# Notes to the Financial Statements

## 1. Material Accounting Policies

### A) General Information

Invesco Markets II plc (the "Company") is an open-ended variable capital company with segregated liability between Funds of the Company ("Funds"). The Company was incorporated on 11 September 2015. It is organised under the laws of Republic of Ireland as a public limited company pursuant to the Companies Act 2014 (as amended) and as an undertaking for collective investment in transferable securities pursuant to the European Communities ("Undertakings for Collective Investment in Transferable Securities") Regulations 2011 (as amended) (the "UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities Regulations 2019 (the "Central Bank UCITS Regulations"). Please see page 7 to 11 for General Information on the Umbrella.

These Financial Statements have been prepared on a going concern basis with the exception of the Invesco MSCI EMU ESG Universal Screened UCITS ETF and Invesco USD High Yield Corporate Bond ESG UCITS ETF which have been prepared on a basis other than going concern. Costs associated with the termination of these Funds will be borne by the Manager with no provision being made in these Financial Statements for such costs. The Financial Statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") endorsed by the European Union (EU), the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended) (the "UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertaking for Collective Investment in Transferable Securities (Amendment) Regulation 2019 (the "Central Bank UCITS Regulations"). The Financial Statements have been prepared under the historical cost convention as modified by the revaluation of financial assets and liabilities held at fair value through profit or loss. The material accounting policies are set out below.

The preparation of Financial Statements in accordance with IFRS, as adopted by the EU, requires the use of certain critical estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the Financial Statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on management's best knowledge of the amount, event or actions, actual results ultimately may differ from those estimates.

The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the Financial Statements are disclosed in Notes 1 c) (iii) and 1 d).

### International Financial Reporting Standards

The principal accounting policies adopted in the preparation of these Financial Statements are set out below. These policies have been consistently applied to the periods presented unless otherwise stated.

#### Standards, amendments and interpretations effective 1 January 2024:

There are no new IFRSs, new amendments or IFRIC interpretations that are effective on 1 January 2024 that would be expected to have any impact on the Funds.

#### Standards, amendments and interpretations not yet effective:

There are no new IFRSs, new amendments or IFRIC interpretations that are not yet effective that would be expected to have any impact on the Funds.

Certain new accounting standards, amendments to accounting standards and interpretations have been published that are not mandatory for 31 December 2024 reporting periods and have not been early adopted by the Funds. These standards, amendments or interpretations are not expected to have a material impact on the Funds in the current or future reporting periods and on foreseeable future transactions.

### B) Functional and presentation currency

The Board of Directors considers the Euro as the currency that most faithfully represents the economic effects of the underlying transactions, events and conditions.

The Financial Statements of the Company are presented in Euro, which is both the functional and presentation currency.

Each individual Fund's functional currency is disclosed on pages 13 and 14.

### Transactions and balances

Foreign exchange gains and losses on financial assets and financial liabilities at fair value through profit or loss are recognised together with other changes in the fair value. Net currency gains/(losses) are net foreign exchange gains and losses on monetary financial assets and liabilities other than those classified at fair value through profit or loss.

Assets and liabilities denominated in foreign currencies, other than the functional currency of the Company, have been translated at the rate of exchange ruling at 31 December 2024. Transactions in foreign currencies are translated into Euro at the exchange rate ruling at the date of the transaction. All gains and losses on foreign exchange are recognised in the Statement of Comprehensive Income in net gains/(losses) on financial assets and financial liabilities at fair value through profit or loss in determining the result for the financial period.

### C) Financial assets and financial liabilities at fair value through profit or loss

#### (i) Classification

IFRS 9 sets out three potential categories for financial assets. These are amortised cost, fair value through other comprehensive income, and financial assets at fair value through profit and loss ("FVTPL"). The classification of financial assets under IFRS 9 is generally based on the business model in which a financial asset is managed and its contractual cash flow characteristics.

# Notes to the Financial Statements (continued)

## 1. Material Accounting Policies (continued)

### C) Financial assets and financial liabilities at fair value through profit or loss (continued)

#### (i) Classification (continued)

A debt instrument is measured at fair value through comprehensive income if the objective of the business model is to hold the financial asset both to collect contractual cash flows from Solely Payments of Principal and Interest ("SPPI") and to sell. All other debt instruments must be recognised at fair value through profit or loss. An entity may however, at initial recognition, irrevocably designate a financial asset as measured at fair value through profit or loss if doing so eliminates or significantly reduces a measurement or recognition inconsistency.

Pursuant to IFRS 9, a portfolio of financial assets that is managed and whose performance is evaluated on a fair value basis is neither held to collect contractual cash flows or held both to collect contractual cash flows and to sell financial assets. The Company is primarily focused on fair value information and uses that information to assess the assets' performance and to make decisions. In addition, a portfolio of financial assets that meets the definition of held for trading is not held to collect contractual cash flows or held both to collect contractual cash flows and to sell financial assets. For such portfolios, the collection of contractual cash flows is only incidental to achieving the business model's objective. Consequently, such portfolios of financial assets must be measured at FVTPL.

The carrying amounts of cash and cash equivalents, accrued interest income from financial assets at fair value through profit or loss, amounts due from/to brokers, accrued management fees and distributions payable is approximate fair value due to the immediate or short term nature of these financial instruments.

The Company's financial assets and liabilities are initially recorded at their transaction price and then measured at fair value subsequent to initial recognition. Gains and losses arising from changes in the fair value of the 'financial assets or financial liabilities at fair value through profit or loss' category are presented in the Statement of Comprehensive Income in the financial year in which they arise.

Financial assets other than financial assets at fair value through profit or loss include cash and cash equivalents, balances due from brokers, dividend income receivable, capital shares receivable, interest from financial assets at fair value through profit and loss receivable and accrued income and other receivables.

Financial liabilities that were not at fair value through profit or loss include bank overdraft, balances due to brokers, capital shares payable, variation margin payable, creditors (amounts falling due within one year) and financial liabilities arising on redeemable shares.

All of the Funds' investments are classified as financial assets and financial liabilities at fair value through profit or loss as at 31 December 2024 and 31 December 2023.

#### (ii) Recognition, derecognition and measurement

Regular purchases and sales of financial assets are recognised on the trade date. Any gains and losses, arising from changes in fair value of the financial assets or financial liabilities, are recorded from this date.

The Company recognises financial assets and financial liabilities on the date it becomes a party to the contractual provisions of the instrument, and all significant rights and access to the benefits from the assets or liabilities, and the exposure to the risks inherent in those benefits, are transferred to the Company. The Company derecognises financial assets and financial liabilities when all such benefits and risks are transferred from the Company. Investment transactions are recorded on a trade date basis. Realised gains and losses are based on the high cost method for all Funds. Dividends and interest arising on the investments are recognised as income of the Company on an ex-dividend or interest date, and interest arising on deposits of the Company, are recognised on an accrual basis and effective interest basis, respectively.

Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value of the 'financial assets or financial liabilities at fair value through profit or loss' category are presented in the Statements of Comprehensive Income with other net changes in fair value of financial assets and liabilities at fair value through profit or loss in the financial period in which they arise.

#### (iii) Valuation of investments

The estimation of fair value, after initial recognition, is determined as follows:

##### Listed investments

The Company utilises the last traded market price for both financial assets and financial liabilities where the last traded price falls within the bid-ask spread. In circumstances where the last traded price is not within the bid-ask spread, management will determine the point within the bid-ask spread that is most representative of fair value.

Realised gains or losses on disposal of investments during the financial year and unrealised gains and losses on valuation of investments held at the financial year-end are included in the Statement of Comprehensive Income, within net gains/(losses) on financial assets and financial liabilities at fair value through profit or loss.

The fixed income securities on all Funds were priced at Evaluated Bid (with the exception of the Invesco Variable Rate Preferred Shares UCITS ETF and Invesco US Municipal Bond UCITS ETF which were priced at Evaluated Mid during the financial reporting period and bonds classified as "Other transferable" in the Schedule of Investments which have been fair valued by the Directors).

The Funds actively trade in debt securities, some of which are variable rate. As at 31 December 2024, the Funds did not hold any variable rate debt investments linked to Secured Overnight Financing Rate ("SOFR"). Such investments have the potential to transition to an alternative benchmark prior to being disposed of. The impact of this transition, if any, will be captured in the change in fair value of these investments and is not expected to be material to the Funds.

A forward currency contract involves an obligation to purchase or sell a specific currency at a future date, at a price set at the time the contract is made. Forward currency contracts are valued by reference to the forward price at which a new forward contract at the same size and maturity could be undertaken at the valuation date. The unrealised gain or loss on open forward currency contracts is calculated as the difference between the contract rate and the forward price and is recognised in the Statement of comprehensive income.

Investment funds are valued based upon reference to the latest available net asset value per unit or share of the relevant fund.

#### (iv) Offsetting Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the Statement of Financial Position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the assets and settle the liability simultaneously. No such offsetting has occurred as at 31 December 2024 or 31 December 2023.

# Notes to the Financial Statements (continued)

## 1. Material Accounting Policies (continued)

### D) Critical accounting estimates and assumptions

Management makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. There were no estimates and assumptions that had a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities as of the financial year end date.

All of the Funds' financial assets and financial liabilities were held for the purpose of being traded at fair value through profit or loss.

The application of IFRS 9 and the classification of the financial assets at FVTPL is a key judgement applied by management.

#### *Debt Securities*

The fair value of debt securities are based on evaluated bid prices at the Statement of Financial Position date. Variable Rate Preferred Shares UCITS ETF and US Municipal Bond UCITS ETF fixed income securities are priced at Evaluated Mid prices. The market prices are obtained from reputable pricing sources. The Company would exercise judgement on the quantity and quality of pricing sources used. Where no market price is available the Company will determine the fair value using valuation techniques. These valuation techniques include the use of comparable recent transactions, reference to other instruments that are substantially the same, discounted cash flow analysis and other valuation techniques used by market participants. There were no debt securities valued using such valuation techniques at current or prior year end.

### E) Fees and expenses

In accordance with the Prospectus, the management fees were charged to the Statement of Comprehensive Income on an accruals basis. Other than the management fees, all fees and expenses incurred by the Funds including those payable to the Investment Manager, the Depositary, the Administrator, the Auditor and the Directors were paid by the Manager.

### F) Cash and cash equivalents

As at 31 December 2024 and 31 December 2023, cash in all Funds was held on deposit with The Bank of New York Mellon SA/NV, Dublin Branch. Cash and cash equivalents includes cash in hand, deposits held at call with banks and other short-term investments in an active market with original maturities of three months or less and bank overdrafts. Cash and Cash Equivalents are shown in current assets in the statement of financial positions. Bank overdrafts are shown in current liabilities in the statement of financial position. The Funds are allowed to have an overdraft facility in place which is in line with both the Depositary Agreement (under Depositary Duties) and UCITS regulations. Overdrawn balances are continuously monitored. Per the UCITS regulations, overdrafts are permitted within the set out limits. Intraday credit is provided to support the Funds' efficient portfolio management, as the Depositary cannot prevent overdrafts from occurring. As at 31 December 2024 and 31 December 2023, Margin cash is held with the broker Bank of America Merrill Lynch International, details of which are disclosed in the Schedule of Investments of the relevant sub-funds.

### G) Redeemable shares

Redeemable Shares are redeemable at the Shareholders' option and are classified as financial liabilities. Any distributions on these shares are recognised in the Statement of Comprehensive Income as finance costs.

### H) Fair value of net assets attributable to redeemable shareholders

In accordance with the provisions of the Prospectus and Supplements, investments are valued in line with the valuation policy detailed in Note 1 C) (iii) "Valuation of Investments", on the valuation day for the purpose of determining the net asset value per share for subscriptions and redemptions and for various fee calculations.

### I) Segment reporting

Operating segments are reported in a manner consistent with the internal reporting used by the Chief Operating Decision Maker ("CODM"). The CODM, who is responsible for allocating resources and assessing the performance of the operating segments has been identified as the Board of Directors. The Board of Directors make the strategic resource allocations on behalf of the Company. The Company is managed as one operating segment which invest in equity instruments, debt instruments and related derivatives.

### J) Distribution

The dividend arrangements relating to each Fund will be decided by the Directors at the time of the creation of the relevant Fund and details are set out where applicable in the relevant Supplement.

Under the Articles, the Directors are entitled to declare such dividends on any Class of Shares at such times as they think appropriate and as appear to be justified out of the profits of the relevant Fund, being (i) the accumulated revenue (consisting of all revenue accrued including interest and dividends) less expenses and/or (ii) realised and unrealised capital gains on the disposal/valuation of investments and other Funds less realised and unrealised accumulated capital losses of the relevant Fund and/or the capital of the relevant Fund. Where the dividends will be paid out of the capital of the relevant Fund, this will be disclosed in the relevant Supplement.

The Company total distributions figure should not be read in isolation, it is merely a consolidation of the Funds. Distributions should be viewed on a Fund level. There has not been an over distribution at Company level.

### K) Dividend income

Dividends are credited to the Statement of Comprehensive Income on the dates on which the relevant securities are listed as "ex-dividend". Dividend income is shown gross of any non-reclaimable withholding taxes, which are disclosed separately in the Statement of Comprehensive Income, and net of any tax credits.

### L) Transaction costs

Transaction costs are expensed as incurred. They include fees and commissions paid to agents, advisers, brokers or dealers.

### M) Interest Income and Interest from financial assets at FVTPL/Interest Income receivable and Interest from financial assets at FVTPL receivable

Interest income is recognised on a time-proportionate basis using the effective interest method. Interest income includes interest from cash and cash equivalents.

Interest from financial assets at FVTPL is accrued on an effective yield basis and recognised in the Statement of Comprehensive Income. Interest on securities includes interest and discount earned (net of premium), which is the difference between the face value and the original cost, including original issue discount.

## Notes to the Financial Statements (continued)

### 1. Material Accounting Policies (continued)

#### M) Interest Income and Interest from financial assets at FVTPL/Interest Income receivable and Interest from financial assets at FVTPL receivable (continued)

Interest earned whilst holding investment securities is reported as Interest from financial assets at FVTPL in the Statement of Comprehensive Income, whilst interest due to the Funds is reported as Interest from financial assets at FVTPL receivable in the Statement of Financial Position.

#### N) Balances due to/from brokers

Amounts due to/from brokers represent payables for securities purchased and receivables for securities sold that have been contracted for but not yet delivered or settled as at period end.

#### O) Set up costs

The cost of establishing the Company and the Funds (including fees in connection with the incorporation and registration of the Company, listing the Funds on the relevant stock exchanges and registering the Funds for sale in other jurisdictions) will be paid by Invesco Investment Management Limited (the "Manager"). The cost of establishing subsequent Funds will also be paid by the Manager unless otherwise provided in the Supplement for the relevant Fund.

#### P) Forward foreign currency contracts

A forward agreement is a customised, bilateral agreement to exchange an asset or cash flows at a specified future settlement date at a forward price agreed on the trade date. One party to the forward is the buyer (long), who agrees to pay the forward price on the settlement date; the other is the seller (short), who agrees to receive the forward price. Forward currency contracts could be used to hedge against currency risk that has resulted from assets held by the Funds that are not in the Base Currency. A Fund, may, for example, use forward currency contracts by selling forward a foreign currency against the Base Currency to protect the Funds from foreign exchange rate risk that has risen from holding assets in that currency. Investments in forward currency contracts are classified as Level 2 as they are valued at the close-of-business rates as reported by the pricing vendors utilised by the Administrator of the Fund.

The unrealised gain or loss on open forward foreign currency contracts is calculated as the difference between the contracted rate and the rate to close out the contract and is disclosed in the Statement of Financial Position. Realised gains or losses and changes in unrealised appreciation/depreciation include net results on contracts which have been settled or offset on other contracts and are recorded in the Statement of Comprehensive Income.

#### Q) Open Exchange Traded Futures contracts

Open exchange traded futures contracts ('futures') are fair valued at the official exchange traded price at the close of business on the valuation day to approximate fair value. The fair value, less purchase price, represents the net unrealised gain or loss attributable to these open positions, and is included in the Statement of Financial Position. The difference in the unrealised gain or loss between the current year and the prior year represents the net change in unrealised gain or loss and is included in the Statement of Comprehensive Income.

Margin Cash in relation to the futures is identified in the Schedules of Investments as Margin Cash and is included as a component of cash and cash equivalents on the Statement of Financial Position. As at 31 December 2024, Margin cash is held with the broker Bank of America Merrill Lynch International for the Invesco EUR IG Corporate Bond ESG UCITS ETF, Invesco EUR Corporate Bond ESG Multi-Factor UCITS ETF, Invesco EUR Corporate Bond ESG Short Duration Multi-Factor UCITS ETF, Invesco Euro Corporate Hybrid Bond UCITS ETF, Invesco GBP Corporate Bond ESG UCITS ETF, Invesco GBP Corporate Bond UCITS ETF, Invesco Global High Yield Corporate Bond ESG UCITS ETF, Invesco Global Emerging Markets USD Bond UCITS ETF, Invesco Global Corporate Bond ESG UCITS ETF and Invesco Bulletshares 2029 USD Corporate Bond UCITS ETF (there was no margin cash held as at 31 December 2024). As at 31 December 2023, Margin cash is held with the broker Bank of America Merrill Lynch International for the Invesco EUR IG Corporate Bond ESG UCITS ETF, Invesco EUR Corporate Bond ESG Multi-Factor UCITS ETF, Invesco EUR Corporate Bond ESG Short Duration Multi-Factor UCITS ETF, Invesco Euro Corporate Hybrid Bond UCITS ETF, Invesco GBP Corporate Bond ESG UCITS ETF, Invesco GBP Corporate Bond UCITS ETF, Invesco Global High Yield Corporate Bond ESG UCITS ETF, Invesco Emerging Markets USD Bond UCITS ETF and Invesco USD High Yield Corporate Bond ESG UCITS ETF.

#### R) Withholding Tax

The Funds currently incur withholding tax imposed by certain countries on investment income and capital gains. Such income or gains are reported gross of withholding tax and the withholding tax is shown separately in the Statement of Comprehensive Income.

#### S) Capital shares receivable/Capital shares payable

Capital shares receivable and Capital shares payable redeemed represent amounts that have been contracted for but not yet settled or delivered on the Statement of Financial Position date.

#### T) Securities Lending

A Fund may enter into securities lending agreements if consistent with the investment objective of the Fund and for the purposes of efficient portfolio management, including to generate income or profits in order to increase portfolio returns or to reduce portfolio expenses or risk, in accordance with the requirements and subject to any relevant regulations of the Central Bank. Any Fund that seeks to engage in securities lending should ensure that it is able at any time to recall any security that has been lent out or terminate any securities lending agreement into which it has entered. A Fund may engage in a securities lending programme through the Investment Manager. In order to mitigate the credit risk exposure to the counterparties to any securities lending contract, the lending of a Fund's securities must be covered by high quality and liquid collateral received by a Fund under a title transfer arrangement with a market value at all times at least equivalent to the market value of a Fund's securities lent plus a premium. A Fund's securities can be lent to counterparties over a period of time. The Manager will, at least annually, review and/or confirm the arrangements for securities lending and associated fees invoiced to the relevant Fund, if any. All the revenues arising from efficient portfolio management techniques shall be returned to the relevant Fund following the deduction of any direct and indirect operational costs and fees arising. Such direct and indirect operational costs and fees shall include fees and expenses payable to securities lending agents engaged by the Company. Details of the Funds' revenues arising and attendant direct and indirect operational costs and fees as well as the identity of any specific securities lending agents engaged by the Company are detailed in Note 15 Securities Lending and Collateral. Income earned from securities lending is reported as Securities lending income in the Statement of Comprehensive Income.

# Notes to the Financial Statements (continued)

## 1. Material Accounting Policies (continued)

### U) Capital Gains Tax

In September 2016, Brazil's Department of Federal Revenue updated Ireland's status for Brazilian tax purposes and included Ireland on their list of countries classified as low tax jurisdictions. This resulted in the asset and wealth management industry having to consider whether funds should accrue for potential Brazilian capital gains tax exposures ("CGT") on unrealised gains on their holdings. No Funds in Invesco Markets II plc had exposure to Brazilian investments as at 31 December 2024.

Two Funds in Invesco Markets II plc had exposure to Indian investments as at 31 December 2024 - Invesco MSCI Emerging Markets ESG Universal Screened UCITS ETF and Invesco MSCI Emerging Markets ESG Climate Paris Aligned UCITS ETF. Gains arising from sale of Indian securities are subject to CGT in India. As at 31 December 2024, the Invesco MSCI Emerging Markets ESG Universal Screened UCITS ETF and Invesco MSCI Emerging Markets ESG Climate Paris Aligned UCITS ETF have made a provision of the potential CGT using the applicable tax rates enacted during the financial year. Please refer to the Statement of Comprehensive Income.

Two Funds in Invesco Markets II plc had exposure to Brazilian investments as at 31 December 2023 - Invesco MSCI Emerging Markets ESG Universal Screened UCITS ETF and Invesco MSCI Emerging Markets ESG Climate Paris Aligned UCITS ETF.

Two Funds in Invesco Markets II plc had exposure to Indian investments as at 31 December 2023 - Invesco MSCI Emerging Markets ESG Universal Screened UCITS ETF and Invesco MSCI Emerging Markets ESG Climate Paris Aligned UCITS ETF. Gains arising from sale of Indian securities are subject to CGT in India. As at 31 December 2023, the Invesco MSCI Emerging Markets ESG Universal Screened UCITS ETF and Invesco MSCI Emerging Markets ESG Climate Paris Aligned UCITS ETF have made a provision of the potential CGT using the applicable tax rates enacted during the financial year. Please refer to the Statement of Comprehensive Income.

## 2. Financial risks

As defined by IFRS 7 'Financial Instrument Disclosures', risk arising on financial instruments can be separated into the following components: Market Risk, Credit Risk and Liquidity Risk.

Each type of risk is discussed below and both qualitative and quantitative analyses are provided, where relevant, to give the reader an understanding of risk management methods used by the Investment Manager and reviewed by the Directors of the Company.

The main risks arising from the Funds' financial instruments are market risk, credit risk and liquidity risk. The Company's overall risk management policy focuses on the unpredictability of financial markets and seeks to minimise any discrepancy between the performance of the Funds and the performance of the respective benchmarks.

The nature and extent of the financial instruments outstanding at the Statement of Financial Position date and the risk management policies employed by the Company are discussed below:

### A) General

The risk monitoring process is the responsibility of the Company which has delegated this responsibility to the Manager and the Investment Manager.

The Company's investment objective is that each Fund will seek to provide shareholders with a target performance linked to the performance of a reference index or reference asset by purchasing a portfolio of transferable securities that may (but is not obliged to) comprise all or a representative sample of the constituent securities of that reference index or reference asset.

The Investment Manager is responsible for the operation of the risk management process, including the measurement of risk of each Fund's portfolio at any given time.

The Investment Manager will report in writing at least monthly to the named Designated Person confirming compliance with the guidelines laid down in the Risk Management Policy document and the Prospectus. The Investment Manager will also report at minimum quarterly to the Board of Directors in respect of same.

The risk management technique applying to the Funds is the Commitment Approach. The commitment is calculated in line with ESMA Guidelines 10 788. This ratio merely reflects the usage of all financial derivative instruments of the relevant Fund and is calculated using the sum of notional of all financial derivative instruments, netting and hedging arrangements being considered to reduce exposure. A sensitivity analysis is presented in Note (iii) Market Price Risk to reflect the Commitment Approach which represents the interest rate risk maturity profile for the Funds. Each Fund's global exposure measured in accordance with the "commitment approach" under the Central Bank Guidance entitled UCITS Financial Derivative Instruments and Efficient Portfolio Management, relating to FDI must not exceed its total net asset value.

### B) Market risk

Market risk is the risk that the fair value of a financial instrument will fluctuate because of changes in market prices. Market risk comprises the following type of risk:

- interest rate risk;
- currency risk; and
- market price risk;

#### (i) Interest rate risk

Interest rate risk arises from the effects of fluctuations in the prevailing levels of market interest rates which would cause the fair value of the assets and liabilities and the future cash flows to fluctuate accordingly. The value of debt securities is likely to decline in times of rising interest rates. Conversely, when rates fall, the value of these investments is likely to rise. The longer the time to maturity the greater are such variations. As the majority of the Funds' assets are interest-bearing, it is exposed to this risk.

As the Company may invest in fixed income securities, any change to the relevant interest rates for particular securities may result in the Investment Manager being unable to secure similar returns on the expiry of contracts or the sale of securities. In addition, changes to prevailing interest rates or changes in expectations of future rates may result in an increase or decrease in the value of the securities held. In general, if interest rates rise, the value of the fixed income securities will decline. A decline in interest rates will, in general, have the opposite effect.

## Notes to the Financial Statements (continued)

### 2. Financial risks (continued)

#### B) Market risk (continued)

##### (i) Interest rate risk (continued)

The following tables summarise the exposure to interest rate risk for the financial year ended 31 December 2024. It includes the Funds' assets and trading liabilities at fair values categorised by the earlier of contractual re-pricing or maturity date measured by the carrying value of the assets and liabilities.

A reasonable approximate increase in the net assets attributable to holders of redeemable participating shares due to a 1% (1% is considered to be a reasonable possible change in interest rates) increase/decrease in market interest rates as at 31 December 2024 and 31 December 2023 is also detailed below.

##### (ii) Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

Foreign currency risk, as defined in IFRS 7, arises as the value of future transactions, recognised monetary assets and monetary liabilities denominated in other currencies fluctuate due to changes in foreign exchange rates. IFRS 7 considers the foreign exchange exposure relating to non-monetary assets and non-monetary liabilities to be a component of market price risk not foreign currency risk.

Monetary items are units of currency held and assets and liabilities to be received or paid in a fixed or determinable number of units of currency. Non-monetary items are any other assets and liabilities other than monetary ones.

The Funds, in line with the securities comprising their underlying indices, are exposed to the currency risk of the respective reference index/strategy. The Investment Manager monitors the Funds' currency risk to ensure that it replicates that of the securities comprising the underlying index.

There was no currency risk on the following Funds as the Funds did not hold assets and liabilities denominated in a currency other than the Functional Currency of each Fund at 31 December 2024:

Invesco EUR Corporate Bond ESG Multi-Factor UCITS ETF, Invesco EUR Corporate Bond ESG Short Duration Multi-Factor UCITS ETF, Invesco Variable Rate Preferred Shares UCITS ETF, Invesco MSCI EMU ESG Universal Screened UCITS ETF, Invesco EUR Government and Related Green Transition UCITS ETF, Invesco US Municipal Bond UCITS ETF, Invesco NASDAQ Next Generation 100 UCITS ETF, Invesco NASDAQ-100 Equal Weight UCITS ETF, Invesco S&P 500 Equal Weight UCITS ETF, Invesco S&P 500 Low Volatility UCITS ETF, Invesco USD High Yield Corporate Bond ESG UCITS ETF, Invesco NASDAQ-100 ESG UCITS ETF, Invesco MSCI USA ESG Climate Paris Aligned UCITS ETF, Invesco Dow Jones US Insurance UCITS ETF, Invesco BulletShares 2026 EUR Corporate Bond UCITS ETF, Invesco BulletShares 2027 EUR Corporate Bond UCITS ETF, Invesco BulletShares 2028 EUR Corporate Bond UCITS ETF, Invesco BulletShares 2029 EUR Corporate Bond UCITS ETF and Invesco BulletShares 2030 EUR Corporate Bond UCITS ETF.

There was no currency risk on the following Funds as the Funds did not hold assets and liabilities denominated in a currency other than the Functional Currency of each Fund at 31 December 2023:

Invesco EUR Corporate Bond ESG Multi-Factor UCITS ETF, Invesco EUR Corporate Bond ESG Short Duration Multi-Factor UCITS ETF, Invesco Emerging Markets USD Bond UCITS ETF, Invesco Variable Rate Preferred Shares UCITS ETF, Invesco EUR Government and Related Green Transition UCITS ETF, Invesco US Municipal Bond UCITS ETF, Invesco NASDAQ Next Generation 100 UCITS ETF, Invesco NASDAQ-100 Equal Weight UCITS ETF, Invesco S&P 500 Equal Weight UCITS ETF, Invesco S&P 500 Low Volatility UCITS ETF, Invesco NASDAQ-100 ESG UCITS ETF, Invesco MSCI USA ESG Climate Paris Aligned UCITS ETF and Invesco Dow Jones US Insurance UCITS ETF.

The foreign currency sensitivity analysis overleaf is based on a change in one variable while holding all other variables constant. In practice this is unlikely to occur, and changes in some of the assumptions may be correlated – for example, changes in interest rates. In addition, as the sensitivity analysis uses historical data as a basis for determining future events, it does not encompass all possible scenarios, particularly those that are of an extreme nature. At 31 December 2024 the sensitivity movement used is 10% (2023: 10%) of all monetary assets held in the exposure currency.

At 31 December 2024, had the Euro/ US Dollar/ Pound Sterling strengthened/ (weakened) by 10% in relation to the major currencies listed in the tables overleaf, assuming no hedging of this position, the net assets attributable to redeemable participating Shareholders and the change in net assets attributable to holders of redeemable participating Shares per the Statement of Comprehensive Income of the Funds would have decreased/(increased) by the amounts shown overleaf:

##### (iii) Market price risk

Market price risk is the risk that the value of investments will fluctuate as a result of changes in market price (other than those arising from interest rate risk or currency risk), whether caused by factors specific to an individual investment, its issuer or similar financial instruments traded in the market. For each Fund this risk is in line with the risk of the reference index.

The sensitivity analysis for the Funds assumes a change in the market price of the investments while holding all other variables constant. In practice this is unlikely to occur and changes in some of the variables may be correlated. In addition, as the sensitivity analysis uses historical data as a basis for determining future events, it does not encompass all possible scenarios, particularly those that are of an extreme nature. The reasonably possible decrease in the benchmark index is based on the movement over the financial year ended 31 December 2024. These movements may be different from the long term volatility of the index.

The following tables set forth a sensitivity analysis showing gains and losses that are associated with a fluctuation in market prices of 5% as 31 December 2024:

Fund	Investments	Currency	Fair Value	Change in rate	Effect on NAV
Invesco Preferred Shares UCITS ETF	Equities	USD	182,561,331	+/-5%	+/- 9,128,067

#### C) Credit risk

Credit risk is the risk that one party to a financial instrument or other obligation will cause a financial loss for the other party by failing to discharge an obligation.

The Investment Manager monitors each Fund's credit position on a daily basis.

All transactions in listed securities are settled/paid for upon delivery using approved brokers. The risk of default is considered minimal, as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker. The trade will fail if either party fails to meet its obligation. In accordance with Fund policy, the Investment Manager monitors each Fund credit position on a daily basis; the Board of Directors reviews it on a quarterly basis.

The Funds' Depository is The Bank of New York Mellon, SA/NV, Dublin Branch (the "Depository").

As at 31 December 2024 and 31 December 2023, all of the cash assets are held with The Bank of New York Mellon, SA/NV, Dublin Branch. Please refer to the Statement of Financial Position for cash assets held with The Bank of New York Mellon, SA/NV, Dublin Branch.

As at 31 December 2024 and 31 December 2023, Margin cash is held with the broker Bank of America Merrill Lynch International, details of which are disclosed in the Schedule of Investments of the relevant sub-funds.

Accordingly, in accordance with usual banking practice, the Depository liability to the Funds in respect of such cash deposits shall be that of debtor and the Funds will rank as a general creditor of BNYM (Bank of New York Mellon).

The financial instruments held in custody are held with the Depository except for the futures contracts which are held with the Bank of America Merrill Lynch. These assets are held distinct and separately from the proprietary assets of the Depository. Securities are clearly recorded to ensure they are held on behalf of the Funds. As at 31 December 2024, the Bank of America Merrill Lynch had a long term rating from Standard & Poor's of A+ (31 December 2023: A+).

Both The Bank of New York Mellon SA/NV, Dublin Branch (Ireland) Limited and sub-custodian are wholly owned subsidiaries of BNY Mellon Corporation. As at 31 December 2024 BNY Mellon Corporation had a long term rating from Standard & Poor's of A (31 December 2023: A). For details in relation to the sub-custodian please refer to Appendix V of the Prospectus.

Risk is managed by monitoring the credit quality and financial positions of the Depository the Funds use.

The Funds are exposed to credit risk through the use of a Depository or sub-custodian. The bankruptcy or insolvency of any of these parties may cause the Funds' rights with respect to its assets held by these entities to be delayed or limited.

To mitigate the risks the Funds are exposed to from the use of the Counterparty, the Manager employs appropriate procedures to ensure that the counterparties are reputable institutions and that the credit risk is acceptable to the Funds. The Funds only transacts with Counterparties that are regulated entities subject to prudential supervision, or with high credit-ratings assigned by international credit rating agencies. In addition, the Funds' non-cash assets are maintained by the Depository in segregated accounts. Thus, in the event of insolvency or bankruptcy of the Depository the Funds' non-cash assets are segregated and protected and this further reduces counterparty risk. The Funds will, however, be exposed to the credit risk of the Depository or counterparty/sub-custodian used by the Depository, in relation to the Funds' Cash at Bank held by the Depository. In the event of the insolvency or bankruptcy of the Depository, the Funds will be treated as a general creditor of the Depository in relation to cash holdings of the Funds.

#### D) Liquidity risk

Liquidity risk is the risk that a Fund may not be able to generate sufficient cash resources to settle its obligations in full as they fall due or can only do so on terms that are materially disadvantageous.

The Funds did not withhold any redemptions or did not suspend the NAV during the financial year ended 31 December 2024 or financial year ended 31 December 2023.

Liquidity risk exists when a particular instrument is difficult to purchase or sell.

Liquidity is managed by investing predominantly in UCITS eligible listed securities that are traded in an active market and can be readily disposed. The Fund have therefore limited exposure to liquidity risk.

## Notes to the Financial Statements (continued)

### 2. Financial risks (continued)

#### D) Liquidity risk (continued)

Redeemable Shares are redeemed on demand at the Shareholder's option.

In accordance with the Funds' policy, the Investment Manager monitors the Funds' liquidity position on a daily basis; the Board of Directors reviews it on a quarterly basis.

The Company has the discretion in circumstances set out in the Prospectus to temporarily suspend the calculation of the Net Asset Value of any Fund and the subscription, redemption or exchange of Shares.

The following tables analyse the Funds' financial liabilities into relevant maturity groupings based on the remaining financial year at the statement of financial position date to the contractual maturity date. The amounts in the tables are the contractual undiscounted cash flows. Balances due within twelve months equal their carrying balances as the impact of discounting is not significant. All amounts are stated in the Funds' currency. The contractual cashflows of the forward currency contracts are disclosed within the Schedule of Investments for each Fund.

## Notes to the Financial Statements (continued)

### 2. Financial risks (continued)

#### E) Secondary market trading risk

Even though the Shares may be listed on one or more relevant stock exchanges, there can be no certainty that there will be liquidity in the Shares on any relevant stock exchange or that the market price at which the Shares may be traded on a relevant stock exchange will be the same as or approximately equal to the Net Asset Value per Share.

As the Shares may be dealt in by means of subscription and redemption, the Directors consider that large discounts or premiums in the Net Asset Value of a Fund would not be sustainable. There can be no guarantee that once the Shares are listed on a relevant stock exchange they will remain listed or that the conditions of listing will not change. Trading in Shares on a relevant stock exchange may be halted or suspended due to market conditions or for the reason that, in the relevant stock exchange's view, trading in the Shares is inadvisable, or otherwise pursuant to the relevant stock exchange's rules. If trading on a relevant stock exchange is halted, investors may not be able to sell their Shares until trading resumes however such investors should be able to apply to the Funds to redeem Shares in accordance with the provisions set out in the Prospectus.

#### F) Capital risk management

The capital of the Funds is represented by the net assets attributable to holders of Redeemable Shares. The amount of net assets attributable to holders of Redeemable Shares could change significantly on a daily basis as the Funds are subject to subscriptions and redemptions at the discretion of the Shareholders.

The Funds' individual objectives when managing capital is to safeguard each Fund's ability to continue as a going concern in order to provide returns for Shareholders and to maintain a strong capital base to support the development of the investment activities of the Funds.

#### G) Fair value information

IFRS 13 Fair Value Measurement requires disclosure relating to the fair value hierarchy in which fair value measurements are categorised for assets and liabilities in the Statement of Financial Position. The disclosures are based on a three-level fair value hierarchy for the inputs used in valuation techniques to measure fair value.

The fair value hierarchy has the following levels:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).

Level 3: Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement.

Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The Funds consider observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The fair value of financial assets and liabilities traded in an active market (such as trading securities) are based on quoted market prices at the close of trading on the financial year-end date.

A financial instrument is regarded as quoted in an active market if the quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions.

In the event that market quotes are not readily available for either of these inputs the value of the relevant input will be determined in good faith by the Administrator or another independent service provider, generally based upon recommendations provided by the Investment Manager.

The carrying values of cash and cash equivalents, other receivables and payables are assumed to approximate their fair value.

As at 31 December 2024 and 31 December 2023 such financial assets include cash and cash equivalents, balances due from brokers, dividend income receivable, capital shares receivable, interest from financial assets at fair value through profit and loss receivable and accrued income and other receivables. The financial liabilities include bank overdraft, balances due to brokers, capital shares payable and creditors (amounts falling due within one year). Level 2 is deemed to be the most appropriate categorisation for such assets and liabilities.

Investments, whose values are based on quoted market prices in active markets and therefore classified within Level 1.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within Level 2.

The Schedule of investments shows the investments split by country of origin.

### 4. Management fees

The Management Fee, a percentage of the Net Asset Value of the relevant Class of Shares, is payable by the Company out of the assets of the Funds to the Manager. The Management Fee accrued on each day and was calculated on each Dealing Day and paid monthly in arrears. The Manager paid out of its fees (and not out of the assets of the Funds) the fees and expenses (where appropriate) of the Investment Manager, the Administrator, the Depository, the Directors, the Auditors and the ordinary fees, expenses and costs incurred by the Funds that include set up costs and other administrative expenses as described in the Prospectus. There were no change in rates year on year unless otherwise stated.

The fees in the following table are expressed as a percentage per annum of the Funds' net asset value.

## Notes to the Financial Statements (continued)

### 5. Related party transactions

#### Manager

The Company has appointed Invesco Investment Management Limited to act as Manager to the Company and each Fund. The Manager forms part of the Invesco group of companies, the parent of which is Invesco Limited, a US publicly traded company listed on the New York Stock Exchange with ticker IVZ.

Management fee charged during the year ended 31 December 2024 was EUR 29,314,395 (31 December 2023 : EUR 21,517,650); of which EUR 3,027,238 was outstanding at 31 December 2024 (31 December 2023 : EUR 1,888,923).

#### Directors

The amount paid to Directors in the financial year ended 31 December 2024 by the Manager and the amounts outstanding on 31 December 2024 are disclosed within Operating Expenses and Creditors in the Statement of Comprehensive Income and Statement of Financial Position. The Directors who are also employees of the Invesco Group are not entitled to receive Directors' fees. Please see details above of fee paid to the Manager.

Gary Buxton is a Director of the Company, the Manager and the Chief Operating Officer of the Invesco UK Services Limited. Sarah (Katy Walton) Jones is a Director of the Company and is Head of Legal for Invesco EMEA ETP business. Feargal Dempsey (resigned 31 December 2024) was a Director of the Company and the Manager. Lisa Martensson is a Director of the Company and also a Director of the Manager. Deirdre Gormley (appointed 30 September 2024) is a Director of the Company and the Manager.

The Directors' fees charged during the year ended was EUR 46,250 (inclusive of PAYE) (31 December 2023: EUR 40,000 (inclusive of PAYE)).

#### Investments in Short-Term Investment Funds

For details in relation to the Funds' Investment in short-term investment Funds please refer to "Investment Funds" in the Schedule of Investments. These positions are related to the Manager and Investment Manger of the Funds.

#### Investment Manager

Invesco Capital Management LLC is the Investment Manager to the Funds. The Funds paid no fees directly to the Investment Manager and all other expenses were paid by the Manager on behalf of the Funds.

#### Seed capital

Invesco Capital Management LLC holds the following Redeemable Participating Shares in the below fund:

<b>For the period from 1 January 2024 to 31 December 2024</b>	<b>Opening Balance</b>	<b>Acquired in the period</b>	<b>Redeemed in the period</b>	<b>Closing Balance</b>	<b>% of Net Assets</b>
Invesco USD High Yield Corporate Bond ESG UCITS ETF	169,629	-	(169,629)	-	0.00%

<b>For the period from 1 January 2023 to 31 December 2023</b>	<b>Opening Balance</b>	<b>Acquired in the period</b>	<b>Redeemed in the period</b>	<b>Closing Balance</b>	<b>% of Net Assets</b>
Invesco USD High Yield Corporate Bond ESG UCITS ETF	179,629	-	(10,000)	169,629	47%

#### Significant agreements

##### Authorised Participants

The complete list of Authorised Participants is shown in the General Information section.

Brokerage fees were not paid to the Authorised Participants during the financial year ended 31 December 2024 (31 December 2023 : Nil).

Authorised Participants may purchase and hold Redeemable Shares in the Funds for trading purposes. In addition, the Authorised Participants may hold Redeemable Shares on behalf of clients, on their own account or for the purpose of providing seed capital to the Funds. These holdings may on occasion constitute a large portion of a Fund. From time to time, such holdings may even constitute the majority of assets under management of the Funds. There was no requirement (expressed or implied) on Authorised Participants to maintain positions in a Fund at any time.

## Notes to the Financial Statements (continued)

### 6. Auditors' remuneration

As required under Section 322 of the Companies Act 2014 (as amended), the remuneration for all work carried out by the statutory audit firm in respect of the financial year is as follows:

	Year Ended 31 December 2024 EUR	Year Ended 31 December 2023 EUR
Statutory audit of company accounts	554,636	427,960
PwC Ireland non audit services	78,091	64,091
PwC Network non audit services	388,756	331,099
	<b>1,021,483</b>	<b>823,150</b>

All non audit services relate to Tax services with the exception of €3,291 from PwC Ireland which relates to Swiss Reporting. This is an "other assurance" service.

### 7. Taxation

Under current law and practice, the Company qualifies as an investment undertaking as defined in section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis it is not chargeable to Irish tax on its income or gains. However, Irish tax may arise on the occurrence of a "chargeable event" for certain investors not satisfying one of the criteria outlined below.

A chargeable event includes any distribution payments to Shareholders or any encashment, redemption, cancellation or transfer of Shares and the holding of Shares at the end of each 8 year period beginning with the acquisition of such Shares.

No Irish tax will arise on the Company in respect of chargeable events in respect of:

- A Shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Company, or the Company has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations and the Company is not in possession of any information which would reasonably suggest that the information contained therein is no longer materially correct;
- Certain exempted Irish tax resident Shareholders who have provided the Company with the necessary signed statutory declarations; or
- Any transaction (which might otherwise be a chargeable event) in relation to Shares held in a recognised clearing system as designated by order of the Irish Revenue Commissioners will not constitute a chargeable event. It is the current intention of the Directors that all the Shares in the Company will be held in recognised clearing systems.

Dividends, interest and capital gains (if any) received on investments made by the Company may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its Shareholders.

### 8. Share capital

The authorised share capital of the Company is 2 subscriber shares of €1 each and 1,000,000,000,000 shares of no par value initially designated as unclassified shares and available for issue as shares.

In accordance with the objectives listed in the risk management policies in Note 2, the Company strives to invest the subscriptions of Redeemable Shares in appropriate investments.

Details of the number of shares issued and redeemed during the financial year per Fund are contained overleaf:

## Notes to the Financial Statements (continued)

---

### 10. Soft commission arrangements

It is not currently intended that any soft commission arrangements will be made in respect of the Company.

There were no soft commission arrangements in the current financial year (31 December 2023: none).

---

### 11. Segregation of liability

Under the provisions of the Companies Act 2014 (as amended), the Directors shall maintain for each Fund a separate portfolio of assets. As between Shareholders, each portfolio of assets shall be invested for the exclusive benefit of the relevant Fund. The Shareholders shall only be entitled to the assets and profits of that Fund in which they participate. The Company shall be considered one single legal entity. With regard to third parties, in particular towards the Company's creditors, the Company shall be responsible for all liabilities incurred by a Fund exclusively based on the assets of this relevant Fund. Among the Shareholders, the liabilities of each Fund shall only be incurred to the respective Fund.

While the provisions of the Companies Act 2014 (as amended) provide for segregated liability between Funds, these provisions have yet to be tested in foreign courts, in particular, in satisfying local creditors' claims. Accordingly, it is not free from doubt that the assets of any Fund of the Company may not be exposed to the liabilities of other Funds of the Company.

As at the date of the Financial Statements, the Directors are not aware of any existing or contingent liability of any Fund of the Company.

---

### 12. Operating Segment

IFRS 8 Operating Segments ("IFRS 8") requires a "management approach" under which segment information is presented on the same basis as that used for internal reporting purposes. The Board of Directors are charged with the overall governance of the Company in accordance with the Prospectus and Constitution. Management have determined the Chief Operating Decision Maker ("CODM") as the Board of Directors for the purposes of IFRS 8.

For Management purposes, the Company is organised into one main operating segment, which invests in equity instruments, debt instruments and related derivatives. All the Company's activities are interrelated and each activity is dependent on the others. Accordingly, all significant operating decisions are based upon analysis of the Company as one segment. The financial results from this segment are equivalent to the financial statements of the Company as a whole.

