Investment Objectives and Policies

The Articles provide that the investment objective and policies for each Fund be formulated by the Directors at the time of the creation of the Funds.

The investment objective of each Fund is to seek to provide Redeemable Shareholders/Shareholders (these terms are used interchangeably throughout the Financial Statements) with a Target Performance linked to the performance of a Reference Index or Reference Asset by directly or indirectly purchasing a portfolio of transferable securities that may (but is not obliged to) comprise all or a representative sample of the constituent securities of that Reference Index or Reference Asset.

Each passively managed Fund will seek to achieve its objective by pursuing a policy which will seek to track the performance of a Reference Index or Reference Asset and will generally use either a Replication Strategy, Sampling Strategy or Master Feeder Strategy, with the aim of minimising as far as possible the difference in performance between the Funds and the relevant Reference Index or Reference Asset. The Investment Manager determines whether a Replication Strategy, Sampling Strategy or Master Feeder Strategy is most appropriate for a Fund. The Relevant Supplement will specify and describe the strategy the applicable Fund intends to use.

The following is a summary description of each of the Replication Strategy, Sampling Strategy and Master Feeder Strategy.

- Replication Strategy this strategy seeks to hold all of the securities of a particular Reference Index or Reference Asset, with the approximate
 weightings of that Reference Index or Reference Asset, so that the portfolio of such Fund is a near mirror-image of the components of the
 relevant Reference Index or Reference Asset.
- Sampling Strategy this strategy seeks to build a representative portfolio that provides a return comparable to that of a Reference Index or Reference Asset. This strategy is used for tracking certain equity or fixed income indices which are too broad to replicate (i.e. the Reference Index or Reference Asset contains too many securities for the Fund to be able to purchase them all efficiently) contain securities which are currently unavailable or difficult to purchase in the open markets or an announcement has been made that certain securities will shortly be included as components of the Reference Index or Reference Asset. Consequently, a Fund using this strategy will typically hold only a subset of the securities which comprise the relevant Reference Index or Reference Asset.
- Master Feeder Strategy this strategy seeks to achieve the investment objective of the relevant Fund by investing substantially all (and in any
 event no less than 85%) of the assets of the relevant Fund in another eligible UCITS CIS in accordance with the requirements of the Central
 Bank

A passively managed Fund may also on occasion hold securities which were not comprised in the relevant Reference Index or Reference Asset where the Investment Manager believes this to be appropriate in light of the investment objective and investment restrictions of the Fund, or other factors such as market conditions. The potential for any such proposed investment by a Fund will be disclosed in the relevant Supplement.

In limited circumstances and only where disclosed in the Supplement a passively managed fund may also use the Swap Strategy.

Swap Strategy - this strategy uses financial derivative instruments and transactions and/or OTC derivatives to achieve the Target Performance
by exchanging the performance of a basket of global equity securities and equity related securities in return for the performance/return of the
Reference Index.

Each actively managed Fund will seek to achieve its objective by investing in an actively-managed portfolio of securities, which applies the security selection and portfolio construction process of the Investment Manager on a discretionary basis.

In each case, information in relation to the types of instruments or securities in which the relevant Fund will invest, including details in relation to the exchanges or markets on which the Fund's investments will be listed or traded, will be set out in the Supplement of the relevant Fund.

There is no assurance that the investment objective of any Fund whose performance is linked to the Reference Index or Reference Asset will actually be achieved.

The individual Fund's investment objectives and policies are detailed on pages 12 to 48.

As at 30 June 2025, the Company had 85 active Funds.

Invesco GBP Corporate Bond Screened & Tilted UCITS ETF (formerly Invesco GBP Corporate Bond ESG UCITS ETF)

The investment objective of the Invesco GBP Corporate Bond Screened & Tilted UCITS ETF (the "Fund") is to achieve the total return performance of the Bloomberg MSCI Sterling Liquid Corporate Screened & Tilted Index (formerly Bloomberg MSCI Sterling Liquid Corporate ESG Weighted SRI Index) (the "Reference Index") less fees, expenses and transaction costs.

In order to achieve the investment objective, the Company will employ a sampling strategy ("Sampling Strategy"), which includes the use of quantitative analysis, to select securities from the Reference Index using factors such as the index weighted average duration and credit quality.

