General information

The funds described in this report are sub-funds of a SICAV (Société d'Investissement à Capital Variable) incorporated under Luxembourg law.

Performance

The investment return, or performance, of a mutual fund investment is measured by the change in value of the fund's units. The net asset values per unit (= redemption prices) with the addition of intervening distributions are used as the basis for calculating the value. Past performance is not a guide to future results.

The corresponding benchmark – if available – is also presented in the report. All financial data in this publication is **as of December 31, 2022** (unless otherwise specified).

Sales prospectuses

Fund units are purchased on the basis of the current sales prospectus and management regulations, as well as the key investor information document, in combination with the latest audited annual report and any semiannual report that is more recent than the latest annual report.

Issue and redemption prices

The current issue and redemption prices and all other information for unitholders may be requested at any time at the registered office of the Management Company and from the paying agents. In addition, the issue and redemption prices are published in every country of distribution through appropriate media (such as the Internet, electronic information systems, newspapers, etc.).

Special notice for business investors:

Adjustment of share profits due to European Court of Justice (ECJ) ruling in the STEKO Industriemontage GmbH case

In the STEKO Industriemontage GmbH case (C-377/07), the European Court of Justice (ECJ) ruled that the provision in the German Corporate Tax Act (Körperschaftsteuergesetz (KStG)) for the transition from the corporate tax imputation system to the half-income procedure in 2001 is unlawful under European law. The prohibition on corporations to have profit reductions in connection with holdings in foreign companies made relevant for tax purposes pursuant to section 8b (3) KStG already applied in 2001 pursuant to section 34 KStG, while it only applied for profit reductions in connection with holdings in domestic companies in 2002. In the view of the European Court of Justice, this contravenes the principle of free movement of capital.

The transitional provisions in the KStG applied accordingly for fund investments pursuant to the German Capital Investment Companies Act (Gesetz über Kapitalanlagegesellschaften (KAGG)) (sections 40 and 40a in conjunction with section 43 (14)). The ruling may become important, particularly for the purposes of taking profit reductions into account in the calculation of share profits pursuant to section 40a KAGG. The Federal Finance Court (Bundesfinanzhof (BFH)) decided in a judgment dated October 28, 2009, (Ref. I R 27/08) that the STEKO case does in principle have implications for fund investments. In the German Federal Ministry of Finance letter of February 1, 2011, "Application of the BFH judgment of October 28, 2009 – I R 27/08 to share profits ("STEKO case")", the tax authority sets out the conditions under which in its opinion an adjustment of share profits is possible based on the STEKO case.

In view of possible measures based on the STEKO case, we recommend that investors who have shares in business assets consult a tax advisor.

Russia/Ukraine crisis

The conflict between Russia and Ukraine marked a dramatic turning point in Europe, which, among other things, is impacting on Europe's security architecture and energy policies in the long term and has caused considerable volatility. This volatility is likely to continue. However, the specific or possible medium-to-long-term effects of the crisis on the economy, individual markets and sectors, as well as the social implications, cannot be conclusively assessed due to the uncertainty at the time of preparing this report. The Management Company is therefore continuing its efforts, within the framework of its risk management strategy, to assess these uncertainties and their possible impact on the activities, liquidity and performance of the fund. The Management Company is taking all measures deemed appropriate to protect investor interests to the greatest possible extent.

Liquidation of the sub-fund

The sub-fund **db Advisory Multibrands – Franklin Templeton Global Conservative Portfolio (in liquidation)** was liquidated effective December 13, 2022, following a resolution to that effect adopted by the Board of Directors of the SICAV and the approval of the Luxembourg supervisory authority CSSF. The issue of new shares of the sub-fund was discontinued effective November 2, 2022. Investors could redee

Renamed sub-funds

The sub-fund **db Advisory Multibrands – PIMCO Euro Sustainable Debt Solution** will be renamed **db Advisory Multibrands – PIMCO Euro Debt Solution** effective January 1, 2023.

The sub-fund **db Advisory Multibrands - PIMCO Global Sustainable Multi-Credit Solution** will be renamed **db Advisory Multibrands – PIMCO Global Multi-Credit Solution** effective January 1, 2023.

Launched sub-funds

The sub-fund **db Advisory Multibrands – DWS StepIn ESG Future Trends** will be launched effective January 16, 2023.

The sub-fund **db Advisory Multibrands – PIMCO Real Asset Inflation Solution** will be launched effective January 16, 2023.

Annual report

db Advisory Multibrands – AMUNDI ESG Sustainable Balanced

Investment objective and performance in the reporting period

db Advisory Multibrands – AMUNDI ESG Sustainable Balanced seeks to generate sustained capital growth. To this end, the sub-fund invests either directly or indirectly through investment funds and exchange traded funds, in a diversified portfolio of worldwide issued debt and debt-related instruments, equity and equity-related instruments issued by companies worldwide, money market instruments, cash deposits, cash, and derivatives hereof.

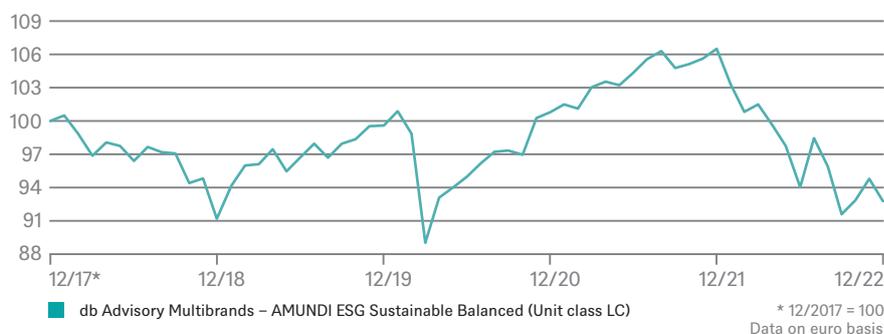

When selecting investments, the environmental and social aspects and the principles of good corporate governance (ESG aspects) are taken into consideration. At least 51% of the sub-fund assets are invested in investment funds and/or exchange traded funds of Amundi Group which, in their investment process, integrate financial analysis with ESG considerations or which focus on Responsible Investments*.

The international capital markets entered increasingly rough waters in 2022. This downward trend began with dramatically rising inflation figures due to increasing supply-chain constraints amid the steep economic recovery following the peak of the COVID-19 pandemic.

The situation was exacerbated further by the ongoing war in Ukraine, which began when Russia invaded on February 24, 2022. Increasing sanctions by Western countries against Russia and supply boycotts by Russia drove the

prices of energy (oil, gas, coal) and also food to unexpected heights.

To counteract inflation and its dynamics, many central banks raised interest rates noticeably, with some bringing many years of expansionary monetary policy to an end. The U.S. Federal Reserve (Fed) thus raised its key interest rate in seven steps from mid-March 2022 through mid-December 2022 by 4.25 percentage points to a target range of 4.25% p.a. – 4.50% p.a.

The European Central Bank (ECB) followed suit in the second half of July 2022, after a pause of almost three years, and raised its key interest rate in four steps by two-and-a-half percentage points to

altogether 2.50% p.a. Against that backdrop, and in view of weakening global economic growth during 2022, there were mounting fears among market actors of a recession taking hold.

In view of high global debt levels and initially still very low interest rates, the bond markets saw marked price declines during the year through the end of December 2022, accompanied by a noticeable rise in bond yields. The rise in yields was principally driven by inflationary dynamics and the central banks’ action to raise interest rates significantly in response.

The corporate bond markets were hobbled by price declines coupled with increased yields and wid-

ened risk premiums both in the investment-grade segment and for high-yield securities. In this challenging environment, the sub-fund recorded a loss 13.0% per share in the financial year to 31 December 2022 (LC unit class; BVI method; in euro).

Investment policy in the reporting period

The year 2022 was a very challenging year for multi-asset investors. In an environment of rising interest rates, both equities and bonds experienced a significant repricing. In the process, bonds achieved their worst annual performance in a century.

Specifically, the sub-fund had a high allocation to fixed income, which suffered from inflation fears in 2022. The sub-fund's euro-centric approach (about 3/4 of assets were invested in euros) also made it impossible to benefit from the strength of the U.S. dollar.

The sub-fund posted a negative absolute performance in the wake of the negative developments in both the equity and fixed income markets.

In terms of portfolio positioning, a short duration position and a positive spread duration (e.g. high yield corporate bonds) has been maintained during the year, assuming interest rates would rise. Given the sub-fund's sustainability-focused DNA, portfolio maintained an overweight of green bonds, averaging around 30%, social bonds around 3% and sustainable bonds around 1%.

In ESG funds, the portfolio maintained a long position in funds/ETFs specialized in green bonds. On the equity side, the allocation included Global and European equity ETF and funds with a socially responsible approach and with a focus on specific themes: Ecology, Education, Food Chain, Clean Energy and Water.

The best performers last year were thematic equity investments such as water, food chain, climate change due to their defensive nature. Thanks to spread tightening also High Yield Bonds were also among the best performers. Among the worst performers Amundi Valeur Durable, due to its selection of growth stocks and sectors.

During the period, the equity exposure has been reduced. (via Amundi Index MSCI World SRI), and the exposure to BTPs and IG credits has been increased

Derivative instruments were used in the fixed-income portfolio to hedge credit and interest rate risk, guaranteeing a positive contribution.

Information on the environmental and/or social characteristics
This product reported in accordance with Article 8(1) of Regulation (EU) 2019/2088 (SFDR) on sustainability-related disclosures in the financial services sector ("SFDR").

Presentation and content requirements for periodic reports for financial products as referred to

in Article 8(1) of Regulation (EU) 2019/2088 (SFDR) and in Article 6 of Regulation (EU) 2020/852 (Taxonomy) are available below.

Composition of the reference portfolio (according to CSSF circular 11/512)
75% BBG Euro Aggregate Corporate Index, 25% MSCI All Country World Net TR Index - in EUR

Market risk exposure (value-at-risk) (according to CSSF circular 11/512)

Lowest market risk exposure	%	76.777
Highest market risk exposure	%	108.562
Average market risk exposure	%	91.377

The values-at-risk were calculated for the period from January 1, 2022, through December 31, 2022, using historical simulation with a 99% confidence level, a 10-day holding period and an effective historical observation period of one year. The risk in a reference portfolio that does not contain derivatives is used as the measurement benchmark. Market risk is the risk to the fund's assets arising from an unfavorable change in market prices. The Company determines the potential market risk by means of the **relative value-at-risk approach** as defined in CSSF circular 11/512.

In the reporting period, the average leverage effect from the use of derivatives was 0.1, whereby the total of the nominal amounts of the derivatives in relation to the fund's assets was used for the calculation (sum-of-notional approach).

The gross exposure generated via derivatives pursuant to point 40 a) of the "Guidelines on ETFs and other UCITS issues" of the European Securities and Markets Authority (ESMA) totaled EUR 5 342 511.04 as of the reporting date.

Notes on valuation

Under the responsibility of the Board of Directors of the SICAV, the Management Company determines the net asset values per share and performs the valuation of the assets of the fund. The basic provision of price data and price validation are performed in accordance with the method introduced by the Board of Directors of the SICAV on the basis of the legal and regulatory requirements or the principles for valuation methods defined in the SICAV's prospectus. The basic provision of price data and price validation are performed in accordance with the method introduced by the Board of Directors of the SICAV on the basis of the legal and regulatory requirements or the principles for valuation methods defined in the SICAV's prospectus.

If no trading prices are available, prices are determined with the aid of valuation models (derived market values) which are agreed between State Street Bank International GmbH, Luxembourg branch, as external price service provider and the Management Company and which are based as far as possible on market parameters. This procedure is subject to an ongoing monitoring process. The plausibility of price information from third parties is checked through other pricing sources, model calculations or other suitable procedure.

Assets reported in this report are not valued at derived market values.

The management fee / all-in fee rates in effect as of the reporting date for the investment fund units held in the securities portfolio are shown in parentheses. A plus sign means that a performance-based fee may also be charged. As the investment fund held units of other investment funds (target funds) in the reporting period, further costs, charges and fees may have been incurred at the level of these individual target funds.

Statement of income and expenses (incl. income adjustment)

for the year from January 1, 2022, through December 31, 2022

I. Income			
1. Interest from securities (before withholding tax)	EUR	340 018.68	
2. Interest from investments of liquid assets (before withholding tax)	EUR	3 963.70	
3. Deduction for foreign withholding tax ¹	EUR	404.05	
4. Other income	EUR	7 472.60	
Total income	EUR	351 859.03	
II. Expenses			
1. Interest on borrowings and negative interest on deposits	EUR	-8 505.30	
2. Expenses from swap transactions	EUR	-27 519.16	
3. Management fee	EUR	-757 967.17	
thereof:			
All-in fee	EUR	-757 967.17	
4. Legal and publication costs	EUR	-725.99	
5. Taxe d'abonnement	EUR	-12 367.65	
6. Other expenses	EUR	-71 102.25	
thereof:			
Expenses from prepaid placement fee ²	EUR	-58 555.95	
Other	EUR	-12 546.30	
Total expenses	EUR	-878 187.52	
III. Net investment expense	EUR	-526 328.49	
IV. Sale transactions			
Realized gains/losses	EUR	-483 128.18	
Capital gains/losses	EUR	-483 128.18	
V. Net gain/loss for the fiscal year	EUR	-1 009 456.67	

¹ This includes primarily income from the liquidation of excess accruals in the amount of EUR 919.73.

² For further information, please refer to the notes to the financial statements.

BVI total expense ratio (TER)

The total expense ratio for the share classes was:

Class LC 1.80% p.a.,	Class LD 1.81% p.a.,
Class PFC 1.74% p.a.,	Class PFD 1.15% p.a.

The TER expresses total expenses and fees (excluding transaction costs) as a percentage of a fund's average net assets in relation to the respective share class for a given fiscal year.

Further costs, charges and fees were incurred at the level of the target funds. The fund invested more than 20% of its assets in target funds. If the target funds publish a TER themselves, this will be taken into account at fund level (synthetic TER). If a TER is not published at target fund level, the all-in fee/management fee is used for the calculation. The synthetic TER was:

Class LC 2.05% p.a.,	Class LD 2.06% p.a.,
Class PFC 1.99% p.a.,	Class PFD 1.40% p.a.

Transaction costs

The transaction costs paid in the fiscal year amounted to EUR 2 008.81.

The transaction costs include all costs that were reported or settled separately for the account of the fund in the fiscal year and are directly connected to the purchase or sale of assets. Any financial transaction taxes which may have been paid are included in the calculation.

Statement of changes in net assets

2022

I. Value of the fund's net assets at the beginning of the fiscal year			EUR	61 965 901.14
1. Distribution for the previous year	EUR	-334 176.87		
2. Net outflows ³	EUR	-9 693 245.26		
3. Income adjustment	EUR	-93 578.87		
4. Net investment expense	EUR	-526 328.49		
5. Realized gains/losses	EUR	-483 128.18		
6. Net change in unrealized appreciation/depreciation	EUR	-6 400 811.28		
II. Value of the fund's net assets at the end of the fiscal year			EUR	44 434 632.19

³ Reduced by a dilution adjustment in the amount of EUR 16 638.81 for the benefit of the fund's assets.

Summary of the gains/losses

2022

Realized gains/losses (incl. income adjustment)	EUR	-483 128.18
from:		
Securities transactions	EUR	-1 199 570.84

	Class PFD	EUR	87.77

Transactions processed for the account of the fund's assets via closely related companies (based on major holdings of the Deutsche Bank Group)

The share of transactions conducted in the reporting period for the account of the fund's assets via brokers that are closely related companies and persons (share of 5% and above), amounted to 6.46% of all transactions. The total volume was EUR 2 537 546.80.

Placement fee / Dilution adjustment

In the reporting period the fund paid a placement fee of 2.9% of the fund's net assets to the sales agent. This was calculated on the subscription date. This placement fee serves in particular as compensation for distribution. The gross amount of the placement fee was paid on the subscription date and simultaneously recognized in the fund's net assets as prepaid expenses. These are amortized on a daily basis over a period of three years from the subscription date. The remaining position for prepaid expenses per share on any valuation is calculated on a daily basis by multiplying the net assets of the fund by a factor. The relevant factor is determined by the linear reduction of the placement fee by a certain percentage on a daily basis over three years from the subscription date. The prepaid expenses position fluctuates during the three years from the subscription date, since it depends on both the fund's net assets and the predetermined factor.

In addition, a dilution adjustment of up to 3% based on the gross redemption amount was charged for the benefit of the fund's net assets in the reporting period (to be paid by the shareholder).

Further details on the placement fee and the dilution adjustment can be found in the corresponding section of the fund's sales prospectus.

Swing pricing

Extensive subscriptions and redemptions within a sub-fund may lead to a dilution of the assets of this sub-fund, as the net asset value sometimes does not reflect all trading and other costs that are incurred when the portfolio manager must buy or sell securities in order to manage large (net) inflows or outflows in the sub-fund. In addition to these costs, substantial order volumes may lead to market prices that are considerably below or above the market prices that apply under normal circumstances.

In order to improve investor protection for existing shareholders, a swing price mechanism can be applied to compensate for trading costs and other expenses if, on a valuation date, a sub-fund is materially affected by the aforementioned cumulative (net) inflows or outflows and a defined threshold is exceeded (this mechanism can be applied to all sub-funds). If a swing price mechanism is introduced for a particular sub-fund, this will be published in the special section of the sales prospectus.

The Management Company for the information of the Board of Directors shall define threshold values for the application of the swing pricing mechanism, which are based on the current market conditions, the available market liquidity and the estimated dilution costs, among other things. The actual adjustment will then be automatically introduced in line with the threshold values. The adjusted net asset value will be applied uniformly to all subscriptions and redemptions for the trading day in question. If a performance-based fee applies for the sub-fund, the calculation is based on the original net asset value.

The amount of the swing pricing adjustment may vary from one sub-fund to another and shall not exceed 2% of the original net asset value per share. The appropriateness of the swing factor applied shall be reviewed regularly with the involvement of the Swing Pricing Committee of the Management Company. Inquiries regarding the adjustment of the net asset value may sent to the Management Company.

As the mechanism should only be applied if significant (net) inflows and outflows are expected and it does not apply for normal trading volumes, it is assumed that the net asset value will only be adjusted occasionally.

The sub-fund can apply swing pricing but has not done so in the reporting period, as its (net) inflows and outflows did not exceed the relevant threshold previously defined.

Annual report

db Advisory Multibrands – DWS ESG Eurozone Bonds Flexible

Investment objective and performance in the reporting period

db Advisory Multibrands – DWS ESG Eurozone Bonds Flexible seeks to achieve above-average returns. To attain this objective, the sub-fund invests in various target funds with a focus on different fixed income classes such as investment grade credit bonds, high-yield credit bonds, covered bonds and convertible bonds. The sub-fund may also invest in exchange-traded funds (ETFs) replicating fixed income indices or baskets of such indices and in time deposits, in short-term money market funds, in money market funds, in money market instruments and in liquid assets. The sub-fund invests primarily in funds managed by Deutsche Bank and affiliates of Deutsche Bank Group. Derivative instruments may be used for hedging and implementation of the investment policy.

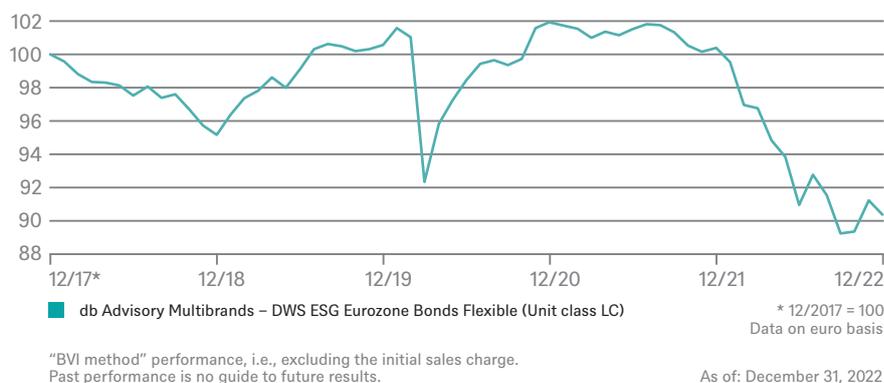

db Advisory Multibrands – DWS ESG Eurozone Bonds Flexible recorded a loss of 10.0 % per share (LC share class, BVI method, in euro).

Investment policy in the reporting period

The international capital markets entered increasingly rough waters in 2022. This downward trend began with dramatically rising inflation figures due to increasing supply-chain constraints amid the steep economic recovery following the peak of the COVID-19 pandemic. The situation was exacerbated further by the ongoing war in Ukraine, which began when Russia invaded on February 24, 2022. Increasing sanctions

“BVI method” performance, i.e., excluding the initial sales charge.
Past performance is no guide to future results.

As of: December 31, 2022

by Western countries against Russia and supply boycotts by Russia caused the prices of energy (oil, gas, coal) and also food to rise dramatically. To counteract inflation and its dynamics, many central banks raised interest rates noticeably, with some bringing many years of expansionary monetary policy to an end. The U.S. Federal Reserve (Fed) thus raised its key interest rate in seven steps from mid-March 2022 through mid-December 2022 by 4.25 percentage points to a target range of 4.25% p.a. – 4.50% p.a.. The European Central Bank (ECB) followed suit in the second half of July 2022, after a pause of almost three years, and raised its key interest rate in four steps by two-and-a-half percentage points to

altogether 2.50% p.a. Against that backdrop, and in view of weakening global economic growth during 2022, there were mounting fears among market actors of a recession taking hold. In view of high global debt levels and initially still very low interest rates, the bond markets saw marked price declines during the year through the end of December 2022, accompanied by a noticeable rise in bond yields. The rise in yields was principally driven by inflationary dynamics and the central banks’ action to raise interest rates significantly in response. The corporate bond markets were hobbled by price declines coupled with increased yields and widened risk premiums both in the investment-grade segment and for high-yield securities.

The portfolio management invested into various fixed income instruments like sovereign bonds, corporate bonds, covered bonds or emerging market bonds. The sub-fund also had an allocation into high yield investments. With respect to ratings, most of the positions are investment grade rated.

Higher quality issuers in general provided a better performance than weaker positioned peers. Derivatives were mostly used to hedge interest rate risk and foreign currency risk.

Number of shares outstanding		
Class LC	Count	37 622.860
Class LD	Count	53 496.000
Class PFC	Count	21 724.000
Class PFD	Count	3 194.000

Composition of the reference portfolio (according to CSSF circular 11/512)
14.14% of portfolio value

Market risk exposure (value-at-risk) (according to CSSF circular 11/512)

Lowest market risk exposure	%	0.628
Highest market risk exposure	%	2.602
Average market risk exposure	%	1.834

The values-at-risk were calculated for the period from January 1, 2022, through December 31, 2022, using historical simulation with a 99% confidence level, a 10-day holding period and an effective historical observation period of one year. The risk in a reference portfolio that does not contain derivatives is used as the measurement benchmark. Market risk is the risk to the fund's assets arising from an unfavorable change in market prices. The Company determines the potential market risk by means of the **absolute value-at-risk approach** as defined in CSSF circular 11/512.

In the reporting period, the average leverage effect from the use of derivatives was 0.4, whereby the total of the nominal amounts of the derivatives in relation to the fund's assets was used for the calculation (sum-of-notional approach).

The gross exposure generated via derivatives pursuant to point 40 a) of the "Guidelines on ETFs and other UCITS issues" of the European Securities and Markets Authority (ESMA) totaled EUR 3 506 941.47 as of the reporting date.

Notes on the valuation

Under the responsibility of the Board of Directors of the SICAV, the Management Company determines the net asset values per share and performs the valuation of the assets of the fund. The basic provision of price data and price validation are performed in accordance with the method introduced by the Board of Directors of the SICAV on the basis of the legal and regulatory requirements or the principles for valuation methods defined in the SICAV's prospectus. The basic provision of price data and price validation are performed in accordance with the method introduced by the Board of Directors of the SICAV on the basis of the legal and regulatory requirements or the principles for valuation methods defined in the SICAV's prospectus.

If no trading prices are available, prices are determined with the aid of valuation models (derived market values) which are agreed between State Street Bank International GmbH, Luxembourg branch, as external price service provider and the Management Company and which are based as far as possible on market parameters. This procedure is subject to an ongoing monitoring process. The plausibility of price information from third parties is checked through other pricing sources, model calculations or other suitable procedure.

Assets reported in this report are not valued at derived market values.

The management fee / all-in fee rates in effect as of the reporting date for the investment fund units held in the securities portfolio are shown in parentheses. A plus sign means that a performance-based fee may also be charged. As the investment fund held units of other investment funds (target funds) in the reporting period, further costs, charges and fees may have been incurred at the level of these individual target funds.

Footnotes

* Floating interest rate.

** The prepaid placement fee is amortized over a period of three years (as specified in article 13 (f) of the general section of the fund's management regulations).

Statement of income and expenses (incl. income adjustment)

for the year from January 1, 2022, through December 31, 2022

I. Income			
1. Interest from securities (before withholding tax)	EUR	104 253.75	
2. Interest from investments of liquid assets (before withholding tax)	EUR	73.15	
3. Deduction for foreign withholding tax	EUR	-576.90	
4. Other income	EUR	19.79	
<u>thereof:</u>			
Other	EUR	18 757.99	
Total income	EUR	103 769.79	
II. Expenses			
1. Interest on borrowings and negative interest on deposits	EUR	-1 253.63	
2. Management fee	EUR	-69 983.02	
<u>thereof:</u>			
Basic management fee	EUR	-69 983.02	
3. Legal and publication costs	EUR	-161.59	
4. Taxe d'abonnement	EUR	-4 574.45	
5. Other expenses	EUR	-37 120.69	
<u>thereof:</u>			
Distribution costs	EUR	-13 266.87	
Expenses from prepaid placement fee ¹	EUR	-24 460.10	
Other ²	EUR	606.28	
Total expenses	EUR	-113 093.38	
III. Net investment expense	EUR	-9 323.59	
IV. Sale transactions			
Realized gains/losses	EUR	-176 776.79	
Capital gains/losses	EUR	-176 776.79	
V. Net gain/loss for the fiscal year	EUR	-186 100.38	

¹ For further information, please refer to the notes to the financial statements.

² This includes primarily income from the reversal of excess accruals of Regulatory fees in the amount of EUR 1 464.09.

BVI total expense ratio (TER)

The total expense ratio for the share classes was:

Class LC 0.95% p.a.,	Class LD 0.94% p.a.,
Class PFC 1.54% p.a.,	Class PFD 0.29% p.a.

The TER expresses total expenses and fees (excluding transaction costs) as a percentage of a fund's average net assets in relation to the respective share class for a given fiscal year.

Transaction costs

The transaction costs paid in the fiscal year amounted to EUR 735.72.

The transaction costs include all costs that were reported or settled separately for the account of the fund in the fiscal year and are directly connected to the purchase or sale of assets. Any financial transaction taxes which may have been paid are included in the calculation.

Statement of changes in net assets

2022

I. Value of the fund's net assets at the beginning of the fiscal year			
1. Distribution for the previous year	EUR	-61 523.38	
2. Net outflows ³	EUR	-2 014 941.96	
3. Income adjustment	EUR	-35 458.95	
4. Net investment expense	EUR	-9 323.59	
5. Realized gains/losses	EUR	-176 776.79	
6. Net change in unrealized appreciation/depreciation	EUR	-1 030 396.94	
II. Value of the fund's net assets at the end of the fiscal year			
	EUR	10 028 132.62	

³ Reduced by a dilution adjustment in the amount of EUR 2 424.66 for the benefit of the fund's assets.

Summary of the gains/losses

2022

Realized gains/losses (incl. income adjustment)	EUR	-176 776.79
<u>from:</u>		
Securities transactions	EUR	-672 304.40
(Forward) currency transactions	EUR	-22 482.53
Derivatives and other financial futures transactions ⁴	EUR	518 010.14

⁴ This line item may include options transactions or swap transactions and/or transactions from warrants and credit derivatives.

Details on the distribution policy *

Class LC

The income for the fiscal year is reinvested.

Class LD

Type	as of	Currency	Per share
Final distribution	March 10, 2023	EUR	0.77

Class PFC

The income for the fiscal year is reinvested.

Class PFD

Type	as of	Currency	Per share
Final distribution	March 10, 2023	EUR	1.09

* Additional information is provided in the sales prospectus.

In the event of a final distribution, any remaining ordinary results of the financial year will be capitalised.

	Class PFD	EUR	91.81

Transactions processed for the account of the fund's assets via closely related companies (based on major holdings of the Deutsche Bank Group)

The share of transactions conducted in the reporting period for the account of the fund's assets via brokers that are closely related companies and persons (share of 5% and above), amounted to 3.49% of all transactions. The total volume was EUR 489 808.66.

Placement fee / Dilution adjustment

In the reporting period the fund paid a placement fee of 2.9% of the fund's net assets to the sales agent. This was calculated on the subscription date. This placement fee serves in particular as compensation for distribution. The gross amount of the placement fee was paid on the subscription date and simultaneously recognized in the fund's net assets as prepaid expenses. These are amortized on a daily basis over a period of three years from the subscription date. The remaining position for prepaid expenses per share on any valuation is calculated on a daily basis by multiplying the net assets of the fund by a factor. The relevant factor is determined by the linear reduction of the placement fee by a certain percentage on a daily basis over three years from the subscription date. The prepaid expenses position fluctuates during the three years from the subscription date, since it depends on both the fund's net assets and the predetermined factor.

In addition, a dilution adjustment of up to 3% based on the gross redemption amount was charged for the benefit of the fund's net assets in the reporting period (to be paid by the shareholder).

Further details on the placement fee and the dilution adjustment can be found in the corresponding section of the fund's sales prospectus.

Annual report

db Advisory Multibrands – DWS StepIn ESG Global Equities

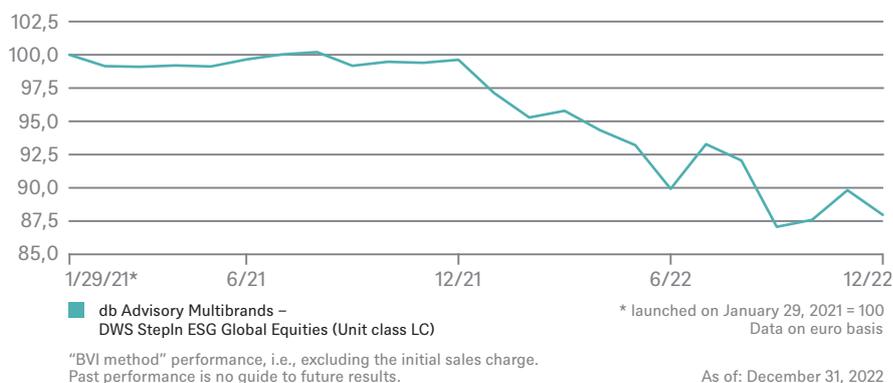

Investment objective and performance in the reporting period

The objective of the investment policy is to generate an above average return for the sub-fund. In order to achieve this, the sub-fund invests in fixed income assets such as interest-bearing securities, convertible bonds, money-market instruments, bank balances (the “Fixed Income Assets”) as well as equities and/or securities equivalent to equities (“the Equities”). Investments in Fixed Income Assets and Equities shall be mainly held indirectly through investment funds. Derivatives may be used for efficient portfolio management purposes, mainly to hedge foreign currency risks. At the launch date, the sub-fund’s assets should be predominantly invested in Fixed Income Assets. The portfolio management intends to decrease the respective proportion of Fixed Income Assets step-by-step over a five-year period (the “Shifting Period”) and simultaneously increase the respective proportion invested into Equities by 1.5%-points of the sub-fund’s assets with each monthly step (monthly “StepIn”) to at least 95% of the sub-fund’s assets. When selecting investments, environmental and social aspects and the principles of good corporate governance (ESG aspects) are taken into consideration alongside the financial performance*.

db Advisory Multibrands – DWS StepIn ESG Global Equities recorded a loss of 11.4 % per share (LC share class, BVI method, in Euro) in the reporting period until the end of December 2022.

As of: December 31, 2022

Investment policy in the reporting period

The international capital markets entered increasingly rough waters in 2022. This downward trend began with dramatically rising inflation figures due to increasing supply-chain constraints amid the steep economic recovery following the peak of the COVID-19 pandemic.

The situation was exacerbated further by the ongoing war in Ukraine, which began when Russia invaded on February 24, 2022. Increasing sanctions by Western countries against Russia and supply boycotts by Russia caused the prices of energy (oil, gas, coal) and also food to rise dramatically.

To counteract inflation and its dynamics, many central banks raised interest rates noticeably, with some bringing many years of expansionary monetary policy to an end. The U.S. Federal Reserve (Fed) thus raised its key interest rate in seven steps from mid-March 2022 through mid-December 2022 by 4.25 percentage points to a target range of 4.25% p.a. – 4.50% p.a. The European Central Bank (ECB) followed suit in the second half of July 2022, after a pause of almost three years, and raised its key interest rate in four steps by two-and-a-half percentage points to altogether 2.50% p.a. Against that backdrop, and in view of weakening global economic growth during 2022,

there were mounting fears among market actors of a recession taking hold.

In this investment climate, the international equity markets recorded significant price declines and closed mostly in deep negative territory.

Notes on valuation

Under the responsibility of the Board of Directors of the SICAV, the Management Company determines the net asset values per share and performs the valuation of the assets of the fund. The basic provision of price data and price validation are performed in accordance with the method introduced by the Board of Directors of the SICAV on the basis of the legal and regulatory requirements or the principles for valuation methods defined in the SICAV's prospectus. The basic provision of price data and price validation are performed in accordance with the method introduced by the Board of Directors of the SICAV on the basis of the legal and regulatory requirements or the principles for valuation methods defined in the SICAV's prospectus.

If no trading prices are available, prices are determined with the aid of valuation models (derived market values) which are agreed between State Street Bank International GmbH, Luxembourg branch, as external price service provider and the Management Company and which are based as far as possible on market parameters. This procedure is subject to an ongoing monitoring process. The plausibility of price information from third parties is checked through other pricing sources, model calculations or other suitable procedure.

Assets reported in this report are not valued at derived market values.

The management fee / all-in fee rates in effect as of the reporting date for the investment fund units held in the securities portfolio are shown in parentheses. A plus sign means that a performance-based fee may also be charged. As the investment fund held units of other investment funds (target funds) in the reporting period, further costs, charges and fees may have been incurred at the level of these individual target funds.

Footnote

* The prepaid placement fee is amortized over a period of three years (as specified in article 13 (f) of the general section of the fund's management regulations).

V. Net gain/loss for the fiscal year	EUR	-8 214 090.54	

¹ For further information, please refer to the notes to the financial statements.

BVI total expense ratio (TER)

The total expense ratio for the share classes was:

Class LC 1.51% p.a., Class PFC 1.92% p.a.

The TER expresses total expenses and fees (excluding transaction costs) as a percentage of a fund's average net assets in relation to the respective share class for a given fiscal period.

Further costs, charges and fees were incurred at the level of the target funds. The fund invested more than 20% of its assets in target funds. If the target funds publish a TER themselves, this will be taken into account at fund level (synthetic TER). If a TER is not published at target fund level, the all-in fee/management fee is used for the calculation. The synthetic TER was:

Class LC 1.87% p.a., Class PFC 2.28% p.a.

Transaction costs

The transaction costs paid in the fiscal year amounted to EUR 2 109.72.

The transaction costs include all costs that were reported or settled separately for the account of the fund in the fiscal year and are directly connected to the purchase or sale of assets. Any financial transaction taxes which may have been paid are included in the calculation.

	Class PFC	EUR	87.73
2021	Class LC	EUR	99.63
	Class PFC	EUR	99.47
2020	Class LC	EUR	-
	Class PFC	EUR	-

Transactions processed for the account of the fund's assets via closely related companies (based on major holdings of the Deutsche Bank Group)

The share of transactions conducted in the reporting period for the account of the fund's assets via brokers that are closely related companies and persons (share of 5% and above), amounted to 2.56% of all transactions. The total volume was EUR 1 890 029.99.

Placement fee / Dilution adjustment

In the reporting period the fund paid a placement fee of 2.9% of the fund's net assets to the sales agent. This was calculated on the subscription date. This placement fee serves in particular as compensation for distribution. The gross amount of the placement fee was paid on the subscription date and simultaneously recognized in the fund's net assets as prepaid expenses. These are amortized on a daily basis over a period of three years from the subscription date. The remaining position for prepaid expenses per share on any valuation is calculated on a daily basis by multiplying the net assets of the fund by a factor. The relevant factor is determined by the linear reduction of the placement fee by a certain percentage on a daily basis over three years from the subscription date. The prepaid expenses position fluctuates during the three years from the subscription date, since it depends on both the fund's net assets and the predetermined factor.

In addition, a dilution adjustment of up to 3% based on the gross redemption amount was charged for the benefit of the fund's net assets in the reporting period (to be paid by the shareholder).

Further details on the placement fee and the dilution adjustment can be found in the corresponding section of the fund's sales prospectus.

Swing pricing

Extensive subscriptions and redemptions within a sub-fund may lead to a dilution of the assets of this sub-fund, as the net asset value sometimes does not reflect all trading and other costs that are incurred when the portfolio manager must buy or sell securities in order to manage large (net) inflows or outflows in the sub-fund. In addition to these costs, substantial order volumes may lead to market prices that are considerably below or above the market prices that apply under normal circumstances.

