## Application for shares

All applications should be made directly to the Manager or via the German information and distribution agent of the Company, the Austrian paying agent of the Company, or via the Swiss representative of the Company. Shares will be purchased on the relevant Dealing Day and a contract note will be sent to the purchaser. Prospective shareholders should note that the price of shares may go down as well as up.

## Redemption of shares

Requests for redemption of shares and requests for the switch of shares can be submitted via the German paying agent of the Company, the Austrian paying agent of the Company, the Swiss representative of the Company or directly to the Manager. This should be done in writing by post, by facsimile, by email or by telephone.

## Availability of Prices

Prices are available from GAM Fund Management Limited, on [www.gam.com](http://www.gam.com).

## Reports

Annual and half-yearly reports are made available to all shareholders.

This half-yearly report in accordance with the UCITS Regulations is unaudited. We note that the statutory auditor's report in the audited year end financial statements as at 30 June 2022 was unqualified.

## Purchases and Sales

Please contact the Manager, the Swiss representative or other local GAM Contacts to obtain a complete list of all purchases and sales for any Fund free of charge.

## Prospectus

Further details concerning the Funds are contained in the Prospectus and Prospectus Addendum, the PRIIPS Key Investor Information Documents of the Company and the Articles of Incorporation. Copies of these, as well as copies of the annual and semi-annual reports, are available on application to the Manager, to the UK facilities agent, the German and Austrian information agent as well as to the Swiss representative free of charge.

## Place of performance and forum in Switzerland

In the case of shares which are distributed in Switzerland or from Switzerland, the place of performance and the forum are at the domicile of the Swiss representative of the Fund in Zürich.

## Reporting Fund Status (relevant to UK Shareholders only)

It is the policy of the Company to apply to HM Revenue and Customs ("HMRC") for certification of all Share classes (with the exception of GAM Star Alpha Spectrum and the non UK RFS Classes of the relevant Funds) as reporting funds as defined in the Offshore Funds (Tax) Regulations 2009.

## Investment Objectives

The investment objectives of each Fund are set out below.

### GAM Star Absolute Return Macro

(Terminated on 17 July 2019)

The investment objective of the Fund was to seek to achieve consistent positive returns over the long term while observing the principle of risk diversification. The Fund aimed to achieve this by blending discretionary and model driven investment strategies which may generate exposure (either directly or indirectly through the use of financial derivative instruments) principally to fund income instruments and currencies.

### GAM Star Alpha Spectrum

The investment objective of the Fund is to seek to achieve an attractive return on capital while simultaneously attempting to limit the risk of capital loss. The Fund aims to achieve this investment objective by gaining exposure to equity, equity hedge, fixed income and trading strategies. Such exposure may be achieved principally through financial derivative instruments and/or investment in open-ended collective investment schemes deploying equity long only, equity hedge, fixed income and trading strategies.

### GAM Star Alpha Technology

The investment objective of the Fund is to achieve long term capital appreciation. The Fund seeks to achieve this objective by taking long and short positions primarily in equities or equity related derivative contracts of technology related companies. Such companies will be listed on or dealt in Recognised Markets globally (including in Emerging Markets as described in the Prospectus) and up to 10% of its Net Asset Value ("NAV") may be invested in unlisted equities of such companies.

### GAM Star Asian Equity

The investment objective of the Fund is to achieve capital appreciation through investment primarily in quoted securities which are issued by public companies with principal offices or significant business activities in the Asian region, excluding Japan.

### GAM Star Global Balanced

The investment objective of the Fund is to seek to achieve an attractive return on capital while simultaneously attempting to limit the risk of capital loss. This investment objective may be achieved primarily through investment in open-ended collective investment schemes which gain exposure to equities, fixed income securities, property, commodities and currencies as set out in the Prospectus. The Fund will not invest directly in property or commodities and such indirect exposure shall be generated as described in the Prospectus.

### GAM Star Capital Appreciation US Equity

The investment objective of the Fund is to achieve long-term capital appreciation. It will be the policy of the Fund to invest primarily in equities and other equity related securities (including preferred shares, convertible bonds, American Depositary Receipts and exchange traded funds) which are issued by companies with principal offices in the United States of America, which exercise their primary economic activity in the United States of America, or which are listed on or dealt in a Recognised Market in the United States of America.