The Funds have no assets classified as non-current assets.

The Funds have highly diversified portfolios of investments and no single investment accounts for a significant portion of the Company's income.

#### **Products and Services**

As of the Company's revenues are derived from one product grouping, namely the portfolio securities and derivative instruments invested in by the Funds in order to track the performance of their respective indices.

#### **Geographical areas**

The Company does not separately monitor revenues from different geographical areas. However, by their nature of tracking indices which represent specific markets in specific regions, each Fund's revenue may be considered as being attributed to the region stated in its investment objective.

#### **Major Customers**

As the Company is an investment company, its distinct major customers are from institutional investors who make the primary market for the Funds' shares. The investments are allocated across 48 distinct Funds which each have a separate Schedule of Investments.

## Notes to the Financial Statements (continued)

### 13. Transaction Costs

In order to achieve its investment objective, the Company incurs transaction costs in relation to trading activity on its portfolios.

The transaction costs below were incurred by the Funds during the financial year ended 31 December 2024 and are included within the net gains/(losses) on financial assets and financial liabilities at fair value through profit or loss figures in the Statement of Comprehensive Income:

### 14. Efficient Portfolio Management

The Company may, on behalf of each Fund and subject to the conditions and within the limits laid down, by the Central Bank of Ireland, employ techniques and instruments relating to transferable securities for efficient portfolio management purposes a list of which are set out in the relevant Supplement for each Fund. Transactions for the purposes of efficient portfolio management maybe undertaken with a view to achieving a reduction in risk, a reduction in costs or the generation of additional capital or income for the relevant Fund with an appropriate level of risk, taking into account the risk profile of the Funds as described in this Prospectus and the relevant Supplement and the risk diversification rules set out in the Central Bank Regulations. Subject to the Regulations and to the conditions within the limits laid down by the Central Bank, the Company, on behalf of a Fund may invest in FDIs dealt on a regulated market and/or OTCs which will be used for investment purposes, hedging and/or efficient portfolio management purposes.

The FDIs in which a Fund may invest are spot and forward currency contracts, options on securities, indices and currencies, Swaps, credit default swaps, futures and options on futures and when issued and forward commitment securities further details of which will be set out in the relevant Supplement. Such techniques and instruments will be utilised in accordance with the requirements of the Central Bank of Ireland. New techniques and instruments may be developed which may be suitable for use by the Company and the Company (subject as aforesaid) may employ such techniques and instruments.

The Funds may also enter into securities lending for the purpose of efficient portfolio management and this may reduce the Minimum Equity Ratio of the Funds. However, the qualifying Fund will ensure that they maintain a minimum continuous investment of more than 50% of their net asset value into equities.

For UCITS which have engaged in EPM techniques, certain disclosures are required under Chapter 4 of the Central Bank UCITS Regulations. The Investment Advisers of the Funds have identified all Financial Derivative Instruments (FDIs) which are used for EPM. A UCITS is required to disclose the revenues arising from EPM techniques for the entire reporting period together with the direct and indirect operational costs and fees incurred.

Details of forward foreign exchange contracts and futures transactions are reflected within the Schedule of Investments of each fund where held.

### 15. Securities Lending and Collateral

A Fund may enter into securities lending, repurchase and/or reverse repurchase agreements if consistent with the investment objective of the Funds and for the purposes of efficient portfolio management, including to generate income or profits in order to increase portfolio returns or to reduce portfolio expenses or risk, in accordance with the requirements and subject to any relevant regulations of the Central Bank. A maximum of 90% of an individual security held by a Fund will be subject to securities lending. The proportion of assets per Fund that may be subject to securities lending will be up to a maximum of 50% for all Government Bond Funds, for all other Fixed Income Funds a maximum of 30%.

The maximum proportion of a Fund's assets that may be subject to securities lending is 100% and the expected proportion of a Fund's assets that may be subject to securities lending are between 0% and 30% for Equity and Bond Funds.

The securities lending agent appointed pursuant to the Securities Lending Authorisation Deed is The Bank of New York Mellon SA/NV ("Bank").

At 31 December 2024, there was securities lending on Funds listed in the tables overleaf. These tables show the securities lending income earned. This securities lending income earned is net of the lending agent fee.

As per the Securities Lending Authorisation Deed, the Bank is authorised and directed to invest and re-invest all or substantially all of the collateral received in any approved investments as specified to be "No Cash Collateral other than for the purposes set out in Schedule 1" of the Securities Lending Authorisation Deed. All approved investments shall be for the account and risk of the lender. To the extent any loss arising out of approved investments results in a deficiency in the amount of collateral available to return to a borrower, the lender agrees to pay the Bank on demand cash in amount equal to such deficiency. As at 31 December 2024 and 31 December 2023, there was no collateral re-invested.

As at 31 December 2024 and 31 December 2023, there was no cash collateral held by the Funds.

The amount of collateral obtained under a securities lending arrangement must be of at least 100% of the daily marked to market value of the stocks on loan.

As per the Securities Lending Authorisation Deed, the non-cash collateral can consist of Debt obligations and securities issued by a government where such government is a ratified member of the Organization for Economic Co Operation and Development, or by the government of Singapore.

The value of securities on loan by counterparty and the value and type of collateral held by the Company in respect of those securities as at 31 December 2024 are detailed as overleaf:

Invesco Defence Innovation UCITS ETF launched on 29 October 2024.

Invesco Defence Innovation UCITS ETF - Class A Acc launched on 29 October 2024.

#### The following funds Liquidated

Effective 14 August 2024, Invesco MSCI EMU ESG Universal Screened UCITS ETF was liquidated.

Effective 7 November 2024, Invesco USD High Yield Corporate Bond ESG UCITS ETF was liquidated.

#### Prospectus

An updated Prospectus was issued on 28 May 2024.

Effective 28 May 2024, the securities lending limit for equity funds was raised from 15% to 30%.

An Appendix to the Prospectus was issued on 25 October 2024. The Appendix contains a list of all Funds of Invesco Markets II plc currently approved by the Central Bank.

#### Index methodology change

Effective 1 May 2024, the index methodology and index name changed with respect of following Funds:

Invesco S&P World Energy ESG UCITS ETF: S&P Developed Ex-Korea LargeMidCap ESG Enhanced Energy Index changed to S&P World ESG Enhanced Energy Index.

Invesco S&P World Financials ESG UCITS ETF: S&P Developed Ex-Korea LargeMidCap ESG Enhanced Financials Index changed to S&P World ESG Enhanced Financials Index.

Invesco S&P World Health Care ESG UCITS ETF: S&P Developed Ex-Korea LargeMidCap ESG Enhanced Health Care Index changed to S&P World ESG Enhanced Health Care Index.

Invesco S&P World Information Technology ESG UCITS ETF: S&P Developed Ex-Korea LargeMidCap ESG Enhanced Information Technology Index changed to S&P World ESG Enhanced Information Technology Index.

#### Appointment of Director

Ms. Deirdre Gormley was appointed as Independent Non-Executive Director to the Board with effective date 30 September 2024.

#### Resignation of Director

Mr. Feargal Dempsey resigned as Chairman on 30 September 2024 and from the Board and the Manager on 31 December 2024.

#### Management Fee Reduction

Effective 19 March 2024, the management fee of Invesco Euro Government Bond UCITS ETF was lowered from 0.10% to 0.07%.

#### Pillar II

Invesco has assessed the applicability of the OECD's Pillar II model rules and concluded that these rules do not apply to the Invesco Markets II plc for the financial year ended 31 December 2024. Invesco Markets II plc meets the definition of an Investment Entity as provided for in S111A TCA 1997. Each fund meets the definition of an Investment Entity and therefore should be equally excluded from the definition of a qualifying entity. In accordance with IAS 12, the Fund has not recognized any current or deferred tax liabilities related to Pillar II.

#### Credit Suisse AT1 Bonds

As previously advised, following the write down of the Credit Suisse AT1s on 19 March 2023, the Fund and Management Company boards continue to review the fund's position in respect of the write down of its interest in such holding and a claim was filed on behalf of the Fund to preserve its position. To date there has been no material updates in the litigation relating to Credit Suisse AT1's. Subsequently, a private market for the acquisition of Credit Suisse AT1 claims has emerged that may provide a mechanism for some realisation of value for the legacy Credit Suisse AT1 position being achieved.

This market for Credit Suisse AT1 claims is still evolving, but due to its OTC nature and the variation of terms that may be involved in any sale, the likelihood of realizing value and corresponding ability to ascribe a valuation to the claim is, at this time, uncertain. Consequently, the boards have determined that, consistent with the approach adopted since [19 March 2023], no value can currently be attributed to the legacy AT1 position for inclusion in the NAV. If this position clarifies such that the ability to realise value becomes more certain, then a value may in the future be attributed and included in the NAV, however, that may not be until such time as a sale of the claim, if any, were to materialise. There can be no guarantee that the fund will be able to realise any value in respect of these claims in future and the board reserves the ability to deal with the claims as it deems appropriate in future, including without limitation, by accessing an OTC market.

## Notes to the Financial Statements (continued)

### 18. Significant events during the financial year (continued)

There were no other significant events during the financial year ended 31 December 2024.

### 19. Significant events since the financial year end

On 5 April 2025 President Trump imposed trade tariffs which caused adverse market conditions and uncertainty on the political and economic front. The impact on the economies, markets and industries continues to evolve. The Directors are monitoring the situation during this period of uncertainty to assess any impact the situation may have on Invesco funds.

There were no other significant events since the financial year end.

### 20. Reconciliation to the published NAV

The published NAV is adjusted for subscriptions receivable in excess of 50bps of the NAV which have a value date of the last NAV of the Fund in the accounting year, in accordance with accounting standards for reporting purposes.

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. Where the number of purchases/sales transactions exceeding 1% of the total value of purchases/sales for the financial period is less than 20, then a minimum of 20 purchases/sales will be disclosed.

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. Where the number of purchases/sales transactions exceeding 1% of the total value of purchases/sales for the financial period is less than 20, then a minimum of 20 purchases/sales will be disclosed.

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. Where the number of purchases/sales transactions exceeding 1% of the total value of purchases/sales for the financial period is less than 20, then a minimum of 20 purchases/sales will be disclosed.

**Statement of Changes in Composition of Portfolio

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. Where the number of purchases/sales transactions exceeding 1% of the total value of purchases/sales for the financial period is less than 20, then a minimum of 20 purchases/sales will be disclosed.

**Statement of Changes in Composition of Portfolio  
for the financial year ended 31 December 2024 (Unaudited)**

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. Where the number of purchases/sales transactions exceeding 1% of the total value of purchases/sales for the financial period is less than 20, then a minimum of 20 purchases/sales will be disclosed.

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. Where the number of purchases/sales transactions exceeding 1% of the total value of purchases/sales for the financial period is less than 20, then a minimum of 20 purchases/sales will be disclosed.

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. Where the number of purchases/sales transactions exceeding 1% of the total value of purchases/sales for the financial period is less than 20, then a minimum of 20 purchases/sales will be disclosed.

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. Where the number of purchases/sales transactions exceeding 1% of the total value of purchases/sales for the financial period is less than 20, then a minimum of 20 purchases/sales will be disclosed.

\*Fund liquidated on the 14 August 2024.

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. Where the number of purchases/sales transactions exceeding 1% of the total value of purchases/sales for the financial period is less than 20, then a minimum of 20 purchases/sales will be disclosed.

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. Where the number of purchases/sales transactions exceeding 1% of the total value of purchases/sales for the financial period is less than 20, then a minimum of 20 purchases/sales will be disclosed.

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. Where the number of purchases/sales transactions exceeding 1% of the total value of purchases/sales for the financial period is less than 20, then a minimum of 20 purchases/sales will be disclosed.

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. Where the number of purchases/sales transactions exceeding 1% of the total value of purchases/sales for the financial period is less than 20, then a minimum of 20 purchases/sales will be disclosed.

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. Where the number of purchases/sales transactions exceeding 1% of the total value of purchases/sales for the financial period is less than 20, then a minimum of 20 purchases/sales will be disclosed.

**Statement of Changes in Composition of Portfolio  
for the financial year ended 31 December 2024 (Unaudited)**

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. Where the number of purchases/sales transactions exceeding 1% of the total value of purchases/sales for the financial period is less than 20, then a minimum of 20 purchases/sales will be disclosed.

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. Where the number of purchases/sales transactions exceeding 1% of the total value of purchases/sales for the financial period is less than 20, then a minimum of 20 purchases/sales will be disclosed.

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. Where the number of purchases/sales transactions exceeding 1% of the total value of purchases/sales for the financial period is less than 20, then a minimum of 20 purchases/sales will be disclosed.

\*Fund launched on the 17 June 2024.

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. Where the number of purchases/sales transactions exceeding 1% of the total value of purchases/sales for the financial period is less than 20, then a minimum of 20 purchases/sales will be disclosed.

\*Fund launched on 21 May 2024.

Due to trading volumes, the above details all of the sales transactions which occurred during the financial period.

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. Where the number of purchases/sales transactions exceeding 1% of the total value of purchases/sales for the financial period is less than 20, then a minimum of 20 purchases/sales will be disclosed.

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. Where the number of purchases/sales transactions exceeding 1% of the total value of purchases/sales for the financial period is less than 20, then a minimum of 20 purchases/sales will be disclosed.

\*Fund launched on the 18 June 2024.

Due to trading volumes, the above details all of the sales transactions which occurred during the financial period.

The CBI requires a schedule of material changes in the composition of the portfolio during the financial period. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the financial period and aggregate disposals greater than one per cent of the total value of sales. Where the number of purchases/sales transactions exceeding 1% of the total value of purchases/sales for the financial period is less than 20, then a minimum of 20 purchases/sales will be disclosed.

## Additional Information (Unaudited)

### Remuneration Disclosure (Unaudited) – Invesco Investment Management Limited

Invesco Investment Management Limited (the “Management Company”) has adopted a remuneration policy which is consistent with the principles outlined in the European Securities and Markets Authority (ESMA) Guidelines on sound remuneration policies under the UCITS Directive.

The policy was revised in 2024, to include specificities for some Invesco EU regulated Management Companies. The Management Company was not impacted by the changes.

The purpose of the remuneration policy is to ensure the remuneration of the staff of the Management Company is consistent with and promotes sound and effective risk management, does not encourage risk-taking which is inconsistent with the risk profiles, rules or instruments of incorporation of the Manager and of the UCITS it manages and does not impair the Management Company's compliance with its duty to act in the best interests of the UCITS it manages. The Management Company's summary remuneration policy is available on our website ([www.invescomanagementcompany.ie](http://www.invescomanagementcompany.ie)). The Management Company's full remuneration policy is available for free from the registered office (see address page 9) upon request.

The remuneration policy is reviewed annually by the Compliance, Human Resources and Risk Management functions who recommend any adjustments to ensure continued alignment of the policy with sound risk management. The board of directors of the Management Company is responsible for the oversight of remuneration and for ensuring adherence to this policy through the Human Resources function.

The Internal Audit function conducts regular testing of administration of the remuneration policy to assess its ongoing compliance with the Invesco Group's remuneration policies and procedures.

The aggregate total remuneration for the staff of the Management Company during performance year 2024 (1 January 2024 to 31 December 2024) is EUR 10.93m of which EUR 9.02m is fixed remuneration and EUR 1.91m is variable remuneration. The number of beneficiaries is 66.

The Management Company has identified individuals considered to have a material impact on the risk profile of the Management Company or the UCITS it manages (Identified Staff), who include board members of the Management Company, senior management, heads of control functions, other risk takers and any employees receiving total remuneration that takes them into the same remuneration bracket as senior management and risk takers.

The aggregate total remuneration paid to the Identified Staff of the Management Company for UCITS related activities for the performance year 2024 (1 January 2024 to 31 December 2024) is EUR 5.17m of which EUR 3.29m is paid to Senior Management and EUR 1.88m is paid to other Identified Staff. Please note the total remuneration for Identified Staff of the Management Company for UCITS related activities includes remuneration for staff employed by delegates.

### Securities Financing Transactions Regulation (continued)

The collaterals are held in the name of the Lending Agent Lender to the order of its clients; the actual segregation to underlying client level is done with the Lending Agent's books and records. The collaterals are held on account at the tri-party agent, who acts as a settlement and collection service for securities and collateral between the lender and the borrower. The tri-party agents used but not limited to, The Bank of New York Mellon, London Branch, JPMorgan Chase Bank N.A and Euroclear Bank. For bilateral transactions, the collaterals are held on account at the Agent Lender.

The following tables provide an analysis of the amounts held at each collateral agent as non-cash collateral received in respect of securities lending transactions as at 31 December 2024:.

Fund	Collateral agent	Aggregate value of collateral held

### Securities Financing Transactions Regulation (continued)

The type and quality of collateral obtained in respect of securities lending transactions are as follows:

(1) Debt obligations and securities issued by a government where such government is a ratified member of the Organization for Economic Co-Operation and Development, or by the government of Singapore. Debt obligations and securities issued by agencies and instrumentalities of these same governments are also acceptable. In each case, the issuer of the debt obligation or security shall be rated (i) A or better by Standard & Poor's, or (ii) A or better by Fitch, or (iii) A2 or better by Moody's, or (iv) A or better by DBRS.

(2) Debt obligations issued by the following supranational issuers, where such issuer has a rating of (i) AA or better by Standard & Poor's, or (ii) AA or better by Fitch, or (iii) Aa2 or better by Moody's, or (iv) AA or better by DBRS.\*\*: European Bank for Reconstruction and Development; European Investment Bank; European Union; European Stability Mechanism, Inter-American Development Bank; International Bank for Reconstruction and Development; International Finance Corporation; European Financial Stability Facility; Eurofima; Council of Europe Development Bank; Eutelsat; Organisation for Economic Co-operation and Development; African Development Bank; Asian Development Bank; Bank of International Settlements; Euratom; European Coal and Steel Community; International Development Association; International Monetary Fund; Nordic Investment Bank;

(3) equity securities from the following indices: AEX 25 (Netherlands), CAC 40 (France), DAX 30 (Germany), Euro 50 (Eurozone), FTSE 100 (United Kingdom), Nikkei 225 (Japan), SMI 20 (Switzerland), S&P 500 (United States of America);

(4) FTSE100 DBV (Class F10) as define in the Crest Reference Manual; and

(5) unstripped British Government Stock (Class UBG) as defined in the CREST Reference Manual.

The following tables provide an analysis of the type and quality of non-cash collateral received in respect of securities lending transactions as at 31 December 2024:

The following sub-funds are classified as financial products with a sustainable investment objective as described in Article 9 of SFDR (the "Article 9 Funds" and each, an "Article 9 Fund"):

Invesco Global Clean Energy UCITS ETF  
Invesco Wind Energy UCITS ETF  
Invesco Hydrogen Economy UCITS ETF  
Invesco MSCI Europe ESG Climate Paris Aligned UCITS ETF  
Invesco MSCI USA ESG Climate Paris Aligned UCITS ETF  
Invesco MSCI Japan ESG Climate Paris Aligned UCITS ETF  
Invesco MSCI World ESG Climate Paris Aligned UCITS ETF  
Invesco MSCI Emerging Markets ESG Climate Paris Aligned UCITS ETF

Article 11(1) of SFDR requires certain information to be disclosed in the audited financial statements where a sub-fund is classified as an Article 8 Fund or an Article 9 Fund within the meaning of SFDR. This information is required to be presented in the form of the template set out in the SFDR Annexes to the financial statements for Article 8 and Article 9 Funds of Commission Delegated Regulation (EU) 2023/363 of 31 October 2022 amending and correcting the regulatory technical standards laid down in Delegated Regulation (EU) 2022/1288 supplementing SFDR. Further information on the environmental and/or social characteristics promoted by the Article 8 Funds and the sustainable investment objectives of the Article 9 Funds during the year can be found in the annexes to these financial statements.

The data used to complete the disclosures set out in the SFDR Annexes to these financial statements for the Article 8 Funds and Article 9 Funds is provided by the relevant index provider and other third-party sources. The data used is the data available as at the date at which the disclosures were produced and is based on backward-looking analysis. The analysis is dependent on companies disclosing relevant data and the availability of this data can be limited. Data may also be incomplete, inaccurate and/or contain errors that may not be detected by the Manager and the relevant index provider. It has been observed that the availability and accuracy of data, from the relevant index provider, third party data providers and underlying investee companies, continues to be challenging in some respects. Additionally, the regulations are still relatively new and best practice may change over time. The disclosures included in the Annexes to these financial statements should consequently be read and understood in light of these continuing challenges. With the assistance of the Manager and the Investment Manager, the Board continues to monitor the ongoing development and evolution of sustainability-related regulation and associated guidance, market practice and the availability of relevant third party and investee companies' data in this regard.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco USD IG Corporate Bond ESG UCITS ETF

Legal entity identifier: 63540083DFQPKM6KHS64

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** \_\_\_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** \_\_\_\_\_%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 48.59 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were to increase overall exposure to issuers demonstrating a robust ESG profile i.e. issuers with a more favourable ESG rating compared to similar issuers. The fund also reduced its exposure to companies involved in certain business activities and those with involvement in very severe ESG controversies.

The Fund achieved the environmental and social characteristics by tracking the Bloomberg MSCI USD Liquid Corporate ESG Weighted SRI Bond Index ("**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

#### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as follows as at 31 December 2024, the data is representative of

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

the reference period:

Sustainability Indicator	Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the Bloomberg US Corporate Bond Index (the " <b>Parent Index</b> ")	8.0% improvement
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Parent Index	74.0% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

Compared to last period the MSCI ESG Score improvement (8.2%) and the CO2 emissions intensity reduction (81.5%) for the Fund are slightly lower. The Fund continues to avoid companies excluded by the Reference Index.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The sustainable investments made by the fund contributed to environmental objectives such as climate change, water management, pollution prevention, and to social objectives such as good health, well-being and gender equality. The Fund achieved those objectives by investing in constituents of the Reference Index. According to Invesco's sustainable investment framework, a percentage (as disclosed above) of constituents of the Reference Index contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index or had their weightings reduced.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The index methodology directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those facing very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score, and adjustment of the weighting for those that are above the threshold based on these same scores, the index also addressed a number of other adverse indicators. The index also excluded any companies where data wasn't available to make such assessments.

MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to carbon emissions, product carbon footprint, biodiversity & land use, toxic emissions & waste, opportunities in renewable energy. The scores also take into account areas such as human capital as well as corporate governance, considering ownership & control, pay and the board.

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to biodiversity & land use, energy & climate change, toxic emissions & waste, operational waste, discrimination & workforce diversity, and governance structures. Any company that violates the UN Global Compact receives a very severe MSCI Controversy Score.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights is captured in the index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that weren't compliant with the UN Global Compact, this set of ten principles show significant overlap with both the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. With regards to OECD, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the United Nations Global Compact, the International Labour Organisation's conventions, and the United Nations Guiding Principles on Business and Human Rights.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

As noted above, the Fund considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

The below table shows the PAI scores for the fund, the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	271.10	91.29	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		98.30	91.29	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		5,787.25	91.29	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		6,156.65	91.29	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	267.77	91.29	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,024.70	99.60	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	1.69	99.98	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	57.24	77.91	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	21.09	38.32	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.10	0.03	
	Electricity, Gas, Steam & Air Conditioning Supply	2.03	2.91	
	Manufacturing	0.16	21.73	
	Mining & Quarrying	1.26	0.72	
	Real Estate Activities	0.37	1.01	
Transportation & Storage	2.63	2.17		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.43	0.39		
Wholesale & Retail	0.05	4.03		

<b>Biodiversity</b>	Trade & Repair of Motor Vehicles & Motorcycles			
	7. Activities negatively affecting biodiversity-sensitive areas	4.09	99.98	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
<b>Water</b>	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
<b>Waste</b>	9. Hazardous waste and radioactive waste ratio	0.10	92.63	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
<b>Social and employee matters</b>	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	99.98	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	56.05	99.63	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	27.48	3.80	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	36.01	97.83	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.93	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

*Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.*

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of January 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
HSBC HOLDINGS	Financials	0.67%	United Kingdom
BANCO SANTANDER	Financials	0.62%	Spain
BACR FLT 11/2/2033	Financials	0.36%	United Kingdom
SUMITOMO MITSUI	Financials	0.36%	Japan
LLOYDS BK GR PLC	Financials	0.35%	United Kingdom
HSBC FLT 5/24/2032	Financials	0.35%	United Kingdom
DB FLT 1/18/2029	Financials	0.33%	United States
NWG FLT 6/14/2027	Financials	0.32%	United Kingdom
IBM 1.7 5/15/2027	Information Technology	0.32%	United States
MS FLT 4/21/2034	Financials	0.28%	United States
HSBC HOLDINGS	Financials	0.26%	United Kingdom
HSBC HOLDINGS	Financials	0.24%	United Kingdom
T 2.3 6/1/2027	Communication Services	0.24%	United States
HCA INC	Health Care	0.23%	United States
FORD MOTOR CO	Consumer Discretionary	0.23%	United States

## What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

### ● What was the asset allocation?

100.00% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.00% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

48.59% of the Fund's NAV was invested in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	45.58
Communication Services	9.08
Consumer Discretionary	5.87
Information Technology	10.07
Industrials	2.27
Consumer Staples	3.43
Energy	2.78
Real Estate	1.01
Health Care	15.38
Materials	0.77
Utilities	3.76
<b>Total</b>	<b>100.00</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.28
10102010	Integrated Oil & Gas	0.00
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.32
10102040	Oil & Gas Storage & Transportation	2.09
10102050	Coal & Consumable Fuels	0.09
<b>Total</b>		<b>2.78</b>

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a

#### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0% of the Fund's portfolio was aligned with the EU Taxonomy.

substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas       In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund continues to have 0% alignment with the EU Taxonomy, as with the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

As the Fund does not currently intend to be EU Taxonomy aligned, 6.11% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. Currently the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

**What was the share of socially sustainable investments?**

42.48% of the Fund's NAV.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

NA

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information on how the indicators performed during the reference period.

## How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

### ● **How does the reference benchmark differ from a broad market index?**

The Reference Index differs from a broad market index because it seeks to increase overall exposure to issuers demonstrating both a robust ESG profile, and issuers that are assigned more favourable ESG scores using MSCI ESG metrics.

### ● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

As the Fund aims to replicate the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index)	7.06	7.06
CO2 emissions intensity (Scope 1+2/Revenue)	58.8	58.2
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

### ● **How did this financial product perform compared with the reference benchmark?**

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

### ● **How did this financial product perform compared with the broad market index?**

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and Parent

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Index differed as below:

<b>Sustainability Indicator</b>	<b>Fund Indicator Performance</b>	<b>Broad Market benchmark (Parent Index) Indicator Performance</b>
MSCI ESG Score (as defined in the methodology of the Reference Index)	7.06	6.54
CO2 emissions intensity (Scope 1+2/Revenue)	58.8	226.0
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 16.5% exposure to excluded companies at the latest Reference Index rebalance date

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco EUR IG Corporate Bond ESG UCITS ETF

Legal entity identifier: 635400LW19MN29H61R85

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** \_\_\_\_\_ %

- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** \_\_\_\_\_ %

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 65.39 % of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to increase overall exposure to issuers demonstrating a robust ESG profile i.e. issuers with a more favourable ESG rating compared to similar issuers. The fund also reduced its exposure to companies involved in certain business activities and those with involvement in very severe ESG controversies.

The Fund achieved the environmental and social characteristics by tracking the Bloomberg MSCI Euro Liquid Corporate ESG Weighted SRI Bond Index ("**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

#### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as follows as at 31 December 2024, the data is representative of

the reference period:

Sustainability Indicator	Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the Bloomberg Euro Aggregate Corporate Index (the "Parent Index")	6.4% improvement
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Parent Index	22.2% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

Compared to last period the MSCI ESG Score improvement (10.7%) and the CO2 emissions intensity reduction (29.7%) for the Fund are slightly lower. The Fund continues to avoid companies excluded by the Reference Index.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The sustainable investments made by the Fund contributed to environmental objectives such as climate change, water management, pollution prevention, and to social objectives such as good health, well-being and gender equality. The Fund achieved those objectives by investing in constituents of the Reference Index. According to Invesco's sustainable investment framework, a percentage (as disclosed above) of constituents of the Reference Index contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index or had their weightings reduced.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The index methodology directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those facing very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score, and adjustment of the weighting for those that are above the threshold based on these same scores, the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data wasn't available to make such assessments.

MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to carbon emissions, product carbon footprint, biodiversity & land use, toxic emissions & waste, opportunities in renewable energy. The scores also take into account areas such as human capital as well as corporate governance, considering ownership & control, pay and the board.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to biodiversity & land use, energy & climate change, toxic emissions & waste, operational waste, discrimination & workforce diversity, and governance structures. Any company that violates the UN Global Compact receives a very severe MSCI Controversy Score.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") is captured in the index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that weren't compliant with the UN Global Compact (the "**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the UNGC, the International Labour Organisation's conventions, and the UN Guiding Principles on Business and Human Rights.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

The below table shows the PAI scores for the fund, the data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	5,758.54	79.07	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		1,250.64	79.07	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		67,608.16	79.07	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		74,617.33	79.07	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	420.29	79.07	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,264.69	99.20	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.19	99.67	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	56.22	79.02	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	17.59	28.77	
	6. Energy consumption intensity per high impact climate sector			
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.15	1.04	
	Electricity, Gas, Steam & Air Conditioning Supply	1.12	4.33	
	Manufacturing	0.50	23.44	
	Mining & Quarrying	0.42	0.15	
Real Estate Activities	0.56	4.84		
Transportation & Storage	0.78	2.37		
Water Supply,	1.20	0.12		

	Sewerage, Waste Management & Remediation Activities			
	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.18	0.49	
<b>Biodiversity</b>	7. Activities negatively affecting biodiversity-sensitive areas	0.96	99.68	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
<b>Water</b>	8. Emissions to water	0.00	0.52	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
<b>Waste</b>	9. Hazardous waste and radioactive waste ratio	0.80	79.57	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
<b>Social and employee matters</b>	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	99.68	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	32.06	99.27	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	23.40	4.47	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	40.36	89.56	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster	0.00	99.06	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

munitions, chemical weapons and biological weapons)			
--	--	--	--

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

*Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.*

### What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: From the 1st of January 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
UBS GROUP	Financials	0.23%	Switzerland

### What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

100.00% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.00% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

65.39% of the Fund's NAV was invested in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	50.61
Communication Services	5.88
Consumer Discretionary	5.93
Information Technology	2.75
Industrials	9.45
Consumer Staples	5.47
Energy	0.36
Real Estate	5.04
Health Care	5.88
Materials	3.32
Utilities	4.28
Unclassified	1.03
<b>Total</b>	<b>100.00</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.03
10102010	Integrated Oil & Gas	0.01
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.13
10102040	Oil & Gas Storage & Transportation	0.19
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>0.36</b>

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

6.62% of the Fund's portfolio was aligned with the EU Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

● **What was the share of investments made in transitional and enabling activities?**

The below table shows the share of investments in transitional and enabling activities as the data is representative of the reference period.

	<b>Aligned</b>
<b>Enabling</b>	<b>1.75%</b>
<b>Transition</b>	<b>0.15%</b>

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

As the Fund does not currently intend to be EU Taxonomy aligned, 2.88% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. The Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

**What was the share of socially sustainable investments?**

55.89% of the Fund's NAV.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

NA

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information on how the indicators performed during the reference period.

## How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### ● *How does the reference benchmark differ from a broad market index?*

The Reference Index differs from a broad market index because it seeks to increase overall exposure to issuers demonstrating both a robust ESG profile, and issuers that are assigned more favourable ESG scores using MSCI ESG metrics.

### ● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

As the Fund aims to replicate the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index)	7.73	7.74
CO2 emissions intensity (Scope 1+2/Revenue)	72.1	71.4
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index date rebalance	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

### ● *How did this financial product perform compared with the reference benchmark?*

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

### ● *How did this financial product perform compared with the broad market index?*

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and Parent

Index differed as below:

<b>Sustainability Indicator</b>	<b>Fund Indicator Performance</b>	<b>Broad Market benchmark (Parent Index) Indicator Performance</b>
MSCI ESG Score (as defined in the methodology of the Reference Index)	7.73	7.27
CO2 emissions intensity (Scope 1+2/Revenue)	72.1	92.7
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 15.4% exposure to excluded companies at the latest Reference Index rebalance date

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Invesco EUR Corporate Bond ESG Multi-Factor UCITS ETF **Legal entity identifier:** 549300TSZMM3T873MK60

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** \_\_\_\_\_%
  - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective:** \_\_\_\_\_%

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 63.37 % of sustainable investments
  - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were to gain exposure to a portfolio of corporate bonds which meet the ESG Policy of the Fund.

The Fund achieved the environmental and social characteristics by excluding certain industries and activities that were considered by the Investment Manager to be inconsistent with ESG outcomes. The Fund also applied a proprietary ESG scoring system to ensure investment was made in "best of class" securities. The Funds also maintained a lower carbon intensity of the portfolio relative to the Bloomberg Euro Corporate Bond Index (the "**Benchmark**").

The extent to which the environmental and/or social characteristics promoted by the Fund were met is further detailed in the performance of the sustainability indicators (see below).

The Benchmark is not aligned with the environmental objectives which the Fund seeks to promote. The Fund measures its performance against the Benchmark, but does not seek to track the performance of the Benchmark and the Fund does not intend for its performance to match or exceed the Benchmark. The Fund is actively managed and will hold a portfolio of corporate bonds that is not constrained by the Benchmark.

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

#### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as at 31st of December 2024. The data is representative of the

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

reference period.

Sustainability Indicator	Indicator Performance
Reduction in the initial investment universe after application of the best-in-class measure based on an overall ESG profile score	25.89% reduction
Reduction in the initial investment universe after application of the exclusions depending on business involvement in controversial activities and controversies including violations of the UN Global Compact, based on third party data and the Investment Manager's proprietary analysis and research	43.15% reduction
Reduction in carbon intensity of the Fund as measured against the Benchmark	38.90% reduction

● **...and compared to previous periods?**

Compared to previous period, figures are stable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The sustainable investments made by the Fund contributed to environmental objectives (such as climate change, water management, pollution prevention) and to social objectives (such as good health, well-being and gender equality).

The Fund achieved those objectives by investing in: (i) issuers which contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives; or (ii) companies which generated a material part of their revenue from environmental impact themes such as energy transition, healthcare and food. The Fund also used a best-in-class approach and selected companies scoring higher, when compared to their peers, utilizing the Investment Manager's proprietary scoring methodology.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Fund took into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Fund.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

The Fund addressed a number of other adverse indicators by excluding companies, sectors or countries from the investment universe if they are assessed to have violated international norms and standards according to the definitions of the International Labour Organisation (ILO), the OECD or the United Nations. All issuers considered for investment were screened for compliance with, and excluded if they do not meet, UN Global Compact principles. By limiting of exposure to thermal coal, shale energy and oil sands the Fund also reduced its exposure to greenhouse gas emissions.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment with the OECD Guidelines for Multinational Enterprises (the "OECD Guidelines") and the UN Guiding Principles on Business and Human Rights (the "UN Guiding Principles") was captured through exclusion of companies from the investible universe if they were deemed not to be in alignment.

The Fund excluded companies that weren't compliant with the UN Global Compact (the "UNGC"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

#### **How did this financial product consider principal adverse impacts on sustainability factors?**

As noted above, the Fund considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

The below table shows the PAI scores for the fund from 1st of January 2024 to 31st of December 2024. The data is

representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	382.96	80.84	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		198.40	80.84	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		14,476.98	80.84	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		15,058.34	80.84	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	749.45	80.84	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,349.52	99.52	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.30	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	58.41	83.04	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	5.81	26.96	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.10	1.33	
	Electricity, Gas, Steam & Air Conditioning Supply	0.06	3.67	
	Manufacturing	0.35	27.19	
	Mining & Quarrying	0.01	0.20	
Real Estate Activities	0.66	6.68		
Transportation & Storage	0.37	0.91		
Water Supply, Sewerage, Waste	1.34	0.58		

	Management & Remediation Activities			
	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.02	0.15	
Biodiversity	7. Activities negatively affecting biodiversity-sensitive areas	0.00	99.30	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	2.08	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	1.58	82.50	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	99.30	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	29.83	99.30	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	33.66	4.10	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	40.38	93.25	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons)	0.00	99.52	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

and biological weapons)

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

*Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.*

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of January 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country

### What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

100.00% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.00% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

63.37% of the Fund's NAV was invested in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period

Sector (GICS)	Weight %
Financials	47.56
Communication Services	4.91
Consumer Discretionary	8.92
Information Technology	1.45
Industrials	11.87
Consumer Staples	6.71
Energy	1.27

<b>Total</b>		<b>1.27</b>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

6.06% of the Fund's portfolio was aligned with the EU Taxonomy.

#### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The below table shows the share of investments in transitional and enabling activities as the data is representative of the reference period.

	Aligned
<b>Enabling</b>	<b>2.44%</b>
<b>Transition</b>	<b>0.27%</b>

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

As the Fund does not currently intend to be EU Taxonomy aligned, 50.11% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly

**What was the share of socially sustainable investments?**

7.20% of the Fund's NAV.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

NA

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund sought to attain the environmental characteristics by applying the ESG Policy of the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

In addition, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy. Please refer to the section "How did this financial product consider principal adverse impacts on sustainability factors" for examples of researched issuers during the reference period.

Yes

No

- It made **sustainable investments with an environmental objective:** \_\_\_\_\_%
  - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective:** \_\_\_\_\_%

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 63.2 % of sustainable investments
  - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were to gain exposure to a portfolio of corporate bonds which meet the ESG Policy of the Fund.

The Fund achieved the environmental and social characteristics by excluding certain industries and activities that were considered by the Investment Manager to be inconsistent with ESG outcomes. The Fund also applied a proprietary ESG scoring system to ensure investment was made in "best of class" securities. The Funds also maintained a lower carbon intensity of the portfolio relative to the Bloomberg Euro Corporate Bond Index (the "**Benchmark**").

The extent to which the environmental and/or social characteristics promoted by the Fund were met is further detailed in the performance of the sustainability indicators (see below).

The Benchmark is not aligned with the environmental objectives which the Fund seeks to promote. The Fund measures its performance against the Benchmark, but does not seek to track the performance of the Benchmark and the Fund does not intend for its performance to match or exceed the Benchmark. The Fund is actively managed and will hold a portfolio of corporate bonds that is not constrained by the Benchmark.

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

#### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as at 31st of December 2024. The data is representative of the

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

reference period.

Sustainability Indicator	Indicator Performance
Reduction in the initial investment universe after application of the best-in-class measure based on an overall ESG profile score	40.32% reduction
Reduction in the initial investment universe after application of the exclusions depending on business involvement in controversial activities and controversies including violations of the UN Global Compact, based on third party data and the Investment Manager's proprietary analysis and research	50.40% reduction
Reduction in carbon intensity of the Fund as measured against the Benchmark	40.80% reduction

● **...and compared to previous periods?**

Compared to previous period, figures are stable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The sustainable investments made by the Fund contributed to environmental objectives (such as climate change, water management, pollution prevention) and to social objectives (such as good health, well-being and gender equality).

The Fund achieved those objectives by investing in: (i) issuers which contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives; or (ii) companies which generated a material part of their revenue from environmental impact themes such as energy transition, healthcare and food. The Fund also used a best-in-class approach and selected companies scoring higher, when compared to their peers, utilizing the investment manager's proprietary scoring methodology.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Fund took into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Fund.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

The Fund addressed a number of other adverse indicators by excluding companies, sectors or countries from the investment universe if they are assessed to have violated international norms and standards according to the definitions of the International Labour Organisation (ILO), the OECD or the United Nations. All issuers considered for investment were screened for compliance with, and excluded if they do not meet, UN Global Compact principles. By limiting of exposure to thermal coal, shale energy and oil sands the Fund also reduced its exposure to greenhouse gas emissions.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was captured through exclusion of companies from the investible universe if they were deemed not to be in alignment.

The Fund excluded companies that weren't compliant with the UN Global Compact, this set of ten principles show significant overlap with both the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. With regards to OECD, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

#### **How did this financial product consider principal adverse impacts on sustainability factors?**

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

The below table shows the PAI scores for the fund from 1st of January 2024 to 31st of December 2024. The data is

representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	1,287.13	76.97	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		657.81	76.97	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		26,892.20	76.97	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		28,837.13	76.97	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	619.10	76.97	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,165.04	99.59	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.12	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	55.68	77.41	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	7.33	28.65	
	6. Energy consumption intensity per high impact climate sector			
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.16	0.23	
	Electricity, Gas, Steam & Air Conditioning Supply	1.21	1.99	
	Manufacturing	0.54	26.09	
Mining & Quarrying	0.00	0.00		
Real Estate Activities	0.67	4.16		
Transportation & Storage	1.00	1.94		
Water Supply, Sewerage, Waste	0.00	0.00		

	Management & Remediation Activities			
	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.08	1.02	
<b>Biodiversity</b>	7. Activities negatively affecting biodiversity-sensitive areas	1.95	99.06	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
<b>Water</b>	8. Emissions to water	0.00	1.63	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
<b>Waste</b>	9. Hazardous waste and radioactive waste ratio	1.26	77.74	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
<b>Social and employee matters</b>	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	99.06	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	26.76	99.06	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	25.26	4.92	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	41.99	88.58	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons)	0.00	99.53	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

and biological weapons)			
-------------------------	--	--	--

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

*Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.*

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of January 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
BPCE	Financials	1.68%	France
DBOERS 0 12/1/2025	Financials	1.55%	Germany
SANTAN 0.5 2/4/2027	Financials	1.41%	Spain
DNBNO FLT 7/19/2028	Financials	1.38%	Norway
ING GROEP NV	Financials	1.38%	Netherlands

0 4/4/2028	Consumer Staples	1.02%	Netherlands
CREDIT AGRICOLE	Financials	1.02%	United Kingdom
NDASS 0.5 11/2/2028	Financials	1.02%	Finland

### What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

100.00% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.00% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

63.20% of the Fund's NAV was invested in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period

Sector (GICS)	Weight %
Financials	50.35
Communication Services	7.14
Consumer Discretionary	7.36
Information Technology	0.68
Industrials	11.07
Consumer Staples	6.69
Energy	0.00
Real Estate	5.08
Health Care	4.06
Materials	5.47
Utilities	2.10
<b>Total</b>	<b>100.00</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	0.00
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>0.00</b>

Although the fund has exclusions around fossil fuel extraction, there may still be exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

7.97% of the Fund's portfolio was aligned with the EU Taxonomy.

activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas       In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The below table shows the share of investments in transitional and enabling activities as the data is representative of the reference period.

	Aligned
Enabling	2.67%
Transition	0.34%

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

As the Fund does not currently intend to be EU Taxonomy aligned, 50.61% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What was the share of socially sustainable investments?**

4.63% of the Fund's NAV.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

NA

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund sought to attain the environmental characteristics by applying the ESG Policy of the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

In addition, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy. Please refer to the section "How did this financial product consider principal adverse impacts on sustainability factors" for examples of researched issuers during the reference period.

**How did this financial product perform compared to the reference benchmark?**

N/A

● **How does the reference benchmark differ from a broad market index?**

N/A

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

N/A

● **How did this financial product perform compared with the reference benchmark?**

N/A

● **How did this financial product perform compared with the broad market index?**

N/A

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco GBP Corporate Bond ESG UCITS ETF

Legal entity identifier: 549300955SP0M7KFY178

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

- It made **sustainable investments with an environmental objective:** \_\_\_\_\_ %
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It made **sustainable investments with a social objective:** \_\_\_\_\_ %

No

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 54.45 % of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective

- It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were to increase overall exposure to issuers demonstrating a robust ESG profile i.e. issuers with a more favourable ESG rating compared to similar issuers. The fund also reduced its exposure to companies involved in certain business activities and those with involvement in very severe ESG controversies.

The Fund achieved the environmental and social characteristics by tracking the Bloomberg MSCI Sterling Liquid Corporate ESG Weighted SRI Bond Index ("**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

#### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as follows as at 31 December 2024, the data is representative of

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

the reference period:

Sustainability Indicator	Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the Bloomberg Sterling Corporate Bond Index (the "Parent Index")	6.2% improvement
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Parent Index	17.8% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

Compared to last period the MSCI ESG Score improvement (14.1%) and the CO2 emissions intensity reduction (26.8%) for the Fund are slightly lower. The Fund continues to avoid companies excluded by the Reference Index.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The sustainable investments made by the fund contributed to environmental objectives such as climate change, water management, pollution prevention, and to social objectives such as good health, well-being and gender equality. The Fund achieved those objectives by investing in constituents of the Reference Index. According to Invesco's sustainable investment framework, a percentage (as disclosed above) of constituents of the Reference Index contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index or had their weightings reduced.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The index methodology directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those facing very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score, and adjustment of the weighting for those that are above the threshold based on these same scores, the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data wasn't available to make such assessments.

MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to carbon emissions, product carbon footprint, biodiversity & land use, toxic emissions & waste, opportunities in renewable energy. The scores also take into account areas such as human capital as well as corporate governance, considering ownership & control, pay and the board.