Where consistent with its investment objective, and in conjunction with the use of a Sampling Strategy the Fund may also hold some securities which are not component securities of the Reference Index, but are of a similar nature to them and whose risk, return and environmental, social and governance ("ESG") characteristics either (a) closely resemble the risk and return and ESG characteristics of constituents of the Reference Index or of the Reference Index as a whole, (b) whose addition improves the quality of the replication of the Reference Index, or (c) whose future inclusion into the Reference Index is anticipated. The level of sampling will vary over the life of the Fund depending on asset levels of the Fund, as certain asset levels may make replication uneconomical or impractical, and the nature of the components of the Reference Index. It is generally expected that the Fund will hold less than the total number of securities in the Reference Index however, the Investment Manager reserves the right to hold as many securities as it believes necessary to achieve the Fund's investment objective.

Further information in relation to how the Fund will seek to track the Reference Index is set out in section 4 "Investment Objective and Policies" of the Prospectus. The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

The Reference Index is designed to reflect the performance of sterling-denominated investment grade, fixed-rate, taxable securities issued by corporate issuers adjusted based upon certain environmental, social and governance ("ESG") metrics, which seek to increase overall exposure to those issuers demonstrating a robust ESG profile. The Index includes publicly issued securities by industrial, utility and financial institution issuers.

Invesco EUR Government and Related Green Bond Weighted UCITS ETF (formerly Invesco EUR Government and **Related Green Transition UCITS ETF)**

The investment objective of the Invesco EUR Government and Related Green Bond Weighted UCITS ETF (the "Fund") is to provide the performance of the European government bond market by investing in an actively managed portfolio of government and government-related bonds that also factors certain environmental, social, and corporate governance ("ESG") criteria into the portfolio construction and maximises exposure to Green Bonds subject to exposure and liquidity considerations.

In order to achieve its investment objective, the Fund will generally invest in a portfolio of euro denominated government and government-related bonds predominantly issued by European issuers with an investment grade credit rating.

Securities are selected by the Investment Manager based on three criteria:

- compliance with the Fund's ESG policy (the "ESG Policy");
- maximising exposure to Green Bonds subject to specific exposure and liquidity considerations; and
- the overall ability of the Fund's portfolio to meet the targets set out in the "Benchmark" section of the Supplement to the Prospectus.

To qualify as eligible for investment by the Fund, a bond must be classified as treasury or government related at a Bloomberg BCLASS Classification Level 1 and must have an investment grade rating by the rating agencies S&P, Fitch or Moody's. Investment grade securities are those rated BBB- or higher by Standard and Poor's or Fitch and Baa3 or higher by Moody's. If the rating for a specific bond is unavailable, the rating of the issuer is to be used instead. Otherwise, unrated securities are eligible if they are determined by the Investment Manager to be of comparable quality to the above based on internal assessment of issuer credit quality. If the ratings of a bond differ between agencies, the middle rating is used to determine a bond's credit quality. If only two agencies rate a bond, the more conservative (lower) rating is used. If only one agency rates a bond, that single rating is used. If the credit rating of any security held by the Fund is downgraded below these respective ratings, the Investment Manager will liquidate this position at the earliest optimal opportunity, within 90 days of the downgrade, taking due account of the interests of its Shareholders

Fixed and floating rate bonds are eligible for inclusion. The Fund may invest up to 10% of its assets in floating rate bonds.

The Fund will not invest in bonds that are in default at the time of investment. If a bond defaults subsequent to purchase by the Fund, the Investment Manager will determine in its discretion whether to hold or dispose of such security, taking due account of the interests of its Shareholders.

The Fund may invest up to 30% of its assets in bonds denominated in currencies other than euro. Exposure to exchange-rate fluctuations resulting from these investments will be hedged back to euro at the Investment Manager's discretion. The Fund will only invest in bonds from developed market issuers, unless an issuer is from the European Economic Area (EEA) in which case an emerging market issuer is eligible; it is not expected that the Fund would invest more than 10% of its assets in securities from emerging market issuers. The Fund may invest up to 30% of its assets in issuers not from the EEA.

Invesco US Municipal Bond UCITS ETF

The investment objective of the Invesco US Municipal Bond UCITS ETF (the "Fund") is to achieve the total return performance of the ICE BofA US Taxable Municipal Securities Plus Index (the "Reference Index") less fees, expenses and transaction costs.

In order to achieve the investment objective, the Company will employ a sampling strategy ("Sampling Strategy").

