#### Directors

Feargal Dempsey (*Irish*)<sup>(2)</sup> Mary Canning (*Irish*)<sup>(2)</sup> Robert Oliver (*British*)<sup>(1)</sup>

#### Manager

Global X Management Company (Europe) Limited 10 Earlsfort Terrace Dublin 2 Ireland

Administrator <sup>(3)</sup> SEI Investments – Global Fund Services Limited 2<sup>nd</sup> floor, One Charlemont Square Charlemont Street Dublin 2 Ireland

#### **ICAV Secretary**

Bradwell Limited 10 Earlsfort Terrace Dublin 2 Ireland

#### Legal Adviser and Listing Sponsor

Arthur Cox LLP 10 Earlsfort Terrace Dublin 2 Ireland

#### Custodian

Brown Brothers Harriman & Co. 50 Post Office Square Boston, MA 0211 USA

#### **Registered Office**

10 Earlsfort Terrace Dublin 2 Ireland

#### **Investment Manager and Distributor**

Global X Management Company LLC 605 Third Avenue, 43<sup>rd</sup> Floor New York, NY 10158 USA

#### Sub-Investment Manager

Global X Management Company (UK) Limited 77 Coleman Street London, England EC2R 5BJ

#### Depositary (3)

SEI Investments - Depositary and Custodial Services (Ireland) Limited 2<sup>nd</sup> floor, One Charlemont Square Charlemont Street Dublin 2 Ireland

#### **Transfer Agent**

Brown Brothers Harriman Fund Administration Services (Ireland) Limited 30 Herbert Street Dublin 2 Ireland

#### **Independent Auditors**

PricewaterhouseCoopers Registered Accountants and Auditors 1 Spencer Dock North Wall Quay Dublin 1 Ireland

<sup>(1)</sup> Non-Independent, Non-Executive

<sup>(2)</sup> Independent, Non-Executive

<sup>(3)</sup> Effective 1 October 2024, the registered address of the Administrator and Depositary changed from Styne House, Upper Hatch Street, Dublin 2 to 2<sup>nd</sup> floor, One Charlemont Square, Charlemont Street, Dublin 2.

The ICAV has adopted a whistleblowing policy pursuant to the Protected Disclosures Act 2014, as amended which gives legal protection to workers, which includes directors and shareholders, who make disclosures, including protections against dismissal or being penalised by the ICAV. Further details are available in the policy, which is available at no charge upon request.

In respect of Swiss investors, the prospectus, the instrument of incorporation, the key investor information document (KID or KIID), the list of purchases and sales and the latest annual and semi-annual reports can be obtained free of charge from the representative in Switzerland. The representative in Switzerland is 1741 Fund Solutions AG, Burggraben 16, 9000 St. Gallen. The paying agent in Switzerland is Tellco AG, Bahnhofstrasse 4, 6430 Schwyz. In respect of the units offered in Switzerland, the place of performance is the registered office of the representative. The place of jurisdiction is at the registered office of the representative or at the registered office or place of residence of the investor.

#### **Investment objective**

The investment objective of the Sub-Funds is to provide investment results that closely correspond, before fees and expenses, generally to the price and yield performance of the relevant index as referenced in the relevant Supplement.

#### Sub-Fund performance, tracking difference and tracking error

In "tracking" the performance of an Index, the Investment Manager does not necessarily seek to replicate the composition of the Index (i.e. the full list of constituents in the same or substantially the same proportions as they are weighted within the Index). Instead, the Investment Manager is simply aiming to track the performance of the Index. The Investment Manager may use one or more techniques (including a combination thereof) to track the performance of an Index including (i) optimisation/sampling techniques whereby direct investments are made in physical assets and (ii) the use of FDIs such as OTC Swaps whereby a financial counterparty is engaged contractually to provide the return of the relevant Index. Optimising techniques and/or assets unrelated to the Index constituents in each case where the relevant Investments (when taken together) resemble the risk and return characteristics of constituents of the Index or of the Index as a whole.

These techniques will also enable the Investment Manager to reflect anticipated changes in an Index in the Sub-Fund's portfolio (resulting in for example, Index constituents and corporate actions being reflected in the Sub-Fund's portfolio, Index constituents being sold or purchased in anticipation of those constituents being included or removed from the relevant Index, or weightings of Index constituents (vis-à-vis the actual Index composition) being varied).

In "replicating" the performance of an Index, the Investment Manager will seek to invest in (or gain exposure to) all Index constituents in the same or substantially the same proportions as they are weighted within the Index.

"Tracking error" can be defined as the volatility of the difference between the return of an Index Fund which tracks/replicates an Index versus the return of the relevant Index which it tracks or replicates, whereas "tracking difference" can be defined as the total return difference between such an Index Fund and the relevant Index which it tracks or replicates over a certain period of time.

Unless otherwise stated, an Index Fund is not expected to track the performance of its Index at all times with perfect accuracy and there can be no assurance that any Index Fund will achieve any particular level of accuracy in tracking or replicating an Index. Each Index Fund that seeks to track or replicate an Index is, however, expected to provide investment results that, before fees and expenses are applied, generally correspond to the price and yield performance of its Index.

Cash management, efficient portfolio management techniques including securities lending, transaction costs from rebalancing and currency hedging can have an impact on tracking difference. Importantly, these impacts can be either positive or negative depending on the underlying circumstances.

\* Sub-Fund launched in September 2024, so no data is available.

#### **Sub-Fund Review**

#### **Global X Video Games & Esports UCITS ETF**

After a prolonged period of slowing growth and a weak M&A climate, the gaming industry is slowly making a comeback as resilient engagement and strong consumer activity helps improve fundamentals. Easing console supply, a strong new release line-up, continued transition to the subscription model further helps the ecosystem expand. We expect equity performance to continue to improve as the backdrop strengthens.

Global core user engagement remains strong, with the total number of video game players expected to reach nearly four billion by 2026.<sup>1</sup> Similarly, global gaming revenues are projected to reach an impressive \$212 billion by 2026, representing a 15% increase from 2023.<sup>2</sup> Specifically, categories such as mobile gaming are expected to show healthy growth, particularly as a smartphone upgrade cycle loom. Mobile games are expected to bring in \$109.6 billion in sales, up 3.6% YoY.<sup>3</sup> Collectively, better devices, faster networks, immersive hardware, and sophisticated games, could continue to deliver tailwinds to the gaming space to keep growth elevated through the decade.

Gaming companies in emerging markets have been showing significant strength, especially those domiciled in China which have received the benefit of the China stimulus announcement in September of 2024.

Prolonged consumer strength and a cutting cycle ahead of us could potentially be good for the theme as well as consumers have the bandwidth to continue to spend on holiday gifts and leisurely activity. Moreover, the launch of the newest generation of iPhones could further spur mobile and casual gaming activity, as Apple double downs on the device's capability to run AAA games on the new A18 chip. Moreover, Apple also disclosed that smaller devices will be able to run graphic-rich games such as Assassin's Creed Mirage and Resident Evil 7, which were previously reserved to the Pro line up only.<sup>4</sup>

One subtheme within the gaming industry that is working particularly well is sports, especially American Football. For example, Electronic Arts ("EA") recently brought back its popular NCAA College Football game, which has had strong sales. EA reported strong quarterly results with bookings and adjusted EPS ahead of expectations by 6% and 13%, respectively. The sports portfolio was the key driver of strength in the portfolio, fuelled by continued outperformance from college football and the successful launch of Madden '25. The company also reiterated its expectation of >\$1bn of bookings from college football and Madden in FY25 and raised its overall FY25 bookings and adjusted EPS guidance by 2.5%.5

Emerging categories of gaming, such as social gaming, also continue to display incredible growth. U.S. social gaming leader Roblox reported a standout quarter that surpassed expectations and drove guidance upwards, which led to an immediate 17% post report rally. Revenue and booking were up 29% and 34% YoY, respectively. Similarly, daily active users ("DAU") and hours engaged both reached new records and were up 27% and 29% YoY, respectively.<sup>6</sup> We expect this trend of social gaming growth to continue, fuelled by AI investments and greater on-device gaming opportunities enabled by edge AI.

#### **Global X Telemedicine & Digital Health UCITS ETF**

Insulet received FDA approval for its Omnipod 5 Automated Insulin Delivery System for the management of type 2 diabetes. This marks the first automated insulin delivery system cleared for both type 1 and type 2 diabetes.

ResMed announced a new suite of products that leverage wearable monitoring and artificial intelligence to improve care of sleep apnea. The new suite includes compatibility with the Apple Watch to monitor vitals over time and offer key insights for sleep apnea patients. The company also launched its first fabric mask, designed to improve overall sleep health<sup>7</sup>, and unveiled its 2030 strategy.

Current regulatory efforts seek to expand COVID era telehealth flexibilities for Medicare patients for another two years. The legislation, called the Telehealth Modernization Act of 2024, passed unanimously in the House Committee on Energy and Commerce, sending the bill to the House floor to await consideration. The bill would avert a year-end expiration of the pandemic-era flexibilities and points to the broad support for Medicare coverage of telehealth visits.

<sup>&</sup>lt;sup>7</sup> ResMed (2024, September 30). ResMed Enhances CPAP Therapy with its First Fabric Mark, Designed to Make it Easier for People to Embrace Their Treatment and Improve Overall Sleep Health.

#### **Sub-Fund Review (continued)**

#### Global X Telemedicine & Digital Health UCITS ETF (continued)

Newly elected Senate majority leader John Thune has a long history of supporting telehealth. COVID-era Medicare flexibilities for telehealth are set to expire in early 2025, and Thune supports making them permanent. There's a bipartisan bill progressing through the House of Representatives that would extend the flexibilities for two years.

The FDA has taken significant steps to clarify regulatory frameworks for healthcare AI adoption. By the end of 2024, the agency is projected to approve its 280<sup>th</sup> AI-enabled medical device, bringing the total number of approved AI/ML-enabled medical devices to over 1,100.8

Hims & Hers demonstrated substantial growth in the second half of 2024, driven by its expanding GLP-1 medication services. The company leveraged generic compounding capabilities to address supply shortages of popular treatments like Ozempic. With over 2 million subscribers, the platform reported 77% year-over-year revenue growth in Q3 2024.9

Doximity maintained strong momentum with 20% year-over-year quarterly revenue growth, fuelled by increased adoption of its telehealth, scheduling, and AI assistant solutions.<sup>10</sup> The platform has achieved significant market penetration, now serving more than 80% of U.S. physicians across all specialties.<sup>11</sup> During the quarter, it also released its State of Telemedicine Report, in which 83% of physician telemedicine users surveyed stated they would like virtual care to remain a permanent part of their clinical practice. 78% of patients surveyed indicated they would like to access virtual care options in the future.<sup>12</sup>

Pro Medicus reported 27% revenue growth and 37% earnings growth in Q4, given strong adoption for is its imaging software and radiology software across Australia, North America, and Europe.<sup>13</sup> It also announced it had signed a \$30 million 7-year contract with Duly Health and Care, which will see Pro Medicus' cloud-engineered Visage 7 Enterprise Imaging Platform implemented throughout the medical group.<sup>14</sup>

#### **Global X U.S. Infrastructure Development UCITS ETF**

Legislative tailwinds continued to create new potential opportunities for infrastructure development in the United States over H2 2024. According to the latest estimates from mid-Q4, \$568 billion in funding from the Infrastructure Investment and Jobs Act ("IIJA") has been announced towards 66,000 state-level infrastructure projects.<sup>15</sup> For comparison, at the end of Q3, IIJA state-level funding stood at \$480 billion towards 60,000 projects.<sup>16</sup>

The U.S. manufacturing landscape also continued to advance due to private and public investments amid the current legislative tailwinds. As of 20 December, private investments toward the manufacturing of semiconductors, EVs, batteries, and cleantech reached \$785 billion - up from \$710 billion in mid-October.<sup>17,18</sup> At the company level, in October, Ford and LG Energy Solution announced an agreement to move the production of EV batteries for Ford's Mustang Mach-E from Poland to Michigan in 2025, in an effort to have the Mach-E become eligible for the Inflation Reduction Act ("IRA")'s EV tax credit.<sup>19</sup> Building and/or expanding manufacturing facilities is likely to create significant potential opportunities for companies across the entire infrastructure development value chain. For example, manufacturing investments spurred by the CHIPS Act could create around 115,000 construction and manufacturing jobs.<sup>20</sup>

The U.S. construction industry added 10,000 jobs in November, which was an increase from 2,000 new positions in October.<sup>21</sup> The construction rate unemployment rate rose to 4.6%, however, due primarily to seasonal construction patterns. Despite the slower growth in recent months, construction employment has outpaced the broader economic growth YTD.<sup>22</sup>

<sup>&</sup>lt;sup>22</sup> Lesprom. (2024, December 6). Construction employment rises by 10,000 in November, 2.6% growth year-over-year

#### **Sub-Fund Review (continued)**

#### Global X U.S. Infrastructure Development UCITS ETF (continued)

Construction starts increased 4% MoM in October and 5% MoM in November, with construction starts totalling a seasonally adjusted annual rate of \$1.2 trillion in November.<sup>23,24</sup> For the first 11 months of 2024, construction starts were up 5% compared to Jan-Nov 2023.<sup>25</sup> The non-residential, residential and non-building construction segments have all contributed to YTD growth, despite industry headwinds from policy uncertainty, elevated interest rates, and labour shortages.

Data centers and non-building infrastructure projects, such as highways and bridges, were two infrastructure asset segments that bolstered overall infrastructure construction start growth rates in Q3.<sup>26,27</sup> Total construction starts grew 10% in July 2024 vs. July 2023, and 6% YoY in August.<sup>28,29</sup> That said, the high interest rate environment continued to create volatility for construction starts across several segments, such as the residential building and non-residential building (ex. warehouse, commercial) segments.<sup>30</sup>

Legislative tailwinds, expected growth in U.S. manufacturing facilities and data centres, the ongoing electrification of power and transport, and ongoing efforts to upgrade aging infrastructure are anticipated to continue creating new infrastructure project development opportunities through the long term. Over the near-term, however, elevated interest rate environment, labour shortages, and stricter lending standards could remain headwinds for companies throughout the infrastructure development value chain. Heightened uncertainty within the industry surrounding potential shifts in tariff and immigration policies under the new administration could also create short-term headwinds. That said, project backlogs could begin to ease, and industry sentiment could begin to improve by mid-2025 as policies become clearer and the interest rate environment improves.

#### **Global X FinTech UCITS ETF**

Sentiment around FinTech has turned positive after a challenging period, with a strong Q3 earnings period further fuelling momentum and leading to a strong Q4. Strong consumer spending, supported by receding inflation and a robust employment market, has payment volume growth trending higher for digital financial solutions providers. For example, Fiserv's Q3 2024 earnings results showed healthy merchant trends via growth in its core payment services as well as modular Clover point-of-sale ("POS") solution. Total revenues grew 7% YoY, with Clover revenues growing 28% YoY. Revenue projections for FY 2024 were also raised at the midpoint to 7–8% growth.<sup>31</sup>

FinTech companies that used the post-COVID slump to get leaner and more efficient are also continuing to demonstrate impressive profitability gains. For instance, in Q3 2024, PayPal delivered better transaction margin dollar ("TMD") results and raised its fiscal year 2024 TMD and adjusted earnings per share outlooks.<sup>32</sup> More nascent platforms like Buy Now Pay Later ("BNPL") platform Affirm and SoFi have also achieved or are approaching profitability.