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to biodiversity & land use, energy & climate change, toxic emissions & waste, operational waste, discrimination & workforce diversity, and governance structures. Any company that violates

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

the UN Global Compact receives a very severe MSCI Controversy Score.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") is captured in the index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that weren't compliant with the UN Global Compact (the "**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the UNGC, the International Labour Organisation's conventions, and the UN Guiding Principles on Business and Human Rights.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

The below table shows the PAI scores for the fund, the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	337.69	66.21	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		150.79	66.21	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		15,096.05	66.21	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		15,584.53	66.21	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	343.70	66.21	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,256.16	95.69	Fund level Total Emission Intensity-Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.05	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	48.94	68.54	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	15.67	25.82	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.14	0.81	
	Electricity, Gas, Steam & Air Conditioning Supply	1.17	5.65	
	Manufacturing	0.20	8.69	
Mining & Quarrying	0.00	0.00		
Real Estate Activities	0.70	3.75		
Transportation & Storage	0.13	2.67		
Water Supply, Sewerage, Waste Management &	0.68	1.54		

	Remediation Activities			
	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.05	0.59	
<b>Biodiversity</b>	7. Activities negatively affecting biodiversity-sensitive areas	1.21	91.03	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
<b>Water</b>	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
<b>Waste</b>	9. Hazardous waste and radioactive waste ratio	0.08	66.05	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
<b>Social and employee matters</b>	10. Violations fo UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	91.03	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	37.49	90.06	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	23.53	21.25	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	41.44	79.53	Waited Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons	0.00	97.19	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

and biological weapons)

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

*Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.*

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of January 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
MS FLT 11/18/2033	Financials	0.74%	United States
BARCLAYS PLC	Financials	0.69%	United Kingdom
LLOYDS FLT 12/3/2035	Financials	0.56%	United Kingdom

### What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

100.00% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.00% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

54.45% of the Fund's NAV was invested in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	61.40
Communication Services	6.81
Consumer Discretionary	3.42
Information Technology	0.88
Industrials	6.03
Consumer Staples	2.41
Energy	0.16
Real Estate	5.24
Health Care	3.28
Materials	0.16
Utilities	8.60
Unclassified	1.61
<b>Total</b>	<b>100.00</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	0.00
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.16
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>0.16</b>

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

0% of the Fund's portfolio was aligned with the EU Taxonomy.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes
- In fossil gas     In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund continues to have 0% alignment with the EU Taxonomy, as with the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

As the Fund does not currently intend to be EU Taxonomy aligned, 5.40% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. Currently the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

**What was the share of socially sustainable investments?**

49.05% of the Fund's NAV.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

NA

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information on how the indicators performed during the reference period.

## How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### ● **How does the reference benchmark differ from a broad market index?**

The Reference Index differs from a broad market index because it seeks to increase overall exposure to issuers demonstrating both a robust ESG profile, and issuers that are assigned more favourable ESG scores using MSCI ESG metrics.

### ● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

As the Fund aims to replicate the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index)	7.65	7.69
CO2 emissions intensity (Scope 1+2/Revenue)	48.6	50.3
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

### ● **How did this financial product perform compared with the reference benchmark?**

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

### ● **How did this financial product perform compared with the broad market index?**

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund

and Parent Index differed as below:

<b>Sustainability Indicator</b>	<b>Fund Indicator Performance</b>	<b>Broad Market benchmark (Parent Index) Indicator Performance</b>
MSCI ESG Score (as defined in the methodology of the Reference Index)	7.65	7.21
CO2 emissions intensity (Scope 1+2/Revenue)	48.6	59.1
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 12.0% exposure to excluded companies at the latest Reference Index rebalance date

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Invesco Global High Yield Corporate Bond ESG UCITS ETF

**Legal entity identifier:** 549300IOSJ6SE24AU714

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** \_\_\_\_\_%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective:** \_\_\_\_\_%

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 51.9 % of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to increase overall exposure to issuers demonstrating a robust ESG profile i.e. issuers with a more favourable ESG rating compared to similar issuers. The fund also reduced exposure to companies involved in certain business activities and those with involvement in very severe ESG controversies.

The Fund achieves the environmental and social characteristics by tracking the Bloomberg MSCI Global High Yield Liquid Corporate ESG Weighted SRI Bond Index ("**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The extent to which the Fund tracked Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

#### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as follows as at 31 December 2024, the data is representative of

the reference period:

Sustainability Indicator	Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the Bloomberg Global High Yield Corporate Index (the "Parent Index")	17.0% improvement
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Parent Index	39.0% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

Compared to last period the MSCI ESG Score improvement (48.6%) for the Fund is lower and the CO2 emissions intensity reduction (24.8%) is higher. The Fund continues to avoid companies excluded by the Reference Index.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The sustainable investments made by the fund contributed to environmental objectives such as climate change, water management, pollution prevention, and to social objectives such as good health, well-being and gender equality. The Fund achieved those objectives by investing in constituents of the Reference Index. According to Invesco's sustainable investment framework, a percentage (as disclosed above) of constituents of the Reference Index contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index or had their weightings reduced.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The index methodology directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those facing very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score, and adjustment of the weighting for those that are above the threshold based on these same scores, the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data isn't available to make such assessments.

MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to carbon emissions, product carbon footprint, biodiversity & land use, toxic emissions & waste, opportunities in renewable energy. The scores also take into account areas such as human capital as well as corporate governance, considering ownership & control, pay and the board.

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to biodiversity & land use, energy & climate change, toxic emissions & waste, operational waste, discrimination & workforce diversity, and governance structures. Any company that violates the UN Global Compact receives a very severe MSCI Controversy Score.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") is captured in the index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that weren't compliant with the UN Global Compact (the "**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the UNGC, the International Labour Organisation's conventions, and the UN Guiding Principles.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

The below table shows the PAI scores for the fund, the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
<b>Greenhouse gas emissions</b>	1. GHG Emissions	8,994.77	79.89	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		2,013.15	79.89	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		76,446.00	79.89	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		87,453.92	79.89	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	871.92	79.89	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,387.69	97.77	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	1.98	97.70	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	73.99	58.73	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	21.87	23.33	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.13	0.47	
	Electricity, Gas, Steam & Air Conditioning Supply	2.97	2.09	
	Manufacturing	1.10	20.86	
	Mining & Quarrying	0.94	2.34	
Real Estate Activities	0.33	3.24		
Transportation & Storage	5.69	4.53		
Water Supply,	0.54	0.45		

	Sewerage, Waste Management & Remediation Activities			
	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.09	5.30	
<b>Biodiversity</b>	7. Activities negatively affecting biodiversity-sensitive areas	2.94	94.50	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
<b>Water</b>	8. Emissions to water	0.02	0.19	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
<b>Waste</b>	9. Hazardous waste and radioactive waste ratio	4.16	82.99	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
<b>Social and employee matters</b>	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	94.50	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	55.17	93.76	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	11.65	2.28	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	31.41	91.89	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster)	0.00	99.34	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

munitions, chemical weapons and biological weapons)			
---	--	--	--

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

*Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.*

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of January 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
UNIT 10.5 2/15/2028	Real Estate	0.38%	United States
DVA 4.625 6/1/2030	Health Care	0.36%	United States

### What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

100% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.00% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

51.90% of the Fund's NAV was invested in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown as at - The data is representative of the reference period.

Sector (GICS)	Weight %
Financials	13.42
Communication Services	17.22
Consumer Discretionary	14.96
Information Technology	4.45

Materials	8.24
Utilities	3.12
Unclassified	1.11
<b>Total</b>	<b>100.00</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.31
10101020	Oil & Gas Equipment & Services	1.21
10102010	Integrated Oil & Gas	0.17
10102020	Oil & Gas Exploration & Production	0.04
10102030	Oil & Gas Refining & Marketing	1.37
10102040	Oil & Gas Storage & Transportation	2.28
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>5.38</b>

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

0% of the Fund's portfolio was aligned with the EU Taxonomy.

activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes
- In fossil gas       In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund continues to have 0% alignment with the EU Taxonomy, as with the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

As the Fund does not currently intend to be EU Taxonomy aligned, 5.86% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

**What was the share of socially sustainable investments?**

46.04% of the Fund's NAV.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

NA

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information on how the indicators performed during the reference period.

## How did this financial product perform compared to the reference benchmark?

See table completed in below sections.

### ● **How does the reference benchmark differ from a broad market index?**

The Reference Index differs from a broad market index because it seeks to increase overall exposure to issuers demonstrating both a robust ESG profile, and issuers that are assigned more favourable ESG scores using MSCI ESG metrics.

### ● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

As the Fund aims to replicate the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index)	6.58	6.05
CO2 emissions intensity (Scope 1+2/Revenue)	156.7	160.4
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

### ● **How did this financial product perform compared with the reference benchmark?**

As Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

### ● **How did this financial product perform compared with the broad market index?**

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and Parent

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Index differed as below:

<b>Sustainability Indicator</b>	<b>Fund Indicator Performance</b>	<b>Broad Market benchmark (Parent Index) Indicator Performance</b>
MSCI ESG Score (as defined in the methodology of the Reference Index)	6.58	5.63
CO2 emissions intensity (Scope 1+2/Revenue)	156.7	256.6
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 42.2% exposure to excluded companies at the latest Reference Index rebalance date

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco AT1 Capital Bond UCITS ETF

Legal entity identifier: 63540079IESLQABALN14

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

- It made **sustainable investments with an environmental objective:** \_\_\_\_\_%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It made **sustainable investments with a social objective:** \_\_\_\_\_%

No

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_\_\_% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were to ensure that the issuers it has exposure to are not involved in controversial and environmentally damaging business activities. The Fund achieved this by tracking the iBoxx USD Contingent Convertible Liquid Developed Market AT1 (8% Issuer Cap) Index ("**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

The environmental and social characteristics were achieved by applying the Index Provider's exclusion criteria to the eligible securities.

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

#### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as follows as at 31st of December 2024. The data is representative

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

of the reference period.

Sustainability Indicator	Indicator Performance
CO2 emissions intensity of the Fund	2.7
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

Compared to last reference period the CO2 emissions intensity (2.9) for the Fund has decreased slightly. The Fund continues to avoid companies excluded by the Reference Index.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

N/A

**How were the indicators for adverse impacts on sustainability factors taken into account?**

N/A

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

N/A

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**How did this financial product consider principal adverse impacts on sustainability factors?**

The methodology of the Reference Index considered principal adverse impacts on sustainability factors by directly excluding a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those that weren't compliant with the UN Global Compact.

The below table shows the PAI scores for the fund, the data is representative of the reference period.:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	48.94	99.00	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		101.60	99.00	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		165,312.13	99.00	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		165,462.66	99.00	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	175.93	99.00	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,576.94	100.02	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	100.02	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	42.29	90.82	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	0.00	15.33	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	0.00	0.00	
	Manufacturing	0.00	0.00	
Mining & Quarrying	0.00	0.00		
Real Estate Activities	0.00	0.00		
Transportation & Storage	0.00	0.00		
Water Supply,	0.00	0.00		

	Sewerage, Waste Management & Remediation Activities			
	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.00	0.00	
Biodiversity	7. Activities negatively affecting biodiversity-sensitive areas	0.00	100.02	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.00	98.65	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	100.02	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	9.57	100.02	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	33.23	12.69	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	41.65	99.33	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster)	0.00	100.02	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

munitions, chemical weapons and biological weapons)			
---	--	--	--

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

*Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.*

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of January 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
BACR FLT 12/31/2059	Financials	2.29%	United Kingdom
BACR FLT 12/31/2059	Financials	2.13%	United Kingdom
SANTAN FLT 59	Financials	2.09%	Spain
LLOYDS FLT 59	Financials	2.05%	United Kingdom
DEUTSCHE BANK AG	Financials	2.03%	Germany
RBS 6 12/31/2059	Financials	2.02%	United Kingdom
LLOYDS FLT 59	Financials	1.77%	United Kingdom
STANLN FLT 49	Financials	1.76%	United Kingdom
STANLN FLT 59	Financials	1.73%	United Kingdom
NDASS 6.625 59	Financials	1.71%	Finland
SANTAN FLT 59	Financials	1.70%	Spain
BACR FLT 12/31/2059	Financials	1.65%	United Kingdom
CRED AGRICOLE SA	Financials	1.65%	France
WESTPAC BK NZ	Financials	1.65%	New Zealand
DEUTSCHE BANK AG	Financials	1.63%	Germany

### What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

100.00% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.00% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

0.00% of the Fund's NAV was invested in sustainable investments

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### ● In which economic sectors were the investments made?

GICS Sector Breakdown as at - the data is representative of the reference period

Sector (GICS)	Weight %
Financials	100.00
Communication Services	0.00
Consumer Discretionary	0.00
Information Technology	0.00
Industrials	0.00
Consumer Staples	0.00
Energy	0.00
Real Estate	0.00
Health Care	0.00
Materials	0.00
Utilities	0.00
Cash	0.08
<b>Total</b>	<b>100.00</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	0.00
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>0.00</b>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The Fund did not make any sustainable investments within the meaning of Article 2(17) of Regulation (EU) 2019/2088.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes
  - In fossil gas
  - In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

● **What was the share of investments made in transitional and enabling activities?**

N/A

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund did not make any sustainable investments. The Fund does not currently intend to be EU Taxonomy aligned, 0.00% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

**What was the share of socially sustainable investments?**

N/A

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

NA

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

**How did this financial product perform compared to the reference benchmark?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

See below fields.

● **How does the reference benchmark differ from a broad market index?**

The Reference Index differs from a generic broad market index because it seeks to exclude issuers that are involved in controversial and environmentally damaging business activities.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

As the Fund fully replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator performance	Reference Index Indicator performance
CO2 emissions intensity	2.9	2.9
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	This Fund had 0% exposure to excluded companies as at each Reference Index rebalance date	This Reference Index had 0% exposure to excluded companies as at each Reference Index rebalance date

● **How did this financial product perform compared with the reference benchmark?**

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Index. Please see below for the performance of the sustainability indicators compared with the Reference Index.

● **How did this financial product perform compared with the broad market index?**

Due to the specific nature of the asset class there is not an appropriate broad market index available for such a comparison.

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Invesco MSCI Europe ESG Leaders Catholic Principles UCITS ETF

**Legal entity identifier:** 5493004L1J8DLBP0LZ70

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### Did this financial product have a sustainable investment objective?

Yes

- It made **sustainable investments with an environmental objective:** \_\_\_\_\_%

  - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It made **sustainable investments with a social objective:** \_\_\_\_\_%

No

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 84.8 % of sustainable investments
  - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective

- It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were to increase overall exposure to companies with high environment, social and governance ("**ESG**") ratings, relative to sector peers. The fund also reduced its exposure to companies involved in certain business activities and those with involvement in very severe ESG controversies.

The Fund achieved the environmental and social characteristics by tracking the MSCI Europe Select Catholic Principles ESG Leaders 10/40 Index (the "**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

#### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as follows as at 31st of December 2024. The data is representative

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

of the reference period.

Sustainability Indicator	Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) of the fund relative to the MSCI Europe Index (the " <b>Parent Index</b> ")	9.7% improvement
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Parent Index	2.0% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

Compared to last period the MSCI ESG Score improvement (9.2%) for the Fund is slightly higher and the CO2 emissions intensity reduction (2.1%) slightly lower. The Fund continues to avoid companies excluded by the Reference Index.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The sustainable investments made by the Fund contributed to environmental objectives such as climate change, water management, pollution prevention, and to social objectives such as good health, well-being and gender equality. The Fund achieved those objectives by investing in constituents of the Reference Index. According to Invesco's sustainable investment framework, a percentage (as disclosed above) of constituents of the Reference Index contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The index methodology directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those facing very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score, and adjustment of the weighting for those that are above the threshold based on these same scores, the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data wasn't available to make such assessments.

MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to; carbon emissions, product carbon footprint, biodiversity & land use, toxic emissions & waste, opportunities in renewable energy. The scores also take into account areas such as human capital as well as corporate governance, considering ownership & control, pay and the board.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to; biodiversity & land use, energy & climate change, toxic emissions & waste, operational waste, discrimination & workforce diversity, and governance structures. Any company that violates the UN Global Compact receives a very severe MSCI Controversy Score.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") is captured in the index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that aren't compliant with the UN Global Compact (the "**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the UNGC, the International Labour Organisation's conventions, and the United Nations Guiding Principles.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

The below table shows the PAI scores for the fund, the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	1,082.75	99.74	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		210.50	99.74	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		13,457.02	99.74	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		14,750.27	99.74	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	540.44	99.74	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,313.05	99.22	Fund level Total Emission Intensity-Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.02	99.98	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	50.47	79.25	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	8.42	25.93	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.05	0.82	
	Electricity, Gas, Steam & Air Conditioning Supply	0.66	3.61	
	Manufacturing	0.43	47.20	
	Mining & Quarrying	1.06	0.67	
Real Estate Activities	0.35	1.06		
Transportation & Storage	0.43	2.56		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.65	0.39		

<b>Biodiversity</b>	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.07	4.98	
	7. Activities negatively affecting biodiversity-sensitive areas	0.65	99.98	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
<b>Water</b>	8. Emissions to water	0.00	0.59	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
<b>Waste</b>	9. Hazardous waste and radioactive waste ratio	3.77	97.86	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
<b>Social and employee matters</b>	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	99.98	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	24.69	99.41	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	20.05	4.98	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	41.11	99.16	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.98	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of January 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
ASML HOLDING NV	Information Technology	7.88%	Netherlands
UNILEVER PLC	Consumer Staples	3.14%	United Kingdom
SCHNEIDER ELECTR	Industrials	2.97%	France
ALLIANZ SE-REG	Financials	2.64%	Germany
L'OREAL	Consumer Staples	2.29%	France
RELX PLC	Industrials	1.89%	United Kingdom
ABB LTD-REG	Industrials	1.89%	Switzerland
ZURICH INSURANCE	Financials	1.85%	Switzerland
HERMES INTL	Consumer Discretionary	1.71%	France
MUENCHENER RUE-R	Financials	1.53%	Germany
ESSILORLUXOTTICA	Health Care	1.52%	France
AXA	Financials	1.45%	France
LONDON STOCK EX	Financials	1.32%	United Kingdom
INDITEX	Consumer Discretionary	1.28%	Spain
NATIONAL GRID PL	Utilities	1.27%	United Kingdom

### What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

99.98% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.02% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

84.80% of the Fund's NAV was invested in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown as the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	22.78
Communication Services	4.22
Consumer Discretionary	12.99
Information Technology	10.04
Industrials	20.67
Consumer Staples	10.34
Energy	0.27
Real Estate	1.06
Health Care	5.89
Materials	7.68
Utilities	4.04
Cash	0.02
<b>Total</b>	<b>100.00</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.09
10102010	Integrated Oil & Gas	0.00
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.18
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>0.27</b>

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities**

#### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Although the Fund does not commit to a minimum of sustainable investments aligned with the EU Taxonomy the extent to which the Fund as a whole was aligned with the EU Taxonomy was calculated for the reference period. 5.65% (Turnover) of the Fund's portfolio was aligned with the EU Taxonomy. The figures are representative of the reference period.

directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes
- In fossil gas     In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The below table shows the share of investments in transitional and enabling activities as the data is representative of the reference period.

	Aligned
Enabling	3.77%
Transition	0.27%

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

As the Fund does not currently intend to be EU Taxonomy aligned, 6.20% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

**What was the share of socially sustainable investments?**

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

72.95% of the Fund's NAV.

**What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

0.02% of the Fund's NAV was invested in investments that did not align with the environmental and social characteristics of the Fund. Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information on how the indicators performed during the reference period.

**How did this financial product perform compared to the reference benchmark?**

See tables completed in below sections.

● **How does the reference benchmark differ from a broad market index?**

The Reference Index differs from a broad market index because it seeks to increase overall exposure to companies with high ESG ratings, relative to sector peers.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

As the Fund fully replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index)	8.61	8.61
CO2 emissions intensity (Scope 1+2/Revenue)	77.4	77.4
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

● **How did this financial product perform compared with the reference benchmark?**

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

● **How did this financial product perform compared with the broad market index?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and Parent Index differed as below:

<b>Sustainability Indicator</b>	<b>Fund Indicator Performance</b>	<b>Broad Market benchmark (Parent Index) Indicator Performance</b>
MSCI ESG Score (as defined in the methodology of the Reference Index)	8.61	7.85
CO2 emissions intensity (Scope 1+2/Revenue)	77.4	79.0
Percentage of the fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 59.4% exposure to excluded companies at the latest Reference Index rebalance date

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### Did this financial product have a sustainable investment objective?

Yes

- It made **sustainable investments with an environmental objective:** \_\_\_\_\_ %
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** \_\_\_\_\_ %

No

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 61.83 % of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were to increase overall exposure to large and mid-capitalisation companies in developed markets worldwide demonstrating a robust ESG profile, as well as a positive trend in improving that profile. i.e. issuers with a more favourable or increasingly favourable ESG rating compared to similar issuers. The fund also reduced its exposure to companies involved in certain business activities and those with involvement in very severe ESG controversies.

The Fund achieved the environmental and social characteristics by tracking the MSCI World ESG Universal Select Business Screens Index (the "**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

#### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as at 31st of December 2024. The data is representative of the reference period.

Sustainability Indicator	Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI World Index (the " <b>Parent Index</b> ")	8.2% improvement
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Parent Index	27.9% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

#### ● ...and compared to previous periods?

Compared to last period the MSCI ESG Score improvement (8.0%) for the Fund is slightly higher and the CO2 emissions intensity reduction (30.5%) slightly lower. The Fund continues to avoid companies excluded by the Reference Index.

#### ● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to environmental objectives such as climate change, water management, pollution prevention, and to social objectives such as good health, well-being and gender equality. The Fund achieved those objectives by investing in constituents of the Reference Index. According to Invesco's sustainable investment

framework, a percentage (as disclosed above) of constituents of the Reference Index contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives.

#### Principal adverse impacts

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

#### How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index or had their weightings reduced.

#### How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The index methodology directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those facing very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score, and adjustment of the weighting for those that are above the threshold based on these same scores, the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data wasn't available to make such assessments.

MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to; carbon emissions, product carbon footprint, biodiversity & land use, toxic emissions & waste, opportunities in renewable energy. The scores also take into account areas such as human capital as well as corporate governance, considering ownership & control, pay and the board.

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to; biodiversity & land use, energy & climate change, toxic emissions & waste, operational waste, discrimination & workforce diversity, and governance structures. Any company that violates the UN Global Compact receives a very severe MSCI Controversy Score.

#### Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises (the "OECD Guidelines") and the UN Guiding Principles on Business and Human Rights (the "UN Guiding Principles") is captured in the index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that aren't compliant with the UN Global Compact (the "UNGC"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the UNGC, the International Labour Organisation's conventions, and the United Nations Guiding Principles on Business and Human Rights.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

#### How did this financial product consider principal adverse impacts on sustainability factors?

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

The below table shows the PAI scores for the fund- the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric	
<b>Greenhouse gas emissions</b>	1.GHG Emissions	2,891.54	99.84	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)	
		821.99	99.84	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)	
		54,854.61	99.84	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)	
		58,568.14	99.84	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)	
	2. Carbon footprint	407.33	99.84	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)	
	3. GHG Intensity of investee companies	1,050.28	99.80	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)	
	4. Exposure to companies active in the fossil fuel sector	1.31	99.88	% of the fund exposed to any fossil fuels revenue	
	5. Share of non-renewable energy consumption	55.12	74.86	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)	
	5. Share of non-renewable energy production	19.89	37.04		
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector	
	Agriculture, Forestry & Fishing	1.83	0.06		
	Construction	0.10	0.39		
	Electricity, Gas, Steam & Air Conditioning Supply	2.55	1.53		
	Manufacturing	0.25	41.07		
	Mining & Quarrying	1.44	1.67		
	Real Estate Activities	0.49	1.92		
Transportation & Storage	1.80	1.95			
Water Supply, Sewerage, Waste Management & Remediation Activities	0.59	0.22			
Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.08	3.74			
<b>Biodiversity</b>	7. Activites negatively affecting biodiversity-sensitive areas	3.74	99.90		Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
<b>Water</b>	8. Emissions to water	0.00	0.24		Adjusted weighted average per

				issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
<b>Waste</b>	9. Hazardous waste and radioactive waste ratio	2.32	98.45	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
<b>Social and employee matters</b>	10. Violations fo UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	99.90	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	49.56	99.41	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	17.33	3.51	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	35.59	99.11	Waited Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.04	99.95	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

*Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.*

#### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of January 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
NVIDIA CORP	Information Technology	5.58%	United States
MICROSOFT CORP	Information Technology	4.91%	United States
APPLE INC	Information Technology	3.47%	United States
AMAZON.COM INC	Consumer Discretionary	1.69%	United States
ALPHABET INC-A	Communication Services	1.15%	United States
BROADCOM INC	Information Technology	1.02%	United States
ALPHABET INC-C	Communication Services	1.00%	United States
UNITEDHEALTH GRP	Health Care	0.93%	United States
MASTERCARD INC-A	Financials	0.92%	United States

ASML HOLDING NV	Information Technology	0.80%	Netherlands
TESLA INC	Consumer Discretionary	0.76%	United States
JPMORGAN CHASE	Financials	0.69%	United States
VISA INC-CLASS A	Financials	0.66%	United States

**Asset allocation** describes the share of investments in specific assets.

### What was the proportion of sustainability-related investments?

See below field

#### ● What was the asset allocation?

99.97% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.03% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

61.83% of the Fund's NAV was invested in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### ● In which economic sectors were the investments made?

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	17.12
Communication Services	5.83
Consumer Discretionary	9.72
Information Technology	28.39
Industrials	10.34
Consumer Staples	6.14
Energy	2.33
Real Estate	2.37
Health Care	12.12
Materials	3.59
Utilities	2.02
Cash	0.03
<b>Total</b>	<b>100.00</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.27
10102010	Integrated Oil & Gas	0.22
10102020	Oil & Gas Exploration & Production	0.62
10102030	Oil & Gas Refining & Marketing	0.35
10102040	Oil & Gas Storage & Transportation	0.82
10102050	Coal & Consumable Fuels	0.05
<b>Total</b>		<b>2.33</b>

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:  
- **turnover** reflecting the share of revenue from green activities of investee companies.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

0% of the Fund's portfolio was aligned with the EU Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes  
 In fossil gas     In nuclear energy  
 No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.  
 - **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund continues to have 0% alignment with the EU Taxonomy, as with the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

As the Fund does not currently intend to be EU Taxonomy aligned, 17.25% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. Currently the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

● **What was the share of socially sustainable investments?**

44.58% of the Fund's NAV.

● **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

0.03% of the Fund's NAV was invested in investments that did not align with the environmental and social characteristics of the Fund. Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

● **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

● **How did this financial product perform compared to the reference benchmark?**

See tables completed in below sections.

● **How does the reference benchmark differ from a broad market index?**

The Reference Index differs from a broad market index because it seeks to increase overall exposure to issuers demonstrating both a robust ESG profile, and issuers that are assigned more favourable ESG scores using MSCI ESG metrics.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics

As the Fund fully replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) relative to the Parent Index	7.47	7.47
CO2 emissions intensity (Scope 1+2/Revenue)	67.2	67.2
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as rebalance date defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

● **How did this financial product perform compared with the reference benchmark?**

As the Fund achieved the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

● **How did this financial product perform compared with the broad market index?**

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and Parent Index differed as below:

Sustainability Indicator	Fund Indicator Performance	Broad Market benchmark (Parent Index) Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index)	7.47	6.90
CO2 emissions intensity (Scope 1+2/Revenue)	67.2	93.3
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 6.6% exposure to excluded companies at the latest Reference Index rebalance date

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Invesco MSCI Europe ESG Universal Screened UCITS ETF

**Legal entity identifier:** 549300NR0JE6T31NQ528

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Did this financial product have a sustainable investment objective?**

**Yes**    **No**

<p><input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> _____%</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <p><input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> _____%</p>	<p><input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <u>76.96</u> % of sustainable investments</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul> <p><input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b></p>
---	---

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to increase overall exposure to large- and mid-capitalisation companies in Europe demonstrating a robust ESG profile, as well as a positive trend in improving that profile. i.e. issuers with a more favourable or increasingly favourable ESG rating compared to similar issuers. The fund also reduced its exposure to companies involved in certain business activities and those with involvement in very severe ESG controversies.

The Fund achieved the environmental and social characteristics by tracking the MSCI Europe ESG Universal Select Business Screens Index (the "**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

● **How did the sustainability indicators perform?**

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as at 31st of December 2024. The data is representative of the

reference period.

Sustainability Indicator	Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI Europe Index (the " <b>Parent Index</b> ")	5.3% improvement
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Parent Index	16.7% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

Compared to last period the MSCI ESG Score improvement (5.0%) for the Fund is slightly higher and the CO2 emissions intensity reduction (17.2%) slightly lower. The Fund continues to avoid companies excluded by the Reference Index.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The sustainable investments made by the Fund contributed to environmental objectives such as climate change, water management, pollution prevention, and to social objectives such as good health, well-being and gender equality. The Fund achieved those objectives by investing in constituents of the Reference Index. According to Invesco's sustainable investment framework, a percentage (as disclosed above) of constituents of the Reference Index contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index or had their weightings reduced.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The index methodology directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those facing very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score, and adjustment of the weighting for those that are above the threshold based on these same scores, the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data wasn't available to make such assessments.

MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to; carbon emissions, product carbon footprint, biodiversity & land use, toxic emissions & waste, opportunities in renewable energy. The scores also take into account areas such as human capital as

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

well as corporate governance, considering ownership & control, pay and the board.

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to; biodiversity & land use, energy & climate change, toxic emissions & waste, operational waste, discrimination & workforce diversity, and governance structures. Any company that violates the UN Global Compact receives a very severe MSCI Controversy Score.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") is captured in the index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that aren't compliant with the UN Global Compact (the "**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the UNGC, the International Labour Organisation's conventions, and the United Nations Guiding Principles on Business and Human Rights.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

The below table shows the PAI scores for the fund, the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	5,411.76	99.81	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		1,108.88	99.81	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		78,942.20	99.81	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		85,462.84	99.81	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	547.73	99.81	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,219.43	99.54	Fund level Total Emission Intensity-Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.34	99.98	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	52.05	81.75	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	22.97	28.84	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.10	0.82	
	Electricity, Gas, Steam & Air Conditioning Supply	1.79	4.24	
	Manufacturing	0.39	51.23	
	Mining & Quarrying	1.08	2.27	
Real Estate Activities	0.42	0.90		
Transportation & Storage	0.49	1.32		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.64	0.11		

<b>Biodiversity</b>	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.07	2.80	
	7. Activities negatively affecting biodiversity-sensitive areas	4.64	99.98	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
<b>Water</b>	8. Emissions to water	0.00	0.81	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
<b>Waste</b>	9. Hazardous waste and radioactive waste ratio	3.43	98.64	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
<b>Social and employee matters</b>	10. Violations fo UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	99.98	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	24.14	99.66	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	15.64	6.32	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	41.96	99.39	Waited Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.98	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of January 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
COM	Health Care	4.61%	Denmark
ASML HOLDING NV	Information Technology	4.21%	Netherlands
SAP SE	Information Technology	2.71%	Germany
ASTRAZENECA PLC	Health Care	2.66%	United Kingdom
LVMH MOET HENNE	Consumer Discretionary	2.53%	France
NOVARTIS AG-REG	Health Care	2.47%	Switzerland
HSBC HOLDINGS PL	Financials	1.98%	United Kingdom
SIEMENS AG-REG	Industrials	1.75%	Germany

ABB LTD-REG	Industrials	1.02%	Switzerland

### What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

99.97% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.03% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

76.96% of the Fund's NAV was invested in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

## ● In which economic sectors were the investments made?

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	22.31
Communication Services	2.95
Consumer Discretionary	10.26
Information Technology	9.87
Industrials	15.29
Consumer Staples	9.50
Energy	1.09
Real Estate	0.91
Health Care	17.29
Materials	6.12
Utilities	4.38
Cash	0.03
<b>Total</b>	<b>100.00</b>

### GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.04
10102010	Integrated Oil & Gas	0.90
10102020	Oil & Gas Exploration & Production	0.05
10102030	Oil & Gas Refining & Marketing	0.10
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>1.09</b>

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0% of the Fund's portfolio was aligned with the EU Taxonomy.

#### Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes

In fossil gas

In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

N/A

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund continues to have 0% alignment with the EU Taxonomy, as with the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

As the Fund does not currently intend to be EU Taxonomy aligned, 12.19% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. Currently the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

**What was the share of socially sustainable investments?**

64.77% of the Fund's NAV.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

0.03% of the Fund's NAV was invested in investments that did not align with the environmental and social characteristics of the Fund. Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

**How did this financial product perform compared to the reference benchmark?**

See tables completed in below sections:

● **How does the reference benchmark differ from a broad market index?**

The Reference Index differs from a broad market index because it seeks to increase overall exposure to issuers demonstrating both a robust ESG profile, and issuers that are assigned more favourable ESG scores using MSCI ESG metrics.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

As the Fund aims to fully replicates the performance of the Reference Index , the sustainability

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

indicators performed similarly for the Fund and Reference Index:

<b>Sustainability Indicator</b>	<b>Fund Indicator performance</b>	<b>Reference Index Indicator performance</b>
MSCI ESG Score (as defined in the methodology Of the Reference Index) relative to the Parent Index	8.27	8.27
CO2 emissions intensity (Scope 1+2/Revenue)	65.8	65.8
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

● **How did this financial product perform compared with the reference benchmark?**

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

● **How did this financial product perform compared with the broad market index?**

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and Parent Index differed as below:

<b>Sustainability Indicator</b>	<b>Fund Indicator Performance</b>	<b>Broad Market benchmark (Parent Index) Indicator performance</b>
MSCI ESG Score (as defined in the methodology of the Reference Index)	8.27	7.85
CO2 emissions intensity (Scope 1+2/Revenue)	65.8	79.0
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology Of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 21.9% exposure to excluded companies at the latest Reference Index rebalance date

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Invesco MSCI USA ESG Universal Screened UCITS ETF **Legal entity identifier:** 54930050XX7J4D0I5R34

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** \_\_\_\_\_ %
  - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 58.16 % of sustainable investments
  - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective

- It made **sustainable investments with a social objective:** \_\_\_\_\_ %

- It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were to increase overall exposure to large- and mid-capitalisation companies in the USA demonstrating a robust ESG profile, as well as a positive trend in improving that profile. i.e. issuers with a more favourable or increasingly favourable ESG rating compared to similar issuers. The fund also reduced its exposure to companies involved in certain business activities and those with involvement in very severe ESG controversies.

The Fund achieved the environmental and social characteristics by tracking the MSCI USA ESG Universal Select Business Screens Index (the "**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

#### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as at 31st of December 2024. The data is representative of the

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

reference period.

Sustainability Indicator	Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI USA Index (the "Parent Index")	7.2% improvement
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Parent Index	28.1% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

Compared to last period the MSCI ESG Score improvement (7.7%) and the CO2 emissions intensity reduction (34.2%) for the Fund are slightly lower. The Fund continues to avoid companies excluded by the Reference Index.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The sustainable investments made by the Fund contributed to environmental objectives such as climate change, water management, pollution prevention, and to social objectives such as good health, well-being and gender equality. The Fund achieved those objectives by investing in constituents of the Reference Index. According to Invesco's sustainable investment framework, a percentage (as disclosed above) of constituents of the Reference Index contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index or had their weightings reduced.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The index methodology directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those facing very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score, and adjustment of the weighting for those that are above the threshold based on these same scores, the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data wasn't available to make such assessments.

MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to; carbon emissions, product carbon footprint, biodiversity & land use, toxic emissions & waste, opportunities in renewable energy. The scores also take into account areas such as human capital as well as corporate governance, considering ownership & control, pay and the board.

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to; biodiversity & land use, energy & climate change, toxic emissions & waste, operational waste, discrimination & workforce diversity, and governance structures. Any company that violates

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

the UN Global Compact receives a very severe MSCI Controversy Score.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") is captured in the index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that aren't compliant with the UN Global Compact (the "**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles . With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the UNGC, the International Labour Organisation's conventions, and the United Nations Guiding Principles on Business and Human Rights.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

The below table shows the PAI scores for the fund- the data is representative of the reference period

Adverse sustainability indicator	PAI	Data	Coverage	Metric
<b>Greenhouse gas emissions</b>	1.GHG Emissions	35,380.01	99.84	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		10,850.84	99.84	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		734,463.68	99.84	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		780,694.53	99.84	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	319.36	99.84	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	934.50	99.85	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	1.53	99.85	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	54.91	74.54	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	23.07	39.07	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	1.53	0.08	
	Construction	0.19	0.17	
	Electricity, Gas, Steam & Air Conditioning Supply	3.22	0.94	
	Manufacturing	0.20	40.00	
Mining & Quarrying	1.03	1.12		
Real Estate Activities	0.57	2.23		
Transportation & Storage	1.65	1.55		

	Water Supply, Sewerage, Waste Management & Remediation Activities	0.58	0.30	
	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.06	4.64	
<b>Biodiversity</b>	7. Activities negatively affecting biodiversity-sensitive areas	3.47	99.87	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
<b>Water</b>	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
<b>Waste</b>	9. Hazardous waste and radioactive waste ratio	0.21	98.70	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
<b>Social and employee matters</b>	10. Violations fo UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	99.87	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	60.34	99.21	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	18.26	3.59	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	34.73	99.23	Waited Average of all issuers in the portfolio ratio of female to male board members in investee companies,

			expressed as a percentage of all board members
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.06	99.96	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

*Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.*

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of January 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
NVIDIA CORP	Information Technology	6.16%	United States

### What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

99.98% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.02% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

58.16% of the Fund's NAV was invested in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	13.75
Communication Services	7.14
Consumer Discretionary	9.84
Information Technology	33.36
Industrials	8.19

Real Estate	2.69
Health Care	12.40
Materials	2.63
Utilities	1.58
Cash	0.02
<b>Total</b>	<b>100.00</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.41
10102010	Integrated Oil & Gas	0.08
10102020	Oil & Gas Exploration & Production	0.69
10102030	Oil & Gas Refining & Marketing	0.44
10102040	Oil & Gas Storage & Transportation	0.73
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>2.35</b>

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

0% of the Fund's portfolio was aligned with the EU Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes
- In fossil gas       In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

● **What was the share of investments made in transitional and enabling activities?**

N/A

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund continues to have 0% alignment with the EU Taxonomy, as with the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

As the Fund does not currently intend to be EU Taxonomy aligned, 18.91% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. Currently the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

**What was the share of socially sustainable investments?**

39.25% of the Fund's NAV.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

0.02% of the Fund's NAV was invested in investments that did not align with the environmental and social characteristics of the Fund. Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information on how the indicators performed during the reference period.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

● **How does the reference benchmark differ from a broad market index?**

The Reference Index differs from a broad market index because it seeks to increase overall exposure to issuers demonstrating both a robust ESG profile, and issuers that are assigned more favourable ESG scores using MSCI ESG metrics.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

As the Fund replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) relative to the Parent Index	7.08	7.08
CO2 emissions intensity (Scope 1+2/Revenue)	65.2	65.2
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

● **How did this financial product perform compared with the reference benchmark?**

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

● **How did this financial product perform compared with the broad market index?**

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and Parent Index differed as below:

<b>Sustainability Indicator</b>	<b>Fund Indicator Performance</b>	<b>Broad Market benchmark (Parent Index) Indicator Performance</b>
MSCI ESG Score (as defined in the methodology of the Reference Index)	7.08	6.61
CO2 emissions intensity (Scope 1+2/Revenue)	65.2	90.7
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 7.2% exposure to excluded companies at the latest Reference Index rebalance date

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Invesco MSCI Pacific ex Japan ESG Universal Screened UCITS ETF

**Legal entity identifier:** 549300T97JTQ2VFQQ072

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** \_\_\_\_\_%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 68.02 % of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective

- It made **sustainable investments with a social objective:** \_\_\_\_\_%

- It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to increase overall exposure to large- and mid-capitalisation companies across Australia, Hong Kong, New Zealand and Singapore demonstrating a robust ESG profile, as well as a positive trend in improving that profile. i.e. issuers with a more favourable or increasingly favourable ESG rating compared to similar issuers. The fund also reduced its exposure to companies involved in certain business activities and those with involvement in very severe ESG controversies.

The Fund achieved the environmental and social characteristics by tracking the MSCI Pacific ex Japan ESG Universal Select Business Screens Index (the "**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

#### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as at 31st of December 2024. The data is representative of the

reference period.

Sustainability Indicator	Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI Pacific ex Japan Index (the " <b>Parent Index</b> ")	6.2% improvement
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Index Parent	32.1% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

Compared to last period the MSCI ESG Score improvement (6.2%) for the Fund is the same and the CO2 emissions intensity reduction (32.0%) is slightly higher. The Fund continues to avoid companies excluded by the Reference Index.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The sustainable investments made by the Fund contributed to environmental objectives such as climate change, water management, pollution prevention, and to social objectives such as good health, well-being and gender equality. The Fund achieved those objectives by investing in constituents of the Reference Index. According to Invesco's sustainable investment framework, a percentage (as disclosed above) of constituents of the Reference Index contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index or had their weightings reduced.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The index methodology directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those facing very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score, and adjustment of the weighting for those that are above the threshold based on these same scores, the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data wasn't available to make such assessments.

MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to; carbon emissions, product carbon footprint, biodiversity & land use, toxic emissions & waste, opportunities in renewable energy. The scores also take into account areas such as human capital as well as corporate governance, considering ownership & control, pay and the board.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to; biodiversity & land use, energy & climate change, toxic emissions & waste, operational waste, discrimination & workforce diversity, and governance structures. Any company that violates the UN Global Compact receives a very severe MSCI Controversy Score.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") is captured in the index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that aren't compliant with the UN Global Compact (the "**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the UNGC, the International Labour Organisation's conventions, and the United Nations Guiding Principles on Business and Human Rights.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

The below table shows the PAI scores for the fund, the data is representative of the reference period

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	865.86	100.00	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		286.68	100.00	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		12,410.16	100.00	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		13,562.69	100.00	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	561.54	100.00	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,600.97	100.00	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	4.12	100.00	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	68.79	50.38	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	3.33	28.42	
	6. Energy consumption intensity per high impact climate sector			
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	4.97	1.50	
	Manufacturing	0.41	12.73	
Mining & Quarrying	4.11	7.88		
Real Estate Activities	0.21	6.35		
Transportation & Storage	0.64	3.74		
Water Supply, Sewerage, Waste	0.00	0.00		

<b>Biodiversity</b>	Management & Remediation Activities			
	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.09	2.44	
	7. Activities negatively affecting biodiversity-sensitive areas	6.02	100.00	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
<b>Water</b>	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
<b>Waste</b>	9. Hazardous waste and radioactive waste ratio	16.46	93.23	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
<b>Social and employee matters</b>	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	100.00	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	56.66	100.00	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	9.75	0.28	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	39.05	95.43	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons)	0.00	100.00	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

and biological weapons)

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

*Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.*

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of January 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
COMMONW BK AUSTR	Financials	5.28%	Australia

### What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

100% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.00% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

68.02% of the Fund's NAV was invested in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period

Sector (GICS)	Weight %

10102030	Oil & Gas Refining & Marketing	0.34
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>4.45</b>

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities**

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0% of the Fund's portfolio was aligned with the EU Taxonomy.

#### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

● **What was the share of investments made in transitional and enabling activities?**

N/A

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund continues to have 0% alignment with the EU Taxonomy, as with the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

As the Fund does not currently intend to be EU Taxonomy aligned, 5.68% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. Currently the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

**What was the share of socially sustainable investments?**

62.34% of the Fund's NAV.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

NA

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information on how the indicators performed during the reference period.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

### ● **How does the reference benchmark differ from a broad market index?**

The Reference Index differs from a broad market index because it seeks to increase overall exposure to issuers demonstrating both a robust ESG profile, and issuers that are assigned more favourable ESG scores using MSCI ESG metrics.

### ● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

As the Fund fully replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) relative to the Parent Index	7.89	7.89
CO2 emissions intensity (Scope 1+2/Revenue)	93.0	93.0
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

### ● **How did this financial product perform compared with the reference benchmark?**

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

### ● **How did this financial product perform compared with the broad market index?**

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and

Parent Index differed as below:

<b>Sustainability Indicator</b>	<b>Fund Indicator Performance</b>	<b>Broad Market benchmark (Parent Index) Indicator Performance</b>
MSCI ESG Score (as defined in the methodology of the Reference Index)	7.89	7.43
CO2 emissions intensity (Scope 1+2/Revenue)	93.0	136.9
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 13.5% exposure to excluded companies at the latest Reference Index rebalance date

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Invesco MSCI Japan ESG Universal Screened UCITS ETF **Legal entity identifier:** 549300415V0ZCKPHLK17

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** \_\_\_\_\_ %
  - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 67.8 % of sustainable investments
  - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective

- It made **sustainable investments with a social objective:** \_\_\_\_\_ %

- It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were to increase overall exposure to large- and mid-capitalisation companies across Japan demonstrating a robust ESG profile, as well as a positive trend in improving that profile. i.e. issuers with a more favourable or increasingly favourable ESG rating compared to similar issuers. The fund also reduced its exposure to companies involved in certain business activities and those with involvement in very severe ESG controversies.

The Fund achieved the environmental and social characteristics by tracking the MSCI Japan ESG Universal Select Business Screens Index (the "**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

#### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as at 31st of December 2024. The data is representative of the

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

reference period.

