The ICAV has adopted a whistleblowing policy pursuant to the Protected Disclosures Act 2014, as amended which gives legal protection to workers, which includes directors and shareholders, who make disclosures, including protections against dismissal or being penalised by the ICAV. Further details are available in the policy, which is available at no charge upon request.

In respect of Swiss investors, the prospectus, the instrument of incorporation, the key investor information document (KID or KIID), the list of purchases and sales and the latest annual and semi-annual reports can be obtained free of charge from the representative in Switzerland. The representative in Switzerland is 1741 Fund Solutions AG, Burggraben 16, 9000 St. Gallen. The paying agent in Switzerland is Tellco AG, Bahnhofstrasse 4, 6430 Schwyz. In respect of the units offered in Switzerland, the place of performance is the registered office of the representative. The place of jurisdiction is at the registered office of the representative or at the registered office or place of residence of the investor.

<sup>(1)</sup> Non-Independent, Non-Executive

<sup>(2)</sup> Independent, Non-Executive

Directors' Report

For the year ended 30 June 2025

The Directors submit this report together with the Annual Report and the Audited Financial Statements of Global X ETFs ICAV (the "ICAV"), in each case for the financial year ended 30 June 2025.

#### The ICAV

The ICAV was registered in Ireland, registration number C435449, pursuant to the Irish Collective Asset-management Vehicles Act 2015 (the "ICAV Act") on 20 July 2020 and authorised by the Central Bank of Ireland (the "Central Bank") as an Undertaking for Collective Investment in Transferable Securities pursuant to the European Communities (Undertaking for Collective Investment in Transferable Securities) Regulations 2011 (S.I. No 352 of 2011), and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (S.I. 230 of 2019) (collectively the "UCITS Regulations").

The ICAV is organised in the form of an umbrella fund with segregated liability between sub-funds (each a "Sub-fund", together the "Sub-Funds"). Each Sub-Fund has a distinct portfolio of investments, and the investment objective and policy of each Sub-fund is formulated by Global X Management Company LLC (the "Investment Manager"). As at 30 June 2025, the following Sub-Funds were in operation:

<b>Sub-Funds</b>	Central Bank	Launch date
	<b>Authorisation Date</b>

#### The Sub-Funds

Investment Objective and Policies, and review of business developments

## Global X Video Games & Esports UCITS ETF

Global X Video Games & Esports UCITS ETF (the "Sub-Fund") listed on the London stock exchange on 18 December 2020, Deutsche Börse Xetra stock exchange on 4 February 2021, SIX Swiss stock exchange on 16 July 2021 and Borsa Italiana stock exchange on 9 August 2021.

The investment objective of the Sub-Fund is to provide investment results that closely correspond, before fees and expenses, generally to the price and yield performance of the Solactive Video Games & Esports v2 Index (the "Index"). In order to achieve this investment objective, the Sub-Fund will seek to replicate the performance of the Index, subject to the deduction of the total expense ratio ("TER") and other expenses associated with operating the Sub-Fund. It will do so by investing primarily in a portfolio of equity securities and derivatives that, as far as possible and practicable, consists of the component securities of the Index in similar proportions to their weightings in the Index and in American Depositary Receipts and Global Depositary Receipts based on the securities in the Index. By holding each equity security in approximately the same proportion as its weighting in the Index, the Sub-Fund may have exposure to or invest up to 20% of the net asset value of the Sub-Fund in stocks issued by the same body. This limit may be raised to 35% for a single issuer in exceptional market conditions which may include the dominance of a particular issuer in the relevant market. The Sub-Fund follows a strategy of replicating the Index. The performance of the Sub-Fund is reviewed in detail in the Investment Manager's Report.

### Global X Telemedicine & Digital Health UCITS ETF

Global X Telemedicine & Digital Health UCITS ETF (the "Sub-Fund") listed on the London stock exchange on 18 December 2020, Deutsche Börse Xetra stock exchange on 4 February 2021, SIX Swiss stock exchange on 16 July 2021 and Borsa Italiana stock exchange on 9 August 2021.

The investment objective of the Sub-Fund is to provide investment results that closely correspond, before fees and expenses, generally to the price and yield performance of the Solactive Telemedicine & Digital Health Index (the "Index"). In order to achieve this investment objective, the Sub-Fund will seek to replicate the performance of the Index, subject to the deduction of the TER and other expenses associated with operating the Sub-Fund. It will do so by investing primarily in a portfolio of equity securities that, as far as possible and practicable, consists of the component securities of the Index in similar proportions to their weightings in the Index and in American Depositary Receipts and Global Depositary Receipts based on the securities in the Index. By holding each equity security in approximately the same proportion as its weighting in the Index, the Sub-Fund may have exposure to or invest up to 20% of the net asset value of the Sub-Fund in stocks issued by the same body. This limit may be raised to 35% for a single issuer in exceptional market conditions which may include the dominance of a particular issuer in the relevant market. The Sub-Fund follows a strategy of replicating the Index. The performance of the Sub-Fund is reviewed in detail in the Investment Manager's Report.

## Global X Genomics & Biotechnology UCITS ETF

Global X Genomics & Biotechnology UCITS ETF (the "Sub-Fund") listed on the London stock exchange on 4 November 2021, Deutsche Börse Xetra stock exchange on 11 November 2021, Borsa Italiana stock exchange on 18 November 2021 and SIX Swiss stock exchange on 6 December 2021.

The investment objective of the Sub-Fund is to provide investment results that closely correspond, before fees and expenses, generally to the price and yield performance of the Solactive Genomics v2 Index (the "Index"). In order to achieve this investment objective, the Sub-Fund will seek to replicate the performance of the Index, subject to the deduction of the TER and other expenses associated with operating the Sub-Fund. It will do so by investing primarily in a portfolio of equity securities that, as far as possible and practicable, consists of the component securities of the Index in similar proportions to their weightings in the Index and in American Depositary Receipts and Global Depositary Receipts based on the securities in the Index. By holding each equity security in approximately the same proportion as its weighting in the Index, the Sub-Fund may have exposure to or invest up to 20% of the net asset value of the Sub-Fund in stocks issued by the same body. The Sub-Fund follows a strategy of replicating the Index. The performance of the Sub-Fund is reviewed in detail in the Investment Manager's Report.

## Global X U.S. Infrastructure Development UCITS ETF

Global X U.S. Infrastructure Development UCITS ETF (the "Sub-Fund") listed on the London stock exchange on 4 November 2021, Deutsche Börse Xetra stock exchange on 11 November 2021, Borsa Italiana stock exchange on 18 November 2021 and SIX Swiss stock exchange on 6 December 2021.

Directors' Report (continued)

For the year ended 30 June 2025

#### The Sub-Funds (continued)

Investment Objective and Policies, and review of business developments (continued)

## Global X U.S. Infrastructure Development UCITS ETF (continued)

The investment objective of the Sub-Fund is to provide investment results that closely correspond, before fees and expenses, generally to the price and yield performance of the Indxx U.S. Infrastructure Development v2 Index (the "Index"). In order to achieve this investment objective, the Sub-Fund will seek to replicate the performance of the Index, subject to the deduction of the TER and other expenses associated with operating the Sub-Fund. It will do so by investing primarily in a portfolio of equity securities that, as far as possible and practicable, consists of the component securities of the Index in similar proportions to their weightings in the Index and in American Depositary Receipts and Global Depositary Receipts based on the securities in the Index. By holding each equity security in approximately the same proportion as its weighting in the Index, the Sub-Fund may have exposure to or invest up to 20% of the net asset value of the Sub-Fund in stocks issued by the same body. The Sub-Fund follows a strategy of replicating the Index. The performance of the Sub-Fund is reviewed in detail in the Investment Manager's Report.

#### **Global X Cloud Computing UCITS ETF**

Global X Cloud Computing UCITS ETF (the "Sub-Fund") listed on the London stock exchange on 4 November 2021, Deutsche Börse Xetra stock exchange on 11 November 2021, Borsa Italiana stock exchange on 18 November 2021 and SIX Swiss stock exchange on 6 December 2021.

The investment objective of the Sub-Fund is to provide investment results that closely correspond, before fees and expenses, generally to the price and yield performance of the Indxx Global Cloud Computing v2 Index (the "Index"). In order to achieve this investment objective, the Sub-Fund will seek to replicate the performance of the Index, subject to the deduction of the TER and other expenses associated with operating the Sub-Fund. It will do so by investing primarily in a portfolio of equity securities that, as far as possible and practicable, consists of the component securities of the Index in similar proportions to their weightings in the Index and in American Depositary Receipts and Global Depositary Receipts based on the securities in the Index. By holding each equity security in approximately the same proportion as its weighting in the Index, the Sub-Fund may have exposure to or invest up to 20% of the net asset value of the Sub-Fund in stocks issued by the same body. The Sub-Fund follows a strategy of replicating the Index. The performance of the Sub-Fund is reviewed in detail in the Investment Manager's Report.

## **Global X E-commerce UCITS ETF**

Global X E-commerce UCITS ETF (the "Sub-Fund") listed on the London, Deutsche Börse Xetra, and Borsa Italiana stock exchanges on 18 November 2021 and SIX Swiss stock exchange on 6 December 2021.

The investment objective of the Sub-Fund is to provide investment results that closely correspond, before fees and expenses, generally to the price and yield performance of the Solactive E-commerce v2 Index (the "Index"). In order to achieve this investment objective, the Sub-Fund will seek to replicate the performance of the Index, subject to the deduction of the TER and other expenses associated with operating the Sub-Fund. It will do so by investing primarily in a portfolio of equity securities that, as far as possible and practicable, consists of the component securities of the Index in similar proportions to their weightings in the Index and in American Depositary Receipts and Global Depositary Receipts based on the securities in the Index. By holding each equity security in approximately the same proportion as its weighting in the Index, the Sub-Fund may have exposure to or invest up to 20% of the net asset value of the Sub-Fund in stocks issued by the same body. The Sub-Fund follows a strategy of replicating the Index. The performance of the Sub-Fund is reviewed in detail in the Investment Manager's Report.

#### Global X FinTech UCITS ETF

Global X FinTech UCITS ETF (the "Sub-Fund") listed on the London, Deutsche Börse Xetra, and Borsa Italiana stock exchanges on 18 November 2021 and SIX Swiss stock exchange on 6 December 2021.

The investment objective of the Sub-Fund is to provide investment results that closely correspond, before fees and expenses, generally to the price and yield performance of the Indxx Global FinTech Thematic v2 Index (the "Index"). In order to achieve this investment objective, the Sub-Fund will seek to replicate the performance of the Index, subject to the deduction of the TER and other expenses associated with operating the Sub-Fund. It will do so by investing primarily in a portfolio of equity securities that, as far as possible and practicable, consists of the component securities of the Index in similar proportions to their weightings in the Index and in American Depositary Receipts and Global Depositary Receipts based on the securities in the Index. By holding each equity security in approximately the same proportion as its weighting in the Index, the Sub-Fund may have exposure to or invest up to 20% of the net asset value of the Sub-Fund in stocks issued by the same body. The Sub-Fund follows a strategy of replicating the Index. The performance of the Sub-Fund is reviewed in detail in the Investment Manager's Report.

## **Global X Copper Miners UCITS ETF**

Global X Copper Miners UCITS ETF (the "Sub-Fund") listed on the London and Deutsche Börse Xetra stock exchanges on 24 November 2021 and listed on SIX Swiss and Borsa Italiana stock exchanges on 11 February 2022 and 17 February 2022, respectively.

The investment objective of the Sub-Fund is to provide investment results that closely correspond, before fees and expenses, generally to the price and yield performance of the Solactive Global Copper Miners Total Return v2 Index (the "Index"). In order to achieve this investment objective, the Sub-Fund will seek to replicate the performance of the Index, subject to the deduction of the TER and other expenses associated with operating the Sub-Fund. It will do so by investing primarily in a portfolio of equity securities that, as far as possible and practicable, consists of the component securities of the Index in similar proportions to their weightings in the Index and in American Depositary Receipts and Global Depositary Receipts based on the securities in the Index. By holding each equity security in approximately the same proportion as its weighting in the Index, the Sub-Fund may have exposure to or invest up to 20% of the net asset value of the Sub-Fund in stocks issued by the same body. The Sub-Fund follows a strategy of replicating the Index. The performance of the Sub-Fund is reviewed in detail in the Investment Manager's Report.

## **Global X Renewable Energy Producers UCITS ETF**

Global X Renewable Energy Producers UCITS ETF (the "Sub-Fund") listed on the London, Deutsche Börse Xetra, SIX Swiss, and Borsa Italiana stock exchanges on 9 December 2021.

The investment objective of the Sub-Fund is to provide investment results that closely correspond, before fees and expenses, generally to the price and yield performance of the Indxx Renewable Energy Producers v2 Index (the "Index"). In order to achieve this investment objective, the Sub-Fund will seek to replicate the performance of the Index, subject to the deduction of the TER and other expenses associated with operating the Sub-Fund. It will do so by investing primarily in a portfolio of equity securities that, as far as possible and practicable, consists of the component securities of the Index in similar proportions to their weightings in the Index and in American Depositary Receipts and Global Depositary Receipts based on the securities in the Index. By holding each equity security in approximately the same proportion as its weighting in the Index, the Sub-Fund may have exposure to or invest up to 20% of the net asset value of the Sub-Fund in stocks issued by the same body. The Sub-Fund follows a strategy of replicating the Index. The performance of the Sub-Fund is reviewed in detail in the Investment Manager's Report.

#### Global X Clean Water UCITS ETF

Global X Clean Water UCITS ETF (the "Sub-Fund") listed on the London and Deutsche Börse Xetra stock exchanges on 9 December 2021 and listed on SIX Swiss and Borsa Italiana stock exchanges on 11 February 2022 and 17 February 2022, respectively.

The investment objective of the Sub-Fund is to provide investment results that closely correspond, before fees and expenses, generally to the price and yield performance of the Solactive Global Clean Water Industry v2 Index (the "Index"). In order to achieve this investment objective, the Sub-Fund will seek to replicate the performance of the Index, subject to the deduction of the TER and other expenses associated with operating the Sub-Fund. It will do so by investing primarily in a portfolio of equity securities that, as far as possible and practicable, consists of the component securities of the Index in similar proportions to their weightings in the Index and in American Depositary Receipts and Global Depositary Receipts based on the securities in the Index. By holding each equity security in approximately the same proportion as its weighting in the Index, the Sub-Fund may have exposure to or invest up to 20% of the net asset value of the Sub-Fund in stocks issued by the same body. The Sub-Fund follows a strategy of replicating the Index. The performance of the Sub-Fund is reviewed in detail in the Investment Manager's Report.

#### Global X Lithium & Battery Tech UCITS ETF

Global X Lithium & Battery Tech UCITS ETF (the "Sub-Fund") listed on the London and Deutsche Börse Xetra stock exchanges on 9 December 2021 and listed on SIX Swiss and Borsa Italiana stock exchanges on 11 February 2022 and 17 February 2022, respectively.

The investment objective of the Sub-Fund is to provide investment results that closely correspond, before fees and expenses, generally to the price and yield performance of the Solactive Global Lithium v2 Index (the "Index"). In order to achieve this investment objective, the Sub-Fund will seek to replicate the performance of the Index, subject to the deduction of the TER and other expenses associated with operating the Sub-Fund. It will do so by investing primarily in a portfolio of equity securities that, as far as possible and practicable, consists of the component securities of the Index in similar proportions to their weightings in the Index and in American Depositary Receipts and Global Depositary Receipts based on the securities in the Index. By holding each equity security in approximately the same proportion as its weighting in the Index, the Sub-Fund may have exposure to or invest up to 20% of the net asset value of the Sub-Fund in stocks issued by the same body. This limit may be raised to 35% for a single issuer in exceptional market conditions which may include the dominance of a particular issuer in the relevant market. The Sub-Fund follows a strategy of replicating the Index. The performance of the Sub-Fund is reviewed in detail in the Investment Manager's Report.

## Global X Data Center REITS & Digital Infrastructure UCITS ETF

Global X Data Center REITS & Digital Infrastructure UCITS ETF (the "Sub-Fund") listed on the London and Deutsche Börse Xetra stock exchanges on 9 December 2021 and listed on SIX Swiss and Borsa Italiana stock exchanges on 11 February 2022 and 17 February 2022, respectively.

The investment objective of the Sub-Fund is to provide investment results that closely correspond, before fees and expenses, generally to the price and yield performance of the Solactive Data Center REITs & Digital Infrastructure v2 Index (the "Index"). In order to achieve this investment objective, the Sub-Fund will seek to replicate the performance of the Index, subject to the deduction of the TER and other expenses associated with operating the Sub-Fund. It will do so by investing primarily in a portfolio of equity securities that, as far as possible and practicable, consists of the component securities of the Index in similar proportions to their weightings in the Index and in American Depositary Receipts and Global Depositary Receipts based on the securities in the Index. By holding each equity security in approximately the same proportion as its weighting in the Index, the Sub-Fund may have exposure to or invest up to 20% of the net asset value of the Sub-Fund in stocks issued by the same body. This limit may be raised to 35% for a single issuer in exceptional market conditions which may include the dominance of a particular issuer in the relevant market. The Sub-Fund follows a strategy of replicating the Index. The performance of the Sub-Fund is reviewed in detail in the Investment Manager's Report.

### Global X Nasdaq 100® Covered Call UCITS ETF

Global X Nasdaq 100® Covered Call UCITS ETF (the "Sub-Fund") listed on the London and Deutsche Börse Xetra stock exchanges on 23 November 2022 and listed on Borsa Italiana and SIX Swiss stock exchanges on 24 November 2022 and 12 April 2023, respectively.

The investment objective of the Sub-Fund is to provide investment results that closely correspond, before fees and expenses, generally to the price and yield performance of the CBOE NASDAQ-100® BuyWrite V2 UCITS Index (the "Index"). In order to achieve this investment objective, the Sub-Fund will seek to replicate the performance of the Index, subject to the deduction of the TER and other expenses associated with operating the Sub-Fund. The Index each month measures the performance of a portfolio of the equity securities included in the NASDAQ-100® Index (the "Reference Index") while it also "writes" (or sells) a succession of one-month at-the-money covered call options on the securities in the Reference Index, which are held until the expiration dates (i.e., generally the third Friday of the month) (the "Roll Date") and are liquidated at a time-weighted average price of the new call option during the two-hour period beginning at 11:30 Eastern Standard Time ("EST") on the Roll Date. The Sub-Fund follows a strategy of replicating the Index. The performance of the Sub-Fund is reviewed in detail in the Investment Manager's Report.

## Global X S&P 500® Quarterly Buffer UCITS ETF

Global X S&P 500® Quarterly Buffer UCITS ETF (the "Sub-Fund") listed on the London and Deutsche Börse Xetra stock exchanges on 23 February 2023 and listed on Borsa Italiana and SIX Swiss stock exchanges on 20 March 2023 and 12 April 2023, respectively.

The investment objective of the Sub-Fund is to provide investment results that closely correspond, before fees and expenses, generally to the price and yield performance of the CBOE S&P 500® 15% WHT Quarterly 5% Buffer Protect Index (the "Index"). The Index seeks to provide similar returns to the S&P 500® Index (the "Reference Index"), with lower volatility and downside risks, in most market environments except for when the U.S. equity market is rallying. In order to achieve this investment objective, the Sub-Fund will seek to replicate the performance of the Index, subject to the deduction of the TER and other expenses associated with operating the Sub-Fund. The Sub-Fund follows a strategy of replicating the Index. The performance of the Sub-Fund is reviewed in detail in the Investment Manager's Report.

## Global X S&P 500® Quarterly Tail Hedge UCITS ETF

Global X S&P 500® Quarterly Tail Hedge UCITS ETF (the "Sub-Fund") listed on the London and Deutsche Börse Xetra stock exchanges on 23 February 2023 and listed on Borsa Italiana and SIX Swiss stock exchanges on 20 March 2023 and 12 April 2023, respectively.

The investment objective of the Sub-Fund is to provide investment results that closely correspond, before fees and expenses, generally to the price and yield performance of the CBOE S&P 500® 15% WHT Quarterly 9% (-3% to -12%) Buffer Protect Index (the "Index"). The Index seeks to provide similar returns to the S&P 500® Index (the "Reference Index"), with lower volatility and downside risks, in most market environments except for when the U.S. equity market is rallying. In order to achieve this investment objective, the Sub-Fund will seek to replicate the performance of the Index, subject to the deduction of the TER and other expenses associated with operating the Sub-Fund. The Sub-Fund follows a strategy of replicating the Index. The performance of the Sub-Fund is reviewed in detail in the Investment Manager's Report.

#### Global X S&P 500® Covered Call UCITS ETF

Global X S&P 500® Covered Call UCITS ETF (the "Sub-Fund") listed on the London and Deutsche Börse Xetra stock exchanges on 13 July 2023 and listed on Borsa Italiana and SIX Swiss stock exchanges on 20 July 2023 and 3 August 2023, respectively.

The investment objective of the Sub-Fund is to provide investment results that closely correspond, before fees and expenses, generally to the price and yield performance of the CBOE S&P 500® BuyWrite 15% WHT (the "Index"). In order to achieve this investment objective, the Sub-Fund will seek to replicate the performance of the Index, subject to the deduction of the TER and other expenses associated with operating the Sub-Fund. The Index is comprised of two parts: (1) all the equity securities in the S&P 500® Index ("the Reference Index"); and (2) short (written) call options on up to 100% of the Reference Index. The Sub-Fund follows a strategy of replicating the Index. The performance of the Sub-Fund is reviewed in detail in the Investment Manager's Report.

### Global X S&P 500® Annual Buffer UCITS ETF

Global X S&P 500® Annual Buffer UCITS ETF (the "Sub-Fund") listed on the London and Deutsche Börse Xetra stock exchanges on 9 November 2023 and listed on Borsa Italiana and SIX Swiss stock exchanges on 21 November 2023 and 28 November 2023, respectively.

The investment objective of the Sub-Fund is to provide investment results that closely correspond, before fees and expenses, generally to the price and yield performance of the CBOE S&P 500® Annual 15% Buffer Protect Index (the "Index"). The Index seeks to provide similar returns to the S&P 500® Index (the "Reference Index"), with lower volatility and downside risks, in most market environments except for when the U.S. equity market is rallying. In order to achieve this investment objective, the Sub-Fund will seek to replicate the performance of the Index, subject to the deduction of the TER and other expenses associated with operating the Sub-Fund. The Sub-Fund follows a strategy of replicating the Index. The performance of the Sub-Fund is reviewed in detail in the Investment Manager's Report.

#### Global X S&P 500® Annual Tail Hedge UCITS ETF

Global X S&P 500® Annual Tail Hedge UCITS ETF (the "Sub-Fund") listed on the London and Deutsche Börse Xetra stock exchanges on 9 November 2023 and listed on Borsa Italiana and SIX Swiss stock exchanges on 21 November 2023 and 28 November 2023, respectively.

The investment objective of the Sub-Fund is to provide investment results that closely correspond, before fees and expenses, generally to the price and yield performance of the CBOE S&P 500® Annual 30% (-5% to -35%) Buffer Protect Index (the "Index"). The Index seeks to provide similar returns to the S&P 500® Index (the "Reference Index"), with lower volatility and downside risks, in most market environments except for when the U.S. equity market is rallying. In order to achieve this investment objective, the Sub-Fund will seek to replicate the performance of the Index, subject to the deduction of the TER and other expenses associated with operating the Sub-Fund. The Sub-Fund follows a strategy of replicating the Index. The performance of the Sub-Fund is reviewed in detail in the Investment Manager's Report.

#### Global X 1-3 Month T-Bill UCITS ETF

Global X 1-3 Month T-Bill UCITS ETF (the "Sub-Fund") listed on the London and Deutsche Börse Xetra stock exchanges on 8 December 2023 and listed on Borsa Italiana and SIX Swiss stock exchanges on 9 January 2024.

The investment objective of the Sub-Fund is to provide investment results that closely correspond, before fees and expenses, generally to the price and yield performance of the Solactive 1-3 month US T-Bill Index (the "Index"). In order to achieve this investment objective, the Sub-Fund will track the Index and invest in a portfolio that principally comprises Treasury bills ("T-Bills") issued by the U.S. government. The Sub-Fund invests at least 80% of its total assets in the securities of the Index. The Index is designed to measure the performance of public obligations of the U.S. Treasury that have a remaining maturity of greater than or equal to 1 month and less than 3 months. The Sub-Fund follows a strategy of replicating the Index. The performance of the Sub-Fund is reviewed in detail in the Investment Manager's Report.

Investment Objective and Policies, and review of business developments (continued)

#### Global X European Infrastructure Development UCITS ETF

Global X European Infrastructure Development UCITS ETF (the "Sub-Fund") listed on the London, Deutsche Börse Xetra and SIX Swiss stock exchanges on 5 September 2024 and listed on Borsa Italiana stock exchange on 12 September 2024.

The investment objective of the Sub-Fund is to provide investment results that closely correspond, before fees and expenses, generally to the price and yield performance of the Mirae Asset European Infrastructure Development Index (the "Index"). In order to achieve this investment objective, the Sub-Fund will seek to replicate the composition of the Index, subject to the deduction of the TER and other expenses associated with operating the Sub-Fund. It will do so by investing primarily in a portfolio of equity securities that, as far as possible and practicable, consists of the component securities of the Index in similar proportions to their weightings in the Index and in Global Depositary Receipts based on the securities in the Index. By holding each equity security in approximately the same proportion as its weighting in the Index, the Sub-Fund may have exposure to or invest up to 20% of the net asset value of the Sub-Fund in stocks issued by the same body. This limit may be raised to 35% for a single issuer in exceptional market conditions which may include the dominance of a particular issuer in the relevant market. The performance of the Sub-Fund is reviewed in detail in the Investment Manager's Report.

#### Global X Defence Tech UCITS ETF

Global X Defence Tech UCITS ETF (the "Sub-Fund") listed on the London, Deutsche Börse Xetra, SIX Swiss and Borsa Italiana stock exchanges on 12 September 2024.

The investment objective of the Sub-Fund is to provide investment results that closely correspond, before fees and expenses, generally to the price and yield performance of the Mirae Asset Defence Tech Index (the "Index"). In order to achieve this investment objective, the Sub-Fund will seek to replicate the composition of the Index, subject to the deduction of the TER and other expenses associated with operating the Sub-Fund. It will do so by investing primarily in a portfolio of equity securities that, as far as possible and practicable, consists of the component securities of the Index in similar proportions to their weightings in the Index and in American Depositary Receipts and Global Depositary Receipts based on the securities in the Index. By holding each equity security in approximately the same proportion as its weighting in the Index, the Sub-Fund may have exposure to or invest up to 20% of the net asset value of the Sub-Fund in stocks issued by the same body. This limit may be raised to 35% for a single issuer in exceptional market conditions which may include the dominance of a particular issuer in the relevant market. The performance of the Sub-Fund is reviewed in detail in the Investment Manager's Report.

## Global X Artificial Intelligence UCITS ETF

Global X Artificial Intelligence UCITS ETF (the "Sub-Fund") listed on the London, Deutsche Börse Xetra, SIX Swiss and Borsa Italiana stock exchanges on 12 September 2024 and listed on Bolsa Mexicana De Valores stock exchange on 20 June 2025.

The investment objective of the Sub-Fund is to provide investment results that closely correspond, before fees and expenses, generally to the price and yield performance of the Indxx Artificial Intelligence Index (the "Index"). In order to achieve this investment objective, the Sub-Fund will seek to replicate the composition of the Index, subject to the deduction of the TER and other expenses associated with operating the Sub-Fund. It will do so by investing primarily in a portfolio of equity securities that, as far as possible and practicable, consists of the component securities of the Index in similar proportions to their weightings in the Index and in American Depositary Receipts and Global Depositary Receipts based on the securities in the Index. By holding each equity security in approximately the same proportion as its weighting in the Index, the Sub-Fund may have exposure to or invest up to 20% of the net asset value of the Sub-Fund in stocks issued by the same body. This limit may be raised to 35% for a single issuer in exceptional market conditions which may include the dominance of a particular issuer in the relevant market. The performance of the Sub-Fund is reviewed in detail in the Investment Manager's Report.

#### Global X Euro Stoxx 50 Covered Call UCITS ETF

Global X Euro Stoxx 50 Covered Call UCITS ETF (the "Sub-Fund") listed on the London and Deutsche Börse Xetra stock exchanges on 8 May 2025 and listed on Borsa Italiana and SIX Swiss stock exchanges on 15 May 2025 and 24 June 2025, respectively.

The investment objective of the Sub-Fund is to provide investment results that closely correspond, before fees and expenses, generally to the price and yield performance of the EURO STOXX 50 Covered Call ATM Index (the "Index"). In order to achieve this investment objective, the Sub-Fund will seek to replicate the performance of the Index, subject to the deduction of the TER and other expenses associated with operating the Sub-Fund. The Index each month measures the performance of a portfolio of the equity securities included in the EURO STOXX 50 Index (the "Reference Index") while it also "writes" (or sells) a succession of one-month at-the-money covered call options on the securities in the Reference Index, which are held until the expiration dates (i.e., generally the third Friday of the month) (the "Roll Date"). The performance of the Sub-Fund is reviewed in detail in the Investment Manager's Report.

Directors' Report (continued)

For the year ended 30 June 2025

#### The Sub-Funds (continued)

Investment Objective and Policies, and review of business developments (continued)

#### Global X Europe Focused Defence Tech UCITS ETF

Global X Europe Focused Defence Tech UCITS ETF (the "Sub-Fund") listed on the London and Deutsche Börse Xetra stock exchanges on 22 May 2025 and listed on Borsa Italiana and SIX Swiss stock exchanges on 5 June 2025 and 24 June 2025, respectively.