Another catalyst is product innovation and deeper integration of crypto and AI offerings which have boosted average revenue per user for leading platforms. The crypto-friendly stance of the incoming U.S. administration has also served as a strong tailwind for digital asset exchanges within the ecosystem. Lastly, lending activity is also showing signs of recovery with interest rates coming down. For example, LendingClub reported 27% YoY growth in loan originations in Q3 as consumers are looking for ways to consolidate and pay down debt.<sup>33</sup>

<sup>&</sup>lt;sup>23</sup> Dodge Construction Network. (2024, November 21). Construction Starts Increase 4% in October.

<sup>&</sup>lt;sup>24</sup> Dodge Construction Network. (2024, December 19). Construction Starts Increase 5% in November.

<sup>&</sup>lt;sup>25</sup> Dodge Construction Network. (2024, November 21). Construction Starts Increase 4% in October. <sup>26</sup> Dodge Construction Network. (2024, August 22). Construction Starts Increase 4% in October.

 <sup>&</sup>lt;sup>26</sup> Dodge Construction Network. (2024, August 22). Construction Starts Jump 10% in July.
 <sup>27</sup> Dodge Construction Network. (2024, September 24). Construction Starts Increase 6% in August.

#### Sub-Fund Review (continued)

#### **Global X Robotics & Artificial Intelligence UCITS ETF**

The Robotics and AI theme is being propelled by the broader adoption of artificial intelligence as well as the growing case for use of automation in the industrial context.

AI adoption remains strong, with record investments in infrastructure across industries. Across big tech companies, capex remains exceptionally high given how early we are in the generative AI investment cycle. Hyperscalers deployed significant capex into data centres and other AI infrastructure in 2024 and have signalled this will increase in 2025, signalling their willingness to intensify their AI infrastructure buildouts. These record investments will also benefit an expanding list of companies in AI hardware and infrastructure, like Nvidia. Spending on top-end chips, such as those provided by Nvidia continue to scale, and demand for AI systems from industries such as transportation remains strong.

While the outlook for robotics remains bright and one of the under-appreciated opportunities across the thematic landscape, there was a brief slowdown in spending towards the end of 2024, particularly on the manufacturing and industrial demand side of things. After a rapid ramp up on broad manufacturing investments in 2023 and first half of 2024, U.S. non-residential manufacturing investments paused for the third quarter. Against the 5% QoQ growth seen between Q2 and Q1 or 2024, spending for Q3 dialled back by 0.8%.<sup>34</sup> However, investments could pick up in 2025, potentially boosted by continued policy support aimed at reshoring of manufacturing. Potential private investment spurred by tariffs could also help.

The backdrop for industrial robotics installations remains strong, as suggested by industrial robot installations increasing by 12% to 44,303 units in 2023 in the U.S.<sup>35</sup> From a global perspective, China's weakness continues to remain a challenge to the story, but rising demand for industrial robots from Mexico and Canada is helping to offset this weakness.<sup>36</sup> Rising manufacturing wages, demand for precision production processes, as well as the continued declines achieved in costs of industrial robotics systems offer more, sustained tailwinds.

The non-industrial robotics industry is also growing. Intuitive Surgical saw sales increase by nearly 17% YoY, powered by 15% YoY installed base growth.<sup>37</sup> The company saw 18% YoY growth in procedures, and placed 379 new Da Vinci systems during the quarter.<sup>38</sup> Looking ahead, generative AI and automation in both industrial and service sectors could be powerful catalysts that are still in the early stages of development. Humanoid robot development also continues to gather momentum, which we don't think the market fully understands or appreciates just yet. These trends are expected to continue driving the Robotics and AI theme throughout 2025 and beyond.

#### Global X Autonomous & Electric Vehicles UCITS ETF

China surpassed one million EV sales in a month for the first time in August, with a total of 1.027 million EVs sold.<sup>39</sup> China's previous monthly record for total EV sales, including plug-in hybrid EVs and battery EVs, was recorded in December 2023 with just over 950,000 EVs sold.<sup>40</sup> 1.27 million EVs were sold in China in November, and initial estimates show that the country recorded its fifth-straight month of greater than 1 million EVs in December.<sup>41,42</sup> The strong growth in EV sales in China has been attributed to the vehicle trade-in incentive scheme, which was first announced in April 2024 and strengthened in July 2024, as well as the wide range of affordable and diverse EV models.<sup>43</sup> China's YTD EV sales growth rates remained much higher than other major auto markets across Europe and in the United States. At the end of November, China's EV sales were up 40%, compared to 6.7% growth in the United States, 17% growth in the United Kingdom, and declines in Germany, France, and Sweden.<sup>44</sup>

The dampened demand in markets outside of China continued to weigh on many EV battery and lithium providers. Tariffs on imported vehicles and EV components from China, particularly in Europe, also continued to create headwinds for companies throughout the EV value chain.<sup>45</sup> GM, Nissan, and Stellantis were among the companies that announced jobs cuts in Q4.<sup>46</sup>

#### Sub-Fund Review (continued)

#### Global X Autonomous & Electric Vehicles UCITS ETF (continued)

In October, the European Commission voted to make the tariffs on Chinese-made EVs permanent for the next five years.<sup>47</sup> The tariffs were first announced in mid-2024, and the tariffs passed despite opposition from major auto markets like Germany. EVs imported from manufacturing facilities in China will now have an up to 45% tariff, dependent on several company-specific factors. For example, imported cars from SAIC will have a 45% total tariff, while Tesla vehicles will have a 19% total tariff.<sup>48</sup>

The autonomous vehicle industry received likely welcomed news in California at the end of September. California governor, Gavin Newsom, vetoed two bills that would have increased regulations and limited the use of autonomous trucks on public roads.<sup>49</sup>

In the U.S., total EV sales increased 9.3% month-on-month to 146,000 units in November.<sup>50</sup> Notably, Ford recorded recordhigh EV and hybrid sales in November, making it the second-best selling EV brand for the month behind only Tesla.<sup>51</sup> Ford's sales of electric vehicles totalled 10,821 units in November and 257,693 units YTD, driven by robust demand for the Mustang Mach-E and F-150 Lightning.<sup>52</sup>

#### Global X SuperDividend® UCITS ETF

The Global X SuperDividend® UCITS ETF seeks investment results that correspond generally to the price and yield performance, before fees and expenses, of the Solactive Global SuperDividend v2 Index (the "Underlying Index"). The Sub-Fund is passively managed, which means the Sub-Fund does not attempt to take defensive positions in declining markets. The Sub-Fund generally seeks to fully replicate the Underlying Index.

The Underlying Index tracks the performance of 100 equally weighted companies that rank among the highest dividend yielding equity securities in the world. The index provider applies certain dividend stability filters.

During H2 2024, the Global X SuperDividend® UCITS ETF returned 0.56%. The best performing holding, HKBN Ltd, returned 114.72%, while the worst performer, Service Properties Trust, returned (49.33%).

On a Contribution to Return ("CTR") basis HKBN Ltd and Uniti Goup Inc added 0.99% and 0.58%, respectively. The largest detractors on a CTR basis were BW LPG Ltd and Service Properties Trust with (0.49%) and (0.48%), respectively.

The Real Estate sector with a 20.92% weight in the Sub-Fund added 1.67% of the returns on a CTR basis. Energy with a 25.07% weight in the Sub-Fund contributed a (2.51%) return to the Sub-Fund.

During the reporting period, the Sub-Fund had an average approximate exposure of 34.76% to stocks in United States and 28.93% to APAC. The U.S. and APAC regions reduced 0.57% and 1.98% of the returns on a CTR basis, respectively.

#### **Global X Uranium UCITS ETF**

The performance was negative in the second half of 2024 as a risk-off environment amplified a general disinterest in the uranium spot and equities markets during summer. Also, rising uranium production numbers have questioned the sustainability of high uranium pricing in the long run.

The spot price continued to lose ground amid the unwinding of supply risks and demand threats. Trump promised to end the Russia-Ukraine war as soon as possible, making it likely that the sanctions imposed against Russian-processed uranium by the Biden Administration will be lifted in 2025.

On the demand side, Sweden's nuclear revival risked being undermined as more companies pulled the brakes on large powerhungry green projects designed to clean up some of the world's dirtiest industries. Taiwan planned to phase out its last nuclear reactor by May 2025, even though power demand is expected to rise in the coming decades. Moreover, it was announced that the fundraising process for the Sizewell C nuclear plant is expected to be concluded in Spring 2025, a delay from a previous plan to complete the deal by the end of the year, according to the UK budget.

<sup>&</sup>lt;sup>47</sup> Reuters. (2024, October 4). EU presses ahead with Chinese EV tariffs after divided vote.

<sup>&</sup>lt;sup>49</sup> The Verge. (2024, September 30). California governor signs one driverless vehicle bill, vetoes two others. <sup>50</sup> Ibid

<sup>&</sup>lt;sup>51</sup> Inside EVs. (2024, December 5). Ford EV Sales Reach New Monthly Record in November.

<sup>52</sup> Ibid

#### **Sub-Fund Review (continued)**

#### **Global X Disruptive Materials UCITS ETF**

The performance was negative in the second half of 2024 as the lack of significant policy revisions in China's 'Third Plenum' conference weighed on the majority of the transition metals. As the world's largest consumer of key metals and a leader in renewable energy technologies, China's decisions impacted the global market.

Also, in August, the market share of battery electric vehicles ("BEVs") in the European Union ("EU") fell by over 40% yearover-year. Germany and France had the greatest declines, with a 68% and 33% drop in BEV registrations, respectively.

In particular, the copper segment's Q4 performance was negative amid the renewed US-led trade war. The threat of tariffs, particularly those targeting China, impacted industry sentiment as they could be initiated upon the return of Donald Trump to the Oval Office in January 2025. In addition, China announced the intention to soften curbs on metal scrap imports, offering some potential relief for copper smelters facing an unprecedented profit pinch as they struggle to secure enough ore from the world's miners. Lithium and other critical EV battery minerals, like cobalt and nickel, continued facing oversupplies within the market.

#### Global X Nasdaq 100® Covered Call UCITS ETF

The Global X Nasdaq 100<sup>®</sup> Covered Call UCITS ETF seeks to provide investment results that correspond generally to the price and yield performance, before fees and expenses, of the CBOE Nasdaq-100<sup>®</sup> BuyWrite V2 Index ("Underlying Index").

The Underlying Index tracks the performance of a theoretical portfolio of the stocks included in the NASDAQ-100 Index (the "Reference Index"), and "writes" (or sells) a succession of one-month at-the-money NASDAQ-100 Index covered call options. The Underlying Index replicates the methodology used to calculate the BXNTU Index. The Sub-Fund underperformed its Reference Index during the reporting period since its covered call strategy forfeits upside potential to generate options premiums.

During H2, volatility measures for major domestic equity indices initially trended upward before reversing course post-election. The Cboe Volatility Index ("VIX") rose above the 23 level, reaching its highest peak since August, driven by disappointing guidance from two megacap companies regarding artificial intelligence investment costs on 30 October. However, the market quickly absorbed the news, and the S&P 500 and Nasdaq 100 posted strong gains following the U.S. presidential election on 5 November and the following 25 bps rate cut by the Federal Reserve on the 7 November 2024.

As a product of the environment during the Q4 2024 monthly roll periods, the Sub-Fund's strategies attracted premiums that appreciated in the low single digit percentage vicinity versus Q3 2024. The premiums remained near the high end of those acquired by the funds over the past year. During the August roll period in Q3, the VIX and the Cboe Nasdaq 100 Volatility Index ("VXN") expressed their highest peaks in over a year. The happening was influenced by a series of economic data points, including a higher-than-expected domestic unemployment rate, which was made available to the public on 2 August. Thereafter, a decision by the Bank of Japan to raise its key interest rate some 25 basis points led to a chain of events that would see investors unwind their yen-denominated carry trades and send U.S. markets into a tailspin on August 8th. In December, a sell-off occurred, with the VIX spiking above 28 post the Federal Reserve's decision to cut interest rates by an additional 25 basis points as expected. This move raised concerns among some market participants about re-emerging inflation risks going into the new year and contributed to a steepening yield curve, with long-term rates climbing higher.

#### **Sub-Fund Review (continued)**

#### **Global X Genomics & Biotechnology UCITS ETF**

Gilead received FDA approval for Livdelzi, a new treatment for a rare liver disease known as primary biliary cholangitis.<sup>53</sup> It also reported phase 3 clinical data for its twice-yearly HIV prevention shot, which reduced HIV infection by 96%.<sup>54</sup> The company said 99.9% of participants who received the treatment did not acquire HIV, with two cases among 2,180 people.<sup>55</sup>

Legend Biotech's multiple myeloma gene therapy, Carvykti, recently reported it prolonged patients' lives in a long-term study.<sup>56</sup> A single dose of the therapy cut the risk of death by 45% compared with two traditional therapies often used to treat myeloma.<sup>57</sup> Back in July, Carvikty also showed strong benefit in preventing disease progression.<sup>58</sup> Legend also recently partnered with a robotic cell therapy manufacturing firm, Multiply Labs, to automate cell therapy production through the power of robotics.<sup>59</sup> Manufacturing genomic medicines is inherently difficult, as each treatment is made to order for each individual patient using their own plasma. Though widely accepted, demand has largely outpaced supply for genomic treatments, particularly those that treat cancer.

Moderna presented data at the European Society of Medical Oncology where its mRNA vaccine for solid tumours showed early signs of promise in a recent phase 1 clinical trial.<sup>60</sup> Data showed the mRNA vaccine activated the immune system to recognize two proteins of interest, PD-L1 and IDO1. This should trigger a response of immune cells to kill cancer cells, as well as the body reducing other immune cells which can prevent the immune system from fighting cancer.

Vertex Pharmaceuticals received FDA approval for its next-generation cystic fibrosis treatment, Alyftrek. This breakthrough therapy is projected to achieve blockbuster status in its first year, with estimated sales of \$1.4B in 2025, growing to \$8.3B by 2030.<sup>61</sup>

UniQure achieved a significant regulatory milestone when the FDA permitted pursuit of accelerated approval for AMT-130, their Huntington's Disease gene therapy.<sup>62</sup> This decision eliminates the requirement for a large, placebo-controlled trial, potentially enabling FDA approval as early as 2026.<sup>63</sup> The ruling also demonstrates the FDA's commitment to streamlining the approval process for genetic medicines targeting severe rare diseases with limited treatment options.