Sustainability Indicator	Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI Japan Index (the "Parent Index")	6.1% improvement
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Parent Index	14.2% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

Compared to last period the MSCI ESG Score improvement (6.2%) and the CO2 emissions intensity reduction (16.8%) for the Fund are slightly lower. The Fund continues to avoid companies excluded by the Reference Index.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The sustainable investments made by the Fund contributed to environmental objectives such as climate change, water management, pollution prevention, and to social objectives such as good health, well-being and gender equality. The Fund achieved those objectives by investing in constituents of the Reference Index. According to Invesco's sustainable investment framework, a percentage (as disclosed above) of constituents of the Reference Index contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index or had their weightings reduced.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The index methodology directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those facing very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score, and adjustment of the weighting for those that are above the threshold based on these same scores, the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data wasn't available to make such assessments.

MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to; carbon emissions, product carbon footprint, biodiversity & land use, toxic emissions & waste, opportunities in renewable energy. The scores also take into account areas such as human capital as well as corporate governance, considering ownership & control, pay and the board.

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to; biodiversity & land use, energy & climate change, toxic emissions & waste, operational waste, discrimination & workforce diversity, and governance structures. Any company that violates the UN Global Compact receives a very severe MSCI Controversy Score.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") is captured in the index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that aren't compliant with the UN Global Compact (the "**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the UNGC, the International Labour Organisation's conventions, and the United Nations Guiding Principles on Business and Human Rights.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

The below table shows the PAI scores for the fund, The data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	305.27	99.42	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		128.91	99.42	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		8,436.86	99.42	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		8,871.03	99.42	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	1,010.16	99.42	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,558.35	99.81	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.26	99.88	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	81.00	65.03	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	5.96	23.32	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.04	1.01	
	Electricity, Gas, Steam & Air Conditioning Supply	1.13	0.32	
	Manufacturing	0.31	49.31	
	Mining & Quarrying	0.98	0.65	
Real Estate Activities	0.15	1.95		
Transportation & Storage	1.43	1.57		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

<b>Biodiversity</b>	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.23	1.55	
	7. Activities negatively affecting biodiversity-sensitive areas	2.42	99.81	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
<b>Water</b>	8. Emissions to water	0.00	1.27	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
<b>Waste</b>	9. Hazardous waste and radioactive waste ratio	0.20	98.11	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
<b>Social and employee matters</b>	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	99.81	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	33.86	99.80	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	5.38	0.03	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	20.57	97.88	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.85	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's

portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

*Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.*

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of January 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
SONY GROUP CORP	Consumer Discretionary	3.93%	Japan
TOYOTA MOTOR	Consumer Discretionary	3.67%	Japan
HITACHI LTD	Industrials	3.57%	Japan
TOKYO ELECTRON	Information Technology	3.15%	Japan
RECRUIT HOLDINGS	Industrials	2.78%	Japan
SMFG	Financials	2.74%	Japan
TOKIO MARINE HD	Financials	2.21%	Japan
MITSUBISHI UFJ F	Financials	2.00%	Japan
DAIICHI SANKYO	Health Care	1.94%	Japan
ITOCHU CORP	Industrials	1.93%	Japan
FAST RETAILING	Consumer Discretionary	1.89%	Japan
SOFTBANK GROUP C	Communication Services	1.85%	Japan
MIZUHO FINANCIAL	Financials	1.73%	Japan
NINTENDO CO LTD	Communication Services	1.59%	Japan
KDDI CORP	Communication Services	1.52%	Japan

### What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

99.82% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.18% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

67.80% of the Fund's NAV was invested in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period

Sector (GICS)	Weight %
Financials	15.20
Communication Services	7.97
Consumer Discretionary	17.89
Information Technology	14.87
Industrials	22.94
Consumer Staples	4.28
Energy	0.80
Real Estate	2.67
Health Care	9.03
Materials	3.73
Utilities	0.42
Unclassified	0.02
Cash	0.18
<b>Total</b>	<b>100.00</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	0.00
10102020	Oil & Gas Exploration & Production	0.26
10102030	Oil & Gas Refining & Marketing	0.54
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>0.80</b>

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

0% of the Fund's portfolio was aligned with the EU Taxonomy.

management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas

In nuclear energy

No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund continues to have 0% alignment with the EU Taxonomy, as with the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

As the Fund does not currently intend to be EU Taxonomy aligned, 12.58% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. Currently the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

**What was the share of socially sustainable investments?**

55.22% of the Fund's NAV.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

0.18% of the Fund's NAV was invested in investments that did not align with the environmental and social characteristics of the Fund. Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

No minimum environmental or social safeguards were applied in relation to these instruments.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information on how the indicators performed during the reference period.

### How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

#### ● **How does the reference benchmark differ from a broad market index?**

The Reference Index differs from a broad market index because it seeks to increase overall exposure to issuers demonstrating both a robust ESG profile, and issuers that are assigned more favourable ESG scores using MSCI ESG metrics.

#### ● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

As the Fund fully replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator performance	Reference Index Indicator performance
MSCI ESG score (as defined in the methodology of the Reference Index) relative to the Parent Index	7.86	7.86
CO2 emissions intensity (Scope 1+2/Revenue)	56.2	56.2
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

#### ● **How did this financial product perform compared with the reference benchmark?**

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

#### ● **How did this financial product perform compared with the broad market index?**

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund

and Parent Index differed as below:

<b>Sustainability Indicator</b>	<b>Fund Indicator performance</b>	<b>Broad Market benchmark (Parent Index) Indicator Performance</b>
MSCI ESG Score (as defined in the methodology Of the Reference Index)	7.86	7.41
CO2 emissions intensity (Scope 1+2/Revenue)	56.2	65.4
Percentage of the Fund porffolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 2.6% exposure to excluded companies at the latest Reference Index rebalance date

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco MSCI EMU ESG Universal Screened UCITS ETF

Legal entity identifier: 5493005A892WKK5VZK37

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

- It made **sustainable investments with an environmental objective:** \_\_\_\_\_%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It made **sustainable investments with a social objective:** \_\_\_\_\_%

No

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 77.73 % of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were to increase overall exposure to large- and mid-capitalisation companies across the 10 Developed Markets in the EMU (European Economic and Monetary Union) demonstrating a robust ESG profile, as well as a positive trend in improving that profile. i.e. issuers with a more favourable or increasingly favourable ESG rating compared to similar issuers. The fund also reduced its exposure to companies involved in certain business activities and those with involvement in very severe ESG controversies.

The Fund achieved the environmental and social characteristics by tracking the MSCI EMU ESG Universal Select Business Screens Index (the "**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

*Please note that this Fund was closed on 14 August 2024.*

### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as follows as at 31st of December 2024. The data is representative of

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

the reference period.

Sustainability Indicator	Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) of the fund relative to the MSCI EMU Index (the "Parent Index")	5.8% improvement
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Parent Index	24.9% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

Compared to last period the MSCI ESG Score improvement (5.4%) and CO2 emissions intensity reduction (19.3%) for the Fund are slightly higher. The Fund continues to avoid companies excluded by the Reference Index.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The sustainable investments made by the Fund contributed to environmental objectives such as climate change, water management, pollution prevention, and to social objectives such as good health, well-being and gender equality. The Fund achieved those objectives by investing in constituents of the Reference Index. According to Invesco's sustainable investment framework, a percentage (as disclosed above) of constituents of the Reference Index contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index or had their weightings reduced.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The index methodology directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those facing very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score, and adjustment of the weighting for those that are above the threshold based on these same scores, the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data wasn't available to make such assessments.

MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to; carbon emissions, product carbon footprint, biodiversity & land use, toxic emissions & waste, opportunities in renewable energy. The scores also take into account areas such as human capital as well as corporate governance, considering ownership & control, pay and the board.

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to; biodiversity & land use, energy & climate change, toxic emissions & waste, operational waste, discrimination & workforce diversity, and governance structures. Any company that violates the UN Global Compact receives a very severe MSCI Controversy Score.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") is captured in the index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that aren't compliant with the UN Global Compact (the "**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the UNGC, the International Labour Organisation's conventions, and the United Nations Guiding Principles on Business and Human Rights.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

#### **How did this financial product consider principal adverse impacts on sustainability factors?**

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

The below table shows the PAI scores for the fund, as the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
<b>Greenhouse gas emissions</b>	1.GHG Emissions	53.81	99.90	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		12.89	99.90	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		845.58	99.90	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		912.28	99.90	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	644.42	99.90	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,143.81	99.93	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.05	99.99	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	54.17	80.94	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	20.15	28.42	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.14	1.00	
	Electricity, Gas, Steam & Air Conditioning Supply	2.31	6.06	
	Manufacturing	0.36	45.96	
	Mining & Quarrying	0.80	1.26	
	Real Estate Activities	0.56	0.89	
Transportation & Storage	0.43	1.34		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		
Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.05	2.96		
<b>Biodiversity</b>	7. Activites negatively affecting biodiversity-	3.71	99.99	Share of investments in the fund of investee companies with sites/operations

	sensitive areas			located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
<b>Water</b>	8. Emissions to water	0.00	1.17	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
<b>Waste</b>	9. Hazardous waste and radioactive waste ratio	4.42	97.76	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
<b>Social and employee matters</b>	10. Violations fo UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	99.99	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	15.56	99.37	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	19.26	0.66	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	42.25	99.14	Waited Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.99	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

*Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.*

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From 1st of

Largest Investments	Sector	% Assets	Country
UniCredit SpA	Financials	1.40%	Italy
Wolters Kluwer NV	Industrials	0.96%	Netherlands
Vinci SA	Industrials	0.71%	France
STMicroelectronics NV	Information Technology	0.67%	Switzerland
Universal Music Group NV	Communication Services	0.59%	Netherlands
UPM-Kymmene Oyj	Materials	0.44%	Finland
UCB SA	Health Care	0.41%	Belgium
Symrise AG	Materials	0.39%	Germany
Veolia Environnement SA	Utilities	0.26%	France
Telefonica SA	Communication Services	0.25%	Spain
Terna - Rete Elettrica Nazionale	Utilities	0.24%	Italy
Wartsila OYJ Abp	Industrials	0.20%	Finland
Stora Enso Oyj	Materials	0.19%	Finland
Vonovia SE	Real Estate	0.19%	Germany
Unibail-Rodamco-Westfield	Real Estate	0.17%	France

**Asset allocation** describes the share of investments in specific assets.

### What was the proportion of sustainability-related investments?

See below field

#### ● What was the asset allocation?

100% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

77.73% of the Fund's NAV was invested in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown as the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	23.31
Communication Services	3.78
Consumer Discretionary	16.46
Information Technology	15.55
Industrials	14.56
Consumer Staples	7.54
Energy	1.36
Real Estate	0.88
Health Care	5.67
Materials	4.81
Utilities	6.06
Cash	0.02
<b>Total</b>	<b>100.00</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.10
10102010	Integrated Oil & Gas	1.03
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.23
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>1.36</b>

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

5% of the Fund's portfolio was aligned with the EU Taxonomy.

#### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

● **What was the share of investments made in transitional and enabling activities?**

The below table shows the share of investments in transitional and enabling activities - the data is representative of the reference period

	Aligned
<b>Enabling</b>	3.51%
<b>Transition</b>	0.15%

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

As the Fund does not currently intend to be EU Taxonomy aligned, 9.58% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

**What was the share of socially sustainable investments?**

63.15% of the Fund's NAV.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

NA

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information on how the indicators performed during the reference period.

## How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### ● *How does the reference benchmark differ from a broad market index?*

The Reference Index differs from a broad market index because it seeks to increase overall exposure to issuers demonstrating both a robust ESG profile, and issuers that are assigned more favourable ESG scores using MSCI ESG metrics.

### ● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

As the Fund fully replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index)	8.16	8.16
CO2 emissions intensity (Scope 1+2/Revenue)	65.4	65.4
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

### ● *How did this financial product perform compared with the reference benchmark?*

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

### ● *How did this financial product perform compared with the broad market index?*

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and

Parent Index differed as below:

<b>Sustainability Indicator</b>	<b>Fund Indicator Performance</b>	<b>Broad Market benchmark (Parent Index) Indicator Performance</b>
MSCI ESG Score (as defined in the methodology of the Reference Index)	8.16	7.71
CO2 emissions intensity (Scope 1+2/Revenue)	65.4	87.1
Percentage of the fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 25.1% exposure to excluded companies at the latest Reference Index rebalance date

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Invesco MSCI Europe Ex UK ESG Universal Screened UCITS ETF

**Legal entity identifier:** 549300M2XC8K4G8QB195

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** \_\_\_\_\_%
  - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 79.9 % of sustainable investments
  - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective

- It made **sustainable investments with a social objective:** \_\_\_\_\_%

- It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to increase overall exposure to large- and mid-capitalisation companies across 14 Developed Markets in Europe (excluding the UK) demonstrating a robust ESG profile, as well as a positive trend in improving that profile. i.e. issuers with a more favourable or increasingly favourable ESG rating compared to similar issuers. The fund also reduced its exposure to companies involved in certain business activities and those with involvement in very severe ESG controversies.

The Fund achieved the environmental and social characteristics by tracking the MSCI Europe ex UK ESG Universal Select Business Screens Index (the "**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

#### ● **How did the sustainability indicators perform?**

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as at 31st of December 2024. The data is representative of the

reference period.

Sustainability Indicator	Indicator Performance
MSCI ESG Score (as defined in the methodology Of the Reference Index) Of the Fund relative to the MSCI Europe ex UK Index (the " <b>Parent Index</b> ")	5.0% improvement
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Parent Index	11.4% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

Compared to last period the MSCI ESG Score improvement (5.0%) for the Fund is the same and the CO2 emissions intensity reduction (14.9%) is slightly lower. The Fund continues to avoid companies excluded by the Reference Index.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The sustainable investments made by the Fund contributed to environmental objectives such as climate change, water management, pollution prevention, and to social objectives such as good health, well-being and gender equality. The Fund achieved those objectives by investing in constituents of the Reference Index. According to Invesco's sustainable investment framework, a percentage (as disclosed above) of constituents of the Reference Index contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index or had their weightings reduced.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The index methodology directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those facing very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score, and adjustment of the weighting for those that are above the threshold based on these same scores, the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data wasn't available to make such assessments.

MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to; carbon emissions, product carbon footprint, biodiversity & land use, toxic emissions & waste, opportunities in renewable energy. The scores also take into account areas such as human capital as well as corporate governance, considering ownership & control, pay and the board.

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to; biodiversity & land use, energy & climate change, toxic emissions & waste, operational waste, discrimination & workforce diversity, and governance structures. Any company that violates

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

the UN Global Compact receives a very severe MSCI Controversy Score.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") is captured in the index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that aren't compliant with the UN Global Compact (the "**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles . With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the UNGC, the International Labour Organisation's conventions, and the United Nations Guiding Principles on Business and Human Rights.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

The below table shows the PAI scores for the fund, the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
<b>Greenhouse gas emissions</b>	1. GHG Emissions	291.84	99.80	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		55.66	99.80	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		4,079.62	99.80	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		4,427.11	99.80	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	590.99	99.80	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,300.08	99.81	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.43	99.99	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	52.15	82.69	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	18.65	29.31	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.13	0.74	
	Electricity, Gas, Steam & Air Conditioning Supply	2.30	4.17	
	Manufacturing	0.34	54.92	
	Mining & Quarrying	0.77	1.31	
Real Estate Activities	0.54	0.87		
Transportation & Storage	0.49	1.69		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

<b>Biodiversity</b>	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.05	2.29	
	7. Activities negatively affecting biodiversity-sensitive areas	4.51	99.98	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
<b>Water</b>	8. Emissions to water	0.00	1.04	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
<b>Waste</b>	9. Hazardous waste and radioactive waste ratio	1.83	98.59	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
<b>Social and employee matters</b>	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	99.98	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	23.28	99.57	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	5.98	3.75	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	41.12	99.23	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.98	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

*Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.*

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of January 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
ASML HOLDING NV	Information Technology	5.13%	Netherlands
COM	Health Care	4.85%	Denmark
SAP SE	Information Technology	3.48%	Germany
LVMH MOET HENNE	Consumer Discretionary	3.25%	France
NOVARTIS AG-REG	Health Care	3.17%	Switzerland
SIEMENS AG-REG	Industrials	2.25%	Germany

### What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

99.98% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.02% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

79.90% of the Fund's NAV was invested in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	21.18
Communication Services	2.96
Consumer Discretionary	11.22
Information Technology	11.98
Industrials	16.58
Consumer Staples	7.39
Energy	1.23

10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>1.23</b>

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

5.01% of the Fund's portfolio was aligned with the EU Taxonomy.

#### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The below table shows the share of investments in transitional and enabling activities as the data is representative of the reference period.

	Aligned
<b>Enabling</b>	<b>3.30%</b>
<b>Transition</b>	<b>0.17%</b>

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

As the Fund does not currently intend to be EU Taxonomy aligned, 8.21% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. Currently the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

**What was the share of socially sustainable investments?**

66.68% of the Fund's NAV.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

0.02% of the Fund's NAV was invested in investments that did not align with the environmental and social characteristics of the Fund. Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

### How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

#### ● How does the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it seeks to increase overall exposure to issuers demonstrating both a robust ESG profile, and issuers that are assigned more favourable ESG scores using MSCI ESG metrics.

#### ● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund fully replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
MSCI ESG score (as defined in the methodology of the Reference Index) relative to the Parent Index	8.27	8.27
CO2 emissions intensity (Scope 1+2/Revenue)	68.8	68.8
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

#### ● How did this financial product perform compared with the reference benchmark?

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

#### ● How did this financial product perform compared with the broad market index?

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

and Parent Index differed as below:

<b>Sustainability Indicator</b>	<b>Fund Indicator Performance</b>	<b>Broad Market benchmark (Parent Index) Indicator Performance</b>
MSCI ESG score (as defined in the methodology of the Reference Index)	8.27	7.88
CO2 emissions intensity (Scope 1+2/Revenue)	68.8	77.6
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 21.0% exposure to excluded companies at the latest Reference Index rebalance date

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Invesco MSCI Emerging Markets ESG Universal Screened UCITS

**Legal entity identifier:** 549300JN201KVAIZA857

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Did this financial product have a sustainable investment objective?**

Yes    No

<p><input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> _____%</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <p><input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> _____%</p>	<p><input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <u>51.91</u> % of sustainable investments</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul> <p><input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b></p>
---	---

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to increase overall exposure to large- and mid-capitalisation companies across 26 Emerging Market (EM) countries demonstrating a robust ESG profile, as well as a positive trend in improving that profile. i.e. issuers with a more favourable or increasingly favourable ESG rating compared to similar issuers. The fund also reduced its exposure to companies involved in certain business activities and those with involvement in very severe ESG controversies.

The Fund achieved the environmental and social characteristics by tracking the MSCI EM (Emerging Markets) ESG Universal Select Business Screens Index (the "**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

**● How did the sustainability indicators perform?**

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as follows as at 31st of December 2024. The data is representative

of the reference period.

Sustainability Indicator	Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) of the fund relative to the MSCI Emerging Markets Index (the " <b>Parent Index</b> ")	11.8% improvement
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Parent Index	46.8% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

Compared to last period the MSCI ESG Score improvement (12.5%) for the Fund is slightly lower and the CO2 emissions intensity reduction (44.4%) slightly higher. The Fund continues to avoid companies excluded by the Reference Index.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The sustainable investments made by the Fund contributed to environmental objectives such as climate change, water management, pollution prevention, and to social objectives such as good health, well-being and gender equality. The Fund achieved those objectives by investing in constituents of the Reference Index. According to Invesco's sustainable investment framework, a percentage (as disclosed above) of constituents of the Reference Index contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index or had their weightings reduced.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The index methodology directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those facing very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score, and adjustment of the weighting for those that are above the threshold based on these same scores, the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data wasn't available to make such assessments.

MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to; carbon emissions, product carbon footprint, biodiversity & land use, toxic emissions & waste, opportunities in renewable energy. The scores also take into account areas such as human capital as well as corporate governance, considering ownership & control, pay and the board.

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to; biodiversity & land use, energy & climate change, toxic emissions & waste, operational waste, discrimination & workforce diversity, and governance structures. Any company that violates the UN Global Compact receives a very severe MSCI Controversy Score.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") is captured in the Reference Index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that aren't compliant with the UN Global Compact ("**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the UNGC, the International Labour Organisation's conventions, and the United Nations Guiding Principles on Business and Human Rights.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

As noted above, the Fund considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

The below table shows the PAI scores for the fund, as the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
<b>Greenhouse gas emissions</b>	1. GHG Emissions	2,871.94	97.59	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		967.02	97.59	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		20,507.27	97.59	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		24,346.24	97.59	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	560.93	97.59	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,336.52	97.64	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.19	97.56	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	85.21	67.37	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	6.19	36.88	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.02	0.15	
	Electricity, Gas, Steam & Air Conditioning Supply	1.25	1.37	
	Manufacturing	1.14	34.56	
	Mining & Quarrying	1.75	4.77	
Real Estate Activities	0.28	1.56		
Transportation & Storage	1.77	1.43		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.90	0.10		
Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.10	2.64		
<b>Biodiversity</b>	7. Activities negatively affecting biodiversity-sensitive areas	2.26	97.55	
<b>Water</b>	8. Emissions to water	0.00	0.01	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
<b>Waste</b>	9. Hazardous waste and radioactive waste ratio	2.26	96.72	Tonnes of hazardous waste and radioactive waste generated by investee

				companies per million EUR invested, expressed as a weighted average
<b>Social and employee matters</b>	10. Violations fo UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	97.55	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	65.36	97.12	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	12.91	0.35	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	19.65	87.30	Waited Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	97.72	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

*Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.*

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of January 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
TSMC	Information Technology	6.63%	Taiwan
SAMSUNG ELECTRON	Information Technology	3.84%	South Korea
TENCENT	Communication Services	3.26%	China
BABA-W	Consumer Discretionary	2.33%	China
HDFC BANK LTD	Financials	1.78%	India
RELIANCE INDS	Energy	1.64%	India

FUBON FINANCIAL	Financials	0.65%	Taiwan

**Asset allocation** describes the share of investments in specific assets.

### What was the proportion of sustainability-related investments?

See below field

#### ● What was the asset allocation?

99.56% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.44% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

51.91% of the Fund's NAV was invested in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown as the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	28.61

10102040	Oil & Gas Storage & Transportation	0.28
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>3.35</b>

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

0% of the Fund's portfolio was aligned with the EU Taxonomy.

criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes
- In fossil gas       In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund continues to have 0% alignment with the EU Taxonomy, as with the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

As the Fund does not currently intend to be EU Taxonomy aligned, 14.06% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

**What was the share of socially sustainable investments?**

37.85% of the Fund's NAV.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

0.44% of the Fund's NAV was invested in investments that did not align with the environmental and social characteristics of the Fund. Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

### How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

● **How does the reference benchmark differ from a broad market index?**

The Reference Index differs from a broad market index because it seeks to increase overall exposure to issuers demonstrating both a robust ESG profile, and issuers that are assigned more favourable ESG scores using MSCI ESG metrics.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

As the Fund fully replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index)	6.51	6.51
CO2 emissions intensity (Scope 1+2/Revenue)	177.4	177.4
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

● **How did this financial product perform compared with the reference benchmark?**

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

● **How did this financial product perform compared with the broad market index?**

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and Parent Index differed as below:

**Reference**

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

<b>Sustainability Indicator</b>	<b>Fund Indicator Performance</b>	<b>Broad Market benchmark (Parent Index) Indicator Performance</b>
MSCI ESG Score (as defined in the methodology of the Reference Index)	6.51	5.82
CO2 emissions intensity (Scope 1+2/Revenue)	177.4	333.4
Percentage of the fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 7.1% exposure to excluded companies at the latest Reference Index rebalance date

Yes

No

- It made **sustainable investments with an environmental objective:** \_\_\_\_\_%

  - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 77.68 % of sustainable investments
  - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective

- It made **sustainable investments with a social objective:** \_\_\_\_\_%

- It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to gain exposure to a portfolio of equity and equity-related securities of companies which meet the ESG Policy of the Fund.

The Fund achieved the environmental and social characteristics by excluding certain industries and activities that were considered by the Investment Manager to be inconsistent with ESG outcomes. The Fund also applied a proprietary ESG scoring system to ensure investment was made in “best of class” securities. The Fund ensured ongoing compliance with the standards of the Febelfin ecolabel. The Fund also maintained a lower carbon intensity of the portfolio relative to the MSCI World Index (the “**Benchmark**”).

The extent to which the environmental and/or social characteristics promoted by the Fund was met is further detailed in the performance of the sustainability indicators (see below).

The Benchmark is not aligned with the environmental objectives which the Fund seeks to promote. The Fund does not seek to track the performance of the Benchmark. The Fund holds an actively-managed portfolio of equities and equity-related securities with the aim of delivering superior risk-adjusted returns over the long term when compared with the average performance of global equity markets. Due to the changing volatility and return characteristics of equity markets, the fund does not have an absolute risk or return target. Rather, the Sub-Investment Manager will select the portfolio holdings through an optimisation process that utilises the Benchmark as a reference for risk and return calculations.

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

#### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as at 31st of December 2024. The data is representative of the

reference period.

Sustainability Indicator	Indicator Performance
Reduction in the initial investment universe after application of the best-in-class measure based on an overall ESG profile score	55.72% reduction
Reduction in the initial investment universe after application of the exclusions depending on business involvement in controversial activities and controversies including violations of the UN Global Compact, based on third party data and the Investment Manager's proprietary analysis and research	63.49% reduction
Reduction in carbon intensity of the Fund as measured against the Benchmark	50.10% reduction

● **...and compared to previous periods?**

Compared to previous period, figures are stable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The sustainable investments made by the Fund contributed to environmental objectives (such as climate change, water management, pollution prevention) and to social objectives (such as good health, well-being and gender equality).

The Fund achieved those objectives by investing in: (i) issuers which contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives; or (ii) companies which generated a material part of their revenue from environmental impact themes such as energy transition, healthcare and food. The Fund also used a best-in-class approach and selected companies scoring higher, when compared to their peers, utilizing the investment manager's proprietary scoring methodology.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Fund took into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Fund.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

The Fund addressed a number of other adverse indicators by excluding companies, sectors or countries from the investment universe if they are assessed to have violated international norms and standards according to the definitions of the International Labour Organisation (ILO), the OECD or the United Nations. All issuers considered for investment were screened for compliance with, and excluded if they do not meet, UN Global Compact principles. By limiting of exposure to thermal coal, shale energy and oil sands the Fund also reduced its exposure to greenhouse gas emissions.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment with the OECD Guidelines for Multinational Enterprises (the "OECD Guidelines") and the UN Guiding Principles on Business and Human Rights (the "UN Guiding Principles") was captured through exclusion of companies from the investible universe if they were deemed not to be in alignment.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Fund excluded companies that weren't compliant with the UN Global Compact (the "UNGC"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

As noted above, the Fund considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

The below table shows the PAI scores for the fund from 1st of January 2024 to 31st of December 2024. The data is

representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	14,663.35	100.14	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		3,954.90	100.14	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		280,735.55	100.14	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		299,353.79	100.14	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	509.04	100.14	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,199.70	100.14	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	100.14	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	62.58	82.02	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	13.78	41.86	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.05	1.51	
	Electricity, Gas, Steam & Air Conditioning Supply	0.00	0.00	
	Manufacturing	0.29	39.52	
	Mining & Quarrying	1.04	0.87	
	Real Estate Activities	0.17	0.21	
Transportation & Storage	1.39	2.38		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.47	0.07		
Wholesale & Retail	0.05	9.81		

<b>Biodiversity</b>	Trade & Repair of Motor Vehicles & Motorcycles			
	7. Activities negatively affecting biodiversity-sensitive areas	0.79	100.14	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
<b>Water</b>	8. Emissions to water	0.00	0.95	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
<b>Waste</b>	9. Hazardous waste and radioactive waste ratio	5.04	98.59	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
<b>Social and employee matters</b>	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	100.14	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	43.02	100.12	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	24.13	0.81	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	35.87	99.89	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	100.14	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of January 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
NVIDIA CORP	Information Technology	4.53%	United States
MICROSOFT CORP	Information Technology	4.45%	United States

### What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

100.00% of the Fund's NAV was invested in investments environmental and social characteristics of the Fund.

0.00% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

77.68% of the Fund's NAV was invested in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period

Sector (GICS)	Weight %
Financials	21.06
Communication Services	5.44
Consumer Discretionary	11.84
Information Technology	26.25
Industrials	15.28
Consumer Staples	6.52
Energy	0.14
Real Estate	0.21
Health Care	8.81
Materials	4.59
Utilities	0.00
Cash	-0.14
<b>Total</b>	<b>100.00</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	0.00
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.14
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>0.14</b>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

0% of the Fund's portfolio was aligned with the EU Taxonomy.

to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes
- In fossil gas       In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund continues to have 0% alignment with the EU Taxonomy, as with the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

As the Fund does not currently intend to be EU Taxonomy aligned, 50.08% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. Currently the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

**What was the share of socially sustainable investments?**

27.60% of the Fund's NAV.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

NA

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental characteristics by applying the ESG Policy of the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

In addition, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy. Please refer to the section "How did this financial product consider principal adverse impacts on sustainability factors" for examples of researched issuers during the reference period.

## How did this financial product perform compared to the reference benchmark?

N/A

### ● How does the reference benchmark differ from a broad market index?

N/A

### ● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

N/A

### ● How did this financial product perform compared with the reference benchmark?

N/A

### ● How did this financial product perform compared with the broad market index?

N/A

#### Reference

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Invesco Quantitative Strategies Global Equity Low Volatility Low Carbon UCITS ETF

**Legal entity identifier:** 549300WDE00HSW86K568

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Did this financial product have a sustainable investment objective?**

Yes    No

<p><input type="checkbox"/> It made <b>sustainable investments with an environmental objective:</b> _____%</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> </ul> <p><input type="checkbox"/> It made <b>sustainable investments with a social objective:</b> _____%</p>	<p><input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of <u>68.16</u> % of sustainable investments</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</li> <li><input checked="" type="checkbox"/> with a social objective</li> </ul> <p><input type="checkbox"/> It promoted E/S characteristics, but <b>did not make any sustainable investments</b></p>

**To what extent were the environmental and/or social characteristics promoted by this financial product met?**

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to gain exposure to a portfolio of equity and equity-related securities of companies which meet the ESG Policy of the Fund.

The Fund achieved the environmental and social characteristics by excluding certain industries and activities that were considered by the Investment Manager to be inconsistent with ESG outcomes. The Fund also applied a proprietary ESG scoring system to ensure investment was made in “best of class” securities. The Fund ensured ongoing compliance with the standards of the Towards Sustainability ecolabel. The Fund also maintained a lower carbon intensity of the portfolio relative to the MSCI World Index (the “**Benchmark**”).

The extent to which the environmental and/or social characteristics promoted by the Fund was met is further detailed in the performance of the sustainability indicators (see below).

The Benchmark is not aligned with the environmental objectives which the Fund seeks to promote. The Fund does not seek to track the performance of the Benchmark. The Fund holds an actively-managed portfolio of equities and equity-related securities with the aim of delivering superior risk-adjusted returns over the long term when compared with the average performance of global equity markets. Due to the changing volatility and return characteristics of equity markets, the fund does not have an absolute risk or return target. Rather, the Sub-Investment Manager will select the portfolio holdings through an optimisation process that utilises the Benchmark as a reference for risk and return calculations.

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

● **How did the sustainability indicators perform?**

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as at 31st of December 2024. The data is representative of the reference

period.

Sustainability Indicator	Indicator Performance
Reduction in the initial investment universe after application of the best-in-class measure based on an overall ESG profile score	45.82% reduction
Reduction in the initial investment universe after application of the exclusions depending on business involvement in controversial activities and controversies including violations of the UN Global Compact, based on third party data and the Investment Manager's proprietary analysis and research	53.91% reduction
Reduction in carbon intensity of the Fund as measured against the Benchmark	50.50% reduction

● **...and compared to previous periods?**

Compared to previous period, figures are stable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The sustainable investments made by the Fund contributed to environmental objectives (such as climate change, water management, pollution prevention) and to social objectives (such as good health, well-being and gender equality).

The Fund achieved those objectives by investing in: (i) issuers which contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives; or (ii) companies which generated a material part of their revenue from environmental impact themes such as energy transition, healthcare and food. The Fund also used a best-in-class approach and selected companies scoring higher, when compared to their peers, utilizing the investment manager's proprietary scoring methodology.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Fund took into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Fund.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

The Fund addressed a number of other adverse indicators by excluding companies, sectors or countries from the investment universe if they are assessed to have violated international norms and standards according to the definitions of the International Labour Organisation (ILO), the OECD or the United Nations. All issuers considered for investment were screened for compliance with, and excluded if they do not meet, UN Global Compact principles. By limiting of exposure to thermal coal, shale energy and oil sands the Fund also reduced its exposure to greenhouse gas emissions.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was captured through exclusion of companies from the investible universe if they were deemed not to be in alignment.

The Fund excluded companies that weren't compliant with the UN Global Compact, this set of ten principles show significant overlap with both the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. With regards to OECD, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

As noted above, the Fund considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

The below table shows the PAI scores for the fund, The data is representative of the reference period.:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	990.29	100.28	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		373.35	100.28	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		17,373.36	100.28	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		18,736.99	100.28	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	308.84	100.28	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	674.96	100.37	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	100.37	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	63.06	72.49	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	19.52	39.14	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.02	0.34	
	Electricity, Gas, Steam & Air Conditioning Supply	0.06	0.34	
	Manufacturing	0.24	40.27	
	Mining & Quarrying	0.73	0.49	
	Real Estate Activities	0.17	0.24	
	Transportation & Storage	0.94	2.53	
Water Supply, Sewerage, Waste Management & Remediation Activities	0.68	1.23		
Wholesale & Retail Trade & Repair of	0.06	5.94		

<b>Biodiversity</b>	Motor Vehicles & Motorcycles			
	7. Activities negatively affecting biodiversity-sensitive areas	2.91	100.37	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
<b>Water</b>	8. Emissions to water	0.00	0.96	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
<b>Waste</b>	9. Hazardous waste and radioactive waste ratio	1.13	97.72	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
<b>Social and employee matters</b>	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	100.37	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	52.17	100.34	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	11.36	2.21	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	35.83	99.85	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	100.37	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of January 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
APPLE INC	Information Technology	3.34%	United States
MICROSOFT CORP	Information Technology	3.01%	United States
NVIDIA CORP	Information Technology	2.56%	United States
AMAZON.COM INC	Consumer Discretionary	1.62%	United States
META PLATFORMS-A	Communication Services	1.18%	United States
NOVARTIS AG-REG	Health Care	1.00%	Switzerland
Johnson&Johnson	Health Care	0.99%	United States
ELI LILLY & CO	Health Care	0.98%	United States
MOTOROLA SOLUTIO	Information Technology	0.95%	United States
TJX COS INC	Consumer Discretionary	0.95%	United States
ABBVIE INC	Health Care	0.94%	United States
WALMART INC	Consumer Staples	0.91%	United States
COLGATE-PALMOLIV	Consumer Staples	0.90%	United States
DEUTSCHE TELEKOM	Communication Services	0.87%	Germany
PROCTER & GAMBLE	Consumer Staples	0.87%	United States

### What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

100.00% of the Fund's NAV was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

0.00% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

68.16% of the Fund's NAV was invested in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	18.46
Communication Services	9.39
Consumer Discretionary	10.16
Information Technology	20.99
Industrials	8.65
Consumer Staples	12.03
Energy	0.13
Real Estate	0.32
Health Care	17.24
Materials	2.13
Utilities	0.92
Cash	-0.42
<b>Total</b>	<b>100.00</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	0.00
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.13
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>0.13</b>

Although the fund has exclusions around fossil fuel extraction, there may still be exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities**

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

0% of the Fund's portfolio was aligned with the EU Taxonomy.

directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes
- In fossil gas       In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund continues to have 0% alignment with the EU Taxonomy, as with the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

As the Fund does not currently intend to be EU Taxonomy aligned, 43.98% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. Currently the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

**What was the share of socially sustainable investments?**

24.18% of the Fund's NAV.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

NA

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the the environmental characteristics by applying the ESG Policy of the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

In addition, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy. Please refer to the section "How did this financial product consider principal adverse impacts on sustainability factors" for examples of researched issuers during the reference period.

## How did this financial product perform compared to the reference benchmark?

N/A

### ● *How does the reference benchmark differ from a broad market index?*

N/A

### ● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

N/A

### ● *How did this financial product perform compared with the reference benchmark?*

N/A

### ● *How did this financial product perform compared with the broad market index?*

N/A

#### Reference

**benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Invesco EUR Government and Related Green Transition UCITS ETF

**Legal entity identifier:** 54930004RQNIL6FL9094

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** \_\_\_\_\_%

  - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 56.23 % of sustainable investments
  - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective

- It made **sustainable investments with a social objective:** \_\_\_\_\_%

- It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were:

- to maximise exposure to Green Bonds, according to the criteria set out under the heading “What investment strategy does this financial product follow?”;
- to gain exposure to a portfolio of government and government-related bonds issued by countries that had ratified and implemented in equivalent national legislation: a) the eight fundamental conventions identified in the International Labour Organisation’s declaration on Fundamental Rights and Principles at Work; and b) at least half of the 18 core International Human Rights Treaties;
- to exclude securities issued by countries that did not conform with international treaties and assessments by third-party non-profit organisations (e.g. the Paris Agreement, the UN Convention on Biological Diversity, the Nuclear Non-Proliferation Treaty, it had particularly high military budgets, it was considered to be a ‘Jurisdiction with strategic AML/CFT deficiencies’ by FATF, if it had a score of less than 40/100 on the Transparency International Corruption Perception Index, or it was qualified as ‘Not Free’ by the Freedom House ‘Freedom in the World’ survey); and
- to exclude securities issued by Government-owned issuers that are not government guaranteed, if such issuers were involved in controversial business activity or ESG controversies (e.g. involvement in nuclear power, coal, unconventional as well as conventional oil and, controversial weapons, military weapons, civilian firearms, tobacco and activities constituting violations of the UN Human Rights Directive or the International Labour Organisation’s Labour Rights Directive).

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

#### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as at 31st of December 2024. The data is representative of the reference period.

Sustainability Indicator	Indicator Performance
Percentage of the Fund's NAV invested in excluded countries (as defined in the investment policy of the Fund)	0%
Percentage of the Fund's NAV invested in government-owned issuers that are not government guaranteed involved in controversial business activities and controversies (as defined in the investment policy of the Fund)	0%
Proportion of Green Bonds in the portfolio as a percentage of the Fund's invested assets (excluding cash holdings)	56.30%

● **...and compared to previous periods?**

Compared to previous period, figures are stable.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Fund made sustainable investments that contributed to environmental objectives which included renewable energy, energy efficiency, pollution prevention and control, environmentally sustainable management of living natural resources and land use, biodiversity, clean transportation, sustainable water and wastewater management, climate change adaptation, circular economy and green buildings.

The Fund achieved those objectives by investing in Green Bonds, issued under a recognised green bond standard (e.g. ICMA/CBI/EU GS), that aimed to finance or re-finance projects, expenditure or assets that helped to address climate and environmental issues.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The Fund took into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Fund.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

In relation to government-owned issuers that are not government guaranteed, the ESG Policy of the Fund addressed a number of other adverse indicators by excluding a number of issuers involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Fund reduced its exposure to greenhouse gas emissions. The ESG Policy of the Fund also excluded issuers involved in controversial weapons, and those that were deemed non-compliant with the principles of the United Nations Global Compact.

In relation to government issuers, the relevant PAIs were considered through the eligibility and exclusion criteria, e.g. countries that had not ratified the Paris Agreement were excluded, which reduced exposure to greenhouse gas emissions. Additionally, by limiting eligibility to countries that had ratified and implemented in national legislation the eight fundamental conventions identified in the International Labour Organisation's Declaration on Fundamental Rights and Principles at Work, and at least half of the 18 core International Human Rights Treaties, the Fund reduced its exposure to countries exposed to social violations.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was captured through exclusion of issuers, sectors or countries from the investible universe if they were deemed not to be in alignment. The Fund also excluded issuers that weren't compliant with the UN Global Compact principles.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

As noted above, the Fund considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

The below table shows the PAI data for the Fund. The data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	0.00	0.00	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		0.00	0.00	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		0.00	0.00	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		0.00	0.00	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	0.00	0.00	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,057.36	8.53	Fund level Total Emission Intensity-Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	10.53	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	47.14	5.85	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	0.00	1.47	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	0.00	0.00	
	Manufacturing	0.00	0.00	
	Mining & Quarrying	0.00	0.00	
Real Estate Activities	0.00	0.00		
Transportation & Storage	0.00	0.00		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.00	0.00	
	7. Activities negatively affecting biodiversity-sensitive areas	0.00	7.83	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.00	0.00	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations fo UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	7.83	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	4.36	7.83	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	0.00	0.00	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	0.00	0.00	Waited Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap- ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	12.75	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of January 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
BUNDESOBL-G	Sovereign	5.09%	Germany
FRANCE O.A.T.	Sovereign	3.76%	France
BTPS 4 4/30/2035	Sovereign	3.71%	Italy
DEUTSCHLAND REP	Sovereign	3.17%	Germany
BUNDESOBL-G	Sovereign	3.07%	Germany
BTPS	Sovereign	3.07%	Italy
REP OF AUSTRIA	Sovereign	2.93%	Austria
DEUTSCHLAND REP	Sovereign	2.73%	Germany
IRISH GOVT	Sovereign	2.63%	Ireland
BELGIAN GOVT	Sovereign	2.25%	Belgium
EUROPEAN INVT BK	Financials	2.18%	Luxembourg
BELGIAN GOVT	Sovereign	1.95%	Belgium
FRANCE O.A.T.	Sovereign	1.93%	France
BTPS	Sovereign	1.92%	Italy
NETHERLANDS GOVT	Sovereign	1.73%	Netherlands

### What was the proportion of sustainability-related investments?

Please see below fields.

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

99.79% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.21% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

56.23% of the Fund's NAV was invested in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

## ● In which economic sectors were the investments made?

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	6.85
Communication Services	0.00
Consumer Discretionary	0.00
Information Technology	0.00
Industrials	0.00
Consumer Staples	0.00
Energy	0.00
Real Estate	0.00
Health Care	0.00
Materials	0.00
Utilities	0.65
Sovereign	92.29
Cash	0.21
<b>Total</b>	<b>100.00</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	0.00
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>0.00</b>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

0% of the Fund's portfolio was aligned with the EU Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes
- In fossil gas       In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

**What was the share of investments made in transitional and enabling activities?**

N/A

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund continues to have 0% alignment with the EU Taxonomy, as with the previous reference period.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

As the Fund does not currently intend to be EU Taxonomy aligned, 56.23% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

**What was the share of socially sustainable investments?**

N/A

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and/or for investment purposes and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund sought to attain the environmental characteristics by applying the ESG Policy of the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

In addition, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy. Please refer to the section "How did this financial product consider principal adverse impacts on sustainability factors" for examples of researched issuers during the reference period.

**How did this financial product perform compared to the reference benchmark?**

NA

● **How does the reference benchmark differ from a broad market index?**

NA

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

NA

● **How did this financial product perform compared with the reference benchmark?**

NA

● **How did this financial product perform compared with the broad market index?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

- It made **sustainable investments with an environmental objective:** \_\_\_\_\_%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It made **sustainable investments with a social objective:** \_\_\_\_\_%

No

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 60.99 % of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective

- It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were to gain exposure to issuers demonstrating a robust ESG profile, i.e. issuers with limited/no involvement in certain business activities and with no involvement in severe ESG controversies. The Fund also aimed to gain increased exposure to those issuers generating revenue from green projects, and those that exhibit lower levels of carbon emissions and fossil fuel reserves, relative to the companies that comprise the FTSE All-Share ex Investment Trusts Index (the "**Parent Index**").

The Fund achieved the environmental and social characteristics by tracking the FTSE All Share ex Investment Trusts ESG Climate Select Index ("**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

#### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as follows at 31st of December 2024, the data is representative of the

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

reference period

Sustainability Indicator	Indicator Performance
FTSE ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the Parent Index	8.4% improvement
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Parent Index	41.7% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

Compared to last period the FTSE ESG Score improvement (7.6%) and the CO2 emissions intensity reduction (39.5%) for the Fund are slightly higher. The Fund continues to avoid companies excluded by the Reference Index.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The sustainable investments made by the Fund contributed to environmental objectives such as climate change, water management, pollution prevention, and to social objectives such as good health, well-being and gender equality. The Fund achieved those objectives by investing in constituents of the Reference Index. According to Invesco's sustainable investment framework, a percentage (as disclosed above) of constituents of the Reference Index contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index or had their weightings reduced.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

The index methodology directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons, and those that were deemed non-compliant with the principles of the United Nations Global Compact. Through re-weighting constituents based on FTSE ESG scores, green revenue, carbon emissions and fossil fuel reserves, the index also addressed a number of other adverse indicators.

