHEPDE 4.375% - 15/01/2028 Call | Manufacture of basic pharmaceutical products and pharmaceutical preparations | 1.15% | DE |
| ZIGGO 2.875% - 15/01/2029 Call | Telecommunications | 1.14% | NL |
| PINEFI 3.625% - 15/11/2027 Call | Motion picture, video and television programme production, sound recording and music publishing acti | 1.14% | GB |
| SABSM 5.25% Var - 07/02/2029 Call | Financial service activities, except insurance and pension funding | 1.13% | ES |
| EDRSM 5.5% - 15/07/2027 Call | Information service activities | 1.12% | ES |

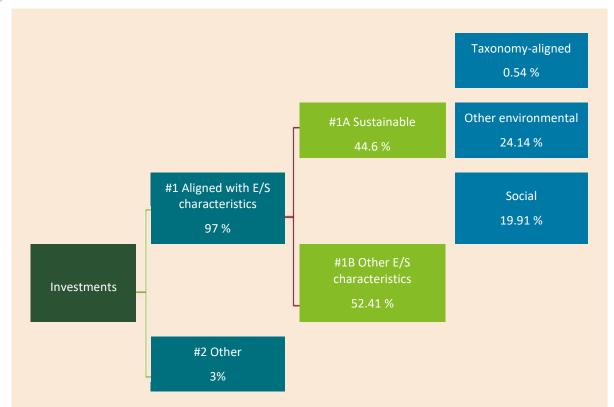

The portfolio proportions of investments presented above are an average over the reference period.

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The actual asset allocation has been reported based on an average of the data available at end of each quarter of the reference period.

Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

In which economic sectors were the investments made?

Financial product's investments were made in the economic sectors (based on NACE level 2) detailed below:

| Top sector (NACE level 2) | Proportion |
|--|------------|
| Telecommunications | 12.34% |
| Financial service activities, except insurance and pension funding | 11.6% |
| Manufacture of motor vehicles, trailers and semi-trailers | 5.96% |
| Manufacture of chemicals and chemical products | 5.78% |
| Gambling and betting activities | 5.12% |
| Manufacture of paper and paper products | 3.63% |
| Electricity, gas, steam and air conditioning supply | 3.58% |
| Retail trade, except of motor vehicles and motorcycles | 3.45% |
| Human health activities | 3.18% |

| Warehousing and support activities for transportation | 2.92% |
|--|-------|
| Manufacture of fabricated metal products, except machinery and equipment | 2.88% |
| Motion picture, video and television programme production, sound recording and music publishing acti | 2.85% |
| Insurance, reinsurance and pension funding, except compulsory social security | 2.71% |
| Manufacture of basic pharmaceutical products and pharmaceutical preparations | 2.52% |
| Activities auxiliary to financial services and insurance activities | 2.08% |
| Office administrative, office support and other business support activities | 1.91% |
| Waste collection, treatment and disposal activities, materials recovery | 1.72% |
| Manufacture of computer, electronic and optical products | 1.68% |
| Manufacture of electrical equipment | 1.66% |
| Rental and leasing activities | 1.58% |
| Information service activities | 1.55% |
| Publishing activities | 1.48% |
| Security and investigation activities | 1.41% |
| Computer programming, consultancy and related activities | 1.38% |
| Manufacture of rubber and plastic products | 1.28% |
| Scientific research and development | 1.26% |
| Manufacture of machinery and equipment n.e.c. | 1.25% |
| Manufacture of wearing apparel | 1.18% |
| Sports activities and amusement and recreation activities | 1.15% |
| Manufacture of food products | 1.08% |
| Manufacture of beverages | 1.07% |
| Education | 0.87% |
| Wholesale and retail trade and repair of motor vehicles and motorcycles | 0.82% |
| Manufacture of other transport equipment | 0.76% |
| Wholesale trade, except of motor vehicles and motorcycles | 0.7% |
| Real estate activities | 0.68% |
| Civil engineering | 0.5% |
| Accommodation | 0.48% |
| Construction of buildings | 0.45% |
| Water transport | 0.43% |
| Other | 0.42% |
| Repair and installation of machinery and equipment | 0.32% |
| Manufacture of coke and refined petroleum products | 0.26% |
| Manufacture of other non-metallic mineral products | 0.08% |
| The partialia proportions of investments presented above are an average over the refere | |

The portfolio proportions of investments presented above are an average over the reference period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product took into consideration the criteria of the EU Taxonomy environmental objectives, and the "do not significantly harm" principles. It is invested in activities aligned with the objectives of the EU Taxonomy. The Taxonomy alignment of the Financial Product has been provided by an external data provider and have been consolidated at portfolio level by AXA IM. Nevertheless, it has not been subject to an audit or a review by a third party. The Taxonomy alignment of the Financial Product has been provided by an external data provider and have been consolidated to the portfolio level by AXA IM. Nevertheless, it has not been subject to an audit or a review by a third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

| ∐Yes | |
|-----------------|-----------------------------|
| ☐ In fossil gas | \square In nuclear energy |
| ⊠No | |