The investment objective of the Sub-Fund is to provide investment results that closely correspond, before fees and expenses, generally to the price and yield performance of the Mirae Asset Europe Defence Tech Index (the "Index"). In order to achieve this investment objective, the Sub-Fund will seek to replicate the composition of the Index, subject to the deduction of the TER and other expenses associated with operating the Sub-Fund. It will do so by investing primarily in a portfolio of equity securities that, as far as possible and practicable, consists of the component securities of the Index in similar proportions to their weightings in the Index and in American Depositary Receipts and Global Depositary Receipts based on the securities in the Index. By holding each equity security in approximately the same proportion as its weighting in the Index, the Sub-Fund may have exposure to or invest up to 20% of the net asset value of the Sub-Fund in stocks issued by the same body. This limit may be raised to 35% for a single issuer in exceptional market conditions which may include the dominance of a particular issuer in the relevant market. The performance of the Sub-Fund is reviewed in detail in the Investment Manager's Report.

## Global X NDX Quarterly Tail Hedge UCITS ETF

The investment objective of the Global X NDX Quarterly Tail Hedge UCITS ETF (the "Sub-Fund") is to provide investment results that closely correspond, before fees and expenses, generally to the price and yield performance of the Citi NDX Quarterly (-3% to -12%) Tail Hedge Index (the "Index"). The Index seeks to provide similar returns to the NDX 100 Index (the "Reference Index"), with lower volatility and downside risks, in most market environments except for when the U.S. equity market is rallying. In order to achieve this investment objective, the Sub-Fund will seek to replicate the performance of the Index, subject to the deduction of the TER and other expenses associated with operating the Sub-Fund.

The Sub-Fund had not launched prior to 30 June 2025.

## Risk management objectives and policies

The Directors have identified certain risks arising from the ICAV's holdings. The principal risks and uncertainties which the ICAV faces relate to the use of financial instruments and are listed in Note 7 "Financial risk management". The macro-economic risks related to events arising in Russia and Ukraine, and the conflict between Israel and Harakat al-Muqawama al-Islamiya (Islamic Resistance Movement) or HAMAS in Gaza are also mentioned on Note 12 "Significant events during the reporting year". The Directors are also aware of these economic and operational risks posed to the ICAV due to ongoing global changes. The Directors continuously monitor these situations and their impact on the ICAV.

## Results

The results of operations of the ICAV for the financial year are set out in the Statement of Comprehensive Income. A review of the performance of the Sub-Funds for the financial year is included in the Investment Manager's report.

## Significant events during the reporting year

Significant events during the year under review are disclosed in Note 12 "Significant events during the reporting year".

## Events after the reporting year

Subsequent events are disclosed in Note 13 "Events after the reporting year".

#### Directors

The Directors as at 30 June 2025 and throughout the financial year are listed in Directors and Other Information on page 3.

## Directors' and Secretary's Interests

None of the Directors, their families or the Secretary held any interest in the shares of the Sub-Funds during the financial years ended 30 June 2025 and 30 June 2024.

### Transactions involving Directors and ICAV Secretary

Contracts or arrangements of any significance in relation to the business of the ICAV in which the Directors or the ICAV Secretary had any interest as defined in the ICAV Act, at any time during the years ended 30 June 2025 and 30 June 2024, are disclosed in Note 10 "Related parties and connected persons" in the notes to the financial statements.

Directors' Report (continued)

For the year ended 30 June 2025

#### Secretary

Bradwell Limited held the office of Secretary throughout the financial years ended 30 June 2025 and 30 June 2024.

#### Directors' Remuneration

The ICAV shall be responsible for discharging any fees and expenses of the Directors of the ICAV out of the TER fee. Robert Oliver as an employee of the Sub-Investment Manager and director of Global X Management Company (Europe) Limited, does not receive any remuneration from the ICAV. During the year under review, each of the independent non-executive Directors (namely, Mary Canning and Feargal Dempsey) were paid a fixed fee of €20,000, with respect to services provided to the ICAV. Neither of the independent non-executive Directors received variable remuneration.

## Segregated Liability

The ICAV is an umbrella fund with segregated liability between the Sub-Funds and as such, as a matter of Irish law, the assets of a Sub-Fund will not be exposed to the liabilities of the ICAV's other Sub-Funds.

Segregated liability ensures that the liabilities incurred on behalf of a Sub-Fund will be discharged solely out of the assets of that Sub-Fund and there can generally be no recourse to the other Sub-Funds to satisfy those liabilities.

Each Sub-Fund will be responsible for paying its fees and expenses regardless of the level of profitability. Notwithstanding the foregoing there can be no guarantee or assurance that, should an action be brought against the ICAV in a court of another jurisdiction, that the segregated nature of the Sub-Funds would necessarily be upheld.

### **Connected Persons**

Regulation 43(1) of the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations") "Restrictions on transactions with connected persons" states that "A responsible person shall ensure that any transaction between a UCITS and a connected person is conducted a) at arm's length; and b) in the best interest of the unitholders of the UCITS".

As required under regulation 81.4 of the Central Bank UCITS Regulations, the Directors of the Manager (the Responsible Person) are satisfied that there are in place arrangements, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 43(1) are applied to all transactions with a connected persons (as defined in Regulation 42 of the Central Bank UCITS Regulations); and all transactions with a connected persons that were entered into during the financial period to which the report relates complied with the obligations that are prescribed by Regulation 43(1).

Shareholders should note that not all connected persons as defined by the Central Bank UCITS Regulations are deemed related parties as defined by IAS 24 'Related Party Disclosures'. Related parties include the Board of Directors, the Manager, and the Investment Manager.

Transactions with related parties during the years ended 30 June 2025 and 30 June 2024 are disclosed in Note 10 "Related parties and connected persons" in the notes to the financial statements.

#### Dividends

It is intended to declare dividends in respect of the share classes identified as "distributing" classes of the Sub-Funds. Distributions in respect of these classes will be declared on each distribution date, semi-annually, in each year provided that such dates are not business days. The distribution may comprise net income (if any) of the relevant Sub-Fund.

It is not the current intention of the Directors to declare dividends in respect of the share classes identified as "accumulating" classes. The income and earnings and gains of the accumulating classes will be accumulated and reinvested in the Sub-Funds.

During the years ended 30 June 2025 and 30 June 2024, the Directors declared dividends on the distributing classes of the Sub-Funds. The dividends declared are recognised in the "Distribution to shareholders" line of the Statement of Comprehensive Income and Statement of Changes in Equity.

## Soft Commissions

There were no soft commission arrangements during the years ended 30 June 2025 and 30 June 2024.

# Securities Lending

The ICAV implemented securities lending on 8 April 2021. As at 30 June 2025, the ICAV had the following exposure:

	Lending return BPS	Average loan % AUM	Max loan % AUM	Collateral level % of loan	Current % AUM
Global X Video Games & Esports UCITS ETF	3.400	2.570	7.490	0.000	0.000

Directors' Report (continued)

For the year ended 30 June 2025

#### **Employees**

The ICAV had no employees throughout the years ended 30 June 2025 and 30 June 2024.

#### Future Developments

The ICAV will seek to add (pending Central Bank approval) additional product offerings during the next financial year. In addition, it will look to continue to market and grow the assets under management within its existing product offering. The ICAV will continue to market in all jurisdictions passported for distribution.

### Accounting Records

The Directors have ensured that adequate accounting record requirements under Sections 109 to 113 of the ICAV Act have been complied with by outsourcing this function to a specialist provider of such services. The accounting records are held by SEI Investments – Global Fund Services Limited in their office which is located at 2<sup>nd</sup> Floor, One Charlemont Square, Dublin 2, D02 X9Y6, Ireland.

## Directors' Responsibilities Statement

The Directors are responsible for preparing the Directors' Report and financial statements in accordance with applicable law and regulations.

The ICAV Act requires the Directors to prepare financial statements for each financial year. Under that law they have elected to prepare the financial statements in accordance with International Financial Reporting Standards ("IFRS") as adopted by the European Union.

The financial statements are required to give a true and fair view of the assets, liabilities and financial position of the Sub-Funds at the end of the financial year and of the increase/(decrease) in net assets attributable to holders of redeemable participating shares in the Sub-Funds for the financial year. In preparing these financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether applicable Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements;
- assess the Sub-Funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and
- use the going concern basis of accounting unless they either intend to liquidate the Sub-Funds or to cease operations, or have no realistic alternative but to do so.

The Directors are responsible for keeping adequate accounting records which disclose with reasonable accuracy at any time the assets, liabilities, financial position and increase or decrease in net assets attributable to holders of redeemable participating shares in the Sub-Funds and enable them to ensure that the financial statements comply with the ICAV Act and the UCITS Regulations. They have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the Sub-Funds. In this regard, they have entrusted the assets of the Sub-Funds to a depositary for safekeeping. They are responsible for such internal controls as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error, and to prevent and detect fraud and other irregularities. The Directors are also responsible for preparing a Directors' Report that complies with the requirements of the ICAV Act.

The financial statements are published on the Manager's website: <a href="https://globalxetfs.eu">https://globalxetfs.eu</a>. The Directors, together with the Investment Manager and Manager, are responsible for the maintenance and integrity of the corporate and financial information included on the Manager's website in so far as it relates to the ICAV. Legislation in the Republic of Ireland governing the presentation and dissemination of the financial statements may differ from legislation in other jurisdictions.

Directors' Report (continued)

For the year ended 30 June 2025

## Corporate Governance

The ICAV is subject to compliance with the requirements of the ICAV Act, the Undertaking for Collective Investment in Transferable Securities pursuant to the European Communities (Undertaking for Collective Investment in Transferable Securities) Regulations 2011, and the Central Bank UCITS Regulations. During the year under review, the ICAV was subject to corporate governance imposed by:

- i. The ICAV Act which can be obtained at https://www.irishstatutebook.ie/;
- ii. The Instrument of Incorporation of the ICAV which is available for inspection at the registered office of the ICAV at 10 Earlsfort Terrace, Dublin 2, D02 T380, Ireland; and
- iii. The Central Bank UCITS Regulations which can be obtained from the Central Bank's website at: <a href="http://www.centralbank.ie/regulation/industry-sectors/funds/ucits/Pages/default.aspx">http://www.centralbank.ie/regulation/industry-sectors/funds/ucits/Pages/default.aspx</a> and is available for inspection at the registered office of the ICAV.
- iv. The London Stock Exchange through the London Stock Exchange Rule book which can be obtained from the London Stock Exchange's website at <a href="http://www.londonstockexchange.com/">http://www.londonstockexchange.com/</a>. The Deutsche Börse Exchange through the Deutsche Börse Exchange Rule book which can be obtained from the Deutsche Börse website at <a href="https://www.xetra.com/xetra-en/">https://www.xetra.com/xetra-en/</a>.
- v. The Irish Funds, formally Irish Funds Industry Association, Corporate Governance Code for Collective Investment Schemes and Management Companies (December 2011) which can be found at <a href="http://www.irishfunds.ie/regulatory-technical/corporate-governance">http://www.irishfunds.ie/regulatory-technical/corporate-governance</a>.

## Compliance with the Irish Corporate Governance Code

The Directors have adopted the voluntary Irish Funds (formerly Irish Funds Industry Association) ("IFIA") Corporate Governance Code for Irish domiciled Collective Investment Schemes and Management Companies, issued 14 December 2011 (the "Code"). The Directors have reviewed and assessed the measure included in the Code and consider its corporate governance practices and procedures since the adoption of the Code as consistent therewith.

The Code provides a framework for the organisation and operation of funds to ensure that funds operate efficiently and in the interests of shareholders.

The Board of Directors considers that the ICAV has complied with the main provisions contained in the Code throughout this accounting period and that it complies with the various other corporate governance requirements prescribed by the legislation noted above.

## Relevant Audit Information

The Directors believe that they have taken all steps necessary to make themselves aware of any relevant audit information and have established that the ICAV's statutory auditors are aware of that information. In so far as they are aware, there is no relevant audit information of which the ICAV's statutory auditors are unaware.

### **Independent Auditors**

The auditor, PricewaterhouseCoopers, Chartered Accountants and Statutory Audit Firm were appointed as statutory auditor on 14 May 2021 in accordance with Section 125 of the ICAV Act, have expressed their willingness to continue act as auditors of the ICAV.

On behalf of the Board of Directors:

Date: 28 October 2025

Director

Investment Manager's Report

For the year ended 30 June 2025

## **Investment objective**

The investment objective of the Sub-Funds is to provide investment results that closely correspond, before fees and expenses, generally to the price and yield performance of the relevant index as referenced in the relevant supplement.

## Sub-Fund performance, tracking difference and tracking error

In "tracking" the performance of an Index, the Investment Manager does not necessarily seek to replicate the composition of the Index (i.e. the full list of constituents in the same or substantially the same proportions as they are weighted within the Index). Instead, the Investment Manager is simply aiming to track the performance of the Index. The Investment Manager may use one or more techniques (including a combination thereof) to track the performance of an Index including (i) optimisation/sampling techniques whereby direct investments are made in physical assets and (ii) the use of FDIs such as OTC Swaps whereby a financial counterparty is engaged contractually to provide the return of the relevant Index. Optimising techniques enable a Sub-Fund to invest in (or gain exposure to) either a representative sample of Index constituents and/or assets unrelated to the Index constituents in each case where the relevant investments (when taken together) resemble the risk and return characteristics of constituents of the Index or of the Index as a whole.

These techniques will also enable the Investment Manager to reflect anticipated changes in an Index in the Sub-Fund's portfolio (resulting in for example, Index constituents and corporate actions being reflected in the Sub-Fund's portfolio, Index constituents being sold or purchased in anticipation of those constituents being included or removed from the relevant Index, or weightings of Index constituents (vis-à-vis the actual Index composition) being varied).

In "replicating" the performance of an Index, the Investment Manager will seek to invest in (or gain exposure to) all Index constituents in the same or substantially the same proportions as they are weighted within the Index.

"Tracking error" can be defined as the volatility of the difference between the return of an Index Fund which tracks/replicates an Index versus the return of the relevant Index which it tracks or replicates, whereas "tracking difference" can be defined as the total return difference between such an Index Fund and the relevant Index which it tracks or replicates over a certain period of time

Unless otherwise stated, an Index Fund is not expected to track the performance of its Index at all times with perfect accuracy and there can be no assurance that any Index Fund will achieve any particular level of accuracy in tracking or replicating an Index. Each Index Fund that seeks to track or replicate an Index is, however, expected to provide investment results that, before fees and expenses are applied, generally correspond to the price and yield performance of its Index.

Cash management, efficient portfolio management techniques including securities lending, transaction costs from rebalancing and currency hedging can have an impact on tracking difference. Importantly, these impacts can be either positive or negative depending on the underlying circumstances.

# Sub-Fund performance, tracking difference and tracking error (continued)

## Performance:

Sub-Fund	Fund Return - 1Y (%)	Index Return - 1Y (%)	1 Year Tracking Difference (%)	1 Year Tracking Error (%)	Anticipated Tracking Error in Normal Market Conditions (per Sub- Fund supplement) (%)

#### **Sub-Fund Review:**

### **Global X Uranium UCITS ETF**

Between June 2024 and June 2025, uranium and related assets rallied strongly, underpinned by a wave of policy support and strategic energy shifts<sup>1</sup>. Arguably the most notable catalyst came in May 2025, when the White House issued an executive order directing U.S. agencies to accelerate Small Modular Reactor (SMR) deployment and build out uranium fuel supply chains to support both energy security and advanced manufacturing goals.<sup>2</sup> Spot uranium prices rebounded from ~\$64/lb in Q1 to a mid-June peak of ~\$78/lb before moderating slightly to ~\$71/lb heading into Q3.3

In June 2025, the World Bank officially lifted its decades-long ban on financing nuclear energy, announcing collaboration with the IAEA to fund both existing plant upgrades and new nuclear technologies in developing nations. 4 Meanwhile, private capital flows showed positive momentum, with Meta signing a long-term power agreement for zero-carbon nuclear electricity with Constellation<sup>5</sup>, while Amazon and Google invested in SMR developers and enriched fuel suppliers.<sup>6</sup>

Decade-long underinvestment in uranium mining, combined with bottlenecks in conversion and enrichment capacity, have increased market sensitivity to demand shocks. Cameco, Centrus, and NexGen saw institutional buying as investors responded to rising nuclear demand from AI-driven data centres and increasingly favourable U.S. and global policy environments.8

### **Global X Copper Miners UCITS ETF**

Copper prices rebounded strongly between June 2024 and June 2025, largely driven by a constructive demand outlook for grid infrastructure, electric vehicles, and AI data centres, alongside persistent supply-side challenges. A major catalyst came in early 2025, when the U.S. announced a slew of interim tariffs on countries, sectors and metals, raising the expectation of permanently-high copper tariffs (which subsequently were announced at 50% in Q3 2025, well above consensus expectations). <sup>10</sup> This sparked panic buying in domestic futures and drove a 13.3% single-day gain in U.S. copper contracts. 11

Major producers like BHP posted record output, 12 while Antofagasta reported lower net cash costs due to stronger by-product credits and operational efficiencies.<sup>13</sup> Despite solid growth in production, structural challenges remain, with ore grades continuing to decline, and although projects like Kamoa-Kakula expanded capacity, global mine supply is struggling to keep up with electrification and AI-fuelled infrastructure. 14

The IEA projected global copper demand could exceed 33 million tonnes by 2035 — driven primarily by the energy transition and digital infrastructure. 15 Long-term contracting by utilities and industrial buyers accelerated as a hedge against future shortages. 16

## **Sub-Fund Review (continued):**

#### Global X Silver Miners UCITS ETF

Silver recorded one of its best annual performances from June 2024 to June 2025, supported by persistent supply deficits and strong dual-channel demand across industrial use and haven demand.<sup>17</sup> In this period, industrial demand surged, particularly in photovoltaic applications, as global solar installations outpaced forecasts.<sup>18</sup> PV-related silver offtake continued to trend higher as new high-efficiency N-type solar cells increased silver intensity despite thrifting efforts.<sup>19</sup>

Geopolitical instability, weakening real yields, and declining U.S. dollar strength supported precious metals broadly. Silver's diversified sensitivities, such as a weak but negative correlation with U.S. interest rates and strong correlation with equities - made it attractive to investors seeking a hybrid hedge against both macro and industrial risks.<sup>20</sup> Inventories at LBMA and COMEX declined to multi-year lows through Q2 2025, further supporting market tightness.<sup>21</sup>

The sector also saw a pick-up in consolidation and M&A activity in H1 2025, with Pan American Silver acquiring MAG Silver for \$2.1bn,<sup>22</sup> consolidating control over the Juanicipio mine, one of the world's highest-grade silver assets.<sup>23</sup> Meanwhile, Wheaton Precious Metals posted strong operational performance, reporting 59% YoY revenue growth and 10% YoY silver production increases in Q1 2025.<sup>24</sup>

## Global X Lithium & Battery Tech UCITS ETF

Lithium markets remained weak throughout the June 2024 to June 2025 period, with prices for lithium carbonate in China remaining at levels that weighed on the margins for high-cost producers.<sup>25</sup> New supply from projects in Mali (Goulamina), Argentina (Mariana), and Australia exacerbated the glut, and inventory build-ups at Chinese ports persisted through Q2 2025.<sup>26</sup>

As margins compressed, some miners initiated aggressive curtailments, with some higher-cost operations being idled, and new project timelines pushed back, particularly in Africa and Australia.<sup>27</sup> Analysts began to forecast a narrowing surplus by mid-2025, though demand from electric vehicles ("EV") and grid-scale storage remained more measured than in previous upcycles.<sup>28</sup> Battery manufacturers and automakers, wary of price volatility, preferred to draw down inventories rather than enter long-term offtake contracts.<sup>29</sup>

Strategic investment continued despite the bearish tone, signalled in May by Rio Tinto who announced a \$750 million partnership with Codelco to expand lithium capacity at Chile's Salar de Maricunga.<sup>30</sup> By 30 June, investor sentiment remained cautious, but expectations for a medium-term tightening of the lithium market were beginning to emerge.<sup>31</sup>

Investment Manager's Report (continued)

For the year ended 30 June 2025

## **Sub-Fund Review (continued):**

## **Global X Disruptive Materials UCITS ETF**

Performance among disruptive materials was varied over the 12-month period, with platinum seeing a strong breakout, rising from under \$1,000/oz in June 2024 to over \$1,400/oz by late June 2025. <sup>32</sup> The rally was fuelled by tightening supply conditions, strong Chinese jewelry and industrial demand, and low above-ground inventories <sup>33</sup>. Poor supply from South African producers and a lack of new mine investment further contributed to the market squeeze. <sup>34</sup>

Battery metals were under pressure overall, with lithium and nickel both experiencing extended price weakness, while cobalt rebounded modestly due to rising battery demand, DR Congo export bans and expansion of recycling initiatives.<sup>35</sup> Production cuts in lithium and nickel began to curb oversupply, setting the stage for more balanced markets in late 2025.<sup>36</sup>

Rare earths, particularly magnet metals like neodymium-praseodymium and dysprosium, saw strategic stockpiling by Western economies aiming to diversify away from China.<sup>37</sup> While prices remained volatile, structural tightness in the complex supply chain persisted as few new projects reached final investment decision and bottlenecks emerged.<sup>38</sup> Analysts warned of long-term deficits if supply-chain reshoring efforts continue to lag demand growth in EVs, wind turbines, and advanced electronics.<sup>39</sup>

## Global X U.S. Infrastructure Development UCITS ETF

It was a tale of two halves for U.S. Infrastructure. In 1H 2025, the Infrastructure Investment and Jobs Act (IIJA), Inflation Reduction Act (IRA), and the CHIPS and Science Act remained strong legislative tailwinds that continued to boost government funding and private investments for U.S. infrastructure development in 1H 2025. The Trump presidency brought uncertainty around the shifting U.S. trade policies, as well as concerns around spending cuts when the "DOGE" initiative was initially launched, and the potential impacts this would have on U.S. industrial demand. There was also uncertainty around the resulting economic outlook, which weighed on construction activity in H2, including for single-family residential buildings and manufacturing facilities. Even with the rebound in May, construction starts were down 4.5% YTD. The trump are the continued to boost government funding and the continued to boost government funding and private investments for U.S. infrastructure development in 1H 2025. The Trump presidency brought uncertainty around the shifting U.S. trade policies, as well as concerns around spending cuts when the "DOGE" initiative was initially launched, and the potential impacts this would have on U.S. industrial demand. There was also uncertainty around the resulting economic outlook, which weighed on construction activity in H2, including for single-family residential buildings and manufacturing facilities. Even with the rebound in May, construction starts were down 4.5% YTD.

However, there have been positive signs in non-residential building projects, with the pipeline expanding in H2, with 113 projects valued at over \$100 million entering the planning stages in Q4 2025. 42,43,44 Data centres continued to see robust planning activity within the United States. In June, the three largest commercial projects to enter the planning phase were data centres, including a \$500 million data centre in Middletown, VA, a \$300 million data centre in Tucson, AZ, and a \$300 million data centre in Laredo, TX. 45

The potential imposition of tariffs has been part of Trump's playbook to seek private (i.e. company) investment into the U.S., both for manufacturing as well as research & development. Companies including IBM (\$120 billion), <sup>46</sup> Roche (\$50 billion), <sup>47</sup> Novartis (\$23 billion), <sup>48</sup> John Deere (\$20 billion), <sup>49</sup> GlobalFoundries (\$16 billion), <sup>50</sup> and Gilead (\$11 billion), <sup>51</sup> announced planned investments in U.S. manufacturing in H2. In total, we have tracked the announcement of over \$1 trillion in newly planned U.S. manufacturing investments since the start of the Trump Administration.

## **Sub-Fund Review (continued):**

## Global X U.S. Infrastructure Development UCITS ETF (continued)

On July 4, 2025, President Trump signed into law the 'One Big Beautiful Bill Act' (OBBBA), after its passage in the Senate and House. The bill includes several provisions that could be potentially positive for U.S. businesses, real estate, and manufacturing, and therefore by extension, companies throughout the U.S. infrastructure development value chain. These include tax reforms related to manufacturing, homebuilding, and other business activities, such as the extension of certain provisions from the Tax Cuts and Jobs Act of 2017 and new incentives related to manufacturing, billions in spending on infrastructure for defence, shipbuilding, airports and border control, and an expansion in workforce training program support. The OBBBA rolls back federal support for clean energy development, state-level policy support, ongoing technology advancements, and the cost-competitiveness/overall benefits of renewables could help encourage growth in the U.S. solar and wind industries moving forward.

## Global X Artificial Intelligence UCITS ETF

The AI infrastructure cycle has entered hypergrowth mode, with data centres and chips at the core. Given its dominance in the AI chip segment, Nvidia remains a strong barometer of overall AI chip demand. Nvidia sold \$39.1 billion in chips to AI data centres last quarter (quarter ended April 27, 2025), up 12% quarter-on-quarter (QoQ), and 69% year-on-year (YoY), demonstrating the sustained pace of acceleration. Nvidia's management continues to emphasise that chip demand remains exceptionally strong, constrained only by the pace at which power capacity, supporting hardware, and new data centres can come online. Despite headwinds from the China export ban, Nvidia beat consensus estimates and raised guidance for the next quarter, underscoring the breadth and strength of end-market demand it sees across geographies.

There were concerns at the start of CY2025 around the implications of DeepSeek, and the potential impact that an effective model trained on less compute would have on broader AI chip demand. The "Big 4" hyperscalers (Amazon, Meta, Alphabet, Microsoft) maintained their full year capital expenditure (capex) guidance shortly after the DeepSeek R2 launch and recent Nvidia results have shown that these fears were overblown. Meta has subsequently increased its capex guidance range from \$60-64 billion to \$64-72 billion.<sup>59</sup>

Other AI chip and component suppliers see similar tailwinds to Nvidia. Broadcom, which supplies custom AI chips to companies like Google, saw \$15 billion in revenue over the second quarter in 2025, representing 46% YoY growth.<sup>60</sup> Micron Technologies, a key supplier of high-bandwidth memory, saw revenues rise 38% YoY.<sup>61</sup> The expanding size of data centres and continued demand for AI apps from end users, potentially signal that the runway remains long.

As infrastructure becomes more available, an increase in use cases could follow, which could drive earnings growth of AI leaders. Companies like Meta, Alphabet, and Microsoft remain the primary beneficiaries of monetisation expansion. However, cloud computing providers, application software firms, and broader internet platforms could be next in line.

Lastly, AI development is becoming a global story. While the U.S. remains the early leader in AI, the rest of the world is entering the acceleration phase. Europe, China, and India are ramping up investments in AI models and infrastructure, with 2025 marking the start of a major global buildout. That said, much of the global AI ecosystem still runs on the foundational infrastructure of U.S. tech leaders like Nvidia, Microsoft, and Amazon's AWS, which reinforces U.S. leadership.

Investment Manager's Report (continued)

For the year ended 30 June 2025

## **Sub-Fund Review (continued):**

## Global X Data Center REITs & Digital Infrastructure UCITS ETF

Growing demand for accelerated computing, created by AI, autonomy, high-performance computing, is creating a unique opportunity for the data centre sector, driving a significant investment wave.

Major hyperscalers continue to flag large capex plans. Significant hiring activity across the hyperscalers also demonstrated their commitment towards AI. Meta acquired a 49% stake in Scale AI, with CEO Alexandr Wang joining Meta's Superintelligence Team. It also hired key AI researchers from competitors such as Google DeepMind and OpenAI.<sup>62</sup>

As demand for AI increases, global data centre capacity is falling short.<sup>63</sup> This is visible in multi-year high rental rates charged for shared hosting and historically low vacancy rates across major markets in the US and globally.<sup>64</sup> This has been helping large data centre operators report strong earnings as they up-charge for capacity, directly boosting the bottom-line, while freeing up capital for construction of new facilities. Equinix announced its Q1 2025 result at the end of April, reporting a 6% YoY increase in revenues to \$2.2 billion. In its 1Q25 result, Digital Realty Trust recorded record pricing of \$244/kw and signed its largest single lease signing. Growing shortage for data centre capacity is also driving construction into new projects, with nearly 6.35 GW of capacity under construction as at the end of 2024, which could benefit data centre component suppliers.<sup>65</sup>

### **Global X Defence Tech UCITS ETF**

Global defence spending grew 9.4% in real terms in 2024 to \$2.72 trillion, the steepest rise since at least the end of the Cold War.<sup>66</sup> This also marked the tenth year of consecutive rises, with military spending in Europe (+17%) being a key driver of growth.

A key development towards the end of FY2025 was that NATO allies agreed to boost their annual defence spending target to 5% of GDP by 2035, up from the 2% target set in 2014.i This new target exceeds the percentage that any NATO ally currently spends. For context, the U.S. allocated 3.4% of its GDP to defence in 2024.<sup>67</sup> Assuming U.S. GDP grows by 2% annually for the next decade, the 5% allocation could put U.S. defence spending over \$1.7 trillion annually in a decade, up from ~\$950 billion today. NATO's new 5% target includes at least 3.5% for core military capabilities such as troops, weapons, and defence technologies, with the remaining 1.5% directed toward critical security infrastructure like cybersecurity. This marks a significant financial escalation, making it a key inflection point in the global military expenditure trajectory.

Another key catalyst to the defence theme is that European remilitarisation is still in its early stages. In early 2025, major European nations announced large-scale defence spending programs, totalling hundreds of billions of dollars, to enhance military capabilities through 2030. EU member states, which spent over €326 billion on defence in 2024, are expected to increase expenditures by another €100 billion in real terms by 2027. European defence companies held in ARMR are already seeing some of the benefit. U.K. aerospace and defence firm BAE Systems reported record FY24 sales revenue of £28.33 billion, up 14% YoY, driven by heightened EU defence spending since the Russia-Ukraine war. Similarly, Rheinmetall AG has experienced significant growth over the last few years, benefitting from increased European defence spending. The company recently signed its largest-ever framework contract (€3.1 billion) with the German Armed Forces for the digitisation of infantry soldier systems.

Investment Manager's Report (continued)

For the year ended 30 June 2025

## **Sub-Fund Review (continued):**

## Global X Europe Focused Defence Tech UCITS ETF

European defence expenditure increased 17% in 2024 to \$693 billion, the key contributor to global defence spending, which grew 9.4% in real terms. With the Russia-Ukraine conflict ongoing, as well as President Trump signalling a change in U.S. commitment to NATO at the start of the year, European countries have placed greater focus on resilience and self-sufficiency.

