Representatives and Paying Agents outside Luxembourg and Switzerland

The full list of Representatives and Paying Agents outside Luxembourg and Switzerland can be obtained, free of charge, at the registered office of the Management Company.

No subscription may be accepted on the basis of the financial reports. Subscriptions are accepted only on the basis of the current prospectus accompanied by the Key Investor Information Documents, the latest annual report and the latest semi-annual report.

The issue and redemption prices will be published in Luxembourg at the registered office of the SICAV. The net asset value will also be published daily on the Internet at www.credit-suisse.com and may be published in different newspapers.

Shareholders may obtain the prospectus, Key Information Documents (PRIIPS KID), the latest annual and semi-annual reports, the changes in the composition of the securities portfolio during the reporting period and copies of the Articles of Association free of charge from the registered office of the Company or the local representatives in the countries where the SICAV is registered.

Board of Directors

Jonathan Griffin, Certified Investment Fund Director

Mr. Griffin is the former CEO and Chairman of the Board of JPMorgan Asset Management (Europe) Sarl in Luxembourg. He retired in June 2020 following a 34 year career at JPMorgan with roles based in the UK, Germany and Tokyo including the last 19 years as CEO of JPMAME in Luxembourg. He was also a Board member of ALFI (Luxembourg Fund Industry Association) from 2005 to 2019 and Board member of EFAMA (European Fund Asset Management Association) from 2019 to 2020. Mr. Griffin is a Certified Investment Fund Director (CIFD) since June 2021.

Evanthi Savvoulidi, Director (since 10 October 2023 until 6 July 2024)
Credit Suisse Fund Management S.A.

Petra Borisch, Director (since 10 October 2023 until 31 August 2024)
Credit Suisse Fund Management S.A.

Eduard von Kymmel, Non-Executive Director

Mr. von Kymmel is an Independent Non-Executive Director (INED) of several investment funds including several CSAM managed investment funds and an AIFM. He has over 20 years of professional experience in the Luxembourg, Liechtenstein and Swiss investment fund industry, both in traditional and alternative asset classes. Mr. von Kymmel is a German-Luxembourger who lives in Luxembourg, is a fully qualified German lawyer (ass.iur.) and holds numerous certificates such as Chartered Director (IoD London), ILA certified director, EFPA ESG Advisor and an MBA from the University of Wales. Prior to becoming an iNED, he was CEO and Chairman of VP Bank AG-promoted ManCos, AIFMs and SICAVs domiciled in Luxembourg and Liechtenstein from 2015 to 2021. Before this he held various senior positions at Credit Suisse in CSIS, CS Solution Partners and CSAM in Luxembourg and Zurich. Before joining CS he worked at Intertrust in Luxembourg. In addition to being an iNED, Mr. von Kymmel is the founder of id Linked®, a corporate governance service provider based in Luxembourg.

Marc Berryman, Director (since 10 March 2023)
UBS Asset Management Holding Ltd.

Mr Berryman is an Executive Director within UBS Asset Management, based in London. He is the Head of UK Business Management and Chief Executive Officer of Credit Suisse Asset Management Limited as well as a director of several UBS AM managed investment funds and UBS Asset Management UK subsidiaries. Mr Berryman joined Credit Suisse in 2015 (which has since become part of the UBS Group) and between 2015 and 2020 was a Director within the CFO division before being appointed Chief Operating Officer of Credit Suisse Asset Management Limited in June 2020. Mr Berryman joined from Standard Chartered Bank where he was a Senior Manager within Group Treasury. Mr Berryman holds a Masters in Mechanical Engineering from Cardiff University and is a Fellow of the Institute of Chartered Accountants in England and Wales. Mr Berryman is a board member of a global think tank and member of the Strategic Business & Risk Committee of the UK's Investment Association.

Structure of the fund

CS Investment Funds 2 (the "Fund") is a société d'investissement à capital variable (investment company with variable capital) organised as a société anonyme (public company limited by shares) under the laws of the Grand Duchy of Luxembourg. The Fund was incorporated on 5 February 2007 and qualifies as an undertaking for collective investment in transferable securities pursuant to Part I of the Luxembourg law of 17 December 2010 on undertakings for collective investment, as amended (the "2010 Law").

The board of Directors of the Fund (the "Board") has appointed Credit Suisse Fund Management S.A. as the management company of the Fund (the "Manager") within the meaning of Chapter 15 of the aforementioned law of 17 December 2010. The Manager is supervised by the financial regulator of Luxembourg, Commission de Surveillance du Secteur Financier (CSSF).

The Fund is organised as an "umbrella" with a number of sub-funds, each of which having its own investment objective, policies and restrictions.

The objective of the Fund is to place the funds available to it in transferable securities of all types, and other investments permitted by law, with the purpose of spreading investment risks and affording its shareholders the results of the management of its portfolio. The Fund may take any measures and carry out any operations that it may deem useful in the accomplishment and development of its purpose to the full extent permitted by Part I of the 2010 Law.

As at 31 May 2024, the Fund had 19 sub-funds with share classes registered for offer and distribution in the Grand Duchy of Luxembourg and in the following jurisdictions: Australia, Austria, Belgium, Bahrain, Chile, Czech Republic, Finland, France, Germany, Gibraltar, Denmark, Iceland, Italy, Japan, Republic of Korea, Liechtenstein, Netherlands, Norway, Portugal, Saudi Arabia, Singapore, South Africa, Spain, Sweden, Switzerland and the United Kingdom. During the year, there were no country registrations or de-registrations.

Changes:

The Subfund Credit Suisse (Lux) Global Property Total Return Equity Fund was liquidated as of 09.06.2023.

The Subfund Credit Suisse (Lux) Asia Pacific Income Equity Fund was liquidated as of 22.08.2023.

The Subfund Credit Suisse (Lux) Italy Equity Fund (the Merging Subfund) was merged into the Subfund Credit Suisse (Lux) European Entrepreneur Equity Fund (the Receiving Subfund) as of 13.10.2023 based on the NAV as of 12.10.2023.

As of 23.01.2024, the Subfund Credit Suisse (Lux) Global Dividend Plus Equity Fund was renamed Credit Suisse (Lux) Global Quality Dividend Equity Fund and the Subfund Credit Suisse (Lux) European Dividend Plus Equity Fund was renamed Credit Suisse (Lux) European Quality Dividend Equity Fund.

The Subfund Credit Suisse (Lux) Japan Value Equity Fund (the Merging Subfund) was merged into White Fleet II – SGVP Japan Value Equity Fund (the Receiving Subfund) as of 29.02.2024.

The Subfund Credit Suisse (Lux) Small Cap Switzerland Equity Fund was liquidated as of 04.04.2024.

The Subfund Credit Suisse (Lux) Eurozone Quality Growth Equity Fund (the Merging Subfund) was merged into the Subfund Credit Suisse (Lux) European Entrepreneur Equity Fund (the Receiving Subfund) as of 03.05.2024 based on the NAV as of 02.05.2024.

Role and responsibility of the Board

The responsibility of the Board is governed exclusively by Luxembourg law. With respect to the annual accounts of the Fund, the duties of the Directors are governed by the Luxembourg law of 10 December 2010 relating to the introduction of international accounting standards for undertakings, as amended, and the 2010 Law.

A management agreement between the Fund and the Manager sets out the matters over which the Manager has authority.

The Directors take decisions in the interests of the Fund and its shareholders as a whole and refrain from taking part in any deliberation or decision which creates a conflict of interest between their personal interests and those of the Fund and its shareholders.

The Board may take independent professional advice if necessary and at the Fund's expense.

Board composition and remuneration

As at 31 May 2024, the board of directors of the company consisted of one director employed by UBS Asset Management Holding Ltd. (formerly Credit Suisse Asset Management), UK, two directors employed by Credit Suisse Fund Management S.A. and two non-executive directors free of any business, family or other relationship with the company, its investment managers or management company.

In appointing a Director, the Board takes into account the relative mix and composition of the Board, which as a whole has a breadth of investment knowledge, financial skills, as well as legal and other experience relevant to the Fund's business.

The Board does not limit the number of years of Directors' service and it does take into account the nature and requirements of the fund industry and of the Fund's business when making recommendation to shareholders that Directors be elected. The terms of each Director's appointment are set out in a contract for services and these are available at the Fund's registered office for inspection.

Mss Evanthe Savoulidi and Petra Borisch resigned from their mandates as directors of the company with effect as of 6 July and 31 August 2024, respectively.

The total remuneration of the Non-Executive Directors amounts to approximately €25k per annum, pro-rated where such Non-Executive Directors were in office for part of the year. Fees for future periods may be adjusted for inflation or other reasons. Employees of the Credit Suisse group do not receive additional remuneration for their Director mandates.

Board meetings and committees

The Board usually meets quarterly and where necessary additional meetings are arranged.

Prospectus

The prospectus of the Fund was amended for the last time in July 2024.

Annual general meetings

The next annual general meeting of the Fund (the "AGM") will be held on Tuesday, 8 October 2024 at the registered office of the Fund to consider matters relating to the year ended on 31 May 2024. At this meeting, shareholders will be requested to consider the usual matters at such meetings, including (i) the adoption of the annual accounts and approval of the allocation of the results, (ii) the discharge and renewal of Directors mandates and (iii) the renewal of the auditor's mandate.

Discharge of Directors

One of the resolutions in the AGM is, as required under Luxembourg law, for shareholders to vote on the discharge of the Directors of their duties for the financial year in question. This discharge is only valid where the annual accounts contain no omission or false information concealing the real financial situation of the Fund.

Distributions to the shareholders of the Fund

CS Investment Funds 2
The board of Directors

Audit report

To the Shareholders of
CS Investment Funds 2

Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of CS Investment Funds 2 (the “Fund”) and of each of its sub-funds as at 31 May 2024, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund’s financial statements comprise:

- the combined statement of net assets for the Fund and the statement of net assets for each of the sub-funds as at 31 May 2024;
- the combined statement of operations / changes in net assets for the Fund and the statement of operations / changes in net assets for each of the sub-funds for the year then ended;
- the statement of investments in securities for each of the sub-funds as at 31 May 2024; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the “Commission de Surveillance du Secteur Financier” (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the “Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements” section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

*PricewaterhouseCoopers, Société coopérative, 2 rue Gerhard Mercator, B.P. 1443, L-1014 Luxembourg
T : +352 494848 1, F : +352 494848 2900, www.pwc.lu*

*Cabinet de révision agréé. Expert-comptable (autorisation gouvernementale n°10028256)
R.C.S. Luxembourg B 65 477 - TVA LU25482518*

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the “Réviseur d'entreprises agréé” for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;

- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

General

CS Investment Funds 2 ("the Company") is a Luxembourg investment company with variable capital (SICAV). The Company has an umbrella structure and was established on 05.02.2007 in Luxembourg as an undertaking for collective investment under Part I of the amended law of 17.12.2010.

As of 31.05.2024 the Company had 19 Subfunds.

Changes:

The Subfund Credit Suisse (Lux) Global Property Total Return Equity Fund was liquidated as of 09.06.2023.

The Subfund Credit Suisse (Lux) Asia Pacific Income Equity Fund was liquidated as of 22.08.2023.

The Subfund Credit Suisse (Lux) Italy Equity Fund (the Merging Subfund) was merged into the Subfund Credit Suisse (Lux) European Entrepreneur Equity Fund (the Receiving Subfund) as of 13.10.2023 based on the NAV as of 12.10.2023.

As of 23.01.2024, the Subfund Credit Suisse (Lux) Global Dividend Plus Equity Fund was renamed Credit Suisse (Lux) Global Quality Dividend Equity Fund and the Subfund Credit Suisse (Lux) European Dividend Plus Equity Fund was renamed Credit Suisse (Lux) European Quality Dividend Equity Fund.

The Subfund Credit Suisse (Lux) Japan Value Equity Fund (the Merging Subfund) was merged into White Fleet II – SGVP Japan Value Equity Fund (the Receiving Subfund) as of 29.02.2024.

The Subfund Credit Suisse (Lux) Small Cap Switzerland Equity Fund was liquidated as of 04.04.2024.

The Subfund Credit Suisse (Lux) Eurozone Quality Growth Equity Fund (the Merging Subfund) was merged into the Subfund Credit Suisse (Lux) European Entrepreneur Equity Fund (the Receiving Subfund) as of 03.05.2024 based on the NAV as of 02.05.2024.

Summary of significant accounting policies

a) Presentation of financial statements

The financial statements are prepared in accordance with Luxembourg legal and regulatory requirements relating to investment funds under the going concern basis of accounting.

b) Computation of the net asset value of each Subfund

The net asset value of the Shares of each Subfund shall be calculated in the reference currency of the respective Subfund and shall be determined under the responsibility of the Company's Board of Directors in Luxembourg on each banking day in Luxembourg (each such day being referred to as a "Valuation Day"). A banking day is defined as being a day on which banks are normally open for business in Luxembourg.

For the active Subfunds, the Net Asset Value calculated will be increased by up to a maximum of 2% per Share in the event of a net surplus of subscription applications or reduced by up to a maximum of 2% per Share in the event of a net surplus of redemption applications in respect of the applications received on the respective Valuation Day. The effective date for the introduction of the Net Asset Value adjustment mechanism (Single Swing Pricing) was as of 01.01.2012.

The NAV per share as disclosed in the statistical information is the published NAV per share whereas the total net assets disclosed in the statement of net assets is the total net asset value excluding period end swing adjustment.

As per 31.05.2024 swing pricing was applied on the Subfunds: Credit Suisse (Lux) Edutainment Equity Fund, Credit Suisse (Lux) Energy Evolution Equity Fund, Credit Suisse (Lux) European Entrepreneur Equity Fund, Credit Suisse (Lux) Small and Mid Cap Alpha Long/Short Fund and Credit Suisse (Lux) Systematic Index Fund Balanced CHF.

c) Valuation of investment securities of each Subfund

Securities which are listed or regularly traded on a stock exchange shall be valued at the last available purchase price. If such a price is not available for a particular trading day, but a closing mid-price (the mean of the closing bid and ask prices) or a closing bid price is available, the closing mid-price, or alternatively the closing bid price, may be taken as a basis for the valuation.

If a security is traded on several stock exchanges, the valuation shall be made by reference to the exchange on which the security is chiefly traded.

In the case of securities for which trading on a stock exchange is not significant whereas a secondary market with regulated trading among securities dealers does exist (with the effect that the price is set on a market basis), the valuation may be based on this secondary market.

Securities traded on a regulated market shall be valued in the same way as securities listed on a stock exchange.

Securities that are neither listed on a stock exchange nor traded on a regulated market shall be valued at their last available market price. If no such price is available, the Company shall value these securities in accordance with other criteria to be established by the Board of Directors and on the basis of the probable sales price, the value of which shall be estimated with due care and in good faith.

Units or shares in UCI shall be valued on the basis of their most recently calculated net asset value, where necessary taking due account of the redemption fee. Where no net asset value and only buy and sell prices are available for units or shares in UCI, the Shares/shares in such UCI may be valued at the mean of such buy and sell prices.

Fiduciary and fixed-term deposits shall be valued at their respective nominal value plus accrued interest.

If a valuation in accordance with the above rules is rendered impossible or incorrect owing to special or changed circumstances, then the Company's Board of Directors shall be entitled to use other generally recognized and auditable valuation principles in order to value the Subfund's assets.

In exceptional circumstances, further valuations may be carried out on the same day; such valuations will be valid for any applications for purchase and/or redemption subsequently received.

d) Cash at banks and at brokers

Cash at banks and at brokers includes cash in hand, margin calls and deposits held at call with banks.

e) Net realised gain/loss on sales of investments of each Subfund

The realised gains or losses on the sales of securities are calculated on the basis of the average acquisition cost.

f) Foreign exchange conversion

The financial statements are kept in the reference currency of each Subfund and the combined financial statements are kept in CHF.

Cash at banks, other net assets and the value of portfolio securities in currencies other than the reference currency of each Subfund are converted into the reference currency at the foreign exchange rate prevailing on the date of valuation.

Income and expenses in currencies other than the reference currency of each Subfund are converted into the reference currency at the foreign exchange rate applicable at the date they accrue to the Subfund.

Realised gains or losses on foreign currencies are accounted for in the statement of operations / changes in net assets.

The acquisition cost of securities in currencies other than the reference currency of each Subfund is converted into the reference currency at the foreign exchange rate valid at the date of acquisition.

g) Transactions on investments in securities of each Subfund

The transactions on investments in securities are booked on a trade date basis.

h) Valuation of financial futures contracts of each Subfund

Unmatured financial futures contracts are valued at valuation date at market prices prevailing at this date and resulting unrealised gains or losses are posted to the statement of operations / changes in net assets and are shown under unrealised gain/loss on financial future contracts in the statement of net assets. Realised gains or losses are also posted to the statement of operations / changes in net assets under "Net realised gain (loss) on financial futures contracts".

i) Valuation of forward foreign exchange contracts of each Subfund

Unmatured forward foreign exchange contracts are valued at valuation date at forward exchange rates prevailing at this date and resulting unrealised gains or losses are posted to the statement of operations / changes in net assets and are shown under unrealised gain/loss on forward foreign exchange contracts in the statement of net assets. Realised gains or losses are also posted to the statement of operations / changes in net assets under "Net realised gain (loss) on forward foreign exchange contracts".

j) Valuation of swaps

On each valuation day, swap agreements are valued at the net present value of the future cash flows, using the relevant interest rate yield curve on valuation day. For the valuation of excess return swaps, the relevant underlying is taken into account. The resulting unrealised gains or losses are shown under unrealised gain/loss on swap contracts in the statement of net assets. Realised gains or losses are also posted to the statement of operations / changes in net assets under "Net realised gain (loss) on swap contracts".

k) Valuation of contract for differences of each Subfund

Unmatured contracts for difference are valued at valuation date at market prices prevailing at this date and resulting unrealised gains or losses are posted to the statement of operations / changes in net assets under "Change in net unrealised appreciation (depreciation) on financial futures contracts" and are shown under unrealised gain/loss on financial future contracts in the statement of net assets. Realised gains or losses are also posted to the statement of operations / changes in net assets under "Net realised gain (loss) on financial futures contracts".

l) Valuation of option contracts of each Subfund

Premiums received on issued options are recorded as liabilities and premiums paid on the purchase of options are recorded as assets in the statement of net assets. Option contracts outstanding on the reporting date are valued at the last settlement or close price on the stock exchanges or regulated markets. Realised and unrealised gains or losses are recorded in the statement of operations / changes in net assets under "Net realised gain (loss) on sales of investments" and Change in net unrealised appreciation (depreciation) on investments.

m) Allocation of accrued expenses

Accrued expenses which can be allocated directly to a Subfund are charged to the Subfund. Accrued expenses which cannot be allocated directly are divided among the Subfunds in proportion to the net assets of each Subfund.

n) Securities Lending

The Company can practise lending of securities included in its portfolios of its Subfunds. The Company may only lend securities within a standardized system of securities lending organised by a recognised institution of securities compensation or by first class financial institutions specialised in this type of operations.

o) Income recognition

Dividends are recorded on ex-dividend date, net of withholding tax. Interests are accrued on a daily basis.

p) Other income

The trailer commissions received during the period are accounted under "Other income".

Management fee and Performance fee

(see detail at Subfund level)

As remuneration for its services and reimbursement of its expenses, the Management Company is entitled to a monthly management fee, payable at the end of each month and calculated on the basis of the average of the daily net asset value of the relevant share class during that month.

Class -DA-, -DAH-, -DB- and -DBH- Shares are not subject to a management fee but only to an all-in management service fee, payable to the Management Company covering all fees and expenses excluding the fees payable to the Depositary Bank, of not more than 0.35% p.a.

In addition to the management fee, the Management Company is entitled to a performance fee for the Subfunds:

- Credit Suisse (Lux) Digital Health Equity Fund,
- Credit Suisse (Lux) Edutainment Equity Fund,
- Credit Suisse (Lux) Energy Evolution Equity Fund
- Credit Suisse (Lux) Environmental Impact Equity Fund,
- Credit Suisse (Lux) European Entrepreneur Equity Fund,
- Credit Suisse (Lux) Italy Equity Fund (until 13.10.2023),
- Credit Suisse (Lux) Robotics Equity Fund,
- Credit Suisse (Lux) Security Equity Fund,
- Credit Suisse (Lux) Small and Mid Cap Alpha Long/Short Fund,
- Credit Suisse (Lux) Thematic Opportunities Equity Fund,

For Credit Suisse (Lux) Small and Mid Cap Alpha Long/Short Fund:

The Management Company is entitled to a performance fee for the Subfund which is calculated on the basis of the unswung Net Asset Value of the Share Class concerned.

The performance fee is calculated with each unswung Net Asset Value. The necessary provisions are made accordingly.

A performance fee may only be levied if, on the Valuation Day following a Trading Day, the unswung Net Asset Value of a Share Class on a Trading Day used in the calculation of the performance fee exceeds all the unswung Net Asset Values previously achieved on a Trading Day ("high water mark").

The high water mark will never be reset throughout the life of the Subfund, meaning that the performance reference period corresponds to the whole life of the Subfund.

If, on the Valuation Date following a Trading Day, the unswung Net Asset Value (prior to deduction of the performance fee and net of all costs) of a Share Class is greater than the preceding unswung Net Asset Values (prior to deduction of the performance fee) applicable to the previous Trading Days, a performance fee of 20% shall be deducted on the difference between the unswung Net Asset Value of the Share Class on the Valuation Day following the Trading Day and the high water mark. Calculation of the performance fee takes place on the basis of the Shares of the relevant Class that are currently in circulation. New subscriptions do not affect the provisioned performance fee amount.

The performance fee calculated and set aside under the above method is paid at the beginning of the respective quarter. The levied performance fee cannot be refunded if the unswung Net Asset Value falls again after deduction of the fee.

For the other Subfunds:

The Management Company is entitled to a Performance Fee for the Subfund, which is calculated on the basis of the unswung net asset value before performance fee accrual for the relevant Valuation Day of the Share Class concerned ("Calculation Date").

The relative high watermark principle is adopted for the calculation of the performance fee, meaning that any underperformance incurred by the relevant Share Class of the Subfund against its benchmark during the performance reference period of 5 years ("Reference Period") must be recovered before a Performance Fee becomes payable, it being understood that performance fees may be payable during the reference period of 5 years and/or in the first years of a Subfund's existence, in case the relevant Share Class of the Subfund has not existed for 5 years or after a reset of the high watermark (having an equivalent impact on the handling of the reference period as a new launch).

The Performance Fee shall be payable (i.e., crystallised) on an annual basis ("Crystallisation Period"). The Crystallisation Period will end on May, 31st (with the first Crystallisation Period being potentially longer than 12 months while starting with the launch of the Subfund or the relevant Share Class and lasting at least 12 months).

The calculation of the Performance Fee and the necessary provisioning take place with every Net Asset Value calculation. The accrued Performance Fee shall be payable annually in arrears within one month after the end of the respective Crystallisation Period, and, if Shares are redeemed during the Crystallisation Period, the amount of Performance Fee included in the Net Asset Value per Share will be due and owed (i.e. crystallized) for these redeemed Shares in due proportion on the date of the Shareholder's redemption.

If, on the Calculation Date, the net performance of the unswung net asset value of a Share Class (net of all costs) is above the benchmark performance, a Performance Fee of 15% for all Share Classes shall be deducted on the difference between the performance of the unswung net asset value of the relevant Share Class and the performance of the benchmark (i.e. relative value) over the same Crystallisation Period, provided that such difference exceeds the sum of any yearly underperformances against the benchmark during the performance reference period of up to 5 years (or less in case the relevant Share Class of the Subfund has not existed for 5 years or after a reset of the high watermark). The Performance Fee is calculated on the basis of the Shares of the relevant Share Class that are in circulation during the Crystallisation Period whereas the effect of new subscriptions is neutralized. The new subscriptions will therefore only be impacted by the Performance Fee after they contributed to the performance of the relevant Share Class.

For the avoidance of doubt, the Performance Fee shall be paid from the Subfund on the payment date also in the event of negative absolute performance by the Subfund, provided that the Subfund has exceeded the benchmark since the previous performance fee payment date.

Credit Suisse (Lux) Digital Health Equity Fund

All active share classes are not subject to performance fees. No performance fees have been charged for the Subfund over the reporting year.

Credit Suisse (Lux) Edutainment Equity Fund

The following share classes are not entitled to a performance fee:

-B- USD share class, -BH- CHF share class, -BH- EUR share class and -CB- EUR share class.

Depositary Fee

The Depositary Bank receives from the Company fees which are charged on the basis of usual market rates prevailing in Luxembourg and which are based on the net assets of the respective Subfund.

"Taxe d'abonnement"

Under the prevailing laws and regulations, the Company is subject in Luxembourg, on the basis of its investments, to a "taxe d'abonnement" at the annual rate of 0.05%, payable quarterly and calculated on the basis of the net assets of each subfund at the end of each quarter. In the case of Share Classes that may only be acquired by institutional investors, this annual tax rate is 0.01%. The portion of net assets, which is invested in other undertakings for collective investment in securities under Luxembourg law, is exempt from this tax.

Exchange Rates

The combined financial statements are kept in CHF. For this purpose, the financial statements of the Subfunds are converted into CHF at the foreign exchange rates as of 31.05.2024:

1 EUR = 0.979750 CHF
1 USD = 0.902128 CHF
1 JPY = 0.005741 CHF

Total Expense Ratio (TER)

(see detail at Subfund level)

The TER expresses the sum of all costs and commissions charged on an ongoing basis to the respective Subfund, taken retrospectively as a percentage of these assets.

If a Subfund invests at least 10% of its net assets as a fund of fund in target funds, a composite TER of the fund of funds is to be calculated as follows:

The prorated TER of the individual target funds including a performance related remuneration, weighted according to the share they represent in the overall assets of the fund of funds as of the closing date and the TER of the fund of funds minus the retroceded commissions received from the target funds during the reporting year.

The TER is calculated following the AMAS (Asset Management Association Switzerland) guideline. No TER is disclosed for shares classes/Subfunds liquidated during the reporting year.