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

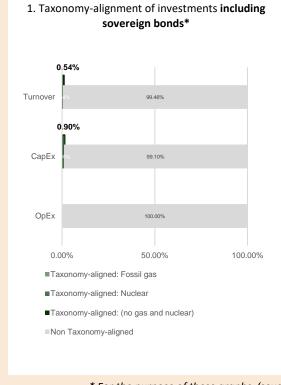

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

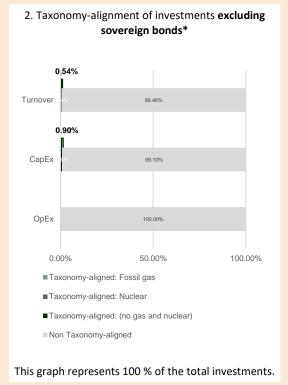

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

³ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

The Financial Product has invested 0% of its Net Asset Value in transitional activities and 0% of its Net Asset Value in enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

| Percentage of EU Taxonomy-aligned investments | | | | | |
|---|-------|-------|--|--|--|
| | 2024 | 2023 | | | |
| Revenue-based | 0.54% | 0.00% | | | |
| CapEx-based | 0.90% | 0.00% | | | |
| OpEx-based | 0.00% | 0.00% | | | |

Source: AXA IM, based on S&P Trucost, 2024

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 24.14% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 19.91% of sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining "Other" investments represented 3% of the Financial Product's Net Asset Value.

The "other" assets may have consisted in, as defined in the precontractual annex:

- · cash and cash equivalent investments, and;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria
 described in this appendix. Such assets may be transferable securities such as debt instruments, derivatives
 investments and investment collective schemes that do not promote environmental or social characteristics and
 that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging
 purposes.

Environmental or social safeguards were applied and assessed on all "other" assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the Financial Product continued to apply all AXA IM exclusion policies, for which the exclusion criteria were updated - for the most recent updates - in 2023, but which exclusion lists were updated in 2024. More details on AXA IM exclusion policies are available under the following link: <u>Sustainability Policies and Reports | AXA IM Corporate</u>

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy

Product Name: Target Yield June 2028 (the Legal Entity Identifier: 213800MFTS8JGBQ6JS26

"Financial Product")

Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective? | | | |
|---|--|--|--|
| ■ □ YES | ●○ ⊠ NO | | |
| It made sustainable investments with an environmental objective:% | It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 36.6 % of sustainable investments | | |
| in economic activities that qualify as environmentally sustainable under the EU Taxonomy | with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy | | |
| in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | | |
| | with a social objective | | |
| It made sustainable investments with a social objective:% | It promoted E/S characteristics, but did not make any sustainable investments | | |

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil & gas activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period
- Protection of human rights avoiding investing in debt instruments issued by countries where the worst forms of human right violations are observed.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

The Financial Product has outperformed its ESG Score compared to Not applicable during the reference period.

| Sustainability KPI Name | Value | Coverage |
|-------------------------|----------|----------|
| ESG Score | 6.3 / 10 | 96.22 % |

N.B.: KPIs and benchmarks are reported based on an average of the data available at each end of month of the reference period.

... And compared to previous periods?

Not applicable.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

- 1.UN Sustainable Development Goals alignment (SDG) of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:
- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2.Integration of issuers engaged in a solid Transition Pathway consistently with the European Commission's ambition to help fund the transition to a 1.5°c world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product took into consideration the criteria of the EU Taxonomy environmental objectives, and the "do not significantly harm" principles. It is invested in activities aligned with the objectives of the EU Taxonomy. The Taxonomy alignment of the Financial Product has been provided by an external data provider and have been consolidated at portfolio level by AXA IM. Nevertheless, it has not been subject to an audit or a review by a third party.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a
 quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly
 contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively
 overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

----- How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through (i) AXA IM sectorial exclusion policies and AXA IM ESG standards that have been applied bindingly at all times by the Financial Product, as well as through the filters based on UN Sustainable Development Goals scoring.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under -5 on any SDG (on a scale from +10 corresponding to 'significant contributing impact' to -10 corresponding to 'significant obstructing impact'), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies | PAI indicator | Units | Measurement | Coverage in % based on Total AUM | Coverage in % based on eligible assets |
|--|--|--|--|---|---|
| | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes of carbon dioxide equivalents (tCO2e) | Scope 1: 3507.75 Scope 2: 439.776 Scope 3: 5417.1 Scope 1+2: 3947.526 Scope 1+2+3: 9272.598 | Scope 1: 40 Scope 2: 40 Scope 3: 38 Scope 1+2: 40 Scope 1+2+3: 38 | Scope 1: 40 Scope 2: 40 Scope 3: 39 Scope 1+2: 40 Scope 1+2+3: 39 |
| Climate Risk policy Ecosystem Protection & Deforestation policy | PAI 2: Carbon Footprint | Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/€M) | Scope 1+2: 76.261 Scope 1+2+3: 188.725 | Scope 1+2: 38 Scope 1+2+3: 38 | Scope 1+2: 39 Scope 1+2+3: 39 |
| | PAI 3: GHG intensity of investee companies | Metric tonnes of carbon dioxide equivalents per million euro of revenue (tCO2e/€M) | Scope 1+2+3: 729.979 | Scope 1+2+3: 39 | Scope 1+2+3: 39 |
| Climate Risk policy | PAI 4: Exposure to Companies active in the fossil fuel sector | Share of investments in companies active in the fossil fuel sector (% of AuM) | 2.94 | 40 | 41 |
| SDG no significantly negative score | PAI 5 : Share of non- renewable energy consumption and production | Share of non- renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%) | Energy Consumption: 62.22 Energy Production: 78.24 | Energy Consumption: 38 Energy Production: 1 | Energy Consumption: 39 Energy Production: 1 |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) ¹ | PAI 6: Energy consumption intensity per high impact climate sector | Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector (GWh/€M) | Sector NACE C: 0.548 Sector NACE D: 4.249 Sector NACE G: 0.021 Sector NACE H: 0.256 Sector NACE L: 0.236 | Sector NACE A: 0 Sector NACE B: 0 Sector NACE C: 12 Sector NACE D: 1 Sector NACE E: 0 Sector NACE F: 0 Sector NACE G: 3 Sector NACE H: 0 Sector NACE L: 2 | Sector NACE C: 26 Sector NACE D: 12 Sector NACE G: 26 Sector NACE H: 23 Sector NACE L: 24 |
| Ecosystem Protection & Deforestation policy | PAI 7: Activities negatively affecting biodiversity-sensitive areas | Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas (% of AuM) | 12.61 | 13 | 13 |
| SDG no significantly negative score | PAI 8: Emissions to water | Tonnes of emissions to water generated by investee companies per million EUR invested, expressed as a weighted average (t/€M) | 0.001 | 12 | 12 |
| SDG no significantly negative score | PAI 9: Hazardous waste and radioactive waste ratio | Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average (t/€M) | 1.513 | 16 | 17 |

