

SICAV

Annual Report including audited financial statements As at December 31, 2023

No subscriptions should be made on the basis of the Financial Reports including audited financial statements alone. Subscriptions should only be made on the basis of the current Prospectus supplemented by the application form, the Key Investor Documents ("KIDs"), the latest Annual Report including audited financial statements and the latest unaudited Semi-Annual Report, if published thereafter.

Performance data shown represents past performance and is not a guarantee of future results. More recent performance may be lower or higher. Principal value and returns fluctuate over time (including as a result of currency fluctuations) so that Shares, when redeemed, will be worth more or less than their original cost. Performance shown is net of all Fund expenses, but does not include the effect of sales charges or correspondent bank charges, and assumes reinvestment of distributions. If such charges were included, returns would have been lower. Performance for other share classes will be more or less depending on differences in fees and sales charges.

Unless otherwise indicated, all defined terms used herein shall have the same meaning as set out in the Prospectus of the SICAV.

The Prospectus and KIDs are available free of charge at the registered office of the SICAV I in Luxembourg and on www.ossiam.com.

Ossiam Shiller Barclays CAPE® US Sector Value TR

Investment Objective

The investment objective of the Sub-Fund is to replicate, before the Sub-Fund's fees and expenses, the performance of the Shiller Barclays CAPE® US Sector Value Net TR Index closing level. The Sub-Fund is passively managed.

- Performance and Tracking Error vs Index

Index

Shiller Barclays CAPE® US Sector Value Net TR

	Sub-Fund Class Performance	Index Performance	Performance Difference	Tracking Error*	Target Tracking Error
UCITS ETF 1C (EUR)	23.92%	24.81%	-0.89%	0.05%	0.50%
UCITS ETF HEDGED INDEX 1C (EUR)	24.22%	25.38%	-1.17%	0.07%	0.50%
UCITS ETF 1C (USD)	28.22%	29.18%	-0.97%	0.06%	0.50%

This performance difference represents the net cost borne by the Sub-Fund which is the sum of administrative costs (Total Expense Ratio) and transaction costs less additional revenues coming from the synthetic replication used in this Sub-Fund. The effective Tracking Error is compliant with the Sub-Fund's objective which is to maintain a low Tracking Error.

- Performance and Volatility comparison vs Market Cap Index

Market Cap Index S&P 500 NR (S&P 500 EUR Hedged NTR for the EUR Hedged share class)

	Sub-Fund Class Performance	Index	Performance Difference	Sub-Fund Class Volatility**	Market Cap Index Volatility***	Volatility Difference
UCITS ETF 1C (EUR)	23.92%	21.41%	2.51%	14.82%	14.03%	0.79%
UCITS ETF HEDGED INDEX 1C (EUR)	24.22%	22.19%	2.03%	14.80%	13.47%	1.32%
UCITS ETF 1C (USD)	28.22%	25.67%	2.55%	14.84%	13.49%	1.35%

The Tracking Error was computed as the annualized standard deviation of the difference between the weekly returns of the Share Class and the weekly returns of the Index over a one-year period, unless specified otherwise

The Sub-Fund Class Volatility was computed as the annualized standard deviation of the daily returns of the Share Class over the period

The Market Cap Index Volatility was computed as the annualized standard deviation of the daily returns of the Market Cap Index over the period

(Performance are calculated over the period 2022-12-30 to 2023-12-29 unless specified otherwise)

Ossiam Shiller Barclays CAPE® Europe Sector Value TR

- Investment Objective

The investment objective of the Sub-Fund is to replicate, before the Sub-Fund's fees and expenses, the performance of the Shiller Barclays CAPE® Europe Sector Value Net TR Index closing level. The Sub-Fund is passively managed.

REPORT OF THE REVISEUR D'ENTREPRISES AGREE

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Ossiam Lux (the "Fund") and of each of its sub-funds, which comprise the statement of net assets and the statement of investments as at December 31, 2023, and the statement of operations and changes in net assets for the year ended and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Fund as at December 31, 2023, and of the results of their operations and changes in their net assets for year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for Opinion

We conducted our audit in accordance with the EU Regulation N° 537/2014, the Law of July 23, 2016 on the audit profession (Law of July 23, 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the *Commission de Surveillance du Secteur Financier* (CSSF). Our responsibilities under the EU Regulation N° 537/2014, the Law of July 23, 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "Responsibilities of the *réviseur d'entreprises agréé* for the Audit of the Financial statements" section of our report. We are also independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Société à responsabilité limitée au capital de 360.000 € RCS Luxembourg B 67.895 Autorisation d'établissement 10022179

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of the audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Why the matter was considered to be one of most significance in the audit?

Five sub-funds of the Fund invest in index-linked swaps. These swaps are over-the-counter (OTC) derivative instruments. We refer to Note 6 to the financial statements for the description of instruments held.

The commitment on these investments is significant to each sub-funds' investment activity. The index- linked swaps are neither directly held for safekeeping by the Depositary nor kept by other credit institutions but are contracts between the parties. This requires specific procedures by the Depositary on the information received from index-linked swaps' counterparties to verify ownership and keep a record of these other assets.

Index-linked swaps are either valued on basis of directly observable market data or unobservable input based on management estimates. The more significant the influence of those unobservable inputs the higher is the assessed risk of management bias.

We refer to Note 2b. relating to the valuation of swaps.

The existence and valuation of the Fund's indexlinked swaps has been determined to be a key audit matter.

How the matter was addressed in the audit

Our audit procedures over the existence and valuation of the Fund's index-linked swaps consisted of:

- obtaining an understanding of the Administrative Agent's and the Depositary's internal controls, including controls in place around the transaction processing of OTC derivatives, the reconciliation of positions between Fund accounting and broker and/or counterparty statements of open positions at valuation date, and valuation of different kinds of OTC derivative instruments held;
- requesting from the Depositary a confirmation of all assets held directly as well as of all other assets, including derivatives, held outside the Depositary network;
- inspecting reconciliations performed by the Depositary at year-end between their records and the statements of OTC derivatives open obtained from counterparties;
- reading the prospectus to understand how the Fund describes to shareholders its valuation policy for OTC derivative instruments, and confirming that the described valuation method is in line with those commonly used by market players and adequate for each type of OTC derivative instruments;
- performing substantive procedures to analyze the correlation between performance of the index of specific index-linked swaps and evolution of the net asset value per share of related sub-funds of the Fund;
- using our own valuation specialists to re-perform the valuation for a sample of swaps. Our internal specialists validated all key external inputs used in calculations to third party data sources. They re-performed at year-end an independent valuation of a sample of instruments held. We compared this independent valuation to the valuation disclosed in the financial statements at year-end.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our report of the *réviseur d'entreprises agréé* thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the Financial Statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the réviseur d'entreprises agréé for the Audit of the Financial Statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the *réviseur d'entreprises agréé* that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the EU Regulation N°537/2014, the Law of July 23, 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the EU Regulation N° 537/2014, the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or
 error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is
 sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material
 misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion,
 forgery, intentional omissions, misrepresentations, or the override of internal control;
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are
 appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the
 Fund's internal control;
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;
- Conclude on the appropriateness of the Board of Directors of the Fund use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the "réviseur d'entreprises agréé" to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the "réviseur d'entreprises agréé". However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our report unless law or regulation precludes public disclosure about the matter.

Report on Other Legal and Regulatory Requirements

We have been appointed as "réviseur d'entreprises agréé" by the General Meeting of the Shareholders on May 19, 2023 and the duration of our uninterrupted engagement, including previous renewals and reappointments, is eight years.

We confirm that the prohibited non-audit services referred to in the EU Regulation N° 537/2014 were not provided and that we remained independent of the Fund in conducting the audit.

For Deloitte Audit, Cabinet de révision agréé

Jean-Philippe Bachelet, *Réviseur d'entreprises agréé* Partner

Notes to the Financial Statements

As at December 31, 2023

Note 1 - GENERAL

Ossiam Lux (the "SICAV") is a *Société d'Investissement à Capital Variable* incorporated under the laws of the Grand Duchy of Luxembourg on April 5, 2011 and is currently governed by Part I of the Law of December 17, 2010 on undertakings for collective investment (the "UCIs"), as amended.

The registered office of the SICAV is located at 49, Avenue J.F. Kennedy, L-1855 Luxembourg. The SICAV is recorded in the Luxembourg Registre de Commerce et des Sociétés under the number B160071.

The SICAV's objective is to provide investors access to a diversified management expertise through a range of several separate Sub-Funds, each having its own investment objective and policy, the performance of which may be linked partially or in full to the performance of an underlying asset, such as, for instance, a basket of securities or an index.

As of December 31, 2023 shares are offered in twelve Sub-Funds (each, a "Sub-Fund"):

- Ossiam Europe ESG Machine Learning (launched on June 21, 2011): The Sub-Fund's investment objective is to deliver the net total return of a selection of equities which are listed in Europe while consistently integrating environmental, social and governance ("ESG") matters. The Sub-Fund is actively managed.
- Ossiam STOXX® Europe 600 ESG Equal Weight NR (launched on May 16, 2011): The Sub-Fund's investment objective is to replicate, before the Sub-Fund's fees and expenses, the performance of the STOXX® Europe 600 ESG Broad Market Equal Weight Index Net Return EUR closing level, which screens securities for certain environmental, social and governance (ESG) criteria. The STOXX® Europe 600 ESG Broad Market Equal Weight Index Net Return EUR is a total return index (net dividends reinvested), calculated and published by STOXX, expressed in EUR.
- Ossiam Shiller Barclays Cape® US Sector Value TR (launched on June 22, 2015): The Sub-Fund's investment objective is to replicate, before the Sub-Fund's fees and expenses, the performance of the Shiller Barclays Cape® US Sector Value Net TR Index (the "Index") closing level. The Index is a total return index (net dividends reinvested) expressed in USD, sponsored by Barclays and calculated and published by Bloomberg Index Services Limited.
- Ossiam Shiller Barclays Cape[®] Europe Sector Value TR (launched on December 30, 2014): The Sub-Fund's investment objective is to replicate, before the Sub-Fund's fees and expenses, the performance of the Shiller Barclays Cape[®] Europe Sector Value Net TR Index (the "Index") closing level. The Index is a total return index (net dividends reinvested) expressed in EUR, sponsored by Barclays and calculated and published by Bloomberg Index Services Limited.
- Ossiam Bloomberg Europe ex Eurozone PAB NR (launched on November 10, 2017): The Sub-Fund's investment objective is to replicate, before the Sub-Fund's fees and expenses, the performance of the Bloomberg PAB Europe DM ex Eurozone Large & Mid Cap Net Return Index (the "Index", ticker: EUXPABNL closing level. The Sub-Fund is a financial product that pursuant to the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (the "SFDR Regulation") promotes the reduction of carbon emissions through the replication of the Index. The Index is a Bloomberg Global Equity Paris-Aligned Index expressed in EUR, calculated and published by Bloomberg.
- Ossiam Bloomberg Japan PAB NR (launched on November 14, 2017): The Sub-Fund's investment objective is to replicate, before the Sub-Fund's fees and expenses, the performance of the Bloomberg PAB Japan Large & Mid Cap Net Return Index (the "Index", ticker: JPPABNL) closing level. The Sub-Fund is a financial product that pursuant to the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (the "SFDR Regulation") promotes the reduction of carbon emissions through the replication of the Index. The Index is a Bloomberg Global Equity Paris-Aligned Index expressed in Japanese yen (JPY), calculated and published by Bloomberg.

Notes to the Financial Statements (continued)

As at December 31, 2023

Note 1 - GENERAL (continued)

- Ossiam Bloomberg Eurozone PAB NR (launched on August 31, 2018): The Sub-Fund's investment objective is to replicate, before the Sub-Fund's fees and expenses, the performance of the Bloomberg PAB Eurozone DM Large & Mid Cap Net Return Index (the "Index", ticker: EURPABNL) closing level. The Sub-Fund is a financial product that pursuant to the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (the "SFDR Regulation") promotes the reduction of carbon emissions through the replication of the Index. The Index is a Bloomberg Global Equity Paris-Aligned Index expressed in EUR, calculated and published by Bloomberg.
- Ossiam US Steepener (launched on July 19, 2019): The Sub-Fund's investment objective is to replicate, before the Sub-Fund's fees and expenses, the performance of the Solactive US Treasury Yield Curve Steepener 2-5 vs 10-30 Index (The "Index") closing level. The Index is a leveraged index which is expressed in USD, created by Solactive AG, and calculated and published by Solactive AG.
- Ossiam Euro Government Bonds 3-5Y Carbon Reduction (launched on May 13, 2020): The Sub-Fund's investment objective is to replicate, before the Fund's fees and expenses, the performance of the ICE 3-5 Year Euro Government Carbon Reduction Index (The "Index"). The Index is calculated and published by ICE Data Indices, LLC. The Index tracks the performance of EUR denominated sovereign debt publicly issued by Eurozone member countries which have a remaining term to final maturity greater than 3 years and less than 5 years.
- Ossiam Bloomberg Asia Pacific ex Japan PAB NR (launched on July 19, 2022): The Sub-Fund's investment objective is to replicate, before the Fund's fees and expenses, the performance of the Bloomberg PAB APAC DM ex-Japan Large & Mid Cap Net Return Index (The "Index") closing level. The Sub-Fund is a financial product that pursuant to the Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (the "SFDR Regulation") promotes the reduction of carbon emissions through the replication of the Index. The Index is a Bloomberg Global Equity Paris-Aligned Index expressed in USD, calculated and published by Bloomberg.
- Barclays Quantic Global E NR (launched on July 19, 2022): The Sub-Fund's investment objective is to replicate, before the Fund's fees and expenses, the performance of the Barclays Quantic Global E Index (The "Index") closing level. The Index is expressed in EUR. The Index is calculated by Solactive AG and published by Barclays Bank PLC.
- Ossiam Shiller Barclays Cape® Global Sector Value (launched on December 21, 2022): The Sub-Fund's investment objective is to replicate, before the Fund's fees and expenses, the performance of the Shiller Barclays CAPE® Global Sector Net TR Index (the "Index") closing level. The Index is a total return index (net dividends reinvested) expressed in USD, sponsored by Barclays and calculated and published by Bloomberg Index Services Limited.

Three Sub-Funds have been liquidated during the year:

- Ossiam Risk Weighted Enhanced Commodity Ex. Grains TR (launched on July 5, 2013; liquidated on April 20, 2023): The Sub-Fund's investment objective was to replicate, before the Sub-Fund's fees and expenses, the performance of the Risk Weighted Enhanced Commodity Ex. Grains Index Total Return USD (the "Index") closing level. The Index was created by Société Générale, calculated and published by S&P Dow Jones Indices LLC, expressed in USD. As of year-end, this liquidated sub-fund still hold amounts of cash in his Balance Sheet for 120,57 EUR.
- Ossiam Global Multi-Asset Allocation (launched on December 28, 2016; liquidated on June 5, 2023): The Sub-Fund's investment objective was to reflect, before the Fund's fees and expenses, the performance of the SGI Global Multi Asset Allocation Index™ EUR closing level. As of year-end, this liquidated sub-fund still hold amounts of cash in his Balance Sheet for 395,39 EUR.
- Ossiam Solactive Moody's Analytics IG EUR Select Credit (launched on December 29, 2017; liquidated on August 11, 2023): The Sub-Fund's investment objective is to replicate, before the Sub-Fund's fees and expenses, the performance of the Solactive Moody's Analytics IG EUR Select Credit Index (the "Index") closing level. The Index is a total return index, (net income reinvested at each rebalancing date) expressed in EUR, created by Solactive AG, and calculated and published by Solactive AG. As of year-end, this liquidated sub-fund still hold amounts of cash in his Balance Sheet for 27,64 EUR.