There was strong adoption across diagnostic tests. Natera's Q3 revenue increased 64% over the previous year, fuelled by a substantial increase in test volumes for its cell-free DNA tests for oncology and women's health.<sup>64</sup> It raised its full year 2024 guidance from \$1.61 billion to \$1.64 billion. The company also announced the completion of study using SignateraTM from the CALGB (Alliance)/SWOG 80702 randomised, phase III clinical trial in colorectal cancer. Veracyte similarly had a strong Q3, with revenue increasing 29% from the previous year.<sup>65</sup>

The Sub-Fund saw its Q3 revenue fall 1% year-on-year on the back of a sales team restructuring. While America's revenue fell 11% on the prior comparable period (pcp), EMEA revenue and APAC revenue were up 18% and 15% respectively on the pcp. Overall gross margin improved from 62% to 70%, driven by a favourable product mix. New product launches include GEM-X Flex and Chromium Xo, aimed at reducing costs for researchers while enhancing single cell analysis capabilities.

Bio-Techne and ALZpath announced a partnership on neurodegenerative disease research.<sup>66</sup> The collaboration will see the use of Bio-Techne's fully automated multiplexing immunoassay platform, as well as ALZpath's proprietary pTau217 antibody.

#### **Sub-Fund Review (continued)**

#### **Global X Cloud Computing UCITS ETF**

Cloud computing resources are foundational to the broad adoption of generative AI, as every single AI tool built and developed today is likely to be using cloud-native infra. In 2024, global cloud computing revenues are expected to top \$675.4 billion, up nearly 20% YoY.<sup>67</sup> Growth could accelerate through 2025 and 2026 as AI workloads grow and become a larger share of the current cloud spend mix. Meanwhile, quarterly fundamentals continue to tick in the right direction, with leading cloud companies scaling sales and improving EPS. For example, cloud-based data platform provider Snowflake had its best day as a publicly traded company after reporting revenue growth of 28% YoY and increasing its 2025 product revenue target to \$3.43 billion from \$3.36 billion. The updated guidance also includes an adjusted operating margin of 5%, up from the previous guidance of 3%.<sup>68</sup> Salesforce also reported revenue growth of 8% and raised revenue guidance to \$37.8-\$38 billion for fiscal year (FY) 25. The company's new AI agent, Agentforce, closed more than 200 deals in the quarter, with thousands more in the pipeline.<sup>69</sup>

As the middle layer of generative AI, cloud resources are integral to the development and deployment of nearly all AI tools today, with cloud suppliers offering GPU capacity or application software reaping some of the most notable revenue gains.

On the infrastructure side, AI-as-a-service solutions continue to drive significant top-line growth for hyperscale cloud players. Microsoft Azure revenues grew 33%, with 12 points coming from AI services.<sup>70</sup> Google Cloud reported 35% YoY revenue growth, and Amazon's cloud unit sales grew 19% YoY.<sup>71</sup> With investments in AI infrastructure still reaching new highs, the cloud franchises of big tech firms could continue to deliver meaningful top line revenue gains in the quarters ahead. All three major hyperscalers continue to prioritize capex investments, in anticipation of growing demand for cloud AI-as-a-service solutions, which should further help accelerate growth through this decade. Similarly, companies across the data centre value chain have also been reporting strong numbers. Digital Realty saw revenues of \$1.4 billion during the quarter, up 2% against previous quarter, as new lease sign ups remain elevated and demand for new capacity grows.<sup>72</sup> Lastly, profitability remains an area of focus for cloud computing companies, as the cohort's collective margins and cost discipline continues to improve. Significant improvements can be seen across the cost structure of giants like Salesforce, Shopify, Zscaler, and more.

#### **Global X E-Commerce UCITS ETF**

The ecommerce theme saw 1) continued improvements in profitability and margins, bolstered by varied monetisation levers and favourable economies of scale, and 2) higher rates and inflation failure to dent broad resilience in consumer spending.

Leading platforms continue to cut through traditional retail spend and win share. Amazon, the industry leader, reported a 10% YoY increase in total sales for Q2 of 2024, powered by 5% YoY growth in online sales, with ecommerce revenues topping \$55.4 billion for the quarter or \$200B+ on an annualized basis.<sup>73</sup> Amazon's third-party seller services business, which includes commissions from merchants selling on the platform, grew at a more impressive rate of 12% YoY, reflecting the company's successful transition into a marketplace and enabler for SMEs.<sup>74</sup> Moreover, offering further evidence of revenue diversification is Amazon's digital ad business – which grew by 20% YoY during the quarter, providing valuable boost to the bottom line.<sup>75</sup> A similar trend can be seen across multiple other platforms.

Similarly, international ecommerce companies are also showing tremendous momentum. Mercado Libre, a significant player in the Latin American ecommerce market, saw revenues accelerating at 41% YoY, with EPS nearly doubling.<sup>76</sup> Services spending has overall also been resilient, with travel, restaurant, and other digital channels showing increasing volumes.

The holiday season further accelerated this trend, with U.S. online sales on Thanksgiving Day hitting a record \$6.1 billion, an 8.8% increase from the previous year.<sup>77</sup> This surge was attributed to substantial discounts on electronics and apparel, which spurred impulse buying.

E-commerce retail sales reached 16.2% of total sales in Q3 2024, almost back to COVID-period highs of 16.4%. This effectively marks a continuation of the pre-COVID growth trend in e-commerce sales.

<sup>&</sup>lt;sup>67</sup> Gartner. (2024, May 20). Gartner Forecasts Worldwide Public Cloud End-User Spending to Surpass \$675 Billion in 2024.

#### **Sub-Fund Review (continued)**

#### **Global X CleanTech UCITS ETF**

During H2 2024, the Global X CleanTech UCITS ETF decreased by (14.09%). The best performing holdings, Goldwind Science & Technology and Bloom Energy Corp, returned 106.73% and 81.45%, respectively, while the worst performers were Sunpower Corp and Meyer Burger Technology AG which returned (93.24%) and (80.99%), respectively.

Over H2 2024, companies within the cleantech theme continued to be negatively impacted by a range of headwinds. For example, in the United States, cleantech project developers once again had to navigate elevated interest rates, tighter lending standards, slow and complex permitting processes – which weighed on demand for cleantech equipment. Europe's renewables industry also continued to be impacted by slow permitting procedures. The EU added an estimated 13GW of new wind power in 2024, marking a decline from 16GW of new installations in 2023, and slow permitting has been cited as a key factor.<sup>78</sup>

The outcomes of the recent United States' election cycle weighed on sentiment throughout the cleantech industry. On the campaign trail, Trump stated that he would attempt to repeal the Inflation Reduction Act, which includes range of financial incentives and tax credits for cleantech.<sup>79</sup> That said, in our view, a full repeal will likely be difficult due to rising bipartisan support for the legislation as its benefits have become clearer. For example, in August 2024, 18 House Republicans sent a letter to Speaker Mike Johnson expressing their support for the clean energy tax credits included in the bill.<sup>80</sup> President-elect Trump is also expected to shift the domestic energy focus towards natural gas and nuclear power, which is weighing on sentiment in the cleantech sector.<sup>81</sup>

Companies throughout the cleantech theme will continue to face policy uncertainty and economic headwinds to start 2025. However, some challenges could begin to ease over the coming quarters, with the potential for additional interest rate cuts and clearer cleantech policies. Additionally, in early January 2025, the U.S. Treasury released final guidelines for tax credits for low-carbon hydrogen developers.<sup>82</sup> Over the past several quarters, the lack of final guidance had been delaying investments and project developments within the U.S. hydrogen industry.<sup>83</sup> Over the long term, clean tech equipment manufacturers are poised to potentially benefit from the ongoing electrification of the power and transport sectors. In particular, global renewables capacity could increase 2.7x between 2023 and 2030, and the solar and wind power industries are forecast to account for more than 95% of global renewables growth.<sup>84</sup>

#### **Global X Cybersecurity UCITS ETF**

On the software front, the rapid adoption of cloud-based AI services is driving cybersecurity spending due to the need for enhanced data protection, with increased interest in AI security in preparation for the rollout of inference-based AI tools. Cybersecurity remains a top spending priority for enterprises globally, especially as newer technologies like gen AI and public cloud expand the attack landscape and create new product and platform consolidation opportunities for leading players. These trends were evidenced clearly in earnings results across the theme, particularly those aligned with AI-related network security refreshes, which has helped stabilise performance.

For example, Fortinet reported better-than-expected Q3 results, with billings up 6% YoY. Management called out accelerated product booking during the quarter, which grew 10%+ QoQ. While much of this performance was attributed to a firewall refresh cycle, the company also reported growth of 32% and 14% in its Security Ops and Unified SASE segments, respectively, suggesting the company is executing on its platformisation strategy.<sup>85</sup> Similarly, Palo Alto Networks ("PANW") reported strong quarterly results, with Remaining Performance Obligations (RPO) growing by 20% YoY and RPO growth guidance for the current quarter coming in above expectations at 20%-21%. PANW's platformisation strategy is successfully driving large 8+ figure deals and ramping product cycles. Annual recurring revenues ("ARR") within PANW's next-gen security segment grew 40%+ YoY, with Cortex, it's suite of AI-driven cyber solutions, surpassing over \$1 billion in ARR.<sup>86</sup>

M&A activity continued in the sector, with Thoma Bravo-backed Sophos agreeing to acquire Secureworks from Dell Technologies for \$859 million in an all-cash transaction.<sup>87</sup>

<sup>&</sup>lt;sup>78</sup> Recharge News. (2025, January 15). 'Crack whip' over wind permitting, industry chief urges EU.

<sup>&</sup>lt;sup>86</sup> Palo Alto Networks. (2024, November 20). Palo Alto Networks Reports Fiscal First Quarter 2025 Financial Results.

<sup>&</sup>lt;sup>87</sup> Secureworks. (2024, October 21). Sophos to acquire Secureworks to accelerate Cybersecurity Services and Technology for Organizations Worldwide.

#### **Sub-Fund Review (continued)**

#### Global X Cybersecurity UCITS ETF (continued)

With PANW reporting a strong AI-related ARR, other cybersecurity companies could see meaningful revenue contributions in 2025, fuelled by an increasing presence of AI-security co-pilots. In addition, vendor consolidation could continue in 2025 as the Cybersecurity market remains fragmented. While consolidation will be net positive for the theme in the long run, it may create some headwinds in the short term around pricing pressures.

Lastly, the evolving geo-political landscape offers further support for cyber spending. Sovereign security and technological investments are expected to see a boost throughout this decade, especially as global nations increase their military budgets with a great portion allocated towards cybersecurity.

#### **Global X Internet of Things UCITS ETF**

Edge AI has been gaining significant traction in recent weeks, emphasized by Apple's recent iPhone 16 launch event that debuted Apple Intelligence for new iPhone 16's. The move to on-device AI could catalyse the next consumer electronics and device upgrade cycle, which is benefitting various component providers and chip markets within the IoT theme. For example, Qualcomm, which specialises in making processors and modems for smartphones, reported strong earnings and guidance for the current quarter. Revenue grew 11% YoY \$9.39 billion (vs \$9.22 expected) and Non-GAAP EPS grew 25% YoY to \$2.33 (vs. \$2.25 expected).<sup>88</sup> Qualcomm also recently introduced its Snapdragon X Plus 8-core processor, targeting PCs priced as low as \$700 to expand its portfolio to more devices, in a bid to compete with companies like Intel.<sup>89</sup> Qualcomm's Snapdragon chips are already utilized by Microsoft in its Copilot+ line up of PCs.

The Internet of Things (IoT) performance has lagged the market, but the long-term story is boosted by catalysts such as the digitisation of the industrial landscape, growing manufacturing investment landscape, greater need for connectivity, and personal device upgrade cycles. Similarly, the ongoing AI investment cycle and the potential rotation favouring small caps provides confidence in the theme's growth trajectory.

One of the notable sub-trends that continues to work favourably for the theme is the momentum wearables and connected fitness device vendors such as Garmin are seeing. Wearable tech and fitness/health monitoring also continue to trend in the right direction, as these products are becoming increasingly sophisticated with greater and more seamless technology. Garmin's Q3 2024 revenues grew 24.2% YoY, with operating income of \$437 million, up 62% YoY.<sup>90</sup> Revenue from the fitness segment increased 31% YoY, while revenue from the outdoor segment increased 21% YoY. We believe the continued solidification of these trends as the younger generation of buyers continue to show affinity for connected devices is likely to benefit large, market-leading vendors. The recent holiday season, along with a positive backdrop formed by broad consumer strength, could act as a further catalyst in 2025.

An area of concern this year has been the broad weakness in the EV industry and its negative impact on segments of some of the theme's participants. For example, NXP saw auto revenue drop 3% YoY for the most recent quarter.<sup>91</sup> STM Microelectronics saw a similar dynamic, with a 29.7% YoY sales drop for Digital ICs and RF products segment due to weakness in Autos.<sup>92</sup> The headwinds are expected to be short lived, as potentially lower interest rates spur demand in 2025. Lastly, a near-term slowdown in U.S. manufacturing activity and investments is likely also dampening industrial IoT demand temporarily as well. The U.S. manufacturing PMI contracted for three consecutive months in Q3 but rebounded in October and November.<sup>93</sup> This is reflected through earnings as well. For example, NXP Semiconductor witnessed a 9% QoQ drop in sales for its Industrial and IOT segment.<sup>94</sup>

<sup>88</sup> Qualcomm. (2024, July 31). Qualcomm Announces Third Quarter Fiscal 2024 Results.

#### **Sub-Fund Review (continued)**

#### **Global X Copper Miners UCITS ETF**

The performance was negative in the second half of 2024 amid demand pessimism due to an economic slowdown in China and no bullish policy surprise during the 3<sup>rd</sup> Plenum and Politburo meetings. LME and COMEX inventories increased substantially over the year's second half, weighing on the metal market. Also, a market sell-off that weakened global equities aggravated the overall slump in base metals, and the unwinding of supply risks in Chile weighed on copper prices.

Negative pressure on copper spot price also came from the renewed US-led trade war: the threat of tariffs, particularly those targeting China, loomed large as they could be realised upon the return of Donald Trump to the Oval Office. Also, China announced the intention to soften curbs on metal scrap imports, offering some potential relief for copper smelters facing an unprecedented profit pinch as they struggle to secure enough ore from the world's miners.

#### **Global X Renewable Energy Producers UCITS ETF**

During H2 2024, the Sub-Fund decreased by (11.60%). During the reporting period, the highest returns came from aes Brasil Energia SA and Drac Group Plc which returned 35.19% and 32.65%, respectively. The worst performers were Energy Absolute Pcl and Serena Energia SA, which returned (45.11%) and (43.84%), respectively.

On a Contribution to Return ("CTR") basis Drax Group Plc and Barito Renewables Energy TBK added 0.77% and 0.74%, respectively. The largest detractors on a CTR basis were EDP Renovaveis SA and Orsted A/S with (1.59%) and (1.07%), respectively.