Social and Governance:

| Relevant AXA IM policies | PAI indicator | Units | Measurement | Coverage in % based on Total AUM | Coverage in % based on eligible assets |
|---|--|--|-------------|----------------------------------|---|
| ESG standards policy: violation of international norms and standards | PAI 10: Violation of UN Global Compact principles & OECD Guidelines for Multinational Enterprises | Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for | 0.0% | 98 | 100 |

¹ The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively. Not all high impact climate sectors are targeted by the exclusion policy for the time being.

| | | Multinational Enterprises (% of AuM) | | | |
|--|---|---|---------|----|-----|
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) ² | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for Multinational Enterprises | Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance /complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (% of AuM) | 18.17 % | 40 | 40 |
| SDG no significantly negative score | PAI 12: Unadjusted gender pay gap | Average unadjusted gender pay gap of investee companies (%) | 13.15% | 36 | 37 |
| SDG no significantly negative score | PAI 13: Board gender diversity | Average ratio of female board members in investee companies, expressed as a percentage of all board members (%) | 33.84 | 40 | 41 |
| Controversial weapons policy | PAI 14: Exposure to controversial weapons | Share of investments in investee companies involved in the manufacture or selling of controversial weapons (% of AuM) | 0.0 | 98 | 100 |

For Sovereign and supranationals:

| Relevant AXA IM policies | PAI indicator | Units | Measurement | Coverage in % based on Total AUM | Coverage in % based on eligible assets |
|---|--|--|-------------|--|--|
| AXA IM ESG Standards policy, through the exclusion of investee countries with severe social violations Compliance black- list based on international and EU sanctions | PAI 16: Sovereign Investee countries subject to social violations | Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law | N/A | Absolute number: 0 Relative number: 0 | N/A |

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

² The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies:

| Relevant AXA IM policies | PAI indicator | Units | Measurement | Coverage in % based on Total AUM | Coverage in % based on eligible assets |
|---|--|---|--|---|---|
| Ecosystem protection & Deforestation policy | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023) | Metric tonnes of carbon dioxide equivalents (tCO2e) | Scope 1: 3507.75 Scope 2: 439.776 Scope 3: 5417.1 Scope 1+2: 3947.526 Scope 1+2+3: 9272.598 | Scope 1: 40 Scope 2: 40 Scope 3: 38 Scope 1+2: 40 Scope 1+2+3: 38 | Scope 1: 40 Scope 2: 40 Scope 3: 39 Scope 1+2: 40 Scope 1+2+3: 39 |
| Climate Risk policy | | Metric tonnes of | | | |
| Ecosystem protection & Deforestation policy | PAI 2: Carbon Footprint | carbon dioxide equivalents per million euro or dollar invested (tCO2e/€M) | Scope 1+2: 76.261 Scope 1+2+3: 188.725 | Scope 1+2: 38 Scope 1+2+3: 38 | Scope 1+2: 39 Scope 1+2+3: 39 |
| Climate Risk policy Ecosystem protection & Deforestation policy | PAI 3: GHG intensity of investee companies | Metric tonnes of carbon dioxide equivalents per million euro of revenue (tCO2e/€M) | Scope 1+2+3: 729.979 | Scope 1+2+3: 39 | Scope 1+2+3: 39 |
| Climate Risk policy | PAI 4: Exposure to companies active in the fossil fuel sector | Share of investments in companies active in the fossil fuel sector (% of AuM) | 2.94 | 40 | 41 |
| Ecosystem protection & Deforestation policy | PAI 7: Activities negatively affecting biodiversity- sensitive areas | Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas (% of AuM) | 12.61 | 13 | 13 |
| ESG standard policy / violation of international norms and standards | PAI 10: Violation of UN Global Compact principles & OECD Guidelines for Multinational Enterprises | Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (% of AuM) | 0.0% | 98 | 100 |
| Controversial weapons policy | PAI 14: Exposure to controversial weapons | Share of investments in investee companies involved in the manufacture or selling of controversial weapons (% of AuM) | 0.0 | 98 | 100 |

For Sovereign and supranationals:

| Relevant AXA IM policies | PAI indicator | Units | Measurement | Coverage in % based on Total AUM | Coverage in % based on eligible assets |
|---|--|---|-------------|--|---|
| AXA IM ESG Standards policy, through the exclusion of investee countries with severe social violations Compliance blacklist based on international and EU sanctions | PAI 16: Sovereign Investee countries subject to social violations | Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where | N/A | Absolute number: 0 Relative number: 0 | N/A |

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

N.B.: PAIs are reported based on an average of the impacts at each end of quarter of the reference period where data is available.