FTSE ESG Scores consider a number of key issues in their construction, including, but not limited to; GHG emissions and energy reduction, intensity of GHG emission reports, biodiversity, quantified water discharge and resource use, policy and procedures radioactive waste, actions to address labour issues and improve diversity, Policy addressing non-discrimination, and commitment to diversity on the Board.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") was captured in the index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that weren't compliant with the UN Global Compact (the "**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

#### **How did this financial product consider principal adverse impacts on sustainability factors?**

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

The below table shows the PAI scores for the fund- the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	4,032.05	99.98	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		707.78	99.98	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		80,862.57	99.98	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		85,602.40	99.98	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	728.56	99.98	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,097.86	99.86	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	100.00	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	52.32	82.71	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	37.25	41.55	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.02	1.47	
	Electricity, Gas, Steam & Air Conditioning Supply	1.32	0.35	
Manufacturing	0.12	32.51		
Mining & Quarrying	0.83	12.00		
Real Estate Activities	0.20	1.67		
Transportation & Storage	0.38	0.65		

	Water Supply, Sewerage, Waste Management & Remediation Activities	0.66	1.61	
	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.07	5.99	
Biodiversity	7. Activities negatively affecting biodiversity-sensitive areas	12.15	100.00	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	1.30	98.75	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations fo UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	100.00	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	32.18	100.00	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	24.00	26.37	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	45.64	100.00	Waited Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-	0.00	100.00	Share of investments in investee companies involved in

personnel mines, cluster munitions, chemical weapons and biological weapons)			the manufacture or selling of controversial weapons
--	--	--	---

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

*Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.*

### What were the top investments of this financial product?

Largest Investments	Sector	% Assets	Country
SHEL LN COM	Energy	6.92%	United Kingdom
ASTRAZENECA PLC	Health Care	6.52%	United Kingdom
GSK LN COM	Health Care	5.57%	United Kingdom
DIAGEO PLC	Consumer Staples	5.57%	United Kingdom
UNILEVER PLC	Consumer Staples	5.39%	United Kingdom
LLOYDS BANKING	Financials	4.60%	United Kingdom
BARCLAYS PLC	Financials	4.49%	United Kingdom
EXPERIAN PLC	Industrials	4.40%	Ireland
RECKITT BENCKISE	Consumer Staples	3.41%	United Kingdom
HSBC HOLDINGS PL	Financials	2.81%	United Kingdom
AV/ LN COM	Financials	2.79%	United Kingdom

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of January 2024 to 31st of December 2024. The data is representative of the reference period.

### What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

100% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

60.99% of the Fund's NAV was invested in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	21.88
Communication Services	7.36
Consumer Discretionary	8.19
Information Technology	4.37
Industrials	11.07
Consumer Staples	17.19
Energy	9.12
Real Estate	1.67
Health Care	12.09
Materials	5.10
Utilities	1.96
<b>Total</b>	<b>100.00</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.03
10102010	Integrated Oil & Gas	9.09
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>9.12</b>

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

0% of the Fund's portfolio was aligned with the EU Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

● **What was the share of investments made in transitional and enabling activities?**

NA

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund continues to have 0% alignment with the EU Taxonomy, as with the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

As the Fund does not currently intend to be EU Taxonomy aligned, 4.92% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

**What was the share of socially sustainable investments?**

56.07% of the Fund's NAV.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

NA

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

### ● **How does the reference benchmark differ from a broad market index?**

The Reference Index differs from a broad market index because it seeks to increase overall exposure to companies demonstrating both a robust ESG (environmental, social and governance) profile as well as a companies generating an increased percentage of their revenue from green projects, and those that exhibit lower levels of carbon emissions and fossil fuel reserves, relative to a broad market index.

### ● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

As the Fund fully replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

<b>Sustainability Indicator</b>	<b>Fund Indicator Performance</b>	<b>Reference Index Indicator Performance</b>
FTSE ESG Score (as defined in the methodology of the Reference Index)	4.11	4.11
CO2 emissions intensity (Scope 1+2/Revenue)	48.9	48.9
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

### ● **How did this financial product perform compared with the reference benchmark?**

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

### ● **How did this financial product perform compared with the broad market index?**

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and Parent

Index differed as below:

<b>Sustainability Indicator</b>	<b>Fund Indicator Performance</b>	<b>Broad Market benchmark (Parent Index) Indicator Performance</b>
FTSE ESG Score (as defined in the methodology of the Reference Index)	4.11	3.79
CO2 emissions intensity (Scope 1+2/Revenue)	48.9	83.8
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 25.6% exposure to excluded companies at the latest Reference Index rebalance date

## Sustainable investment objective

### Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: 99.89 %
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: \_\_\_\_\_ %

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_\_\_ % of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was to invest in global companies whose innovative technologies contributed to the generation and utilisation of cleaner energy, conservation, efficiency and the advancement of renewable energy. The Fund's portfolio was mainly composed of companies focused on wind, solar, biofuels, hydro, wave, tidal, geothermal and other relevant renewable energy businesses, as well as energy conversion, storage, conservation, efficiency, materials relating to those activities. The Fund achieved this by tracking the WilderHill New Energy Global Innovation Index ("**Reference Index**"), which has a methodology that is consistent with attaining the sustainable investment objective of the Fund.

The extent to which the Fund tracked Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

The environmental characteristics of the Fund were achieved by applying the Index Provider's exclusion criteria and by the Index Provider determining a company's eligibility for inclusion in the Reference Index by assessing whether the primary part of the company's business activities was focused on new energy innovation.

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

*Please note that the Fund was re-categorised from Article 8 to Article 9 on 28 May 2024.*

### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the sustainable investment objective. The Fund performed as at 31st of December 2024. The data is representative of the

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

reference period.

Sustainability Indicator	Indicator Performance
Percentage of the Fund portfolio invested in companies associated with the clean energy sectors (as more fully described in the supplement)	99.89%
Sustainalytics Risk Rating (as defined in the methodology of Reference Index) of the fund	23.1
CO2 emissions intensity (Scope 1+2 / Revenue) of the Fund	131.3
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

Barring ancillary liquidity holdings and derivatives, the Fund continues to invest solely in companies associated with the hydrogen economy. Compared to last period the Sustainalytics Risk Rating (21.8) and CO2 emissions intensity (127.7) for the Fund are both slightly higher. The Fund continues to avoid companies excluded by the Reference Index

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

The index methodology directly excluded a number of companies involved in certain business activities. Through the removal of companies involved in thermal coal, shale energy and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons, those facing severe ESG controversies, as assessed via Sustainalytics Controversy Scores, and those that were deemed non-compliant with the principles of the United Nations Global Compact.

Sustainalytics Controversy Scores consider controversies in a number of different areas, including, but not limited to; discrimination & harassment, land use and biodiversity, energy use and greenhouse gas emissions, discharges and releases (water), degradation & contamination (land), and controversial weapons.

Sustainalytics Risk Ratings consider a number of key issues in their construction, including, but not limited to biodiversity programmes, hazardous waste management, water risk management, GHG risk management, carbon intensity, gender pay equality programme, gender pay disclosure, and board diversity.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") is captured in the index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that weren't compliant with the UN Global Compact (the "UNGC"). This set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the Human Rights space.

The index methodology excluded companies that faced severe ESG controversies, as assessed via Sustainalytics Controversy Scores. As part of their research Sustainalytics consider global standards screening, in particular specific international norms and standards including both the OECD Guidelines and the UN Guiding Principles.

***How did this financial product consider principal adverse impacts on sustainability factors?***

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

The below table shows the PAI scores for the fund, the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	876.94	76.96	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		918.80	76.96	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		62,944.43	76.96	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		64,740.18	76.96	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	1,904.54	76.96	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	5,411.60	97.72	Fund level Total Emission Intensity-Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.95	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	76.88	38.88	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	5.58	25.95	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	0.50	11.49	
	Manufacturing	0.71	39.01	
Mining & Quarrying	0.17	0.16		
Real Estate Activities	0.00	0.74		
Transportation & Storage	0.00	0.00		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.03	1.31	
	7. Activities negatively affecting biodiversity-sensitive areas	0.70	76.35	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.67	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.50	75.07	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	76.35	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	50.66	75.52	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	6.18	1.22	
	13. Board gender diversity	28.77	73.82	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.97	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is From the 1st of January 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
MEYER BURGER TEC	Information Technology	22.15%	Switzerland
SHIHLIN ELEC&ENG	Industrials	0.97%	Taiwan
TIANNENG POWER	Consumer Discretionary	0.92%	China
ACHR US COM	Industrials	0.91%	United States
XINYI SOLAR HLDS	Information Technology	0.86%	China
EOSE US COM	Industrials	0.84%	United States
BE US COM	Industrials	0.81%	United States
XPEV US ADR	Consumer Discretionary	0.81%	China
LS ELECTRIC CO L	Industrials	0.81%	South Korea
JINKOSOLAR-ADR	Information Technology	0.79%	China
NIO INC - ADR	Consumer Discretionary	0.79%	China
VOLTRONIC POWER	Industrials	0.78%	Taiwan
CHUNG-HSIN	Industrials	0.78%	Taiwan
GS YUASA CORP	Industrials	0.78%	Japan
LOTTE ENERGY MAT	Information Technology	0.78%	South Korea

### What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

99.89% of the Fund's NAV was invested in accordance with the sustainable investment objective of the Fund.

0.11% of the Fund's NAV was invested in investments which did not qualify as sustainable investments.

99.89% of the Fund's NAV was invested in sustainable investments with an environmental objective.

#### ● In which economic sectors were the investments made?

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	0.82
Communication Services	0.00
Consumer Discretionary	6.28
Information Technology	36.43
Industrials	36.72
Consumer Staples	0.41
Energy	1.88
Real Estate	0.00
Health Care	0.00
Materials	2.48
Utilities	14.90
Unclassified	0.08
<b>Total</b>	<b>100.00</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.49
10102010	Integrated Oil & Gas	0.00
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	1.39
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>1.88</b>

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

#### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Although the Fund does not commit to a minimum of sustainable investments aligned with the EU Taxonomy the extent to which the Fund as a whole was aligned with the EU Taxonomy was calculated for the reference period. 30.69% (Turnover) of the Fund's portfolio was aligned with the EU Taxonomy. The figures are representative of the reference period.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities are economic activities** for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas       In nuclear energy

No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The below table shows the share of investments in transitional and enabling activities - the data is representative of the reference period

	Aligned
<b>Enabling</b>	<b>19.06%</b>
<b>Transition</b>	<b>0.66%</b>

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments that were aligned with the EU Taxonomy decreased compared to the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

As the Fund does not currently intend to be EU Taxonomy aligned, 69.20% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

**What was the share of socially sustainable investments?**

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

N/A

**What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

0.11% of the Fund's NAV was invested in other investments which do not qualify as sustainable investments, this portion included investments such as financial derivative instruments for hedging and/or efficient portfolio management and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

**What actions have been taken to attain the sustainable investment objective during the reference period?**

The Fund sought to attain the sustainable investment objective by tracking the Reference Index, which has a methodology that is consistent with attaining the sustainable investment objective promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information on how the indicators performed during the reference period.

**How did this financial product perform compared to the reference sustainable benchmark?**

See tables completed in below sections.

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

● **How did the reference benchmark differ from a broad market index?**

The Reference Index differs from a broad market index because it comprises only companies with a meaningful exposure to clean energy.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

As the Fund fully replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
Percentage of exposure in companies associated with the clean energy sectors (as more fully described in the supplement)	99.89%	100%
Sustainalytics Risk Rating (as defined in the methodology of Reference Index)	23.1	23.1
CO2 emissions intensity (Scope 1+2 / Revenue)	131.3	131.3
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

● **How did this financial product perform compared with the reference benchmark?**

As Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference

Benchmark.

● **How did this financial product perform compared with the broad market index?**

Compared to a broad global equity index, the sustainability indicators for the Fund differed as below. The greater CO2 emissions intensity for the fund can be attributed somewhat to its sector breakdown.

<b>Sustainability Indicator</b>	<b>Fund Indicator Performance</b>	<b>Broad Market benchmark Indicator Performance</b>
Percentage of exposure in companies associated with the clean energy sectors (as more fully described in the supplement)	99.89%	0.4%
Sustainalytics Risk Rating (as defined in the methodology of Reference Index)	23.1	21.1
CO2 emissions intensity (Scope 1+2 / Revenue)	131.3	93.3
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 11.2% exposure to excluded companies at the latest Reference Index rebalance date

## Sustainable investment objective

### Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective**: 99.99 %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: \_\_\_\_\_ %

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its

objective a sustainable investment, it had a proportion of \_\_\_\_\_ % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was to invest in global companies whose innovative technologies focus on advancing wind energy, enabling its use, hence facilitating a transition to a lower carbon economy. The Fund's portfolio was mainly composed of companies focused on improving wind turbines and blades, providing materials used in wind energy, modernising the grid, facilitating greater wind energy deployment or expanding its use and companies involved in onshore and offshore wind energy. The Fund achieved this objective by tracking the WilderHill Wind Energy Index (the "**Reference Index**"), which has a methodology that is aligned with attaining the sustainable objective of the Fund.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

#### ● **How did the sustainability indicators perform?**

The Fund used a variety of indicators to measure the attainment of the sustainable investment objective.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The Fund performed as at 31st of December 2024. The data is representative of the reference period.

Sustainability Indicator	Performance Indicator
Percentage of the Fund portfolio invested in companies associated with the wind energy sectors (as more fully described in the Supplement)	99.99%
Sustainalytics Risk Rating (as defined in the methodology of the Reference Index) of the Fund	21.6
CO2 emissions intensity (Scope 1+2 / Revenue) for the Fund	64.3
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

Barring ancillary liquidity holdings and derivatives, the Fund continues to invest solely in companies associated with the hydrogen economy. Compared to last period the Sustainalytics Risk Rating (18.4) is slightly higher, whilst the CO2 emissions intensity (71.4) has dropped slightly. The Fund continues to avoid companies excluded by the Reference Index

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The index methodology directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons, those facing severe ESG controversies, as assessed via Sustainalytics Controversy Scores, and those that are deemed non-compliant with the principles of the United Nations Global Compact. Additionally, through its exclusions based on Sustainalytics Risk Rating Score the Reference Index also addressed a number of other adverse indicators. Companies were assessed for inclusion based on whether they were deemed to help the world decarbonise and reduce climate risk generally.

Sustainalytics Controversy Scores consider controversies in a number of different areas, including, but not limited to discrimination and harassment, land use and biodiversity, energy use and greenhouse gas emissions, discharges and releases (water), degradation and contamination (land), and controversial weapons.

Sustainalytics Risk Ratings consider a number of key issues in their construction, including, but not limited to biodiversity programmes, hazardous waste management, water risk management, GHG risk management, carbon intensity, gender pay equality programme, gender pay disclosure, and board diversity.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment with the OECD Guidelines for Multinational Enterprises (the "OECD Guidelines") and the UN Guiding Principles on Business and Human Rights (the "UN Guiding Principles") was captured in the index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The index methodology excluded companies that weren't compliant with the UN Global Compact (the "UNGC"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing severe ESG controversies, as assessed via Sustainalytics Controversy Scores. As part of their research Sustainalytics consider global standards screening, in particular specific international norms and standards including both the OECD Guidelines and the UN Guiding Principles.

***How did this financial product consider principal adverse impacts on sustainability factors?***

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

The below table shows the PAI scores for the fund, the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	51.23	96.86	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		67.37	96.86	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		11,632.09	96.86	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		11,750.69	96.86	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	2,970.56	96.86	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	9,740.17	96.28	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	1.15	99.65	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	75.83	49.81	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	4.60	32.44	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.01	1.04	
	Electricity, Gas, Steam & Air Conditioning Supply	0.71	23.05	
	Manufacturing	0.40	41.74	
	Mining & Quarrying	0.05	0.33	
	Real Estate Activities	0.00	0.00	
Transportation & Storage	0.00	0.00		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		
Wholesale & Retail	0.02	4.33		

Biodiversity	Trade & Repair of Motor Vehicles & Motorcycles			
	7. Activities negatively affecting biodiversity-sensitive areas	1.74	97.34	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	1.35	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.51	94.64	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	97.34	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	44.58	94.98	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	3.98	0.36	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	31.42	97.00	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.65	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is From the 1st of January 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
SHIHLIN ELEC&ENG	Industrials	1.89%	Taiwan
HD HYUNDAI ELECT	Industrials	1.77%	South Korea
LS ELECTRIC CO L	Industrials	1.63%	South Korea
DAIHEN CORP	Industrials	1.61%	Japan
NEOEN FP COM	Utilities	1.54%	France
TORAY INDUSTRIES	Materials	1.54%	Japan
TOYO TANSO CO LT	Industrials	1.53%	Japan
TA YA ELEC	Industrials	1.52%	Taiwan
TECO ELEC & MACH	Industrials	1.51%	Taiwan
PRYSMIAN SPA	Industrials	1.51%	Italy
RNW US COM	Utilities	1.51%	India
GRE SM COM	Utilities	1.50%	Spain
BELDEN INC	Information Technology	1.50%	United States
INNERGEX RENEWAB	Utilities	1.50%	Canada
CHINA DATANG C-H	Utilities	1.50%	China

### What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

99.99% of the Fund's NAV was invested in accordance with the sustainable investment objective of the Fund, by virtue of the Fund tracking as closely as possible the Reference Index.

0.01% of the Fund's NAV was invested in other investments which do not qualify as sustainable investments, this portion included investments such as financial derivative instruments for hedging and/or efficient portfolio management and cash for ancillary liquidity.

99.99% of the Fund's NAV was invested in sustainable investments with an environmental objective.

#### ● In which economic sectors were the investments made?

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	0.00
Communication Services	0.00
Consumer Discretionary	2.81
Information Technology	12.05
Industrials	50.77
Consumer Staples	0.00
Energy	2.27
Real Estate	0.00
Health Care	0.00
Materials	1.89
Utilities	30.20
Cash	0.01
<b>Total</b>	<b>100.00</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	2.27
10102010	Integrated Oil & Gas	0.00
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>2.27</b>

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution

#### To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Although the Fund does not commit to a minimum of sustainable investments aligned with the EU Taxonomy, the extent to which the Fund was aligned with the EU Taxonomy was calculated for the reference period. 32.73% (Turnover) of the Fund's portfolio was aligned with the EU Taxonomy. The figures are representative of the reference period.

to an environmental objective

**Transitional activities are economic activities** for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes
- In fossil gas     In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The below table shows the share of investments in transitional and enabling activities - data is representative of the reference period.

	Aligned
Enabling	13.79%
Transition	0.05%

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments that were aligned with the EU Taxonomy decreased compared to the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

● **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

As the Fund does not currently intend to be EU Taxonomy aligned, 67.26% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

● **What was the share of socially sustainable investments?**

N/A

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

NA

**What actions have been taken to attain the sustainable investment objective during the reference period?**

The Fund sought to attain the sustainable investment objective by tracking the Reference Index, which has a methodology that is consistent with attaining the sustainable investment objective promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information on how the indicators performed during the reference period.

**How did this financial product perform compared to the reference sustainable benchmark?**

See tables completed in below sections:

● **How did the reference benchmark differ from a broad market index?**

The Reference Index differs from a broad market index because it comprises only companies with a meaningful exposure to wind energy (a clean alternative energy source).

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

As the Fund fully replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
Percentage of exposure in companies associated with the wind energy sectors (as more fully described in the Supplement)	99.99%	100%
Sustainalytics Risk Rating (as defined in the methodology of the Reference Index)	21.6	21.6
CO2 emissions intensity (Scope 1+2 / Revenue)	64.3	64.3
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

● **How did this financial product perform compared with the reference benchmark?**

As the Fund achieved the sustainable investment objective by tracking the Reference Index, which has a methodology that is consistent with attaining the sustainable investment objective of the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

● **How did this financial product perform compared with the broad market index?**

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

Compared to a broad global equity index, the sustainability indicators for the Fund differed as below:

<b>Sustainability Indicator</b>	<b>Fund Indicator Performance</b>	<b>Broad Market benchmark Indicator Performance</b>
Percentage of exposure in companies associated with the wind energy sectors (as more fully described in the Supplement)	99.99%	0.5%
Sustainalytics Risk Rating (as defined in the methodology of the Reference Index)	21.6	21.1
CO2 emissions intensity (Scope 1+2 / Revenue)	64.3	93.3
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 11.2% exposure to excluded companies at the latest Reference Index rebalance date

## Sustainable investment objective

### Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: 99.98 %
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: \_\_\_\_\_ %

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_\_\_ % of sustainable investments

- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective is to invest in global companies whose innovative technologies focus on advancing the use of hydrogen, fuel cells and the potential hydrogen economy hence facilitating a transition to a lower carbon economy. The Fund's portfolio was mainly composed of companies involved in renewable green hydrogen, improving hydrogen generation, its storage, conversion, uses in transportation, innovation and the advancement of fuel cells. The Fund achieved this objective by tracking the WilderHill Hydrogen Economy Index (the "**Reference Index**"), which has a methodology that is aligned with attaining the sustainable objective of the Fund.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in section "Tracking Error Analysis" of the annual report.

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the sustainable investment objective. The

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

Fund performed as at 31st of December 2024. The data is representative of the reference period.

Sustainability Indicator	Indicator Performance
Percentage of the Fund portfolio invested in companies associated with the hydrogen economy sectors (as more fully described in the Supplement)	99.98%
Sustainalytics Risk Rating (as defined in the methodology of the Reference Index) of the Fund	23.8
CO2 emissions intensity (Scope 1+2 / Revenue) for the Fund	171.2
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

Barring ancillary liquidity holdings and derivatives, the Fund continues to invest solely in companies associated with the hydrogen economy. Compared to last period the Sustainalytics Risk Rating (21.8) and CO2 emissions intensity (140.0) for the Fund are both slightly higher. The Fund continues to avoid companies excluded by the Reference Index

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The index methodology directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons, those facing severe ESG controversies, as assessed via Sustainalytics Controversy Scores, and those that were deemed non-compliant with the principles of the United Nations Global Compact. Additionally, through its exclusions based on Sustainalytics Risk Rating Score the Reference Index also addressed a number of other adverse indicators. Companies were assessed for inclusion based on whether they were deemed to help the world decarbonise and reduce climate risk generally.

Sustainalytics Controversy Scores consider controversies in a number of different areas, including, but not limited to discrimination and harassment, land use and biodiversity, energy use and greenhouse gas emissions, discharges and releases (water), degradation and contamination (land), and controversial weapons.

Sustainalytics Risk Ratings consider a number of key issues in their construction, including, but not limited to biodiversity programmes, hazardous waste management, water risk management, GHG risk management, carbon intensity, gender pay equality programme, gender pay disclosure, and board diversity.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") was captured in the index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that weren't compliant with the UN Global Compact (the "**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing severe ESG controversies, as assessed via Sustainalytics Controversy Scores. As part of their research Sustainalytics considered global standards screening, in particular specific international norms and standards including both the OECD Guidelines and the UN Guiding Principles.

***How did this financial product consider principal adverse impacts on sustainability factors?***

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

The below table shows the PAI scores for the fund, the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1. GHG Emissions	280.25	96.03	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		165.13	96.03	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		6,299.47	96.03	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		6,744.85	96.03	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	2,332.91	96.03	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	7,699.88	96.38	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.56	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	77.07	58.43	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	11.03	34.68	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.01	1.17	
	Electricity, Gas, Steam & Air Conditioning Supply	0.51	9.82	
	Manufacturing	1.62	60.08	
Mining & Quarrying	0.21	0.77		
Real Estate Activities	0.00	0.00		
Transportation & Storage	0.00	0.00		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		
Wholesale & Retail Trade & Repair of	0.00	0.00		

Biodiversity	Motor Vehicles & Motorcycles			
	7. Activities negatively affecting biodiversity-sensitive areas	0.00	97.28	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	2.36	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	1.48	95.48	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations fo UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	97.28	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	51.04	95.10	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	6.83	3.29	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	28.47	94.92	Waited Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.56	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

*Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.*

## What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is From the 1st of January 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
TIANNENG POWER	Consumer Discretionary	2.01%	China
BE US COM	Industrials	1.85%	United States
CHUNG-HSIN	Industrials	1.84%	Taiwan
NEOEN FP COM	Utilities	1.78%	France
TORAY INDUSTRIES	Materials	1.76%	Japan
TOYO TANSO CO LT	Industrials	1.75%	Japan

SCATEC ASA	Utilities	1.68%	Norway

**Asset allocation** describes the share of investments in specific assets.

### What was the proportion of sustainability-related investments?

See below field

#### ● What was the asset allocation?

99.98% of the Fund's NAV was invested in accordance with the sustainable investment objective of the Fund, by virtue of the Fund tracking as closely as possible the Reference Index.

0.02% of the Fund's NAV was invested in other investments which do not qualify as sustainable investments, this portion included investments such as financial derivative instruments for hedging and/or efficient portfolio management and cash for ancillary liquidity.

99.98% of the Fund's NAV was invested in sustainable investments with an environmental objective.

#### ● In which economic sectors were the investments made?

GICS Sector Breakdown - The data is representative of the reference period.

Sector (GICS)	Weight %
Financials	0.00
Communication Services	0.00
Consumer Discretionary	4.10
Information Technology	15.16
Industrials	44.06
Consumer Staples	0.00
Energy	3.23
Real Estate	0.00
Health Care	0.00
Materials	18.59
Utilities	14.84
Cash	0.02
<b>Total</b>	<b>100</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	0.00
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	3.23
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>3.23</b>

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Although the Fund does not commit to a minimum of sustainable investments aligned with the EU Taxonomy, the extent to which the Fund as a whole was aligned with the EU Taxonomy was calculated for the reference period. 17.40% (Turnover) of the Fund's portfolio was aligned with the EU Taxonomy. The figures are representative of the reference period.

to an environmental objective

**Transitional activities are economic activities** for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas       In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The below table shows the share of investments in transitional and enabling activities - the data is representative of the reference period

	Aligned
<b>Enabling</b>	<b>7.77%</b>
<b>Transition</b>	<b>0.19%</b>

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

● **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

As the Fund does not currently intend to be EU Taxonomy aligned, 82.59% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

● **What was the share of socially sustainable investments?**

N/A

**What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?**

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

0.02% of the Fund's NAV was invested in other investments which do not qualify as sustainable investments, this portion included investments such as financial derivative instruments for hedging and/or efficient portfolio management and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

### What actions have been taken to attain the sustainable investment objective during the reference period?

The Fund sought to attain the sustainable investment objective by tracking the Reference Index, which has a methodology that is consistent with attaining the sustainable investment objective promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

### How did this financial product perform compared to the reference sustainable benchmark?

See tables completed in below sections:

#### ● How did the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it comprises only companies with a meaningful exposure to hydrogen (a clean alternative to natural gas).

#### ● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

As the Fund fully replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
Percentage of exposure in companies associated with the hydrogen economy sectors (as more fully described in the Supplement)	99.98%	100%
Sustainalytics Risk Rating (as defined in the methodology of the Reference Index)	23.8	23.8
CO2 emissions intensity (Scope 1+2 / Revenue)	171.2	171.2
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

#### ● How did this financial product perform compared with the reference benchmark?

As the Fund achieved the sustainable investment objective by tracking the Reference Index, which has a methodology that is consistent with attaining the sustainable investment objective of the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

#### ● How did this financial product perform compared with the broad market index?

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

Compared to a broad global equity index, the sustainability indicators for the Fund differed as below. The greater CO2 emissions intensity for the fund can be attributed somewhat to its sector breakdown.

<b>Sustainability Indicator</b>	<b>Fund Indicator Performance</b>	<b>Broad Market benchmark Indicator Performance</b>
Percentage of exposure in companies associated with the hydrogen economy sectors (as more fully described in the Supplement)	99.98%	0.4%
Sustainalytics Risk Rating (as defined in the methodology of the Reference Index)	23.8	21.1
CO2 emissions intensity (Scope 1+2 / Revenue)	171.2	93.3
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 11.2% exposure to excluded companies at the latest Reference Index rebalance date

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

Product name: Invesco USD High Yield Corporate Bond ESG UCITS ETF Legal entity identifier: 549300RNEZ4Q61YGDZ85

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** \_\_\_\_\_ %
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It made **sustainable investments with a social objective:** \_\_\_\_\_ %

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 47.05 % of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective

- It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were to increase overall exposure to issuers demonstrating a robust ESG profile i.e. issuers with a more favourable ESG rating compared to similar issuers. The fund also reduced exposure to companies involved in certain business activities and those with involvement in very severe ESG controversies.

The Fund achieves the environmental and social characteristics by tracking the Bloomberg MSCI USD High Yield Liquid Corporate ESG Weighted SRI Bond Index ("**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

*Please note that this Fund was closed on 6 November 2024.*

#### ● **How did the sustainability indicators perform?**

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as follows as at 31 December 2024, the data is representative of

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

the reference period:

Sustainability Indicator	Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the Bloomberg US Corporate High Yield Bond Index (the " <b>Parent Index</b> ")	18.8% improvement
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Parent Index	36.8% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

Compared to last period the MSCI ESG Score improvement (46.6%) for the Fund is lower and the CO2 emissions intensity reduction (21.7%) higher. The Fund continues to avoid companies excluded by the Reference Index.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The sustainable investments made by the fund contributed to environmental objectives such as climate change, water management, pollution prevention, and to social objectives such as good health, well-being and gender equality. The Fund achieved those objectives by investing in constituents of the Reference Index. According to Invesco's sustainable investment framework, a percentage (as disclosed above) of constituents of the Reference Index contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index or had their weightings reduced.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The index methodology directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those facing very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score, and adjustment of the weighting for those that are above the threshold based on these same scores, the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data wasn't available to make such assessments.

MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to carbon emissions, product carbon footprint, biodiversity & land use, toxic emissions & waste, opportunities in renewable energy. The scores also take into account areas such as human capital as well as corporate governance, considering ownership & control, pay and the board.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to biodiversity & land use, energy & climate change, toxic emissions & waste, operational waste, discrimination & workforce diversity, and governance structures. Any company that violates the UN Global Compact receives a very severe MSCI Controversy Score.

***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") is captured in the index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that weren't compliant with the UN Global Compact (the "**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the UNGC, the International Labour Organisation's conventions, and the UN Guiding Principles on Business and Human Rights.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

The below table shows the PAI scores for the fund, the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	463.59	82.85	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		127.93	82.85	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		6,193.82	82.85	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		6,785.34	82.85	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	751.07	82.85	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,533.69	98.44	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	3.16	97.88	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	84.72	51.84	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	24.63	17.61	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	2.87	0.79	
	Manufacturing	0.96	17.52	
	Mining & Quarrying	1.08	3.49	
Real Estate Activities	0.30	4.28		
Transportation & Storage	8.20	4.39		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.49	0.59		

<b>Biodiversity</b>	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.09	7.61		
	7. Activities negatively affecting biodiversity-sensitive areas	1.85	96.40	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas	
<b>Water</b>	8. Emissions to water	0.01	0.29	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)	
<b>Waste</b>	9. Hazardous waste and radioactive waste ratio	0.45	86.68	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average	
<b>Social and employee matters</b>	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	96.40	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	64.54	95.82	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	
	12. Unadjusted gender pay gap	3.20	0.35	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies	
	13. Board gender diversity	31.12	96.00	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members	
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.54	Share of investments in investee companies involved in the manufacture or selling of controversial weapons	
	<b>Optional Indicators</b>	Optional Indicator: 4. Investments in companies without carbon emission reduction initiative	60.75		Share of investments in investee companies without carbon emission reduction initiatives aimed at aligning with the Paris Agreement

	Optional Indicator: 9. Lack of a human rights policy	19.39		Share of investments in entities without a human rights policy
--	--	-------	--	--

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

*Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.*

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From 1st of January 2024 to 06th of November 2024.

Largest Investments	Sector	% Assets	Country
UniCredit SpA	Financials	0.53%	Italy
Valaris Ltd	Energy	0.52%	United States
United States Cellular Corp	Communication Services	0.45%	United States
Vodafone Group PLC	Communication Services	0.44%	United Kingdom
WESCO Distribution Inc 7.25% 15/06/2028	Industrials	0.43%	United States
WESCO Distribution Inc 6.38% 15/03/2029	Industrials	0.43%	United States
Tenet Healthcare Corp 6.125% 15/06/2030	Health Care	0.43%	United States
Tenet Healthcare Corp 6.25% 01/02/2027	Health Care	0.42%	United States

Western Digital Corp	Information Technology	0.42%	United States
United Wholesale Mortgage LLC	Financials	0.42%	United States
United Rentals North America Inc	Consumer Discretionary	0.42%	United States
Univision Communications Inc	Communication Services	0.41%	United States
US Foods Inc	Consumer Staples	0.41%	United States
Vertiv Group Corp	Industrials	0.40%	United States

### What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

100% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

47.05% of the Fund's NAV was invested in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	8.42
Communication Services	15.18
Consumer Discretionary	13.14
Information Technology	5.47
Industrials	10.46
Consumer Staples	5.15
Energy	6.27
Real Estate	4.52
Health Care	10.30
Materials	5.68
Utilities	1.22
Unclassified	14.04
Cash	0.15
<b>Total</b>	<b>100.00</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.91
10101020	Oil & Gas Equipment & Services	0.82
10102010	Integrated Oil & Gas	0.00
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	1.27
10102040	Oil & Gas Storage & Transportation	3.27
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>6.27</b>

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

0% of the Fund's portfolio was aligned with the EU Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

NA

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments that were aligned with the EU Taxonomy decreased compared to the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

As the Fund does not currently intend to be EU Taxonomy aligned, 5.43% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. Currently the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

**What was the share of socially sustainable investments?**

41.62%

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

NA

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information on how the indicators performed during the reference period.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

### ● **How does the reference benchmark differ from a broad market index?**

The Reference Index differs from a broad market index because it seeks to increase overall exposure to issuers demonstrating both a robust ESG profile, and issuers that are assigned more favourable ESG scores using MSCI ESG metrics.

### ● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

As the Fund aims to replicate the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index)	6.58	6.58
CO2 emissions intensity (Scope 1+2/Revenue)	161.2	145.2
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

### ● **How did this financial product perform compared with the reference benchmark?**

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

### ● **How did this financial product perform compared with the broad market index?**

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund

and Parent Index differed as below:

<b>Sustainability Indicator</b>	<b>Fund Indicator Performance</b>	<b>Broad Market benchmark (Parent Index) Indicator Performance</b>
MSCI ESG Score (as defined in the methodology of the Reference Index)	6.58	5.54
CO2 emissions intensity (Scope 1+2/Revenue)	161.2	255.0
Percentage of the Fund portfolio Invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 41.8% exposure to excluded companies at the latest Reference Index rebalance date

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Solar Energy UCITS ETF

Legal entity identifier: 549300F3Y1FVUG9DNW45

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective: \_\_\_\_\_%**
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It made **sustainable investments with a social objective: \_\_\_\_\_%**

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 94.64 % of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental characteristics promoted by the Fund were to gain exposure to the global solar energy equity sector by investing in companies that derived significant revenue from solar business activities. The Fund achieved this by tracking the MAC Global Solar Energy Index ("**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The extent to which the Fund tracked Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

The environmental characteristics were achieved by applying the Index Provider's exclusion criteria to the index universe and the Index Provider determining a company's eligibility for inclusion in the Reference Index by assessing whether solar power was a significant component of the company's business.

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

#### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as at 31st of December 2024. The data is representative of the reference

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

period.

Sustainability Indicator	Indicator Performance
Percentage of the Fund portfolio invested in companies associated with the solar energy sectors (as more fully described in the Supplement)	99.97%
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund	394.6
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

Barring ancillary liquidity holdings and derivatives, the fund continues to only offer exposure to companies associated with the solar energy sector and exhibits 0% exposure to companies excluded by the methodology of the Reference Index. Emissions have risen from the previous period (275.9).

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The environmental objectives that the sustainable investments contributed to are the generation and use of solar energy.

The sustainable investments contributed to the objectives as the companies invested in had solar power as a significant component of its business, from which they derived significant revenue (as determined by the Index Provider).

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

The index methodology directly excluded a number of companies involved in certain business activities. Through removal of companies involved in coal and petroleum power generation, as well as those extracting crude petroleum and natural gas, the Reference Index reduced its exposure to greenhouse gas emissions. Index selection is based on revenue derived from solar business activities, as such the index limits its exposure to companies engaged in non-renewable energy production. The methodology also excluded companies that have the lowest S&P Global Governance & Economic Score.

S&P Global Governance & Economic Score consider a number of key issues in their construction, including, but not limited to, board gender diversity.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment with the OECD Guidelines for Multinational Enterprises (the "OECD Guidelines") and the UN Guiding Principles on Business and Human Rights (the "UN Guiding Principles") was captured in the index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The index methodology excluded companies that had the lowest S&P Global Governance & Economic Score. As part of their research S&P consider a number of topics that overlap with the OECD Guidelines, including the areas of corruption & bribery, customer relationship management, marketing practices, energy mix, innovation management, anti-competitive practices and tax strategy.

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

#### **How did this financial product consider principal adverse impacts on sustainability factors?**

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

The below table shows the PAI scores for fund, the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	2,840.74	71.07	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		2,713.96	71.07	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		32,770.74	71.07	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		38,325.44	71.07	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	800.35	71.07	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,934.78	93.43	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.32	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	69.49	39.47	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	3.05	40.02	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	0.81	9.79	
	Manufacturing	1.45	36.80	
	Mining & Quarrying	0.17	0.17	
	Real Estate Activities	0.00	3.21	
Transportation & Storage	0.00	0.00		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		
Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.03	1.51		

<b>Biodiversity</b>	7. Activities negatively affecting biodiversity-sensitive areas	0.00	76.10	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
<b>Water</b>	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
<b>Waste</b>	9. Hazardous waste and radioactive waste ratio	0.32	72.79	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
<b>Social and employee matters</b>	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	76.10	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	57.30	73.87	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	14.36	0.00	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	24.79	74.37	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	100.00	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

*Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.*

**What were the top investments of this financial product?**

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: From the 1st of January 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
MEYER BURGER TEC	Information Technology	22.42%	Switzerland
FIRST SOLAR INC	Information Technology	7.71%	United States
ENPHASE ENERGY	Information Technology	7.38%	United States
NXT US COM	Industrials	6.28%	United States
GCL TECHNOLOGY H	Information Technology	4.42%	Hong Kong
SUNRUN INC	Industrials	3.96%	United States

### What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

99.97% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.03% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

94.64% of the Fund's NAV was invested in sustainable investments.

#### ● In which economic sectors were the investments made?

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	3.23
Communication Services	0.00
Consumer Discretionary	0.00
Information Technology	60.01
Industrials	16.11
Consumer Staples	0.00
Energy	0.00

Health Care	0.00
Materials	0.63
Utilities	19.99
Cash	0.03
<b>Total</b>	<b>100.00</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	0.00
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>0.00</b>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Although the Fund does not commit to a minimum of sustainable investments aligned with the EU Taxonomy the extent to which the Fund as a whole was aligned with the EU Taxonomy was calculated for the reference period. 64.89% (Turnover) of the Fund's portfolio was aligned with the EU Taxonomy. The figures are representative of the reference period.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

**What was the share of investments made in transitional and enabling activities?**

The below table shows the share of investments in transitional and enabling activities - the data is representative of the reference period

	<b>Aligned</b>
<b>Enabling</b>	<b>44.76%</b>
<b>Transition</b>	<b>0.00%</b>

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

**How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments that were aligned with the EU Taxonomy decreased compared to the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

As the Fund does not currently intend to be EU Taxonomy aligned, 29.75% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

**What was the share of socially sustainable investments?**

NA

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

0.03% of the Fund's NAV was invested in investments that did not align with the environmental and social characteristics of the Fund. Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information on how the indicators performed during

## How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

### ● How does the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it comprises only companies that derive significant revenue from solar business activities.

### ● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund fully replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
Percentage of exposure in companies associated with the solar energy sectors (as more fully described in the Supplement)	99.97%	100%
CO2 emissions intensity (Scope 1+2/Revenue)	394.6	394.6
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

### ● How did this financial product perform compared with the reference benchmark?

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

### ● How did this financial product perform compared with the broad market index?

Compared to a broad global equity index, the sustainability indicators for the Fund differed as below. The greater CO2

#### Reference benchmarks

are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

emissions intensity for the Fund can be attributed somewhat to its sector breakdown.

<b>Sustainability Indicator</b>	<b>Fund Indicator Performance</b>	<b>Broad Market Benchmark Indicator Performance</b>
Percentage of exposure in companies associated with the solar energy sectors (as more fully described in the Supplement)	99.97%	0.07%
CO2 emissions intensity (Scope 1+2/Revenue)	394.6	93.3
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 45.6% exposure to excluded companies at the latest Reference Index rebalance date

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

Product name: Invesco NASDAQ-100 ESG UCITS ETF

Legal entity identifier: 54930070QYLC2UME7Q60

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: \_\_\_\_\_ %
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 61.67 % of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective

- It made **sustainable investments with a social objective**: \_\_\_\_\_ %

- It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to gain exposure to companies that meet certain specific ESG criteria i.e. issuers with limited/no involvement in certain business activities, with a more favourable ESG rating compared to similar issuers and with no involvement in severe ESG controversies. The Fund achieved this by tracking the NASDAQ100® ESG Index (the "**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

The environmental and social characteristics were achieved by applying the Index Provider's exclusion criteria to the Nasdaq 100® Index (the "**Parent Index**") and by evaluating and weighting the companies on the basis of their business activities, controversies and ESG Risk Ratings.

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

#### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as follows as at 31st of December 2024, the data is representative of the reference period.

Sustainability Indicator	Indicator Performance
Sustainalytics Risk Rating (as defined in the methodology of the Reference Index) of the Fund relative to the Parent Index	9.7% improvement
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Parent Index	17.1% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

#### ● ...and compared to previous periods?

Compared to last period the Sustainalytics Risk Rating improvement (8.4%) for the Fund is slightly higher and the CO2 emissions intensity reduction (40.4%) is lower. The Fund continues to avoid companies excluded by the Reference Index.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The sustainable investments made by the Fund contributed to environmental objectives such as climate change, water management, pollution prevention, and to social objectives such as good health, well-being and gender equality. The Fund achieved those objectives by investing in constituents of the Reference Index. According to Invesco's sustainable investment framework, a percentage (as disclosed above) of constituents of the Reference Index contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index or had their weightings reduced.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

The index methodology directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal, shale energy and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons, those that faced severe ESG controversies, as assessed via Sustainalytics Controversy Scores, and those that were deemed non-compliant with the principles of the United Nations Global Compact. Additionally, through its exclusions based on Sustainalytics Risk Rating Score, and adjustment of the weighting for those that are below the threshold based on these same scores, the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data wasn't available to make such assessments.

Sustainalytics Risk Rating consider a number of key issues in their construction, including, but not limited to; biodiversity programmes, hazardous waste management, water risk management, GHG risk management, carbon intensity, gender pay equality programme, gender pay disclosure, and board diversity.

Sustainalytics Controversy Scores consider controversies in a number of different areas, including, but not limited to; discrimination & harassment, land use and biodiversity, energy use and greenhouse gas emissions, discharges and releases (water), degradation & contamination (land), and controversial weapons.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") was captured through exclusion of companies from the investible universe if they were deemed not to be in alignment.

The Fund excluded companies that weren't compliant with the UN Global Compact (the "**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

### **How did this financial product consider principal adverse impacts on sustainability factors?**

As noted above, the Fund considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

The below table shows the PAI scores for the fund, the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric	
Greenhouse gas emissions	1. GHG Emissions	4,283.98	100.00	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)	
		4,604.82	100.00	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)	
		63,962.64	100.00	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)	
		72,851.44	100.00	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)	
	2. Carbon footprint	58.37	100.00	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)	
	3. GHG Intensity of investee companies	321.37	100.00	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)	
	4. Exposure to companies active in the fossil fuel sector	0.00	100.00	% of the fund exposed to any fossil fuels revenue	
	5. Share of non-renewable energy consumption	40.82	78.41	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)	
	5. Share of non-renewable energy production	19.43	41.06		
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector	
	Agriculture, Forestry & Fishing	0.00	0.00		
	Construction	0.00	0.00		
	Electricity, Gas, Steam & Air Conditioning Supply	0.43	0.25		
	Manufacturing	0.17	51.04		
	Mining & Quarrying	0.00	0.00		
	Real Estate Activities	0.00	0.00		
Transportation & Storage	0.88	0.33			
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00			
Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.04	1.37			
7. Biodiversity	7. Activites negatively	2.27	100.00		Share of investments in the

	affecting biodiversity-sensitive areas			fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
<b>Water</b>	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
<b>Waste</b>	9. Hazardous waste and radioactive waste ratio	0.03	99.94	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
<b>Social and employee matters</b>	10. Violations fo UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	100.00	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	51.52	100.00	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	20.06	4.73	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	34.71	98.86	Waited Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	100.00	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

*Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.*

#### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of**

investments of the financial product during the reference period which is: From the 1st of January 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
MICROSOFT CORP	Information Technology	10.76%	United States
NVIDIA CORP	Information Technology	10.27%	United States
APPLE INC	Information Technology	10.13%	United States

AMAZON.COM INC	Consumer Discretionary	2.78%	United States
NETFLIX INC	Communication Services	2.53%	United States
TESLA INC	Consumer Discretionary	2.27%	United States
ADV MICRO DEVICE	Information Technology	2.23%	United States
2226792D US COM	Materials	2.12%	United States
ALPHABET INC-A	Communication Services	2.12%	United States

**Asset allocation** describes the share of investments in specific assets.

**What was the proportion of sustainability-related investments?**

See below field

● **What was the asset allocation?**

100.00% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.0% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

61.67% of the Fund's NAV was invested in sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown as at - The data is representative of the reference period.