Notes to the Financial Statements (continued)

As at December 31, 2023

Note 1 - GENERAL (continued)

As of year end, the following liquidated sub-funds still hold amounts of cash:

- Ossiam MSCI Canada NR (liquidated in 2022) for an amount of 10.830,63 EUR
- A sleeve of Ossiam MSCI Canada NR for an amount of 24.989,46 EUR
- Ossiam World Minimum Variance NR (liquidated in 2020) for an amount of 311,61 USD

The financial statements are presented on the basis of the latest Net Asset Value ("NAV") calculated during the financial year. In accordance with the prospectus dated January 2023, the NAVs were calculated using the latest market values and exchange rates known at the time of the calculation meaning for all Sub-Funds as at December 31, 2023.

Ossiam is a French société à directoire et conseil de surveillance with a share capital of EUR 286 080, having its registered office located 6, place de la Madeleine, 75008 Paris, France, and with a registration number 512 855 958 RCS Paris.

Ossiam is registered as a *Société de Gestion de Portefeuille* with the French *Autorité des Marchés Financiers* under number GP10000016. Ossiam is a subsidiary of Natixis Investment Managers, which is ultimately controlled by Natixis, Paris, France.

Since January 2023, each share class for a given Sub-Fund is represented by separate Key Investor Document ("KID").

Note 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a) Presentation of financial statements

The financial statements are prepared in accordance with Luxembourg legal and regulatory requirements concerning undertakings for collective investment in transferable securities ("UCITS") and generally accepted accounting principles.

b) Method of Calculation

The value of each Sub-Fund's assets shall be determined as follows:

- Securities and money market instruments traded on exchanges and Regulated Markets last closing price (unless the Board of Directors of the SICAV believes that an occurrence after the publication of the last market price and before any Sub-Fund next calculates its net asset value will materially affect the security's value. In that case, the security may be fair valued: the Administrative Agent determines its fair value by or pursuant to procedures approved by the Board of Directors of the SICAV).
- Securities and money market instruments not traded on a Regulated Market (other than short-term money market instruments) - based upon valuations provided by pricing vendors, which valuations are determined based on normal, institutional-size trading of such securities using market information, transactions for comparable securities and various relationships between securities which are generally recognized by institutional traders.
- Swaps contracts the swaps contracts agreements are valued on the basis of a total return swap, which
 corresponds to the net positive or negative value resulting from, on one hand, either the market value or
 gain/(loss) of the portfolio of investments, and, on the other hand, of the market value or gain/(loss) of
 the index plus any additional payment related to dividend distributions for those indices which are total
 return indices. The net positive or negative value is disclosed in the Statement of Net Assets under the
 caption "Net unrealised gain/(loss) on swaps contracts" and net realised profit/(loss) and change in net
 unrealised appreciation/(depreciation) are presented in the Statement of Operations and Changes in Net
 Assets.

Notes to the Financial Statements (continued)

As at December 31, 2023

Note 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

b) Method of Calculation (continued)

- Forward foreign exchange contracts in order to track the Hedged Index performance, in addition to the use of swaps contracts, the SICAV will also enter into currency forward foreign exchange contracts to reduce the impact of exchange rate fluctuations between the currency of the Index and the foreign exchange currency in which the Hedged Index is calculated. Unrealised gain/(loss) is disclosed in the Statement of Net Assets under the caption "Unrealised gain/(loss) on forward foreign exchange contracts" and net realised profit/(loss) and change in net unrealised appreciation/(depreciation) are presented in the Statement of Operations and Changes in Net Assets. The forward foreign exchange contracts are valued on the basis of current settlement prices. When a settlement price is not used, forward foreign exchange contracts are valued at their fair value as determined pursuant to procedures approved by the Board of Directors of the SICAV, as used on a consistent basis.
- Units or shares of open-ended funds last published net asset value.
- Cash on hand or deposit, bills, demand notes, accounts receivable, prepaid expenses, cash dividends and interest declared or accrued and not yet received full amount, unless in any case such amount is unlikely to be paid or received in full, in which case the value thereof is arrived at after the SICAV or its agent makes such discount as it may consider appropriate in such case to reflect the true value thereof.
- All other assets fair market value as determined pursuant to procedures approved by the Board of Directors of the SICAV.

c) Foreign Exchange Translation

The value of all assets and liabilities not expressed in the reference currency of a Sub-Fund is converted into the reference currency of such Sub-Fund at rates last quoted by any major bank. Income and expenses expressed in currencies other than the reference currency of the Sub-Fund are converted into this currency at the exchange rate prevailing on the date of the transaction.

Foreign currency exchange gains or losses relating to investments, derivative financial investments, and all other foreign currency exchange gains or losses relating to monetary items, including cash and cash equivalents, are reflected in the net realised profit/(loss) or change in net unrealised appreciation/(depreciation) on forward foreign exchange contracts and foreign currencies in the Statement of Operations and Changes in Net Assets.

The exchange rates used as at December 31, 2023 are the following:

1 EUR = 1,618891285 AUD

1 EUR = 0,929728786 CHF

1 EUR = 7,45456574 DKK

1 EUR = 0,866528438 GBP

1 EUR = 8,625715813 HKD

1 EUR = 155,733576062 JPY

1 EUR = 11,218495378 NOK

1 EUR = 1,744689947 NZD

1 EUR = 4,343760494 PLN

1 EUR = 11,132498365 SEK

Notes to the Financial Statements (continued)

As at December 31, 2023

Note 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

c) Foreign Exchange Translation (continued)

1 EUR = 1,457143993 SGD

1 EUR = 1,104650135 USD

d) Net realised result on sales of investments

Net realised profit/(loss) on sales of investments has been determined on the basis of the average cost method.

e) Conversion of the acquisition cost of securities in the portfolio

For securities expressed in currencies other than the reference currency of the SICAV, the conversion of the acquisition cost is calculated based on the closing exchange rates of the day of purchase.

f) Combined Financial Statements

The accounts of each Sub-Fund are expressed in the Sub-Funds' reference currency. The combined figures of the SICAV are expressed in EUR and include the total of the financial statements of the different Sub-Funds. For the translation of the Statement of Net Assets and Statement of Operations and Changes in Net Assets, the exchange rates used are rates prevailing at the Sub-Funds' valuation point as at December 31, 2023.

g) Dividend and interest income

Dividend income are recorded on the ex-dividend date and are recognized on a net basis after withholding tax, if any. Interest income is accrued on a daily basis.

h) Dividend Distribution

Distributing Shares identified by the inclusion of a D in their name make periodic distributions in the form of cash, as decided by the Shareholders upon proposal of the Board of Directors of the SICAV. In addition, the Board of Directors of the SICAV may declare interim dividends.

The SICAV's administrative agent ("Administrative Agent") is responsible for calculating the amounts of any distribution.

The SICAV's paying agent ("Paying Agent") is responsible for liaising, and arranging, with the Depositary of the SICAV for the payment to Shareholders of any distribution.

There was no distribution during the year 2023.

Note 3 - FEES PAID TO THE MANAGEMENT COMPANY

The Management Company is entitled to receive from the SICAV a management fee. The Management Company pays the distributors and other fees out of the fees it receives from the SICAV.

The Management Fee is calculated as the difference between the amount of Total Expense Ratio of each Sub-Fund and the total real expenses paid by each. If the total real expenses paid by each Sub-Fund exceed the Total Expense Ratio, the Management Company will not receive any Management Fee and instead will support the difference as explained under Note 5.

Note 4 - TAXATION

Notes to the Financial Statements (continued)

As at December 31, 2023

Note 4 - TAXATION (continued)

The SICAV is not subject to any Luxembourg tax on interest or dividends received by any Sub-Fund, any realised or unrealised capital appreciation of Sub-Fund assets or any distribution paid by any Sub-Fund to Shareholders. The SICAV is not subject to any Luxembourg stamp tax or other duty payable on the issuance of Shares.

As per the article 175 - e) of the amended Law of December 17, 2010, UCIs whose securities are listed or traded on at least one stock exchange or another regulated market operating regularly, recognised and open to the public and whose exclusive object is to replicate the performance of one or more indices, are exempted from the subscription tax.

Notes to the Financial Statements (continued)

As at December 31, 2023

Note 5 - TOTAL EXPENSE RATIO ("TER")

The amount of expenses (in %) to be incurred annually by each Sub-Fund including among others the remuneration to the Management Company, the Depositary Bank, the Administrative Agent, the Auditor, the outside counsels and other professionals is:

	1C (EUR) Shares	UCITS ETF 1C (EUR) Shares	2C (EUR) Shares	UCITS ETF 1C (USD) Shares	2C (USD) Shares	UCITS ETF Hedged Index 1C (EUR) Shares	Hedged Index 1C (EUR) Shares

Notes to the Financial Statements (continued)

As at December 31, 2023

Note 5 - TOTAL EXPENSE RATIO ("TER") (continued)

The Total Expense Ratio by share class, as indicated in each Sub-Fund's description, does not necessarily include all the expenses linked to the Sub-Fund's investments (such as but not limited to brokerage fees and bank interest fees) that are paid by such Sub-Fund.

Costs and gross incomes provided by a Total Return Swap or performance swap shall be considered as basic flows between a Sub-Fund and a swap counterparty. Such costs and expenses will be borne by each Sub-Fund and the gross revenue will revert to the relevant Sub-Fund. These costs and expenses are not included in the Total Expense Ratio.

If the total real expenses paid by each Sub-Fund exceed the Total Expense Ratio, the Management Company will support the difference and the corresponding income will be presented under "Other Income" in the Statement of Operations and Changes in Net Assets and respectively in "Other Assets" in the Statement of Net Assets; at December 31, 2023, total real expenses didn't exceed the Total Expense Ratio for any Sub-Funds in current period.

Other charges presented in Statement of Operations and Changes in Net Assets includes i.a. audit fees, listing fees, distribution fees, advisory fees, legal fees, liquidity provider fees and subscription taxes.

Note 6 - TOTAL RETURN SWAPS

Exposure to swap counterparties is collateralized through daily margin calls on the following business day (T+1 of NAV date).

The following table details the gross aggregate unrealised value and the proportion of the Sub-Fund's Net Assets Value for Total Return Swaps analysed by counterparty, as at December 31, 2023:

Ossiam Shille	Ossiam Shiller Barclays Cape® US Sector Value TR:

¹ A basket swap is a swap in which the floating leg is based on the returns on a basket of underlying securities. Sub-Fund received collateral of 1,420,000 USD held by State Street Bank International GmbH, Luxembourg Branch. The country of incorporation is the one of the direct counterparty.

Note 7 - FORMATION EXPENSES

Charges relating to the creation of a new Sub-Fund or share class may be written off over a period not exceeding 5 years against the assets of that Sub-Fund or class.

There have been no formation expenses to be written off during the year ended December 31, 2023.

Note 8 - CHANGES IN THE SECURITIES PORTFOLIO

A copy of the list of changes in the securities portfolio during the reference year may be obtained free of charge at the depositary or paying agents and the representative's office.

Note 9 - TRANSACTION COSTS

During the year ended December 31, 2023 the transaction costs which have been defined as brokerage transaction costs and depositary bank transaction costs have been charged to the Sub-Funds in relation to purchases and sales of transferable securities, money market instruments, derivatives or any other eligible assets (brokerage transaction costs on fixed income or derivatives are excluded).

Brokerage transaction costs are included in the caption "Portfolio at cost" in the Statement of Net Assets of the Annual Report including the audited financial statements, and respectively in the captions "Net realised profit/(loss)" and "Change in net unrealised appreciation/(depreciation)" in the Statement of Operations and Changes in Net Assets.⁽¹⁾

Depositary transaction costs (not in TER) which are linked to Subscription or Redemption activity and paid using a portion of Subscription or Redemption replication fees paid by investors are neither reflected in the Statement of Net Assets nor in the Statement of Operations and Changes in Net Assets. Those fees are excluded from the TER and do not impact the Net Assets of the Sub-Funds. (2)

Depositary transaction costs which are not linked to Subscription or Redemption activity are included in the caption "Other expenses payable" in the Statement of Net Assets, and respectively in the caption "Depositary and Depositary transaction fees" in the Statement of Operations and Changes in Net Assets. Those fees are included in the Total Expense Ratio ("TER"). (3)

Notes to the Financial Statements (continued)

As at December 31, 2023

Note 10 - SIGNIFICANT EVENTS

The CSSF approved a new version of the Prospectus on January 23, 2023, to include SFDR pre-contractual disclosure requirements.

As a matter of economic rationalisation, the Board has approved the liquidation of the sub-funds: Ossiam Risk Weighted Enhanced Commodity Ex. Grains TR (liquidation took place on April 20, 2023), Ossiam Global Multi-Asset Allocation (liquidation took place on June 5, 2023) and Ossiam Solactive Moody's Analytics IG EUR Select Credit (liquidation took place on August 11, 2023).

Since January 23, 2023 the OSSIAM STOXX® EUROPE 600 ESG EQUAL WEIGHT NR (the sub-fund) investment policy has been amended. From this date the sub-fund solely uses physical replication and is no longer permanently invested for a minimum of 75% in equities or rights issued by companies having their registered office in the European Economic Area, excluding Liechtenstein. The sub-fund is consequently no longer eligible to the French Plan D'Epargne en Actions.

Article 24 of the Company's Articles of Association was amended so as to delete the obligation to notify the shareholders of a termination/amalgamation of sub-funds or share classes by way of a notice published in newspaper and replace it with an obligation to notify the shareholders of the same by way of a notice as per the provisions of the Prospectus.

The revised Articles of Association were approved at an extraordinary general meeting on 28 July 2023 and filed with the Luxembourgish RCS on September 4, 2023.

Note 11 - SUBSEQUENT EVENTS

On 31 January 2024 Ossiam signed the Exempt dealer Agreement with Altervest Ltd, with the effective date on 3 November 2023, for the provision of marketing and assistance services in Ontario and Québec, Canada. Consequently, Altervest Ltd will be the distributor of Ossiam Lux in Ontario and Québec regarding all the sub-funds except Ossiam Stoxx Europe 600 ESG Equal Weight NR.

Notes to the Financial Statements (continued)

As at December 31, 2023

Note 11 - SUBSEQUENT EVENTS (continued)

On 1 March 2024, the CSSF approved the amended prospectus of Ossiam Lux. The amendments made to the new prospectus relate to some clarifications/changes in relation to the following:

- 1. Re-classify the sub-funds below in SFDR Article 9 products, as they designate as a reference benchmark a Paris Aligned Benchmark and so, are deemed to have sustainable investments as defined in Article 2, point (17) of SFDR as their objective:
 - Ossiam Bloomberg Europe ex Eurozone PAB NR
 - Ossiam Bloomberg Europe PAB NR
 - Ossiam Bloomberg Eurozone PAB NR
 - Ossiam Bloomberg Asia Pacific ex Japan PAB NR
 - Ossiam Bloomberg Japan PAB NR
- 2. New Dealing Deadline of 3:00 p.m. (Luxembourg time) instead of 3:30 p.m. (Luxembourg time) for the sub-fund Ossiam Stoxx® Europe 600 ESG Equal Weight NR
- 3. Miscellaneous clarifications/changes were made in relation to, inter alia, performance comparisons, disclaimers, iNAV calculation, funds of funds, master feeder structures, management of collateral, etc.

There have been no other significant subsequent events after the year end that require disclosure in the financial statements.

Additional Information (Unaudited)

INFORMATION ON GLOBAL MARKET RISK EXPOSURE

The Management Company monitored the global exposure of the Sub-Funds for the year ended December 31, 2023 utilizing the commitment approach.