In order to improve investor protection for existing shareholders, a swing price mechanism can be applied to compensate for trading costs and other expenses if, on a valuation date, a sub-fund is materially affected by the aforementioned cumulative (net) inflows or outflows and a defined threshold is exceeded (this mechanism can be applied to all sub-funds). If a swing price mechanism is introduced for a particular sub-fund, this will be published in the special section of the sales prospectus.

The Management Company for the information of the Board of Directors shall define threshold values for the application of the swing pricing mechanism, which are based on the current market conditions, the available market liquidity and the estimated dilution costs, among other things. The actual adjustment will then be automatically introduced in line with the threshold values. The adjusted net asset value will be applied uniformly to all subscriptions and redemptions for the trading day in question. If a performance-based fee applies for the sub-fund, the calculation is based on the original net asset value.

The amount of the swing pricing adjustment may vary from one sub-fund to another and shall not exceed 2% of the original net asset value per share. The appropriateness of the swing factor applied shall be reviewed regularly with the involvement of the Swing Pricing Committee of the Management Company. Inquiries regarding the adjustment of the net asset value may be sent to the Management Company.

As the mechanism should only be applied if significant (net) inflows and outflows are expected and it does not apply for normal trading volumes, it is assumed that the net asset value will only be adjusted occasionally.

The sub-fund can apply swing pricing but has not done so in the reporting period, as its (net) inflows and outflows did not exceed the relevant threshold previously defined.

Annual report

db Advisory Multibrands – DWS StepIn ESG Thematic Equities

Investment objective and performance in the reporting period

The objective of the investment policy is to generate an above average return for the sub-fund. In order to achieve this, the sub-fund invests in fixed income assets such as interest-bearing securities, convertible bonds, money-market instruments, bank balances (the “Fixed Income Assets”) as well as equities and/or securities equivalent to equities (“the Equities”). Investments in Fixed Income Assets and Equities shall be mainly held indirectly through investment funds. Derivatives may be used for efficient portfolio management purposes, mainly to hedge foreign currency risks. At the launch date, the fund’s assets shall be predominantly invested in Fixed Income Assets. The portfolio management intends to decrease the respective proportion of Fixed Income Assets step-by-step over a three-year period (the “Shifting Period”) and simultaneously increase the respective proportion invested into Equities by 2,5%-points of the fund’s assets with each monthly step (monthly “StepIn”) to at least 90% of the fund’s assets. When selecting investments, environmental and social aspects and the principles of good corporate governance (ESG aspects) are taken into consideration alongside the financial performance*.

The portfolio management pursues an “Environmental, Social and Corporate Governance (ESG) concept” by investing exclusively in DWS ESG funds. When selecting investments, environmental and social aspects and the principles of good corporate governance

(ESG aspects) are taken into consideration alongside the financial performance.

The sub-fund db Advisory Multibrands – DWS StepIn ESG Thematic Equities launched on January 17, 2022, recorded a loss of 9.7% per share (LC share class, BVI method, in Euro) in the reporting period until the end of December 2022.

Investment policy in the reporting period

The international capital markets entered increasingly rough waters in 2022. This downward trend began with dramatically rising inflation figures due to increasing supply-chain constraints amid the steep economic recovery following the peak of the COVID-19

pandemic. The situation was exacerbated further by the ongoing war in Ukraine, which began when Russia invaded on February 24, 2022. Increasing sanctions by Western countries against Russia and supply boycotts by Russia caused the prices of energy (oil, gas, coal) and also food to rise dramatically. To counteract inflation and its dynamics, many central banks raised interest rates noticeably, with some bringing many years of expansionary monetary policy to an end. The U.S. Federal Reserve (Fed) thus raised its key interest rate in seven steps from mid-March 2022 through mid-December 2022 by 4.25 percentage points to a target range of 4.25% p.a. – 4.50% p.a. The European Central Bank (ECB) followed suit in the second half of July

2022, after a pause of almost three years, and raised its key interest rate in four steps by two-and-a-half percentage points to altogether 2.50% p.a. Against that backdrop, and in view of weakening global economic growth during 2022, there were mounting fears among market actors of a recession taking hold. In this investment climate, the international equity markets recorded significant price declines and closed mostly in deep negative territory. The Japanese equity market, on the other hand, fared better thanks to the weakness of the yen, which favored Japanese export companies.

db Advisory Multibrands – DWS StepIn ESG Thematic Equities

Composition of the reference portfolio (according to CSSF circular 11/512)

65% BBG Global Aggregate Corporate EUR Index, 35% MSCI World Net TR Index in EUR

Market risk exposure (Value-at-Risk) (according to CSSF circular 11/512)

Lowest market risk exposure	%	0.000
Highest market risk exposure	%	74.903
Average market risk exposure	%	55.597

The values-at-risk were calculated for the period from January 17, 2022, through December 31, 2022, using historical simulation with a 99% confidence level, a 10-day holding period and an effective historical observation period of one year. The risk in a reference portfolio that does not contain derivatives is used as the measurement benchmark. Market risk is the risk to the fund's assets arising from an unfavorable change in market prices. The Company determines the potential market risk by means of the **relative value-at-risk approach** as defined in CSSF circular 11/512.

In the reporting period, the average leverage effect from the use of derivatives was 0.0, whereby the total of the nominal amounts of the derivatives in relation to the fund's assets was used for the calculation (sum-of-notional approach).

The gross exposure generated via derivatives pursuant to point 40 a) of the "Guidelines on ETFs and other UCITS issues" of the European Securities and Markets Authority (ESMA) totaled EUR 0.00 as of the reporting date.

Notes on valuation

Under the responsibility of the Board of Directors of the SICAV, the Management Company determines the net asset values per share and performs the valuation of the assets of the fund. The basic provision of price data and price validation are performed in accordance with the method introduced by the Board of Directors of the SICAV on the basis of the legal and regulatory requirements or the principles for valuation methods defined in the SICAV's prospectus. The basic provision of price data and price validation are performed in accordance with the method introduced by the Board of Directors of the SICAV on the basis of the legal and regulatory requirements or the principles for valuation methods defined in the SICAV's prospectus.

If no trading prices are available, prices are determined with the aid of valuation models (derived market values) which are agreed between State Street Bank International GmbH, Luxembourg branch, as external price service provider and the Management Company and which are based as far as possible on market parameters. This procedure is subject to an ongoing monitoring process. The plausibility of price information from third parties is checked through other pricing sources, model calculations or other suitable procedure.

Assets reported in this report are not valued at derived market values.

The management fee / all-in fee rates in effect as of the reporting date for the investment fund units held in the securities portfolio are shown in parentheses. A plus sign means that a performance-based fee may also be charged. As the investment fund held units of other investment funds (target funds) in the reporting period, further costs, charges and fees may have been incurred at the level of these individual target funds.

Footnote

* The prepaid placement fee is amortized over a period of three years (as specified in article 13 (f) of the general section of the fund's management regulations).

V. Net gain/loss for the fiscal period	EUR	-5 540 087.42

¹ For further information, please refer to the notes to the financial statements.

BVI total expense ratio (TER)

The total expense ratio for the share classes was:

Class LC 1.46%² Class PFC 1.84%²

The TER expresses total expenses and fees (excluding transaction costs) as a percentage of a fund's average net assets in relation to the respective share class for a given fiscal year.

Further costs, charges and fees were incurred at the level of the target funds. The fund invested more than 20% of its assets in target funds. If the target funds publish a TER themselves, this will be taken into account at fund level (synthetic TER). If a TER is not published at target fund level, the all-in fee/management fee is used for the calculation. The synthetic TER was:

Class LC 1.80%² Class PFC 2.18%²

² Annualization has not been performed for share classes launched during the year.

Transaction costs

The transaction costs paid in the fiscal year amounted to EUR 0.00.

The transaction costs include all costs that were reported or settled separately for the account of the fund in the fiscal year and are directly connected to the purchase or sale of assets. Any financial transaction taxes which may have been paid are included in the calculation.

Statement of changes in net assets

2022

I. Value of the fund's net assets at the beginning of the fiscal period

	Class PFC	EUR	89.96
2021	Class LC	EUR	-
	Class PFC	EUR	-
2020	Class LC	EUR	-
	Class PFC	EUR	-

Transactions processed for the account of the fund's assets via closely related companies (based on major holdings of the Deutsche Bank Group)

The share of transactions conducted in the reporting period for the account of the fund's assets via brokers that are closely related companies and persons (share of 5% and above), amounted to 0.00% of all transactions. The total volume was EUR 0.00.

Placement fee / Dilution adjustment

In the reporting period the fund paid a placement fee of 2.9% of the fund's net assets to the sales agent. This was calculated on the subscription date. This placement fee serves in particular as compensation for distribution. The gross amount of the placement fee was paid on the subscription date and simultaneously recognized in the fund's net assets as prepaid expenses. These are amortized on a daily basis over a period of three years from the subscription date. The remaining position for prepaid expenses per share on any valuation is calculated on a daily basis by multiplying the net assets of the fund by a factor. The relevant factor is determined by the linear reduction of the placement fee by a certain percentage on a daily basis over three years from the subscription date. The prepaid expenses position fluctuates during the three years from the subscription date, since it depends on both the fund's net assets and the predetermined factor.

In addition, a dilution adjustment of up to 3% based on the gross redemption amount was charged for the benefit of the fund's net assets in the reporting period (to be paid by the shareholder).

Further details on the placement fee and the dilution adjustment can be found in the corresponding section of the fund's sales prospectus

Annual report

db Advisory Multibrands – DWS StepIn Global Equities Evolution

Investment objective and performance in the reporting period

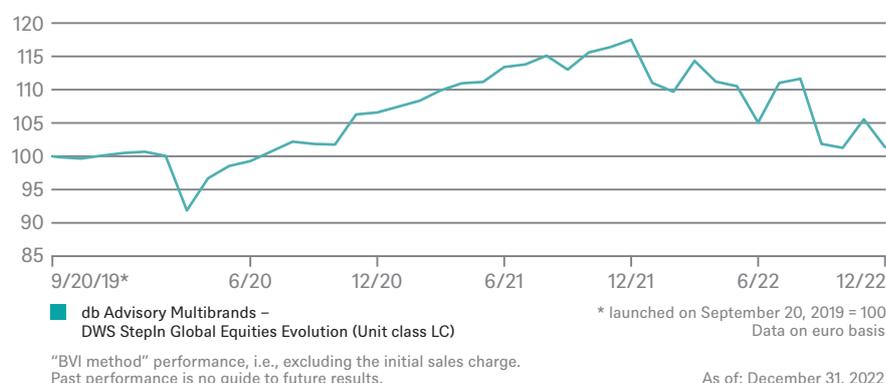

The objective of the investment policy is to generate an above average return. The sub fund invests in fixed income assets as well as equities, which are mainly held indirectly through funds. At launch date, the assets shall be invested predominantly in Fixed Income Assets which will be shifted step-by step over a three-year period into Equities to at least 90% of the fund's assets. Here it is intended to invest into funds with thematic focus. The fund management pursues an "evolutionary concept" by investing in thematic funds with future oriented focus.

The international capital markets entered increasingly rough waters in 2022. This downward trend began with dramatically rising inflation figures due to increasing supply-chain constraints amid the steep economic recovery following the peak of the COVID-19 pandemic. The situation was exacerbated further by the ongoing war in Ukraine, which began when Russia invaded on February 24, 2022. Increasing sanctions by Western countries against Russia and supply boycotts by Russia caused the prices of energy (oil, gas, coal) and also food to rise dramatically.

To counteract inflation and its dynamics, many central banks raised interest rates noticeably, with some bringing many years of expansionary monetary policy to an end. The U.S. Federal Reserve (Fed) thus raised its key interest rate in seven steps from mid-March 2022 through

“BVI method” performance, i.e., excluding the initial sales charge.
Past performance is no guide to future results.

As of: December 31, 2022

mid-December 2022 by 4.25 percentage points to a target range of 4.25% p.a. – 4.50% p.a. The European Central Bank (ECB) followed suit in the second half of July 2022, after a pause of almost three years, and raised its key interest rate in four steps by two-and-a-half percentage points to altogether 2.50% p.a. Against that backdrop, and in view of weakening global economic growth during 2022, there were mounting fears among market actors of a recession taking hold.

Against this backdrop, the sub-fund db Advisory Multibrands – DWS StepIn Global Equities Evolution achieved a performance of –13,8 per share (LC share class, BVI method; in Euro) in the 2022 fiscal year.

Investment policy in the reporting period

The fund's performance was affected by the general global development of the equity and fixed income markets. This also included the development of market sectors, particularly in the areas of infrastructure, industry, information technology, energy supply and agriculture. The main risks affecting the fund during the reporting period were inflation and central bank policy. These included above all the uncertainty about the future course of the major central banks in view of significantly increased inflation rates as well as recession risks. Geopolitical risks included the Russia/Ukraine conflict in particular, but also uncertainty in East Asia regarding the future of the econ-

omy. the uncertainty in East Asia regarding the further course of the coronavirus pandemic, possible mutations of the virus, the effectiveness of vaccines and, related to this, the effects on the global economy and the financial markets. Of course, the energy crisis in Europe was also part of it.

BVI total expense ratio (TER)

The total expense ratio for the share classes was:

Class LC 1.17% p.a., Class PFC 1.56% p.a.

The TER expresses total expenses and fees (excluding transaction costs) as a percentage of a fund's average net assets in relation to the respective share class for a given fiscal year.

Further costs, charges and fees were incurred at the level of the target funds. The fund invested more than 20% of its assets in target funds. If the target funds publish a TER themselves, this will be taken into account at fund level (synthetic TER). If a TER is not published at target fund level, the all-in fee/management fee is used for the calculation. The synthetic TER was:

Class LC 1.91% p.a., Class PFC 2.29% p.a.

Transaction costs

The transaction costs paid in the fiscal year amounted to EUR 2 014.76.

The transaction costs include all costs that were reported or settled separately for the account of the fund in the fiscal year and are directly connected to the purchase or sale of assets. Any financial transaction taxes which may have been paid are included in the calculation.

Statement of changes in net assets

2022

I. Value of the fund's net assets at the beginning of the fiscal year			
1. Net outflows ²	EUR	-26 273 059.73

db Advisory Multibrands – DWS StepIn Global Equities Evolution

Transactions processed for the account of the fund's assets via closely related companies (based on major holdings of the Deutsche Bank Group)

The share of transactions conducted in the reporting period for the account of the fund's assets via brokers that are closely related companies and persons (share of 5% and above), amounted to 0.00% of all transactions. The total volume was EUR 0.00.

Placement fee / Dilution adjustment

In the reporting period the fund paid a placement fee of 2.9% of the fund's net assets to the sales agent. This was calculated on the subscription date. This placement fee serves in particular as compensation for distribution. The gross amount of the placement fee was paid on the subscription date and simultaneously recognized in the fund's net assets as prepaid expenses. These are amortized on a daily basis over a period of three years from the subscription date. The remaining position for prepaid expenses per share on any valuation is calculated on a daily basis by multiplying the net assets of the fund by a factor. The relevant factor is determined by the linear reduction of the placement fee by a certain percentage on a daily basis over three years from the subscription date. The prepaid expenses position fluctuates during the three years from the subscription date, since it depends on both the fund's net assets and the predetermined factor.

In addition, a dilution adjustment of up to 3% based on the gross redemption amount was charged for the benefit of the fund's net assets in the reporting period (to be paid by the shareholder).

Further details on the placement fee and the dilution adjustment can be found in the corresponding section of the fund's sales prospectus.

Swing pricing

Extensive subscriptions and redemptions within a sub-fund may lead to a dilution of the assets of this sub-fund, as the net asset value sometimes does not reflect all trading and other costs that are incurred when the portfolio manager must buy or sell securities in order to manage large (net) inflows or outflows in the sub-fund. In addition to these costs, substantial order volumes may lead to market prices that are considerably below or above the market prices that apply under normal circumstances.

In order to improve investor protection for existing shareholders, a swing price mechanism can be applied to compensate for trading costs and other expenses if, on a valuation date, a sub-fund is materially affected by the aforementioned cumulative (net) inflows or outflows and a defined threshold is exceeded (this mechanism can be applied to all sub-funds). If a swing price mechanism is introduced for a particular sub-fund, this will be published in the special section of the sales prospectus.

The Management Company for the information of the Board of Directors shall define threshold values for the application of the swing pricing mechanism, which are based on the current market conditions, the available market liquidity and the estimated dilution costs, among other things. The actual adjustment will then be automatically introduced in line with the threshold values. The adjusted net asset value will be applied uniformly to all subscriptions and redemptions for the trading day in question. If a performance-based fee applies for the sub-fund, the calculation is based on the original net asset value.

The amount of the swing pricing adjustment may vary from one sub-fund to another and shall not exceed 2% of the original net asset value per share. The appropriateness of the swing factor applied shall be reviewed regularly with the involvement of the Swing Pricing Committee of the Management Company. Inquiries regarding the adjustment of the net asset value may be sent to the Management Company.

As the mechanism should only be applied if significant (net) inflows and outflows are expected and it does not apply for normal trading volumes, it is assumed that the net asset value will only be adjusted occasionally.

The sub-fund can apply swing pricing but has not done so in the reporting period, as its (net) inflows and outflows did not exceed the relevant threshold previously defined.

Annual report

db Advisory Multibrands – Franklin Templeton Global Conservative Portfolio (in liquidation)

Investment objective and performance in the reporting period

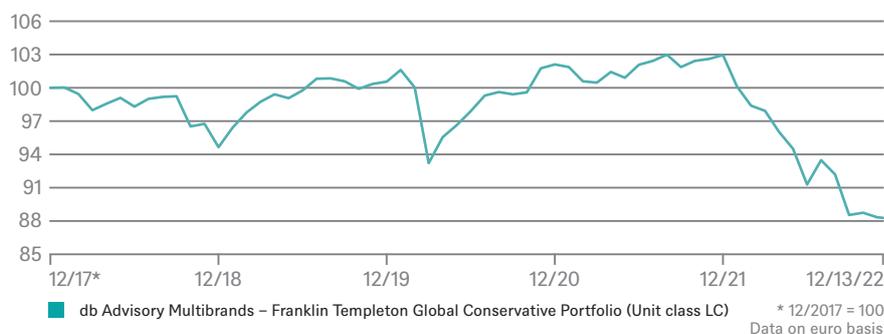

The objective of the investment policy of db Advisory Multibrands – Franklin Templeton Global Conservative Portfolio (in liquidation) was to seek medium-term capital appreciation with low volatility. In order to achieve this, the sub-fund invested in various funds and exchange traded funds that invest in worldwide debt securities, equities and/or money market Instruments. The sub-fund might also invest in equities, debt securities, money market instruments and cash. The sub-fund invested at least 51% in funds managed by Franklin Templeton and affiliates of the Franklin Templeton Group and might only invest up to 40% of its net assets in equity exposure. Derivative instruments might be used for hedging and investment purposes.

In the reporting period from the beginning of January 2022 to December 13, 2022 (date of its liquidation) the sub-fund recorded a loss of 14.4% per share (LC share class, in euro, BVI method).

Investment policy in the reporting period

The international capital markets entered increasingly rough waters in the reporting period. This downward trend began with dramatically rising inflation figures due to increasing supply-chain constraints amid the steep economic recovery following the peak of the COVID-19 pandemic. The situation was exacerbated further by the ongoing war in Ukraine, which began when Russia invaded on February 24, 2022.

As of: December 13, 2022

Increasing sanctions by Western countries against Russia and supply boycotts by Russia caused the prices of energy (oil, gas, coal) and also food to rise dramatically. To counteract inflation and its dynamics, many central banks raised interest rates noticeably, with some bringing many years of expansionary monetary policy to an end. Against that backdrop, and in view of weakening global economic growth during the reporting period, there were mounting fears among market actors of a recession taking hold.

In this investment climate, the international equity markets recorded significant price declines and closed mostly in deep nega-

tive territory. The Japanese equity market, on the other hand, fared better thanks to the weakness of the yen, which favored Japanese export companies. In view of high global debt levels and initially still very low interest rates, the bond markets saw marked price declines during the reporting period, accompanied by a noticeable rise in bond yields. The rise in yields was principally driven by inflationary dynamics and the central banks’ action to raise interest rates significantly in response. The corporate bond markets were hobbled by price declines coupled with increased yields and widened risk premiums both in the investment-grade segment and for high-yield securities.

Liquidation of the sub-fund

The sub-fund db Advisory Multibrands – Franklin Templeton Global Conservative Portfolio (in liquidation) was liquidated effective December 13, 2022, following a resolution to that effect adopted by the Board of Directors of the SICAV and the approval of the Luxembourg supervisory authority CSSF. The issue of new shares of the sub-fund was discontinued effective November 2, 2022. Investors could redeem sub-fund shares until December 8, 2022.

Composition of the reference portfolio (according to CSSF circular 11/512)

50% Barclays Capital Multiverse Hedged EUR; 25% JPM Government Bond Index – Emerging Markets; 20% MSCI AC World Index; 5% EONIA

Market risk exposure (value-at-risk) (according to CSSF circular 11/512)

Lowest market risk exposure	%	0.000
Highest market risk exposure	%	148.062
Average market risk exposure	%	86.184

The values-at-risk were calculated for the period from January 1, 2022, through December 13, 2022 (liquidation date), using historical simulation with a 99% confidence level, a 10-day holding period and an effective historical observation period of one year. The risk in a reference portfolio that does not contain derivatives is used as the measurement benchmark. Market risk is the risk to the fund's assets arising from an unfavorable change in market prices. The Company determines the potential market risk by means of the **relative value-at-risk approach** as defined in CSSF circular 11/512.

In the reporting period, the average leverage effect from the use of derivatives was 0.0, whereby the total of the nominal amounts of the derivatives in relation to the fund's assets was used for the calculation (sum-of-notional approach).

The gross exposure generated via derivatives pursuant to point 40 a) of the "Guidelines on ETFs and other UCITS issues" of the European Securities and Markets Authority (ESMA) totaled EUR 0.00 as of the reporting date.

db Advisory Multibrands – Franklin Templeton Global Conservative Portfolio (in liquidation)

Notes on valuation

Under the responsibility of the Board of Directors of the SICAV, the Management Company determines the net asset values per share and performs the valuation of the assets of the fund. The basic provision of price data and price validation are performed in accordance with the method introduced by the Board of Directors of the SICAV on the basis of the legal and regulatory requirements or the principles for valuation methods defined in the SICAV's prospectus. The basic provision of price data and price validation are performed in accordance with the method introduced by the Board of Directors of the SICAV on the basis of the legal and regulatory requirements or the principles for valuation methods defined in the SICAV's prospectus.

If no trading prices are available, prices are determined with the aid of valuation models (derived market values) which are agreed between State Street Bank International GmbH, Luxembourg branch, as external price service provider and the Management Company and which are based as far as possible on market parameters. This procedure is subject to an ongoing monitoring process. The plausibility of price information from third parties is checked through other pricing sources, model calculations or other suitable procedure.

Assets reported in this report are not valued at derived market values.

The management fee / all-in fee rates in effect as of the reporting date for the investment fund units held in the securities portfolio are shown in parentheses. A plus sign means that a performance-based fee may also be charged. As the investment fund held units of other investment funds (target funds) in the reporting period, further costs, charges and fees may have been incurred at the level of these individual target funds.

Footnote

* The prepaid placement fee is amortized over a period of three years (as specified in article 13 (f) of the general section of the fund's management regulations).

Transactions processed for the account of the fund's assets via closely related companies (based on major holdings of the Deutsche Bank Group)

The share of transactions conducted in the reporting period for the account of the fund's assets via brokers that are closely related companies and persons (share of 5% and above), amounted to 0.00% of all transactions. The total volume was EUR 0.00.

Placement fee / Dilution adjustment

In the reporting period the fund paid a placement fee of 2.9% of the fund's net assets to the sales agent. This was calculated on the subscription date. This placement fee serves in particular as compensation for distribution. The gross amount of the placement fee was paid on the subscription date and simultaneously recognized in the fund's net assets as prepaid expenses. These are amortized on a daily basis over a period of three years from the subscription date. The remaining position for prepaid expenses per share on any valuation is calculated on a daily basis by multiplying the net assets of the fund by a factor. The relevant factor is determined by the linear reduction of the placement fee by a certain percentage on a daily basis over three years from the subscription date. The prepaid expenses position fluctuates during the three years from the subscription date, since it depends on both the fund's net assets and the predetermined factor.

In addition, a dilution adjustment of up to 3% based on the gross redemption amount was charged for the benefit of the fund's net assets in the reporting period (to be paid by the shareholder).

Further details on the placement fee and the dilution adjustment can be found in the corresponding section of the fund's sales prospectus.

Swing pricing

Extensive subscriptions and redemptions within a sub-fund may lead to a dilution of the assets of this sub-fund, as the net asset value sometimes does not reflect all trading and other costs that are incurred when the portfolio manager must buy or sell securities in order to manage large (net) inflows or outflows in the sub-fund. In addition to these costs, substantial order volumes may lead to market prices that are considerably below or above the market prices that apply under normal circumstances.

In order to improve investor protection for existing shareholders, a swing price mechanism can be applied to compensate for trading costs and other expenses if, on a valuation date, a sub-fund is materially affected by the aforementioned cumulative (net) inflows or outflows and a defined threshold is exceeded (this mechanism can be applied to all sub-funds). If a swing price mechanism is introduced for a particular sub-fund, this will be published in the special section of the sales prospectus.

The Management Company for the information of the Board of Directors shall define threshold values for the application of the swing pricing mechanism, which are based on the current market conditions, the available market liquidity and the estimated dilution costs, among other things. The actual adjustment will then be automatically introduced in line with the threshold values. The adjusted net asset value will be applied uniformly to all subscriptions and redemptions for the trading day in question. If a performance-based fee applies for the sub-fund, the calculation is based on the original net asset value.

The amount of the swing pricing adjustment may vary from one sub-fund to another and shall not exceed 2% of the original net asset value per share. The appropriateness of the swing factor applied shall be reviewed regularly with the involvement of the Swing Pricing Committee of the Management Company. Inquiries regarding the adjustment of the net asset value may sent to the Management Company.

As the mechanism should only be applied if significant (net) inflows and outflows are expected and it does not apply for normal trading volumes, it is assumed that the net asset value will only be adjusted occasionally.

The sub-fund can apply swing pricing but has not done so in the reporting period, as its (net) inflows and outflows did not exceed the relevant threshold previously defined.

Annual report

db Advisory Multibrands – Invesco Asia Megatrends

Investment objective and performance in the reporting period

The objective of the investment policy of db Advisory Multibrands – Invesco Asia Megatrends is to achieve long-term capital growth. The sub-fund invests in various actively managed funds and ETFs focusing on different asset classes such as fixed income, equities and commodities. The sub-fund may also invest in money market funds, money market instruments and liquid assets. The sub-fund invests predominantly in funds and ETFs managed by Invesco and its affiliates. The sub-fund will show an orientation towards Asian markets, in parallel the sub-fund may also invest in Emerging Markets in relation to the definition of megatrend with Asian focus.

The international capital markets entered increasingly rough waters in 2022. This downward trend began with dramatically rising inflation figures due to increasing supply-chain constraints amid the steep economic recovery following the peak of the COVID-19 pandemic. The situation was exacerbated further by the ongoing war in Ukraine, which began when Russia invaded on February 24, 2022. Increasing sanctions by Western countries against Russia and supply boycotts by Russia caused the prices of energy (oil, gas, coal) and also food to rise dramatically. To counteract inflation and its dynamics, many central banks raised interest rates noticeably, with some bringing many years of expansionary monetary policy to an end. The U.S. Federal Reserve (Fed) thus raised its key interest rate in seven steps

“BVI method” performance, i.e., excluding the initial sales charge.
Past performance is no guide to future results.

As of: December 31, 2022

from mid-March 2022 through mid-December 2022 by 4.25 percentage points to a target range of 4.25% p.a. – 4.50% p.a. The European Central Bank (ECB) followed suit in the second half of July 2022, after a pause of almost three years, and raised its key interest rate in four steps by two-and-a-half percentage points to altogether 2.50% p.a. Against that backdrop, and in view of weakening global economic growth during 2022, there were mounting fears among market actors of a recession taking hold.

The sub-fund recorded a loss of 20.7% per share (LC share class;

BVI method; in euro) in the fiscal year through December 31, 2022.

Investment policy in the reporting period

In terms of both financial markets, performance and economic growth, 2022 was very different compared to 2021. The global economy weakened. Leading economic indicators recorded noticeable declines across most regions in 2022. This broad-based deterioration in economic momentum posed a threat to the improving risk sentiment. In addition to that, the overall exposure of the strategy to Asian Markets was strongly impacted by the long dating lock-

down period that characterized the Chinese Economy. On top of that the general decline of private inventory investment, weak residential and non-residential fixed investment, government spending, and a large decline in net exports, led by a large increase in imports, explained the weak market environment that characterized the first six months of 2022. Fears of recession has never left the market sentiment in the first three quarter of the year, and this negatively impacted risky and theoretically less risky asset class during the entire year.

In the first quarter of the year a longer duration was a negative contributor in absolute terms for the sub-fund. In addition to that, the cyclical tilt that characterizes some of the Asian Megatrends in the strategy, suffered a higher volatility period in 2022 compared to more defensive assets Consumer Spending, and Asian opportunities were more trimmed in a long dating period of lockdowns that characterized the Chinese environment. Even the Belt and Road Fund, which didn't suffer relative to its market benchmark represented one of the most hit asset classes during the year. Summing up those elements explains the performance recorded in 2022.

Overall the strategy showed an embedded cyclical tilt assigned by the characterization of Asian Megatrends as defined by Investment guidelines. However, in a period where a more defensive tilt was preferred to manage the strategy, the Investment team reduced the positioning in the Invesco Asian Opportunities fund and Invesco

Asian Consumer demand fund to switch to the Invesco Pacific Equity fund and Invesco Asian Equity fund.

This movement created a less cyclical tilt that benefitted the strategy in the second part of the year. In addition to that, the team used all the lever to diversify the Emerging market exposure with Developed countries. The tilt remained well bounded to investment guidelines, but it helped the strategy to reduce the cyclical risk.

The following values performed best in the reporting period:

- Equity Fund: Invesco Asian Equity fund – the active management team created a positive manager effect compared to its style benchmark. In addition, the timing of the fund movements in the strategy created a positive Style effect versus the stated benchmark.
- Equity ETF: Invesco MSCI World ESG Universal Screened UCITS ETF - the timing of the etf movements in the strategy created a positive Style effect versus the stated benchmark.

The following values performed the worst in the reporting period:

- Equity Funds: Invesco Asian Opportunities fund & Invesco Asian Consumer demand fund– the performance of both funds created a negative manager selection effect. The long dating lockdowns that characterized the Chinese economy were the main performance detractor for these strategies.
- During the year the Invesco Funds SICAV - Invesco Belt and

Road Debt Fund -C (EUR)- Capitalisation was closed to take an euro hedged positions (loss). In addition, the fund Invesco Funds SICAV - Invesco Asia Opportunities Equity Fund -C (EUR Hgd) (loss)- Capitalisation was closed to reduce the cyclical tilt of the strategy.

These values were newly added:

- Invesco Funds SICAV – Invesco Belt and Road Debt Fund -C (EUR Hedged)- Capitalisation.
- Invesco Funds SICAV – Invesco Pacific Equity Fund -C Annual Distribution- Distribution

Futures were used to manage the EUR USD currency exposure and EUR JPY currency exposure. In addition, Futures on the US Ultra T bond and German Buxl were used to actively manage duration during the year.

After defensive months, attributable to the summer and autumn period, in November, and above all in December, the more cyclical components once again played a significant role in portfolio exposure.

In detail, the emerging equity component and the credit component were increased. The positions were financed through a reduction of equity positions on developed markets, in particular the United States, and the government component. Global growth outperformed expectations, and recovery regimes were generally accompanied by strong exports of US capital to the global economy.

This lead the investment team to expect a consequent depreciation

of the dollar. While yield spreads continued to support the US dollar relative to other currencies, expensive valuations provided headwinds for the greenback at a time when safe-haven flows were slowing.

The trend reversal observed on the emerging markets, and for the Asian markets which structurally characterized the portfolio, according to the investment guidelines of the mandate, benefited the strategy.

Composition of the reference portfolio (according to CSSF circular 11/512)

10% MSCI World Net TR Index in EUR, 40% MSCI EM Asia Net Index in EUR, 20% Bloomberg Barclays Global Treasuries Euro hedged, 25% Barclays Emerging Markets Hard Currency Aggregate index Euro Hedged

Market risk exposure (value-at-risk) (according to CSSF circular 11/512)

Lowest market risk exposure	%	83.041
Highest market risk exposure	%	120.761
Average market risk exposure	%	101.866

The values-at-risk were calculated for the period from January 1, 2022, through December 31, 2022, using historical simulation with a 99% confidence level, a 10-day holding period and an effective historical observation period of one year. The risk in a reference portfolio that does not contain derivatives is used as the measurement benchmark. Market risk is the risk to the fund's assets arising from an unfavorable change in market prices. The Company determines the potential market risk by means of the **relative value-at-risk approach** as defined in CSSF circular 11/512.

In the reporting period, the average leverage effect from the use of derivatives was 0.3, whereby the total of the nominal amounts of the derivatives in relation to the fund's assets was used for the calculation (sum-of-notional approach).

The gross exposure generated via derivatives pursuant to point 40 a) of the "Guidelines on ETFs and other UCITS issues" of the European Securities and Markets Authority (ESMA) totaled EUR 8 631 447.58 as of the reporting date.

Notes on valuation

Under the responsibility of the Board of Directors of the SICAV, the Management Company determines the net asset values per share and performs the valuation of the assets of the fund. The basic provision of price data and price validation are performed in accordance with the method introduced by the Board of Directors of the SICAV on the basis of the legal and regulatory requirements or the principles for valuation methods defined in the SICAV's prospectus. The basic provision of price data and price validation are performed in accordance with the method introduced by the Board of Directors of the SICAV on the basis of the legal and regulatory requirements or the principles for valuation methods defined in the SICAV's prospectus.

If no trading prices are available, prices are determined with the aid of valuation models (derived market values) which are agreed between State Street Bank International GmbH, Luxembourg branch, as external price service provider and the Management Company and which are based as far as possible on market parameters. This procedure is subject to an ongoing monitoring process. The plausibility of price information from third parties is checked through other pricing sources, model calculations or other suitable procedure.

Assets reported in this report are not valued at derived market values.

The management fee / all-in fee rates in effect as of the reporting date for the investment fund units held in the securities portfolio are shown in parentheses. A plus sign means that a performance-based fee may also be charged. As the investment fund held units of other investment funds (target funds) in the reporting period, further costs, charges and fees may have been incurred at the level of these individual target funds.

Footnotes

* The prepaid placement fee is amortized over a period of three years (as specified in article 13 (f) of the general section of the fund's management regulations).

** Does not include positions with a negative balance, if such exist.

Statement of income and expenses (incl. income adjustment)

for the year from January 1, 2022, through December 31, 2022

I. Income			
1. Interest from securities (before withholding tax)	EUR	1974.28	
2. Interest from investments of liquid assets (before withholding tax)	EUR	4 741.19	
3. Income from investment units	EUR	278 765.82	
4. Deduction for foreign withholding tax 1	EUR	106.01	
5. Other income	EUR	44 261.95	
thereof:			
Income from trailer fees	EUR	42 303.27	
Other	EUR	1958.68	
Total income	EUR	329 849.25	
II. Expenses			
1. Interest on borrowings and negative interest on deposits	EUR	-10 841.84	
2. Management fee	EUR	-1 009 658.92	
thereof:			
Basic management fee	EUR	-1 009 658.92	
3. Legal and publication costs	EUR	-814.58	
4. Taxe d'abonnement	EUR	-10 920.09	
5. Other expenses	EUR	-388 622.00	
thereof:			
Expenses from prepaid placement fee 1	EUR	-346 417.41	
Other	EUR	-42 204.59	
Total expenses	EUR	-1 420 857.43	
III. Net investment expense	EUR	-1 091 008.18	
IV. Sale transactions			
Realized gains/losses	EUR	-8 900 936.72	
Capital gains/losses		EUR	-8 900 936.72
V. Net gain/loss for the fiscal year	EUR	-9 991 944.90	

¹ This includes primarily income from the liquidation of excess accruals in the amount of EUR 100 80.

² For further information, please refer to the notes to the financial statements.

BVI total expense ratio (TER)

The total expense ratio for the share classes was:

Class LC 2.51% p.a.,	Class LD 2.51% p.a.,
Class LDQ 2.18% ³	Class PFC 2.70% p.a.,
Class PFD 1.89% p.a.,	Class PFDQ 2.90% ³

The TER expresses total expenses and fees (excluding transaction costs) as a percentage of a fund's average net assets in relation to the respective share class for a given fiscal year.

Further costs, charges and fees were incurred at the level of the target funds. The fund invested more than 20% of its assets in target funds. If the target funds publish a TER themselves, this will be taken into account at fund level (synthetic TER). If a TER is not published at target fund level, the all-in fee/management fee is used for the calculation. The synthetic TER was:

Class LC 3.16% p.a.,	Class LD 3.17% p.a.,
Class LDQ 2.83% ³	Class PFC 3.35% p.a.,
Class PFD 2.54% p.a.,	Class PFDQ 3.56% ³

³ Annualization has not been performed for share classes launched during the year.