Sector (GICS)	Weight %
Financials	0.58
Communication Services	11.60
Consumer Discretionary	10.01
Information Technology	61.21
Industrials	3.79
Consumer Staples	4.60
Energy	0.00
Real Estate	0.21
Health Care	5.63
Materials	2.12
Utilities	0.25
<b>Total</b>	<b>100.00</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	0.00
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>0.00</b>

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

0% of the Fund's portfolio was aligned with the EU Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes
- In fossil gas       In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund continues to have 0% alignment with the EU Taxonomy, as with the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

As the Fund does not currently intend to be EU Taxonomy aligned, 25.16% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. Currently the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

**What was the share of socially sustainable investments?**

36.51% of the Fund's NAV.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

NA

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

**How did this financial product perform compared to the reference benchmark?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

See tables completed in below sections.

● **How does the reference benchmark differ from a broad market index?**

The Reference Index differs from a broad market index because it seeks to increase overall exposure to companies demonstrating both a robust ESG profile and companies with a lower ESG risk rating relative to a broad market index.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

As the Fund fully replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
Sustainalytics Risk Rating (as defined in the methodology of the Reference Index)	17.64	17.64
CO2 emissions intensity (Scope 1+2/Revenue)	49.2	49.2
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as rebalance date defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

● **How did this financial product perform compared with the reference benchmark?**

As Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

● **How did this financial product perform compared with the broad market index?**

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and Parent Index differed as below:

Sustainability Indicator	Fund Indicator Performance	Broad Market benchmark (Parent Index) Indicator Performance
Sustainalytics Risk Rating (as defined in the methodology of the Reference Index)	17.64	19.54
CO2 emissions intensity (Scope 1+2/Revenue)	49.2	59.3
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 4.0% exposure to excluded companies at the latest Reference Index rebalance date

**Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Invesco MSCI Europe ESG Climate Paris Aligned UCITS ETF

**Legal entity identifier:** 549300DO2A2ZT6S92H22

## Sustainable investment objective

### Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** 98.52 %
  - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It made **sustainable investments with a social objective:** \_\_\_\_\_ %

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_\_\_ % of sustainable investments
  - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was to reduce exposure to transition and physical climate risks whilst pursuing opportunities arising from the transition to a lower carbon economy and aligning with the Paris Agreement requirements. The Fund achieved this by tracking the MSCI Europe ESG Climate Paris Aligned Benchmark Select Index (the "**Reference Index**"), which has a methodology that is aligned with attaining the sustainable investment objective of the Fund. The Reference Index qualifies as an EU Paris-aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

Further information on the attainment of the sustainable investment objective by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

Please note that the Fund was re-categorised from Article 8 to Article 9 on 28 May 2024.

### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as at 31st of December 2024. The data is representative of the

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

reference period.

Sustainability Indicator	Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI World Index (the " <b>Parent Index</b> ")	6.8% improvement
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	70.5% reduction
CO2 emissions intensity (Scope 1+2+3/EVIC) reduction at each Rebalance Date relative to the decarbonisation trajectory base date	11% average reduction across Reference Index rebalance dates in the period
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

Compared to last period the MSCI ESG Score improvement (7.1%) for the Fund is slightly lower and the CO2 emissions intensity reduction (67.0%) slightly higher. The Fund continues to avoid companies excluded by the Reference Index and reduce carbon emissions by more than 10% year on year.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The index methodology of the Reference Index that the Fund tracks took into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The Reference Index reduced exposure to greenhouse gas emissions by specifying a minimum reduction in relation to the Parent Index, as well as a minimum year on year reduction from a given base date. Additionally, the index methodology directly excluded a number of companies involved in certain business activities, and through the removal of companies involved in thermal coal and the oil & gas industry the Reference Index further reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those facing severe, or very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data wasn't available to make such assessments.

MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to; carbon emissions, product carbon footprint, biodiversity & land use, toxic emissions & waste, opportunities in renewable energy. The scores also take into account areas such as human capital as well as corporate governance, considering ownership & control, pay and the board.

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to, biodiversity & land use, energy & climate change, toxic emissions & waste, operational waste, discrimination & workforce diversity, and governance structures. Any company that violates the UN Global Compact receives a very severe MSCI Controversy Score.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principle**") is captured in the Reference Index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that weren't compliant with the UN Global Compact ("**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the UNGC, the International Labour Organisation's conventions, and the United Nations Guiding Principles on Business and Human Rights.

***How did this financial product consider principal adverse impacts on sustainability factors?***

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

The below table shows the PAI scores for the fund- the data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	232.22	99.52	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		221.03	99.52	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		15,801.75	99.52	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		16,255.00	99.52	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	349.26	99.52	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	993.96	99.43	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.99	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	53.08	79.48	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	12.49	34.07	
	6. Energy consumption intensity per high impact climate sector			
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.04	2.44	
	Electricity, Gas, Steam & Air Conditioning Supply	0.21	3.73	
	Manufacturing	0.79	47.45	
	Mining & Quarrying	1.32	0.78	
	Real Estate Activities	0.37	4.48	
Transportation & Storage	0.28	2.79		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

<b>Biodiversity</b>	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.07	4.37	
	7. Activities negatively affecting biodiversity-sensitive areas	0.79	99.99	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
<b>Water</b>	8. Emissions to water	0.00	0.52	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
<b>Waste</b>	9. Hazardous waste and radioactive waste ratio	3.69	96.80	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
<b>Social and employee matters</b>	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	99.99	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	33.90	99.42	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	18.01	7.07	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	41.10	99.20	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.99	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's

portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

*Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.*

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is From the 1st of January 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
COM	Health Care	3.95%	Denmark
ASML HOLDING NV	Information Technology	3.53%	Netherlands

### What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

99.99% of the Fund's NAV was invested in accordance with the sustainable investment objective of the Fund, by virtue of the Fund tracking as closely as possible the Reference Index.

1.48% of the Fund's NAV was invested in other investments which do not qualify as sustainable investments, this portion included investments such as financial derivative instruments for hedging and/or efficient portfolio management and cash for ancillary liquidity.

98.52% of the Fund's NAV was invested in sustainable investments with an environmental objective.

● In which economic sectors were the investments made?

GICS Sector Breakdown as at - The data is representative of the reference period.

Sector (GICS)	Weight %
Financials	19.14
Communication Services	2.91
Consumer Discretionary	8.92

10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>0.00</b>

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

Although the Fund does not commit to a minimum of sustainable investments aligned with the EU Taxonomy, the extent to which the Fund as a whole was aligned with the EU Taxonomy was calculated for the reference period. 6.90% (Turnover) of the Fund's portfolio was aligned with the EU Taxonomy. The figures are representative of the reference period.

to an environmental objective

**Transitional activities are economic activities**

for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes
- In fossil gas       In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The below table shows the share of investments in transitional and enabling activities as the data is representative of the reference period.

	Aligned
<b>Enabling</b>	<b>4.40%</b>
<b>Transition</b>	<b>0.04%</b>

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

As the Fund does not currently intend to be EU Taxonomy aligned, 91.62% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

**What was the share of socially sustainable investments?**

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

N/A

**What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

1.48% of the Fund's NAV was invested in other investments which do not qualify as sustainable investments, this portion included investments such as financial derivative instruments for hedging and/or efficient portfolio management and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

**What actions have been taken to attain the sustainable investment objective during the reference period?**

The Fund sought to attain the sustainable investment objective by tracking the Reference Index, which has a methodology that is consistent with attaining the sustainable investment objective promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information on how the indicators performed during the reference period.

**How did this financial product perform compared to the reference sustainable benchmark?**

See tables completed in below sections.

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

**How did the reference benchmark differ from a broad market index?**

The Reference Index differs from a broad market index because it comprises only companies with high ESG scores, incorporates the TCFD (Task Force on Climate Related Financial Disclosures) recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark.

**How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

As the Fund fully replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI World Index (the "Parent Index")	8.38	8.38
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	160.6	160.6
CO2 emissions intensity (Scope 1+2+3/EVIC) reduction at each Rebalance Date relative to the decarbonisation trajectory base date	11% average reduction across Reference Index rebalance dates in the period	11% average reduction across Reference Index rebalance dates in the period
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies	As at each Reference Index rebalance date, the Reference Index had 0% exposure to excluded companies

**How did this financial product perform compared with the reference benchmark?**

As the Fund achieved the sustainable investment objective by tracking the Reference Index, which has a methodology that is consistent with attaining the sustainable investment objective of the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the

sustainability indicators compared with the Reference Benchmark.

● **How did this financial product perform compared with the broad market index?**

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and Parent Index differed as below:

<b>Sustainability Indicator</b>	<b>Fund Indicator Performance</b>	<b>Broad Market benchmark (Parent Index) Indicator Performance</b>
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI World Index (the " <b>Parent Index</b> ")	8.38	7.85
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	160.6	544.9
CO2 emissions intensity (Scope 1+2+3/EVIC) reduction at each Rebalance Date relative to the decarbonisation trajectory base date	11% average reduction across Reference Index rebalance dates in the period	The Broad Market benchmark has seen an increase in emissions intensity since the trajectory base date
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies	The Broad Market benchmark had 40.8% exposure to excluded companies at the latest Reference Index rebalance date

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco MSCI USA ESG Climate Paris Aligned UCITS ETF

Legal entity identifier: 549300R7QHZBWJYX2D55

## Sustainable investment objective

### Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: 99.95 %
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It made **sustainable investments with a social objective**: \_\_\_\_\_ %

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_\_\_ % of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was to reduce exposure to transition and physical climate risks whilst pursuing opportunities arising from the transition to a lower carbon economy and aligning with the Paris Agreement requirements. The Fund achieved this by tracking the MSCI USA ESG Climate Paris Aligned Benchmark Select Index (the "**Reference Index**"), which has a methodology that is aligned with attaining the sustainable investment objective of the Fund. The Reference Index qualifies as an EU Paris-aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

*Further information on the attainment of the sustainable investment objective by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

*Please note that the Fund was re-categorised from Article 8 to Article 9 on 28 May 2024.*

### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as at 31st of December 2024. The data is representative of the

reference period.

Sustainability Indicator	Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI World Index (the " <b>Parent Index</b> ")	14.2% improvement
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	74.8% reduction
CO2 emissions intensity (Scope 1+2+3/EVIC) reduction at each Rebalance Date relative to the decarbonisation trajectory base date	27% average reduction across Reference Index rebalance dates in the period
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

Compared to last period the MSCI ESG Score improvement (12.2%) and the CO2 emissions intensity reduction (71.0%) for the Fund are both slightly higher. The Fund continues to avoid companies excluded by the Reference Index and reduce carbon emissions by more than 10% year on year.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The index methodology of the Reference Index that the Fund tracks took into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The Reference Index reduced exposure to greenhouse gas emissions by specifying a minimum reduction in relation to the Parent Index, as well as a minimum year on year reduction from a given base date. Additionally, the index methodology directly excluded a number of companies involved in certain business activities, and through the removal of companies involved in thermal coal and the oil & gas industry the Reference Index further reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those facing severe, or very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data wasn't available to make such assessments.

MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to; carbon emissions, product carbon footprint, biodiversity & land use, toxic emissions & waste, opportunities in renewable energy. The scores also take into account areas such as human capital as well as corporate governance, considering ownership & control, pay and the board.

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to, biodiversity & land use, energy & climate change, toxic emissions & waste, operational waste, discrimination & workforce diversity, and governance structures. Any company that violates the UN Global Compact receives a very severe MSCI Controversy Score.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principle**") is captured in the Reference Index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that weren't compliant with the UN Global Compact ("**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the UNGC, the International Labour Organisation's conventions, and the United Nations Guiding Principles on Business and Human Rights.

***How did this financial product consider principal adverse impacts on sustainability factors?***

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

The below table shows the PAI scores for the fund, the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	1,202.32	99.98	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		781.14	99.98	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		44,500.53	99.98	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		46,483.98	99.98	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	131.21	99.98	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	770.76	99.98	Fund level Total Emission Intensity-Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.98	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	53.76	77.61	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	20.36	43.79	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.20	0.48	
	Electricity, Gas, Steam & Air Conditioning Supply	0.22	0.09	
	Manufacturing	0.08	41.54	
	Mining & Quarrying	0.49	0.02	
Real Estate Activities	1.04	7.93		
Transportation & Storage	0.88	0.19		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.49	1.90		

<b>Biodiversity</b>	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.06	2.28	
	7. Activities negatively affecting biodiversity-sensitive areas	0.00	99.87	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
<b>Water</b>	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
<b>Waste</b>	9. Hazardous waste and radioactive waste ratio	0.05	98.13	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
<b>Social and employee matters</b>	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	99.87	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	58.44	98.83	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	17.70	3.85	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	33.76	98.68	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.98	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is From the 1st of January 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
NVIDIA CORP	Information Technology	7.64%	United States
MICROSOFT CORP	Information Technology	7.58%	United States
ALPHABET INC-C	Communication Services	2.86%	United States
SHERWIN-WILLIAMS	Materials	2.16%	United States
ELI LILLY & CO	Health Care	2.16%	United States

ADV MICRO DEVICE	Information Technology	1.33%	United States

### What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

99.95% of the Fund's NAV was invested in accordance with the sustainable investment objective of the Fund, by virtue of the Fund tracking as closely as possible the Reference Index.

0.05% of the Fund's NAV was invested in other investments which do not qualify as sustainable investments, this portion included investments such as financial derivative instruments for hedging and/or efficient portfolio management and cash for ancillary liquidity.

99.95% of the Fund's NAV was invested in sustainable investments with an environmental objective.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - The data is representative of the reference period.

Sector (GICS)	Weight %
Financials	15.13
Communication Services	5.08
Consumer Discretionary	4.09
Information Technology	38.25
Industrials	12.39
Consumer Staples	1.45
Energy	0.00
Real Estate	8.22
Health Care	11.33
Materials	2.92
Utilities	1.12
Cash	0.02
<b>Total</b>	<b>100.00</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	0.00
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>0.00</b>

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

N/A

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

to an environmental objective

**Transitional activities are economic activities**

for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments that were aligned with the EU Taxonomy decreased compared to the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

● **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

As the Fund does not currently intend to be EU Taxonomy aligned, 99.95% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

● **What was the share of socially sustainable investments?**

N/A

● **What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?**

0.05% of the Fund's NAV was invested in other investments which do not qualify as sustainable investments, this portion included investments such as financial derivative instruments for hedging and/or efficient portfolio management and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

● **What actions have been taken to attain the sustainable investment objective during the reference period?**

The Fund sought to attain the sustainable investment objective by tracking the Reference Index, which has a methodology that is consistent with attaining the sustainable investment objective promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

**How did this financial product perform compared to the reference sustainable benchmark?**

See tables completed in below sections.

● **How did the reference benchmark differ from a broad market index?**

The Reference Index differs from a broad market index because it comprises only companies with high ESG scores, incorporates the TCFD (Task Force on Climate Related Financial Disclosures) recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

As the Fund fully replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI World Index (the "Parent Index")	7.55	7.55
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	61.4	61.4
CO2 emissions intensity (Scope 1+2+3/EVIC) reduction at each Rebalance Date relative to the decarbonisation trajectory base date	27% average reduction across Reference Index rebalance dates in the period	27% average reduction across Reference Index rebalance dates in the period
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies	As at each Reference Index rebalance date, the Reference Index had 0% exposure to excluded companies

● **How did this financial product perform compared with the reference benchmark?**

As the Fund achieved the sustainable investment objective by tracking the Reference Index, which has a methodology that is consistent with attaining the sustainable investment objective of the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

● **How did this financial product perform compared with the broad market index?**

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and

Parent Index differed as below:

<b>Sustainability Indicator</b>	<b>Fund Indicator Performance</b>	<b>Broad Market benchmark (Parent Index) Indicator Performance</b>
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI World Index (the " <b>Parent Index</b> ")	7.55	6.61
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	61.4	243.7
CO2 emissions intensity (Scope 1+2+3/EVIC) reduction at each Rebalance Date relative to the decarbonisation trajectory base date	25% average reduction across Reference Index rebalance dates in the period	The Broad Market benchmark has seen an increase in emissions intensity since the trajectory base date
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies	The Broad Market benchmark had 47.4% exposure to excluded companies at the latest Reference Index rebalance date

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco MSCI Japan ESG Climate Paris Aligned UCITS ETF

Legal entity identifier: 5493005TOQBWPY66A96

## Sustainable investment objective

### Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: 99.96 %
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It made **sustainable investments with a social objective**: \_\_\_\_\_ %

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_\_\_ % of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was to reduce exposure to transition and physical climate risks whilst pursuing opportunities arising from the transition to a lower carbon economy and aligning with the Paris Agreement requirements. The Fund achieved this by tracking the MSCI Japan ESG Climate Paris Aligned Benchmark Select Index (the "**Reference Index**"), which has a methodology that is aligned with attaining the sustainable investment objective of the Fund. The Reference Index qualifies as an EU Paris-aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

*Further information on the attainment of the sustainable investment objective by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

*Please note that the Fund was re-categorised from Article 8 to Article 9 on 28 May 2024.*

### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as at 31st of December 2024. The data is representative of the

reference period.

Sustainability Indicator	Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI World Index (the " <b>Parent Index</b> ")	2.7% improvement
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	82.0% reduction
CO2 emissions intensity (Scope 1+2+3/EVIC) reduction at each Rebalance Date relative to the decarbonisation trajectory base date	25% average reduction across Reference Index rebalance dates in the period
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

Compared to last period the MSCI ESG Score improvement (3.7%) for the Fund is slightly lower and the CO2 emissions intensity reduction (72.0%) slightly higher. The Fund continues to avoid companies excluded by the Reference Index and reduce carbon emissions by more than 10% year on year.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The index methodology of the Reference Index that the Fund tracks took into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The Reference Index reduced exposure to greenhouse gas emissions by specifying a minimum reduction in relation to the Parent Index, as well as a minimum year on year reduction from a given base date. Additionally, the index methodology directly excluded a number of companies involved in certain business activities, and through the removal of companies involved in thermal coal and the oil & gas industry the Reference Index further reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those facing severe, or very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data wasn't available to make such assessments.

MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to; carbon emissions, product carbon footprint, biodiversity & land use, toxic emissions & waste, opportunities in renewable energy. The scores also take into account areas such as human capital as well as corporate governance, considering ownership & control, pay and the board.

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to, biodiversity & land use, energy & climate change, toxic emissions & waste, operational waste, discrimination & workforce diversity, and governance structures. Any company that violates the UN Global Compact receives a very severe MSCI Controversy Score.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principle**") is captured in the Reference Index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that weren't compliant with the UN Global Compact ("**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the UNGC, the International Labour Organisation's conventions, and the United Nations Guiding Principles on Business and Human Rights.

***How did this financial product consider principal adverse impacts on sustainability factors?***

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

The below table shows the PAI scores for the fund- the data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	713.23	99.57	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		1,601.68	99.57	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		48,747.78	99.57	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		51,062.69	99.57	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	269.30	99.57	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	802.03	99.95	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.99	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	75.23	53.60	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	6.74	22.51	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	0.00	0.00	
	Manufacturing	0.25	38.82	
	Mining & Quarrying	0.00	0.00	
Real Estate Activities	0.44	5.86		
Transportation & Storage	0.76	5.83		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

<b>Biodiversity</b>	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.15	1.85	
	7. Activities negatively affecting biodiversity-sensitive areas	0.00	99.99	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
<b>Water</b>	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
<b>Waste</b>	9. Hazardous waste and radioactive waste ratio	0.07	97.68	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
<b>Social and employee matters</b>	10. Violations fo UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	99.99	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	60.32	99.99	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	0.00	0.00	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	20.34	93.87	Waited Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap- ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.99	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's

portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

*Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.*

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is From the 1st of January 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
SONY GROUP CORP	Consumer Discretionary	4.61%	Japan
KEYENCE CORP	Information Technology	3.97%	Japan
TOKYO ELECTRON	Information Technology	3.43%	Japan
TOKIO MARINE HD	Financials	2.95%	Japan
RECRUIT HOLDINGS	Industrials	2.87%	Japan
CENTRAL JAPAN RL	Industrials	2.86%	Japan
EAST JAPAN RAIL	Industrials	2.78%	Japan
FAST RETAILING	Consumer Discretionary	2.59%	Japan
SHIN-ETSU CHEM	Materials	2.35%	Japan
DAIICHI SANKYO	Health Care	2.34%	Japan
HOYA CORP	Health Care	2.28%	Japan
NINTENDO CO LTD	Communication Services	2.26%	Japan
NIPPON BUILDING	Real Estate	2.25%	Japan
SOFTBANK GROUP C	Communication Services	2.24%	Japan
CHUGAI PHARMA CO	Health Care	2.11%	Japan

### What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

99.99% of the Fund's NAV was invested in accordance with the sustainable investment objective of the Fund, by virtue of the Fund tracking as closely as possible the Reference Index.

0.04% of the Fund's NAV was invested in other investments which do not qualify as sustainable investments, this portion included investments such as financial derivative instruments for hedging and/or efficient portfolio management and cash for ancillary liquidity.

99.96% of the Fund's NAV was invested in sustainable investments with an environmental objective.

● In which economic sectors were the investments made?

GICS Sector Breakdown as at - The data is representative of the reference period.

Sector (GICS)	Weight %
Financials	12.40
Communication Services	6.97
Consumer Discretionary	13.23
Information Technology	20.89
Industrials	20.09
Consumer Staples	2.02
Energy	0.00
Real Estate	8.06
Health Care	13.40
Materials	2.93
Utilities	0.00
Cash	0.01
<b>Total</b>	<b>100.00</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	0.00
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>0.00</b>

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

0% of the Fund's portfolio was aligned with the EU Taxonomy.

activities to make a substantial contribution to an environmental objective

**Transitional activities are economic activities** for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes
- In fossil gas       In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

● **What was the share of investments made in transitional and enabling activities?**

N/A

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments that were aligned with the EU Taxonomy decreased compared to the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

● **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

As the Fund does not currently intend to be EU Taxonomy aligned, 99.96% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

● **What was the share of socially sustainable investments?**

N/A

● **What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?**

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

0.04% of the Fund's NAV was invested in other investments which do not qualify as sustainable investments, this portion included investments such as financial derivative instruments for hedging and/or efficient portfolio management and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

### What actions have been taken to attain the sustainable investment objective during the reference period?

The Fund sought to attain the sustainable investment objective by tracking the Reference Index, which has a methodology that is consistent with attaining the sustainable investment objective promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

### How did this financial product perform compared to the reference sustainable benchmark?

See tables completed in below sections.

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

#### ● How did the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it comprises only companies with high ESG scores, incorporates the TCFD (Task Force on Climate Related Financial Disclosures) recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark.

#### ● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

As the Fund fully replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI World Index (the "Parent Index")	7.61	7.61
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	125.4	125.4
CO2 emissions intensity (Scope 1+2+3/EVIC) reduction at each Rebalance Date relative to the decarbonisation trajectory base date	25% average reduction across Reference Index rebalance dates in the period	25% average reduction across Reference Index rebalance dates in the period
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies	As at each Reference Index rebalance date, the Reference Index had 0% exposure to excluded companies

#### ● How did this financial product perform compared with the reference benchmark?

As the Fund achieved the sustainable investment objective by tracking the Reference Index, which has a methodology that is consistent with attaining the sustainable investment objective of the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

#### ● How did this financial product perform compared with the broad market index?

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and Parent Index differed as below:

<b>Sustainability Indicator</b>	<b>Fund Indicator Performance</b>	<b>Broad Market benchmark (Parent Index) Indicator Performance</b>
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI World Index (the " <b>Parent Index</b> ")	7.61	7.41
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	125.4	696.0
CO2 emissions intensity (Scope 1+2+3/EVIC) reduction at each Rebalance Date relative to the decarbonisation trajectory base date	25% average reduction across Reference Index rebalance dates in the period	The Broad Market benchmark has seen an increase in emissions intensity since the trajectory base date
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies	The Broad Market benchmark had 31.7% exposure to excluded companies at the latest Reference Index rebalance date

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco MSCI World ESG Climate Paris Aligned UCITS ETF

Legal entity identifier: 549300WITWZPKXMN2F56

## Sustainable investment objective

### Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective**: 99.37 %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective**: \_\_\_\_\_ %

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_\_\_ % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was to reduce exposure to transition and physical climate risks whilst pursuing opportunities arising from the transition to a lower carbon economy and aligning with the Paris Agreement requirements. The Fund achieved this by tracking the MSCI World ESG Climate Paris Aligned Benchmark Select Index (the "**Reference Index**"), which has a methodology that is aligned with attaining the sustainable investment objective of the Fund. The Reference Index qualifies as an EU Paris-aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

*Further information on the attainment of the sustainable investment objective by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

*Please note that this Fund was re-categorised from Article 8 to Article 9 on 28 May 2024.*

### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as at 31st of December 2024. The data is representative of the

reference period.

Sustainability Indicator	Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI World Index (the " <b>Parent Index</b> ")	10.5% improvement
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	74.7% reduction
CO2 emissions intensity (Scope 1+2+3/EVIC) reduction at each Rebalance Date relative to the decarbonisation trajectory base date	22% average reduction across Reference Index rebalance dates in the period
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

Compared to last period the MSCI ESG Score improvement (9.8%) and the CO2 emissions intensity reduction (70.0%) for the Fund are slightly higher. The Fund continues to avoid companies excluded by the Reference Index and reduce carbon emissions by more than 10% year on year.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The index methodology of the Reference Index that the Fund tracks took into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The Reference Index reduced exposure to greenhouse gas emissions by specifying a minimum reduction in relation to the Parent Index, as well as a minimum year on year reduction from a given base date. Additionally, the index methodology directly excluded a number of companies involved in certain business activities, and through the removal of companies involved in thermal coal and the oil & gas industry the Reference Index further reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those facing severe, or very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data wasn't available to make such assessments.

MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to; carbon emissions, product carbon footprint, biodiversity & land use, toxic emissions & waste, opportunities in renewable energy. The scores also take into account areas such as human capital as well as corporate governance, considering ownership & control, pay and the board.

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to, biodiversity & land use, energy & climate change, toxic emissions & waste, operational waste, discrimination & workforce diversity, and governance structures. Any company that violates the UN Global Compact receives a very severe MSCI Controversy Score.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principle**") is captured in the Reference Index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that weren't compliant with the UN Global Compact ("**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the UNGC, the International Labour Organisation's conventions, and the United Nations Guiding Principles on Business and Human Rights.

***How did this financial product consider principal adverse impacts on sustainability factors?***

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

The below table shows the PAI scores for the fund, the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	53.22	99.80	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		40.22	99.80	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		1,916.14	99.80	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		2,009.58	99.80	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	188.44	99.80	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	840.83	99.82	Fund level Total Emission Intensity-Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.83	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	57.88	74.26	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	19.10	40.41	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.08	0.74	
	Electricity, Gas, Steam & Air Conditioning Supply	0.17	1.31	
	Manufacturing	0.30	38.38	
	Mining & Quarrying	1.14	0.82	
	Real Estate Activities	0.63	6.54	
Transportation & Storage	0.68	1.91		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.57	1.01		
Wholesale & Retail Trade & Repair of	0.07	3.55		

<b>Biodiversity</b>	Motor Vehicles & Motorcycles			
	7. Activities negatively affecting biodiversity-sensitive areas	0.17	99.80	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
<b>Water</b>	8. Emissions to water	0.00	0.13	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
<b>Waste</b>	9. Hazardous waste and radioactive waste ratio	3.56	97.36	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
<b>Social and employee matters</b>	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	99.80	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	55.67	98.99	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	19.66	4.04	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	34.65	98.62	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.91	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

### What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is From the 1st of January 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
MICROSOFT CORP	Information Technology	4.96%	United States
NVIDIA CORP	Information Technology	4.79%	United States
ALPHABET INC-C	Communication Services	1.63%	United States
BROADCOM INC	Information Technology	1.39%	United States
ALPHABET INC-A	Communication Services	1.24%	United States
ELI LILLY & CO	Health Care	1.22%	United States
SHERWIN-WILLIAMS	Materials	1.12%	United States
VISA INC-CLASS A	Financials	1.05%	United States
MASTERCARD INC-A	Financials	0.95%	United States
DIGITAL REALTY	Real Estate	0.86%	United States
EQUINIX INC	Real Estate	0.81%	United States
XYLEM INC	Industrials	0.76%	United States
COM	Health Care	0.74%	Denmark
HOME DEPOT INC	Consumer Discretionary	0.73%	United States
CISCO SYSTEMS	Information Technology	0.72%	United States

### What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

99.37% of the Fund's NAV was invested in accordance with the sustainable investment objective of the Fund, by virtue of the Fund tracking as closely as possible the Reference Index.

0.63% of the Fund's NAV was invested in other investments which do not qualify as sustainable investments, this portion included investments such as financial derivative instruments for hedging and/or efficient portfolio management and cash for ancillary liquidity.

99.37% of the Fund's NAV was invested in sustainable investments with an environmental objective.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	16.86
Communication Services	4.90
Consumer Discretionary	6.44
Information Technology	28.37
Industrials	15.74
Consumer Staples	2.39
Energy	0.00
Real Estate	7.05
Health Care	11.20
Materials	5.31
Utilities	1.72
Cash	0.02
<b>Total</b>	<b>100.00</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	0.00
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>0.00</b>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

N/A

activities to make a substantial contribution to an environmental objective

**Transitional activities are economic activities** for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas       In nuclear energy

No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments that were aligned with the EU Taxonomy decreased compared to the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

● **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

As the Fund does not currently intend to be EU Taxonomy aligned, 99.37% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

● **What was the share of socially sustainable investments?**

N/A

● **What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?**

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

0.63% of the Fund's NAV was invested in other investments which do not qualify as sustainable investments, this portion included investments such as financial derivative instruments for hedging and/or efficient portfolio management and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

### What actions have been taken to attain the sustainable investment objective during the reference period?

The Fund sought to attain the sustainable investment objective by tracking the Reference Index, which has a methodology that is consistent with attaining the sustainable investment objective promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

### How did this financial product perform compared to the reference sustainable benchmark?

See tables completed in below sections.

**Reference benchmarks**  
are indexes to measure whether the financial product attains the sustainable objective.

#### ● How did the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it comprises only companies with high ESG scores, incorporates the TCFD (Task Force on Climate Related Financial Disclosures) recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark.

#### ● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

As the Fund fully replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI World Index (the "Parent Index")	7.63	7.63
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	85.7	85.7
CO2 emissions intensity (Scope 1+2+3/EVIC) reduction at each Rebalance Date relative to the decarbonisation trajectory base date	22% average reduction across Reference Index rebalance dates in the period	22% average reduction across Reference Index rebalance dates in the period
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies	As at each Reference Index rebalance date, the Reference Index had 0% exposure to excluded companies

#### ● How did this financial product perform compared with the reference benchmark?

As the Fund achieved the sustainable investment objective by tracking the Reference Index, which has a methodology that is consistent with attaining the sustainable investment objective of the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

#### ● How did this financial product perform compared with the broad market index?

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and Parent Index differed as below:

<b>Sustainability Indicator</b>	<b>Fund Indicator Performance</b>	<b>Broad Market benchmark (Parent Index) Indicator Performance</b>
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI World Index (the " <b>Parent Index</b> ")	7.63	6.90
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	85.7	338.1
CO2 emissions intensity (Scope 1+2+3/EVIC) reduction at each Rebalance Date relative to the decarbonisation trajectory base date	22% average reduction across Reference Index rebalance dates in the period	The Broad Market benchmark has seen an increase in emissions intensity since the trajectory base date
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies	The Broad Market benchmark had 45.2% exposure to excluded companies at the latest Reference Index rebalance date

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco MSCI Emerging Markets ESG Climate Paris Aligned UCITS ETF

Legal entity identifier: 549300LKQGRABQZ01C57

## Sustainable investment objective

### Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective**: 87.65 %
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It made **sustainable investments with a social objective**: \_\_\_\_\_ %

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_\_\_ % of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

### To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was to reduce exposure to transition and physical climate risks whilst pursuing opportunities arising from the transition to a lower carbon economy and aligning with the Paris Agreement requirements. The Fund achieved this by tracking the MSCI Emerging Markets ESG Climate Paris Aligned Benchmark Select Index (the "**Reference Index**"), which has a methodology that is aligned with attaining the sustainable investment objective of the Fund. The Reference Index qualifies as an EU Paris-aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

*Further information on the attainment of the sustainable investment objective by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

*Please note that this Fund was re-categorised from Article 8 to Article 9 on 28 May 2024.*

### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the sustainable investment objective. The Fund performed as follows as at 31st of December 2024. The data is representative of

the reference period.

Sustainability Indicator	Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI World Index (the " <b>Parent Index</b> ")	9.0% improvement
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	83.7% reduction
CO2 emissions intensity (Scope 1+2+3/EVIC) reduction at each Rebalance Date relative to the decarbonisation trajectory base date	20% average reduction across Reference Index rebalance dates in the period
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

Compared to last period the MSCI ESG Score improvement (9.5%) for the Fund is slightly lower and the CO2 emissions intensity reduction (77.8%) slightly higher. The Fund continues to avoid companies excluded by the Reference Index and reduce carbon emissions by more than 10% year on year.

● **How did the sustainable investments not cause significant harm to any sustainable investment objective?**

The index methodology of the Reference Index that the Fund tracks took into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The Reference Index reduced exposure to greenhouse gas emissions by specifying a minimum reduction in relation to the Parent Index, as well as a minimum year on year reduction from a given base date. Additionally, the index methodology directly excluded a number of companies involved in certain business activities, and through the removal of companies involved in thermal coal and the oil & gas industry the Reference Index further reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those facing severe, or very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data wasn't available to make such assessments.

MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to; carbon emissions, product carbon footprint, biodiversity & land use, toxic emissions & waste, opportunities in renewable energy. The scores also take into account areas such as human capital as well as corporate governance, considering ownership & control, pay and the board.

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to, biodiversity & land use, energy & climate change, toxic emissions & waste, operational waste, discrimination & workforce diversity, and governance structures. Any company that violates the UN Global Compact receives a very severe MSCI Controversy Score.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principle**") is captured in the Reference Index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that weren't compliant with the UN Global Compact ("**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the UNGC, the International Labour Organisation's conventions, and the United Nations Guiding Principles on Business and Human Rights.

***How did this financial product consider principal adverse impacts on sustainability factors?***

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

The below table shows the PAI scores for the fund, the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1. GHG Emissions	504.53	97.68	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		974.35	97.68	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		18,455.87	97.68	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		19,934.75	97.68	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	208.54	97.68	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,253.60	98.43	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	98.28	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	81.58	68.34	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	2.65	31.87	
	6. Energy consumption intensity per high impact climate sector			
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.07	0.62	
	Electricity, Gas, Steam & Air Conditioning Supply	0.29	1.73	
	Manufacturing	0.44	40.90	
	Mining & Quarrying	1.00	0.71	
Real Estate Activities	0.51	4.87		
Transportation & Storage	0.38	3.21		
Water Supply, Sewerage, Waste Management &	0.81	0.93		

	Remediation Activities			
	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.07	3.93	
Biodiversity	7. Activities negatively affecting biodiversity-sensitive areas	0.75	98.26	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.12	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.31	96.87	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations fo UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	98.26	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	76.64	97.97	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	11.03	0.42	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	20.37	84.80	Waited Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	98.63	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

*Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.*

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is From the 1st of January 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
TSMC	Information Technology	11.38%	Taiwan

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?**

N/A

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective

**Transitional activities are economic activities** for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure (OpEx)** reflecting green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes
- In fossil gas       In nuclear energy
- No

*The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

● **What was the share of investments made in transitional and enabling activities?**

N/A

● **How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?**

The percentage of investments that were aligned with the EU Taxonomy decreased compared to the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

● **What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?**

As the Fund does not currently intend to be EU Taxonomy aligned, 87.65% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. Currently the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

● **What was the share of socially sustainable investments?**

N/A

● **What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?**

**11.80% of the Fund's NAV was invested in investments which did not qualify as sustainable investments, however were still aligned with the sustainable investment objective.**

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

0.55% of the Fund's NAV was invested in other investments which do not qualify as sustainable investments, this portion included investments such as financial derivative instruments for hedging and/or efficient portfolio management and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

### What actions have been taken to attain the sustainable investment objective during the reference period?

The Fund sought to attain the sustainable investment objective by tracking the Reference Index, which has a methodology that is consistent with attaining the sustainable investment objective promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

### How did this financial product perform compared to the reference sustainable benchmark?

See tables completed in below sections.

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable objective.

#### ● How did the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it comprises only companies with high ESG scores, incorporates the TCFD (Task Force on Climate Related Financial Disclosures) recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark.

#### ● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

As the Fund fully replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI World Index (the "Parent Index")	6.35	6.35
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	114.0	114.0
CO2 emissions intensity (Scope 1+2+3/EVIC) reduction at each Rebalance Date relative to the decarbonisation trajectory base date	20% average reduction across Reference Index rebalance dates in the period	20% average reduction across Reference Index rebalance dates in the period
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies	As at each Reference Index rebalance date, the Reference Index had 0% exposure to excluded companies

#### ● How did this financial product perform compared with the reference benchmark?

As the Fund achieved the sustainable investment objective by tracking the Reference Index, which has a methodology that is consistent with attaining the sustainable investment objective of the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

#### ● How did this financial product perform compared with the broad market index?

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and Parent Index differed as below:

<b>Sustainability Indicator</b>	<b>Fund Indicator Performance</b>	<b>Broad Market benchmark (Parent Index) Indicator Performance</b>
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI World Index (the " <b>Parent Index</b> ")	6.35	5.82
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	114.0	698.4
CO2 emissions intensity (Scope 1+2+3/EVIC) reduction at each Rebalance Date relative to the decarbonisation trajectory base date	20% average reduction across Reference Index rebalance dates in the period	The Broad Market benchmark has seen an increase in emissions intensity since the trajectory base date
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies	The Broad Market benchmark had 30.6% exposure to excluded companies at the latest Reference Index rebalance date

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco S&P World Energy ESG UCITS ETF

Legal entity identifier: 5493007P6I7WEHMCJD97

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

- It made **sustainable investments with an environmental objective:** \_\_\_\_\_%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It made **sustainable investments with a social objective:** \_\_\_\_\_%

No

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_\_\_% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective

- It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were to provide exposure to the risk and return profile of the S&P World ESG Enhanced Energy Index (formerly S&P Developed Ex-Korea LargeMidCap Energy Index) (the "**Parent Index**"), gaining exposure to corresponding sectors whilst improving the ESG characteristics and reducing carbon emissions of the Fund relative to the Parent Index. The Fund achieved this by tracking the S&P World ESG Enhanced Energy Index (formerly S&P Developed Ex-Korea LargeMidCap ESG Enhanced Energy Index) (the "**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The environmental and social characteristics were achieved by applying the Index Provider's exclusion criteria to the eligible securities and by using an optimisation approach to achieve an uplift in the weighted average S&P Global ESG score and a decrease in the weighted average carbon intensity relative to the Parent Index.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

The extent to which the environmental and/or social characteristics promoted by the Fund were met is further detailed in the performance of the sustainability indicators (see below).

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

#### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of environmental and social characteristics. The Fund performed as follows as at 31 December 2023, the data is representative of

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

the reference period:

Sustainability Indicator	Indicator Performance
S&P Global ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the Parent Index	10.6% improvement
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	28.9% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

S&P changed the ESG score dataset used in the construction of the index since the last periodic report and therefore the dataset used here to assess attainment of the environmental and social characteristics has also changed. The old scoring system (S&P DJI ESG Scores) featured more high-scoring outliers, leading to greater perceived improvements as compared to the new scoring system (S&P Global ESG Scores). As such, though the headline improvement figure this year is lower than last year (23.1%) the ESG credentials of the fund have not been diminished.

Compared to last period the CO2 emissions intensity reduction (31.9%) for the Fund is slightly lower. The Fund continues to avoid companies excluded by the Reference Index.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

N/A

**How were the indicators for adverse impacts on sustainability factors taken into account?**

N/A

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

N/A

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**How did this financial product consider principal adverse impacts on sustainability factors?**

The index methodology of the Reference Index that the Fund tracks took into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that don't meet certain PAI thresholds were excluded from the Reference Index or had their weightings reduced. The Fund also relied on the qualitative research and/or engagement of Invesco's ESG team to take into account the RTS PAI indicators.

The below table shows the PAI scores for the fund- the data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	1,302.52	100.00	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		150.84	100.00	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		14,133.26	100.00	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		15,586.61	100.00	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	2,053.23	100.00	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	3,689.93	100.00	Fund level Total Emission Intensity-Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	38.68	100.00	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	94.36	44.85	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	62.39	29.91	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	0.00	0.00	
	Manufacturing	0.40	8.88	
Mining & Quarrying	1.37	59.12		
Real Estate Activities	0.00	0.00		
Transportation & Storage	3.44	23.60		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

<b>Biodiversity</b>	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.00	0.00	
	7. Activities negatively affecting biodiversity-sensitive areas	65.81	100.00	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
<b>Water</b>	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
<b>Waste</b>	9. Hazardous waste and radioactive waste ratio	1.03	100.00	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
<b>Social and employee matters</b>	10. Violations fo UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	100.00	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	47.96	100.00	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	0.00	0.00	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	34.97	99.31	Waited Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	100.00	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of January 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
CHEVRON CORP	Energy	10.60%	United States
EXXON MOBIL CORP	Energy	9.73%	United States
ENBRIDGE INC	Energy	7.56%	Canada
TOTALENERGIES SE	Energy	6.68%	France
SCHLUMBERGER LTD	Energy	6.21%	United States
SHEL LN COM	Energy	5.97%	United Kingdom
WILLIAMS COS INC	Energy	5.34%	United States

**Asset allocation** describes the share of investments in specific assets.

### What was the proportion of sustainability-related investments?

N/A

#### ● What was the asset allocation?

100.00% of the Fund's NAV was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

0.00% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

0.00% of the Fund's NAV was invested in sustainable investments

#### ● In which economic sectors were the investments made?

GICS Sector Breakdown as at - The data is representative of the reference period.

Sector (GICS)	Weight %
Financials	0.00
Communication Services	0.00
Consumer Discretionary	0.00
Information Technology	0.00
Industrials	0.00
Consumer Staples	0.00
Energy	100.00
Real Estate	0.00
Health Care	0.00
Materials	0.00
Utilities	0.00
<b>Total</b>	<b>100.00</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	9.09
10102010	Integrated Oil & Gas	41.24
10102020	Oil & Gas Exploration & Production	18.12
10102030	Oil & Gas Refining & Marketing	1.26
10102040	Oil & Gas Storage & Transportation	30.29
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>100.00</b>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

0% of the Fund's portfolio was aligned with the EU Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● What was the share of investments made in transitional and enabling activities?

N/A

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

N/A

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

NA

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference benchmark?

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

See tables completed in below sections.

● **How does the reference benchmark differ from a broad market index?**

The Reference Index differs from a broad market index because it seeks to achieve an uplift in the weighted average S&P Global ESG score and a decrease in the weighted average carbon intensity relative to the Parent Index (a subset of the S&P World Index, formerly S&P Developed Ex-Korea LargeMidCap Index, a relevant broad market index) which includes companies in the energy sector).

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

As the Fund replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
S&P Global ESG Score (as defined in the methodology of the Reference Index)	53.7	53.7
CO2 emissions intensity (Scope 1+2+3/EVIC)	1747.3	1747.3
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

● **How did this financial product perform compared with the reference benchmark?**

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

● **How did this financial product perform compared with the broad market index?**

The sustainability indicators for the Fund and Parent Index differed as below:

Sustainability Indicator	Fund Indicator Performance	Broad Market benchmark (Parent Index) Indicator Performance
S&P Global ESG Score (as defined in the methodology of the Reference Index)	53.7	48.6
CO2 emissions intensity (Scope 1+2+3/EVIC)	1747.3	2458.8
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 36.6% exposure to excluded companies at the latest Reference Index rebalance date

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco S&P World Financials ESG UCITS ETF

Legal entity identifier: 549300JXBX1AUXXYGX60

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** \_\_\_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** \_\_\_\_\_%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 69.52 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were to provide exposure to the risk and return profile of the S&P World Financials Index (formerly S&P Developed Ex-Korea LargeMidCap Financials Index) (the "**Parent Index**"), gaining exposure to corresponding sectors whilst improving the ESG characteristics and reducing carbon emissions of the Fund relative to the Parent Index. The Fund achieved this by tracking the S&P World ESG Enhanced Financials Index (formerly S&P Developed Ex-Korea LargeMidCap ESG Enhanced Financials Index) (the "Reference Index"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The environmental and social characteristics were achieved by applying the Index Provider's exclusion criteria to the eligible securities and by using an optimisation approach to achieve an uplift in the weighted average S&P Global ESG score and a decrease in the weighted average carbon intensity relative to the Parent Index.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

The extent to which the environmental and/or social characteristics promoted by the Fund were met is further detailed in the performance of the sustainability indicators (see below).

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI."*

#### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of environmental and social characteristics. The Fund performed as follows as at 31 December 2024, the data is representative of

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

the reference period:

Sustainability Indicator	Indicator Performance
S&P Global ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the Parent Index	13.5% improvement
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	24.9% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

S&P changed the ESG score dataset used in the construction of the index since the last periodic report and therefore the dataset used here to assess attainment of the environmental and social characteristics has also changed. The old scoring system (S&P DJI ESG Scores) featured more high-scoring outliers, leading to greater perceived improvements as compared to the new scoring system (S&P Global ESG Scores). As such, though the headline improvement figure this year is lower than last year (17.8%) the ESG credentials of the fund have not been diminished.