Expenses reimbursement

Credit Suisse (Lux) Energy Evolution Equity Fund

The Subfund pays expenses based on a capped TER. On a monthly basis, the total amount of the expenses actually incurred by the Subfund is determined and compared to the accrued amount of expenses calculated on the basis of the capped TER. Where the level of actual expenses is higher than the cap, the difference is booked as a decrease of expense (the "waiver fees"). On a monthly basis the waiver fees will be invoiced to Credit Suisse Fund Management S.A. The amount of waiver fees is disclosed as "Expense reimbursed or waived" in the "Statement of Operations / Change in Net Assets".

Fund performance

(see detail at Subfund level)

The performance is based on the net asset values as calculated on the last business day of the period. Those net asset values reflect the market prices of the investments as of the last business day of the period.

Historical performance is no indicator of current or future performance. The performance data given does not take into account commissions and costs incurred in the subscription or redemption of Company shares.

For shares launched more than 3 years ago no performance since inception is disclosed.

Performance of distributing shares includes reinvestments of dividends.

Global Exposure

The global exposure of the Subfunds is calculated on the basis of the commitment approach.

Transaction costs

Transactions costs include brokerage fees, stamp duty, local taxes and other foreign charges if incurred during the period. Transaction costs are included in the cost of securities purchased and sold.

For the year ended on 31.05.2024, the Company incurred transaction costs relating to purchase or sale of investments in securities and similar transactions, (including derivatives instruments or other eligible assets) as follows:

Subfund	CCY	Transaction costs
Credit Suisse (Lux) Asia Pacific Income Equity Fund	USD	190,390.37
Credit Suisse (Lux) Commodity Allocation Fund	USD	0.00
Credit Suisse (Lux) Edutainment Equity Fund	USD	100,404.83
Credit Suisse (Lux) Energy Evolution Equity Fund	USD	4,333.99
Credit Suisse (Lux) Environmental Impact Equity Fund	USD	284,318.72
Credit Suisse (Lux) European Quality Dividend Equity Fund (previously Credit Suisse (Lux) European Dividend Plus Equity Fund)	EUR	22,130.86

Subfund	CCY	Transaction costs
Credit Suisse (Lux) European Entrepreneur Equity Fund	EUR	40,781.13
Credit Suisse (Lux) Eurozone Active Opportunities Equity Fund	EUR	59,885.96
Credit Suisse (Lux) Global Balanced Convertible Bond Fund	USD	1,442.50
Credit Suisse (Lux) Global Digital Health Equity Fund	USD	282,411.41
Credit Suisse (Lux) Global Quality Dividend Equity Fund (previously Credit Suisse (Lux) Global Dividend Plus Equity Fund)	USD	28,104.27
Credit Suisse (Lux) Global Property Total Return Equity Fund	USD	9,601.30
Credit Suisse (Lux) Global Robotics Equity Fund	USD	399,061.38
Credit Suisse (Lux) Global Security Equity Fund	USD	125,297.02
Credit Suisse (Lux) Global Value Equity Fund	EUR	30,421.84
Credit Suisse (Lux) Infrastructure Equity Fund	USD	144,035.22
Credit Suisse (Lux) Italy Equity Fund	EUR	18,998.34
Credit Suisse (Lux) Japan Value Equity Fund	JPY	308,932.00
Credit Suisse (Lux) Small and Mid Cap Alpha Long/Short Fund	EUR	183,244.52
Credit Suisse (Lux) Small and Mid Cap Germany Equity Fund	EUR	11,411.65
Credit Suisse (Lux) Small Cap Switzerland Equity Fund	CHF	21,651.08
Credit Suisse (Lux) Systematic Index Fund Balanced CHF	CHF	14,607.54
Credit Suisse (Lux) Systematic Index Fund Growth CHF	CHF	5,094.28
Credit Suisse (Lux) Systematic Index Fund Yield CHF	CHF	4,155.87
Credit Suisse (Lux) Thematic Opportunities Equity Fund	USD	126,486.87

Not all transaction costs are separately identifiable. For fixed income investments, forward foreign exchange contracts and for some other derivative contracts, transaction costs will be included in the purchase and sales price of the investment. Whilst not separately identifiable these transaction costs will be captured within the performance of each Subfund.

Changes in the composition of the securities portfolio

Changes in the composition of the securities portfolio during the reporting year are available to Shareholders free of charge at the registered office of the Company or the local representatives in the countries where the Company is registered.

Financial Derivative Instruments

The Subfunds may engage in derivative transactions for the purpose of efficient portfolio management. Details of the derivatives are displayed in the Notes pages.

Depending on the type of derivatives held, collateral might be received from the different counterparties to reduce the counterparty exposure. For other type of derivatives, margin accounts might be used.

As at 31.05.2024, in order to reduce the counterparty risk, the following Subfunds received the following assets as collateral from the following counterparty for an amount of:

Credit Suisse (Lux) CommodityAllocation Fund:

Type	Counterparty	CCY	Amount
Cash	BNP PARIBAS PARIS	USD	1,170,000.00

Cash collateral

The following table shows the amount of cash collateral included in the Cash at banks and at brokers as disclosed the Statement of Net Assets:

Subfund	Counterparty	CCY	Amount
Credit Suisse (Lux) CommodityAllocation Fund	MACQUARIE BANK LTD.	USD	330,000.00
	JP MORGAN CHASE NY	USD	1,000,000.00
	MERRILL LYNCH INT.LDN	USD	1,190,000.00
	BNP PARIBAS SA PARIS	USD	820,000.00
Credit Suisse (Lux) Global Value Equity Fund	CREDIT SUISSE (SCHWEIZ) AG	EUR	110,000.00
Credit Suisse (Lux) Small and Mid Cap Alpha Long/Short Fund	GOLDMAN SACHS INTERNATIONAL LONDON	EUR	8,502,320.44

Collateralised positions

As at 31.05.2024, the Subfund Credit Suisse (Lux) Small and Mid Cap Alpha Long/Short Fund has the following position to cover the counterparty risk on derivative positions with Goldman Sachs International:

40,000 shares of LEG IMMOBILIEN (REG. SHARES) for a total amount of CHF 3,164,480.

Unswung net asset value

The following table shows the total net asset value per share before swing pricing adjustment (unswung net asset value per unit) for:

Credit Suisse (Lux) Edutainment Equity Fund:

The collateral delivered by the securities lending counterparty to the Subfund is composed of a well diversified portfolio of securities consisting of

- highly rated bonds issued or guaranteed by governments, government agencies, bodies regulated by public law or corporations (excluding Credit Suisse affiliates) from selected OECD countries.
- highly rated bonds from supranational organisations.
- equities listed on selected stock exchanges within the OECD on the condition that the shares are included in a main and liquid index.

The determination of the market value of the collateral is subject to the application of appropriate haircuts adapted to the volatility of the collateral type.

The revenues mentioned in the Statement of Operations / Changes in Net Assets under "Securities Lending Income" are the net amounts received from the lending principal. Any direct and indirect operational costs and fees are borne out of its fee and include the liability risk assumed by the principal.

For the year ended on 31.05.2024, the fee paid to the principal amounted to as follows:

Subfund	Ccy	Gross amount securities lending	Expenses and commission from the securities lending counterparty	Net amount of securities lending income
Credit Suisse (Lux) Asia Pacific Income Equity Fund (until 22.08.2023)	USD	1,528.04	305.61	1,222.43

Transparency of the promotion of environmental or social characteristics and of sustainable investments

Information on environmental and/or social characteristics and/or sustainable investments is available in the relevant annexes under the (unaudited) Transparency of the promotion of environmental or social characteristics and of sustainable investments section.

Significant events during the year

In response to the war in Ukraine since late February 2022, the US, EU, UK, Switzerland and other countries across the world imposed severe sanctions against Russia's financial system and on Russian government officials and Russian business leaders. The sanctions included limitations on the ability of Russian banks to access the SWIFT financial messaging service and restrictions on transactions with the Russian central bank. The Russian government has also imposed certain countermeasures, which include restrictions relating to foreign currency accounts and security transactions.

The Company continues to assess and monitor the impact of the sanctions already imposed and potential future escalations, on its business on an ongoing basis.

On 12 June 2023, Credit Suisse Group AG was merged into UBS Group AG and the combined entity now operates as a consolidated banking group (the "Merger"). The Fund receives various services and has banking relationships with consolidated subsidiaries of Credit Suisse Group AG, and as such these relationships and service providers may change in the future as a result of the Merger. As a result of the Merger, Credit Suisse Fund Management S.A. will be merged into UBS Asset Management (Europe) S.A. on 1st October 2024.

The new prospectus entered into force on 23.01.2024.

Subsequent events

The Subfund Credit Suisse (Lux) Edutainment Equity Fund (the Merging Subfund) was merged into the Subfund Credit Suisse (Lux) Energy Evolution Equity Fund (the Receiving SubFund) as of 28.06.2024.

The Subfund Credit Suisse (Lux) European Quality Dividend Equity Fund (the Merging Subfund) was merged into the Subfund UBS (Lux) Equity SICAV - European Income Opportunity Sustainable (EUR) (the Receiving SubFund) as of 28.06.2024.

The Subfund Credit Suisse (Lux) Global Value Equity Fund (the Merging Subfund) was merged into the Subfund White Fleet II - SGVP Global Value Equity Fund (the Receiving Sub-Fund) as of 05.07.2024.

The Subfund Credit Suisse Investment Partners (Lux) Global Balanced Convertible Bond Fund (the Merging Subfund) will be merged into the Subfund BANTLEON SELECT SICAV – Bantleon Global Convertibles Balanced (the Receiving Sub-Fund) as of 11.10.2024.

The following Subfunds were renamed as of 05.07.2024:

Credit Suisse (Lux) Asia Pacific Income Equity Fund (until 22.08.2023)

Credit Suisse (Lux) Asia Pacific Income Equity Fund has been liquidated as at 22.08.2023.

Credit Suisse (Lux) CommodityAllocation Fund

Commodities performed well during the reporting period ending 31.05.2024. Commodities strengthened initially, driven by the energy sector. Gasoil led in price appreciation, strengthening due to tighter-than-expected supplies and low inventories. This was caused by a combination of unplanned refinery outages and stronger implied demand. Commodities fell in November, with natural gas performance being notably negative. An unseasonably warm November, along with forecasts for the mild weather to continue into December, significantly reduced demand expectations. Commodities started to climb again in April 2024. Metals were the strongest sectors, with industrial metals increasing on the back of strong positive performance from all sector constituents.

The Sub-Fund uses commodity-linked swaps to gain exposure to the Bloomberg Commodity Index and may implement tactical over- or underweights based on the CS House View. As of 31.05.2024 this index was composed of five sectors with the following weightings: Energy 28.5%, agriculture 28.4%, industrial metals 16.8%, precious metals 20.7% and livestock 5.7%. Regarding the Sub-Fund's sector weights relative to the benchmark, there was an overweight in energy and precious metals at the end of May. The index is constructed based on liquidity and production metrics, and is rebalanced annually, with initial sector caps at 33%. The five largest positions in the Bloomberg Commodity Index as of 31.05.2024 were: Gold at 15.3%, US natural gas at 7.3%, Brent crude oil at 7.3%, WTI crude oil at 7.1% and copper at 6%.

Credit Suisse (Lux) Digital Health Equity Fund

The period under review was characterized by high volatility as macro uncertainty, persistent inflation and high interest rates coupled with rising geopolitical tensions contrasted with improving corporate fundamentals. The ongoing outperformance by large-capitalized companies versus their small and mid-cap counterparts persisted, with companies related to artificial intelligence (AI) demonstrating the strongest performance. This trend was particularly unfavourable for small and mid-cap growth companies, which comprise almost the entire fund investment universe.

The fund consistently underperformed its benchmark, despite intermittent episodes of outperformance, with a negative performance against a positive index performance. Most of the underperformance happened before the end of October 2023, when hopes for an imminent rate cut did not materialize. In a challenging market environment, while maintaining a balanced risk profile. As fund managers, we tried our best to maneuver through one of the toughest environment for the theme. We have been sticking to keeping the weights of the top positions near 4% weight, trimming very strong positions, which was most positive to lock in some of the Artificial Intelligence upside that temporarily manifested itself in the Research and Development subtheme. However, a couple of massive outperformers were still not enough to overcome the generally very negative macro backdrop, as the fund theme revealed to be even more interest rate sensitive than we had anticipated. However, the rather few names which showed an impressive performance give us hope that after the significant attrition, the fund will be left with fewer names (currently 51 compared to 79 holdings at the peak), in our view boding well for future outperformance should the macro environment change. Growth of these companies is almost independent of growth in the general economy, with the expected median revenue growth for 2024 still well in excess of 20%, and many companies finally nearing profitability.

Information about the environmental or social characteristics promoted by the Subfund is available in the Annex of this Report.

Credit Suisse (Lux) Edutainment Equity Fund

In the 12-month period ending 31 May 2024, equity markets initially struggled to find a direction as labor market data and inflation reports gave contradictory signals from one month to another. From November 2023, equity markets trended upwards as investors started to believe that most of the hiking campaigns of global central banks were over. The period was also marked by a surge in technology stocks, as market participants continued to show interest in artificial intelligence (AI) and attempted to identify potential enablers and adopters of this technology.

The Credit Suisse (Lux) Edutainment Equity Fund underperformed the reference MSCI World ESG Leaders Index. The main reason for the strategy's underperformance throughout the period is its high exposure to small cap companies, whereas the performance of the benchmark was driven by larger cap stocks, where we have no exposure due to our pure-play focus on the Edutainment theme. Despite this unfavorable sentiment towards earlier stage growth companies, some of our portfolio holdings were able to deliver strong returns, like New Oriental which returned +112%, followed by Stride up +70%. In contrast, some portfolio companies like 2U or SMS were down -75% and -40% respectively, mainly because of deteriorating fundamentals. Our strategy gives investors focused "pure-play" exposure to the Edutainment investment opportunity, while providing sector and geographic diversification.

Information about the environmental or social characteristics promoted by the Subfund is available in the Annex of this Report.

Credit Suisse (Lux) Energy Evolution Equity Fund

Global equity markets started rising towards year-end and delivered a positive return over the reporting period. Central Banks kept interest rates high, continuing their fight against inflation. As inflation readings started to cool down, the rise in long-term interest rates came to a halt, and investors started pricing in rate cuts. Information Technology was once again the best performing sector, and US Big Tech companies performed strongly on the back of continued Artificial Intelligence growth and optimism.

Copper prices rose significantly during the year as global copper production is facing disruptions, while demand rose strongly, also in anticipation of increased data center copper consumption.

The fund invests in companies across the whole energy transition value chain, spread over three subthemes, namely Materials & Chemicals ("upstream"); Production, Generation & Supply ("midstream"); and Infrastructure, Consumption & Mobility ("downstream"), providing pure-play exposure that is well-diversified over regions, while being somewhat concentrated in the energy, materials, industrials and utilities sectors.

The fund underperformed its reference index over the reporting period. As both copper and uranium prices were strong during the year, the fund's top performers were concentrated in the uranium and copper mining space, with Cameco, Denison Mines and Capstone Copper contributing positively to performance. High-voltage cable manufacturers also showed strong performance, as infrastructure upgrades and more renewables drive spending on electricity grids. Underperformers were mainly found in the electric vehicle value chain, from battery companies to charging infrastructure providers to electric vehicle manufacturers.

Information about the environmental or social characteristics promoted by the Subfund is available in the Annex of this Report.

Credit Suisse (Lux) Environmental Impact Equity Fund

In the 12-month period ending 31 May 2023, stock markets were up modestly. For most of 2022, the war in the Ukraine, inflation and rising rates fueled recession fears. Markets eventually bottomed in October, as energy prices eased, and central banks pointed to a slower pace of rate hikes ahead. Although the positive economic impulse of the reopening in China did not materialize, the strong labor market and robust consumer spending delayed the expected economic recession. While the failure of US regional banks caused market stress in March, Technology led the markets higher, helped by a boom in AI stocks.

The CS (Lux) Environmental Impact Equity Fund lagged the reference Index over the reporting period. For most of the reporting period the fund outperformed the benchmark, with Sustainable Infrastructure names contributing best, especially over the first nine months. The European energy crisis triggered a meaningful shift in energy policy frameworks, stimulating demand for energy efficient products, which helped our positions in green buildings and electrification enablers. In Resources, Solar equipment providers performed best, as the newly announced US Inflation Reduction Act (IRA), created long-term visibility for project developers and introduced new requirements to source equipment locally. The fund trailed the benchmark since March 2023, mainly driven by the strong outperformance of mega cap Technology companies like NVIDIA and Microsoft, which are not investable for the Environmental Impact strategy.

Information about the environmental or social characteristics promoted by the Subfund is available in the Annex of this Report.

Credit Suisse (Lux) European Quality Dividend Equity Fund (previously Credit Suisse (Lux) European Dividend Plus Equity Fund)

European equity markets as measured by the MSCI Europe TR net index in EUR trended sideways from the end of May 2023 to the end of October 2023. Since the end of October 2023, European equity markets steadily advanced, closing the reporting period clearly in the positive territory.

The reporting period was characterized by geopolitical uncertainties such as the war between Russia and the Ukraine, the war between the Hamas and Israel as well as the tensions between China and the USA regarding Taiwan. On the macro front, headline inflation numbers gradually declined in major economies such as the USA, Euro area and the UK in the first half of the reporting period, but remained stickier than expected in the second half of the reporting period. Major central banks such as the US Federal Reserve (Fed), European Central Bank (ECB) and Bank of England (BoE) continued to gradually hike interest rates in the first few months of the reporting period, but kept them flat since September 2023. Furthermore, optimism that innovations in artificial intelligence will boost profits drove European equity markets higher.

Our investment discipline remains unchanged. Hence, we invest in stocks which have not only an attractive dividend yield but where we expect the dividend payment to be sustainable over time. Typically, these are stocks of companies which according to our analysis run a solid balance sheet and do cover the dividend payouts by the generation of solid earnings and cash flows. At the same time, we continue to target a dividend yield on the portfolio level that is higher than the dividend yield of the respective benchmark. Furthermore, we target to have a defensive tilt in our portfolio, characterized by the ex-ante beta of lower than 1. Our investment discipline leads to a relatively low turnover ratio of stocks in the fund's portfolio. Last but not least, we incorporate ESG criteria in every step of our investment process and target GHG emissions intensity of the portfolio to be lower than that of the benchmark.

We run the largest overweights in sectors with higher dividend yields and/or sectors with higher quality dividends such as utilities, health care and consumer staples and the largest underweights in the lower yielding sectors consumer discretionary and information technology as well as in energy, where we have currently no exposure due to the high GHG emissions intensity of the stocks in the sector.

Information about the environmental or social characteristics promoted by the Subfund is available in the Annex of this Report.

Credit Suisse (Lux) European Entrepreneur Equity Fund

Despite geopolitical tensions around the war in Ukraine and a slow-down in economic momentum in China, the eurozone economy held up well especially in the former crisis ridden economies of the South. Political reforms, European Union recovery funds, a strong tourist season and exposure towards consumer sectors that benefited from excess savings deployment were a tailwind. Consequently, eurozone equity indices hit new all-time highs, driven especially by the good performance of semiconductor companies, financial stocks and large cap industrial companies. A resilient economic picture, higher interest rates, the global diversification in revenues from some of the largest European industrial companies and the artificial intelligence momentum were the main market drivers.

The CS European Entrepreneur Equity subfund reported +12.98% during the reporting period for the retail EUR B share class net of fees, 5.81% below its respective reference index, the MSCI EMU Total Return Index. In an environment of cyclical recovery characterized by a higher for longer interest rates regime the fund underperformed mainly for two reasons: First, small caps underperformed large caps. The fund runs a dedicated small and mid cap bias and this segment of the market underperformed our reference index. This was especially visible among industrials where large cap index heavy weights outperformed smaller niche players we tend to invest in. Second, financials continued to outperform. Our universe materially under-indexes in banks and insurances, both sectors that benefit significantly from an environment of higher interest rates. The fund performed well in communication services, where event ticketing provider CTS Eventim was among our best contributors. Also in IT the fund outperformed the benchmark despite a significant underweight in semiconductors stock, confirming a good stock-picking contribution for a number of well-run family-owned names.

Information about the environmental or social characteristics promoted by the Subfund is available in the Annex of this Report.

Credit Suisse (Lux) Eurozone Quality Growth Equity Fund (until 03.05.2024)

Credit Suisse (Lux) Eurozone Quality Growth Equity Fund has been liquidated as at 03.05.2024.

Credit Suisse Investment Partners (Lux) Global Balanced Convertible Bond Fund

The period under review was characterized by high volatility as macro uncertainty, persistent inflation and high interest rates coupled with rising geopolitical tensions contrasted with improving corporate fundamentals. Despite a noticeable market correction between August and October 2023, the overall trajectory remained positive. The ongoing outperformance by large-capitalized companies versus their small and mid-cap counterparts persisted, with companies related to artificial intelligence (AI) demonstrating the strongest performance. This trend was somewhat unfavorable for global convertible bonds, where small and mid-caps comprise a large portion of the investment universe, leading to reduced upside participation during the observed period.

The fund outperformed its benchmark in a challenging market environment, while maintaining a balanced risk profile. Most of the outperformance was achieved in the final three months of the observation period, during which several high-conviction investments showed positive developments. The fund's overall equity sensitivity ended the period at 50%, 3 percentage points higher to where it started. More opportunities surfaced, leading to an 8-percentage point increase in active share. Largest relative contributors were high-conviction positions in Bharti Airtel, Safran and Spotify Technology. On the other side of the spectrum were our high-conviction positions in Carnival, Li Auto and Exact Sciences that had the largest drag on the relative result. Whichever direction the next turn of events takes us, we remain confident that our balanced, high-conviction convertible bond strategy continues to provide convexity and exposure to fundamentally undervalued convertible bonds.

Information about the environmental or social characteristics promoted by the Subfund is available in the Annex of this Report.

Credit Suisse (Lux) Global Quality Dividend Equity Fund (previously Credit Suisse (Lux) Global Dividend Plus Equity Fund)

Global equity markets as measured by the MSCI World TR net index in USD trended sideways from the end of May 2023 to the end of October 2023. Since the end of October 2023, global equity markets steadily advanced, closing the reporting period clearly in the positive territory.

The reporting period was characterized by geopolitical uncertainties such as the war between Russia and the Ukraine, the war between the Hamas and Israel as well as the tensions between China and the USA regarding Taiwan. On the macro front, headline inflation numbers gradually declined in major economies such as the USA, Euro area and the UK in the first half of the reporting period, but remained stickier than expected in the second half of the reporting period. Major central banks such as the US Federal Reserve (Fed), European Central Bank (ECB) and Bank of England (BoE) continued to gradually hike interest rates in the first few months of the reporting period, but kept them flat since September 2023. Our investment discipline remains unchanged. Hence, we invest in stocks which have not only an attractive dividend yield but where we expect the dividend payment to be sustainable over time. Typically, these are stocks of companies which according to our analysis run a solid balance sheet and do cover the dividend payouts by the generation of solid earnings and cash flows. At the same time, we continue to target a dividend yield on the portfolio level that is higher than the dividend yield of the respective benchmark. Furthermore, we target to have a defensive tilt in our portfolio, characterized by the ex-ante beta of lower than 1. Our investment discipline leads to a relatively low turnover ratio of stocks in the fund's portfolio. Last but not least, we incorporate ESG criteria in every step of our investment process and target GHG emissions intensity of the portfolio to be lower than that of the benchmark.

We run the largest overweights in sectors with higher dividend yields and/or sectors with higher quality dividends such as consumer staples, utilities and health care and run the largest underweights in the lower yielding sectors information technology and consumer discretionary as well as in energy, where we have currently no exposure due to the high GHG emissions intensity of the stocks in the sector.

Credit Suisse (Lux) Global Property Total Return Equity Fund (until 09.06.2023)

Credit Suisse (Lux) Global Property Total Return Equity Fund has been liquidated as at 09.06.2023.

Credit Suisse (Lux) Global Value Equity Fund

In the first half of the Subfund's financial year, equity markets moved mainly sideways as revenue growth rates of many companies cooled down following the post-pandemic recovery and tighter monetary conditions. During the second half of the financial year, stock markets across the globe showed a relentless march upwards, dominated by a few very large, popular stocks. We usually greet such strong positive price momentum with a healthy dose of skepticism, especially when it is explained and justified by groundbreaking new technologies, concepts or possibilities that will supposedly revolutionize the world. We stick to our knitting and diligently search for overlooked or untrendy companies that consequently can be purchased at a bargain price.

Investing strictly from a bottom-up perspective, the Subfund's portfolio structure and positioning have not materially changed compared to the previous year. Our current regions of concentration continue to be mainly found in Europe, Japan and select emerging markets. Sector-wise we place a big emphasis on materials, capital goods and traditional media. True to our classic Graham & Dodd value approach, we continue to hold equities with attractive margins of safety in investment areas that are neglected, shunned or misunderstood by other market participants. Representative examples within the Subfund are: capital-intensive engineering firms with "lumpy" and thus difficult-to-forecast revenues and order flow; "messy" conglomerates and holding companies trading at big discounts to their sum-of-the-parts worth; and underappreciated land ownership or similarly neglected asset values hidden on the balance sheet of less well-known companies.

Credit Suisse (Lux) Infrastructure Equity Fund

Despite the looming headwind of high interest rates on global economic growth, central banks maintained their tightening measures to curb inflation. As a result, financial markets only began to perform notably in the fourth quarter of 2023 as confidence grew that the US economy was heading for a soft landing. Market sentiment was also boosted by good corporate earnings, growing investment in artificial intelligence by technology companies and signs that the rate-cutting cycle was gaining momentum. Triggered by rising waste and commodity prices, the waste management and oil & gas storage and transportation sectors were clearly the best performers, followed by multi-utilities and seaports. Conversely, renewable energies, towers and power generators were hit hardest by rising interest rates, the latter also due to lower electricity prices.

The portfolio continued to focus on pure infrastructure players that operate long-term infrastructure assets in markets with high barriers to entry and inelastic demand. Climate change prompts a strong focus on sustainability, as the world moves toward net zero emissions. Significant infrastructure spending is required globally, and themes like clean energy, 5G, and e-mobility continue to have strong structural growth drivers. Rising interest rates combined with declining economic growth outlook prompted us to reduce shares of utilities and cyclical transportation companies in favor of oil & gas storage & transportation stocks triggered by firm commodity prices, as well as communication infrastructure stocks. The latter benefited from the emerging boom in artificial intelligence. In utilities, we primarily reduced our exposure to electric, gas, and multi utilities, while increasing our exposure to renewables and waste recycling. In the transportation segment, we reduced our exposure to airports and toll roads in favor of railways. In the telecommunication segment, we clearly focused on data centers at the expense of towers.