Transaction costs

The transaction costs paid in the fiscal year amounted to EUR 30 962.35.

The transaction costs include all costs that were reported or settled separately for the account of the fund in the fiscal year and are directly connected to the purchase or sale of assets. Any financial transaction taxes which may have been paid are included in the calculation.

Statement of changes in net assets

2022

Transactions processed for the account of the fund's assets via closely related companies (based on major holdings of the Deutsche Bank Group)

The share of transactions conducted in the reporting period for the account of the fund's assets via brokers that are closely related companies and persons (share of 5% and above), amounted to 0.00% of all transactions. The total volume was EUR 0.00.

Placement fee / Dilution adjustment

In the reporting period the fund paid a placement fee of 2.9% of the fund's net assets to the sales agent. This was calculated on the subscription date. This placement fee serves in particular as compensation for distribution. The gross amount of the placement fee was paid on the subscription date and simultaneously recognized in the fund's net assets as prepaid expenses. These are amortized on a daily basis over a period of three years from the subscription date. The remaining position for prepaid expenses per share on any valuation is calculated on a daily basis by multiplying the net assets of the fund by a factor. The relevant factor is determined by the linear reduction of the placement fee by a certain percentage on a daily basis over three years from the subscription date. The prepaid expenses position fluctuates during the three years from the subscription date, since it depends on both the fund's net assets and the predetermined factor.

In addition, a dilution adjustment of up to 3% based on the gross redemption amount was charged for the benefit of the fund's net assets in the reporting period (to be paid by the shareholder).

Further details on the placement fee and the dilution adjustment can be found in the corresponding section of the fund's sales prospectus.

Annual report

db Advisory Multibrands – JP Morgan Emerging Markets Active Allocation

Active Allocation

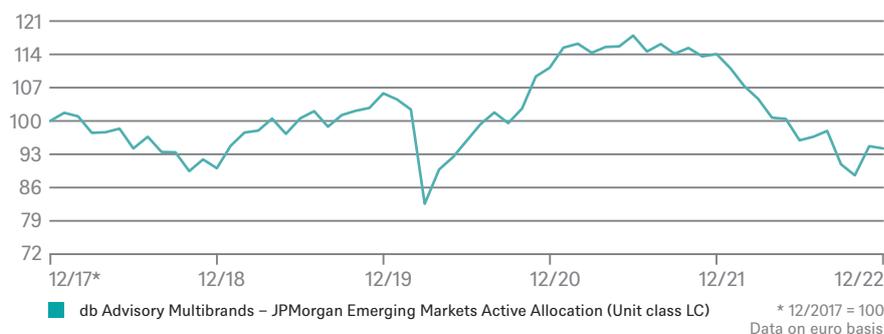

Investment objective and performance in the reporting period

The objective of the investment policy of db Advisory Multibrands – JPMorgan Emerging Markets Active Allocation is to achieve long-term capital growth. To this end, the sub-fund’s assets are invested in various investment funds and exchange-traded funds that invest in equities and debt instruments from emerging market countries, as well as in short-term bond funds, money market funds, money market instruments and liquid assets. The sub-fund invests primarily in funds that are managed by JPMorgan and associated companies of the JPMorgan Chase & Co. group. At least 20% and up to 80% of the sub-fund’s assets are invested in emerging market equity funds. At least 20% and up to 80% of the sub-fund’s assets are invested in emerging market fixed income funds. Derivative instruments may be used for hedging purposes and for efficient portfolio management.

The investment climate in the reporting period was challenging. Emerging Markets (EM) had an extremely tough year, impacted by Russia’s invasion of Ukraine, tighter financial conditions to fight higher inflation, a stronger US dollar, and China’s economic growth decline due to its zero-COVID-19 policy and property sector distress. Against this backdrop, the sub-fund recorded a loss of 17.5% per share (LC share class, BVI method, in euro) in the fiscal year through December 31, 2022.

As of: December 31, 2022

Investment policy in the reporting period

The international capital markets entered increasingly rough waters in 2022. This downward trend began with dramatically rising inflation figures due to increasing supply-chain constraints amid the steep economic recovery following the peak of the COVID-19 pandemic. The situation was exacerbated further by the ongoing war in Ukraine, which began when Russia invaded on February 24, 2022. Increasing sanctions by Western countries against Russia and supply boycotts by Russia caused the prices of energy (oil, gas, coal) and also food to rise dramatically. To counteract inflation and its dynamics, many central banks

raised interest rates noticeably, with some bringing many years of expansionary monetary policy to an end. The U.S. Federal Reserve (Fed) thus raised its key interest rate in seven steps from mid-March 2022 through mid-December 2022 by 4.25 percentage points to a target range of 4.25% p.a. – 4.50% p.a. The European Central Bank (ECB) followed suit in the second half of July 2022, after a pause of almost three years, and raised its key interest rate in four steps by two-and-a-half percentage points to altogether 2.50% p.a. Against that backdrop, and in view of weakening global economic growth during 2022, there were mounting fears among market actors of a recession taking hold.

In this investment climate, the international equity markets recorded significant price declines and closed mostly in deep negative territory. The Japanese equity market, on the other hand, fared better thanks to the weakness of the yen, which favored Japanese export companies. In view of high global debt levels and initially still very low interest rates, the bond markets saw marked price declines during the year through the end of December 2022, accompanied by a noticeable rise in bond yields. The rise in yields was principally driven by inflationary dynamics and the central banks' action to raise interest rates significantly in response. The corporate bond markets were hobbled by price declines coupled with increased yields and widened risk premiums both in the investment-grade segment and for high-yield securities.

During the year the sub-fund moved to overweight debt versus equities given the weakening backdrop for equities, although as the sentiment started to ease, and earnings recovery was more visible in equities, the underweight was reduced to be closer to neutral coming towards the end of 2022.

On the equity side the sub-fund's management have continued to rotate towards quality names which have underperformed, notably in China where the market was one of the worst performers globally given the continuation of zero-covid-19. A headwind to returns was the continued rotation away from growth towards value, while exposure to Taiwan which has

been a source of positive returns for many years, dragged given the impact of interest rate rises on technology stocks as the market grew more concerned about the possibility of a US recession.

From the fixed income perspective, local currency exposure, which was increased over the period, was a solid contributor although the broad fixed income universe struggled to deliver positive relative returns.

The portfolio management continued to display a disciplined approach to portfolio construction and rotated out of strong performers, or names where the initial investment thesis had changed. In bonds, we have been gradually increasing exposure to local sovereign currency, remaining focused on quality.

Information on the environmental and/or social characteristics

This financial product qualified as a product in accordance with Article 6 of Regulation (EU) 2019/2088 (SFDR) on sustainability-related disclosures in the financial services sector ("SFDR").

The following is the disclosure in accordance with article 7 of Regulation (EU) 2020/852 of June 18, 2020, on the establishment of a framework to facilitate sustainable investment: The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

The following disclosure is made for the financial product in accor-

dance with article 7(1) of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector: The portfolio management did not consider any principle adverse impacts on sustainability factors for this financial product, as it did not pursue an ESG and/or sustainable investment policy as indicated above.

Net asset value per share		
Class LC	EUR	110.71
Class PFC	EUR	101.38
Number of shares outstanding		
Class LC	Count	240 967.000
Class PFC	Count	60 164.000

Composition of the reference portfolio (according to CSSF circular 11/512)
50% MSCI Emerging Markets Total Return Net Dividend in USD and 50% JPMorgan Emerging Markets Bonds Index Global Diversified

Market risk exposure (Value-at-Risk) (according to CSSF circular 11/512)

Lowest market risk exposure	%	84.624
Highest market risk exposure	%	116.351
Average market risk exposure	%	95.553

The values-at-risk were calculated for the period from January 1, 2022, through December 31, 2022, using historical simulation with a 99% confidence level, a 10-day holding period and an effective historical observation period of one year. The risk in a reference portfolio that does not contain derivatives is used as the measurement benchmark. Market risk is the risk to the fund's assets arising from an unfavorable change in market prices. The Company determines the potential market risk by means of the relative value-at-risk approach as defined in CSSF circular 11/512.

In the reporting period, the average leverage effect from the use of derivatives was 0.0, whereby the total of the nominal amounts of the derivatives in relation to the fund's assets was used for the calculation (sum-of-notional approach).

The gross exposure generated via derivatives pursuant to point 40 a) of the "Guidelines on ETFs and other UCITS issues" of the European Securities and Markets Authority (ESMA) totaled EUR 0.00 as of the reporting date.

Notes on valuation

Under the responsibility of the Board of Directors of the SICAV, the Management Company determines the net asset values per share and performs the valuation of the assets of the fund. The basic provision of price data and price validation are performed in accordance with the method introduced by the Board of Directors of the SICAV on the basis of the legal and regulatory requirements or the principles for valuation methods defined in the SICAV's prospectus.

If no trading prices are available, prices are determined with the aid of valuation models (derived market values) which are agreed between State Street Bank International GmbH, Luxembourg branch, as external price service provider and the Management Company and which are based as far as possible on market parameters. This procedure is subject to an ongoing monitoring process. The plausibility of price information from third parties is checked through other pricing sources, model calculations or other suitable procedure.

Assets reported in this report are not valued at derived market values.

The management fee / all-in fee rates in effect as of the reporting date for the investment fund units held in the securities portfolio are shown in parentheses. A plus sign means that a performance-based fee may also be charged. As the investment fund held units of other investment funds (target funds) in the reporting period, further costs, charges and fees may have been incurred at the level of these individual target funds.

Statement of income and expenses (incl. income adjustment)

for the year from January 1, 2021, through December 31, 2022

I. Expenses			
1. Interest on borrowings and negative interest on deposits	EUR		-919.47
2. Management fee	EUR		-849 264.50
thereof:			
Basic management fee	EUR		-849 264.50
3. Legal and publication costs	EUR		-536.28
4. Taxe d'abonnement ¹	EUR		1 284.75
5. Other expenses	EUR		-70 692.79
thereof:			
Expenses from prepaid placement fee ²	EUR		-53 980.51
Other	EUR		-16 712.28
Total expenses	EUR		-920 128.29
II. Net investment income	EUR		-920 128.29
III. Sale transactions			
Realized gains/losses	EUR		1 412 733.37
Capital gains/losses	EUR		1 412 733.37
IV. Net gain/loss for the fiscal year	EUR		492 605.08

¹ This includes primarily income from the reversal of excess accruals of Taxe d'abonnement in the amount of EUR 22 431.37.

² For further information, please refer to the notes to the financial statements.

BVI total expense ratio (TER)

The total expense ratio for the share classes was:

Class LC 2.65% p.a., Class PFC 2.55% p.a.

The TER expresses total expenses and fees (excluding transaction costs) as a percentage of a fund's average net assets in relation to the respective share class for a given fiscal year.

Further costs, charges and fees were incurred at the level of the target funds. The fund invested more than 20% of its assets in target funds. If the target funds publish a TER themselves, this will be taken into account at fund level (synthetic TER). If a TER is not published at target fund level, the all-in fee/management fee is used for the calculation. The synthetic TER was:

Class LC 2.70% p.a., Class PFC 2.61% p.a.

Transaction costs

The transaction costs paid in the fiscal year amounted to EUR 2 051.60.

The transaction costs include all costs that were reported or settled separately for the account of the fund in the fiscal year and are directly connected to the purchase or sale of assets. Any financial transaction taxes which may have been paid are included in the calculation.

Statement of changes in net assets

2022

I. Value of the fund's net assets at the beginning of the fiscal year			EUR	42 969 132.86
1. Net outflows ³	EUR		-2 925 832.29	
2. Income adjustment	EUR		82 324.07	
3. Net investment expense	EUR		-920 128.29	
4. Realized gains/losses	EUR		1 412 733.37	
5. Net change in unrealized appreciation/depreciation	EUR		-7 842 499.15	
II. Value of the fund's net assets at the end of the fiscal year			EUR	32 775 730.57

³ Reduced by a dilution adjustment in the amount of EUR 10 149.67 for the benefit of the fund's assets.

Transactions processed for the account of the fund's assets via closely related companies (based on major holdings of the Deutsche Bank Group)

The share of transactions conducted in the reporting period for the account of the fund's assets via brokers that are closely related companies and persons (share of 5% and above), amounted to 0.00% of all transactions. The total volume was EUR 0.00.

db Advisory Multibrands – JPMorgan Emerging Markets Active Allocation

Placement fee / Dilution adjustment

In the reporting period the fund paid a placement fee of 2.9% of the fund's net assets to the sales agent. This was calculated on the subscription date. This placement fee serves in particular as compensation for distribution. The gross amount of the placement fee was paid on the subscription date and simultaneously recognized in the fund's net assets as prepaid expenses. These are amortized on a daily basis over a period of three years from the subscription date. The remaining position for prepaid expenses per share on any valuation is calculated on a daily basis by multiplying the net assets of the fund by a factor. The relevant factor is determined by the linear reduction of the placement fee by a certain percentage on a daily basis over three years from the subscription date. The prepaid expenses position fluctuates during the three years from the subscription date, since it depends on both the fund's net assets and the predetermined factor.

In addition, a dilution adjustment of up to 3% based on the gross redemption amount was charged for the benefit of the fund's net assets in the reporting period (to be paid by the shareholder).

Further details on the placement fee and the dilution adjustment can be found in the corresponding section of the fund's sales prospectus.

Annual report

db Advisory Multibrands – Nordea Sustainable Global Stars

Investment objective and performance in the reporting period

The objective of the investment policy is to achieve long-term capital appreciation. In order to achieve this, the sub-fund invests its assets with a particular focus on the companies' ability to comply with environmental, social and corporate governance ("ESG")*. The portfolio manager determines the fair value of a company by its long-term sustainable cash generation. Attractive investment opportunities, arising when securities prices deviate from their fair values, are exploited by investing with a long-term investment horizon in companies priced at a discount to fair value. The disciplined investment process is furthermore characterized by rigorous independent research, a high active share and low portfolio turnover. The sub-fund invests mainly in equities and equity related instruments. Up to 25% of the sub-fund's assets can be invested in emerging market countries including China A shares via the Stock Connect program. Derivatives can be used for efficient portfolio management and investment purposes.

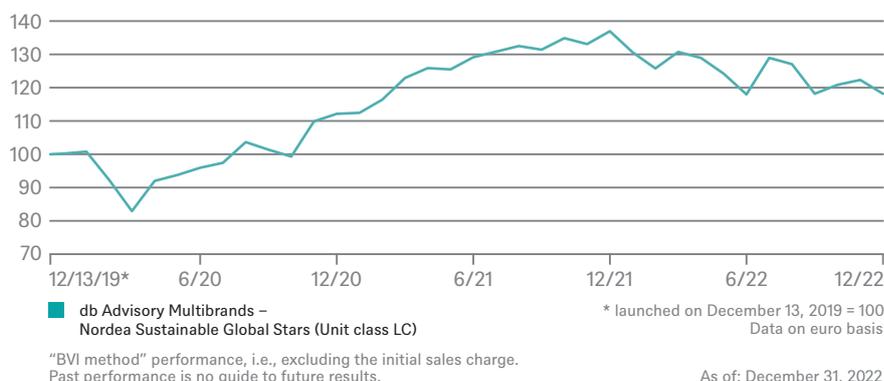

The sub-fund db Advisory Multibrands – Nordea Sustainable Global Stars recorded a loss of 13,7% per share (LC share class; BVI method; in Euro) in the 2022 fiscal year.

Investment policy in the reporting period

2022 was the worst year since 2008 with a sharp decline in global equities, marking the end of the multi-year bull market since the financial crisis. The driving

db Advisory Multibrands – Nordea Sustainable Global Stars

Performance since inception

Performance of share classes (in euro)

Share class	ISIN	1 year	3 years	Since inception ¹
Class LC	LU1947594526	-13.7%	17.8%	18.0%
Class PFC	LU1947594799	-14.1%	16.3%	16.8%

¹ Launched on December 13, 2019

“BVI method” performance, i.e., excluding the initial sales charge.

Past performance is no guide to future results.

As of: December 31, 2022

forces were a palette of macro risks that have developed throughout the year with the focal points being inflation, hawkish central banks, dollar strength, China Zero-COVID19 uncertainty, deteriorating economic growth and the Russia/ Ukraine conflict.

The year also represented a change in the investment landscape as we saw the end of cheap money and zero interest rates, causing some segments of the financial system to experience meaningful deflation of previous speculation, for example in tech, non-profitable growth companies and cryptocurrencies.

The strategy followed the market was limited. Meaning that despite the negative environment for sus-

tainable investors, the portfolio management still managed to generate significant value to the investors.

The sub-fund followed a bottom-up approach, and stock selection is the main expertise of the portfolio management. With that said, the portfolio management positioned the sub-fund towards higher quality and more resilient companies with less cyclicality, where the management considered to have found the best opportunities in the market on a relative basis.

At the end of 2022, the healthcare and consumer staples sectors were the most overweight, while the portfolio management underweight energy and consumer cyclicals.

Among the sub-fund investments, Merck & Co Inc (Expectation Gap) did particularly well as good clinical results from a phase 3 cardiovascular drug coincided with a report of strong results from key sales drivers Keytruda and Gardasil. Being a defensive company, the shares continued to perform well in the latter part of the year.

AbbVie (Expectation Gap) also performed strongly for the whole year due to its defensive profile. Pharmaceutical stocks rallied strongly during the month of September as investors digested the drug pricing bill passed the congress in August and reversed some of the draw-down seen in the month before.

Pan Pacific International Holdings(-Expectation Gap) is a Japanese discount retailer with a relatively dynamic and innovative business model. The stock performed very well in 2022, partly due to a post-COVID-19 rally and partly due to defensive characteristics as the market became increasingly nervous about consumer sentiment.

Alphabet share price weakness (expectations gap) continued into years-end as many investors were selling out “big tech” names. Moreover, the digital ad business is cyclical and there is a high level of uncertainty in the market about how much this will impact Alphabet’s earnings in the coming quarters. The stock came into 2022 on the back of a very strong 2021. Also among the worst performers during the period was Koninklijke Philips (expectation gap): The sub-fund management bought Philips as a turnaround case following a product recall in its Respirionics

business in the U.S. However, the product’s safety issues dragged on longer than expected and performance was further impacted by supply chain issues in 2022. Salesforce (Moat & Tailwind) was part of the “Big Tec” crisis mentioned above, with SaaS companies going through difficult quarters and announcing weaker forecasts.

In the reporting period, we disposed of some positions. This was due to various reasons. Among the positions sold were

- US Foods Holding (Expectation Gap) was held as a post Covid-19 re-opening beneficiary, which is now finished and the fund management sold out the last part of the position in October. (Sold at a loss YTD)
- The Lloyds Banking Group (Expectation Gap) was sold to finance HSBC. (Sold at a loss YTD)

Some stocks were also added to the fund during the reporting period. Among the positions added were

- Shimano (Moat & Tailwind) has historically been one of the best performing companies in Japan. As a supplier of bicycle and electric bicycle components the fund management thought that Shimano enjoys a structural tailwind in demand, which was expected to remain for the foreseeable future. The fund management took advantage of a decline in the share price driven by COVID-19 backlash and general concerns about discretionary spending among consumers to take a position in this quality stock.

- Roche Holding (Expectation Gap) replaces Sanofi in the portfolio. The fund management believes that the shares are de-risked after a large immune oncology study failed earlier this year. Core Roche is a solid business with proven track record in commercial execution as well as research and development. The fund management sees it as a defensive stock at a relatively attractive price.

Information on the environmental and/or social characteristics

This product reported in accordance with Article 8(1) of Regulation (EU) 2019/2088 (SFDR) on sustainability-related disclosures in the financial services sector (“SFDR”).

Presentation and content requirements for periodic reports for financial products as referred to in Article 8(1) of Regulation (EU) 2019/2088 (SFDR) and in Article 6 of Regulation (EU) 2020/852 (Taxonomy) are available below.

Market risk exposure (value-at-risk) (according to CSSF circular 11/512)		
Lowest market risk exposure	%	87.666
Highest market risk exposure	%	112.151
Average market risk exposure	%	100.269

db Advisory Multibrands – Nordea Sustainable Global Stars

The values-at-risk were calculated for the period from January 1, 2022, through December 31, 2022, using historical simulation with a 99% confidence level, a 10-day holding period and an effective historical observation period of one year. The risk in a reference portfolio that does not contain derivatives is used as the measurement benchmark. Market risk is the risk to the fund's assets arising from an unfavorable change in market prices. The Company determines the potential market risk by means of the relative value-at-risk approach as defined in CSSF circular 11/512.

In the reporting period, the average leverage effect from the use of derivatives was 0.0, whereby the total of the nominal amounts of the derivatives in relation to the fund's assets was used for the calculation (sum-of-notional approach).

The gross exposure generated via derivatives pursuant to point 40 a) of the "Guidelines on ETFs and other UCITS issues" of the European Securities and Markets Authority (ESMA) totaled USD 0.00 as of the reporting date.

Notes on valuation

Under the responsibility of the Board of Directors of the SICAV, the Management Company determines the net asset values per share and performs the valuation of the assets of the fund. The basic provision of price data and price validation are performed in accordance with the method introduced by the Board of Directors of the SICAV on the basis of the legal and regulatory requirements or the principles for valuation methods defined in the SICAV's prospectus.

If no trading prices are available, prices are determined with the aid of valuation models (derived market values) which are agreed between State Street Bank International GmbH, Luxembourg Branch, as external price service provider and the Management Company and which are based as far as possible on market parameters. This procedure is subject to an ongoing monitoring process. The plausibility of price information from third parties is checked through other pricing sources, model calculations or other suitable procedure.

Assets reported in this report are not valued at derived market values.

Footnote

* The prepaid placement fee is amortized over a period of three years (as specified in article 13 (f) of the general section of the fund's management regulations).

¹ For further information, please refer to the notes to the financial statements.

BVI total expense ratio (TER)

The total expense ratio for the share classes was:

Class LC 2.41% p.a., Class PFC 2.89% p.a.

The TER expresses total expenses and fees (excluding transaction costs) as a percentage of a fund's average net assets in relation to the respective share class for a given fiscal year.

Transaction costs

The transaction costs paid in the fiscal year amounted to USD 30 324.85.

The transaction costs include all costs that were reported or settled separately for the account of the fund in the reporting period and are directly connected to the purchase or sale of assets. Any financial transaction taxes which may have been paid are included in the calculation.

The share of transactions conducted in the reporting period for the account of the fund's assets via brokers that are closely related companies and persons (share of 5% and above), amounted to 0.00% of all transactions. The total volume was USD 0.00.

db Advisory Multibrands – Nordea Sustainable Global Stars

Placement fee / Dilution adjustment

In the reporting period the fund paid a placement fee of 2.9% of the fund's net assets to the sales agent. This was calculated on the subscription date. This placement fee serves in particular as compensation for distribution. The gross amount of the placement fee was paid on the subscription date and simultaneously recognized in the fund's net assets as prepaid expenses. These are amortized on a daily basis over a period of three years from the subscription date. The remaining position for prepaid expenses per share on any valuation is calculated on a daily basis by multiplying the net assets of the fund by a factor. The relevant factor is determined by the linear reduction of the placement fee by a certain percentage on a daily basis over three years from the subscription date. The prepaid expenses position fluctuates during the three years from the subscription date, since it depends on both the fund's net assets and the predetermined factor.

In addition, a dilution adjustment of up to 3% based on the gross redemption amount was charged for the benefit of the fund's net assets in the reporting period (to be paid by the shareholder).

Further details on the placement fee and the dilution adjustment can be found in the corresponding section of the fund's sales prospectus.

Swing pricing

Extensive subscriptions and redemptions within a sub-fund may lead to a dilution of the assets of this sub-fund, as the net asset value sometimes does not reflect all trading and other costs that are incurred when the portfolio manager must buy or sell securities in order to manage large (net) inflows or outflows in the sub-fund. In addition to these costs, substantial order volumes may lead to market prices that are considerably below or above the market prices that apply under normal circumstances.

In order to improve investor protection for existing shareholders, a swing price mechanism can be applied to compensate for trading costs and other expenses if, on a valuation date, a sub-fund is materially affected by the aforementioned cumulative (net) inflows or outflows and a defined threshold is exceeded (this mechanism can be applied to all sub-funds). If a swing price mechanism is introduced for a particular sub-fund, this will be published in the special section of the sales prospectus.

The Management Company for the information of the Board of Directors shall define threshold values for the application of the swing pricing mechanism, which are based on the current market conditions, the available market liquidity and the estimated dilution costs, among other things. The actual adjustment will then be automatically introduced in line with the threshold values. The adjusted net asset value will be applied uniformly to all subscriptions and redemptions for the trading day in question. If a performance-based fee applies for the sub-fund, the calculation is based on the original net asset value.

The amount of the swing pricing adjustment may vary from one sub-fund to another and shall not exceed 2% of the original net asset value per share. The appropriateness of the swing factor applied shall be reviewed regularly with the involvement of the Swing Pricing Committee of the Management Company. Inquiries regarding the adjustment of the net asset value may sent to the Management Company.

As the mechanism should only be applied if significant (net) inflows and outflows are expected and it does not apply for normal trading volumes, it is assumed that the net asset value will only be adjusted occasionally.

The sub-fund can apply swing pricing but has not done so in the reporting period, as its (net) inflows and outflows did not exceed the relevant threshold previously defined.

Annual report

db Advisory Multibrands – Pictet Multi Asset Flexible Allocation

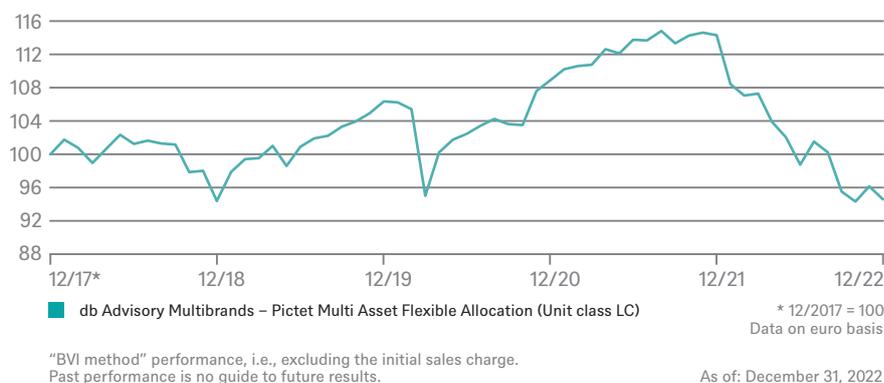

Investment objective and performance in the reporting period

The objective of the investment policy of db Advisory Multibrands – Pictet Multi Asset Flexible Allocation is to achieve a positive investment result in the medium to long term while taking the opportunities and risks of the international capital markets into account. To this end, the sub-fund may invest in equities, bonds, certificates, funds and cash. Up to 100% may be invested in bonds, convertible bonds, warrant-linked bonds, bond funds and certificates on bonds or bond indices. Up to 60% will be invested in equities, equity funds, equity warrants and certificates on equities or equity indices. Up to 49% of the sub-fund's assets are invested in money market funds, money market instruments and cash. Up to 20% may be invested in asset backed securities and mortgage-backed securities. Up to 10% may be invested in certificates and funds which invest in or are based on commodities, commodity indices, precious metals and precious metals indices. The sub-fund invests primarily in funds managed by the fund manager and affiliates of the Pictet Group. The investment policy will also be implemented through the use of suitable derivatives.

The international capital markets entered increasingly rough waters in 2022. This downward trend began with dramatically rising inflation figures due to increasing supply-chain constraints amid the steep economic recovery following the peak of the COVID-19 pandemic. The situation was exacerbated further by the ongoing

As of: December 31, 2022

war in Ukraine, which began when Russia invaded on February 24, 2022. Increasing sanctions by Western countries against Russia and supply boycotts by Russia caused the prices of energy (oil, gas, coal) and also food to rise dramatically. To counteract inflation and its dynamics, many central banks raised interest rates noticeably, with some bringing many years of expansionary monetary policy to an end. The U.S. Federal Reserve (Fed) thus raised its key interest rate in seven steps from mid-March 2022 through mid-December 2022 by 4.25 percentage points to a target range of 4.25% p.a. – 4.50% p.a. The European Central Bank (ECB) followed suit in the second half of July 2022, after a pause of almost

three years, and raised its key interest rate in four steps by two-and-a-half percentage points to altogether 2.50% p.a. Against that backdrop, and in view of weakening global economic growth during 2022, there were mounting fears among market actors of a recession taking hold.

In this environment, the sub-fund recorded a loss of 17.3 percent per share (LD share class coupon included, BVI method, in euro) in the fiscal year through December 31, 2022.

Investment policy in the reporting period

Unprecedented monetary stimulus, coupled with extraordinary fiscal stimulus and supply chain disrup-

tions stemming from the COVID-19 pandemic, created the perfect mix for upside shocks to inflation for one of the first times in over a quarter-century. In addition to an already unparalleled combination of shocks, in 2022 a war in Europe unveiled and China embarked on irrational and severe Zero Covid policy, adding additional pressure to inflation. These elements alone are a testament to the exceptional year we went through.

Rising and constantly surprising inflation led to a complete U-turn in central banks reaction function, causing sharp increases in (real) bond yields that led to a major valuation reset across assets last year, especially for long duration ones.

In this environment, with equities and bonds selling off together, a lot of sources of multi-asset diversification for the last 20 years disappeared, complicated by the underperformance of traditional defensive/safe heaven assets like Gold, the Japanese Yen.

With its Euro based multi-asset strategy the fund invests in multiple asset classes of different countries and economic sectors. Within equities the main exposure for the first half of 2022 confirmed the allocation of 2021 and was in favour of thematic strategies managed by Pictet. The thematic strategies have a natural growth bias while investing in companies with strong fundamentals and an history in business innovation. The compartment was heavily penalized by the monetary policy repricing without distinction on quality.

In the second half of 2022 the portfolio management reduced exposure to thematic strategies given the uncertain environment caused by the unfavourable mix of growth and inflation.

Gold and alternative strategies were maintained throughout 2022 for diversification purposes. Fixed income exposure was focused on Europe with some exposure to US and emerging markets for diversification purposes.

Derivatives are used for hedging purposes to protect the portfolio from market shocks. In 2022 hedging strategies were used to a small degree as market conditions were not optimal for their implementation and include the following. So, bond options made a slightly negative contribution to performance. In contrast, equity options and volatility strategies made a positive contribution.

Currency management was mainly focused in managing USD exposure as a source of diversification, which had a positive impact on the performance of the sub-fund.

Information on the environmental and/or social characteristics

This financial product qualified as a product in accordance with Article 6 of Regulation (EU) 2019/2088 (SFDR) on sustainability-related disclosures in the financial services sector ("SFDR").

The following is the disclosure in accordance with article 7 of Regulation (EU) 2020/852 of June 18, 2020 on the establishment of a

framework to facilitate sustainable investment: The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

The following disclosure is made for the financial product in accordance with article 7(1) of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector: The portfolio management did not consider any principle adverse impacts on sustainability factors for this financial product, as it did not pursue an ESG and/or sustainable investment policy as indicated above.

Composition of the reference portfolio (according to CSSF circular 11/512)
60% BBG Euro Aggregate 3-5 Index, 40% MSCI World, 100% EUR Hedged

Market risk exposure (value-at-risk) (according to CSSF circular 11/512)

Lowest market risk exposure	%	66.512
Highest market risk exposure	%	145.214
Average market risk exposure	%	89.911

The values-at-risk were calculated for the period from January 1, 2022, through December 31, 2022, using historical simulation with a 99% confidence level, a 10-day holding period and an effective historical observation period of one year. The risk in a reference portfolio that does not contain derivatives is used as the measurement benchmark. Market risk is the risk to the fund's assets arising from an unfavorable change in market prices. The Company determines the potential market risk by means of the relative value-at-risk approach as defined in CSSF circular 11/512.

In the reporting period, the average leverage effect from the use of derivatives was 0.6, whereby the total of the nominal amounts of the derivatives in relation to the fund's assets was used for the calculation (sum-of-notional approach).

The gross exposure generated via derivatives pursuant to point 40 a) of the "Guidelines on ETFs and other UCITS issues" of the European Securities and Markets Authority (ESMA) totaled EUR 80 910 876.38 as of the reporting date.

Notes on the valuation

Under the responsibility of the Board of Directors of the SICAV, the Management Company determines the net asset values per share and performs the valuation of the assets of the fund. The basic provision of price data and price validation are performed in accordance with the method introduced by the Board of Directors of the SICAV on the basis of the legal and regulatory requirements or the principles for valuation methods defined in the SICAV's prospectus.

If no trading prices are available, prices are determined with the aid of valuation models (derived market values) which are agreed between State Street Bank International GmbH, Luxembourg branch, as external price service provider and the Management Company and which are based as far as possible on market parameters. This procedure is subject to an ongoing monitoring process. The plausibility of price information from third parties is checked through other pricing sources, model calculations or other suitable procedure.

Assets reported in this report are not valued at derived market values.

The management fee / all-in fee rates in effect as of the reporting date for the investment fund units held in the securities portfolio are shown in parentheses. A plus sign means that a performance-based fee may also be charged. As the investment fund held units of other investment funds (target funds) in the reporting period, further costs, charges and fees may have been incurred at the level of these individual target funds. No initial sales charges or redemption fees were paid in the reporting period.

Footnotes

* The prepaid placement fee is amortized over a period of three years (as specified in article 13 (f) of the general section of the fund's management regulations).

** Does not include positions with a negative balance, if such exist.

Statement of income and expenses (incl. income adjustment)

for the year from January 1, 2022, through December 31, 2022

I. Income			
1. Interest from securities (before withholding tax)	EUR	645 549.74	
2. Interest from investments of liquid assets (before withholding tax)	EUR	30 150.89	
3. Income from investment units	EUR	33 638.56	
4. Other income	EUR	4 832.46	
Total income	EUR	714 171.65	
II. Expenses			
1. Interest on borrowings and negative interest on deposits	EUR	-117 373.04	
2. Management fee	EUR	-2 380 292.15	
thereof:			
Basic management fee	EUR	-2 380 292.15	
3. Legal and publication costs	EUR	-2 164.57	
4. Taxe d'abonnement	EUR	-19 870.55	
5. Other expenses	EUR	-430 127.92	
thereof:			
Distribution costs	EUR	-92 041.28	
Expenses from prepaid placement fee ¹	EUR	-343 989.79	
Other ²	EUR	5 903.15	
Total expenses	EUR	-2 949 828.23	
III. Net investment income	EUR	-2 235 656.58	
IV. Sale transactions			
Realized gains/losses	EUR	-958 990.36	
Capital gains/losses	EUR	-958 990.36	
V. Net gain/loss for the fiscal year	EUR	-3 194 646.94	

¹ For further information, please refer to the notes to the financial statements.

² This includes primarily income from the reversal of excess accruals of Regulatory fees in the amount of EUR 19 435.99.

BVI total expense ratio (TER)

The total expense ratio for the share classes was:

Class LC 2.03% p.a.,	Class LD 2.03% p.a.,
Class PFC 2.34% p.a.,	Class PFD 1.27% p.a.

The TER expresses total expenses and fees (excluding transaction costs) as a percentage of a fund's average net assets in relation to the respective share class for a given fiscal year.

Further costs, charges and fees were incurred at the level of the target funds. The fund invested more than 20% of its assets in target funds. If the target funds publish a TER themselves, this will be taken into account at fund level (synthetic TER). If a TER is not published at target fund level, the all-in fee/management fee is used for the calculation. The synthetic TER was:

Class LC 2.55% p.a.,	Class LD 2.55% p.a.,
Class PFC 2.87% p.a.,	Class PFD 1.79% p.a.

Transaction costs

The transaction costs paid in the fiscal year amounted to EUR 12 282.49.

The transaction costs include all costs that were reported or settled separately for the account of the fund in the fiscal year and are directly connected to the purchase or sale of assets. Any financial transaction taxes which may have been paid are included in the calculation.

Statement of changes in net assets

2022

I. Value of the fund's net assets at the beginning of the fiscal year			
1. Distribution for the previous year	EUR	-2 545 538.67	
2. Net outflows ³	EUR	-17 368 956.36	
3. Income adjustment	EUR	-158 909.05	
4. Net investment expense	EUR	-2 235 656.58	
5. Realized gains/losses	EUR	-958 990.36	
6. Net change in unrealized appreciation/depreciation	EUR	-25 864 155.19	
II. Value of the fund's net assets at the end of the fiscal year			
	EUR	127 861 753.11	

³ Reduced by a dilution adjustment in the amount of EUR 97 544.88 for the benefit of the fund's assets.

Summary of the gains/losses

	Class LD	EUR	103.97
	Class PFC	EUR	116.50
	Class PFD	EUR	103.04

Transactions processed for the account of the fund's assets via closely related companies (based on major holdings of the Deutsche Bank Group)

The share of transactions conducted in the reporting period for the account of the fund's assets via brokers that are closely related companies and persons (share of 5% and above), amounted to 6.29% of all transactions. The total volume was EUR 7 933 921.37.