### GAM Star Cat Bond

The investment objective of the Fund is to seek to generate returns through selective investment in a global portfolio of catastrophe bonds ("Cat Bonds"). Cat Bonds are debt securities that transfer the risk of catastrophic events from insurance companies, reinsurance companies, corporations, governments, etc. to the capital markets.

### GAM Star Global Cautious

The investment objective of the Fund is to seek to achieve long term capital growth with lower volatility than a fund which invests solely in equities. The Fund aims to achieve this investment objective primarily through investment in open-ended collective investment schemes which provide exposure to equities, fixed income securities, property, commodities and currencies as set out in the Prospectus.

### GAM Star China A Equity

(Approved on 12 December 2014. Not yet launched)

The investment objective of the Fund is to achieve capital appreciation. GAM International Management Limited and GAM Hong Kong Limited, which have been appointed as Co-Investment Managers to the Fund, intend to achieve this investment objective through investment primarily in China A shares listed on or dealt in the Shanghai Stock Exchange ("SSE") or the Shenzhen Stock Exchange ("SZSE") ("China A Shares").

### GAM Star China Equity

The investment objective of the Fund is to achieve capital appreciation through investment primarily in quoted equity securities listed on or dealt in any Recognised Market and which are issued by companies with principal offices or significant business activities in the People's Republic of China and Hong Kong.

### GAM Star Composite Global Equity

The investment objective of the Fund is to achieve long term capital appreciation with the aim of generating a capital return in excess of global equity markets over the medium to long term. The Fund intends to pursue its investment objective by gaining exposure principally to equity and equity related strategies. Such exposure may be achieved principally through financial derivative instruments and/or investment in open ended collective investment schemes deploying equity long only and equity hedge strategies. The Fund may also invest in exchange traded funds which are listed or traded on Recognised Markets worldwide in order to gain exposure to such strategies. The Fund may also invest in unlisted collective investment schemes in accordance with the provisions of the UCITS Regulations.

### GAM Star Continental European Equity

The investment objective of the Fund is to achieve long-term capital appreciation through investing primarily in quoted equity and equity related securities (including but not limited to warrants), listed on or dealt in Recognised Markets within the EU which are issued by companies with principal offices in Europe other than the United Kingdom.

### GAM Star Credit Opportunities (EUR)

The investment objective of the Fund is to achieve long-term capital gain in Euro. It will be the policy of the Fund to seek to achieve its investment objective through investment principally in income bearing or accruing securities with fixed principal amounts including government bonds, corporate bonds, junior debt securities, preferred shares, convertible securities and contingent capital notes.

## **GAM Star Credit Opportunities (GBP)**

The investment objective of the Fund is to achieve long-term capital gain in Sterling. It will be the policy of the Fund to seek to achieve its investment objective through investment principally in income bearing or accruing securities with fixed principal amounts including government bonds, corporate bonds, junior debt securities, preferred shares, convertible securities and contingent capital notes.

## **GAM Star Credit Opportunities (USD)**

The investment objective of the Fund is to achieve long-term capital gain in US dollars. It will be the policy of the Fund to seek to achieve its investment objective through investment principally in income bearing or accruing securities with fixed principal amounts including government bonds, corporate bonds, junior debt securities, preferred shares, convertible securities and contingent capital notes.

## **GAM Star Global Defensive**

The investment objective of the Fund is to seek to achieve long term capital growth. The Fund aims to achieve this investment objective primarily through investment in open-ended collective investment schemes which provide exposure to equities, fixed income securities, property, commodities and currencies as set out in the Prospectus.

## **GAM Star Global Dynamic Growth**

The investment objective of the Fund is to seek to achieve long term capital growth. The Fund aims to achieve this investment objective primarily through investment in open-ended collective investment schemes which provide exposure to equities, fixed income securities, property, commodities and currencies as set out in the terms of the Prospectus. The Fund will not invest directly in property or commodities and such indirect exposure shall be generated as described in the terms of the Prospectus.

## **GAM Sustainable Emerging Equity**

The investment objective of the Fund is to achieve long term capital appreciation. The Fund seeks to achieve this objective through investing primarily in equity and equity related securities (such as warrants and rights issues) of companies listed on or dealt in Recognised Markets in Emerging Markets or which are listed on or dealt in Recognised Markets outside of the Emerging Markets but which generate the bulk of their earnings in Emerging Markets.

## **GAM Star Emerging Market Rates**

The investment objective of the Fund is to achieve absolute return regardless of market conditions through investment in a portfolio of local and hard currency bonds and other fixed income securities from emerging markets worldwide.