Credit Suisse (Lux) Italy Equity Fund (until 13.10.2023)

Credit Suisse (Lux) Italy Equity Fund has been liquidated as at 13.10.2023.

Credit Suisse (Lux) Japan Value Equity Fund (until 29.02.2024)

Credit Suisse (Lux) Japan Value Equity Fund has been liquidated as at 29.02.2024.

Credit Suisse (Lux) Robotics Equity Fund

In the 12-month period ending 31 May 2024 equity markets have advanced materially, despite a higher rate environment. A large part of the performance was driven by continued excitement around artificial intelligence (AI), particularly, the infrastructure portion: semiconductors, data center equipment and related services, while corporate and professional AI-enabled applications are not mainstream just yet. Factory, warehouse and laboratory automation largely continued to lag, continuing to deal with post-COVID inventory levels and accelerated ordering from supply-chain shortages.

The Credit Suisse (Lux) Robotics Equity Fund slightly underperformed the reference MSCI World ESG Leaders Index over this 12-month period. Like last year, positive contributions to the portfolio were concentrated around the semiconductor value chain – specialty semiconductors, production equipment and design software, driven by market focus on AI beneficiaries, as well as semiconductor companies navigating inventory situations. Other notable mentions include mission-critical software vendors tied to physical and digital operations. Detractors include a mix of enterprise software, autos-related semiconductors, healthcare and recycling automation companies, and component manufacturers, with most of these companies combating the expected and real inventory situations. Therefore, our strategy gives investors focused, "pure-play" exposure to robotics and automation opportunity, while providing sector, geography and end-market exposure diversification.

Information about the environmental or social characteristics promoted by the Subfund is available in the Annex of this Report.

Credit Suisse (Lux) Security Equity Fund

The last reporting year (from May 31st 2023 to May 31st 2024) ended with a positive absolute performance, despite the fact that ongoing geopolitical issues (e.g. Russia – Ukraine, Taiwan – China), fears about potential trade wars or the still stronger than expected inflation rates dominated the daily newsflows. While the inflation rates seemingly peaked in mid-2022 in major markets, the overall inflationary pressure remains still high, but, positively, is declining.

During the reporting period, the CS (Lux) Security Equity Fund underperformed against the MSCI World ESG Leaders index. The main reason is that segments such as the semiconductor or obesity area, which are not in the investment universe of the security and safety segment, were the major positive performance contributors in the reference index.

In the security & safety space, companies are continuing to gain market share by growing their business in the high single digits revenue growth and in the low-double digits earnings growth rates. One growth driver is e.g. the emergence of cloud solutions: Cloud-based solutions have become the technology of choice for companies looking to gain the agility and flexibility needed to accelerate innovation and meet the expectations of today's modern consumers. Organizations are transitioning from on-premise devices to cloud or hybrid cloud solutions, where a significant portion of their data is stored in the cloud. In addition, physical security continues to evolve from being seen as a tool for mitigating risks to playing a much more significant role in organizations' digital transformation. We think these trends are continuing.

In the short run a key question from a macroeconomic point of view is in which direction the inflation and the interest rates will go. On the one hand side the rise in long-term US Treasury yields since summer 2020 has put pressure on high multiple companies because higher yields reduce the present value of companies' future cash flows and earnings, undercutting the rich valuations of fast-growing companies in particular. On the other hand, there are signs of a macroeconomic slowdown. In addition, geopolitical tensions such as the current escalation of the crisis in Ukraine - Russia or China - Taiwan.

We are focused on the long term: The structural growth drivers are still intact, given the persistent uncertainty about the current state of the economy and the geopolitical situation in the world. We think the security and safety theme remains very attractive for long-term oriented investors with an investment horizon of 7 - 10 years: Technological innovation, the ongoing digitization of our society, the need to protect our critical infrastructures as well as the increasing free movement of goods, capital and people are the structural growth drivers. Additionally stricter regulatory trends (such as GMP Annex 1, GDPR, CCPA or PSD2) are likely to remain.

This explains why our five investment themes within the security and safety segment stay attractive in the long run. In the short run we cannot do much about the volatility and the cyclical nature of the market. Therefore, we continue to follow a balanced approach by favoring companies which have a strong market position, ability to increase margins as well as to grow earnings. As a result, we believe the fund is an attractive investment opportunity for patient investors willing to capture a long-term growth trend with strong fundamentals.

Information about the environmental or social characteristics promoted by the Subfund is available in the Annex of this Report.

Credit Suisse (Lux) Small and Mid Cap Alpha Long/Short Fund

During the fiscal period 2023/2024 the fund's EUR B share class reported a net return of -1.18%. This performance has to be seen in the context of our core German small and mid-equity market which was among the worst performing equity markets in the Western world with the MDAX index up only 0.68% with a relatively low volatility. Both conditions taken together were a headwind for our strategy. There was no beta tailwind and a low volatility meant that also trading opportunities were subdued. The German export-oriented economy has been suffering the global manufacturing downturn due to its traditional focus on the production and export of highly cyclical goods. Also, some energy-intensive lines of production, for example the sizeable chemicals sector continued to suffer from high uncertainty about demand and energy sourcing. Unlike Germany, most of other Euro countries especially in the South have been reaping rewards from political reforms implemented in the aftermath of the euro crisis, access to European recovery funds, a solid tourist season post pandemic and a nice exposure to consumer sectors especially in the high-end part of the market.

Our main positive long contributors were real-estate company LEG Immobilien and event ticketing provider CTS Eventim. LEG benefited from a peaking interest rates environment which led to stabilization of real estate valuations and helped LEG to re-rate, as the company owns large residential portfolios that are seen to be more resilient due to supportive demographic and immigration trends that should support rental income over time as regulation adapts to higher inflation rates. CTS Eventim has benefited from a good and sustainable line-up of events in Germany and in Europe. CTS Eventim has entered the very attractive US market, where regulators would like to break the monopolistic position of Live Nation. Our worst long contributors were Vivoryon Therapeutics and hospital software provider Compugroup. Vivoryon was down as a drug study devoted to treat Alzheimer's disease failed. Compugroup was down as higher investments and inflationary pressure on its costbase forced management to issue profit warnings and disappointed an investor base that was used on a steady delivery of profitable growth over time. In the short book our best contributors were Tomra and Rentokil, our worst contributors Philips and Morphosys. Recycling company Tomra suffered a significant slowdown in order intake with the decline in recycled PET prices being an important factor for the business case. Facilities management company Rentokil was down as it is digesting the big Terminix acquisition in an environment of macro slow down and lower demand particularly within its residential business. Philips jumped on the announced settlement of the personal injury litigation which has removed an important overhang for the stock. Morphosys's shares re-rated as Novartis acquired the company.

Information about the environmental or social characteristics promoted by the Subfund is available in the Annex of this Report.

Credit Suisse (Lux) Small and Mid Cap Germany Equity Fund

In the fiscal year 2023/2024, German mid cap equities reported a flat performance with the MDAX up 0.68% with a relatively low volatility. The German export-oriented economy has been suffering the global manufacturing downturn due to its traditional focus on the production and export of highly cyclical goods. Also, some energy-intensive lines of production, for example the sizeable chemicals sector continued to suffer from high uncertainty about demand and energy sourcing.

The subfund outperformed its benchmark for a relatively low tracking error risk taken. The positive relative performance was mainly a result of stock picking as the fund was about neutral positioned versus the benchmark in terms of beta and with little sector bets. Among our best attributors were our underweight in Hensoldt and our overweight in Scout24. Hensoldt produces sensor systems, offering space radars and electronic warfare systems. We did not have any position, but the benchmark position suffered a bit at the end of the reporting period by the peace conference held in Switzerland to end the war in the Ukraine. The provider of an online platform for renting, buying, and selling of real estate Scout24 profited from a resilient fee driven business model and the outlook for lower interest rates providing the basis for the real estate transaction market to pick up again. Among our worst attributors were our underweights in construction software provider Nemetschek and mobile communication service provider Freenet. Our underweight in Nemetschek did not pay out. The valuation appeared rather high, but the company could surprise positively on earnings. Our underweight in Freenet did not pay out as well as Freenet showed first success in building up a new TV streaming business aside its low growth main mobile communication services business.

Information about the environmental or social characteristics promoted by the Subfund is available in the Annex of this Report.

Credit Suisse (Lux) Small Cap Switzerland Equity Fund (until 04.04.2024)

Credit Suisse (Lux) Small Cap Switzerland Equity Fund has been liquidated as at 04.04.2024.

Credit Suisse (Lux) Systematic Index Fund Balanced CHF
Credit Suisse (Lux) Systematic Index Fund Growth CHF
Credit Suisse (Lux) Systematic Index Fund Yield CHF

The reporting period from May 31, 2023 to May 31, 2024 exhibited a very good market environment for risky assets. Economic growth surprised positively despite substantial policy rate hikes by the major central banks and equity markets climbed up in June and July. Despite encouraging trends in corporate earnings, equities started to reverse and suffered until end of October. Gold was a top performer in October as is expected in times of geopolitical tensions. Dovish communication by the FOMC in November and falling inflation proved to be the good news markets have been waiting for and led to the best month for US Treasuries since 1980. Falling yields in turn added to the relative appeal of stocks and triggered an intense rally which extended into the end of the reporting period.

The fund started the reporting period with a above neutral allocation to equities, commodities and REITs. This came at the expense of allocation to investment grade bonds. During August 2023, the view on equities became less positive and equities had been reduced accordingly. The model upgraded risky assets again in mid-November and at the end of the reporting period, the allocations to equities, commodities and REITs were still above neutral.

Information about the environmental or social characteristics promoted by the Subfund is available in the Annex of this Report.

Credit Suisse (Lux) Thematic Opportunities Equity Fund

The reference index performed well over the reporting period, driven by a strong performance of the semiconductor space. The excitement about generative artificial intelligence and potential use cases propelled shares in companies such as NVIDIA, a key supplier of semiconductors needed to run artificial intelligence algorithms. On the inflation front, central banks largely maintained a contractionary policy as the inflation proved to be more entrenched than initially expected. The US Federal Funds Target Rate remained between 5.25 and 5.5% over the reporting period, with expectations for rate cuts turning out to be premature. The still-elevated interest rate environment and the lack of any prospect of an interest rate cut weighed particularly on small and mid-cap companies. The Israel-Hamas conflict that started in October 2023 kept investors concerned about a potential escalation and its impact on global markets.

The Credit Suisse (Lux) Thematic Opportunities Equity Fund delivered a positive absolute return over the reporting period. Relative to the reference index the fund underperformed. The main reasons for the underperformance include the high concentration of semiconductor companies in the index, which drove a significant part of its performance. Given our thematic approach, many of the semiconductor names are not part of the investment universe. Compared to the index the fund was thus underweight semiconductors. In addition, the fund mainly invests in innovative fast-growing small to mid-cap companies, which especially suffered in the still-elevated interest rate environment. Our strategy provides investors with a concentrated exposure to companies that stand to benefit from long-term, secular growth trends such as the demographic change, sustainability, robotics and automation, or digitalization. Given the continuing relevance of these trends, we remain highly confident in the outlook for our companies.

Remuneration

This disclosure should be read in conjunction with the Credit Suisse Compensation Policy (available on the Group's website – <https://www.credit-suisse.com/media/assets/about-us/docs/our-company/our-governance/compensation-policy.pdf>), which provides more information on the remuneration principles and policies.

Total Remuneration UCITS

At 31 December 2023, Credit Suisse Fund Management S.A. hereafter "CSFM" had total assets under management of CHF 37.9bn, of which CHF 30.8bn were in UCITs. The aggregated gross remuneration data that follows reflects amounts paid in respect of performance during 2023.

Staff remuneration for the financial year ending 31 December 2023

Total remuneration for the financial year ending 31 December 2023 paid by CSFM to 30 beneficiaries	CHF 4,349,067.62 made up of: - CHF 3,751,890.69 fixed remuneration - CHF 597,176.93 variable remuneration
<i>Which includes:</i>	
Remuneration paid to Senior Management	CHF 1,493,947.69
Remuneration paid to Control Functions	CHF 721,100.69
Remuneration paid to other staff members whose actions have a material impact on the risk profile of the funds managed	n/a (*)

(*) To avoid disclosure of remuneration figures of individual employees, this category is consolidated under category "Control Functions".

Total remuneration for the financial year ending 31 December 2023 paid by the UCITs fund to 2 beneficiaries	CHF 23,527.86, made up of: - CHF 23,527.86 fixed remuneration - CHF 0 variable remuneration
<i>Which includes:</i>	
Remuneration paid to Senior Management	CHF 23,527.86
Remuneration paid to Control Functions	CHF 0
Remuneration paid to other staff members whose actions have a material impact on the risk profile of the fund	CHF 0

Fixed remuneration consists of Directors fees paid to the Members of the Board, salaries and benefits paid. Variable remuneration consists of annual bonuses paid in accordance with remuneration policies, including remuneration paid directly by the fund to the staff, e.g. through performance fees, if any.

The annual gross amounts of fixed and variable remuneration have been aggregated.

The implementation of the Compensation Policy is, at least annually, subject to review by the Internal Audit function for compliance with the policies and procedures for remuneration adopted by the Board of Directors of CSFM.

Delegates remuneration for the financial year ending 31 May 2024:

Credit Suisse Fund Management S.A. is not paying remuneration to the Identified Staff of the Delegates (portfolio management or risk management activities).

Total remuneration for the financial year ending 31 May 2024 paid by the UCITs to the Delegates (portfolio management or risk management activities).	CHF 35,891,470.01 made up of: - CHF 35,891,470.01 Management fees - CHF 0.00 Performance fees
---	--

The implementation of the Compensation Policy is, at least annually, subject to review by the Internal Audit function for compliance with the policies and procedures for remuneration adopted by the Board of CSFM.

During 2023, no material changes were made to the remuneration policy.

General information in relation to Securities Financing Transactions ("SFT") and Total Return Swaps ("TRS")

Types of SFTs and TRS

As at 31.05.2024, the Company is engaged in Securities Lending and Total Return Swaps.

Re-use of collateral

The Company does not re-use collateral in relation to securities financing transactions. There is no cash collateral reinvestment.

Safekeeping of collateral

The safekeeping of collateral is done by Credit Suisse (Luxembourg) S.A (the "Depositary Bank"). The collateral relating to transactions in TRS is held in segregated accounts; the collateral received from securities lending activities are held in a pool.

Settlement and clearing

The settlement and clearing of securities financing transactions occur bilaterally.

Maturity tenor and collateral

The maturity tenor of the SFTs is always open maturity. The maturity tenor of the related collateral is disclosed in the section below.

Complementary information on securities lending activities

As per 31.05.2024, the Subfunds exclusively participated in the security lending system with Credit Suisse (Switzerland) Ltd., Zurich (the "principal"). The amount of securities on loan as a proportion of total lendable assets defined as excluding cash and cash equivalents and as a proportion of the Total Net Assets are disclosed in the table below. The amount of assets engaged in each type of SFTs, the counterparties, the information on collateral and the data on return and cost can be found in the Notes pages of this report.

Subfund	CCY	Amount of securities on loan as a proportion of total lendable assets (in %)*	Amount of securities lending as a proportion of Total Net Assets (in %)

Total Return Swaps ("TRS")

The details of the TRS (name of the counterparties, country of the counterparties, volume of transactions) held by each Subfund as of the reporting date are disclosed in the Technical Data and Notes section of each Subfund in this report.

The table below shows the amount of assets engaged in TRS, split between payable and receivable, by each Subfund at the reporting date, categorized by maturity tenor. The maturity tenor refers to the maturity date of the Total Return Swap as of the reporting date.

Credit Suisse (Lux) CommodityAllocation Fund**Amount of assets engaged in TRS (in USD)**

Maturity tenor of TRS	Absolute amount of payable/receivable on TRS (in USD)	As a proportion of Total Net Assets (in %)
Payable 1 to 3 month	144,449,541.99	97.71%
Receivable 1 to 3 month	2,000,000.01	1.35%
Total	146,449,542.00	99.07%

There are no cost associated in these transactions, as included in the spread of each contract.

The maturity tenor of TRS is held in cash and has an open maturity.

Transparency of the promotion of environmental or social characteristics and of sustainable investments

As requested in Art. 11(1) of Regulation (EU) 2019/2088 (SFDR), Subfunds as referred to in Art. 8 of that Regulation, shall describe the extent to which environmental or social characteristics are met. Products as referred to in SFDR Art. 9 shall describe the overall sustainability-related impact of the Subfund by means of relevant sustainability indicators.

For Subfunds falling under Art. 8 or 9 of SFDR the respective information are disclosed below.

Subfunds not falling under Art. 8 or 9 of SFDR are not listed below. The investments underlying those Subfunds do not take into account the EU criteria for environmentally sustainable economic activities.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Credit Suisse (Lux) Asia Pacific Income Equity Fund
The Subfund is liquidated since 21.08.2023.

Legal entity identifier: 549300U5JP35W6LWIM45

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This Subfund promotes environmental, social and governance (ESG) characteristics (within the meaning of Art. 8 of Regulation (EU) 2019/2088).

The Management Company and the Investment Manager applied the Credit Suisse Asset Management (CSAM) Sustainable Investing Policy to this Subfund.

This Subfund promoted the following environmental and social characteristics:

- to invest into companies that comply with international treaties on controversial weapons (norms-based exclusions on direct investments)
- not to invest into companies that derive more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment (values-based exclusions on direct investments)
- not to invest into companies that either derive more than 20% of their revenue from tobacco distribution or conventional weapons support systems and services (values-based exclusions on direct investments)
- not to invest into companies that either derive more than 20% of their revenues from coal (coal mining and coal-based electricity generation) and 5% of their revenues in arctic oil and gas, or 10% of their revenues from oil sands (values-based exclusions on direct investments)
- adherence to, and conducting business activities in accordance with, international norms such as the "United Nations Global Compact Principles" (UNGCP) (business-conduct exclusions on direct investments)
- higher exposure to investments that have better ESG profile and fewer ESG controversies over their investment cycle (ESG Integration)
- contribution to good governance and sustainable practices through proxy voting and engagement with investee companies in line with Credit Suisse Asset Management's Sustainable Investing Policy (Active Ownership)

Derivatives were not used to attain the environmental or social characteristics.

Please find further information on ESG Integration, ESG Exclusions and Active Ownership below in the question "What actions have been taken to meet the environmental and/or social characteristics during the reference period?" and online at www.credit-suisse.com/esg.

● *How did the sustainability indicators perform?*

The Subfund is liquidated since 21.08.2023.

● *...and compared to previous periods?*

The table below presents data from the previous reference period (as of 31.05.2023). The data may differ compared to the previously published report as the most recently available data was taken into account, as the data provider(s) may have retroactively updated some figures. While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

Sustainability Indicator*	Portfolio	Indicator Output
ESG Rating	AAA: 10.87%, AA: 9.53%, A: 42.11%, BBB: 14.54%, BB: 5.40%, B: 8.42%, CCC: 0.00%, Not ratable**: 2.72%, No data coverage**: 6.42%	Investment exposure by ESG Rating: AAA (highest): 0–100% AA: 0–100% A: 0–100% BBB: 0–100% BB: 0–100% B: 0–100% CCC (lowest): 0–100%
Environmental pillar score	5.33	Portfolio aggregate environmental pillar score: 1 (lowest) – 10 (highest)
Social pillar score	5.44	Portfolio aggregate social pillar score: 1 (lowest) – 10 (highest)
Governance pillar score	4.82	Portfolio aggregate governance pillar score: 1 (lowest) – 10 (highest)
ESG controversy flag	Green: 56.31%, Yellow: 19.25%, Orange: 16.52%, Red: 1.71%, Not ratable**: 2.72%, No data coverage**: 3.50%	Investment exposure by ESG controversy flag: Green: 0–100% Yellow: 0–100% Orange: 0–100% Red: 0–100%
CSAM ESG exclusions***	Pre- and post-trade checks are in place to detect investments that breach the ESG exclusions. Any detected breach is escalated and remedied.	This indicator reflects that the portfolio complied with the applicable ESG exclusions as described in the exclusion section of the website (during the entire reference period, CSAM adhered to ESG exclusion criteria, as stated in the CSAM Sustainable Investing Policy).

* None of the Sustainability Indicators were subject to an assurance provided by an auditor or a review by a third party.

** These categories can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

*** Note that the amount of investments that were restricted due to the ESG exclusions depend on the investable universe of the Subfund.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The Subfund is liquidated since 21.08.2023.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Subfund is liquidated since 21.08.2023.

— — ***How were the indicators for adverse impacts on sustainability factors taken into account?***

During the reference period, the PAI Indicators applied by CSAM to identify investments which qualify as SFDR Sustainable Investments in line with CS SFDR Sustainable Investment Methodology included a set of criteria and thresholds to determine if an investment passed the DNSH condition as follows:

Investments must not:

1. have a significant negative contribution to climate change. This criterion makes use of an indicator that flags the biggest emitters of greenhouse gas globally and relates to PAI 1, 2, 3 and 15.
2. be subject to norms, values and business conduct exclusions and other investment restrictions which address PAI 4, 10, 14 and 16.
3. be subject to severe ESG controversies which address PAI 7 and 10 where applicable.
4. be strongly lagging its industry peers in overall ESG performance. This criterion has been applied to cover the remainder of the PAI to the extent possible.

— — ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Sustainable Investments were aligned with the 'OECD Guidelines for Multinational Enterprises' and the 'UN Guiding Principles on Business and Human Rights'. The alignment was assessed as part of the CS ESG Exclusion framework. Companies that exhibit severe weaknesses in business conduct, particularly with regard to breaches of the 'United Nations Global Compact Principles' (UNGC) and companies placed on the watchlist, but with no immediate exclusion, were flagged not to be considered SFDR Sustainable Investments due to DNSH.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The Subfund is liquidated since 21.08.2023.

What were the top investments of this financial product?

The Subfund is liquidated since 21.08.2023.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 31.05.2024

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

The Subfund is liquidated since 21.08.2023.

● *In which economic sectors were the investments made?*

The Subfund is liquidated since 21.08.2023.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Subfund is liquidated since 21.08.2023.

● *Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?*

Yes

In fossil gas

In nuclear energy

No

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- *What was the share of investments made in transitional and enabling activities?*

The Subfund is liquidated since 21.08.2023.

- *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

The Subfund is liquidated since 21.08.2023.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Subfund is liquidated since 21.08.2023.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The Subfund is liquidated since 21.08.2023.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Subfund is liquidated since 21.08.2023.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To attain the environmental or social characteristics promoted by this Subfund, this Subfund applied ESG Exclusions, ESG Integration and Active Ownership.

This Subfund excluded investments in companies of the following three categories:

- Norms-based Exclusions

This Subfund excluded companies that failed to comply with international treaties on controversial weapons such as the Convention on Cluster Munitions, the Chemical Weapons Convention, the Biological Weapons Convention, the Treaty on the Non-Proliferation of Nuclear Weapons (NPT). In addition, it excluded companies that are recommended for exclusions by the Swiss Association for Responsible Investments (SVVK-ASIR) in respect to APM (anti-personnel mines), cluster munitions and nuclear weapons (outside of NPT).

- Values-based Exclusions

This Subfund excluded companies that derived more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment. It excluded companies that derived more than 20% of their revenue from tobacco distribution and conventional weapons support systems and services. In addition, a revenue limit of 20% applied to investments in coal (coal mining and coal-based electricity generation), a revenue limit of 5% applies to investments in arctic oil and gas as well as a revenue limit of 10% applies to investments in oil sands.

- Business-conduct Exclusions

Companies found to systematically violate international norms, where the breaches were particularly severe, or where management was not open to implement necessary reforms, were placed on a watch list, and may have been excluded from the Credit Suisse-wide investment universe. This process was governed by a dedicated committee that maintained the list of excluded companies and was responsible for ensuring that the list is communicated to investment teams in a timely manner.

- Restrictions related to LuxFLAG ESG label

To comply with the LuxFLAG ESG label, this Subfund excluded additionally the following companies from the investment universe:

- Tobacco, tobacco-related products and supporting services: Companies that derive more than 5% of their annual revenue from production and all companies that derive more than 15% of their annual revenue from sales and distribution are excluded.

ESG Factors were integrated into the investment process in the following four main steps:

- Identification of material ESG Factors

First, the Investment Manager used materiality frameworks to identify those ESG Factors that are relevant to the investment strategy. Materiality frameworks are concepts that help to identify sustainability-related issues and opportunities that are likely to affect the financial condition or operating performance of companies within an industry. Material factors have been furthermore assessed based on the Subfund’s sector and geographical exposure. Second, the Investment Manager prioritized the material factors that were most relevant to the subsequent investment decisions based on the portfolio’s current market exposure.

- ESG security analysis

Based on the identified material ESG Factors, the Investment Manager performed security research across the Subfund’s investment universe. The Investment Manager made use of ESG ratings from third-party service providers and combined them with CSAM’s proprietary analyses and information. These included, e.g. ESG related news, ESG ratings and scores, ESG-related controversies, and ESG trends.

The ESG data are fully integrated in the portfolio management software. The CSAM sustainable investing team may offer additional support, where needed, and advise on access to other ESG data providers. The outcome of the ESG analysis of individual securities, combined with financial research, enabled the Investment Managers to make ESG-adjusted risk/return assessments. This enabled the Investment Manager to compare securities on an ESG-adjusted basis and to evaluate whether to keep certain securities in the portfolio or to sell them during the security selection and portfolio implementation stage. The ESG security analysis has been updated periodically.

- Security selection and portfolio implementation

Based on the identified material ESG Factors and the ESG-adjusted security analysis, the Investment Manager constructed a portfolio in accordance with the Subfund's investment process and principles. The ESG-adjusted security analysis combined with portfolio construction considerations has been used to determine appropriate portfolio weights that reflected the ESG-adjusted risk/return profile of the analyzed securities.

The research process might make use of dedicated ESG questionnaires with potential follow-up meetings with investee companies in case incomplete data is available from third-party ESG data providers.