THE REMUNERATION POLICY

The Management Company has designed a remuneration policy compliant with the provisions of the 2014/91/UE Directive (UCITS V Directive).

The remuneration policy is consistent with, and promotes, sound and effective risk management, based on its business model that by its nature does not encourage excessive risk taking which would be inconsistent with the risk profile of the Sub-Funds. If and where the Management Company identifies those of its staff members whose professional activity has a material impact on the risk profiles of the Sub-Funds, it ensures that these staff members comply with the remuneration policy.

The remuneration policy integrates governance, a pay structure that is balanced between fixed and variable components, and risk and long-term performance alignment rules. These alignment rules are designed to be consistent with the interests of the Management Company, the SICAV and the shareholders, with respect to such considerations as business strategy, objectives, values and interests, and include measures to avoid conflicts of interest.

The Management Company ensures that the calculation of a part of the performance-based remuneration may be deffered over a three-year period and subject to the compliance with the risk-taking policy of the company.

The remuneration policy is applicable as from the financial period 2023 to the Management Company and is to be reviewed every year by the remuneration committee of the Management Company. Remuneration paid in respect of 2023 for 45 employees (remuneration pro rata temporis of their presence in the company): the fixed remuneration is EUR 4 515 806 and the variable remuneration in respect of the financial year 2023 is EUR 1 488 953.

The details of the remuneration policy of the Management Company are available on the "Legal mention" page in "Reports" section of www.ossiam.com, or you can request a free paper copy from the registered office of the Management Company.

Securities Financing Transactions Regulation

The following table provides an analysis of the maturity tenor of total return swaps, outstanding as at December 31, 2023:

				Maturity Tenor		
Fund	2 to 7 days	8 to 30 days	31 to 90 days	91 to 365 days	More than 365 days	Total return swap
Ossiam Shiller Barclays Cape [®] US Sector Value TR (USD)	-	204,034,600	-	(2,499,184)	-	201,535,417

The above maturity tenor analysis has been based on the respective transaction contractual maturity date.

The total return swaps are rolled forward from year to year.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Barclays Quantic Global E NR (the "Fund") **Legal entity identifier:** 549300XMUGUGTLFYSO27

Environmental and/or social characteristics

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product	have a sustain	nable i	nvest	tment objective?
Yes		••	X	No
It made sustainable investments with a environmental object in economic actiqualify as environ sustainable under Taxonomy in economic actinot qualify as environs qualify as environs sustainable under Taxonomy	vities that nmentally er the EU vities that do vironmentally	S	char vhile ustai	omoted Environmental/Social (E/S) acteristics and it did not have as its objective a nable investment, it had a proportion of % of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
It made sustainable i with a social objective				omoted E/S characteristics, but did not e any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted an active consideration of environmental issues. The Fund gained exposure to investments promoting environmental issues through derivatives (total return swaps).

The Fund's investment strategy is to replicate the Index. The anticipated level of tracking error in normal conditions is 1% over a one-year period.

The Index is, in turn, bound by its methodology, which includes the following binding elements:

- Index filter that excludes stocks of companies that:
 - ✓ Are without environmental risk rating from Sustainalytics;
 - ✓ Are involved in controversial businesses; or
 - ✓ Are non-compliant with the United Nations Global Compact.
- Best-in-class filter, which excludes the 50% bottom-ranked stocks by environmental risk rating within each industry.

Objectives of the Fund's sustainable investments:

- Actively contributing to fulfilling the objectives of the Paris Agreement;
- Reducing GHG emissions, in particular with science-based emissions reduction targets and net-zero commitments;
- Reducing biodiversity loss.
- How did the sustainability indicators perform?
- ...and compared to the previous periods?

Sustainability Indicator	Fund Value	Broad Market	Fund Value	Broad Market
	2022	Value 2022	2023	Value 2023
Environmental risk rating: Companies unmanaged environmental risk, interval from 0 to 40+, with 0 meaning the lowest available risk.	2.3	4.6	3.2	4.5

The environmental risk rating of the Fund is that of the Index, which is calculated using the environmental risk rating of each company composing the Index. There were no further third party assurances than the controls established by our data provider.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Objectives of the Fund's sustainable investments were:

- Actively contributed to fulfilling the objectives of the Paris Agreement;
- Reduce GHG emissions, in particular with science-based emissions reduction targets and net-zero commitments;
- Reduce biodiversity loss.

Contribution of the Fund's sustainable investments to these objectives:

The management company has defined metrics that are relevant to the objectives of the Fund's sustainable investments, with a view to monitoring and assessing their quality. By

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

meeting or remaining below, as the case may be, the thresholds set by the management company, the Fund's sustainable investments are assessed as having contributed to their objectives.

The eight metrics contribute as follows:

- Temperature alignment and climate change mitigation under the EU Taxonomy contribute to the first objective: fulfilling the objectives of the Paris Agreement;
- GHG emissions and SBTi commitment (three metrics) contribute to the second objective: the reduction of GHG emissions;
- Biodiversity impact contributes to the third objective: the reduction of biodiversity loss.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund ensures that its sustainable investments do not cause significant harm to any environmental or social sustainable objective by setting a pre-determined threshold on environmental and social indicators to which each investee company must meet or remain below to be considered as not causing significant harm. The fund takes into account the indicators for adverse impacts on sustainability factors set out in the table below.

— How were the indicators for adverse impacts on sustainability factors taken into account?

Indicator for adverse impact on sustainability	Theme	Metric	Fund policy
Greenhouse gas emissions	GHG emissions	Scope 1 GHG emissions Scope 2 GHG emissions Scope 3 GHG emissions Total GHG emissions	PAI are taken into account in the management company's definition of Sustainable Investment. To qualify as a sustainable investment, each investee company must meet or remain below, as the case may be, certain thresholds which have
	Carbon footprint GHG intensity of investee companies Exposure to companies active in the fossil fuel sector	Carbon footprint GHG intensity of investee companies Share of investments in companies active in the fossil fuel sector	been set taking into account the indicators for adverse impact on sustainability.
	Share of non- renewable energy consumption and production	Share of non- renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources	

Г		I	
	Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	
Biodiversity	Activities negatively affecting biodiversity- sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas	
Water	Emissions to water	Tonnes of emissions to water generated by investee companies per million EUR invested, expressed as a weighted average	
Waste	Hazardous waste and radioactive waste ratio	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average	
Social and employee matters	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	
	Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance /complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	

	Unadjusted gender pay gap Board gender diversity	Average unadjusted gender pay gap of investee companies Average ratio of female to male board members in investee companies, expressed as a percentage of all
	Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)	board members Share of investments in investee companies involved in the manufacture or selling of controversial weapons
Additional Climate Indicator	Investing in companies without carbon emission reduction initiatives	Share of investments in investee companies without carbon emission reduction initiatives aimed at aligning with the Paris Agreement
Additional Social Indicator	Rate of accidents	Rate of accidents in investee companies expressed as a weighted average

^{——} Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment was ensured through the Index' selection process which excludes companies in violation of the United Nations Global Compact (UNGC) principles, the Organisation of Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Certain principal adverse impacts ("PAI") are considered in the Index construction process as part of the "Index filters" described in the "Index Methodology" in its Prospectus.

Adverse Impact Indicator	Theme	Metric	Value over reporting period	Fund policy
Social and employee matters	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0%	At each rebalancing date, each company is selected for inclusion in the portfolio if assessed as not contributing to a PAI. Between rebalancing dates, discussions with companies and voting on pertinent resolutions, as

			described in Ossiam's engagement and voting
Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0%	policy, contribute to reducing the PAI on these sustainability factors

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2023-01-01 to 2023-12-29

Largest investments	Sector	% Assets	Country
Apple Inc	MANUFACTURING	6.7%	US
Microsoft Corp	INFORMATION AND COMMUNICATION	6.1%	US
AMAZON.COM INC	WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	6.1%	US
FACEBOOK INC-CLASS A	INFORMATION AND COMMUNICATION	5.5%	US
ELI LILLY & CO	MANUFACTURING	4.5%	US
ALPHABET INC-CL C	INFORMATION AND COMMUNICATION	4.5%	US
ADOBE INC	INFORMATION AND COMMUNICATION	3.7%	US
SALESFORCE.COM INC	INFORMATION AND COMMUNICATION	3.4%	US
NVIDIA Corp	MANUFACTURING	3.2%	US
ON SEMICONDUCTOR CORP	MANUFACTURING	2.8%	US
PEPSICO INC	MANUFACTURING	2.8%	US

HOME DEPOT INC	WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	2.7%	US
O'REILLY AUTOMOTIVE INC	WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	2.4%	US
GARTNER INC	INFORMATION AND COMMUNICATION	2.4%	US
UNITEDHEALTH GROUP INC	FINANCIAL AND INSURANCE ACTIVITIES	2.1%	US

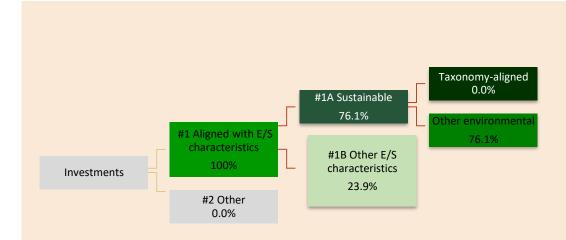

The figures referred in the above table have been calculated by averaging quarterly data for the reference period

What was the proportion of sustainability-related investments?

76.1%

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The denominator for all the calculation is the sum of total investments.

Asset allocation describes the share of investments in specific assets.

Investments	Weight 2022	Weight 2023
#1 Aligned with E/S characteristics	99.9%	100%
#1A Sustainable	53.2%	76.1%
Taxonomy-aligned	1.3%	0%
Other environmental	51.9%	76.1%
#1B Other E/S characteristics	46.6%	23.9%
#2 Other	0.2%	0%

In which economic sectors were the investments made?

The table below portrays the investments made in sectors and subsectors by the Fund, including the sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels as defined in Article 2, point (62), of Regulation (EU) 2018/1999 of the European Parliament and of the Council.

Economic Sectors	Average weight
ACCOMMODATION AND FOOD SERVICE ACTIVITIES	2.8%
Restaurants and mobile food service activities	2.8%
FINANCIAL AND INSURANCE ACTIVITIES	7.0%
Non-life insurance	2.1%
Other activities auxiliary to financial services, except insurance and pension funding	3.0%
Other monetary intermediation	1.9%
INFORMATION AND COMMUNICATION	30.2%
Motion picture, video and television programme production activities	1.1%
Other information service activities n.e.c.	3.0%
Other software publishing	14.8%
Publishing of computer games	0.7%
Web portals	10.6%
MANUFACTURING	33.4%
Manufacture of basic pharmaceutical products	6.6%

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Manufacture of communication equipment	6.7%
Manufacture of electrical equipment	2.1%
Manufacture of electronic components	8.4%
Manufacture of footwear	2.1%
Manufacture of household and sanitary goods and of toilet requisites	1.1%
Manufacture of motor vehicles	2.2%
Manufacture of refined petroleum products	1.1%
Manufacture of soft drinks; production of mineral waters and other bottled waters	3.1%
PROFESSIONAL. SCIENTIFIC AND TECHNICAL ACTIVITIES	6.6%
Research and experimental development on biotechnology	6.6%
TRANSPORTATION AND STORAGE	1.9%
Other postal and courier activities	1.1%
Passenger air transport	0.8%
WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	13.4%
Retail sale in non-specialised stores	2.2%
Retail sale of hardware, paints and glass in specialised stores	2.7%
Retail sale via mail order houses or via Internet	6.1%
Retail trade of motor vehicle parts and accessories	2.4%

During the reference period, the Fund was exposed to fossil fuels through investments made in DAL UN Equity Delta Air Lines Inc and VLO UN Equity Valero Energy Corp

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of investments classified as sustainable investments with an environmental objective aligned with the EU Taxonomy was 0%.

To qualify as an activity that is aligned with one of the six environmental objectives of the taxonomy, a company (1) needs to be involved in a taxonomy-eligible activity, (2) the activity has to be conducted in a manner that satisfies the Technical Screening Criteria (TSC) that have been set up for this activity within the taxonomy and (3) the activity needs to meet the Do No Significant Harm (DNSH) and Minimum Safeguards (MS) requirements that go beyond the particular environmental objective at hand (Sustainalytics).

EU Taxonomy environmental objectives

Proportion of EU Taxonomy aligned investments (revenue)

Climate change mitigation	0%
Climate change adaptation	0%
Sustainable use and protection of water and marine resources	0%
Transition to a circular economy	0%
Pollution prevention and control	0%
Protection and restoration of biodiversity ecosystems	0%

There were no further third party assurances than the controls established by our data provider.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU taxonomy¹?

	Yes:		
		In fossil gas	In nuclear energy
Χ	No		

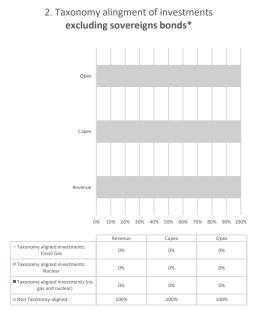

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- capital
 expenditure
 (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments

What was the share of investments made in transitional and enabling activities?

Fund	Proportion of investments in transitional activities	Proportion of investments in enabling activities
BARCLAYS QUANTIC Global E NR - UCITS ETF	0.0%	0.0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Proportion of investments with an environmental objective aligned with the EU Taxonomy	Value 2022	Value 2023	Difference
BARCLAYS QUANTIC Global E NR - UCITS ETF	1.3%	0%	This reference period saw a decrease of 1.3% in comparison to the previous reference period

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

^{*}For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

During the reporting period, the Fund's proportion of investments classified as sustainable investments with an environmental objective not aligned with the EU Taxonomy was 76.1%. The sustainability policy used to determine the classification of the Fund's sustainable investments considers themes currently out of scope of the EU taxonomy. The Fund has a 0% EU Taxonomy aligned investments commitment.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included as "#2 Other" consisted of:

Cash, which was used to facilitate the day-to-day management of the Fund. As such, no environmental or social safeguard was required.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Management Company is an active steward of investments. It integrates ESG analysis in its investment strategies. It engages invested companies to promote sustainable approaches. It votes at the annual meetings in a way that promotes sustainable approaches and in line with the outcome of its conversations with invested companies. The last two items are described in Ossiam's Voting and Engagement Policy, which is available on the website.

Over the reference period, the onus has been placed on conversations with investee companies focusing on nutrition, prevention of biodiversity loss, the environment, and in particular climate change, and for governance, the introduction of sustainability metrics in companies' remuneration policies, Say on Climate resolutions, and sustainability-related Board skills.

In addition, Ossiam has participated in collective initiatives urging companies to report on their emissions (with CDP), promoting a better approach to the production of animal protein (with FAIRR) and challenging companies facing severe social or environmental controversies (with ISS).

The Management Company publishes reports detailing and summarising its engagement and voting activities, which are available on its website.

How did this financial product perform compared to the reference benchmark?

The Fund has designated the Barclays Quantic Global E Index (the "Index") as a reference benchmark for the purpose of attaining the environmental characteristic it promotes.

The methodology used for the calculation of the index can be found at https://indices.barclays/file.app?action=shared&path=binda/BarclaysQUANTICGlobalEIndex exIMD.pdf

How does the reference benchmark differ from a broad market index?