Figures disclosed on PAI indicators can either be based on the "current value of all investments" as defined by the Regulation, or on "eligible assets with available data only" where relevant. For the purpose of this document, "eligible assets with available data only" refers to all investments (i.e., investee companies, or sovereign and supranational, or real estate assets, depending on the PAI), excluding derivatives, cash and cash equivalent and eligible assets without available data. "Eligible assets without available data" refers to assets that have insufficient data and/or low data quality for a specific investment. The attention of the recipient is drawn to the fact that for some specific PAIs (i.e., PAIs which are relative i) to investee companies' revenue or ii) to non-monetary units such as physical flows), the calculation is rebased on eligible assets with available data only for data quality and comparability purposes. Such exclusion at the denominator is reflected and disclosed through the coverage ratios for the relevant indicators: the coverage disclosed reflects the proportion of eligible assets for which data is available and provided in this document; in addition, to ensure full transparency on the scope of assets where PAIs are disclosed, the coverage based on the current value of all investments is also disclosed.

| Reported PAI indicators based on the current value of all investments | Reported PAI indicators based on eligible assets, excluding eligible assets with no available data |
|---|--|
| PAI indicators 2, 4, 7, 10, 11 and 14 | PAI indicators 3 and 6 |

N.B.: PAI indicators 1 and 16 are not based neither on any of these two approaches as being PAIs in absolute values (noting that the PAI 16 is also relative to the number of invested countries in addition to the absolute value number), i.e., having no denominator in their formula.

More details on our methodologies to account and disclose PAIs are available in AXA IM ESG Methodologies Handbook available on AXA IM website: https://www.axa-im.com/our-policies-and-reports

What were the top investments of this financial product?

The top investments of the Financial Product (based on the NACE classification's divisions: NACE level 2) are detailed below:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/01/2024-31/12/2024

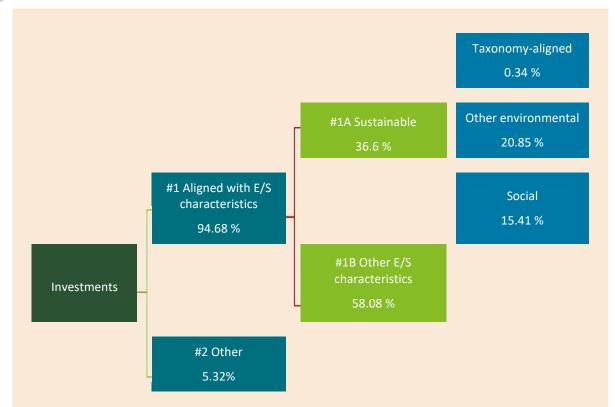

| Largest investments | Sector (NACE level 2) | % Assets | Country |
|----------------------------------|--|----------|---------|
| Portfolio 104878 EUR SET SSI | Other | 2.87% | N/A |

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The actual asset allocation has been reported based on an average of the data available at end of each quarter of the reference period.

Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

In which economic sectors were the investments made?

Financial product's investments were made in the economic sectors (based on NACE level 2) detailed below:

| Top sector (NACE level 2) | Proportion |
|--|------------|
| Telecommunications | 12% |
| Financial service activities, except insurance and pension funding | 7.36% |
| Manufacture of chemicals and chemical products | 7.33% |
| Manufacture of motor vehicles, trailers and semi-trailers | 6.26% |
| Retail trade, except of motor vehicles and motorcycles | 5.54% |
| Gambling and betting activities | 5.17% |
| Manufacture of paper and paper products | 4.59% |
| Electricity, gas, steam and air conditioning supply | 4.16% |
| Human health activities | 3.42% |

| Activities auxiliary to financial services and insurance activities | 2.89% |
|--|-------|
| Other | 2.66% |
| Real estate activities | 2.42% |
| Security and investigation activities | 2.42% |
| Computer programming, consultancy and related activities | 2.34% |
| Motion picture, video and television programme production, sound recording and music publishing acti | 2.1% |
| Manufacture of machinery and equipment n.e.c. | 2.1% |
| Office administrative, office support and other business support activities | 2.06% |
| Manufacture of basic pharmaceutical products and pharmaceutical preparations | 1.97% |
| Insurance, reinsurance and pension funding, except compulsory social security | 1.87% |
| Publishing activities | 1.81% |
| Warehousing and support activities for transportation | 1.8% |
| Manufacture of rubber and plastic products | 1.76% |
| Education | 1.44% |
| Scientific research and development | 1.4% |
| Wholesale and retail trade and repair of motor vehicles and motorcycles | 1.39% |
| Manufacture of electrical equipment | 1.12% |
| Rental and leasing activities | 1.08% |
| Construction of buildings | 1.06% |
| Sports activities and amusement and recreation activities | 1.01% |
| Information service activities | 1% |
| Civil engineering | 0.82% |
| Manufacture of food products | 0.82% |
| Waste collection, treatment and disposal activities, materials recovery | 0.81% |
| Manufacture of beverages | 0.8% |
| Services to buildings and landscape activities | 0.78% |
| Manufacture of fabricated metal products, except machinery and equipment | 0.62% |
| Manufacture of computer, electronic and optical products | 0.62% |
| Manufacture of coke and refined petroleum products | 0.6% |
| Wholesale trade, except of motor vehicles and motorcycles | 0.42% |
| Manufacture of wearing apparel | 0.18% |
| | |