- Portfolio monitoring

The Investment Manager monitored the ESG Factors periodically to detect significant changes in the ESG Factors of the underlying securities. They regularly reassessed the portfolio, taking into consideration financial and ESG metrics, and consequently decided whether to increase or decrease positions in the portfolio.

- Engagement

CSAM engaged with investee companies with the aim of increasing its impact on sustainability issues. Selected companies that were able and willing to take action were subject to engagement and CSAM sought to preserve and/or enhance the value of the companies they invested in, through engagement with issuers. The Active Ownership team defined the topics and issues CSAM wanted to discuss with investee companies. The resulting engagement activities for the reference period of this SFDR annex to the annual report were defined using certain criteria and aimed at companies in which CSAM held considerable investments through its funds. More information about the engagement activities and the most current active ownership report of CSAM can be found online at: www.credit-suisse.com/esg.

- Proxy Voting

Voting rights have been exercised for investee companies which have met the criteria for proxy voting as explained at www.credit-suisse.com/esg.

How did this financial product perform compared to the reference benchmark?

The Subfund did not use a reference benchmark for the purpose of attaining the environmental and/or social characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

Not applicable.

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

- *How did this financial product perform compared with the reference benchmark?*

- *How did this financial product perform compared with the broad market index?*

Not applicable.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Credit Suisse (Lux) Digital Health Equity Fund

Legal entity identifier: 549300U9YHD0HTSG6828

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 21.81% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This Subfund promotes environmental, social and governance (ESG) characteristics (within the meaning of Art. 8 of Regulation (EU) 2019/2088).

The Management Company and the Investment Manager applied the Credit Suisse Asset Management (CSAM) Sustainable Investing Policy to this Subfund.

This Subfund promoted the following environmental and social characteristics:

- to invest into companies that comply with international treaties on controversial weapons (norms-based exclusions on direct investments)
- not to invest into companies that derive more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment (values-based exclusions on direct investments)
- not to invest into companies that either derive more than 20% of their revenue from tobacco distribution or conventional weapons support systems and services (values-based exclusions on direct investments)
- not to invest into companies that either derive more than 20% of their revenues from coal (coal mining and coal-based electricity generation) and 5% of their revenues in arctic oil and gas, or 10% of their revenues from oil sands (values-based exclusions on direct investments)
- adherence to, and conducting business activities in accordance with, international norms such as the "United Nations Global Compact Principles" (UNGCP) (business-conduct exclusions on direct investments)
- higher exposure to investments that have better ESG profile and fewer ESG controversies over their investment cycle (ESG Integration)
- contribution to good governance and sustainable practices through proxy voting and engagement with investee companies in line with CSAM's Sustainable Investing Policy (Active Ownership)

The extent to which the environmental and/or social characteristics were met is measured by the sustainability indicators shown below.

Derivatives were not used to attain the environmental or social characteristics.

Please find further information on ESG Integration, ESG Exclusions and Active Ownership below in the question "What actions have been taken to meet the environmental and/or social characteristics during the reference period?" and online at www.credit-suisse.com/esg.

● *How did the sustainability indicators perform?*

The table below shows the output of the Sustainability Indicators applicable to this Subfund as of 31.05.2024. While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

Sustainability Indicator*	Portfolio	Indicator Output
ESG Rating	AAA: 4.00%, AA: 5.82%, A: 25.72%, BBB: 44.70%, BB: 4.73%, B: 9.00%, CCC: 1.20%, Not ratable**: 0.18%, No data coverage**: 4.65%	Investment exposure by ESG Rating: AAA (highest): 0–100% AA: 0–100% A: 0–100% BBB: 0–100% BB: 0–100% B: 0–100% CCC (lowest): 0–100%
Environmental pillar score	6.18	Portfolio aggregate environmental pillar score: 1 (lowest) – 10 (highest)
Social pillar score	4.44	Portfolio aggregate social pillar score: 1 (lowest) – 10 (highest)
Governance pillar score	5.93	Portfolio aggregate governance pillar score: 1 (lowest) – 10 (highest)
ESG controversy flag	Green: 87.51%, Yellow: 8.62%, Orange: 0.85%, Red: 0.00%, Not ratable**: 0.18%, No data coverage**: 2.84%	Investment exposure by ESG controversy flag: Green: 0–100% Yellow: 0–100% Orange: 0–100% Red: 0–100%
CSAM ESG exclusions***	Pre- and post-trade checks are in place to detect investments that breach the ESG exclusions. Any detected breach is escalated and remedied.	This indicator reflects that the portfolio complied with the applicable ESG exclusions as described in the exclusion section of the website (during the entire reference period, CSAM adhered to ESG exclusion criteria, as stated in the CSAM Sustainable Investing Policy).

* None of the Sustainability Indicators were subject to an assurance provided by an auditor or a review by a third party.

** These categories can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

*** Note that the amount of investments that were restricted due to the ESG exclusions depend on the investable universe of the Subfund.

● ...and compared to previous periods?

The table below presents data from the previous reference period (as of 31.05.2023). The data may differ compared to the previously published report as the most recently available data was taken into account, as the data provider(s) may have retroactively updated some figures. While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

Sustainability Indicator*	Portfolio	Indicator Output
ESG Rating	AAA: 2.29%, AA: 8.22%, A: 31.47%, BBB: 22.01%, BB: 20.32%, B: 12.49%, CCC: 0.00%, Not ratable**: -0.07%, No data coverage**: 3.27%	Investment exposure by ESG Rating: AAA (highest): 0–100% AA: 0–100% A: 0–100% BBB: 0–100% BB: 0–100% B: 0–100% CCC (lowest): 0–100%
Environmental pillar score	6.35	Portfolio aggregate environmental pillar score: 1 (lowest) – 10 (highest)
Social pillar score	4.51	Portfolio aggregate social pillar score: 1 (lowest) – 10 (highest)
Governance pillar score	5.85	Portfolio aggregate governance pillar score: 1 (lowest) – 10 (highest)
ESG controversy flag	Green: 91.92%, Yellow: 5.44%, Orange: 0.54%, Red: 0.00%, Not ratable**: -0.07%, No data coverage**: 2.16%	Investment exposure by ESG controversy flag: Green: 0–100% Yellow: 0–100% Orange: 0–100% Red: 0–100%
CSAM ESG exclusions***	Pre- and post-trade checks are in place to detect investments that breach the ESG exclusions. Any detected breach is escalated and remedied.	This indicator reflects that the portfolio complied with the applicable ESG exclusions as described in the exclusion section of the website (during the entire reference period, CSAM adhered to ESG exclusion criteria, as stated in the CSAM Sustainable Investing Policy).

* None of the Sustainability Indicators were subject to an assurance provided by an auditor or a review by a third party.

** These categories can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

*** Note that the amount of investments that were restricted due to the ESG exclusions depend on the investable universe of the Subfund.

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

At the end of the reference period, the sustainable investments contributed to the Social objectives below:

- Investments that generated at least 50% of their revenues from products and services that contribute to a social objective (e.g. nutrition, disease treatments, sanitation, affordable real estate, SME finance, education, connectivity etc.)

The above criteria were assessed using a quantitative methodology. If there had not been an output from the quantitative assessment (e.g. in the case of missing quantitative ESG data), investments were submitted for confirmation in a case-by-case approach based on a proprietary assessment of the criteria. A central Credit Suisse committee approved such submissions.

● How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

CSAM considered various indicators linked to principal adverse impacts on sustainability factors (PAI Indicators) and further indicators from its exclusion framework to assess whether sustainable investments caused significant harm to any environmental or social investment objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

During the reference period, the PAI Indicators applied by CSAM to identify investments which qualify as SFDR Sustainable Investments in line with CS SFDR Sustainable Investment Methodology included a set of criteria and thresholds to determine if an investment passed the DNSH condition as follows:

Investments must not:

1. have a significant negative contribution to climate change. This criterion makes use of an indicator that flags the biggest emitters of greenhouse gas globally and relates to PAI 1, 2, 3 and 15.
2. be subject to norms, values and business conduct exclusions and other investment restrictions which address PAI 4, 10, 14 and 16.
3. be subject to severe ESG controversies which address PAI 7 and 10 where applicable.
4. be strongly lagging its industry peers in overall ESG performance. This criterion has been applied to cover the remainder of the PAI to the extent possible.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Sustainable Investments were aligned with the 'OECD Guidelines for Multinational Enterprises' and the 'UN Guiding Principles on Business and Human Rights'. The alignment was assessed as part of the CS ESG Exclusion framework. Companies that exhibit severe weaknesses in business conduct, particularly with regard to breaches of the 'United Nations Global Compact Principles' (UNGC) and companies placed on the watchlist, but with no immediate exclusion, were flagged not to be considered SFDR Sustainable Investments due to DNSH.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides the exposure to all mandatory PAI from the Commission Delegated Regulation (EU) 2022/1288. The Adverse Sustainability Indicator/Metric values are calculated as an asset weighted average based on quarterly data representing the reference period from 01.06.2023–31.05.2024.

Please note that CSAM may choose or may not be able to consider and/or mitigate all of the herein reported PAI given the Subfund's investment strategy, asset class or the availability of reliable data. Consideration of PAI may be subject to change given evolving data availability and quality. Please refer to the EET for the most recent overview of which PAI are considered at Subfund level.

Please find further information on CSAM PAI Framework online at www.credit-suisse.com/esg.

Adverse Sustainability Indicator / Metric	Impact *	Eligible Assets (%) **	Data Coverage (%) ***
Indicators applicable to investments in investee companies

18. Exposure to energy-inefficient real estate assets (in percent)	n/a	0.00	0.00

* Impact: The value represents non-normalized portfolio level exposure to a given PAI indicator. This means that the PAI values use the actual weights of portfolio exposures.

** Eligible Assets: Percentage of AUM of the entire portfolio (including cash) for which the PAI is applicable. As an example, government bonds held by the Subfund cannot be measured against PAI indicators applicable to an investee company.

*** Data coverage: Percentage of AUM of the entire portfolio for which PAI indicator data is available.

**** Flags the companies with exposure to fossil fuels related activities, including extraction, processing, storage and transportation of fossil fuels.

***** The coverage of the PAI 6 are limited to the 9 high impact climate sectors defined by SFDR.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31.05.2024

Largest investments *	NACE Sector code	% Assets	Country
ZEALAND PHARMA	M. Professional, scientific and technical activities	4.33	Denmark
INSPIRE MEDICAL SYSTEMS INC	C. Manufacturing	4.16	United States of America
ZAI LAB LTD	C. Manufacturing	4.12	China
NATERA INC	C. Manufacturing	4.06	United States of America
REDCARE PHARMACY NV	G. Wholesale and retail trade; repair of motor vehicles and motorcycles	4.00	Netherlands
TRANSMEDICS GROUP INC	C. Manufacturing	3.98	United States of America
TWIST BIOSCIENCE CORP	C. Manufacturing	3.81	United States of America
VEEVA SYSTEMS INC CLASS A	J. Information and communication	3.73	United States of America

EXACT SCIENCES CORP	C. Manufacturing	3.08	United States of America
INARI MEDICAL INC	C. Manufacturing	2.88	United States of America

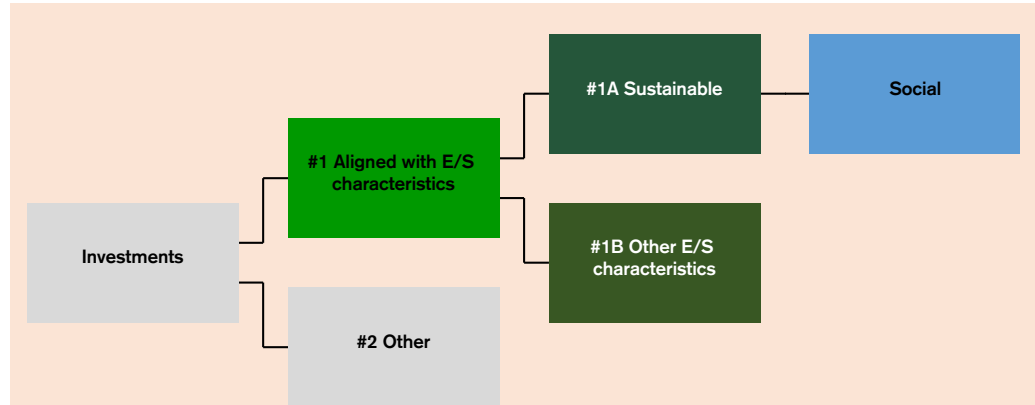

* Look-through enabled where possible, excl. cash and derivatives. Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which were neither aligned with the environmental or social characteristics, nor qualified as sustainable investments.

Please refer to the section "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?" for further information.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that did not qualify as sustainable investments.

The proportion of investments used to meet the environmental or social characteristics promoted by this Subfund (category #1 above) was 95.17% of its total net assets.

Within this category the Subfund held a proportion of 21.81% of its total net assets in sustainable investments (category #1A above) and a proportion of 73.36% of its total net assets in other E/S characteristics (category #1B above).

The proportion of investments held by the Subfund in "Other" (category #2 above) was 4.83% of its total net assets.

The data is valid as of 31.05.2024. It does not represent an average for the reference period.

● In which economic sectors were the investments made?

Subfund Sectoral Exposure

NACE Sector Code *	Portfolio Exposure **
C. Manufacturing	47.17%
G. Wholesale and retail trade; repair of motor vehicles and motorcycles	6.19%
J. Information and communication	18.40%
M. Professional, scientific and technical activities	21.93%
Q. Human health and social work activities	6.12%
Others	0.18%

* Please note that the NACE sector allocation is not used in the Subfund's investment strategy. It is provided for disclosure purposes only. For example, the Subfund's investment strategy makes use of company's revenue exposure in accordance with CSAM's ESG Exclusion framework and does not exclude companies based on their NACE sector allocation.

** Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period. The "Others" category can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

Subfund Exposure to Fossil Fuels Sub-Sectors

NACE Sector Code *	NACE name	Portfolio Exposure **
B5.1.0	Mining of hard coal	0.00%
B5.2.0	Mining of lignite	0.00%
B6.1.0	Extraction of crude petroleum	0.00%
B6.2.0	Extraction of natural gas	0.00%
B9.1.0	Support activities for petroleum and natural gas extraction	0.00%
C19.2.0	Manufacture of refined petroleum products	0.00%
D35.2.1	Manufacture of gas	0.00%
D35.2.2	Distribution of gaseous fuels through mains	0.00%
D35.2.3	Trade of gas through mains	0.00%
G46.7.1	Wholesale of solid, liquid and gaseous fuels and related products	0.00%

* Please note that the NACE sector allocation is not used in the Subfund's investment strategy. It is provided for disclosure purposes only. For example, the Subfund's investment strategy makes use of company's revenue exposure in accordance with CSAM's ESG Exclusion framework and does not exclude companies based on their NACE sector allocation.

** Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

As of 31.05.2024, the Subfund reports 0.00% exposure to sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

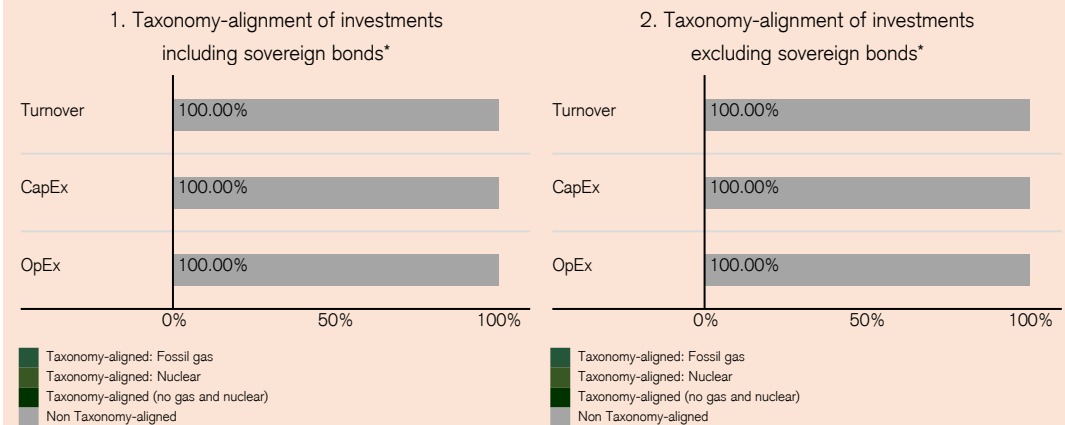

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The Subfund's reported EU Taxonomy alignment was not subject to assurance or review by a third party.

● **What was the share of investments made in transitional and enabling activities?**

Of the 0.00% of sustainable investments with an environmental objective aligned with the EU Taxonomy as of 31.05.2024, 0.00% were made in transitional activities and 0.00% in enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During the previous reference period the percentage of investments that were aligned with the EU Taxonomy were 0.00% as of 31.05.2023.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As of 31.05.2024, 0.00% of the Subfund's investments were made into sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

As of 31.05.2024, 21.81% of the Subfund's investments were made into socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

As of 31.05.2024, 4.83% of the Subfund's investments were made into "other".

Investments such as cash, derivatives and structured products may have fallen under "other" since such instruments did not contribute to the E/S characteristics of this Subfund. More information about the portfolio exposure to such investments can be found in the financial section of this annual report. Such investments did not have minimum environmental or social safeguards. They may have been used as efficient portfolio management tools, for cash management, for hedging purposes, or as an additional source of return.

Additionally, investments may have fallen under "other" if insufficient ESG-related information was available. This applied in particular to asset classes for which ESG Factors were insufficiently defined or insufficient ESG related information was available. Where possible, minimum environmental or social safeguards have been applied to these underlying securities by ensuring that CSAM ESG exclusions were adhered to.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To attain the environmental or social characteristics promoted by this Subfund, this Subfund applied ESG Exclusions, ESG Integration and Active Ownership.

This Subfund excluded investments in companies of the following three categories:

- Norms-based Exclusions

This Subfund excluded companies that failed to comply with international treaties on controversial weapons such as the Convention on Cluster Munitions, the Chemical Weapons Convention, the Biological Weapons Convention, the Treaty on the Non-Proliferation of Nuclear Weapons (NPT). In addition, it excluded companies that are recommended for exclusions by the Swiss Association for Responsible Investments (SVVK-ASIR) in respect to APM (anti-personnel mines), cluster munitions and nuclear weapons (outside of NPT).

- Values-based Exclusions

This Subfund excluded companies that derived more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment. It excluded companies that derived more than 20% of their revenue from tobacco distribution and conventional weapons support systems and services. In addition, a revenue limit of 20% applied to investments in coal (coal mining and coal-based electricity generation), a revenue limit of 5% applies to investments in arctic oil and gas as well as a revenue limit of 10% applies to investments in oil sands.

- Business-conduct Exclusions

Companies found to systematically violate international norms, where the breaches were particularly severe, or where management was not open to implement necessary reforms, were placed on a watch list, and may have been excluded from the Credit Suisse-wide investment universe. This process was governed by a dedicated committee that maintained the list of excluded companies and was responsible for ensuring that the list is communicated to investment teams in a timely manner.

- Restrictions related to the Guidelines for Responsible Investing of the Bundesverband Investment and Asset Management's (BVI)

To comply with the BVI guidelines, this Subfund excluded additionally the following companies, countries, and sectors from the investment universe:

- Military hardware: companies that derive more than 10% of their revenue from manufacturing conventional weapons, components, and support systems and services
- Sovereign issuers: serious violations of democratic and human rights based on the assessment as "not free" according to the Freedom House's index (freedomhouse.org/countries/freedom-world/scores)

- Restrictions related to LuxFLAG ESG label

To comply with the LuxFLAG ESG label, this Subfund excluded additionally the following companies from the investment universe:

- Tobacco, tobacco-related products and supporting services: Companies that derive more than 5% of their annual revenue from production and all companies that derive more than 15% of their annual revenue from sales and distribution are excluded.

ESG Factors were integrated into the investment process in the following four main steps:

- Identification of material ESG Factors

First, the Investment Manager used materiality frameworks to identify those ESG Factors that are relevant to the investment strategy. Materiality frameworks are concepts that help to identify sustainability-related issues and opportunities that are likely to affect the financial condition or operating performance of companies within an industry. Material factors have been furthermore assessed based on the Subfund's sector and geographical exposure. Second, the Investment Manager prioritized the material factors that were most relevant to the subsequent investment decisions based on the portfolio's current market exposure.

- ESG security analysis

Based on the identified material ESG Factors, the Investment Manager performed security research across the Subfund's investment universe. The Investment Manager made use of ESG ratings from third-party service providers and combined them with CSAM's proprietary analyses and information. These included, e.g. ESG related news, ESG ratings and scores, ESG-related controversies, and ESG trends.

The ESG data are fully integrated in the portfolio management software. The CSAM sustainable investing team may offer additional support, where needed, and advise on access to other ESG data providers. The outcome of the ESG analysis of individual securities, combined with financial research, enabled the Investment Managers to make ESG-adjusted risk/return assessments. This enabled the Investment Manager to compare securities on an ESG-adjusted basis and to evaluate whether to keep certain securities in the portfolio or to sell them during the security selection and portfolio implementation stage. The ESG security analysis has been updated periodically.

- Security selection and portfolio implementation

Based on the identified material ESG Factors and the ESG-adjusted security analysis, the Investment Manager constructed a portfolio in accordance with the Subfund's investment process and principles. The ESG-adjusted security analysis combined with portfolio construction considerations has been used to determine appropriate portfolio weights that reflected the ESG-adjusted risk/return profile of the analyzed securities.

The research process might make use of dedicated ESG questionnaires with potential follow-up meetings with investee companies in case incomplete data is available from third-party ESG data providers.

- Portfolio monitoring

The Investment Manager monitored the ESG Factors periodically to detect significant changes in the ESG Factors of the underlying securities. They regularly reassessed the portfolio, taking into consideration financial and ESG metrics, and consequently decided whether to increase or decrease positions in the portfolio.

- Engagement

CSAM engaged with investee companies with the aim of increasing its impact on sustainability issues. Selected companies that were able and willing to take action were subject to engagement and CSAM sought to preserve and/or enhance the value of the companies they invested in, through engagement with issuers. The Active Ownership team defined the topics and issues CSAM wanted to discuss with investee companies. The resulting engagement activities for the reference period of this SFDR annex to the annual report were defined using certain criteria and aimed at companies in which CSAM held considerable investments through its funds. More information about the engagement activities and the most current active ownership report of CSAM can be found online at: www.credit-suisse.com/esg.

- Proxy Voting

Voting rights have been exercised for investee companies which have met the criteria for Proxy Voting as explained at www.credit-suisse.com/esg

How did this financial product perform compared to the reference benchmark?

The Subfund did not use a reference benchmark for the purpose of attaining the environmental and/or social characteristics.

- *How does the reference benchmark differ from a broad market index?*

Not applicable.

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● *How did this financial product perform compared with the reference benchmark?*

● *How did this financial product perform compared with the broad market index?*

Not applicable.

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Credit Suisse (Lux) Edutainment Equity Fund

Legal entity identifier: 549300IB20RL7WAF7P09

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Sustainable investment objective

Did this financial product have a sustainable investment objective?	
<input checked="" type="radio"/> <input checked="" type="radio"/> <input checked="" type="checkbox"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> It made sustainable investments with a social objective : 98.46%	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained

The Subfund made profitable investments in companies that contributed, individually or cumulatively, to the following UN Sustainable Development Goals (SDGs):

- Goal 4: Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all.
- Goal 8: Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all.
- Goal 9: Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation.

The Subfund achieved its sustainable investment objective by investing in a pure-play investment universe of securities (the Investment team focuses on companies with more than 50% revenue exposure to the Subfund's theme) that are aligned and seeking to advance the above-mentioned UN SDGs. The Subfund assessed the investments of this universe with respect to their exposure to the UN SDGs and considered the results of this assessment in the investment process (Investing with a sustainability objective) in order to achieve the sustainable investment objective.

Furthermore, the Subfund integrated the following environmental and social characteristics to achieve its sustainable investment objective:

- The Subfund has not invested into companies that breach international treaties on controversial weapons (norms-based exclusions on direct investments)
- The Subfund has not invested into companies that derive more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment (values-based exclusions on direct investments)
- The Subfund has not invested into companies that derive more than 20% of their revenue from tobacco distribution, conventional weapons support systems or coal (i.e., coal mining and coal-based electricity generation) and 5% of their revenues in arctic oil and gas, or 10% of their revenues from oil sands (values-based exclusions on direct investments)
- The Subfund has only invested in companies demonstrating adherence to, and conducting business activities in accordance with, international norms such as the "United Nations Global Compact Principles" (UNGCP) (business-conduct exclusions on direct investments)
- The Subfund integrated ESG Factors into the investment decision process without compromising diversification and risk management. This included alignment of investments to SDGs
- Contribution to good governance and sustainable practices through proxy voting and engagement with investee companies in line with Credit Suisse Asset Management's Sustainable Investing Policy (Active Ownership)
- The Subfund met the minimum proportions for SFDR Sustainable Investments through Investments that generated at least 50% of their revenues from products and services that contribute to a social objective (e.g. education, work & full employment, economic productivity).

Derivatives were not used to attain the environmental or social characteristics.

Please find further information on the alignment with the SDGs #4, #8 and #9, ESG Exclusions and Active Ownership below in the question "What actions have been taken to meet the environmental and/or social characteristics during the reference period?", online at www.credit-suisse.com/esg.

● *How did the sustainability indicators perform?*

The table below shows the output of the Sustainability Indicators applicable to this Subfund as of 31.05.2024. While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

Sustainability Indicator*	Portfolio	Indicator Output
CSAM ESG exclusions**	Pre- and post-trade checks are in place to detect investments that breach the ESG exclusions. Any detected breach is escalated and remedied.	This indicator reflects that the portfolio complied with the applicable ESG exclusions as described in the exclusion section of the website (during the entire reference period, CSAM adhered to ESG exclusion criteria, as stated in the CSAM Sustainable Investing Policy).
Alignment of Investments to SDGs	The indicator measures the degree of alignment of the issuers (in terms of total revenue generated from a single product line or a group of homogenous products) that is sold to a distinguishable group of end customers) in the portfolio with the UN Sustainable Development Goals (SDG) listed in the product legal documentation. Credit Suisse Asset Management assesses the alignment of an issuer to SDGs relevant for the Subfund based on data from third-party data providers and apply proprietary methodology and proprietary research.	Explanation of the alignment of the investment exposure to a specific SDG (please find more information on the performance of this indicator below under the section "Alignment of Investments to SDGs").