The Index invests in global developed market stocks, selected based on the highest fundamental scores provided by Quantic and on their environmental risk rating from Sustainalytics, as mentioned in the Index Methodology in the prospectus. The selection process does not correspond to the commonly accepted definition of a broad market index.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The reference benchmark methodology is designed to exclude the bottom 50% of companies ranked on environmental risk rating, the sustainabilify indicator used to attain the environmental characteristic promoted by the Fund, within each industry. Therefore, the reference benchmark is, by construction, continuously aligned with the environmental characteristic that the Fund promotes, active consideration of environmental issues. The Fund tracking error was 0.06% over the reporting period

How did this financial product perform compared with the reference benchmark?

Sustainability Indicator	Financial Product Value	Reference Benchmark Value
Environmental risk rating: Companies unmanaged environmental risk, interval from 0 to 40+, with 0 meaning the lowest available risk.	3.2	2.6

How did this financial product perform compared with the broad market index?

Sustainability Indicator	Financial Product Value	Broad market index
Environmental risk rating: Companies unmanaged environmental risk, interval from 0 to 40+, with 0 meaning the lowest available risk.	3.2	4.5

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Ossiam Bloomberg Asia Pacific ex Japan PAB NR (the "Fund")

Legal entity identifier: 549300JN1SPLJELULJ79

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?				
Yes	• Ω X No			
It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of _76.5% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy x with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective			
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments			

an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable investment means

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation

That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promotes the reduction of carbon emissions through the replication of the Bloomberg PAB APAC DM ex-Japan Large & Mid Cap Net Return Index (the "Index").

The Index qualifies as an EU Paris-aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011. The methodology used for the calculation of the Index can be found in the "Equity indices fact sheets and Publications" section of the Bloomberg website: https://www.bloomberg.com/professional/product/indices/esg-and-climate-indices-resources/

Paris-aligned benchmarks embed in their methodology the reduction of carbon emissions in a manner consistent with limiting global warming to below 2°, as stipulated in the Paris Agreement adopted on 12 December 2015. In particular, the Index seeks to contribute to reduce greenhouse gases (GHG) intensity by at least 50% compared to its parent, broad market index and at least 7% reduction on average per annum relative to the Index itself.

Therefore, by replicating its benchmark, the Fund promoted the reduction of carbon emissions.

- How did the sustainability indicators perform?
- ...and compared to the previous periods?

The Fund uses GHG intensity as its sustainability indicator. There were no further third party assurances than the controls established by our data provider.

Sustainability Indicator	Financial Product Value 2022	Index Value 2023	Broad Market Index Value 2022	Financial Product Value 2023	Index Value 2023	Broad Market Index Value 2023
GHG emissions intensity, tCO2e/revenues million EUR	224	221	394	174	169	318

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Objectives of the Fund's sustainable investments were:

- Actively contribute to fulfilling the objectives of the Paris Agreement;
- Reduce GHG emissions, in particular with science-based emissions reduction targets and net-zero commitments;
- Reduce biodiversity loss.

Contribution of the Fund's sustainable investments to these objectives:

The management company has defined metrics that are relevant to the objectives of the Fund's sustainable investments, with a view to monitoring and assessing their quality. By meeting or remaining below, as the case may be, the thresholds set by the management company, the Fund's sustainable investments were assessed as having contributed to their objectives.

The eight metrics contribute as follows:

- Temperature alignment and climate change mitigation under the EU Taxonomy contribute to the first objective: fulfilling the objectives of the Paris Agreement;
- GHG emissions and SBTi commitment (three metrics) contribute to the second objective: the reduction of GHG emissions;

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

• Biodiversity impact contributes to the third objective: the reduction of biodiversity loss.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund ensures that its sustainable investments do not cause significant harm to any environmental or social sustainable objective by setting a pre-determined threshold on environmental and social indicators to which each investee company must meet or remain below to be considered as not causing significant harm. The fund takes into account the indicators for adverse impacts on sustainability factors set out in the table below.

How were the indicators for adverse impacts on sustainability factors taken into account?

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment was ensured through the Index' selection process which excludes companies in violation of the United Nations Global Compact (UNGC) principles, the Organisation of Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The way the Fund considers principal adverse impacts (PAI) is set out in the table below

Indicators for adverse impact on sustainability		Theme	Metric	Value over reporing period	Index Methodology
factors					
Greenhouse gas emissions	1.	GHG emissions	Scope 1 GHG emissions Scope 2 GHG emissions Scope 3 GHG emissions Total GHG emissions	2,140 tCO2e 1,125 tCOe 4,074 tCOe 7,339 tCO2e	At each rebalancing date, calculations are made using security level data. The GHG intensity of the portfolio,

The figures referred in the above table have been calculated by averaging quarterly data for the reference period

What was the proportion of sustainability-related investments?

76.5%

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The denominator for all the calculations is the sum of total investments.

Investments	Weight 2022	Weight 2023
#1 Aligned with E/S characteristics	99.7%	99.9%
#1A Sustainable	61.9%	76.5%
Taxonomy-aligned	6.8%	0.0%
Other environmental	55.1%	76.5%
#1B Other E/S characteristics	37.8%	23.5%
#2 Other	0.3%	0.1%

In which economic sectors were the investments made?

The table below portrays the investments made in sectors and subsectors by the Fund, including the sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation,

Asset allocation describes the share of investments in specific assets.

storage and trade, of fossil fuels as defined in Article 2, point (62), of Regulation (EU) 2018/1999 of the European Parliament and of the Council.

During the reference period, the Fund was exposed to fossil fuels through investments made in MIN AT Equity Mineral Resources Ltd and WES AT Equity Wesfarmers Ltd

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of investments classified as sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.0%.

To qualify as an activity that is aligned with one of the six environmental objectives of the taxonomy, a company (1) needs to be involved in a taxonomy-eligible activity, (2) the activity has to be conducted in a manner that satisfies the Technical Screening Criteria (TSC) that have been set up for this activity within the taxonomy and (3) the activity needs to meet the Do No Significant Harm (DNSH) and Minimum Safeguards (MS) requirements that go beyond the particular environmental objective at hand (Sustainalytics).

EU Taxonomy environmental objectives	Proportion of EU Taxonomy aligned investments (revenue)
Climate change mitigation	0%
Climate change adaptation	0%
Sustainable use and protection of water and marine resources	0%
Transition to a circular economy	0%
Pollution prevention and control	0%
Protection and restoration of biodiversity ecosystems	0%

There were no further third party assurances than the controls established by our data provider.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU taxonomy¹?

	Yes:		
		In fossil gas	In nuclear energy
Χ	No	1	

Taxonomy-aligned activities are expressed as a share

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

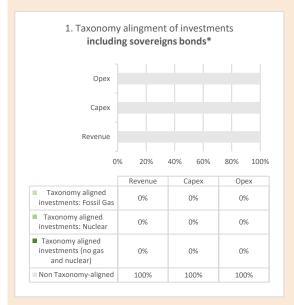

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

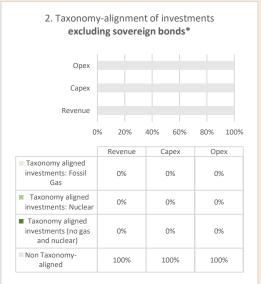

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments

What was the share of investments made in transitional and enabling activities?

Fund	Proportion of investments in transitional activities	Proportion of investments in enabling activities
OSSIAM BLOOMBERG ASIA PACIFIC ex JAPAN PAB NR - UCITS ETF	0.0%	0.0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Proportion of investments with an environmental objective aligned with the EU Taxonomy	Value 2022	Value 2023	Difference
OSSIAM BLOOMBERG ASIA PACIFIC ex JAPAN PAB NR - UCITS ETF	9.6%	0.0%	This reference period saw a decrease of 9.6% in comparison to the previous reference period

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

^{*}For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

During the reporting period, the Fund's proportion of investments classified as sustainable investments with an environmental objective not aligned with the EU Taxonomy was 76.5%. The sustainability policy used to determine the classification of the Fund's sustainable investments considers themes currently out of scope of the EU taxonomy. The Fund has a 0% EU Taxonomy aligned investments commitment.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included as "#2 Other" consisted of:

- Cash, held as ancillary liquidity, to the extent necessary for the proper day-to-day management of the Fund. As such, no environmental or social safeguard was required;
- Derivatives that may be used for FX hedging purposes in the share classes not denominated in USD. As such, no environmental or social safeguard is required.

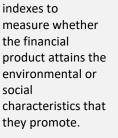

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Management Company is an active steward of investments. It integrates ESG analysis in its investment strategies. It engages invested companies to promote sustainable approaches. It votes at the annual meetings in a way that promotes sustainable approaches and in line with the outcome of its conversations with invested companies. The last two items are described in Ossiam's Voting and Engagement Policy, which is available on the website.

Over the reference period, the onus has been placed on conversations with investee companies focusing on nutrition, prevention of biodiversity loss, the environment, and in particular climate change, and for governance, the introduction of sustainability metrics in companies' remuneration policies, Say on Climate resolutions, and sustainability-related Board skills.

In addition, Ossiam has participated in collective initiatives urging companies to report on their emissions (with CDP), promoting a better approach to the production of animal protein (with FAIRR) and challenging companies facing severe social or environmental controversies (with ISS).

The Management Company publishes reports detailing and summarising its engagement and voting activities, which are available on its website.

Reference

benchmarks are

How did this financial product perform compared to the reference benchmark?

The Index has been designated as a reference benchmark. The methodology of the Index is available in the "Equity indices fact sheets and Publications" section of Bloomberg's website:

https://www.bloomberg.com/professional/product/indices/esg-and-climate-indices-resources/

How does the reference benchmark differ from a broad market index?

The Index has the Bloomberg APAC DM Large & Mid Cap Index as its parent index, which can be considered as being a relevant broad market index.

The Index aims to provide long term returns by investing in an equity portfolio seeking a reduction, by at least 50%, of the Greenhouse Gas (GHG) Intensity compared to its parent index, and by at least 7% on average per annum of GHG emissions.

Thus, the Index construction results in a selection of securities that may not reflect the broader market index.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The constituents of the Index are selected, weighted or excluded with the aim that the resulting benchmark portfolio's carbon emissions will be aligned with the objectives of the Paris Agreement adopted under the United Nations Framework Convention on Climate Change, approved by the Union on 5 October 2016.

The investment strategy of the Fund replicated the Index with a tracking error of 0.25% during the reporting period.

As such the strategy is bound by the composition and weights of the Index.

The replication of the Index is monitored on a daily basis. Thus, the process allows the alignment of the investment strategy with the methodology of the index on a daily basis.

How did this financial product perform compared with the reference benchmark?

Sustainability Indicator	Financial Product Value	Reference Benchmark Value
GHG emissions intensity, tCO2e/revenues millions EUR	174	169

How did this financial product perform compared with the broad market index?

Environmental and/or social characteristics

Did this financial product have a sustain	nable investment objective?
Yes	• Ο χ No
investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of _85.7% of sustainable investments X with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy X with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments

Sustainable **investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a

That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promotes the reduction of carbon emissions through the replication of the Bloomberg PAB Europe DM ex Eurozone Large & Mid Cap Net Return Index (the "Index").

The Index qualifies as an EU Paris-aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011. The methodology used for the calculation of the Index can be found in the "Equity indices fact sheets and Publications" section of the Bloomberg website: https://www.bloomberg.com/professional/product/indices/esg-and-climate-indices-resources/

Paris-aligned benchmarks embed in their methodology the reduction of carbon emissions in a manner consistent with limiting global warming to below 2°, as stipulated in the Paris Agreement adopted on 12 December 2015. In particular, the Index seeks to contribute to reduce greenhouse gases (GHG) intensity by at least 50% compared to its parent, broad market index and at least 7% reduction on average per annum relative to the Index itself.

Therefore, by replicating its benchmark, the Fund promoted the reduction of carbon emissions.

- How did the sustainability indicators perform?
- ...and compared to the previous periods?

The Fund uses GHG intensity as its sustainability indicator. There were no further third party assurances than the controls established by our data provider.

Sustainability Indicator	Financial Product Value 2022	Index Value 2023	Broad Market Index Value 2022	Financial Product Value 2023	Index Value 2023	Broad Market Index Value 2023
GHG emissions intensity, tCO2e/revenues million EUR	314	313	326	224	237	313

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Objectives of the Fund's sustainable investments were:

- Actively contribute to fulfilling the objectives of the Paris Agreement;
- Reduce GHG emissions, in particular with science-based emissions reduction targets and net-zero commitments;
- Reduce biodiversity loss.

<u>Contribution of the Fund's sustainable investments to these objectives:</u>

The management company has defined metrics that are relevant to the objectives of the Fund's sustainable investments, with a view to monitoring and assessing their quality. By meeting or remaining below, as the case may be, the thresholds set by the management company, the Fund's sustainable investments were assessed as having contributed to their objectives.

The eight metrics contribute as follows:

- Temperature alignment and climate change mitigation under the EU Taxonomy contribute to the first objective: fulfilling the objectives of the Paris Agreement;
- GHG emissions and SBTi commitment (three metrics) contribute to the second objective: the reduction of GHG emissions;

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

 Biodiversity impact contributes to the third objective: the reduction of biodiversity loss.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund ensures that its sustainable investments do not cause significant harm to any environmental or social sustainable objective by setting a pre-determined threshold on environmental and social indicators to which each investee company must meet or remain below to be considered as not causing significant harm. The fund takes into account the indicators for adverse impacts on sustainability factors set out in the table below.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicator for adverse impact on sustainability	Theme	Metric	Fund policy
Greenhouse gas emissions	Carbon footprint GHG intensity of investee companies Exposure to companies active in the fossil fuel sector Share of nonrenewable energy consumption and production	Scope 1 GHG emissions Scope 2 GHG emissions Scope 3 GHG emissions Total GHG emissions Carbon footprint GHG intensity of investee companies Share of investments in companies active in the fossil fuel sector Share of non- renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total	PAI are taken into account in the management company's definition of Sustainable Investment. To qualify as a sustainable investment, each investee company must meet or remain below, as the case may be, certain thresholds which have been set taking into account the indicators for adverse impact on sustainability.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment is ensured through the Index' selection process which excluded companies in violation of the United Nations Global Compact (UNGC) principles, the Organisation of Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The way the Fund considers principal adverse impacts (PAI) is set out in the table below:

Indicators for adverse impact on sustainability factors		Theme	Metric	Value over the reporting period	Index Methodology
Greenhouse gas emissions	2.	Carbon footprint GHG intensity of investee companies	Scope 1 GHG emissions Scope 2 GHG emissions Scope 3 GHG emissions Total GHG emissions Carbon footprint GHG intensity of investee companies	1,744 tCO2e 712 tCO2e 6,585 tCO2e 9,040 tCO2e 76.1 tCOe / revenues million EUR 225 tCOe / revenues million EUR	At each rebalancing date, calculations are made using security level data. The GHG intensity of the portfolio, including Scope 1, 2, and 3 GHG emissions, shall be at least 50% lower than the GHG intensity of the investable universe. Between rebalancing dates, discussions with companies and voting on pertinent resolutions, as described in Ossiam's engagement and voting policy, contribute to reducing the PAI on these sustainability

The figures referred in the above table have been calculated by averaging quarterly data for the reference period.

What was the proportion of sustainability-related investments?

85.7%

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The denominator for all the calculations is the sum of total investments.

Investments	Weight 2022	Weight 2023
#1 Aligned with E/S characteristics	99.9%	99.9%
#1A Sustainable	77.9%	85.7%
Taxonomy-aligned	2.2%	0.6%
Other environmental	75.7%	85.1%
#1B Other E/S characteristics	22.0%	14.2%
#2 Other	0.1%	0.1%

In which economic sectors were the investments made?