Placement fee / Dilution adjustment

In the reporting period the fund paid a placement fee of 2.9% of the fund's net assets to the sales agent. This was calculated on the subscription date. This placement fee serves in particular as compensation for distribution. The gross amount of the placement fee was paid on the subscription date and simultaneously recognized in the fund's net assets as prepaid expenses. These are amortized on a daily basis over a period of three years from the subscription date. The remaining position for prepaid expenses per share on any valuation is calculated on a daily basis by multiplying the net assets of the fund by a factor. The relevant factor is determined by the linear reduction of the placement fee by a certain percentage on a daily basis over three years from the subscription date. The prepaid expenses position fluctuates during the three years from the subscription date, since it depends on both the fund's net assets and the predetermined factor.

In addition, a dilution adjustment of up to 3% based on the gross redemption amount was charged for the benefit of the fund's net assets in the reporting period (to be paid by the shareholder).

Further details on the placement fee and the dilution adjustment can be found in the corresponding section of the fund's sales prospectus.

Annual report

db Advisory Multibrands – Pictet Sustainable Thematic New Trends

Investment objective and performance in the reporting period

db Advisory Multibrands – Pictet Sustainable Thematic New Trends seeks to achieve capital growth. To this end, the sub-fund invests mainly in equities and equity-related securities (such as ADR, GDR) issued by companies throughout the world (including emerging-market countries). The sub-fund invests mainly in securities that may benefit from global long-term market themes resulting from secular changes in economic and social factors such as demographics, lifestyle, regulations or the environment. Up to 10% of the sub-fund's net assets may be invested in real estate investment trusts ("REITS"). The sub-fund invests no more than 10% of its assets in bonds or any other debt security (including convertible bonds), money market instruments, liquid assets and financial derivative instruments. Derivatives may be used for hedging and investment purpose.

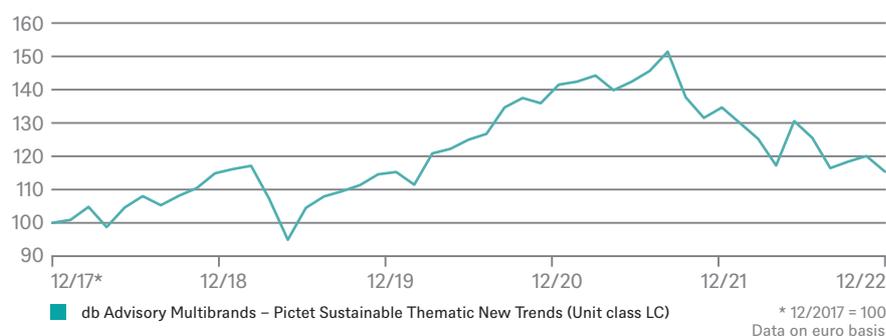

The sub-fund recorded a loss of 23.8% per share (LC share class; BVI method; in euro) in the fiscal year through December 31, 2022.

Investment policy in the reporting period

The international capital markets entered increasingly rough waters in 2022. This downward trend began with dramatically rising inflation figures due to increasing supply-chain constraints amid the steep economic recovery following the peak of the COVID-19 pandemic. The situation was exacerbated further by the ongoing war in Ukraine, which began when

As of: December 31, 2022

Russia invaded on February 24, 2022. Increasing sanctions by Western countries against Russia and supply boycotts by Russia caused the prices of energy (oil, gas, coal) and also food to rise dramatically. To counteract inflation and its dynamics, many central banks raised interest rates noticeably, with some bringing many years of expansionary monetary policy to an end. The U.S. Federal Reserve (Fed) thus raised its key interest rate in seven steps from mid-March 2022 through mid-December 2022 by 4.25 percentage points to a target range of 4.25% p.a. – 4.50% p.a. The European Central Bank (ECB) followed suit in the second half of July

2022, after a pause of almost three years, and raised its key interest rate in four steps by two-and-a-half percentage points to altogether 2.50% p.a. Against that backdrop, and in view of weakening global economic growth during 2022, there were mounting fears among market actors of a recession taking hold.

In this investment climate, the international equity markets recorded significant price declines and closed mostly in deep negative territory. The Japanese equity market, on the other hand, fared better thanks to the weakness of the yen, which favored Japanese export companies.

Within the equity allocation, that underperformed global equities, this was due to a combination of negative allocation and selection effects. The absence of Energy from our strategy was detrimental to performance as the sector was by far the strongest sector following the spike in oil prices. Our almost strategic overweight in IT was detrimental to performance as well as the sector suffered during the market rotation (in the beginning of the year, in particular). Lack of Financials and Materials was also detrimental to allocation. Our overweight in Health Care was a small positive. The rotation away from growth towards value was painful for our Industrial and IT names as the market digested the expectation of increased monetary tightening. Industrials and IT names, such as Applied Materials and Zebra, faced a pronounced decline in valuation multiples, such as large cap Meta and Alphabet. Healthcare names, such as Boston Scientific, were among the best contributors, thanks to the defensiveness of their business models in a market environment of slowing growth.

Composition of the reference portfolio (according to CSSF circular 11/512)
MSCI All Countries World Index (EUR)

Market risk exposure (value-at-risk) (according to CSSF circular 11/512)

Lowest market risk exposure	%	101.428
Highest market risk exposure	%	143.155
Average market risk exposure	%	116.489

The values-at-risk were calculated for the period from January 1, 2022, through December 31, 2022, using historical simulation with a 99% confidence level, a 10-day holding period and an effective historical observation period of one year. The risk in a reference portfolio that does not contain derivatives is used as the measurement benchmark. Market risk is the risk to the fund's assets arising from an unfavorable change in market prices. The Company determines the potential market risk by means of the **relative value-at-risk approach** as defined in CSSF circular 11/512.

In the reporting period, the average leverage effect from the use of derivatives was 0.0, whereby the total of the nominal amounts of the derivatives in relation to the fund's assets was used for the calculation (sum-of-notional approach).

The gross exposure generated via derivatives pursuant to point 40 a) of the "Guidelines on ETFs and other UCITS issues" of the European Securities and Markets Authority (ESMA) totaled EUR 0.00 as of the reporting date.

Notes on the valuation

Under the responsibility of the Board of Directors of the SICAV, the Management Company determines the net asset values per share and performs the valuation of the assets of the fund. The basic provision of price data and price validation are performed in accordance with the method introduced by the Board of Directors of the SICAV on the basis of the legal and regulatory requirements or the principles for valuation methods defined in the SICAV's prospectus. The basic provision of price data and price validation are performed in accordance with the method introduced by the Board of Directors of the SICAV on the basis of the legal and regulatory requirements or the principles for valuation methods defined in the SICAV's prospectus.

If no trading prices are available, prices are determined with the aid of valuation models (derived market values) which are agreed between State Street Bank International GmbH, Luxembourg branch, as external price service provider and the Management Company and which are based as far as possible on market parameters. This procedure is subject to an ongoing monitoring process. The plausibility of price information from third parties is checked through other pricing sources, model calculations or other suitable procedure.

Assets reported in this report are not valued at derived market values.

Capital gains/losses	EUR	-2 090 949.59
V. Net gain/loss for the fiscal year	EUR	-4 389 369.92

¹ For further information, please refer to the notes to the financial statements.

BVI total expense ratio (TER)

The total expense ratio for the share classes was:

Class LC 2.49% p.a.,	Class LD 2.17% ²
Class PFC 2.90% p.a.,	Class PFD 2.74% ²

The TER expresses total expenses and fees (excluding transaction costs) as a percentage of a fund's average net assets in relation to the respective share class for a given fiscal year.

² Annualization has not been performed for share classes launched during the year.

Transaction costs

The transaction costs paid in the fiscal year amounted to EUR 86 170.00.

The transaction costs include all costs that were reported or settled separately for the account of the fund in the reporting period and are directly connected to the purchase or sale of assets. Any financial transaction taxes which may have been paid are included in the calculation.

Statement of changes in net assets

Transactions processed for the account of the fund's assets via closely related companies (based on major holdings of the Deutsche Bank Group)

The share of transactions conducted in the reporting period for the account of the fund's assets via brokers that are closely related companies and persons (share of 5% and above), amounted to 0.00% of all transactions. The total volume was EUR 0.00.

Placement fee / Dilution adjustment

In the reporting period the fund paid a placement fee of 2.9% of the fund's net assets to the sales agent. This was calculated on the subscription date. This placement fee serves in particular as compensation for distribution. The gross amount of the placement fee was paid on the subscription date and simultaneously recognized in the fund's net assets as prepaid expenses. These are amortized on a daily basis over a period of three years from the subscription date. The remaining position for prepaid expenses per share on any valuation is calculated on a daily basis by multiplying the net assets of the fund by a factor. The relevant factor is determined by the linear reduction of the placement fee by a certain percentage on a daily basis over three years from the subscription date. The prepaid expenses position fluctuates during the three years from the subscription date, since it depends on both the fund's net assets and the predetermined factor.

In addition, a dilution adjustment of up to 3% based on the gross redemption amount was charged for the benefit of the fund's net assets in the reporting period (to be paid by the shareholder).

Further details on the placement fee and the dilution adjustment can be found in the corresponding section of the fund's sales prospectus.

Annual report

db Advisory Multibrands – PIMCO Euro Sustainable Debt Solution

Investment objective and performance in the reporting period

The objective of the investment policy of db Advisory Multi-brands – PIMCO EURO Sustainable Debt Solution is a sustained appreciation of capital in combination with current income. To this end, the sub-fund invests in euro-denominated interest-bearing debt securities issued by companies, governments and government authorities in EU and non-EU countries, including emerging-market countries. The sub-fund may also invest in asset-backed securities. The duration of the sub-fund portfolio is normally 0 to 8 years.

Amid significant market volatility, the sub-fund returned -12.6% (LC share class, BVI method, in euro).

Investment policy in the reporting period

Markets in 2022 were anything but ordinary – from COVID-19 to the war in Ukraine to soaring inflation, there were plenty of global developments and crisis. As a result, fixed income experienced a difficult year as the traditional correlations between interest rates and credit spreads broke down and both died at the same time, and the yield curve inverted as market participants assumed a recession.

Given the global market backdrop, rates and spread positions detracted from performance in absolute terms, while certain tactical interest rate positioning and currency strategies added value during the year.

“BVI method” performance, i.e., excluding the initial sales charge.
Past performance is no guide to future results.

As of: December 31, 2022

As yields rose across developed and emerging markets, moderate exposure to duration risk detracted from performance. There were several reasons for that.

The Sub-fund entered 2022 positioned defensively on duration, with 2.33 years total duration as of end-2021, given the risk that rates could rise if inflation persisted and central banks had to tighten monetary policy faster than expected. This meant, that the Sub-fund’s duration, while a negative contributor in an absolute sense, was less damaging to performance, and the duration impact was lower than

that experienced by broad fixed income market indices.

We also moderately increased our duration over the year to 3.08 years by end of December, given cheaper valuations and better risk-reward. We continued to focus on Europe and the U.S. over other developed markets. In doing so, we have favored the middle part of the yield curve.

Throughout the year, the fund management also sought to diversify our duration positions globally, maintaining a tactical short position in Japanese duration as a

“cheap” hedge against global rates moving higher. The position contributed to performance, particularly given signs the Bank of Japan is looking to tighten policy.

The sub-fund maintained select currency positions throughout the year, which modestly contributed to performance. Investing in a basket of emerging market currencies delivered positive results as they appreciated against the U.S. dollar.

Spread positions detracted due to spread widening across credit sectors, driven by hawkish monetary policy, sticky inflation, weaker growth expectations and geopolitics.

Here, too, there were various reasons for this development. First, the funds management exposure to investment grade and high yield corporate credit markets detracted from performance as spreads widened. Corporate bonds, in turn, suffered from concerns about a more challenging macroeconomic environment as well as increased volatility in financial markets and risk-averse sentiment.

Second, in investment grade bonds, we focused on bottom-up security selection to find attractive issues as they arise. In doing so, the fund management favored the financial sector. Here, the focus on deleveraging and diversification of banks’ businesses continued to create an attractive environment for bondholders. The portfolio management were also selective in high-yield debt, looking for opportunities.

Finally, the sub-fund’s exposure in emerging market external debt detracted from performance as spreads widened. We have reduced overall exposure to emerging markets as yields have become more attractive on higher quality bonds.

db Advisory Multibrands – PIMCO Euro Sustainable Debt Solution

Presentation of the maximum limit (according to CSSF circular 11/512) (according to CSSF circular 11/512)
14.14% of portfolio value

Market risk exposure (value-at-risk) (according to CSSF circular 11/512)

Lowest market risk exposure	%	0.749
Highest market risk exposure	%	3.318
Average market risk exposure	%	2.270

The values-at-risk were calculated for the period from January 1, 2022, through December 31, 2022, using historical simulation with a 99% confidence level, a 10-day holding period and an effective historical observation period of one year. The risk in a reference portfolio that does not contain derivatives is used as the measurement benchmark. Market risk is the risk to the fund's assets arising from an unfavorable change in market prices. The Company determines the potential market risk by means of the **absolute value-at-risk approach** as defined in CSSF circular 11/512.

In the reporting period, the average leverage effect from the use of derivatives was 1.2, whereby the total of the nominal amounts of the derivatives in relation to the fund's assets was used for the calculation (sum-of-notional approach).

The gross exposure generated via derivatives pursuant to point 40 a) of the "Guidelines on ETFs and other UCITS issues" of the European Securities and Markets Authority (ESMA) totaled EUR 252 781 247.86 as of the reporting date.

Notes on valuation

Under the responsibility of the Board of Directors of the SICAV, the Management Company determines the net asset values per share and performs the valuation of the assets of the fund. The basic provision of price data and price validation are performed in accordance with the method introduced by the Board of Directors of the SICAV on the basis of the legal and regulatory requirements or the principles for valuation methods defined in the SICAV's prospectus.

If no trading prices are available, prices are determined with the aid of valuation models (derived market values) which are agreed between State Street Bank International GmbH, Luxembourg Branch, as external price service provider and the Management Company and which are based as far as possible on market parameters. This procedure is subject to an ongoing monitoring process. The plausibility of price information from third parties is checked through other pricing sources, model calculations or other suitable procedure.

Assets reported in this report are valued to a minor extent at derived market values.

Footnotes

* Floating interest rate.

** The prepaid placement fee is amortized over a period of three years (as specified in article 13 (f) of the general section of the fund's management regulations).

*** Does not include positions with a negative balance, if such exist.

db Advisory Multibrands – PIMCO Euro Sustainable Debt Solution

Statement of income and expenses (incl. income adjustment)

for the year from January 1, 2022, through December 31, 2022

I. Income			
1. Interest from securities (before withholding tax)	EUR	5 177 212.69	
2. Income from swap transactions	EUR	1 441 729.83	
3. Interest from investments of liquid assets (before withholding tax)	EUR	2 790.78	
4. Deduction for foreign withholding tax	EUR	-1 434.34	
5. Other income	EUR	1 283.83	
Total income	EUR	6 621 582.79	
II. Expenses			
1. Interest on borrowings and negative interest on deposits	EUR	-5 233.86	
2. Management fee	EUR	-3 548 659.04	
thereof:			
Basic management fee	EUR	-3 548 659.04	
3. Legal and publication costs	EUR	-3 550.09	
4. Taxe d'abonnement	EUR	-108 871.28	
5. Other expenses	EUR	-623 204.08	
thereof:			
Expenses from prepaid placement fee ¹	EUR	-509 497.58	
Other	EUR	-113 706.50	
Total expenses	EUR	-4 289 518.35	
III. Net investment income	EUR	2 332 064.44	
IV. Sale transactions			
Realized gains/losses	EUR	-6 257 029.99	
Capital gains/losses	EUR	-6 257 029.99	
V. Net gain/loss for the fiscal year	EUR	-3 924 965.55	

¹ For further information, please refer to the notes to the financial statements.

BVI total expense ratio (TER)

The total expense ratio for the share classes was:

Class LC 1.85% p.a.,	Class LD 1.62% ²
Class LDQ 1.85% p.a.,	Class PFC 1.16% p.a.,
Class PFD 2.09% ²	Class PFDQ 0.74% p.a.

The TER expresses total expenses and fees (excluding transaction costs) as a percentage of a fund's average net assets in relation to the respective share class for a given fiscal year.

² Annualization has not been performed for share classes launched during the year.

Transaction costs

The transaction costs paid in the fiscal year amounted to EUR 2 146.26.

The transaction costs include all costs that were reported or settled separately for the account of the fund in the reporting period and are directly connected to the purchase or sale of assets. Any financial transaction taxes which may have been paid are included in the calculation.

Statement of changes in net assets

2022

I. Value of the fund's net assets at the beginning of the fiscal year			
1. Distribution for the previous year	EUR	-1 044 098.79	312 675 756.77
2. Net outflows ³	EUR	-51 951 039.53	
3. Income adjustment	EUR	-1 267 317.31	
4. Net investment income	EUR	2 332 064.44	
5. Realized gains/losses	EUR	-6 257 029.99	
6. Net change in unrealized appreciation/depreciation	EUR	-32 742 980.69	
II. Value of the fund's net assets at the end of the fiscal year			
	EUR		221 745 354.90

³ Reduced by a dilution adjustment in the amount of EUR 296 394.83 for the benefit of the fund's assets.

Summary of the gains/losses

2022

Realized gains/losses (incl. income adjustment)	EUR	-6 257 029.99
from:		
Securities transactions	EUR	-5 603 883.79
(Forward) currency transactions	EUR	-3 490 884.97
Derivatives and other financial futures transactions ⁴	EUR	2 837 738.77

⁴ This line item may include options transactions or swap transactions and/or transactions from warrants and credit derivatives.

Details on the distribution policy*

Class LC

The income for the fiscal year is reinvested.

Class LD

Type	as of	Currency	Per share
Final distribution	March 10, 2023	EUR	0.90

Class LDQ

Type	as of	Currency	Per share
Interim distribution	January 18, 2022	EUR	0.26
Interim distribution	April 20, 2022	EUR	0.25
Interim distribution	July 18, 2022	EUR	0.23
Interim distribution	October 19, 2022	EUR	0.22

Class PFC

The income for the fiscal year is reinvested.

Class PFD

Type	as of	Currency	Per share
Final distribution	March 10, 2023	EUR	0.90

Class PFDQ

Type	as of	Currency	Per share
Interim distribution	January 18, 2022	EUR	0.25
Interim distribution	April 20, 2022	EUR	0.25
Interim distribution	July 18, 2022	EUR	0.22
Interim distribution	October 19, 2022	EUR	0.21

* Additional information is provided in the sales prospectus.

In the event of a final distribution, any remaining ordinary results of the financial period will be capitalised.

	Class PFDQ	EUR	102.89

Transactions processed for the account of the fund's assets via closely related companies (based on major holdings of the Deutsche Bank Group)

The share of transactions conducted in the reporting period for the account of the fund's assets via brokers that are closely related companies and persons (share of 5% and above), amounted to 3.93% of all transactions. The total volume was EUR 24 389 817.88.

Placement fee / Dilution adjustment

In the reporting period the fund paid a placement fee of 2.9% of the fund's net assets to the sales agent. This was calculated on the subscription date. This placement fee serves in particular as compensation for distribution. The gross amount of the placement fee was paid on the subscription date and simultaneously recognized in the fund's net assets as prepaid expenses. These are amortized on a daily basis over a period of three years from the subscription date. The remaining position for prepaid expenses per share on any valuation is calculated on a daily basis by multiplying the net assets of the fund by a factor. The relevant factor is determined by the linear reduction of the placement fee by a certain percentage on a daily basis over three years from the subscription date. The prepaid expenses position fluctuates during the three years from the subscription date, since it depends on both the fund's net assets and the predetermined factor.

In addition, a dilution adjustment of up to 3% based on the gross redemption amount was charged for the benefit of the fund's net assets in the reporting period (to be paid by the shareholder).

Further details on the placement fee and the dilution adjustment can be found in the corresponding section of the fund's sales prospectus.

Swing pricing

Extensive subscriptions and redemptions within a sub-fund may lead to a dilution of the assets of this sub-fund, as the net asset value sometimes does not reflect all trading and other costs that are incurred when the portfolio manager must buy or sell securities in order to manage large (net) inflows or outflows in the sub-fund. In addition to these costs, substantial order volumes may lead to market prices that are considerably below or above the market prices that apply under normal circumstances.

In order to improve investor protection for existing shareholders, a swing price mechanism can be applied to compensate for trading costs and other expenses if, on a valuation date, a sub-fund is materially affected by the aforementioned cumulative (net) inflows or outflows and a defined threshold is exceeded (this mechanism can be applied to all sub-funds). If a swing price mechanism is introduced for a particular sub-fund, this will be published in the special section of the sales prospectus.

The Management Company for the information of the Board of Directors shall define threshold values for the application of the swing pricing mechanism, which are based on the current market conditions, the available market liquidity and the estimated dilution costs, among other things. The actual adjustment will then be automatically introduced in line with the threshold values. The adjusted net asset value will be applied uniformly to all subscriptions and redemptions for the trading day in question. If a performance-based fee applies for the sub-fund, the calculation is based on the original net asset value.

The amount of the swing pricing adjustment may vary from one sub-fund to another and shall not exceed 2% of the original net asset value per share. The appropriateness of the swing factor applied shall be reviewed regularly with the involvement of the Swing Pricing Committee of the Management Company. Inquiries regarding the adjustment of the net asset value may sent to the Management Company.

As the mechanism should only be applied if significant (net) inflows and outflows are expected and it does not apply for normal trading volumes, it is assumed that the net asset value will only be adjusted occasionally.

The sub-fund can apply swing pricing but has not done so in the reporting period, as its (net) inflows and outflows did not exceed the relevant threshold previously defined.

Annual report

db Advisory Multibrands – PIMCO Global Sustainable Multi-Credit Solution

Investment objective and performance in the reporting period

The objective of the investment policy of db Advisory Multibrands – PIMCO Global Sustainable Multi-Credit Solution is to achieve long-term capital growth in combination with current income. Among other characteristics, the fund promotes environmental characteristics but does not have as its objective a sustainable investment. The companies in which investments are made follow good governance practices. In order to achieve this, the fund invests in interest-bearing debt securities of issuers located globally, including emerging market countries, bonds and other fixed income securities issued by global governments, their agencies and instrumentalities.

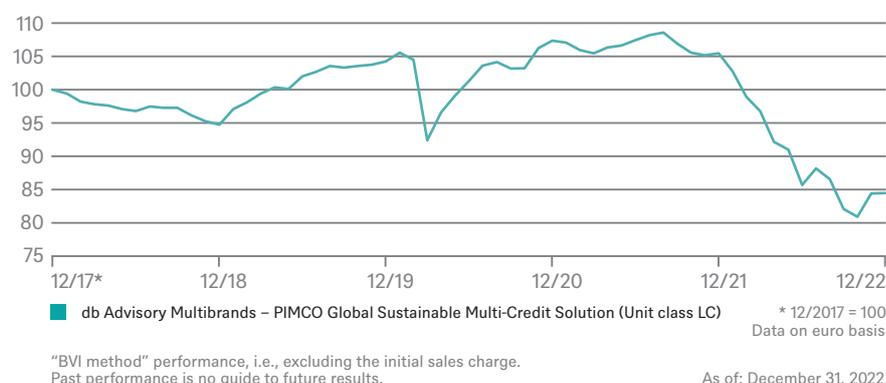

Considering this significant market volatility, the sub-fund returned -20.0% (LC share class, BVI method, in euro).

Investment policy in the reporting period

The international capital markets entered increasingly rough waters in 2022. This downward trend began with dramatically rising inflation figures due to increasing supply-chain constraints amid the steep economic recovery following the peak of the COVID-19 pandemic.

The situation was exacerbated further by the ongoing war in Ukraine, which began when Russia invaded on February 24, 2022. Increasing sanctions by Western countries against Russia and supply boycotts by Russia caused

¹ Class LD launched on August 1, 2018

“BVI method” performance, i.e., excluding the initial sales charge.
Past performance is no guide to future results.

As of: December 31, 2022

the prices of energy (oil, gas, coal) and also food to rise dramatically. To counteract inflation and its dynamics, many central banks raised interest rates noticeably, with some bringing many years of expansionary monetary policy to an end. The U.S. Federal Reserve (Fed) thus raised its key interest rate in seven steps from mid-March 2022 through mid-December 2022 by 4.25 percentage points to a target range of 4.25% p.a. – 4.50% p.a.

The European Central Bank (ECB) followed suit in the second half of July 2022, after a pause of almost three years, and raised its key

interest rate in four steps by two-and-a-half percentage points to altogether 2.50% p.a. Against that backdrop, and in view of weakening global economic growth during 2022, there were mounting fears among market actors of a recession taking hold.

As yields rose across developed and emerging markets, the biggest detractor was the duration exposure of the sub-fund across different regions, mainly in U.S. and Europe. On the other hand, regarding yields exposure, its short position on Japanese duration slightly contributed to performance.

Another big detractor was the spread exposure, given spread widening across different sectors. In external emerging markets, the exposure to China and Russia were the main drivers of negative returns, in the first case due to China's property developers crisis and in the second due to Russia's invasion of Ukraine. In investment grade and high yield credit, both financial and industrial sectors impacted negatively on performance.

On the other hand, selected currency exposure in certain emerging markets with high carry and interesting relative value, for example to commodity producer countries like Mexican Peso and Brazilian Real contributed during the year.

Information on the environmental and/or social characteristics

This product reported in accordance with Article 8(1) of Regulation (EU) 2019/2088 (SFDR) on sustainability-related disclosures in the financial services sector ("SFDR").

Composition of the reference portfolio (according to CSSF circular 11/512)

50% Bloomberg Global Aggregate Credit ex EM EUR Hedged Index, 25% JPM ESG DM Corporate High Yield USD Hedged EUR Index, 25% JP Morgan ESG EMBI Global Diversified EUR Hedged Index

Market risk exposure (value-at-risk) (according to CSSF circular 11/512)

Lowest market risk exposure	%	95.084
Highest market risk exposure	%	167.889
Average market risk exposure	%	137.068

The values-at-risk were calculated for the period from January 1, 2022, through December 31, 2022, using historical simulation with a 99% confidence level, a 10-day holding period and an effective historical observation period of one year. The risk in a reference portfolio that does not contain derivatives is used as the measurement benchmark. Market risk is the risk to the fund's assets arising from an unfavorable change in market prices. The Company determines the potential market risk by means of the **relative value-at-risk approach** as defined in CSSF circular 11/512.

In the reporting period, the average leverage effect from the use of derivatives was 1.7, whereby the total of the nominal amounts of the derivatives in relation to the fund's assets was used for the calculation (sum-of-notional approach).

The gross exposure generated via derivatives pursuant to point 40 a) of the "Guidelines on ETFs and other UCITS issues" of the European Securities and Markets Authority (ESMA) totaled EUR 51 056 136.90 as of the reporting date.

Notes on valuation

Under the responsibility of the Board of Directors of the SICAV, the Management Company determines the net asset values per share and performs the valuation of the assets of the fund. The basic provision of price data and price validation are performed in accordance with the method introduced by the Board of Directors of the SICAV on the basis of the legal and regulatory requirements or the principles for valuation methods defined in the SICAV's prospectus. The basic provision of price data and price validation are performed in accordance with the method introduced by the Board of Directors of the SICAV on the basis of the legal and regulatory requirements or the principles for valuation methods defined in the SICAV's prospectus.

If no trading prices are available, prices are determined with the aid of valuation models (derived market values) which are agreed between State Street Bank International GmbH, Luxembourg branch, as external price service provider and the Management Company and which are based as far as possible on market parameters. This procedure is subject to an ongoing monitoring process. The plausibility of price information from third parties is checked through other pricing sources, model calculations or other suitable procedure.

Assets reported in this report are valued to a minor extent at derived market values.

Footnotes

* Floating interest rate.

** Does not include positions with a negative balance, if such exist.

Statement of income and expenses (incl. income adjustment)

for the year from January 1, 2022, through December 31, 2022

I. Income			
1. Interest from securities (before withholding tax)	EUR	1 839 565.58	
2. Income from swap transactions	EUR	242 214.82	
3. Interest from investments of liquid assets (before withholding tax)	EUR	632.13	
4. Deduction for foreign withholding tax ¹	EUR	824.94	
5. Other income	EUR	115.82	
Total income	EUR	2 083 353.29	
II. Expenses			
1. Interest on borrowings and negative interest on deposits	EUR	-741.09	
2. Expenses from swap transactions	EUR	-625.87	
3. Management fee	EUR	-826 491.16	
thereof:			
Basic management fee	EUR	-826 491.16	
4. Legal and publication costs	EUR	-810.02	
5. Taxe d'abonnement	EUR	-23 489.50	
6. Other expenses	EUR	-73 850.60	
thereof:			
Expenses from prepaid placement fee ²	EUR	-26 203.15	
Other	EUR	-47 647.45	
Total expenses	EUR	-926 008.24	
III. Net investment income	EUR	1 157 345.05	
IV. Sale transactions			
Realized gains/losses	EUR	-7 627 996.93	
Capital gains/losses	EUR	-7 627 996.93	
V. Net gain/loss for the fiscal year	EUR	-6 470 651.88	

¹ This includes primarily income from the liquidation of excess accruals in the amount of EUR 10 005.92.

² For further information, please refer to the notes to the financial statements.

BVI total expense ratio (TER)

The total expense ratio for the share classes was:

Class LC 1.90% p.a.,	Class LD 1.90% p.a.,
Class LDQ 1.89% p.a.,	Class PFD 0.94% p.a.,
Class PFDQ 0.86% p.a.	

The TER expresses total expenses and fees (excluding transaction costs) as a percentage of a fund's average net assets in relation to the respective share class for a given fiscal year.

Transaction costs

The transaction costs paid in the fiscal year amounted to EUR 1688.83.

The transaction costs include all costs that were reported or settled separately for the account of the fund in the reporting period and are directly connected to the purchase or sale of assets. Any financial transaction taxes which may have been paid are included in the calculation.

Statement of changes in net assets

2022

I. Value of the fund's net assets at the beginning of the fiscal year		EUR	82 068 799.54
1. Distribution for the previous year	EUR	-1 317 397.68	
2. Net outflows ³	EUR	-18 874 305.41	
3. Income adjustment	EUR	-1 038 488.04	
4. Net investment income	EUR	1 157 345.05	
5. Realized gains/losses	EUR	-7 627 996.93	
6. Net change in unrealized appreciation/depreciation	EUR	-7 207 817.28	
II. Value of the fund's net assets at the end of the fiscal year		EUR	47 160 139.25

³ Reduced by a dilution adjustment in the amount of EUR 42 243.38 for the benefit of the fund's assets.

Summary of the gains/losses

2022

Realized gains/losses (incl. income adjustment)		EUR	-7 627 996.93
from:			
Securities transactions	EUR	-1 338 848.07	
(Forward) currency transactions	EUR	-2 957 246.54	
Derivatives and other financial futures transactions ⁴	EUR	-3 331 902.32	

⁴ This line item may include options transactions or swap transactions and/or transactions from warrants and credit derivatives.

	Class LD	EUR	105.03
	Class LDQ	EUR	90.50
	Class PFD	EUR	101.02
	Class PFDQ	EUR	100.00

Transactions processed for the account of the fund's assets via closely related companies (based on major holdings of the Deutsche Bank Group)

The share of transactions conducted in the reporting period for the account of the fund's assets via brokers that are closely related companies and persons (share of 5% and above), amounted to 1.94% of all transactions. The total volume was EUR 3 405 893.09.

Placement fee / Dilution adjustment

In the reporting period the fund paid a placement fee of 2.9% of the fund's net assets to the sales agent. This was calculated on the subscription date. This placement fee serves in particular as compensation for distribution. The gross amount of the placement fee was paid on the subscription date and simultaneously recognized in the fund's net assets as prepaid expenses. These are amortized on a daily basis over a period of three years from the subscription date. The remaining position for prepaid expenses per share on any valuation is calculated on a daily basis by multiplying the net assets of the fund by a factor. The relevant factor is determined by the linear reduction of the placement fee by a certain percentage on a daily basis over three years from the subscription date. The prepaid expenses position fluctuates during the three years from the subscription date, since it depends on both the fund's net assets and the predetermined factor.

In addition, a dilution adjustment of up to 3% based on the gross redemption amount was charged for the benefit of the fund's net assets in the reporting period (to be paid by the shareholder).

Further details on the placement fee and the dilution adjustment can be found in the corresponding section of the fund's sales prospectus.

The attached financial statements represent the assets and liabilities of the individual sub-funds as well as of the fund as a whole. The financial statements for the respective sub-fund are prepared in the currency specified in the sales prospectus while the financial statements for the fund are prepared in its base currency. If the currency of a sub-fund differs from the fund's base currency, the following is carried out within the scope of the consolidation of the individual sub-fund currencies into the fund's base currency: the difference between the net assets of the sub-fund at the beginning of the reporting period converted at exchange rates applicable at the beginning of the reporting period and the value of the net assets of the sub-fund calculated at exchange rates applicable at the end of the reporting period is shown as "Exchange rate valuation differences on the fund's assets at the beginning of the reporting period" in the consolidated statement of changes in net assets for the fund.

Fiscal Year End 2022 USD 1.068951 = EUR 1

Fiscal Year End 2021 USD 1.133450 = EUR 1

** The consolidated statement of net assets, the consolidated statement of income and expenses as well as the consolidated statement of changes in net assets correspond to the overall result of the individual sub-funds. In the case of investments between individual sub-funds of db Advisory Multibrands, SICAV, the corresponding accounts of the fund were not the object of an elimination for the purposes of the respective consolidated statement.

*** In case of derivatives, the position "Total assets" comprises the positive balances of the netted single positions within the same group of assets, while the negative balances are included under "Total liabilities".

¹ The sub-fund was launched on January 17, 2022.

The attached financial statements represent the assets and liabilities of the individual sub-funds as well as of the fund as a whole. The financial statements for the respective sub-fund are prepared in the currency specified in the sales prospectus while the financial statements for the fund are prepared in its base currency. If the currency of a sub-fund differs from the fund's base currency, the following is carried out within the scope of the consolidation of the individual sub-fund currencies into the fund's base currency: the difference between the net assets of the sub-fund at the beginning of the reporting period converted at exchange rates applicable at the beginning of the reporting period and the value of the net assets of the sub-fund calculated at exchange rates applicable at the end of the reporting period is shown as "Exchange rate valuation differences on the fund's assets at the beginning of the reporting period" in the consolidated statement of changes in net assets for the fund.

Fiscal Year End 2022 USD 1.068951 = EUR 1
Fiscal Year End 2021 USD 1.133450 = EUR 1

** The consolidated statement of net assets, the consolidated statement of income and expenses as well as the consolidated statement of changes in net assets correspond to the overall result of the individual sub-funds. In the case of investments between individual sub-funds of db Advisory Multibrands, SICAV, the corresponding accounts of the fund were not the object of an elimination for the purposes of the respective consolidated statement.

¹ The sub-fund was launched on January 17, 2022.

² The sub-fund was liquidated on December 13, 2022.

REPORT OF THE REVISEUR D'ENTREPRISES AGREE

Report on the audit of the financial statements

Opinion

We have audited the financial statements of db Advisory Multibrands, SICAV ("the Fund") and each of its sub-funds, which comprise the statement of net assets including the statement of investments in securities and other net assets as at 31 December 2022 and the statement of income and expenses and the statement of changes in net assets for the year then ended, and explanatory information to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of db Advisory Multibrands, SICAV and each of its sub-funds as at 31 December 2022, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession ("Law of 23 July 2016") and with International Standards on Auditing ("ISAs") as adopted for Luxembourg by the Commission de Surveillance du Secteur Financier ("CSSF"). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the « Responsibilities of "réviseur d'entreprises agréé" for the Audit of the Financial Statements » section of our report. We are also independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of Matter

We draw attention to notes on valuation of these financial statements, which indicates the decision of the Board of Directors of the Fund to close the sub-fund db Advisory Multibrands – Franklin Templeton Global Conservative Portfolio (in liquidation) effective 13 December 2022. The financial statements of the concerned sub-fund have therefore been prepared using a non-going concern basis of accounting. Our opinion is not modified in respect of this matter.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our report of the “réviseur d’entreprises agréé” thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of these financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund’s and each of its sub-funds’ ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the “réviseur d’entreprises agréé” for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the “réviseur d’entreprises agréé” that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit.