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product took into consideration the criteria of the EU Taxonomy environmental objectives, and the "do not significantly harm" principles. It is invested in activities aligned with the objectives of the EU Taxonomy. The Taxonomy alignment of the Financial Product has been provided by an external data provider and have been consolidated at portfolio level by AXA IM. Nevertheless, it has not been subject to an audit or a review by a third party. The Taxonomy alignment of the Financial Product has been provided by an external data provider and have been consolidated to the portfolio level by AXA IM. Nevertheless, it has not been subject to an audit or a review by a third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

| ∐Yes | |
|-----------------|-----------------------------|
| ☐ In fossil gas | \square In nuclear energy |
| ⊠No | |

emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a

substantial contribution to an environmental objective.

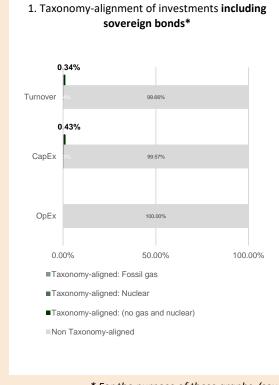

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on

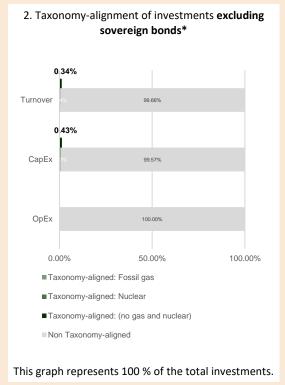

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

³ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

The Financial Product has invested 0% of its Net Asset Value in transitional activities and 0% of its Net Asset Value in enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 20.85% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 15.41% of sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining "Other" investments represented 5.32% of the Financial Product's Net Asset Value.

The "other" assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments, and;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria
 described in this appendix. Such assets may be transferable securities such as debt instruments, derivatives
 investments and investment collective schemes that do not promote environmental or social characteristics and
 that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging
 purposes.

Environmental or social safeguards were applied and assessed on all "other" assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the Financial Product continued to apply all AXA IM exclusion policies, for which the exclusion criteria were updated - for the most recent updates - in 2023, but which exclusion lists were updated in 2024. More details on AXA IM exclusion policies are available under the following link: Sustainability Policies and Reports | AXA IM Corporate

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: USD Credit 2027 (the "Financial Legal Entity Identifier: 213800XX7B7XZT9VRG03 Product")

Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective? | | | | | | |
|---|---|--|--|--|--|--|
| •• □ YES | ● NO | | | | | |
| It made sustainable investments with an environmental objective:% | It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 35.45 % of sustainable investments | | | | | |
| in economic activities that qualify as environmentally sustainable under the EU Taxonomy | with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy | | | | | |
| in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | | | | | |
| | with a social objective | | | | | |
| It made sustainable investments with a social objective:% | It promoted E/S characteristics, but did not make any sustainable investments | | | | | |

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil & gas activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of
 international norms and standards such as the United Nations Global Compact Principles, International Labor
 Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and
 ESG standards have been applied bindingly at all times during the reference period
- Protection of human rights avoiding investing in debt instruments issued by countries where the worst forms of human right violations are observed.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

How did the sustainability indicators perform?

During the reference period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

| Sustainability KPI Name | Value | Coverage |
|-------------------------|----------|----------|
| ESG Score | 6.1 / 10 | 100 % |

N.B.: KPIs and benchmarks are reported based on an average of the data available at each end of month of the reference period.

... And compared to previous periods?

Not applicable.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

- 1.UN Sustainable Development Goals alignment (SDG) of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:
- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or

b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2.Integration of issuers engaged in a solid Transition Pathway consistently with the European Commission's ambition to help fund the transition to a 1.5°c world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product took into consideration the criteria of the EU Taxonomy environmental objectives, and the "do not significantly harm" principles. It is invested in activities aligned with the objectives of the EU Taxonomy. The Taxonomy alignment of the Financial Product has been provided by an external data provider and have been consolidated at portfolio level by AXA IM. Nevertheless, it has not been subject to an audit or a review by a third party.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a
 quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly
 contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively
 overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through (i) AXA IM sectorial exclusion policies and AXA IM ESG standards that have been applied bindingly at all times by the Financial Product, as well as through the filters based on UN Sustainable Development Goals scoring.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under – 5 on any SDG (on a scale from + 10 corresponding to 'significant contributing impact' to – 10 corresponding to 'significant obstructing impact'), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

| Relevant AXA IM policies | PAI indicator | Units | Measurement | Coverage in % based on Total AUM | Coverage in % based on eligible assets |
|--|--|--|--|---|---|
| | PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023) | Metric tonnes of carbon dioxide equivalents (tCO2e) | Scope 1: 1310.113 Scope 2: 379.088 Scope 3: 14376.428 Scope 1+2: 1689.201 Scope 1+2+3: 15847.258 | Scope 1: 70 Scope 2: 70 Scope 3: 66 Scope 1+2: 70 Scope 1+2+3: 66 | Scope 1: 71 Scope 2: 71 Scope 3: 67 Scope 1+2: 71 Scope 1+2+3: 67 |

