GENERAL INFORMATION

The following information is derived from and should be read in conjunction with the full text and definitions section of the prospectus.

The Principal Global Investors Funds ("the Trust") was constituted on 13 October 1992 as an open-ended umbrella Unit Trust established as an Undertaking for Collective Investment in Transferable Securities ("UCITS") under the laws of Ireland. The Unit Trust has created a number of sub-funds (the "Funds", individually referred to as "Fund"). The Trust has been authorised in Ireland pursuant to the European Communities (Undertakings for Collective Investments in Transferable Securities) Regulations, 2011, (as amended) and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) (Amendment) Regulations 2019 (the "Central Bank UCITS Regulations").

Units are unhedged, except where otherwise noted.

GENERAL INFORMATION (continued)

For the period to 31 March 2025, the Trust comprised of the following Funds: (continued)

Funds	Type of Units	Launch Date
Islamic Global Responsible Equity Fund	I Class Accumulation	10 May 2024
Global Sustainable Food and Biodiversity Fund	I Class Accumulation I Class Income A Class Accumulation A Class Income	3 July 2024 3 July 2024 3 July 2024 3 July 2024

^{*}Fixed Income Fund.

Principal Global Investors (Ireland) Limited (the "Manager") may, with the prior consent of the Central Bank and approval of The Bank of New York Mellon SA/NV, Dublin Branch (the "Depositary") and the Board of Directors of the Manager (the "Directors"), add additional Funds.

The financial statements are published on the www.principalglobal.com website. The Directors, together with the Manager and Principal Global Investors, LLC (the "Investment Manager") are responsible for the maintenance and integrity of the financial information included on this website.

PRICES

There will be a single price for buying, selling and switching units in each of the Funds. This will be represented by the Net Asset Value ("NAV") per Unit (less/plus duties and charges where applicable).

DEALING

The dealing deadline (being the time by which subscription and redemption requests for units must be received in Dublin in order for such requests to be dealt with in normal circumstances on a particular dealing day) is 10.00 a.m. (Irish time) on that dealing day. The dealing deadline for requests from Hong Kong investors is 5.00 p.m. (Hong Kong time) on that dealing day. All dealing requests should be addressed to:

GENERAL INFORMATION (continued)

DISTRIBUTIONS AND DISTRIBUTOR STATUS

The Trust Deed provides for the Manager to decide to make, and for the Trustee on each distribution date to make, distributions among holders of income units and income plus units in each of the Funds. It is the intention of the Manager to make distributions to the extent that they are covered by income received from underlying investments. It is also the intention of the Manager that distributions will be declared on 30 September each year or nearest business day for all Income Unit Classes and Income Plus Unit Classes where possible. Annual distributions will be payable in respect of the A Income Unit Class on the Global Sustainable Equity Fund, the A Income Unit Class on the European Equity Fund, the A. A2. D. I. I2 and N Income Unit Classes on the Global Properties Securities Fund and the D and N Income Unit Classes on the U.S. Equity Fund. Quarterly distributions will be payable in respect of the A, I, D, F, N, P and X Income Unit Classes on the Preferred Securities Fund, the A, I, D and N Income Unit Classes on the Global High Yield Fund, the A2 (Quarterly) and D2 Income Plus Unit Class, I (Quarterly) Income Unit Classes of the Global Property Securities Fund, the A, A2 and I Income Unit Classes on the Post Short Duration High Yield Fund, the A, A2, I, I2, I3, D, F, N Income Unit, A2 and P2 Income Plus Unit Classes on the Finisterre Unconstrained Emerging Markets Fixed Income Fund, the I2 and A2 Income Unit Class on Asian High Yield Fund, the I2 Income Unit Class on the Finisterre VAG Unconstrained EM Fixed Income Fund, the N Income Unit Class on the Finisterre Emerging Markets Debt Euro Income Fund, the X Income Unit Class on the Principal High Grade Capital Securities Fund and the X Income Unit Class on the Principal Capital Securities Fund. Monthly distributions will be payable in respect of the D2 Income Unit and D2 Income Plus Unit Classes on the Preferred Securities Fund, the D2 Income Plus Unit Class on the Global High Yield Fund, the D2 Income Unit Class on the Global Property Securities Fund, the D2 Income Unit and D2 Income Plus Unit Classes on the Post Short Duration High Yield Fund, the D Income Unit and D Income Plus Unit Classes on the Global Diversified Income Fund, the D2 Income Unit and the D2 Income Plus Unit Classes on the Asian High Yield Fund. There are no D2 Income Unit Classes in issue currently on the Finisterre Unconstrained Emerging Markets Fixed Income Fund. Monthly distributions will also be payable in respect of the N2 Income Unit Class on the Preferred Securities Fund. There are no N2 Income Unit Classes in issue currently on the Preferred Securities Fund. There were distributions out of capital of \$511,073 (2024: \$256,797).

Upon the expiry of the period of six years after the relevant Distribution Date, the Holder and any person claiming through, under or in trust for him shall forfeit any right to any distribution not paid, and such amount shall become part of the relevant Fund.

CORPORATE GOVERNANCE

The Board of Directors of the Manager has adopted and applied standards of corporate governance that are consistent with the Irish Funds Code for the period ended 31 March 2025.

CONNECTED PERSONS

The Central Bank of Ireland ("CBI") UCITS Regulations, Section 43(1), Restrictions on transactions with connected persons - requires that any transaction carried out with a UCITS by a distributor, manager, trustee, administrator, Depositary, investment manager, sub-manager and/or associated or group companies of these ("connected persons") must be carried out as if negotiated at arm's length. Transactions must be in the best interests of the Unitholders of the UCITS.

Having regard to confirmations from the Manager's Designated Person for Capital and Financial Management, and the Trustee, the Board of Directors of the Manager is satisfied that there are arrangements (evidenced by written procedures) in place to ensure that the obligations set out in Regulation 43(1) of the Central Bank UCITS Regulations are applied to all transactions with connected persons, and is satisfied that transactions with connected persons entered into during the period complied with these obligations.

None of the Directors had any interests in the units of the Funds for the period from 1 October 2024 to 31 March 2025.

SIGNIFICANT EVENTS DURING THE PERIOD

Effective 21 October 2024 U.S. Blue Chip Equity Fund changed its name to U.S. Equity Fund.

Effective 16 December 2024 Global Responsible Equity Fund changed its name to Global Sustainable Equity Fund.

Effective 21 January 2025, the Investment Manager will appoint Jupiter Asset Management Limited ("Jupiter") as the new sub-investment manager of the Origin Global Emerging Market Equity Fund and Origin Global Smaller Companies Fund replacing Origin Asset Management LLP ("Origin"), the existing sub-investment manager of the Funds.

This change does not have a material impact on (i) manner in which the Funds are being operated; and (ii) the overall risk profile of the Funds.

Effective 31 March 2025 European Responsible Equity Fund changed its name to European Equity Fund.

Effective 31 March 2025 Global Sustainable Listed Infrastructure Fund changed its name to Global Listed Infrastructure Fund.

GENERAL INFORMATION (continued)

SIGNIFICANT EVENTS DURING THE PERIOD (continued)

There have been no other significant events affecting the Funds during the period ended 31 March 2025.

SIGNIFICANT EVENTS AFTER THE PERIOD END

On 2 April 2025, U.S. President Donald Trump announced tariffs under the 'liberation Day' initiative. These measures included a universal 10% tariff on all imports, with higher rates for specific countries including China, effective from 9 April 2025. Following the announcement, global financial markets have experienced increased volatility. In response to the market turmoil, President Trump announced a 90 day pause on certain tariffs. On 13 May 2025, the U.S and China agreed to a 90-day pause on the imposition of tariffs targeting each other's goods. Volatility in the global markets remains, and the full economic impact remains unclear. The Manager continues to monitor the situation closely.

James Bowers resigned as Director of the Manager effective 21 May 2025.

There have been no other significant events affecting the Funds after the period ended 31 March 2025.

INVESTMENT ADVISER'S REPORT

for the period ended 31 March 2025

Global Sustainable Equity Fund

For the 6-month period ending 31 March 2025, the Global Sustainable Equity Fund reported net performance of -6.89% compared to -2.30% for the index, MSCI AC World Index.

Sectoral performance was mixed overall with outperformance from industrials, consumer staples and materials being more than offset by weakness in information technology, health care, and consumer discretionary. From a country perspective, Norway and France outperformed while the United States and United Kingdom were weak overall. Over the period, Boston Scientific Corporation, DNB ASA and Republic Services were the top three contributors. The top detractors over the period were Novo Nordisk, Socionext and Vistry.

The fund intentionally invests in companies that contribute to a sustainable future, conceptualized through 7 of the Sustainable Development Goals (SDGs) introduced by the United Nations. These are targeted through 3 themes: Natural Capital, Social Capital, and Climate Solutions.

Heading into 2025, U.S. exceptionalism remained a dominant theme. But tech sector struggles, downward revisions to U.S. economic growth forecasts and tariff uncertainties have all culminated in U.S. equity weakness but a broadening into other parts of the world as well as better breadth. Protectionism remains a contentious point and likely to keep volatility prevalent on trade war concerns. Following multi-year leadership, U.S. equities have taken a back seat to international markets thus far in 2025. President Trump and his administration are looking to restructure international trade through tariffs and by extension has increased concern about the economic outlook. Odds for a recession in the States have ticked higher and there is the increased likelihood for growth boosting policies, deregulation and tax cuts, to avoid this scenario. However, through all the volatility and constant gyration on tariffs, peak tariffs and, therefore, peak pessimism, has likely been reached. Knowing President Trump is watching bond markets also implies that the tail risk of liquidity strains morphing into a financial crisis has been cut back significantly and provides a floor from which market sentiment can recover. That said, caution remains warranted. The potential impact on the U.S. is still significant, and uncertainty is likely to remain elevated through the 90-day grace period and as the U.S./China back-and-forth persists. The Federal Reserve remains biased to easing policy though inflation fears will constrain the number of cuts. Whether U.S. markets can reassert itself and deliver positive equity returns going forward will likely depend on whether earnings growth can deliver. In recent months, European markets have staged an impressive run of outperformance relative to the United States. What began as a tactical move by investors to capitalize on valuation asymmetries has evolved into something more structural: a story increasingly underpinned by fundamentals. The policy tone across Europe has become more constructive, with a shift toward a more expansionary fiscal mindset raising hopes that the continent might finally unlock a stronger and more sustainable set of investment opportunities—something that has eluded investors over the past decade. From a global perspective, there are still numerous challenges and persisting risks. However, the depressed valuations in these regions create attractive entry points for long-term investors in firms generating resilient economic returns. Both China and the U.K. are examples of countries facing longstanding economic structural challenges. It is not surprising that investor's view companies domiciled in these markets with pessimism. Nevertheless, the market pessimism seems extreme as many of these companies operate globally yet are beset with deeply discounted valuations relative to their own histories and global peers. In times like these, the adage of staying invested with a diversified portfolio is more important than ever. Global diversification remains essential, especially given the asymmetric implementation of tariffs across countries, while cross-asset class exposure provides valuable resilience in periods of heightened volatility. After a sharp decline, equities have the potential to recover in the months ahead.

European Equity Fund

For the 6-month period ending 31 March 2025, the European Equity Fund reported net performance of -0.45% compared to -0.28% for the index, MSCI Europe Index.

Sectoral performance was mixed overall with outperformance from communication services, financials and industrials being more than offset by weakness in information technology, consumer discretionary, and energy. From a country perspective, France and Denmark outperformed while the United Kingdom and Spain were weak overall. Over the period, Thales, BAE Systems and Deutsche Telekom were the top three individual contributors while Vistry Group, ICON and HSBC Holdings the top three individual detractors.

The fund invests in European businesses that the team believe are becoming better as a result of positive change catalysts and aims to identify dislocations between market expectations and the team's assessment of free cash flow growth.