We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

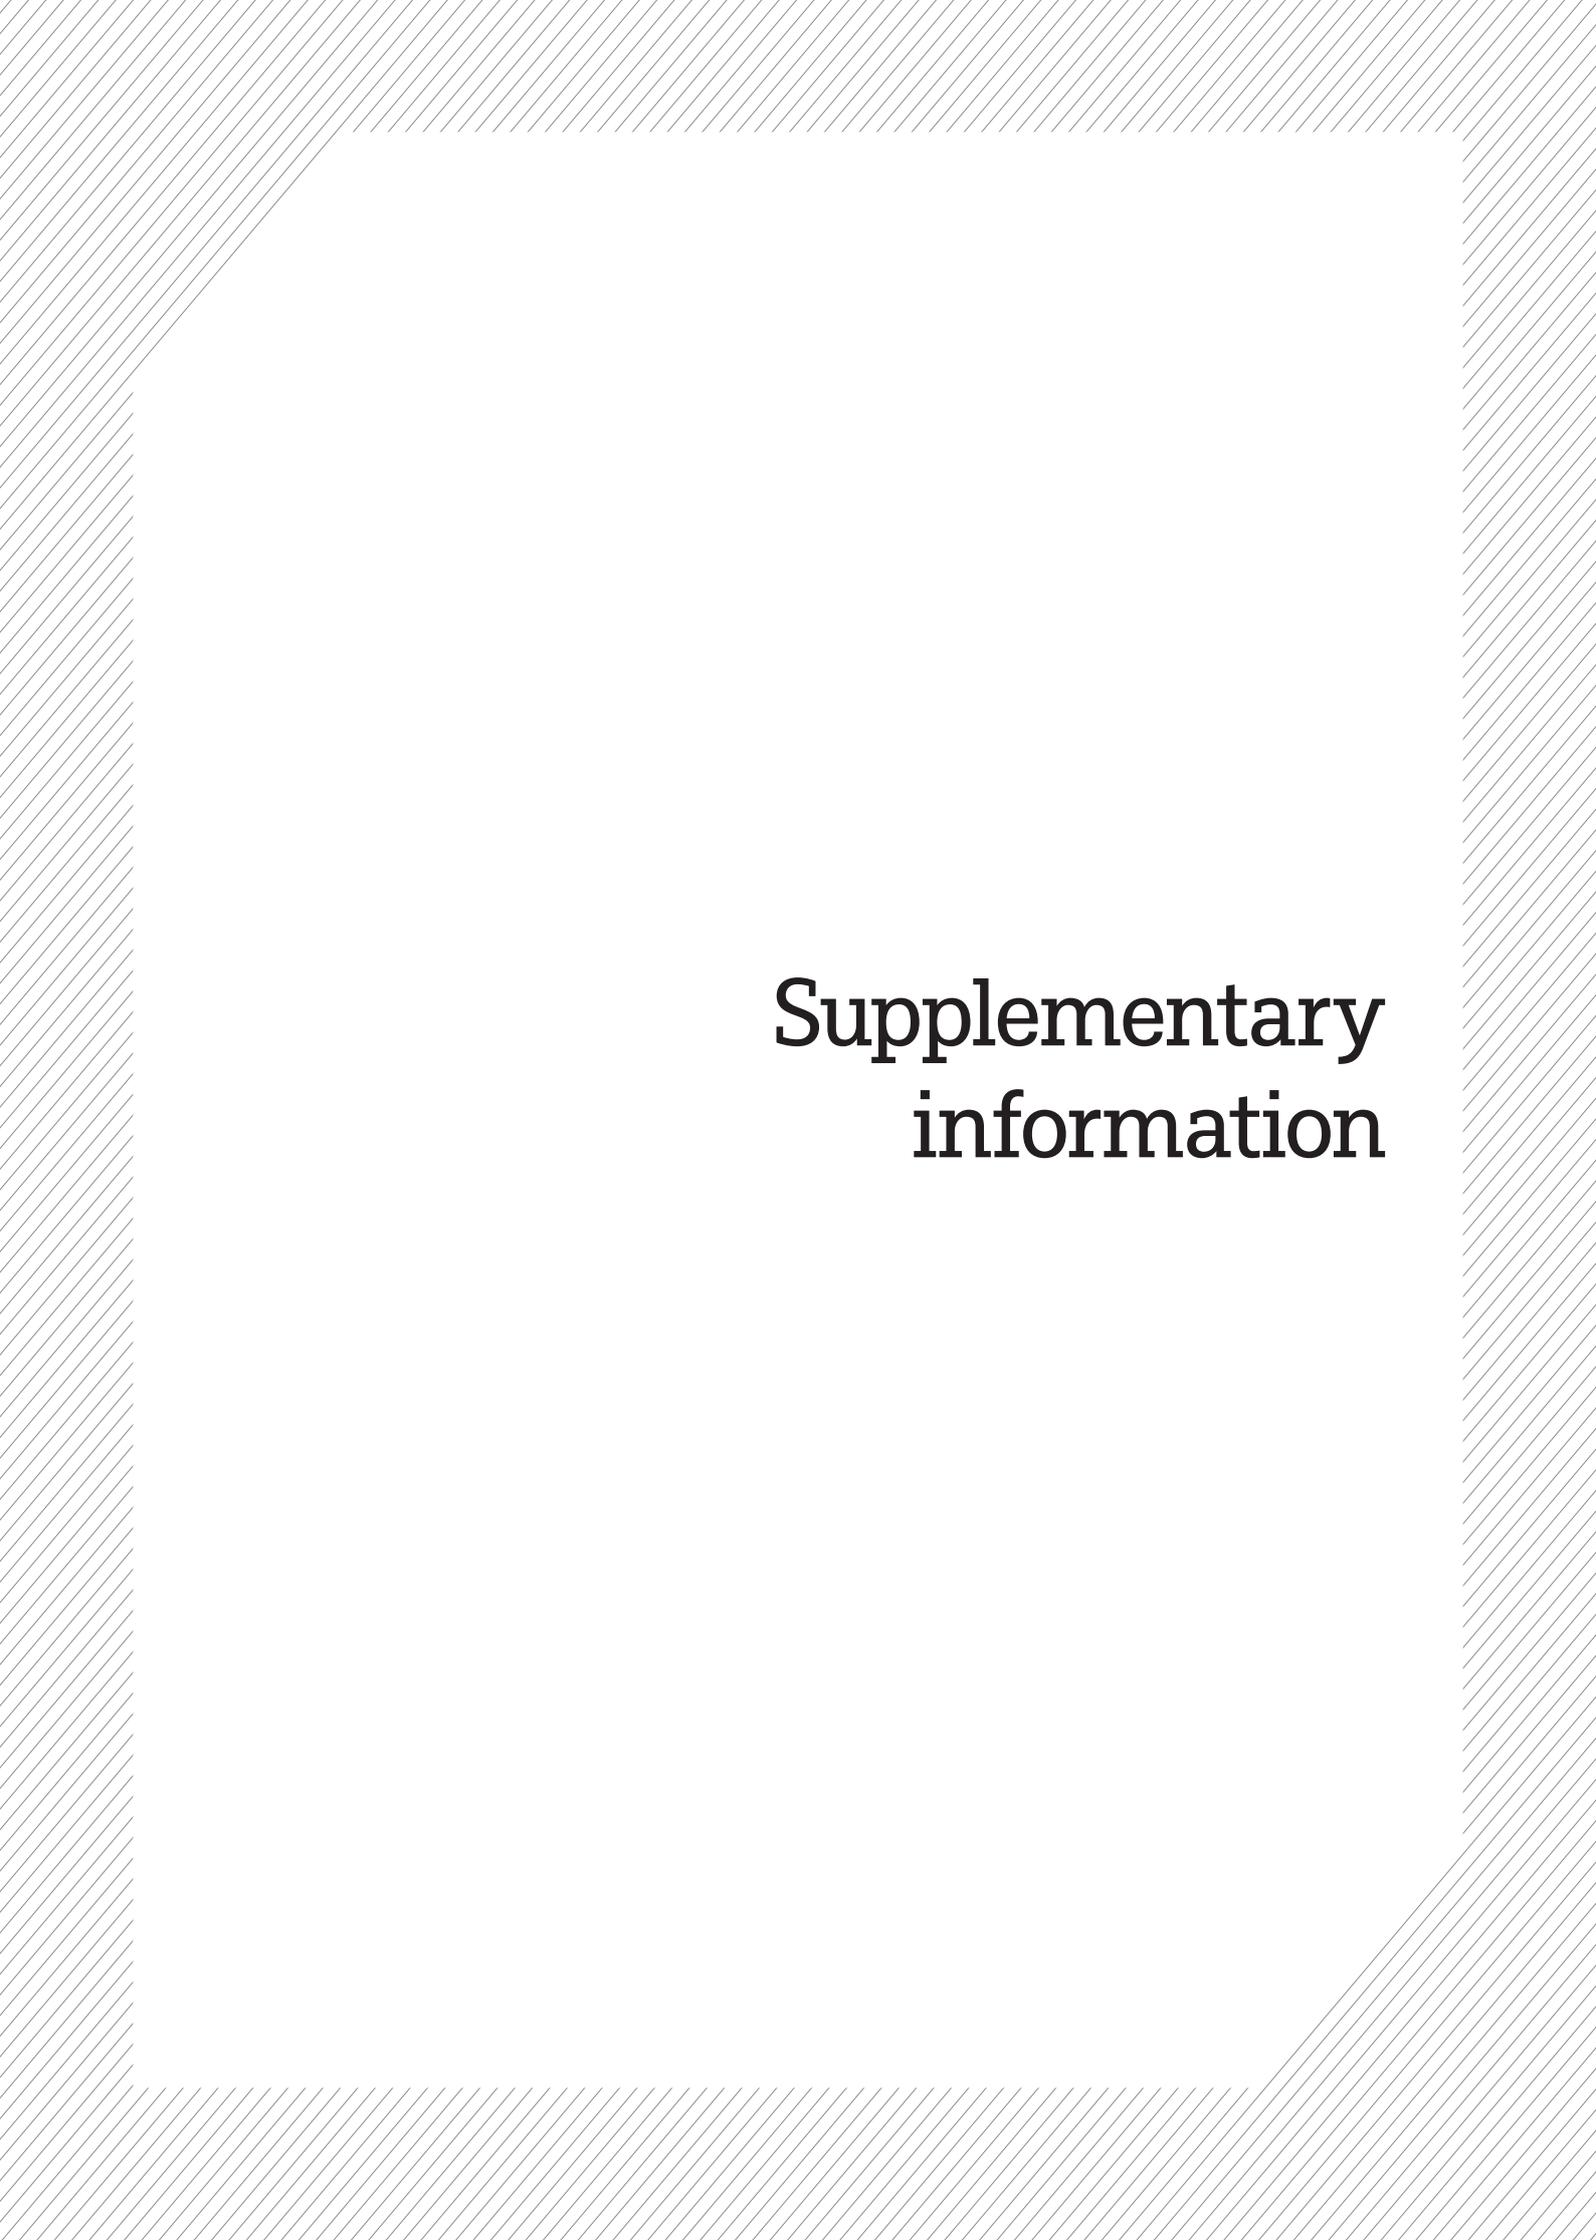

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund.
- Conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our report of the "réviseur d'entreprises agréé" to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the "réviseur d'entreprises agréé". However, future events or conditions may cause the Fund or any of its sub-funds (except for the sub-fund where a decision or an intention to close exists) to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Luxembourg, 21 April 2023

Pia Schanz

Supplementary information

Remuneration Disclosure

DWS Investment S.A. (the "Company") is a subsidiary in DWS Group GmbH & Co. KGaA ("DWS KGaA"), and is subject to the regulatory requirements of the Fifth Directive on Undertakings for Collective Investment in Transferable Securities ("UCITS V Directive") and the Alternative Investment Fund Management Directive ("AIFM Directive") as well as the European Securities and Markets Authority's Guidelines on Sound Remuneration Policies ("ESMA Guidelines") with regard to the design of its remuneration system.

Remuneration Policy & Governance

The Company is governed by the Group-wide Compensation Policy that DWS KGaA has adopted for itself and all of its subsidiaries ("DWS Group" or only "Group").

In line with the Group structure, committees have been set up to ensure the appropriateness of the compensation system and compliance with regulatory requirements on compensation and are responsible for reviewing it.

As such the DWS Compensation Committee was tasked by the DWS KGaA Executive Board with developing and designing sustainable compensation principles, making recommendations on overall compensation and ensuring appropriate governance and oversight with regard to compensation and benefits for the Group.

Furthermore, the Remuneration Committee was established to support the Supervisory Board of DWS KGaA in monitoring the appropriate structure of the remuneration systems for all Group employees. This is done by testing the consistency of the remuneration strategy with the business and risk strategy and taking into account the effects of the remuneration system on the group-wide risk, capital and liquidity management.

The internal annual review at DWS Group level concluded the design of the remuneration system to be appropriate and no significant irregularities were recognized.

Compensation structure

Employee compensation consists of fixed and variable compensation.

Fixed compensation remunerates employees for their skills, experience and competencies, commensurate with the requirements, size and scope of their role.

Variable compensation takes into account performance at group, divisional and individual level. Variable compensation generally consists of two elements – the "Franchise Component" and the "Individual Component".

The Franchise Component is determined based upon the performance of three Key Performance Indicators (KPIs) at DWS Group level. For the performance year 2022 these were: Adjusted Cost Income Ratio ("CIR"), Net Flows and ESG metrics.

The individual component of variable compensation takes into account a number of financial and non-financial factors, relativities within the peer group, and retention considerations. Variable compensation can be reduced accordingly or cancelled completely in the event of negative performance contributions or misconduct. In principle, it is only granted and paid out if the granting is affordable for the Group. Guaranteed variable compensation is not normally granted to employees. On an exceptional basis, guaranteed variable compensation can be granted to new hires but only during their first year of employment.

The compensation strategy is designed to achieve an appropriate balance between fixed and variable compensation. This helps to align employee compensation with the interests of customers, investors and shareholders, as well as to industry standards. At the same time, it ensures that fixed compensation represents a sufficiently high proportion of total compensation to allow the Group full flexibility in granting variable compensation.

Determination of variable compensation and appropriate risk-adjustment

The total amount of variable compensation is subject to appropriate risk-adjustment measures which include ex-ante and ex-post risk adjustments. The robust methodology is designed to ensure that the determination of variable compensation reflects Group's risk-adjusted performance as well as the capital and liquidity position.

A number of considerations are used in assessing the performance of the business units. Performance is assessed in the context of financial and non-financial targets based on balanced scorecards. The allocation of variable compensation to the infrastructure areas and in particular to the control functions depends on the overall results of the Group, but not on the results of the business areas they oversee.

Principles for determining variable compensation apply at individual employee level which detail the factors and metrics that must be taken into account when making IVC decisions. These include, for instance, investment performance, client retention, culture considerations, and objective setting and performance assessment based on the "Total Performance" approach. Furthermore, any control function inputs and disciplinary sanctions and their impact on the VC have to be considered as well.

Sustainable Compensation

Sustainability and sustainability risks are an essential part that determine the variable compensation. Therefore, the remuneration policy is fully in line and consistent with sustainability risks. Hence, DWS Group incentivises behaviour that benefits both interest of clients and the long-term performance of the firm. Relevant sustainability factors are reviewed on a regular basis and incorporated in the design of the compensation system.

Compensation for 2022

The DWS Compensation Committee has monitored the affordability of VC for 2022 and determined that the Group's capital and liquidity levels remain above regulatory minimum requirements, and internal risk appetite threshold.

As part of the overall 2022 variable compensation granted in March 2023, the Franchise Component is awarded to eligible employees in line with the assessment of the defined KPIs. The Executive Board recognizing the considerable contribution of employees and determined a target achievement rate of 76.25% for 2022.

Identification of Material Risk Takers

In accordance with the regulatory requirements, the Company has identified Material Risk Takers. The identification process was carried out in accordance with the Group's policies and is based on an assessment of the impact of the following categories of staff on the risk profile of the Company or on a fund it manages: (a) Board Members/Senior Management, (b) Portfolio/Investment managers, (c) Control Functions, (d) Staff heading Administration, Marketing and Human Resources, (e) other individuals (Risk Takers) in a significant position of influence, (f) other employees in the same remuneration bracket as other Risk Takers, whose roles have an impact on the risk profile of the Company or the Group. At least 40% of the VC for Material Risk Takers is deferred. Additionally, at least 50% of both, the upfront and the deferred proportion, are granted in the Group share-based instruments or fund-linked instruments for Key Investment Professionals. All deferred components are subject to a number of performance conditions and forfeiture provisions which ensure an appropriate ex-post risk adjustment. In case the VC is lower than EUR 50,000, the Material Risk Takers receive their entire variable compensation in cash without any deferral.

Aggregate Compensation Information for the Company for 2022¹

Number of employees on an annual average	152
Total Compensation ²	EUR 21,279,765
Fixed Pay	EUR 18,301,194
Variable Compensation	EUR 2,978,570
Thereof: Carried Interest	EUR 0
Total Compensation for Senior Management ³	EUR 1,454,400
Total Compensation for other Material Risk Takers ⁴	EUR 0
Total Compensation for Control Function employees	EUR 1,248,758

¹ In cases where portfolio or risk management activities have been delegated by the Company, the compensation data for delegates are not included in the table.

² Considering various elements of remuneration as defined in the ESMA Guidelines which may include monetary payments or benefits (such as cash, shares, options, pension contributions) or none (directly) monetary benefits (such as fringe benefits or special allowances for car, mobile phone, etc.).

³ Senior Management refers to the members of the Management Board of the Company, only. Members of the Management Board meet the definition of managers. Apart from the members of Senior Management, no further managers have been identified.

⁴ Identified risk takers with control functions are shown in the line "Control Function employees".

Directors Fees and Interests

Directors Fees and Interests for the financial Year ending on 31 December 2021

Further to shareholder approval at the annual general meeting of the Company on 28 April 2022, the annual remuneration of the independent Director has been approved based on the number of Sub-funds at the end of the financial year of the Company. The independent Director received 15,000 EUR for the financial year ending on 31 December 2021.

Independent Director remuneration is paid by the Management Company.

For the avoidance of doubt, non-independent Directors do not receive remuneration for their roles as Directors nor any other material benefit paid to them by the Company or the Management Company.

Directors Fees and Interests for the financial Year ending on 31 December 2022

The annual general meeting of shareholders that will be held on 26 April 2023 will approve the annual remuneration for the independent Director for the financial year ending 31 December 2022. The proposed amount for the independent Director is 15,000 EUR and is based on the number of Sub-funds at the end of the financial year ending 31 December 2022.

Independent Director remuneration is paid by the Management Company.

For the avoidance of doubt, non-independent Directors do not receive remuneration for their roles as Directors nor any other material benefit paid to them by the Company or the Management Company.

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The sub-fund promoted environmental and/or social characteristics by complying with the ESG analysis framework and scoring methodology of Amundi. Moreover, for the portfolio component invested in funds and ETFs, the selection was focused on instruments that had a positive link to one or several of the UN Sustainable Development Goals (UN SDGs).

Amundi's ESG analysis framework had been designed to assess corporate behaviour in three fields: Environment, Social, and Governance (ESG). Amundi assessed companies' exposure to ESG risks and opportunities, including sustainability factors and sustainability risks, and how corporates managed these challenges in each of their sectors. As far as issuers of listed securities were concerned, Amundi scores issuers regardless of the instrument type, equity or debt.

Amundi based its ESG analysis of corporates on a "best-in-class" approach. Each issuer was assessed with a quantitative score scaled around the average of their sector, which distinguished best practices from worst practices at sector level. Amundi's assessment relied on a combination of extra-financial data from third parties and qualitative analysis of associated sector and sustainability themes. The quantitative score was translated into a letter rating which ranged from a scale of A (for best practices) to G (for the worst ones). G-rated companies were excluded from investment in actively managed funds.

Moreover, Amundi applied a targeted exclusion policy with reference to issuers that did not comply with Amundi Group's Responsible Investment Policy, such as issuers exposed to the exclusionary rules and thresholds set out in our sector policy (i.e. thermal coal, tobacco) or did not comply with internationally recognized conventions and/or frameworks, and national regulations. Amundi had developed two main ESG scoring methodologies, one for corporates issuing listed instruments and one for sovereign entities.

Regarding corporate issuers, Amundi's ESG analysis framework was comprised of 38 criteria, of which 17 are cross-sector criteria, common to all companies whatever their business sector, and 21 sector specific criteria. These criteria were designed to either assess how sustainability issues might affect the issuer as well as the quality of the management of this dimension. Impact on sustainability factors as well as quality of the mitigation undertaken were also considered. All criteria were available in fund managers' front office portfolio management system.

Further details regarding the cross sector criteria, the sector specific criteria as well as the main investment strategy are specified in the Special Section of the Sales Prospectus.

The extent to which these criteria affected an issuer's ESG score depends on the relative importance attributed to them in the model compared to the other factors considered. Each issuer was rated with a score measured against the average of its sector, in order to distinguish between best practices and worst practices at the sector level.

Regarding sovereign issuers, Amundi's methodology relied on a set of about 50 ESG indicators. All indicators had been grouped into 8 categories, each category falling into one of the pillars E, S or G. Similar to Amundi's corporate ESG rating scale, issuers' ESG score is translated in an ESG rating ranging from A to G:

Environment: Climate Change, Natural Capital

Social: Human Rights, Social Cohesion, Human Capital, Civil Rights

Governance: Government Effectiveness, Economic Environment

Derivatives were not used to attain the environmental and social characteristics promoted by the subfund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

db Advisory Multibrands - AMUNDI ESG Sustainable Balanced

Indicators	Description	Value
Sustainability Indicators		
Excludes issuers with ESG Rating lower than D:		
	ESG Rating E	0% of portfolio volume
	ESG Rating F	0% of portfolio volume
	ESG Rating G	0% of portfolio volume
Seeks to achieve an ESG Rating of the portfolio at least equal to C		C+
Seeks to achieve an ESG Rating of the portfolio greater than its investment universe		C-
Applies a rule of minimum 90% of financial instruments with an ESG Rating assigned		95,82%

As of: December 31, 2022

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments were to invest in investee companies that sought to meet two criteria:

1. follow best environmental and social practices; and
2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a “best performer” within its sector of activity on at least one of its material environmental or social factors.

The definition of “best performer” relied on Amundi’s proprietary ESG methodology which aimed to measure the ESG performance of an investee company. In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors were identified at a sector level. The identification of material factors was based on Amundi ESG analysis framework which combined extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors were: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company had not significant exposure to activities (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment was assessed at investee company level.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Amundi ensured that any sustainable investment did not significantly harm any environmental or social objective through constant monitoring of all mandatory Principal Adverse Impact indicators (included in Annex 1 of the Commission Delegated Regulation (EU) 22 / 1288) where robust data was available. The quality of available data is expected to improve over time.

How were the indicators for adverse impacts on sustainability factors taken into account?

All mandatory Principal Adverse Impact indicators (included in Annex 1 of the Commission Delegated Regulation (EU) 22 / 1288) were constantly monitored where robust data was available.

Taking into account these adverse impacts, Amundi had established a quantitative and/or qualitative approach to determine if an investment significantly harmed any of the environmental or social objectives. The monitoring was set based upon various external and internal factors, such as data availability, political objectives or market developments and were adapted going forward.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights were integrated into Amundi's ESG scoring methodology. Amundi's proprietary ESG rating tool assessed issuers using available data from Amundi's data providers. For example, the model had a dedicated criteria called "Community Involvement and Human Rights" which was applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, Amundi conducted controversy monitoring on a, at minimum, quarterly basis which included companies identified for human rights violations. When controversies arised, analysts would evaluate the situation and applied a score to the controversy (using Amundi's proprietary scoring methodology) and determined the best course of action. Controversy scores were updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considered all the mandatory Principal Adverse Impacts and relied on a combination of exclusion policies (normative and sectorial), ESG rating integration into the investment process, engagement and voting approaches. Amundi constantly monitored all mandatory Principal Adverse Impact indicators (included in Annex 1 of the Commission Delegated Regulation (EU) 22 / 1288) where robust data was available. The quality of available data is expected to improve over time.

for the period from January 01, 2022, through December 30, 2022

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: for the period from January 01, 2022, through December 31, 2022

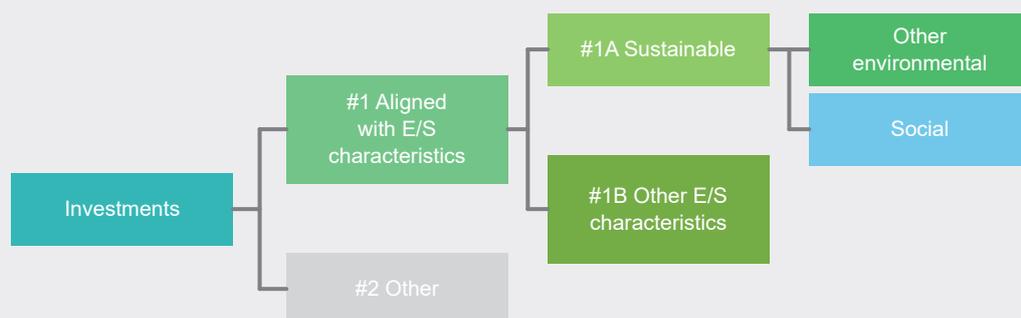

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

This sub-fund invested 95,82% of its net assets in investments that were aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 64,92% of the [sub-]fund's assets qualified as sustainable investments (#1A Sustainable). 4,18% of the investments were not aligned with these characteristics (#2 Other). A more detailed description of the specific asset allocation of this sub-fund can be found in the Special Section of the Sales Prospectus.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

db Advisory Multibrands - AMUNDI ESG Sustainable Balanced

Breakdown by sector / issuer	in % of portfolio volume
Companies	29,61 %
Central governments	10,90 %
Fixed Income funds	31,77 %
Equity funds	24,41 %
Exposure to companies active in the fossil fuel sector	21.35 %

As of: December 31, 2022

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.

- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.

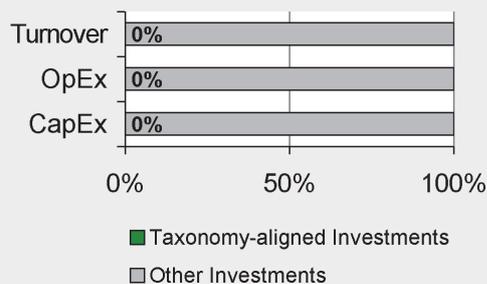

- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

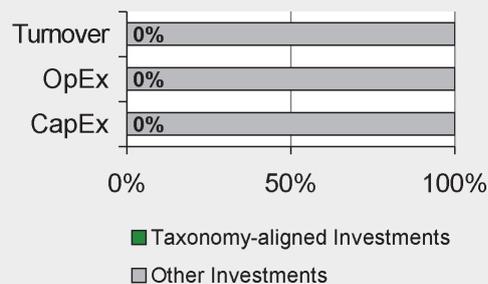

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Due to a lack of reliable data the sub-fund did not commit to invest a minimum proportion of sustainable investments with an environmental objective aligned with the EU Taxonomy. Therefore, the percentage of environmentally sustainable investments aligned with the EU Taxonomy was 0% of the sub-fund's net assets.

Enabling activities

Directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

Are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

The sub-fund did not have a minimum share of investments in transitional and enabling activities, as it did not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/85.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy

The share of environmentally sustainable investments in total was 57,66% of the net assets of the sub-fund.

What was the share of socially sustainable investments?

The share of socially sustainable investments in total was 36,45% of the net assets of the sub-fund.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Included in “#2 Other” were cash and unrated instruments for the purpose of liquidity and portfolio risk management. Unrated instruments might also include securities for which data needed for the measurement of attainment of environmental or social characteristics was not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This sub-fund pursued a strategy based on multiple asset classes as main investment strategy. The sub-fund invested, either directly or indirectly through investment funds and exchange traded funds, in a diversified portfolio of worldwide issued debt and debt-related instruments, equity and equity-related instruments issued by companies worldwide, money market instruments, deposits with credit institutions and derivatives hereof. The direct investments in debt and debt-related instruments were oriented towards securities issued by both governmental and non-governmental issuers worldwide, which had an investment grade rating or, up to a maximum of 10%, a high yield rating (equal or lower than BB+). The sub-fund invested at least 51% of its assets in investment funds and/or exchange traded funds of Amundi Group. The sub-fund's investments in contingent convertible bonds were limited to 10% of the sub-fund's net asset value. Further details regarding the main investment strategy are specified in the Special Section of the Sales Prospectus.

The sub-fund's assets were predominantly allocated into investments that complied with the defined standards in respect to the promoted environmental and social characteristics as described in the following sections. The sub-fund's strategy in relation to the promoted environmental or social characteristics was integral part of the ESG assessment methodology, which was continuously monitored via the sub-fund's investment guidelines.

For direct investments, the portfolio manager:

- Excluded issuers with ESG Rating lower than D;
- Sought to achieve an ESG Rating of the portfolio at least equal to C;
- Sought to achieve an ESG Rating of the portfolio greater than its investment universe;
- Applied a rule of minimum 90% of financial instruments with an ESG Rating assigned

For indirect investments, the selection of underlying funds/ETFs must have taken into account the integration of financial analysis with ESG considerations and/or a focus on Responsible Investments (RI). The selected funds/ETFs must be classified as Art. 8 or Art 9 according to the SFDR and/or had a link of their underlying investment theme with one or several of the UN Sustainable Development Goals (SDGs).

There was no minimum committed rate for the Sub-Fund.

Amundi assessed an issuer's ability to ensure an effective corporate governance framework that guaranteed it met its long-term objectives (e.g. guaranteeing the issuer's value over the long term). The governance criteria considered were: board structure, audit and control, remuneration, shareholders' rights, ethics, tax practices and ESG strategy.

How did this financial product perform compared to the reference sustainable benchmark?

This sub-fund had not designated a reference benchmark to determine whether it was aligned with the environmental and/or social characteristics that it promoted.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: db Advisory Multibrands - DWS ESG Eurozone Bonds Flexible

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund promoted environmental and social characteristics related to climate, governance and social norms as well as general ESG quality through the avoidance of issuers (1) exposed to high or excessive climate and transition risks, (2) exposed to high or highest severity of norm issues (i.e. as regards compliance with international standards of corporate governance, human rights and labour rights, customer and environment safety and business ethics), (3) exposed to high or excessive environmental, social and governance risks compared to their peer group, (4) moderately, highly or excessively exposed to controversial sectors and controversial activities, and/or (5) involved in controversial weapons.

This sub-fund further promoted a minimum proportion of sustainable investments with a positive contribution to one or several of the United Nations Sustainable Development Goals (UN SDGs). This sub-fund had not designated a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted.

No derivatives were used to attain the environmental or social characteristics promoted by the sub-fund.

How did the sustainability indicators perform?

Please see the section entitled “What actions have been taken to meet the environmental and/or social characteristics during the reference period?” for detailed descriptions of the binding elements of the investment strategy used to select the investments for attaining the environmental and/or social characteristics promoted and the assessment methodology for determining whether and to what extent assets and indicators met the defined ESG standards.

The ESG ratios are calculated based on the valuation prices for the assets, which are recorded in the front office system. This can lead to slight variations from the other market prices presented in the annual report, which are taken from the fund accounting system.

Principal Adverse Impact		
PAII - 02. Carbon Footprint - EUR	The carbon footprint is expressed as tonnes of CO2 emissions per million EUR invested. The CO2 emissions of an issuer are normalised by its enterprise value including cash (EVIC)	534.8
PAII - 03. Carbon Intensity	Weighted average carbon intensity scope 1+2+3	985.35
PAII - 04. Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	9.74 %
PAII - 08. Emissions to water	Waste water discharged (metric tons) into surface waters as a result of industrial or manufacturing activities.	7.24
PAII - 10. Violations of UNGC principles and OECD Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0 % of assets
PAII - 14. Exposure to controversial weapons	Share of investments in investee companies involved in the manufacture or selling of controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0 % of assets

As of: December 30, 2022

The Principal Adverse Impact Indicators (PAII) are calculated on the basis of information available within DWS back-office and front-office systems, that are amongst others based on information sourced from external ESG data vendors. In case individual securities or issuers related to such securities do not have information related to an individual PAII, either through a lack of data availability or through the non-applicability of the PAII to that individual issuer or security, the PAII calculation methodology for individual indicators may consider such securities or issuers with a value of 0. For Target Fund investments, a “look-through” into target fund holdings is performed subject to data availability, amongst others related to reasonable actual information of target fund holdings as well as the related security or issuer information. The calculation methodology for the individual PAII indicators may change in subsequent reporting periods as a consequence of evolving market standards, a change of treatment of securities of specific instrument types (such as derivatives), an increase in data coverage or through regulatory clarifications.

DWS ESG-Assessment Scale

In the following assessment categories, the assets received one of six possible scores, with "A" being the best score and "F" being the worst score

Criteria	Involvement in controversial sectors ¹	Involvement in controversial weapons	Norm Assessment ⁸	ESG Quality Assessment	SDG-Assessment	Climate & Transition Risk Assessment
A	Non-involvement	Confirmed non-involvement	Confirmed no issues	True leader in ESG (≥ 87.5 DWS ESG score)	True SDG contributor (≥ 87.5 SDG score)	True climate leader (≥ 87.5 score)
B	Remote involvement	Alleged		ESG leader (75–87.5 DWS ESG score)	SDG contributor (75–87.5 SDG score)	Climate solution provider (75–87.5 score)
C	0% – 5%	Dual-Purpose ²	Violations of lesser degree	ESG upper midfield (50–75 DWS ESG score)	SDG upper midfield (50–75 SDG score)	Low transition risk (50–75 score)
D	5% – 10% (coal: 5% -15%)	Owning ³ /Owned ⁴		ESG lower midfield (25–50 DWS ESG score)	SDG lower midfield (25–50 SDG score)	Mod. transition risk (25–50 score)
E	10% – 25% (coal: 15% - 25%)	Component ⁵ producer	High severity or re-assessed highest severity ⁷	ESG laggard (12.5–25 DWS ESG score)	SDG obstructer (12.5–25 SDG score)	High transition risk (12.5–25 score)
F	≥ 25%	Weapon producer	Highest severity/global compact violation ⁸	True laggard in ESG (0–12.5 DWS ESG score)	Significant SDG obstructer (0–12.5 SDG score)	Excessive transition risk (0–12.5 score)

(1) Revenue share thresholds as per standard scheme. Sub-Granularity available. Thresholds can be individually set.

(2) Encompasses e.g., weapon-carrying systems such as combat aircraft that carry non-controversial weapons as well as controversial ones

(3) Owning more than 20% equity.

(4) Being owned by more than 50% of company involved in grade E or F.

(5) Single purpose key component.

(6) Includes ILO controversies as well as corporate governance and product issues.

(7) In its ongoing assessment, DWS takes into account the violation(s) of international standards – observed via data from ESG data vendors – such as the UN Global Compact, but also possible ESG data vendor errors identified, future expected developments of these violations as well as the willingness of the issuer to engage in dialogue regarding corporate decisions in this regard.

(8) An F-grade can be considered a reconfirmed violation of the United Nations Global Compact rule framework for corporate behavior.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund invested partially in sustainable investments according to article 2(17) SFDR. Such sustainable investments contributed to at least one of the UN SDGs that relate to environmental and/or social objectives, such as the following (non-exhaustive list):

- Goal 1: No poverty
- Goal 2: Zero hunger
- Goal 3: Good health and well-being
- Goal 4: Quality education
- Goal 5: Gender equality
- Goal 6: Clean water and Sanitation
- Goal 7: Affordable and clean energy
- Goal 10: Reduced inequality
- Goal 11: Sustainable cities and communities
- Goal 12: Responsible consumption
- Goal 13: Climate action
- Goal 14: Life below water
- Goal 15: Life on land

The extent of contribution to individual UN SDGs varied based on the actual investments in the portfolio.

DWS measured the contribution to the UN SDGs via its sustainability investment assessment which evaluated potential investments in relation to different criteria to conclude that an economic activity can be considered as sustainable. Via this assessment, the sub-fund management evaluated (1) whether an economic activity contributed to one or several of the UN SDGs, (2) whether the economic activity or other economic activities of that company significantly harmed any of these objectives (Do Not Significantly Harm (DNSH) assessment) and (3) whether the company as such was in line with the DWS safeguard assessment.

The sustainability investment assessment used data from multiple data providers, public sources and internal assessments (based on a defined assessment and classification methodology) to determine if an activity was sustainable. Activities that contributed positively to the UN SDGs were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). If a positive contribution was determined, the activity was considered sustainable if the company passed the DNSH assessment and complied with the DWS safeguard assessment (as detailed in the section “Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?”.)

The sub-fund did not commit to target a minimum proportion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The DNSH assessment was integral part of the sustainability investment assessment and evaluated whether an economic activity with a contribution to an UN SDG caused significant harm to any of these objectives. In case that a significant harm was identified, the economic activity failed the DNSH assessment and could not be considered as sustainable economic activity.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainability investment assessment systematically integrated all mandatory principal adverse indicators from Table 1 and relevant indicators from Tables 2 and 3 of Annex I of the Commission Delegated Regulation (EU) 2022/1288 supplementing the Sustainable Finance Disclosure Regulation (SFDR). Taking into account these adverse impacts, DWS established quantitative thresholds and/or qualitative values to determine if an investment significantly harmed any of the environmental or social objectives. These values were set based upon various external and internal factors, such as data availability or market developments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

As part of its sustainability investment assessment, DWS further evaluated through its safeguard assessment the alignment of a company with international norms. This included checks in relation to adherence to international norms, for example, the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the principles of the United Nations Global Compact and the standards of the International Labour Organization. Companies with assessed and reconfirmed highest violations of one of the international norms were considered as non-compliant to the safeguards and their economic activities could not be considered sustainable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund management considered the following principle adverse impacts on sustainability factors from Annex I of the Commission Delegated Regulation (EU) 2022/1288 supplementing the Sustainable Finance Disclosure Regulation:

- Carbon footprint (no. 2);
- GHG intensity of investee companies (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Emissions to water (no. 8);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

The above principal adverse impacts were considered at product level through the exclusion strategy for the sub-fund's assets that were aligned with environmental and social characteristics via the proprietary ESG assessment methodology as detailed in section "What actions have been taken to meet the environmental and/or social characteristics during the reference period?".