NATO allies agreed to boost their annual defence spending target to 5% of GDP by 2035, up from the 2% target set in 2014.<sup>72</sup> This new target exceeds the percentage that any NATO ally currently spends. For context, the U.S. allocated 3.4% of its GDP to defence in 2024. NATO's new 5% target includes at least 3.5% for core military capabilities such as troops, weapons, and defence technologies, with the remaining 1.5% directed toward critical security infrastructure like cybersecurity.

Following a period of underinvestment on defence as a percentage of GDP,<sup>73</sup> Europe has refocused on rearmament, which is still in its early stages. In early 2025, the European Commission's "European Defence Readiness 2030" White Paper noted that defence investment could reach at least €800 billion over the next 4 years, via the activation of the National Escape Clause by all Member States, as well as the "SAFE" investment vehicle.<sup>74</sup> EU member states, which spent over €326 billion on defence in 2024, are expected to increase expenditures by another €100 billion in real terms by 2027.<sup>75</sup> European defence companies are already seeing some of the benefit. U.K. aerospace and defence firm BAE Systems reported record FY24 sales revenue of £28.33 billion, up 14% YoY, driven by heightened EU defence spending since the Russia-Ukraine war.<sup>76</sup> Similarly, Rheinmetall AG has experienced significant growth over the last few years, benefitting from increased European defence spending. The company recently signed its largest-ever framework contract (€3.1 billion) with the German Armed Forces for the digitisation of infantry soldier systems.<sup>77</sup> The beneficiaries extend beyond just European companies; Trump has announced the U.S. will send U.S. weapons to NATO allies to be used in Ukraine,<sup>78</sup> and there have been partnerships announced between U.S. and European companies.<sup>79</sup>

#### Global X European Infrastructure Development UCITS ETF

European Infrastructure development has been bolstered by the disbursement of funds across major fiscal stimulus packages, including the EU's Recovery and Resilience Fund and the Connecting Europe Facility. These major packages target key areas including transport, digital infrastructure and clean energy, with funding provided to major projects around the EU.

The importance of infrastructure development has been recognised not only at the EU-level but also at the individual country level. Around the end of Q3 2025, Germany announced a  $\in$ 500 billion infrastructure fund. It has begun to outline the allocation of its infrastructure fund, with Vice-chancellor and finance minister Lars Klingbeil wanting to inject up to  $\in$ 10.5 billion into the country's train links this year, (from the  $\in$ 22 billion of infrastructure investments earmarked for 2025).<sup>80</sup> Other planned investments this year include  $\in$ 3 billion to improve broadband coverage in the country and  $\in$ 1 billion to modernise bridges. While Germany may be an outlier in Europe in terms of its relatively low debt-to-GDP ratio, which provides it with greater capacity to borrow than its neighbours, the German parliament's agreement to create a  $\in$ 500 billion infrastructure fund demonstrates the need for greater infrastructure investment across Europe, and infrastructure's role in boosting economies.

Regulation remains front of mind for companies, as Europe seeks to remain competitive with the U.S. across various domains. Competition remains a common topic of debate, with more companies typically competing in a sector in Europe, compared to the United States.

<sup>&</sup>lt;sup>71</sup> SIPRI. (2025, April 28). Unprecedented rise in global military expenditure as European and Middle East spending surges.

Investment Manager's Report (continued)

For the year ended 30 June 2025

## **Sub-Fund Review (continued):**

## Global X European Infrastructure Development UCITS ETF (continued)

With defence very much a focus on, military mobility was one of the 7 priority capability areas highlighted in the European Commission's "European Defence Readiness 2030" White Paper.<sup>81</sup> The Paper highlighted four priority multi-modal corridors (rail, road, sea and air), as well as 500 "hot-spot" projects that have been identified as needing urgent upgrades. This highlights the importance of infrastructure for military applications, with an increasing focus on "dual-use" purpose (i.e. for both civilian and military use) being discussed for current and future projects. While CEF funding for military mobility has already been exhausted, the European Commission is welcoming submissions for a Military Mobility Package,<sup>82</sup> and this could unlock further funding.

### Global X Robotics & Artificial Intelligence UCITS ETF

There was a significant milestone in robot adoption in retail, with Amazon announcing at the end of June 2025, that it had 1 million robots across more than 300 facilities worldwide.<sup>83</sup> This shows the widespread adoption of robots from the world's largest retailer. Amazon has also developed a new generative AI foundation model called DeepFleet, which is projected to improve robot travel efficiency by 10%.<sup>84</sup> This demonstrates the real-world applications and efficiencies being enabled via generative AI.

Beyond retail, other industries are also increasing their adoption of robotics. At its Q2 2025 result, automation company ABB reported its highest ever order intake, with total orders rising 14%, driven by U.S. orders rising 37%. Across key sectors, there was strong growth in Transport & infrastructure, as well as Data centres & Utilities. Across key sectors, there was strong growth in Transport & infrastructure, as well as Data centres & Utilities.

Nvidia continued to expand in Europe, with a £1 billion investment from the UK government to scale up its AI infrastructure. The use of Nvidia-accelerated applications from Ansys, Cadence and Siemens by European manufacturers including BMW Group, Maserati, Mercedes-Benz and Schaeffler, 87 demonstrates the growing intersection between AI and robotics, and how developments in the former are enhancing the latter.

## Global X Blockchain UCITS ETF

Global oversight of virtual assets improved in 2025 but there remains significant room for improvement. The Financial Action Task Force (FATF) highlighted gaps in crypto regulation, noting that only 40 of 138 jurisdictions were 'largely compliant' with its standards and another 68 jurisdictions listed as 'partially compliant'. 88 It warned that up to \$51 billion in illicit cryptocurrency passed through stablecoins in 2024 and attributed a record \$1.5 billion crypto theft from ByBit to North Korea. 89 As a result, international pressure is growing to enforce stronger anti-money-laundering and counter-financing regulations for blockchain-based assets, particularly those with cross-border utility.

Blockchain regulation is taking shape, with significant developments in FY2025. In mid-2025, the US Congress passed the GENIUS Act, the first comprehensive federal law governing dollar-pegged stablecoins. It mandates that issuers hold liquid reserves such as Treasury bills, comply with anti-money-laundering rules, and undergo monthly audits. The law narrowly exempts stablecoins from being treated as securities or bank liabilities and offers fintech companies and foreign issuers a clear path to certification. The law narrowly report highlighting that 9 out of 10 Fortune 500 executives agree that clear regulation on crypto, blockchain, or web3/onchain is needed to support innovation, this should address some of these issues.

Investment Manager's Report (continued)

For the year ended 30 June 2025

## **Sub-Fund Review (continued):**

## Global X Blockchain UCITS ETF (continued)

Growing activity has signalled growing adoption of blockchain technologies from institutions. Coinbase's State of Crypto report highlighted that 60% of Fortune 500 companies are now actively working on blockchain and distributed ledger technology (DLT) initiatives.<sup>93</sup> There continued to be blockchain development in the financial sector, with UBS piloting a blockchain-based payment system, UBS Digital Cash, to enhance cross-border transaction efficiency. This system operates on a private blockchain network, enabling automatic payment execution under specific conditions.<sup>94</sup>

## Global X Cybersecurity UCITS ETF

Cybersecurity remains a top spending priority for enterprises globally, especially as newer technologies like gen AI and public cloud expand the attack landscape and create new product and platform consolidation opportunities for leading players. These trends were evidenced clearly in earnings results across the theme throughout the year, particularly those aligned with AI-related network security refreshes, which has helped stabilise performance.

Palo Alto Networks (PANW) reported strong results in Q3 2025, with the company delivering 15% YoY revenue growth to \$2.3 billion, driven by Next-Generation Security ARR growth of 34% YoY to \$5.1 billion. With PANW reporting a strong Alrelated ARR, other cybersecurity companies could see meaningful revenue contributions in 2025, fuelled by an increasing presence of AI-security copilots. In addition, vendor consolidation could continue in 2025 as the Cybersecurity market remains fragmented. While consolidation will be net positive for the theme in the long run, it may create some headwinds in the short term around pricing pressures.

Most Cybersecurity segments could receive a boost in 2025, especially as cyber remains one of the primary beneficiaries from the AI platform shift. Additionally, favourable economic conditions and increased defence spending could offer another boost. Sovereign security and technological investments are expected to see growth throughout this decade, especially as global nations increase their military budgets with a great portion allocated towards cybersecurity. A key example of this is that 1.5% of NATO Allies' 5% spending target is to be allocated to defence-related items such as critical infrastructure, cybersecurity and resilience measures, 95 which could unlock greater funding in cybersecurity going forward.

Major cyber incidents at retailer M&S and airline Qantas towards the end of FY2025 continue to demonstrate the importance of companies having strong safeguards in place to prevent attacks, as well as robust procedures in the event of major incidents.

## Global X Video Games & Esports UCITS ETF

The Video Games & Esports theme has performed strongly in FY2025, with several factors driving this resilience. A wave of major game launches is boosting demand, while a new console upgrade cycle is emerging as titles begin to outpace current hardware. AI is also enhancing both gameplay and development, improving player engagement, accelerating production, and lifting margins. Additionally, easing regulatory pressures in key markets like China are adding further momentum for publishers and hardware makers.

Social gaming is a subsegment of the market displaying impressive growth and driving performance. Roblox, which generates more than \$4 billion in annualized revenues, has grown revenues at an impressive 29% year-over-year (YoY) rate. User engagement remains robust too, with average daily active users climbing 26% YoY to 97.8 million and hours spent on the platform growing 30% YoY. These metrics could highlight strong success of social gaming and user-generated content, a subsegment in the gaming space that is becoming increasingly popular with younger games, and a trend that may accelerate with new on-device AI capabilities.

Investment Manager's Report (continued)

For the year ended 30 June 2025

## **Sub-Fund Review (continued):**

## Global X Video Games & Esports UCITS ETF (continued)

Helped by new releases potentially triggering hardware upgrades, the console market is projected to grow 20.9% through 2027, which could bode well for software and platform success. 97 A hardware refresh cycle is on tap for 2025 and 2026, with Sony and Nintendo making early moves. Nintendo's Switch 2 sold more than 3.5 million units in the first four days following its recent June 2025 launch. A substantial install base attracts developers and encourages increased software sales, which are typically more profitable than hardware, and overall platform growth. For instance, Nintendo sold over 100 million Wii units and roughly 922 million software units. 98

## Global X Genomics & Biotechnology UCITS ETF

The U.S. Food and Drug Administration (FDA) has now approved 45 genomic medicines, excluding RNA/DNA therapies.<sup>99</sup> A few standout developments are noted below:

Vertex Pharmaceuticals received FDA approval for its next-generation cystic fibrosis treatment, Alyftrek.

UniQure achieved a significant regulatory milestone when the FDA permitted pursuit of accelerated approval for AMT-130, their Huntington's Disease gene therapy. 100 This decision eliminates the requirement for a large, placebo-controlled trial, potentially enabling FDA approval as early as 2026.<sup>101</sup> The ruling could potentially demonstrate the FDA's commitment to streamlining the approval process for genetic medicines targeting severe rare diseases with limited treatment options.

Bio-Techne and ALZpath announced a partnership on neurodegenerative disease research. 102 The collaboration will see the use of Bio-Techne's fully automated multiplexing immunoassay platform, as well as ALZpath's proprietary pTau217 antibody.

Amid rapid adoption of AI technology, genomic data has significant potential. Historically, the industry's ability to sequence DNA outpaced its ability to decipher the information it contains. With growing utilisation, we may continue to see partnerships between genomic firms and key semiconductor companies. Most recently, NVIDIA announced a partnership with Illumina to facilitate the large-scale analysis of DNA information. This could also help expand genomic medicines' reach.

## Global X Autonomous & Electric Vehicles UCITS ETF

Electric vehicle sales reached 1.8 million in June 2025, up 24% year-over-year and 6.7% from May. For the first half of 2025, global sales hit 9.07 million, a 28% increase year-to-date. China remains the primary growth engine, accounting for over 5.5 million sales by May, aided by strong trade-in incentives and a vast array of affordable models. In November alone, China sold 1.27 million EVs, marking its fifth consecutive month above the one-million mark. Meanwhile, the U.S. and Europe saw slower gains, with the U.S. reaching 760,000 EVs sold year-to-date, up 5.8%, 103 and Europe rebounding with 27% growth by May after a flat 2024 start.

Europe's EV recovery has been driven by emissions rules introduced in 2025, prompting automakers to launch cheaper models. Germany added a new incentive plan in June, supporting broader European policy momentum.<sup>104</sup> In contrast, the U.S. market faces uncertainty due to debates over tariffs and EV tax credits. Automakers like GM are responding with large domestic investments, aiming to localise production. 105 However, job cuts at firms like GM and Stellantis in late 2024 reflect broader industry challenges, <sup>106</sup> including lagging demand and rising global competition.

Investment Manager's Report (continued)

For the year ended 30 June 2025

## **Sub-Fund Review (continued):**

## Global X Autonomous & Electric Vehicles UCITS ETF (continued)

Advancements in battery tech could offer long-term promise. U.S.-based QuantumScape showed progress in scaling solid-state batteries, a potential breakthrough in cost, performance, and safety. 107 Still, the supply chain faces turbulence. The U.S. and Europe imposed stiff tariffs on Chinese-made EVs, up to 45% in some cases, impacting global flows and pricing. In Q2 2025, China introduced new export controls on advanced EV battery materials and metal-processing technologies, 108 reinforcing its upstream supply chain dominance. These trends could underline the EV sector's sensitivity to geopolitical and material shifts.

Global EV sales are forecast to exceed 20 million units in 2025, up 19% from 2024's revised 17 million. 109 Longer-term, industry growth remains underpinned by battery innovation, expanding charging infrastructure, and a broader transition toward electrification.

## Global X FinTech UCITS ETF (FINX LN)

Holdings like PayPal and Affirm are blending financial services seamlessly into commerce, redefining customer dynamics. PayPal's Open platform and partnerships with Verifone and J.P. Morgan embed payments into checkout flows, a tactic expected to boost merchant adoption through 2027. 110,1111 Affirm's deepening integrations with e-commerce platforms could position it as the default financing layer, not merely a standalone lender. This "invisible banking" shift could signal that fintech's true value lies in transaction infrastructure embedded directly where consumers spend.

The integration of AI into different processes has been consistent throughout fintech in FY2025. Intuit exemplifies the theme, integrating AI across TurboTax, QuickBooks, Credit Karma, and Mailchimp. 112 The launch of Intuit Assist agentic interfaces in late 2024, 113 and the rollout of AI agents via GenOS to millions by June 2025, 114 illustrate a transformation of client interaction and decision-making. Complemented by broader industry insight that firms like Block, Visa, Mastercard, and PayPal increasingly leverage AI for fraud detection and customer personalisation 115,116 AI appears to be increasingly efficiency across various functions and adding new functionality.

Companies are responding to fragmented regulations and global growth by aligning compliance across multiple regions. Wise's move to dual list in New York exemplifies a strategic pivot to access U.S. regulatory clarity and capital. 117 Several large FinTech companies sought formal bank charters, albeit in a limited nature than a full bank license. Examples include Stripe, which applied and received approval for a Merchant Acquirer Limited-Purpose Bank, and Wise, which applied to establish a nondepository national trust bank, to gain greater control and cost efficiency in USD flows.<sup>118</sup>

Numerous acquisitions took place in Q2 2025, perhaps signalling ongoing consolidation in the FinTech space as companies either expanded their verticals, sought access to new geographies and licenses, or in some cases both. Examples include Robinhood's acquisition of Bitstamp and Xero's acquisition of Melio. 119,120 With the IPO market remaining relatively muted, private companies are seeing exits via strategic acquirers.

Investment Manager's Report (continued)

For the year ended 30 June 2025

## **Sub-Fund Review (continued):**

## Global X UCITS Telemedicine & Digital Health UCITS ETF

The Telemedicine & Digital Health theme saw the ongoing adoption and deployment of AI capabilities to improve patient care. A key example is ResMed, which announced a new suite of products that leverage wearable monitoring and artificial intelligence to improve care of sleep apnea. The new suite includes compatibility with the Apple Watch to monitor vitals over time and offer key insights for sleep apnea patients.

The adoption of wearable health monitoring devices continues to rise, and their growing compatibility with everyday consumer electronics is expected to enhance user acceptance and integration of these systems into daily life. Apple's FDA approvals for hearing aid functionality in the AirPod Pro and sleep apnea detection in Apple Watch exemplify this trend. 121 These advancements could potentially boost awareness of health conditions and drive demand for specialised medical devices.

The telemedicine and digital health theme saw numerous acquisitions during the FY2025, each with different purposes. Teladoc acquired virtual mental health provider UpLift for \$30 million in cash, <sup>122</sup> reflecting telemedicine firms' pivot toward integrated, specialty care services and broader virtual care excellence. Teladoc stated the acquisition supports its strategy to enhance its leadership position in virtual mental health. 123 This could signal the growing strategic value of cross-border digital health platforms and marks a step toward globalised, integrated telemedicine services

## **Global X Cloud Computing UCITS ETF**

Cloud providers have centred their strategies on AI to differentiate and capture enterprise demand. AWS recorded US \$29.3 billion in revenue in Q1 2025, growing 17% YoY, <sup>124</sup> and is expanding its AI investments with initiatives like Bedrock AgentCore, S3 Vectors, and the Generative AI Innovation Centre, backed by commitments to startups like Anthropic and Trainium chip development. 125 Microsoft Azure saw Q1 revenue grow 33%, bolstered by AI Foundry, GPT-4.1 integration, and NVIDIA microservices. 126 Google Cloud surged 32% YoY, prompting Alphabet to raise cloud capex to US \$85 billion, aided by its Gemini model and OpenAI partnership for AI workloads. 127 These moves show AI appears to be the core operating lever in cloud strategies.

While AWS remains dominant, competition is intensifying. In Q1 2025, AWS held ~32% of global cloud infrastructure, with Azure at 23% and Google Cloud at 12%. 128 Azure's growth outpaced AWS (33% vs. 17%), and Google Cloud narrowed the gap thanks to AI-led enterprise deals.<sup>129</sup> Alphabet's capital expenditure target increased by US \$10 billion to US \$85 billion for 2025, marking a strategic priority toward cloud infrastructure investment.<sup>130</sup> This capital shift potentially signals that cloud players view AI-tailored infrastructure as essential to maintaining or growing market position.

Cloud platforms are evolving into full-stack ecosystems. AWS's suite, Bedrock, AgentCore, S3 Vectors, is designed for seamless generative-AI deployment.<sup>131</sup>Azure's Fusion of AI Foundry, Fabric, Data portfolio, and OpenAI support aims to simplify enterprise AI innovation across developers and data teams. 132,133,134 Google Cloud's large AI deals, custom TPUs, and Wiz acquisition for cloud security indicate a maturing ecosystem that integrates compute, data, protection, and AI services. These platforms are transforming from infrastructure providers to strategic innovation hubs.

Cloud computing resources are foundational to the broad adoption of generative AI, as every single AI tool built and developed today is likely to be using cloud-native infrastructure. In 2024 alone, global cloud computing revenues are expected to top \$675.4 billion, up nearly 20% YoY. 135 We anticipate growth acceleration to come through 2025 and 2026 as AI workloads grow and become a higher share of the current cloud spend mix.

Investment Manager's Report (continued)

For the year ended 30 June 2025

## **Sub-Fund Review (continued):**

#### Global X E-commerce UCITS ETF

Amazon's 2025 Prime Day, held from 8 to 11 July, extended its format to four days for the first time since the event. Total U.S. retail sales during the period rose 30.3% year-on-year to \$24.1 billion, with a majority of purchases made via mobile devices (53.2%) for the first time. 136 This shift towards mobile underscores an ongoing trend rather than a sudden transformation. Over the past several years, improvements in mobile shopping interfaces, faster checkouts, and wider device use have gradually made mobile the preferred channel. While Prime Day drives short-term spikes in activity, it also reflects the broader evolution of digital retail, where convenience and accessibility continue to shape consumer behaviour.

A notable development in e-commerce over the past year has been the early-stage integration of generative AI into consumer search. Platforms like ChatGPT have begun embedding product links directly into responses, 137 contributing to a 3,300% yearon-year increase in AI-generated traffic to U.S. retail sites during Prime Day. 138 Although the absolute base remains low, the trend signals a gradual shift in how consumers may navigate online retail. Over time, conversational AI tools could alter discovery pathways, with implications for search marketing and product visibility. The impact remains nascent, but it would appear that the infrastructure for a new mode of digital commerce is being laid, especially as more users incorporate AI into their daily browsing routines.

E-commerce's share of total U.S. retail sales rose slightly from 16.1% in Q2 2024 to 16.2% in Q2 2025, <sup>139</sup> slightly below its pandemic-era peak but well above pre-COVID levels. While higher interest rates and inflation have created challenges across retail sectors, online businesses have shown relative stability. This persistence suggests that e-commerce is settling into a mature phase, no longer defined by rapid expansion but by incremental, durable growth.

Leading e-commerce companies continue to shift from pure retail to broader platform-based models. Amazon's Q1 2025 results highlight this transition: third-party seller services grew 6% year-on-year, while digital advertising rose 18%. 140 These figures suggest a growing emphasis on services and monetisation beyond direct product sales. Overall, e-commerce platforms appear to benefit from scale efficiencies and revenue diversity, helping to buffer against market volatility. Looking ahead, the prospect of interest rate cuts may offer some support, particularly for small- and medium-sized platforms, but sustained performance will likely depend on continued operational efficiency and measured consumer demand.

<sup>136</sup> Adobe for Business. (2025, July 14). Adobe: Prime Day event drove \$24.1 billion in online spend across U.S. retailers.

<sup>&</sup>lt;sup>137</sup> iDownloadBlog. (2025, April 29). OpenAI brings new ChatGPT shopping features to find, compare and buy products. 138 Adobe for Business. (2025, July 14). Adobe: Prime Day event drove \$24.1 billion in online spend across U.S. retailers.

<sup>&</sup>lt;sup>140</sup> Amazon. (2025, May 1). Amazon.com Announces First Quarter Results.

Investment Manager's Report (continued)

For the year ended 30 June 2025

## **Sub-Fund Review (continued):**

## **Global X Internet of Things UCITS ETF**

After a lacklustre start to FY2025, the Internet of Things (IoT) theme rebounded towards the end of the period, supported by post-Liberation Day gains and renewed investor interest in physical AI. Apple's launch and upgrades of Apple Intelligence, 141 exemplify how on-device AI is catalysing a new wave of consumer electronics upgrades. Component suppliers like Qualcomm have already reported double-digit revenue growth and strong guidance, 142 signalling renewed strength in edge computing. As AI becomes increasingly localised, edge hardware, including processors, modems, sensors, and storage, could experience a demand uplift. By 2027, over 60% of global data is expected to be processed on edge devices, and by 2028, over 26 billion short-range IoT connections will be enabled by this very trend. 143,144 This evolving architecture could strengthen the case for investing in AI-powered IoT beyond hyperscalers and traditional semiconductor giants.

The industrial side of IoT remains resilient, even as the automotive segment drags. While hardware-centric IoT, like sensors, gateways, and edge devices, faces short-term volatility, the software and infrastructure layers continue to grow steadily. Companies like Samsara reported 31-37% year-on-year revenue growth, driven by demand in asset monitoring, predictive maintenance, and connected logistics. 145 These enterprise use cases are less tied to consumer cycles and more aligned with public and private infrastructure spending, which tends to be long-term and predictable. U.S. manufacturing PMIs have been quite volatile throughout FY2025, 146 given ongoing uncertainty around trade policies. However, the digitisation of industrial capex remains a defining trend, bolstering demand for sensing, data processing, and analytics technologies across industrial

Health-centric IoT remains a bright spot within the broader theme, with strong secular tailwinds. Garmin's FY 2024 results revealed 20% YoY revenue growth, driven by a 32% rise in its Fitness segment and 16% in Outdoor. 147 Increasing consumer affinity for connected health devices, such as fitness trackers, diagnostic wearables, and continuous monitoring systems, has been reinforced by demographic trends like population ageing and rising health awareness. In addition, the sophistication of these devices is improving rapidly, offering seamless integration and more advanced analytics. This dynamic is drawing in younger buyers, creating a multi-generational demand base.

Despite promising segments, the IoT theme still faces notable headwinds, especially in automotive IoT. High interest rates and inflation have reduced demand for connected vehicles, hitting suppliers like STM Microelectronics and NXP, who reported double-digit revenue declines in auto-related ICs. 148,149 Tariff recalibrations and front-loaded consumer spending in H2 2025 could weigh on demand in H1 2026. Nevertheless, the theme is well-positioned for recovery as rate cuts approach, potentially reigniting auto and industrial capex. Ongoing AI investment cycles, small-cap rotations, and domestic manufacturing incentives offer further upside. In the mid-term, IoT's role in enabling AI at the edge, digitising infrastructure, and connecting devices across verticals continues to solidify its place as a core long-term investment theme.

## **Sub-Fund Review (continued):**

#### Global X Clean Water UCITS ETF

The U.S. Environmental Protection Agency (EPA) announced \$3.6 billion in new funding under the Bipartisan Infrastructure Law (BIL) to upgrade water infrastructure and keep communities safe. <sup>150</sup> Combined with \$2.6 billion announced in October, this \$6.2 billion in investments for FY25 will help communities across the country upgrade water infrastructure that is essential to safely managing wastewater, protecting local freshwater resources, and delivering safe drinking water to homes, schools, and businesses. The BIL funds will flow through the Clean Water and Drinking Water State Revolving Funds (SRF), a long-standing federal-state water investment partnership. This multibillion-dollar investment will fund state-run, low-interest loan programs that address key challenges in financing water infrastructure.

In addition, companies within the industrial sector, such as the oil and gas, power, pharmaceuticals, mining, and the food and beverage industries, continue to face growing pressure to more sustainability manage water use. For example, in April 2024, the EU parliament approved a package of rules that will increase the required contributions in water treatment from the pharmaceutical and cosmetic industries. This trend potentially presents opportunities for specialised water treatment companies to provide innovative technologies for water recycling, reuse, and zero liquid discharge systems.

There are also favourable policy tailwinds in major markets like the United States, where PFAS and water management regulations and funding from the Infrastructure Investment and Jobs Act (IIJA) could boost opportunities throughout the industry. In total, the IIJA devotes \$55 billion towards renovating water infrastructure, replacing lead pipes, investments into desalination, water conservation efforts, and water recycling. The IIJA is the largest investment in water the country has ever seen.

Ferguson Enterprises (FERG) expanded its position in digital water management by adding WINT Water Intelligence, a U.S. based commercial water management and leak detection firm to its portfolio in January 2025 and completing two strategic acquisitions of regional pipe and fire safety businesses in April, broadening its capabilities and reach.<sup>151</sup>

American Water (AWK) received recognition as one of TIME's Best Mid-Size Companies, reflecting strong performance and ambition, and disclosed plans to invest \$40–42 billion over the next decade in U.S. water systems. <sup>152</sup> Pentair showcased new membrane filtration, dosing and UV systems at Aquatech 2025 in Amsterdam and introduced its X-Flow membrane for cost-effective water reuse solutions. <sup>153</sup>

Xylem has selected 13 startups from nine countries to join its 2025 Partnerships Accelerator, a program focused on fast-tracking technologies aimed at improving water resilience and security. The selected companies are developing tools to address issues such as leak detection, contamination monitoring, energy use, and water reuse – pressures that continue to mount due to aging infrastructure, climate impacts, and rising water demand from industries like data centres.<sup>154</sup>

In the UK, United Utilities and Severn Trent are undertaking major infrastructure programs. Severn Trent announced a £139 million upgrade of Wanlip sewage works and reported a 65% reduction in storm overflow spills in early 2025. The UK government also moved to consolidate regulators under a new single authority to improve oversight. The UK government also moved to consolidate regulators under a new single authority to improve oversight.

#### **Sub-Fund Review (continued):**

#### Global X NASDAQ 100 Covered Call UCITS ETF

The Sub-Fund seeks to provide investment results that correspond generally to the price and yield performance, before fees and expenses, of the CBOE Nasdaq-100® BuyWrite V2 Index ("Underlying Index").

The Underlying Index tracks the performance of a theoretical portfolio of the stocks included in the NASDAQ-100 Index (the "Reference Index"), and "writes" (or sells) a succession of one-month at-the-money NASDAQ-100 Index covered call options. The Underlying Index replicates the methodology used to calculate the BXNTU Index. The Sub-Fund underperformed its Reference Index during the reporting period since its covered call strategy forfeits upside potential to generate options premiums.

In the second half of 2024, markets were rocked by tariff announcements, rising geopolitical risk, and earnings disappointments from major tech firms. Volatility spiked notably in late October as two megacap companies issued cautious guidance around AI-related spending, sending the VIX above 23, its highest since August. Following the U.S. presidential election and a 25 bps Fed rate cut in early November, equities rebounded strongly, with the S&P 500 up 7.7% in H2 and 23.3% for the year, led by Communication Services, Industrials, and Tech.

Entering 2025, the environment remained volatile. April saw one of the sharpest bond market selloffs in years with the VIX spiking to 52.3 on April 8, and the put/call ratio surging to 1.58x. Treasury yields jumped by over 35bps as investors digested new tariff implementations and worsening fiscal dynamics. Equity markets corrected sharply, with the S&P 500 falling to a 52-week low of 4,982. Still, sentiment rebounded by late Q2 amid easing trade tensions and solid earnings (78% of S&P 500 companies beat estimates). This sustained volatility translated into historically strong premiums across covered call strategies. In Q2 2025 QYLD collected an 8.76% option premium, up from 6.78% in Q1, with a 3.04% yield distribution. XYLU premiums rose to 6.92%, from 5.05% in Q1, with distributions increasing to 2.96%. The SX5ECCA Index (Euro Stoxx 50 covered call benchmark) held steady at 5.75%, with yield ticking up to 2.88%.