INVESTMENT ADVISER'S REPORT

for the period ended 31 March 2025 (continued)

European Equity Fund (continued)

Heading into 2025, U.S. exceptionalism remained a dominant theme. But tech sector struggles, downward revisions to U.S. economic growth forecasts and tariff uncertainties have all culminated in U.S. equity weakness but a broadening into other parts of the world as well as better breadth. Protectionism remains a contentious point and likely to keep volatility prevalent on trade war concerns. Following multi-year leadership, U.S. equities have taken a back seat to international markets thus far in 2025. President Trump and his administration are looking to restructure international trade through tariffs and by extension has increased concern about the economic outlook. Odds for a recession in the States and globally have ticked higher and there is the increased likelihood for growth boosting policies, deregulation and tax cuts, to avoid this scenario. However, through all the volatility and constant gyration on tariffs, peak tariffs and, therefore, peak pessimism, has likely been reached. Knowing President Trump is watching bond markets also implies that the tail risk of liquidity strains morphing into a financial crisis has been cut back significantly and provides a floor from which market sentiment can recover. In recent months, European markets have staged an impressive run of outperformance relative to the United States. What began as a tactical move by investors to capitalize on valuation asymmetries has evolved into something more structural: a story increasingly underpinned by fundamentals. The policy tone across Europe has become more constructive, with a shift toward a more expansionary fiscal mindset raising hopes that the continent might finally unlock a stronger and more sustainable set of investment opportunities—something that has eluded investors over the past decade. The potential impact on the U.S. is still significant, and uncertainty is likely to remain elevated through the 90-day grace period and as the U.S./China back-and-forth persists. The Federal Reserve remains biased to easing policy though inflation fears will constrain the number of cuts whereas the European Central Bank (with inflation more under control on the continent) has more flexibility to use monetary policy to combat any potential recession. Whether markets can deliver positive equity returns going forward will likely depend on whether earnings growth can deliver. In times like these, the adage of staying invested with a diversified portfolio is more important than ever. Diversification remains essential, especially given the asymmetric implementation of tariffs across countries, while cross-asset class exposure provides valuable resilience in periods of heightened volatility.

Preferred Securities Fund

For the six-month period ending 31 March 2025, the PGIF Preferred Securities Fund reported net performance of 0.99% compared to -0.51% for the index, the Bloomberg Global Aggregate Corporate USD Total Return Index Value Unhedged USD Index.

During the first half of the period the Fed cut interest rates twice, but abruptly pivoted to being less concerned about cooling in labor markets and more concerned about inflation staying on a declining trend after the election. During the second half of the period the mood of the markets became focused on corporate earnings disruptions from President Trump's notifications on tariffs. As a result, US Treasury bond yields declined which shifted the term structure lower with the belly of the curve dipping a little more than longer maturities. In terms of Fund returns the Contingent Convertible AT1 sector contributed the most during the period, while the \$25par Preferred sector detracted the most.

The volatility caused by policy challenges should create more interim buying opportunities. Importantly, the added growth policies of low taxation and less regulation can offset the drag from less fiscal spending; and more US energy production can foster internal growth and disinflation. Global trade will eventually be renegotiated, and the rules will become clear. In the long run, these policies should foster a disinflationary economic environment that allows the Fed to cut its policy rates more and help to keep credit spreads tighter than average again. The excessively eager tactics of the Trump administration is a surprise. Aggressive tariffs and retaliatory moves have repriced just about everything in capital markets. The administration's appetite for change appears to be voracious rather than gradual. Therefore, we believe that credit spreads have bottomed out in January and are now on a widening path to become higher than average.

The volatility caused by policy challenges should create more interim buying opportunities (like now). We expect the Fund to be a relative safe haven compared to other fixed income sectors because hybrids have <u>positive</u> absolute Estimated Risk Adjusted RORs assuming maximum credit valuation risk compared to IG Corporates and High Yield bonds, which are <u>negative</u> over the 1yr period Global trade will eventually be renegotiated, and the rules will become clear. In the long run, these policies should foster a disinflationary economic environment that allows the Fed to cut its policy rates more and help to keep credit spreads tighter than average again. We recommend holding existing hybrid positions (adding more on weakness) and switching from high yield bonds and intermediate IG corporate bonds into hybrids – especially given the relative safety of hybrid concentrations in banks, insurance and utilities.

INVESTMENT ADVISER'S REPORT

for the period ended 31 March 2025 (continued)

Global High Yield Fund

For the six-month period ending 31 March 2025, the Global High Yield Fund reported net performance of 0.66% compared to 1.76% for the index, ICE BofA Global High Yield USD Hedged Index.

Security selection was the primary driver of underperformance during the semi-annual period, with the largest impact coming from an overweight position to Teide Ltd. Additional detractors included overweight positions in LABL Inc, Kronos Acquisition Holdings Inc, and Olympus Water US Holding Corp, as well as unfavorable capital structure positioning in Altice Financing SA. Somewhat offsetting the underperformance included overweight positions in Eagle Intermediate Global Holding, Linx Capital Ltd, Bausch Health Companies, Lions Gate Capital Holdings, and Aruba Investments Holdings. While sector allocation also detracted from performance-due to underweight exposure to the Banking sector and overweight exposure to the Leisure sector-its impact was more modest. From a credit quality perspective, an underweight to BB-rated securities and an overweight to CCC-rated securities further weighed on performance, with CCCs having the greater negative effect.

At the end of the semi-annual performance period, the fund outyielded its index, driven by an underweight position to higher-quality issuers relative to the benchmark. The duration of the fund was slightly shorter than the index by approximately a quarter of a year. Within capital structures, the fund maintained a higher allocation to senior secured securities compared to the index. Geographically, the fund remained overweight the North America region and underweight Emerging Markets. From a sector perspective, the fund held overweight positions in the Leisure and Services sectors, while maintaining underweights in Energy and Utilities.

Looking ahead to the rest of the year, a more defensive and selective positioning is expected in response to the heightened market volatility driven by global trade headlines and broader macroeconomic uncertainty. With bid/ask spreads widening and trading activity constrained by execution costs, incremental positioning has shifted toward higher-quality issuers and more resilient sectors such as consumer non-cyclicals, while reducing exposure to more volatile, commodity-focused areas like energy. Tariff-related headlines have led to sharp, often intraday, swings in sentiment, complicating efforts to determine optimal positioning. In this environment, flexibility and the preservation of dry powder are being prioritized to take advantage of market dislocations as greater clarity emerges on fiscal and monetary policy. Although valuations are becoming increasingly compelling—particularly with yields in the 8–9% range—patience and selectivity remain key amid a wide range of potential economic outcomes.

Global Property Securities Fund

For the six-month period ending 31 March 2025 the Global Property Securities Fund reported net performance of -8.51% compared to -8.25% for the index, the FTSE EPRA Nareit Developed NR USD index.

The portfolio outperformed the benchmark on stock selection. Contribution came mainly from the US where the overweight to senior housing continued to reap dividends as tight supply and strong demand continued to drive pricing power and earnings upgrades. An underweight to a documents processing company with data center exposure also contributed as the stock lagged on the selloff in the broader tech complex. Selection within shopping centers was also additive. Detraction came mainly from Australian selection due to overweights to tech exposed stocks, one of which conducted a mammoth fund raising to take advantage of favorable valuations in the first quarter of 2025.

Our strategy strives to deliver consistent and attractive risk-adjusted excess total returns over the long term. We focus on constructing benchmark-differentiated portfolios with our sources of potential alpha broadly diversified. We invest in listed equity of REITs, REOCs, and other real estate companies that own income-producing property, develop real estate assets or perform other property related activities in global markets. We believe that reliable and consistent alpha generation can be achieved through skill, rigorous fundamental analysis, and an emphasis on diversified, bottom-up stock selection that favors higher quality companies.

INVESTMENT ADVISER'S REPORT

for the period ended 31 March 2025 (continued)

Global Property Securities Fund (continued)

The macroeconomic and political landscape is shifting towards a more uncertain and potentially bearish outlook to start 2025. Rising geopolitical tensions, trade war fears, and concerns about slowing economic growth are increasing volatility across financial markets. Recently, the Trump administration's sweeping tariff announcement is likely to depress growth whilst stoking inflation. Bond markets have voted with their feet with long bond yields tumbling and yield curves flattening, suggesting the market is more concerned over the negative growth implications of tariffs than the one-off impact on inflation. Clearly, the risks of a marked economic slowdown, if not recession, have risen. Whilst the Fed is for now still more concerned about sticky inflation, it also has to juggle its dual mandate of maintaining employment. Given the view that tariffs have a transitory impact on inflation, the Fed is likely to respond to weakness in the labor market with rate cuts, vindicated by longer term market driven measures of inflation expectations which remain anchored. This biases real interest rates downwards and should continue to be supportive for defensive asset classes like REITs, which have outperformed year-todate. We continue to believe that the defensive REIT sector offers an attractive investment opportunity with valuations looking very cheap when measured against public equities. REITs are also relatively insulated from any direct impact on tariffs and any potential de-risking away from America. With steady fundamentals and durable cash flows, they provide a compelling away to diversify risk in portfolios today, but a prolonged stagflationary environment poses a risk. Our portfolio strategy will continue to emphasize bottom-up stock selection and company fundamentals to drive excess returns. With a preference for quality and overweights to key positions that offer resilient long-term growth in earnings, we expect the portfolio to be positioned well for economic weakness and lower yields ahead. If markets pivot back to risk-on, then we could expect some headwinds to relative performance.

Post Short Duration High Yield Fund

For the six-month period ending 31 March 2025, the PGIF Post Short Duration High Yield Fund reported net performance of 1.19% compared to 1.55% for the index, ICE US Treasury 1-3 Year Bond Index.

Short duration high quality high yield generated modestly positive returns over the last six month despite heightened volatility in broader risk markets. The opportunistic loan allocation as well as the focus on higher quality issuers benefitted performance offset by exposure to the consumer cyclical services and gaming sectors.

While less susceptible than the broader high yield market, the Fund has been exposed to the volatility caused by the administrations tariff program. Yet the Fund has proven resilient and generated a positive return given its focus on higher quality issuers. The Fund's opportunistic allocation to loans outperformed and contributed to performance as did the exposure to the shortest duration assets (inside of one year). Longer duration assets (three years plus) generated a positive return yet underperformed on a relative basis, while media & entertainment and lodging were the only two sectors to generate modestly negative returns.

Coming into 2025, it seemed to us that both US equity and credit markets were focused solely on the more business-friendly policies they expected from President Trump (including deregulation and tax cuts) while discounting the impact of the potentially more economically harmful policies that he had championed (including tariffs and immigration policy). We had an out-of-consensus view that the US economy was vulnerable to a pullback later in the year, particularly if there was policy-induced pain. The market's performance in the first quarter has given us increasing confidence in our view and has caused us to become more cautious on the macro-outlook. Yet our concerns are balanced by the solid fundamentals, elevated yields, and the potential upside risks should agreements be reached. We feel the Fund, while not immune to broader market forces, is well positioned to weather the increased volatility and potential economic slowdown.

Origin Global Emerging Markets Fund

For the six-month period ending 31 March 2025, the Origin Global Emerging Markets Fund reported net performance of -0.93% compared to -5.31% for the index, the MSCI Emerging Markets Net TR Index.

The fund benefited from strong stock selection in Korea & China, offset by underperformance in Turkey. Viewed through a sector lens Industrials & Consumer Discretionary offered the strongest drivers of relative performance with Energy and Financials the laggards.

As at quarter end the Industrials & Consumer Discretionary sectors were the largest overweights, and Energy & Utilities the largest underweights. The fund is overweight in China & Korea, whilst underweight India & Saudi Arabia.

As ever we do not seek to forecast, however we remain true to our discipline of focussing on stocks embodying our 4 key characteristics. The portfolio positioning reflects this.

INVESTMENT ADVISER'S REPORT

for the period ended 31 March 2025 (continued)

Origin Global Smaller Companies Fund

For the six-month period ending 31 March 2025, the Origin Global Smaller Companies Fund reported net performance of -2.19% compared to -7.10% for the index, the MSCI AC World Small Cap Net TR Index.

The majority of the fund's outperformance was driven by stock selection in North America and Emerging Markets, offset by stock selection and allocation in Europe & Japan. Health Care contributed the greatest relative outperformance along with Financials, with Industrials and Communication Services the laggards.

The fund is currently overweight in Canada & Korea, whilst underweight Japan & India. Viewed by sector, Financials & Health Care are the two largest overweights with Real Estate & Industrials the largest underweights.

As ever we do not seek to forecast, however we remain true to our discipline of focusing on stocks embodying our 4 key characteristics (capital management, relative value, earnings revision, and price momentum) the portfolio positioning reflects this.

Finisterre Unconstrained Emerging Markets Fixed Income Fund

For the six-month period ending 31 March 2025, the Finisterre Unconstrained Emerging Markets Fixed Income Fund reported a net performance of 1.44%.

