What is this product?

Type

The product is a share class of the sub-fund PEGASO CAPITAL SICAV – Strategic Bond which is part of PEGASO CAPITAL SICAV (the "Umbrella Fund"), an open-ended investment company with variable capital (Société d'Investissement à Capital Variable - SICAV) of the umbrella type governed by Part I of the Luxembourg law of December 17, 2010, as amended (2010 Law), and thus qualifies as a UCITS. The assets and liabilities of each sub-fund are legally segregated.

Term

The fund has no maturity date. Notwithstanding this provision, the fund may be dissolved at any time by the Management Company.

Objectives

Investment objective

The objective of the investment policy of PEGASO CAPITAL SICAV – Strategic Bond ("sub-fund" or "financial product") is to achieve medium-term capital growth through a flexible fixed income asset allocation based on the trends and opportunities offered by the financial markets. The sub-fund is actively managed. The composition of the portfolio is determined by the fund manager solely in accordance with the criteria laid down in the investment objectives / the investment policy, is regularly reviewed and, if necessary, adjusted. The sub-fund is not managed using an index as a benchmark.

Investment policy

In principle, the sub-fund may invest in bonds, money market instruments, certificates, other structured products (e.g. reverse convertible bonds, warrant-linked bonds, convertible bonds), target funds, shares and fixed-term deposits and overnight deposits, depending on the market situation and the assessment of the fund management. Such certificates may be based on legally permissible underlying assets such as, for example, shares, bonds, units in investment funds, financial indices and foreign exchange. Emerging market corporate and government bonds will not exceed 40% of the portfolio. At the time of purchase, investments in bonds rated below investment grade will not exceed 50% of the sub-fund's net asset value. A maximum of 15% can be invested in unrated bonds. Non-performing and defaulted bonds (from CCC+ or equivalent to D or

equivalent) are permitted up to a limit of 5% in total. A maximum of 15% of the sub-fund may be invested in convertible bonds. The portfolio may also invest in shares resulting from the conversion of bonds held in the portfolio provided that the total amount does not exceed 10% of the net asset value of the portfolio. The sub-fund's investment universe may also include structured bonds up to a maximum of 10%. Contingent convertible bonds will not exceed 25% of the sub-fund's net asset value. Target funds may be acquired to more than 10% of the sub-fund's assets, making the sub-fund ineligible as a target fund. The sub-fund may use derived financial instruments ("derivatives") in order to achieve the aforementioned investment objectives as well as for investment and hedging purposes.

The share class is hedged against currency fluctuations resulting from the fund currency. Hedging is associated with inefficiencies. It can therefore not be guaranteed that all currency fluctuations are completely reduced by the hedging.

Dividend policy

The income remains in the fund.

Subscription and redemption

In principle, investors may redeem their shares on any banking day in Luxembourg, with the exception of 24 and 31 December. The redemption of shares may be suspended in extraordinary circumstances if this is deemed necessary in the interests of investors.

Intended retail investor

The fund is aimed at all types of investors who pursue the goal of asset accumulation or asset optimisation and wish to invest in the medium to long term. They should be able to bear losses up to the amount of the capital invested.

Depository

The fund's depository is DZ PRIVATBANK S.A., société anonyme, whose registered office is at 4, rue Thomas Edison, L-1445 Strassen, Luxembourg.

What are the risks and what could I get in return?

Risk indicator

The risk indicator is based on the assumption that you will hold the product for 3 years.

If you cash in the investment early, the actual risk may differ significantly and you may get back less.

The overall risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact our capacity to pay you.

Please note the currency risk. You will receive payments in another currency and your final return will therefore depend on the exchange rate between the two currencies. This risk is not taken into account in the indicator specified above.

This product does not include protection against future market developments, so you could lose all or part of the capital invested.

Performance Scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.