## **GAM Star European Equity**

The investment objective of the Fund is to achieve long-term capital appreciation through investing primarily in quoted equity securities issued by companies with principal offices in Europe, including Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Russia, Spain, Sweden, Switzerland, Turkey and the United Kingdom. It will be the policy of the Fund to invest primarily in equities.

## **GAM Star Flexible Global Portfolio**

The investment objective of the Fund is to achieve capital appreciation by gaining exposure to one or more of the following asset classes: financial indices, open-ended collective investment schemes, exchange traded funds, exchange traded commodities, property, fixed income securities, equities, equity related securities, derivative instruments, cash, cash equivalents, money market instruments and closed-ended funds. Allocations will be made at the Co-Investment Manager's discretion, both within each asset class and among the asset classes. The Fund need not be invested in any or all of the asset classes at any one time.

## **GAM Star GAMCO US Equity**

(Merged into GAM Star Capital Appreciation US Equity on 12 December 2018)

The investment objective of the Fund was to achieve long-term capital appreciation. It was the policy of the Fund to invest primarily in a diversified portfolio of equities (i) issued by companies with principal offices in the United States of America and/or (ii) which were listed on Recognised Markets in the United States of America. Whilst the Fund primarily invested in the equities described above, it could also invest in other equities listed on Recognised Markets worldwide.

## **GAM Star Global Rates**

The investment objective of the Fund is to achieve absolute returns. The Fund employs a process of economic analysis to identify fundamental trends within both the fixed income and global currency markets. There are both medium term and short term based themes involved in the Fund's strategy.

## **GAM Star Global Selector**

(Merged into GAM Star Worldwide Equity on 22 January 2020)

The investment objective of the Fund was to achieve long term capital appreciation by investing primarily in a focused, concentrated portfolio of worldwide quoted equity and equity related securities (including, but not limited to warrants), listed on or dealt in Recognised Markets on a worldwide basis.

## **GAM Star Global Growth**

The investment objective of the Fund is to seek to achieve long term capital growth. The Fund aims to achieve this investment objective primarily through investment in open-ended collective investment schemes which provide exposure to equities, fixed income securities, property, commodities and currencies as set out in the Prospectus. The Fund will not invest directly in property or commodities and such indirect exposure shall be generated as described in the terms of the Prospectus.

## **GAM Star Interest Trend**

The investment objective of the Fund is to achieve long-term capital appreciation in US dollars. The Fund aims to achieve its investment objective through investment principally in income bearing securities which are expected to generate fixed income payments and also selectively make capital gains from trends in interest rates. Such instruments include government bonds, corporate bonds, junior debt securities, preferred shares, convertible securities and contingent convertible notes.

## **GAM Star Japan Leaders**

The investment objective of the Fund is to achieve long-term capital appreciation through investing primarily in quoted equity securities in Japan issued by companies with principal office in Japan. It will be the policy of the Fund to invest primarily in equities.

### **GAM Star MBS Total Return**

The Fund's primary investment objective is to seek to generate returns through selective investment in a diversified portfolio of mortgage-backed debt securities ("MBS") and asset-backed debt securities ("ABS"). The Fund may also invest to a lesser extent in debt securities (such as bonds and notes) issued by corporations and governments. Such debt securities may pay fixed, floating and inverse floating rates of interest and may include zero coupon obligations.

### **GAM Systematic Alternative Risk Premia**

The investment objective of the Fund is to provide consistent above-average, risk-adjusted returns on capital with a low long term correlation with traditional asset classes such as equities and bonds. The investment objective is achieved by the Co-Investment Manager by gaining exposure directly or indirectly using financial derivatives instruments to the following four asset classes i.e. equities (which will be listed or traded worldwide), fixed income (i.e. fixed income securities), Currencies and Commodities.

### **GAM Systematic Core Macro**

(Terminated on 12 May 2021)

The investment objective of the Fund was to achieve long term capital growth through the generation of absolute returns by the use of proprietary advanced modeling techniques which were used to identify appropriate investments for the Fund across all relevant asset classes.

### **GAM Star Tactical Opportunities**

The investment objective of the Fund is to seek to achieve capital appreciation via unconstrained tactical asset allocation. The Fund aims to achieve this investment objective by gaining exposure either directly or indirectly through the use of derivatives to a range of asset classes including equities, fixed income securities, currencies, commodities and property as described in the Prospectus. The Fund will not invest directly in property or commodities.