The table below portrays the investments made in sectors and subsectors by the Fund, including the sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels as defined in Article 2, point (62), of Regulation (EU) 2018/1999 of the European Parliament and of the Council.

Economic sectors	Average Weight
ACCOMMODATION AND FOOD SERVICE ACTIVITIES	1.0%

TRANSPORTATION AND STORAGE	2.5%
Other transportation support activities	1.4%
Passenger air transport	0.2%
Sea and coastal freight water transport	0.3%
Sea and coastal passenger water transport	0.6%
WATER SUPPLY; SEWERAGE, WASTMANAGEMENT AND REMEDIATION ACTIVITIES	1.1%
Water collection, treatment and supply	1.1%
WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES	3.7%
Agents involved in the sale of a variety of goods	0.6%
Retail sale of clothing in specialised stores	1.6%

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the

Retail sale of food, beverages and tobacco in specialised stores	1.3%
Retail sale of hardware, paints and glass in specialised stores	0.1%
Retail sale of watches and jewellery in specialised stores	0.1%

During the reference period, the Fund was exposed to fossil fuels derived revenue through investments made in PGHN SE Equity Partners Group Holding AG, CCEP UW Equity Coca-Cola Europacific Partners, and AKER NO Equity Aker ASA

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of investments classified as sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.6%.

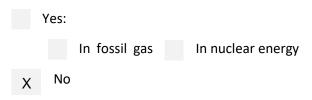

To qualify as an activity that is aligned with one of the six environmental objectives of the taxonomy, a company (1) needs to be involved in a taxonomy-eligible activity, (2) the activity has to be conducted in a manner that satisfies the Technical Screening Criteria (TSC) that have been set up for this activity within the taxonomy and (3) the activity needs to meet the Do No Significant Harm (DNSH) and Minimum Safeguards (MS) requirements that go beyond the particular environmental objective at hand (Sustainalytics).

EU Taxonomy environmental objectives	Proportion of EU Taxonomy aligned investments (revenue)
Climate change mitigation	0.6%
Climate change adaptation	0%
Sustainable use and protection of water and marine resources	0%
Transition to a circular economy	0%
Pollution prevention and control	0%
Protection and restoration of biodiversity ecosystems	0%

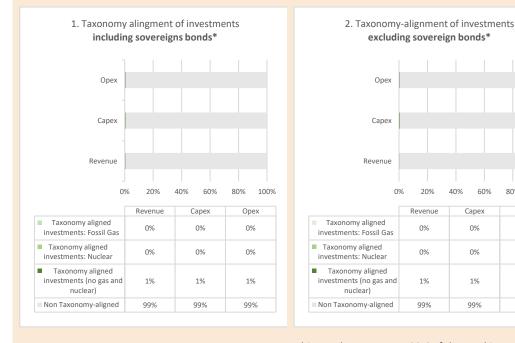

There were no further third party assurances than the controls established by our data provider.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU taxonomy¹?

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective –

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

Fund	Proportion of investments in transitional activities	Proportion of investments in enabling activities
OSSIAM BLOOMBERG EUROPE ex EUROZONE PAB NR	0.0%	0.5%

^{*}For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Proportion of investments with an environmental objective aligned with the EU Taxonomy	Value 2022	Value 2023	Difference
OSSIAM BLOOMBERG EUROPE ex EUROZONE PAB NR	1.6%	0.6%	This reference period saw a decrease of 1.0% in comparison to the previous reference period

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

During the reporting period, the Fund's proportion of investments classified as sustainable investments with an environmental objective not aligned with the EU Taxonomy was 85.1%. The sustainability policy used to determine the classification of the Fund's sustainable investments considers themes currently out of scope of the EU taxonomy. The Fund has a 0% EU Taxonomy aligned investments commitment.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included as "#2 Other" consisted of:

- Cash, held as ancillary liquidity, to the extent necessary for the proper day-today management of the Fund. As such, no environmental or social safeguard was required;
- Derivatives that may be used for FX hedging purposes in the share classes not denominated in EUR. As such, no environmental or social safeguard was required.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Management Company is an active steward of investments. It integrates ESG analysis in its investment strategies. It engages invested companies to promote sustainable approaches. It votes at the annual meetings in a way that promotes sustainable approaches and in line with the outcome of its conversations with invested companies. The last two items are described in Ossiam's Voting and Engagement Policy, which is available on the website.

Over the reference period, the onus has been placed on conversations with investee companies focusing on nutrition, prevention of biodiversity loss, the environment, and in

particular climate change, and for governance, the introduction of sustainability metrics in companies' remuneration policies, Say on Climate resolutions, and sustainability-related Board skills.

In addition, Ossiam has participated in collective initiatives urging companies to report on their emissions (with CDP), promoting a better approach to the production of animal protein (with FAIRR) and challenging companies facing severe social or environmental controversies (with ISS).

The Management Company publishes reports detailing and summarising its engagement and voting activities, which are available on its website.

How did this financial product perform compared to the reference benchmark?

The Index has been designated as a reference benchmark. The methodology of the Index is available in the "Equity indices fact sheets and Publications" section of Bloomberg's website: https://www.bloomberg.com/professional/product/indices/esg-and-climate-indices-resources/.

How does the reference benchmark differ from a broad market index?

The Index has the Bloomberg Europe DM ex Eurozone Large & Mid Cap Index as its parent index, which can be considered as being a relevant broad market index.

The Index aims to provide long term returns by investing in an equity portfolio seeking a reduction, by at least 50%, of the Greenhouse Gas (GHG) Intensity compared to its parent index, and by at least 7% on average per annum of GHG emissions.

Thus, the Index construction results in a selection of securities that may not reflect the broader market index.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The constituents of the Index are selected, weighted or excluded with the aim that the resulting benchmark portfolio's carbon emissions will be aligned with the objectives of the Paris Agreement adopted under the United Nations Framework Convention on Climate Change, approved by the Union on 5 October 2016.

The investment strategy of the Fund replicated the Index with a tracking error of 0.23% during the reporting period.

As such the strategy is bound by the composition and weights of the Index.

The replication of the Index is monitored on a daily basis. Thus, the process allows the alignment of the investment strategy with the methodology of the index on a daily basis.

Legal entity identifier: 549300WPNLM3ORGU6L16

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes No It made **sustainable** It promoted Environmental/Social (E/S) Χ investments with an characteristics and while it did not have as its objective a environmental objective: % sustainable investment, it had a proportion of in economic activities that _87.4__% of sustainable investments qualify as environmentally with an environmental objective in economic sustainable under the EU X activities that qualify as environmentally Taxonomy sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally with an environmental objective in Χ economic activities that do not qualify as sustainable under the EU environmentally sustainable under the EU Taxonomy Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but **did not** make any sustainable investments with a social objective: ___%

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable

investment means an investment in an economic activity that contributes to

an environmental or social objective,

investment does not

any environmental or

social objective and

that the investee

companies follow

good governance

practices.

provided that the

significantly harm

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promotes the reduction of carbon emissions through the replication of the Bloomberg PAB Eurozone DM Large & Mid Cap Net Return Index (the "Index").

The Index qualifies as an EU Paris-aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011. The methodology used for the calculation of the Index can be found in the "Equity indices fact sheets and Publications" section of the Bloomberg website: https://www.bloomberg.com/professional/product/indices/esg-and-climate-indices-resources/

Paris-aligned benchmarks embed in their methodology the reduction of carbon emissions in a manner consistent with limiting global warming to below 2°, as stipulated in the Paris

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Agreement adopted on 12 December 2015. In particular, the Index seeks to contribute to reduce greenhouse gases (GHG) intensity by at least 50% compared to its parent, broad market index and at least 7% reduction on average per annum relative to the Index itself.

Therefore, by replicating its benchmark, the Fund promoted the reduction of carbon emissions.

- How did the sustainability indicators perform?
- ...and compared to the previous periods?

The Fund uses GHG intensity as its sustainability indicator. There were no further third party assurances than the controls established by our data provider.

Sustainability Indicator	Financial Product Value 2022	Index Value 2022	Broad Market Index Value 2022	Financial Product Value 2023	Index Value 2023	Broad Market Index Value 2023
GHG emissions intensity, tCO2e/revenues million EUR	255	255	321	184	184	296

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Objectives of the Fund's sustainable investments were :

- Actively contribute to fulfilling the objectives of the Paris Agreement;
- Reduce GHG emissions, in particular with science-based emissions reduction targets and net-zero commitments;
- Reduce biodiversity loss.

Contribution of the Fund's sustainable investments to these objectives:

The management company has defined metrics that are relevant to the objectives of the Fund's sustainable investments, with a view to monitoring and assessing their quality. By meeting or remaining below, as the case may be, the thresholds set by the management company, the Fund's sustainable investments were assessed as having contributed to their objectives.

The eight metrics contribute as follows:

- Temperature alignment and climate change mitigation under the EU Taxonomy contribute to the first objective: fulfilling the objectives of the Paris Agreement;
- GHG emissions and SBTi commitment (three metrics) contribute to the second objective: the reduction of GHG emissions;

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

• Biodiversity impact contributes to the third objective: the reduction of biodiversity loss.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund ensures that its sustainable investments do not cause significant harm to any environmental or social sustainable objective by setting a pre-determined threshold on environmental and social indicators to which each investee company must meet or remain below to be considered as not causing significant harm. The fund takes into account the indicators for adverse impacts on sustainability factors set out in the table below.

How were the indicators for adverse impacts on sustainability factors taken into account?

Additional Social Indicator	Rate of accidents	Rate of accidents in investee companies expressed as a weighted average

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment was ensured through the Index' selection process which excludes companies in violation of the United Nations Global Compact (UNGC) principles, the Organisation of Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The way the Fund considers principal adverse impacts (PAI) is set out in the table below:

Indicators for adverse impact on sustainability factors		Theme	Metric	Value over the reporting period	Index Methodology
Greenhouse gas emissions	1.	GHG emissions	Scope 1 GHG emissions Scope 2 GHG	2,032 tCO2e	At each rebalancing date, calculations are
			emissions	2,331 tCO2e	made using security level
			Scope 3 GHG emissions	17,159 tCO2e	data. The GHG intensity of the
			Total GHG emissions	21,523 tCO2e	portfolio, including Scope 1,
	2.	Carbon footprint	Carbon footprint	72.7 tCO2e / revenues millions EUR	2, and 3 GHG emissions, shall
	3.	GHG intensity of investee companies	GHG intensity of investee companies	184 tCO2e / revenues millions EUR	be at least 50% lower than the GHG intensity of the investable universe. Between rebalancing dates, discussions with companies and voting on pertinent resolutions, as described in Ossiam's engagement and voting policy, contribute to reducing the PAI on these sustainability factors.
	4.	Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	1.5%	At each rebalancing date, companies that derive revenues from the
	5.	Share of non- renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to	Consumption : 56.5% Production: 11.8%	following activities: Coal, Oil & gas, and Electricity generation from fossil fuel sources, will be excluded if the proportion of their revenues is above the pre-

determined renewable energy sources, expressed threshold. as a percentage of total energy Between sources rebalancing dates, discussions with companies and voting on pertinent resolutions, as described in Ossiam's engagement and voting policy, contribute to reducing the PAI on these sustainability factors. Social and Violations of UN Share of At each Global Compact employee investments in rebalancing date, matters principles and investee each company is Organisation for selected for companies that Economic have been involved inclusion in the Cooperation in violations of the portfolio if UNGC principles or 0.0% assessed as not and Development **OECD** Guidelines contributing to a for Multinational PAI. (OECD) Enterprises Guidelines for Multinational Between Enterprises rebalancing dates, discussions Exposure to Share of with companies controversial investments in and voting on pertinent weapons (antiinvestee resolutions, as personnel companies mines, cluster involved in the described in munitions, manufacture or Ossiam's engagement and 0.4% chemical selling of weapons and controversial voting policy, contribute to biological weapons reducing the PAI weapons) on these sustainability factors

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2023-01-01 to 2023-12-29

Largests investments	Sector	% Assets	Country
ASML HOLDING NV	MANUFACTURING	5.6%	NL

Asset allocation describes the share of investments in specific assets.

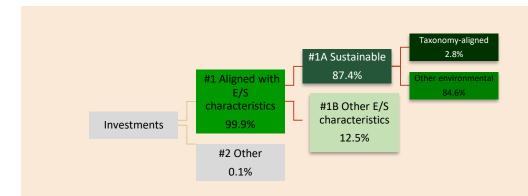

The figures referred in the above table have been calculated by averaging quarterly data for the reference period

What was the proportion of sustainability-related investments?

87.4%

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The denominator for all the calculations is the sum of total investments.

Investments	Weight 2022	Weight 2023
#1 Aligned with E/S characteristics	99.9%	99.9.%
#1A Sustainable	86.5%	87.4%
Taxonomy-aligned	2.6%	2.8%
Other environmental	84.0%	84.6%
#1B Other E/S characteristics	13.4%	12.5%
#2 Other	0.1%	0.1%

Ossiam's Sustainable Investment Policy (OSIP), which follows the rationale of the European Commission Q&A 06/04/2023 on Definition of sustainable investment Question 2 ("The SFDR does not set out minimum requirements that qualify concepts such as contribution, do no significant harm, or good governance, i.e. the key parameters of a 'sustainable investment'. Financial market participants must carry out their own assessment for each investment and disclose their underlying assumptions."), applies a set of criteria to determine an investment as a sustainable investment. The alignment to the EU taxonomy is a criterion but not an exhaustive criterion to be deemed a sustainable investment by OSIP. Therefore, on the question "What was the asset allocation?", the proportion calculation formula excludes from the sub-category #1A Sustainable taxonomy-aligned investments that do not meet OSIP criteria. The proportion of taxonomy-aligned investments that do not meet OSIP criteria is 0.2% and are disclosed under the #1B Other E/S characteristics.

In which economic sectors were the investments made?

The table below portrays the investments made in sectors and subsectors by the Fund, including the sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels as defined in Article 2, point (62), of Regulation (EU) 2018/1999 of the European Parliament and of the Council.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of investments classified as sustainable investments with an environmental objective aligned with the EU Taxonomy was 2.8%.

To qualify as an activity that is aligned with one of the six environmental objectives of the taxonomy, a company (1) needs to be involved in a taxonomy-eligible activity, (2) the activity has to be conducted in a manner that satisfies the Technical Screening Criteria (TSC) that have been set up for this activity within the taxonomy and (3) the activity needs to meet the Do No Significant Harm (DNSH) and Minimum Safeguards (MS) requirements that go beyond the particular environmental objective at hand (Sustainalytics).

EU Taxonomy environmental objectives	Proportion of EU Taxonomy aligned investments (revenue)
Climate change mitigation	3.0%
Climate change adaptation	0%
Sustainable use and protection of water and marine resources	0%

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Transition to a circular economy	0%
Pollution prevention and control	0%
Protection and restoration of biodiversity ecosystems	0%

There were no further third party assurances than the controls established by our data provider.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU taxonomy¹?

Yes:
In fossil gas In nuclear energy

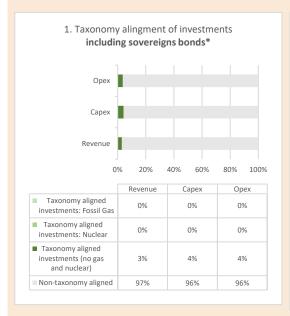

X No

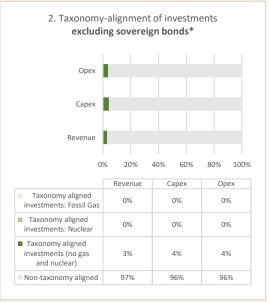

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- capital
 expenditure
 (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments

What was the share of investments made in transitional and enabling activities?