| Climate Risk policy | PAI 4: Exposure to Companies active in the fossil fuel sector | Share of investments in companies active in the fossil fuel sector (% of AuM) | 7.9 | 75 | 76 |
| SDG no significantly negative score | PAI 5 : Share of non- renewable energy consumption and production | Share of non- renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%) | Energy Consumption: 64.47 | Energy Consumption: 58 Energy Production: 0 | Energy Consumption: 58 |
| Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) ¹ | PAI 6: Energy consumption intensity per high impact climate sector | Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector (GWh/€M) | Sector NACE B: 1.209 Sector NACE C: 0.727 Sector NACE D: 0.731 Sector NACE F: 0.021 Sector NACE G: 0.253 Sector NACE H: 1.433 Sector NACE L: 0.114 | Sector NACE A: 0 Sector NACE B: 1 Sector NACE C: 18 Sector NACE D: 2 Sector NACE E: 0 Sector NACE F: 0 Sector NACE G: 7 Sector NACE H: 1 Sector NACE L: 3 | Sector NACE B: 26 Sector NACE C: 44 Sector NACE D: 26 Sector NACE F: 50 Sector NACE G: 54 Sector NACE H: 32 Sector NACE L: 52 |
| Ecosystem Protection & Deforestation policy | PAI 7: Activities negatively affecting biodiversity-sensitive areas | Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas (% of AuM) | 23.71 | 24 | 24 |
| SDG no significantly negative score | PAI 8: Emissions to water | Tonnes of emissions to water generated by investee companies per million EUR invested, expressed as a weighted average (t/€M) | 0.002 | 18 | 18 |
| SDG no significantly negative score | PAI 9: Hazardous waste and radioactive waste ratio | Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average (t/€M) | 1.231 | 19 | 20 |

Social and Governance:

| Relevant AXA IM policies | PAI indicator | Units | Measurement | Coverage in % based on Total AUM | Coverage in % based on eligible assets |
|---|--|--|-------------|----------------------------------|---|
| ESG standards policy: violation of international norms and standards | PAI 10: Violation of UN Global Compact principles & OECD Guidelines for Multinational Enterprises | Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for | 0% | 99 | 100 |

¹ The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively. Not all high impact climate sectors are targeted by the exclusion policy for the time being.

| | | Multinational Enterprises (% of AuM) | | | |
|--|---|---|---------|----|-----|
| ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) ² | PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for Multinational Enterprises | Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance /complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (% of AuM) | 47.52 % | 74 | 74 |
| SDG no significantly negative score | PAI 12: Unadjusted gender pay gap | Average unadjusted gender pay gap of investee companies (%) | 18.41% | 70 | 71 |
| SDG no significantly negative score | PAI 13: Board gender diversity | Average ratio of female board members in investee companies, expressed as a percentage of all board members (%) | 29.18 | 75 | 76 |
| Controversial weapons policy | PAI 14: Exposure to controversial weapons | Share of investments in investee companies involved in the manufacture or selling of controversial weapons (% of AuM) | 0 | 99 | 100 |

For Sovereign and supranationals:

| Relevant AXA IM policies | PAI indicator | Units | Measurement | Coverage in % based on Total AUM | Coverage in % based on eligible assets |
|---|--|--|-------------|--|--|
| AXA IM ESG Standards policy, through the exclusion of investee countries with severe social violations Compliance black- list based on international and EU sanctions | PAI 16: Sovereign Investee countries subject to social violations | Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law | N/A | Absolute number: 0 Relative number: 0 | N/A |

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

.Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

² The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies:

| Relevant AXA IM policies | PAI indicator | Units | Measurement | Coverage in % based on Total AUM | Coverage in % based on eligible assets |
|---|--|---|---|---|---|
| Climate Risk policy Ecosystem protection & Deforestation policy | PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023) | Metric tonnes of carbon dioxide equivalents (tCO2e) | Scope 1: 1310.113 Scope 2: 379.088 Scope 3: 14376.428 Scope 1+2: 1689.201 Scope 1+2+3: 15847.258 | Scope 1: 70 Scope 2: 70 Scope 3: 66 Scope 1+2: 70 Scope 1+2+3: 66 | Scope 1: 71 Scope 2: 71 Scope 3: 67 Scope 1+2: 71 Scope 1+2+3: 67 |
| Climate Risk policy | | Metric tonnes of | | | |
| Ecosystem protection & Deforestation policy | PAI 2: Carbon Footprint | carbon dioxide equivalents per million euro or dollar invested (tCO2e/€M) | Scope 1+2: 55.906 Scope 1+2+3: 490.667 | Scope 1+2: 75 Scope 1+2+3: 66 | Scope 1+2: 76 Scope 1+2+3: 67 |
| Climate Risk policy Ecosystem protection & Deforestation policy | PAI 3: GHG intensity of investee companies | Metric tonnes of carbon dioxide equivalents per million euro of revenue (tCO2e/€M) | Scope 1+2+3: 1240.504 | Scope 1+2+3: 71 | Scope 1+2+3: 72 |
| Climate Risk policy | PAI 4: Exposure to companies active in the fossil fuel sector | Share of investments in companies active in the fossil fuel sector (% of AuM) | 7.9 | 75 | 76 |
| Ecosystem protection & Deforestation policy | PAI 7: Activities negatively affecting biodiversity- sensitive areas | Share of investments in investee companies with sites/operations located in or near to biodiversity sensitive areas where activities of those investee companies negatively affect those areas (% of AuM) | 23.71 | 24 | 24 |
| ESG standard policy / violation of international norms and standards | PAI 10: Violation of UN Global Compact principles & OECD Guidelines for Multinational Enterprises | Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises (% of AuM) | 0% | 99 | 100 |
| Controversial weapons policy | PAI 14: Exposure to controversial weapons | Share of investments in investee companies involved in the manufacture or selling of controversial weapons (% of AuM) | 0 | 99 | 100 |