### **GAM Star Disruptive Growth**

The investment objective of the Fund is to achieve long-term capital appreciation. It will be the policy of the Fund to invest primarily in a globally diversified portfolio of technology related companies. The Fund seeks to achieve this objective through investing primarily in equity and equity related securities (such as warrants and rights issues) of companies listed on or dealt in Recognised Markets worldwide, and up to 10% of its net assets in unlisted equities, in each case which demonstrate long term growth opportunities within the broader technology sector or whose business models are driven by new technologies. The Fund may also seek to gain exposure to such companies through the use of financial derivative instruments described in the Prospectus.

### **GAM Star UK Equity Income**

(Approved 21 December 2018. Not yet launched)

The objective of the Fund is to generate income and capital appreciation through investments primarily in UK equities. The Fund will invest at least two thirds of its assets in UK ordinary Shares and preference Shares without restrictions either by company, size or industry.

### **GAM Star US All Cap Equity**

The investment objective of the Fund is to achieve long-term capital appreciation through investing primarily in quoted securities in the United States of America issued by companies with principal offices in the United States of America. The Fund will invest in a broad spread of equities, and may invest in fixed income securities and preferred stock listed on or dealt in a Recognised Market in the United States of America. It will be the policy of the Fund to invest primarily in equities.

### **GAM Star Worldwide Equity**

The investment objective of the Fund is to provide capital appreciation primarily through investment in quoted securities on a worldwide basis. It will be the normal policy of the Fund to invest primarily in equities.

### **GAM Systematic Dynamic Credit**

(Terminated on 23 April 2021)

The investment objective of the Fund was to seek to achieve long-term capital growth through the generation of absolute returns from credit, interest rate and fixed income markets. The Fund aimed to achieve this investment objective through the use of proprietary advanced modelling techniques which were used to identify appropriate investments for the Fund across all relevant asset classes.

### **GAM Systematic Dynamic Multi Asset**

(Approved on 27 August 2020. Not yet launched)

The investment objective of the Fund is to achieve long-term capital growth by allocating across the following assets classes available across financial markets; equities, sovereign and corporate debt, commodities and currencies (predominantly G10, emerging market and other liquid currencies including Hungarian Forint, Singapore Dollar, Israeli Shekel and Turkish Lira), based upon a systematic, proprietary algorithm as further detailed below under "Investment Approach". With the exception of permitted investments in unlisted securities, such equities and sovereign and corporate debt (such as Government bonds and fixed income securities) will be listed or dealt on Recognised Markets worldwide.

### **GAM Sustainable Climate Bond**

The investment objective of the Fund is to achieve long-term income and capital gain in Euro, by investing in "Impact Bonds" with a positive environmental or social impact. Impact Bonds are bonds which have a specific environmental, social and governance ("ESG") purpose. The Fund will seek to achieve its investment objective through investment principally in such Impact Bonds issued by companies in the financial sector which aim to generate social and/or environmental impact alongside a financial return. The Fund may invest in income bearing or accruing securities with fixed principal amounts including government bonds, corporate bonds, junior debt securities, preferred Shares, convertible securities and contingent capital notes, provided such fulfil the definition of an Impact Bond.

## **General**

In addition, please note the following in relation to the investment objectives and policies of the Funds:

(i) any Fund, the name of which contains a reference to a specific type of security, country or region will invest at least two thirds of its non-liquid assets in that specific type of security, country or region;

(ii) any Fund, the name of which contains a specific reference to a specific currency, will invest at least two thirds of its non-liquid assets in securities denominated in that specific currency;

(iii) where the investment policy of a Fund states that investments are made "primarily" in a specific type of security, country or region, that Fund will invest either directly or indirectly (through the use of financial derivative instruments) at least two thirds of its non-liquid assets in that specific type of security, country or region;

(iv) where the investment policy of a Fund refers to investments in companies of a specific country or region, this means (in the absence of any other definition) that these companies will have their registered office in the specific country or region stated, notwithstanding their being listed on any stock exchange mentioned in the investment policy of the Fund.

The Company is an umbrella fund with segregated liability between Funds. Accordingly any liability incurred on behalf of or attributable to any Fund of the Company shall be discharged solely out of the assets of that Fund, and neither the Company nor any director, receiver, examiner, liquidator, provisional liquidator or other person shall apply, nor be obliged to apply, the assets of any such Fund in satisfaction of any liability incurred on behalf of or attributable to any other Fund of the Company, irrespective of when such liability was incurred.