In tracking the Reference Index, the Investment Manager applies the Sampling Strategy, which includes the use of quantitative analysis, to select securities from the Reference Index with the goal of matching key characteristics of the Reference Index such as the weighted average duration, industry weights, issuer types, regional exposures and credit quality.

Where consistent with its investment objective, and in conjunction with the use of a Sampling Strategy, the Fund may also hold securities which are not component securities of the Reference Index, but are of a similar nature to them and whose risk and return characteristics either (a) closely resemble the risk and return characteristics of constituents of the Reference Index or of the Reference Index as a whole, (b) whose addition is expected to improve the quality of the replication of the Reference Index, or (c) whose future inclusion into the Reference Index is anticipated.

Whilst the level of sampling will vary over the life of the Fund depending on asset levels of the Fund, market structure and other factors, including liquidity, degree of correlation across different subsets of the taxable municipal market, the volume of issuances in the taxable municipal bond market and the diversity of different types of issuing entities, it is generally expected that the Fund will hold a total number of securities that is significantly less that the number in the Reference Index- frequently less than 10% - though this may change and the Investment Manager reserves the right to hold as many securities as it believes necessary to achieve the Fund's investment objective. The Fund will hold municipal securities (being debt securities issued by state and local governments in the United States, which are generally used to finance public projects), corporate bonds and other types of securities that may comprise the Reference Index.

The reason the Investment Manager expects to hold a significantly fewer securities than what is found in the Reference Index is that the issuance of municipal securities is frequently done in multiple, smaller issuances rather than in the less frequent, larger issues that are common in, for example, the investment grade corporate bond markets. As a result, the Reference Index has a very large number of individual securities with highly similar characteristics. It is these characteristics that the Investment Manager looks to replicate with the Sampling Strategy.

Invesco US Municipal Bond UCITS ETF (continued)

In addition, while the Investment Manager expects to manage the majority of inflows and outflows from the fund through purchase and sale of securities in the secondary market, the Investment Manager will participate significantly in the primary market as newly issued securities frequently exhibit attractive pricing and secondary market liquidity. These securities may not yet be included in the Reference Index and there is no guarantee that they will be included.

The investment objective of the Invesco ChiNext 50 UCITS ETF (the "Fund") is to provide exposure to the performance of the most liquid companies listed on the ChiNext market of the Shenzhen Stock Exchange in China.

In order to achieve the investment objective, the Fund will seek to replicate the net total return performance of the ChiNext 50 Capped Index (the "Reference Index"), less fees, expenses and transaction costs. Further information on the components and selection criteria of the Reference Index is set out under "General Description of the Reference Index" in the Supplement to the Prospectus

The Fund will generally seek to employ a replication method that looks to invest as far as possible and practicable in the constituents of the Reference Index. When employing a replication method, the Fund intends to replicate the Reference Index by holding all of its constituent securities in a similar proportion to their weightings in the Reference Index.

There are circumstances, however, where gaining access to the components of the Reference Index may be prohibited by applicable legal, regulatory or similar reasons, may not otherwise be in Shareholders' interest or may not otherwise be possible or practicable. Such circumstances may include, but are not limited to, a suspension of trading or insufficient liquidity of the underlying securities comprising the Reference Index. Where employing a replication method is not reasonably possible, the Sub-Fund will employ a sampling strategy ("Sampling Strategy") to select securities from the Reference Index using factors such as the industry sectors and liquidity. Where consistent with its investment objective, and in conjunction with the use of a Sampling Strategy, the Fund may also hold some securities which are not component securities of the Reference Index, but are of a similar nature to them and whose risk and return characteristics either (a) closely resemble the risk and return characteristics of constituents of the Reference Index or of the Reference Index as a whole, (b) whose addition improves the quality of the replication of the Reference Index, or (c) whose future inclusion into the Reference Index is anticipated.

The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

The Fund may also engage in transactions in FDIs for hedging and/or efficient portfolio management purposes. The Fund may use the following FDIs listed on a Market or traded OTC, as applicable: options and futures transactions, forward contracts, non-deliverable forwards and spot foreign exchange transactions. Further details on FDIs and how they may be used are contained in the main part of the Prospectus under "Appendix III - Use of Financial Derivative Instruments And Efficient Portfolio Management".

The Fund shall not invest more than 10% of its net assets in other UCITS or other open or closed ended CIS.