For sustainable investments, the principal adverse impacts were further considered in the DNSH assessment as described above in section "How were the indicators for adverse impacts on sustainability factors taken into account?".

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

This sub-fund invested 95.44% of its net assets in investments that were aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 18.08% of the sub-fund's assets qualified as sustainable investments (#1A Sustainable).

4.56% of the investments were not aligned with these characteristics (#2 Other). A more detailed description of the specific asset allocation of this sub-fund can be found in the Special Section of the Sales Prospectus.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

db Advisory Multibrands – DWS ESG Eurozone Bonds Flexible

Breakdown by sector / issuer	in % of portfolio volume
Companies	58,48 %
Central governments	26,26 %
Regional governments	1,91 %
Fixed Income funds	7,91 %
Exposure to companies active in the fossil fuel sector	9,74 %

As of: December 31, 2022

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities

Directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

Are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

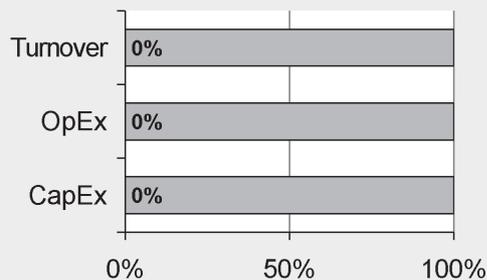

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

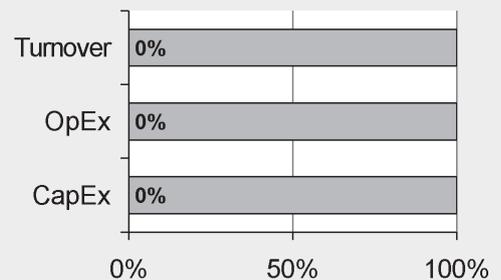

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

■ Taxonomy-aligned 0.00%
 ■ Non Taxonomy-aligned 100.00%

2. Taxonomy-alignment of investments excluding sovereign bonds*

■ Taxonomy-aligned 0.00%
 ■ Non Taxonomy-aligned 100.00%

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Due to a lack of reliable data the sub-fund did not commit to invest a minimum proportion of sustainable investments with an environmental objective aligned with the EU Taxonomy. Therefore, the percentage of environmentally sustainable investments aligned with the EU Taxonomy was 0% of the sub-fund's net assets. However, there may have been instances in which part of the investments' underlying economic activities were aligned with the EU Taxonomy.

What was the share of investments made in transitional and enabling activities?

The sub-fund did not have a minimum share of investments in transitional and enabling activities, as it did not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/85.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy

The sub-fund did not intend to make a minimum allocation to environmentally or socially sustainable investments pursuant to Article 2(17) SFDR. However, the share of environmentally and socially sustainable investments in total was 18.08% of the net assets of the sub-fund.

What was the share of socially sustainable investments?

The sub-fund did not intend to make a minimum allocation to environmentally or socially sustainable investments pursuant to Article 2(17) SFDR. However, the share of environmentally and socially sustainable investments in total was 18.08% of the net assets of the sub-fund.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

This sub-fund promoted a predominant asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics). In addition, and on an ancillary basis, this sub-fund invested into investments that are not considered aligned with the promoted characteristics (#2 Other). These remaining investments could include all asset classes as foreseen in the specific investment policy including cash and derivatives.

In line with the market positioning of this sub-fund, the purpose of these remaining investments was to provide investors with an exposure to non-ESG aligned investments while at the same time ensuring a predominant exposure to environmentally and socially aligned investments. Remaining investments could be used by the portfolio management for performance, diversification, liquidity and hedging purposes.

This sub-fund did not consider any minimum environmental or social safeguards on these remaining investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This sub-fund pursued a strategy based on bonds as main investment strategy. The sub-fund should acquire securities denominated in EUR or hedged against the EUR. In doing so, at least 51% should be on government bonds, corporate bonds and covered bonds, which had investment grade status at the time of their acquisition. Furthermore, the sub-fund invested in funds managed by the sub-fund manager and affiliates of the Deutsche Bank Group. The sub-fund manager could also invest up to 40% of the Portfolio in other collective investment schemes. The sub-fund's investments in asset-backed securities and subordinate bonds were limited to 20% of the sub-fund's assets in each case.

Further details regarding the main investment strategy are specified in the Special Section of the Sales Prospectus.

The sub-fund's assets were predominantly allocated into investments that complied with the defined standards in respect to the promoted environmental and social characteristics as described in the following sections. The sub-fund's strategy in relation to the promoted environmental or social characteristics was integral part of the ESG assessment methodology, which was continuously monitored via the sub-fund's investment guidelines.

ESG assessment methodology

The portfolio management of this sub-fund sought to attain the promoted environmental and social characteristics by assessing potential investments via a proprietary ESG assessment methodology irrespective of economic prospects of success. This methodology was based on the ESG database, which used data from multiple ESG data providers, public sources and internal assessments (based on a defined assessment and classification methodology) to derive combined scores. The ESG database was therefore constituted by data and figures as well as on internal assessments that took into account factors beyond the processed data and figures, such as an issuer's future expected ESG development, plausibility of the data with regard to past or future events, an issuer's willingness to engage in dialogues on ESG matters or corporate decisions.

The ESG database derived "A" to "F" letter coded assessments within different categories as further detailed below. Within each category, issuers received one of six possible scores, with "A" being the highest score and "F" being the lowest score. If an issuer's score in one category was deemed insufficient, the portfolio management was prohibited from investing in that issuer, even if it was eligible according to other categories. For exclusion purposes, each letter score in a category was considered individually and might have resulted in exclusion of an issuer.

The ESG database used a variety of assessment categories to assess the attainment of the promoted environmental and social characteristics, including amongst others:

• DWS Climate and Transition Risk Assessment

The DWS Climate and Transition Risk Assessment evaluated issuers in relation to climate change and environmental changes, e.g., in respect to greenhouse gas reduction and water conservation. Issuers that contributed less to climate change and other negative environmental changes or were less exposed to such risks received better evaluations. Issuers with excessive climate risk profile (i.e., a letter score of "F") were excluded as an investment. Issuers with high climate risk profile (i.e., a letter score of "E") were limited to 5% of the sub-fund's net assets.

• DWS Norm Assessment

The DWS Norm Assessment evaluated the behaviour of issuers, e.g., within the framework of the principles of the United Nations Global Compact, the standards of the International Labour Organization and behaviour within generally accepted international standards and principles. The Norm Assessment examined, e.g., human rights violations, violations of workers' rights, child or forced labour, adverse environmental impacts, and business ethics. Issuers with highest severity of norm issues (i.e., a letter score of "F") were excluded as an investment. Issuers with high severity of norm issues (i.e., a letter score of "E") were limited to 5% of the sub-fund's net assets.

• DWS ESG Quality Assessment

The DWS ESG Quality Assessment distinguished between corporate and sovereign issuers. For corporate issuers, the DWS ESG Quality Assessment allowed for a peer group comparison based on cross vendor consensus on overall ESG assessment (best-in-class approach), for example concerning the handling of environmental changes, product safety, employee management or corporate ethics. The peer group was composed of issuers from the same sector in the same region. Issuers rated better in this peer group comparison received a better score, while issuers rated worse in the comparison received a worse score. Corporate issuers rated poorly compared to their peer group (i.e., a letter score of "E" or "F") were excluded as an investment.

For sovereign issuers, the DWS ESG Quality Assessment evaluated a countries' governance from a

holistic perspective taking into account, among other things, the assessment of political and civil liberties. Sovereign issuers with high or excessive controversies regarding governance (i.e., a letter score of “E” or “F”) were excluded as an investment. Further, issuers with a letter score of “D” in the DWS ESG Quality Assessment were limited to 15% of the sub-fund’s net assets.

• **Exposure to controversial sectors**

The ESG database defined certain business areas and business activities as relevant. Business areas and business activities were defined as relevant if they involve the production or distribution of products in a controversial area (“controversial sectors”). Controversial sectors were defined, for example, as the civil firearms industry, military defence, tobacco and adult entertainment. Other business sectors and business activities that affect the production or distribution of products in other sectors were defined as relevant. Other relevant sectors were, for example, nuclear energy or coal mining and coal-based power generation.

Issuers were evaluated according to the share of total revenues they generate in controversial business areas and controversial business activities. The lower the percentage of revenues from the controversial business areas and controversial business activities, the better the score. Issuers (excluding target funds) with a moderate, high or excessive exposure (i.e., a letter score of “D”, “E” or “F”) were excluded as an investment. As regards the involvement in coal mining and coal-based power generation, issuers (excluding target funds) with high or excessive exposure (i.e., a letter score of “E” or “F”) were excluded as an investment.

• **Involvement in controversial weapons**

The ESG database assessed a company’s involvement in the business of controversial weapons. Controversial weapons include for example anti-personnel mines, cluster munitions, depleted uranium weapons, nuclear weapons, chemical and biological weapons.

Issuers were assessed based on their degree of involvement (production of controversial weapons, component production, etc.) in the manufacturing of controversial weapons, regardless of total revenues they generate from controversial weapons. Issuers (with the exception of target funds) with medium, high or excessive involvement (i.e., a letter score of “D”, “E” or “F”) were excluded as an investment.

To the extent that the sub-fund sought to attain the promoted environmental and social characteristics as well as corporate governance practices by means of an investment in target funds, the latter had to meet the DWS standards on Climate and Transition Risk-, Norm- and DWS ESG Quality Assessment (excluding the assessment of sovereigns) outlined above.

Derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund and were therefore not taken into account for the calculation of the minimum share of assets complying with these characteristics. However, derivatives on individual issuers may have been acquired for the sub-fund if the issuers of the underlying complied with the ESG assessment methodology.

Ancillary liquid assets were not evaluated via the ESG assessment methodology.

Sustainability investment assessment methodology

Further, for the proportion of sustainable investments DWS measured the contribution to one or several UN SDGs via its sustainability investment assessment which evaluated potential investments in relation to different criteria to conclude that an economic activity could be considered as sustainable as further detailed in section “What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?”

The applied ESG investment strategy did not pursue a committed minimum reduction of the scope of the investments.

The procedure to assess the good governance practices of the investee companies was based on the DWS Norm Assessment. Accordingly, the assessed investee companies followed good governance practices.

Further, the management company considered active ownership as a strong driver to improve governance, policies and practices, and thus for a better long-term performance of investee companies. Active ownership meant using the position as shareholders to influence the activities or behaviour of the investee companies. An engagement activity could have been initiated with the investee companies regarding matters such as strategy, financial and non-financial performance, risk, capital structure, social and environmental impact as well as corporate governance including topics like disclosure, culture and remuneration. The engagement activity could have been undertaken via,

e.g., issuer meetings or engagement letters. Furthermore, for equity investments it could also be an interaction with the company resulting from proxy voting activities or participation at general meetings.

How did this financial product perform compared to the reference sustainable benchmark?

This sub-fund had not designated a reference benchmark to determine whether it was aligned with the environmental and/or social characteristics that it promoted.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: db Advisory Multibrands - DWS StepIn ESG Global Equities

<input type="checkbox"/>	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund promoted environmental and social characteristics related to climate, governance and social norms as well as general ESG quality through the avoidance of issuers (1) exposed to high or excessive climate and transition risks, (2) exposed to high or highest severity of norm issues (i.e. as regards compliance with international standards of corporate governance, human rights and labour rights, customer and environment safety and business ethics), (3) exposed to high or excessive environmental, social and governance risks compared to their peer group, (4) moderately, highly or excessively exposed to controversial sectors and controversial activities, and/or (5) involved in controversial weapons.

This sub-fund further promoted a minimum proportion of sustainable investments with a positive contribution to one or several of the United Nations Sustainable Development Goals (UN SDGs). This sub-fund had not designated a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted.

No derivatives were used to attain the environmental or social characteristics promoted by the sub-fund.

How did the sustainability indicators perform?

Please see the section entitled “What actions have been taken to meet the environmental and/or social characteristics during the reference period?” for detailed descriptions of the binding elements of the investment strategy used to select the investments for attaining the environmental and/or social characteristics promoted and the assessment methodology for determining whether and to what extent assets and indicators met the defined ESG standards.

The ESG ratios are calculated based on the valuation prices for the assets, which are recorded in the front office system. This can lead to slight variations from the other market prices presented in the annual report, which are taken from the fund accounting system.

Principal Adverse Impact		
PAII - 02. Carbon Footprint - EUR	The carbon footprint is expressed as tonnes of CO2 emissions per million EUR invested. The CO2 emissions of an issuer are normalised by its enterprise value including cash (EVIC)	273.08
PAII - 03. Carbon Intensity	Weighted average carbon intensity scope 1+2+3	790.52
PAII - 04. Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	9.05 %
PAII - 08. Emissions to water	Waste water discharged (metric tons) into surface waters as a result of industrial or manufacturing activities.	63.79
PAII - 10. Violations of UNGC principles and OECD Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.03 % of assets
PAII - 14. Exposure to controversial weapons	Share of investments in investee companies involved in the manufacture or selling of controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0 % of assets

As of: December 30, 2022

The Principal Adverse Impact Indicators (PAII) are calculated on the basis of information available within DWS back-office and front-office systems, that are amongst others based on information sourced from external ESG data vendors. In case individual securities or issuers related to such securities do not have information related to an individual PAII, either through a lack of data availability or through the non-applicability of the PAII to that individual issuer or security, the PAII calculation methodology for individual indicators may consider such securities or issuers with a value of 0. For Target Fund investments, a “look-through” into target fund holdings is performed subject to data availability, amongst others related to reasonable actual information of target fund holdings as well as the related security or issuer information. The calculation methodology for the individual PAII indicators may change in subsequent reporting periods as a consequence of evolving market standards, a change of treatment of securities of specific instrument types (such as derivatives), an increase in data coverage or through regulatory clarifications.

DWS ESG-Assessment Scale

In the following assessment categories, the assets received one of six possible scores, with "A" being the best score and "F" being the worst score

Criteria	Involvement in controversial sectors ¹	Involvement in controversial weapons	Norm Assessment ⁸	ESG Quality Assessment	SDG-Assessment	Climate & Transition Risk Assessment
A	Non-involvement	Confirmed non-involvement	Confirmed no issues	True leader in ESG (≥ 87.5 DWS ESG score)	True SDG contributor (≥ 87.5 SDG score)	True climate leader (≥ 87.5 score)
B	Remote involvement	Alleged		ESG leader (75–87.5 DWS ESG score)	SDG contributor (75–87.5 SDG score)	Climate solution provider (75–87.5 score)
C	0% – 5%	Dual-Purpose ²	Violations of lesser degree	ESG upper midfield (50–75 DWS ESG score)	SDG upper midfield (50–75 SDG score)	Low transition risk (50–75 score)
D	5% – 10% (coal: 5% -15%)	Owning ³ /Owned ⁴		ESG lower midfield (25–50 DWS ESG score)	SDG lower midfield (25–50 SDG score)	Mod. transition risk (25–50 score)
E	10% – 25% (coal: 15% - 25%)	Component ⁵ producer	High severity or re-assessed highest severity ⁷	ESG laggard (12.5–25 DWS ESG score)	SDG obstructer (12.5–25 SDG score)	High transition risk (12.5–25 score)
F	≥ 25%	Weapon producer	Highest severity/global compact violation ⁸	True laggard in ESG (0–12.5 DWS ESG score)	Significant SDG obstructer (0–12.5 SDG score)	Excessive transition risk (0–12.5 score)

(1) Revenue share thresholds as per standard scheme. Sub-Granularity available. Thresholds can be individually set.

(2) Encompasses e.g., weapon-carrying systems such as combat aircraft that carry non-controversial weapons as well as controversial ones

(3) Owning more than 20% equity.

(4) Being owned by more than 50% of company involved in grade E or F.

(5) Single purpose key component.

(6) Includes ILO controversies as well as corporate governance and product issues.

(7) In its ongoing assessment, DWS takes into account the violation(s) of international standards – observed via data from ESG data vendors – such as the UN Global Compact, but also possible ESG data vendor errors identified, future expected developments of these violations as well as the willingness of the issuer to engage in dialogue regarding corporate decisions in this regard.

(8) An F-grade can be considered a reconfirmed violation of the United Nations Global Compact rule framework for corporate behavior.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund invested partially in sustainable investments according to article 2(17) SFDR. Such sustainable investments contributed to at least one of the UN SDGs that relate to environmental and/or social objectives, such as the following (non-exhaustive list):

- Goal 1: No poverty
- Goal 2: Zero hunger
- Goal 3: Good health and well-being
- Goal 4: Quality education
- Goal 5: Gender equality
- Goal 6: Clean water and Sanitation
- Goal 7: Affordable and clean energy
- Goal 10: Reduced inequality
- Goal 11: Sustainable cities and communities
- Goal 12: Responsible consumption
- Goal 13: Climate action
- Goal 14: Life below water
- Goal 15: Life on land

The extent of contribution to individual UN SDGs varied based on the actual investments in the portfolio.

DWS measured the contribution to the UN SDGs via its sustainability investment assessment which evaluated potential investments in relation to different criteria to conclude that an economic activity can be considered as sustainable. Via this assessment, the sub-fund management evaluated (1) whether an economic activity contributed to one or several of the UN SDGs, (2) whether the economic activity or other economic activities of that company significantly harmed any of these objectives (Do Not Significantly Harm (DNSH) assessment) and (3) whether the company as such was in line with the DWS safeguard assessment.

The sustainability investment assessment used data from multiple data providers, public sources and internal assessments (based on a defined assessment and classification methodology) to determine if an activity was sustainable. Activities that contributed positively to the UN SDGs were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). If a positive contribution was determined, the activity was considered sustainable if the company passed the DNSH assessment and complied with the DWS safeguard assessment (as detailed in the section “Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?”.)

The sub-fund did not commit to target a minimum proportion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The DNSH assessment was integral part of the sustainability investment assessment and evaluated whether an economic activity with a contribution to an UN SDG caused significant harm to any of these objectives. In case that a significant harm was identified, the economic activity failed the DNSH assessment and could not be considered as sustainable economic activity.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainability investment assessment systematically integrated all mandatory principal adverse indicators from Table 1 and relevant indicators from Tables 2 and 3 of Annex I of the Commission Delegated Regulation (EU) 2022/1288 supplementing the Sustainable Finance Disclosure Regulation (SFDR). Taking into account these adverse impacts, DWS established quantitative thresholds and/or qualitative values to determine if an investment significantly harmed any of the environmental or social objectives. These values were set based upon various external and internal factors, such as data availability or market developments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

As part of its sustainability investment assessment, DWS further evaluated through its safeguard assessment the alignment of a company with international norms. This included checks in relation to adherence to international norms, for example, the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the principles of the United Nations Global Compact and the standards of the International Labour Organization. Companies with assessed and reconfirmed highest violations of one of the international norms were considered as non-compliant to the safeguards and their economic activities could not be considered sustainable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund management considered the following principle adverse impacts on sustainability factors from Annex I of the Commission Delegated Regulation (EU) 2022/1288 supplementing the Sustainable Finance Disclosure Regulation:

- Carbon footprint (no. 2);
- GHG intensity of investee companies (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Emissions to water (no. 8);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

The above principal adverse impacts were considered at product level through the exclusion strategy for the sub-fund's assets that were aligned with environmental and social characteristics via the proprietary ESG assessment methodology as detailed in section "What actions have been taken to meet the environmental and/or social characteristics during the reference period?".

For sustainable investments, the principal adverse impacts were further considered in the DNSH assessment as described above in section "How were the indicators for adverse impacts on sustainability factors taken into account?".

What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

This sub-fund invested 95.65% of its net assets in investments that were aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 18.93% of the sub-fund's assets qualified as sustainable investments (#1A Sustainable).

4.35% of the investments were not aligned with these characteristics (#2 Other). A more detailed description of the specific asset allocation of this sub-fund can be found in the Special Section of the Sales Prospectus.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

db Advisory Multibrands – DWS StepIn ESG Global Equities

Breakdown by sector / issuer	in % of portfolio volume
Fixed Income funds	55,40 %
Equity funds	39,38 %
Exposure to companies active in the fossil fuel sector	9,05 %

As of: December 31, 2022

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities

Directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

Are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

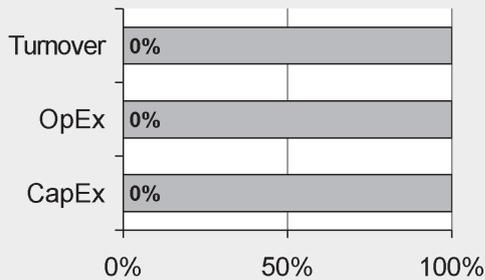

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

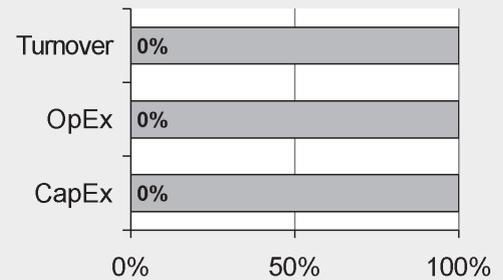

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

■ Taxonomy-aligned 0.00%
■ Non Taxonomy-aligned 100.00%

2. Taxonomy-alignment of investments excluding sovereign bonds*

■ Taxonomy-aligned 0.00%
■ Non Taxonomy-aligned 100.00%

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Due to a lack of reliable data the sub-fund did not commit to invest a minimum proportion of sustainable investments with an environmental objective aligned with the EU Taxonomy. Therefore, the percentage of environmentally sustainable investments aligned with the EU Taxonomy was 0% of the sub-fund's net assets. However, there may have been instances in which part of the investments' underlying economic activities were aligned with the EU Taxonomy.

What was the share of investments made in transitional and enabling activities?

The sub-fund did not have a minimum share of investments in transitional and enabling activities, as it did not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/85.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy

The sub-fund did not intend to make a minimum allocation to environmentally or socially sustainable investments pursuant to Article 2(17) SFDR. However, the share of environmentally and socially sustainable investments in total was 18.93% of the net assets of the sub-fund.

What was the share of socially sustainable investments?

The sub-fund did not intend to make a minimum allocation to environmentally or socially sustainable investments pursuant to Article 2(17) SFDR. However, the share of environmentally and socially sustainable investments in total was 18.93% of the net assets of the sub-fund.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

This sub-fund promoted a predominant asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics). In addition, and on an ancillary basis, this sub-fund invested into investments that are not considered aligned with the promoted characteristics (#2 Other). These remaining investments could include all asset classes as foreseen in the specific investment policy including cash and derivatives.

In line with the market positioning of this sub-fund, the purpose of these remaining investments was to provide investors with an exposure to non-ESG aligned investments while at the same time ensuring a predominant exposure to environmentally and socially aligned investments. Remaining investments could be used by the portfolio management for performance, diversification, liquidity and hedging purposes.

This sub-fund did not consider any minimum environmental or social safeguards on these remaining investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This sub-fund pursued a strategy based on multiple asset classes as main investment strategy. The sub-fund was invested globally in fixed income assets such as interest-bearing securities, convertible bonds, money-market instruments, bank balances as well as equities and/or securities equivalent to equities. Investment in Fixed Income Assets and Equities were mainly held indirectly through investment funds. Derivatives were used for efficient portfolio management purposes, mainly to hedge foreign currency risks. At the launch date, the sub-fund's assets were predominantly be invested in Fixed Income Assets, mainly held through at least six investment funds. The portfolio management intended to decrease the respective proportion of Fixed Income Assets step-by-step over a five-year period and simultaneously increase the respective proportion invested into Equities to at least 95%.

Further details regarding the main investment strategy are specified in the Special Section of the Sales Prospectus.

The sub-fund's assets were predominantly allocated into investments that complied with the defined standards in respect to the promoted environmental and social characteristics as described in the following sections. The sub-fund's strategy in relation to the promoted environmental or social characteristics was integral part of the ESG assessment methodology, which was continuously monitored via the sub-fund's investment guidelines.

ESG assessment methodology

The portfolio management of this sub-fund sought to attain the promoted environmental and social characteristics by assessing potential investments via a proprietary ESG assessment methodology irrespective of economic prospects of success. This methodology was based on the ESG database, which used data from multiple ESG data providers, public sources and internal assessments (based on a defined assessment and classification methodology) to derive combined scores. The ESG database was therefore constituted by data and figures as well as on internal assessments that took into account factors beyond the processed data and figures, such as an issuer's future expected ESG development, plausibility of the data with regard to past or future events, an issuer's willingness to engage in dialogues on ESG matters or corporate decisions.

The ESG database derived "A" to "F" letter coded assessments within different categories as further detailed below. Within each category, issuers received one of six possible scores, with "A" being the highest score and "F" being the lowest score. If an issuer's score in one category was deemed insufficient, the portfolio management was prohibited from investing in that issuer, even if it was eligible according to other categories. For exclusion purposes, each letter score in a category was considered individually and might have resulted in exclusion of an issuer.

The ESG database used a variety of assessment categories to assess the attainment of the promoted environmental and social characteristics, including amongst others:

• DWS Climate and Transition Risk Assessment

The DWS Climate and Transition Risk Assessment evaluated issuers in relation to climate change and environmental changes, e.g., in respect to greenhouse gas reduction and water conservation. Issuers that contributed less to climate change and other negative environmental changes or were less exposed to such risks received better evaluations. Issuers with excessive climate risk profile (i.e., a letter score of "F") were excluded as an investment. Issuers with high climate risk profile (i.e., a letter score of "E") were limited to 5% of the sub-fund's net assets.

• DWS Norm Assessment

The DWS Norm Assessment evaluated the behaviour of issuers, e.g., within the framework of the principles of the United Nations Global Compact, the standards of the International Labour Organization and behaviour within generally accepted international standards and principles. The Norm Assessment examined, e.g., human rights violations, violations of workers' rights, child or forced labour, adverse environmental impacts, and business ethics. Issuers with highest severity of norm issues (i.e., a letter score of "F") were excluded as an investment. Issuers with high severity of norm issues (i.e., a letter score of "E") were limited to 5% of the sub-fund's net assets.

• DWS ESG Quality Assessment

The DWS ESG Quality Assessment distinguished between corporate and sovereign issuers. For corporate issuers, the DWS ESG Quality Assessment allowed for a peer group comparison based on cross vendor consensus on overall ESG assessment (best-in-class approach), for example concerning the handling of environmental changes, product safety, employee management or corporate ethics. The peer group was composed of issuers from the same sector in the same region. Issuers rated better in this peer group comparison received a better score, while issuers rated worse in the comparison received a worse score. Corporate issuers rated poorly compared to their peer

group (i.e., a letter score of “E” or “F”) were excluded as an investment. For sovereign issuers, the DWS ESG Quality Assessment evaluated a countries’ governance from a holistic perspective taking into account, among other things, the assessment of political and civil liberties. Sovereign issuers with high or excessive controversies regarding governance (i.e., a letter score of “E” or “F”) were excluded as an investment. Further, issuers with a letter score of “D” in the DWS ESG Quality Assessment were limited to 15% of the sub-fund’s net assets.

• **Exposure to controversial sectors**

The ESG database defined certain business areas and business activities as relevant. Business areas and business activities were defined as relevant if they involve the production or distribution of products in a controversial area (“controversial sectors”). Controversial sectors were defined, for example, as the civil firearms industry, military defence, tobacco and adult entertainment. Other business sectors and business activities that affect the production or distribution of products in other sectors were defined as relevant. Other relevant sectors were, for example, nuclear energy or coal mining and coal-based power generation.

Issuers were evaluated according to the share of total revenues they generate in controversial business areas and controversial business activities. The lower the percentage of revenues from the controversial business areas and controversial business activities, the better the score. Issuers (excluding target funds) with a moderate, high or excessive exposure (i.e., a letter score of “D”, “E” or “F”) were excluded as an investment. As regards the involvement in coal mining and coal-based power generation, issuers (excluding target funds) with high or excessive exposure (i.e., a letter score of “E” or “F”) were excluded as an investment.

• **Involvement in controversial weapons**

The ESG database assessed a company’s involvement in the business of controversial weapons. Controversial weapons include for example anti-personnel mines, cluster munitions, depleted uranium weapons, nuclear weapons, chemical and biological weapons.

Issuers were assessed based on their degree of involvement (production of controversial weapons, component production, etc.) in the manufacturing of controversial weapons, regardless of total revenues they generate from controversial weapons. Issuers (with the exception of target funds) with medium, high or excessive involvement (i.e., a letter score of “D”, “E” or “F”) were excluded as an investment.

To the extent that the sub-fund sought to attain the promoted environmental and social characteristics as well as corporate governance practices by means of an investment in target funds, the latter had to meet the DWS standards on Climate and Transition Risk-, Norm- and DWS ESG Quality Assessment (excluding the assessment of sovereigns) outlined above.

Derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund and were therefore not taken into account for the calculation of the minimum share of assets complying with these characteristics. However, derivatives on individual issuers may have been acquired for the sub-fund if the issuers of the underlying complied with the ESG assessment methodology.

Ancillary liquid assets were not evaluated via the ESG assessment methodology.

Sustainability investment assessment methodology

Further, for the proportion of sustainable investments DWS measured the contribution to one or several UN SDGs via its sustainability investment assessment which evaluated potential investments in relation to different criteria to conclude that an economic activity could be considered as sustainable as further detailed in section “What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?”

The applied ESG investment strategy did not pursue a committed minimum reduction of the scope of the investments.

The procedure to assess the good governance practices of the investee companies was based on the DWS Norm Assessment. Accordingly, the assessed investee companies followed good governance practices.

Further, the management company considered active ownership as a strong driver to improve governance, policies and practices, and thus for a better long-term performance of investee companies. Active ownership meant using the position as shareholders to influence the activities or behaviour of the investee companies. An engagement activity could have been initiated with the investee companies regarding matters such as strategy, financial and non-financial performance, risk, capital structure, social and environmental impact as well as corporate governance including topics like disclosure, culture and remuneration. The engagement activity could have been undertaken via,

e.g., issuer meetings or engagement letters. Furthermore, for equity investments it could also be an interaction with the company resulting from proxy voting activities or participation at general meetings.

How did this financial product perform compared to the reference sustainable benchmark?

This sub-fund had not designated a reference benchmark to determine whether it was aligned with the environmental and/or social characteristics that it promoted.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: db Advisory Multibrands - DWS StepIn ESG Thematic Equities

Legal entity identifier: 254900JCZXJMXWEGWC87

ISIN: LU2382954837

<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund promoted environmental and social characteristics related to climate, governance and social norms as well as general ESG quality through the avoidance of issuers (1) exposed to high or excessive climate and transition risks, (2) exposed to high or highest severity of norm issues (i.e. as regards compliance with international standards of corporate governance, human rights and labour rights, customer and environment safety and business ethics), (3) exposed to high or excessive environmental, social and governance risks compared to their peer group, (4) moderately, highly or excessively exposed to controversial sectors and controversial activities, and/or (5) involved in controversial weapons.

This sub-fund further promoted a minimum proportion of sustainable investments with a positive contribution to one or several of the United Nations Sustainable Development Goals (UN SDGs). This sub-fund had not designated a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted.

No derivatives were used to attain the environmental or social characteristics promoted by the sub-fund.

How did the sustainability indicators perform?

Please see the section entitled “What actions have been taken to meet the environmental and/or social characteristics during the reference period?” for detailed descriptions of the binding elements of the investment strategy used to select the investments for attaining the environmental and/or social characteristics promoted and the assessment methodology for determining whether and to what extent assets and indicators met the defined ESG standards.

The ESG ratios are calculated based on the valuation prices for the assets, which are recorded in the front office system. This can lead to slight variations from the other market prices presented in the annual report, which are taken from the fund accounting system.

Principal Adverse Impact		
PAII - 02. Carbon Footprint - EUR	The carbon footprint is expressed as tonnes of CO2 emissions per million EUR invested. The CO2 emissions of an issuer are normalised by its enterprise value including cash (EVIC)	388.27
PAII - 03. Carbon Intensity	Weighted average carbon intensity scope 1+2+3	873.46
PAII - 04. Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	10.42 %
PAII - 08. Emissions to water	Waste water discharged (metric tons) into surface waters as a result of industrial or manufacturing activities.	39.02
PAII - 10. Violations of UNGC principles and OECD Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0 % of assets
PAII - 14. Exposure to controversial weapons	Share of investments in investee companies involved in the manufacture or selling of controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0 % of assets

As of: December 30, 2022

The Principal Adverse Impact Indicators (PAII) are calculated on the basis of information available within DWS back-office and front-office systems, that are amongst others based on information sourced from external ESG data vendors. In case individual securities or issuers related to such securities do not have information related to an individual PAII, either through a lack of data availability or through the non-applicability of the PAII to that individual issuer or security, the PAII calculation methodology for individual indicators may consider such securities or issuers with a value of 0. For Target Fund investments, a “look-through” into target fund holdings is performed subject to data availability, amongst others related to reasonable actual information of target fund holdings as well as the related security or issuer information. The calculation methodology for the individual PAII indicators may change in subsequent reporting periods as a consequence of evolving market standards, a change of treatment of securities of specific instrument types (such as derivatives), an increase in data coverage or through regulatory clarifications.

DWS ESG-Assessment Scale

In the following assessment categories, the assets received one of six possible scores, with "A" being the best score and "F" being the worst score

Criteria	Involvement in controversial sectors ¹	Involvement in controversial weapons	Norm Assessment ⁸	ESG Quality Assessment	SDG-Assessment	Climate & Transition Risk Assessment
A	Non-involvement	Confirmed non-involvement	Confirmed no issues	True leader in ESG (≥ 87.5 DWS ESG score)	True SDG contributor (≥ 87.5 SDG score)	True climate leader (≥ 87.5 score)
B	Remote involvement	Alleged		ESG leader (75–87.5 DWS ESG score)	SDG contributor (75–87.5 SDG score)	Climate solution provider (75–87.5 score)
C	0% – 5%	Dual-Purpose ²	Violations of lesser degree	ESG upper midfield (50–75 DWS ESG score)	SDG upper midfield (50–75 SDG score)	Low transition risk (50–75 score)
D	5% – 10% (coal: 5% -15%)	Owning ³ /Owned ⁴		ESG lower midfield (25–50 DWS ESG score)	SDG lower midfield (25–50 SDG score)	Mod. transition risk (25–50 score)
E	10% – 25% (coal: 15% - 25%)	Component ⁵ producer	High severity or re-assessed highest severity ⁷	ESG laggard (12.5–25 DWS ESG score)	SDG obstructer (12.5–25 SDG score)	High transition risk (12.5–25 score)
F	≥ 25%	Weapon producer	Highest severity/global compact violation ⁸	True laggard in ESG (0–12.5 DWS ESG score)	Significant SDG obstructer (0–12.5 SDG score)	Excessive transition risk (0–12.5 score)

(1) Revenue share thresholds as per standard scheme. Sub-Granularity available. Thresholds can be individually set.

(2) Encompasses e.g., weapon-carrying systems such as combat aircraft that carry non-controversial weapons as well as controversial ones

(3) Owning more than 20% equity.

(4) Being owned by more than 50% of company involved in grade E or F.

(5) Single purpose key component.

(6) Includes ILO controversies as well as corporate governance and product issues.

(7) In its ongoing assessment, DWS takes into account the violation(s) of international standards – observed via data from ESG data vendors – such as the UN Global Compact, but also possible ESG data vendor errors identified, future expected developments of these violations as well as the willingness of the issuer to engage in dialogue regarding corporate decisions in this regard.

(8) An F-grade can be considered a reconfirmed violation of the United Nations Global Compact rule framework for corporate behavior.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund invested partially in sustainable investments according to article 2(17) SFDR. Such sustainable investments contributed to at least one of the UN SDGs that relate to environmental and/or social objectives, such as the following (non-exhaustive list):

- Goal 1: No poverty
- Goal 2: Zero hunger
- Goal 3: Good health and well-being
- Goal 4: Quality education
- Goal 5: Gender equality
- Goal 6: Clean water and Sanitation
- Goal 7: Affordable and clean energy
- Goal 10: Reduced inequality
- Goal 11: Sustainable cities and communities
- Goal 12: Responsible consumption
- Goal 13: Climate action
- Goal 14: Life below water
- Goal 15: Life on land

The extent of contribution to individual UN SDGs varied based on the actual investments in the portfolio.

DWS measured the contribution to the UN SDGs via its sustainability investment assessment which evaluated potential investments in relation to different criteria to conclude that an economic activity can be considered as sustainable. Via this assessment, the sub-fund management evaluated (1) whether an economic activity contributed to one or several of the UN SDGs, (2) whether the economic activity or other economic activities of that company significantly harmed any of these objectives (Do Not Significantly Harm (DNSH) assessment) and (3) whether the company as such was in line with the DWS safeguard assessment.

The sustainability investment assessment used data from multiple data providers, public sources and internal assessments (based on a defined assessment and classification methodology) to determine if an activity was sustainable. Activities that contributed positively to the UN SDGs were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). If a positive contribution was determined, the activity was considered sustainable if the company passed the DNSH assessment and complied with the DWS safeguard assessment (as detailed in the section “Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?”.)