In the 6 month period Argentina, Ukraine, Nigeria and Turkey were the largest contributors, while Brazil, South Africa and Romania detracted. After a somewhat challenging 4Q24 for EMD assets, under pressure from higher US yields and a stronger USD through the US election period, markets started 2025 fully focused on the January 20th inauguration day, and the first key decrees of the new Trump administration regarding immigration, trade tariffs, and the prospects for peace deals in Ukraine and the Middle East. A friendly US CPI number on January 15th helped support sentiment though, and the absence of new news in a market already positioned for the worst, led to better risk asset performance from mid-January onwards, before plateauing at January month end, as the first disruptive announcements came through. Amidst all the fury of the first few weeks of the Trump presidency, EMD assets looked to have coped reasonably well until late February, as perception of a less exceptional US economy, a less dramatic and a more constructive sentiment around US treasury secretary Bessent's intents to keep the US budget and US long yields under control, brought markets some relief. A less exceptional US economy also revived a few bespoke drivers in other regions, including a stronger JPY, a strong performance from Chinese tech equities, but also from broader EU equities and the EUR (on the anticipated defence spending boost and better economic surprises vs US), which all combined to keep EM sentiment constructive. Yet, towards February month end, this benign behaviour started to show some cracks on the back of a sharp deterioration of relations between the US and its allies that seemed to show the US favouring Russia over Ukraine and upending the transatlantic alliance. March was a negative month for risk with the trends that began in February accelerating as the month progressed. The epicentre of the March weakness remained in the US with markets increasingly unconvinced that President Trump's policies (particularly on trade) will actually succeed in 'Making America Great Again'. Although the hard data continued to come in reasonably firm in March, sentiment and expectations measures fell quite precipitously.

We must think though that any unwind of such level of current uncertainty depends on the will of one man. Even if tariffs are rolled back, diluted or 'deals are made', the hit on global confidence and the disruption to the world order will remain, justifying more risk premia overall but affecting US assets more than non-US ones. We remain big believers that, after years of US-centricity in global asset allocations, some reallocation away from the US will occur towards the rest of the world. While excess capital regions like the EU and Japan, and possibly offshore USD conversion in China and Hong Kong, may see a lot of it, EMD assets with their decades low ownership levels would be buffered even with a small strategic reallocation. Eventually, the growth and deflationary pressures will focus more on China, South East Asia and UK/Europe, but even if many of our most important EMD markets from a portfolio standpoint are not in the firing line, EM commodity exporters should feel the brunt indirectly.

In terms of portfolio structure, we retain a 10%+ cash exposure, a preference for income assets and the opportunity to add back to select idiosyncratic stories. Calmer markets may allow for some relative value opportunities, possibly through curve steepening trades in local rates across Asia, Mexico or CE3. Any beta exposure will remain low, nimble and tactical and we will focus on liquid FX and rates instruments rather than sovereign credits. We remain of the view that we are at or near the crux of the recent crisis, that some roll back and sentiment bounce should be expected. Eventually, EMD assets will benefit from their yield and diversification appeal in a world in need for more asset allocation options outside the US.

INVESTMENT ADVISER'S REPORT

for the period ended 31 March 2025 (continued)

U. S. Equity Fund

For the six-month period ending 31 March 2025, the U.S Equity Fund reported net performance of -4.13% compared to -2.04% for the index. The fund's benchmark was Russell 1000 Growth NTR Index from 1 October 2024 to 20 October 2024 and the Russell 1000 NTR Index from 21 October 2024 to 31 March 2025.

The three largest individual detractors in the period were Elf Beauty, Deckers Outdoor Corporation, and Constellation Energy (CEG). Elf Beauty is a cosmetics company specializing in low-cost premium-quality products and detracted from relative performance as the company cut guidance dramatically. Deckers Outdoor Corporation, the footwear, apparel, and accessories retailer and detracted from relative performance as shares underperformed following tepid fiscal fourth quarter guidance. Constellation Energy is the largest producer of carbon-free power in the U.S. and sells clean energy to commercial and retail customers as a deregulated utility and detracted from relative performance as investors questioned power demand needs following the release of new, more efficient large language and reasoning models. The three largest individual detractors in the period were Visa Inc, McKesson Corporation and Republic Services Group. Visa Inc. is the largest payment network in the world with a great margin profile. Visa saw strong cross-border results as volumes were up +16% year-over-year, driven by travel improvement. McKesson Corporation is a health care distribution company, focused primarily on pharmaceuticals and medical supplies. After a weak Q4 following the U.S. election results, the stock rebounded along with the health care industry and saw strong growth in its U.S. pharmaceutical segment. Republic Services Group is the second largest regulated waste company in North America by market cap and revenue and the company topped margin expectations driven by solid pricing and strong cost controls and issued a strong guide for 2025.

The investment strategy of the Fund is to seek long-term growth of capital by investing primarily in stocks of U.S. large cap companies.

The first quarter of 2025 proved to be a wild ride ending with the S&P 500 down 4.3%. U.S. equities started the year off in positive territory, but sentiment turned sharply negative in mid-February driving the market down 8.5% from the February high. As we move into the second quarter, volatility has escalated further with the size of the U.S. tariff announcements surprising the market and prompting a sharp sell-off. The tariff announcements clearly add complexity for investors, but with complexity comes greater risk and opportunity. Which begs the question: how should disciplined equity investors react? With so much in flux, we are inclined to take a thoughtful approach and avoid knee jerk reactions. We are skeptical that the tariff increases presented by the White House on April 2nd will be the actual tariffs that are in effect a year from now but acknowledge that tariffs are clearly a tool that the current administration will be using to some extent over the next four years. We believe tariffs, in general, act as a price increase, and therefore a company's pricing power becomes a key determinant of their ability to manage a higher tariff environment. What is not so simple to determine is which companies truly have pricing power in the current environment. For us, it's less of a call on small versus large or on industrials vs financials as it is a call on which companies can take pricing, take market share, and grow earnings over time in an evolving landscape. With uncertainty prevalent, there are fewer quality franchises that can effectively maneuver on unsteady terrain. Deep fundamental research is therefore essential to identifying quality businesses with strong franchises that are also nimble. Similar to when interest rates rose violently in 2022 and most macroeconomists predicted an imminent recession (that never came), we don't believe the impact of the recently announced tariffs is any clearer. As a result, any tactical moves we make will be grounded in deep fundamental research, will be company specific, and will be focused on business model resilience, strong cash flow generation, and pricing power as we look forward.

Finisterre VAG Unconstrained EM Fixed Income Fund

For the six-month period ending 31st March 2025, the Finisterre VAG Unconstrained EM Fixed Income Fund reported a net performance of 0.33%.

In the 6 month period Argentina, Ukraine, Nigeria and Turkey were the largest contributors, while Brazil, South Africa and Romania detracted. After a somewhat challenging 4Q24 for EMD assets, under pressure from higher US yields and a stronger USD through the US election period, markets started 2025 fully focused on the January 20th inauguration day, and the first key decrees of the new Trump administration regarding immigration, trade tariffs, and the prospects for peace deals in Ukraine and the Middle East. A friendly US CPI number on January 15th helped support sentiment though, and the absence of new news in a market already positioned for the worst, led to better risk asset performance from mid-January onwards, before plateauing at January month end, as the first disruptive announcements came through. Amidst all the fury of the first few weeks of the Trump presidency, EMD assets looked to have coped reasonably well until late February, as perception of a less exceptional US economy, a less dramatic and a more constructive sentiment around US treasury secretary Bessent's intents to keep the US budget and US long yields under control, brought markets some relief.

INVESTMENT ADVISER'S REPORT

for the period ended 31 March 2025 (continued)

Finisterre VAG Unconstrained EM Fixed Income Fund (continued)

A less exceptional US economy also revived a few bespoke drivers in other regions, including a stronger JPY, a strong performance from Chinese tech equities, but also from broader EU equities and the EUR (on the anticipated defence spending boost and better economic surprises vs US), which all combined to keep EM sentiment constructive. Yet, towards February month end, this benign behaviour started to show some cracks on the back of a sharp deterioration of relations between the US and its allies that seemed to show the US favouring Russia over Ukraine and upending the transatlantic alliance. March was a negative month for risk with the trends that began in February accelerating as the month progressed. The epicentre of the March weakness remained in the US with markets increasingly unconvinced that President Trump's policies (particularly on trade) will actually succeed in 'Making America Great Again'. Although the hard data continued to come in reasonably firm in March, sentiment and expectations measures fell quite precipitously.

We must think though that any unwind of such level of current uncertainty depends on the will of one man. Even if tariffs are rolled back, diluted or 'deals are made', the hit on global confidence and the disruption to the world order will remain, justifying more risk premia overall but affecting US assets more than non-US ones. We remain big believers that, after years of US-centricity in global asset allocations, some reallocation away from the US will occur towards the rest of the world. While excess capital regions like the EU and Japan, and possibly offshore USD conversion in China and Hong Kong, may see a lot of it, EMD assets with their decades low ownership levels would be buffered even with a small strategic reallocation. Eventually, the growth and deflationary pressures will focus more on China, South East Asia and UK/Europe, but even if many of our most important EMD markets from a portfolio standpoint are not in the firing line, EM commodity exporters should feel the brunt indirectly.

In terms of portfolio structure, we retain a 10%+ cash exposure, a preference for income assets and the opportunity to add back to select idiosyncratic stories. Calmer markets may allow for some relative value opportunities, possibly through curve steepening trades in local rates across Asia, Mexico or CE3. Any beta exposure will remain low, nimble and tactical and we will focus on liquid FX and rates instruments rather than sovereign credits. We remain of the view that we are at or near the crux of the recent crisis, that some roll back and sentiment bounce should be expected. Eventually, EMD assets will benefit from their yield and diversification appeal in a world in need for more asset allocation options outside the US.

Finisterre Emerging Markets Debt Euro Income Fund

For the six-month period ending 31 March 2025, the Finisterre Emerging Markets Debt Euro Income Fund reported a net performance of 2.15%.

In the 6 month period Argentina, Ukraine, Nigeria and Turkey were the largest contributors, while Brazil, South Africa and Romania detracted. After a somewhat challenging 4Q24 for EMD assets, under pressure from higher US yields and a stronger USD through the US election period, markets started 2025 fully focused on the January 20th inauguration day, and the first key decrees of the new Trump administration regarding immigration, trade tariffs, and the prospects for peace deals in Ukraine and the Middle East. A friendly US CPI number on January 15th helped support sentiment though, and the absence of new news in a market already positioned for the worst, led to better risk asset performance from mid-January onwards, before plateauing at January month end, as the first disruptive announcements came through. Amidst all the fury of the first few weeks of the Trump presidency, EMD assets looked to have coped reasonably well until late February, as perception of a less exceptional US economy, a less dramatic and a more constructive sentiment around US treasury secretary Bessent's intents to keep the US budget and US long yields under control, brought markets some relief.

A less exceptional US economy also revived a few bespoke drivers in other regions, including a stronger JPY, a strong performance from Chinese tech equities, but also from broader EU equities and the EUR (on the anticipated defence spending boost and better economic surprises vs US), which all combined to keep EM sentiment constructive. Yet, towards February month end, this benign behaviour started to show some cracks on the back of a sharp deterioration of relations between the US and its allies that seemed to show the US favouring Russia over Ukraine and upending the transatlantic alliance. March was a negative month for risk with the trends that began in February accelerating as the month progressed. The epicentre of the March weakness remained in the US with markets increasingly unconvinced that President Trump's policies (particularly on trade) will actually succeed in 'Making America Great Again'. Although the hard data continued to come in reasonably firm in March, sentiment and expectations measures fell quite precipitously. The 'end of US exceptionalism' narrative was further supported in March by the waking up of Europe on having to defend itself and the need to adjust its economy to incoming trade pressures. The suspension of the "debt brake" in Germany and passage of a major fiscal plan enables German public spending to increase dramatically to support defence and infrastructure. This was accompanied by several countries agreeing to boost defence spending, including through joint borrowings at the EU level. Bund yields moved materially higher on the announcement but should be capped as German fiscal headroom remains comfortable. The near-term growth implications of this additional spending capacity are likely to be limited but it opens significant potential growth upside from Germany (and Europe more broadly) going forward.

INVESTMENT ADVISER'S REPORT

for the period ended 31 March 2025 (continued)

Finisterre Emerging Markets Debt Euro Income Fund (continued)

This should continue to support the EUR and a further rebalancing of global assets away from the US towards Europe and other regions in the medium term.

We must think though that any unwind of such level of uncertainty depends on the will of one man. Even if tariffs are rolled back, diluted or 'deals are made', the hit on global confidence and the disruption to the world order will remain, justifying more risk premia overall but affecting US assets more than non-US ones. We remain big believers that, after years of US-centricity in global asset allocations, some reallocation away from the US will occur towards the rest of the world. While excess capital regions like the EU and Japan, and possibly offshore USD conversion in China and Hong Kong, may see a lot of it, EMD assets with their decades low ownership levels would be buffered even with a small strategic reallocation. Eventually, the growth and deflationary pressures will focus more on China, South East Asia and UK/Europe, but even if many of our most important EMD markets from a portfolio standpoint are not in the firing line, EM commodity exporters should feel the brunt indirectly.

In terms of portfolio structure, we retain a 10%+ cash exposure, a preference for income assets and the opportunity to add back to select idiosyncratic stories. Calmer markets may allow for some relative value opportunities, possibly through curve steepening trades in local rates across Asia, Mexico or CE3. Any beta exposure will remain low, nimble and tactical and we will focus on liquid FX and rates instruments rather than sovereign credits. We remain of the view that we are at or near the crux of the recent crisis, that some roll back and sentiment bounce should be expected. Eventually, EMD assets will benefit from their yield and diversification appeal in a world in need for more asset allocation options outside the US.