The U.S. government has expanded the federal lands available for solar projects from 22 million to 31 million acres, aiming to boost renewable energy production. Globally, renewable energy capacity is projected to increase more in the next five years (2023-2028) than the total amount installed in the past century. Solar and wind will account for 95% of this growth, with installations expected to more than double in major markets like the U.S., EU, India, and Brazil. This surge is supported by over \$215 billion in private investments into clean energy and manufacturing in the U.S., driven by incentives from the IRA and CHIPS Acts. Additionally, global investment in clean technology needs to reach \$150 trillion by 2050 to meet climate goals, with solar energy projected to lead, contributing to nearly half of global electricity demand by 2030. China alone is forecast to account for 60% of the new renewable capacity.

The UNFCC's 29<sup>th</sup> Conference of the Parties ("COP29"), the largest annual international climate conference took place. After two weeks of negotiations, over 200 countries signed a new agreement which aims to triple finance to developing countries.<sup>95</sup> The new goal is for signatories to send a total of \$300 billion annually to developing countries by 2035, up from a previous goal of \$100 billion.<sup>96</sup> The funding should be used for climate adaptation efforts and clean energy growth. Renewable energy producers expanded their renewable portfolios and made progress in offshore wind projects, benefiting from technological advancements. However, higher borrowing costs made it more expensive for utilities to finance new projects, leading to delays and re-evaluations of planned expansions. The high interest rate environment, as well as shifting policies, continued to weigh particularly hard on residential solar power demand in key markets such as Europe and the United States.<sup>97</sup>

Escalating global data centre energy consumption makes innovation critical to mitigate environmental impacts and ensure sustainability. Renewable energy sources like solar and wind power can help flatten energy consumption profiles and reduce dependence on non-renewable sources, particularly during peak-demand periods.<sup>98</sup> In March 2024, the EU Commission approved a new Energy Efficiency Directive that introduces a unified scheme to assess the sustainability of data centers.<sup>99</sup> Beginning in 2026, data centre operators must report sustainability metrics, including total electricity usage and the proportion covered by renewable sources.<sup>100</sup>

<sup>&</sup>lt;sup>95</sup> Developing nations blast \$300 billion COP29 climate deal as insufficient, Reuters, 24 Nov, 2024.

 <sup>99</sup> European Commission, Data centres in Europe – reporting scheme. 14 March 2024.

<sup>100</sup> Ibid

#### **Sub-Fund Review (continued)**

#### **Global X Clean Water UCITS ETF**

During H2 2024, the Global X Clean Water UCITS ETF returned 0.47%. The top performers were Guangdong Investment Ltd and Pentair Plc, which returned 54.77% and 31.95%, respectively. The bottom performer was Nomura Micro Science Co Ltd which returned (44.84%).

The U.S. Environmental Protection Agency (EPA) announced \$3.6 billion in new funding under the Bipartisan Infrastructure Law ("BIL") to upgrade water infrastructure and keep communities safe.<sup>101</sup> Combined with \$2.6 billion announced in October, this \$6.2 billion in investments for FY25 will help communities across the country upgrade water infrastructure that is essential to safely managing wastewater, protecting local freshwater resources, and delivering safe drinking water to homes, schools, and businesses. The BIL funds will flow through the Clean Water and Drinking Water State Revolving Funds ("SRF"), a long-standing federal-state water investment partnership. This multibillion-dollar investment will fund state-run, low-interest loan programs that address key challenges in financing water infrastructure.

In addition, companies within the industrial sector, such as the oil and gas, power, pharmaceuticals, mining, and the food and beverage industries, continue to face growing pressure to more sustainability manage water use. For example, in April 2024, the EU parliament approved a package of rules that will increase the required contributions in water treatment from the pharmaceutical and cosmetic industries. In our view, this trend presents opportunities for specialised water treatment companies to provide innovative technologies for water recycling, reuse, and zero liquid discharge systems.

There are also favourable policy tailwinds in major markets like the United States, where PFAS and water management regulations and funding from the Infrastructure Investment and Jobs Act ("IIJA") could boost opportunities throughout the industry. In total, the IIJA devotes \$55 billion towards renovating water infrastructure, replacing lead pipes, investments into desalination, water conservation efforts, and water recycling. The IIJA is the largest investment in water the country has ever seen.

Water shortage trends could continue to intensify in 2025, in what is predicted to be yet another record year for elevated temperatures. These events could help spur investments in clean water equipment, infrastructure, and processes and could continue to draw attention towards the space. In addition, funding within the IIJA will likely continue to produce opportunities for companies throughout the clean water value chain that operate in the United States. Additionally, compressed utilities valuations, as well as the potential for interest rate cuts could bring more water management companies back into favour with investors over the coming quarters.

#### Global X Lithium & Battery Tech UCITS ETF

The performance was positive in the second half of 2024 as favourable long-term factors such as supportive government regulations, conventional automakers' pledges, and continuous technological advancements continued to underpin potentially robust lithium and battery demand outlooks. Moreover, the market forecasted the introduction of cheaper EV models to drive demand in major EV markets, including the US and Europe. Despite some manufacturers scaling back their electrification goals, the focus on developing next-gen EV batteries and technology remained. These technological advancements have the potential to significantly increase EV adoption and benefit firms in the EV battery value chain. Also, while lithium miners continued to face headwinds from the oversupply and low-price environment for lithium, M&A activity resulted in positive sentiment. Finally, the supply surplus was forecasted to decline from 9.5% in 2023 to 4.8% in 2024.

<sup>&</sup>lt;sup>101</sup> EPA Announces Over \$132m for Water Infrastructure in Pennsylvania.

#### Sub-Fund Review (continued)

#### Global X Data Center REITs & Digital Infrastructure UCITS ETF

The data centre industry experienced significant growth in H2 2024, driven by increased demand for digital infrastructure and strategic investments. Growing shortage for data centre capacity is driving construction into new projects, with nearly 800 MW of capacity coming online in first half of 2024, and 2.5 GW of new capacity construction expected to come online through 2024 in the US, which benefits many data centre component suppliers.<sup>102</sup>

Hyperscaling cloud computing companies are also investing heavily in new capacity to sustain direct demand for AI processing as applications scale, with the major 4 hyperscalers—Microsoft, Amazon, Google, and Meta, investing significant amounts of their Capital Expenditure (CapEx) on data centres in 2024, and guiding for more in 2025.<sup>103</sup>

Power intensity remains an important issue for data centres, leading hyperscalers like AWS, Microsoft and Google to pursue alternative sources of energy for their data centres, such as nuclear and renewables. For example, AWS is investing over \$500 million in three nuclear power projects from Virginia to Washington State.<sup>104</sup>

AustralianSuper, Australia's largest super fund, invested \$1.5 billion in U.S. data centre developer DataBank. This investment is part of a \$2 billion equity raise by DataBank and will support the construction of three new data centre campuses in the U.S., reflecting the increasing demand for cloud and AI infrastructure from institutional investors.<sup>105</sup>

Equinix announced its Q3 2024 result at the end of October, reporting a 7% year-on-year increase in revenues to \$2.2 billion. It also announced the signing of a \$15 billion joint venture with GIC and Canada Pension Plan Investment Board ("CPP Investments") to accelerate growing artificial intelligence demand in the US.<sup>106</sup>

#### **Global X Blockchain UCITS ETF**

The Trump election in November has served as a catalyst for the bitcoin price, given his pro-cryptocurrency stance. Bitcoin and other major cryptocurrencies rallied into the election, and then further upon the victory of Trump. Several announcements, such as Trump's appointment of David Sacks as 'crypto tzar', the nomination of Paul Atkins as the next SEC Chairman, and the nomination of Scott Bessent, a Bitcoin advocate, as Treasury Secretary, were all positive developments for the broader cryptocurrency space.

Venture capital investments in blockchain reached \$4 billion across 687 deals in Q4 2024, marking the highest quarterly total since Q4 2022.<sup>107</sup> Infrastructure projects led this surge, followed by financial services and Web3 projects.<sup>108</sup>

Blockchain development continues in the financial sector, with UBS piloting a blockchain-based payment system, UBS Digital Cash, to enhance cross-border transaction efficiency. This system operates on a private blockchain network, enabling automatic payment execution under specific conditions.<sup>109</sup>

In the United Kingdom, City Minister Tulip Siddiq advocated for issuing digital gilts on blockchain to modernise UK markets and maintain global competitiveness. Despite some resistance, the initiative reflects a push towards integrating blockchain technology into traditional financial systems.<sup>110</sup>

<sup>&</sup>lt;sup>102</sup> Reuters. (2024, August 20). North America sees 70% jump in data center supply in construction, CBRE report says.

#### **Sub-Fund Review (continued)**

#### **Global X Hydrogen UCITS ETF**

Over H2 2024, the Sub-Fund decreased by (10.78%). The highest total returns came from Bloom Energy Corporation - Class A and Doosan Co Ltd, which returned 81.45% and 22.20%, respectively. The worst performers were Hyzon Motors Inc and Cavendish Hydrogen ASA which returned (88.97%) and (69.50%), respectively.

On a Contribution to Return ("CTR") basis from Bloom Energy Corporation - Class A and Air Products & Chemicals Inc added 15.64% and 0.49%, respectively. The largest detractors on a CTR basis were Nel ASA and Doosan Fuel Cell Co Ltd with (8.32%) and (3.40%), respectively.

In H2 2024, the sector saw a relaxed Tax Credit Criteria for Green Hydrogen Production: The Biden administration has delayed the stricter requirements for green hydrogen producers to qualify for tax credits until 2030. This includes shifting from annual to hourly proof of renewable energy usage, aligning with EU standards. The Treasury is also allowing hydrogen produced using power from existing nuclear plants to qualify in its final rules, as long as the project averts a nuclear plant's retirement. This expands from its draft rules that require developers to produce hydrogen from new clean energy projects, like solar or wind, that are connected to their regional grid.

The U.S. Department of Energy finalized another \$2.2 billion of the \$7 billion previously announced funding for hydrogen hubs.<sup>111</sup> The Gulf Coast Hydrogen Hub will receive \$1.2 billion while the Midwest Hydrogen Hub will receive \$1 billion.<sup>112</sup> This means that only 2 of the 7 selected projects still are waiting for final funding approval. Final approval for all 7 projects will allow them to move on in the development phase.

In Europe the Clean Hydrogen Partnership is driving Europe's clean energy leadership by advancing hydrogen production, storage, and distribution through collaboration with the European Commission, industry leaders, SMEs, and research institutions.<sup>113</sup> A key achievement is the creation of 16 "Hydrogen Valleys" in 15 EU Member States, local ecosystems integrating hydrogen production and use.<sup>114</sup> Backed by an additional €200 million under REPowerEU, the initiative aims to double these valleys by 2025 to enhance scalability and commercial viability.<sup>115</sup>

The €14 million FCH2Rail project successfully tested the Iberian Peninsula's first hydrogen-powered train in Zaragoza during RailLive! 2024, marking a milestone for Spain's and Portugal's railway networks.<sup>116</sup>

Companies focused on clean hydrogen, like Air Products and Chemicals, benefited from increased demand and long-term contracts for green hydrogen. Despite regulatory challenges and rising costs for renewable power, hydrogen projects are moving forward, particularly in regions with robust policy frameworks, such as the U.S.'s Inflation Reduction Act, which has been a significant driver for hydrogen project investments.

However, there are challenges. Project delays, inflation, and regulatory uncertainties are impacting timelines, especially for renewable hydrogen initiatives. Still, with the global hydrogen market expected to grow to \$410 billion by 2030.<sup>117</sup>

<sup>&</sup>lt;sup>116</sup> First hydrogen-powered train successfully tested on Iberian rail networks. Railtech, 6 Dec, 2024.

<sup>&</sup>lt;sup>117</sup> Nasdaq. Best Hydrogen Sotcks to buy August. 7 August, 2024.

#### **Sub-Fund Review (continued)**

#### **Global X Wind Energy UCITS ETF**

Top performers during H2 2024 were Windey Energy Technology and Ming Yang Smart Energy Group with 38.04% and 37.47%, respectively. The worst performers were Century Iron & Steel Industries and CS Bearing Co Ltd with (45.54%) and (41.74%), respectively.

On a Contribution to Return ("CTR") basis Ming Yang Smart Energy Group A and Windey Energy Technology added 1.99% and 0.55%, respectively.

Challenges however persisted, with high interest rates and inflation keeping financing costs elevated, delaying project development, particularly for smaller developers. Despite these issues, corporate commitments to wind energy remained robust, with major companies entering long-term power purchase agreements ("PPAs"), ensuring a stable demand base and supporting the financial viability of new wind projects. In our view, the strong order growth and stable price environment is a positive sign for the wind power market. Over the past couple of years, wind turbine makers have struggled with being squeezed from high supply costs and too-low turbine prices, combined with a slowdown in orders from a multitude of factors.

A recent report by the International Energy Agency ("IEA") finds that renewables could meet nearly half of global electricity demand by 2030.<sup>118</sup> Between 2024 and 2030, the IEA forecasts that the world will install around 5,500 gigawatts ("GW") of renewable energy capacity.<sup>119</sup> China is forecast to account for 60% of the renewable energy installations through 2030.

The newly elected left leaning governments in the UK and France are strongly backing offshore wind farms, providing a boost to an industry previously hindered by rising costs and supply chain issues. Floating wind technology, which allows turbines to operate in deeper waters, is seen as a game-changer for renewable energy. While Europe has lost its top offshore wind market position to the US and China, it leads in floating wind development, with France aiming to build the world's first commercial floating wind farm by 2031, and the UK targeting 5 gigawatts of floating wind capacity by 2030.<sup>120</sup> Additionally, the UK will increase renewable energy support to a record £1.5 billion, with £1.1 billion earmarked for traditional offshore wind.<sup>121</sup> Prime Minister Keir Starmer plans to quadruple offshore wind capacity, in line with France's goal of increasing capacity sixfold by 2035.<sup>122</sup> Both nations aim to meet a significant portion of their energy demand through ambitious offshore wind expansion.

#### **Global X Solar UCITS ETF**

Over H2 2024, the Sub-Fund decreased by (4.03%). The highest total returns came from Sineng Electric Co Ltd-A and Henan Yicheng New Energy C-A, which returned 95.44% and 51.05%, respectively. The worst performers were Meyer Burger Technology AG and Sunpower Corp which returned (94.25%) and (93.24%), respectively.

On a Contribution to Return ("CTR") basis Sungrow Power Supply Co Ltd-A and Ginlong Technologies Co Ltd- A added 1.34% and 0.80%, respectively. The largest detractors on a CTR basis were Enphase Energy Inc and First Solar Inc with (2.23%) and (1.93%), respectively.

In H2 2024, the solar industry faced challenges from multiple fronts. Supply chain disruptions, particularly in the procurement of polysilicon and other critical materials, led to delays in project timelines and increased costs. Rising interest rates strained financing for new solar installations, impacting both residential and utility-scale projects. Additionally, policy uncertainty in key markets, such as the U.S. and Europe, hindered investment as stakeholders awaited clarity on renewable energy subsidies and tariffs. Competition from alternative renewable sources and evolving energy storage technologies further pressured margins in an already competitive sector.