Compared to last period the CO2 emissions intensity reduction (47.2%) for the Fund is slightly lower. The Fund continues to avoid companies excluded by the Reference Index.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The sustainable investments made by the fund contributed to environmental objectives such as climate change, water management, pollution prevention, and to social objectives such as good health, well-being and gender equality. The Fund achieved those objectives by investing in constituents of the Reference Index. According to Invesco's sustainable investment framework, a percentage (as disclosed above) of constituents of the Reference Index contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index or had their weightings reduced.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

The methodology of the Reference Index directly excluded a number of companies involved in certain business activities. Through the removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons, those facing severe ESG controversies, as assessed via Sustainalytics Controversy Scores, and those that were deemed non-compliant with the principles of the United Nations Global Compact. Additionally, through its exclusions based on Sustainalytics Risk Rating Score the index also addressed a number of other adverse indicators. Companies were assessed for inclusion based on whether they were deemed to help the world decarbonise and reduce climate risk generally.

Sustainalytics Controversy Scores consider controversies in a number of different areas, including, but not limited to discrimination and harassment, land use and biodiversity, energy use and greenhouse gas emissions, discharges and releases (water), degradation and contamination (land), and controversial weapons.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainalytics Risk Ratings consider a number of key issues in their construction, including, but not limited to biodiversity programmes, hazardous waste management, water risk management, GHG risk management, carbon intensity, gender pay equality programme, gender pay disclosure, and board diversity.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") was captured in the methodology of the Reference Index tracked by the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The methodology of the Reference Index excluded companies that were deemed not to be compliant with the UN Global Compact (the "**UNGC**"). This set of ten principles show significant overlap with both the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles. With regards to OECD, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The methodology of the Reference Index excluded companies facing severe ESG controversies, as assessed via Sustainalytics Controversy Scores. As part of their research Sustainalytics consider global standards screening, in particular specific international norms and standards including both the OECD Guidelines and the UN Guiding Principles.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

The below table shows the PAI scores for the fund- the data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric	
Greenhouse gas emissions	1. GHG Emissions	0.46	100.00	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)	
		0.71	100.00	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)	
		369.79	100.00	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)	
		370.95	100.00	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)	
	2. Carbon footprint	154.41	100.00	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)	
	3. GHG Intensity of investee companies	712.70	99.75	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)	
	4. Exposure to companies active in the fossil fuel sector	0.00	100.00	% of the fund exposed to any fossil fuels revenue	
	5. Share of non-renewable energy consumption	39.65	70.38	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)	
	5. Share of non-renewable energy production	29.40	29.16		
	6. Energy consumption intensity per high impact climate sector				
	Agriculture, Forestry & Fishing	0.00	0.00		
	Construction	0.00	0.00		
	Electricity, Gas, Steam & Air Conditioning Supply	0.00	0.00		
	Manufacturing	0.00	0.00		
Mining & Quarrying	0.00	0.00			
Real Estate Activities	0.00	0.00			
Transportation & Storage	0.04	0.07			
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00			
Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.33	0.05			
Biodiversity	7. Activities negatively affecting biodiversity-sensitive areas	0.00	100.00		Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00		Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.00	95.93	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average	

Social and employee matters	10. Violations fo UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	100.00	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	57.40	100.00	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	26.62	1.68	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	36.68	99.03	Waited Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.66	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

*Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.*

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of January 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country

**Asset allocation** describes the share of investments in specific assets.

### What was the proportion of sustainability-related investments?

See below

#### ● What was the asset allocation?

100.00% of the Fund's NAV was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

0.00% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

69.52% of the Fund's NAV was invested in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown as at - The data is representative of the reference period.

Sector (GICS)	Weight %
Financials	100.00
Communication Services	0.00
Consumer Discretionary	0.00
Information Technology	0.00
Industrials	0.00
Consumer Staples	0.00
Energy	0.00

Health Care	0.00
Materials	0.00
Utilities	0.00
Cash	0.00
<b>Total</b>	<b>100.00</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	0.00
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>0.00</b>

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

0% of the Fund's portfolio was aligned with the EU Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes
  - In fossil gas
  - In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund continues to have 0% alignment with the EU Taxonomy, as with the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

As the Fund does not currently intend to be EU Taxonomy aligned, 0.77% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. Currently the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

**What was the share of socially sustainable investments?**

68.75% of the Fund's NAV.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

NA

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information on how the indicators performed during the reference period.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### How did this financial product perform compared to the reference benchmark?

See below.

● **How does the reference benchmark differ from a broad market index?**

The Reference Index differs from a broad market index because it seeks to achieve an uplift in the weighted average S&P Global ESG score and a decrease in the weighted average carbon intensity relative to the Parent Index (a subset of the S&P World Index, formerly S&P Developed Ex-Korea LargeMidCap Index, a relevant broad market index) which includes companies in the finance sector).

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

As the Fund replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
S&P Global ESG Score (as defined in the methodology of the Reference Index)	53.5	53.5
CO2 emissions intensity (Scope 1+2+3/EVIC)	64.1	64.1
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

● **How did this financial product perform compared with the reference benchmark?**

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

● **How did this financial product perform compared with the broad market index?**

The sustainability indicators for the Fund and Parent Index differed as below:

<b>Sustainability Indicator</b>	<b>Fund Indicator Performance</b>	<b>Broad Market benchmark (Parent Index) Indicator Performance</b>
S&P Global ESG Score (as defined in the methodology of the Reference Index)	53.5	47.1
CO2 emissions intensity (Scope 1+2+3/EVIC)	64.1	85.4
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 18.8% exposure to excluded companies at the latest Reference Index rebalance date

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco S&P World Health Care ESG UCITS ETF

Legal entity identifier: 549300SL8I1ZSRGCHI36

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** \_\_\_\_\_%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** \_\_\_\_\_%

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 81.98 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were to provide exposure to the risk and return profile of the S&P World ESG Health Care Index (formerly S&P Developed Ex-Korea LargeMidCap Health Care Index) (the "**Parent Index**"), gaining exposure to corresponding sectors whilst improving the ESG characteristics and reducing carbon emissions of the Fund relative to the Parent Index. The Fund achieved this by tracking the S&P World ESG Enhanced Health Care Index (formerly S&P Developed Ex-Korea LargeMidCap ESG Enhanced Health Care Index) (the "**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The environmental and social characteristics were achieved by applying the Index Provider's exclusion criteria to the eligible securities and by using an optimisation approach to achieve an uplift in the weighted average S&P Global ESG score and a decrease in the weighted average carbon intensity relative to the Parent Index.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

The extent to which the environmental and/or social characteristics promoted by the Fund were met is further detailed in the performance of the sustainability indicators (see below).

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

#### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of environmental and social characteristics. The Fund performed as follows as at 31 December 2024, the data is representative of

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

the reference period:

Sustainability Indicator	Indicator Performance
S&P Global ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the Parent Index	9.2% improvement
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	26.9% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

S&P changed the ESG score dataset used in the construction of the index since the last periodic report and therefore the dataset used here to assess attainment of the environmental and social characteristics has also changed. The old scoring system (S&P DJI ESG Scores) featured more high-scoring outliers, leading to greater perceived improvements as compared to the new scoring system (S&P Global ESG Scores). As such, though the headline improvement figure this year is lower than last year (10.0%) the ESG credentials of the fund have not been diminished.

Compared to last period the CO2 emissions intensity reduction (28.7%) for the Fund is slightly lower. The Fund continues to avoid companies excluded by the Reference Index.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The sustainable investments made by the fund contributed to environmental objectives such as climate change, water management, pollution prevention, and to social objectives such as good health, well-being and gender equality. The Fund achieved those objectives by investing in constituents of the Reference Index. According to Invesco's sustainable investment framework, a percentage (as disclosed above) of constituents of the Reference Index contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index or had their weightings reduced.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

The methodology of the Reference Index directly excluded a number of companies involved in certain business activities. Through the removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons, those facing severe ESG controversies, as assessed via Sustainalytics Controversy Scores, and those that were deemed non-compliant with the principles of the United Nations Global Compact. Additionally, through its exclusions based on Sustainalytics Risk Rating Score the index also addressed a number of other adverse indicators. Companies were assessed for inclusion based on whether they were deemed to help the world decarbonise and reduce climate risk generally.

Sustainalytics Controversy Scores consider controversies in a number of different areas, including, but not limited to discrimination and harassment, land use and biodiversity, energy use and greenhouse gas emissions, discharges and releases (water), degradation and contamination (land), and controversial weapons.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainalytics Risk Ratings consider a number of key issues in their construction, including, but not limited to biodiversity programmes, hazardous waste management, water risk management, GHG risk management, carbon intensity, gender pay equality programme, gender pay disclosure, and board diversity.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") was captured in the methodology of the Reference Index tracked by the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The methodology of the Reference Index excluded companies that were deemed not to be compliant with the UN Global Compact (the "**UNGC**"). This set of ten principles show significant overlap with both the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles. With regards to OECD, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The methodology of the Reference Index excluded companies facing severe ESG controversies, as assessed via Sustainalytics Controversy Scores. As part of their research Sustainalytics consider global standards screening, in particular specific international norms and standards including both the OECD Guidelines and the UN Guiding Principles.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

The below table shows the PAI scores for the fund- the data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	37.61	99.99	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		27.81	99.99	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		1,777.29	99.99	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		1,842.71	99.99	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	55.03	99.99	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	205.05	99.99	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	100.00	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	80.57	80.04	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	34.89	58.35	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	0.00	0.00	
	Manufacturing	0.06	82.47	
Mining & Quarrying	0.00	0.00		
Real Estate Activities	0.00	0.00		
Transportation & Storage	0.00	0.00		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.03	0.06	
	7. Activities negatively affecting biodiversity-sensitive areas	21.64	100.00	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.34	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	1.16	100.00	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	100.00	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	59.50	100.00	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	3.89	3.43	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	36.81	99.87	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	100.00	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of January 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
ELI LILLY & CO	Health Care	10.61%	United States
UNITEDHEALTH GRP	Health Care	8.37%	United States
ABBVIE INC	Health Care	8.13%	United States
COM	Health Care	5.26%	Denmark
MERCK & CO	Health Care	4.60%	United States
ROCHE HLDG-GENUS	Health Care	4.02%	Switzerland
ASTRAZENECA PLC	Health Care	3.92%	United Kingdom
ABBOTT LABS	Health Care	3.82%	United States
NOVARTIS AG-REG	Health Care	3.22%	Switzerland

### What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

99.99% of the Fund's NAV was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

0.01% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and

81.98% of the Fund's NAV was invested in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown as at - The data is representative of the reference period.

Sector (GICS)	Weight %

<b>Total</b>		<b>0.00</b>

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

0% of the Fund's portfolio was aligned with the EU Taxonomy.

activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas       In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund continues to have 0% alignment with the EU Taxonomy, as with the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

As the Fund does not currently intend to be EU Taxonomy aligned, 0.56% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

**What was the share of socially sustainable investments?**

81.42% of the Fund's NAV.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

0.01% of the Fund's NAV was invested in investments that did not align with the environmental and social characteristics of the Fund. Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity.

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

No minimum environmental or social safeguards were applied in relation to these instruments.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information on how the indicators performed during the reference period.

### How did this financial product perform compared to the reference benchmark?

See below

#### ● **How does the reference benchmark differ from a broad market index?**

The Reference Index differs from a broad market index because it seeks to achieve an uplift in the weighted average S&P Global ESG score and a decrease in the weighted average carbon intensity relative to the Parent Index (a subset of the S&P World Index, formerly S&P Developed Ex-Korea LargeMidCap Index, a relevant broad market index) which includes companies in the health care sector).

#### ● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

As the Fund replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
S&P Global ESG Score (as defined in the methodology of the Reference Index)	56.0	56.0
CO2 emissions intensity (Scope 1+2+3/EVIC)	23.0	23.0
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

#### ● **How did this financial product perform compared with the reference benchmark?**

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

#### ● **How did this financial product perform compared with the broad market index?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The sustainability indicators for the Fund and Parent Index differed as below:

<b>Sustainability Indicator</b>	<b>Fund Indicator Performance</b>	<b>Broad Market benchmark (Parent Index) Indicator Performance</b>
S&P Global ESG Score (as defined in the methodology of the Reference Index)	56.0	51.3
CO2 emissions intensity (Scope 1+2+3/EVIC)	23.0	31.4
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 15.9% exposure to excluded companies at the latest Reference Index rebalance date

**Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852**

**Product name:** Invesco S&P World Information Technology ESG UCITS ETF **Legal entity identifier:** 549300VIQWUCLYSV364

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** \_\_\_\_\_%

  - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It made **sustainable investments with a social objective:** \_\_\_\_\_%

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 71.01 % of sustainable investments
  - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective

- It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to provide exposure to the risk and return profile of the S&P World Information Technology Index (formerly S&P Developed Ex-Korea LargeMidCap Information Technology Index) (the "**Parent Index**"), gaining exposure to corresponding sectors whilst improving the ESG characteristics and reducing carbon emissions of the Fund relative to the Parent Index. The Fund achieved this by tracking the S&P World ESG Enhanced Information Technology Index (formerly S&P Developed Ex-Korea LargeMidCap ESG Enhanced Information Technology Index) (the "**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The environmental and social characteristics were achieved by applying the Index Provider's exclusion criteria to the eligible securities and by using an optimisation approach to achieve an uplift in the weighted average S&P Global ESG score and a decrease in the weighted average carbon intensity relative to the Parent Index.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

The extent to which the environmental and/or social characteristics promoted by the Fund were met is further detailed in the performance of the sustainability indicators (see below).

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

#### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of environmental and social characteristics. The Fund performed as follows as at 31 December 2024, the data is representative of the reference period:

Sustainability Indicator	Indicator Performance
S&P Global ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the Parent Index	7.3% improvement
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	55.9% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

S&P changed the ESG score dataset used in the construction of the index since the last periodic report and therefore the dataset used here to assess attainment of the environmental and social characteristics has also changed. The old scoring system (S&P DJI ESG Scores) featured more high-scoring outliers, leading to greater perceived improvements as compared to the new scoring system (S&P Global ESG Scores). As such, though the headline improvement figure this year is lower than last year (10.0%) the ESG credentials of the fund have not been diminished.

Compared to last period the CO2 emissions intensity reduction (28.7%) for the Fund is higher. The Fund continues to avoid companies excluded by the Reference Index.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The sustainable investments made by the Fund contributed to environmental objectives such as climate change, water management, pollution prevention, and to social objectives such as good health, well-being and gender equality. The Fund achieved those objectives by investing in constituents of the Reference Index. According to Invesco's sustainable investment framework, a percentage (as disclosed above) of constituents of the Reference Index contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index or had their weightings reduced.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

The methodology of the Reference Index directly excluded a number of companies involved in certain business activities. Through the removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons, those facing severe ESG controversies, as assessed via Sustainalytics Controversy Scores, and those that were deemed non-compliant with the principles of the United Nations Global Compact. Additionally, through its exclusions based on Sustainalytics Risk Rating Score the index also addressed a number of other adverse indicators. Companies were assessed for inclusion based on whether they were deemed to help the world decarbonise and reduce climate risk generally.

Sustainalytics Controversy Scores consider controversies in a number of different areas, including, but not limited to discrimination and harassment, land use and biodiversity, energy use and greenhouse gas emissions, discharges and releases (water), degradation and contamination (land), and controversial weapons.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainalytics Risk Ratings consider a number of key issues in their construction, including, but not limited to biodiversity programmes, hazardous waste management, water risk management, GHG risk management, carbon intensity, gender pay equality programme, gender pay disclosure, and board diversity.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") was captured in the methodology of the Reference Index tracked by the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The methodology of the Reference Index excluded companies that were deemed not to be compliant with the UN Global Compact (the "**UNGC**"). This set of ten principles show significant overlap with both the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles. With regards to OECD, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The methodology of the Reference Index excluded companies facing severe ESG controversies, as assessed via Sustainalytics Controversy Scores. As part of their research Sustainalytics consider global standards screening, in particular specific international norms and standards including both the OECD Guidelines and the UN Guiding Principles.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

The below table shows the PAI scores for the fund- the data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	80.18	99.87	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		112.37	99.87	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		2,541.17	99.87	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		2,733.72	99.87	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	26.93	99.87	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	175.17	99.87	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.87	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	31.16	96.30	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	3.78	53.58	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	0.00	0.00	
	Manufacturing	0.04	58.11	
	Mining & Quarrying	0.00	0.00	
Real Estate Activities	2.12	0.05		
Transportation & Storage	0.00	0.00		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		
Wholesale & Retail Trade & Repair of	0.00	0.00		

Biodiversity	Motor Vehicles & Motorcycles			
	7. Activities negatively affecting biodiversity-sensitive areas	0.00	99.87	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.12	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.03	99.71	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	99.87	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	37.65	99.78	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	0.00	0.00	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	37.93	98.51	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.87	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was

required in accordance with the engagement policy.

*Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data*

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 1st of January 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
NVIDIA CORP	Information Technology	21.10%	United States
MICROSOFT CORP	Information Technology	20.83%	United States
APPLE INC	Information Technology	16.78%	United States

### What was the proportion of sustainability-related investments?

Please see below.

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

99.96% of the Fund's NAV was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

0.04% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes, or was held as cash for ancillary liquidity purposes.

71.01% of the Fund's NAV was invested in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	0.00
Communication Services	0.00
Consumer Discretionary	0.00
Information Technology	99.96
Industrials	0.00
Consumer Staples	0.00
Energy	0.00
Real Estate	0.00
Health Care	0.00
Materials	0.00
Utilities	0.00
Cash	0.04
<b>Total</b>	<b>100.00</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	0.00
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>0.00</b>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

0% of the Fund's portfolio was aligned with the EU Taxonomy.

substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes
- In fossil gas       In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

The Fund continues to have 0% alignment with the EU Taxonomy, as with the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

As the Fund does not currently intend to be EU Taxonomy aligned, 50.48% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

● **What was the share of socially sustainable investments?**

20.53% of the Fund's NAV.

● **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

0.04% of the Fund's NAV was invested in investments that did not align with the environmental and social characteristics of the Fund. Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

### What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

### How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

#### ● How does the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it seeks to achieve an uplift in the weighted average S&P Global ESG score and a decrease in the weighted average carbon intensity relative to the Parent Index (a subset of the S&P World Index, formerly S&P Developed Ex-Korea LargeMidCap Index, a relevant broad market index) which includes companies in the information technology sector).

#### ● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
S&P Global ESG Score (as defined in the methodology of the Reference Index)	55.8	55.8
CO2 emissions intensity (Scope 1+2+3/EVIC)	28.5	28.5
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

#### ● How did this financial product perform compared with the reference benchmark?

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

#### ● How did this financial product perform compared with the broad market index?

The sustainability indicators for the Fund and Parent Index differed as below:

<b>Sustainability Indicator</b>	<b>Fund Indicator Performance</b>	<b>Broad Market benchmark (Parent Index) Indicator Performance</b>
S&P Global ESG Score (as defined in the methodology of the Reference Index)	55.8	52.0
CO2 emissions intensity (Scope 1+2+3/EVIC)	28.5	64.7
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 15.9% exposure to excluded companies at the latest Reference Index rebalance date

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Global Corporate Bond ESG UCITS ETF

Legal entity identifier: 254900SG4WZ4NOGTWF60

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** \_\_\_\_\_ %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** \_\_\_\_\_ %

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 54.21 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to increase overall exposure to issuers demonstrating a robust ESG profile i.e. issuers with a more favourable ESG rating compared similar issuers. The Fund also reduced exposure to companies involved in certain business activities and those with involvement in very severe ESG controversies.

The Fund achieved the environmental and social characteristics by tracking the Bloomberg MSCI Global Liquid Corporate ESG Weighted SRI Sustainable Bond Index ("**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

#### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as follows as at 31 December 2024, the data is representative of

the reference period:

Sustainability Indicator	Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the Bloomberg Global Aggregate Corporate Index (the " <b>Parent Index</b> ")	9.8% improvement
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Parent Index	69.7% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

N/A

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The sustainable investments made by the Fund contributed to environmental objectives such as climate change, water management, pollution prevention, and to social objectives such as good health, well-being and gender equality. The Fund achieved those objectives by investing in constituents of the Reference Index. According to Invesco's sustainable investment framework, a percentage (as disclosed above) of constituents of the Reference Index contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index or had their weightings reduced.

**How were the indicators for adverse impacts on sustainability factors taken into account?**

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The index methodology directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those facing very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score, and adjustment of the weighting for those that are above the threshold based on these same scores, the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data wasn't available to make such assessments.

MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to carbon emissions, product carbon footprint, biodiversity & land use, toxic emissions & waste, opportunities in renewable energy. The scores also take into account areas such as human capital as well as corporate governance, considering ownership & control, pay and the board.

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to biodiversity & land use, energy & climate change, toxic emissions & waste, operational waste, discrimination & workforce diversity, and governance structures. Any company that violates the UN Global Compact receives a very severe MSCI Controversy Score.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") is captured in the index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that weren't compliant with the UN Global Compact (the "**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the UNGC, the International Labour Organisation's conventions, and the UN Guiding Principles on Business and Human Rights.

*The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**How did this financial product consider principal adverse impacts on sustainability factors?**

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

The below table shows the PAI scores for the fund, the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	2,512.73	85.70	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		730.44	85.70	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		47,430.84	85.70	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		50,674.01	85.70	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	270.34	85.70	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,209.06	99.50	Fund level Total Emission Intensity-Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	1.27	99.81	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	56.17	76.32	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	19.01	31.69	
	6. Energy consumption intensity per high impact climate sector			
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.18	0.40	
	Electricity, Gas, Steam & Air Conditioning Supply	1.51	3.34	
	Manufacturing	0.23	19.29	
	Mining & Quarrying	1.26	0.44	
	Real Estate Activities	0.55	1.37	
Transportation & Storage	2.44	2.65		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.42	0.22		

<b>Biodiversity</b>	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.04	2.24	
	7. Activities negatively affecting biodiversity-sensitive areas	2.97	99.26	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
<b>Water</b>	8. Emissions to water	0.00	0.08	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
<b>Waste</b>	9. Hazardous waste and radioactive waste ratio	0.57	87.58	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
<b>Social and employee matters</b>	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	99.26	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	46.34	98.99	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	26.52	4.32	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	38.47	94.49	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.73	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 9th of April 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
HSBC HOLDINGS	Financials	0.11%	United Kingdom
UBS GROUP	Financials	0.11%	Switzerland
SOCGEN FLT 9/22/2028	Financials	0.10%	France
VZ 4.329 9/21/2028	Communication Services	0.10%	United States
UBS 0.25 2/24/2028	Financials	0.10%	Switzerland

### What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

100% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

54.21% of the Fund's NAV was invested in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - The data is representative of the reference period.

Sector (GICS)	Weight %
Financials	53.57
Communication Services	6.82
Consumer Discretionary	4.80
Information Technology	6.94
Industrials	4.07
Consumer Staples	3.55
Energy	2.41
Real Estate	1.40
Health Care	10.88
Materials	1.21
Utilities	4.21
Unclassified	0.14
<b>Total</b>	<b>100.00</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.04
10101020	Oil & Gas Equipment & Services	0.15
10102010	Integrated Oil & Gas	0.01
10102020	Oil & Gas Exploration & Production	0.03
10102030	Oil & Gas Refining & Marketing	0.16
10102040	Oil & Gas Storage & Transportation	2.00
10102050	Coal & Consumable Fuels	0.02
<b>Total</b>		<b>2.41</b>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities**

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

N/A

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

As the Fund does not currently intend to be EU Taxonomy aligned, 6.25% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

**What was the share of socially sustainable investments?**

47.96% of the Fund's NAV.

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

NA

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information on how the indicators performed during the reference period.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

### ● **How does the reference benchmark differ from a broad market index?**

The Reference Index differs from a broad market index because it seeks to increase overall exposure to issuers demonstrating both a robust ESG profile, and issuers that are assigned more favourable ESG scores using MSCI ESG metrics.

### ● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

As the Fund aims to replicate the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index)	7.45	7.45
CO2 emissions intensity (Scope 1+2/Revenue)	59.4	59.7
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index date rebalance	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

### ● **How did this financial product perform compared with the reference benchmark?**

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

### ● **How did this financial product perform compared with the broad market index?**

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and Parent

Index differed as below:

<b>Sustainability Indicator</b>	<b>Fund Indicator Performance</b>	<b>Broad Market benchmark (Parent Index) Indicator Performance</b>
MSCI ESG Score (as defined in the methodology of the Reference Index)	7.45	6.78
CO2 emissions intensity (Scope 1+2/Revenue)	59.4	196.1
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 17.1% exposure to excluded companies at the latest Reference Index rebalance date

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Bulletshares 2026 USD Corporate Bond UCITS ETF

Legal entity identifier: 254900RZMN3XJIHGP923

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

- It made **sustainable investments with an environmental objective:** \_\_\_\_\_ %
  - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective:** \_\_\_\_\_ %

No

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_\_\_ % of sustainable investments
  - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to ensure that the issuers it had exposure to were not involved in controversial and environmentally damaging business activities. The Fund achieved this by tracking the Bloomberg 2026 Maturity USD Corporate Bond Screened Index ("**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund. The environmental and social characteristics were achieved by applying the Index Provider's exclusion criteria to the eligible securities.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

#### ● **How did the sustainability indicators perform?**

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as follows as at 31 December 2024, the data is representative of

the reference period:

Sustainability Indicator	Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Bloomberg US Corporate Bond Index (a broad market index)	62.4% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

N/A

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

N/A

**How were the indicators for adverse impacts on sustainability factors taken into account?**

N/A

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

N/A

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**How did this financial product consider principal adverse impacts on sustainability factors?**

The methodology of the Reference Index considered principal adverse impacts on sustainability factors by directly excluding a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those that weren't compliant with the UN Global Compact.

The below table shows the PAI scores for the fund, the data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	235.10	79.89	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		62.98	79.89	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		4,125.05	79.89	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		4,423.13	79.89	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	422.12	79.89	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,410.36	97.69	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	2.20	99.44	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	64.74	69.80	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	27.33	33.66	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	1.69	0.17	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	3.72	1.82	
	Manufacturing	0.19	27.83	
	Mining & Quarrying	1.23	3.67	
Real Estate Activities	0.48	4.65		
Transportation & Storage	2.48	3.43		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.05	4.16	
	7. Activities negatively affecting biodiversity-sensitive areas	7.29	98.79	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.26	81.53	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	98.79	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	55.60	97.60	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	29.44	1.35	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	34.94	96.98	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.44	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 21st of May 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
CITIGROUP INC	Financials	1.12%	United States
APPLE INC	Information Technology	0.91%	United States
T 1.7 3/25/2026	Communication Services	0.78%	United States
ABBV 2.95 11/21/2026	Health Care	0.75%	United States
PFE 4.45 5/19/2026	Health Care	0.73%	Singapore
CVS HEALTH CORP	Health Care	0.70%	United States

### What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

99.88% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.12% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

0.00% of the Fund's NAV was invested in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	40.73
Communication Services	5.15
Consumer Discretionary	7.64
Information Technology	9.08
Industrials	6.87
Consumer Staples	4.81
Energy	6.00
Real Estate	5.44
Health Care	10.01
Materials	1.32
Utilities	2.83
Cash	0.12
<b>Total</b>	<b>100.00</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.16
10102010	Integrated Oil & Gas	1.96
10102020	Oil & Gas Exploration & Production	0.69
10102030	Oil & Gas Refining & Marketing	0.70
10102040	Oil & Gas Storage & Transportation	2.49
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>6.00</b>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not make any sustainable investments within the meaning of Article 2(17) of Regulation (EU) 2019/2088.

#### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

● **What was the share of investments made in transitional and enabling activities?**

N/A

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund did not make any sustainable investments. The Fund does not currently intend to be EU Taxonomy aligned, 0.00% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

**What was the share of socially sustainable investments?**

N/A

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

0.12% of the Fund's NAV was invested in investments that did not align with the environmental and social characteristics of the Fund. Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

### ● **How does the reference benchmark differ from a broad market index?**

The Reference Index differs from a broad market index because it seeks to reduce overall exposure to issuers which may be most impacted by ESG risks and controversies. The Reference Index targets bonds which mature in a specific timeframe, and will transition to an index comprising United States treasury securities as these bonds mature.

### ● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

As the Fund aims to replicate the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue)	83.2	82.1
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index date rebalance	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

### ● **How did this financial product perform compared with the reference benchmark?**

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

### ● **How did this financial product perform compared with the broad market index?**

The sustainability indicators for the Fund and broad market index differed as below:

Sustainability Indicator	Fund Indicator Performance	Broad Market benchmark (Parent Index) Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue)	83.2	221.5
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 11.5% exposure to excluded companies at the latest Reference Index rebalance date

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco BulletShares 2027 USD Corporate Bond UCITS ETF

Legal entity identifier: 254900033144AZAOK669

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** \_\_\_\_\_%
  - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_\_\_% of sustainable investments
  - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective

- It made **sustainable investments with a social objective:** \_\_\_\_\_%

- It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to ensure that the issuers it had exposure to were not involved in controversial and environmentally damaging business activities, or very severe ESG controversies. The Fund achieved this by tracking the Bloomberg 2027 Maturity USD Corporate Bond Screened Index ("**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund. The environmental and social characteristics were achieved by applying the Index Provider's exclusion criteria to the eligible securities.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

#### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as follows as at 31 December 2024, the data is representative of

the reference period:

Sustainability Indicator	Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Bloomberg US Corporate Bond Index (a broad market index)	63.0% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

N/A

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

N/A

**How were the indicators for adverse impacts on sustainability factors taken into account?**

N/A

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

N/A

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**How did this financial product consider principal adverse impacts on sustainability factors?**

The methodology of the Reference Index considered principal adverse impacts on sustainability factors by directly excluding a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those that weren't compliant with the UN Global Compact.

The below table shows the PAI scores for the fund, the data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	197.40	79.66	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		52.31	79.66	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		2,898.40	79.66	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		3,148.10	79.66	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	450.20	79.66	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,427.29	98.05	Fund level Total Emission Intensity-Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	2.16	99.73	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	64.22	69.54	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	29.09	32.25	
	6. Energy consumption intensity per high impact climate sector			
	Agriculture, Forestry & Fishing	0.56	0.06	
	Construction	0.07	0.06	
	Electricity, Gas, Steam & Air Conditioning Supply	1.99	2.43	
	Manufacturing	0.22	30.71	
	Mining & Quarrying	1.13	3.40	
	Real Estate Activities	0.51	3.91	
Transportation & Storage	2.86	3.19		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.49	0.55		

<b>Biodiversity</b>	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.05	3.76	
	7. Activities negatively affecting biodiversity-sensitive areas	5.99	98.91	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
<b>Water</b>	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
<b>Waste</b>	9. Hazardous waste and radioactive waste ratio	0.14	81.19	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
<b>Social and employee matters</b>	10. Violations fo UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	98.91	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	55.66	97.98	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	14.07	1.37	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	34.90	97.26	Waited Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.73	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was

required in accordance with the engagement policy.

*Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.*

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 21st of May 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
AMZN 3.15 8/22/2027	Consumer Discretionary	1.08%	United States
WBD 3.755 3/15/2027	Communication Services	0.93%	United States
TMUS 3.75 4/15/2027	Communication Services	0.84%	United States
MICROSOFT CORP	Information Technology	0.83%	United States
CITIGROUP INC	Financials	0.83%	United States
VERIZON COMM INC	Communication Services	0.83%	United States
GOLDMAN SACHS GP	Financials	0.76%	United States
TOYOTA 3.05 27	Consumer Discretionary	0.75%	United States
APPLE INC	Information Technology	0.75%	United States
F 7.35 11/4/2027	Consumer Discretionary	0.70%	United States
ORACLE CORP	Information Technology	0.67%	United States
MORGAN STANLEY	Financials	0.65%	United States
BANK OF AMER CRP	Financials	0.59%	United States
TD 4.108 6/8/2027	Financials	0.57%	Canada
GM 5.4 5/8/2027	Financials	0.56%	United States

### What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

100.00% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.00% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

0.00% of the Fund's NAV was invested in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	31.89
Communication Services	6.76
Consumer Discretionary	11.02
Information Technology	10.09
Industrials	6.52
Consumer Staples	6.36
Energy	5.91
Real Estate	4.55
Health Care	10.60
Materials	2.34
Utilities	3.96
<b>Total</b>	<b>100.00</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.54
10102010	Integrated Oil & Gas	0.76
10102020	Oil & Gas Exploration & Production	1.21
10102030	Oil & Gas Refining & Marketing	0.69
10102040	Oil & Gas Storage & Transportation	2.71
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>5.91</b>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The Fund did not make any sustainable investments within the meaning of Article 2(17) of Regulation (EU) 2019/2088.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes
- In fossil gas       In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund did not make any sustainable investments. The Fund does not currently intend to be EU Taxonomy aligned, 0.00% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

● **What was the share of socially sustainable investments?**

N/A

● **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

N/A

● **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

**How did this financial product perform compared to the reference benchmark?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

See tables completed in below sections.

● **How does the reference benchmark differ from a broad market index?**

The Reference Index differs from a broad market index because it seeks to reduce overall exposure to issuers which may be most impacted by ESG risks and controversies. The Reference Index targets bonds which mature in a specific timeframe, and will transition to an index comprising United States treasury securities as these bonds mature.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

As the Fund aims to replicate the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue)	82.0	80.4
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index date rebalance	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

● **How did this financial product perform compared with the reference benchmark?**

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

● **How did this financial product perform compared with the broad market index?**

The sustainability indicators for the Fund and broad market index differed as below:

Sustainability Indicator	Fund Indicator Performance	Broad Market benchmark (Parent Index) Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue)	82.0	221.5
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 11.5% exposure to excluded companies at the latest Reference Index rebalance date

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco BulletShares 2028 USD Corporate Bond UCITS ETF

Legal entity identifier: 254900WG7LQV9SIDJ511

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** \_\_\_\_\_%
  - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective:** \_\_\_\_\_%

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_\_\_% of sustainable investments
  - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective

- It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to ensure that the issuers it had exposure to were not involved in controversial and environmentally damaging business activities, or very severe ESG controversies. The Fund achieved this by tracking the Bloomberg 2028 Maturity USD Corporate Bond Screened Index ("**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund. The environmental and social characteristics were achieved by applying the Index Provider's exclusion criteria to the eligible securities.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

#### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as follows as at 31 December 2024, the data is representative of

the reference period:

Sustainability Indicator	Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Bloomberg US Corporate Bond Index (a broad market index)	45.1% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

N/A

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

N/A

**How were the indicators for adverse impacts on sustainability factors taken into account?**

N/A

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

N/A

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**How did this financial product consider principal adverse impacts on sustainability factors?**

The methodology of the Reference Index considered principal adverse impacts on sustainability factors by directly excluding a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those that weren't compliant with the UN Global Compact.

The below table shows the PAI scores for the fund, the data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	192.01	79.93	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		58.41	79.93	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		3,592.60	79.93	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		3,843.02	79.93	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	471.91	79.93	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,466.10	97.78	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	3.09	99.51	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	68.77	71.09	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	34.75	36.91	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	3.06	3.32	
	Manufacturing	0.20	28.23	
	Mining & Quarrying	1.21	3.62	
	Real Estate Activities	0.64	6.38	
Transportation & Storage	2.54	3.88		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.61	0.55		
Wholesale & Retail Trade & Repair of	0.09	4.56		

<b>Biodiversity</b>	Motor Vehicles & Motorcycles			
	7. Activities negatively affecting biodiversity-sensitive areas	6.79	98.40	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
<b>Water</b>	8. Emissions to water	1.70	0.19	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
<b>Waste</b>	9. Hazardous waste and radioactive waste ratio	0.51	81.51	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
<b>Social and employee matters</b>	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	98.40	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	55.45	97.34	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	29.08	1.82	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	34.52	96.93	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.51	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

*Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.*

## What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 21st of May 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
CVS 4.3 3/25/2028	Health Care	1.23%	United States
CMCSA 4.15 28	Communication Services	1.19%	United States
PFE 4.45 5/19/2028	Health Care	1.11%	Singapore
VZ 4.329 9/21/2028	Communication Services	1.05%	United States
AMGN 5.15 3/2/2028	Health Care	0.98%	United States
CIGNA GROUP/THE	Health Care	0.96%	United States
GM 5.8 6/23/2028	Consumer Discretionary	0.95%	United States
F 6.8 5/12/2028	Consumer Discretionary	0.75%	United States
CS 7.5 2/15/2028	Financials	0.73%	United States

SANTAN 5.588 28	Financials	0.63%	Spain

## What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

### ● What was the asset allocation?

99.97% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.03% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

0.00% of the Fund's NAV was invested in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### ● In which economic sectors were the investments made?

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	26.79
Communication Services	8.71
Consumer Discretionary	8.42
Information Technology	8.13
Industrials	7.20
Consumer Staples	6.35
Energy	7.22
Real Estate	7.26
Health Care	12.63
Materials	2.63
Utilities	4.63
Cash	0.03
<b>Total</b>	<b>100.00</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.04
10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	1.61
10102020	Oil & Gas Exploration & Production	0.55
10102030	Oil & Gas Refining & Marketing	1.77
10102040	Oil & Gas Storage & Transportation	3.25
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>7.22</b>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The Fund did not make any sustainable investments within the meaning of Article 2(17) of Regulation (EU) 2019/2088.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes
- In fossil gas       In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

**Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

● **What was the share of investments made in transitional and enabling activities?**

N/A

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund did not make any sustainable investments. The Fund does not currently intend to be EU Taxonomy aligned, 0.00% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

**What was the share of socially sustainable investments?**

N/A

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

0.03% of the Fund's NAV was invested in investments that did not align with the environmental and social characteristics of the Fund. Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

### ● How does the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it seeks to reduce overall exposure to issuers which may be most impacted by ESG risks and controversies. The Reference Index targets bonds which mature in a specific timeframe, and will transition to an index comprising United States treasury securities as these bonds mature.

### ● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund aims to replicate the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue)	121.5	118.9
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index date rebalance	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

### ● How did this financial product perform compared with the reference benchmark?

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

### ● How did this financial product perform compared with the broad market index?

The sustainability indicators for the Fund and broad market index differed as below:

Sustainability Indicator	Fund Indicator Performance	Broad Market benchmark (Parent Index) Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue)	121.5	221.5
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 11.5% exposure to excluded companies at the latest Reference Index rebalance date

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco BulletShares 2029 USD Corporate Bond UCITS ETF

Legal entity identifier: 2549009OCFO514C5RX42

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

No

- It made **sustainable investments with an environmental objective:** \_\_\_\_\_%
  - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective:** \_\_\_\_\_%

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_\_\_% of sustainable investments
  - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to ensure that the issuers it had exposure to were not involved in controversial and environmentally damaging business activities, or very severe ESG controversies. The Fund achieved this by tracking the Bloomberg 2029 Maturity USD Corporate Bond Screened Index ("**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund. The environmental and social characteristics were achieved by applying the Index Provider's exclusion criteria to the eligible securities.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

#### ● **How did the sustainability indicators perform?**

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as follows as at 31 December 2024, the data is representative of

the reference period:

Sustainability Indicator	Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Bloomberg US Corporate Bond Index (a broad market index)	48.3% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

N/A

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

N/A

**How were the indicators for adverse impacts on sustainability factors taken into account?**

N/A

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

N/A

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**How did this financial product consider principal adverse impacts on sustainability factors?**

The methodology of the Reference Index considered principal adverse impacts on sustainability factors by directly excluding a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those that weren't compliant with the UN Global Compact.

The below table shows the PAI scores for the fund, the data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1. GHG Emissions	232.01	80.27	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		78.34	80.27	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		4,390.39	80.27	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		4,700.73	80.27	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	477.88	80.27	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,373.46	96.09	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	3.06	99.39	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	73.86	67.00	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	29.98	34.59	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	1.69	0.28	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	1.93	2.77	
	Manufacturing	0.27	33.71	
	Mining & Quarrying	1.00	3.76	
Real Estate Activities	0.58	6.33		
Transportation & Storage	1.63	4.03		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.59	0.92		

<b>Biodiversity</b>	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.05	3.72	
	7. Activities negatively affecting biodiversity-sensitive areas	7.37	97.91	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
<b>Water</b>	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
<b>Waste</b>	9. Hazardous waste and radioactive waste ratio	0.11	81.16	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
<b>Social and employee matters</b>	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	97.91	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	57.66	96.50	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	25.07	0.52	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	33.71	95.80	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.27	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 21st of May 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
ABBV 4.8 3/15/2029	Health Care	1.28%	United States
ABIBB 4.75 1/23/2029	Consumer Staples	1.18%	United States
VERIZON COMM INC	Communication Services	1.10%	United States
T-MOBILE USA INC	Communication Services	0.93%	United States
CNC 4.625 12/15/2029	Health Care	0.92%	United States
ABBV 3.2 11/21/2029	Health Care	0.87%	United States
T 4.35 3/1/2029	Communication Services	0.87%	United States
FISERV INC	Financials	0.80%	United States
IBM 3.5 5/15/2029	Information Technology	0.79%	United States
SUMITOMO MITSUI	Financials	0.73%	Japan
CSCO 4.85 2/26/2029	Information Technology	0.72%	United States
BMJ 3.4 7/26/2029	Health Care	0.72%	United States
HCA INC	Health Care	0.68%	United States
F 5.8 3/8/2029	Consumer Discretionary	0.64%	United States
AVGO 4.75 4/15/2029	Information Technology	0.64%	United States

### What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

100.00% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.00% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

0.00% of the Fund's NAV was invested in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### ● In which economic sectors were the investments made?

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	24.04
Communication Services	6.88
Consumer Discretionary	8.40
Information Technology	9.41
Industrials	7.36
Consumer Staples	6.37
Energy	7.39
Real Estate	7.65
Health Care	15.52
Materials	2.11
Utilities	4.87
<b>Total</b>	<b>100.00</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.24
10101020	Oil & Gas Equipment & Services	0.35
10102010	Integrated Oil & Gas	1.80
10102020	Oil & Gas Exploration & Production	0.89
10102030	Oil & Gas Refining & Marketing	0.51
10102040	Oil & Gas Storage & Transportation	3.20
10102050	Coal & Consumable Fuels	0.40
<b>Total</b>		<b>7.39</b>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The Fund did not make any sustainable investments within the meaning of Article 2(17) of Regulation (EU) 2019/2088.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes
- In fossil gas       In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

● **What was the share of investments made in transitional and enabling activities?**

N/A

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund did not make any sustainable investments. The Fund does not currently intend to be EU Taxonomy aligned, 0.00% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

**What was the share of socially sustainable investments?**

N/A

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

N/A

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

**How did this financial product perform compared to the reference benchmark?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

See tables completed in below sections.

● **How does the reference benchmark differ from a broad market index?**

The Reference Index differs from a broad market index because it seeks to reduce overall exposure to issuers which may be most impacted by ESG risks and controversies. The Reference Index targets bonds which mature in a specific timeframe, and will transition to an index comprising United States treasury securities as these bonds mature.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

As the Fund aims to replicate the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue)	114.6	116.6
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index date rebalance	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

● **How did this financial product perform compared with the reference benchmark?**

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

● **How did this financial product perform compared with the broad market index?**

The sustainability indicators for the Fund and broad market index differed as below:

Sustainability Indicator	Fund Indicator Performance	Broad Market benchmark (Parent Index) Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue)	114.6	221.5
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 11.5% exposure to excluded companies at the latest Reference Index rebalance date

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco BulletShares 2030 USD Corporate Bond UCITS ETF

Legal entity identifier: 254900H14QIPU3V1TT77

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### Did this financial product have a sustainable investment objective?

Yes

- It made **sustainable investments with an environmental objective:** \_\_\_\_\_%
  - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective:** \_\_\_\_\_%

No

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_\_\_% of sustainable investments
  - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to ensure that the issuers it had exposure to were not involved in controversial and environmentally damaging business activities, or very severe ESG controversies. The Fund achieved this by tracking the Bloomberg 2030 Maturity USD Corporate Bond Screened Index ("**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund. The environmental and social characteristics were achieved by applying the Index Provider's exclusion criteria to the eligible securities.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

#### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as follows as at 31 December 2024, the data is representative of

the reference period:

Sustainability Indicator	Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Bloomberg US Corporate Bond Index (a broad market index)	43.6% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

N/A

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

N/A

**How were the indicators for adverse impacts on sustainability factors taken into account?**

N/A

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

N/A

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**How did this financial product consider principal adverse impacts on sustainability factors?**

The methodology of the Reference Index considered principal adverse impacts on sustainability factors by directly excluding a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those that weren't compliant with the UN Global Compact.