Global Listed Infrastructure Fund

For the six-month period ending 31 March 2025 the Global Listed Infrastructure Fund reported net performance of -2.54% compared to -1.21% for the index, the FITSE Global Core Infrastructure 50/50 Index.

Our fund underperformed its benchmark over the trailing six months. Stock selection detracted from performance, whereas the regional allocation effect was modestly positive. Selection detracted most significantly within our European positions. There were various drivers of the negative contribution. Our exposure to a European based renewables developer with material operations in the U.S., detracted as the market took a negative view of the outlook for the sector in light of the US election result. Within transportation, our exposure to an airport operator suffered from market perceptions of regulatory uncertainty. Our European utilities selection was negatively affected by concerns about one position's need to finance its growth through equity issuance. Outside of Europe, an underweight to the strongly performing North American energy sector was a material performance detractor. More generally, an increase in long-term interest rate expectations over the period negatively affected our overweight position to the Communications sector and some of our individual positions within the utilities and renewables sectors. Stock selection in North America and Latin America and selection and allocation in Asia were all positive performance drivers over the period. Our North American utilities positions continued to benefit from expected increases in power demand. Outperformance in Asia was driven by underweights to weak seaport and airport stocks as well as a positive contribution from a Chinese natural gas distribution utility.

Our portfolio construction process remains focused on bottom-up stock selection. The underperformance of listed infrastructure relative to global equities in recent years has generated an opportunity for us to orient the portfolio around higher quality, structurally advantaged stocks trading at material discounts to our view of intrinsic value. The portfolio today reflects overweight exposures to economically resilient stocks in the utilities and cellphone tower sectors and to infrastructure businesses outside the U.S, where we believe relative valuation discounts had in some cases reached extreme levels owing to the wildly popular U.S. exceptionalism trade. On the margin, we are also using policy-related volatility to increase exposure to companies for which we have greater confidence in fundamental outcomes over the next 12 months.

After a challenging end to 2024 for the listed infrastructure asset class, uncertainty over U.S. tariff policy, weakening consumer sentiment data and a resulting pullback in U.S. 10-year bond yields contributed to a rotation into defensives to start 2025. Listed infrastructure has outperformed both broader equities and fixed income. The reversal of U.S. dollar strength also created currency tailwinds for some regions. We continue to believe that the potential positives of tax cuts, deregulation and broader 'America first' impulses of President Trump's administration must be considered alongside the potentially negative impacts of tariffs, more restrictive immigration policy and a rising Federal deficit. The strength of the underlying economy and labor market, as well as the specific policies enacted and the timing of those policies, will matter a lot for growth and inflation outcomes as we move through 2025. Ultimately, infrastructure stocks should benefit from resilient fundamentals and will be relatively well-positioned if the current consensus expectation of slowing U.S. economic growth materializes. Long-term business fundamentals for listed infrastructure companies remain robust. Increasing power demand, the energy transition and electrification are related structural tailwinds for many infrastructure companies. Demographic growth and technological innovation provide further support for the asset class.

INVESTMENT ADVISER'S REPORT

for the period ended 31 March 2025 (continued)

CCB Principal China New Energy Innovation Fund

For the six-month period ending 31 March 2025, the CCB Principal China New Energy Innovation Fund reported net performance of -1.59% compared to -12.88% for the index, CSI New Energy Index.

In Q1 2025, China's macroeconomic environment was broadly stable, with a clear divergence in sector performance: consumption rebounded notably, investment remained weak, and short-term export resilience benefited from "pre-emptive shipping" behavior. Post-Chinese New Year, rapid advancements in foundation models (e.g., DeepSeek) and the robotics sector triggered a re-rating of China's broad tech complex, driving a structurally tech-led rally. The CSI New Energy Index fell significantly in the period underperforming broader indices. The photovoltaic supply chain continued to struggle with overcapacity and sharply deteriorating margins, with losses reported across several segments. In contrast, the new energy vehicle sector maintained growth momentum under supportive policies, alongside rapid developments in autonomous driving technologies. The energy storage sector sustained high demand but faced increased competitive pressure. Wind power installations lagged expectations due to multiple bottlenecks, despite healthy growth in tender volumes.

The portfolio remained primarily focused on leading names in new energy and emerging tech. Chinese NEV brands continued to gain global market share, while the adoption rate of advanced autonomous driving features accelerated. In the lithium battery supply chain, industry consolidation led to a more favorable supply structure and stable earnings among key players. The wind power sector benefitted from both falling input costs and improving installation demand. During the period, the fund maintained high conviction positions in NEV and key component suppliers, autonomous driving technology leaders, top-tier lithium materials companies, and wind power parts manufacturers. The portfolio maintained an underweight in the photovoltaic sector due to its unfavorable fundamentals.

Looking ahead, we expect China's monetary and liquidity conditions to remain accommodative in 2025. Economic recovery should continue under policy support, with inflation expected to rise modestly and the PPI potentially turning positive. External risks — including the potential for renewed tariffs under a Trump administration, stronger USD and U.S. Treasury yields, and FX constraints on monetary easing — remain key macro headwinds. In the equity market, earnings recovery is still in its early stages and is likely to contribute less to market returns than liquidity. We anticipate a liquidity-driven, structurally selective market in 2025, with growth and industry-specific themes outperforming. For the new energy sector, we believe the most severe period of industry downturn has passed. The pace of capacity rationalization will be critical going forward. Autonomous driving is set to accelerate materially in 2025, while emerging technologies such as solid-state batteries, BC-type PV cells, and composite current collectors are expected to deliver incremental breakthroughs. We maintain our conviction in the sector's long-term investment case: strong industry competitiveness, resilient medium-term demand growth, and a sizable addressable market remain intact. Valuations across the sector remain depressed. We believe that companies operating in high-barrier segments with durable market positions and sustainable profitability offer compelling long-term investment value at current levels.

Principal High Grade Capital Securities Fund

For the six-month period ending 31 March 2025, the Principal High Grade Capital Securities Fund reported net performance of 1.23% compared to 1.86% for the index, ICE BofA Subordinated Euro Financial Index.

The Bank Sub debt in the portfolio performed strongly returning 2.89% and contributing 148 bps with an average weight of 51%. Corporate hybrids, which is an out of benchmark allocation returned 0.34% and contributed 9 bps with an average weight of 25.49%. The Insurance sub debt in the portfolio returned -0.02% and contributed -0.00% with an average weight of 20.62%.

The rationale of the fund is to provide Euro IG investors with an alternative strategy that has higher yield as a virtue of investing in IG Capital Securities and Corporate hybrids. The portfolio is positioned as an investment grade portfolio of Subordinated Capital Securities denominated primarily in EUR. The objective is to pick up yield over IG Corporate portfolios by investing in IG Subordinated debt. The portfolio is diversified across the investment universe of Capital Securities via investments in Banks, Insurance and other Corporates. There are no investments in Bank or Insurance Tier1 Capital. We continue to look for opportunities to diversify the portfolio away from Financials by looking to invest in high quality hybrid issuance from Corporates.

We would expect coupon income in our strategies to continue to be elevated despite a central bank easing regime. Bonds that were issued with five-year call terms back in 2020 and 2021 are callable in 2025 and 2026. These bonds had very low coupons given the low interest rate environment back then as a result of monetary stimulus due to Covid. These low coupons are getting replaced higher as companies refinance into a higher interest rate environment today. Therefore, despite the ECB rate cuts, we would estimate that coupon income in our strategy will continue to move higher. Increased fiscal spending by Germany should be constructive for growth.

INVESTMENT ADVISER'S REPORT

for the period ended 31 March 2025 (continued)

Principal High Grade Capital Securities Fund (continued)

This should bode well for re-invigorating growth in the German economy and by extension should be positive for European financials. Lower rates as a result of ECB rate cuts should once again stimulate mortgage lending in the EU thereby benefiting Banks.

In 2024, European Banks had very little growth in mortgage lending as a result of higher rates, but this should change in 2025. Mortgages are important for Banks because they account for almost half of all lending in the Eurozone. On the cautionary side, credit spreads could come under pressure if European economies are stressed by the imposition of tariffs by the incoming Trump administration. Europe also has less fiscal flexibility and fiscal deficits are being managed lower post the pandemic spending. China continues to compete with European manufacturing while domestic demand weakness in China has hurt European exporters.

Principal Capital Securities Fund

For the six-month period ending 31 March 2025, the Principal Capital Securities Fund reported net performance of 1.81% compared to 1.86% for the index, ICE BofA Subordinated Euro Financial Index.

The bank subordinated debt in the portfolio performed strongly returning 2.59% and contributing 57 bps with an average weight of 22.07%. Corporate hybrids which is an out of benchmark allocation returned 2.53% and contributed 81 bps with an average weight of 32.1%. The Insurance sub debt in the portfolio returned -0.70% and contributed -0.09% with an average weight of 13.03%. The Insurance paper in the portfolio underperformed the Benchmark which returned 1.90% and contributed 72 bps with an average weight of 38%. AT1 Cocos which is another out of benchmark allocation performed the strongest returning 3.75% and contributing 107 bps with an average weight of 28.47%.

The rationale of the fund is to provide Euro investors with a Capital Securities strategy that is diversified, conservative and with an average IG rating that is focused on income while limiting volatility. The portfolio is positioned as a portfolio of Subordinated Capital Securities denominated primarily in EUR, which is at least 80% IG. The objective is to pick up yield over IG Corporate portfolios by investing in Subordinated debt. The portfolio is diversified across the investment universe of Capital Securities via investments in Banks, Insurance and other Corporates. We continue to look for opportunities to diversify the portfolio away from Financials by looking to invest in high quality hybrid issuance from Corporates.

We would expect coupon income in our strategies to continue to be elevated despite a central bank easing regime. Bonds that were issued with five-year call terms back in 2020 and 2021 are callable in 2025 and 2026. These bonds had very low coupons given the low interest rate environment back then as a result of monetary stimulus due to Covid. These low coupons are getting replaced higher as companies refinance into a higher interest rate environment today. Therefore, despite the ECB rate cuts, we would estimate that coupon income in our strategy will continue to move higher. Increased fiscal spending by Germany should be constructive for growth. This should bode well for re-invigorating growth in the German economy and by extension should be positive for European financials.

Lower rates as a result of ECB rate cuts should once again stimulate mortgage lending in the EU thereby benefiting Banks. In 2024, European Banks had very little growth in mortgage lending as a result of higher rates, but this should change in 2025. Mortgages are important for Banks because they account for almost half of all lending in the Eurozone. On the cautionary side, credit spreads could come under pressure if European economies are stressed by the imposition of tariffs by the incoming Trump administration. Europe also has less fiscal flexibility and fiscal deficits are being managed lower post the pandemic spending. China continues to compete with European manufacturing while domestic demand weakness in China has hurt European exporters.

Global Sukuk Fund

For the six-month period ending 31 March 2025, the Global Sukuk Fund reported net performance of -0.34% compared to -1.62% for the index, DJ Sukuk PR USD Index.

During the period under review, the Global Sukuk market weakened in tandem with US Treasuries but outperformed the Dow Jones Sukuk Price Return index return by 128bps. The Fund's underweight position in sovereigns (which tend to be more correlated to US Treasury movements) contributed to performance. Furthermore, our holdings in shorter-tenured sukuk also cushioned the fund from market weakness during the period.

The US Treasury market weakened during the period under review, weighed by stronger-than-expected economic data, Trump's sweeping victory in the US elections, as well as hawkish Fedspeak. 10-year US Treasury yields jumped 103bps from 3.78% at end-September 2024 to 4.81% on 14th January 2025, before rallying 60bps to 4.21% at end-March 2025 (on a net basis, up 43bps).

INVESTMENT ADVISER'S REPORT

for the period ended 31 March 2025 (continued)

Global Sukuk Fund (continued)

The US Fed cut rates by 50bps cumulatively in November and December 2024 from 4.75-5.00% to 4.25-4.50%, before holding it unchanged in January and March 2025, given expectations that President Trump's policies may drive inflation higher. The Global Sukuk market softened in tandem with US Treasuries.