Solar remains the fastest growing source of power generation in the US, with new capacity consistently growing over 20% annually, replacing wind as the primary target of renewable energy development. Panel cost efficiency continues to improve on a \$/kV basis, improving project economics.<sup>123</sup>

A recently published report from Ember finds that the world could install 593 gigawatts ("GW") of solar power capacity this year, which would equate to 29% YoY growth.<sup>124</sup> This would make 2024 the largest-ever year for solar power capacity growth, surpassing 2023's record-breaking year for solar power installations.

<sup>&</sup>lt;sup>118</sup> Massive Global growth of renewables to 2030, IEA, 9 Oct 2024.

#### Sub-Fund Review (continued)

#### Global X Solar UCITS ETF (continued)

In September 2024, First Solar ("FSLR") inaugurated a new \$1.1 billion fully vertically integrated thin-film solar manufacturing facility in Lawrence County, Alabama.<sup>125</sup> This state-of-the-art plant adds 3.5GW of annual capacity, bringing the company's total U.S. manufacturing capacity to approximately 10 GW.<sup>126</sup>

#### **Global X AgTech & Food Innovation UCITS ETF**

During H2 2024, the Global X AgTech & Food Innovation UCITS ETF returned (1.82%). The top performers on a total return basis were Sprouts Farmers Market Inc and Sunopta Inc with 51.89% and 45.83%, respectively. The worst performers were NR Instant Produce PCL and Bioceres Crop Solutions Corp with (46.98%) and (45.76%), respectively.

On a Contribution to Return ("CTR") basis Deere & Co and Sunopta Inc added 1.86% and 0.98%, respectively. The largest detractors on a CTR basis were Kubota Corp and Nutrien Ltd with (1.85%) and (1.24%), respectively.

In H2 2024, major agtech and food-related industries saw significant developments. A key partnership expanded precision agriculture capabilities, integrating advanced data tools to enhance farm productivity and sustainability. Meanwhile, the seed sector remained resilient despite challenges in crop protection, including price pressures and currency fluctuations. Consumer demand for organic products and home gardening continued to drive growth, with companies focusing on sustainability and local sourcing to meet market demands. Despite supply chain issues, there was a strong push toward technology and innovation in the lawn and garden sectors.

There have been several precision agriculture partnerships helping famers make data-driven decisions with equipment. These initiatives aim to improve both productivity and sustainability on farms, with pilot programs expected to expand into North America and Canada.

#### Global X Silver Miners UCITS ETF

The performance was slightly positive in the second half of 2024 as silver was supported by U.S. dovish monetary policy and the need for safe havens due to geopolitical threats. The first FED rate cut in September marked the start of an easing cycle, which is supposed to support precious metals: the US Federal Reserve eased monetary policy for the first time in four years at the September 2024 Federal Open Market Committee meeting, lowering interest rates by 50 basis points.

Moreover, news about further stimulus in China added to the support for industrial silver demand. With an unprecedented burst of stimulus measures, China boosted its economy. The announcements were made rapidly and intensely, boosting market sentiment and indicating that Beijing was determined to bring GDP back on track to achieve its target of roughly 5%.

#### Global X S&P 500® Quarterly Buffer UCITS ETF

Implementing a defined outcome strategy, the Sub-Fund aims to protect against the first 5% of losses on the S&P 500 through the purchase of a put spread each quarter. Additionally, by writing calls, the strategy aims to minimize the cost of the put spread, resulting in a capped maximum gain each quarter. During H2 2024, the Sub-Fund recorded a positive net asset value return of 6.07%, as softening levels if inflation, a dovish Fed and post U.S election rally contributed to increased flows into U.S. equity markets.

Looking back, the SPX rose 7.71%% over H2 2024 and 23.31% in 2024 with returns being predominantly led by the Consumer Discretionary, Communication Services and Information Technology sectors.

Volatility measures for major U.S. equity indices initially trended upward before reversing course post-election. The Cboe Volatility Index ("VIX") rose above the 23 level, reaching its highest peak since August (yen carry trade unwind), driven by disappointing guidance from two megacap companies regarding artificial intelligence investment costs on 30 October. However, the market quickly absorbed the news, and the S&P 500 and Nasdaq 100 posted strong gains following the U.S. presidential election on 5 November and the following 25bps rate cut by the Federal Reserve on the 7 November 2024.

In December, a sell-off occurred, with the VIX spiking above 28 post the Federal Reserve's decision to cut interest rates by an additional 25 basis points as expected. This move raised concerns among some market participants about re-emerging inflation risks going into the new year and contributed to a steepening yield curve, with long-term rates climbing higher.

 <sup>&</sup>lt;sup>125</sup> First Solar opens 3.5 GW solar factory in Alabama. PV Magazine. 26 Sep 2024.
 <sup>126</sup> Ibid

#### Sub-Fund Review (continued)

#### Global X S&P 500® Quarterly Tail Hedge UCITS ETF

Implementing a defined outcome strategy, the Sub-Fund aims to provide a 9% buffer on the S&P 500 after the first 3% of losses on the same index. During H2 2024, the Sub-Fund recorded positive net asset value return of 6.55%, as a dovish Fed and post U.S election rally contributed to increased flows into U.S. equity markets.

Looking back, the SPX rose 7.71%% over H2 2024 and 23.31% in 2024 with returns being predominantly led by the Consumer Discretionary, Communication Services and Information Technology sectors.

Volatility measures for major U.S. equity indices initially trended upward before reversing course post-election. The Cboe Volatility Index ("VIX") rose above the 23 level, reaching its highest peak since August (yen carry trade unwind), driven by disappointing guidance from two megacap companies regarding artificial intelligence investment costs on 30 October. However, the market quickly absorbed the news, and the S&P 500 and Nasdaq 100 posted strong gains following the U.S. presidential election on 5 November and the following 25bps rate cut by the Federal Reserve on the 7 November 2024.

In December, a sell-off occurred, with the VIX spiking above 28 post the Federal Reserve's decision to cut interest rates by an additional 25 basis points as expected. This move raised concerns among some market participants about re-emerging inflation risks going into the new year and contributed to a steepening yield curve, with long-term rates climbing higher.

#### Global X S&P 500® Covered Call UCITS ETF

The Global X S&P 500® Covered Call UCITS ETF seeks to provide investment results that correspond generally to the price and yield performance, before fees and expenses, of the Cboe S&P 500 BuyWrite 15% WHT Index ("Underlying Index").

The Global X S&P 500® Covered Call UCITS ETF follows a synthetic strategy, in which the Sub-Fund seeks to replicate a buy-write index by selling covered calls, with underlying equity exposure designed to match constituents of the S&P 500 Index. The Cboe S&P 500 BuyWrite 15% WHT Index (BXMU Index) tracks the performance of a hypothetical call strategy portfolio consisting of a "long" position indexed to the S&P 500 NTR 15% USD Index ("SPX15UN") and a short European-Style at the money S&P 500 Index ("SPX") Call option position expiring monthly.

During H2 2024, volatility measures for major domestic equity indices initially trended upward before reversing course postelection. The Cboe Volatility Index ("VIX") rose above the 23 level, reaching its highest peak since August, driven by disappointing guidance from two megacap companies regarding artificial intelligence investment costs on 30 October. However, the market quickly absorbed the news, and the S&P 500 and Nasdaq 100 posted strong gains following the U.S. presidential election on 5 November and the following 25 bps rate cut by the Federal Reserve on the 7 November 2024. Looking back, the SPX rose 7.71% over H2 and is up 23.31% for 2024, with returns being predominantly led by the Communication Services, Industrials and Information Technology sectors.

As a product of the environment during the Q4 2024 monthly roll periods, the Sub-Fund's strategies attracted premiums that appreciated in the low single digit percentage vicinity versus Q3 2024. The premiums remained near the high end of those acquired by the funds over the past year. August roll period in Q3, the Cboe Volatility Index (VIX) and the Cboe Nasdaq 100 Volatility Index (VXN) expressed their highest peaks in over a year. The happening was influenced by a series of economic data points, including a higher-than-expected domestic unemployment rate, which was made available to the public on 2 August. Thereafter, a decision by the Bank of Japan to raise its key interest rate some 25 basis points led to a chain of events that would see investors unwind their yen-denominated carry trades and send U.S. markets into a tailspin on August 8<sup>th</sup>. In December, a sell-off occurred, with the VIX spiking above 28 post the Federal Reserve's decision to cut interest rates by an additional 25 basis points as expected. This move raised concerns among some market participants about re-emerging inflation risks going into the new year and contributed to a steepening yield curve, with long-term rates climbing higher.

#### Sub-Fund Review (continued)

#### Global X S&P 500® Annual Buffer UCITS ETF

Implementing a defined outcome strategy, the Sub-Fund aims to provide a buffer on the first 15% of losses on the S&P 500 from the purchase of a put spread exercised annually at the beginning of January. The Sub-Fund seeks to achieve this outcome through buying and selling put options and selling out-of-the-money call options on the same index. The Sub-Fund returned 4.41% over H2 2024 period as a dovish Fed and post U.S election rally contributed to increased flows into U.S. equity markets.

Looking back, the SPX rose 7.71%% over H2 2024 and 23.31% in 2024 with returns being predominantly led by the Consumer Discretionary, Communication Services and Information Technology sectors.

Volatility measures for major U.S. equity indices initially trended upward before reversing course post-election. The Cboe Volatility Index ("VIX") rose above the 23 level, reaching its highest peak since August (yen carry trade unwind), driven by disappointing guidance from two megacap companies regarding artificial intelligence investment costs on 30 October. However, the market quickly absorbed the news, and the S&P 500 and Nasdaq 100 posted strong gains following the U.S. presidential election on 5 November and the following 25bps rate cut by the Federal Reserve on the 7 November 2024.

In December, a sell-off occurred, with the VIX spiking above 28 post the Federal Reserve's decision to cut interest rates by an additional 25 basis points as expected. This move raised concerns among some market participants about re-emerging inflation risks going into the new year and contributed to a steepening yield curve, with long-term rates climbing higher.

#### Global X S&P 500® Annual Tail Hedge UCITS ETF

Implementing a defined outcome strategy, the Sub-Fund aims to provide a 30% buffer on the S&P 500, after the first 5% of losses on the same index. The Sub-Fund seeks to achieve this outcome through buying and selling put options and selling out-of-the-money call options on the same index. The Sub-Fund returned 4.16% during H2 2024, as a dovish Fed and post U.S election rally contributed to increased flows into U.S. equity markets.

Looking back, the SPX rose 7.71% over H2 2024 and 23.31% in 2024 with returns being predominantly led by the Consumer Discretionary, Communication Services and Information Technology sectors.

Volatility measures for major U.S. equity indices initially trended upward before reversing course post-election. The Cboe Volatility Index ("VIX") rose above the 23 level, reaching its highest peak since August (yen carry trade unwind), driven by disappointing guidance from two megacap companies regarding artificial intelligence investment costs on 30 October. However, the market quickly absorbed the news, and the S&P 500 and Nasdaq 100 posted strong gains following the U.S. presidential election on 5 November and the following 25 bps rate cut by the Federal Reserve on the 7 November 2024.

In December, a sell-off occurred, with the VIX spiking above 28 post the Federal Reserve's decision to cut interest rates by an additional 25 basis points as expected. This move raised concerns among some market participants about re-emerging inflation risks going into the new year and contributed to a steepening yield curve, with long-term rates climbing higher.

#### **Global X 1-3 Month T-Bill UCITS ETF**

The Sub-Fund recorded positive returns of 2.54% during H2 2024 period as ultra-short term treasury bills reflected the U.S. Federal Reserve's elevated interest rate level throughout the year and in turn the average yield to maturity of the Sub-Fund's underlying holdings throughout the reporting period. The Federal Reserve began its cutting cycle by announcing a 50bp cut and lowering the Fed Funds rate to 5% at the September FOMC meeting. Two subsequent cuts of 25 bps each followed both in November and December. The Sub-Fund managed to avoid interest rate volatility that impacted interest rates on the long end of the interest rate curve during the reporting period. Throughout the reporting period, the Sub-Fund delivered consistent interest income that largely tracked prevailing short-term interest rates while maintaining a stable net asset value.

#### Sub-Fund Review (continued)

#### **Global X European Infrastructure Development UCITS ETF**

Since inception on 5 September 2024, the Sub-Fund decreased by (1.60%). The highest total returns came from Norconsult AS and Fraport AG Frankfurt Airport, which returned 30.57% and 25.97%, respectively. The worst performers were Hexatronic Group AB and EDP Renovaveis SA which returned (35.29%) and (34.25%), respectively.

On a Contribution to Return ("CTR") basis Leonardo Spa and Ferrovial SE added 0.75% and 0.74%, respectively. The largest detractors on a CTR basis were EDP Renovaveis SA and Cellnex Telecom SA with (1.41%) and (0.89%), respectively.

In Europe, growth is challenged by external factors, including a slowing Chinese economy, a strong U.S. dollar, and capital outflows to U.S. equities. However, opportunities may arise if undervalued equities attract interest and a weaker euro bolsters export recovery. Expected rate cuts by the European Central Bank by mid-2025 could lower borrowing costs substantially, aiding around  $\notin 1.1$  trillion in planned infrastructure investments and potentially delivering a significant boost to GDP growth.

Europe faces an estimated \$2 trillion infrastructure investment gap by 2040, equivalent to an annual investment gap of 0.35% of GDP. The NextGenerationEU fund and the Cohesion Policy will look to drive progress across projects spanning renewable energy, digital transformation, and public-private partnerships. Notably, approximately 60% of the Recovery and Resilience Facility's  $\in$ 723.8 billion budget remains unallocated, highlighting significant opportunities in infrastructure and clean energy projects, and potentially including nuclear power. Additionally, the  $\in$ 392 billion Cohesion Policy funds continue to be distributed, further supporting regional development initiatives.

Mario Draghi's recent report highlights the critical need for significant investments in green initiatives, digital infrastructure, and defence capabilities to bridge Europe's annual  $\epsilon$ 750 to  $\epsilon$ 800 billion investment gap and sustain global competitiveness. Investment in renewable energy, electric vehicle infrastructure, 5G networks, and cloud computing are aimed at accelerating Europe's decarbonisation and digitalisation efforts, potentially creating opportunities for both public and private infrastructure development sectors.

In the U.K. Prime Minister Keir Starmer pledged to fast-track decisions on 150 major infrastructure projects and streamline planning approvals under a new Planning and Infrastructure Bill, aiming to triple the number of approvals compared to the previous Conservative government.<sup>127</sup> The government plans to release ten-year housing and infrastructure strategies next spring, targeting unprecedented construction rates to deliver 1.5 million homes and major projects.