Despite a steady decline in implied volatility through May (VIX fell 42% to 17.24), call option demand remained strong, especially during the May roll period when 90% of notional volume was concentrated in calls highlighting investor appetite for upside participation with embedded risk mitigation.

Looking ahead to H2 2025, markets remain sensitive to policy-driven volatility. The August tariff deadline, persistent fiscal uncertainty, and inflation risks appear to continue to drive demand for structured equity solutions. In this climate, covered call ETFs may offer compelling potential for yield enhancement, benefiting from periodic volatility spikes and sustained interest in defined-outcome strategies.

#### **Sub-Fund Review (continued):**

#### Global X S&P 500® Covered Call UCITS ETF

The Sub-Fund seeks to provide investment results that correspond generally to the price and yield performance, before fees and expenses, of the Cboe S&P 500 BuyWrite 15% WHT Index ("Underlying Index").

The Sub-Fund (XYLU LN) follows a synthetic strategy, in which the Sub-Fund seeks to replicate a buy-write index by selling covered calls, with underlying equity exposure designed to match constituents of the S&P 500 Index. The Cboe S&P 500 BuyWrite 15% WHT Index (BXMU Index) tracks the performance of a hypothetical call strategy portfolio consisting of a "long" position indexed to the S&P 500 NTR 15% USD Index ("SPX15UN") and a short European-Style at the money S&P 500 Index ("SPX") Call option position expiring monthly.

In the second half of 2024, markets were rocked by tariff announcements, rising geopolitical risk, and earnings disappointments from major tech firms. Volatility spiked notably in late October as two megacap companies issued cautious guidance around AI-related spending, sending the VIX above 23, its highest since August. Following the U.S. presidential election and a 25 bps Fed rate cut in early November, equities rebounded strongly, with the S&P 500 up 7.7% in H2 and 23.3% for the year, led by Communication Services, Industrials, and Tech.

Entering 2025, the environment remained volatile. April saw one of the sharpest bond market selloffs in years with the VIX spiking to 52.3 on April 8, and the put/call ratio surging to 1.58x. Treasury yields jumped by over 35bps as investors digested new tariff implementations and worsening fiscal dynamics. Equity markets corrected sharply, with the S&P 500 falling to a 52-week low of 4,982. Still, sentiment rebounded by late Q2 amid easing trade tensions and solid earnings (78% of S&P 500 companies beat estimates). This sustained volatility translated into historically strong premiums across covered call strategies. In Q2 2025 XYLU premiums rose to 6.92%, from 5.05% in Q1, with distributions increasing to 2.96%.

Despite a steady decline in implied volatility through May (VIX fell 42% to 17.24), call option demand remained strong, especially during the May roll period when 90% of notional volume was concentrated in calls highlighting investor appetite for upside participation with embedded risk mitigation.

Looking ahead to H2 2025, markets remain sensitive to policy-driven volatility. It would appear the August tariff deadline, persistent fiscal uncertainty, and inflation risks continue to drive demand for structured equity solutions. In this climate, covered call ETFs may offer compelling potential for yield enhancement, benefiting from periodic volatility spikes and sustained interest in defined-outcome strategies.

#### **Sub-Fund Review (continued):**

#### Global X Euro Stoxx 50 Covered Call UCITS ETF

The Sub-Fund (SYLD LN) follows a synthetic strategy, in which the Sub-Fund seeks to replicate a buy-write index by selling covered calls, with underlying equity exposure designed to match constituents of the Euro Stoxx 50 Index.

The Sub-Fund seeks to provide investment results that correspond generally to the price and yield performance, before fees and expenses, of the of the Euro Stoxx 50 Covered Call ATM Index.

Entering 2025, the environment remained volatile. April saw one of the sharpest bond market selloffs in years with the VIX spiking to 52.3 on April 8, and the put/call ratio surging to 1.58x. Treasury yields jumped by over 35bps as investors digested new tariff implementations and worsening fiscal dynamics. Equity markets corrected sharply, with the S&P 500 falling to a 52-week low of 4,982. Still, sentiment rebounded by late Q2 amid easing trade tensions and solid earnings (78% of S&P 500 companies beat estimates). This sustained volatility translated into historically strong premiums across covered call strategies. In Q2 2025 XYLU premiums rose to 6.92%, from 5.05% in Q1, with distributions increasing to 2.96%.

Despite a steady decline in implied volatility through May (VIX fell 42% to 17.24), call option demand remained strong, especially during the May roll period when 90% of notional volume was concentrated in calls highlighting investor appetite for upside participation with embedded risk mitigation.

Looking ahead to H2 2025, markets remain sensitive to policy-driven volatility. The August tariff deadline, persistent fiscal uncertainty, and inflation risks appear to continue to drive demand for structured equity solutions. In this climate, covered call ETFs may offer compelling potential for yield enhancement, benefiting from periodic volatility spikes and sustained interest in defined-outcome strategies.

#### Global X S&P 500® Quarterly Buffer UCITS ETF

Implementing a defined outcome strategy, the Sub-Fund aims to protect against the first 5% of losses on the S&P 500 through the purchase of a put spread each quarter. Additionally, by writing calls, the strategy aims to minimise the cost of the put spread, resulting in a capped maximum gain each quarter.

In the second half of 2024, markets experienced tariff-driven volatility and geopolitical uncertainty, which weighed on risk assets. Equity volatility spiked notably after disappointing guidance from major tech companies on AI investment costs in late October, pushing the VIX above 23—the highest level since August. Following the U.S. presidential election in early November and a 25 basis point rate cut by the Federal Reserve, markets rebounded strongly. However, December saw another volatility spike, with the VIX rising above 28 after the Fed's additional rate cut, amid growing concerns about inflation risks heading into 2025. This period also witnessed a steepening yield curve as long-term rates climbed due to persistent inflationary pressures and fiscal uncertainties.

Entering 2025, markets continued to navigate these themes. The April bond market selloff, triggered by refinancing risks and ongoing fiscal expansion, underscored heightened sensitivity to U.S. debt and political dysfunction, as meaningful fiscal restraint remains unlikely amid large spending bills moving through Congress. Inflation expectations remain elevated, with rising 1-year U.S. inflation swap around, keeping a hawkish tone on monetary policy. Structural factors like rising nominal GDP growth expectations, strong credit issuance, and fiscal concerns have driven a pronounced steepening of the U.S. yield curve, reflecting increased term premiums on long-duration debt.

Looking ahead to the second half of 2025, risks persist around the new August tariff deadline, ongoing fiscal debates, and inflation dynamics. In this uncertain environment, Defined Outcome Strategies are gaining traction as they offer investors upside participation with downside capital protection, historically delivering lower volatility and beta compared to broad equity benchmarks.

#### Global X SuperDividend® UCITS ETF

The Sub-Fund seeks investment results that correspond generally to the price and yield performance, before fees and expenses, of the Solactive Global SuperDividend v2 Index (the "Underlying Index"). The Sub-Fund is passively managed, which means the fund does not attempt to take defensive positions in declining markets. The Sub-Fund generally seeks to fully replicate the Underlying Index.

The Underlying Index tracks the performance of 100 equally weighted companies that rank among the highest dividend yielding equity securities in the world. The index provider applies certain dividend stability filters. Over the 12-month rolling period ending June 2025 SDIV yielded 10.44% in dividends. 157

### Global X 1-3 Month T-Bill UCITS ETF

Since the start of 2025, the U.S. has faced renewed scrutiny over its fiscal trajectory amid persistent inflation and rising debt issuance. Despite mounting concerns over debt sustainability, there's little sign of fiscal restraint emerging, as evidenced by another large spending bill moving through Congress. The bond market selloff in April, sparked by refinancing pressures and deficit fears, underscored the growing sensitivity of long-duration yields to structural imbalances. While the Fed is unlikely to ease policy simply to lower interest costs, volatility in long-term rates may trigger tactical responses aimed at stabilising markets. The yield curve has steepened materially since "liberation day," driven by resilient nominal GDP, sticky service inflation, and the need for a higher term premium amid fiscal uncertainty. This environment suggests that structurally steeper curves could persist.

The Federal Reserve began its cutting cycle by announcing a 50bp cut and lowering the Fed Funds rate to 5% at the September FOMC meeting. Two subsequent cuts of 25bps each followed both in November and December. The Sub-Fund managed to avoid interest rate volatility that impacted interest rates on the long end of the interest rate curve during the reporting period. Throughout the reporting period, the Sub-Fund delivered consistent interest income that largely tracked prevailing short-term interest rates while maintaining a stable net asset value.

#### **Sub-Fund Review (continued):**

#### **Global X Renewable Energy Producers UCITS ETF**

The UNFCC's 29th Conference of the Parties (COP29), the largest annual international climate conference took place. After two weeks of negotiations, over 200 countries signed a new agreement which aims to triple finance to developing countries.<sup>158</sup> The new goal is for signatories to send a total of \$300 billion annually to developing countries by 2035, up from a previous goal of \$100 billion. 159 The funding should be used for climate adaptation efforts and clean energy growth. Renewable energy producers expanded their renewable portfolios and made progress in offshore wind projects, benefiting from technological advancements. However, higher borrowing costs made it more expensive for utilities to finance new projects, leading to delays and re-evaluations of planned expansions. The high interest rate environment, as well as shifting policies, continued to weigh particularly hard on residential solar power demand in key markets such as Europe and the United States. 160

Escalating global data centre energy consumption makes innovation critical to mitigate environmental impacts and ensure sustainability. Renewable energy sources like solar and wind power can help flatten energy consumption profiles and reduce dependence on non-renewable sources, particularly during peak-demand periods.<sup>161</sup> In March 2024, the EU Commission approved a new Energy Efficiency Directive that introduces a unified scheme to assess the sustainability of data centres. 162 Beginning in 2026, data centre operators must report sustainability metrics, including total electricity usage and the proportion covered by renewable sources.<sup>163</sup>

In January 2025, policymakers in the U.S. finalised the Energy Permitting reform Act, streamlining approval timelines for energy and transmission projects, including renewables aimed at accelerating critical infrastructure rollout. 164 However, an executive order now mandates that all wind and solar projects on federal lands undergo elevated approval by the Interior Secretary, a move that industry groups warn could delay developments such as those seeking credits before tax incentives expire. 165 Additionally, emerging budget proposals, including the "One Big Beautiful Bill", propose phase outs of key clean energy tax credits while introducing domestic fossil fuel support, raising concerns about reduced investment in renewables. 166

In Europe the final deadline arrived for the revised Renewable Energy Directive in May 2025, setting binding targets of at least 42.5% renewables by 2030, with ambition to reach 45%, prompting member states to strengthen plans for solar, wind and grid upgrades. <sup>167</sup> The EU projects record-breaking installations—approximately 89 GW of new renewables in 2025 of which 70 GW solar and 19 GW wind. This would surpass prior year growth despite concerns over subsidy cuts in some countries.<sup>168</sup>

Orsted has taken decisive steps to strengthen its balance sheet and recalibrate its strategy. In February, the company reduced its 2030 investment plans by around 25% amid pressure from rising interest rates and supply chain costs in offshore wind. 169 In May, Orsted cancelled the large-scale Hornsea 4 project in the UK, citing economic pressure, and also shifted its focus in Asia toward Taiwan and South Korea, securing \$3 billion in financing for the 632 MW Greater Changhua 2 project.<sup>170</sup>

EDP Renováveis reported a robust 10% year-over-year increase in power generation in Q1 2025, driven by strong solar and North American performance.<sup>171</sup> Ormat Technologies reported strong Q1 2025 results driven by strong energy segement revenues and strategic acquisitions. In May the company secured a \$62 million hybrid tax-equity deal for two US storage projects. 172

Investment Manager's Report (continued)

For the year ended 30 June 2025

#### **Sub-Fund Review (continued):**

#### Global X CleanTech UCITS ETF

Over H2 2024, companies within the cleantech theme continued to be negatively impacted by a range of headwinds. For example, in the United States, cleantech project developers once again had to navigate elevated interest rates, tighter lending standards, slow and complex permitting processes which weighed on demand for cleantech equipment. Europe's renewables industry also continued to be impacted by slow permitting procedures. The EU added an estimated 13GW of new wind power in 2024, marking a decline from 16GW of new installations in 2023, and slow permitting has been cited as a key factor. <sup>173</sup>

In 2025, cleantech has gained momentum, largely driven by clearer policy direction. A major catalyst was the finalisation of low-carbon hydrogen tax credit rules under Section 45V, released by the U.S. Treasury and IRS on 3 January.<sup>174</sup> The finalised rules offer much needed clarity and flexibility allowing hydrogen from renewables, nuclear, natural gas with carbon capture, and other sources to qualify if emissions stay below set limits. 175

Meanwhile companies are pushing technological boundaries. 176 QuantumScape announced in June that it had successfully integrated its new "Cobra" high-throughput ceramic separator process into baseline production for solid-state EV batteries.<sup>177</sup> In the solar infrastructure space, Nextracker posted record Q4 FY2025 results in May, with revenue of \$924 million, a 26% year-over-year increase and wide profit growth. The company also launched its Electrical Balance of Systems platform through the acquisition of Bentek, expanding its role to a full-solar platform provider. 178 In parallel, it introduced enhancements to its TrueCapture smart-tracking software promised to boost plant yields by up to 4% annually and deployed low-carbon solar trackers to reduce emissions from project logistics. 179

Samsung SDI is expanding EV and stationary battery production to meet surging demand linked to global electrification trends. The company has raised over \$1.2 billion via a rights offering to upgrade its Göd, Hungary plant, increasing prismatic cell capacity. 180 It's also ramping up U.S. production, including LFP cells in Ulsan for North American ESS markets.

Over the long term, clean tech equipment manufacturers are poised to potentially benefit from the ongoing electrification of the power and transport sectors. In particular, global renewables capacity could increase 2.7x between 2023 and 2030, and the solar and wind power industries are forecast to account for more than 95% of global renewables growth. 181

#### Global X Solar UCITS ETF

In H2 2024, the solar industry faced challenges from multiple fronts. Supply chain disruptions, particularly in the procurement of polysilicon and other critical materials, led to delays in project timelines and increased costs. Rising interest rates strained financing for new solar installations, impacting both residential and utility-scale projects. Additionally, policy uncertainty in key markets, such as the U.S. and Europe, hindered investment as stakeholders awaited clarity on renewable energy subsidies and tariffs. Competition from alternative renewable sources and evolving energy storage technologies further pressured margins in an already competitive sector.

A report by IEA report highlights that supply chain constraints for polysilicon and solar inverters have eased in 2025, as global production capacity expanded, reducing equipment lead times and costs.<sup>182</sup> Lead times for large-scale solar inverters have shortened from 12 months in 2021 to 8 months thanks to these supply chain advancements. 183 Despite these improvements, the world remains heavily dependent on China, which is expected to supply nearly 95 percent of polysilicon, ingot, and wafer production this year. 184

#### **Sub-Fund Review (continued):**

### Global X Solar UCITS ETF (continued)

In July 2025, a Budget Reconciliation Act extended the 30 percent residential Investment Tax Credit (ITC) through the end of 2025, but removed the 10 percent domestic-content bonus as well as the ability to transfer or carry forward credits, changes that may dampen residential solar uptake in 2026. 185 Additionally, a new rule mandates that all solar projects on federal lands must receive approval directly from the Interior Secretary, potentially introducing permitting delays for utility-scale developments. 186

First Solar Inc entered an exclusive multi-year agreement with UbiOD to integrate quantum-dot coatings into its thin-film bifacial panels.<sup>187</sup> In September 2024, First Solar (FSLR) inaugurated a new \$1.1 billion fully vertically integrated thin-film solar manufacturing facility in Lawrence County, Alabama. 188 This state-of-the-art plant adds 3.5 gigawatts (GW) of annual capacity, bringing the company's total U.S. manufacturing capacity to approximately 10 GW. 189

Enphase Energy reported strong Q2 performance, however, its cautious Q3 guidance reflects concerns over new tariffs on China sourced batteries.

Solar remains the fastest growing source of power generation in the US, with new capacity consistently growing over 20% annually, replacing wind as the primary target of renewable energy development. Panel cost efficiency continues to improve on a \$/kV basis, improving project economics. 190

#### Global X Wind UCITS ETF

The broader wind market has been shaped by divergent regional policies. In the United States, the Trump administration's January 2025 executive order halted new offshore wind leases, delaying high-profile projects such as New England Wind and Revolution Wind, which contributed to Equinor's impairment charge. 191 Equinor booked a substantial US \$955 million writedown on its U.S. offshore wind projects, citing regulatory uncertainty, and BP announced the sale of its U.S. onshore wind business to LS Power/Clearlight Energy as it shifts its strategic focus back to oil and gas. 192

According to GWEC's Global Wind Report, the wind industry installed a record 117 GW of new capacity in 2024, with Asia-Pacific (led by China) and Europe leading global additions. 193 Further acceleration is expected in 2025, with forecasts of 138 GW in new installations this year and annual growth climbing toward 194 GW by 2030.<sup>194</sup>

China remains the dominant force in the global wind market, particularly in floating offshore wind, where it has made rapid progress in both capacity and deployment. By early 2025, China accounted for more than half of global offshore wind capacity, with approximately 41 gigawatts installed and grid connected. 195

The United Kingdom is moving ahead with construction of the Hornsea 3 offshore wind farm, one of Europe's largest projects. In April 2025, the first offshore converter station was shipped for installation, with onshore works also progressing. <sup>196</sup> On 15 July 2025, the Labour government introduced reforms to the Contracts for Difference scheme, extending contract terms from 15 to 20 years and updating auction procedures to give ministers greater control over budgets. These changes are designed to reduce investor risk, speed up clean energy deployment, and help reach the national goal of 43 to 50 gigawatts of offshore wind by 2030, up from around 15 gigawatts today. 197

Investment Manager's Report (continued)

For the year ended 30 June 2025

#### **Sub-Fund Review (continued):**

#### **Global X Wind UCITS ETF (continued)**

France reaffirmed its long-term offshore wind ambitions including floating wind by targeting 18 GW by 2035 and 45 GW by 2050, alongside an expanded auction schedule aimed at streamlining development. These moves support Europe's lead in floating wind as China and the U.S. ramp up fixed-bottom capacity. Progress may fall short of ambition. An April 7, 2025 report by the Institute for Energy Economics and Financial Analysis warned that permitting hurdles and budget constraints could leave France with just 3 GW in operation by 2032 unless investment conditions improve. 199

Despite the positive demand outlook, the sector continues to grapple with elevated financing costs, supply chain bottlenecks, and rising inflation. While turbine manufacturers such as Vestas have benefited from a more stable pricing environment and growing order books, developers like Ørsted have delayed major projects due to higher capital costs.<sup>200</sup>

#### Global X Hydrogen UCITS ETF

The U.S. has eased the criteria for clean hydrogen tax credits under section 45V, delaying the strict hourly matching requirement until 2030 and allowing existing nuclear plants to qualify if their continued operation prevents shutdowns.<sup>201</sup> These final rules offer broader pathways for hydrogen production using electricity, natural gas with carbon capture, or renewable natural gas, aiming to support industry growth while meeting emissions standards.<sup>202</sup> In February 2025, Treasury clarified that green hydrogen producers can claim up to \$3 per kilogram when using power from newly built clean energy sources, enabling project developers to resume work on large-scale facilities.<sup>203</sup>

The U.S. Department of Energy finalised another \$2.2 billion of the \$7 billion previously announced funding for hydrogen hubs. The Gulf Coast Hydrogen Hub will receive \$1.2 billion while the Midwest Hydrogen Hub will receive \$1 billion. This means that only 2 of the 7 selected projects still are waiting for final funding approval. Final approval for all 7 projects will allow them to move on in the development phase.

In Europe the Clean Hydrogen Partnership is driving Europe's clean energy leadership by advancing hydrogen production, storage, and distribution through collaboration with the European Commission, industry leaders, SMEs, and research institutions. A key achievement is the creation of 16 "Hydrogen Valleys" in 15 EU Member States, local ecosystems integrating hydrogen production and use. Backed by an additional €200 million under REPowerEU, the initiative aims to double these valleys by 2025 to enhance scalability and commercial viability. Backed by 2025 to enhance scalability and commercial viability.

The €14 million FCH2Rail project successfully tested the Iberian Peninsula's first hydrogen-powered train in Zaragoza during RailLive! 2024, marking a milestone for Spain's and Portugal's railway networks.<sup>209</sup>

Companies focused on clean hydrogen, like Air Products and Chemicals, benefited from increased demand and long-term contracts for green hydrogen. Despite regulatory challenges and rising costs for renewable power, hydrogen projects are moving forward, particularly in regions with robust policy frameworks, such as the U.S.'s Inflation Reduction Act, which has been a significant driver for hydrogen project investments.

However, there are challenges. Project delays, inflation, and regulatory uncertainties are impacting timelines, especially for renewable hydrogen initiatives. Still, with the global hydrogen market expected to grow to \$410 billion by 2030.<sup>210</sup>

Investment Manager's Report (continued)

For the year ended 30 June 2025

#### **Sub-Fund Review (continued):**

#### Global X AgTech & Food Innovation UCITS ETF

Major agtech and food-related industries saw significant developments. A key partnership expanded precision agriculture capabilities, integrating advanced data tools to enhance farm productivity and sustainability. Meanwhile, the seed sector remained resilient despite challenges in crop protection, including price pressures and currency fluctuations. Consumer demand for organic products and home gardening continued to drive growth, with companies focusing on sustainability and local sourcing to meet market demands. Despite supply chain issues, there was a strong push toward technology and innovation in the lawn and garden sectors.

At CES 2025, John Deere unveiled a fleet of autonomous heavy equipment, including tractors capable of efficiently spraying pesticides and fertilizers. Lubota presented AI technology that detects crop diseases and pests, allowing for precise application of chemicals, thereby reducing chemical use and optimizing land. Nutrien Ltd continues to capitalise on its integrated fertilizer and digital ag services. In early 2025, Nutrien reported strong growth in its digital platform uptake, combining satellite imagery and machine learning for precise nutrient management.

Similarly, AGCO Corp is advancing in smart farming solutions. The company has integrated its Precision Planting platform with Trimble's technology, creating a global mixed-fleet precision agriculture platform. This collaboration aims to provide farmers with comprehensive solutions across the crop cycle, enhancing productivity and sustainability.<sup>214</sup>

There have been several precision agriculture partnerships helping famers make data-driven decisions with equipment. These initiatives aim to improve both productivity and sustainability on farms, with pilot programs expected to expand into North America and Canada.

Depositary's Report

#### For the year ended 30 June 2025

We, SEI Investments – Depositary and Custodial Services (Ireland) Limited, appointed Depositary to Global X ETFs ICAV (the "ICAV"), provide this report solely in favour of the investors of the ICAV for the year ended 30 June 2025 (the "Accounting Period"). This report is provided in accordance with the UCITS Regulations – European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (SI No 352 of 2011) as amended, (the "UCITS Regulations"). We do not, in the provision of this report, accept nor assume responsibility for any other purpose or person to whom this report is shown.

In accordance with our Depositary obligation as provided for under the UCITS Regulations, we have enquired into the conduct of the ICAV for the Accounting Period and we hereby report thereon to the investors of the ICAV as follows:

We are of the opinion that the ICAV has been managed during the Accounting Period, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the ICAV by the constitutional documents and by the UCITS Regulations; and
- (ii) otherwise in accordance with the provisions of the constitutional document and the UCITS Regulations.

For and on behalf of SEI Investments - Depositary and Custodial Services (Ireland) Limited

Date: 28 October 2025

# Independent auditors' report to the shareholders of the sub-funds of Global X ETFs ICAV

### Report on the audit of the financial statements

### **Opinion**

In our opinion, Global X ETFs ICAV's financial statements:

- give a true and fair view of the sub-funds' assets, liabilities and financial position as at 30 June 2025 and of their results and cash flows for the year then ended;
- have been properly prepared in accordance with International Financial Reporting Standards ("IFRSs") as adopted by the European Union; and
- have been properly prepared in accordance with the requirements of the Irish Collective Asset-management Vehicles Act 2015 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended).

We have audited the financial statements, included within the Annual Report and Audited Financial Statements, which comprise:

- the Statement of Financial Position as at 30 June 2025;
- the Statement of Comprehensive Income for the year then ended;
- the Statement of Cash Flows for the year then ended;
- the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares for the year then ended;
- the Statement of Changes in Equity for the year then ended;
- the Schedule of Investments for each of the sub-funds as at 30 June 2025; and
- the notes to the financial statements for each of the sub-funds, which include a description of the accounting policies.

Our opinion is consistent with our reporting to the Board of Directors.

### **Basis for opinion**

We conducted our audit in accordance with International Standards on Auditing (Ireland) ("ISAs (Ireland)") and applicable law.

Our responsibilities under ISAs (Ireland) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Independence

We remained independent of the ICAV in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, which includes IAASA's Ethical Standard as applicable to listed public interest entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

To the best of our knowledge and belief, we declare that non-audit services prohibited by IAASA's Ethical Standard were not provided to the ICAV.

Other than those disclosed in note 5, we have provided no non-audit services to the ICAV in the period from 1 July 2024 to 30 June 2025.

### Our audit approach

#### Overview

#### Materiality

- Overall materiality: 50 basis points (2024: 50 basis points) of Net asset value attributable to holders of redeemable participating shares ("NAV") at 30 June 2025 (2024: 30 June 2024) for each of the ICAV's sub-funds.
- Performance materiality: 75%% of overall materiality.

#### Audit scope

• The ICAV is an open-ended investment ICAV with variable capital and engages Global X Management Company (Europe) Limited (the "Manager") and Global X Management Company, LLC (the 'Investment Manager') to manage certain duties and responsibilities with regards to the day-to-day management of the ICAV. We tailored the scope of our audit taking into account the types of investments within the sub-funds of the ICAV, the involvement of the third parties referred to below, the accounting processes and controls, and the industry in which the ICAV operates. We look at each of the sub-funds at an individual level.

#### Key audit matters

- Valuation of financial assets and liabilities at fair value through profit or loss.
- Existence of financial assets and liabilities at fair value through profit or loss.

#### The scope of our audit

As part of designing our audit, we determined materiality and assessed the risks of material misstatement in the financial statements. In particular, we looked at where the directors made subjective judgements, for example the selection of pricing sources to value the investment portfolio. As in all of our audits, we also addressed the risk of management override of internal controls, including evaluating whether there was evidence of bias by the directors that represented a risk of material misstatement due to fraud.

#### Key audit matters

Key audit matters are those matters that, in the auditors' professional judgement, were of most significance in the audit of the financial statements of the current period and include the most significant assessed risks of material misstatement (whether or not due to fraud) identified by the auditors, including those which had the greatest effect on: the overall audit strategy; the allocation of resources in the audit; and directing the efforts of the engagement team. These matters, and any comments we make on the results of our procedures thereon, were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. This is not a complete list of all risks identified by our audit.

### Key audit matter

#### Valuation of financial assets and liabilities at fair value through profit or loss

Refer to the individual Schedule of Investments, Note 2(d) (ii) (Material accounting policies - Investments), Note 7 (a) (i) (Financial risk management - market risk - price risk) and Note 8 (Fair value measurement).

As of 30 June 2025, the investment portfolios are comprised primarily of equities and government bonds. A number of the sub-funds also hold Total Return Swaps.

We focused on the valuation of the investments held by the ICAV's sub-funds as these financial assets and liabilities at

#### How our audit addressed the key audit matter

The fair value of the investment positions held by the subfunds is determined by the Administrator in conjunction with the Investment Manager.

We reviewed the controls surrounding the valuation of investments detailed in the administrator's controls report.

We tested the valuation of the equities and government bonds by independently obtaining price quotations from third party vendor sources for the equities and government bonds held by each sub-fund included within the financial statements, where possible.

#### Key audit matter

### How our audit addressed the key audit matter

fair value through profit or loss represent the principal element of the NAV of the sub-funds as disclosed in the Statement of Financial Position within the audited financial statements.

We tested the valuation of the total return swaps by using our internal valuation expert to develop an independent estimate of the fair value and to determine whether management's fair value estimate was reasonable.

Existence of financial assets and liabilities at fair value through profit or loss

result of the procedures we performed.

We reviewed the controls surrounding the safe-keeping and reconciliation of investment positions detailed in the administrator's controls report.

No material uncorrected misstatements were identified as a

Refer to the individual Schedule of Investments, Note 2(d) (ii) (Material accounting policies - Investments), Note 7 (a) (i) (Financial risk management - market risk - price risk) and Note 8 (Fair value measurement).

We obtained independent confirmation of the equity, government bonds and swap positions held with the Depositary and counterparties respectively. We then reconciled these confirmations to the accounting records maintained by the sub-funds' Administrator and evaluated any material differences identified.

The financial assets and liabilities at fair value through profit or loss are comprised primarily of equities and government bonds as at 30 June 2025 which are held by the depository. A number of the sub-funds also hold Total Return Swaps with counterparties.

No material uncorrected misstatements were identified as a result of the procedures we performed.

We focused on the existence of the investments held by the ICAV's sub-funds as these financial assets and liabilities at fair value through profit or loss represent the principal element of the NAV of the sub-funds as disclosed in the Statement of Financial Position within the audited financial statements.

#### How we tailored the audit scope

We tailored the scope of our audit to ensure that we performed enough work to be able to give an opinion on the financial statements as a whole, taking into account the structure of the ICAV, the accounting processes and controls, and the industry in which it operates.

The directors control the affairs of the ICAV and are responsible for the overall investment policy which is determined by them. The ICAV engages the Manager to manage certain duties and responsibilities with regards to the day to day management of the ICAV. The Manager has delegated certain responsibilities to Global X Management Company, LLC (the 'Investment Manager') and to SEI Investments – Global Fund Services Limited (the 'Administrator'). The financial statements, which remain the responsibility of the directors, are prepared on their behalf by the Administrator. The ICAV has appointed SEI Investments – Depositary and Custodial Services (Ireland) Limited (the "Depositary") to act as Depositary of the ICAV's assets. In establishing the overall approach to our audit we assessed the risk of material misstatement at a sub-fund level, taking into account the nature, likelihood and potential magnitude of any misstatement. As part of our risk assessment, we considered the ICAV's interaction with the Administrator, and we assessed the control environment in place at the Administrator.