Fund	Proportion of investments in transitional activities	Proportion of investments in enabling activities
OSSIAM BLOOMBERG EUROZONE PAB NR	0.0%	1.6%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Proportion of investments with an environmental objective aligned with the EU Taxonomy	Value 2022	Value 2023	Difference
OSSIAM BLOOMBERG EUROZONE PAB NR	2.1%	3.0%	This reference period saw an increase of 0.9% in comparison to the previous reference period

^{*}For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

During the reporting period, the Fund's proportion of investments classified as sustainable investments with an environmental objective not aligned with the EU Taxonomy was 83.7%. The sustainability policy used to determine the classification of the Fund's sustainable investments considers themes currently out of scope of the EU taxonomy. The Fund has a 0% EU Taxonomy aligned investments commitment.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included as "#2 Other" consisted of:

 Cash, held as ancillary liquidity, to the extent necessary for the proper day-to-day management of the Fund. As such, no environmental or social safeguard was required;

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Management Company is an active steward of investments. It integrates ESG analysis in its investment strategies. It engages invested companies to promote sustainable approaches. It votes at the annual meetings in a way that promotes sustainable approaches and in line with the outcome of its conversations with invested companies. The last two items are described in Ossiam's Voting and Engagement Policy, which is available on the website.

Over the reference period, the onus has been placed on conversations with investee companies focusing on nutrition, prevention of biodiversity loss, the environment, and in particular climate change, and for governance, the introduction of sustainability metrics in companies' remuneration policies, Say on Climate resolutions, and sustainability-related Board skills.

In addition, Ossiam has participated in collective initiatives urging companies to report on their emissions (with CDP), promoting a better approach to the production of animal protein (with FAIRR) and challenging companies facing severe social or environmental controversies (with ISS).

The Management Company publishes reports detailing and summarising its engagement and voting activities, which are available on its website.

economic activities

under Regulation (EU) 2020/852.

How did this financial product perform compared to the reference benchmark?

The Index has been designated as a reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The methodology of the Index is available in the "Equity indices fact sheets and Publications" section of Bloomberg's website:

https://www.bloomberg.com/professional/product/indices/esg-and-climate-indices-resources/.

How does the reference benchmark differ from a broad market index?

The Index has the Bloomberg Eurozone DM Large & Mid Cap Index as its parent index, which can be considered as being a relevant broad market index.

The Index aims to provide long term returns by investing in an equity portfolio seeking a reduction, by at least 50%, of the Greenhouse Gas (GHG) Intensity compared to its parent index, and by at least 7% on average per annum of GHG emissions.

Thus, the Index construction results in a selection of securities that may not reflect the broader market index.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The constituents of the Index are selected, weighted or excluded with the aim that the resulting benchmark portfolio's carbon emissions will be aligned with the objectives of the Paris Agreement adopted under the United Nations Framework Convention on Climate Change, approved by the Union on 5 October 2016.

The investment strategy of the Fund replicates the Index with a tracking error of 0.14% over the reporting period.

As such the strategy is bound by the composition and weights of the Index.

The replication of the Index is monitored on a daily basis. Thus, the process allowed the alignment of the investment strategy with the methodology of the index on a daily basis.

How did this financial product perform compared with the reference benchmark?

Sustainability Indicator	Financial Product Value	Reference Benchmark Value
GHG emissions intensity, tCO2e/revenues million EUR	184	184

How did this financial product perform compared with the broad market index?

Sustainability Indicator	Financial Product Value	Broad Market Index Value

GHG emissions intensity, tCO2e/revenues million EUR	184	296

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Legal entity identifier: 549300GGS6XFHTVGVU15

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes No It made sustainable It promoted Environmental/Social (E/S) Χ investments with an characteristics and while it did not have as its objective a environmental objective: % sustainable investment, it had a proportion of in economic activities that _63.5__% of sustainable investments qualify as environmentally with an environmental objective in sustainable under the EU economic activities that qualify as Taxonomy environmentally sustainable under the EU in economic activities that do Taxonomy not qualify as environmentally with an environmental objective in sustainable under the EU economic activities that do not qualify as Taxonomy environmentally sustainable under the EU Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but **did not** make any sustainable investments with a social objective: %

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation

That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promotes the reduction of carbon emissions through the replication of the Bloomberg PAB Japan Large & Mid Cap Net Return Index (the "Index").

The Index qualifies as an EU Paris-aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011. The methodology used for the calculation of the Index can be found in the "Equity indices fact sheets and Publications" section of the Bloomberg website: https://www.bloomberg.com/professional/product/indices/esg-and-climate-indices-resources/

Paris-aligned benchmarks embed in their methodology the reduction of carbon emissions in a manner consistent with limiting global warming to below 2°, as stipulated in the Paris Agreement adopted on 12 December 2015. In particular, the Index seeks to contribute to reduce greenhouse gases (GHG) intensity by at least 50% compared to its parent, broad market index and at least 7% reduction on average per annum relative to the Index itself.

Therefore, by replicating its benchmark, the Fund promoted the reduction of carbon emissions.

- How did the sustainability indicators perform?
- ...and compared to the previous periods?

The Fund uses GHG intensity as its sustainability indicator.

Sustainability Indicator	Financial Product Value 2022	Index Value 2022	Broad Market Index Value 2022	Financial Product Value 2023	Index Value 2022	Broad Market Index Value 2023
GHG emissions intensity, tCO2e/revenues million EUR	233	233	255	192	190	255

There were no further third party assurances than the controls established by our data provider.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Objectives of the Fund's sustainable investments were :

- Actively contribute to fulfilling the objectives of the Paris Agreement;
- Reduce GHG emissions, in particular with science-based emissions reduction targets and net-zero commitments;
- Reduce biodiversity loss.

Contribution of the Fund's sustainable investments to these objectives:

The management company has defined metrics that are relevant to the objectives of the Fund's sustainable investments, with a view to monitoring and assessing their quality. By meeting or remaining below, as the case may be, the thresholds set by the management company, the Fund's sustainable investments were assessed as having contributed to their objectives.

The eight metrics contribute as follows:

- Temperature alignment and climate change mitigation under the EU Taxonomy contribute to the first objective: fulfilling the objectives of the Paris Agreement;
- GHG emissions and SBTi commitment (three metrics) contribute to the second objective: the reduction of GHG emissions;
- Biodiversity impact contributes to the third objective: the reduction of biodiversity loss.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund ensures that its sustainable investments do not cause significant harm to any environmental or social sustainable objective by setting a pre-determined threshold on environmental and social indicators to which each investee company must meet or remain below to be considered as not causing significant harm. The fund takes into account the indicators for adverse impacts on sustainability factors set out in the table below.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicator for adverse impact on sustainability	Theme	Metric	Fund policy
Greenhouse gas emissions	GHG emissions	Scope 1 GHG emissions Scope 2 GHG emissions Scope 3 GHG emissions Total GHG emissions	PAI are taken into account in the management company's definition of Sustainable Investment. To qualify as a sustainable investment, each investee company must meet or remain below, as the case may
	Carbon footprint GHG intensity of investee companies	Carbon footprint GHG intensity of investee companies	be, certain thresholds which have been set taking into account the indicators for adverse impact on sustainability.
	Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	
	Share of non- renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources	
	Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies,	

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment was ensured through the Index' selection process which excludes companies in violation of the United Nations Global Compact (UNGC) principles, the Organisation of Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The way the Fund considers principal adverse impacts (PAI) is set out in the table below:

Indicators for		Theme	Metric	Value over the	Index
adverse impact on sustainability factors				reporting period	Methodology
Greenhouse gas emissions	2.	Carbon footprint GHG intensity of investee companies	Scope 1 GHG emissions Scope 2 GHG emissions Scope 3 GHG emissions Total GHG emissions Carbon footprint GHG intensity of investee companies	1,395 tCO2e 2,792 tCO2e 13,691 tCO2e 17,878 tCO2e 84.3 tCO2/ revenues million EUR 192 tCO2/ revenues million EUR	At each rebalancing date, calculations are made using security level data. The GHG intensity of the portfolio, including Scope 1, 2, and 3 GHG emissions, shall be at least 50% lower than the GHG intensity of
					the investable universe. Between rebalancing dates, discussions with companies and voting on pertinent resolutions, as described in Ossiam's engagement and voting policy, contribute to reducing the PAI on these sustainability factors.
	4.	Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	0.8%	At each rebalancing date, companies that derive revenues from the

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2023-01-01 to 2023-12-29

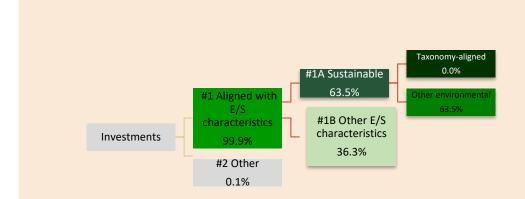

The figures referred in the above table have been calculated by averaging quarterly data for the reference period

What was the proportion of sustainability-related investments?

63.5%

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The denominator for all the calculations is the sum of total investments.

Asset allocation describes the share of investments in specific assets.

Investments	Weight 2022	Weight 2023
#1 Aligned with E/S characteristics	99.9%	99.9%
#1A Sustainable	61.3%	63.5%
Taxonomy-aligned	1.6%	0.0%
Other environmental	59.7%	63.5%
#1B Other E/S characteristics	38.6%	36.3%
#2 Other	0.1%	0.1%

In which economic sectors were the investments made?

The table below portrays the investments made in sectors and subsectors by the fund, including the sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels as defined in Article 2, point (62), of Regulation (EU) 2018/1999 of the European Parliament and of the Council.

Economis Sectors	Average weight
ADMINISTRATIVE AND SUPPORT SERVICE ACTIVITIES	1.2%
Activities of employment placement agencies	0.8%
Private security activities	0.4%
ARTS. ENTERTAINMENT AND RECREATION	1.2%
Activities of amusement parks and theme parks	1.2%

Manufacture of paints, varnishes and similar coatings, printing ink and mastics	0.6%
Manufacture of parts and accessories for motor vehicles	0.7%

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Manufacture of perfumes and toilet preparations 1.3% Manufacture of soft drinks; production of mineral waters and other bottled waters 0.7% 0.5% Manufacture of sports goods Printing and service activities related to printing 0.3% REAESTATE ACTIVITIES 6.4% Real estate agencies 0.5% Rental and operating of own or leased real estate 5.9% TRANSPORTATION AND STORAGE 4.4% Other passenger land transport 2.8% Other postal and courier activities 0.4% Passenger air transport 0.3% 0.9% Urban and suburban passenger land transport WHOLESALE AND RETAIL TRADE; REPAIR OF MOTOR VEHICLES AND MOTORCYCLES 7.6% 0.7% Retail sale in non-specialised stores Retail sale of clothing in specialised stores 1.7% Retail sale of food, beverages and tobacco in specialised stores 2.8% Retail sale of other household equipment in specialised stores 0.8% Retail sale via mail order houses or via Internet 1.5% Wholesale of other machinery, equipment and supplies 0.1%

During the reference period, the Fund was exposed to fossil fuels derived revenue through investments made in 9984 JT Equity SoftBank Group Corp.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of investments classified as sustainable investments with an environmental objective aligned with the EU Taxonomy was 0.0%.

To qualify as an activity that is aligned with one of the six environmental objectives of the taxonomy, a company (1) needs to be involved in a taxonomy-eligible activity, (2) the activity has to be conducted in a manner that satisfies the Technical Screening Criteria (TSC) that have been set up for this activity within the taxonomy and (3) the activity needs to meet the Do No Significant Harm (DNSH) and Minimum Safeguards (MS) requirements that go beyond the particular environmental objective at hand (Sustainalytics).

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- capital
 expenditure
 (CapEx) shows the
 green investments
 made by investee
 companies,
 relevant for a
 transition to a
 green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

EU Taxonomy environmental objectives	Proportion of EU Taxonomy aligned investments (revenue)
Climate change mitigation	0%
Climate change adaptation	0%
Sustainable use and protection of water and marine resources	0%
Transition to a circular economy	0%
Pollution prevention and control	0%
Protection and restoration of biodiversity ecosystems	0%

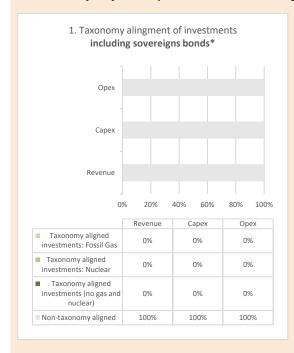

There were no further third party assurances than the controls established by our data provider.

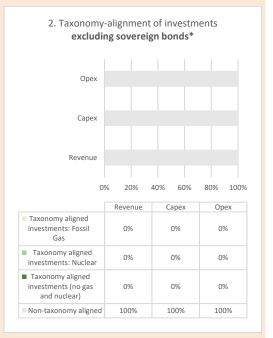

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU taxonomy¹?

	Yes:		
		In fossil gas	In nuclear energy
Χ	No		

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments

What was the share of investments made in transitional and enabling activities?

Fund	Proportion of investments in transitional activities	Proportion of investments in enabling activities
OSSIAM BLOOMBERG JAPAN PAB NR	0.0%	0.0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Proportion of investments with an environmental objective aligned with the EU Taxonomy	Value 2022	Value 2023	Difference
OSSIAM BLOOMBERG JAPAN PAB NR	3.6%	0.0%	This reference period saw a decrease of 3.6% in comparison to the previous reference period

^{*}For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

During the reporting period, the Fund's proportion of investments classified as sustainable investments with an environmental objective not aligned with the EU Taxonomy was 63.5%. The sustainability policy used to determine the classification of the Fund's sustainable investments considers themes currently out of scope of the EU taxonomy. The Fund has a 0% EU Taxonomy aligned investments commitment.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included as "#2 Other" consisted of:

- Cash, held as ancillary liquidity, to the extent necessary for the proper day-to-day management of the Fund. As such, no environmental or social safeguard was required;
- Derivatives that may be used for FX hedging purposes in the share classes not denominated in Japanese yen. As such, no environmental or social safeguard was required.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Management Company is an active steward of investments. It integrates ESG analysis in its investment strategies. It engages invested companies to promote sustainable approaches. It votes at the annual meetings in a way that promotes sustainable approaches and in line with the outcome of its conversations with invested companies. The last two items are described in Ossiam's Voting and Engagement Policy, which is available on the website.

Over the reference period, the onus has been placed on conversations with investee companies focusing on nutrition, prevention of biodiversity loss, the environment, and in particular climate change, and for governance, the introduction of sustainability metrics in companies' remuneration policies, Say on Climate resolutions, and sustainability-related Board skills.

In addition, Ossiam has participated in collective initiatives urging companies to report on their emissions (with CDP), promoting a better approach to the production of animal protein (with FAIRR) and challenging companies facing severe social or environmental controversies (with ISS).

The Management Company publishes reports detailing and summarising its engagement and voting activities, which are available on its website.

How did this financial product perform compared to the reference benchmark?

The Index has been designated as a reference benchmark.

The methodology of the Index is available in the "Equity indices fact sheets and Publications" section of Bloomberg's website:

https://www.bloomberg.com/professional/product/indices/esg-and-climate-indices-resources/.

How does the reference benchmark differ from a broad market index?

The Index has the Bloomberg Japan Large & Mid Cap Index as its parent index, which can be considered as being a relevant broad market index.

The Index aims to provide long term returns by investing in an equity portfolio seeking a reduction, by at least 50%, of the Greenhouse Gas (GHG) Intensity compared to its parent index, and by at least 7% on average per annum of GHG emissions.