### 2. Accounting policies

The significant accounting policies and estimations techniques adopted by the Company are as follows:

These policies have been consistently applied to all periods presented unless otherwise stated.

#### (a) Basis of preparation

This unaudited half-yearly report has been prepared in accordance with the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended the UCITS Regulations) and under the Central Bank (Supervision & Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the Central Bank UCITS Regulations).

#### (b) Investments at fair value

##### Classification

This category has two sub-categories: financial assets and liabilities held for trading, and those designated at fair value through profit or loss at inception. Financial assets or liabilities held for trading are acquired or incurred principally for the purpose of selling or repurchasing in the short term. Derivatives are also categorised as held for trading, as the Company does not designate any derivatives as hedges in a hedging relationship.

##### Recognition/Derecognition

Purchases and sales are recognised on trade date – the date on which the Company commits to purchase or sell the asset. Investments are derecognised when the rights to receive cash flows from the investments have expired or the Company has transferred substantially all risks and rewards of ownership.

##### Measurement

Financial assets and liabilities are initially recognised at fair value, and transaction costs for all financial assets/liabilities carried at fair value through profit or loss are expensed as incurred. Subsequent to initial recognition, all financial assets and liabilities at fair value through profit or loss are measured at fair value.

##### Fair value estimation

The fair value of financial instruments traded in active markets (such as publicly traded derivatives and trading securities) is based on quoted market prices at the balance sheet date. The quoted market price used for financial assets and liabilities held by the Company is the last traded price. GAM Star Cat Bond fund positions are fair valued using average of multiple broker quotes or single broker quotes.

In the case of any security not listed, quoted or dealt with on a regulated market or for which no quotation or value is readily available which would provide a fair valuation, or in respect of which the price is unrepresentative, the fair value of such security is determined by the Directors or other competent person appointed by the Directors and approved for the purpose by the Depositary, using the market approach which consists of estimating the fair value of these securities using a comparable multiple of revenue for similar guideline public companies.

Shares or units in any collective investment scheme which provides for those shares or units to be redeemed at the option of their holder out of the assets of the undertaking shall be valued at the last published unaudited NAV per share.

### 2. Accounting policies, continued

#### (b) Investments at fair value, continued

##### Fair value estimation, continued

The Company may from time to time invest in financial instruments that are not traded in an active market (for example in over the counter derivatives). The fair value is determined by using valuation techniques. The Company uses a variety of methods and makes assumptions that are based on market conditions existing at each balance sheet date. Valuation techniques used include the use of comparable recent arm's length transactions, discounted cash flow analysis, option pricing models and other valuation techniques commonly used by market participants. Any such securities are disclosed in the portfolio statements.

##### Critical accounting estimates and assumptions

Management makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition seldom equal the actual related results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the financial period are Debt securities as noted below and Level 3 positions as disclosed in note 3 Fair value hierarchy.

##### Debt securities

Debt securities are valued on the basis of dealer supplied quotations or by using a pricing service selected by the Manager. The fair value of the instrument is estimated using valuation techniques if a quoted market price is not available from a broker/dealer or a third party pricing service. Valuation methods include the use of recent unaffiliated market transactions, reference to the current fair value of another instrument that is substantially the same, discounted cash flow techniques or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions.

##### Financial derivatives

Funds may hold derivatives for investment purposes and/or efficient portfolio management purposes as described in the relevant Supplement to the Prospectus.

#### (i) Forward foreign currency exchange contract

When entering into a forward foreign currency exchange contract, the Funds agree to receive or deliver a fixed quantity of foreign currency for an agreed price upon an agreed future date. These contracts are valued daily at the forward rate and the Fund's equity therein, representing unrealised gains or losses on the contracts, is included in the Balance Sheet. The unrealised gain/(loss) on open forward exchange contracts is calculated by reference to the difference between the contracted rate and the rate to close out the contract.

#### (ii) Futures contract

A futures contract obligates one party to sell and the other party to purchase a specific instrument for an agreed price on an agreed future date. Initial margin deposits made with respect to futures contracts are recognised as assets due from the Fund's broker agent in acquiring the futures position. Subsequent changes in the daily valuation of open contracts are recognised as changes in unrealised gains and losses. Variation margin payments are made or received on traded futures as appreciation or depreciation occurs. Futures contracts are valued using quoted daily settlement prices established by the exchange on which they trade. Realised gains or losses are recorded when a contract is closed. Futures contracts are included in Financial assets at fair value when the fair value is positive, and in Financial liabilities when the fair value is negative in the Balance Sheet.