#### **Materiality**

The scope of our audit was influenced by our application of materiality. We set certain quantitative thresholds for materiality. These, together with qualitative considerations, helped us to determine the scope of our audit and the nature, timing and extent of our audit procedures on the individual financial statement line items and disclosures and in evaluating the effect of misstatements, both individually and in aggregate on the financial statements as a whole.

Based on our professional judgement, we determined materiality for the financial statements of each of the ICAV's subfunds as follows:

Overall materiality and how we determined it	50 basis points (2024: 50 basis points) of Net asset value attributable to holders of redeemable participating shares ("NAV") at 30 June 2025 (2024: 30 June 2024) for each of the ICAV's sub-funds.
Rationale for benchmark applied	We have applied this benchmark because the main objective of the ICAV is to provide investors with a total return at a sub-fund level, taking account of the capital and income returns.

We use performance materiality to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements exceeds overall materiality. Specifically, we use performance materiality in determining the scope of our audit and the nature and extent of our testing of account balances, classes of transactions and disclosures, for example in determining sample sizes. Our performance materiality was 75%% of overall materiality.

In determining the performance materiality, we considered a number of factors - the history of misstatements, risk assessment and aggregation risk and the effectiveness of controls - and concluded that an amount at the upper end of our normal range was appropriate.

We agreed with the Board of Directors that we would report to them misstatements identified during our audit above 5 basis points of each sub-fund's NAV, for NAV per share impacting differences (2024: 5 basis points of each sub-fund's NAV, for NAV per share impacting differences ) as well as misstatements below that amount that, in our view, warranted reporting for qualitative reasons.

#### Conclusions relating to going concern

Our evaluation of the directors' assessment of the sub-funds' ability to continue to adopt the going concern basis of accounting included:

- Obtaining an understanding of the liquidity risks of the ICAV for each of the sub-funds and the measures to mitigate and manage these risks (as disclosed in Note 7 Financial risk management);
- Obtaining management's assessment of going concern which included a consideration of the capital activity of the sub-funds, sub-fund launches and the sub-funds' listing status;
- Agreeing the liquidity terms surrounding the ICAV's ability to manage liquidity risk (as per note 7b Financial risk management Liquidity risk), to the legal documents;
- Considering post year end capital activity; and
- Discussing management's plans to assess if there is a plan to terminate any of the sub-funds.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the sub-funds' ability to continue as a going concern for a period of at least twelve months from the date on which the financial statements are authorised for issue.

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the subfunds' ability to continue as a going concern.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

### Reporting on other information

The other information comprises all of the information in the Annual Report and Audited Financial Statements other than the financial statements and our auditors' report thereon. The directors are responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon. In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

Based on the responsibilities described above and our work undertaken in the course of the audit, the Irish Collective Asset-management Vehicles Act 2015 requires us to also report the opinion as described below:

#### Directors' Report

 In our opinion, based on the work undertaken in the course of the audit, the information given in the Directors' Report for the year ended 30 June 2025 is consistent with the financial statements.

#### Responsibilities for the financial statements and the audit

#### Responsibilities of the directors for the financial statements

As explained more fully in the Directors' Responsibilities Statement set out within the financial statements, the directors are responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view.

The directors are also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the sub-funds' ability to continue as going concerns, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the ICAV or to cease operations, or have no realistic alternative but to do so.

#### Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud, is detailed below.

Based on our understanding of the ICAV and industry, we identified that the principal risks of non-compliance with laws and regulations related to the Irish Collective Asset-management Vehicles Act 2015, and we considered the extent to which non-compliance might have a material effect on the financial statements. We also considered those laws and regulations that have a direct impact on the preparation of the financial statements such as the Irish Collective Asset-management Vehicles Act 2015 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended). We evaluated management's incentives and opportunities for fraudulent manipulation of the financial statements (including the risk of override of controls), and determined that the principal risks were related to Management Override of Controls.

Audit procedures performed by the engagement team included:

- Enquiry of management to identify any instances of non-compliance with laws and regulations;
- Identifying and testing year end journal entries that met our specific risk based criteria;
- Designing audit procedures to incorporate unpredictability around the nature, timing and extent of our testing;
- Reviewing relevant minutes of the meetings of the board of directors; and
- Reviewing financial statement disclosures and agreeing to supporting documentation to assess compliance with applicable laws and regulations.

There are inherent limitations in the audit procedures described above. We are less likely to become aware of instances of non-compliance with laws and regulations that are not closely related to events and transactions reflected in the financial statements. Also, the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion.

Our audit testing might include testing complete populations of certain transactions and balances, possibly using data auditing techniques. However, it typically involves selecting a limited number of items for testing, rather than testing complete populations. We will often seek to target particular items for testing based on their size or risk characteristics. In

other cases, we will use audit sampling to enable us to draw a conclusion about the population from which the sample is selected.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA website at:

https://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8f-a98202dc9c3a/Description of auditors responsibilities for audit.pdf.

This description forms part of our auditors' report.

#### Use of this report

This report, including the opinions, has been prepared for and only for the shareholders of each of the sub-funds as a body in accordance with section 120 of the Irish Collective Asset-management Vehicles Act 2015 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

### Other required reporting

#### Irish Collective Asset-management Vehicles Act 2015 exception reporting

#### Directors' remuneration

Under the Irish Collective Asset-management Vehicles Act 2015 we are required to report to you if, in our opinion, the disclosures of directors' remuneration specified by section 117 of that Act have not been made. We have no exceptions to report arising from this responsibility.

#### **Appointment**

We were appointed by the Board of Directors on 14 May 2021 to audit the financial statements for the year ended 30 June 2021 and subsequent financial periods. The period of total uninterrupted engagement is 5 years, covering the years ended 30 June 2021 to 30 June 2025.

Mary Ruane

for and on behalf of PricewaterhouseCoopers Chartered Accountants and Statutory Audit Firm Dublin

#### 1. Nature of operations

Global X ETFs ICAV (the "ICAV") was registered in Ireland, registration number C435449, pursuant to the Irish Collective Asset-management Vehicles Act 2015 (the "ICAV Act") on 20 July 2020 and authorised by the Central Bank of Ireland (the "Central Bank") as an Undertaking for Collective Investment in Transferable Securities pursuant to the European Communities (Undertaking for Collective Investment in Transferable Securities) Regulations 2011 (S.I. No 352 of 2011), and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (S.I. 230 of 2019) (collectively the "UCITS Regulations").

The ICAV is organised in the form of an umbrella fund with segregated liability between Sub-Funds. Each Sub-Fund has a distinct portfolio of investments, and the investment objective and policy of each Sub-Fund is formulated by Global X Management Company LLC (the "Investment Manager"). At 30 June 2025, the following Sub-Funds were in operation:

Sub-Funds	Launch date
Global X Video Games & Esports UCITS ETF	17 December 2020
Global X Telemedicine & Digital Health UCITS ETF	17 December 2020
Global X Genomics & Biotechnology UCITS ETF	2 November 2021

Global X Europe Focused Defence Tech UCITS ETF	21 May 2025

During the financial year ended 30 June 2025, Global X NDX Quarterly Tail Hedge UCITS ETF was approved by the Central Bank, but had not launched prior to 30 June 2025.

Notes to the Financial Statements (continued)

For the year ended 30 June 2025

### 1. Nature of operations (continued)

Global X Management Company LLC was appointed as Investment Manager and Distributor of the ICAV pursuant to the investment management and distribution agreement between the ICAV, the Manager and the Investment Manager. Global X Management Company (Europe) Limited (the "Manager") serves as the Manager of the ICAV.

The registered office of the ICAV is 10 Earlsfort Terrace, Dublin 2, D02 T380, Ireland. SEI Investments – Global Fund Services Limited (the "Administrator") is the administrator. SEI Investments – Depositary and Custodial Services (Ireland) Limited (the "Depositary") is the depositary. Brown Brothers Harriman & Co. and Brown Brothers Harriman Fund Administration Services (Ireland) Limited have been appointed as the custodian (the "Custodian") and transfer agent (the "Transfer Agent"), respectively.

### 2. Basis of preparation and material accounting policies

### (a) Statement of compliance

The financial statements of each of the Sub-Funds are prepared in accordance with International Financial Reporting Standards ("IFRS"), as adopted by the European Union, the UCITS Regulations, and the ICAV Act. This report presents financial statements for the following Sub-Funds as at 30 June 2025:

Global X Video Games & Esports UCITS ETF Global X Telemedicine & Digital Health UCITS ETF Global X U.S. Infrastructure Development UCITS ETF Global X FinTech UCITS ETF Global X Robotics & Artificial Intelligence UCITS ETF Global X Autonomous & Electric Vehicles UCITS ETF Global X SuperDividend® UCITS ETF Global X Uranium UCITS ETF Global X Disruptive Materials UCITS ETF Global X Nasdaq 100® Covered Call UCITS ETF Global X Genomics & Biotechnology UCITS ETF Global X Cloud Computing UCITS ETF Global X CleanTech UCITS ETF Global X Cybersecurity UCITS ETF Global X Internet of Things UCITS ETF Global X Copper Miners UCITS ETF	Global X Lithium & Battery Tech UCITS ETF Global X Data Center REITs & Digital Infrastructure UCITS ETF Global X Blockchain UCITS ETF Global X Hydrogen UCITS ETF Global X Wind Energy UCITS ETF Global X Solar UCITS ETF Global X Solar UCITS ETF Global X AgTech & Food Innovation UCITS ETF Global X Silver Miners UCITS ETF Global X S&P 500® Quarterly Buffer UCITS ETF Global X S&P 500® Quarterly Tail Hedge UCITS ETF Global X S&P 500® Covered Call UCITS ETF Global X S&P 500® Annual Buffer UCITS ETF Global X S&P 500® Annual Tail Hedge UCITS ETF Global X 1-3 Month T-Bill UCITS ETF Global X European Infrastructure Development UCITS ETF Global X Defence Tech UCITS ETF
Global X Clean Water UCITS ETF	Global X Europe Focused Defence Tech UCITS ETF

This report presents comparative financial statements as at 30 June 2024 on the Statement of Financial Position and also presents comparative financial statements for the year/period ended 30 June 2024 on the Statement of Comprehensive Income, Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares, Statement of Changes in Equity, Statement of Cash Flows, and related notes.

Global X NDX Quarterly Tail Hedge UCITS ETF had not commenced operations as at 30 June 2025. There are no financial statements to present for the year ended 30 June 2025.

Notes to the Financial Statements (continued)

For the year ended 30 June 2025

#### 2. Basis of preparation and material accounting policies (continued)

#### (b) Basis of preparation

The financial statements of the Sub-Funds are presented in United States Dollars ("USD" or "US\$") except for Global X European Infrastructure Development UCITS ETF, Global X Euro Stoxx 50 Covered Call UCITS ETF and Global X Europe Focused Defence Tech UCITS ETF which are presented in Euro ("EUR" or "€"). The financial statements have been prepared under the going concern basis and under the historical cost convention, as modified by the revaluation of financial assets at fair value through profit or loss.

The preparation of financial statements in conformity with IFRS requires management to make judgements, critical accounting estimates and assumptions that affect the application of policies and the reported amounts of assets and liabilities, income, and expense. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period and future periods if the revision affects both current and future periods.

All references to net assets throughout this document refer to net assets attributable to holders of redeemable participating shares.

Corresponding figures for the year ended 30 June 2024 have been reclassified to ensure the comparability with the figures for the year ended 30 June 2025.

#### (c) Changes in relevant accounting standards

#### Standards and amendments to existing standards effective during the year

The following amended standard and interpretation became effective during the year:

#### Effective date 1 January 2025:

• Lack of exchangeability - Amendments to IAS 21

The amendment did not have a material impact on the financial statements of the Sub-Funds.

### Standards, amendments, and interpretations that are not yet effective for the year and not early adopted

A number of new standards, amendments to standards and interpretations are effective for annual periods beginning after 1 July 2025 and have not been applied in preparing these financial statements. None of these are expected to have a material effect on the financial statements of the Sub-Funds.

### (d) Material accounting policies

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied for the periods presented, unless otherwise stated.

### i. Foreign currency translation

### Functional and presentation currency

Functional currency is the currency of the primary economic environment in which the Sub-Funds operate. When indicators of the primary economic environment are mixed, management uses its judgement to determine the functional currency that most faithfully represents the economic effect of the underlying transactions, events, and conditions. The Board of Directors has determined that the functional currency of the Sub-Funds is USD ("US\$") except for Global X European Infrastructure Development UCITS ETF, Global X Euro Stoxx 50 Covered Call UCITS ETF and Global X Europe Focused Defence Tech UCITS ETF, the functional currency of which is EUR ("€"). Investor subscriptions and redemptions are received and paid in the currency of the relevant share class which is predominantly in USD and predominantly in EUR for Sub-Funds with USD as the functional currency and for Sub-Funds with EUR as the functional currency, respectively.

Notes to the Financial Statements (continued)

For the year ended 30 June 2025

### 2. Basis of preparation and material accounting policies (continued)

#### (d) Material accounting policies (continued)

#### i. Foreign currency translation (continued)

#### Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign currency assets and liabilities are translated into the functional currency using the exchange rate prevailing at the year-end date.

Foreign exchange gains and losses arising from translation are included in the Statement of Comprehensive Income.

#### Net gains/(losses) on foreign exchange translation

Foreign exchange gains and losses relating to cash and cash equivalents are presented in the Statement of Comprehensive Income within 'Net gains/(losses) on financial assets and liabilities at fair value through profit or loss'.

Foreign exchange gains and losses relating to the financial assets and liabilities carried at fair value through profit or loss are presented in the Statement of Comprehensive Income within 'Net gains/(losses) on financial assets and liabilities at fair value through profit or loss'.

#### ii. Investments

#### Classification

In accordance with IFRS 9, the Sub-Funds classify equity investments (including rights and warrants), treasury bills and derivative contracts as financial assets or financial liabilities at fair value through profit or loss.

All of the Sub-Funds' financial assets and liabilities designated at fair value through profit or loss are financial instruments that are classified as held for trading and are considered managed investments. Their performance is evaluated on a fair value basis in accordance with the Sub-Funds' investment strategy.

All other financial assets and liabilities including cash, cash equivalents, receivables and payables are classified as being measured at amortised cost. Measurement at amortised cost takes into account any premium or discount on acquisition as well as transaction costs and fees that are an integral part of the effective interest rate. All financial assets measured at amortised cost are short term in nature and the application of the expected credit loss model does not impact the carrying amounts of these financial assets as they approximate their fair values under IFRS 9.

### Recognition, derecognition and measurement

Regular purchases and sales of investments are recognised on the trade date - the date on which each Sub-Fund commits to purchase or sell the investment. Financial assets and financial liabilities at fair value through profit or loss are initially recognised at fair value. Transaction costs are expensed as incurred in the Statement of Comprehensive Income. Financial assets are derecognised when the rights to receive cash flows from the investments have expired or the Sub-Fund has transferred substantially all risks and rewards of ownership.

Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value. Realised and unrealised gains and losses arising from changes in the fair value of the 'financial assets or financial liabilities at fair value through profit or loss' category are presented in the Statement of Comprehensive Income within 'Net gains/(losses) on financial assets and liabilities at fair value through profit or loss' in the financial year/period in which they arise.

In accordance with IFRS 9, the ICAV applies the 'expected credit loss' ("ECL") model when determining if financial assets are subject to impairment. This impairment model applies to financial assets measured at amortised cost and an assessment is required to determine if an ECL is required. The ICAV has determined that the application of IFRS 9's impairment requirements result in no ECL impairment as the cash and cash equivalents, receivables and payables are short-term in nature.

Notes to the Financial Statements (continued)

For the year ended 30 June 2025

### 2. Basis of preparation and material accounting policies (continued)

### (d) Material accounting policies (continued)

#### ii. Investments (continued)

#### Fair value estimation

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value of financial assets and liabilities traded in active markets (such as publicly traded derivatives and equities (including rights and warrants)) are based on quoted market prices at the close of trading on the reporting date. In circumstances where the last traded price is not within the bid-ask spread, management will determine the point within the bid-ask spread that is most representative of fair value.

If a quoted market price is not available on a recognised market or from a broker/dealer for non-exchange traded financial instruments, the fair value of such investment shall be estimated with care and in good faith by a competent professional person, body, firm, or corporation (appointed for such purpose by the Board of the ICAV) and such fair value shall be determined on the basis of the probable realisation value of the investment.

The total return swap has been entered into by some Sub-Funds, and is revalued by the Administrator, reviewed by the Investment Manager, and agreed to counterparty information.

If the Investment Manager considers that the methods of valuation set out above do not provide a fair valuation of a particular asset, it may ask for the fair value to be estimated with care and in good faith by a competent person appointed by the Board of the ICAV and approved for the purpose by the Depositary.

Cash deposits and similar investments shall be valued at their face value together with accrued interest.

As at 30 June 2025, the fair values of all of the Sub-Funds' investment in equities were determined by reference to quoted market prices except for investments in two securities that were suspended on trading, two securities that were not traded and three securities domiciled in Russia. The two securities that were suspended on trading were Jinchuan Group International Resources Co Ltd from Global X Copper Miners UCITS ETF and Peninsula Energy Ltd from Global X Uranium UCITS ETF. The two securities that were not traded were Zhejiang Akcome New Energy Technology Co Ltd from Global X Solar UCITS ETF and ESG Minerals Ltd from Global X Lithium & Battery Tech UCITS ETF. The three securities domiciled in Russia include RusHydro PJSC from Global X Renewable Energy Producers UCITS ETF, Magnitogorsk Iron & Steel Works PJSC and Severstal PAO from Global X SuperDividend® UCITS ETF which were all written down. See Note 8 for more details.

As at 30 June 2024, the fair values of all of the Sub-Funds' investment in equities were determined by reference to quoted market prices except for investments in two securities that were suspended on trading, three securities (including rights and warrant) that were not traded, and three securities domiciled in Russia. The two securities suspended on trading were Scilex Holding Company from Global X Genomics & Biotechnology UCITS ETF and Zhejiang Akcome New Energy Technology Co Ltd from Global X Solar UCITS ETF. The three securities (including rights and warrant) that were not traded were Vizsla Royalties Corp and Vizsla Royalties Corp warrant from Global X Silver Miners UCITS ETF and MMG LTD rights from Global X Disruptive Materials UCITS ETF and Global X Copper Miners UCITS ETF. The three securities domiciled in Russia include RusHydro PJSC from Global X Renewable Energy Producers UCITS ETF, Magnitogorsk Iron & Steel Works PJSC and Severstal PAO from Global X SuperDividend® UCITS ETF which were all written down. See Note 8 for more details.

### iii. Cash and cash equivalents and bank overdraft

Cash and cash equivalents include cash in hand, deposits held at call with banks and other short-term investments in an active market with original maturities of three months or less. Bank overdraft, if any, is repayable on demand and is included within current liabilities in the Statement of Financial Position.

Notes to the Financial Statements (continued)

For the year ended 30 June 2025

### 2. Basis of preparation and material accounting policies (continued)

### (d) Material accounting policies (continued)

#### iv. Expenses

Expenses are recognised on an accrual basis. The only expenses charged to and accrued by the Sub-Funds is the TER.

#### v. Income

Interest income is recognised on a time-proportionate basis using the effective interest method. Dividend income from equity securities designated at fair value through profit or loss is recognised in the "Dividend income" line in the Statement of Comprehensive Income. Dividend income is recognised in profit or loss on the date that the right to receive the payment is established. For quoted equity securities, this is usually the ex-dividend date. For unquoted equity securities, this is usually the date on which the shareholders approve the payment of a dividend. Dividend income is shown gross of any non-recoverable withholding taxes, which are presented separately in the Statement of Comprehensive Income.

Securities lending income is income earned from securities lending arrangements which is accrued and paid on a monthly basis. To the extent the Sub-Funds undertake securities lending, the relevant supplement will disclose the proportion of the revenue generated which will remain with the Sub-Fund and the proportion of the revenue generated (representing the attendant direct and indirect operational costs and fees of any securities lending) which will be retained by the securities lending agent. Such direct and indirect operational costs and fees shall not include hidden revenue.

#### vi. Redeemable participating shares

The Sub-Funds are open-ended and issue redeemable participating shares, which are redeemable at a shareholder's option. These shares can be put back to the respective Sub-Fund for cash equal to a proportionate share of the Sub-Funds trading Net Asset Value ("NAV") calculated in accordance with the prospectus. These shares are classified as equity or liability, as appropriate, in accordance with IAS 32 Financial Instruments - Presentation ("IAS 32"). Typically, where a Sub-Fund has only one such share class in issue, those shares qualify for equity classification as the qualifying criteria in IAS 32.16A and 16B are met. On the other hand, where a Sub-Fund has more than one such share class in issue, those share classes do not, for example, typically have identical rights to each other and therefore those qualifying criteria for equity classification are not met. Where the criteria are no longer met, the Sub-Fund reclassifies from the date when the shares cease to qualify for equity classification. The shares, when first classified as financial liabilities, are measured at their fair value. Subsequently the redeemable shares are classified as financial liabilities at amortised cost and are measured at the present value of the redeemption amounts.

A puttable financial instrument that includes a contractual obligation for the respective Sub-Funds to repurchase or redeem that instrument for cash or another financial asset is classified as equity if it meets all of the conditions below:

- it entitles the holder to a pro rata share of the Sub-Fund's net assets in the event of the Sub-Fund's liquidation;
- it is in the class of instruments that is subordinate to all other classes of instruments;
- all financial instruments in the class of instruments that are subordinate to all other classes of instruments have identical features;
- apart from the contractual obligation for the respective Sub-Fund to repurchase or redeem the instrument for cash or another financial asset, the instrument does not include any other features that would require classification as a liability; and
- the total expected cash flows attributable to the instrument over its life are based substantially on the profit or loss, the change in the recognised net assets or the change in the fair value of the recognised and unrecognised net assets of the respective Sub-Fund over the life of the instrument.

# 2. Basis of preparation and material accounting policies (continued)

## (d) Material accounting policies (continued)

## vi. Redeemable participating shares (continued)

As at 30 June 2025, the following Sub-Funds have two classes of units in issue and are classified as financial liability.

Sub-Fund	Currency	Net Assets Classified as Liability
Global X Video Games & Esports UCITS ETF	USD	10,280,266
Global X Telemedicine & Digital Health UCITS ETF	USD	5,353,031

Notes to the Financial Statements (continued)

For the year ended 30 June 2025

### 2. Basis of preparation and material accounting policies (continued)

### (d) Material accounting policies (continued)

#### vii. Distribution policy

The Directors are empowered by the Instrument of Incorporation to declare and pay dividends in respect of the shares in any Sub-Fund in the ICAV out of the net income of the relevant Sub-Fund less accrued expenses of the ICAV. The Directors are also empowered by the Instrument of Incorporation to declare and pay dividends in respect of the shares in any Sub-Fund in the ICAV out of the capital of the relevant Sub-Fund. Where a Sub-Fund intends to pay dividends out of capital this will be set out in the relevant supplement for that Sub-Fund.

It is intended to declare dividends in respect of the share classes identified as "distributing" classes of the Sub-Funds. Distributions in respect of these classes will be declared on each distribution date, semi-annually, in each year provided that such dates are not business days. Where dividends are paid, they shall be paid out of the net income or capital of the ICAV which is attributable to the relevant class and shall be paid by way of electronic transfer.

It is not the current intention of the Directors to declare dividends in respect of the share classes identified as "accumulating" classes. The income and earnings and gains of the accumulating classes will be accumulated and reinvested in the Sub-Funds.

### viii. Subscriptions receivable

Subscriptions receivable, if any, is reported in the Statement of Financial Position and relates to unsettled subscriptions.

### ix. Redemptions payable

Redemptions payable, if any, relates to the amount requested in the redemption notice becoming fixed. This generally may occur either at the time of the receipt of a valid and approved notice, or on the last day of a fiscal period, depending on the nature of the request. As a result, redemptions paid after the end of the period, but based upon period end capital balance are reflected as redemptions payable.

#### x. Receivable for securities sold

Receivable for securities sold, if any, is reported in the Statement of Financial Position and relates to unsettled sales of the equity trades.

### xi. Payable for securities purchased

Payable for securities purchased, if any, is reported in the Statement of Financial Position and relates to unsettled purchases of equity trades.

### xii. Soft commissions

There were no soft commission arrangements during the years ended 30 June 2025 and 30 June 2024.

Notes to the Financial Statements (continued)

Further information on these securities lending arrangements is available in Appendix 3 "Securities Financing Transactions Regulations Disclosures (Unaudited)".

Notes to the Financial Statements (continued)

For the year ended 30 June 2025

### 2. Basis of preparation and material accounting policies (continued)

#### (d) Material accounting policies (continued)

#### xiv. Offsetting financial instruments

Financial assets and liabilities are offset, and the net amount reported in the Statement of Financial Position when, and only when, there is a legally enforceable right to set off the recognised amounts and there is an intention to settle on a net basis or realise the assets and settle the liability simultaneously. Please refer to Note 7(f) "Offsetting and Amounts Subject to Master Netting/Similar Agreements" for further details.

#### 3. Taxation

Under current law and practice the ICAV qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act 1997, as amended. On that basis, it is not chargeable to Irish tax on its income or gains.

Notwithstanding the above, Irish tax may arise on the happening of a "chargeable event". A chargeable event includes:

- a) Any distribution payments made to shareholders by the ICAV in respect of their shares;
- b) Any encashment, redemption, cancellation, or transfer of shares;
- c) The holding of shares at the end of each eight-year period beginning with the acquisition of such shares.

No Irish tax will arise on the ICAV in respect of chargeable events in respect of:

- a) A shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with Section 739D of the Taxes Consolidation Act, 1997, as amended, are held by the ICAV or the ICAV has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations under the ICAV with the necessary signed statutory declarations;
- b) Certain exempted Irish tax resident shareholders who have provided the ICAV with the necessary signed statutory declarations; and
- c) Any transaction (which might otherwise be a chargeable event) in relation to shares held in a recognised clearing system as designated by order of the Irish Revenue Commissioners.

Capital gains, dividends and interest received by the ICAV may be subject to taxes, including capital gains taxes and withholding taxes in the countries in which the issuers of investments are located, which may be reflected in the NAV of the ICAV. Dividend and interest income has been recognised gross in the Statement of Comprehensive Income, with withholding taxes recognised separately. Such taxes may not be recoverable by the ICAV or its shareholders.

The ICAV has evaluated the tax positions and has concluded that there are no significant tax positions requiring recognition, measurement, or disclosure in the financial statements. Tax penalties and interest, if any, would be accrued as incurred and would be classified as tax expense in the Statement of Comprehensive Income. During the years ended 30 June 2025 and 30 June 2024, the ICAV did not incur any interest or penalties.

### 4. Share capital

The share capital of the ICAV shall at all times equal the NAV of the ICAV. The Directors are empowered to issue up to 500 billion shares of no-par value in the ICAV at the NAV per share on such terms as they may think fit. There are no rights of pre-emption upon the issue of shares in the ICAV. The subscriber shares issued by the ICAV ("Subscriber Shares") do not participate in the assets of any Sub-Fund. The ICAV reserves the right to redeem some or all of the Subscriber Shares provided that the ICAV at all times has a minimum issued share capital to the value of £300,000.

Notes to the Financial Statements (continued)

For the year ended 30 June 2025

### 4. Share capital (continued)

Each of the shares entitles the shareholder to participate equally on a pro rata basis in the dividends and net assets of a Sub-Fund attributable to the relevant class in respect of which they are issued, save in the case of dividends declared prior to becoming a shareholder. The Subscriber Shares' entitlement is limited to the amount subscribed and accrued interest thereon.

The proceeds from the issue of shares shall be applied in the books of the ICAV to the relevant Sub-Fund and shall be used in the acquisition on behalf of the relevant Sub-Fund of assets in which the Sub-Fund may invest. The records and accounts of each Sub-Fund shall be maintained separately.

The Directors reserve the right to redesignate any class from time to time, provided that shareholders in that class shall first have been notified by the ICAV that the shares will be redesignated and shall have been given the opportunity to have their shares redeemed by the ICAV, except that this requirement shall not apply where the Directors redesignate shares in issue in order to facilitate the creation of an additional class.

Each of the shares entitles the shareholder to attend and vote at meetings of the ICAV and of the relevant class of a Sub-Fund represented by those shares. No class confers on the holder thereof any preferential or pre-emptive rights or any rights to participate in the profits and dividends of any other class or any voting rights in relation to matters relating solely to any other class.

Any resolution to alter the class rights of the shares requires the approval of three quarters of the shareholders of the shares represented or present and voting at a general meeting duly convened in accordance with the Instrument of Incorporation.

The Instrument of Incorporation of the ICAV empowers the Directors to issue fractional shares in the ICAV. Fractional shares may be issued and shall not carry any voting rights at general meetings of the ICAV or of any Sub-Fund or class and the NAV of any fractional share shall be the NAV per share adjusted in proportion to the fraction.

It is intended that all but two of the Subscriber Shares will be redeemed by the ICAV at their NAV on the dealing day on which the first issue of shares is effected after the initial offer period ("Initial Offer Period"). The Initial Offer Period is the period set out by Directors in each relevant supplement in relation to any Sub-Fund or class as the period during which such shares are initially on offer unless such period is shortened or extended and notified to the Central Bank. The dealing day ("Dealing Day") is a day on which the New York Stock Exchange is open for normal business or such business day(s) as the Directors may from time to time determine for dealings in a Sub-Fund. The Subscriber Shares entitle the shareholders holding them to attend and vote at all meetings of the ICAV but do not entitle the holders to participate in the dividends or net assets of any Sub-Fund or of the ICAV.

The ICAV offers the following launched classes of shares in each Sub-Fund. The ICAV may also create additional classes of shares in each Sub-Fund in the future with prior notification to, and clearance in advance by, the Central Bank. Details of unlaunched share classes are set out in the supplement of each Sub-Fund.