For Sovereign and supranationals:

| Relevant AXA IM policies | PAI indicator | Units | Measurement | Coverage in % based on Total AUM | Coverage in % based on eligible assets |
|---|--|---|-------------|--|---|
| AXA IM ESG Standards policy, through the exclusion of investee countries with severe social violations Compliance black- list based on international and EU sanctions | PAI 16: Sovereign Investee countries subject to social violations | Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where | N/A | Absolute number: 0 Relative number: 0 | N/A |

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

N.B.: PAIs are reported based on an average of the impacts at each end of quarter of the reference period where data is available.

Figures disclosed on PAI indicators can either be based on the "current value of all investments" as defined by the Regulation, or on "eligible assets with available data only" where relevant. For the purpose of this document, "eligible assets with available data only" refers to all investments (i.e., investee companies, or sovereign and supranational, or real estate assets, depending on the PAI), excluding derivatives, cash and cash equivalent and eligible assets without available data. "Eligible assets without available data" refers to assets that have insufficient data and/or low data quality for a specific investment. The attention of the recipient is drawn to the fact that for some specific PAIs (i.e., PAIs which are relative i) to investee companies' revenue or ii) to non-monetary units such as physical flows), the calculation is rebased on eligible assets with available data only for data quality and comparability purposes. Such exclusion at the denominator is reflected and disclosed through the coverage ratios for the relevant indicators: the coverage disclosed reflects the proportion of eligible assets for which data is available and provided in this document; in addition, to ensure full transparency on the scope of assets where PAIs are disclosed, the coverage based on the current value of all investments is also disclosed.

| Reported PAI indicators based on the current value of all investments | Reported PAI indicators based on eligible assets excluding eligible assets with no available data | |
|---|---|--|
| PAI indicators 2, 4, 7, 10, 11 and 14 | PAI indicators 3 and 6 | |

N.B.: PAI indicators 1 and 16 are not based neither on any of these two approaches as being PAIs in absolute values (noting that the PAI 16 is also relative to the number of invested countries in addition to the absolute value number), i.e., having no denominator in their formula.

More details on our methodologies to account and disclose PAIs are available in AXA IM ESG Methodologies Handbook available on AXA IM website: https://www.axa-im.com/our-policies-and-reports

What were the top investments of this financial product?

The top investments of the Financial Product (based on the NACE classification's divisions: NACE level 2) are detailed below:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/01/2024-31/12/2024

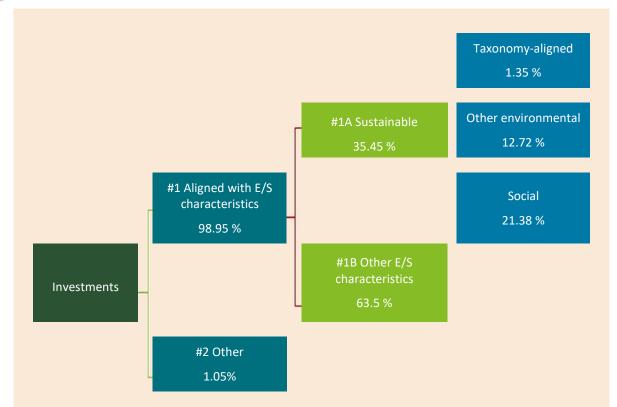

| Largest investments | Sector (NACE level 2) | % Assets | Country |
|---------------------------------|--|----------|---------|
| F 3.815% - 02/11/2027 Call | Manufacture of motor vehicles, trailers and semi-trailers | 2.59% | us |
| NXST 5.625% - 15/07/2027 Call | Programming and broadcasting activities | 2.42% | US |
| DQE 3.616% - 01/08/2027 Call | Electricity, gas, steam and air conditioning supply | 2.31% | US |
| ATH 2.45% - 20/08/2027 | Insurance, reinsurance and pension funding, except compulsory social security | 2.3% | US |
| SANTAN 5.294% - 18/08/2027 | Financial service activities, except insurance and pension funding | 2.27% | ES |
| UVN 6.625% - 01/06/2027 Call | Motion picture, video and television programme production, sound recording and music publishing acti | 2.22% | US |
| NWL 6.375% - 15/09/2027 Call | Other manufacturing | 2.18% | US |
| ABEGET 9.75% - 01/03/2027 Call | Information service activities | 2.05% | US |
| BHF 5.55% - 09/04/2027 | Insurance, reinsurance and pension funding, except compulsory social security | 2% | US |
| FREMOR 6.625% - 15/01/2027 Call | Financial service activities, except insurance and pension funding | 1.85% | US |
| BWY 9.25% - 15/04/2027 Call | Manufacture of paper and paper products | 1.84% | US |
| MATW 8.625% - 01/10/2027 Call | Other personal service activities | 1.8% | US |
| CNO 4.875% - 10/12/2027 | Insurance, reinsurance and pension funding, except compulsory social security | 1.79% | US |
| CHTR 5.125% - 01/05/2027 Call | Telecommunications | 1.75% | US |
| GTN 7% - 15/05/2027 Call | Programming and broadcasting activities | 1.74% | US |

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The actual asset allocation has been reported based on an average of the data available at end of each quarter of the reference period.

Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

In which economic sectors were the investments made?

Financial product's investments were made in the economic sectors (based on NACE level 2) detailed below:

| Top sector (NACE level 2) | Proportion |
|--|------------|
| Financial service activities, except insurance and pension funding | 21.05% |
| Manufacture of motor vehicles, trailers and semi-trailers | 9.15% |
| Insurance, reinsurance and pension funding, except compulsory social security | 8.95% |
| Motion picture, video and television programme production, sound recording and music publishing acti | 5.51% |
| Telecommunications | 5.35% |
| Electricity, gas, steam and air conditioning supply | 5.18% |
| Activities auxiliary to financial services and insurance activities | 4.67% |
| Programming and broadcasting activities | 4.16% |
| Real estate activities | 3.17% |

| Extraction of crude petroleum and natural gas | 2.58% | |
|--|-------|--|
| Information service activities | 2.41% | |
| Other manufacturing | 2.34% | |
| Manufacture of paper and paper products | 2.31% | |
| Land transport and transport via pipelines | 2.25% | |
| Manufacture of chemicals and chemical products | 2.22% | |
| Manufacture of basic pharmaceutical products and pharmaceutical preparations | 1.96% | |
| Other personal service activities | 1.8% | |
| Retail trade, except of motor vehicles and motorcycles | 1.77% | |
| Security and investigation activities | 1.36% | |
| Rental and leasing activities | 1.26% | |
| Manufacture of other non-metallic mineral products | 1.22% | |
| Food and beverage service activities | 1.13% | |
| Other | 1.06% | |
| Construction of buildings | 0.94% | |
| Office administrative, office support and other business support activities | 0.87% | |
| Human health activities | 0.83% | |
| Manufacture of wood and of products of wood and cork, except furniture, manufacture of articles of s | 0.78% | |
| Manufacture of other transport equipment | 0.72% | |
| Employment activities | 0.6% | |
| Scientific research and development | 0.49% | |
| Manufacture of basic metals | 0.46% | |
| Wholesale trade, except of motor vehicles and motorcycles | 0.43% | |
| Manufacture of computer, electronic and optical products | 0.37% | |
| Manufacture of rubber and plastic products | 0.22% | |
| Warehousing and support activities for transportation | 0.21% | |
| Accommodation | 0.09% | |
| Wholesale and retail trade and repair of motor vehicles and motorcycles | 0.07% | |
| Air transport | 0.05% | |
| The portfolio proportions of investments presented above are an average over the reference period | | |

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product took into consideration the criteria of the EU Taxonomy environmental objectives, and the "do not significantly harm" principles. It is invested in activities aligned with the objectives of the EU Taxonomy. The Taxonomy alignment of the Financial Product has been provided by an external data provider and have been consolidated at portfolio level by AXA IM. Nevertheless, it has not been subject to an audit or a review by a third party. The Taxonomy alignment of the Financial Product has been provided by an external data provider and have been consolidated to the portfolio level by AXA IM. Nevertheless, it has not been subject to an audit or a review by a third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy?

| | • |
|-----------------|-----------------------------|
| □Yes | |
| ☐ In fossil gas | \square In nuclear energy |
| ⊠No | |

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

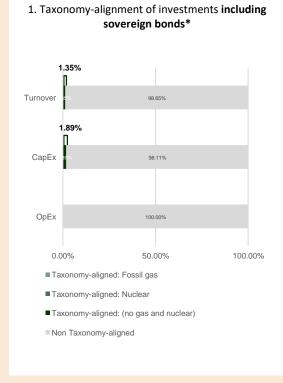

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

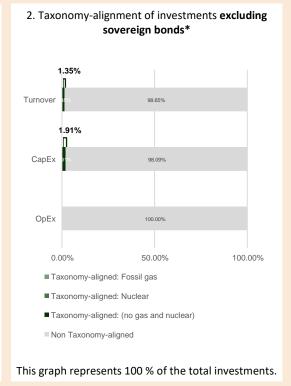

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

³ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective -see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

The Financial Product has invested 0% of its Net Asset Value in transitional activities and 0% of its Net Asset Value in enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 12.72% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 21.38% of sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining "Other" investments represented 1.05% of the Financial Product's Net Asset Value.

The "other" assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments, and;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria
 described in this appendix. Such assets may be transferable securities such as debt instruments, derivatives
 investments and investment collective schemes that do not promote environmental or social characteristics and
 that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging
 purposes.

Environmental or social safeguards were applied and assessed on all "other" assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

During the reference period, the Financial Product continued to apply all AXA IM exclusion policies, for which the exclusion criteria were updated - for the most recent updates - in 2023, but which exclusion lists were updated in 2024. More details on AXA IM exclusion policies are available under the following link: Sustainability Policies and Reports | AXA IM Corporate

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.