President Trump's "Liberation Day" tariff announcement on 2nd April threatens to erase most of the progress made in reducing inflation in the US since the Covid-19 pandemic, test the resilience of the US economy, and may even push it into a recession. This also complicates the US Fed's task in determining its next monetary policy move. In his first remarks post-Liberation Day, US Fed Chairman Powell said policymakers "face a highly uncertain outlook with elevated risks of both higher unemployment and higher inflation", and cautioned that the effects of the tariff could be more persistent than expected. Powell also emphasized that the central bank does not need to hurry to adjust rates, stressing that policymakers need to wait for more clarity on the Trump administration's policies. Separately, President Trump's imposition of 10% tariffs on GCC countries is unlikely to have a significant direct economic impact to the region, as oil and gas imports are exempt from the new tariffs. This exemption protects the GCC region's most critical export sector, as oil and gas account for over 60% of Saudi Arabia's exports to the US and remain a key pillar of Gulf-US trade. Excluding energy, GCC countries have limited direct trade exposure to the US, with the US recording trade surpluses with all six GCC countries in 2024. Meanwhile, Saudi Arabia and the UAE continue to deliver progress on their economic diversification, with non-oil sectors now contributing around 53% and 75% of total GDP respectively. Nevertheless, due to heightened uncertainties, we will remain vigilant and adopt a nimble investment strategy to manoeuvre market fluctuations and capitalize on trading opportunities, with increased investments in sovereign sukuk.

Islamic Asia Pacific Dynamic Income & Growth Fund

For the six -month period ending 31 March 2025, the Islamic Asia Pacific Dynamic Income & Growth Fund reported net performance of -12.84%.

In the six-month period, the US 10-year bond yield fluctuated strongly from 3.8% to 4.5% before declining to 4.2%. During this period, crude oil prices hovered at about US\$72 to US\$75 per barrel. Indonesia, Thailand and Philippines were main detractors. Singapore and China were main contributors during this volatile period.

The fund is positioned in the following areas: a) diversified technology names across semiconductor and internet; and b) ideas where return drivers are not major macro factors, such as ASEAN telcos and pharmaceutical contract manufacturers. Our preference is for domestic oriented companies that are more insulated from the US. Recently we have bought selected stocks that could benefit from China's supply side reforms in the areas of steel sector. We trimmed selected technology stocks in IT services and semiconductors that are exposed to a potential US economic slowdown.

The US trade tariffs on 2 April came in both higher and broader than expected. It appears that the Trump Administration wants to use tariffs as both a negotiating tool and to rewire global trade practices. The impact on global growth is hard to dismiss. The sell-off in equity markets has somewhat priced in a slowdown. The downside risk to global growth stems from consumer and business uncertainty, and the impact on inflation expectations. In the US, there are emerging signs of strain on US consumer spending and question marks around whether the Fed will cut rates if the economy weakens while inflation stays sticky or moves higher depending on tariffs. The Asian region is in the spotlight because of the trade surplus with US. Each individual country will now need to negotiate with the US on a trade deal. China will face cumulative tariffs exceeding 50% and hence the impact on GDP growth can be material. Preliminary estimates from some economists place the GDP impact at 0.5% to 1.0% which means GDP growth could be revised from about 4.5% to about 3.5% to 4.0%. But the tariffs will probably push Beijing to implement stimulative policies on both the fiscal and monetary front to blunt this, especially now that China has decided to retaliate with 34% tariffs on US goods. We prefer domestically focused stocks which will help to dampen our fund's volatility.

Islamic Global Multi-Asset Fund

For the six-month period ending 31 March 2025, the Islamic Global Multi-Asset Fund returned -5.98%.

Negative returns in the period were predominantly driven by the equity sleeve within the fund which significantly detracted while the fund's gold allocation and sukuk sleeve contributed positively to the total return.

The fund is a total return strategy with no single focus on either income or capital appreciation. The strategic asset allocation is to be 50% equity, 50% sukuk with tactical deviations from these strategic asset allocations permitted upwards to 75% for equities and 85% for Sukuk. Global equity markets sold off over the last six months as market increased pricing in the odds of stagflation from spillover of Trump 2.0 trade policy uncertainty. While the selloff was broad-based, it has been a roller coaster ride for European equity which underperformed in Q4'24 on France's surprising snap election and Trump's victory in US presidential election but clawed back the loss in Q1'25 on Germany's loosening fiscal policies.

INVESTMENT ADVISER'S REPORT

for the period ended 31 March 2025 (continued)

Islamic Global Multi-Asset Fund (continued)

Emerging markets underperformed the developed markets counterparts. As US Treasury 10yr yield rose +42bps over the period, long duration sectors such as IT, Utilities and Real Estate underperformed. Sukuk credit spreads widened. Gold continued its upward trend, hitting record highs. Over the six-month period a policy divergence was witnessed across major central banks globally in which ex US central banks such as ECB and SNB continued their rate cutting cycle with a focus on economic growth while US Fed slowed down the pace of policy rate adjustments on the policy uncertainty of the new US administration. Our leading regime indicator ticked up marginally, staying in mildly expansionary zone while economic surprises were negative in Japan and US but were positive in China and Europe. Global financial conditions tightened on wider spreads and weaker equity momentum despite falling rates.

Recent reciprocal tariffs announced by the US administration exceeded market estimates sending risk assets into a freefall. As market sentiment swung to another extreme, we tactically increased our overweight in equity from sukuk and by taking some profits in gold allocation. As policies of the new US administration are expected to focus more on domestic economy and market has been repricing risk of tariff on economy, medium to longer term US economy is expected to fare better than other developed economies despite near term trade uncertainty weighing on US growth sentiments. We believe economic outlook in Europe remains challenging where capital market has already priced in the optimism of Germany's rising infrastructure and defence expense. In China, we believe more supportive policies are required with effective implementation to sustain the economic recovery while we closely monitor if the recent tech-driven rally is sustainable with improving fundamentals. We will be nimble in the positioning upon the unfolding policies of the new US administration & global central banks and development in inflation & growth dynamics.

Islamic Global Responsible Equity Fund

For the six-month period ending 31 March 2025, the Islamic Global Responsible Equity reported net performance of -8.42% compared to -7.62% for the index, MSCI ACWI Islamic Index.

Our stock selection in industrials and healthcare sectors contributed positively during the period but our investments in consumer discretionary and consumer staples disappointed. In particular, the underweight in Telsa was a significant drag on performance. Our stock selection in Japan added the most value and more than compensated for the negative contribution from Germany and France.

Equity markets kicked off 2025 strongly though not without bouts of volatility. It was a period filled with significant events including President Trump taking the oval office, widespread central bank meetings and an unforeseen report related to Al advancements that led to hasty stock price movements within the Al complex. U.S. tech stocks faced a sharp sell-off as investors reassessed lofty valuations following the release of a powerful open-source Al model by Chinese startup DeepSeek. The model, which seems to rival those from top U.S. developers but at a significantly lower cost, has raised concerns about the sustainability of current equity premiums. Despite it all, equity returns moved higher led by previously lagging Europe. During the month of February, Trump started the trade war with 25% tariffs on Mexico and Canada and additional 10% on China. Besides affecting trading partners, the uncertainty around trade policy may also be hitting US business and consumer confidence. Economic data relating to capex expectations and consumer confidence came in softer than expected and financial markets were pricing in almost 3 rate cuts by year-end by US Fed. However, US headline inflation was higher than expected in January, rising by 0.5%MoM and core goods inflation re-accelerated to 0.3%MoM. With this print, it is possible that the Fed may prolong its pause into the second half of the year.

The size and scope of the tariff announcement overwhelm the trade actions implemented during the 2018 Trade War. bringing average U.S. tariff rates even higher than those seen during the Smoot-Hawley Tariff Act of 1930. As a result. heightened worries about economic disruption have erupted. The tariffs represent the largest U.S. tax hike in modern history, and the impact on consumers could be severe. We estimate the resulting hit to U.S. GDP growth at around 2.4%, with more considerable fallout if trade partners retaliate. The odds of a U.S. recession are higher as a result. The dramatic nature of these tariffs and lack of ready softening measures implies equities will likely be in risk-off mode until something catalyses change. While markets priced in tariff risk, the actual measures announced are more severe than expected and future actions remain uncertain. This ambiguity, combined with the stagflationary nature of the shock, limits the Fed's ability to offset with policy support removing a pillar of potential market resilience. We may be nearing peak uncertainty. There is an optimistic scenario where tariffs are a negotiating tactic intended to build credibility and pave the way for fiscal stimulus. This may be via tax cuts especially tied to onshoring or a market-driven reduction in rates. If paired with tighter immigration policy, this could support real wage gains at the lower-income cohort and incentivize pro-cyclical responses from foreign economies (e.g. China & Germany). But this outcome requires policy clarity, and we are not there yet. Until a credible resolution emerges, either through de-escalation or fiscal offset, the market is likely to be defensive. Rising costs, limited visibility and uncertain policy path argues for caution in equity positioning. In this backdrop, companies with strong free cash flow generating capabilities remain attractive. With that said, following the dramatic share price declines in a wide swath of equities, we view this as a great opportunity to add to positions where our financials models suggest significant upside over the long-term.

INVESTMENT ADVISER'S REPORT

for the period ended 31 March 2025 (continued)

Global Sustainable Food and Biodiversity Fund

For the 6-month period ending 31 March 2025, the Global Sustainable Food and Biodiversity Equity Fund reported net performance of -7.72% compared to -0.99% for the index, S&P Global Agribusiness Equity Index.

Sectoral performance outperformance came solely from consumer staples which was more than offset by weakness in industrials, health care, and information technology. From a country perspective, Norway and Germany outperformed while Denmark and the United States were weak overall. Over the period, FMC Corp, Sprouts Farmers Market and Archer-Daniels-Midland Company were the top three contributors. The top detractors over the period were Manhattan Associates, Novo Nordisk and WH Group.

The fund is a fundamental high conviction thematic long-term global equity strategy, leveraging proprietary Sustainable Development Goal (SDG) tool for idea generation. It is focused on investing in companies spanning the food and agriculture value chain "from seed to table and beyond" and also targets biodiversity impact by investing in companies that deliver solutions to improve or lower negative biodiversity outcomes for their customers and that can materially improve or lower negative biodiversity outcomes through their business policies.

Heading into 2025, U.S. exceptionalism remained a dominant theme. But tech sector struggles, downward revisions to U.S. economic growth forecasts and tariff uncertainties have all culminated in U.S. equity weakness but a broadening into other parts of the world as well as better breadth. Protectionism remains a contentious point and likely to keep volatility prevalent on trade war concerns. Following multi-year leadership, U.S. equities have taken a back seat to international markets thus far in 2025. President Trump and his administration are looking to restructure international trade through tariffs and by extension has increased concern about the economic outlook. Odds for a recession in the States have ticked higher and there is the increased likelihood of growth boosting policies, deregulation and tax cuts, to avoid this scenario. However, through all the volatility and constant gyration on tariffs, peak tariffs and, therefore, peak pessimism, has likely been reached. Knowing President Trump is watching bond markets also implies that the tail risk of liquidity strains morphing into a financial crisis has been cut back significantly and provides a floor from which market sentiment can recover. That said, caution remains warranted. The potential impact on the U.S. is still significant, and uncertainty is likely to remain elevated through the 90-day grace period and as the U.S./China back-and-forth persists. From a global perspective, there are still numerous challenges and persisting risks. However, the depressed valuations in these regions create attractive entry points for long-term investors in firms generating resilient economic returns. Both China and the U.K. are examples of countries facing longstanding economic structural challenges. It is not surprising that investors' view companies domiciled in these markets with pessimism. Nevertheless, the market pessimism seems extreme as many of these companies operate globally yet are beset with deeply discounted valuations relative to their own histories and global peers. In times like these. the adage of staying invested with a diversified portfolio is more important than ever. Global diversification remains essential, especially given the asymmetric implementation of tariffs across countries, while cross-asset class exposure provides valuable resilience in periods of heightened volatility. After a sharp decline, equities have the potential to recover in the months ahead.

Principal Global Investors, LLC May 2025

1. FORMATION

The Principal Global Investors Funds ("the Trust") was constituted under the laws of Ireland by a Trust Deed dated 13 October 1992 as an open-ended umbrella Unit Trust established as an Undertaking for Collective Investment in Transferable Securities ("UCITS"). It is an umbrella Unit Trust in that different classes of units may be issued from time to time by the Manager. The Unit Trust has created a number of sub-funds (the "Funds"). The Trust has been authorised by the Central Bank of Ireland (the "Central Bank") pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011, (as amended) and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) (Amendment) Regulations 2019 (the "Central Bank UCITS Regulations").

The financial statements have been prepared for the period ended 31 March 2025.

The Funds of the Trust are listed on pages 4-9. The Portfolios of Investments are listed on pages 29-102.

2. PRINCIPAL ACCOUNTING POLICIES

Accounting Convention and Basis of Accounting

These condensed interim unaudited financial statements for the period ended 31 March 2025 have been prepared in accordance with accounting standards generally accepted in Ireland ("Irish GAAP") including Financial Reporting Standard ("FRS") 104 - Interim Financial Reporting ("FRS 104"), "The Financial Reporting Standard applicable in the United Kingdom and Republic of Ireland" and certain provisions of the UCITS Regulations and the Hong Kong Securities and Futures Commission's Code on Unit Trusts and Mutual Funds. Irish GAAP used in preparing financial statements which present a true and fair view are those standards issued by the Financial Reporting Council ("FRC").