* None of the Sustainability Indicators were subject to an assurance provided by an auditor or a review by a third party.

*** Note that the amount of investments that were restricted due to the ESG exclusions depend on the investable universe of the Subfund.*

Alignment of Investments to SDGs

The United Nations have defined 17 SDGs with five to 19 targets under each goal. This methodology does not capture positive spill-over effects a product can have on multiple targets and goals. For example, a service broadening access to education could contribute to SDG number 4 – quality education, and less directly to goals related to gender equality or decent work and economic growth. CSAM does not account for these “less direct” effects, which would over-emphasize the contribution by double-counting the positive effects. This may adversely affect the total allocation towards targets related to goals with the broadest scope and goals that are heavily interlinked with others, such as “no poverty” or “gender equality.” However, this also aims to ensure that only the most direct, visible, or significant contribution is represented. Given the thematic mandate of the portfolio, most companies will contribute primarily to SDGs number 4 (quality education) and number 8 (decent work and economic growth) under this methodology.

The overall sustainability-related contribution of the Subfund is shown below in terms of investment proportions in companies offering products and services that are aligned to SDGs. The chart below shows the contribution of investments of the Subfund to SDGs.

Contribution of investments of the Subfund to SDGs

SDG Target	SDG sub-Target	Sub-Target Portfolio alignment in %	SDG Target Portfolio alignment in % (total)
SDG 4	SDG 4.1	10.1	64.8
	SDG 4.2	4.7	
	SDG 4.3	13.3	
	SDG 4.4	35.4	
	SDG 4.5	1.3	
SDG 8	SDG 8.2	17.1	27.6
	SDG 8.5	7.6	
	SDG 8.10	2.9	
SDG 9	SDG 9.5	3.2	3.2
Not aligned with SDGs			4.4

The table shows revenues generated from a single product line (or a group of homogenous products), that corresponds to a relevant SDG, and that is sold to a distinguishable group of end customers. The outcome is calculated into portfolio weights as of 31.05.2024. While this outcome is representative of the weights throughout the year, those data do not represent an average of the portfolio weights for the entire reference period. The chart is based on a proprietary methodology to complete missing or possibly not reliable third-party data. To quantify this contribution, the Investment Team considers the proportion of total revenue generated from a distinguishable business line (i.e. a group of homogenous products) that is sold to a distinguishable group of end customers. That proportion is classified in a taxonomy table and assigned to the three SDGs that the Subfund seeks to positively contribute to, as defined in the fund prospectus of Credit Suisse (Lux) Edutainment Equity Fund.

To illustrate the Subfund's contribution to SDGs, some examples of relevant investments within the reference period are described below.

- Goal 4 (Impact Relevance: Ensuring quality education; Revenue relevance: 100% aligned with SDG 4.1): The Subfund invested in a company providing cloud-based software solutions to the education sector. These products support school administration, assist in classroom administration and enhance communication between educators, parents and students.
- Goal 4 and 8 (Impact Relevance: Access to inclusive education and equitable job market; Revenue relevance: 36% aligned with SDG 4.5 and 64% aligned with SDG 8.5): The Subfund invested in a company that operates educational facilities offering education services for children with special needs. It also operates employment centres that help and train individuals with disabilities to find a job.
- Goal 4 (Impact Relevance: Upskilling; Revenue relevance: 100% aligned with SDG 4.4): The Subfund invested in a company that offers vocational training in culinary arts, IT, auto services, and fashion and beauty. Through this, it has significantly contributed local economic growth, positioning itself as a leader and model in the local vocational education sector.
- Goal 8 (Impact Relevance: Employment opportunities; Revenue relevance: 100% aligned with SDG 8.5): The Subfund invested in a company that operates an online talent marketplace, focusing on digital-only delivery and capitalizing heavily on the largest skills gaps/most in-demand services, chiefly in technology. With that it focuses on freelancing to enable continuous learning and building experience. Through its e-commerce approach it has a transparent pricing and timing of services.

● ***...and compared to previous periods?***

Below presents data from the previous reference period (as of 31.05.2023). While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

Alignment of Investments to SDGs

The United Nations have defined 17 SDGs with five to 19 targets under each goal. This methodology does not capture positive spill-over effects a product can have on multiple targets and goals. For example, a service broadening access to education could contribute to SDG number 4 – quality education, and less directly to goals related to gender equality or decent work and economic growth. CSAM does not account for these “less direct” effects, which would over-emphasize the contribution by double-counting the positive effects. This may adversely affect the total allocation towards targets related to goals with the broadest scope and goals that are heavily interlinked with others, such as “no poverty” or “gender equality.” However, this also aims to ensure that only the most direct, visible, or significant contribution is represented. Given the thematic mandate of the portfolio, most companies will contribute primarily to SDGs number 4 (quality education) and number 8 (decent work and economic growth) under this methodology.

The overall sustainability-related contribution of the Subfund is shown below in terms of investment proportions in companies offering products and services that are aligned to SDGs. The chart below shows the contribution of investments of the Subfund to SDGs.

Contribution of investments of the Subfund to SDGs

SDG Target	SDG sub-Target	Sub-Target Portfolio alignment in %	SDG Target Portfolio alignment in % (total)
SDG 4	SDG 4.1	12.14	70.58
	SDG 4.3	20.95	
	SDG 4.4	36.51	
	SDG 4.5	0.99	
SDG 8	SDG 8.2	14.78	23.01
	SDG 8.5	8.24	
SDG 9	SDG 9.5	2.37	2.37
Not aligned with SDGs			4.03

The table shows revenues generated from a single product line (or a group of homogenous products), that corresponds to a relevant SDG, and that is sold to a distinguishable group of end customers. The outcome is calculated into portfolio weights as of 31.05.2023. While this outcome is representative of the weights throughout the year, those data do not represent an average of the portfolio weights for the entire reference period. The chart is based on a proprietary methodology to complete missing or possibly not reliable third-party data. To quantify this contribution, the Investment team considers the proportion of total revenue generated from a distinguishable business line (i.e., a group of homogenous products) that is sold to a distinguishable group of end customers. That proportion is classified in a taxonomy table and assigned to one of 67 possible targets under the seven SDGs that the Subfund seeks to positively contribute to, as defined in the fund prospectus of Credit Suisse (Lux) Edutainment Equity Fund.

● ***How did the sustainable investments not cause significant harm to any environmental or social sustainable investment objective?***

Credit Suisse Asset Management (CSAM) considered various indicators linked to principal adverse impacts on sustainability factors (PAI Indicators) and further indicators from its exclusion framework to assess whether sustainable investments caused significant harm to any environmental or social investment objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

During the Reference Period, the PAI Indicators applied by CSAM to identify investments which qualify as SFDR Sustainable Investments in line with CS SFDR Sustainable Investment Methodology included a set of criteria and thresholds to determine if an investment passed the DNSH condition as follows:

Investments must not:

1. have a significant negative contribution to climate change. This criterion makes use of an indicator that flags the biggest emitters of greenhouse gas globally and relates to PAI 1, 2, 3 and 15.
2. be subject to norms-, value and business conduct exclusions and other investment restrictions which address PAI 4, 10, 14 and 16.
3. be subject to severe ESG controversies which address PAI 7 and 10 where applicable.
4. be strongly lagging its industry peers in overall ESG performance. This criterion has been applied to cover the remainder of the PAI to the extent possible.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Sustainable Investments were aligned with the 'OECD Guidelines for Multinational Enterprises' and the 'UN Guiding Principles on Business and Human Rights'. The alignment was assessed through the CS business conduct framework as part of the CS ESG Exclusion framework.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides the exposure to all mandatory PAI from the Commission Delegated Regulation (EU) 2022/1288. The Adverse Sustainability Indicator/Metric values are calculated as an average based on quarterly data representing the reference period from 01.06.2023 – 31.05.2024.

Please note that CSAM may choose or may not be able to consider and/or mitigate all herein reported PAI given the Subfund's investment strategy, asset classes or the availability of reliable data. Consideration of PAI may be subject to change given evolving data availability and quality. Please refer to the EET for the most recent overview of which PAI are considered at Subfund level.

Please refer to the CSAM ESG website (www.credit-suisse.com/esg) to get further information on the CSAM PAI framework including potential limitations in the methodology to consider PAI.

Adverse Sustainability Indicator / Metric	Impact *	Eligible Assets (%) **	Data Coverage (%) ***
Indicators applicable to investments in investee companies			
CLIMATE AND OTHER ENVIRONMENT-RELATED INDICATORS			
GHG Emissions			
1. GHG emissions Scope 1 (in metric tons)	92.09	98.54	83.38

* Look-through enabled where possible, excl. cash and derivatives. Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The proportion of investments contributing to a sustainable investment, by this Subfund (category # 1 above), was 98.46% of its total net assets. This data is valid as of 31.05.2024. It does not represent an average for the reference period.

● In which economic sectors were the investments made?

Subfund Sectoral Exposure

NACE Sector Code *	Portfolio Exposure **
J. Information and communication	64.01%
M. Professional, scientific and technical activities	2.27%
N. Administrative and support service activities	6.95%
P. Education	20.39%
Q. Human health and social work activities	4.84%
Others	1.54%

* Please note that the NACE sector allocation is not used in the Subfund's investment strategy. It is provided for disclosure purposes only. For example, the Subfund's investment strategy makes use of company's revenue exposure in accordance with CSAM's ESG Exclusion framework and does not exclude companies based on their NACE sector allocation.

** Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period. The “Other” category can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

Subfund Exposure to Fossil Fuels Sub-Sectors

NACE Sector Code *	NACE name	Portfolio Exposure **
B5.1.0	Mining of hard coal	0.00%
B5.2.0	Mining of lignite	0.00%
B6.1.0	Extraction of crude petroleum	0.00%
B6.2.0	Extraction of natural gas	0.00%
B9.1.0	Support activities for petroleum and natural gas extraction	0.00%

C19.2.0	Manufacture of refined petroleum products	0.00%
D35.2.1	Manufacture of gas	0.00%
D35.2.2	Distribution of gaseous fuels through mains	0.00%
D35.2.3	Trade of gas through mains	0.00%
G46.7.1	Wholesale of solid, liquid and gaseous fuels and related products	0.00%

* Please note that the NACE sector allocation is not used in the Subfund's investment strategy. It is provided for disclosure purposes only. For example, the Subfund's investment strategy makes use of company's revenue exposure in accordance with CSAM's ESG Exclusion framework and does not exclude companies based on their NACE sector allocation.

** Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

During the Reference period, the Subfund reports 0% exposure to sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

The Subfund's reported EU Taxonomy alignment was not subject to assurance or review by a third party.

● ***What was the share of investments made in transitional and enabling activities?***

Of the 0.00% of sustainable investments with an environmental objective aligned with the EU Taxonomy during the Reference Period, 0.00% were made in transitional activities and 0.00% in enabling activities.

● ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

A comparison of the portfolio's investments that were aligned with the EU Taxonomy compared to previous periods will be available as of the next reference period.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

During the Reference Period, 0.00% of the Subfund's investments were made into sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of socially sustainable investments?

As of 31.05.2024, 98.46% of the Subfund's investments were made into socially sustainable investments.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

As of 31.05.2024, 1.54% of the Subfund's investments were made into "not sustainable".

Investments such as cash, derivatives and structured products may have fallen under "not sustainable" since such instruments did not contribute to the Sustainable Investment objectives of this Subfund. More information about the portfolio exposure to such investments can be found in the financial section of this annual report. Such investments did not have minimum environmental or social safeguards. They may have been used as efficient portfolio management tools, for cash management, for hedging purposes, or as an additional source of return.

What actions have been taken to attain the sustainable investment objective during the reference period?

To attain the sustainable investment objective set by this Subfund, this Subfund applied ESG Exclusions, ESG Integration and engaged with investee companies.

This Subfund excluded investments in companies of the following three categories:

- Norms-based Exclusions

This Subfund excluded companies that failed to comply with international treaties on controversial weapons such as the Convention on Cluster Munitions, the Chemical Weapons Convention, the Biological Weapons Convention, the Treaty on the Non-Proliferation of Nuclear Weapons (NPT). In addition, it excluded companies that are recommended for exclusions by the Swiss Association for Responsible Investments (SVVK-ASIR) in respect to APM (anti-personnel mines), cluster munitions and nuclear weapons (outside of NPT).

- Values-based Exclusions

This Subfund excluded companies that derived more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment. It excluded companies that derived more than 20% of their revenue from tobacco distribution and conventional weapons support systems and services. In addition, a revenue limit of 20% applied to investments in coal (coal mining and coal-based electricity generation), a revenue limit of 5% applies to investments in arctic oil and gas as well as a revenue limit of 10% applies to investments in oil sands.

- Business-conduct Exclusions

Companies found to systematically violate international norms, where the breaches were particularly severe, or where management was not open to implement necessary reforms, were placed on a watch list, and may have been excluded from the Credit Suisse-wide investment universe. Restrictions related to LuxFLAG ESG label

To comply with the LuxFLAG ESG label, this Subfund excluded additionally the following companies from the investment universe:

- Tobacco, tobacco-related products and supporting services: Companies that derive more than 5% of their annual revenue from production and all companies that derive more than 15% of their annual revenue from sales and distribution are excluded.

ESG Factors were integrated into the investment process in the following four main steps:

- Check the alignment of investments to relevant SDGs on a pure-play basis

The Investment Manager analyzed if the majority of the company's products or services calculated as a % of total revenue (i.e. pure-play) were aligned with the SDGs of the sustainable investment objective.

- Identification of material ESG Factors

The Investment Manager identified the Subfund's material ESG Factors based on the fund's sustainable investment objectives. This assessment was supported by materiality frameworks, which defined industry-specific weights of ESG Factors and took in particular sustainability risks into account.

- ESG security analysis

CSAM performed security, sector and regional research on ESG Factors across the Subfund's investment universe. CSAM made use of ESG data from third-party service providers and combined them with CSAM proprietary analysis and information. This included the alignment to SDGs, ESG related news, ESG ratings and scores, ESG related controversies and ESG trends.

- Security selection and portfolio implementation

Based on the identified material ESG Factors and the resulting ESG integrated security analysis, CSAM constructs the Subfund's portfolio composition. The Subfund's strategy is to invest in companies that are helping to lower the rising cost of education, broaden access to education, upskilling and employment opportunities. The bottom-up security selection process is based upon:

- alignment to the relevant SDGs > 50%
- financial factors such as revenue growth and profitability

- Portfolio monitoring

CSAM continuously monitored the ESG Factors by its portfolio management system and significant changes in the ESG Factors of underlying securities were re-assessed regularly to evaluate if a position should be increased or decreased.

- Engagement

CSAM engaged with investee companies with the aim of increasing its impact on sustainability issues. Selected companies that were able and willing to take action were subject to engagement and CSAM sought to preserve and/or enhance the value of the companies they invested in, through engagement with issuers. The Investment Team and the Active Ownership Team defined the topics and issues CSAM wanted to discuss with investee companies. The resulting engagement activities for the reference period of this SFDR annex to the annual report were defined using certain criteria and aimed at companies in which CSAM held considerable investments through its funds. Below, please find a summary of our engagement activities:

Date, country	Engagement themes	Details
Company 1	Social KPIs, management compensation, and other material issues	<p>The Investment Team and the Active Ownership Team discussed with the IR (Investor Relations) Team:</p> <ul style="list-style-type: none"> - the creation of quantitative KPIs to measure outcome - the CEO compensation in relation with the share price performance - the ESG score provided by MSCI and ways to improve it

<p>Company 2</p>	<p>Responsible AI, educational impact metrics, and other material issues</p>	<p>The Investment Team and the Active Ownership Team discussed with the CFO and IR (Investor Relations):</p> <ul style="list-style-type: none"> - the implementation of responsible AI - the creation of quantitative impact metrics on educational outcome - the ESG score provided by MSCI and ways to improve it
-------------------------	--	--

More information about the engagement activities and the most current active ownership report of CSAM can be found online at www.credit-suisse.com/esg.

- Proxy Voting

Voting rights have been exercised for investee companies which have met the criteria for proxy voting. These criteria are explained online at www.credit-suisse.com/esg.

How did this financial product perform compared to the reference sustainable benchmark?

The Subfund did not use a reference benchmark for the purpose of attaining the environmental and/or social characteristics.

- *How does the reference benchmark differ from a broad market index?*

Not applicable.

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

- *How did this financial product perform compared with the reference benchmark?*

Not applicable.

- *How did this financial product perform compared with the broad market index?*

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Credit Suisse (Lux) Energy Evolution Equity Fund

Legal entity identifier: 213800516AW67OZZOZ43

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="checkbox"/> Yes	<input type="checkbox"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 46.01% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This Subfund promotes environmental, social and governance (ESG) characteristics (within the meaning of Art. 8 of Regulation (EU) 2019/2088).

The Management Company and the Investment Manager applied the Credit Suisse Asset Management (CSAM) Sustainable Investing Policy to this Subfund.

This Subfund promoted the following environmental and social characteristics:

- to invest into companies that comply with international treaties on controversial weapons (norms-based exclusions on direct investments)
- not to invest into companies that derive more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment (values-based exclusions on direct investments)
- not to invest into companies that either derive more than 20% of their revenue from tobacco distribution or conventional weapons support systems and services (values-based exclusions on direct investments)
- not to invest into companies that either derive more than 20% of their revenues from coal (coal mining and coal-based electricity generation) and 5% of their revenues in arctic oil and gas, or 10% of their revenues from oil sands (values-based exclusions on direct investments)
- adherence to, and conducting business activities in accordance with, international norms such as the "United Nations Global Compact Principles" (UNGCP) (business-conduct exclusions on direct investments)
- higher exposure to investments that have better ESG profile and fewer ESG controversies over their investment cycle (ESG Integration)
- contribution to good governance and sustainable practices through proxy voting and engagement with investee companies in line with CSAM's Sustainable Investing Policy (Active Ownership)

The extent to which the environmental and/or social characteristics were met is measured by the sustainability indicators shown below.

Derivatives were not used to attain the environmental or social characteristics.

Please find further information on ESG Integration, ESG Exclusions and Active Ownership below in the question "What actions have been taken to meet the environmental and/or social characteristics during the reference period?" and online at www.credit-suisse.com/esg.

● *How did the sustainability indicators perform?*

The table below shows the output of the Sustainability Indicators applicable to this Subfund as of 31.05.2024. While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

Sustainability Indicator*	Portfolio	Indicator Output
ESG Rating	AAA: 16.85%, AA: 24.42%, A: 33.90%, BBB: 5.68%, BB: 4.43%, B: 4.09%, CCC: 1.21%, Not ratable**: 0.46%, No data coverage**: 8.97%	Investment exposure by ESG Rating: AAA (highest): 0–100% AA: 0–100% A: 0–100% BBB: 0–100% BB: 0–100% B: 0–100% CCC (lowest): 0–100%
Environmental pillar score	5.56	Portfolio aggregate environmental pillar score: 1 (lowest) – 10 (highest)
Social pillar score	5.66	Portfolio aggregate social pillar score: 1 (lowest) – 10 (highest)
Governance pillar score	6.11	Portfolio aggregate governance pillar score: 1 (lowest) – 10 (highest)
ESG controversy flag	Green: 62.14%, Yellow: 25.12%, Orange: 3.31%, Red: 0.00%, Not ratable**: 0.46%, No data coverage**: 8.97%	Investment exposure by ESG controversy flag: Green: 0–100% Yellow: 0–100% Orange: 0–100% Red: 0–100%
CSAM ESG exclusions***	Pre- and post-trade checks are in place to detect investments that breach the ESG exclusions. Any detected breach is escalated and remedied.	This indicator reflects that the portfolio complied with the applicable ESG exclusions as described in the exclusion section of the website (during the entire reference period, CSAM adhered to ESG exclusion criteria, as stated in the CSAM Sustainable Investing Policy).

* None of the Sustainability Indicators were subject to an assurance provided by an auditor or a review by a third party.

** These categories can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

*** Note that the amount of investments that were restricted due to the ESG exclusions depend on the investable universe of the Subfund.

● ...and compared to previous periods?

The table below presents data from the previous reference period (as of 31.05.2023). The data may differ compared to the previously published report as the most recently available data was taken into account, as the data provider(s) may have retroactively updated some figures. While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

Sustainability Indicator*	Portfolio	Indicator Output
ESG Rating	AAA: 18.87%, AA: 27.97%, A: 21.47%, BBB: 7.99%, BB: 4.06%, B: 3.58%, CCC: 1.38%, Not ratable**: 1.04%, No data coverage**: 13.63%	Investment exposure by ESG Rating: AAA (highest): 0–100% AA: 0–100% A: 0–100% BBB: 0–100% BB: 0–100% B: 0–100% CCC (lowest): 0–100%
Environmental pillar score	5.96	Portfolio aggregate environmental pillar score: 1 (lowest) – 10 (highest)
Social pillar score	5.52	Portfolio aggregate social pillar score: 1 (lowest) – 10 (highest)
Governance pillar score	6.06	Portfolio aggregate governance pillar score: 1 (lowest) – 10 (highest)
ESG controversy flag	Green: 64.53%, Yellow: 19.20%, Orange: 1.60%, Red: 0.00%, Not ratable**: 1.04%, No data coverage**: 13.63%	Investment exposure by ESG controversy flag: Green: 0–100% Yellow: 0–100% Orange: 0–100% Red: 0–100%
CSAM ESG exclusions***	Pre- and post-trade checks are in place to detect investments that breach the ESG exclusions. Any detected breach is escalated and remedied.	This indicator reflects that the portfolio complied with the applicable ESG exclusions as described in the exclusion section of the website (during the entire reference period, CSAM adhered to ESG exclusion criteria, as stated in the CSAM Sustainable Investing Policy).

* None of the Sustainability Indicators were subject to an assurance provided by an auditor or a review by a third party.

** These categories can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

*** Note that the amount of investments that were restricted due to the ESG exclusions depend on the investable universe of the Subfund.

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

At the end of the reference period, the sustainable investments contributed to the Environmental objectives below:

- Investments that generated at least 50% of their revenues from products and services that contributed to an environmental objective (e.g. alternative energy, carbon & energy efficiency, green building, sustainable water, pollution prevention, sustainable agriculture etc.)
- Investments that have an approved commitment to science-based emission targets and an average reduction in carbon emissions intensity of 7% over the last three years

The above criteria were assessed using a quantitative methodology. If there had not been an output from the quantitative assessment (e.g. in the case of missing quantitative ESG data), investments were submitted for confirmation in a case-by-case approach based on a proprietary assessment of the criteria. A central Credit Suisse committee approved such submissions.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

CSAM considered various indicators linked to principal adverse impacts on sustainability factors (PAI Indicators) and further indicators from its exclusion framework to assess whether sustainable investments caused significant harm to any environmental or social investment objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— — **How were the indicators for adverse impacts on sustainability factors taken into account?**

During the reference period, the PAI Indicators applied by CSAM to identify investments which qualify as SFDR Sustainable Investments in line with CS SFDR Sustainable Investment Methodology included a set of criteria and thresholds to determine if an investment passed the DNSH condition as follows:

Investments must not:

1. have a significant negative contribution to climate change. This criterion makes use of an indicator that flags the biggest emitters of greenhouse gas globally and relates to PAI 1, 2, 3 and 15.
2. be subject to norms, values and business conduct exclusions and other investment restrictions which address PAI 4, 10, 14 and 16.
3. be subject to severe ESG controversies which address PAI 7 and 10 where applicable.
4. be strongly lagging its industry peers in overall ESG performance. This criterion has been applied to cover the remainder of the PAI to the extent possible.

— — — **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Sustainable Investments were aligned with the 'OECD Guidelines for Multinational Enterprises' and the 'UN Guiding Principles on Business and Human Rights'. The alignment was assessed as part of the CS ESG Exclusion framework. Companies that exhibit severe weaknesses in business conduct, particularly with regard to breaches of the 'United Nations Global Compact Principles' (UNGC) and companies placed on the watchlist, but with no immediate exclusion, were flagged not to be considered SFDR Sustainable Investments due to DNSH.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides the exposure to all mandatory PAI from the Commission Delegated Regulation (EU) 2022/1288. The Adverse Sustainability Indicator/Metric values are calculated as an asset weighted average based on quarterly data representing the reference period from 01.06.2023–31.05.2024.

Please note that CSAM may choose or may not be able to consider and/or mitigate all of the herein reported PAI given the Subfund's investment strategy, asset class or the availability of reliable data. Consideration of PAI may be subject to change given evolving data availability and quality. Please refer to the EET for the most recent overview of which PAI are considered at Subfund level.

Please find further information on CSAM PAI Framework online at www.credit-suisse.com/esg.