The sub-fund did not commit to target a minimum proportion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The DNSH assessment was integral part of the sustainability investment assessment and evaluated whether an economic activity with a contribution to an UN SDG caused significant harm to any of these objectives. In case that a significant harm was identified, the economic activity failed the DNSH assessment and could not be considered as sustainable economic activity.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainability investment assessment systematically integrated all mandatory principal adverse indicators from Table 1 and relevant indicators from Tables 2 and 3 of Annex I of the Commission Delegated Regulation (EU) 2022/1288 supplementing the Sustainable Finance Disclosure Regulation (SFDR). Taking into account these adverse impacts, DWS established quantitative thresholds and/or qualitative values to determine if an investment significantly harmed any of the environmental or social objectives. These values were set based upon various external and internal factors, such as data availability or market developments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

As part of its sustainability investment assessment, DWS further evaluated through its safeguard assessment the alignment of a company with international norms. This included checks in relation to adherence to international norms, for example, the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the principles of the United Nations Global Compact and the standards of the International Labour Organization. Companies with assessed and reconfirmed highest violations of one of the international norms were considered as non-compliant to the safeguards and their economic activities could not be considered sustainable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund management considered the following principle adverse impacts on sustainability factors from Annex I of the Commission Delegated Regulation (EU) 2022/1288 supplementing the Sustainable Finance Disclosure Regulation:

- Carbon footprint (no. 2);
- GHG intensity of investee companies (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Emissions to water (no. 8);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

The above principal adverse impacts were considered at product level through the exclusion strategy for the sub-fund's assets that were aligned with environmental and social characteristics via the proprietary ESG assessment methodology as detailed in section "What actions have been taken to meet the environmental and/or social characteristics during the reference period?".

For sustainable investments, the principal adverse impacts were further considered in the DNSH assessment as described above in section "How were the indicators for adverse impacts on sustainability factors taken into account?".

What were the top investments of this financial product?

for the period from January 01, 2022, through December 30, 2022

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:
for the period from January 01, 2022, through December 31, 2022

What was the proportion of sustainability-related investments?

Asset allocation

describes the share of investments in specific assets.

What was the asset allocation?

This sub-fund invested 94.77% of its net assets in investments that were aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 18.79% of the sub-fund's assets qualified as sustainable investments (#1A Sustainable).

5.23% of the investments were not aligned with these characteristics (#2 Other). A more detailed description of the specific asset allocation of this sub-fund can be found in the Special Section of the Sales Prospectus.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

db Advisory Multibrands – DWS StepIn ESG Thematic Equities

Breakdown by sector / issuer	in % of portfolio volume
Fixed Income funds	60,55 %
Equity funds	32,48 %
Exposure to companies active in the fossil fuel sector	10,42 %

As of: December 31, 2022

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities

Directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

Are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

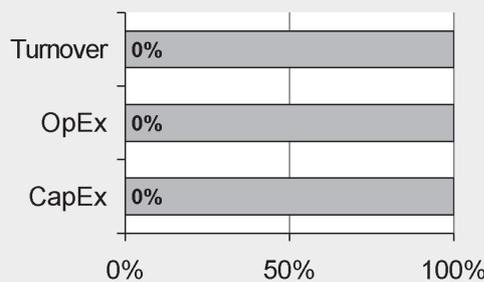

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure (OpEx)** reflecting the green operational activities of investee companies.

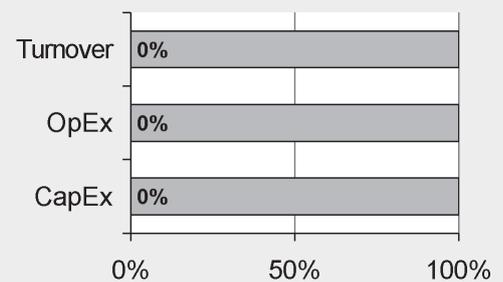

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

■ Taxonomy-aligned 0.00%
■ Non Taxonomy-aligned 100.00%

2. Taxonomy-alignment of investments excluding sovereign bonds*

■ Taxonomy-aligned 0.00%
■ Non Taxonomy-aligned 100.00%

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Due to a lack of reliable data the sub-fund did not commit to invest a minimum proportion of sustainable investments with an environmental objective aligned with the EU Taxonomy. Therefore, the percentage of environmentally sustainable investments aligned with the EU Taxonomy was 0% of the sub-fund's net assets. However, there may have been instances in which part of the investments' underlying economic activities were aligned with the EU Taxonomy.

What was the share of investments made in transitional and enabling activities?

The sub-fund did not have a minimum share of investments in transitional and enabling activities, as it did not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/85.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy

The sub-fund did not intend to make a minimum allocation to environmentally or socially sustainable investments pursuant to Article 2(17) SFDR. However, the share of environmentally and socially sustainable investments in total was 18.79% of the net assets of the sub-fund.

What was the share of socially sustainable investments?

The sub-fund did not intend to make a minimum allocation to environmentally or socially sustainable investments pursuant to Article 2(17) SFDR. However, the share of environmentally and socially sustainable investments in total was 18.79% of the net assets of the sub-fund.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

This sub-fund promoted a predominant asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics). In addition, and on an ancillary basis, this sub-fund invested into investments that are not considered aligned with the promoted characteristics (#2 Other). These remaining investments could include all asset classes as foreseen in the specific investment policy including cash and derivatives.

In line with the market positioning of this sub-fund, the purpose of these remaining investments was to provide investors with an exposure to non-ESG aligned investments while at the same time ensuring a predominant exposure to environmentally and socially aligned investments. Remaining investments could be used by the portfolio management for performance, diversification, liquidity and hedging purposes.

This sub-fund did not consider any minimum environmental or social safeguards on these remaining investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This sub-fund pursued a strategy based on multiple asset classes as main investment strategy. The sub-fund would invest globally in fixed income assets such as interest-bearing securities, convertible bonds, money-market instruments, bank balances as well as equities and/or securities equivalent to equities. Investment in fixed income assets and equities should be mainly held indirectly through investment funds. Derivatives might be used for efficient portfolio management purposes, mainly to hedge foreign currency risks. At the launch date, the sub-fund's assets should be predominantly invested in Fixed Income Assets, mainly held through at least six investment funds. The portfolio management intended to decrease the respective proportion of Fixed Income Assets step-by-step over a three-year period and simultaneously increase the respective proportion invested into Equities to at least 90%.

Further details regarding the main investment strategy are specified in the Special Section of the Sales Prospectus.

The sub-fund's assets were predominantly allocated into investments that complied with the defined standards in respect to the promoted environmental and social characteristics as described in the following sections. The sub-fund's strategy in relation to the promoted environmental or social characteristics was integral part of the ESG assessment methodology, which was continuously monitored via the sub-fund's investment guidelines.

ESG assessment methodology

The portfolio management of this sub-fund sought to attain the promoted environmental and social characteristics by assessing potential investments via a proprietary ESG assessment methodology irrespective of economic prospects of success. This methodology was based on the ESG database, which used data from multiple ESG data providers, public sources and internal assessments (based on a defined assessment and classification methodology) to derive combined scores. The ESG database was therefore constituted by data and figures as well as on internal assessments that took into account factors beyond the processed data and figures, such as an issuer's future expected ESG development, plausibility of the data with regard to past or future events, an issuer's willingness to engage in dialogues on ESG matters or corporate decisions.

The ESG database derived "A" to "F" letter coded assessments within different categories as further detailed below. Within each category, issuers received one of six possible scores, with "A" being the highest score and "F" being the lowest score. If an issuer's score in one category was deemed insufficient, the portfolio management was prohibited from investing in that issuer, even if it was eligible according to other categories. For exclusion purposes, each letter score in a category was considered individually and might have resulted in exclusion of an issuer.

The ESG database used a variety of assessment categories to assess the attainment of the promoted environmental and social characteristics, including amongst others:

• DWS Climate and Transition Risk Assessment

The DWS Climate and Transition Risk Assessment evaluated issuers in relation to climate change and environmental changes, e.g., in respect to greenhouse gas reduction and water conservation. Issuers that contributed less to climate change and other negative environmental changes or were less exposed to such risks received better evaluations. Issuers with excessive climate risk profile (i.e., a letter score of "F") were excluded as an investment. Issuers with high climate risk profile (i.e., a letter score of "E") were limited to 5% of the sub-fund's net assets.

• DWS Norm Assessment

The DWS Norm Assessment evaluated the behaviour of issuers, e.g., within the framework of the principles of the United Nations Global Compact, the standards of the International Labour Organization and behaviour within generally accepted international standards and principles. The Norm Assessment examined, e.g., human rights violations, violations of workers' rights, child or forced labour, adverse environmental impacts, and business ethics. Issuers with highest severity of norm issues (i.e., a letter score of "F") were excluded as an investment. Issuers with high severity of norm issues (i.e., a letter score of "E") were limited to 5% of the sub-fund's net assets.

• DWS ESG Quality Assessment

The DWS ESG Quality Assessment distinguished between corporate and sovereign issuers. For corporate issuers, the DWS ESG Quality Assessment allowed for a peer group comparison based on cross vendor consensus on overall ESG assessment (best-in-class approach), for example concerning the handling of environmental changes, product safety, employee management or corporate ethics. The peer group was composed of issuers from the same sector in the same region. Issuers rated better in this peer group comparison received a better score, while issuers rated worse

in the comparison received a worse score. Corporate issuers rated poorly compared to their peer group (i.e., a letter score of “E” or “F”) were excluded as an investment. For sovereign issuers, the DWS ESG Quality Assessment evaluated a countries’ governance from a holistic perspective taking into account, among other things, the assessment of political and civil liberties. Sovereign issuers with high or excessive controversies regarding governance (i.e., a letter score of “E” or “F”) were excluded as an investment. Further, issuers with a letter score of “D” in the DWS ESG Quality Assessment were limited to 15% of the sub-fund’s net assets.

• **Exposure to controversial sectors**

The ESG database defined certain business areas and business activities as relevant. Business areas and business activities were defined as relevant if they involve the production or distribution of products in a controversial area (“controversial sectors”). Controversial sectors were defined, for example, as the civil firearms industry, military defence, tobacco and adult entertainment. Other business sectors and business activities that affect the production or distribution of products in other sectors were defined as relevant. Other relevant sectors were, for example, nuclear energy or coal mining and coal-based power generation.

Issuers were evaluated according to the share of total revenues they generate in controversial business areas and controversial business activities. The lower the percentage of revenues from the controversial business areas and controversial business activities, the better the score. Issuers (excluding target funds) with a moderate, high or excessive exposure (i.e., a letter score of “D”, “E” or “F”) were excluded as an investment. As regards the involvement in coal mining and coal-based power generation, issuers (excluding target funds) with high or excessive exposure (i.e., a letter score of “E” or “F”) were excluded as an investment.

• **Involvement in controversial weapons**

The ESG database assessed a company’s involvement in the business of controversial weapons. Controversial weapons include for example anti-personnel mines, cluster munitions, depleted uranium weapons, nuclear weapons, chemical and biological weapons.

Issuers were assessed based on their degree of involvement (production of controversial weapons, component production, etc.) in the manufacturing of controversial weapons, regardless of total revenues they generate from controversial weapons. Issuers (with the exception of target funds) with medium, high or excessive involvement (i.e., a letter score of “D”, “E” or “F”) were excluded as an investment.

To the extent that the sub-fund sought to attain the promoted environmental and social characteristics as well as corporate governance practices by means of an investment in target funds, the latter had to meet the DWS standards on Climate and Transition Risk-, Norm- and DWS ESG Quality Assessment (excluding the assessment of sovereigns) outlined above.

Derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund and were therefore not taken into account for the calculation of the minimum share of assets complying with these characteristics. However, derivatives on individual issuers may have been acquired for the sub-fund if the issuers of the underlying complied with the ESG assessment methodology.

Ancillary liquid assets were not evaluated via the ESG assessment methodology.

Sustainability investment assessment methodology

Further, for the proportion of sustainable investments DWS measured the contribution to one or several UN SDGs via its sustainability investment assessment which evaluated potential investments in relation to different criteria to conclude that an economic activity could be considered as sustainable as further detailed in section “What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?”

The applied ESG investment strategy did not pursue a committed minimum reduction of the scope of the investments.

The procedure to assess the good governance practices of the investee companies was based on the DWS Norm Assessment. Accordingly, the assessed investee companies followed good governance practices.

Further, the management company considered active ownership as a strong driver to improve governance, policies and practices, and thus for a better long-term performance of investee companies. Active ownership meant using the position as shareholders to influence the activities or behaviour of the investee companies. An engagement activity could have been initiated with the investee companies regarding matters such as strategy, financial and non-financial performance, risk, capital structure, social and environmental impact as well as corporate governance including topics like disclosure, culture and remuneration. The engagement activity could have been undertaken via,

e.g., issuer meetings or engagement letters. Furthermore, for equity investments it could also be an interaction with the company resulting from proxy voting activities or participation at general meetings.

How did this financial product perform compared to the reference sustainable benchmark?

This sub-fund had not designated a reference benchmark to determine whether it was aligned with the environmental and/or social characteristics that it promoted.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: db Advisory Multibrands - DWS StepIn Global Equities Evolution

Legal entity identifier: 549300SO79QF1O4STR19

<input type="checkbox"/>	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund promoted environmental and social characteristics related to climate, governance and social norms as well as sovereign matters through the avoidance of (1) issuers exposed to excessive climate and transition risks, (2) issuers exposed to highest severity of norm issues (i.e. as regards compliance with international standards of corporate governance, human rights and labour rights, customer and environment safety and business ethics), (3) sovereign issuers with high or excessive controversies regarding political and civil liberties, (4) issuers moderately, highly or excessively exposed to controversial sectors and controversial activities, and/or (5) issuers involved in controversial weapons.

This sub-fund further promoted a minimum proportion of sustainable investments with a positive contribution to one or several of the United Nations Sustainable Development Goals (UN SDGs). This sub-fund had not designated a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted.

No derivatives were used to attain the environmental or social characteristics promoted by the sub-fund.

How did the sustainability indicators perform?

Please see the section entitled “What actions have been taken to meet the environmental and/or social characteristics during the reference period?” for detailed descriptions of the binding elements of the investment strategy used to select the investments for attaining the environmental and/or social characteristics promoted and the assessment methodology for determining whether and to what extent assets and indicators met the defined ESG standards.

The ESG ratios are calculated based on the valuation prices for the assets, which are recorded in the front office system. This can lead to slight variations from the other market prices presented in the annual report, which are taken from the fund accounting system.

Indicators	Description	Performance
Principal Adverse Impact		
PAII - 02. Carbon Footprint - EUR	The carbon footprint is expressed as tonnes of CO2 emissions per million EUR invested. The CO2 emissions of an issuer are normalised by its enterprise value including cash (EVIC)	381.66
PAII - 03. Carbon Intensity	Weighted average carbon intensity scope 1+2+3	1139.24
PAII - 04. Exposure to companies active in the fossil fuel sector	Share of investments in companies active in the fossil fuel sector	16.7 %
PAII - 10. Violations of UNGC principles and OECD Guidelines for Multinational Enterprises	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0 % of assets
PAII - 14. Exposure to controversial weapons	Share of investments in investee companies involved in the manufacture or selling of controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0 % of assets

As of: December 30, 2022

The Principal Adverse Impact Indicators (PAII) are calculated on the basis of information available within DWS back-office and front-office systems, that are amongst others based on information sourced from external ESG data vendors. In case individual securities or issuers related to such securities do not have information related to an individual PAII, either through a lack of data availability or through the non-applicability of the PAII to that individual issuer or security, the PAII calculation methodology for individual indicators may consider such securities or issuers with a value of 0. For Target Fund investments, a “look-through” into target fund holdings is performed subject to data availability, amongst others related to reasonable actual information of target fund holdings as well as the related security or issuer information. The calculation methodology for the individual PAII indicators may change in subsequent reporting periods as a consequence of evolving market standards, a change of treatment of securities of specific instrument types (such as derivatives), an increase in data coverage or through regulatory clarifications.

DWS ESG-Assessment Scale

In the following assessment categories, the assets received one of six possible scores, with “A” being the best score and “F” being the worst score

Criteria	Involvement in controversial sectors ¹	Involvement in controversial weapons	Norm Assessment ⁸	ESG Quality Assessment	SDG-Assessment	Climate & Transition Risk Assessment
A	Non-involvement	Confirmed non-involvement	Confirmed no issues	True leader in ESG (≥ 87.5 DWS ESG score)	True SDG contributor (≥ 87.5 SDG score)	True climate leader (≥ 87.5 score)
B	Remote involvement	Alleged		ESG leader (75–87.5 DWS ESG score)	SDG contributor (75–87.5 SDG score)	Climate solution provider (75–87.5 score)
C	0% – 5%	Dual-Purpose ²	Violations of lesser degree	ESG upper midfield (50–75 DWS ESG score)	SDG upper midfield (50–75 SDG score)	Low transition risk (50–75 score)
D	5% – 10% (coal: 5% -15%)	Owning ³ /Owned ⁴		ESG lower midfield (25–50 DWS ESG score)	SDG lower midfield (25–50 SDG score)	Mod. transition risk (25–50 score)
E	10% – 25% (coal: 15% - 25%)	Component ⁵ producer	High severity or re-assessed highest severity ⁷	ESG laggard (12.5–25 DWS ESG score)	SDG obstructer (12.5–25 SDG score)	High transition risk (12.5–25 score)
F	≥ 25%	Weapon producer	Highest severity/global compact violation ⁸	True laggard in ESG (0–12.5 DWS ESG score)	Significant SDG obstructer (0–12.5 SDG score)	Excessive transition risk (0–12.5 score)

- (1) Revenue share thresholds as per standard scheme. Sub-Granularity available. Thresholds can be individually set.
- (2) Encompasses e.g. weapon-carrying systems such as combat aircraft that carry non-controversial weapons as well as controversial ones
- (3) Owning more than 20% equity.
- (4) Being owned by more than 50% of company involved in grade E or F.
- (5) Single purpose key component.
- (6) Includes ILO controversies as well as corporate governance and product issues.
- (7) In its ongoing assessment, DWS takes into account the violation(s) of international standards – observed via data from ESG data vendors – such as the UN Global Compact, but also possible ESG data vendor errors identified, future expected developments of these violations as well as the willingness of the issuer to engage in dialogue regarding corporate decisions in this regard.
- (8) An F-grade can be considered a reconfirmed violation of the United Nations Global Compact rule framework for corporate behavior.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sub-fund invested partially in sustainable investments according to article 2(17) SFDR. Such sustainable investments contributed to at least one of the UN SDGs that relate to environmental and/or social objectives, such as the following (non-exhaustive list):

- Goal 1: No poverty
- Goal 2: Zero hunger
- Goal 3: Good health and well-being
- Goal 4: Quality education
- Goal 5: Gender equality
- Goal 6: Clean water and Sanitation
- Goal 7: Affordable and clean energy
- Goal 10: Reduced inequality
- Goal 11: Sustainable cities and communities
- Goal 12: Responsible consumption
- Goal 13: Climate action
- Goal 14: Life below water
- Goal 15: Life on land

The extent of contribution to individual UN SDGs varied based on the actual investments in the portfolio.

DWS measured the contribution to the UN SDGs via its sustainability investment assessment which evaluated potential investments in relation to different criteria to conclude that an economic activity can be considered as sustainable. Via this assessment, the sub-fund management evaluated (1) whether an economic activity contributed to one or several of the UN SDGs, (2) whether the economic activity or other economic activities of that company significantly harmed any of these objectives (Do Not Significantly Harm (DNSH) assessment) and (3) whether the company as such was in line with the DWS safeguard assessment.

The sustainability investment assessment used data from multiple data providers, public sources and internal assessments (based on a defined assessment and classification methodology) to determine if an activity was sustainable. Activities that contributed positively to the UN SDGs were measured in terms of revenues, capital expenditure (CapEx) and/or operational expenditure (OpEx). If a positive contribution was determined, the activity was considered sustainable if the company passed the DNSH assessment and complied with the DWS safeguard assessment (as detailed in the section “Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?”.)

The sub-fund did not commit to target a minimum proportion of sustainable investments with an environmental objective aligned with the EU Taxonomy.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The DNSH assessment was integral part of the sustainability investment assessment and evaluated whether an economic activity with a contribution to an UN SDG caused significant harm to any of these objectives. In case that a significant harm was identified, the economic activity failed the DNSH assessment and could not be considered as sustainable economic activity.

How were the indicators for adverse impacts on sustainability factors taken into account?

As part of the DNSH assessment under article 2(17) SFDR, the sustainability investment assessment systematically integrated all mandatory principal adverse indicators from Table 1 and relevant indicators from Tables 2 and 3 of Annex I of the Commission Delegated Regulation (EU) 2022/1288 supplementing the Sustainable Finance Disclosure Regulation (SFDR). Taking into account these adverse impacts, DWS established quantitative thresholds and/or qualitative values to determine if an investment significantly harmed any of the environmental or social objectives. These values were set based upon various external and internal factors, such as data availability or market developments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

As part of its sustainability investment assessment, DWS further evaluated through its safeguard assessment the alignment of a company with international norms. This included checks in relation to adherence to international norms, for example, the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the principles of the United Nations Global Compact and the standards of the International Labour Organization. Companies with assessed and reconfirmed highest violations of one of the international norms were considered as non-compliant to the safeguards and their economic activities could not be considered sustainable.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union Criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund management considered the following principle adverse impacts on sustainability factors from Annex I of the Commission Delegated Regulation (EU) 2022/1288 supplementing the Sustainable Finance Disclosure Regulation:

- Carbon footprint (no. 2);
- GHG intensity of investee companies (no. 3);
- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

The above principal adverse impacts were considered at product level through the exclusion strategy for the sub-fund's assets that were aligned with environmental and social characteristics via the proprietary ESG assessment methodology as detailed in section "What actions have been taken to meet the environmental and/or social characteristics during the reference period?".

For sustainable investments, the principal adverse impacts were further considered in the DNSH assessment as described above in section "How were the indicators for adverse impacts on sustainability factors taken into account?".

What were the top investments of this financial product?

for the period from January 01, 2022, through December 31, 2022

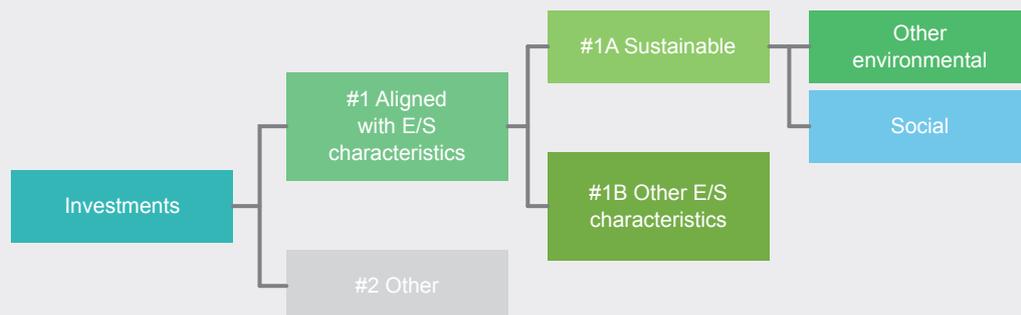

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

This sub-fund invested 98.3% of its net assets in investments that were aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 20.29% of the sub-fund's assets qualified as sustainable investments (#1A Sustainable).

1.7% of the investments were not aligned with these characteristics (#2 Other). A more detailed description of the specific asset allocation of this sub-fund can be found in the Special Section of the Sales Prospectus.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

db Advisory Multibrands – DWS StepIn ESG Global Equities Evolution

Breakdown by sector / issuer	in % of portfolio volume
Equity funds	98,61 %
Exposure to companies active in the fossil fuel sector	16,7 %

As of: December 31, 2022

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities

Directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

Are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

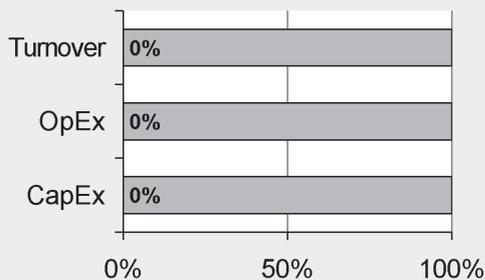

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting the green operational activities of investee companies.

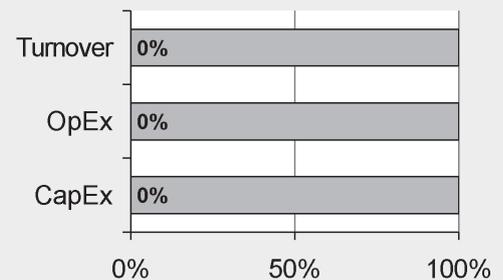

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

■ Taxonomy-aligned 0.00%
■ Non Taxonomy-aligned 100.00%

2. Taxonomy-alignment of investments excluding sovereign bonds*

■ Taxonomy-aligned 0.00%
■ Non Taxonomy-aligned 100.00%

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Due to a lack of reliable data the sub-fund did not commit to invest a minimum proportion of sustainable investments with an environmental objective aligned with the EU Taxonomy. Therefore, the percentage of environmentally sustainable investments aligned with the EU Taxonomy was 0% of the sub-fund's net assets. However, there may have been instances in which part of the investments' underlying economic activities were aligned with the EU Taxonomy.

What was the share of investments made in transitional and enabling activities?

The sub-fund did not have a minimum share of investments in transitional and enabling activities, as it did not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/85.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy

The sub-fund did not intend to make a minimum allocation to environmentally or socially sustainable investments pursuant to Article 2(17) SFDR. However, the share of environmentally and socially sustainable investments in total was 20.29% of the net assets of the sub-fund.

What was the share of socially sustainable investments?

The sub-fund did not intend to make a minimum allocation to environmentally or socially sustainable investments pursuant to Article 2(17) SFDR. However, the share of environmentally and socially sustainable investments in total was 20.29% of the net assets of the sub-fund.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

This sub-fund promoted a predominant asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics). In addition, and on an ancillary basis, this sub-fund invested into investments that are not considered aligned with the promoted characteristics (#2 Other). These remaining investments could include all asset classes as foreseen in the specific investment policy including cash and derivatives.

In line with the market positioning of this sub-fund, the purpose of these remaining investments was to provide investors with an exposure to non-ESG aligned investments while at the same time ensuring a predominant exposure to environmentally and socially aligned investments. Remaining investments could be used by the portfolio management for performance, diversification, liquidity and hedging purposes.

This sub-fund did not consider any minimum environmental or social safeguards on these remaining investments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This sub-fund pursued a strategy based on multiple asset classes as main investment strategy. The sub-fund were invested globally in fixed income assets such as interest-bearing securities, convertible bonds, money-market instruments, bank balances as well as equities and/or securities equivalent to equities. Investment in Fixed Income Assets and Equities were mainly held indirectly through investment funds. Derivatives were used for efficient portfolio management purposes, mainly to hedged foreign currency risks. At the launch date, the sub-fund's assets were predominantly be invested in Fixed Income Assets, mainly held through six investment funds. The portfolio management intended to decreased the respective proportion of Fixed Income Assets step-by-step over a three-year period and simultaneously increased the respective proportion invested into Equities to at least 90%.

Further details regarding the main investment strategy are specified in the Special Section of the Sales Prospectus.

The sub-fund's assets were predominantly allocated into investments that complied with the defined standards in respect to the promoted environmental and social characteristics as described in the following sections. The sub-fund's strategy in relation to the promoted environmental or social characteristics was integral part of the ESG assessment methodology, which was continuously monitored via the sub-fund's investment guidelines.

ESG assessment methodology

The portfolio management of this sub-fund sought to attain the promoted environmental and social characteristics by assessing potential investments via a proprietary ESG assessment methodology irrespective of economic prospects of success. This methodology was based on the ESG database, which used data from multiple ESG data providers, public sources and internal assessments (based on a defined assessment and classification methodology) to derive combined scores. The ESG database was therefore constituted by data and figures as well as on internal assessments that took into account factors beyond the processed data and figures, such as an issuer's future expected ESG development, plausibility of the data with regard to past or future events, an issuer's willingness to engage in dialogues on ESG matters or corporate decisions.

The ESG database derived "A" to "F" letter coded assessments within different categories as further detailed below. Within each category, issuers received one of six possible scores, with "A" being the highest score and "F" being the lowest score. If an issuer's score in one category was deemed insufficient, the portfolio management was prohibited from investing in that issuer, even if it was eligible according to other categories. For exclusion purposes, each letter score in a category was considered individually and may result might have resulted in exclusion of an issuer.

The ESG database used a variety of assessment categories to assess the attainment of the promoted environmental and social characteristics, including amongst others:

• DWS Climate and Transition Risk Assessment

The DWS Climate and Transition Risk Assessment evaluated issuers in relation to climate change and environmental changes, e.g. in respect to greenhouse gas reduction and water conservation. Issuers that contributed less to climate change and other negative environmental changes or were less exposed to such risks received better evaluations. Issuers with excessive climate risk profile (i.e. a letter score of "F") were excluded as an investment.

• DWS Norm Assessment

The DWS Norm Assessment evaluated the behaviour of issuers, for example, within the framework of the principles of the United Nations Global Compact, the standards of the International Labour Organization and behaviour within generally accepted international standards and principles. The Norm Assessment examined, for example, human rights violations, violations of workers' rights, child or forced labour, adverse environmental impacts and business ethics. Issuers with highest severity of norm issues (i.e. a letter score of "F") were excluded as an investment.

• DWS Sovereign Assessment

The DWS Sovereign Assessment evaluated the assessment of political and civil liberties. Sovereign issuers with high or excessive controversies regarding political and civil liberties (i.e. a letter score of "E" or "F") were excluded as an investment.

• Exposure to controversial sectors

The ESG database defined certain business areas and business activities as relevant. Business areas and business activities were defined as relevant if they involve the production or distribution of products in a controversial area ("controversial sectors"). Controversial sectors were defined, for

example, as the civil firearms industry, military defence and tobacco. Other business sectors and business activities that affect the production or distribution of products in other sectors were defined as relevant. Other relevant sectors were, for example, coal mining and coal-based power generation. Issuers were evaluated according to the share of total revenues they generate in controversial business areas and controversial business activities. The lower the percentage of revenues from the controversial business areas and controversial business activities, the better the score.

As regards the involvement in tobacco and civil firearms, issuers (excluding target funds) with a moderate, high or excessive exposure (i.e. a letter score of "D", "E" or "F") were excluded as an investment.

As regards the involvement in the military defence industry, issuers (excluding target funds) with high or excessive exposure (i.e. a letter score of "E" or "F") were excluded as an investment.

As regards the involvement in coal mining and coal-based power generation or other controversial sectors and controversial business practices, issuers (excluding target funds) with excessive exposure (i.e. a letter score "F") were excluded as an investment.

• **Involvement in controversial weapons**

The ESG database assessed a company's involvement in the business of controversial weapons. Controversial weapons included for example anti-personnel mines, cluster munitions, depleted uranium weapons, nuclear weapons, chemical and biological weapons.

Issuers were assessed based on their degree of involvement (production of controversial weapons, component production, etc.) in the manufacturing of controversial weapons, regardless of total revenues they generate from controversial weapons. Issuers (with the exception of target funds) with medium, high or excessive involvement (i.e., a letter score of "D", "E" or "F") were excluded as an investment.

To the extent that the sub-fund sought to attain the promoted environmental and social characteristics as well as corporate governance practices by means of an investment in target funds, the latter had to meet the DWS standards on Climate and Transition Risk- and Norm Assessment outlined above.

No derivatives were used to attain the environmental or social characteristics promoted by the sub-fund and were therefore not taken into account for the calculation of the minimum share of assets complying with these characteristics. However, derivatives on individual issuers may have only been acquired for the sub-fund if the issuers of the underlying comply with the ESG assessment methodology.

Sustainability investment assessment methodology

Further, for the proportion of sustainable investments DWS measured the contribution to one or several UN SDGs via its sustainability investment assessment which evaluated potential investments in relation to different criteria to conclude that an economic activity could be considered as sustainable as further detailed in section "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?"

The applied ESG investment strategy did not pursue a committed minimum reduction of the scope of the investments.

The procedure to assess the good governance practices of the investee companies was based on the DWS Norm Assessment. Accordingly, the assessed investee companies followed good governance practices.

Further, the management company considered active ownership as a strong driver to improve governance, policies and practices, and thus for a better long-term performance of investee companies. Active ownership meant using the position as shareholders to influence the activities or behaviour of the investee companies. An engagement activity could have been initiated with the investee companies regarding matters such as strategy, financial and non-financial performance, risk, capital structure, social and environmental impact as well as corporate governance including topics like disclosure, culture and remuneration. The engagement activity could have been undertaken via, e.g., issuer meetings or engagement letters. Furthermore, for equity investments it could also be an interaction with the company resulting from proxy voting activities or participation at general meetings.

How did this financial product perform compared to the reference sustainable benchmark?

This sub-fund had not designated a reference benchmark to determine whether it was aligned with the environmental and/or social characteristics that it promoted.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name: db Advisory Multibrands - Nordea Sustainable Global Stars

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The E/S characteristics of this product included:

• **Minimum proportion of sustainable investments**

The product invested in sustainable investments, which meant companies and issuers involved in activities that contributed to an environmental or social objective as outlined in the UN SDGs, while not significantly harming any other environmental or social objectives.

• **NAM's Paris-Aligned Fossil Fuel policy**

Exposure to fossil fuel companies was governed by the product's adherence to Nordea Asset Management's (NAM) Paris-Aligned Fossil Fuel Policy which aimed at limiting the carbon footprint resulting from the investment portfolio.

• **NAM's Responsible Investment Policy**

Excluded were companies that were on Nordea's exclusion list due to violation of international norms or involvement in controversial business activities. This sub-fund had not designated a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted.

Derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

db Advisory Multibrands - Nordea Sustainable Global Stars

Sustainability Indicator	Metric	Metric Value	Eligibility	Coverage
Carbon Footprint	Carbon Footprint	30 tCO2e / m€ invested	96,71 %	96,71 %
Violations of United Nations Global Compact	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	1,92 % involved in violations	96,71 %	96,71 %

Eligibility: The proportion of the assets in the financial product (relative to NAV), which are in scope for the indicator.

Coverage: The proportion of the assets in the financial product (relative to NAV), where data is available to present the indicator.

Principal Adversere Impact

PAII - 2. Carbon footprint	30 tCO2e / m€ invested
PAII - 10. Violations of UNGC principles and OECD Guidelines for Multinational Enterprises	1,92 % involved in violations

As of: December 31, 2022

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Sustainable investment was defined under the SFDR as an investment in an economic activity that contributed to an environmental or social objective, provided that the investment did not significantly harm any environmental or social objective and that the investee companies followed good governance practices.

NAM took into consideration the regulatory framework for sustainable finance, as well as proprietary investment methodologies, to ensure that sustainable investments could be identified, invested in and measured. In order to select sustainable investments, NAM applied three tests. The investment should pass all three tests to qualify as a sustainable investment.

- Step 1: Good governance test – a company needs to have sufficient processes in place related to the four good governance topics specified by the SFDR: sound management structures, employee relations, remuneration of staff and tax compliance, and must not be subject to significant controversies related to any of these topics.
- Step 2: Do no significant harm test – a company cannot perform negatively on selected principal adverse impact (PAI) indicators. The thresholds defining negative outliers and poor performance vary for each PAI indicator.
- Step 3: Environmental or Social Contribution – A minimum proportion of 20 per cent of the turnover of the company should come from economic activities that actively contribute to a sustainable objective. The sustainable objective can be environmental or social objective belonging to the list of United Nations Sustainable Development Goals.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments had passed a test determining that they did not significantly harm any other social or environmental objectives (DNSH test). NAM had developed a proprietary quantitative "PAI tool" that assessed the performance of NAM's full investment universe across multiple PAI indicators. The tool utilised a diverse range of data sources across numerous ESG thematic areas in order to ensure that investee companies' performance was appropriately analysed, using a rigorous inhouse methodology. The output from the PAI tool was the basis for the DNSH test and the results were further enriched with additional third party data covering environmental and social factors to arrive at the test result.

How were the indicators for adverse impacts on sustainability factors taken into account?

NAM had developed a proprietary quantitative methodology that assessed the environmental and social impact of NAM's investment universe (direct investments mainly) using multiple principal adverse impact ("PAI") indicators from Table 1 and/or Table 2 and/or Table 3 of Annex 1 of the SFDR RTS (the "PAI tool"). The methodology utilised a diverse range of data sources in order to ensure that investee companies' performance was appropriately analysed. PAI indicators were assessed in NAM's PAI tool and the results were a material part of the DNSH test.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was tested and assured as part of the process to identify sustainable investments using NAM's "PAI tool". This included checks in relation to adherence to international norms, for example, the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the principles of the United Nations Global Compact and the standards of the International Labour Organization.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund management considered the following principle adverse impacts on sustainability factors from Annex I of the Commission Delegated Regulation (EU) 2022/1288 supplementing the Sustainable Finance Disclosure Regulation:

- Carbon footprint (no. 2); and
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10).

The above principal adverse impacts were considered at product level through the exclusion strategy for the sub-fund’s assets that were aligned with environmental and social characteristics via the proprietary ESG assessment methodology as detailed in section “What actions have been taken to meet the environmental and/or social characteristics during the reference period?”.