Thus, the Index construction results in a selection of securities that may not reflect the broader market index.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The constituents of the Index are selected, weighted or excluded with the aim that the resulting benchmark portfolio's carbon emissions will be aligned with the objectives of the Paris Agreement adopted under the United Nations Framework Convention on Climate Change, approved by the Union on 5 October 2016.

The investment strategy of the Fund is to replicate the Index with a tracking error that must remain below 0.17%.

As such the strategy is bound by the composition and weights of the Index.

The replication of the Index is monitored on a daily basis. Thus, the process allowed the alignment of the investment strategy with the methodology of the index on a daily basis.

How did this financial product perform compared with the reference benchmark?

Sustainability Indicator	Financial Product Value	Reference Benchmark Value
GHG emissions intensity, tCO2e/revenues million EUR	192	190

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared with the broad market index?

Sustainability Indicator	Financial Product Value	Broad Market Index Value
GHG emissions intensity, tCO2e/revenues million EUR	192	255

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Legal entity identifier: 5493001PVMV624OP4T29

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes No It made sustainable It promoted Environmental/Social (E/S) characteristics and investments with an while it did not have as its objective a environmental objective: % sustainable investment, it had a proportion of in economic activities that % of sustainable investments qualify as environmentally with an environmental objective in sustainable under the EU economic activities that qualify as Taxonomy environmentally sustainable under the EU in economic activities that do Taxonomy not qualify as environmentally with an environmental objective in sustainable under the EU economic activities that do not qualify as Taxonomy environmentally sustainable under the EU Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but **did not** Χ make any sustainable investments with a social objective: ___%

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation

That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promotes the reduction of carbon emissions per capita and has designated the ICE 3-5 Year Euro Government Carbon Reduction Index (the "Index") as a reference benchmark for the purpose of attaining this environmental characteristic.

- The Fund's investment strategy is to replicate the Index with a tracking error, in normal market conditions, of 1%. As such the investment strategy is bound by the Index composition and weights;
- The Index, in turn, is bound by its methodology which, to attain a reduction of CO2 emissions per capita, selects Index constituents on a monthly basis using an

optimisation procedure which targets an average carbon metric 30% lower than that of the eligible universe (as described earlier in this Prospectus), using the carbon data of each country that constitutes the portfolio.

The Index is not a Paris agreement Benchmark

- How did the sustainability indicators perform?
- ...and compared to previous periods?

The carbon metric is calculated using the carbon data of each country that constitutes the portfolio and their respective weights in the portfolio. There were no further third party assurances than the controls established by our data provider.

Sustainability Indicator	Value 2022	Broad Market Value 2022	Value 2023	Broad Market Value 2023
Carbon emissions per capita, tCO2e per capita	5.4	5.7	5.4	6.2

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund did not commit to investing in sustainable investments

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index considered the following PAI:

GHG Intensity: the Index considers GHG emitted per capita, and not per unit of GDP. At each rebalancing date, the optimisation process will deliver a portfolio whose GHG intensity is 30% lower than the eligible universe (as described earlier in its Prospectus).

Countries subject to social violations: the Index invests only in countries with a high level of social safeguards (ie, the eurozone); the Index does not tally the absolute or relative number of countries that do not meet this criterion as it is expected to be 0.

Adverse impact indicator	Theme	Metric	Value over the reporting period
Environmental	GHG intensity	GHG intensity of investee countries	5.4 tCO2e per capita
Social	Investee countries subject to social violations	Number of investee countries subject to social violations (absolute number and relative number divided by all investee countries), as referred to in international treaties and conventions, United Nations principles and, where applicable, national law	0

What were the top investments of this financial product?

The figures referred in the above table have been calculated by averaging monthly/quarterly data for the reference period

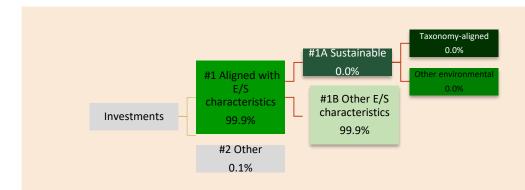

What was the proportion of sustainability-related investments?

0%

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Investments	Weight 2022	Weight 2023
#1 Aligned with E/S characteristics	99.9%	99.9%
#1A Sustainable	0.0%	0.0%
Taxonomy-aligned	0.0%	0.0%
Other environmental	0.0%	0.0%
#1B Other E/S characteristics	99.9%	99.9%
#2 Other	0.1%	0.1%

In which economic sectors were the investments made?

Not applicable, the investments made were in government bonds.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

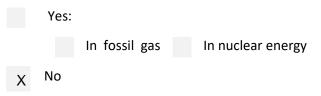

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

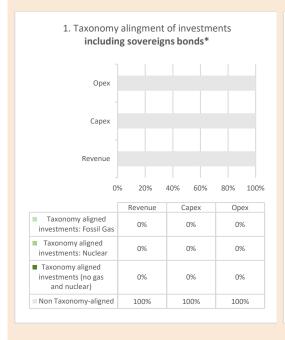

Taxonomy-aligned activities are expressed as a share of:

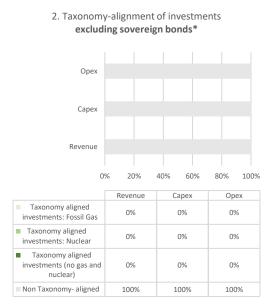

- turnover reflects the "greenness" of investee companies today.
- expenditure
 (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 0.1% of the total investments.

What was the share of investments made in transitional and enabling activities?

Fund	Proportion of investments in transitional activities	Proportion of investments in enabling activities
OSSIAM EURO GOVERNMENT BONDS 3-5Y CARBON REDUCTION - UCITS ETF	0.0%	0.0%

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

^{*}For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Proportion of investments with an environmental objective aligned with the EU Taxonomy	Value 2022	Value 2023	Difference
OSSIAM EURO GOVERNMENT BONDS 3- 5Y CARBON REDUCTION - UCITS ETF	0.0%	0.0%	No change on the proportion of investments with an environmental objective aligned with the EU Taxonomy

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included as "#2 Other" consisted in cash, which is used to facilitate the day-to-day management of the Fund, and other money market instruments. As such, no environmental or social safeguard was required.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

At each rebalancing date, the Management Company applied the investment strategy to construct the Fund's portfolio. The methodology integrates ESG rules which are used to filter and optimise the Fund's composition. This periodic rebalancing aligns the Fund with the environmental and social characteristics it promotes. Given the nature of the assets invested (government and corporate bonds), no engagement with issuers is considered.

How did this financial product perform compared to the reference benchmark?

The ICE 3-5 Year Euro Government Carbon Reduction Index has been designated as a reference benchmark. The methodology used for the calculation of the index can be found at https://indices.theice.com/

(It might be necessary to create an account to access the methodology)

How does the reference benchmark differ from a broad market index?

The Index is a subset of the ICE BofAML 3-5 Year Euro Government Index, which may be considered as being a relevant broad market index.

The Index aims to reduce fossil fuel emissions compared to said relevant broad market index and will consequently differ from the latter in terms of its composition and/or weights.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The aim of the Index is to reflect the performance of a subset of bonds of the ICE BofAML 3-5 Year Euro Government Index (the "Base Index").

The Index Methodology selects, weights or excludes securities, resulting in an Index portfolio.

The Fund's investment strategy is to replicate the Index, its tracking error was 0.52% for the reporting period.

As such the strategy is bound by the composition and weights of the Index. Thus, the physical replication process allowed the alignment of the investment strategy with the methodology of the Index on a continuous basis.

How did this financial product perform compared with the reference benchmark?

Sustainability Indicator	Financial Product Value	Reference Benchmark Value
Carbon emissions per capita, tCO2e per		
capita	5.4	5.3

How did this financial product perform compared with the broad market index?

Sustainability Indicator	Financial Product Value	Broad Market Index Value
Carbon emissions per capita, tCO2e per		
capita	5.4	6.2

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes No It made sustainable It promoted Environmental/Social (E/S) Χ characteristics and investments with an while it did not have as its objective a environmental objective: % sustainable investment, it had a proportion of in economic activities that 80.7 % of sustainable investments qualify as environmentally with an environmental objective in sustainable under the EU Χ economic activities that qualify as Taxonomy environmentally sustainable under the EU in economic activities that do Taxonomy not qualify as environmentally with an environmental objective in sustainable under the EU Χ economic activities that do not qualify as Taxonomy environmentally sustainable under the EU Taxonomy with a social objective It made sustainable investments It promoted E/S characteristics, but **did not** make any sustainable investments with a social objective: ___%

aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promotes:

- The reduction of greenhouse gas ("GHG") emissions;
- Minimum social standards; and
- Active consideration of environmental issues

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainable

investment means an investment in an economic activity that contributes to

an environmental or social objective,

provided that the investment does not

significantly harm

any environmental or

social objective and

that the investee

companies follow

good governance

The **EU Taxonomy** is

system laid down in

establishing a list of

economic activities. That Regulation

does not lay down a list of socially

economic activities.

investments with an environmental objective might be

environmentally sustainable

a classification

Regulation (EU)

2020/852,

sustainable

Sustainable

practices.

The investment strategy used the following binding element to attain the environmental and social characteristics:

- (i) "Ethical Filter": excludes securities from companies that:
- Undergo high-risk controversies;
- Are involved in the controversial weapons business (e.g., cluster munitions or chemical weapons);
- Have significant operations in the tobacco or coal industries;
- Are not compliant with the Ten Principles of the UN Global Compact
- Are referenced in major Scandinavian institutions' publicly available exclusion lists
- For stocks that are involved in the electricity production sub-sector, those that have more than 20% of their production from coal-fired plants.
- (ii) "Machine Learning process": excludes securities identified by the model as having an ESG negative outlook.
- (iii) Compliance with the portfolio constraints:
- Total GHG emissions must be 40% lower than that of the Benchmark;
- Potential GHG emissions from reserves must be 40% lower than that of the Benchmark; and
- ESG rating must be at least 10% higher than that of the Benchmark (based on ESG ratings for each company).

Objectives of the Fund's sustainable investments:

- Actively contributing to fulfilling the objectives of the Paris Agreement;
- Reducing GHG emissions, in particular with science-based emissions reduction targets and net-zero commitments;
- Reducing biodiversity loss.
- How did the sustainability indicators perform?
- ... and compared to previous periods?

The fund uses as sustainability indicators the ESG Score, Total GHG emissions, and GHG emissions from reserves. There were no further third party assurances than the controls established by our data provider.

Sustainability Indicator	Value 2022 (Average of quarterly values)	Value 2023 (Average of quarterly values)
ESG Total Score, interval from 0 to 100, with 100 being the best score.	76	77
Total GHG emissions (Scope 1+2+3), tCO2e	14 990	12 455
GHG emissions from reserve, tCO2e	11	42

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Objectives of the Fund's sustainable investments were:

- Actively contribute to fulfilling the objectives of the Paris Agreement;
- Reduce GHG emissions, in particular with science-based emissions reduction targets and net-zero commitments;
- Reduce biodiversity loss.

Contribution of the Fund's sustainable investments to these objectives:

The management company has defined metrics that are relevant to the objectives of the Fund's sustainable investments, with a view to monitoring and assessing their quality. By meeting or remaining below, as the case may be, the thresholds set by the management company, the Fund's sustainable investments are assessed as having contributed to their objectives.

The eight metrics contribute as follows:

- Temperature alignment and climate change mitigation under the EU Taxonomy contribute to the first objective: fulfilling the objectives of the Paris Agreement;
- GHG emissions and SBTi commitment (three metrics) contribute to the second objective: the reduction of GHG emissions;
- Biodiversity impact contributes to the third objective: the reduction of biodiversity loss.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund ensures that its sustainable investments do not cause significant harm to any environmental or social sustainable objective by setting a pre-determined threshold on environmental and social indicators to which each investee company must meet or remain below to be considered as not causing significant harm. The fund takes into account the indicators for adverse impacts on sustainability factors set out in the table below.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicator for adverse impact on sustainability	Theme	Metric	Fund policy
Greenhouse gas emissions	GHG emissions	Scope 1 GHG emissions	PAI are taken into account in the management company's
		Scope 2 GHG emissions	definition of Sustainable Investment. To qualify as a
		Scope 3 GHG emissions	sustainable investment, each investee company must meet or
		Total GHG emissions	remain below, as the case may
	Carbon footprint	Carbon footprint	be, certain thresholds which have
	GHG intensity of	GHG intensity of	been set taking into account the
	investee companies	investee companies	indicators for adverse impact on sustainability.

	Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	
	Share of non- renewable energy consumption and production	Share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources	
	Energy consumption intensity per high impact climate sector	Energy consumption in GWh per million EUR of revenue of investee companies, per high impact climate sector	
Biodiversity	Activities negatively affecting biodiversity- sensitive areas	Share of investments in investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas	
Water	Emissions to water	Tonnes of emissions to water generated by investee companies per million EUR invested, expressed as a weighted average	
Waste	Hazardous waste and radioactive waste ratio	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average	
Social and employee matters	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	
	Lack of processes and compliance	Share of investments in investee	

	mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance /complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	
	Unadjusted gender pay gap	Average unadjusted gender pay gap of investee companies	
	Board gender diversity	Average ratio of female to male board members in investee companies, expressed as a percentage of all board members	
	Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	
Additional Climate Indicator	Investing in companies without carbon emission reduction initiatives	Share of investments in investee companies without carbon emission reduction initiatives aimed at aligning with the Paris Agreement	
Additional Social Indicator	Rate of accidents	Rate of accidents in investee companies expressed as a weighted average	

[—] Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment was ensured through the Index' selection process which excludes companies in violation of the United Nations Global Compact (UNGC) principles, the Organisation of Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund opted to consider certain principal adverse impacts ("PAI") as part of the Ethical Filter and portfolio optimisation and weighting process described in the Investment Strategy section of its Supplement.

Adverse impact indicator	Theme	Metric	Value over the reporting period	Fund policy	
Greenhouse gas emissions	GHG emissions	Scope 1 GHG emissions	2,619 tCO2e	- At each rebalancing date, total GHG emissions of the	
		Scope 2 GHG emissions	1,081 tCO2e	portfolio must be 40% lower than the Benchmark. - Between rebalancing dates, discussions with companies and voting on pertinent resolutions, as described in Ossiam's engagement and voting policy, contribute to reducing the PAI on these sustainability factors.	
		Scope 3 GHG emissions	8,761 tCO2e		
		Total GHG emissions	12,461 tCO2e		

Social and employee matters	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0%	- At each rebalancing date, each company is selected to be included in the portfolio provided that is assessed as not contributing to a PAI. - Between rebalancing dates, discussions with companies and voting on pertinent resolutions, as described in Ossiam's engagement and voting policy, contribute to reducing the PAI on these sustainability factors.
	Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	0%	

What were the top investments of this financial product?