Notes to the Financial Statements (continued)

For the year ended 30 June 2025

#### 4. Share capital (continued)

### **Subscriptions**

Shares will be issued on each Dealing Day at the appropriate NAV per share with an appropriate provision for duties and charges. Investors may subscribe for shares for cash on each Dealing Day by making an application by the dealing deadline. Consideration, in the form of cleared subscription monies/securities, must be received by the applicable settlement deadline.

#### Redemptions

Shareholders may effect a redemption of shares on any Dealing Day at the appropriate NAV per share, subject to an appropriate provision for duties and charges, provided that a valid redemption request from the shareholder is received by the ICAV by the dealing deadline on the relevant Dealing Day.

Shares will be redeemed at the applicable NAV per share on the Dealing Day as of which the redemption is effected, subject to any applicable fees associated with such redemption.

No redemption will be made until the applicant has completed and delivered to the Transfer Agent a redemption request and satisfied all the requirements of the Directors and the Manager as to such applicant's redemption request.

The net assets and NAV per share of each class of shares in issue as at 30 June 2025, 30 June 2024, and 30 June 2023 are as follows:

### 5. Fees and expenses

#### **TER Fees**

All of the following fees and expenses payable in respect of the share classes of the Sub-Funds are paid as one single fee, which will not exceed the amounts listed below. This is referred to as the total expense ratio or "TER". The TER is calculated and accrued daily from the NAV of each Sub-Fund and payable monthly in arrears by the ICAV at the rate set out below. The following fees and operational expenses of each Sub-Fund shall be paid out of the TER:

- All the ordinary operating and administrative expenses of the Sub-Fund, including, but not limited to, fees and expenses of the Manager, Depositary, Administrator, Transfer Agent, Distributor, the Directors, the costs of maintaining the Sub-Funds and any registration of the Sub-Funds with any governmental or regulatory authority; preparation, printing, and posting of prospectuses, sales literature and reports to shareholders, regulatory fees of the Central Bank and other governmental agencies; marketing expenses; insurance premiums; fees and expenses for legal, audit and other services; paying for licensing fees related to each Sub-Fund's Index and any distribution fees or expenses.

Should the above fees and operational expenses of each Sub-Fund exceed the TER, the additional expenses shall be borne by the Manager. Where all costs and expenses of a Sub-Fund are met and exceeded by the TER, the ICAV will pay any excess from the TER to the Investment Manager as the investment management fee. Refer to Note 10 for more details.

Notes to the Financial Statements (continued)

For the year ended 30 June 2025

## 7. Financial risk management

Each Sub-Fund has exposure to the following specific risks from financial instruments:

- market risk (including price risk, currency risk, interest rate risk, and concentration risk);
- liquidity risk; and
- credit risk.

### (a) Market Risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. The likelihood of these types of adverse changes and the extent to which they affect the business of the Sub-Funds cannot always be accurately predicted.

### (i) Price Risk

Price risk is the risk that the value of an investment may fluctuate as a result of changes in market prices, whether caused by factors specific to an individual investment or all factors affecting all instruments traded in the market.

The Manager monitors price risk on a daily basis in accordance with the Sub-Funds specific restrictions and the UCITS regulatory limits. The Manager has escalation procedures in place to report breaches of these risks limits to the Directors, the Depositary, the Investment Manager and the Regulator, where appropriate.

Based on historic movements and management's knowledge and experience of the financial markets, the Manager believes the movements represented by sensitivity percentages are 'reasonably possible' over a 12 month period. These assumptions are consistent with the assumptions used internally by management for planning purposes and the development of its financial risk management strategy.

Global X Video Games & Esports UCITS ETF

As at 30 June 2025, the Sub-Fund had 45 positions (30 June 2024: 41) with the top five being 28.71% of net assets (30 June 2024: 31.75%).

As at 30 June 2025, the Sub-Fund was invested in four industries (30 June 2024: three) with the highest industry exposure being 81.76% of net assets (30 June 2024: 84.77%).

As at 30 June 2025, should the price of the securities held by the Sub-Fund have increased or decreased by 10% (2024: 10%) with all other variables remaining constant the increase or decrease in the net assets attributable to holders of redeemable participating shares for the year would amount to approximately USD 1,025,985 (30 June 2024: USD 421,365).

Global X Telemedicine & Digital Health UCITS ETF

As at 30 June 2025, the Sub-Fund had 39 positions (30 June 2024: 41) with the top five being 25.90% of net assets (30 June 2024: 22.56%).

As at 30 June 2025, the Sub-Fund was invested in four industries (30 June 2024: four) with the highest industry exposure being 69.42% of net assets (30 June 2024: 72.36%).

As at 30 June 2025, should the price of the securities held by the Sub-Fund have increased or decreased by 10% (2024: 10%) with all other variables remaining constant the increase or decrease in the net assets attributable to holders of redeemable participating shares for the year would amount to approximately USD 534,699 (30 June 2024: USD 461,915).

Notes to the Financial Statements (continued)

For the year ended 30 June 2025

## 7. Financial risk management (continued)

### (a) Market Risk (continued)

### (i) Price Risk (continued)

Global X U.S. Infrastructure Development UCITS ETF

As at 30 June 2025, the Sub-Fund had 99 positions (30 June 2024: 99) with the top five being 17.73% of net assets (30 June 2024: 16.48%).

As at 30 June 2025, the Sub-Fund was invested in eight industries (30 June 2024: eight) with the highest industry exposure being 73.74% of net assets (30 June 2024: 71.89%).

As at 30 June 2025, should the price of the securities held by the Sub-Fund have increased or decreased by 10% (2024: 10%) with all other variables remaining constant the increase or decrease in the net assets attributable to holders of redeemable participating shares for the year would amount to approximately USD 57,107,546 (30 June 2024: USD 29,547,660).

#### Global X FinTech UCITS ETF

As at 30 June 2025, the Sub-Fund had 62 positions (30 June 2024: 64) with the top five being 32.05% of net assets (30 June 2024: 31.10%).

As at 30 June 2025, the Sub-Fund was invested in four industries (30 June 2024: four) with the highest industry exposure being 40.86% of net assets (30 June 2024: 44.92%).

As at 30 June 2025, should the price of the securities held by the Sub-Fund have increased or decreased by 10% (2024: 10%) with all other variables remaining constant the increase or decrease in the net assets attributable to holders of redeemable participating shares for the year would amount to approximately USD 532,064 (30 June 2024: USD 328,020).

Global X Robotics & Artificial Intelligence UCITS ETF

As at 30 June 2025, the Sub-Fund had 49 positions (30 June 2024: 42) with the top five being 41.46% of net assets (30 June 2024: 45.83%).

As at 30 June 2025, the Sub-Fund was invested in seven industries (30 June 2024: six) with the highest industry exposure being 57.60% of net assets (30 June 2024: 56.53%).

As at 30 June 2025, should the price of the securities held by the Sub-Fund have increased or decreased by 10% (2024: 10%) with all other variables remaining constant the increase or decrease in the net assets attributable to holders of redeemable participating shares for the year would amount to approximately USD 9,326,269 (30 June 2024: USD 6,221,854).

Global X Autonomous & Electric Vehicles UCITS ETF

As at 30 June 2025, the Sub-Fund had 74 positions (30 June 2024: 74) with the top five being 15.49% of net assets (30 June 2024: 21.09%).

As at 30 June 2025, the Sub-Fund was invested in six industries (30 June 2024: six) with the highest industry exposure being 38.20% of net assets (30 June 2024: 35.96%).

As at 30 June 2025, should the price of the securities held by the Sub-Fund have increased or decreased by 10% (2024: 10%) with all other variables remaining constant the increase or decrease in the net assets attributable to holders of redeemable participating shares for the year would amount to approximately USD 676,525 (30 June 2024: USD 1,006,099).

### (a) Market Risk (continued)

### (ii) Currency Risk

Currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates. The Sub-Funds invest in securities and other investments that are denominated in currencies other than the functional currency of the Sub-Funds. Accordingly, the value of the Sub-Funds assets may be affected favourably or unfavourably by fluctuations in currency rates and therefore the Sub-Funds will be subject to foreign exchange risks.

In accordance with the ICAV's policy, the Investment Manager monitors the Sub-Funds' currency exposures on a daily basis and reports regularly to the Board of Directors, which reviews the information provided by the Manager on any significant exposures at its periodic meetings.

The Sub-Funds had the following exposure to foreign currency as at 30 June 2025:

Global X Video Games & Esports UCITS ETF

			Non-		Forward	Net Foreign

- Global X S&P 500® Annual Buffer UCITS ETF
- Global X S&P 500® Annual Tail Hedge UCITS ETF
- Global X 1-3 Month T-Bill UCITS ETF

#### Sensitivity analysis

As at 30 June 2025, had the USD and EUR weakened by 10% (30 June 2024: USD by 10%) in relation to all currencies, with all other variables held constant, the increase in the value of the Sub-Funds' investments and other net assets and liabilities including cash and cash equivalents denominated in currencies other than USD and EUR attributable to holders of redeemable participating shares is disclosed on the prior pages and above.

A 10% (30 June 2024: USD by 10%) strengthening of the USD and EUR would have resulted in an equal but opposite effect on the above financial statement amounts on the basis that all other variables remain constant.

Based on historic movements and management's knowledge and experience of the financial markets, the Manager believes the movements represented by sensitivity percentages are 'reasonably possible' over a 12-month period. These assumptions are consistent with the assumptions used internally by management for planning purposes and the development of its financial risk management strategy.

Foreign currency rates used in the preparation of these financial statements are disclosed in Note 6.

#### (iii) Interest Rate Risk

Interest rate risk arises from the possibility that changes in interest rates will affect future cash flows or the fair values of financial instruments. Interest rate risk is not material in respect of the Sub-Funds.

Notes to the Financial Statements (continued)

For the year ended 30 June 2025

### 7. Financial risk management (continued)

#### (b) Liquidity Risk

This is the risk that a lack of a market in certain portfolio securities could prevent the Sub-Funds from liquidating unfavourable positions or prevent the Sub-Funds from funding redemptions from existing shareholders. The Manager compares the liquidity of portfolio assets versus the redemption profile of the Sub-Funds to determine if there are any potential liquidity shortfalls. The portfolio of investments can be easily liquidated in order to meet the redemption requests of the shareholders as they occur and meet contractual financial liabilities.

The ICAV may temporarily suspend the determination of the NAV and the sale, conversion or redemption of shares in any Sub-Fund during:

- (a) any period (other than ordinary holiday or customary weekend closings) when any of the principal markets on which any significant portion of the investments of the relevant Sub-Fund from time to time are quoted, listed, traded or dealt in is closed (otherwise than for customary weekend or ordinary holidays) or during which dealings therein are restricted or suspended or trading on any relevant futures exchange or market is restricted or suspended;
- (b) any period when, as a result of political, economic, military or monetary events or any circumstances outside the control, responsibility and power of the Directors, disposal or valuation of a substantial portion of the investments of a Sub-Fund is not reasonably practicable without this being seriously detrimental to the interests of Investors of a Sub-Fund;
- (c) any period during which the disposal or valuation of investments which constitute a substantial portion of the assets of a Sub-Fund is not practically feasible or if feasible would be possible only on terms materially disadvantageous to Investors:
- (d) any period when for any reason the prices of any investments of a Sub-Fund cannot be reasonably, promptly or accurately ascertained by the Administrator;
- (e) any period when remittance of monies which will, or may, be involved in the realisation of, or in the payment for, investments of a Sub-Fund cannot, in the opinion of the Directors, be carried out at normal rates of exchange;
- (f) any period when the proceeds of the sale or repurchase of the shares cannot be transmitted to or from a Sub-Fund's account;
- (g) any period when a notice to terminate a Sub-Fund has been served or when a meeting of shareholders has been convened to consider a motion to wind up the ICAV or to terminate a Sub-Fund;
- (h) upon the occurrence of an event causing the ICAV to enter liquidation or a Sub-Fund to terminate; or
- (i) any period where the Directors consider it to be in the best interests of the Investors of the ICAV or a Sub-Fund to do so.

A suspension of repurchases may be made at any time prior to the payment of the repurchase monies and the removal of the shareholder's name from the register of members. A suspension of subscriptions may be made at any time prior to the entry of a shareholder's name on the Register.

Any such suspension shall be notified immediately (without delay) and in any event within the same business day to the Euronext Dublin, the Central Bank and all relevant stock exchanges which the ICAV is required to notify. Where possible, all reasonable steps will be taken to bring a period of suspension to an end as soon as possible.

Notes to the Financial Statements (continued)

For the year ended 30 June 2025

### 7. Financial risk management (continued)

#### (c) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Sub-Funds, resulting in a financial loss to the Sub-Funds.

The Sub-Funds manage credit risk by monitoring the financial condition and credit rating of their Depositary/Custodian and other counterparties.

The Sub-Funds currently hold no securities, cash, receivables and any other assets with any party other than the Custodian and Citigroup Global Markets Limited. The Custodian is rated by Fitch Ratings with a Long-Term Debt rating of A+ as at 30 June 2025 and 30 June 2024. Insolvency or bankruptcy of the Custodian may cause the Sub-Funds rights with respect to its assets held by the Depositary to be delayed or limited. The total return swaps of the Sub-Funds are held by Citigroup Global Markets Limited which is rated by Fitch Ratings with a Derivative Counterparty Rating of A+(dcr) as at 30 June 2025 and 30 June 2024.

The maximum exposure to credit risk is the carrying value of the assets held by the respective Sub-Fund.

The Sub-Funds that replicate their investments strategies through use of swaps and a basket of global equity securities and equity related securities (the "Basket") are exposed to the following risks:

#### Swaps Counterparty Risk

The return payable under swaps with an approved counterparty is subject to the credit risk of the approved counterparty. In addition, the approved counterparty will act as the calculation agent under the swaps (the "Calculation Agent"). Investors should note that not only will they be exposed to the credit risk of the approved counterparty but also potential conflicts of interest in the performance of the function of Calculation Agent by the approved counterparty. The approved counterparty has undertaken to use its reasonable endeavours to resolve any such conflicts of interest fairly (having regard to its respective obligations and duties) and to ensure that the interests of the ICAV and its investors are not unfairly prejudiced. The Directors believe that the approved counterparty is suitable and competent to perform such functions. In addition, the valuations provided by the approved counterparty in its role as Calculation Agent will be verified at least weekly by a party independent of the approved counterparty who shall either be the Administrator or sourced by the Administrator as appropriate and who has been approved for such purpose by the Depositary. Where swap valuations from an approved counterparty in its role as Calculation Agent would not be provided in time for the calculation of the Sub-Fund's NAV, the Sub-Fund will value such swaps by utilising the publicly available values for the Index and the Basket, as determined by a competent person appointed by the Directors. This value will be reconciled to the Calculation Agent's valuation on a daily basis. However, on any day, this alternative valuation could diverge from the valuation calculated by the Calculation Agent, meaning that the valuation of the swaps included in the Sub-Fund's NAV on any given day may not reflect the Calculation Agent's valuation. Currently, as it is not expected that swap valuations from the approved counterparty in its role as Calculation Agent will be available at the time Sub-Fund's NAV is calculated, the alternative valuation is expected to be used.

#### Basket Default Risk

Where a Sub-Fund intends to invest primarily in the Basket and thus enter the swap. The Reference Index is the underlying exposure that the investor will receive within the cap and put-spread bounds. This exposure is received via a swap on the Index. The performance of the Basket is delivered to the swap counterparties in return for the exposure on the Index being received by the Sub-Fund, there is no remaining economic exposure in the Sub-Fund to the Basket. An unrectified default by a swap counterparty, may result, in the Sub-Fund having economic exposure to the Basket until the matter is resolved.

Further information on the use of derivative contracts is available in Note 9 Derivative Contracts.

### 7. Financial risk management (continued)

#### (d) Concentration Risk

The Sub-Funds are subject to concentration risk if they have a large exposure to a particular holding or if investors in the Sub-Funds have a holding of shares greater than 5%. The Sub-Funds may invest substantially all of their assets in one country, as a result the Sub-Funds will have greater exposure to market, political, legal, economic and social risks of that country than a Sub-Fund which diversifies country risk across a number of countries.

Each Sub-Fund that aims to track and replicate an index (the "Index Tracking Sub-Fund") seeks to achieve a return which corresponds generally to the price and yield performance, before fees and expenses, of the relevant Index as published by the Index Provider. Index Provider is an entity or person who by itself or through a designated agent compiles, calculates or publishes information on the relevant Index. There is no assurance that the Index Provider will compile the Index accurately, or that the Index will be determined, composed or calculated accurately. While the Index Provider does provide descriptions of what the Index is designed to achieve, the Index Provider does not provide any warranty or accept any liability in relation to the quality, accuracy or completeness of data in respect of the Index, and does not guarantee that the Index will be in line with the described methodology.

The following table lists the number of individual investment positions for each Sub-Fund that were greater than 5% of the NAV of each Sub-Fund.

### (e) Efficient Portfolio Management

The ICAV on behalf of the Sub-Funds may employ techniques and instruments relating to financial derivative instruments ("FDIs") in which it invests for efficient portfolio management purposes, a list of which (if any) shall be, where relevant, set out in the relevant supplements of the Sub-Funds. FDI's such as currency forwards and interest rate futures may be utilised for portfolio hedging. Currency forwards may be utilised for NAV hedging. For the years ended 30 June 2025 and 30 June 2024, there were no currency forwards held by the ICAV.

The Sub-Funds' global exposure and leverage is calculated using the commitment approach and the Sub-Funds' global exposure will not exceed 100% of NAV. The commitment approach converts the Sub-Funds' FDI positions into the equivalent positions in the underlying assets and seeks to ensure that the FDI risk is monitored in terms of any future "commitments" to which it is (or may be) obligated. During the years ended 30 June 2025 and 30 June 2024, none of the Sub-Funds held FDI positions.

Direct and indirect operational costs and fees arising from OTC swaps or securities financing transactions may be deducted from the revenue delivered to the UCITS. These costs and fees do not and should not include hidden revenue. All the revenues arising from securities financing transactions and any other efficient portfolio management techniques shall be returned to the relevant Sub-Fund following the deduction of any direct and indirect operational costs and fees arising.

The entities to which direct and indirect costs and fees may be paid include banks, investment firms, broker-dealers, securities lending agents or other financial institutions or intermediaries and may be related parties to the Investment Manager or the Depositary.

Where a Sub-Fund undertakes securities lending, the relevant supplement will disclose the proportion of the revenue generated which will remain with the Sub-Fund and the proportion of the revenue generated (representing the attendant direct and indirect operational costs and fees of any securities lending) which will be retained by the securities lending agent. Such direct and indirect operational costs and fees shall not include hidden revenue.

Notes to the Financial Statements (continued)

For the year ended 30 June 2025

### 7. Financial risk management (continued)

#### (f) Offsetting and Amounts Subject to Master Netting/Similar Agreements

As at 30 June 2025 and 30 June 2024, the ICAV were subject to ISDA Master Netting Agreements, which are applicable if a Sub-Fund entered into derivative contracts. The Sub-Funds are subject to a securities lending agency agreement with the Custodian.

The tables below present, at a Sub-Fund level, the Sub-Funds' financial assets and liabilities subject to offsetting, enforceable master netting arrangements and similar agreements as at 30 June 2025 and 30 June 2024. While the terms and conditions of these agreements may vary, all transactions under any such agreement constitute a single contractual relationship between each Sub-Fund and each counterparty, severally and not jointly. Each Sub-Fund's obligation to make any payments, deliveries or other transfers in respect of any transaction under such an agreement may be netted against the counterparty's obligations under such agreement. A default by either party in performance with respect to one transaction under such an agreement would give the other party the right to terminate all transactions under such agreement and calculate one net amount owed from one party to the other. Further information on the Sub-Funds' exposure to the counterparties of the various derivative contracts is provided in Appendix 3.

As at 30 June 2025, the following financial instruments were subject to enforceable master netting agreements.

### 8. Fair value measurement

As the Sub-Funds' investments are classified as financial assets at fair value through profit or loss, the carrying value of the Sub-Funds' investments is a reasonable approximation of fair value. The Sub-Funds' accounting policy on fair value measurements is discussed in Note 2(d).

The Sub-Funds measure fair values, as defined by IFRS 13 'Fair Value Measurement' ("IFRS 13"), using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements:

- Level 1: Quoted market price (unadjusted) in an active market for an identical instrument.
- Level 2: Valuation techniques based on observable inputs, either directly (i.e. as prices) or indirectly (i.e. derived from prices). This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.
- Level 3: Valuation techniques using significant unobservable inputs. This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

Fair values of financial assets that are traded in active markets are based on quoted market prices or dealer price quotations. For all other financial instruments, each Sub-Fund determines fair values using valuation techniques as described above.

Notes to the Financial Statements (continued)

For the year ended 30 June 2025

#### 8. Fair value measurement (continued)

As at 30 June 2025, all financial assets and liabilities measured at fair value were carried at Level 1 except for investments in three securities domiciled in Russia, two securities that were suspended on trading, and two securities that were not traded and were carried at Level 3.

The three securities domiciled in Russia as at 30 June 2025 include RusHydro PJSC which represents 0.00% of the NAV of Global X Renewable Energy Producers UCITS ETF, Magnitogorsk Iron & Steel Works PJSC and Severstal PAO which represents 0.00% and 0.00%, respectively, of the NAV of Global X SuperDividend® UCITS ETF which were all written down.

The two securities that suspended trading as at 30 June 2025 were Jinchuan Group International Resources Co Ltd which represents 0.35% of the NAV of Global X Copper Miners UCITS ETF and Peninsula Energy Ltd which represents 0.10% of the NAV of Global X Uranium UCITS ETF. The two securities that were not traded were Zhejiang Akcome New Energy Technology Co Ltd which represents 0.00% of the NAV of Global X Solar UCITS ETF and ESG Minerals Ltd which represents 0.00% of the NAV of Global X Lithium & Battery Tech UCITS ETF.

As at 30 June 2024, all financial assets and liabilities measured at fair value were carried at Level 1 except for investments in three securities domiciled in Russia, two securities that were suspended on trading, and three securities (including rights and warrant) that were not traded and were carried at Level 3.

The three securities domiciled in Russia as at 30 June 2024 include RusHydro PJSC which represents 0.00% of the NAV of Global X Renewable Energy Producers UCITS ETF, Magnitogorsk Iron & Steel Works PJSC and Severstal PAO which represents 0.00% and 0.00%, respectively, of the NAV of Global X SuperDividend® UCITS ETF which were all written down.

The two securities that suspended trading as at 30 June 2024 were Scilex Holding Company which represents 0.05% of the NAV of Global X Genomics & Biotechnology UCITS ETF and Zhejiang Akcome New Energy Technology Co Ltd which represents 0.25% of the NAV of Global X Solar UCITS ETF. The three securities that were not traded were Vizsla Royalties Corp. and Vizsla Royalties Corp. warrant which represents 0.00% and 0.00%, respectively, of the NAV of Global X Silver Miners UCITS ETF and MMG LTD rights which represents 0.03% and 0.05% of the NAV of Global X Disruptive Materials UCITS ETF and Global X Copper Miners UCITS ETF, respectively.

The tables below analyse the Sub-Funds' assets measured at fair value as at 30 June 2025 by the level in the fair value hierarchy into which the fair value measurement is categorised:

<sup>(4)</sup> This pertains to securities held in Zhejiang Akcome New Energy Technology Co Ltd that were halted after violating Shenzhen Stock Exchange's policy: "Under Chinese securities regulations, a stock that trades below CNY 1 for 20 consecutive trading days faces delisting." The Investment Manager used the last traded price as the fair value.

Notes to the Financial Statements (continued)

For the year ended 30 June 2025

#### 8. Fair value measurement (continued)

#### Global X Silver Miners UCITS ETF

30 June 2024

Financial Assets	Fair Value		Valuation Approach	Unobservable Inputs	Range
Equity securities	\$	-	Fair valued (5)	Not applicable	Not applicable
Total	\$	-			

<sup>(5)</sup> This pertains to securities (including warrant) held in Vizsla Royalties Corp. that were unlisted and not traded at year-end. The Investment Manager used the fair values at year-end in the valuation of these securities.

Transfers between levels are recognised at the end of the reporting period. There were transfers between Level 1 and Level 3 for two securities held during the year ended 30 June 2025 (30 June 2024: none).

Each Sub-Fund's financial instruments not measured at fair value through profit or loss consist of cash and cash equivalents, other assets, bank overdraft, TER fees payable, and other payables whereas cash is classified as Level 1 and the rest as Level 2. These financial instruments are realised or settled within a short period of time. The carrying value of these other financial instruments approximate their fair value.

#### 9. **Derivative contracts**

Typically, derivative contracts serve as components of the Sub-Funds' investment strategy and are utilised primarily to structure and hedge investments to enhance performance and reduce risk to the Sub-Funds (the Sub-Funds do not designate any derivatives as hedges for hedge accounting purposes as described under IFRS 9).

#### Total return swaps

Swaps are bilateral contracts entered into for periods ranging from a few weeks to more than one year. In a standard "swap" transaction, two parties agree to exchange returns (or differentials in rates of return) calculated with respect to a "notional amount", e.g., the return on or increase in value of a particular dollar amount invested at a particular interest rate, in a particular foreign currency.

Some Sub-Funds intend to invest primarily in the Basket and entered into an unfunded swap agreement with approved counterparties governed by the International Swaps and Derivatives Association to exchange the performance/return of the Basket for the return of the Index minus any associated fees (the "total return swaps").

The intention of these Sub-Funds is to gain synthetic exposure to its corresponding reference index via total return swaps. As at 30 June 2025 and 30 June 2024, the following Sub-Funds reported a total return swap included in the Sub-Funds' financial assets and financial liabilities at fair value through profit or loss in the Statement of Financial Position.

Financial assets at fair value through profit or loss:

During the years ended 30 June 2025 and 30 June 2024, these Sub-Funds entered into a swap agreement with Citigroup Global Markets Limited.

#### 10. Related parties and connected persons

The following parties are considered related parties:

- The Directors
- Global X Management Company (Europe) Limited Manager
- Global X Management Company LLC Investment Manager
- Mirae Asset Securities (USA) Inc. Broker
- Brown Brothers Harriman & Co. Securities Lending Agent

Robert Oliver, as an employee of the Sub-Investment Manager and director of the Manager, does not receive any remuneration from the ICAV. During the year under review, each of the independent non-executive Directors (namely, Mary Canning and Feargal Dempsey) were paid a fixed fee of €20,000, with respect to services provided to the ICAV. Neither of the independent non-executive Directors received variable remuneration.

Robert Oliver, a Director of the ICAV, held shares in the Sub-Funds of the ICAV during the year ended 30 June 2025. None of the other Directors, their families, or the Secretary held any interest in the shares of the Sub-Funds during the year ended 30 June 2025.

Directors' fees are disclosed in Note 5, Fees and Expenses. Expenses charged during the years ended 30 June 2025 and 30 June 2024 by the Directors are detailed in Note 5.

Global X Management Company (Europe) Limited is considered a related party to the ICAV as it is considered to have significant influence over the ICAV in its role as Manager. During the year ended 30 June 2025, the Manager charged fees of USD 4,612,300 (30 June 2024: USD 183,973), of which USD 2,557,829 (30 June 2024: USD Nil) was payable at year end.

Mary Canning, Feargal Dempsey and Robert Oliver hold directorships in both Global X Management Company (Europe) Limited and the ICAV.

In line with the underlying Management Agreement, certain costs, and expenses of the ICAV shall be borne by the Manager. In the event the costs and expenses of a Sub-Fund or class that are intended to be covered within the TER exceed the stated TER, the Manager will discharge any excess amounts out of its own assets.

Transaction costs charged during the years ended 30 June 2025 and 30 June 2024 by Mirae Asset Securities (USA) Inc. are detailed in Note 11.

### 10. Related parties and connected persons (continued)

As of 30 June 2025 and 30 June 2024, each Sub-Fund has a single shareholder which is a nominee of the common depository for the International Central Securities Depositaries ("ICSDs") in which the shares of the Sub-Funds are cleared and settled. However, the beneficial ownership of such shares, and the voting rights in relation to such shares, are passed from the common depositary to the ICSDs and onwards to the participants of the ICSDs.

There were no other related party transactions for the financial year other than those disclosed above, and in Note 5, including any other emoluments or gains which have been paid or are payable, to any Director of the ICAV. All transactions with related parties were at arm's length.

#### 11. Transaction costs

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument.

During the years ended 30 June 2025 and 30 June 2024, the Sub-Funds incurred the following transaction costs:

Sub-Funds	Currency	30 June 2025	30 June 2024
Global X Video Games & Esports UCITS ETF	USD	4,923	16,123

Global X Blockchain UCITS ETF	USD	-	11
Global X Hydrogen UCITS ETF	USD	-	97
Global X Uranium UCITS ETF	USD	404	-

### 12. Significant events during the reporting year

As a result of political and military actions undertaken by Russia in Ukraine, the governments of multiple jurisdictions, including the EU and the U.S., have instituted sanctions against certain Russian officials and institutions. These sanctions, and any additional sanctions or other intergovernmental actions that may be undertaken against Russia in the future, may result in the devaluation of the Russian currency, a downgrade in the country's credit rating, and a decline in the value and liquidity of Russian securities. Such actions have resulted and could in the future result in a freeze of Russian securities, and may impair the ability of a Sub-Fund to buy, sell, receive, or deliver those securities. Countermeasures by the Russian government could involve the seizure of U.S. and/or European residents' assets, and any such actions are likely to impair the value and liquidity of such assets. Any or all of these potential results could have an adverse/recessionary effect on Russia's economy. Significant uncertainty remains in the market regarding the ramifications of these developments, and the range and potential implications of possible political, regulatory, economic and market outcomes are difficult to predict. All of these factors could have a negative effect on performance, particularly if a Sub-Fund has significant direct or indirect exposure to Russia.

The Directors are monitoring developments related to this military action, including current and potential future interventions of foreign governments and economic sanctions against Russia, in order to assess their impact on any Russian securities held by the Sub-Funds, including their potential impact on the liquidity of Russian securities.