Adverse Sustainability Indicator / Metric Impact * Eligible Assets (%) ** Data Coverage (%) ***

Indicators applicable to investments in investee companies

* *Impact: The value represents non-normalized portfolio level exposure to a given PAI indicator. This means that the PAI values use the actual weights of portfolio exposures.*

** *Eligible Assets: Percentage of AUM of the entire portfolio (including cash) for which the PAI is applicable. As an example, government bonds held by the Subfund cannot be measured against PAI indicators applicable to an investee company.*

*** *Data coverage: Percentage of AUM of the entire portfolio for which PAI indicator data is available.*

**** *Flags the companies with exposure to fossil fuels related activities, including extraction, processing, storage and transportation of fossil fuels.*

***** *The coverage of the PAI 6 are limited to the 9 high impact climate sectors defined by SFDR.*

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31.05.2024

Largest investments *	NACE Sector code	% Assets	Country
PRYSMIAN	C. Manufacturing	3.77	Italy
CAMECO CORP	B. Mining and quarrying	3.67	Canada
BOLIDEN	C. Manufacturing	3.61	Sweden
SNAM	H. Transportation and storage	3.52	Italy
CAPSTONE COPPER CORP	B. Mining and quarrying	3.50	Canada
HANNON ARMSTRONG SUSTAINABLE INFRA	K. Financial and insurance activities	3.44	United States of America
DENISON MINES CORP	B. Mining and quarrying	3.40	Canada
CONTEMPORARY AMPEREX TECHNOLOGY LT	C. Manufacturing	3.39	China
FIRST SOLAR INC	C. Manufacturing	3.37	United States of America
CORPORACION ACCIONA ENERGIAS RENOV	D. Electricity, gas, steam and air conditioning supply	3.36	Spain
NORSK HYDRO	C. Manufacturing	3.35	Norway
REDEIA CORPORACION SA	D. Electricity, gas, steam and air conditioning supply	3.34	Spain
ERAMET SA	B. Mining and quarrying	3.31	France
OERSTED	D. Electricity, gas, steam and air conditioning supply	3.28	Denmark
GOLAR LNG LTD	D. Electricity, gas, steam and air conditioning supply	3.26	Bermuda

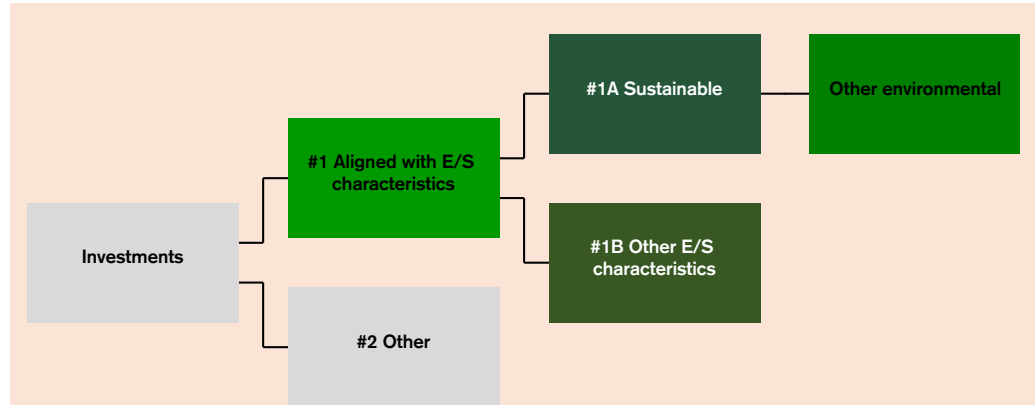

* *Look-through enabled where possible, excl. cash and derivatives. Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period.*

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which were neither aligned with the environmental or social characteristics, nor qualified as sustainable investments.

Please refer to the section "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?" for further information.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that did not qualify as sustainable investments.

The proportion of investments used to meet the environmental or social characteristics promoted by this Subfund (category #1 above) was 90.57% of its total net assets.

Within this category the Subfund held a proportion of 46.01% of its total net assets in sustainable investments (category #1A above) and a proportion of 44.56% of its total net assets in other E/S characteristics (category #1B above).

The proportion of investments held by the Subfund in "Other" (category #2 above) was 9.43% of its total net assets.

The data is valid as of 31.05.2024. It does not represent an average for the reference period.

● In which economic sectors were the investments made?

Subfund Sectoral Exposure

NACE Sector Code *	Portfolio Exposure **
B. Mining and quarrying	22.10%
C. Manufacturing	42.36%
D. Electricity, gas, steam and air conditioning supply	24.45%
F. Construction	1.90%
H. Transportation and storage	3.52%
J. Information and communication	1.78%
K. Financial and insurance activities	3.44%
Others	0.46%

* Please note that the NACE sector allocation is not used in the Subfund's investment strategy. It is provided for disclosure purposes only. For example, the Subfund's investment strategy makes use of company's revenue exposure in accordance with CSAM's ESG Exclusion framework and does not exclude companies based on their NACE sector allocation.

** Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period. The "Others"

category can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

Subfund Exposure to Fossil Fuels Sub-Sectors

NACE Sector Code *	NACE name	Portfolio Exposure **
B5.1.0	Mining of hard coal	0.00%
B5.2.0	Mining of lignite	0.00%
B6.1.0	Extraction of crude petroleum	0.00%
B6.2.0	Extraction of natural gas	0.00%
B9.1.0	Support activities for petroleum and natural gas extraction	2.10%
C19.2.0	Manufacture of refined petroleum products	0.00%
D35.2.1	Manufacture of gas	0.00%
D35.2.2	Distribution of gaseous fuels through mains	3.26%
D35.2.3	Trade of gas through mains	0.00%
G46.7.1	Wholesale of solid, liquid and gaseous fuels and related products	0.00%

* Please note that the NACE sector allocation is not used in the Subfund's investment strategy. It is provided for disclosure purposes only. For example, the Subfund's investment strategy makes use of company's revenue exposure in accordance with CSAM's ESG Exclusion framework and does not exclude companies based on their NACE sector allocation.

** Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

As of 31.05.2024, the Subfund reports 0.00% exposure to sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The Subfund's reported EU Taxonomy alignment was not subject to assurance or review by a third party.

● *What was the share of investments made in transitional and enabling activities?*

Of the 0.00% of sustainable investments with an environmental objective aligned with the EU Taxonomy as of 31.05.2024, 0.00% were made in transitional activities and 0.00% in enabling activities.

● *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

During the previous reference period the percentage of investments that were aligned with the EU Taxonomy were 0.00% as of 31.05.2023.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As of 31.05.2024, 46.01% of the Subfund's investments were made into sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

As of 31.05.2024, 0.00% of the Subfund's investments were made into socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

As of 31.05.2024, 9.43% of the Subfund's investments were made into "other".

Investments such as cash, derivatives and structured products may have fallen under "other" since such instruments did not contribute to the E/S characteristics of this Subfund. More information about the portfolio exposure to such investments can be found in the financial section of this annual report. Such investments did not have minimum environmental or social safeguards. They may have been used as efficient portfolio management tools, for cash management, for hedging purposes, or as an additional source of return.

Additionally, investments may have fallen under "other" if insufficient ESG-related information was available. This applied in particular to asset classes for which ESG Factors were insufficiently defined or insufficient ESG related information was available. Where possible, minimum environmental or social safeguards have been applied to these underlying securities by ensuring that CSAM ESG exclusions were adhered to.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To attain the environmental or social characteristics promoted by this Subfund, this Subfund applied ESG Exclusions, ESG Integration and Active Ownership.

This Subfund excluded investments in companies of the following three categories:

- Norms-based Exclusions

This Subfund excluded companies that failed to comply with international treaties on controversial weapons such as the Convention on Cluster Munitions, the Chemical Weapons Convention, the Biological Weapons Convention, the Treaty on the Non-Proliferation of Nuclear Weapons (NPT). In addition, it excluded companies that are recommended for exclusions by the Swiss Association for Responsible Investments (SVVK-ASIR) in respect to APM (anti-personnel mines), cluster munitions and nuclear weapons (outside of NPT).

- Values-based Exclusions

This Subfund excluded companies that derived more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment. It excluded companies that derived more than 20% of their revenue from tobacco distribution and conventional weapons support systems and services. In addition, a revenue limit of 20% applied to investments in coal (coal mining and coal-based electricity generation), a revenue limit of 5% applies to investments in arctic oil and gas as well as a revenue limit of 10% applies to investments in oil sands.

- Business-conduct Exclusions

Companies found to systematically violate international norms, where the breaches were particularly severe, or where management was not open to implement necessary reforms, were placed on a watch list, and may have been excluded from the Credit Suisse-wide investment universe. This process was governed by a dedicated committee that maintained the list of excluded companies and was responsible for ensuring that the list is communicated to investment teams in a timely manner.

- Restrictions related to the Guidelines for Responsible Investing of the Bundesverband Investment and Asset Management's (BVI)

To comply with the BVI guidelines, this Subfund excluded additionally the following companies, countries, and sectors from the investment universe:

- Military hardware: companies that derive more than 10% of their revenue from manufacturing conventional weapons, components, and support systems and services
- Sovereign issuers: serious violations of democratic and human rights based on the assessment as "not free" according to the Freedom House's index (freedomhouse.org/countries/freedom-world/scores)

- Restrictions related to LuxFLAG ESG label

To comply with the LuxFLAG ESG label, this Subfund excluded additionally the following companies from the investment universe:

- Tobacco, tobacco-related products and supporting services: Companies that derive more than 5% of their annual revenue from production and all companies that derive more than 15% of their annual revenue from sales and distribution are excluded.

ESG Factors were integrated into the investment process in the following four main steps:

- Identification of material ESG Factors

First, the Investment Manager used materiality frameworks to identify those ESG Factors that are relevant to the investment strategy. Materiality frameworks are concepts that help to identify sustainability-related issues and opportunities that are likely to affect the financial condition or operating performance of companies within an industry. Material factors have been furthermore assessed based on the Subfund's sector and geographical exposure. Second, the Investment Manager prioritized the material factors that were most relevant to the subsequent investment decisions based on the portfolio's current market exposure.

- ESG security analysis

Based on the identified material ESG Factors, the Investment Manager performed security research across the Subfund's investment universe. The Investment Manager made use of ESG ratings from third-party service providers and combined them with CSAM's proprietary analyses and information. These included, e.g. ESG related news, ESG ratings and scores, ESG-related controversies, and ESG trends.

The ESG data are fully integrated in the portfolio management software. The CSAM sustainable investing team may offer additional support, where needed, and advise on access to other ESG data providers. The outcome of the ESG analysis of individual securities, combined with financial research, enabled the Investment Managers to make ESG-adjusted risk/return assessments. This enabled the Investment Manager to compare securities on an ESG-adjusted basis and to evaluate whether to keep certain securities in the portfolio or to sell them during the security selection and portfolio implementation stage. The ESG security analysis has been updated periodically.

- Security selection and portfolio implementation

Based on the identified material ESG Factors and the ESG-adjusted security analysis, the Investment Manager constructed a portfolio in accordance with the Subfund's investment process and principles. The ESG-adjusted security analysis combined with portfolio construction considerations has been used to determine appropriate portfolio weights that reflected the ESG-adjusted risk/return profile of the analyzed securities.

The research process might make use of dedicated ESG questionnaires with potential follow-up meetings with investee companies in case incomplete data is available from third-party ESG data providers.

- Portfolio monitoring

The Investment Manager monitored the ESG Factors periodically to detect significant changes in the ESG Factors of the underlying securities. They regularly reassessed the portfolio, taking into consideration financial and ESG metrics, and consequently decided whether to increase or decrease positions in the portfolio.

- Engagement

CSAM engaged with investee companies with the aim of increasing its impact on sustainability issues. Selected companies that were able and willing to take action were subject to engagement and CSAM sought to preserve and/or enhance the value of the companies they invested in, through engagement with issuers. The Active Ownership team defined the topics and issues CSAM wanted to discuss with investee companies. The resulting engagement activities for the reference period of this SFDR annex to the annual report were defined using certain criteria and aimed at companies in which CSAM held considerable investments through its funds. More information about the engagement activities and the most current active ownership report of CSAM can be found online at: www.credit-suisse.com/esg.

- Proxy Voting

Voting rights have been exercised for investee companies which have met the criteria for Proxy Voting as explained at www.credit-suisse.com/esg

How did this financial product perform compared to the reference benchmark?

The Subfund did not use a reference benchmark for the purpose of attaining the environmental and/or social characteristics.

- *How does the reference benchmark differ from a broad market index?*

Not applicable.

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● *How did this financial product perform compared with the reference benchmark?*

● *How did this financial product perform compared with the broad market index?*

Not applicable.

ANNEX V

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Credit Suisse (Lux)
Environmental Impact Equity
Fund

Legal entity identifier: 5493000NEO3IVH6FWW93

Sustainable investment objective

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> Yes	<input checked="" type="radio"/> <input type="radio"/> <input type="checkbox"/> No
<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective : 96.61% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of - ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input checked="" type="checkbox"/> It made sustainable investments with a social objective : 2.45%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent was the sustainable investment objective of this financial product met?

The Subfund made profitable investments in companies that contributed, individually or cumulatively, to the following UN Sustainable Development Goals (SDGs):

- Goal 6: Ensure availability and sustainable management of water and sanitation for all
- Goal 7: Ensure access to affordable, reliable, sustainable and modern energy for all
- Goal 9: Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation
- Goal 11: Make cities and human settlements inclusive, safe, resilient and sustainable

Sustainability indicators measure how the sustainable objectives of this financial product are attained

- Goal 12: Ensure sustainable consumption and production patterns
- Goal 13: Take urgent action to combat climate change and its impacts

To target investments related to the above listed SDGs the fund used four subthemes and made investments into companies that market products with a focus on:

- Green buildings, energy efficiency, environmental services and / or water management (Subtheme: Sustainable Infrastructure).
- Renewable energy, sustainable forestry, sustainable agriculture, land-use efficiency (Subtheme: Resources)
- Recycling, packaging, sustainable materials and waste management (Subtheme: Waste mitigation)
- Sustainable transportation, alternative power technology, energy storage solutions, pollution management (Subtheme: Carbon reduction technologies)

The Subfund also has a reduction in carbon emissions as its objective in view of achieving the long-term global warming objectives of the Paris Agreement. Primarily, the Subfund achieved this objective by investing in companies whose products and services enable a reduction of CO2 emissions through their use. The holistic approach of the fund in terms of industry exposure means that the CO2 reduction objective is achieved through various means, from avoided emissions promoted by building insulation materials or high-efficiency power semiconductors to energy saving technologies and processes such as high-efficiency heat exchangers in industrial applications or LED lighting and building automation.

While the Subfund invested in companies whose products and services generate a positive environmental impact, the Investment team wants that invested companies are able to deliver products and services in the most environmentally friendly manner possible. One metric allowing to connect such assessment with the Subfund's objective of a reduction in carbon emissions is the so-called emissions intensity, which is the ratio of a company's CO2 emissions in tonnes and its respective sales in millions of US dollars. For comparability purposes, the Investment team provides data for the Subfund's carbon intensity and the Reference Index (MSCI ESG Leaders Index; please also refer to the question "How did the sustainability indicators perform?" for more information). In addition, given the significantly different sector allocation between the Subfund and the Reference Index, we provide a Sector-Neutral comparison (see next paragraph for a detailed explanation), which in our view is the most comparable framework to assess the carbon intensity difference between the Subfund and the Reference Index.

The table below shows the underlying carbon intensity (Scope 1 and 2) for each sector as well as the corresponding allocation in the fund and reference index. The total figure for the fund and the reference index represents the product of the carbon intensity of each security and its corresponding average allocation in the period. To adjust for the sector bias of the fund compared to the reference index, the Investment team provides a "sector-neutral carbon intensity" for the reference index, where it took the underlying carbon intensity of each sector in the reference index and applied the sector allocation of the Subfund, thus neutralizing the sectoral differences between the fund and the reference index. As a result, the sector adjusted carbon intensity for the Reference index (Sector-Neutral Reference Index) is significantly higher than the Subfund's own carbon intensity.

	Fund		Reference Index		Sector-Neutral Ref. Index	
	Allocation	Carbon Intensity	Allocation	Carbon Intensity	Allocation	Carbon Intensity
Industrials	45.9%	78.1	11.0%	90.3	45.9%	90.3
Materials	24.2%	181.0	4.2%	425.6	24.2%	425.6
Information Technology	16.2%	51.6	24.4%	21.2	16.2%	21.2
Consumer Discretionary	6.9%	82.7	10.6%	22.9	6.9%	22.9
Real Estate	2.7%	85.2	2.4%	120.2	2.7%	120.2
Consumer Staples	2.6%	118.2	6.9%	46.8	2.6%	46.8
Utilities	0.0%	-	1.8%	393.0	0.0%	393.0
Financials	0.0%	-	14.7%	3.2	0.0%	3.2
Communication Services	0.0%	-	8.5%	12.4	0.0%	12.4
Health Care	1.5%	11.7	12.4%	14.4	1.5%	14.4
Energy	0.0%	-	3.0%	293.9	0.0%	293.9
Total	100.0%	99.3	100.0%	60.8	100.0%	154.0

Furthermore, the Management Company and the Investment Manager applied the Credit Suisse Asset Management (CSAM) Sustainable Investing Policy to this Subfund. This Subfund promoted the following environmental and social characteristics:

- Incorporation of ESG factors and consideration of ESG controversies at various steps of the investment process by combining financial information with information on environmental, social, and governance aspects
- The Subfund has not invested into companies that comply with international treaties on controversial weapons (norms-based exclusions on direct investments)
- The Subfund has not invested into companies that derive more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment (values-based exclusions on direct investments)
- The Subfund has not invested into companies that derive more than 20% of their revenue from tobacco distribution, conventional weapons support systems or coal (i.e., coal mining and coal-based electricity generation) and 5% of their revenues in arctic oil and gas, or 10% of their revenues from oil sands (values-based exclusions on direct investments)

- The Subfund has only invested in companies demonstrating adherence to, and conducting business activities in accordance with, international norms such as the "United Nations Global Compact Principles" (UNGC) (business-conduct exclusions on direct investments)
- The Subfund integrated ESG Factors into the investment decision process without compromising diversification and risk management. This included alignment of investments to SDGs
- Contribution to good governance and sustainable practices through proxy voting and engagement with investee companies in line with Credit Suisse Asset Management's Sustainable Investing Policy (Active Ownership)
- The Subfund met the minimum proportions for SFDR Sustainable Investments through Investments that
 - generated at least 50% of their revenues from products and services that contributed to an environmental objective (e.g. alternative energy, carbon & energy efficiency, green building, sustainable water, pollution prevention, sustainable agriculture etc.)
 - generated at least 50% of their revenues from products and services that contribute to a social objective (e.g. nutrition, disease treatments, sanitation, affordable real estate, SME finance, education, connectivity etc.)
 - have an approved commitment to science-based emission targets and an average reduction in carbon emissions intensity of 7% over the last three years.

Derivatives were not used to attain the environmental or social characteristics.

Please find further information on the alignment with the SDGs #6, #7, #9, #11, #12, #13, ESG Integration, ESG Exclusions and Active Ownership below in the question "What actions have been taken to meet the environmental and/or social characteristics during the reference period?" online at www.credit-suisse.com/esg.

● *How did the sustainability indicators perform?*

The table below shows the output of the Sustainability Indicators applicable to this Subfund as of 31.05.2024. While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period and is not representative of the Sustainability Indicator values at any other day of the financial year.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

Sustainability Indicator*	Portfolio	Indicator Output
CSAM ESG exclusions**	Pre- and post-trade checks are in place to detect investments that breach the ESG exclusions. Any detected breach is escalated and remedied.	This indicator reflects that the portfolio complied with the applicable ESG exclusions as described in the exclusion section of the website (during the entire reference period, CSAM adhered to ESG exclusion criteria, as stated in the CSAM Sustainable Investing Policy)
Alignment of Investments to SDGs	The indicator measures the degree of product alignment of the issuers (in terms of total revenue generated from a single product line or a group of homogenous products) in the portfolio with the UN Sustainable Development Goals (SDG) listed in the product legal documentation. Credit Suisse Asset Management assesses the alignment of an issuer to SDGs relevant for the Subfund based on data from third-party data providers and apply proprietary methodology and proprietary research.	Explanation of the alignment of the investment exposure to a specific SDG (please find more information on the performance of this indicator below)

* None of the Sustainability Indicators were subject to an assurance provided by an auditor or a review by a third party.

** Note that the amount of investments that were restricted due to the ESG exclusions depend on the investable universe of the Subfund.

Alignment of Investments to SDGs

The overall sustainability-related contribution of the Subfund is shown below in terms of investment proportions in companies offering products and services that are aligned to SDGs. The graph below shows the contribution of investments of the Subfund to SDGs.

CSAM applies a proprietary methodology to calculate the above SDG alignment of the CS (Lux) Environmental Impact Fund and the MSCI ESG Leaders Index (also referred to as Reference Index throughout this document). The Fund is a thematic fund making investments in companies that contribute to SDGs while MSCI ESG Leaders Index is a global index designed to represent the performance of companies that have high Environmental, Social and Governance (“ESG”) ratings relative to their sector peers. Thus, CS (Lux) Environmental Impact Equity Fund outperforms the benchmark due to undertaken SDG aligned oriented approach. In addition, it should be noted that some SDGs could have been double counted based on multiple SDG aligned product and service offerings of investee companies.

The Investment team collected the data on a single-security level from MSCI on SDG Alignment on a product level (in terms of total revenue generated from a single product line or a group of homogenous products). The combined score at the portfolio level was obtained by aggregating the single security scores in both portfolios as of the reporting date.

To illustrate the Subfund’s contribution to SDGs, some examples of relevant investments within the reference period are described below (Please refer to Table 1 for an overview of individual company KPI):

- SDG 6: The Subfund invested in companies directly involved in water supply and wastewater treatment, with investee companies generating a positive impact on availability and the circularity profile of water. In addition, the Subfund also invests in industrial companies whose products and services promote water efficiency, reducing the water intensity of industries such as semiconductors and hospitality.
- SDG 7: The Subfund’s investments aligned with SDG 7 in two ways: first, by investing in companies active in the renewable energy supply chain, such as wind turbine and solar panel manufacturers; secondly, by investing in the companies who promote energy savings – avoided consumption – through the use of their products, such as efficient lighting or efficient power semiconductors.
- SDG 9: The Subfund’s investments were aligned with infrastructure resiliency through investments in companies active in distributed energy production and smart infrastructure. To a large extent, the companies in the portfolio improve the sustainability profile of their clients who tend to be active in industries where efficiency gains on areas such as energy or water consumption have both a large impact in economic and sustainability related metrics.
- SDG 11: The Subfund investments aligned with SDG 11 mainly through the allocation to companies active in the Internet of Things (IoT), whose business improves the efficiency of basic infrastructure - water, energy, waste, and transportation – within urban areas. Additionally, the company’s investments in the electrification of energy, buildings, and transportation sector have an especially positive impact on the sustainability profile of urban areas through improved air quality.
- SDG 12: The Subfund aligned with SDG 12 mainly through its investments in companies that foster circularity or through companies with a more efficient process / product that support the goals of SDG 12. The Subfund invested in companies active in the food industry – for example, manufacturers of ingredients that extend shelf life or producers of protein with better feed conversion ratio -, paper and packaging industry who promote the replacement of plastic and reduce the environmental impact of various consumer products through better recyclability profiles.
- SDG 13: The Subfund’s investments aligned with SDG 13 across the entire portfolio. The Subfund made investments in sustainable materials, water, and sustainable forestry companies that were especially well aligned with SDG 13, by incorporating the intrinsic value of natural resources in the business model of invested companies.

SDG product alignment can be either “strongly aligned,” “aligned,” “neutral,” “misaligned,” or “strongly misaligned.” To determine the SDG net product alignment, only portfolio and benchmark weights allocated to companies with “strongly aligned,” “aligned,” “misaligned,” and “strongly misaligned” ratings are taken into account. Companies with “strongly aligned” and “aligned” ratings create a positive exposure. Companies with “misaligned” and “strongly misaligned” ratings create a negative exposure. The net product alignment is calculated by the sum of both parts and can be either positive or negative. Please refer to “MSCI SDG

● *...and compared to previous periods?*

The chart below presents the SDG alignment data from the previous reference period (as of 31.05.2023). While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period.

● *How did the sustainable investments not cause significant harm to any environmental or social sustainable investment objective?*

Credit Suisse Asset Management (CSAM) considered various indicators linked to principal adverse impacts on sustainability factors (PAI Indicators) and further indicators from its exclusion framework to assess whether sustainable investments caused significant harm to any environmental or social investment objective.

— — *How were the indicators for adverse impacts on sustainability factors taken into account?*

During the Reference Period, the PAI Indicators applied by CSAM to identify investments which qualify as SFDR Sustainable Investments in line with CS SFDR Sustainable Investment Methodology included a set of criteria and thresholds to determine if an investment passed the DNSH condition as follows:

Investments must not:

1. have a significant negative contribution to climate change. This criterion makes use of an indicator that flags the biggest emitters of greenhouse gas globally and relates to PAI 1, 2, 3 and 15.
2. be subject to norms-, value and business conduct exclusions and other investment restrictions which address PAI 4, 10, 14 and 16.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

3. be subject to severe ESG controversies which address PAI 7 and 10 where applicable.
4. be strongly lagging its industry peers in overall ESG performance. This criterion has been applied to cover the remainder of the PAI to the extent possible.

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainable Investments were aligned with the 'OECD Guidelines for Multinational Enterprises' and the 'UN Guiding Principles on Business and Human Rights'. The alignment was assessed through the CS business conduct framework as part of the CS ESG Exclusion framework.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides the exposure to all mandatory PAI from the Commission Delegated Regulation (EU) 2022/1288. The Adverse Sustainability Indicator/Metric values are calculated as an average based on quarterly data representing the reference period from 01.06.2023 – 31.05.2024.

Please note that CSAM may choose or may not be able to consider and/or mitigate all of the herein reported PAI given the Subfunds investment strategy, asset classes or the availability of reliable data. Consideration of PAI may be subject to change given evolving data availability and quality. Please refer to the EET for the most recent overview of which PAI are considered at Subfund level.

Please refer to the CSAM ESG website (www.credit-suisse.com/esg) to get further information on the CSAM PAI framework including potential limitations in the methodology to consider PAI.

* *Impact: The value represents non-normalized portfolio level exposure to a given PAI indicator. This means that the PAI values use the actual weights of portfolio exposures.*

** *Eligible Assets: Percentage of AUM of the entire portfolio (including cash) for which the PAI is applicable. As an example, government bonds held by the Subfund cannot be measured against PAI indicators applicable to an investee company.*

*** *Data coverage: The percentage of AUM of the entire portfolio for which PAI indicator data is available.*

**** *Flags the companies with exposure to fossil fuels related activities, including extraction, processing, storage and transportation of fossil fuels.*

***** *The coverage of the PAI 6 are limited to the 9 high impact climate sectors defined by SFDR.*

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 31.05.2024

Largest investments *	NACE Sector code	% Assets	Country
NVENT ELECTRIC PLC	C. Manufacturing	3.65	United Kingdom
BIOTAGE	C. Manufacturing	3.56	Sweden
NORDIC SEMICONDUCTOR	C. Manufacturing	3.55	Norway
ADVANCED DRAINAGE SYSTEMS INC	C. Manufacturing	3.47	United States of America
ITRON INC	C. Manufacturing	3.20	United States of America
NOVOZYMES CLASS B	C. Manufacturing	3.12	Denmark
ECOLAB INC	F. Construction	3.11	United States of America
KURITA WATER INDUSTRIES LTD	E. Water supply; sewerage, waste management and remediation activities	3.04	Japan
VESTAS WIND SYSTEMS	C. Manufacturing	2.99	Denmark
TREX INC	C. Manufacturing	2.79	United States of America
ACUITY BRANDS INC	C. Manufacturing	2.77	United States of America
WASTE MANAGEMENT INC	E. Water supply; sewerage, waste management and remediation activities	2.76	United States of America
BYD LTD H	C. Manufacturing	2.68	China
VALMET	C. Manufacturing	2.67	Finland
A O SMITH CORP	C. Manufacturing	2.65	United States of America

* Look-through enabled where possible, excl. cash and derivatives. Portfolio Exposure as of 31.05.2024. It does not represent an average for the entire reference period.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The proportion of investments, contributing to a sustainable investment, by this Subfund (category #1 above), was 99.07% % of its total net assets. The data is valid as of 31.05.2024. It does not represent an average for the reference period. §

● In which economic sectors were the investments made?