#### **Global X Defence Tech UCITS ETF**

Ongoing global conflicts across multiple continents could see defence spending remain elevated in the near-term.

- Trump's victory in the US election has raised questions around the level of defence spending of other NATO members. At a press conference on 7 January, Trump stated that the new NATO defence spending target should be 5%, compared to the current 2% target for 2024.<sup>128</sup> While previous US presidents have also expressed concerns around the lower level of funding from other NATO members, Trump has been the first to outline the potential consequences, stating that he would encourage the Russia to do "whatever the hell they want" if Nato members are not contributing to a satisfactory level.<sup>129</sup>
- Trump's election also brings with it other interesting angles multiple members of his administration have close ties with Silicon Valley, including incoming Vice-President JD Vance, who has close ties to Peter Thiel, who was a co-founder of Palantir. Elon Musk, a central figure of Trump's Department of Government Efficiency ("DOGE") movement, has been critical of spending on traditional defence areas such as fighter jets, advocating for more cost-effective options such as drones.<sup>130</sup> This is consistent with one of the trends in the theme, which is a shift towards more cost-effective and increasingly automated solutions.
- The prospect of deregulation could bring about quicker spending approvals and a greater acceptance of newer technologies and companies. Notably, Pete Hegseth, Trump's defence secretary pick, has also emphasised the need to speed up weapons development through competition and innovation.<sup>131</sup>

<sup>&</sup>lt;sup>127</sup> Starmer pledges to treble rate of infrastructure decisions, Constructionnews, 5 Dec, 2024.

<sup>&</sup>lt;sup>128</sup> The Conversation. (2025, January 15). Nato: why the prospect of Trump 2.0 is putting such intense pressure on the western alliance.

<sup>129</sup> Ibid

<sup>&</sup>lt;sup>130</sup> Financial Times. (2024, December 17). Elon Musk's attack on F-35s fuels debate over expensive fighter jets.

<sup>&</sup>lt;sup>131</sup> Financial Times. (2025, January 16). US defence industry braced for tech shake-up under Trump.

#### **Sub-Fund Review (continued)**

#### **Global X Artificial Intelligence UCITS ETF**

AI adoption remains strong, with record investments in infrastructure across industries. Across big tech companies, capex remains exceptionally high given how early we are in the generative AI investment cycle. Hyperscalers deployed significant capex into data centres and other AI infrastructure in 2024 and have signalled this will increase in 2025, signalling their willingness to intensify their AI infrastructure buildouts. These record investments will also benefit an expanding list of companies in AI hardware and infrastructure, like Nvidia. Spending on top-end chips, such as those provided by Nvidia, continue to scale, and demand for AI systems from industries such as transportation and healthcare remains strong.

Countries are becoming increasingly aware of the importance of maintaining their technological capabilities. The UK government, for example, has announced plans to invest in a significant expansion of AI computing capacity over the next five years, including building a new supercomputer.<sup>132</sup> Sovereign-backed investment funds are increasingly looking at opportunities to capitalise on the growth and development of AI. During H2, sovereign-backed investment firm, MGX, announced a partnership with BlackRock, Global Infrastructure Partners ("GIP") and Microsoft to launch a \$30 billion fund that will invest in AI to build data centres and energy projects.<sup>133</sup>

The US government announced it would place restrictions on chip exports via licensing requirements, separating countries into three tiers, the third tier including nations such as China, Iran, Russia and North Korea, to which companies in effect, cannot export to.<sup>134</sup>

<sup>&</sup>lt;sup>132</sup> Financial Times. (2025, January 12). UK pledges huge increase in computing capacity to build AI industry.

<sup>&</sup>lt;sup>133</sup> Gulf Business. (2024, September 18). Abu Dhabi's MGX, Microsoft, BlackRock partner to launch \$30bn AI fund.

<sup>&</sup>lt;sup>134</sup> Financial Times. (2025, January 13). US imposes export controls on chips for AI to counter China.

**Global X ETFs ICAV** Notes to the Financial Statements

For the period ended 31 December 2024

#### 1. Nature of operations

Global X ETFs ICAV (the "ICAV") was registered in Ireland, registration number C435449, pursuant to the Irish Collective Asset-management Vehicles Act 2015 (the "ICAV Act") on 20 July 2020 and authorised by the Central Bank of Ireland (the "Central Bank") as an Undertaking for Collective Investment in Transferable Securities pursuant to the European Communities (Undertaking for Collective Investment in Transferable Securities) Regulations 2011 (S.I. No 352 of 2011), and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investments in Transferable Securities) Regulations 2019 (S.I. 230 of 2019) (collectively the "UCITS Regulations").

The ICAV is organised in the form of an umbrella fund with segregated liability between Sub-Funds. Each Sub-Fund has a distinct portfolio of investments, and the investment objective and policy of each Sub-Fund is formulated by Global X Management Company LLC (the "Investment Manager"). At 31 December 2024, the following Sub-Funds were in operation:

## **Sub-Funds**

Global X Management Company LLC was appointed as Investment Manager and Distributor of the ICAV pursuant to the investment management and distribution agreement between the ICAV, the Manager and the Investment Manager. Global X Management Company (Europe) Limited (the "Manager") serves as the Manager of the ICAV.

For the period ended 31 December 2024

## 1. Nature of operations (continued)

The registered office of the ICAV is 10 Earlsfort Terrace, Dublin 2, Ireland. SEI Investments - Global Fund Services Limited (the "Administrator") is the administrator. SEI Investments – Depositary and Custodial Services (Ireland) Limited (the "Depositary") is the depositary. Brown Brothers Harriman & Co. and Brown Brothers Harriman Fund Administration Services (Ireland) Limited have been appointed as the custodian (the "Custodian") and transfer agent (the "Transfer Agent"), respectively.

## 2. Basis of preparation and material accounting policies

#### (a) Statement of compliance

The unaudited condensed semi-annual financial statements are prepared in accordance with International Accounting Standards ("IAS") 34 'Interim Financial Reporting', the ICAV Act and the UCITS Regulations. This report presents financial statements for the following Sub-Funds as at 31 December 2024:

Global X Video Games & Esports UCITS ETF	Global X Clean Water UCITS ETF
Global X Telemedicine & Digital Health UCITS ETF	Global X Lithium & Battery Tech UCITS ETF
Global X U.S. Infrastructure Development UCITS ETF	Global X Data Center REITs & Digital Infrastructure UCITS ETF
Global X FinTech UCITS ETF	Global X Blockchain UCITS ETF
Global X Robotics & Artificial Intelligence UCITS ETF	Global X Hydrogen UCITS ETF
Global X Autonomous & Electric Vehicles UCITS ETF	Global X Wind Energy UCITS ETF
Global X SuperDividend® UCITS ETF	Global X Solar UCITS ETF
Global X Uranium UCITS ETF	Global X AgTech & Food Innovation UCITS ETF
Global X Disruptive Materials UCITS ETF	Global X Silver Miners UCITS ETF

Global X Cloud Computing UCITS ETF	Global X S&P 500® Covered Call UCITS ETF
Global X E-commerce UCITS ETF	Global X S&P 500® Annual Buffer UCITS ETF
Global X CleanTech UCITS ETF	Global X S&P 500® Annual Tail Hedge UCITS ETF
Global X Cybersecurity UCITS ETF	Global X 1-3 Month T-Bill UCITS ETF
Global X Internet of Things UCITS ETF	Global X European Infrastructure Development UCITS ETF
Global X Copper Miners UCITS ETF	Global X Defence Tech UCITS ETF
Global X Renewable Energy Producers UCITS ETF	Global X Artificial Intelligence UCITS ETF

This report presents comparative financial statements as at 30 June 2024 on the Statement of Financial Position and related notes; and for the period from 1 July 2023 to 31 December 2023 on the Statement of Comprehensive Income, Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares, Statement of Changes in Equity, Statement of Cash Flows, and related notes.

#### (b) Basis of preparation

The financial statements of the Sub-Funds are presented in United States Dollars ("USD" or "US\$") except for Global X European Infrastructure Development UCITS ETF which is presented in Euro ("EUR" or " $\in$ "). The financial statements have been prepared under the going concern basis and under the historical cost convention, as modified by the revaluation of financial assets at fair value through profit or loss.

The preparation of financial statements in conformity with International Financial Reporting Standards ("IFRS") requires management to make judgements, critical accounting estimates and assumptions that affect the application of policies and the reported amounts of assets and liabilities, income, and expense. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period and future periods if the revision affects both current and future periods.

For the period ended 31 December 2024

## 2. Basis of preparation and material accounting policies (continued)

#### (b) **Basis of preparation (continued)**

All references to net assets throughout this document refer to net assets attributable to holders of redeemable participating shares.

Corresponding figures for the period from 1 July 2023 to 31 December 2023 have been reclassified to ensure the comparability with the figures for the period from 1 July 2024 to 31 December 2024.

#### (c) Changes in relevant accounting standards

## Standards and amendments to existing standards effective during the period

The following amended standard and interpretation became effective during the period:

Effective date 1 January 2024:

• Classification of Liabilities as Current or Non-current – Amendments to IAS 1

#### Standards, amendments, and interpretations that are not yet effective for the period and not early adopted

A number of new standards, amendments to standards and interpretations are effective for annual periods beginning after 1 January 2025, and have not been applied in preparing these financial statements. None of these are expected to have a material effect on the financial statements of the Sub-Funds.

## (d) Material accounting policies

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied for the periods presented, unless otherwise stated.

#### i. Foreign currency translation

#### Functional and presentation currency

Functional currency is the currency of the primary economic environment in which the Sub-Funds operate. When indicators of the primary economic environment are mixed, management uses its judgement to determine the functional currency that most faithfully represents the economic effect of the underlying transactions, events, and conditions. The Board has determined that the functional currency of the Sub-Funds is USD ("US\$") except for Global X European Infrastructure Development UCITS ETF, the functional currency of which is EUR (" $\in$ "). Investor subscriptions and redemptions are received and paid in the currency of the relevant share class which is predominantly in USD. The expenses incurred by the Sub-Funds (including management fees, custodian fees and administration fees) are also denominated and paid mostly in USD.

#### Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign currency assets and liabilities are translated into the functional currency using the exchange rate prevailing at the period end date.

Foreign exchange gains and losses arising from translation are included in the Statement of Comprehensive Income.

#### Net gains/(losses) on foreign exchange translation

Foreign exchange gains and losses relating to cash and cash equivalents are presented in the Statement of Comprehensive Income within 'Net gains/(losses) on financial assets and liabilities at fair value through profit or loss'.

Foreign exchange gains and losses relating to the financial assets and liabilities carried at fair value through profit or loss are presented in the Statement of Comprehensive Income within 'Net gains/(losses) on financial assets and liabilities at fair value through profit or loss'.

For the period ended 31 December 2024

## 2. Basis of preparation and material accounting policies (continued)

## (d) Material accounting policies (continued)

## ii. Investments

## Classification

In accordance with IFRS 9, the Sub-Funds classify equity investments (including rights and warrants), treasury bills and derivative contracts as financial assets or financial liabilities at fair value through profit or loss.

All of the Sub-Funds' financial assets and liabilities designated at fair value through profit or loss are financial instruments that are classified as held for trading and are considered managed investments. Their performance is evaluated on a fair value basis in accordance with the Sub-Funds' investment strategy.

All other financial assets and liabilities including cash, cash equivalents, receivables and payables are classified as being measured at amortised cost. Measurement at amortised cost takes into account any premium or discount on acquisition as well as transaction costs and fees that are an integral part of the effective interest rate. All financial assets measured at amortised cost are short term in nature and the application of the expected credit loss model does not impact the carrying amounts of these financial assets as they approximate their fair values under IFRS 9.

## Recognition, derecognition and measurement

Regular purchases and sales of investments are recognised on the trade date – the date on which each Sub-Fund commits to purchase or sell the investment. Financial assets and financial liabilities at fair value through profit or loss are initially recognised at fair value. Transaction costs are expensed as incurred in the Statement of Comprehensive Income. Financial assets are derecognised when the rights to receive cash flows from the investments have expired or the Sub-Fund has transferred substantially all risks and rewards of ownership.

Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value. Realised and unrealised gains and losses arising from changes in the fair value of the 'financial assets or financial liabilities at fair value through profit or loss' category are presented in the Statement of Comprehensive Income within 'Net gains/(losses) on financial assets and liabilities at fair value through profit or loss' in the financial period in which they arise.

In accordance with IFRS 9, the ICAV applies the 'expected credit loss' ("ECL") model when determining if financial assets are subject to impairment. This impairment model applies to financial assets measured at amortised cost and an assessment is required to determine if an ECL is required. The ICAV has determined that the application of IFRS 9's impairment requirements result in no ECL impairment as the cash and cash equivalents, receivables and payables are short-term in nature.

#### Fair value estimation

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value of financial assets and liabilities traded in active markets (such as publicly traded derivatives and equities (including rights and warrants)) are based on quoted market prices at the close of trading on the reporting date. In circumstances where the last traded price is not within the bid-ask spread, management will determine the point within the bid-ask spread that is most representative of fair value.

If a quoted market price is not available on a recognised market or from a broker/dealer for non-exchange traded financial instruments, the fair value of such investment shall be estimated with care and in good faith by a competent professional person, body, firm, or corporation (appointed for such purpose by the Board of the ICAV) and such fair value shall be determined on the basis of the probable realisation value of the investment.

The total return swap has been entered into by some Sub-Funds, and is revalued by the Administrator, reviewed by the Investment Manager, and agreed to counterparty information.

For the period ended 31 December 2024

## 2. Basis of preparation and material accounting policies (continued)

## (d) Material accounting policies (continued)

## ii. Investments (continued)

## *Fair value estimation (continued)*

If the Investment Manager considers that the methods of valuation set out above do not provide a fair valuation of a particular asset, it may ask for the fair value to be estimated with care and in good faith by a competent person appointed by the Board of the ICAV and approved for the purpose by the Depositary.

Cash deposits and similar investments shall be valued at their face value together with accrued interest.

As at 31 December 2024, the fair values of all of the Sub-Funds' investment in equities were determined by reference to quoted market prices except for investments in one security that was suspended on trading, two securities that were not traded and three securities domiciled in Russia. The security that was suspended on trading was Scilex Holding Company from Global X Genomics & Biotechnology UCITS ETF. The two securities that were not traded were F4 Uranium Corp from Global X Uranium UCITS ETF and Zhejiang Akcome New Energy Technology Co Ltd from Global X Solar UCITS ETF. The three securities domiciled in Russia include RusHydro PJSC from Global X Renewable Energy Producers UCITS ETF, Magnitogorsk Iron & Steel Works PJSC and Severstal PAO from Global X SuperDividend® UCITS ETF which were all written down. See Note 7 for more details.