The Trust has availed of the exemption available to open ended investment Funds that hold a substantial proportion of highly liquid and fair valued investments under Section 7 "Statement of Cash Flows" of FRS 102, also referenced in section 15(g) of FRS 104 and is not presenting cash flow statements.

The Directors have a reasonable expectation that the Trust has adequate resources to continue in operational existence for the foreseeable future. The report has been prepared for all Funds in the Trust on a going concern basis. The report has been prepared for all Funds in the Trust under the historical cost convention, as modified by the revaluation of financial assets at fair value through profit or loss. The report has been prepared in USD for all Funds except Finisterre Emerging Markets Debt Euro Income Fund, Principal High Grade Capital Securities Fund and Principal Capital Securities Fund is Euro. The functional and presentation currency of the Trust is USD.

The format and certain wordings of the financial statements have been adapted from those contained in Irish statute so that, in the opinion of the Directors, they more appropriately reflect the nature of the Trust's business as an investment Fund.

The information required by FRS 102, to be included in a single statement of comprehensive income for the reporting period displaying all items of income and expense recognised during the period including those items recognised in determining profit or loss and items of other comprehensive income and a Reconciliation of Movements in Unitholders' Funds are, in the opinion of the Directors, contained in the Statements of Comprehensive Income and the Statements of Movement in Net Assets Attributable to Redeemable Participating Unitholders. In arriving at the results for the year, all amounts in the Statements of Comprehensive Income relate to continuing activities. In the opinion of the Directors, the financial statements give, in all other respects, the information required by the UCITS Regulations and the Hong Kong Securities and Futures Commission's Code on Unit Trusts and Mutual Funds.

All gains or losses for the period are reflected in the Statements of Comprehensive Income.

The significant accounting policies adopted by the Trust are set out overleaf. These policies have been consistently applied to the financial periods presented unless otherwise stated.

2. PRINCIPAL ACCOUNTING POLICIES (continued)

Financial Instruments at Fair Value through Profit or Loss

Under FRS 102, in accounting for its financial instruments a reporting entity is required to apply either (a) the full provisions of Section 11 "Basic Financial Instruments" and Section 12 "Other Financial Instruments Issues" of FRS 102, (b) the recognition and measurement provisions of International Accounting Standards ("IAS") 39 "Financial Instruments: Recognition and Measurement" ("IAS 39") and only the disclosure requirements of Sections 11 and 12 of FRS 102; or (c) the recognition and measurement provisions of International Financial Reporting Standards ("IFRS") 9 "Financial Instruments" ("IFRS 9") and the disclosure requirements of Sections 11 and 12. The Trust has elected to apply the recognition and measurement provisions of IAS 39 and the disclosure requirements of Sections 11 and 12.

This category has two sub-categories: financial assets and liabilities held for trading, and those designated by the Valuation Committee of the Manager at fair value through profit or loss at inception. All instruments on the Portfolio of Investments are classified as held at fair value through profit or loss. Subsequent to initial recognition, all instruments classified at fair value through profit or loss are measured at fair value with changes in their fair value recognised in the Statement of Comprehensive Income. Financial assets are derecognised when the rights to receive the cashflow from the investments have expired or the Funds have transferred substantially all of the risks or rewards of ownership.

Accounting for Investments

Investments are recognised at the trade date at last traded prices. Realised gains or losses on investment disposals are calculated using the average cost method. Realised gains or losses on investment transactions in debt instruments are calculated using the amortised cost method based on the effective interest rate.

Valuation of Investments

The period end valuation date was 31 March 2025, the last business day of the interim period. Securities listed on a recognised stock exchange or traded on any other organised market, are valued at the current price at each valuation point on the stock exchange or market which constitutes the principal market for such securities. If trades are received after the dealing cut-off time they will be accounted for in the next valuation. If for specific assets the current prices do not, in the opinion of the Manager, reflect their fair value or are not available, the price of the most recent transaction provides evidence of the current fair value as long as there has not been a significant change in economic circumstances since the time of the transaction or the Manager may also apply a fair value adjustment where they deem appropriate in order to reflect fair value.

In the case of any security not listed, quoted or dealt on a regulated market or for which no quotation or value is available which would provide a fair valuation, or in respect of which the price is unrepresentative, the fair value of such security is determined on the basis of the probable realisation value and is determined by the Investment Manager, Sub-Investment Manager(s), a stockbroker or other competent person appointed by the Manager and approved for the purpose by the Trustee, using valuation techniques.

Futures

A futures contract obligates one party to sell and the other party to purchase a specific instrument for an agreed price at an agreed future date. Futures may be used subject to the conditions and limits laid down by the Central Bank and the Trust Deed and subject to any other restrictions or regulations which may affect the portfolio management of the Funds or the Investment Manager/Sub-Investment Manager(s). Certain Funds may buy or sell futures to provide an efficient, liquid and effective method for the management of risks by "locking in" gains and/or protecting against future declines in value. The fair value of open future contracts is calculated as the difference between the contracted rate and the current rate that would close out the contract on the Statement of Financial Position date. Gains or losses on futures are included in the Unrealised Gain/(Loss) on Open Future Contracts on the Statement of Financial Position and are shown in the Portfolio of Investments. When the contract is terminated, the Funds will recognise a realised gain or loss in the Statement of Comprehensive Income equal to the difference between the value of the contract at the time it was entered into and the time it was closed.

Forward Foreign Currency Exchange Contracts

In a Forward Foreign Currency Exchange Contract, the Funds agree to receive or deliver a fixed quantity of one currency for another, at a pre-determined price at a future date. The fair value of Forward Foreign Currency Exchange Contracts is calculated as the difference between the contracted rate and the current forward rate that would close out the contract on the Statement of Financial Position date. Gains or losses on Forward Foreign Currency Exchange Contracts are included in the Unrealised Gain/(Loss) on Forward Foreign Currency Exchange Contracts on the Statement of Financial Position and are shown in the Portfolio of Investments. Any realised gains or losses are recognised in the Statement of Comprehensive Income at trade date. The Funds may enter into these contracts to hedge against changes in currency exchange rates. The Forward Foreign Currency Exchange Contracts are used to hedge the currency exposure on individual positions taken by the Funds and to hedge certain non base currency units.

2. PRINCIPAL ACCOUNTING POLICIES (continued)

Spot Currency Contracts

In a Spot Currency Contract the Fund agrees to receive or deliver a fixed quantity of one currency for another, at a predetermined price at a future date (the spot date). This date is typically within three business days of inception of the contract. The fair value of Open Spot Currency Contracts is calculated as the difference between the contracted rate and the current forward rate that would close out the contract on the Statement of Financial Position date. Gains or losses on Spot Currency Contracts are included in the Unrealised Gain/(Loss) on Open Spot Currency Contracts on the Statement of Financial Position and are shown in the Portfolio of Investments. Any realised gains or losses are recognised in the Statement of Comprehensive Income at trade date.

Credit Default Swaps

A Credit Default Swap is a credit derivative transaction in which two parties enter into an agreement, whereby one party pays the other a fixed periodic coupon for the specified life of the agreement. The other party makes no payments unless a credit event, relating to a predetermined reference asset occurs. If such an event occurs, the party will then make a payment to the first party and the swap will terminate. When the swap terminates any realised gains or losses arising are reflected in the Statement of Comprehensive Income as part of the Net Gain/(Loss) on investment activities. A Credit Default Swap provides the Fund with an alternative to investing in assets themselves for a potentially higher return with the same risk or they may be used to obtain exposure to assets which the Fund could not otherwise acquire due to illiquidity in the relevant market. The Fund recognises the swap when it becomes party to the contract. The Credit Default Swaps are marked to market daily based upon quotations from market makers and recorded in the Statement of Financial Position as Market Value Gain/(Loss) on Swap Contracts.

Term Loans

The Fund begins earning interest from settlement date of the trade. The loans pay interest at an assigned rate. A Fund investing in such a loan assumes the credit risk of the borrower and there could be potential loss to the Fund in the event of default by the borrower. Term loans are priced at quoted market prices or independently vendor priced, or at cost when vendor prices are unavailable. The change in unrealised gains and losses or any realised gains or losses arising on the loans are shown in Net Gain/(Loss) on investment activities in the Statement of Comprehensive Income.

Interest Rate Swaps

An Interest Rate Swap is a bilateral agreement in which each of the parties agrees to exchange a series of interest payments for another series of payments (usually fixed/floating) based on a notional amount that serves as a computation basis and that is usually not exchanged. The Interest Rate Swaps are marked to market daily based upon quotations from market makers and recorded in the Statement of Financial Position as Market Value Gain/(Loss) on Swap Contracts. When the swap terminates any gains or losses arising are reflected in the Statement of Comprehensive Income as part of the Net Gain/(Loss) on investment activities.

Total Return Swaps

A Total Return Swap is a financial contract whereby one party agrees to pay another party the total return of a defined asset in return for receiving a floating rate return. The Trust enters into unfunded swap agreements on behalf of the Fund. Total Return Swaps are marked to market using valuation sources/methods and the fair value is recorded in the Statement of Financial Position as Market Value Gain/(Loss) on Swap Contracts. The change in unrealised gains and losses or any realised gains or losses arising on termination are shown in Net Gain/(Loss) on investment activities in the Statement of Comprehensive Income.

Total Return Swap positions are valued using models which utilise observable data to the extent practicable and contain assumptions on the application of this data. Changes in data inputs and assumptions about these factors could affect the reported fair value of the Total Return Swaps.

Foreign Currency Transactions

In accordance with Section 30 "Foreign Currency Translation" of FRS 102, items included in the individual Fund's financial statements are measured using the currency of the primary economic environment in which it operates (functional currency). The Fund's selection of the functional currency is attributable to the functional currency being: a) the major component of the Fund's benchmark and b) the common proxy for most clients in the Fund's varied client base. The functional currency assessment was completed at a Fund level. The Funds' presentation currencies equated to their respective functional currencies when assessed under FRS 102. The functional currency of each Fund of the Trust is USD except for Finisterre Emerging Markets Debt Euro Income Fund, Principal High Grade Capital Securities Fund and Principal Securities Fund is Euro.

2. PRINCIPAL ACCOUNTING POLICIES (continued)

Foreign Currency Transactions (continued) For each Fund:

- (i) Currency gains or losses can arise where there is a difference between the amounts of foreign dividends and interest recorded on the Fund's books and the Fund's functional currency equivalent of the amounts actually received or paid. These gains or losses are included where appropriate in the dividend and net gain/(loss) on investment activities figure in the individual Fund's Statement of Comprehensive Income;
- (ii) Currency gains or losses realised on securities purchases and sales transactions are included in Net Gain/(Loss) on investment activities in the individual Fund's Statement of Comprehensive Income;
- (iii) Unrealised currency gains or losses on securities held at period end are included in Net Gain/(Loss) on investment activities in the individual Fund's Statement of Comprehensive Income; and
- (iv) Monetary assets and liabilities denominated in currencies other than the Fund's functional currency are translated at the rate of exchange ruling at the close of business on the Statement of Financial Position date and exchange differences are included in Net Gain/(Loss) on investment activities in the individual Fund's Statement of Comprehensive Income.

Income from Investments

Dividends are credited to the Statement of Comprehensive Income on the dates on which the relevant securities are listed as "ex-dividend". Interest income is accounted for daily on an effective yield basis. Income is shown gross of any non-recoverable withholding taxes, which are disclosed separately in the Statement of Comprehensive Income, and net of any tax credits. Realised gains or losses on investment transactions in debt instruments are calculated using the amortised cost method based on the effective interest rate. Dividend income due to the Fund is reported as Dividends Receivable in the Statement of Financial Position.

Net Gain/(Loss) on Investment Activities

In respect of each instrument type classified as Financial Instruments at Fair Value through Profit or Loss, the movement in unrealised gains/(losses) since the prior period end and realised gains/(losses) are included in Net Gain/(Loss) on investment activities in the Statement of Comprehensive Income. Interest earned on fixed income securities such as bonds is included here also.

Due to Unitholders

Due to unitholders represent monies received from investors for the purchase of shares, but for which shares have not been issued at the statement of financial position date. Due to Unitholders are recognised at a price per unit equal to the Net Asset Value per Redeemable Participating Unit on the relevant Dealing Day.

Due from Unitholders

Due from Unitholders represent monies received in respect of redemptions which is due to be paid to investors for the redemption of shares, but for which have not been redeemed at the statement of financial position date. Due from Unitholders are recognised at a price per unit equal to the Net Asset Value per Redeemable Participating Unit on the relevant Dealing Day.

Expenses

Operating expenses are recognised on an accruals basis in the Statement of Comprehensive Income.