#### (iii) Credit default swaps

In a credit default swap contract, one party makes payments to another party in exchange for the right to receive a specified return (or to put a security) if a credit event (e.g., default or similar event) occurs with respect to a reference entity or entities. A seller of credit default protection receives periodic payments in return for its obligation to pay the principal amount of a debt security (or other agreed-upon value) to the other party upon the occurrence of a credit event. If no credit event occurs, the seller has no payment obligations so long as there is no early termination. Credit default swap agreements are fair valued on the valuation date using either market vendors or central counterparty clearing house prices. Credit default swaps are included in Financial assets at fair value when the fair value is positive, and in Financial liabilities when the fair value is negative in the Balance Sheet.

Some of the credit default swap contracts are centrally cleared positions. Centrally cleared credit default contracts provide the same rights to the protection buyer and seller except the payments between parties, including upfront premiums, are settled through a central clearing agent through variation margin payments. An upfront payment made by a Fund is recorded as an asset on the Funds' books. Upfront and periodic payments received or paid by the Funds for centrally cleared credit default swap contracts are recorded as realised gains or losses at the reset date or close of the contract. Upon the occurrence of a credit event, the difference between the par value and market value of the reference obligation, net of any proportional amount of the upfront payment, is recorded as a realised gain or loss.

## Notes to the Unaudited Half-Yearly Report

### 2. Accounting policies, continued

#### (b) Investments at fair value, continued

##### Financial derivatives, continued

##### (iv) Contracts for difference

Contracts for difference are Over the Counter ("OTC") derivatives which take advantage of the economic benefits which are not afforded through investing directly in certain securities markets. Funds may purchase equity contracts for difference as a means of gaining exposure to the economic performance and cash flows of an equity security without the need for taking or making physical delivery of the security. A contract for difference is a financial instrument linked to an underlying share price. Consequently, no rights are acquired or obligations incurred relating to the underlying share and the Fund may buy or sell depending on the fund manager's view of a company's share price. Contracts for difference are highly leveraged instruments and for a small deposit it is possible for Fund to hold a position much greater than would be possible with a traditional investment. These are valued daily based on quoted market prices at the balance sheet date. Contracts for difference are included in Financial assets at fair value when the fair value is positive, and in Financial liabilities when the fair value is negative in the Balance Sheet.

The fair value of contracts for differences is the difference between the opening price and the volume weighted average price of the financial instrument multiplied by the number of shares specified within the contract.

##### (v) Interest rate swaps

Interest rate swaps may be used as a substitute for a physical security or a less expensive or more liquid way of obtaining desired exposures. These are valued on the valuation date using either market vendors or central counterparty clearing house prices. Interest rate swaps are included in Financial assets at fair value when the fair value is positive, and in Financial liabilities when the fair value is negative in the Balance Sheet.

Some of the interest rate swaps are centrally cleared positions. In a centrally cleared swap, immediately following execution of the swap agreement, the swap contract is novated to a clearing counterparty and the Funds faces the clearing counterparty through a broker. Upon entering into a centrally cleared swap the Funds are required to deposit initial margin with the broker in the form of cash in an amount that varies depending on the size and risk profile of the swap.

##### (vi) Total return swaps

Total return swaps may be used as a substitute for investing in standardised exchange traded funds, futures or options contracts. Total return swaps involve the exchange of the right to receive the total return, dividends or coupons plus capital gains or losses, of a specified reference asset, index or basket of assets against the right to make fixed or floating payments. Any assets to be received by the Funds will be consistent with the investment policies of the Funds. Where the Funds enter into a total return swap on a net basis, the two payment streams are netted out, with the Funds receiving or paying, as the case may be, only the net amount of the two payments. These are valued daily using the price of underlying equity/index. Total return swaps are included in Financial assets at fair value when the fair value is positive, and in Financial liabilities when the fair value is negative in the Balance Sheet.

##### (vii) Options contract

An option contract gives the buyer the right, but not the obligation, to buy (call) or sell (put) a financial instrument. Options held by the Funds which are dealt on a recognised market are valued using a settlement price as determined by the recognised market in question. Where a settlement price is not available, the value is the probable realisation value estimated with care and good faith by the Manager. Exchange traded options are valued at the settlement price determined by the relevant exchange. These are valued daily. Options contracts are included in Financial assets at fair value when the fair value is positive, and in Financial liabilities when the fair value is negative in the Balance Sheet.