For sustainable investments, the principal adverse impacts were further considered in the DNSH assessment as described above in section “How were the indicators for adverse impacts on sustainability factors taken into account?”

What were the top investments of this financial product?

db Advisory Multibrands - Nordea Sustainable Global Stars

Largest investments	Breakdown by sector / issuer	in % of average portfolio volume	Breakdown by country
Microsoft Corp.	Technology	4.3 %	United States
Alphabet Cl.A	Technology	3.6 %	United States
Amazon.com	Retail	3.0 %	United States
Merck & Co.	Health Care	2.7 %	United States

Thermo Fisher Scientific Inc.	Health Care	1.6 %	United States

for the period from January 01, 2022, through December 30, 2022

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: for the period from January 01, 2022, through December 31, 2022

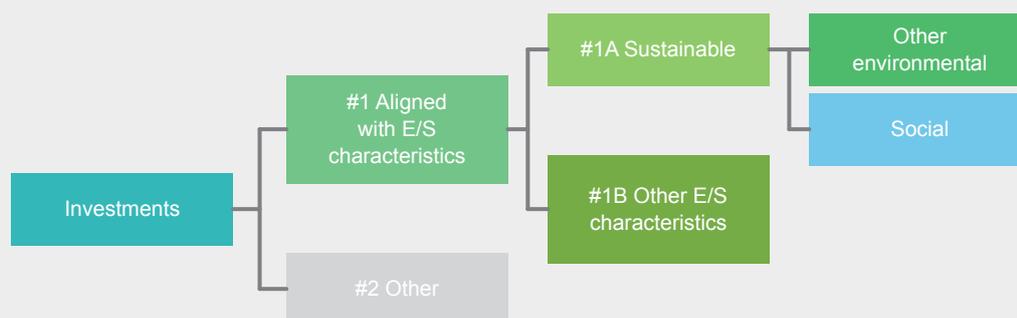

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

This sub-fund invested 97% of its net assets in investments that were aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). Within this category, 72% of the sub-fund's assets qualified as sustainable investments (#1A Sustainable). 3% of the investments were not aligned with these characteristics (#2 Other). A more detailed description of the specific asset allocation of this sub-fund can be found in the Special Section of the Sales Prospectus.

The asset allocation might change over time and percentages should be seen as an average over an extended period of time. Calculations might rely on incomplete or inaccurate company or third party data.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

db Advisory Multibrands - Pictet Sustainable Thematic New Trends

Breakdown by sector / issuer	in % of portfolio volume
Information Technology	18,07 %
Telecommunication Services	7,10 %
Consumer Discretionary	31,80 %
Energy	0,68 %
Consumer Staples	7,99 %
Financials	17,12 %
Materials	3,14 %
Industrials	7,58 %
Utilities	2,67 %
Exposure to companies active in the fossil fuel sector	1,33 %

As of: December 31, 2022

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

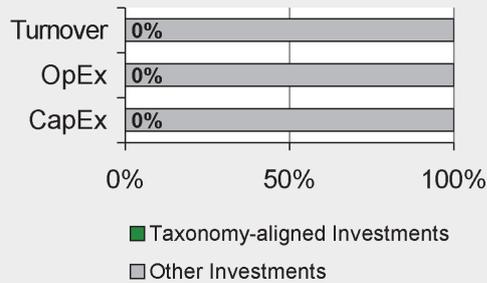

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

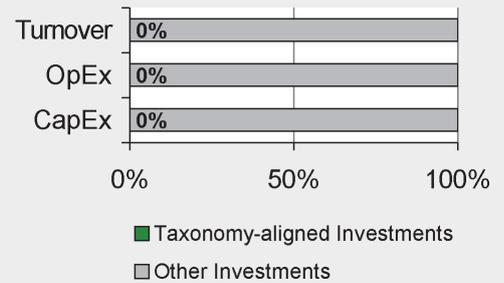

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

Due to a lack of reliable data the sub-fund did not commit to invest a minimum proportion of sustainable investments with an environmental objective aligned with the EU Taxonomy. Therefore, the minimum percentage of environmentally sustainable investments aligned with the EU Taxonomy was 0% of the sub-fund’s net assets. However, it might occur that part of the investments’ underlying economic activities were aligned with the EU Taxonomy.

Enabling activities

Directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

Are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

There was no commitment to a minimum proportion of investments in transitional and enabling activities.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/85.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 59%.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 62%.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

Cash might be held as ancillary liquidity or for risk balancing purposes. The product might use derivatives and other techniques for the purposes described in the investment guidelines. This category might also include securities for which relevant data was not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This sub-fund pursued a strategy based on equities as main investment strategy. The sub-fund invested globally and at least 75% of its net assets in equities and equity related securities (such as Preferred Shares, Depositary Receipts (ADR and GDR), closed-ended listed US REITs, dividend right certificates, equity rights and Participation Certificates). Up to 25% of the sub-fund's total assets could be invested in emerging market countries including investments in China A-shares via the Shanghai-Hong Kong Stock Connect program and the Shenzhen-Hong Kong Stock Connect program. Up to 25% of the sub-fund's net assets might be invested in money market instruments and bank balances.

Further details regarding the main investment strategy are specified in the Special Section of the Sales Prospectus.

The sub-fund's assets were predominantly allocated into investments that complied with the defined standards in respect to the promoted environmental and social characteristics as described in the following sections. The sub-fund's strategy in relation to the promoted environmental or social characteristics was integral part of the ESG assessment methodology, which was continuously monitored via the sub-fund's investment guidelines.

- Minimum 50% of the product was invested in sustainable investments as defined by NAM's proprietary methodology that identified sustainable investments as further detailed under section "What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?"

- NAM's Paris-Aligned Fossil Fuel Policy set thresholds for companies' exposure to fossil fuel production, distribution and services. This meant that the product didn't invest in companies with material involvement in fossil fuel production, distribution or services if they did not have a documented transition strategy that aligned with the Paris Agreement.

- The product adhered to NAM's Responsible Investment Policy and did not invest in companies that were on Nordea's exclusion list due to violation of the UN Global Compact. The binding elements were documented and monitored on an ongoing basis. Separately, NAM had in place risk management processes to control financial and regulatory risk and ensure appropriate escalation of any potential issues within a clear governance structure.

NAM conducted a thorough due diligence on external data vendors to clarify applied methodologies and verify data quality. However, as the regulation and standards of non-financial reporting was rapidly developing, data quality, coverage and accessibility remained challenging – especially for smaller companies and less developed markets.

Good governance practices of investee companies was addressed in various layers of the security selection process. Governance safeguards were inherent in the NAM level norms-based screening as well as the NAM PAI processes. Additionally, at the product level, companies were screened for good governance by assessing their employee relations, pay practices, management structures and tax compliance. In respect of sovereign issuers, the assessment of good governance practices was based on three pillars; 1) The principles of governance (democratic governance), 2) Execution of governance and 3) Efficiency of governance.

How did this financial product perform compared to the reference sustainable benchmark?

This sub-fund had not designated a reference benchmark to determine whether it was aligned with the environmental and/or social characteristics that it promoted.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

No

it made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of ___ % of sustainable investments.

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but did **not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

• **Positive tilt approach**

The sub-fund sought to increase the weight of securities with low sustainability risks and/or decrease the weight of securities with high sustainability risks, as a result the sub-fund aimed to have a better environmental, social and governance (ESG) risk profile than the reference index. The risk assessment included, for example, environmental risks (e.g. carbon emissions, involvement in environmentally detrimental activities, environmental incidents related to waste or water, physical impacts of climate change); social risks (e.g. human rights violations, involvement in socially detrimental activities, labour-related incidents, product safety incidents), governance risks (e.g. malfunctioning boards, inadequate remuneration structures, lack of appropriate risk controls).

• **Norms- and values-based exclusions**

The sub-fund excluded issuers that were in severe breach of international norms or had significant activities with adverse impacts on society or the environment. These exclusions related to fossil fuels and nuclear energy, weapons, breaches of international norms and other controversial activities.

The sub-fund did not use derivatives to attain the promoted environmental or social characteristics. However, exclusions were applied to all types of securities (equities, bonds, convertible bonds) issued by excluded entities, including participation notes and derivatives issued by third parties on such securities.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

db Advisory Multibrands - Pictet Sustainable Thematic New Trends

Indicators	Description	Value
Sustainable Indicators		
Positive tilt approach:	The strategy targets a weighted average ESG score that is better than the weighted average ESG score of the reference index MSCI AC World.	
Weighted average ESG score db Advisory Multibrands - Pictet Thematic New Trends		0,44
Weighted average ESG score MSCI AC World		-0,01
Norms- and values-based exclusions:		
Fossil Fuels and Nuclear Energy	- %share of the sub-fund's net assets deriving more than 50% of revenue from Nuclear Power Generation - %share of the sub-fund's net assets deriving more than 25% of revenue from Thermal Coal (extraction/power generation), Oil and Gas (production) respectively - %share of the sub-fund's net assets deriving more than 10% of revenue from Oil Sand and Shale Energy (extraction) and Off-shore Arctic Oil and Gas Exploration respectively	
Weapons	- %share of the sub-fund's net assets deriving more than 50% of revenue from Military Contracting Weapon-Related Products and/or Services - %share of the sub-fund's net assets deriving more than 25% of revenue from Small Arms Military/Law Enforcement Customers, Small Arms Key Components respectively - %share of the sub-fund's net assets deriving more than 10% of revenue from Military Contracting Weapons, Small Arms Civilian Customers (assault/ non assault weapons) respectively - %share of the sub-fund's net assets deriving more than 0% of revenue from Production of Controversial Weapons	
Other Controversial Activities	- %share of the sub-fund's net assets deriving more than 25% of revenue from Genetically Modified Plants and Seeds (development/growth) respectively - %share of the sub-fund's net assets deriving more than 10% of revenue from Tobacco (production), Adult Entertainment (production), Gambling (operation), Pesticides (production/retail) respectively	
Company Exclusions based on Breaches of International Norms)	- %share of the sub-fund's net assets that severely violate international norms including the UN Global Compact principles on human rights, labour standards, environmental protection and anticorruption	

Principal Adversere Impact

PAII - 4. Exposure to companies active in the fossil fuel sector	2,02% of portfolio volume
PAII - 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0% of portfolio volume
PAII - 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0% of portfolio volume

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The fund considered and, where possible mitigates adverse impacts of its investments on society and the environment through a combination of portfolio management decisions, active ownership activities, and exclusion of issuers associated with controversial conduct or activities.

The following principal adverse impacts were taken into account:

- * PAI 4 - Exposure to companies active in the fossil fuel sector
- * PAI 10 - Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises
- * PAI 14 - Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)

Furthermore, the fund considered principle adverse impacts by engaging with management on material ESG issues and by methodically exercising its voting rights.

What were the top investments of this financial product?

db Advisory Multibrands - Pictet Sustainable Thematic New Trends

for the period from January 01, 2022, through December 30, 2022

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: for the period from January 02, 2022, through December 31, 2022

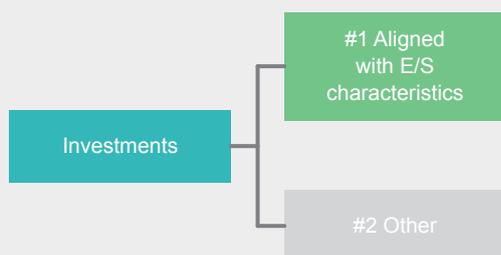

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

This sub-fund invested 98% of its net assets in investments that were aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). 2% of the investments were not aligned with these characteristics (#2 Other). A more detailed description of the specific asset allocation of this sub-fund can be found in the Special Section of the Sales Prospectus.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

db Advisory Multibrands - Pictet Sustainable Thematic New Trends

Breakdown by sector / issuer	in % of portfolio volume
Information Technology	22,97 %
Telecommunication Services	3,87 %
Consumer Discretionary	29,59 %
Energy	0,64 %
Consumer Staples	11,55 %
Financials	7,75 %
Industrials	17,97 %
Utilities	2,01 %
Exposure to companies active in the fossil fuel sector	2,02 %

As of: December 31, 2022

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the “greenness” of investee companies today.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

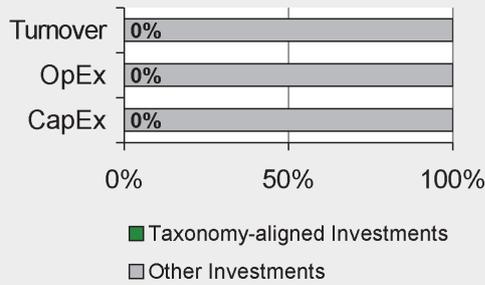

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

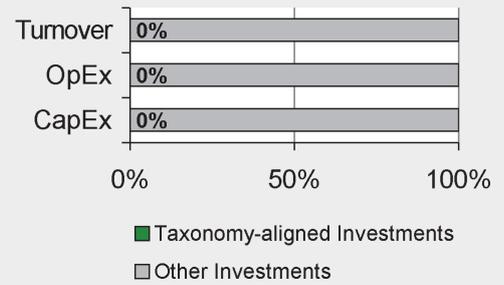

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

Due to a lack of reliable data the sub-fund did not commit to invest a minimum proportion of sustainable investments with an environmental objective aligned with the EU Taxonomy. Therefore, the minimum percentage of environmentally sustainable investments aligned with the EU Taxonomy was 0% of the sub-fund’s net assets. However, it occurred that part of the investments’ underlying economic activities were aligned with the EU Taxonomy.

Enabling activities

Directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

Are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

The sub-fund did not have a minimum share of investments in transitional and enabling activities, as it did not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/85.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

This sub-fund promoted a predominant asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics). In addition, and on an ancillary basis, this sub-fund invested into investments that were not considered aligned with the promoted characteristics (#2 Other). These remaining investments included all asset classes as foreseen in the specific investment policy including cash and derivatives.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This sub-fund pursued a strategy based on equities as main investment strategy. The sub-fund invested mainly in companies whose significant proportion of their activities (as measured by turnover, enterprise value, earning before income and tax, or similar metrics) were related to, but not limited to products and services supporting the energy transition, circular economy, energy efficiency, water quality and supply, sustainable forestry, sustainable cities, nutrition, human health and therapeutics, personal self-fulfilment and security. Up to 20% of the sub-fund's net assets invested in GDRs and ADRs that were listed on recognized exchanges and markets issued by international financial institutions or to the extent permitted by the Grand Ducal Regulation of February 8, 2008, relating to certain definitions of the Law of 2010 (the 2008 Regulation) and Article 41 (1) or (2) of the Law of 2010. Up to 20% of the sub-fund's net assets invested in China A Shares through (i) the Shanghai-Hong Kong Stock Connect program (ii) and the Shenzhen-Hong Kong Stock Connect program. Up to 10% of the sub-fund's net assets invested in closed-ended real estate investment trusts ("REITS"). A REIT was a company that owned and managed a portfolio of real estate properties.

Further details regarding the main investment strategy are specified in the Special Section of the Sales Prospectus.

The sub-fund's assets were predominantly allocated into investments that complied with the defined standards in respect to the promoted environmental and social characteristics as described in the following sections. The sub-fund's strategy in relation to the promoted environmental or social characteristics was integral part of the ESG assessment methodology, which was continuously monitored via the sub-fund's investment guidelines.

The sub-fund's binding elements included:

• Norms- and values-based exclusions

Exclusion of issuers based on Controversial Activities and Revenue Thresholds:

Fossil Fuels and Nuclear Energy

- Nuclear Power Generation: >50%
- Thermal Coal (extraction/power generation), Oil and Gas (production): >25% respectively
- Oil Sand and Shale Energy (extraction) and Off-shore Arctic Oil and Gas Exploration: >10% respectively

Weapons

- Military Contracting Weapon-Related Products and/or Services: >50%
- Small Arms Military/Law Enforcement Customers, Small Arms Key Components: >25% respectively
- Military Contracting Weapons, Small Arms Civilian Customers (assault/ non assault weapons): >10% respectively
- Production of Controversial Weapons: 0%

Other Controversial Activities

- Genetically Modified Plants and Seeds (development/growth): >25% respectively
- Tobacco (production), Adult Entertainment (production), Gambling (operation), Pesticides (production/retail): >10% respectively

Company Exclusions based on Breaches of International Norms

- companies that severely violate international norms including the UN Global Compact principles on human rights, labour standards, environmental protection and anti-corruption

• Positive Tilt approach

The sub-fund sought to increase the weight of securities with low sustainability risks and/or decreased the weight of securities with high sustainability risks, as a result the sub-fund aimed to have a better environmental, social and governance (ESG) risk profile than the reference index. The ESG risk profile of the portfolio of the sub-fund was measured through a proprietary ESG score composed of 3rd party data as well as internal ESG data. The score combined several material ESG issues such as governance quality, involvement in controversies, a company's carbon emissions and carbon risk management as well as involvement in products.

The strategy targets for the sub-fund a weighted average ESG score that was better than the weighted average ESG score of the reference index MSCI AC World.

Further details on the risk assessment are defined in PICTET's RI policy as published under <https://am.pictet/-/media/pam/pam-common-gallery/pictet-asset-management/responsible-investmentpolicy.pdf>

- ESG criteria analysis that covered 90% of net assets or the number of issuers in the portfolio (at the discretion of the investment manager)

To ensure ongoing compliance, the sub-fund monitors the ESG profile of all securities and issuers that form part of the minimum percentage of E/S investments stated in “What was the asset allocation?”. The sub-fund drew on information from various sources, such as proprietary fundamental analysis, ESG research providers, third-party analyses (including those from brokers), credit rating services and financial and general media. Based on this information, the investment manager decided to add or discontinue certain securities, or increase or decrease its holdings in certain securities.

The sub-fund assessed company decision-making processes and controls, as well as how management balances the interests of shareholders, employees, suppliers, customers, the community and other stakeholders. Assessed areas included:

- the composition of the executive team and board of directors, including the experience, diversity and distribution of roles, along with succession planning and board evaluation
- executive remuneration, including short term and long term incentives and their alignment with investor interests
- risk control and reporting, including auditor independence and tenure
- Shareholder rights, including one-share-one-vote and related-party transactions

How did this financial product perform compared to the reference sustainable benchmark?

This sub-fund had not designated a reference benchmark to determine whether it was aligned with the environmental and/or social characteristics that it promoted.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Periodic disclosure for financial products referred to in Article 8, paragraph 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund promoted environmental and social characteristics and qualified as a product in accordance with article 8(1) of Regulation (EU) 2019/2088 on sustainability related disclosures in the financial services sector. Among other characteristics, the sub-fund promoted environmental characteristics but did not have as its objective a sustainable investment.

The sub-fund was promoting ESG characteristics through exclusions on coal, unconventional oil, tobacco, controversial weapons, military weapons and UNGC violators.

No reference benchmark had been designated for the purpose of attaining the environmental characteristics promoted by the sub-fund.

Derivatives were not used to attain the environmental or social characteristics promoted by the sub-fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

db Advisory Multibrands - PIMCO Euro Sustainable Debt Solution

Indicators	Description	Value
Sustainability Indicators		
Coal	Companies deriving 10% or more revenue from the mining of thermal coal or thermal coal based power generation	0% of portfolio volume
Unconventional Oil	Companies deriving 10% or more revenue from the production of Shale/Arctic Oil and Oil Sands	0% of portfolio volume
Tobacco	Companies deriving more than 5% of revenue from tobacco production	0% of portfolio volume
Controversial weapons	Companies deriving 10% or more revenue from manufacturing cluster munitions, landmines, depleted uranium weapons, biological/chemical weapons, blinding lasers, non detectable fragments, nuclear weapons, and incendiary weapons	0% of portfolio volume
Military weapons	Companies deriving more than 10% of their revenue from manufacturing of military weapons	0% of portfolio volume

Principal Adverse Impacts

PAII - 4.	Exposure to companies active in the fossil fuel sector	0% of portfolio volume
PAII - 10.	Violations of UNGC principles and OECD Guidelines for Multinational Enterprises	1,60% of portfolio volume
PAII - 14.	Exposure to controversial weapons	0% of portfolio volume

As of: December 31, 2022

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The sub-fund management considered the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final):

- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

The above principal adverse impacts were considered at product level by means of exclusion strategy for the sub-funds' assets that were aligned with environmental or social characteristics via the proprietary ESG assessment methodology as detailed in section "What actions have been taken to meet the environmental and/or social characteristics during the reference period?".

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: for the period from January 01, 2022, through December 31, 2022

What was the proportion of sustainability-related investments?

Asset allocation

describes the share of investments in specific assets.

What was the asset allocation?

This sub-fund applied exclusion criteria to all of its holdings and as a result invested 100% of its net assets in investments that were aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). 0% of the sub-fund holdings were not aligned with these characteristics (#2 Other) and included cash and other instruments used for hedging and risk management of the sub-fund. A more detailed description of the specific asset allocation of this subfund can be found in the Special Section of the Sales Prospectus.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

db Advisory Multibrands - PIMCO Euro Sustainable Debt Solution

Breakdown by sector / issuer	in % of portfolio volume
Companies	79,14%
Institutions	17,13%
Central governments	0,86%
Exposure to companies active in the fossil fuel sector	0,00%

As of: December 31, 2022

Taxonomy-aligned activities are expressed as a share of:

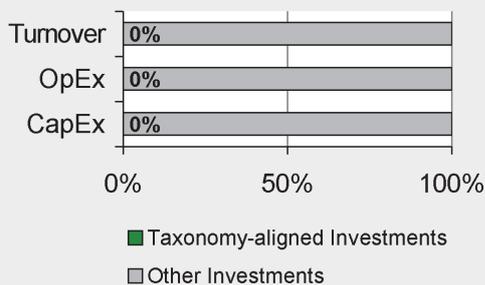

- **turnover** reflects the “greenness” of investee companies today.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

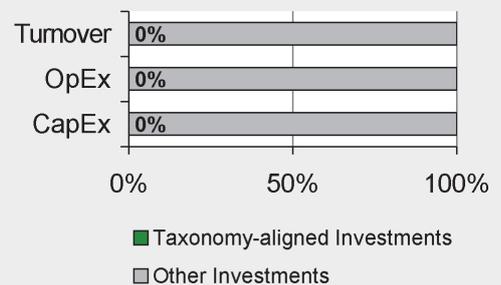

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

*For the purpose of these graphs, ‘sovereign bonds’ consist of all sovereign exposures

Due to a lack of reliable data the sub-fund did not commit to invest a minimum proportion of sustainable investments with an environmental objective aligned with the EU Taxonomy. Therefore, the percentage of environmentally sustainable investments aligned with the EU Taxonomy was 0% of the sub-fund’s net assets. However, it might occur that part of the investments’ underlying economic activities were aligned with the EU Taxonomy.

Enabling activities

Directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

Are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

The sub-fund did not have a minimum share of investments in transitional and enabling activities, as it did not commit to a proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/85.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy

The sub-fund did not intend to make a minimum allocation to environmentally sustainable investments pursuant to Article 2(17) SFDR.

What was the share of socially sustainable investments?

The sub-fund did not intend to make a minimum allocation to socially sustainable investments pursuant to Article 2(17) SFDR.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

This sub-fund promoted a predominant asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics). In addition, and on an ancillary basis, this sub-fund invested into investments that were not considered aligned with the promoted characteristics (#2 Other). These remaining investments could include all asset classes as foreseen in the specific investment policy/prospectus including cash and derivatives.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This sub-fund pursued a strategy based on bonds as main investment strategy. The sub-fund generally allocated its assets among several investment sectors, which included (i) bonds and other fixed income securities of issuers located in the EU and in non-EU countries, including emerging market countries; (ii) bonds and other fixed income securities issued by EU and non-EU governments, their agencies and instrumentalities; (iii) mortgage-related and other asset-backed securities (which were unleveraged); and (iv) foreign currency positions, including currencies of emerging market countries. The sub-fund's assets were invested in money market instruments, money market funds, deposits with credit institutions, interest-bearing debt securities (including but not limited to assetbacked securities, commercial paper, certificates of deposit), index certificates on underlying bond indices and derivatives thereof. The average portfolio duration of the sub-fund normally varied from 0 to 8 years. The sub-fund invested at least 70% of its assets in a diversified portfolio of EUR-denominated bonds and other EUR-denominated fixed income instruments of varying maturities. The sub-fund invested in both investment grade securities and high yield securities subject to a maximum of 40% of its assets in securities rated below BBB-. The sub-fund invested up to 25% of its assets in fixed income securities that were economically tied to emerging market countries (securities that were issued by companies based in an emerging market or those that conducted their principal business activity in such a country). The maximum non-EUR currency exposure was 20%. The sub-fund's investments in securitized products (Agency MBS, Non-Agency MBS, ABS, CMBS, CLO/CDO) were limited to 20% of the sub-fund's net asset value. No more than 10% of the subfund's net assets were invested in securities that were convertible into equity securities. Further details regarding the main investment strategy are specified in the Special Section of the Sales Prospectus.

The sub-fund's assets were predominantly allocated into investments that comply with the defined standards in respect to the promoted environmental and social characteristics as described in the following sections. The sub-fund's strategy in relation to the promoted environmental or social characteristics was integral part of the ESG assessment methodology, which was continuously monitored via the sub-fund's investment guidelines.

In order to met the environmental and social characteristics promoted in Sub-Fund, PIMCO applied binding criteria to the selection of underlying assets as part of its investment decision making process and as set out in the Investment Guidelines to the Investment Management Agreement. The selection criteria below was not disappplied or overridden by PIMCO.

PIMCO restricted investments by reference to an exclusion list as set out in the Investment Guidelines. In fact, the sub-fund excluded certain industries and sectors due to ESG considerations. In particular, any issue from a company that felt under one or more of the below criteria was excluded from the portfolio, unless it was a green, social or sustainable bond. Focusing on exclusions, these were implemented by solely allowing investments in companies/issuers that did not have a % of revenues generated in specific sectors being higher than a certain threshold:

Coal: Companies deriving 10% or more revenue from the mining of thermal coal or thermal coal based power generation

Unconventional Oil: Companies deriving 10% or more revenue from the production of Shale/Artic Oil and Oil Sands

Tobacco: Companies deriving more than 5% of revenue from tobacco production

Controversial weapons: Companies deriving more than 0% revenue from manufacturing cluster munitions, landmines, depleted uranium weapons, biological/chemical weapons, blinding lasers, nondetectable fragments, nuclear weapons, and incendiary weapons

Military weapons: Companies deriving more than 10% of their revenue from manufacturing of military weapons

UNGC Violators: Companies that pose an unacceptable risk to, contribute to, or be responsible for, among the others: serious or systematic human rights violations, severe environmental damage, gross corruption etc.

The applied ESG investment strategy did not pursue a committed minimum reduction of the scope of the investments.

This assessment was carried out in variety of ways, including but not limited to, application of the UN Global Compact principles, in relation to sound management practices, employee relations, remuneration of staff and tax compliance as applicable.

More information on the Investment Managers ESG investment philosophy, integration in the investment research process, the selection criteria, as well as its ESG related policies, can be found at this website <https://www.pimco.co.uk/engb/investments/esg-investing>

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This sub-fund promoted environmental and social characteristics and qualified as a product in accordance with article 8(1) of Regulation (EU) 2019/2088 on sustainability related disclosures in the financial services sector. Among other characteristics, the sub-fund promoted environmental characteristics but did not have as its objective a sustainable investment.

The sub-fund was promoting ESG characteristics through exclusions on coal, unconventional oil, tobacco, controversial weapons, military weapons and UNGC violators.

No reference benchmark had been designated for the purpose of attaining the environmental characteristics promoted by the sub-fund.

Derivatives were currently not used to attain the environmental or social characteristics promoted by the sub-fund

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

db Advisory Multibrands - PIMCO Global Sustainable Multi-Credit Solution

Indicators	Description	Value
Sustainability Indicators		
Coal	Companies deriving 10% or more revenue from the mining of thermal coal or thermal coal based power generation	0% of portfolio volume
Unconventional Oil	Companies deriving 10% or more revenue from the production of Shale/Arctic Oil and Oil Sands	0% of portfolio volume
Tobacco	Companies deriving more than 5% of revenue from tobacco production	0% of portfolio volume
Controversial weapons	Companies deriving more than 0% revenue from manufacturing cluster munitions, landmines, depleted uranium weapons, biological/chemical weapons, blinding lasers, non detectable fragments, nuclear weapons, and incendiary weapons	0% of portfolio volume
Military weapons	Companies deriving more than 10% of their revenue from manufacturing of military weapons	0% of portfolio volume
UNGC	Companies that pose an unacceptable risk to, contribute to, or be responsible for, among the others: serious or systematic human rights violations, severe environmental damage, gross corruption etc.	0,20% of portfolio volume

Principal Adverse Impacts

PAII - 4. Exposure to companies active in the fossil fuel sector	0% of portfolio volume
PAII - 10. Violations of UNGC principles and OECD Guidelines for Multinational Enterprises	0,20% of portfolio volume
PAII - 14. Exposure to controversial weapons	0% of portfolio volume

As of: December 31, 2022

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union Criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union Criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The sub-fund management considered the following principle adverse impacts on sustainability factors from Annex I of the draft Commission Delegated Regulation supplementing the SFDR (C(2022) 1931 final):

- Exposure to companies active in the fossil fuel sector (no. 4);
- Violation of UN Global Compact principles and OECD Guidelines for multinational enterprises (no. 10); and
- Exposure to controversial weapons (no. 14).

The above principal adverse impacts were considered at product level by means of exclusion strategy for the sub-funds' assets that were aligned with environmental or social characteristics via the proprietary ESG assessment methodology as detailed in section "What actions have been taken to meet the environmental and/or social characteristics during the reference period?".

What were the top investments of this financial product?

for the period from January 01, 2022, through December 30, 2022

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: for the period from January 01, 2022, through December 31, 2022

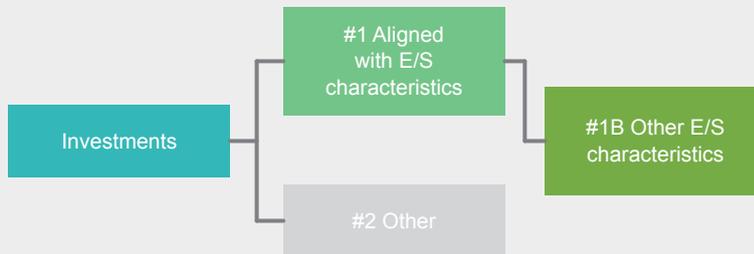

What was the proportion of sustainability-related investments?

Asset allocation

describes the share of investments in specific assets.

What was the asset allocation?

This sub-fund applied exclusion criteria to all of its holdings and as a result invested 100% of its net assets in investments that were aligned with the promoted environmental and social characteristics (#1 Aligned with E/S characteristics). 0% of the sub-fund holdings were not aligned with these characteristics (#2 Other) and included cash and other instruments used for hedging and risk management of the sub-fund. A more detailed description of the specific asset allocation of this subfund can be found in the Special Section of the Sales Prospectus.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

db Advisory Multibrands - PIMCO Global Sustainable Multi-Credit Solution

Breakdown by sector / issuer	in % of portfolio volume
Energy	0,07 %
Companies	64,44 %
Institutions	15,71 %
Central governments	15,68 %
Exposure to companies active in the fossil fuel sector	0,00 %

As of: December 31, 2022

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.

- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.

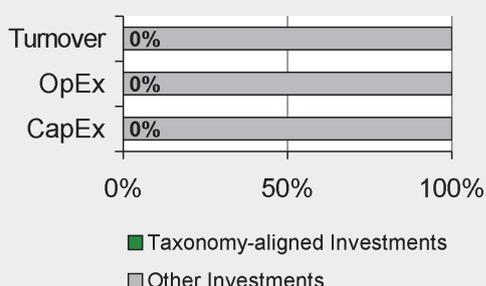

- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

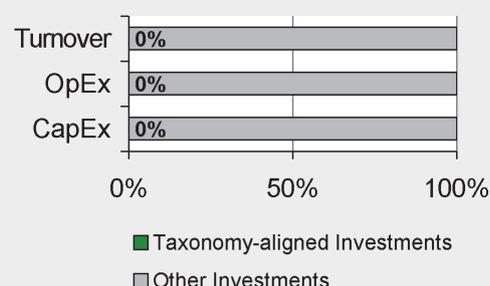

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy-alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy-alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Due to a lack of reliable data the sub-fund did not commit to invest a minimum proportion of sustainable investments with an environmental objective aligned with the EU Taxonomy. Therefore, the minimum percentage of environmentally sustainable investments aligned with the EU Taxonomy was 0% of the sub-fund's net assets. However, it might occur that part of the investments' underlying economic activities were aligned with the EU Taxonomy.

Enabling activities

Directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities

Are economic activities for yet low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

The sub-fund did not have a minimum share of investments in transitional and enabling activities, as it did not commit to a minimum proportion of environmentally sustainable investments aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the Regulation (EU) 2020/85.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy

The sub-fund did not intend to make a minimum allocation to environmentally or socially sustainable investments pursuant to Article 2(17) SFDR.

What was the share of socially sustainable investments?

The sub-fund did not intend to make a minimum allocation to socially sustainable investments pursuant to Article 2(17) SFDR.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

This sub-fund promoted a predominant asset allocation in investments that were aligned with environmental and social characteristics (#1 Aligned with E/S characteristics). In addition, and on an ancillary basis, this sub-fund invested into investments that were not considered aligned with the promoted characteristics (#2 Other). These remaining investments included all asset classes as foreseen in the specific investment policy/prospectus including cash and derivatives.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This sub-fund pursued a strategy based on bonds as main investment strategy. The sub-fund sought to maintain a high and constant level of dividend income by investing in a broad array of fixed income sectors. The sub-fund generally allocated its assets among several investment sectors, which included (i) bonds and other fixed income securities of issuers located globally, including emerging market countries; (ii) bonds and other fixed income securities issued by global governments, their agencies and instrumentalities; (iii) mortgage-related and other asset-backed securities (which were unleveraged); and (iv) foreign currency positions, including currencies of emerging market countries. The sub-fund's assets were invested in money market instruments, money market funds, deposits with credit institutions, interest-bearing debt securities (including but not limited to asset-backed securities, commercial paper, certificates of deposit), index certificates on underlying bond indices and derivatives thereof. The average portfolio duration of the sub-fund normally varied from +/- 3 years from the duration of the risk benchmark. The sub-fund invested in both investment grade securities and high yield securities subject to a maximum of 70% of its assets in securities (including Credit Default Swaps) rated below BBB-. The sub-fund invested up to 50% of its assets in fixed income securities that were economically tied to emerging market countries (securities that were issued by companies based in an emerging market or those that conducted their principal business activity in such a country). The maximum non-EUR currency exposure was 20%. The sub-fund's investments in asset backed securities and mortgage backed securities were limited to 30% of the sub-fund's net asset value.

Further details regarding the main investment strategy are specified in the Special Section of the Sales Prospectus.

The sub-fund's assets were predominantly allocated into investments that complied with the defined standards in respect to the promoted environmental and social characteristics as described in the following sections. The sub-fund's strategy in relation to the promoted environmental or social characteristics was integral part of the ESG assessment methodology, which was continuously monitored via the sub-fund's investment guidelines.

In order to meet the environmental and social characteristics promoted in Sub-Fund, PIMCO applied binding criteria to the selection of underlying assets as part of its investment decision making process and as set out in the Investment Guidelines to the Investment Management Agreement. The selection criteria below was not disapplied or overridden by PIMCO. PIMCO restricted investments by reference to an exclusion list as set out in the Investment Guidelines. In fact, the sub-fund excluded certain industries and sectors due to ESG considerations. In particular, any issue from a company that fell under one or more of the below criteria was excluded from the portfolio, unless it was a green, social or sustainable bond. Focusing on exclusions, these were implemented by solely allowing investments in companies/issuers that did not have a % of revenues generated in specific sectors being higher than a certain threshold:

Coal: Companies deriving 10% or more revenue from the mining of thermal coal or thermal coal based power generation

Unconventional Oil: Companies deriving 10% or more revenue from the production of Shale/Arctic Oil and Oil Sands

Tobacco: Companies deriving more than 5% of revenue from tobacco production
Controversial weapons: Companies deriving more than 0% revenue from manufacturing cluster munitions, landmines, depleted uranium weapons, biological/chemical weapons, blinding lasers, nondetectable fragments, nuclear weapons, and incendiary weapons

Military weapons: Companies deriving more than 10% of their revenue from manufacturing of military weapons

UNGC Violators: Companies that pose an unacceptable risk to, contribute to, or be responsible for, among the others: serious or systematic human rights violations, severe environmental damage, gross corruption etc.

The applied ESG investment strategy did not pursue a committed minimum reduction of the scope of the investments.

This assessment was carried out in variety of ways, including but not limited to, application of the UN Global Compact principles, in relation to sound management practices, employee relations, remuneration of staff and tax compliance as applicable. More information on the Investment Managers ESG investment philosophy, integration in the investment research process, the selection criteria, as well as its ESG related policies, can be found at this website <https://www.pimco.co.uk/engb/investments/esg-investing>

How did this financial product perform compared to the reference sustainable benchmark?

This sub-fund had not designated a reference benchmark to determine whether it was aligned with the environmental and/or social characteristics that it promoted.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.