Largest investments	Sector	% Assets (Average)	Country
Deutsche Boerse AG	FINANCIAL AND INSURANCE ACTIVITIES	4.0%	DE
Reckitt Benckiser Group PLC	MANUFACTURING	3.9%	GB
Roche Holding AG	MANUFACTURING	3.8%	СН
Orange SA	INFORMATION AND COMMUNICATION	3.6%	FR
E.ON SE	ELECTRICITY. GAS. STEAM ANAIR CONDITIONING SUPPLY	3.3%	DE
Iberdrola SA	ELECTRICITY. GAS. STEAM ANAIR CONDITIONING SUPPLY	3.1%	ES
GSK PLC	MANUFACTURING	3.1%	GB
Equinor ASA	MANUFACTURING	2.9%	NO

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2023-01-01 to 2023-12-29

Deutsche Telekom AG	INFORMATION AND COMMUNICATION	2.8%	DE
Henkel AG & Co KGaA	MANUFACTURING	2.2%	DE
Muenchener Rueckversicherungs-	FINANCIAL AND INSURANCE ACTIVITIES	2.1%	DE
NatWest Group PLC	FINANCIAL AND INSURANCE ACTIVITIES	2.1%	GB
Novo Nordisk A/S	MANUFACTURING	2.0%	DK
Telefonica SA	INFORMATION AND COMMUNICATION	2.0%	ES
Beiersdorf AG	MANUFACTURING	2.0%	DE
Essity AB	MANUFACTURING	1.9%	SE

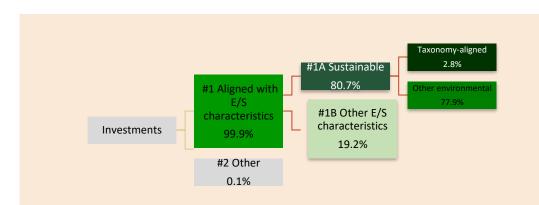

The figures referred in the above table have been calculated by averaging quarterly data for the reference period

What was the proportion of sustainability-related investments?

80.7%

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Asset allocation describes the share of investments in specific assets.

Investments	Weight 2022	Weight 2023
#1 Aligned with E/S characteristics	99.9%	99.9%
#1A Sustainable	83.2%	80.7%
Taxonomy-aligned	2.0%	2.8%
Other environmental	81.2%	77.9%
#1B Other E/S characteristics	16.7%	19.2%
#2 Other	0.1%	0.1%

Ossiam's Sustainable Investment Policy (OSIP), which follows the rationale of the European Commission Q&A 06/04/2023 on Definition of sustainable investment Question 2 ("The SFDR does not set out minimum requirements that qualify concepts such as contribution, do no significant harm, or good governance, i.e. the key parameters of a 'sustainable investment'. Financial market participants must carry out their own assessment for each investment and disclose their underlying assumptions."), applies a set of criteria to determine an investment as a sustainable investment. The alignment to the EU taxonomy is a criterion but not an exhaustive criterion to be deemed a sustainable investment by OSIP. Therefore, on the question "What was the asset allocation?", the proportion calculation formula excludes from the sub-category #1A Sustainable taxonomy-aligned investments that do not meet OSIP criteria. The proportion of taxonomy-aligned investments that do not meet OSIP criteria is 0.2% and are disclosed under the #1B Other E/S characteristics.

In which economic sectors were the investments made?

The table below portrays the investments made in sectors and subsectors by the Fund, including the sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels as defined in Article 2, point (62), of Regulation (EU) 2018/1999 of the European Parliament and of the Council.

Economic sectors	Average Weight

During the reference period, the Fund was exposed to fossil fuels through investments made in BOL FP Equity Bollore SE, NTGY SQ Equity Naturgy Energy Group SA, SBMO NA Equity SBM Offshore NV, EOAN GY Equity E.ON SE, IBE SQ Equity Iberdrola SA, AKRBP NO Equity Aker BP ASA, EQNR NO Equity Equinor ASA, ENG SQ Equity Enagas SA, DNORD DC Equity D/S Norden A/S, GALP PL Equity Galp Energia SGPS SA, VER AV Equity Verbund AG, RUI FP Equity Rubis SCA, VPN NA Equity Knoninklijke Vopak NV, REP SQ Equity Repsol SA, Getlink SE, EDP PL Equity EDP- Energia de Portugal SA, SPM IM Equity Saipem SpA, and ORSTED DC Equity Orsted AS

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of investments classified as sustainable investments with an environmental objective aligned with the EU Taxonomy was 2.8%.

To qualify as an activity that is aligned with one of the six environmental objectives of the taxonomy, a company (1) needs to be involved in a taxonomy-eligible activity, (2) the activity has to be conducted in a manner that satisfies the Technical Screening Criteria (TSC) that have been set up for this activity within the taxonomy and (3) the activity needs to meet the Do No Significant Harm (DNSH) and Minimum Safeguards (MS) requirements that go beyond the particular environmental objective at hand (Sustainalytics).

EU Taxonomy environmental objectives	Proportion of EU Taxonomy aligned investments (revenue)
Climate change mitigation	3%
Climate change adaptation	0%
Sustainable use and protection of water and marine resources	0%
Transition to a circular economy	0%

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

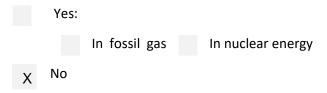

- turnover reflects the "greenness" of investee companies today.
- expenditure
 (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

Pollution prevention and control 0%

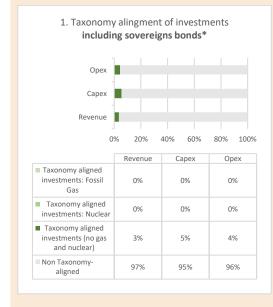

Protection and restoration of biodiversity ecosystems 0%

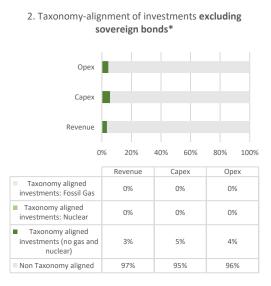

There were no further third party assurances than the controls established by our data provider.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU taxonomy¹?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

What was the share of investments made in transitional and enabling activities?

^{*}For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Fund	Proportion of investments in transitional activities	Proportion of investments in enabling activities
OSSIAM EUROPE ESG MACHINE LEARNING UCITS ETF	0%	2%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Proportion of investments with an environmental objective aligned with the EU Taxonomy	Value 2022	Value 2023	Difference
OSSIAM EUROPE ESG MACHINE LEARNING UCITS ETF	2%	3%	This reference period saw an increase of 1.5% in comparison to the previous reference period

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

During the reporting period, the Fund's proportion of investments classified as sustainable investments with an environmental objective not aligned with the EU Taxonomy was 77.9%. The sustainability policy used to determine the classification of the Fund's sustainable investments considers themes currently out of scope of the EU taxonomy. The Fund has a 0% EU Taxonomy aligned investments commitment.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included as "#2 Other" consisted of:

• Cash to the extent necessary for the proper day-to-day management of the Fund. As such, no environmental or social safeguard was required;

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Management Company is an active steward of investments. It integrates ESG analysis in its investment strategies. It engages invested companies to promote sustainable approaches. It votes at the annual meetings in a way that promotes sustainable approaches and in line with the outcome of its conversations with invested companies. The last two items are described in Ossiam's Voting and Engagement Policy, which is available on the website.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Over the reference period, the onus has been placed on conversations with investee companies focusing on nutrition, prevention of biodiversity loss, the environment, and in particular climate change, and for governance, the introduction of sustainability metrics in companies' remuneration policies, Say on Climate resolutions, and sustainability-related Board skills.

In addition, Ossiam has participated in collective initiatives urging companies to report on their emissions (with CDP), promoting a better approach to the production of animal protein (with FAIRR) and challenging companies facing severe social or environmental controversies (with ISS).

The Management Company publishes reports detailing and summarising its engagement and voting activities, which are available on its website.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

significantly harm

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promotes:

- Minimum social standards; and
- Active consideration of environmental issues.

The Fund has designated the STOXX® Europe 600 ESG Broad Market Equal Weight Index Net Return (the "Index") as a reference benchmark for the purpose of attaining these environmental and social characteristics.

The Fund's investment strategy is to replicate the Index. The anticipated level of tracking error in normal conditions is 0.50% over a one-year period.

The Index is, in turn, bound by its methodology, which includes the following elements:

- Exclusions that eliminate stocks of companies:
 - ✓ That are non-compliant based on the Sustainalytics Global Standards Screening assessment;
 - ✓ Are involved in controversial weapon business; and
 - ✓ Are involved in Tobacco Production, Thermal Coal and Military Contracting
- A Best-in-class filter which selects the 80% top-ranking securities, based on their ESG score, within each of the 11 ICB Industry groups.

Objectives of the Fund's sustainable investments:

- Actively contributing to fulfilling the objectives of the Paris Agreement;
- Reducing GHG emissions, in particular with science-based emissions reduction targets and net-zero commitments;
- Reducing biodiversity loss.
- How did the sustainability indicators perform?
- ...and compared to previous periods?

The Index provider, whose Index is replicated by the Fund, uses the ESG scores provided by the data provider as its sustainability indicator. There were no further third party assurances than the controls established by our data provider.

Sustainability Indicator	Financial Product Value 2022	Broad Market Index Value 2022	Financial Product Value 2023	Broad Market Index Value 2023
ESG Total Score, , interval				
from 0 to 100, with 100	74	74	75	75
being the best score.				

Corporate sustainability is measured by three criteria: environmental, social and governance (the ESG-criteria). The data provider has defined a set of indicators which evaluate the performance within each criterion. A score is given to each indicator. The scoring is based on a profound analysis performed by the data provider's analysts who evaluate every single company. The individual indicator scores are then aggregated into an ESG score for each company.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives? Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Objectives of the Fund's sustainable investments were:

- Actively contribute to fulfilling the objectives of the Paris Agreement;
- Reduce GHG emissions, in particular with science-based emissions reduction targets and net-zero commitments;
- Reduce biodiversity loss.

Contribution of the Fund's sustainable investments to these objectives:

The management company has defined metrics that are relevant to the objectives of the Fund's sustainable investments, with a view to monitoring and assessing their quality. By meeting or remaining below, as the case may be, the thresholds set by the management company, the Fund's sustainable investments are assessed as having contributed to their objectives.

The eight metrics contribute as follows:

- Temperature alignment and climate change mitigation under the EU Taxonomy contribute to the first objective: fulfilling the objectives of the Paris Agreement;
- GHG emissions and SBTi commitment (three metrics) contribute to the second objective: the reduction of GHG emissions;
- Biodiversity impact contributes to the third objective: the reduction of biodiversity loss.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund ensures that its sustainable investments do not cause significant harm to any environmental or social sustainable objective by setting a pre-determined threshold on environmental and social indicators to which each investee company must meet or remain below to be considered as not causing significant harm. The fund takes into account the indicators for adverse impacts on sustainability factors set out in the table below.

How were the indicators for adverse impacts on sustainability factors taken into account?

Indicator for adverse impact on sustainability	Theme	Metric	Fund policy
Greenhouse gas emissions	Carbon footprint GHG intensity of investee companies	Scope 1 GHG emissions Scope 2 GHG emissions Scope 3 GHG emissions Total GHG emissions Carbon footprint GHG intensity of investee companies	PAI are taken into account in the management company's definition of Sustainable Investment. To qualify as a sustainable investment, each investee company must meet or remain below, as the case may be, certain thresholds which have been set taking into account the indicators for adverse impact on sustainability.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of investments classified as sustainable investments with an environmental objective aligned with the EU Taxonomy was 1.6%.

To qualify as an activity that is aligned with one of the six environmental objectives of the taxonomy, a company (1) needs to be involved in a taxonomy-eligible activity, (2) the activity has to be conducted in a manner that satisfies the Technical Screening Criteria (TSC) that have been set up for this activity within the taxonomy and (3) the activity needs to meet the Do No Significant Harm (DNSH) and Minimum Safeguards (MS) requirements that go beyond the particular environmental objective at hand (Sustainalytics).

EU Taxonomy environmental objectives	Proportion of EU Taxonomy aligned investments (revenue)
Climate change mitigation	1.9%

Climate change adaptation	0%
Sustainable use and protection of water and marine resources	0%
Transition to a circular economy	0%
Pollution prevention and control	0%
Protection and restoration of biodiversity ecosystems	0%

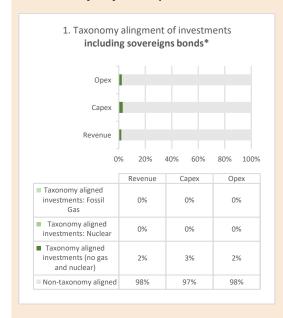

There were no further third party assurances than the controls established by our data provider.

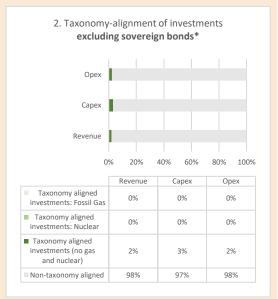

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU taxonomy¹?

	Yes:		
		In fossil gas	In nuclear energy
Χ	No		

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

What was the share of investments made in transitional and enabling activities?

Fund	Proportion of investments in transitional activities	Proportion of investments in enabling activities
OSSIAM STOXX® EUROPE 600 ESG EQUAL WEIGHT NR UCITS ETF	0.1%	1.0%

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Proportion of investments with an environmental objective aligned with the EU Taxonomy	Value 2022	Value 2023	Difference
OSSIAM STOXX® EUROPE 600 ESG EQUAL WEIGHT NR UCITS ETF	5.9%	2.0%	This reference period saw a decrease of 3.9% in comparison to the previous reference period

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- capital
 expenditure
 (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

^{*}For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

During the reporting period, the Fund's proportion of investments classified as sustainable investments with an environmental objective not aligned with the EU Taxonomy was 78.8%. The sustainability policy used to determine the classification of the Fund's sustainable investments considers themes currently out of scope of the EU taxonomy. The Fund has a 0% EU Taxonomy aligned investments commitment.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

• Cash to the extent necessary for the proper day-to-day management of the Fund. As such, no environmental or social safeguard was required.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Management Company is an active steward of investments. It integrates ESG analysis in its investment strategies. It engages invested companies to promote sustainable approaches. It votes at the annual meetings in a way that promotes sustainable approaches and in line with the outcome of its conversations with invested companies. The last two items are described in Ossiam's Voting and Engagement Policy, which is available on the website.

Over the reference period, the onus has been placed on conversations with investee companies focusing on nutrition, prevention of biodiversity loss, the environment, and in particular climate change, and for governance, the introduction of sustainability metrics in companies' remuneration policies, Say on Climate resolutions, and sustainability-related Board skills.

In addition, Ossiam has participated in collective initiatives urging companies to report on their emissions (with CDP), promoting a better approach to the production of animal protein (with FAIRR) and challenging companies facing severe social or environmental controversies (with ISS).

The Management Company publishes reports detailing and summarising its engagement and voting activities, which are available on its website.

How did this financial product perform compared to the reference benchmark?

The reference benchmark is the STOXX® Europe 600 ESG Broad Market Equal Weight Index Net Return.

The methodology used for the calculation of the index can be found at https://www.stoxx.com/rulebooks

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social

characteristics that

they promote.

How does the reference benchmark differ from a broad market index?

The Index has the STOXX® Europe 600 index as its parent index, which can be considered as being a relevant broad market index.

The Index screens securities for certain environmental, social and governance (ESG) criteria. In this it is different from a broad market index.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Index tracks the performance of securities from the STOXX® Europe 600 index ("Parent Index") after a set of compliance, involvement and ESG performance screens are applied (the Index Methodology).

The Index Methodology selects or excludes securities and then equally weights them, resulting in an Index portfolio.

The investment strategy of the Fund replicates the Index. The Fund's tracking error of 0.24% for the reporting period. As such the strategy is bound by the composition and weights of the Index.

The replication of the Index is monitored on a daily basis. Thus, the process allows the alignment of the investment strategy with the methodology of the Index on a daily basis.

How did this financial product perform compared with the reference benchmark?

Sustainability Indicator	Financial Product Value	Reference Benchmark Value
ESG Total Score, interval from 0 to 100, with 100 being the best score.	75	75

How did this financial product perform compared with the broad market index?

Sustainability Indicator	Financial Product Value	Broad Market Index Value
ESG Total Score, interval from 0 to 100,	75	7.5
with 100 being the best score.	/5	/5