### 3. Fair value hierarchy

The Company is required to classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The guidance establishes three levels of the fair value hierarchy as follows:

Level 1: Inputs that reflect unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date;

Level 2: Inputs other than quoted prices from active markets that are observable for the asset or liability either directly or indirectly, including inputs from markets that are not considered to be active;

Level 3: Inputs that are unobservable and are significant to the valuation.

The Company uses the "market approach" valuation technique to value its investments. A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. However, the determination of what constitutes "observable" may require significant judgement but can generally be considered as that market data which is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. The categorisation of a financial instrument within the hierarchy is based upon the pricing transparency of the instrument and does not necessarily correspond to the risk of that instrument.

## Notes to the Unaudited Half-Yearly Report

### 3. Fair value hierarchy, continued

Investments typically classified within level 1 include active listed equities, exchange traded derivatives and certain government bonds. Investments typically classified within level 2 include investments in corporate bonds, certain government bonds, certain listed equities and over the counter derivatives. Investment funds are also considered level 2 investments if there is evidence that redemptions occurred during the financial period and there were no restrictions preventing redemptions at the financial period end. As level 2 investments include positions that are not traded in active

markets and/or are subject to transfer restrictions, valuations may be adjusted to reflect illiquidity and/or non-transferability. Such adjustments are generally based on available market information. Investments typically classified within level 3 include certain corporate bonds, private equities and investment funds that have suspended redemptions, created side pocket classes or imposed gates. Within level 3, the use of the market approach generally consists of using comparable market transactions.

### 5. Taxation

Under current Irish law and practice, the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997 (as amended). It is not chargeable to Irish tax on its income and gains. However, tax can arise on the happening of a "Chargeable Event" in the Company. A Chargeable Event includes any distribution payments to shareholders or any encashment, cancellation, redemption or transfer of shares.

No Irish tax will arise on the Company in respect of Chargeable Events in respect of a shareholder who is not an Irish Resident and not Ordinarily Resident for tax purposes in Ireland at the time of the Chargeable Event provided that the appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act 1997, (as amended), are held by the Company; and certain exempted Irish resident investors who have provided the Company with the necessary signed statutory declarations. Following changes introduced by Finance Act 2010, investment undertakings will no longer be required to obtain relevant declarations from shareholders who are neither Irish Resident nor Ordinarily Resident in Ireland where the investment undertaking is not actively marketed to Irish investors and the Irish Revenue have given the investment undertaking the appropriate approval. With effect from 3 April 2010 a chargeable event will not arise if at the time of the chargeable event appropriate equivalent measures have been put in place by the Company to ensure that shareholders in the Company are neither Irish Resident nor Ordinarily Resident in Ireland and the Company has received approval from the Irish Revenue Commissioners to this effect and the approval has not been withdrawn.

Dividends, interest and capital gains (if any) which the Company receives with respect to its investments may be subject to taxes, including withholding taxes, in the countries in which the issuers of the investments are located and such taxes may not be recoverable by the Company or its shareholders.

## Notes to the Unaudited Half-Yearly Report

### 14. Securities Financing Transactions, continued

All derivative instruments (including total return swaps) are entered into by the Funds under an International Swaps and Derivatives Associations, Inc. Agreement (“ISDA Agreement”) or similar agreement. An ISDA Agreement is a bilateral agreement between the Funds and a counterparty that governs all derivative instruments (including total return swaps) entered into by the parties. The parties’ exposures under the ISDA Agreement are netted and collateralised together, therefore any collateral disclosures provided are in respect of all derivative instruments entered into by the Funds under the ISDA Agreement, not just total return swaps. All collateral received/posted by the Funds in relation to the ISDA Agreement is cash as at 31 December 2022. All of the cash balances have an open maturity. The cash collateral received and disclosed above is custodied with the depositary. Cash collateral received may be reinvested in accordance with the requirements of the Central Bank at the discretion of the Investment Manager.

The following table discloses the returns of the total return swaps:

Fund	Net gains/losses US\$	Net return US\$
GAM Systematic Alternative Risk Premia	68,889	68,889
	68,889	68,889

The costs incurred when entering a total return swap transaction are incorporated into the price so cannot be disclosed separately.