Anti-Dilution Levy

The Board of Directors of the Manager may exercise its discretion to apply an anti-dilution levy in relation to subscriptions and redemptions of units. The levy is a charge for transaction costs that may be added or deducted from the NAV per Unit of the relevant class to reflect the costs of acquiring or disposing of underlying assets to Fund subscriptions or redemptions from the Fund, respectively. The levy is intended to be used to ensure that all investors in the Trust are treated equitably by allocating transaction costs to the investors whose transactions give rise to those costs. For the period ended 31 March 2025, there was anti-dilution levies charged on the following funds: Origin Global Smaller Companies Fund \$12,720. For the year ended 30 September 2024, there was anti-dilution levies charged on the following funds: Global High Yield Fund \$21,148, Global Sukuk Fund \$1,546, Islamic Asia Pacific Dynamic Income & Growth Fund \$8,525 and Post Short Duration High Yield Fund \$125,774.

Cash at Bank

Cash is valued at amortised cost, which approximates fair value. Cash is held with The Bank of New York Mellon SA/NV, Dublin Branch.

2. PRINCIPAL ACCOUNTING POLICIES (continued)

Cash Collateral & Pledged Collateral

Cash collateral provided by each Fund is identified in the Statement of Financial Position as cash collateral held and is not included as a component of Cash at Bank. For collateral other than cash, if the party to whom the collateral is provided has the right by contract or custom to sell or repledge the collateral, the Fund classifies that asset in its Statement of Financial Position separately from other assets and identifies the asset as Securities pledged as collateral. Where the party to whom the collateral is provided does not have the right to sell or repledge, a disclosure of the collateral provided is made in the notes to the financial statements. Any obligation arising from collateral received is measured at the fair value of the amount required to settle the obligation and separately identified in the Statement of Financial Position.

Margin Cash Receivable/Payable

Margin Cash Receivable/Payable to the Trust in relation to the open Futures Contracts is identified in the Statement of Financial Position as Margin Cash Receivable/Payable and is not included as a component of Cash at Bank. Margin Cash Receivable and Margin Cash Payable at 31 March 2025 and 30 September 2024 is detailed as part of Note 4.

Purification of Income and Capital Gains

Procedures have been established for the identification and purification of any impure capital gains or income on the following Shariah Compliant Funds: Global Sukuk Fund, Islamic Asia Pacific Dynamic Income & Growth Fund, Islamic Global Multi-Asset Fund and Islamic Global Sustainable Equity Fund. Impure capital gains may arise; a) where a security is held that was Shariah compliant at the time of investment, but subsequently becomes non-Shariah compliant, or b) where a non-Shariah compliant security is purchased in error. Impure income could be derived from non-Shariah compliant sources such as interest income from conventional financing, interest bearing accounts or from dividend purification exercises. Amanie Advisors Sdn Bhd (the "Shariah Investment Manager") will conduct post review on the securities held and any income received and will identify any instances where income or capital gains are considered impure. Any impure income or capital gains so identified will be removed from the Funds and paid to charitable bodies as approved by the Shariah Adviser as soon as possible. Impure income was paid to the following charitable bodies for the financial period ended 31 March 2025: XXX. There were no impure income payments outstanding for the financial period end 31 March 2025. There was no impure income paid to charitable bodies for the financial period ended 31 March 2024.

Distributions

The Global Sustainable Equity Fund declares and pays annual distributions to Unitholders holding the A Income Unit Class.

The European Equity Fund declares and pays annual distributions to Unitholders holding the A Income Unit Class.

The Global Property Securities Fund declares and pays annual distributions to Unitholders holding the A, A2, D, I, I2 and N Income Unit Classes.

The U.S. Equity Fund declares and pays annual distributions to Unitholders holding the D and N Income Unit Classes.

The Preferred Securities Fund declares and pays quarterly distributions to Unitholders holding the A, A2, I, D, F, N, P and X Income Unit Classes.

The Global High Yield Fund declares and pays quarterly distributions to Unitholders holding the A, I, D and N Income Unit Classes.

The Global Property Securities Fund declares and pays quarterly distributions to Unitholders holding the A2 (Quarterly), D2 Income Plus unit Classes and I (Quarterly) Income Unit Classes.

The Post Short Duration High Yield Fund declares and pays quarterly distributions to Unitholders holding the A, A2 and I Income Unit Classes.

The Finisterre Unconstrained Emerging Markets Fixed Income Fund declares and pays quarterly distributions to Unitholders holding the A, A2, I, I2, I3, D, F, N Income Unit and A2 and P2 Income Plus Unit Classes.

The Finisterre VAG Unconstrained EM Fixed Income Fund will declares and pays quarterly distribution to Unitholders holding the I2 Income Unit Class.

The Finisterre Emerging Markets Debt Euro Income Fund declares and pays quarterly distribution to Unitholders holding the N Income Unit Class.

The Preferred Securities Fund declares and pays monthly distributions to Unitholders holding the D2 Income Unit and D2 Income Plus Unit Classes.

2. PRINCIPAL ACCOUNTING POLICIES (continued)

Distributions (continued)

The Global High Yield Fund declares and pays monthly distributions to Unitholders holding the D2 Income Plus Unit Class.

The Global Property Securities Fund declares and pays monthly distributions to Unitholders holding the D2 Income Unit Class.

The Post Short Duration High Yield Fund declares and pays monthly distributions to Unitholders holding the D2 Income Unit and D2 Income Plus unit Classes.

The Principal High Grade Capital Securities Fund declares and pays quarterly distribution to Unitholders holding the X Income Unit Class.

The Principal Capital Securities Fund declares and pays quarterly distribution to Unitholders holding the X Income Unit Class.

The Global Sukuk Fund declares and pays quarterly distribution to Unitholders holding the A Income Unit, I Income Unit, A Income (SGD) Unit, I Income (SGD) Unit Classes and annual distribution to Unitholders holding the I Income (GBP) Unit Class.

The Islamic Asia Pacific Dynamic Income & Growth Fund declares and pays annual distribution to Unitholders holding the A Income Unit, I Income Unit and A Income (SGD) Unit Classes.

The Islamic Global Multi-Asset Fund declares and pays quarterly distribution to Unitholders holding the A Income Plus Unit Class and annual distribution to Unitholders holding the A Income Unit, I Income Unit and A Income (SGD) Unit Classes.

The Islamic Global Responsible Equity Fund declares and pays quarterly distribution to Unitholders holding Income Unit Class. There are no Income Units Classes are in issue on Islamic Global Responsible Equity Fund.

The Global Sustainable Food and Biodiversity Fund declares and pays quarterly distribution to Unitholders holding A Income Unit and I Income Unit Classes.

There are no D2 Income Unit Classes in issue currently on the Finisterre Unconstrained Emerging Markets Fixed Income Fund.

Monthly distributions will also be payable in respect of the N2 Income Unit Class on the Preferred Securities Fund. There are no N2 Income Unit Classes in issue currently on the Preferred Securities Fund.

There were distributions out of capital of \$422,242 for the period ended 31 March 2025 (30 September 2024: \$567,804).

Upon the expiry of the period of six years after the relevant Distribution Date, the Holder and any person claiming through, under or in trust for him shall forfeit any right to any distribution not paid, and such amount shall become part of the relevant Fund.

Distributions are recorded by each Fund on ex-dividend date in the Statement of Comprehensive Income.

Offsetting

Financial assets and liabilities are offset and the net amount reported in the Statement of Financial Position when there is a legally enforceable right to set-off the recognised amounts and there is an intention to settle on a net basis, or minimise the assets and settle the liability simultaneously. No offsetting has taken place during the financial period ended 31 March 2025 and 30 September 2024.

Participating Units

All participating units issued by the Funds provide the investors the right to acquire redemptions for cash at the value proportionate to the investor's share in the Fund's net assets at the redemption date. Such instruments give rise to a financial liability for the present value of the redemption amount. In accordance with the issued prospectus the Funds are contractually obliged to redeem units at the traded NAV per unit which is calculated at each valuation point.

2. PRINCIPAL ACCOUNTING POLICIES (continued)

Redeeming Units

When a redemption request has been submitted by a Unitholder who is or is deemed to be an Irish resident, or is acting on behalf of an Irish resident, the Manager shall deduct from the redemption proceeds an amount which is equal to the tax payable by the Unit Trust to the Revenue Commissioners in Ireland in respect of the relevant transaction.

Cross Umbrella Holdings

Some of the Sub-Funds use cross investment techniques, meaning that the Funds invest into other Funds of the umbrella structure. These investments are into zero management fee share classes in order to avoid double charging.

The following Funds held cross umbrella investments as at 31 March 2025, outlined in the Schedule of Investments of the Fund.

Fund	Cross Umbrella Investments	Currency	Market Value	% of Net Assets
Preferred Securities Fund	Principal Capital Securities Fund	USD	95,429,313	2.24
Preferred Securities Fund	Principal High Grade Capital Securities Fund		95,635,722	2.25
Finisterre Unconstrained Emergino Markets Fixed Income Fund	g Finisterre Emerging Markets Debt Euro Income Fund – X Inc	EUR	30,862,780	1.37
Finisterre Unconstrained Emerging Markets Fixed Income Fund	g Finisterre Emerging Markets Debt Euro Income Fund – X Acc	EUR	30,862,449	1.37

3. TAXATION

Under current law and practice the Trust qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis, it is not chargeable to Irish tax on its income or gains.

However, Irish tax may arise on the happening of a "chargeable event". A chargeable event includes any distribution payments to Unitholders, any encashment, redemption, cancellation, repurchase or transfer of units and any deemed disposals of units as described below for Irish tax purposes arising as a result of holding units in the Trust for a period of eight years or more. Where a chargeable event occurs, the Trust is required to account for the Irish tax thereon.

No Irish tax will arise on the Trust in respect of chargeable events in respect of:

- (i) a Unitholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Trust or the Trust has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and
- (ii) certain exempted Irish tax resident Unitholders who have provided the Trust with the necessary signed statutory declarations.

Dividends, interest and capital gains (if any) received on investments made by the Trust may be subject to taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Trust or its Unitholders.

6. DISTRIBUTIONS

For the period ended 31 March 2025

Interim distributions were declared on 1 April 2025 and 1 April 2024 respectively. Distributions declared on 1 April 2025 or nearest subsequent business day have not been included in the Statement of Comprehensive Income for 31 March 2025. These will be included in the financial statements for 30 September 2025. The A Income Unit Classes from the Global Sustainable Equity Fund did not declare and pay any annual distributions for the period ended 31 March 2025 or 31 March 2024. Distributions declared on 1 April 2025 relate to 31 March 2025 distributions in the table below.

Accumulation Classes

The Accumulation Unit Classes did not declare Distributions on 31 March 2025 or 31 March 2024.

^{***}These Funds offer monthly distributions to investors.

7. SIGNIFICANT CONTRACTS AND TRANSACTIONS WITH RELATED PARTIES

Management Fee

Pursuant to the Trust Deed dated 13 October 1992, Principal Global Investors (Ireland) Limited ("the Manager") acts as Manager to the Trust and is responsible for its management and administration. This is considered a Related Party to the Company. For services rendered, the Trust will pay to the Manager an annual fee, accrued daily in the unit price and payable monthly in arrears. The Management Fee is currently calculated as a percentage of the NAV of each Fund and is accrued every Business Day. These related party transactions have been entered into in the ordinary course of business. The Management Fee expense is shown in the Statement of Comprehensive Income and the accrued amount is shown in the Statement of Financial Position. Management Fee rates for each unit class are listed in the supplement for each Fund. These are available from the www.principalglobal.com website.

Islamic Asia Pacific Dynamic Income & Growth Fund invests in Principal managed Funds. A rebate is in place to ensure Management fees on these Fund of Fund investments is reimbursed to avoid double charging. The Rebate on these investments is shown in the Statement of Comprehensive Income.

Related Party Transactions

Principal Islamic Asia Pacific Dynamic Equity Fund is a Related Party to the Company and any transactions are included in the note above. AIFM fees are disclosed in the Statement of Comprehensive Income. The Directors of the Company are not aware of any other Related Party transactions. The two subscriber shares issued for the purposes of the incorporation of the Funds, are each being legally and beneficially owned by entities within the Principal Financial Group.

Expense Cap

The Manager, or the Shariah Investment Manager in case of the Islamic Funds, at its discretion, may absorb (directly by waiving a portion of its fees or by reimbursement to the account of each Fund), certain additional fees, costs or expenses for each Fund that may arise in respect of the management and operation of the Trust attributable to each Fund. This is considered a Related Party to the Company. This Expense Cap fee is shown as Rebate/Recharge to the Fund due to capping in the Statement of Comprehensive Income and the accrual/prepaid amount is shown as part of Other Assets or Other Payables in the Statement of Financial Position.