As at 30 June 2024, the fair values of all of the Sub-Funds' investment in equities were determined by reference to quoted market prices except for investments in two securities that were suspended on trading, three securities (including rights and warrant) that were not traded, and three securities domiciled in Russia. The two securities suspended on trading were Scilex Holding Company from Global X Genomics & Biotechnology UCITS ETF and Zhejiang Akcome New Energy Technology Co Ltd from Global X Solar UCITS ETF. The three securities (including rights and warrant) that were not traded were Vizsla Royalties Corp and Vizsla Royalties Corp warrant from Global X Silver Miners UCITS ETF and MMG LTD rights from Global X Disruptive Materials UCITS ETF and Global X Copper Miners UCITS ETF. The three securities domiciled in Russia include RusHydro PJSC from Global X Renewable Energy Producers UCITS ETF, Magnitogorsk Iron & Steel Works PJSC and Severstal PAO from Global X SuperDividend® UCITS ETF which were all written down. See Note 7 for more details.

## iii. Cash and cash equivalents and bank overdraft

Cash and cash equivalents include cash in hand, deposits held at call with banks and other short-term investments in an active market with original maturities of three months or less. Bank overdraft, if any, is repayable on demand and is included within current liabilities in the Statement of Financial Position.

## iv. Expenses

Expenses are recognised on an accrual basis. The only expenses charged to and accrued by the Sub-Funds is the TER.

## v. Income

Interest income is recognised on a time-proportionate basis using the effective interest method. Dividend income from equity securities designated at fair value through profit or loss is recognised in the "Dividend income" line in the Statement of Comprehensive Income. Dividend income is recognised in profit or loss on the date that the right to receive the payment is established. For quoted equity securities, this is usually the ex-dividend date. For unquoted equity securities, this is usually the date on which the shareholders approve the payment of a dividend. Dividend income is shown gross of any non-recoverable withholding taxes, which are presented separately in the Statement of Comprehensive Income.

For the period ended 31 December 2024

## 2. Basis of preparation and material accounting policies (continued)

## (d) Material accounting policies (continued)

#### v. Income (continued)

Securities lending income is income earned from securities lending arrangements which is accrued and paid on a monthly basis. To the extent the Sub-Funds undertake securities lending, the relevant supplement will disclose the proportion of the revenue generated which will remain with the Sub-Fund and the proportion of the revenue generated (representing the attendant direct and indirect operational costs and fees of any securities lending) which will be retained by the securities lending agent. Such direct and indirect operational costs and fees shall not include hidden revenue.

## vi. Redeemable participating shares

The Sub-Funds are open-ended, and issue redeemable participating shares, which are redeemable at a shareholder's option. These shares can be put back to the respective Sub-Fund for cash equal to a proportionate share of the Sub-Funds' trading Net Asset Value ("NAV") calculated in accordance with the Prospectus. These shares are classified as equity or liability, as appropriate, in accordance with IAS 32 Financial Instruments – Presentation ("IAS 32"). Typically, where a Sub-Fund has only one such share class in issue, those shares qualify for equity classification as the qualifying criteria in IAS 32.16A and 16B are met. On the other hand, where a Sub-Fund has more than one such share class in issue, those shares do not, for example, typically have identical rights to each other and therefore those qualifying criteria for equity classification are not met. Where the criteria are no longer met, the Sub-Fund reclassifies from the date when the shares cease to qualify for equity classification. The shares, when first classified as financial liabilities, are measured at their fair value. Subsequently, the redeemable shares are classified as financial liabilities at amortised cost and are measured at the present value of the redemption amounts.

A puttable financial instrument that includes a contractual obligation for the respective Sub-Funds to repurchase or redeem that instrument for cash or another financial asset is classified as equity if it meets all of the conditions below:

- it entitles the holder to a pro rata share of the Sub-Fund's net assets in the event of the Sub-Fund's liquidation;
- it is in the class of instruments that is subordinate to all other classes of instruments;
- all financial instruments in the class of instruments that is subordinate to all other classes of instruments have identical features;
- apart from the contractual obligation for the respective Sub-Fund to repurchase or redeem the instrument for cash or another financial asset, the instrument does not include any other features that would require classification as a liability; and
- the total expected cash flows attributable to the instrument over its life are based substantially on the profit or loss, the change in the recognised net assets or the change in the fair value of the recognised and unrecognised net assets of the respective Sub-Fund over the life of the instrument.

As at 31 December 2024, the following Sub-Funds have two classes of units in issue and are classified as financial liability.

		Net Assets Classified
Sub-Fund	Currency	as Liability
Global X Video Games & Esports UCITS ETF	USD	4,805,992
Global X Telemedicine & Digital Health UCITS ETF	USD	2,282,008
Global X U.S. Infrastructure Development UCITS ETF	USD	511,668,985

For the period ended 31 December 2024

## 2. Basis of preparation and material accounting policies (continued)

## (d) Material accounting policies (continued)

## vii. Distribution policy

The Directors are empowered by the Instrument of Incorporation to declare and pay dividends in respect of the shares in any Sub-Fund in the ICAV out of the net income of the relevant Sub-Fund less accrued expenses of the ICAV. The Directors are also empowered by the Instrument of Incorporation to declare and pay dividends in respect of the shares in any Sub-Fund in the ICAV out of the relevant Sub-Fund. Where a Sub-Fund intends to pay dividends out of capital, this will be set out in the relevant supplement for that Sub-Fund.

It is intended to declare dividends in respect of the share classes identified as "distributing" Classes of the Sub-Funds. Distributions in respect of these Classes will be declared on each distribution date, semi-annually, in each year, provided that such dates are not business days. Where dividends are paid, they shall be paid out of the net income of the ICAV which is attributable to the relevant Class and shall be paid by way of electronic transfer.

It is not the current intention of the Directors to declare dividends in respect of the share classes identified as "accumulating" Classes. The income and earnings and gains of the accumulating classes will be accumulated and reinvested in the Sub-Funds.

## viii. Subscriptions receivable

Subscriptions receivable, if any, is reported on the Statement of Financial Position and relates to unsettled subscriptions.

## ix. Redemptions payable

Redemption payable relates to the amount requested in the redemption notice becoming fixed. This generally may occur either at the time of the receipt of a valid and approved notice, or on the last day of a fiscal period, depending on the nature of the request. As a result, redemptions paid after the end of the period, but based upon period end capital balance are reflected as redemptions payable.

## x. Receivable for securities sold

Receivable for securities sold, if any, is reported on the Statement of Financial Position and relates to unsettled sales of the equity trades.

## xi. Payable for securities purchased

Payable for securities purchased, if any, is reported on the Statement of Financial Position and relates to unsettled purchases of equity trades.

## xii. Soft commissions

There were no soft commission arrangements during the period ended 31 December 2024 and 31 December 2023.

For the period ended 31 December 2024

## 2. Basis of preparation and material accounting policies (continued)

## (d) Material accounting policies (continued)

## xiii. Securities lending

The ICAV implemented securities lending on 8 April 2021. Securities on loan are not derecognised. As at 31 December 2024, the ICAV had the following exposure:

	Lending return BPS	Average loan % AUM	Max loan % AUM	Collateral level % of loan	Current % AUM

Further information on these securities lending arrangements is available in Appendix 2 "Securities Financing Transactions Regulations Disclosures (Unaudited)".

## xiv. Offsetting financial instruments

Financial assets and liabilities are offset, and the net amount reported on the Statement of Financial Position when, and only when, there is a legally enforceable right to set off the recognised amounts and there is an intention to settle on a net basis or realise the assets and settle the liability simultaneously.

## 3. Taxation

Under current law and practice, the ICAV qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act 1997, as amended. On that basis, it is not chargeable to Irish tax on its income or gains.

Notwithstanding the above, Irish tax may arise on the happening of a "chargeable event". A chargeable event includes:

- a) Any distribution payments made to shareholders by the ICAV in respect of their shares;
- b) Any encashment, redemption, cancellation, or transfer of shares; and
- c) The holding of shares at the end of each eight-year period beginning with the acquisition of such shares.

No Irish tax will arise on the ICAV in respect of chargeable events in respect of:

- a) A shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with Section 739D of the Taxes Consolidation Act, 1997, as amended, are held by the ICAV or the ICAV has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations under the ICAV with the necessary signed statutory declarations; and
- b) Certain exempted Irish tax resident shareholders who have provided the ICAV with the necessary signed statutory declarations.

For the period ended 31 December 2024

## 3. Taxation (continued)

Capital gains, dividends and interest received by the ICAV may be subject to taxes, including capital gains taxes and withholding taxes in the countries in which the issuers of investments are located, which may be reflected in the NAV of the ICAV. Dividend and interest income has been recognised gross in the Statement of Comprehensive Income, with withholding taxes recognised separately. Such taxes may not be recoverable by the ICAV or its shareholders.

The ICAV has evaluated the tax positions and has concluded that there are no significant tax positions requiring recognition, measurement, or disclosure in the financial statements. Tax penalties and interest, if any, would be accrued as incurred and would be classified as tax expense in the Statement of Comprehensive Income. During the period ended 31 December 2024 and 31 December 2023, the ICAV did not incur any interest or penalties.

## 4. Share capital

The share capital of the ICAV shall at all times equal the NAV of the ICAV. The Directors are empowered to issue up to 500 billion Shares of no-par value in the ICAV at the NAV per Share on such terms as they may think fit. There are no rights of pre-emption upon the issue of Shares in the ICAV. The Subscriber Shares do not participate in the assets of any Sub-Fund. The ICAV reserves the right to redeem some or all of the Subscriber Shares provided that the ICAV at all times has a minimum issued share capital to the value of  $\notin$  300,000.

Each of the Shares entitles the Shareholder to participate equally on a pro rata basis in the dividends and net assets of a Sub-Fund attributable to the relevant Class in respect of which they are issued, save in the case of dividends declared prior to becoming a Shareholder. The Subscriber Shares' entitlement is limited to the amount subscribed and accrued interest thereon.

The proceeds from the issue of Shares shall be applied in the books of the ICAV to the relevant Sub-Fund and shall be used in the acquisition on behalf of the relevant Sub-Fund of assets in which the Sub-Fund may invest. The records and accounts of each Sub-Fund shall be maintained separately.

The Directors reserve the right to redesignate any Class from time to time, provided that Shareholders in that Class shall first have been notified by the ICAV that the Shares will be redesignated and shall have been given the opportunity to have their Shares redeemed by the ICAV, except that this requirement shall not apply where the Directors redesignate Shares in issue in order to facilitate the creation of an additional Class.

Each of the Shares entitles the Shareholder to attend and vote at meetings of the ICAV and of the relevant Class of a Sub-Fund represented by those Shares. No Class confers on the holder thereof any preferential or pre-emptive rights or any rights to participate in the profits and dividends of any other Class or any voting rights in relation to matters relating solely to any other Class.

Any resolution to alter the Class rights of the Shares requires the approval of three quarters of the Shareholders of the Shares represented or present and voting at a general meeting duly convened in accordance with the Instrument of Incorporation.

The Instrument of Incorporation of the ICAV empowers the Directors to issue fractional shares in the ICAV. Fractional shares may be issued and shall not carry any voting rights at general meetings of the ICAV or of any Sub-Fund or Class and the NAV of any fractional Share shall be the NAV per Share adjusted in proportion to the fraction.

It is intended that all but two of the Subscriber Shares will be redeemed by the ICAV at their NAV on the dealing day on which the first issue of Shares is effected after the Initial Offer Period. The Subscriber Shares entitle the Shareholders holding them to attend and vote at all meetings of the ICAV but do not entitle the holders to participate in the dividends or net assets of any Sub-Fund or of the ICAV.

For the period ended 31 December 2024

## 4. Share capital (continued)

The ICAV offers the following launched Classes of Shares in each Sub-Fund. The ICAV may also create additional Classes of Shares in each Sub-Fund in the future with prior notification to, and clearance in advance by, the Central Bank. Details of unlaunched share classes are set out in the Supplement of each Sub-Fund.

Global X Video Games & Esports UCITS ETF

Class	Minimum Subscription Amount	Hedged
USD Accumulating	1 Creation Unit of 10,000 Shares or its cash equivalent	No

Global X Artificial Intelligence UCITS ETF

Class	Minimum Subscription Amount	Hedged
USD Accumulating	1 Creation Unit of 10,000 Shares or its cash equivalent	No

#### Subscriptions

Shares will be issued on each dealing day at the appropriate NAV per Share with an appropriate provision for duties and charges. Investors may subscribe for shares for cash on each dealing day by making an application by the dealing deadline. Consideration, in the form of cleared subscription monies/securities, must be received by the applicable settlement deadline.

## Redemptions

Shareholders may effect a redemption of shares on any dealing day at the appropriate NAV per Share, subject to an appropriate provision for duties and charges, provided that a valid redemption request from the shareholder is received by the ICAV by the dealing deadline on the relevant dealing day.

Shares will be redeemed at the applicable NAV per Share on the dealing day as of which the redemption is effected, subject to any applicable fees associated with such redemption.

No redemption will be made until the applicant has completed and delivered to the Transfer Agent a redemption request and satisfied all the requirements of the Directors and the Manager as to such applicant's redemption request.

The net assets and NAV per share of each class of shares in issue as at 31 December 2024, 30 June 2024, and 31 December 2023 are as follows:

## 5. Fees and expenses

## **TER Fees**

All of the following fees and expenses payable in respect of the share classes of the Sub-Funds are paid as one single fee, which will not exceed the amounts listed below. This is referred to as the total expense ratio or "TER". The TER is calculated and accrued daily from the NAV of each Sub-Fund and payable monthly in arrears by the ICAV at the rate set out below. The following fees and operational expenses of each Sub-Fund shall be paid out of the TER:

- All the ordinary operating and administrative expenses of the Sub-Fund, including, but not limited to, fees and expenses of the Manager, Depositary, Administrator, Transfer Agent, Distributor, the Directors, the costs of maintaining the Sub-Funds and any registration of the Sub-Funds with any governmental or regulatory authority; preparation, printing, and posting of prospectuses, sales literature and reports to Shareholders, regulatory fees of the Central Bank and other governmental agencies; marketing expenses; insurance premiums; fees and expenses for legal, audit and other services; paying for licensing fees related to each Sub-Fund's Index and any distribution fees or expenses.

Should the above fees and operational expenses of each Sub-Fund exceed the TER, the additional expenses shall be borne by the Manager. Where all costs and expenses of a Sub-Fund are met and exceeded by the TER, the ICAV will pay any excess from the TER to the Investment Manager as the investment management fee. Refer to Note 9 for more details.

## For the period ended 31 December 2024

## 5. Fees and expenses (continued)

## **TER Fees (continued)**

The table below lists the TER rates and TER fees incurred during the periods ended 31 December 2024 and 31 December 2023 and accrued TER fees of each Sub-Fund as at 31 December 2024 and 30 June 2024:

\* Global X European Infrastructure Development UCITS ETF was authorised by the Central Bank on 19 July 2024 and launched on 3 September 2024. Thus, no exchange rate as of 30 June 2024 is presented.

## For the period ended 31 December 2024

#### 7. Fair value measurement

As the Sub-Funds' investments are classified as financial assets at fair value through profit or loss, the carrying value of the Sub-Funds' investments are a reasonable approximation of fair value. The Sub-Funds accounting policy on fair value measurements is discussed in Note 2(d).

