What is this product?

Type

This is an open ended UCITS fund.

Term

There is no maturity date of the fund.

Investment objective

The fund aims to provide capital growth and income over a three to five year period after fees have been deducted by investing in a diversified range of assets and markets worldwide.

The fund is actively managed and invests at least two-thirds of its assets directly or indirectly through derivatives in equities, bonds and alternative asset classes.

Bonds include government bonds, corporate bonds, emerging market debt, sub-investment grade bonds (being bonds with a credit rating below investment grade as measured by Standard & Poor's or any equivalent grade of other credit rating agencies), convertible bonds and inflation linked bonds.

The fund may invest indirectly in alternative asset classes such as commodities or real estate through derivatives, investment funds or structured securities.

The fund may (exceptionally) hold up to 100% of its assets in cash and money market investments. The fund may invest up to 10% of its assets in open-ended investment funds.

The fund may use derivatives, long and short, with the aim of achieving investment gains, reducing risk, mitigating losses in falling markets or managing the fund more efficiently.

The fund is valued with reference to the net asset value of the underlying assets.

Benchmark: The fund does not have a target benchmark. The fund's performance should be compared against the Morningstar EUR Cautious Allocation – Global Category median. The comparator benchmark is only included for performance comparison purposes and does not determine how the investment manager invests the fund's assets. The comparator benchmark has been selected because the investment manager believes that the benchmark is a suitable comparison for performance purposes given the fund's investment objective and policy.

The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the fund.

Dealing Frequency: You may redeem your investment upon demand. This fund deals daily.

Distribution Policy: This share class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the share class.

Depositary: J.P. Morgan SE

Intended retail investor

The fund is intended for retail investors (i) with basic investment knowledge; (ii) who understand the basics of buying and selling shares in stock market listed companies and the way these shares are valued; (iii) who can accept large short-term losses; and (iv) wanting growth over [the longer term] but with easy access to their cash. This investment should form part of a varied investment portfolio. This product is suitable for general sale to retail and professional investors through all distribution channels with or without professional advice.

What are the risks and what could I get in return?

The risk indicator assumes you keep the product for 3 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and suitable benchmark over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions.

Recommended holding period:		3 years	
Example Investment:		CZK 100000	
		If you exit after 1 year	If you exit after 3 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	CZK 62830	CZK 67000
	Average return each year	-37.2%	-12.5%
Unfavourable	What you might get back after costs	CZK 85630	CZK 88240
	Average return each year	-14.4%	-4.1%

Favourable	What you might get back after costs	CZK 118190	CZK 120930
	Average return each year	18.2%	6.5%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

The maximum loss you could incur would be the full value of your investment

We have classified this product as 3 out of 7, which is a medium-low risk class.

The fund is in this category because it seeks to provide rewards whilst limiting price volatility.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

Credit risk: A decline in the financial health of an issuer could cause the value of its bonds to fall or become worthless.

You can find more information about the other risks in the prospectus at: <https://api.schroders.com/document-store/SISF-Prospectus-LUEN.pdf>

The Unfavourable scenario occurred for an investment between 03 2017 to 03 2020

The Moderate scenario occurred for an investment between 06 2016 to 06 2019

The Favourable scenario occurred for an investment between 03 2020 to 03 2023

What happens if Schroder Investment Management (Europe) S.A. is unable to pay out?

For your protection the company's assets are held with a separate company, a depositary, so the fund's ability to pay out would not be affected by the insolvency of Schroder Investment Management (Europe) S.A.. If the fund is terminated or wound up, the assets will be liquidated and you will receive an appropriate share of any proceeds but you may lose part or all of your investment. You are not covered by the Luxembourg compensation scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario

- CZK 100 000,00 is invested

	If you exit after 1 year	If you exit after 3 years
Total costs	CZK 5919	CZK 9867
Annual cost impact (*)	5.9%	3.3% each year

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2,8 % before costs and -0,4 % after costs.