With the exception of permitted investment in unlisted securities or in units of open-ended CIS, investment will be limited to the stock exchanges and regulated markets set out in Appendix I of the Prospectus.

Invesco EUR AAA CLO UCITS ETF

The investment objective of Invesco EUR AAA CLO UCITS ETF (the "Fund") is to seek to provide consistent income and capital preservation over the long term.

In order to achieve the investment objective, the Fund will primarily invest in AAA-rated (or equivalently rated by a nationally recognised statistical rating organisation) tranches of Euro denominated floating rate debt securities issued by collateralised loan obligations ("CLOs").

A CLO is a structure that issues fixed- or floating-rate debt securities that are collateralised by a pool of loans and bonds, which primarily include senior secured loans, broadly syndicated loans (i.e., loans with offering sizes that are typically greater than EUR250 million), floating rate notes, high yield bonds and subordinated corporate loans, including loans and bonds that may be rated below investment grade or equivalent unrated loans or bonds. The underlying loans and bonds in a CLO are selected by the CLO's manager.

The Fund will invest in floating rate debt tranches of CLOs ("CLO Debt Securities"). The Fund will not invest in fixed rate debt tranches or equity tranches. The Fund may also invest in floating rate debt tranches of static CLOs which, unlike a typical CLO Debt Security, does not allow for active management of the underlying loan portfolio, meaning that once the loans and/or bonds are selected and placed in the CLO Debt Securities, there is no ability for the CLO manager to buy or sell loans and/or bonds except in very limited circumstances.

The Fund may invest in CLO Debt Securities of any maturity and tranche size.

The Fund may invest up to 10% of its net assets in securities that are denominated in currencies other than Euro. Exposure to exchange-rate fluctuations resulting from these investments will be hedged back to Euro at the Investment Manager's discretion.

The Fund is subject to risk retention requirements under the European Securitisation Regulation (EU 2017/2402) such that the Fund may only invest in CLOs if the originator, sponsor or original lender of the CLO has disclosed that it retains, at issuance and on an on-going basis, a material net economic interest in the CLO of at least 5%. If the originator, sponsor or original lender of the CLO ceases to retain the requisite material net economic interest and that position will not be imminently rectified, the Investment Manager will arrange for disinvestment of the relevant CLO as soon as reasonably practicable, having due regard to the best interests of the Shareholders.

At least 80% of the CLO Debt Securities in which the Fund will invest will be AAA-rated (as rated by at least one rating agency) CLO Debt Securities. Up to 20% of CLO Debt Securities in which the Fund will invest may be below AAA-rated subject to such CLO Debt Securities being rated investment grade and predominantly comprising AA-rated CLO Debt Securities. If a security is downgraded subsequent to its purchase by the Fund, the Investment Manager will take such action as required as soon as reasonably practicable, taking due account of the interests of its Shareholders.

The majority of CLO Debt Securities that the Fund will invest in will be classified as 144A and/or RegS securities.

The Fund will not invest in CLO Debt Securities where Invesco, or a subsidiary, is acting as the CLO manager.

The Fund may also invest a portion of its assets in cash or other short-term instruments, such as money market instruments (Euro-denominated government bonds and short-dated government bonds) or, money market funds, for the purpose of liquidity management purposes and managing redemptions.

Invesco USD AAA CLO UCITS ETF (continued)

The underlying loans and bonds in a CLO are selected by the CLO's manager.

The Fund will invest in floating rate and fixed rate debt tranches of CLOs ("CLO Debt Securities"). The Fund will not invest in equity tranches. The Fund may also invest in tranches of static CLO Debt Securities which, unlike a typical CLO Debt Security, does not allow for active management of the underlying loan portfolio, meaning that once the loans and/or bonds are selected and placed in the CLO Debt Securities, there is no ability for the CLO manager to buy or sell loans and/or bonds except in very limited circumstances. The Fund may invest in fixed rate tranches of CLO Debt Securities up to a maximum of 15% of its net assets. The Fund may also invest in "middle-market CLOs", which are CLO Debt Securities whose underlying loan collateral are substantially comprised of middle-market loans (i.e. loans with offering sizes generally below USD\$250million). The Fund may invest up to 15% of its net assets in middle market CLO Debt Securities.

The Fund may invest in CLO Debt Securities of any maturity and tranche size.