The Sub-Funds measure fair values, as defined by IFRS 13 'Fair Value Measurement' ("IFRS 13"), using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements:

- Level 1: Quoted market price (unadjusted) in an active market for an identical instrument.
- Level 2: Valuation techniques based on observable inputs, either directly (i.e. as prices) or indirectly (i.e. derived from prices). This category includes instruments valued using quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.
- Level 3: Valuation techniques using significant unobservable inputs. This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

Fair values of financial assets that are traded in active markets are based on quoted market prices or dealer price quotations. For all other financial instruments, each Sub-Fund determines fair values using valuation techniques as described above.

As at 31 December 2024, all financial assets and liabilities measured at fair value were carried at Level 1 except for investments in three securities domiciled in Russia, one security that was suspended on trading and two securities were not traded, which were carried at Level 3, and total return swaps which are carried at Level 2.

The three securities domiciled in Russia as at 31 December 2024 include RusHydro PJSC which represents 0.00% of the NAV of Global X Renewable Energy Producers UCITS ETF, Magnitogorsk Iron & Steel Works PJSC and Severstal PAO which represents 0.00% and 0.00%, respectively, of the NAV of Global X SuperDividend® UCITS ETF which were all written down.

The one security that suspended trading at 31 December 2024 was Scilex Holding Company which represents 0.00% of the NAV of Global X Genomics & Biotechnology UCITS ETF. The two securities that were not traded were F4 Uranium Corp which represents 0.00% of the NAV of Global X Uranium UCITS ETF and Zhejiang Akcome New Energy Technology Co Ltd which represents 0.00% of the NAV of Global X Solar UCITS ETF.

As at 30 June 2024, all financial assets and liabilities measured at fair value were carried at Level 1 except for investments in three securities domiciled in Russia, two securities that were suspended on trading, and three securities (including rights and warrant) that were not traded and were carried at Level 3.

The three securities domiciled in Russia as at 30 June 2024 include RusHydro PJSC which represents 0.00% of the NAV of Global X Renewable Energy Producers UCITS ETF, Magnitogorsk Iron & Steel Works PJSC and Severstal PAO which represents 0.00% and 0.00%, respectively, of the NAV of Global X SuperDividend® UCITS ETF which were all written down.

The two securities that suspended trading as at 30 June 2024 were Scilex Holding Company which represents 0.05% of the NAV of Global X Genomics & Biotechnology UCITS ETF and Zhejiang Akcome New Energy Technology Co Ltd which represents 0.25% of the NAV of Global X Solar UCITS ETF. The three securities that were not traded were Vizsla Royalties Corp. and Vizsla Royalties Corp. warrant which represents 0.00% and 0.00%, respectively, of the NAV of Global X Silver Miners UCITS ETF, and MMG LTD rights which represents 0.03% and 0.05% of the NAV of Global X Disruptive Materials UCITS ETF and Global X Copper Miners UCITS ETF, respectively.

For the period ended 31 December 2024

	Fair Value\$				Range Not applicable

<sup>(1)</sup> These pertain to securities related to companies domiciled in Russia and/or listed on exchanges located in Russia, including the Moscow Exchange ("Russian Securities") which were written down on 25 February 2022. The Investment Manager decided to write down the Russian Securities following the events arising in Ukraine and Russia.

<sup>(2)</sup> These pertain to securities held in F4 Uranium Corp that are not yet traded in an exchange. F4 Uranium Corp is valued at zero because it has yet to trade since the spin off event on 15 August 2024, and was consequently removed from the Index at a price of zero with the effective date of 11 November 2024.

<sup>(1)</sup> These pertain to securities related to companies domiciled in Russia and/or listed on exchanges located in Russia, including the Moscow Exchange ("Russian Securities") which were written down on 25 February 2022. The Investment Manager decided to write down the Russian Securities following the events arising in Ukraine and Russia.

<sup>(4)</sup> This pertains to securities held in Zhejiang Akcome New Energy Technology Co Ltd that were halted after violating Shenzhen Stock Exchange's policy: "Under Chinese securities regulations, a stock that trades below CNY 1 for 20 consecutive trading days faces delisting." The Investment Manager used the last traded price as the fair value.

<sup>(5)</sup> This pertains to securities (including warrant) held in Vizsla Royalties Corp. that were unlisted and not traded at year-end. The Investment Manager used the fair values at year-end in the valuation of these securities.

Transfers between levels are recognised at the end of the reporting period. There were no transfers between Level 1 and Level 3 for securities held during the period ended 31 December 2024 and year ended 30 June 2024.

Each Sub-Fund's financial instruments not measured at fair value through profit or loss consist of cash and cash equivalents, receivable for securities sold, subscriptions receivable, dividend, securities lending and interest receivable, and other assets, bank overdraft, TER fees payable, payable for securities purchased, capital gains tax payable, and other payables whereas cash is classified as Level 1 and the rest as Level 2. These financial instruments are realised or settled within a short period of time. The carrying value of these other financial instruments approximate their fair value.

For the period ended 31 December 2024

#### 8. Derivative contracts

Typically, derivative contracts serve as components of the Sub-Funds' investment strategy and are utilised primarily to structure and hedge investments to enhance performance and reduce risk to the Sub-Funds (the Sub-Funds do not designate any derivatives as hedges for hedge accounting purposes as described under IFRS 9).

#### Total return swaps

Swaps are bilateral contracts entered into for periods ranging from a few weeks to more than one year. In a standard "swap" transaction, two parties agree to exchange returns (or differentials in rates of return) calculated with respect to a "notional amount", e.g., the return on or increase in value of a particular dollar amount invested at a particular interest rate, in a particular foreign currency.

Some Sub-Funds intend to invest primarily in a basket of global equity securities and equity related securities (the "Basket") and entered into an unfunded swap agreement with approved counterparties governed by the International Swaps and Derivatives Association to exchange the performance/return of the Basket for the return of the Index minus any associated fees (the "total return swaps").

The intention of these Sub-Funds is to gain synthetic exposure to its corresponding reference index via total return swaps. As at 31 December 2024 and 30 June 2024, the following Sub-Funds reported a total return swap included in the Sub-Funds' financial assets and financial liabilities at fair value through profit or loss in the Statement of Financial Position.

Financial assets at fair value through profit or loss:		
Sub-Funds	31 December 2024	30 June 2024
	USD	USD
Global X Nasdaq 100 <sup>®</sup> Covered Call UCITS ETF	6,133,559	775,804
Global X S&P 500® Quarterly Buffer UCITS ETF	59,255	-
Global X S&P 500® Quarterly Tail Hedge UCITS ETF	106,753	-
Global X S&P 500® Covered Call UCITS ETF	76,781	-
Global X S&P 500® Annual Buffer UCITS ETF	29,748	-
Global X S&P 500® Annual Tail Hedge UCITS ETF	15,783	-

#### Financial liabilities at fair value through profit or loss: Sub-Funds

Sub-Funds	31 December 2024	30 June 2024
	USD	USD
Global X S&P 500® Quarterly Buffer UCITS ETF	-	112,854
Global X S&P 500® Quarterly Tail Hedge UCITS ETF	-	24,384
Global X S&P 500® Covered Call UCITS ETF	-	42,042
Global X S&P 500® Annual Buffer UCITS ETF	-	13,920
Global X S&P 500® Annual Tail Hedge UCITS ETF	-	3,376

During the period ended 31 December 2024 and year ended 30 June 2024, these Sub-Funds entered into a swap agreement with Citigroup Global Markets Limited.

For the period ended 31 December 2024

#### 9. Related parties and connected persons

The following parties are considered related parties:

- The Directors
- Global X Management Company (Europe) Limited Manager
- Global X Management Company LLC Investment Manager
- Mirae Asset Securities (USA) Inc. Broker
- Brown Brothers Harriman & Co. Securities Lending Agent

Robert Oliver, as an employee of the Sub-Investment Manager and director of the Manager, does not receive any remuneration from the ICAV. During the period under review, each of the independent non-executive Directors (namely, Mary Canning and Feargal Dempsey) were paid a fixed fee of €10,000, with respect to services provided to the ICAV. Neither of the independent non-executive Directors received variable remuneration.

Robert Oliver, a Director of the ICAV, held shares in the Sub-Funds of the ICAV during the financial period 1 July 2024 to 31 December 2024. None of the other Directors, their families, or the Secretary held any interest in the shares of the Sub-Funds during the financial period 1 July 2024 to 31 December 2024.

Directors' fees are disclosed in Note 5, Fees and expenses. Expenses charged during the periods ended 31 December 2024 and 31 December 2023 by the Directors are detailed in Note 5.

Global X Management Company (Europe) Limited is considered a related party to the ICAV as it is considered to have significant influence over the ICAV in its role as Manager. During the period ended 31 December 2024, the Manager received fees of USD 1,627,713 (31 December 2023: USD 1,582,453), of which USD 2,241,252 (30 June 2024: USD Nil) was payable at period end.

In line with the underlying Management Agreement, certain costs, and expenses of the ICAV shall be borne by the Manager. In the event the costs and expenses of a Sub-Fund or Class that are intended to be covered within the TER exceed the stated TER, the Manager will discharge any excess amounts out of its own assets.

Transaction costs charged during the periods ended 31 December 2024 and 31 December 2023 by Mirae Asset Securities (USA) Inc. are detailed in Note 10.

As of 31 December 2024 and 30 June 2024, each Sub-Fund has a single shareholder which is a nominee of the common depository for the International Central Securities Depositaries ("ICSDs") in which the shares of the Sub-Funds are cleared and settled. However, the beneficial ownership of such shares, and the voting rights in relation to such shares, are passed from the common depositary to the ICSDs and onwards to the participants of the ICSDs.

There were no other related party transactions for the financial period other than those disclosed above, and in Note 5, including any other emoluments or gains which have been paid or are payable, to any Director of the ICAV. All transactions with related parties were at arm's length.

#### **Connected Persons**

Regulation 43(1) of the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations") "Restrictions on transactions with connected persons" states that "A responsible person shall ensure that any transaction between a UCITS and a connected person is conducted a) at arm's length; and b) in the best interest of the unitholders of the UCITS".

As required under regulation 81.4 of the Central Bank UCITS Regulations, the Directors of the Manager (the Responsible Person) are satisfied that there are in place arrangements, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 43(1) are applied to all transactions with a connected persons (as defined in Regulation 42 of the Central Bank UCITS Regulations); and all transactions with a connected persons that were entered into during the financial period to which the report relates complied with the obligations that are prescribed by Regulation 43(1).

Shareholders should note that not all connected persons as defined by the Central Bank UCITS Regulations are deemed related parties as defined by IAS 24 'Related Party Disclosures'. Related parties include the Board of Directors, the Manager, and the Investment Manager.

For the period ended 31 December 2024

#### 10. Transaction costs

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued, or disposed of the financial instrument.

During the periods ended 31 December 2024 and 31 December 2023, the Sub-Funds incurred the following transaction costs:

Sub-Funds	Currency 3	31 December 2024 31 Dec	ember 2023

Global X Renewable Energy Producers UCITS ETF	USD	-	275
Global X Hydrogen UCITS ETF	USD	-	102
Global X Uranium UCITS ETF	USD	404	-

#### 11. Significant events during the reporting period

As a result of political and military actions undertaken by Russia in Ukraine, the governments of multiple jurisdictions, including the EU and the U.S., have instituted sanctions against certain Russian officials and institutions. These sanctions, and any additional sanctions or other intergovernmental actions that may be undertaken against Russia in the future, may result in the devaluation of the Russian currency, a downgrade in the country's credit rating, and a decline in the value and liquidity of Russian securities. Such actions have resulted and could in the future result in a freeze of Russian securities, and may impair the ability of a Sub-Fund to buy, sell, receive, or deliver those securities. Countermeasures by the Russian government could involve the seizure of U.S. and/or European residents' assets, and any such actions are likely to impair the value and liquidity of such assets. Any or all of these potential results could have an adverse/recessionary effect on Russia's economy. Significant uncertainty remains in the market regarding the ramifications of these developments, and the range and potential implications of possible political, regulatory, economic and market outcomes are difficult to predict. All of these factors could have a negative effect on performance, particularly if a Sub-Fund has significant direct or indirect exposure to Russia.

The Directors are monitoring developments related to this military action, including current and potential future interventions of foreign governments and economic sanctions against Russia, in order to assess their impact on any Russian securities held by the Sub-Funds, including their potential impact on the liquidity of Russian securities.

The conflict between Israel and Harakat al-Muqawama al-Islamiya (Islamic Resistance Movement) or HAMAS in Gaza escalated in October 2023. The conflict could lead to disruption, instability and volatility in global markets, economies and industries that could negatively impact the business of the Sub-Funds, results of operations and financial condition. The conflict may also escalate further and its resolution is unclear. The potential for further military escalation and other corresponding events, could have, severe negative effects on regional and global economic and financial markets, including increased volatility and overall uncertainty.

Global X European Infrastructure Development UCITS ETF was authorised by the Central Bank on 19 July 2024 and launched on 3 September 2024.

Global X Defence Tech UCITS ETF was authorised by the Central Bank on 19 July 2024 and launched on 10 September 2024.

Global X Artificial Intelligence UCITS ETF was authorised by the Central Bank on 19 July 2024 and launched on 10 September 2024.

On 12 August 2024, the Shenzhen Stock Exchange ("SZSE") announced that as of that day, that Zhejiang Akcome New Energy Technology Co Ltd was delisted from the exchange. Consequently, the position held in the Global X Solar UCITS ETF was reflected as having zero value.

On 13 August 2024, a revised supplement for Global X AgTech & Food Innovation UCITS ETF was noted by the Central Bank to reflect the recategorisation from an Article 6 fund to an Article 8 fund within the meaning of Regulation (EU) 2019/2088, as amended ("SFDR").

For the period ended 31 December 2024

#### 11. Significant events during the reporting period (continued)

On 25 September 2024, the U.S. Bankruptcy Court for the Southern District of Texas approved a motion to extend the lockup period on shares received from a stock dividend of Sorrento Therapeutics Inc. to Scilex Holding to 31 January 2025. As a result, shares of the dividend stock cannot be traded until the new expiration date. Consequently, on 30 September 2024, the position held in the Global X Genomics & Biotechnology UCITS ETF was written down by applying a 95% discount to the price.

Effective 1 October 2024, the registered address of the Administrator and Depositary changed from Styne House, Upper Hatch Street, Dublin 2 to 2<sup>nd</sup> floor, One Charlemont Square, Charlemont Street, Dublin 2.

On 14 October 2024, a revised supplement for Global X U.S. Infrastructure Development UCITS ETF was noted by the Central Bank to reflect the inclusion of a disclosure in the section entitled "Fees and Expenses" to note that the Manager may in its sole discretion, enter into rebate arrangements with certain shareholders in accordance with UCITS requirements.