The conflict between Israel and Harakat al-Muqawama al-Islamiya (Islamic Resistance Movement) or HAMAS in Gaza escalated in October 2023. The conflict could lead to disruption, instability and volatility in global markets, economies and industries that could negatively impact the business of the Sub-Funds, results of operations and financial condition. The conflict may also escalate further and its resolution is unclear. The potential for further military escalation and other corresponding events, could have, severe negative effects on regional and global economic and financial markets, including increased volatility and overall uncertainty.

Global X European Infrastructure Development UCITS ETF was authorised by the Central Bank on 19 July 2024 and launched on 3 September 2024.

Global X Defence Tech UCITS ETF was authorised by the Central Bank on 19 July 2024 and launched on 10 September 2024.

Global X Artificial Intelligence UCITS ETF was authorised by the Central Bank on 19 July 2024 and launched on 10 September 2024.

Notes to the Financial Statements (continued)

For the year ended 30 June 2025

### 12. Significant events during the reporting year (continued)

Global X Euro Stoxx 50 Covered Call UCITS ETF was authorised by the Central Bank on 26 March 2025 and launched on 7 May 2025.

Global X Europe Focused Defence Tech UCITS ETF was authorised by the Central Bank on 28 April 2025 and launched on 21 May 2025.

Global X NDX Quarterly Tail Hedge UCITS ETF was authorised by the Central Bank on 28 April 2025 and has not commenced operations as at 30 June 2025.

On 12 August 2024, the Shenzhen Stock Exchange ("SZSE") announced that as of that day, that Zhejiang Akcome New Energy Technology Co Ltd was delisted from the exchange. Consequently, the position held in the Global X Solar UCITS ETF was reflected as having zero value.

On 13 August 2024, a revised supplement for Global X AgTech & Food Innovation UCITS ETF was noted by the Central Bank to reflect the recategorisation from an Article 6 fund to an Article 8 fund within the meaning of Regulation (EU) 2019/2088, as amended ("SFDR").

On 25 September 2024, the U.S. Bankruptcy Court for the Southern District of Texas approved a motion to extend the lock-up period on shares received from a stock dividend of Sorrento Therapeutics Inc. to Scilex Holding to 31 January 2025. As a result, shares of the dividend stock cannot be traded until the new expiration date. As at 30 June 2024, the position held in the Global X Genomics & Biotechnology UCITS ETF was written down by applying a 95% discount to the price. As at 30 June 2025, the position was not held by Global X Genomics & Biotechnology UCITS ETF.

Effective 1 October 2024, the registered address of the Administrator and Depositary changed from Styne House, Upper Hatch Street, Dublin 2, D02 DY27, Ireland to 2<sup>nd</sup> floor, One Charlemont Square, Dublin 2, D02 X9Y6, Ireland.

On 14 October 2024, a revised supplement for Global X U.S. Infrastructure Development UCITS ETF was noted by the Central Bank to reflect the inclusion of a disclosure in the section entitled "Fees and Expenses" to note that the Manager may in its sole discretion, enter into rebate arrangements with certain shareholders in accordance with UCITS requirements.

There were no other significant events during the reporting year that requires adjustments or disclosure in these financial statements.

#### 13. Events after the reporting year

The ICAV was registered under the new UK Overseas Fund Regime with effect from 15 July 2025.

Global X European SuperDividend UCITS ETF and Global X UK SuperDividend UCITS ETF were authorised by the Central Bank on 13 August 2025 and launched on 4 September 2025.

With effect from 20 August 2025, Robert Oliver resigned as director of the ICAV and the Manager.

On 28 August 2025, Mitsubishi UFJ Trust and Banking Corporation replaced Brown Brothers Harriman & Co. as the securities lending agent of the ICAV.

Global X DAX Covered Call UCITS ETF was authorised by the Central Bank on 10 October 2025.

Appendix 2 – UCITS V Remuneration Disclosure (Unaudited)

For the year ended 30 June 2025

The European Union Directive 2014/91/EU as implemented in Ireland by S.I. No. 143/2016 - European Union (Undertakings for Collective Investment in Transferable Securities) (Amendment) Regulations 2016, requires management companies to establish and apply remuneration policies and practices that promote sound and effective risk management, and do not encourage risk taking which is inconsistent with the risk profile of the UCITS.

To that effect, Global X Management Company (Europe) Limited (the "Manager") has implemented a remuneration policy that applies to all UCITS for which the Manager acts as manager (the "Remuneration Policy") and covers all staff whose professional activities have a material impact on the risk profile of the Manager or the UCITS it manages ("Identified Staff of the Manager"). In accordance with the Remuneration Policy, all remuneration paid to Identified Staff of the Manager can be divided into:

- Fixed remuneration (payments or benefits without consideration of any performance criteria); and
- Variable remuneration (additional payments or benefits depending on performance or, in certain cases, other contractual criteria) which is not based on the performance of the UCITS.

The Manager has designated the following persons as Identified Staff of the Manager:

- 1. The Designated Persons;
- 2. Each of the Manager's directors;
- 3. Head of Compliance;
- 4. Chief Risk Officer;
- 5. Head of Anti-Money Laundering and Counter Terrorist Financing Compliance; and
- 6. Chief Executive Officer.

The Manager has a business model, policies, and procedures which by their nature do not promote excessive risk taking and take account of the nature, scale, and complexity of the Manager and the UCITS. The Remuneration Policy is designed to discourage risk taking that is inconsistent with the risk profile of the UCITS and the Manager is not incentivised or rewarded for taking excessive risk.

The Manager has determined that due to the nature, scale and complexity of the business that it is appropriate for remuneration matters to be determined through the Manager's board of directors.

The Manager's board of directors is responsible for the ongoing implementation of the Manager's remuneration matters and will assess, oversee, and review the remuneration arrangements of the Manager as well as that of the delegates as relevant, in line with the provisions of the applicable remuneration requirements.

The Manager has a number of directly employed staff. The independent non-executive directors are paid a fixed remuneration. The other Identified Staff member's remuneration is linked to their overall individual contribution to the Manager, with reference to both financial and non-financial criteria and not directly linked to the performance of specific business units or targets reached or the performance of the UCITS.

The remuneration of the directly employed Identified Staff of the Manager and the remuneration of the independent non-executive directors is €853,012 paid to Identified Staff\* for the year ended 31 December 2024.

<sup>\*</sup>This number represents the number of Identified Staff and the independent non-executive directors of the Manager as at 31 December 2024.

Appendix 2 – UCITS V Remuneration Disclosure (Unaudited) (continued)

For the year ended 30 June 2025

The Manager has also determined that, on the basis of number of sub-funds / net asset value of the UCITS relative to the number of sub-funds / assets under management, the portion of this figure attributable to the UCITS is  $\epsilon$ 850,531 for 2024.

The Manager has delegated investment management to the Investment Manager. The Manager has put in place contractual arrangements with the Investment Manager to receive and disclose information regarding the remuneration of the Investment Manager identified staff in accordance with the remuneration guidelines. No remuneration has been paid to staff of the Investment Manager by the Manager. The Investment Manager pays remuneration to its staff in accordance with the policies, procedures and processes applicable to it.

Appendix 3 – Securities Financing Transactions Regulations Disclosures (Unaudited)

For the year ended 30 June 2025

The ICAV entered into a securities lending agency agreement with Brown Brothers Harriman & Co. on 8 April 2021. Securities lending commenced on Global X Video Games & Esports UCITS ETF on 8 April 2021. As at 30 June 2025, the Sub-Fund was not engaged in any securities lending arrangement.

## Global X Video Games & Esports UCITS ETF

### **Global Data:**

- The amount of securities and commodities on loan as a proportion of total lendable assets: 0.00%
- The amount of assets engaged in each type of securities financing transactions ("SFTs") and total return swaps ("TRS")
- expressed as an absolute amount (in the collective investment undertakings currency) and as a proportion of the collective investment undertakings Assets Under Management (AUM):

Appendix 4 – Sustainable Finance Disclosure Regulation (Unaudited)

For the year ended 30 June 2025

#### The Sustainable Finance Disclosure Regulation ("SFDR") and Taxonomy Regulation

Global X CleanTech UCITS ETF, Global X Renewable Energy Producers UCITS ETF, Global X Clean Water UCITS ETF, Global X Hydrogen UCITS ETF, Global X Wind Energy UCITS ETF, Global X Solar UCITS ETF, and Global X AgTech & Food Innovation UCITS ETF are classified as Article 8 funds according to the Sustainable Finance Disclosure Regulation ("SFDR"). This means that these Sub-Funds promote environmental or social characteristics in a way that meets the specific criteria contained in Article 8 of SFDR. Details are disclosed in Appendix 4. The rest of the Sub-Funds are classified as Article 6 funds. The investments underlying these Sub-Funds do not take into account the European Union criteria for environmentally sustainable activities.

During the course of the year, regulation around sustainability-related disclosures continued to evolve, through the Sustainable Finance Disclosure Regulation (Regulation EU/2019/2088) (the "SFDR") and the EU Taxonomy Regulation (Regulation (EU) 2020/852, and amending SFDR) (the "Taxonomy Regulation") and their associated regulatory technical standards and available guidance. Additional disclosure requirements under the Commission Delegated Regulation (EU) 2022/12882 ("SFDR Level 2") are applicable to all annual reports published on or after 1 January 2023 and such disclosures as they relate to the Sub-Funds can be found in Appendix 4 of this report. Such disclosures have in part been prepared using data sourced from third party data providers which was available as at the date of which the disclosures were produced. It has been observed that the availability of data continues to be challenging in some respects and there may be further regulatory guidance of relevance to the content of the disclosures that is still to be issued. The disclosures included in Appendix 4 of this report should consequently be read and understood in light of these continuing challenges. With the assistance of the Manager and the Investment Managers, the Board of Directors continues to monitor the ongoing development and evolution of sustainability-related regulation and associated guidance and the availability of relevant data in this regard.

479

Sustainable

investment means an

that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852,

establishing a list of environmentally sustainable

economic activities. That Regulation does not lay down a list of socially sustainable

economic activities.

investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable

investment in an economic activity

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global X CleanTech UCITS ETF (the "Fund")

Legal entity identifier: 635400AFWBVKC5AB2I24

### Environmental and/or social characteristics

Did this financial product have a susta	ninable investment objective?
Yes	No × No
It made sustainable investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
It made sustainable investments with a social objective:%	with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective  It promoted E/S characteristics, but did not make any sustainable investments

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted investment in exchange-listed companies that were positioned to benefit from the increased adoption of technologies focused on improving the efficiency of renewable energy production and/or mitigating the adverse environmental effects of resource consumption ("CleanTech"), including, but not limited to, companies whose principal business is in developing technology relating to renewable energy, energy efficiency and storage, smart grid, lithium-ion batteries and/or fuel cells, and/or pollution prevention/amelioration (collectively, "CleanTech Companies" as defined by Indxx LLC, (the "Index Provider") of the Indxx Global CleanTech v2 Index (the "Index").

The Index Provider, in partnership with ESG data provider Minerva, on a quarterly basis reviewed each constituent of the Index for compliance with the principles of the United Nations Global Compact as well as for involvement in the production of controversial products. Controversial products were defined by Minerva as products that pose a material risk due to a large portion of investors perceiving them as offensive, embarrassing, harmful, socially unacceptable, or ethically objectionable.

Any existing or potential constituent of the Index which did not meet the labour, human rights, environmental, and anti-corruption standards as defined by the United Nations Global Compact Principles, or that breaches the established thresholds for involvement in controversial products, as of the quarterly review was excluded from the Index, as determined by the Index Provider.

Derivative instruments have not been used to attain the environmental / social characteristics promoted by the Fund.

The Indxx Global CleanTech v2 Index has been designated as a reference benchmark for the purpose of attaining the environmental / social characteristics promoted by the Fund.

The MSCI World Index has been designated as a broad market index.

United Nations Global Compact ("UNGC")		

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

N/A.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A.

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund did not consider principal adverse impacts on sustainability factors.

The list includes the

investments constituting the greatest proportion of investments of the financial product during the reference period which is: 30.06.2024 – 30.06.2025.

### What were the top investments of this financial product?

The top investments of this Fund, excluding cash and derivatives, were:

Holding	Sector	% Assets	Country
FIRST SOLAR INC	Information Technology	6.68	US
QUANTUMSCAPE CORP	Consumer Discretionary	6.51	US
NEXTRACKER INC-CL A	Industrials	6.45	US
SAMSUNG SDI CO LTD	Information Technology	5.57	KR
NIBE INDUSTRIER AB-B SHS	Industrials	5.34	SE
VESTAS WIND SYSTEMS A/S	Industrials	5.28	DK
JOHNSON MATTHEY PLC	Materials	5.22	GB
NORDEX SE	Industrials	4.67	DE
EB ENVIRONMENT	Industrials	4.54	HK
SIMPLO TECHNOLOGY CO LTD	Information Technology	4.44	TW
LANDIS + GYR GROUP AG	Information Technology	4.04	СН
BLOOM ENERGY CORP- A	Industrials	3.99	US
ENPHASE ENERGY INC	Information Technology	3.64	US
XINYI SOLAR HOLDINGS LTD	Information Technology	3.06	CN
CS WIND CORP	Industrials	2.93	KR

Weight of top investments is at the end of the financial year.

### What was the proportion of sustainability-related investments?

### What was the asset allocation?

The Fund invested in a portfolio of equity securities that, as far as possible and practicable, consisted of the component securities of the Index in similar proportions to their weightings in the Index and in American Depositary Receipts ("ADRs") and Global Depositary Receipts ("GDRs") based on the securities in the Index.

The Fund invested 99.75% of its assets in investments which attained the environmental characteristics promoted by the Fund.

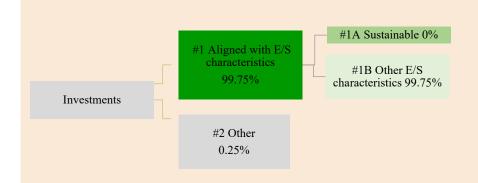

The remaining 0.25% of the Fund's investments were in investments which sought to achieve the broader objectives of the Fund including instruments for the purposes of efficient portfolio management, and liquidity management purposes. No minimum environmental or social safeguards were applied in relation to these instruments.

# Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### In which economic sectors were the investments made?<sup>1</sup>

### By Sector

Sector	% Sector Allocation
Industrials	52.44%
Information Technology	35.58%
Materials	5.22%
Consumer Discretionary	6.51%

### By Sub-Industry

<b>Sub-Industry</b>	% Sub-Industry Allocation
Automotive Parts & Equipment	6.51%
Building Products	5.34%
Construction & Engineering	1.07%
Construction Machinery & Heavy	
Transportation Equipment	2.35%
Electrical Components & Equipment	19.65%
Electronic Components	12.37%
Electronic Equipment & Instruments	4.04%
Environmental & Facilities Services	4.54%
Heavy Electrical Equipment	19.50%
Semiconductor Materials & Equipment	9.41%
Semiconductors	9.75%
Specialty Chemicals	5.22%

<sup>&</sup>lt;sup>1</sup> This section may be completed by reference to NACE sectors and sub-sectors, the EU standard classification system. This section should provide information on the proportion of investments during the period covered by the periodic report in different sectors and sub-sectors (including, if relevant, sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels).

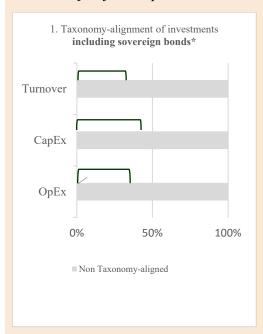

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

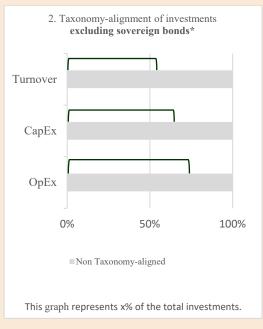

The Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>2</sup>?

Yes:
In fossil gas
In nuclear energy
X No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- \* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

The Fund did not invest in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy.

of:
- turnover reflects
the "greenness" of
investee
companies today.
- capital
expenditure

Taxonomy-aligned activities are

expressed as a share

expenditure
(CapEx) shows the
green investments
made by investee
companies,
relevant for a
transition to a
green economy.

- operational expenditure (OpEx) reflects the green operational activities of investee companies.

Sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

<sup>&</sup>lt;sup>2</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

# What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy.

### What was the share of socially sustainable investments?

The Fund did not make socially sustainable investments.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

No "other" assets were invested in by the Fund for the period. The remaining 0.25% of the Fund's investments were in investments which sought to achieve the broader objectives of the Fund including instruments for the purposes of efficient portfolio management, and liquidity management purposes. No minimum environmental or social safeguards were applied in relation to these instruments.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental characteristics promoted by the Fund by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

The index was rebalanced in line with methology to ensure its constituents remained in line with the outlined screening criteria, which neccessitated that the portfolio of the Fund was subject to a corresponding rebalance.

# How did this financial product perform compared to the reference benchmark?

The Fund continued to track the Index in accordance with the supplement for the Fund during the reference benchmark.

The methodology for the calculation of the designated index can be found at <a href="https://www.indxx.com/indxx-global-cleantech-v2-index-tr">https://www.indxx.com/indxx-global-cleantech-v2-index-tr</a>.

### How does the reference benchmark differ from a broad market index?

The Index was weighted according to the Index Provider's ESG proprietary ratings.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. The Index Provider, in partnership with ESG data provider Minerva, on a quarterly basis reviewed each constituent of the Index for compliance with the principles of the United Nations Global Compact as well as for involvement in the production of controversial products. Controversial products were defined by Minerva as products that pose a material risk due to a large portion of investors perceiving them as offensive, embarrassing, harmful, socially unacceptable, or ethically objectionable.

Any existing or potential constituent of the Index which did not meet the labour, human rights, environmental, and anti-corruption standards as defined by the United Nations Global Compact Principles, or that breached the established thresholds for involvement in controversial products, as of the quarterly review was excluded from the Index, as determined by the Index Provider.

The universe of possible investments therefore differed from a broad market index.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Fund performed broadly in line with the Index. Please see below table.

Sustainaibility Indicators	Performance of the Fund	Performance of the Index (reference benchmark)
The eligible universe of companies screened out of the portfolio of the Fund and the Index as a result of the application of the ESG screening criteria incorporated in the Index methodology	0%	0%
Percentage of each of the <b>Index and the</b> Fund's portfolios invested in companies which comply with the principles of the United Nations Global Compact Principles	99.75%	100%

### How did this financial product perform compared with the reference benchmark?

As the Fund achieves its environmental characteristics by tracking the Index, which has a methodology that is consistent with attaining the environmental characteristics promoted by the Fund, the performance of the Fund broadly aligned with the performance of the Index during the reference period, as set out above. Please see below for the performance of the sustainability indicators versus the Index.

### How did this financial product perform compared with the broad market index?

The Investment Manager has designated MSCI World Index as a relevant broad market index and, accordingly, the performance of the Fund compared with MSCI World Index, against the sustainability indicators for the Fund, is set out below:

Sustainaibility Indicators	Performance of the Fund	Performance of the broad market index (MSCI World Index)
The eligible universe of companies screened out of the portfolio of the Fund and the Index as a result of the application of the ESG screening criteria incorporated in the Index methodology	0%	0%
Percentage of each of the <b>Index and the</b> Fund's portfolios invested in companies which comply with the principles of the United Nations Global Compact Principles	99.75%	91.96%

Legal entity identifier: 635400FK76ORXEWQ3M88

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global X Renewable Energy Producers UCITS ETF (the "Fund")

Sustainable
investment means an
investment in an
economic activity
that contributes to an
environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or
social objective and
that the investee
companies follow

good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Taxonomy or not.

# Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?			
• • Yes	• No		
It made sustainable investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective		
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments		

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted investment in renewable sources including wind, solar, hydroelectric, geothermal, and biofuels by investing in publicly traded companies listed in either developed or emerging markets (excluding India) that produce energy from renewable sources including wind, solar, hydroelectric, geothermal, and biofuels (including publicly traded companies that are formed to own operating assets that produce defined cash flows and are focused on returning cash flows generated from renewable energy assets to shareholders ("YieldCos")) (collectively, "Renewable Energy Companies"), as defined by Indxx LLC (the "Index Provider") of the the Indxx Renewable Energy Producers v2 Index (the "Index").

The Index Provider, in partnership with ESG data provider Minerva, on a quarterly basis reviewed each constituent of the Index for compliance with the principles of the United Nations Global Compact as well as for involvement in the production of controversial products. Controversial products were defined by Minerva as products that posed a material risk due to a large portion of investors perceiving them as offensive, embarrassing, harmful, socially unacceptable, or ethically objectionable.

Any existing or potential constituent of the Index which did meet the labor, human rights, environmental, and anti-corruption standards as defined by the United Nations Global Compact Principles, or that breached the established thresholds for involvement in controversial products, as of the quarterly review were excluded from the Index, as determined by the Index Provider.

Derivative instruments have not been used to attain the environmental / social characteristics promoted by the Fund.

The Indxx Renewable Energy Producers v2 Index has been designated as a reference benchmark for the purpose of attaining the environmental / social characteristics promoted by the Fund.

The MSCI World Index has been designated as a broad market index.

# To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

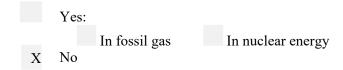

The Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy.

<sup>&</sup>lt;sup>1</sup> This section may be completed by reference to NACE sectors and sub-sectors, the EU standard classification system. This section should provide information on the proportion of investments during the period covered by the periodic report in different sectors and sub-sectors (including, if relevant, sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels).

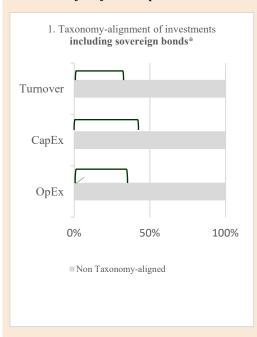

Taxonomy-aligned activities are expressed as a share of:

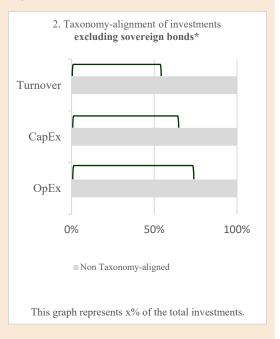

- **turnover** reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>2</sup>?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- \* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

The Fund did not invest in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy.

<sup>&</sup>lt;sup>2</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

For the year ended 30 June 2025

Sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

# What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy.

### What was the share of socially sustainable investments?

The Fund did not make socially sustainable investments.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

No "other" assets were invested in by the Fund for the period. The remaining 0.17% of the Fund's investments were in investments which sought to achieve the broader objectives of the Fund including instruments for the purposes of efficient portfolio management, and liquidity management purposes. No minimum environmental or social safeguards were applied in relation to these instruments.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved its environmental characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

The Index was rebalanced in line with its methology to ensure its constituents remained in line with the outlined screening criteria, which neccessitated that the portfolio of the Fund was subject to a corresponding rebalance.

# How did this financial product perform compared to the reference benchmark?

The Fund continued to track its reference benchmark within its predefined constraints during the period. Please refer to the section.

The methodology for the calculation of the designated index can be found at <a href="https://www.indxx.com/indxx-renewable-energy-producers-v2-index-tr">https://www.indxx.com/indxx-renewable-energy-producers-v2-index-tr</a>.

### How does the reference benchmark differ from a broad market index?

The Index was weighted according to the Index Provider's ESG proprietary ratings.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. The Index Provider, in partnership with ESG data provider Minerva, on a quarterly basis reviewed each constituent of the Index for compliance with the principles of the United Nations Global Compact as well as for involvement in the production of controversial products. Controversial products are defined by Minerva as products that pose a material risk due to a large portion of investors perceiving them as offensive, embarrassing, harmful, socially unacceptable, or ethically objectionable. Any existing or potential constituent of the Index which did not meet the labor, human rights, environmental, and anti-corruption standards as defined by the United Nations Global Compact Principles, or that breached the established thresholds for involvement in controversial products, as of the quarterly review were excluded from the Index, as determined by the Index Provider.

The universe of possible investments therefore differed from a broad market index.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Fund performed broadly in line with the Index. Please see below table.

Sustainaibility Indicators	Performance of the Fund	Performance of the Index (reference benchmark)
The eligible universe of companies screened out of the portfolio of the Fund and the Index as a result of the application of the ESG screening criteria incorporated in the Index methodology	0%	0%
Percentage of each of the <b>Index and the</b> Fund's portfolios invested in companies which comply with the principles of the United Nations Global Compact Principles	99.83%.	100.0%

### How did this financial product perform compared with the reference benchmark?

As the Fund achieves its environmental characteristics by tracking the Index, which has a methodology that is consistent with attaining the environmental characteristics promoted by the Fund, the performance of the Fund broadly aligned with the performance of the Index during the reference period, as set out above. Please see below for the performance of the sustainability indicators versus the Index.

### How did this financial product perform compared with the broad market index?

The Investment Manager has designated MSCI World Index as a relevant broad market index and, accordingly, the performance of the Fund compared with MSCI World Index, against the sustainability indicators for the Fund, is set out below:

Sustainaibility Indicators	Performance of the Fund	Performance of the broad market index (MSCI World Index)
The eligible universe of companies screened out of the portfolio of the Fund and the Index as a result of the application of the ESG screening criteria incorporated in the Index methodology	0%	0%
Percentage of each of the <b>Index and the</b> Fund's portfolios invested in companies which comply with the principles of the United Nations Global Compact Principles	99.83%.	91.96%

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global X Clean Water UCITS ETF (the "Fund")

Legal entity identifier: 635400KHBDPHZRXLHM36

### Environmental and/or social characteristics

Did this financial product have a susta	Did this financial product have a sustainable investment objective?	
• • Yes	• No	
It made sustainable investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy  in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy  with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective	
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments	

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted investment in companies that have business operations in the provision of clean water ("Clean Water Companies"), by replicating the Solactive Global Clean Water Industry v2 Index (the "Index").

Clean Water Companies as defined by Solactive AG, the provider of the Index (the "Index Provider") are those companies that derive at least 50% of their revenues, operating income, or assets from the following business activities: (1) Industrial water treatment, recycling (including water reclamation), purification, and conservation; (2) water storage, transportation, metering, and distribution infrastructure; (3) production of household and commercial water purifier and heating products; and (4) provision of consulting services identifying and implementing water efficiency strategies at the corporate and/or municipal levels.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a

list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained. The Index Provider, in partnership with ESG data provider Minerva, on a quarterly basis reviewed each constituent of the Index for compliance with the principles of the United Nations Global Compact as well as for involvement in the production of controversial products. Controversial products were defined by Minerva as products that pose a material risk due to a large portion of investors perceiving them as offensive, embarrassing, harmful, socially unacceptable, or ethically objectionable.

Any existing or potential constituent of the Index which did not meet the labor, human rights, environmental, and anti-corruption standards as defined by the United Nations Global Compact Principles, or that breached the established thresholds for involvement in controversial products, as of the quarterly review was excluded from the Index, as determined by the Index Provider.

Derivative instruments have not been used to attain the environmental / social characteristics promoted by the Fund.

The Solactive Global Clean Water Industry v2 Index has been designated as the reference index for the purpose of attaining the environmental / social characteristics promoted by the Fund.

The MSCI World Index has been designated as a relevant broad market index.

### How did the sustainability indicators perform?

As at 30 June 2025.

Sustainability Indicators	Performance as at the end of the reference period.
The eligible universe of companies screened out of the portfolio of the Fund out as a result of the application of the ESG screening criteria incorporated in the Index methodology	11.69%

For the year ended 30 June 2025

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and anti-

bribery matters.

Sustainability Indicators	As at 30th June 2023
The eligible universe of companies screened out of the portfolio of the Fund out as a result of the application of the ESG screening criteria incorporated in the Index methodology	4.16%
Percentage of the Fund's portfolio invested in companies which comply with the principles of the United Nations Global Compact ("UNGC")	100%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

N/A.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A.

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund did not consider principal adverse impacts on sustainability factors.

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 30.06.2024 – 30.06.2025.

### What were the top investments of this financial product?

The top investments of this Fund, excluding cash and derivatives, were

Holding	Sector	% Assets	Country
FERGUSON ENTERPRISES INC	Industrials	8.92	GB
AMERICAN WATER W	Utilities	8.35	US
PENTAIR PLC	Industrials	8.01	GB

PRIMO BRANDS CORP	Consumer Staples	3.45	US
Zurn Elkay Water Solution	Industrials	3.26	US
KURITA WATER IND	Industrials	2.45	JP

Weight of top investments is at the end of the financial year.

### What was the proportion of sustainability-related investments?

### What was the asset allocation?

The Fund invested in a portfolio of equity securities that, as far as possible and practicable, consisted of the component securities of the Index in similar proportions to their weightings in the Index and in n American Depositary Receipts ("ADRs") and Global Depositary Receipts ("GDRs") based on the securities in the Index.

The Fund invested 99.80% of its assets in investments which attained the environmental characteristics promoted by the Fund.

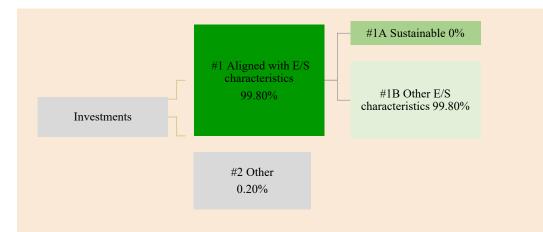

The remaining 0.20% of the Fund's investments were in investments which sought to achieve the broader objectives of the Fund including instruments for the purposes of efficient portfolio management, and liquidity management purposes. No minimum environmental or social safeguards were applied in relation to these instruments.

# Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

### In which economic sectors were the investments made?<sup>1</sup>

### By Sector

Sector	% Sector Allocation
Industrials	56.08%
Utilities	33.39%
Information Technology	4.49%
Consumer Staples	3.45%
Consumer Discretionary	2.39%

### By Sub-Industry

<b>Sub-Industry</b>	% Sub-Industry Allocation
Building Products	11.25%
Construction & Engineering	0.24%
Electronic Equipment & Instruments	4.49%
Environmental & Facilities Services	0.69%
Household Appliances	2.39%
Industrial Machinery & Suppliers	28.36%
Soft Drinks & Non-Alcoholic Beverages	3.45%
Trading Companies & Distributors	15.54%
Water Utilities	33.39%

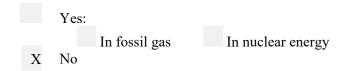

<sup>&</sup>lt;sup>1</sup> This section may be completed by reference to NACE sectors and sub-sectors, the EU standard classification system. This section should provide information on the proportion of investments during the period covered by the periodic report in different sectors and sub-sectors (including, if relevant, sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels).

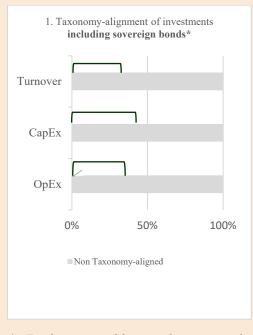

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

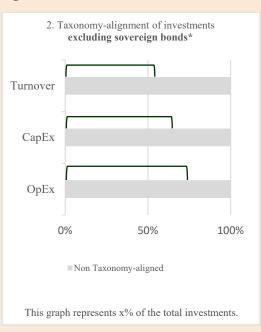

The Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>2</sup>?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- \* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

The Fund did not invest in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods

The Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy.

activities are expressed as a share of: turnover reflects the "greenness" of

Taxonomy-aligned

- investee companies today. capital
- expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

Sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

<sup>&</sup>lt;sup>2</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

# What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy.

### What was the share of socially sustainable investments

The Fund did not make socially sustainable investments.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

No "other" assets were invested in by the Fund for the period. The remaining 0.20% of the Fund's investments were in investments which sought to achieve the broader objectives of the Fund including instruments for the purposes of efficient portfolio management, and liquidity management purposes. No minimum environmental or social safeguards were applied in relation to these instruments.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental characteristics promoted by the Fund by tracking the Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

The index was rebalanced in line with methology to ensure its constituents remained in line with the outlined screening criteria, which neccessitated that the portfolio of the Fund was subject to a corresponding rebalance.

# How did this financial product perform compared to the reference benchmark?

The Fund continued to track the Index in accordance with the supplement for the Fund during the reference benchmark.

The methodology for the calculation of the designated index can be found at <a href="https://www.solactive.com/indices/?index=DE000SL0CZS9">https://www.solactive.com/indices/?index=DE000SL0CZS9</a>.

### How does the reference benchmark differ from a broad market index?

The Index was weighted according to the Index Provider's ESG proprietary ratings.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. The Index Provider, in partnership with ESG data provider Minerva, on a quarterly basis reviewed each constituent of the Index for compliance with the principles of the United Nations Global Compact as well as for involvement in the production of controversial products. Controversial products were defined by Minerva as products that pose a material risk due to a large portion of investors perceiving them as offensive, embarrassing, harmful, socially unacceptable, or ethically objectionable.

Any existing or potential constituent of the Index which did not meet the labor, human rights, environmental, and anti-corruption standards as defined by the United Nations Global Compact Principles, or that breached the established thresholds for involvement in controversial products, as of the quarterly review was excluded from the Index, as determined by the Index Provider.

The universe of possible investments therefore differed from a broad market index.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Fund performed broadly in line with the Index. Please see below table.

Sustainaibility Indicators	Performance of the Fund	Performance of the Index (reference benchmark)
The eligible universe of companies screened out of the portfolio of the Fund and the Index as a result of the application of the ESG screening criteria incorporated in the Index methodology	13.04%	13.04%
Percentage of each of the <b>Index and the</b> Fund's portfolios invested in companies which comply with the principles of the United Nations Global Compact Principles	99.80%.	100%

### How did this financial product perform compared with the reference benchmark?

As the Fund achieves its environmental characteristics by tracking the Index, which has a methodology that is consistent with attaining the environmental characteristics promoted by the Fund, the performance of the Fund broadly aligned with the performance of the Index during the reference period, as set out above. Please see below for the performance of the sustainability indicators versus the Index.

### How did this financial product perform compared with the broad market index?

The Investment Manager has designated MSCI World Index as a relevant broad market index and, accordingly, the performance of the Fund compared with MSCI World Index, against the sustainability indicators for the Fund, is set out below:

Sustainaibility Indicators	Performance of the Fund	Performance of a relevant broad market index (MSCI World Index)
The eligible universe of companies screened out of the portfolio of the Fund and a broad market index as a result of the application of the ESG screening criteria incorporated in the Index methodology	13.04%	0%
Percentage of each of the <b>Index and the</b> Fund's portfolios invested in companies which comply with the principles of the United Nations Global Compact Principles	99.80%.	91.96%

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Global X Hydrogen UCITS ETF (the "Fund")

Legal entity identifier: 635400P7P5NKHXV1XQ19

### **Environmental and/or social characteristics**

Did this financial product have a sustainable investment objective?				
• • Yes	● ○ ■ No			
It made sustainable investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective			
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments			

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted investment in companies that were positioned to benefit from further advances in the field of hydrogen technology. Hydrogen technology includes products and services focused on the development and implementation of hydrogen gas as a renewable fuel source.

Specifically, the Fund sought to replicate the performance of the Solactive Global Hydrogen v2 Index (the "Index") that included securities issued by "Hydrogen Companies" as defined by Solactive AG, (the "Index Provider") as those companies derived at least 50% of their revenues, operating income, or assets from the following business activities: 1. Hydrogen Production: Companies involved in the production, transportation, storage, and distribution of hydrogen (including renewable hydrogen) that can be used as an energy source. 2. Hydrogen Fuel Cells: Companies that develop and/or manufacture fuel cells (and the components thereof) that convert chemical energy into electricity and heat, powered by hydrogen fuel and/or reformed hydrogen-rich gas. 3. Hydrogen Technology: Companies involved in the production of hydrogen electrolysers (which produce hydrogen gas from water), tanks and pipelines, commercial and residential infrastructure, generators, engines, and vehicles powered by hydrogen fuel cells, as well as

Sustainable
investment means an
investment in an
economic activity
that contributes to an
environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or
social objective and
that the investee
companies follow
good governance

practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

hydrogen fuelling stations. 4. Hydrogen Integration: Companies that provide engineering and consulting services for the adoption and utilization of hydrogen-based fuel and/or energy sources at the residential, commercial, and industrial levels.

In addition, companies identified by the Index Provider as deriving greater than 0% but less than 50% of revenue from the business activities described above ("Diversified Hydrogen Companies"), as well as companies identified by the Index Provider as having primary business operations in the business activities described above but that do not currently generate revenues ("Pre-Revenue Hydrogen Companies"), were eligible for inclusion in the Index. In addition, Diversified Hydrogen Companies and Pre-Revenue Hydrogen Companies are subject to an individual weight cap of 2% and an aggregate weight cap of 10% at each semi-annual rebalance.

The Index Provider, in partnership with ESG data provider Minerva, on a quarterly basis reviewed each constituent of the Index for compliance with the principles of the United Nations Global Compact as well as for involvement in the production of controversial products. Controversial products were defined by Minerva as products that pose a material risk due to a large portion of investors perceiving them as offensive, embarrassing, harmful, socially unacceptable, or ethically objectionable.

Any existing or potential constituent of the Index which did not meet the labour, human rights, environmental, and anti-corruption standards as defined by the United Nations Global Compact Principles, or that breaches the established thresholds for involvement in controversial products, as of the quarterly review were excluded from the Index, as determined by the Index Provider.

Derivative instruments have not been used to attain the environmental / social characteristics promoted by the Fund.

The Solactive Global Hydrogen v2 has been designated as a reference benchmark for the purpose of attaining the environmental / social characteristics promoted by the Fund.

The MSCI World Index has been designated as a broad market index.

### How did the sustainability indicators perform?

As at 30 June 2025.

Sustainability Indicators	Performance as at the end of the reference period.
The eligible universe of companies screened out of the portfolio of the Fund out as a result of the application of the ESG screening criteria incorporated in the Index methodology	2.0%

The percentage of the eligible universe of companies screened out of the portfolio of the Fund out as a result of the application of the ESG screening criteria incorporated in the Index methodology	6.29%
The percentage of the Fund's portfolio invested in companies which comply with the principles of the United Nations Global Compact ("UNGC")	99.84%

Sustainability Indicators	As at 30 <sup>th</sup> June 2023
The percentage of the eligible universe of companies screened out of the portfolio of the Fund out as a result of the application of the ESG screening criteria incorporated in the Index methodology	13.34%
The percentage of the Fund's portfolio invested in companies which comply with the principles of the United Nations Global Compact ("UNGC")	99.98%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

N/A.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

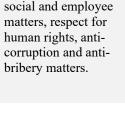

N/A.

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A.

Principal adverse impacts are the most significant negative

investment decisions on sustainability

factors relating to environmental,

impacts of

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

The Fund did not consider principal adverse impacts on sustainability factors.

### What were the top investments of this financial product?

The top investments of this Fund, excluding cash and derivatives, were:

Weight of top investments is at the end of the financial year.

### What was the proportion of sustainability-related investments?

### What was the asset allocation?

The Fund invested primarily in a portfolio of equity securities that, as far as possible and practicable, consisted of the component securities of the Index in similar proportions to their weightings in the Index and in American Depositary Receipts ("ADRs") and Global Depositary Receipts ("GDRs") based on the securities in the Index.

The Fund invested 99.84% of its assets in investments which attained the environmental characteristics promoted by the Fund.

The remaining amount of the Fund's investments, 0.16% of the Fund's assets, were investments which sought to achieve the broader objectives of the Fund including instruments for the purposes of efficient portfolio management, and liquidity management purposes. No minimum environmental or social safeguards were applied in relation to these instruments.

Taxonomy-aligned activities are expressed as a share of:

**Asset allocation** 

describes the

investments in specific assets.

share of

- turnover reflects the "greenness" of investee companies today.
- expenditure
  (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### In which economic sectors were the investments made?<sup>1</sup>

### By Sector

Sector	% Sector Allocation	
Utilities	57.64%	
Industrials	42.20%	

### By Sub Industry

<b>Sub-Industry</b>	% Sub-Industry Allocation	
Construction & Engineering	3.13%	
Heavy Electrical Equipment	39.07%	
Renewable Electricity	57.64%	

# To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy.

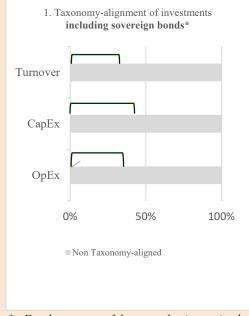

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>2</sup>?

	Yes:			
		In fossil gas	In nuclear ene	rgv
X	No	8		63

<sup>&</sup>lt;sup>1</sup> This section may be completed by reference to NACE sectors and sub-sectors, the EU standard classification system. This section should provide information on the proportion of investments during the period covered by the periodic report in different sectors and sub-sectors (including, if relevant, sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels).

<sup>&</sup>lt;sup>2</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- \* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
  - What was the share of investments made in transitional and enabling activities?

The Fund did not invest in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy.

Sustainable

investments with an environmental

objective that do not

take into account the criteria for

environmentally

economic activities

under Regulation

(EU) 2020/852.

sustainable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

The Fund did not make socially sustainable investments.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

No "other" assets were invested in by the Fund for the period. The remaining amount of the Fund's investments, 0.16% of the Fund's assets, were investments which sought to achieve the broader objectives of the Fund including instruments for the purposes of efficient portfolio management, and liquidity management purposes. No minimum environmental or social safeguards were applied in relation to these instruments.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental characteristics by tracking the Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

The Index was rebalanced in line with the methology of the Index to ensure its constituents remain in line with the outlined screening criteria, which neccessitated that the portfolio of the Fund was subject to a corresponding rebalance.

# How did this financial product perform compared to the reference benchmark?

The Fund continued to track its reference benchmark in accordance with the supplement for the Fund during the reference period.

The methodology for the calculation of the designated index can be found at https://www.solactive.com/indices/?index=DE000SL0D1L5.

### How

### How does the reference benchmark differ from a broad market index?

The Index was weighted according to the Index Provider's ESG proprietary ratings.

The Index Provider, in partnership with ESG data provider Minerva, on a quarterly basis reviewed each constituent of the Index for compliance with the principles of the United Nations Global Compact as well as for involvement in the production of controversial products. Controversial products were defined by Minerva as products that pose a material risk due to a large portion of investors perceiving them as offensive, embarrassing, harmful, socially unacceptable, or ethically objectionable.

Any existing or potential constituent of the Index which did not meet the labour, human rights, environmental, and anti-corruption standards as defined by the United Nations Global Compact Principles, or that breached the established thresholds for involvement in controversial products, as of the quarterly review will be excluded from the Index, as determined by the Index Provider.

The universe of possible investments therefore differed from a broad market index.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Fund performed broadly in line with the Index. Please see below table.

Sustainaibility Indicators	Performnce of the Fund	Performance of the Index (reference benchmark)
The eligible universe of companies screened out of the portfolio of the Fund and the Index as a result of the application of the ESG screening criteria incorporated in the Index methodology	13.33%	13.33%
Percentage of each of the <b>Index and the</b> Fund's portfolios invested in companies which comply with the principles of the United Nations Global Compact Principles	99.84%.	100%

### Mow did this financial product perform compared with the reference benchmark?

As the Fund achieves its environmental characteristics by tracking the Index, which has a methodology that is consistent with attaining the environmental characteristics promoted by the Fund, the performance of the Fund broadly aligned with the performance of the Index during the reference period, as set out above. Please see below for the performance of the sustainability indicators versus the Index.

### How did this financial product perform compared with the broad market index?

The Investment Manager has designated MSCI World Index as a relevant broad market index and, accordingly, the performance of the Fund compared with MSCI World Index, against the sustainability indicators for the Fund, is set out below:

Sustainaibility Indicators	Performance of the Fund	Performance of a relevant broad market index (MSCI World Index)
The eligible universe of companies screened out of the portfolio of the Fund and the Index as a result of the application of the ESG screening criteria incorporated in the Index methodology	13.33%	0%
Percentage of each of the <b>Index and the</b> Fund's portfolios invested in companies which comply with the principles of the United Nations Global Compact Principles	99.84%.	91.96%

Product name: Global X Solar UCITS ETF (the "Fund") Legal entity identifier: 635400FA2MLLF9ZHYN83

### Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?				
• • Yes	No No			
It made sustainable investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy  with a social objective			
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments			

# To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund promoted investment in companies that are positioned to benefit from further advances in the field of solar technology. Specifically, the Fund sought to replicate the Solactive Solar v2 Index (the "Index") that consists of securities issued by "Solar Companies" defined by Solactive AG, the ("Index Provider") as those companies that derived at least 50% of their revenues from the following business activities: Solar Energy Materials: Companies involved in the production of raw materials that are primarily used in photovoltaic solar cells or concentrating solar-thermal mirrors or lenses (including silicon, cadmium telluride, copper indium gallium diselenide, titanium dioxide, and/or perovskite). Solar Energy Systems & Components: Companies involved in the development and/or manufacturing of solar energy systems (and the components thereof) that harness energy from the photovoltaic effect or from sunlight to generate electricity. For example, a company involved in the production of solar panels may be categorized as having business activities related to Solar Energy Systems & Components. Solar panels consist of an arrangement of solar photovoltaic cells mounted in a framework for installation. Solar Power Production: Companies that generate and distribute electricity

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.

That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse

impacts of

**impacts** are the most significant negative

investment decisions on sustainability

social and employee

matters, respect for

human rights, anticorruption and anti-

bribery matters.

factors relating to

environmental,

from light energy. Solar Technology: Companies that develop commercial and residential infrastructure, generators, and engines powered by solar energy, as well as residential and commercial scale batteries for electricity produced from solar power, and solar-powered charging systems for electric vehicles or other electric devices. Solar Installation, Integration & Maintenance: Companies that provide engineering and/or advisory services for the installation, integration, maintenance, and/or utilization of solar power at the residential, commercial, and industrial levels.

The Index Provider, in partnership with ESG data provider Minerva, on a quarterly basis reviewed each constituent of the Index for compliance with the principles of the United Nations Global Compact as well as for involvement in the production of controversial products. Controversial products were defined by Minerva as products that pose a material risk due to a large portion of investors perceiving them as offensive, embarrassing, harmful, socially unacceptable, or ethically objectionable. Any existing or potential constituent of the Index which did not meet the labor, human rights, environmental, and anti-corruption standards as defined by the United Nations Global Compact Principles, or that breached the established thresholds for involvement in controversial products, as of the quarterly review was excluded from the Index, as determined by the Index Provider.

Derivative instruments have not been used to attain the environmental / social characteristics promoted by the Fund.

The Solactive Solar v2 Index has been designated as a reference benchmark for the purpose of attaining the environmental / social characteristics promoted by the Fund.

The MSCI World Index has been designated as a broad market index.

### How did the sustainability indicators perform?

As at 30 June 2025.

environmental objective that **do not** 

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

The Fund did not make socially sustainable investments.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

No "other" assets were invested in by the Fund for the period. The remaining 0.14% of the Fund's investments were in investments which sought to achieve the broader objectives of the Fund including instruments for the purposes of efficient portfolio management, and liquidity management purposes. No minimum environmental or social safeguards were applied in relation to these instruments.

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental characteristics promoted by the Fund by tracking the Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

The index was rebalanced in line with methology to ensure its constituents remained in line with the outlined screening criteria, which necessitated that the portfolio of the Fund was subject to a corresponding rebalance.

## How did this financial product perform compared to the reference benchmark?

The Fund continued to track its reference benchmark within its predefined constraints during the period.

The methodology for the calculation of the designated index can be found at https://www.solactive.com/indices/?index=DE000SL0D1S0.

### How does the reference benchmark differ from a broad market index?

The Index was weighted according to the Index Provider's ESG proprietary ratings.

The Index Provider, in partnership with ESG data provider Minerva, on a quarterly basis reviewed each constituent of the Index for compliance with the principles of the United Nations Global Compact as well as for involvement in the production of controversial products. Controversial products were defined by Minerva as products that pose a material risk due to a large portion of investors perceiving them as offensive, embarrassing, harmful, socially unacceptable, or ethically objectionable.

Any existing or potential constituent of the Index which did not meet the labour, human rights, environmental, and anti-corruption standards as defined by the United Nations Global Compact Principles, or that breached the established thresholds for involvement in controversial products, as of the quarterly review was excluded from the Index, as determined by the Index Provider.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. The universe of possible investments therefore differed from a broad market index.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Fund performed broadly in line with the Index. Please see below table.

Sustainability Indicators	Performance of the Fund	Performance of the Index (reference benchmark)
The eligible universe of companies screened out of the portfolio of the Fund and the Index as a result of the application of the ESG screening criteria incorporated in the Index methodology	8.93%	8.93%
Percentage of each of the <b>Index and the</b> Fund's portfolios invested in companies which comply with the principles of the United Nations Global Compact Principles	99.86%	100%

### Mow did this financial product perform compared with the reference benchmark?

As the Fund achieves its environmental characteristics by tracking the Index, which has a methodology that is consistent with attaining the environmental characteristics promoted by the Fund, the performance of the Fund broadly aligned with the performance of the Index during the reference period, as set out above. Please see below for the performance of the sustainability indicators versus the Index.

### How did this financial product perform compared with the broad market index?

The Investment Manager has designated MSCI World Index as a relevant broad market index and, accordingly, the performance of the Fund compared with MSCI World Index, against the sustainability indicators for the Fund, is set out below:

### **Environmental and/or social characteristics**

Did this financial product have a sustainable investment objective?			
• • Yes	● No		
It made sustainable investments with an environmental objective:%  in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments  with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective		
It made sustainable investments with a social objective:%	It promoted E/S characteristics, but did not make any sustainable investments		

system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities.

The EU Taxonomy is a classification

Sustainable

investment in an

economic activity

social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

that contributes to an environmental or

That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

The Fund promoted investment in companies that were positioned to benefit from further advances in the fields of agricultural technology and food innovation.

The Fund sought to replicate the performance of the Solactive AgTech & Food Innovation v2 Index (the "Index") to include securities issued by "AgTech & Food **Innovation Companies**" as defined by Solactive AG, (the "Index Provider") as those companies that derive at least 50% of their revenues, operating income, or assets from the following business activities: Precision Agriculture: Precision agriculture utilises technology and data to optimise farming practices, minimising resource usage such as water, fertiliser, and pesticides through targeted application. By reducing input waste and environmental impact, precision agriculture promotes sustainability in farming while also contributing to biodiversity conservation and ecosystem health. Technologies used to increase crop yields and reduce levels of traditional agricultural inputs (land, water, fertiliser, etc.) to grow crops more profitably/efficiently. Business activities

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

include the development of Geographic Information System ("GIS") software and hardware for GIS-based agriculture, precision weed control technologies, soil and water sensors, weather tracking, and satellite imaging. Protein & Dairy Alternatives: Protein and dairy alternative products offer sustainable options to traditional animal-based products, with lower environmental footprints in terms of land use, water consumption, and greenhouse gas emissions. By promoting plant-based proteins and non-dairy alternatives, individuals and industries can mitigate environmental impact and contribute to a more sustainable food system, addressing concerns related to deforestation, habitat destruction, and climate change. Food Waste Reduction: Food waste reduction strategies aim to minimise waste at various stages of the supply chain, from production and distribution to consumption, thereby conserving resources and reducing greenhouse gas emissions. Through improved harvesting techniques and technologies, storage methods, consumer education, and surplus food redistribution initiatives, food waste reduction efforts mitigate environmental impact, alleviate pressure on ecosystems, and contribute to a more sustainable and efficient food system. Robotics/Automation: Robotics and automation technologies streamline agricultural tasks through drones, autonomous vehicles, and artificial intelligence-driven systems, enhancing productivity, reducing labour costs, and optimising resource usage to foster sustainable farming practices with potentially lower environmental impacts. Controlled Environment Agriculture: Controlled environment agriculture involves growing crops indoors or in controlled settings, optimising conditions to enable year-round production, conserving resources, and offering opportunities for urban farming, thus promoting food security and reducing pressure on natural ecosystems. Agricultural Biotechnology: Biotechnology in agriculture utilises genetic engineering to improve crop traits, enhance yields, and bolster resistance to pests and diseases, potentially reducing the reliance on chemical inputs while addressing food security concerns.

In addition, companies identified by the Index Provider as Diversified AgTech & Food Innovation Companies, as well as Pre-Revenue AgTech & Food Innovation Companies, are eligible for inclusion in the Index if there are fewer than 30 eligible AgTech & Food Innovation Companies. Diversified AgTech & Food Innovation Companies and Pre-Revenue AgTech & Food Innovation Companies are collectively subject to an aggregate weight cap of 15% at each semi-annual rebalance.

The Index was weighted according to the Index Provider's ESG proprietary ratings. The Index Provider, in partnership with ESG data provider Minerva, on a quarterly basis reviewed each constituent of the Index for compliance with the principles of the United Nations Global Compact as well as for involvement in the production of controversial products.

Controversial products were defined by Minerva as products that pose a material risk due to a large portion of investors perceiving them as offensive, embarrassing, harmful, socially unacceptable, or ethically objectionable. Any existing or potential constituent of the Index which did not meet the labour, human rights, environmental, and anti-corruption standards as defined by the United Nations Global Compact Principles, or that breaches the established thresholds for involvement in controversial products, as of the quarterly review was excluded from the Index, as determined by the Index Provider.

Derivative instruments have not been used to attain the environmental / social characteristics promoted by the Fund.

The Solactive AgTech & Food Innovation v2 Index has been designated as the reference benchmark for the purpose of attaining the environmental / social characteristics promoted by the Fund.

The MSCI World Index has been designated as a broad market index.

### How did the sustainability indicators perform?

As at 30 June 2025.

Sustainability Indicators	Performance as at the end of the reference period.
The eligible universe of companies screened out of the portfolio of the Fund out as a result of the application of the ESG screening criteria incorporated in the Index methodology	0%
Percentage of the Fund's portfolio invested in companies which comply with the principles of the United Nations Global Compact ("UNGC")	99.79%

### ...and compared to previous periods?

Sustainability Indicators	<b>As at 30<sup>th</sup> June 2024</b>
The eligible universe of companies screened out of the portfolio of the Fund out as a result of the application of the ESG screening criteria incorporated in the Index methodology	n/a
Percentage of the Fund's portfolio invested in companies which comply with the principles of the United Nations Global Compact ("UNGC")	n/a

<sup>\*</sup> Global X AgTech & Food Innovation UCITS ETF was upgraded from an Article 6 fund to an Article 8 fund on 13 August 2024.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

N/A.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

N/A.

How were the indicators for adverse impacts on sustainability factors taken into account?

N/A.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

N/A.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

# How did this financial product consider principal adverse impacts on sustainability factors?

The Fund did not consider principal adverse impacts on sustainability factors.

### What were the top investments of this financial product?

The top investments of this Fund, excluding cash and derivatives, were:

Weight of top investments is at the end of the financial year.

What was the proportion of sustainability-related investments?

### What was the asset allocation?

The Fund invested primarily in a portfolio of equity securities that, as far as possible and practicable, consisted of the component securities of the Index in similar proportions to their weightings in the Index and in American Depositary Receipts ("ADRs") and Global Depositary Receipts ("GDRs") based on the securities in the Index

The Fund invested 99.79% of its assets in investments which attained the environmental characteristics promoted by the Fund.

The remaining amount of the Fund's investments, 0.21% of the Fund's assets, were investments which sought to achieve the broader objectives of the Fund including instruments for the purposes of efficient portfolio management, and liquidity management purposes. No minimum environmental or social safeguards were applied in relation to these instruments.

# #1 Aligned with E/S characteristics 99.79% #1B Other E/S characteristics 99.79% #2 Other 0.21%

**#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category #1 Aligned with E/S characteristics covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

# Asset allocation describes the share of investments in specific assets.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share

# \*\*\*\*

# To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy.

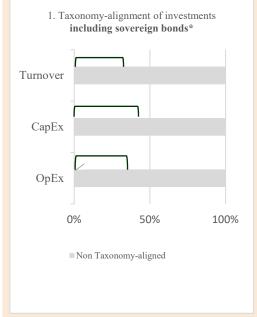

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy<sup>2</sup>?

	Yes:		
		In fossil gas	In nuclear energy
X	No	8	83

<sup>&</sup>lt;sup>1</sup> This section may be completed by reference to NACE sectors and sub-sectors, the EU standard classification system. This section should provide information on the proportion of investments during the period covered by the periodic report in different sectors and sub-sectors (including, if relevant, sectors and sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade, of fossil fuels).

<sup>&</sup>lt;sup>2</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- \* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.
- What was the share of investments made in transitional and enabling activities?

The Fund did not invest in transitional and enabling activities.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy.

Sustainable

investments with an environmental objective that **do not** 

take into account

economic activities

under Regulation (EU) 2020/852.

the criteria for environmentally

sustainable

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund did not make sustainable investments with an environmental objective aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

The Fund did not make socially sustainable investments.

# What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

No "other" assets were invested in by the Fund for the period. The remaining amount of the Fund's investments, 0.21% of the Fund's assets, were investments which sought to achieve the broader objectives of the Fund including instruments for the purposes of efficient portfolio management, and liquidity management purposes. No minimum environmental or social safeguards were applied in relation to these instruments

# What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental characteristics by tracking the Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

The Index was rebalanced in line with the methology of the Index to ensure its constituents remain in line with the outlined screening criteria, which neccessitated that the portfolio of the Fund was subject to a corresponding rebalance.

## How did this financial product perform compared to the reference benchmark?

The Fund continued to track its reference benchmark in accordance with the supplement for the Fund during the reference period.

The methodology for the calculation of the designated index can be found at https://www.solactive.com/indices/?index=DE000SL0D1Y8.

# benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that

they promote.

Reference

### How does the reference benchmark differ from a broad market index?

The Index was weighted according to the Index Provider's ESG proprietary ratings.

The Index Provider, in partnership with ESG data provider Minerva, on a quarterly basis reviewed each constituent of the Index for compliance with the principles of the United Nations Global Compact as well as for involvement in the production of controversial products. Controversial products were defined by Minerva as products that pose a material risk due to a large portion of investors perceiving them as offensive, embarrassing, harmful, socially unacceptable, or ethically objectionable.

Any existing or potential constituent of the Index which did not meet the labour, human rights, environmental, and anti-corruption standards as defined by the United Nations Global Compact Principles, or that breached the established thresholds for involvement in controversial products, as of the quarterly review will be excluded from the Index, as determined by the Index Provider.

The universe of possible investments therefore differed from a broad market index.

### How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

The Fund performed broadly in line with the Index. Please see below table.

Sustainaibility Indicators	Performnce of the Fund	Performance of the Index (reference benchmark)
The eligible universe of companies screened out of the portfolio of the Fund and the Index as a result of the application of the ESG screening criteria incorporated in the Index methodology	0%	0%
Percentage of each of the <b>Index and the</b> Fund's portfolios invested in companies which comply with the principles of the United Nations Global Compact Principles	99.79%	100%

### How did this financial product perform compared with the reference benchmark?

As the Fund achieves its environmental characteristics by tracking the Index, which has a methodology that is consistent with attaining the environmental characteristics promoted by the Fund, the performance of the Fund broadly aligned with the performance of the Index during the reference period, as set out above. Please see below for the performance of the sustainability indicators versus the Index.

### How did this financial product perform compared with the broad market index?

The Investment Manager has designated MSCI World Index as a relevant broad market index and, accordingly, the performance of the Fund compared with MSCI World Index, against the sustainability indicators for the Fund, is set out below:

Sustainaibility Indicators	Performance of the Fund	Performance of a relevant broad market index (MSCI World Index)
The eligible universe of companies screened out of the portfolio of the Fund and the Index as a result of the application of the ESG screening criteria incorporated in the Index methodology	0%	0%
Percentage of each of the <b>Index and the</b> Fund's portfolios invested in companies which comply with the principles of the United Nations Global Compact Principles	99.79%	91.96%