Administration Fee

In addition to the Management Fee, the Trust Deed permits the Manager to charge an Administration Fee of up to 0.15% per annum of the value of the units in the Funds for administering the Trust. Currently the Manager only charges this fee on the NAV of the Funds attributable to A, D, F, and N Class units. This fee is calculated as a percentage of the NAV of each Fund attributable to A, D, F and N Class units and is accrued every Business Day. The total accrued amount is paid monthly in arrears. All fees and expenses payable to the Administrator in respect of the administration services it provides to the Manager will be met by the Manager. Administration Fee expense is shown in the Statement of Comprehensive Income and the accrued amount is shown in the Statement of Financial Position.

Trustee and Depositary fee

The Manager appointed The Bank of New York Mellon SA/NV, Dublin Branch to act as the Trustee to the Trust. The principal activity of the Trustee is to act as the Depositary and Trustee of the assets of collective investment schemes ("CISs"). The Trustee may retain for its own use out of each Fund a fee of up to 0.012% per annum of the NAV of the units calculated on each Business Day during the month, accrued and deducted from the Fund the following month subject to a minimum fee of US\$15,000 per annum which may be waived. The fee currently charged by the Trustee per Fund is disclosed in the relevant supplement for each Fund. The Trustee Fee expense is shown in the Statement of Comprehensive Income and the accrued amount is shown in the Statement of Financial Position.

Directors' Remuneration

Mr. John O'Connell, Ms. Bronwyn Wright and Mr. Jim Firn are independent non-executive Directors of the Manager and have no executive function with the Investment Manager or its related party companies. Each independent non-executive Director receives an annual fee of €33,540 for their services rendered to the Trust. Mr. Joel Pitz, Ms. Barbara Weing, Mr. James Bowers and Mr. Donnacha Loughrey are related parties to the Investment Manager and are not entitled to receive any compensation from the Trust.

Sub-Custody Fee

The Depositary will be paid a fee at normal commercial rates and such fee shall be paid out of each Fund. The level of Sub-Custodian Fees and expenses will vary depending on the investment profile of the Fund including, in particular, the nature of the securities markets in which the Fund invests, the size of the Fund and the amount of trading in the assets of the Fund. Such fees will be charged at normal commercial rates and will only be reimbursed from a Fund where they are less than 0.50% per annum of the NAV of the Fund. The Manager will pay any fees that exceed this level. Depositary Fee expense is shown in the Statement of Comprehensive Income and the accrued amount is shown in the Statement of Financial Position.

7. SIGNIFICANT CONTRACTS AND TRANSACTIONS WITH RELATED PARTIES (continued)

Performance Fees

There are no performance fees on any of the Funds for the period ended 31 March 2025 or for the year ended 30 September 2024.

Audit Fees

The audit fee charged for the period ended 31 March 2025 was \$189,451 excluding VAT (31 March 2024: \$137,072).

9. EFFICIENT PORTFOLIO MANAGEMENT

The Funds are denominated in USD, except for Finisterre Emerging Markets Debt Euro Income Fund, Principal High Grade Capital Securities Fund and Principal Capital Securities Fund, which are denominated in Euro, but purchase assets denominated in a range of currencies. During the period, transactions were entered into which are economically appropriate to the reduction of relevant risks or costs to improve investment performance.

Subject to the conditions and within the limits from time to time laid down by the Central Bank, and except as otherwise stated in the investment objective and policies of a Fund, the Investment Manager and/or Sub-Investment Manager(s) may employ, for certain Funds, investment techniques and instruments such as futures, forward foreign currency exchange contracts, currency swaps, credit default swaps, total return swaps, options, equity options, warrants and other derivatives for Efficient Portfolio Management ("EPM") purposes if deemed advisable by the Investment Manager/Sub-Investment Manager(s). Furthermore, new techniques and instruments may be developed which may be suitable for use by a Fund in the future, and a Fund may employ such techniques and instruments subject to the prior approval of, and any restrictions imposed by, the Central Bank.

For UCITS which have engaged in EPM techniques, certain disclosures are required under Chapter 4 of the Central Bank UCITS Regulations. The Investment Manager of the Funds have identified all Financial Derivative Instruments ("FDIs") which are used for EPM. A UCITS is required to disclose the revenues arising from EPM techniques for the entire reporting period together with the direct and indirect operational costs and fees incurred.

The Funds may also where indicated in the relevant supplement, enter into repurchase, reverse repurchase, sale and buyback agreements and stock lending agreements. The Investment Manager/Sub-Investment Manager(s) considers only repurchase agreements, reverse repurchase agreements and securities lending to be EPM techniques. None of the Funds held repurchase agreements, reverse repurchase agreements or took part in securities lending as at 31 March 2025 or at 30 September 2024.

Details of all open transactions at the period end are disclosed in the Portfolios of Investments.

10. DEALING COMMISSION ARRANGEMENTS

The Investment Manager appointed in relation to each Fund is responsible for the selection of brokers with whom they deal. In relation to certain equity Funds, the Investment Manager/Sub-Investment Manager(s) have entered into dealing commission arrangements with brokers whereby they obtain services or benefits from them, or from third parties — which are paid for out of commissions charged to the Funds. Such services or benefits relate primarily to research and portfolio management, and ensuring their purchase is compliant with relevant local regulation; including being a permitted service. The relevant Investment Manager/Sub Investment Manager(s) are satisfied that trades generating soft commissions comply with the relevant local regulations requiring best execution — which requires consideration of relevant factors, including price and execution quality.

11. FINANCIAL RISK MANAGEMENT

Financial Assets at Fair Value through Profit or Loss

Under FRS 102, the Trust is required to classify fair value measurement using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Level 1: The unadjusted quoted price in an active market for identical assets or liabilities that the entity can access
 at the measurement date.
- Level 2: Inputs other than quoted prices included within Level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly.
- Level 3: Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability.

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

"FRS 102 - Fair value hierarchy disclosures" require disclosure of financial instruments held at fair value on the basis of a fair value hierarchy consistent with EU-adopted IFRS based on Level 1, 2 and 3 classifications. The financial statements and comparatives have been prepared in accordance with these amendments and fair value measurement is categorised based on Levels 1, 2 and 3.

The fair value of securities held in Level 3 for the period ended 31 March 2025 was USD1,046 (30 September 2024: USD 1,802). Securities fair valued at nil have been indicated by a footnote on any relevant Funds in the following tables.

The tables analyse the financial assets of each Fund against the fair value hierarchy and measures them at fair value for 31 March 2025 and 30 September 2024 in accordance with FRS 102.

13. GLOBAL EXPOSURE

The Investment Manager/Sub-Investment Manager(s) employ a documented Risk Management Process in relation to the use of FDIs, which ensures the risk associated with the positions is measured, monitored and managed. In respect of the Finisterre Unconstrained Emerging Markets Fixed Income Fund; Finisterre Unconstrained VAG Unconstrained EM Fixed Income Fund and Finisterre Emerrging Markets Debt Euro Income Fund; an Absolute VaR approach, based on a confidence level of 99% for a daily horizon and considering at least two years of historical data is used to manage risk. In relation to the remaining Funds, the Commitment approach is used; which entails monitoring global exposure and counterparty exposure associated with the positions.

15. SIGNIFICANT EVENTS DURING THE PERIOD

Effective 21 October 2024 U.S. Blue Chip Equity Fund changed its name to U.S. Equity Fund.

Effective 16 December 2024 Global Responsible Equity Fund changed its name to Global Sustainable Equity Fund.

Effective 21 January 2025, the Investment Manager will appoint Jupiter Asset Management Limited ("Jupiter") as the new sub-investment manager of the Origin Global Emerging Market Equity Fund and Origin Global Smaller Companies Fund replacing Origin Asset Management LLP ("Origin"), the existing sub-investment manager of the Funds.

This change will not have a material impact on (i) manner in which the Funds are being operated; and (ii) the overall risk profile of the Funds.

Effective 31 March 2025 European Responsible Equity Fund changed its name to European Equity Fund.

Effective 31 March 2025 Global Sustainable Listed Infrastructure Fund changed its name to Global Listed Infrastructure Fund.

There have been no other significant events affecting the Funds during the period ended 31 March 2025.

16. SIGNIFICANT EVENTS AFTER THE PERIOD END

On 2 April 2025, U.S. President Donald Trump announced tariffs under the 'liberation Day' initiative. These measures included a universal 10% tariff on all imports, with higher rates for specific countries including China, effective from 9 April 2025. Following the announcement, global financial markets have experienced increased volatility. In response to the market turmoil, President Trump announced a 90 day pause on certain tariffs. On 13 May 2025, the U.S and China agreed to a 90-day pause on the imposition of tariffs targeting each other's goods. Volatility in the global markets remains, and the full economic impact remains unclear. The Manager continues to monitor the situation closely.

James Bowers resigned as Director of the Manager effective 21 May 2025.

There have been no other significant events affecting the Funds after the period ended 31 March 2025.

17. APPROVAL OF FINANCIAL STATEMENTS

The Financial Statements were approved by the Board of Directors of the Manager on 14 May 2025.

for the period ended 31 March 2025

Securities Financing Transactions Regulation for the period ended 31 March 2025

Securities Financing Transactions on Total Return Swaps

The following table details the gross aggregate fair value for total return swaps held on Finisterre Unconstrained Emerging Markets Fixed Income Fund, Finisterre VAG Unconstrained EM Fixed Income Fund and Finisterre Emerging Markets Debt Euro Income Fund analysed by counterparty, as at the Statement of Financial Position date.

Finisterre Unconstrained Emerging Markets Fixed Income Fund

		Total Return Swaps
Counterparty	Counterparty's country of incorporation	USD
Citigroup	United States	1,659,925
JPMorgan Chase & Co	United States	1,205,381
		2,865,306

The gross aggregate fair value of total return swaps as a proportion of the Fund's NAV, as at the Statement of Financial Position date, is 0.12%.

Finisterre VAG Unconstrained EM Fixed Income Fund

Counterparty	Counterparty's country of incorporation	Total Return Swaps USD
Citigroup	United States	125,051
JPMorgan Chase & Co	United States	90,768
		215,819

The gross aggregate fair value of total return swaps as a proportion of the Fund's NAV, as at the Statement of Financial Position date, is 0.15%.

Finisterre Emerging Markets Debt Euro Income Fund

		Total Return Swaps
Counterparty	Counterparty's country of incorporation	EUR
Citigroup	United States	81,658
JPMorgan Chase & Co	United States	38,133
		119,791

The gross aggregate fair value of total return swaps as a proportion of the Fund's NAV, as at the Statement of Financial Position date, is 0.11%.

The following table provides an analysis of the maturity tenor of open Securities Financing Transactions ("SFTs") on Total Return Swaps ("TRS") and associated collateral received/provided, as at the Statement of Financial Position date.

Finisterre Unconstrained Emerging Markets Fixed Income Fund

	OTC derivative transactions	Cash collateral	Non-cash collateral
	(net exposure)	received/ (provided)	received/ (provided)
Maturity tenor	USD	USD	USD
1 day	-	-	-
2 to 7 days	-	-	-
Open	2,865,306	39,575,000	-
Total	2,865,306	39,575,000	-

Securities Financing Transactions Regulation for the period ended 31 March 2025 (continued)

Finisterre VAG Unconstrained EM Fixed Income Fund

Maturity tenor	OTC derivative transactions (net exposure) USD	Cash collateral received/ (provided) USD	Non-cash collateral received/ (provided) USD
1 day	-	-	-
2 to 7 days	-	-	-
Open	215,819	2,120,000	-
Total	215,819	2,120,000	-

Finisterre Emerging Markets Debt Euro Income Fund

Maturity tenor	OTC derivative transactions (net exposure) EUR	Cash collateral received/ (provided) EUR	Non-cash collateral received/ (provided) EUR
1 day	-	-	-
2 to 7 days	-	-	-
Open	119,791	2,065,000	-
Total	119,791	2,065,000	-

The above maturity tenor analysis has been based on the contractual maturity date of the relevant SFTs on TRS and, in case of non-cash collateral, the contractual maturity date of the security received/provided as collateral.

SFTs on TRS are entered into by the Fund/s under an International Swaps and Derivatives Associations, Inc. Master Agreement ("ISDA Master Agreement") or similar agreement. An ISDA Master Agreement is a bilateral agreement between the Fund/s and a counterparty that governs SFTs (including TRS) entered into by the parties. All SFTs on TRS entered under an ISDA Master agreement are netted together for collateral purposes.

TRS are marked to market using valuation sources/methods and the fair value is recorded in the Statement of Financial Position as Unrealised Gain on Swap Contracts. The change in unrealised gains and losses is shown in Net gain/(loss) on investment activities in the Statement of Comprehensive Income and is not subject to any returns sharing arrangements with the Fund's Investment Adviser or any other third parties.