The below table shows the PAI scores for the fund, the data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	229.12	83.13	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		68.38	83.13	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		4,481.23	83.13	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		4,778.73	83.13	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	601.58	83.13	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,454.63	98.34	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	4.40	99.33	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	69.82	67.90	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	34.19	37.60	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	1.69	0.27	
	Construction	0.20	0.29	
	Electricity, Gas, Steam & Air Conditioning Supply	2.67	2.84	
	Manufacturing	0.30	30.67	
	Mining & Quarrying	1.27	6.26	
Real Estate Activities	0.45	5.80		
Transportation & Storage	2.76	3.59		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.51	0.66		

<b>Biodiversity</b>	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.11	3.82	
	7. Activities negatively affecting biodiversity-sensitive areas	7.96	98.61	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
<b>Water</b>	8. Emissions to water	1.70	0.26	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
<b>Waste</b>	9. Hazardous waste and radioactive waste ratio	0.27	84.06	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
<b>Social and employee matters</b>	10. Violations fo UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	98.61	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	56.07	98.01	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	8.14	2.05	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	34.15	97.27	Waited Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap- ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.43	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 21st of May 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
TMUS 3.875 4/15/2030	Communication Services	1.85%	United States
DEUTSCHE TEL FIN	Communication Services	1.20%	Netherlands
BRITISH TELECOMM	Communication Services	0.91%	United Kingdom
ORCL 2.95 4/1/2030	Information Technology	0.91%	United States
AMGN 5.25 3/2/2030	Health Care	0.90%	United States
T 4.3 2/15/2030	Communication Services	0.89%	United States
CMCSA 3.4 4/1/2030	Communication Services	0.84%	United States
SUMIBK 2.13 7/8/2030	Financials	0.84%	Japan
XOM 3.482 3/19/2030	Energy	0.82%	United States

CENTENE CORP	Health Care	0.77%	United States
PFE 4.65 5/19/2030	Health Care	0.72%	Singapore
VZ 3.15 3/22/2030	Communication Services	0.72%	United States
FORD MOTOR CRED	Consumer Discretionary	0.67%	United States
AVGO 4.15 11/15/2030	Information Technology	0.67%	United States

### What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

99.88% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.12% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

0.00% of the Fund's NAV was invested in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	18.53
Communication Services	10.06
Consumer Discretionary	9.86
Information Technology	8.19
Industrials	7.09
Consumer Staples	7.67
Energy	9.77
Real Estate	6.91
Health Care	14.63
Materials	3.00
Utilities	4.17
Cash	0.12
<b>Total</b>	<b>100.00</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.79
10101020	Oil & Gas Equipment & Services	0.68
10102010	Integrated Oil & Gas	3.50
10102020	Oil & Gas Exploration & Production	1.35
10102030	Oil & Gas Refining & Marketing	0.71
10102040	Oil & Gas Storage & Transportation	2.74
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>9.77</b>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The Fund did not make any sustainable investments within the meaning of Article 2(17) of Regulation (EU) 2019/2088.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes
- In fossil gas       In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● What was the share of investments made in transitional and enabling activities?

N/A

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund did not make any sustainable investments. The Fund does not currently intend to be EU Taxonomy aligned, 0.00% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

N/A

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

0.12% of the Fund's NAV was invested in investments that did not align with the environmental and social characteristics of the Fund. Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

### ● **How does the reference benchmark differ from a broad market index?**

The Reference Index differs from a broad market index because it seeks to reduce overall exposure to issuers which may be most impacted by ESG risks and controversies. The Reference Index targets bonds which mature in a specific timeframe, and will transition to an index comprising United States treasury securities as these bonds mature.

### ● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

As the Fund aims to replicate the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue)	124.9	121.7
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index date rebalance	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

### ● **How did this financial product perform compared with the reference benchmark?**

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

### ● **How did this financial product perform compared with the broad market index?**

The sustainability indicators for the Fund and broad market index differed as below:

Sustainability Indicator	Fund Indicator Performance	Broad Market benchmark (Parent Index) Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue)	124.9	221.5
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 11.5% exposure to excluded companies at the latest Reference Index rebalance date

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Bulletshares 2026 EUR Corporate Bond UCITS ETF Legal entity identifier: 254900HGBMG46T2E8647

## Environmental and/or social characteristics

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### Did this financial product have a sustainable investment objective?

Yes

- It made **sustainable investments with an environmental objective:** \_\_\_\_\_ %
  - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective:** \_\_\_\_\_ %

No

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 6.57 % of sustainable investments
  - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to ensure that the issuers it had exposure to were not involved in controversial and environmentally damaging business activities, or very severe ESG controversies. The Fund achieved this by tracking the Bloomberg 2026 Maturity EUR Corporate Bond Screened Index ("**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund. The environmental and social characteristics were achieved by applying the Index Provider's exclusion criteria to the eligible securities.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

#### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as follows as at 31 December 2024, the data is representative of

the reference period:

Sustainability Indicator	Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Bloomberg Euro Aggregate Corporate Index (a broad market index)	41.5% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

N/A

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

N/A

**How were the indicators for adverse impacts on sustainability factors taken into account?**

N/A

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

N/A

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**How did this financial product consider principal adverse impacts on sustainability factors?**

The methodology of the Reference Index considered principal adverse impacts on sustainability factors by directly excluding a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those that weren't compliant with the UN Global Compact.

The below table shows the PAI scores for the fund, the data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	204.88	70.96	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		27.10	70.96	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		2,306.00	70.96	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		2,537.99	70.96	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	543.25	70.96	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,298.49	99.45	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.45	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	59.18	73.04	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	34.74	33.45	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.15	1.48	
	Electricity, Gas, Steam & Air Conditioning Supply	2.65	5.96	
	Manufacturing	0.19	29.16	
	Mining & Quarrying	0.90	3.00	
	Real Estate Activities	1.14	4.51	
Transportation & Storage	0.43	1.59		
Water Supply, Sewerage, Waste Management &	0.00	0.00		

	Remediation Activities			
	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.00	0.00	
Biodiversity	7. Activities negatively affecting biodiversity-sensitive areas	5.47	99.45	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.77	72.44	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	99.45	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	24.99	99.45	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	0.00	0.00	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	39.78	90.95	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.45	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

The methodology of the Reference Index considered principal adverse impacts on sustainability factors by directly excluding a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those that weren't compliant with the UN Global Compact. Additionally, the Fund identified priority investee entities using thresholds on each principal adverse impacts indicator and engaged through methods such as letters, meetings and proxy voting as appropriate. Information on principal adverse impacts on sustainability factors is available in the annual report of the Fund. The annual report of the Fund describes the extent to which environmental or social characteristics were met. The annual report is available on the Fund's website at [etf.invesco.com](http://etf.invesco.com).

*Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.*

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 21st of May 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
DANAHER CORP	Health Care	2.25%	United States
UBS AG LONDON	Financials	1.59%	United Kingdom
BKNG 4 11/15/2026	Consumer Discretionary	1.56%	United States
SOCIETE GENERALE	Financials	1.56%	France
RCI BANQUE	Financials	1.55%	France
DBOERS 3.875 26	Financials	1.55%	Germany
DEUTSCHE BANK AG	Financials	1.55%	Germany
SGOFP 3.75 26	Industrials	1.55%	France
VOLVO TREAS AB	Financials	1.55%	Sweden
ARVAL SERVICE LE	Industrials	1.54%	France
VW 4.25 1/7/2026	Consumer Discretionary	1.54%	Germany
TOYOTA 3.434 26	Consumer Discretionary	1.53%	Australia
VERIZON COMM INC	Communication Services	1.53%	United States
JPMORGAN CHASE	Financials	1.53%	United States
GOLDMAN SACHS GP	Financials	1.52%	United States

### What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

99.45% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.55% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

0.00% of the Fund's NAV was invested in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

## ● In which economic sectors were the investments made?

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	43.34
Communication Services	7.44
Consumer Discretionary	10.53
Information Technology	2.95
Industrials	7.64
Consumer Staples	5.92
Energy	3.00
Real Estate	4.51
Health Care	5.24
Materials	2.94
Utilities	5.94
Cash	0.55
<b>Total</b>	<b>100.00</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	3.00
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>3.00</b>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

6.57% of the Fund's portfolio was aligned with the EU Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes
- In fossil gas       In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

**What was the share of investments made in transitional and enabling activities?**

The below table shows the share of investments in transitional and enabling activities as the data is

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

representative of the reference period.

	Aligned
Enabling	2.40%
Transition	0.30%

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund did not make any sustainable investments. The Fund does not currently intend to be EU Taxonomy aligned, 0.00% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

- **What was the share of socially sustainable investments?**

N/A

- **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

0.55% of the Fund's NAV was invested in investments that did not align with the environmental and social characteristics of the Fund. Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

- **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during

- **How did this financial product perform compared to the reference benchmark?**

See tables completed in below sections.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- **How does the reference benchmark differ from a broad market index?**

The Reference Index differs from a generic broad market index because it seeks to exclude issuers that are involved in controversial and environmentally damaging business activities or very severe ESG controversies. The Reference Index targets bonds which mature in a specific timeframe, and will transition to an index comprising EUR denominated treasury securities as these bonds mature. Government issuers will be assessed on the level of freedom and democracy they exhibit, reducing exposure to those categorised as 'Not Free' in the Freedom in the World Report published by Freedom House.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

As the Fund aims to replicate the performance of the Reference Index, the sustainability indicators performed

similarly for the Fund and Reference Index:

<b>Sustainability Indicator</b>	<b>Fund Indicator Performance</b>	<b>Reference Index Indicator Performance</b>
CO2 emissions intensity (Scope 1+2/Revenue)	53.5	78.6
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index date rebalance	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

● **How did this financial product perform compared with the reference benchmark?**

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

● **How did this financial product perform compared with the broad market index?**

The sustainability indicators for the Fund and broad market index differed as below:

<b>Sustainability Indicator</b>	<b>Fund Indicator Performance</b>	<b>Broad Market benchmark (Parent Index) Indicator Performance</b>
CO2 emissions intensity (Scope 1+2/Revenue)	53.5	91.4
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 3.8% exposure to excluded companies at the latest Reference Index rebalance date

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Bulletshares 2027 EUR Corporate Bond UCITS ETF Legal entity identifier: 2549007IT9Z006J18718

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** \_\_\_\_\_ %

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** \_\_\_\_\_ %

It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 5.89 % of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were to ensure that the issuers it had exposure to were not involved in controversial and environmentally damaging business activities, or very severe ESG controversies. The Fund achieved this by tracking the Bloomberg 2027 Maturity EUR Corporate Bond Screened Index ("**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund. The environmental and social characteristics were achieved by applying the Index Provider's exclusion criteria to the eligible securities.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

#### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as follows as at 31 December 2024, the data is representative of

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

the reference period:

Sustainability Indicator	Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Bloomberg Euro Aggregate Corporate Index (a broad market index)	8.8% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

N/A

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

N/A

**How were the indicators for adverse impacts on sustainability factors taken into account?**

N/A

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

N/A

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**How did this financial product consider principal adverse impacts on sustainability factors?**

The methodology of the Reference Index considered principal adverse impacts on sustainability factors by directly excluding a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those that weren't compliant with the UN Global Compact.

The below table shows the PAI scores for the fund, the data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	291.85	70.19	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		42.90	70.19	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		2,076.05	70.19	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		2,410.80	70.19	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	522.02	70.19	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,162.85	95.91	Fund level Total Emission Intensity-Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.24	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	64.77	75.45	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	28.33	43.65	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.18	2.93	
	Electricity, Gas, Steam & Air Conditioning Supply	2.46	7.93	
	Manufacturing	0.26	32.43	
	Mining & Quarrying	0.97	2.94	
	Real Estate Activities	0.48	6.90	
Transportation & Storage	0.48	2.92		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

Biodiversity	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.00	0.00	
	7. Activities negatively affecting biodiversity-sensitive areas	4.37	99.24	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	1.17	72.70	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	99.24	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	32.74	99.24	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	35.56	2.59	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	40.83	85.76	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	97.35	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

*Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.*

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 21st of May 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
VOLKSWAGEN INTFN	Consumer Discretionary	2.93%	Netherlands
ENEL FIN INTL NV	Utilities	2.13%	Netherlands
VONOVIA SE	Real Estate	1.58%	Germany
INTESA SANPAOLO	Financials	1.57%	Italy
SKANDINAV ENSKIL	Financials	1.57%	Sweden
RCI BANQUE	Consumer Discretionary	1.57%	France
LLOYDS BANK	Financials	1.56%	United Kingdom
SOCIETE GENERALE	Financials	1.55%	France
NESTLE FIN INTL	Financials	1.55%	Luxembourg
SVENSKA HNDLSBKN	Financials	1.55%	Sweden
0 9/15/2027	Consumer Staples	1.55%	France
NFLX 3.625 5/15/2027	Communication Services	1.54%	United States
KERING	Consumer Discretionary	1.54%	France
RTOLN 3.875 27	Consumer Discretionary	1.54%	United Kingdom
ENIIM 3.625 27	Energy	1.54%	Italy

### What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

99.73% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.27% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

0.00% of the Fund's NAV was invested in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	42.71
Communication Services	4.44
Consumer Discretionary	9.21
Information Technology	4.52
Industrials	10.35
Consumer Staples	4.47
Energy	2.94
Real Estate	5.88
Health Care	5.80
Materials	1.48
Utilities	7.93
Cash	0.27
<b>Total</b>	<b>100.00</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	2.94
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>2.94</b>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

5.89% of the Fund's portfolio was aligned with the EU Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes
  In fossil gas
  In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

### What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities as the data is representative of the reference period.

	Aligned
Enabling	2.24%
Transition	0.23%

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

N/A

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

### What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund did not make any sustainable investments. The Fund does not currently intend to be EU Taxonomy aligned, 0.00% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

### What was the share of socially sustainable investments?

N/A

### What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

0.27% of the Fund's NAV was invested in investments that did not align with the environmental and social characteristics of the Fund. Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information on how the indicators performed during

## How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### ● **How does the reference benchmark differ from a broad market index?**

The Reference Index differs from a generic broad market index because it seeks to exclude issuers that are involved in controversial and environmentally damaging business activities or very severe ESG controversies. The Reference Index targets bonds which mature in a specific timeframe, and will transition to an index comprising EUR denominated treasury securities as these bonds mature. Government issuers will be assessed on the level of freedom and democracy they exhibit, reducing exposure to those categorised as ‘Not Free’ in the Freedom in the World Report published by Freedom House.

### ● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

As the Fund aims to replicate the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue)	83.4	90.8
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index date rebalance	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

### ● **How did this financial product perform compared with the reference benchmark?**

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

### ● **How did this financial product perform compared with the broad market index?**

The sustainability indicators for the Fund and broad market index differed as below:

<b>Sustainability Indicator</b>	<b>Fund Indicator Performance</b>	<b>Broad Market benchmark (Parent Index) Indicator Performance</b>
CO2 emissions intensity (Scope 1+2/Revenue)	83.4	91.4
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 3.8% exposure to excluded companies at the latest Reference Index rebalance date

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Bulletshares 2028 EUR Corporate Bond UCITS ETF Legal entity identifier: 2549006LL9HQBG5KWP52

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

- It made **sustainable investments with an environmental objective:** \_\_\_\_\_ %
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It made **sustainable investments with a social objective:** \_\_\_\_\_ %

No

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 7.94 % of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were to ensure that the issuers it had exposure to were not involved in controversial and environmentally damaging business activities, or very severe ESG controversies. The Fund achieved this by tracking the Bloomberg 2028 Maturity EUR Corporate Bond Screened Index ("**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund. The environmental and social characteristics were achieved by applying the Index Provider's exclusion criteria to the eligible securities.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

#### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as follows as at 31 December 2024, the data is representative of

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

the reference period:

Sustainability Indicator	Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Bloomberg Euro Aggregate Corporate Index (a broad market index)	49.4% increase
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

N/A

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

N/A

**How were the indicators for adverse impacts on sustainability factors taken into account?**

N/A

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

N/A

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**How did this financial product consider principal adverse impacts on sustainability factors?**

The methodology of the Reference Index considered principal adverse impacts on sustainability factors by directly excluding a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those that weren't compliant with the UN Global Compact.

The below table shows the PAI scores for the fund, the data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG Emissions	448.10	65.22	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		55.20	65.22	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		1,941.24	65.22	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		2,444.54	65.22	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	571.57	65.22	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,198.14	98.44	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.84	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	60.62	76.20	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	25.27	44.76	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.15	1.40	
	Electricity, Gas, Steam & Air Conditioning Supply	1.46	7.18	
	Manufacturing	0.74	33.46	
	Mining & Quarrying	0.83	4.36	
	Real Estate Activities	1.20	4.21	
Transportation & Storage	0.26	3.04		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

<b>Biodiversity</b>	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.00	0.00	
	7. Activities negatively affecting biodiversity-sensitive areas	7.44	99.84	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
<b>Water</b>	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
<b>Waste</b>	9. Hazardous waste and radioactive waste ratio	0.90	65.22	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
<b>Social and employee matters</b>	10. Violations fo UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	99.84	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	22.49	99.84	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	3.60	1.37	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	41.84	86.05	Waited Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	98.00	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 21st of May 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
VW 3.875 10/11/2028	Consumer Discretionary	2.16%	Germany
RCI BANQUE	Financials	1.59%	France
ABNANV 4.375 28	Financials	1.59%	Netherlands
SWEDBANK AB	Financials	1.58%	Sweden
NORDEA BANK ABP	Financials	1.57%	Finland
CARLB 4 10/5/2028	Consumer Staples	1.57%	Denmark

ALDFP 3.875 28	Industrials	1.55%	France
SVENSKA HNDLSBKN	Financials	1.55%	Sweden
SOLBBB 3.875 28	Materials	1.55%	Belgium

### What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

100.00% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.00% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

0.00% of the Fund's NAV was invested in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	33.61
Communication Services	5.81
Consumer Discretionary	9.62
Information Technology	4.40
Industrials	10.45
Consumer Staples	7.28
Energy	4.36
Real Estate	5.62
Health Care	5.65

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	4.36
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>4.36</b>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

7.94% of the Fund's portfolio was aligned with the EU Taxonomy.

#### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The below table shows the share of investments in transitional and enabling activities as the data is representative of the reference period.

	<b>Aligned</b>
<b>Enabling</b>	<b>3.06%</b>
<b>Transition</b>	<b>0.49%</b>

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund did not make any sustainable investments within the meaning of Article 2(17) of Regulation (EU) 2019/2088.

**What was the share of socially sustainable investments?**

N/A

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

The Fund did not make any sustainable investments. The Fund does not currently intend to be EU Taxonomy aligned, 0.00% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information on how the indicators performed during

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

## How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

### ● How does the reference benchmark differ from a broad market index?

The Reference Index differs from a generic broad market index because it seeks to exclude issuers that are involved in controversial and environmentally damaging business activities or very severe ESG controversies. The Reference Index targets bonds which mature in a specific timeframe, and will transition to an index comprising EUR denominated treasury securities as these bonds mature. Government issuers will be assessed on the level of freedom and democracy they exhibit, reducing exposure to those categorised as ‘Not Free’ in the Freedom in the World Report published by Freedom House.

### ● How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund aims to replicate the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue)	136.6	102.1
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index date rebalance	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

### ● How did this financial product perform compared with the reference benchmark?

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

### ● How did this financial product perform compared with the broad market index?

The sustainability indicators for the Fund and broad market index differed as below:

Sustainability Indicator	Fund Indicator Performance	Broad Market benchmark (Parent Index) Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue)	136.6	91.4
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 3.8% exposure to excluded companies at the latest Reference Index rebalance date

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Bulletshares 2029 EUR Corporate Bond UCITS ETF

Legal entity identifier: 254900A9PVU6KR01IH97

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

- It made **sustainable investments with an environmental objective:** \_\_\_\_\_ %
  - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective:** \_\_\_\_\_ %

No

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 5.4 % of sustainable investments
  - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to ensure that the issuers it had exposure to were not involved in controversial and environmentally damaging business activities, or very severe ESG controversies. The Fund achieved this by tracking the Bloomberg 2029 Maturity EUR Corporate Bond Screened Index ("**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund. The environmental and social characteristics were achieved by applying the Index Provider's exclusion criteria to the eligible securities.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

#### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as follows as at 31 December 2024, the data is representative of

the reference period:

Sustainability Indicator	Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Bloomberg Euro Aggregate Corporate Index (a broad market index)	34.4% increase
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

N/A

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

N/A

**How were the indicators for adverse impacts on sustainability factors taken into account?**

N/A

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

N/A

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**How did this financial product consider principal adverse impacts on sustainability factors?**

The methodology of the Reference Index considered principal adverse impacts on sustainability factors by directly excluding a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those that weren't compliant with the UN Global Compact.

The below table shows the PAI scores for the fund, the data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1. GHG Emissions	269.61	74.72	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		64.19	74.72	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		2,637.61	74.72	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		2,971.41	74.72	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	602.09	74.72	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,133.41	98.12	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.87	99.54	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	63.85	74.01	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	23.40	35.29	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.15	1.43	
	Electricity, Gas, Steam & Air Conditioning Supply	0.90	8.20	
	Manufacturing	0.69	31.87	
	Mining & Quarrying	0.73	2.86	
Real Estate Activities	0.38	4.84		
Transportation & Storage	0.12	1.46		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

<b>Biodiversity</b>	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.10	1.67	
	7. Activities negatively affecting biodiversity-sensitive areas	3.34	99.54	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
<b>Water</b>	8. Emissions to water	0.00	1.36	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
<b>Waste</b>	9. Hazardous waste and radioactive waste ratio	1.24	76.89	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
<b>Social and employee matters</b>	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	99.54	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	36.08	99.54	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	0.00	0.00	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	39.88	90.12	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	98.02	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 21st of May 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
T 2.35 47366	Communication Services	2.19%	United States
HOLCIM FINANCE L	Materials	2.13%	Luxembourg
URW SE	Real Estate	2.10%	France
EURONEXT NV	Financials	2.09%	Netherlands
BAXTER INTL	Health Care	2.09%	United States
BLACKSTONE PROP	Financials	2.07%	Luxembourg
WALMART INC	Consumer Staples	1.66%	United States

### What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

99.54% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.46% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

0.00% of the Fund's NAV was invested in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	40.69
Communication Services	8.06
Consumer Discretionary	8.70
Information Technology	2.76
Industrials	6.26
Consumer Staples	7.23
Energy	2.76
Real Estate	4.84
Health Care	6.39
Materials	4.53
Utilities	7.32
Cash	0.46
<b>Total</b>	<b>100.00</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	1.45
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	1.31
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>2.76</b>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which

### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

5.40% of the Fund's portfolio was aligned with the EU Taxonomy.

#### ● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The below table shows the share of investments in transitional and enabling activities as the data is representative of the reference period.

	Aligned
<b>Enabling</b>	<b>2.81%</b>
<b>Transition</b>	<b>0.35%</b>

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund did not make any sustainable investments. The Fund does not currently intend to be EU Taxonomy aligned, 0.00% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

**What was the share of socially sustainable investments?**

N/A

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

0.46% of the Fund's NAV was invested in investments that did not align with the environmental and social characteristics of the Fund. Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information on how the indicators performed during

## How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### ● **How does the reference benchmark differ from a broad market index?**

The Reference Index differs from a generic broad market index because it seeks to exclude issuers that are involved in controversial and environmentally damaging business activities or very severe ESG controversies. The Reference Index targets bonds which mature in a specific timeframe, and will transition to an index comprising EUR denominated treasury securities as these bonds mature. Government issuers will be assessed on the level of freedom and democracy they exhibit, reducing exposure to those categorised as ‘Not Free’ in the Freedom in the World Report published by Freedom House.

### ● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

As the Fund aims to replicate the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue)	122.9	73.2
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index date rebalance	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

### ● **How did this financial product perform compared with the reference benchmark?**

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

### ● **How did this financial product perform compared with the broad market index?**

The sustainability indicators for the Fund and broad market index differed as below:

<b>Sustainability Indicator</b>	<b>Fund Indicator Performance</b>	<b>Broad Market benchmark (Parent Index) Indicator Performance</b>
CO2 emissions intensity (Scope 1+2/Revenue)	122.9	91.4
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 3.8% exposure to excluded companies at the latest Reference Index rebalance date

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Bulletshares 2030 EUR Corporate Bond UCITS ETF Legal entity identifier: 254900KLHK9D0N45HH12

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

- It made **sustainable investments with an environmental objective:** \_\_\_\_\_ %
  - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It made **sustainable investments with a social objective:** \_\_\_\_\_ %

No

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 8.74 % of sustainable investments
  - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to ensure that the issuers it had exposure to were not involved in controversial and environmentally damaging business activities, or very severe ESG controversies. The Fund achieved this by tracking the Bloomberg 2030 Maturity EUR Corporate Bond Screened Index ("**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund. The environmental and social characteristics were achieved by applying the Index Provider's exclusion criteria to the eligible securities.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

#### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as follows as at 31 December 2024, the data is representative of

the reference period:

Sustainability Indicator	Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Bloomberg Euro Aggregate Corporate Index (a broad market index)	20.7% increase
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

● **...and compared to previous periods?**

NA

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

NA

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

NA

**How were the indicators for adverse impacts on sustainability factors taken into account?**

NA

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

NA

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

**How did this financial product consider principal adverse impacts on sustainability factors?**

The methodology of the Reference Index considered principal adverse impacts on sustainability factors by directly excluding a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those that weren't compliant with the UN Global Compact.

The below table shows the PAI scores for the fund, the data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
<b>Greenhouse gas emissions</b>	1.GHG Emissions	323.39	70.53	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		44.58	70.53	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		2,790.84	70.53	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		3,158.81	70.53	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	653.53	70.53	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	1,294.61	97.78	Fund level Total Emission Intensity-Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.80	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	65.56	74.38	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	24.32	40.21	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.15	1.36	
	Electricity, Gas, Steam & Air Conditioning Supply	2.15	8.65	
	Manufacturing	0.51	35.43	
	Mining & Quarrying	1.23	1.93	
	Real Estate Activities	0.45	8.29	
Transportation & Storage	0.27	2.91		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

<b>Biodiversity</b>	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.00	0.00	
	7. Activities negatively affecting biodiversity-sensitive areas	1.93	99.80	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
<b>Water</b>	8. Emissions to water	0.00	0.94	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
<b>Waste</b>	9. Hazardous waste and radioactive waste ratio	0.89	71.39	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
<b>Social and employee matters</b>	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	99.80	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	23.24	98.24	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	9.43	4.04	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	38.67	89.36	Weighted Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	98.98	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 21st of May 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
FRESENIUS SE & C	Health Care	2.38%	Germany
AKZANA 1.625 30	Materials	2.01%	Netherlands
ENIIM 0.625 30	Energy	1.93%	Italy
DAIGR 2.375 30	Consumer Discretionary	1.92%	Germany
PROLOGIS INTL II	Real Estate	1.71%	Luxembourg
REWE INTL	Financials	1.55%	Netherlands

### What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

99.80% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.20% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

0.00% of the Fund's NAV was invested in sustainable investments

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	30.72
Communication Services	8.22
Consumer Discretionary	10.15
Information Technology	1.31
Industrials	7.02
Consumer Staples	7.83
Energy	3.68
Real Estate	9.56
Health Care	8.36
Materials	4.59
Utilities	8.36
Cash	0.20
<b>Total</b>	<b>100.00</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight

10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	1.93
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	1.75
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>3.68</b>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

8.74% of the Fund's portfolio was aligned with the EU Taxonomy.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

Yes

In fossil gas

In nuclear energy

No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

The below table shows the share of investments in transitional and enabling activities as the data is representative of the reference period.

	Aligned
<b>Enabling</b>	<b>2.63%</b>
<b>Transition</b>	<b>0.24%</b>

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

NA

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund did not make any sustainable investments. The Fund does not currently intend to be EU Taxonomy aligned, 0.00% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

**What was the share of socially sustainable investments?**

NA

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

0.20% of the Fund's NAV was invested in investments that did not align with the environmental and social characteristics of the Fund. Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information on how the indicators performed during the reference period.

## How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### ● **How does the reference benchmark differ from a broad market index?**

The Reference Index differs from a generic broad market index because it seeks to exclude issuers that are involved in controversial and environmentally damaging business activities or very severe ESG controversies. The Reference Index targets bonds which mature in a specific timeframe, and will transition to an index comprising EUR denominated treasury securities as these bonds mature. Government issuers will be assessed on the level of freedom and democracy they exhibit, reducing exposure to those categorised as ‘Not Free’ in the Freedom in the World Report published by Freedom House.

### ● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

As the Fund aims to replicate the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue)	110.3	94.9
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index date rebalance	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

### ● **How did this financial product perform compared with the reference benchmark?**

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

### ● **How did this financial product perform compared with the broad market index?**

The sustainability indicators for the Fund and broad market index differed as below:

<b>Sustainability Indicator</b>	<b>Fund Indicator Performance</b>	<b>Broad Market benchmark (Parent Index) Indicator Performance</b>
CO2 emissions intensity (Scope 1+2/Revenue)	110.3	91.4
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 3.8% exposure to excluded companies at the latest Reference Index rebalance date

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Artificial Intelligence Enablers UCITS ETF

Legal entity identifier: 254900XNLTE4334U0N41

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

- It made **sustainable investments with an environmental objective:** \_\_\_\_\_%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It made **sustainable investments with a social objective:** \_\_\_\_\_%

No

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_\_\_% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were investments that respect international norms and standards (i.e. fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption) through the exclusion of companies involved in controversies and those deemed non-compliant with the United Nations Global Compact Principles, and through additional exclusion criteria to also ensure that exposure to environmentally and socially damaging business activities is limited. The Fund achieved this by tracking the S&P Kensho Global Artificial Intelligence Enablers Screened Index (the "**Reference Index**"), which had a methodology that was consistent with attaining the environmental and social characteristics promoted by the Fund. The environmental and social characteristics were achieved by applying the Index Provider's exclusion criteria to the eligible securities.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

#### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as follows as at 31st of December 2024. The data is representative of

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

the reference period.

Sustainability Indicator	Indicator Performance
Percentage of the Fund portfolio invested in companies involved in controversial business activities (as defined by the Index Provider)	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies
Percentage of the Fund portfolio invested in companies involved in controversies (as defined by the Index Provider)	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies
Percentage of the Fund portfolio invested in companies classified as Non-Compliant according to Sustainalytics' Global Standards Screening (GSS) which provides an opinion as to whether a company is violating UN Global Compact (UNGC) Principles and related international norms and standards (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights)	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies
Percentage of the Fund portfolio invested in companies that have an S&P Global ESG Score which falls in the bottom 10% (i.e. the worst performers in terms of ESG score) of the S&P Global BMI Index, which is a broad global equity universe	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies
Percentage of the Fund portfolio invested in companies that were not covered by the ESG data solution used by the Index Provider	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies

● **...and compared to previous periods?**

N/A

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

N/A

**How were the indicators for adverse impacts on sustainability factors taken into account?**

N/A

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

N/A

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

#### **How did this financial product consider principal adverse impacts on sustainability factors?**

The index methodology considered principal adverse impacts on sustainability factors through the exclusion and selection criteria. The methodology of the Reference Index directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons, and those that were deemed non-compliant with the principles of the United Nations Global Compact. The Reference Index also excluded any companies where data wasn't available to make such assessments. The selection of constituents was based on S&P Global ESG Scores. These scores considered greenhouse gas emissions, energy consumption, hazardous waste, board gender diversity, gender pay gap, and if there had been recent controversies in the area of water operations.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

The below table shows the PAI scores for fund, the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
<b>Greenhouse gas emissions</b>	1.GHG Emissions	2.58	99.96	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		6.82	99.96	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		132.45	99.96	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		141.86	99.96	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	59.13	99.96	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	297.63	99.96	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.96	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	52.59	55.62	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	15.66	22.11	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	0.00	0.00	
	Manufacturing	0.07	21.73	
Mining & Quarrying	0.00	0.00		
Real Estate Activities	0.00	0.00		
Transportation & Storage	0.00	0.00		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		
Wholesale & Retail	0.00	0.00		

<b>Biodiversity</b>	Trade & Repair of Motor Vehicles & Motorcycles			
	7. Activities negatively affecting biodiversity-sensitive areas	0.00	99.96	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
<b>Water</b>	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
<b>Waste</b>	9. Hazardous waste and radioactive waste ratio	0.03	99.96	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
<b>Social and employee matters</b>	10. Violations fo UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	99.96	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	66.72	99.96	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	17.70	3.29	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	30.76	94.41	Waited Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap- ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.96	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 29th of October 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
SOUN COM	Information Technology	9.44%	United States

### What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

100.00% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.00% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

0.00% of the Fund's NAV was invested in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

#### ● In which economic sectors were the investments made?

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a

#### To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not make any sustainable investments within the meaning of Article 2(17) of Regulation (EU) 2019/2088.

substantial contribution to an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

● **Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes
- In fossil gas       In nuclear energy
- No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

● **What was the share of investments made in transitional and enabling activities?**

N/A

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

● **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund did not make any sustainable investments. The Fund does not currently intend to be EU Taxonomy aligned, 0.00% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

● **What was the share of socially sustainable investments?**

N/A

● **What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

N/A

● **What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information on how the indicators performed during the reference period.

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

### How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

● **How does the reference benchmark differ from a broad market index?**

The Reference Index differs from a broad market index because it seeks to exclude issuers that are involved in controversial and environmentally damaging business activities, as well as comprising companies that are assessed by the Index Provider to be focused on developing and enabling technology, infrastructure and services propelling the growth and functionality of artificial intelligence.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

As the Fund replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
Percentage of the Fund portfolio invested in companies involved in controversial business activities (as defined by the Index Provider)	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	As at each Reference Index rebalance date, the Reference Index had 0% exposure to such companies
Percentage of the Fund portfolio invested in companies involved in controversies (as defined by the Index Provider)	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	As at each Reference Index rebalance date, the Reference Index had 0% exposure to such companies
Percentage of the Fund portfolio invested in companies classified as Non-Compliant according to Sustainalytics' Global Standards Screening (GSS) which provides an opinion as to whether a company is violating UN Global Compact (UNGC) Principles and related international norms and standards (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights)	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	As at each Reference Index rebalance date, the Reference Index had 0% exposure to such companies
Percentage of the Fund portfolio invested in companies that have an S&P Global ESG Score which falls in the bottom 10% (i.e. the worst performers in terms of ESG score) of the S&P Global BMI Index, which is a broad global equity universe	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	As at each Reference Index rebalance date, the Reference Index had 0% exposure to such companies
Percentage of the Fund portfolio invested in companies that were not covered by the ESG data solution used by the Index Provider	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	As at each Reference Index rebalance date, the Reference Index had 0% exposure to such companies

● **How did this financial product perform compared with the reference benchmark?**

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

● **How did this financial product perform compared with the broad market index?**

The sustainability indicators for the Fund and Parent Index differed as below:

<b>Sustainability Indicator</b>	<b>Fund Indicator Performance</b>	<b>Broad Market benchmark (Parent Index) Indicator Performance</b>
Percentage of the Fund portfolio invested in companies involved in controversial business activities (as defined by the Index Provider)	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	The Broad Market benchmark had 4.7% exposure to excluded companies at the latest Reference Index rebalance date
Percentage of the Fund portfolio invested in companies involved in controversies (as defined by the Index Provider)	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	The Broad Market benchmark had 0.5% exposure to excluded companies at the latest Reference Index rebalance date
Percentage of the Fund portfolio invested in companies classified as Non-Compliant according to Sustainalytics' Global Standards Screening (GSS) which provides an opinion as to whether a company is violating UN Global Compact (UNGC) Principles and related international norms and standards (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights)	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	The Broad Market benchmark had 1.1% exposure to excluded companies at the latest Reference Index rebalance date
Percentage of the Fund portfolio invested in companies that have an S&P Global ESG Score which falls in the bottom 10% (i.e. the worst performers in terms of ESG score) of the S&P Global BMI Index, which is a broad global equity universe	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	The Broad Market benchmark had 15.3% exposure to excluded companies at the latest Reference Index rebalance date
Percentage of the Fund portfolio invested in companies that were not covered by the ESG data solution used by the Index Provider	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	The Broad Market benchmark had 0.6% exposure to excluded companies at the latest Reference Index rebalance date

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Cybersecurity UCITS ETF

Legal entity identifier: 254900U45T90Z324YF96

## Environmental and/or social characteristics

### Did this financial product have a sustainable investment objective?

Yes

- It made **sustainable investments with an environmental objective:** \_\_\_\_\_%
- in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

- It made **sustainable investments with a social objective:** \_\_\_\_\_%

No

- It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of \_\_\_\_\_% of sustainable investments
- with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - with a social objective
- It promoted E/S characteristics, but **did not make any sustainable investments**

**Sustainable investment** means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were investments that respected international norms and standards (i.e. fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption) through the exclusion of companies involved in controversies and those deemed non-compliant with the United Nations Global Compact Principles, and through additional exclusion criteria to also ensure that exposure to environmentally and socially damaging business activities was limited. The Fund achieved this by tracking the S&P Kensho Global Cyber Security Screened Index (the "**Reference Index**"), which had a methodology that was consistent with attaining the environmental and social characteristics promoted by the Fund. The environmental and social characteristics were achieved by applying the Index Provider's exclusion criteria to the eligible securities.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

*Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.*

#### ● How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as follows as at 31st of December 2024. The data is representative of

**Sustainability indicators** measure how the environmental or social characteristics promoted by the financial product are attained.

the reference period.

Sustainability Indicator	Indicator Performance
Percentage of the Fund portfolio invested in companies involved in controversial business activities (as defined by the Index Provider)	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies
Percentage of the Fund portfolio invested in companies involved in controversies (as defined by the Index Provider)	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies
Percentage of the Fund portfolio invested in companies classified as Non-Compliant according to Sustainalytics' Global Standards Screening (GSS) which provides an opinion as to whether a company is violating UN Global Compact (UNGC) Principles and related international norms and standards (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights)	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies
Percentage of the Fund portfolio invested in companies that have an S&P Global ESG Score which falls in the bottom 10% (i.e. the worst performers in terms of ESG score) of the S&P Global BMI Index, which is a broad global equity universe	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies
Percentage of the Fund portfolio invested in companies that were not covered by the ESG data solution used by the Index Provider	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies

● **...and compared to previous periods?**

N/A

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

N/A

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

N/A

**How were the indicators for adverse impacts on sustainability factors taken into account?**

N/A

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

N/A

*The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.*

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

*Any other sustainable investments must also not significantly harm any environmental or social objectives.*

#### **How did this financial product consider principal adverse impacts on sustainability factors?**

The index methodology considered principal adverse impacts on sustainability factors through the exclusion and selection criteria. The methodology of the Reference Index directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons, and those that were deemed non-compliant with the principles of the United Nations Global Compact. The Reference Index also excluded any companies where data wasn't available to make such assessments. The selection of constituents was based on S&P Global ESG Scores. These scores considered greenhouse gas emissions, energy consumption, hazardous waste, board gender diversity, gender pay gap, and if there had been recent controversies in the area of water operations.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

The below table shows the PAI scores for fund, the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1. GHG Emissions	0.81	99.96	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)
		5.61	99.96	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)
		173.82	99.96	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)
		180.23	99.96	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)
	2. Carbon footprint	83.16	99.96	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)
	3. GHG Intensity of investee companies	249.43	99.96	Fund level Total Emission Intensity- Scope 1+2+3 (Per Million EUR Revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.96	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	61.53	36.13	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	0.00	13.24	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, Forestry & Fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, Gas, Steam & Air Conditioning Supply	0.00	0.00	
	Manufacturing	0.03	11.78	
	Mining & Quarrying	0.00	0.00	
Real Estate Activities	0.00	0.00		
Transportation & Storage	0.00	0.00		
Water Supply, Sewerage, Waste Management & Remediation Activities	0.00	0.00		

<b>Biodiversity</b>	Wholesale & Retail Trade & Repair of Motor Vehicles & Motorcycles	0.00	0.00	
	7. Activities negatively affecting biodiversity-sensitive areas	0.00	99.96	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
<b>Water</b>	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
<b>Waste</b>	9. Hazardous waste and radioactive waste ratio	0.01	99.96	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
<b>Social and employee matters</b>	10. Violations fo UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	0.00	99.96	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	89.20	99.96	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises
	12. Unadjusted gender pay gap	37.10	2.88	Weighted Average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	30.63	99.96	Waited Average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.96	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

### What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: From the 29th of October 2024 to 31st of December 2024. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
KINGSOFT CLO-ADR	Information Technology	4.00%	China
BROADCOM INC	Information Technology	3.48%	United States
FORTINET INC	Information Technology	3.14%	United States
CLOUDFLARE INC-A	Information Technology	3.13%	United States
CYBERARK SOFTWARE	Information Technology	3.04%	Israel
DDOG US COM	Information Technology	2.99%	United States
ZIFF DAVIS INC	Communication Services	2.92%	United States
CHECK POINT SOFT	Information Technology	2.89%	Israel
CRWD US COM	Information Technology	2.88%	United States
F5 INC	Information Technology	2.81%	United States
OKTA INC	Information Technology	2.77%	United States
KD US COM	Information Technology	2.77%	United States
TREND MICRO INC	Information Technology	2.76%	Japan
CISCO SYSTEMS	Information Technology	2.75%	United States
RAPID7 INC	Information Technology	2.60%	United States

### What was the proportion of sustainability-related investments?

See below field

**Asset allocation** describes the share of investments in specific assets.

#### ● What was the asset allocation?

100.00% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.00% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

0.00% of the Fund's NAV was invested in sustainable investments.

**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

**#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● **In which economic sectors were the investments made?**

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	0.00
Communication Services	6.27
Consumer Discretionary	0.00
Information Technology	90.63
Industrials	3.06
Consumer Staples	0.00
Energy	0.00
Real Estate	0.00
Health Care	0.00
Materials	0.00
Utilities	0.00
Unclassified	0.04
<b>Total</b>	<b>100.00</b>

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	0.00
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
<b>Total</b>		<b>0.00</b>

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

**Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.

**Transitional activities** are activities for which

**To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?**

The Fund did not make any sustainable investments within the meaning of Article 2(17) of Regulation (EU) 2019/2088.

**Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy<sup>1</sup>?**

- Yes
  - In fossil gas
  - In nuclear energy
- No

<sup>1</sup> Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure (CapEx)** shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure (OpEx)** reflects the green operational activities of investee companies.

● **What was the share of investments made in transitional and enabling activities?**

N/A

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

N/A

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

**What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The Fund did not make any sustainable investments. The Fund does not currently intend to be EU Taxonomy aligned, 0.00% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

**What was the share of socially sustainable investments?**

N/A

**What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?**

N/A

**What actions have been taken to meet the environmental and/or social characteristics during the reference period?**

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

**How did this financial product perform compared to the reference benchmark?**

**Reference benchmarks** are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

See tables completed in below sections.

● **How does the reference benchmark differ from a broad market index?**

The Reference Index differs from a broad market index because it seeks to exclude issuers that are involved in controversial and environmentally damaging business activities, as well as comprising only companies that are assessed by the Index Provider to be focused on protecting enterprises and devices from unauthorised access via electronic means.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

As the Fund replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

<b>Sustainability Indicator</b>	<b>Fund Indicator Performance</b>	<b>Reference Index Indicator Performance</b>
Percentage of the Fund portfolio invested in companies involved in controversial business activities (as defined by the Index Provider)	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	As at each Reference Index rebalance date, the Reference Index had 0% exposure to such companies
Percentage of the Fund portfolio invested in companies involved in controversies (as defined by the Index Provider)	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	As at each Reference Index rebalance date, the Reference Index had 0% exposure to such companies
Percentage of the Fund portfolio invested in companies classified as Non-Compliant according to Sustainalytics' Global Standards Screening (GSS) which provides an opinion as to whether a company is violating UN Global Compact (UNGC) Principles and related international norms and standards (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights)	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	As at each Reference Index rebalance date, the Reference Index had 0% exposure to such companies
Percentage of the Fund portfolio invested in companies that have an S&P Global ESG Score which falls in the bottom 10% (i.e. the worst performers in terms of ESG score) of the S&P Global BMI Index, which is a broad global equity universe	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	As at each Reference Index rebalance date, the Reference Index had 0% exposure to such companies
Percentage of the Fund portfolio invested in companies that were not covered by the ESG data solution used by the Index Provider	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	As at each Reference Index rebalance date, the Reference Index had 0% exposure to such companies

● **How did this financial product perform compared with the reference benchmark?**

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

● **How did this financial product perform compared with the broad market index?**

The sustainability indicators for the Fund and Parent Index differed as below:

<b>Sustainability Indicator</b>	<b>Fund Indicator Performance</b>	<b>Broad Market benchmark (Parent Index) Indicator Performance</b>
Percentage of the Fund portfolio invested in companies involved in controversial business activities (as defined by the Index Provider)	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	The Broad Market benchmark had 4.7% exposure to excluded companies at the latest Reference Index rebalance date
Percentage of the Fund portfolio invested in companies involved in controversies (as defined by the Index Provider)	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	The Broad Market benchmark had 0.5% exposure to excluded companies at the latest Reference Index rebalance date
Percentage of the Fund portfolio invested in companies classified as Non-Compliant according to Sustainalytics' Global Standards Screening (GSS) which provides an opinion as to whether a company is violating UN Global Compact (UNGC) Principles and related international norms and standards (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights)	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	The Broad Market benchmark had 1.1% exposure to excluded companies at the latest Reference Index rebalance date
Percentage of the Fund portfolio invested in companies that have an S&P Global ESG Score which falls in the bottom 10% (i.e. the worst performers in terms of ESG score) of the S&P Global BMI Index, which is a broad global equity universe	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	The Broad Market benchmark had 15.3% exposure to excluded companies at the latest Reference Index rebalance date
Percentage of the Fund portfolio invested in companies that were not covered by the ESG data solution used by the Index Provider	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	The Broad Market benchmark had 0.6% exposure to excluded companies at the latest Reference Index rebalance date