Subfund Sectoral Exposure

NACE Sector Code *	Portfolio Exposure **
A. Agriculture, forestry and fishing	2.45%
C. Manufacturing	83.22%
E. Water supply; sewerage, waste management and remediation activities	5.80%
F. Construction	7.26%
G. Wholesale and retail trade; repair of motor vehicles and motorcycles	0.34%
Others	0.93%

* Please note that the NACE sector allocation is not used in the Subfund's investment strategy. It is provided for disclosure purposes only. For example, the Subfund's investment strategy makes use of company's revenue exposure in accordance with CSAM's ESG Exclusion framework and does not exclude companies based on their NACE sector allocation.

** Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period. The "Other" category can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

Subfund Exposure to Fossil Fuels Sub-Sectors

NACE Sector Code *	NACE name	Portfolio Exposure **
B5.1.0	Mining of hard coal	0.00%
B5.2.0	Mining of lignite	0.00%
B6.1.0	Extraction of crude petroleum	0.00%
B6.2.0	Extraction of natural gas	0.00%
B9.1.0	Support activities for petroleum and natural gas extraction	0.00%
C19.2.0	Manufacture of refined petroleum products	0.00%

D35.2.1	Manufacture of gas	0.00%
D35.2.2	Distribution of gaseous fuels through mains	0.00%
D35.2.3	Trade of gas through mains	0.00%
G46.7.1	Wholesale of solid, liquid and gaseous fuels and related products	0.00%

* Please note that the NACE sector allocation is not used in the Subfund's investment strategy. It is provided for disclosure purposes only. For example, the Subfund's investment strategy makes use of company's revenue exposure in accordance with CSAM's ESG Exclusion framework and does not exclude companies based on their NACE sector allocation.

** Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

As of 31.05.2024, the Subfund reports 0.00% exposure to sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

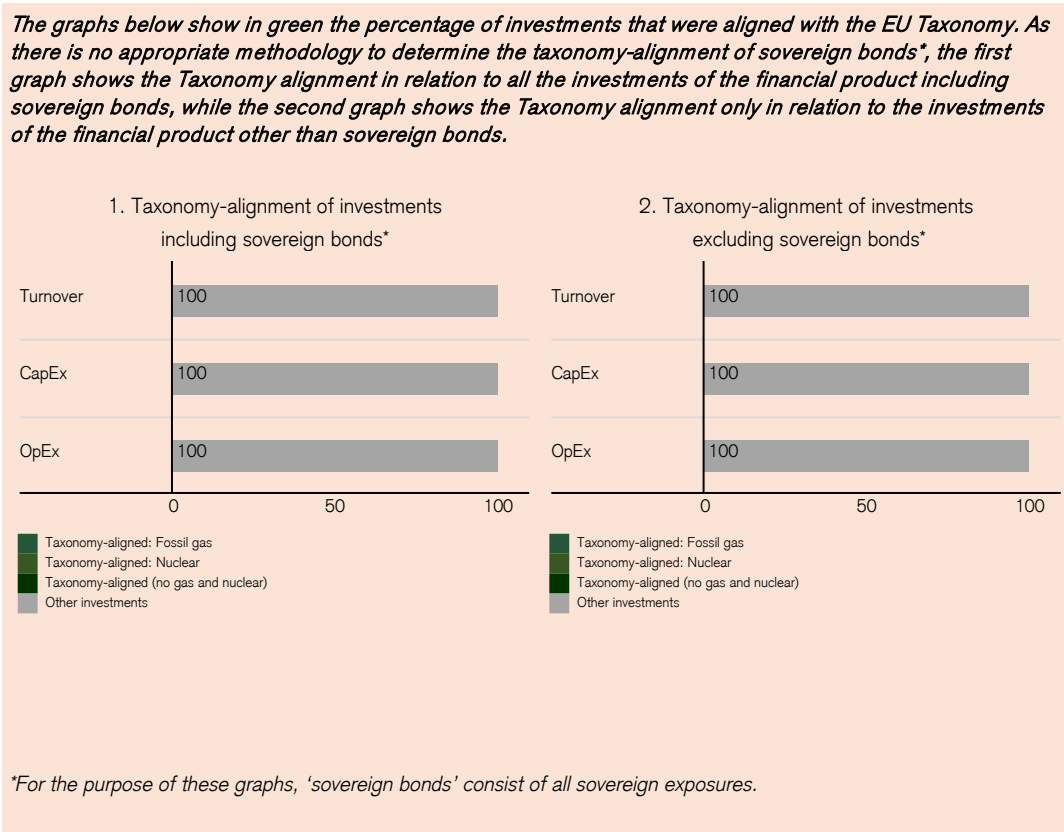

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The Subfund's reported EU Taxonomy alignment was not subject to assurance or review by a third party.

● ***What was the share of investments made in transitional and enabling activities?***

Of the 0.00% of sustainable investments with an environmental objective aligned with the EU Taxonomy as of 31.05.2024, 0.00% were made in transitional activities and 0.00% in enabling activities.

● ***How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?***

A comparison of the portfolio's investments that were aligned with the EU Taxonomy compared to previous periods will be available as of the next reference period.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

As of 31.05.2024, 96.61% of the Subfund's investments were made into sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of socially sustainable investments?

As of 31.05.2024, 2.45% of the Subfund's investments were made into socially sustainable investments.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

During the Reference Period, As of 31.05.2024, 0.93% of the Subfund's investments were made into "not sustainable".

Investments such as cash, derivatives and structured products may have fallen under "not sustainable" since such instruments did not contribute to the Sustainable Investment objectives of this Subfund. More information about the portfolio exposure to such investments can be found in the financial section of this annual report. Such investments did not have minimum environmental or social safeguards. They may have been used as efficient portfolio management tools, for cash management, for hedging purposes, or as an additional source of return.

What actions have been taken to attain the sustainable investment objective during the reference period?

To attain the sustainable investment objective set by this Subfund, this Subfund applied ESG Exclusions, ESG Integration and engaged with investee companies. This Subfund excluded investments in companies of the following three categories:

- Norms-based Exclusions

This Subfund excluded companies that failed to comply with international treaties on controversial weapons such as the Convention on Cluster Munitions, the Chemical Weapons Convention, the Biological Weapons Convention, the Treaty on the Non-Proliferation of Nuclear Weapons (NPT). In addition, it excluded companies that are recommended for exclusions by the Swiss Association for Responsible Investments (SVVK-ASIR) in respect to APM (anti-personnel mines), cluster munitions and nuclear weapons (outside of NPT).

- Values-based Exclusions

This Subfund excluded companies that derived more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment. It excluded companies that derived more than 20% of their revenue from tobacco distribution and conventional weapons support systems and services. In addition, a revenue limit of 20% applied to investments in coal (coal mining and coal-based electricity generation), a revenue limit of 5% applies to investments in arctic oil and gas as well as a revenue limit of 10% applies to investments in oil sands.

- Business-conduct Exclusions

Companies found to systematically violate international norms, where the breaches were particularly severe, or where management was not open to implement necessary reforms, were placed on a watch list, and may have been excluded from the Credit Suisse-wide investment universe. Restrictions related to LuxFLAG Environment label

To comply with the LuxFLAG Environment label, this Subfund considered additionally the following restriction:

- Investments in environment-related sectors corresponding to at least 75% of the investment fund's total assets.

ESG Factors were integrated into the investment process in the following four main steps:

- Identification of material ESG Factors

The Investment Manager identified the Subfund's material ESG Factors based on the fund's sustainable investment objectives. This assessment was supported by materiality frameworks, which define industry-specific weights of ESG Factors and take in particular sustainability risks into account.

- ESG security analysis

CSAM performed security, sector and regional research on ESG Factors across the Subfund's investment universe. CSAM made use of ESG data from third-party service providers and combined them with CSAM proprietary analysis and information. This included the alignment to SDGs, ESG related news, ESG ratings and scores, ESG related controversies and ESG trends.

- Security selection and portfolio implementation

Based on the identified material ESG Factors and the resulting ESG adjusted risk-return assessment, the Investment Manager constructed the Subfund's portfolio composition to meet the sustainable investment objectives and the targeted UN SDGs. The Subfund's strategy is to invest in companies that are helping to solve the most pressing environmental and climate issues. The eligible investment universe was defined through a positive screening involving quantitative and qualitative ESG criteria. The portfolio stocks are subsequently selected bottom-up including:

- Impact analysis (defining and assessing impacts and KPIs)
- ESG assessment (subcategory assessment)
- Fundamental analysis (financial metrics, competition, management)

- Portfolio monitoring

CSAM continuously monitored the ESG Factors by its portfolio management system and significant changes in the ESG Factors of underlying securities were re-assessed regularly to evaluate if a position should be increased or decreased.

- Engagement

CSAM engaged with investee companies with the aim of increasing its impact on sustainability issues. Selected companies that were able and willing to take action were subject to engagement and CSAM sought to preserve and/or enhance the value of the companies they invested in, through engagement with issuers. The Investment team defined the topics and issues CSAM wanted to discuss with investee companies. The resulting engagement activities for the reference period of this SFDR annex to the annual report were defined using certain criteria and aimed at companies in which CSAM held considerable investments through its funds. Below, please find a summary of our engagement activities:

Company	Company focus	Engagement
Company 1	A manufacturer of packaging and paper products	We continued our engagement with this company with the objective to discuss issues related to operations management and group level metrics for renewable and recycled materials. More specifically, we sought insights into how innovation is improving business performance and urged the company to consider the full cost cycle when introducing new processes and technology, as e.g. A.I. solutions are energy intense. The company assured us to evaluate the implications on the full cost cycle, considering energy requirements, and confirmed its 100% renewable energy target.
Company 2	Manufacturer of composite wind blades for the wind energy market and composite vehicle structures.	The Investment team and ESG specialists team has a structured engagement with the company's President and CEO with a special emphasis on the development and reporting on recycling methods for wind turbine blades. The company provided an update on its work related to life cycle assessments in collaboration with Northeastern University in the United States, which compared carbon footprint for different wind blade shredding and recycling methods such as pyrolysis and mechanical recycling. As investors, we expect this collaboration will lead to innovation of repurposing recycled materials and insights on ways to enhance efficiency of the mechanical recycling processes. We continue to assess the quality of innovation and pace of commercialization as part of our engagement insights led investment analysis.

Company 3	One of the largest salmon farmers globally with 100% ASC certified sites in its home market.	The Investment team and ESG specialists team had three structured engagements with the company's CEO and CFO on biodiversity, with a specific emphasis on the scalability of sustainable aquacultural practices. We encouraged the disclosure of common metrics across operations, with more detailed disclosures for an aquaculture operation outside the historical home market of the company related to fish escapes and fish mortality rates. In addition we discussed water recycling rate at currently used hatcheries for this location and possible improvements in the coming years. We are pleased to note that following the engagements, the company added Aquaculture Stewardship Council (ASC) certification rate for the specific business we engaged on.
Company 4	A manufacturer of consumer packaging products	The Investment team and ESG specialists team continued its engagement with this company within the broader TNFD (Taskforce on Nature-related Financial Disclosures) campaign and water consumption project. In our exchange we asked the company for further clarification about the use of recycled plastic and natural fiber as a share of raw materials used by the company. We encouraged the company to consider more groupwide disclosure and targets especially around its successful pilot project in India and share key learnings.
Company 5	Manufacturer of corrugated packaging products.	The Investment team continued its engagement project with this company within the larger initiative on Circularity and resource efficiency. We prioritized in our discussion the protection of natural resources by improvements in package design and the sustainably sourced raw materials. We have discontinued the engagement with the company at the end of the reporting period as we sold the issuer holding.
Company 6	Leading wind turbine manufacturer for on-shore markets	Within the scope of a larger initiative on Circularity and resource efficiency we engaged with the company on its 2025 Sustainability strategy with a focus on blade recyclability and nature ecosystems dependencies. Progress being made on replacing new blades with PET foam from PET bottles and phasing out balsa wood where possible, were some of the positive takeaways from our exchange. We recommended the company to disclose clear milestones and measurement indicators that help investors track progress of its commitment to full blade recyclability by 2032 through commercially viable operations.
Company 7	Manufacturer of aseptic carton packaging.	The Investment team continued its engagement project with this company within the scope of a larger initiative on Circularity and resource efficiency. The goal of the engagement initiative to discuss sustainable sourcing of packaging materials in the context of climate positive opportunities through the lens of natura capital preservation. Especially the company's opportunities in creating a circular by design business mode and how ecosystem dependencies are quantified were part of the exchange. We have discontinued the engagement with the company at the end of the reporting period as we sold the issuer holding.
Company 8	Leading wind turbine manufacturer	The Investment team and ESG specialists team had two structured engagements with the Head of Sustainability on a clear time line and sustainability metrics to demonstrate scalability and the commercialization of 'end-of-life' blade recycling. The company assured us that it has lined up credible partners as customers of recycled materials and operators of the recycling process, the building blocks of commercialization. It will complete the proof of concept in 2025 and will share detailed statistics on scalability in future calls as the data is currently being collected.
Company 9		The Investment team and ESG specialists team started its structured engagement with this company within the broader TNFD (Taskforce on Nature-related Financial Disclosures) campaign. We encouraged improved disclosure on how the company is helping its customers to support natural capital conservation. The company highlighted enhanced disclosure for its beverage processing system in the annual report. The company provided detailed explanation on how technology reduces emissions, water consumption and energy costs for its customers. The company also provided an update on biodiversity impacts and dependencies, the methods it uses to assess them in the annual report and a roadmap for action in upstream and downstream

More information about the engagement activities and the most current active ownership report of CSAM can be found online at: www.credit-suisse.com/esg

- Proxy Voting

Voting rights have been exercised for investee companies which have met the criteria for proxy voting as explained at www.credit-suisse.com/esg

How did this financial product perform compared to the reference sustainable benchmark?

The Subfund did not use a reference benchmark for the purpose of attaining the sustainable objective. However, for the purpose of comparability on the performance of the Subfund in context of the SDGs and carbon intensity, please find further information below.

The graph below shows the contribution of investments of the Subfund to SDGs compared to the Reference Index.

The table below shows the underlying carbon intensity (Scope 1 and 2) for each sector as well as the corresponding allocation in the Subfund's portfolio and reference index.

	Fund		Reference Index		Sector-Neutral Ref. Index	
	Allocation	Carbon Intensity	Allocation	Carbon Intensity	Allocation	Carbon Intensity
Industrials	45.9%	78.1	11.0%	90.3	45.9%	90.3
Materials	24.2%	181.0	4.2%	425.6	24.2%	425.6
Information Technology	16.2%	51.6	24.4%	21.2	16.2%	21.2
Consumer Discretionary	6.9%	82.7	10.6%	22.9	6.9%	22.9

For more information please also refer to the question "To what extent was the sustainable investment objective of this financial product met?"

- *How does the reference benchmark differ from a broad market index?*

Not applicable.

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

- *How did this financial product perform compared with the reference benchmark?*

Not applicable.

- *How did this financial product perform compared with the broad market index?*

Not applicable.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Credit Suisse (Lux) European Dividend Plus Equity Fund (until 07.01.2024)

Legal entity identifier: 529900N2F8WJBAAZSJ71

Credit Suisse (Lux) European Quality Dividend Equity Fund (as of 08.01.2024)

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●● <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective: ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 61.82% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective: ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This Subfund promotes environmental, social and governance (ESG) characteristics (within the meaning of Art. 8 of Regulation (EU) 2019/2088).

The Management Company and the Investment Manager applied the Credit Suisse Asset Management (CSAM) Sustainable Investing Policy to this Subfund.

This Subfund promoted the following environmental and social characteristics:

- to invest into companies that comply with international treaties on controversial weapons (norms-based exclusions on direct investments)
- not to invest into companies that derive more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment (values-based exclusions on direct investments)
- not to invest into companies that either derive more than 20% of their revenue from tobacco distribution or conventional weapons support systems and services (values-based exclusions on direct investments)
- not to invest into companies that either derive more than 20% of their revenues from coal (coal mining and coal-based electricity generation) and 5% of their revenues in arctic oil and gas, or 10% of their revenues from oil sands (values-based exclusions on direct investments)
- adherence to, and conducting business activities in accordance with, international norms such as the "United Nations Global Compact Principles" (UNGC) (business-conduct exclusions on direct investments)
- higher exposure to investments that have better ESG profile and fewer ESG controversies over their investment cycle (ESG Integration)
- contribution to good governance and sustainable practices through proxy voting and engagement with investee companies in line with CSAM's Sustainable Investing Policy (Active Ownership)
- lower GHG emission intensity than the benchmark: MSCI Europe (NR). Tons of CO2 equivalent emission intensity (GHG scopes 1 & 2) per \$m sales: Fund performance (**56.85**) against benchmark (**82.56**)

The extent to which the environmental and/or social characteristics were met is measured by the sustainability indicators shown below.

Derivatives were not used to attain the environmental or social characteristics.

Please find further information on ESG Integration, ESG Exclusions and Active Ownership below in the question "What actions have been taken to meet the environmental and/or social characteristics during the reference period?" and online at www.credit-suisse.com/esg.

● How did the sustainability indicators perform?

The table below shows the output of the Sustainability Indicators applicable to this Subfund as of 31.05.2024. While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

Sustainability Indicator*	Portfolio	Indicator Output
ESG Rating	AAA: 45.34%, AA: 31.07%, A: 21.08%, BBB: 1.07%, BB: 0.00%, B: 0.00%, CCC: 0.00%, Not ratable**: 1.45%, No data coverage**: 0.00%	Investment exposure by ESG Rating: AAA (highest): 0–100% AA: 0–100% A: 0–100% BBB: 0–100% BB: 0–100% B: 0–100% CCC (lowest): 0–100%
Environmental pillar score	6.92	Portfolio aggregate environmental pillar score: 1 (lowest) – 10 (highest)
Social pillar score	5.58	Portfolio aggregate social pillar score: 1 (lowest) – 10 (highest)
Governance pillar score	6.28	Portfolio aggregate governance pillar score: 1 (lowest) – 10 (highest)
ESG controversy flag	Green: 37.06%, Yellow: 36.67%, Orange: 24.83%, Red: 0.00%, Not ratable**: 1.45%, No data coverage**: 0.00%	Investment exposure by ESG controversy flag: Green: 0–100% Yellow: 0–100% Orange: 0–100% Red: 0–100%

CSAM ESG exclusions***	Pre- and post-trade checks are in place to detect investments that breach the ESG exclusions. Any detected breach is escalated and remedied.	This indicator reflects that the portfolio complied with the applicable ESG exclusions as described in the exclusion section of the website (during the entire reference period, CSAM adhered to ESG exclusion criteria, as stated in the CSAM Sustainable Investing Policy).
------------------------	--	---

* None of the Sustainability Indicators were subject to an assurance provided by an auditor or a review by a third party.

** These categories can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

*** Note that the amount of investments that were restricted due to the ESG exclusions depend on the investable universe of the Subfund.

● ...and compared to previous periods?

The table below presents data from the previous reference period (as of 31.05.2023). The data may differ compared to the previously published report as the most recently available data was taken into account, as the data provider(s) may have retroactively updated some figures. While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

Sustainability Indicator*	Portfolio	Indicator Output
ESG Rating	AAA: 35.24%, AA: 47.00%, A: 15.17%, BBB: 1.04%, BB: 0.00%, B: 0.00%, CCC: 0.00%, Not ratable**: 1.55%, No data coverage**: 0.00%	Investment exposure by ESG Rating: AAA (highest): 0–100% AA: 0–100% A: 0–100% BBB: 0–100% BB: 0–100% B: 0–100% CCC (lowest): 0–100%

CSAM ESG exclusions***	Pre- and post-trade checks are in place to detect investments that breach the ESG exclusions. Any detected breach is escalated and remedied.	This indicator reflects that the portfolio complied with the applicable ESG exclusions as described in the exclusion section of the website (during the entire reference period, CSAM adhered to ESG exclusion criteria, as stated in the CSAM Sustainable Investing Policy).
GHG emission intensity	Fund 81.32 Benchmark (MSCI Europe (NR)): 111.46	Tons of CO2 equivalent emission intensity (GHG scopes 1 & 2) per \$m sales

* None of the Sustainability Indicators were subject to an assurance provided by an auditor or a review by a third party.

** These categories can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

*** Note that the amount of investments that were restricted due to the ESG exclusions depend on the investable universe of the Subfund.

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

At the end of the reference period, the sustainable investments contributed to the Social objectives below:

- Investments that generated at least 50% of their revenues from products and services that contribute to a social objective (e.g. nutrition, disease treatments, sanitation, affordable real estate, SME finance, education, connectivity etc.)
- Investments that have an approved commitment to science-based emission targets and an average reduction in carbon emissions intensity of 7% over the last three years

The above criteria were assessed using a quantitative methodology. If there had not been an output from the quantitative assessment (e.g. in the case of missing quantitative ESG data), investments were submitted for confirmation in a case-by-case approach based on a proprietary assessment of the criteria. A central Credit Suisse committee approved such submissions.

● *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

CSAM considered various indicators linked to principal adverse impacts on sustainability factors (PAI Indicators) and further indicators from its exclusion framework to assess whether sustainable investments caused significant harm to any environmental or social investment objective.

— — *How were the indicators for adverse impacts on sustainability factors taken into account?*

During the reference period, the PAI Indicators applied by CSAM to identify investments which qualify as SFDR Sustainable Investments in line with CS SFDR Sustainable Investment Methodology included a set of criteria and thresholds to determine if an investment passed the DNSH condition as follows:

Investments must not:

1. have a significant negative contribution to climate change. This criterion makes use of an indicator that flags the biggest emitters of greenhouse gas globally and relates to PAI 1, 2, 3 and 15.
2. be subject to norms, values and business conduct exclusions and other investment restrictions which address PAI 4, 10, 14 and 16.
3. be subject to severe ESG controversies which address PAI 7 and 10 where applicable.
4. be strongly lagging its industry peers in overall ESG performance. This criterion has been applied to cover the remainder of the PAI to the extent possible.

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainable Investments were aligned with the 'OECD Guidelines for Multinational Enterprises' and the 'UN Guiding Principles on Business and Human Rights'. The alignment was assessed as part of the CS ESG Exclusion framework. Companies that exhibit severe weaknesses in business conduct, particularly with regard to breaches of the 'United Nations Global Compact Principles' (UNGC) and companies placed on the watchlist, but with no immediate exclusion, were flagged not to be considered SFDR Sustainable Investments due to DNSH.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides the exposure to all mandatory PAI from the Commission Delegated Regulation (EU) 2022/1288. The Adverse Sustainability Indicator/Metric values are calculated as an asset weighted average based on quarterly data representing the reference period from 01.06.2023–31.05.2024.

Please note that CSAM may choose or may not be able to consider and/or mitigate all of the herein reported PAI given the Subfund's investment strategy, asset class or the availability of reliable data. Consideration of PAI may be subject to change given evolving data availability and quality. Please refer to the EET for the most recent overview of which PAI are considered at Subfund level.

Please find further information on CSAM PAI Framework online at www.credit-suisse.com/esg.

* Look-through enabled where possible, excl. cash and derivatives. Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which were neither aligned with the environmental or social characteristics, nor qualified as sustainable investments.

Please refer to the section "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?" for further information.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that did not qualify as sustainable investments.

The proportion of investments used to meet the environmental or social characteristics promoted by this Subfund (category #1 above) was 98.49% of its total net assets.

Within this category the Subfund held a proportion of 61.82% of its total net assets in sustainable investments (category #1A above) and a proportion of 36.67% of its total net assets in other E/S characteristics (category #1B above).

The proportion of investments held by the Subfund in "Other" (category #2 above) was 1.51% of its total net assets.

The data is valid as of 31.05.2024. It does not represent an average for the reference period.

● In which economic sectors were the investments made?

Subfund Sectoral Exposure

NACE Sector Code *	Portfolio Exposure **
B. Mining and quarrying	1.65%
C. Manufacturing	48.97%
D. Electricity, gas, steam and air conditioning supply	10.97%
F. Construction	5.34%
G. Wholesale and retail trade; repair of motor vehicles and motorcycles	1.41%
H. Transportation and storage	2.18%
J. Information and communication	8.71%
K. Financial and insurance activities	19.33%
Others	1.45%

* Please note that the NACE sector allocation is not used in the Subfund's investment strategy. It is provided for disclosure purposes only. For example, the Subfund's investment strategy makes use of company's revenue exposure in accordance with CSAM's ESG Exclusion framework and does not exclude companies based on their

NACE sector allocation.

** Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period. The "Others" category can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

Subfund Exposure to Fossil Fuels Sub-Sectors

NACE Sector Code *	NACE name	Portfolio Exposure **
B5.1.0	Mining of hard coal	0.00%
B5.2.0	Mining of lignite	0.00%
B6.1.0	Extraction of crude petroleum	0.00%
B6.2.0	Extraction of natural gas	0.00%
B9.1.0	Support activities for petroleum and natural gas extraction	0.00%
C19.2.0	Manufacture of refined petroleum products	0.00%
D35.2.1	Manufacture of gas	0.00%
D35.2.2	Distribution of gaseous fuels through mains	0.00%
D35.2.3	Trade of gas through mains	0.00%
G46.7.1	Wholesale of solid, liquid and gaseous fuels and related products	0.00%

* Please note that the NACE sector allocation is not used in the Subfund's investment strategy. It is provided for disclosure purposes only. For example, the Subfund's investment strategy makes use of company's revenue exposure in accordance with CSAM's ESG Exclusion framework and does not exclude companies based on their NACE sector allocation.

** Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contri-

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

As of 31.05.2024, the Subfund reports 0.00% exposure to sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

bution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The Subfund's reported EU Taxonomy alignment was not subject to assurance or review by a third party.

● **What was the share of investments made in transitional and enabling activities?**

Of the 0.00% of sustainable investments with an environmental objective aligned with the EU Taxonomy as of 31.05.2024, 0.00% were made in transitional activities and 0.00% in enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During the previous reference period the percentage of investments that were aligned with the EU Taxonomy were 0.00% as of 31.05.2023.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As of 31.05.2024, 58.14% of the Subfund's investments were made into sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

As of 31.05.2024, 3.68% of the Subfund's investments were made into socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

As of 31.05.2024, 1.51% of the Subfund's investments were made into "other".

Investments such as cash, derivatives and structured products may have fallen under "other" since such instruments did not contribute to the E/S characteristics of this Subfund. More information about the portfolio exposure to such investments can be found in the financial section of this annual report. Such investments did not have minimum environmental or social safeguards. They may have been used as efficient portfolio management tools, for cash management, for hedging purposes, or as an additional source of return.

Additionally, investments may have fallen under "other" if insufficient ESG-related information was available. This applied in particular to asset classes for which ESG Factors were insufficiently defined or insufficient ESG related information was available. Where possible, minimum environmental or social safeguards have been applied to these underlying securities by ensuring that CSAM ESG exclusions were adhered to.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To attain the environmental or social characteristics promoted by this Subfund, this Subfund applied ESG Exclusions, ESG Integration and Active Ownership.

This Subfund excluded investments in companies of the following three categories:

- Norms-based Exclusions

This Subfund excluded companies that failed to comply with international treaties on controversial weapons such as the Convention on Cluster Munitions, the Chemical Weapons Convention, the Biological Weapons Convention, the Treaty on the Non-Proliferation of Nuclear Weapons (NPT). In addition, it excluded companies that are recommended for exclusions by the Swiss Association for Responsible Investments (SVVK-ASIR) in respect to APM (anti-personnel mines), cluster munitions and nuclear weapons (outside of NPT).

- Values-based Exclusions

This Subfund excluded companies that derived more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment. It excluded companies that derived more than 20% of their revenue from tobacco distribution and conventional weapons support systems and services. In addition, a revenue limit of 20% applied to investments in coal (coal mining and coal-based electricity generation), a revenue limit of 5% applies to investments in arctic oil and gas as well as a revenue limit of 10% applies to investments in oil sands.

- Business-conduct Exclusions

Companies found to systematically violate international norms, where the breaches were particularly severe, or where management was not open to implement necessary reforms, were placed on a watch list, and may have been excluded

from the Credit Suisse-wide investment universe. This process was governed by a dedicated committee that maintained the list of excluded companies and was responsible for ensuring that the list is communicated to investment teams in a timely manner.

- Restrictions related to the Guidelines for Responsible Investing of the Bundesverband Investment and Asset Management's (BVI)

To comply with the BVI guidelines, this Subfund excluded additionally the following companies, countries, and sectors from the investment universe:

- Military hardware: companies that derive more than 10% of their revenue from manufacturing conventional weapons, components, and support systems and services
- Sovereign issuers: serious violations of democratic and human rights based on the assessment as "not free" according to the Freedom House's index (freedomhouse.org/countries/freedom-world/scores)

ESG Factors were integrated into the investment process in the following four main steps:

- Identification of material ESG Factors

First, the Investment Manager used materiality frameworks to identify those ESG Factors that are relevant to the investment strategy. Materiality frameworks are concepts that help to identify sustainability-related issues and opportunities that are likely to affect the financial condition or operating performance of companies within an industry. Material factors have been furthermore assessed based on the Subfund's sector and geographical exposure. Second, the Investment Manager prioritized the material factors that were most relevant to the subsequent investment decisions based on the portfolio's current market exposure.

- ESG security analysis

Based on the identified material ESG Factors, the Investment Manager performed security research across the Subfund's investment universe. The Investment Manager made use of ESG ratings from third-party service providers and combined them with CSAM's proprietary analyses and information. These included, e.g. ESG related news, ESG ratings and scores, ESG-related controversies, and ESG trends.

The ESG data are fully integrated in the portfolio management software. The CSAM sustainable investing team may offer additional support, where needed, and advise on access to other ESG data providers. The outcome of the ESG analysis of individual securities, combined with financial research, enabled the Investment Managers to make ESG-adjusted risk/return assessments. This enabled the Investment Manager to compare securities on an ESG-adjusted basis and to evaluate whether to keep certain securities in the portfolio or to sell them during the security selection and portfolio implementation stage. The ESG security analysis has been updated periodically.

- Security selection and portfolio implementation

Based on the identified material ESG Factors and the ESG-adjusted security analysis, the Investment Manager constructed a portfolio in accordance with the Subfund's investment process and principles. The ESG-adjusted security analysis combined with portfolio construction considerations has been used to determine appropriate portfolio weights that reflected the ESG-adjusted risk/return profile of the analyzed securities.

The research process might make use of dedicated ESG questionnaires with potential follow-up meetings with investee companies in case incomplete data is available from third-party ESG data providers.

- Portfolio monitoring

The Investment Manager monitored the ESG Factors periodically to detect significant changes in the ESG Factors of the underlying securities. They regularly reassessed the portfolio, taking into consideration financial and ESG metrics, and consequently decided whether to increase or decrease positions in the portfolio.

- Engagement

CSAM engaged with investee companies with the aim of increasing its impact on sustainability issues. Selected companies that were able and willing to take action were subject to engagement and CSAM sought to preserve and/or enhance the value of the companies they invested in, through engagement with issuers. The Active Ownership team defined the topics and issues CSAM wanted to discuss with investee companies. The resulting engagement activities for the reference period of this SFDR annex to the annual report were defined using certain criteria and aimed at companies in which CSAM held considerable investments through its funds. More information about the engagement activities and the most current active ownership report of CSAM can be found online at: www.credit-suisse.com/esg.

- Proxy Voting

Voting rights have been exercised for investee companies which have met the criteria for Proxy Voting as explained at www.credit-suisse.com/esg

How did this financial product perform compared to the reference benchmark?

The Subfund did not use a reference benchmark for the purpose of attaining the environmental and/or social characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

Not applicable.

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

- *How did this financial product perform compared with the reference benchmark?*

- *How did this financial product perform compared with the broad market index?*

Not applicable.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Credit Suisse (Lux) European Entrepreneur Equity Fund

Legal entity identifier: 549300X70P2HLBU5CJ69

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 23.32% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This Subfund promotes environmental, social and governance (ESG) characteristics (within the meaning of Art. 8 of Regulation (EU) 2019/2088).

The Management Company and the Investment Manager applied the Credit Suisse Asset Management (CSAM) Sustainable Investing Policy to this Subfund.

This Subfund promoted the following environmental and social characteristics:

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- to invest into companies that comply with international treaties on controversial weapons (norms-based exclusions on direct investments)
- not to invest into companies that derive more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment (values-based exclusions on direct investments)
- not to invest into companies that either derive more than 20% of their revenue from tobacco distribution or conventional weapons support systems and services (values-based exclusions on direct investments)
- not to invest into companies that either derive more than 20% of their revenues from coal (coal mining and coal-based electricity generation) and 5% of their revenues in arctic oil and gas, or 10% of their revenues from oil sands (values-based exclusions on direct investments)
- adherence to, and conducting business activities in accordance with, international norms such as the "United Nations Global Compact Principles" (UNGCP) (business-conduct exclusions on direct investments)
- higher exposure to investments that have better ESG profile and fewer ESG controversies over their investment cycle (ESG Integration)
- contribution to good governance and sustainable practices through proxy voting and engagement with investee companies in line with CSAM's Sustainable Investing Policy (Active Ownership)

The extent to which the environmental and/or social characteristics were met is measured by the sustainability indicators shown below.

Derivatives were not used to attain the environmental or social characteristics.

Please find further information on ESG Integration, ESG Exclusions and Active Ownership below in the question "What actions have been taken to meet the environmental and/or social characteristics during the reference period?" and online at www.credit-suisse.com/esg.

● *How did the sustainability indicators perform?*

The table below shows the output of the Sustainability Indicators applicable to this Subfund as of 31.05.2024. While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

Sustainability Indicator*	Portfolio	Indicator Output
ESG Rating	AAA: 16.01%, AA: 33.49%, A: 35.08%, BBB: 11.80%, BB: 2.40%, B: 0.00%, CCC: 0.00%, Not ratable**: 0.66%, No data coverage**: 0.57%	Investment exposure by ESG Rating: AAA (highest): 0–100% AA: 0–100% A: 0–100% BBB: 0–100% BB: 0–100% B: 0–100% CCC (lowest): 0–100%
Environmental pillar score	5.80	Portfolio aggregate environmental pillar score: 1 (lowest) – 10 (highest)

ESG controversy flag	Green: 63.38%, Yellow: 29.90%, Orange: 6.06%, Red: 0.00%, Not ratable**: 0.66%, No data coverage**: 0.00%	Investment exposure by ESG controversy flag: Green: 0–100% Yellow: 0–100% Orange: 0–100% Red: 0–100%
CSAM ESG exclusions***	Pre- and post-trade checks are in place to detect investments that breach the ESG exclusions. Any detected breach is escalated and remedied.	This indicator reflects that the portfolio complied with the applicable ESG exclusions as described in the exclusion section of the website (during the entire reference period, CSAM adhered to ESG exclusion criteria, as stated in the CSAM Sustainable Investing Policy).

* None of the Sustainability Indicators were subject to an assurance provided by an auditor or a review by a third party.

** These categories can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

*** Note that the amount of investments that were restricted due to the ESG exclusions depend on the investable universe of the Subfund.

● ...and compared to previous periods?

The table below presents data from the previous reference period (as of 31.05.2023). The data may differ compared to the previously published report as the most recently available data was taken into account, as the data provider(s) may have retroactively updated some figures. While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

Sustainability Indicator*	Portfolio	Indicator Output
ESG Rating	AAA: 18.48%, AA: 24.47%, A: 27.16%, BBB: 14.96%, BB: 4.28%, B: 0.00%, CCC: 0.86%, Not ratable**: 6.24%, No data coverage**: 3.56%	Investment exposure by ESG Rating: AAA (highest): 0–100% AA: 0–100% A: 0–100% BBB: 0–100% BB: 0–100% B: 0–100% CCC (lowest): 0–100%
Environmental pillar score	5.84	Portfolio aggregate environmental pillar score: 1 (lowest) – 10 (highest)
Social pillar score	5.22	Portfolio aggregate social pillar score: 1 (lowest) – 10 (highest)
Governance pillar score	5.92	Portfolio aggregate governance pillar score: 1 (lowest) – 10 (highest)
ESG controversy flag	Green: 66.01%, Yellow: 19.42%, Orange: 4.77%, Red: 0.00%, Not ratable**: 6.24%, No data coverage**: 3.56%	Investment exposure by ESG controversy flag: Green: 0–100% Yellow: 0–100% Orange: 0–100% Red: 0–100%
CSAM ESG exclusions***	Pre- and post-trade checks are in place to detect investments that breach the ESG exclusions. Any detected breach is escalated and remedied.	This indicator reflects that the portfolio complied with the applicable ESG exclusions as described in the exclusion section of the website (during the entire reference period, CSAM adhered to ESG exclusion criteria, as stated in the CSAM Sustainable Investing Policy).

* None of the Sustainability Indicators were subject to an assurance provided by an auditor or a review by a third party.

** These categories can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

*** Note that the amount of investments that were restricted due to the ESG exclusions depend on the investable universe of the Subfund.

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

At the end of the reference period, the sustainable investments contributed to the Social objectives below:

- Investments that generated at least 50% of their revenues from products and services that contribute to a social objective (e.g. nutrition, disease treatments, sanitation, affordable real estate, SME finance, education, connectivity etc.)
- Investments that have an approved commitment to science-based emission targets and an average reduction in carbon emissions intensity of 7% over the last three years

The above criteria were assessed using a quantitative methodology. If there had not been an output from the quantitative assessment (e.g. in the case of missing quantitative ESG data), investments were submitted for confirmation in a case-by-case approach based on a proprietary assessment of the criteria. A central Credit Suisse committee approved such submissions.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

CSAM considered various indicators linked to principal adverse impacts on sustainability factors (PAI Indicators) and further indicators from its exclusion framework to assess whether sustainable investments caused significant harm to any environmental or social investment objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— — ***How were the indicators for adverse impacts on sustainability factors taken into account?***

During the reference period, the PAI Indicators applied by CSAM to identify investments which qualify as SFDR Sustainable Investments in line with CS SFDR Sustainable Investment Methodology included a set of criteria and thresholds to determine if an investment passed the DNSH condition as follows:

Investments must not:

1. have a significant negative contribution to climate change. This criterion makes use of an indicator that flags the biggest emitters of greenhouse gas globally and relates to PAI 1, 2, 3 and 15.
2. be subject to norms, values and business conduct exclusions and other investment restrictions which address PAI 4, 10, 14 and 16.
3. be subject to severe ESG controversies which address PAI 7 and 10 where applicable.
4. be strongly lagging its industry peers in overall ESG performance. This criterion has been applied to cover the remainder of the PAI to the extent possible.

— — — ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Sustainable Investments were aligned with the 'OECD Guidelines for Multinational Enterprises' and the 'UN Guiding Principles on Business and Human Rights'. The alignment was assessed as part of the CS ESG Exclusion framework. Companies that exhibit severe weaknesses in business conduct, particularly with regard to breaches of the 'United Nations Global Compact Principles' (UNGC) and companies placed on the watchlist, but with no immediate exclusion, were flagged not to be considered SFDR Sustainable Investments due to DNSH.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides the exposure to all mandatory PAI from the Commission Delegated Regulation (EU) 2022/1288. The Adverse Sustainability Indicator/Metric values are calculated as an asset weighted average based on quarterly data representing the reference period from 01.06.2023–31.05.2024.

Please note that CSAM may choose or may not be able to consider and/or mitigate all of the herein reported PAI given the Subfund's investment strategy, asset class or the availability of reliable data. Consideration of PAI may be subject to change given evolving data availability and quality. Please refer to the EET for the most recent overview of which PAI are considered at Subfund level.

Please find further information on CSAM PAI Framework online at www.credit-suisse.com/esg.

* *Look-through enabled where possible, excl. cash and derivatives. Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period.*

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 31.05.2024

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which were neither aligned with the environmental or social characteristics, nor qualified as sustainable investments.

Please refer to the section "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?" for further information.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that did not qualify as sustainable investments.

The proportion of investments used to meet the environmental or social characteristics promoted by this Subfund (category #1 above) was 98.72% of its total net assets.

Within this category the Subfund held a proportion of 23.32% of its total net assets in sustainable investments (category #1A above) and a proportion of 75.40% of its total net assets in other E/S characteristics (category #1B above).

The proportion of investments held by the Subfund in "Other" (category #2 above) was 1.28% of its total net assets.

The data is valid as of 31.05.2024. It does not represent an average for the reference period.

● In which economic sectors were the investments made?

Subfund Sectoral Exposure

NACE Sector Code *	Portfolio Exposure **
B. Mining and quarrying	1.52%
C. Manufacturing	50.91%
D. Electricity, gas, steam and air conditioning supply	1.69%
F. Construction	4.41%
G. Wholesale and retail trade; repair of motor vehicles and motorcycles	2.91%
H. Transportation and storage	1.57%
J. Information and communication	12.35%
K. Financial and insurance activities	12.93%
L. Real estate activities	1.13%
M. Professional, scientific and technical activities	4.92%
N. Administrative and support service activities	1.86%
R. Arts, entertainment and recreation	3.13%
Others	0.66%

* Please note that the NACE sector allocation is not used in the Subfund's investment strategy. It is provided for disclosure purposes only. For example, the Subfund's investment strategy makes use of company's revenue exposure in accordance with CSAM's ESG Exclusion framework and does not exclude companies based on their NACE sector allocation.

** Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period. The "Others" category can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

Subfund Exposure to Fossil Fuels Sub-Sectors

NACE Sector Code *	NACE name	Portfolio Exposure **
B5.1.0	Mining of hard coal	0.00%
B5.2.0	Mining of lignite	0.00%
B6.1.0	Extraction of crude petroleum	1.52%
B6.2.0	Extraction of natural gas	0.00%
B9.1.0	Support activities for petroleum and natural gas extraction	0.00%
C19.2.0	Manufacture of refined petroleum products	2.87%
D35.2.1	Manufacture of gas	0.00%
D35.2.2	Distribution of gaseous fuels through mains	0.00%
D35.2.3	Trade of gas through mains	0.00%
G46.7.1	Wholesale of solid, liquid and gaseous fuels and related products	0.00%

* Please note that the NACE sector allocation is not used in the Subfund's investment strategy. It is provided for disclosure purposes only. For example, the Subfund's investment strategy makes use of company's revenue exposure in accordance with CSAM's ESG Exclusion framework and does not exclude companies based on their NACE sector allocation.

** Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contri-

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

As of 31.05.2024, the Subfund reports 0.00% exposure to sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

bution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The Subfund's reported EU Taxonomy alignment was not subject to assurance or review by a third party.

● **What was the share of investments made in transitional and enabling activities?**

Of the 0.00% of sustainable investments with an environmental objective aligned with the EU Taxonomy as of 31.05.2024, 0.00% were made in transitional activities and 0.00% in enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During the previous reference period the percentage of investments that were aligned with the EU Taxonomy were 0.00% as of 31.05.2023.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As of 31.05.2024, 22.31% of the Subfund's investments were made into sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

As of 31.05.2024, 1.01% of the Subfund's investments were made into socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

As of 31.05.2024, 1.28% of the Subfund's investments were made into "other".

Investments such as cash, derivatives and structured products may have fallen under "other" since such instruments did not contribute to the E/S characteristics of this Subfund. More information about the portfolio exposure to such investments can be found in the financial section of this annual report. Such investments did not have minimum environmental or social safeguards. They may have been used as efficient portfolio management tools, for cash management, for hedging purposes, or as an additional source of return.

Additionally, investments may have fallen under "other" if insufficient ESG-related information was available. This applied in particular to asset classes for which ESG Factors were insufficiently defined or insufficient ESG related information was available. Where possible, minimum environmental or social safeguards have been applied to these underlying securities by ensuring that CSAM ESG exclusions were adhered to.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To attain the environmental or social characteristics promoted by this Subfund, this Subfund applied ESG Exclusions, ESG Integration and Active Ownership.

This Subfund excluded investments in companies of the following three categories:

- Norms-based Exclusions

This Subfund excluded companies that failed to comply with international treaties on controversial weapons such as the Convention on Cluster Munitions, the Chemical Weapons Convention, the Biological Weapons Convention, the Treaty on the Non-Proliferation of Nuclear Weapons (NPT). In addition, it excluded companies that are recommended for exclusions by the Swiss Association for Responsible Investments (SVVK-ASIR) in respect to APM (anti-personnel mines), cluster munitions and nuclear weapons (outside of NPT).

- Values-based Exclusions

This Subfund excluded companies that derived more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment. It excluded companies that derived more than 20% of their revenue from tobacco distribution and conventional weapons support systems and services. In addition, a revenue limit of 20% applied to investments in coal (coal mining and coal-based electricity generation), a revenue limit of 5% applies to investments in arctic oil and gas as well as a revenue limit of 10% applies to investments in oil sands.

- Business-conduct Exclusions

Companies found to systematically violate international norms, where the breaches were particularly severe, or where management was not open to implement necessary reforms, were placed on a watch list, and may have been excluded

from the Credit Suisse-wide investment universe. This process was governed by a dedicated committee that maintained the list of excluded companies and was responsible for ensuring that the list is communicated to investment teams in a timely manner.

- Restrictions related to the Guidelines for Responsible Investing of the Bundesverband Investment and Asset Management's (BVI)

To comply with the BVI guidelines, this Subfund excluded additionally the following companies, countries, and sectors from the investment universe:

- Military hardware: companies that derive more than 10% of their revenue from manufacturing conventional weapons, components, and support systems and services
- Sovereign issuers: serious violations of democratic and human rights based on the assessment as "not free" according to the Freedom House's index (freedomhouse.org/countries/freedom-world/scores)

ESG Factors were integrated into the investment process in the following four main steps:

- Identification of material ESG Factors

First, the Investment Manager used materiality frameworks to identify those ESG Factors that are relevant to the investment strategy. Materiality frameworks are concepts that help to identify sustainability-related issues and opportunities that are likely to affect the financial condition or operating performance of companies within an industry. Material factors have been furthermore assessed based on the Subfund's sector and geographical exposure. Second, the Investment Manager prioritized the material factors that were most relevant to the subsequent investment decisions based on the portfolio's current market exposure.

- ESG security analysis

Based on the identified material ESG Factors, the Investment Manager performed security research across the Subfund's investment universe. The Investment Manager made use of ESG ratings from third-party service providers and combined them with CSAM's proprietary analyses and information. These included, e.g. ESG related news, ESG ratings and scores, ESG-related controversies, and ESG trends.

The ESG data are fully integrated in the portfolio management software. The CSAM sustainable investing team may offer additional support, where needed, and advise on access to other ESG data providers. The outcome of the ESG analysis of individual securities, combined with financial research, enabled the Investment Managers to make ESG-adjusted risk/return assessments. This enabled the Investment Manager to compare securities on an ESG-adjusted basis and to evaluate whether to keep certain securities in the portfolio or to sell them during the security selection and portfolio implementation stage. The ESG security analysis has been updated periodically.

- Security selection and portfolio implementation

Based on the identified material ESG Factors and the ESG-adjusted security analysis, the Investment Manager constructed a portfolio in accordance with the Subfund's investment process and principles. The ESG-adjusted security analysis combined with portfolio construction considerations has been used to determine appropriate portfolio weights that reflected the ESG-adjusted risk/return profile of the analyzed securities.

The research process might make use of dedicated ESG questionnaires with potential follow-up meetings with investee companies in case incomplete data is available from third-party ESG data providers.

- Portfolio monitoring

The Investment Manager monitored the ESG Factors periodically to detect significant changes in the ESG Factors of the underlying securities. They regularly reassessed the portfolio, taking into consideration financial and ESG metrics, and consequently decided whether to increase or decrease positions in the portfolio.

- Engagement

CSAM engaged with investee companies with the aim of increasing its impact on sustainability issues. Selected companies that were able and willing to take action were subject to engagement and CSAM sought to preserve and/or enhance the value of the companies they invested in, through engagement with issuers. The Active Ownership team defined the topics and issues CSAM wanted to discuss with investee companies. The resulting engagement activities for the reference period of this SFDR annex to the annual report were defined using certain criteria and aimed at companies in which CSAM held considerable investments through its funds. More information about the engagement activities and the most current active ownership report of CSAM can be found online at: www.credit-suisse.com/esg.

- Proxy Voting

Voting rights have been exercised for investee companies which have met the criteria for Proxy Voting as explained at www.credit-suisse.com/esg

How did this financial product perform compared to the reference benchmark?

The Subfund did not use a reference benchmark for the purpose of attaining the environmental and/or social characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

Not applicable.

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

- *How did this financial product perform compared with the reference benchmark?*

- *How did this financial product perform compared with the broad market index?*

Not applicable.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Credit Suisse (Lux) Eurozone Quality Growth Equity Fund

Legal entity identifier: 5299006RGP08CZU4DD72

The Subfund has been merged into Credit Suisse (Lux) European Entrepreneur Equity Fund as of 03.05.2024. As the Subfund has been merged before the end of the financial year, the period-end date has been adjusted to 02.05.2024.

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?	
<p>●● <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p>	<p>●● <input checked="" type="checkbox"/> No</p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 25.22% of sustainable investments</p> <p style="margin-left: 20px;"><input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy</p> <p style="margin-left: 20px;"><input checked="" type="checkbox"/> with a social objective</p> <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This Subfund promotes environmental, social and governance (ESG) characteristics (within the meaning of Art. 8 of Regulation (EU) 2019/2088).

The Management Company and the Investment Manager applied the Credit Suisse Asset Management (CSAM) Sustainable Investing Policy to this Subfund.

This Subfund promoted the following environmental and social characteristics:

- to invest into companies that comply with international treaties on controversial weapons (norms-based exclusions on direct investments)
- not to invest into companies that derive more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment (values-based exclusions on direct investments)
- not to invest into companies that either derive more than 20% of their revenue from tobacco distribution or conventional weapons support systems and services (values-based exclusions on direct investments)
- not to invest into companies that either derive more than 20% of their revenues from coal (coal mining and coal-based electricity generation) and 5% of their revenues in arctic oil and gas, or 10% of their revenues from oil sands (values-based exclusions on direct investments)
- adherence to, and conducting business activities in accordance with, international norms such as the "United Nations Global Compact Principles" (UNGC) (business-conduct exclusions on direct investments)
- higher exposure to investments that have better ESG profile and fewer ESG controversies over their investment cycle (ESG Integration)
- contribution to good governance and sustainable practices through proxy voting and engagement with investee companies in line with CSAM's Sustainable Investing Policy (Active Ownership)

The extent to which the environmental and/or social characteristics were met is measured by the sustainability indicators shown below.

Derivatives were not used to attain the environmental or social characteristics.

Please find further information on ESG Integration, ESG Exclusions and Active Ownership below in the question "What actions have been taken to meet the environmental and/or social characteristics during the reference period?" and online at www.credit-suisse.com/esg.

● How did the sustainability indicators perform?

The table below shows the output of the Sustainability Indicators applicable to this Subfund as of 02.05.2024. While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

Sustainability Indicator*	Portfolio	Indicator Output
ESG Rating	AAA: 15.82%, AA: 33.19%, A: 34.67%, BBB: 10.89%, BB: 2.33%, B: 0.00%, CCC: 0.00%, Not ratable**: 2.59%, No data coverage**: 0.51%	Investment exposure by ESG Rating: AAA (highest): 0–100% AA: 0–100% A: 0–100% BBB: 0–100% BB: 0–100% B: 0–100% CCC (lowest): 0–100%

--	--

* None of the Sustainability Indicators were subject to an assurance provided by an auditor or a review by a third party.

** These categories can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

*** Note that the amount of investments that were restricted due to the ESG exclusions depend on the investable universe of the Subfund.

● ...and compared to previous periods?

The table below presents data from the previous reference period (as of 31.05.2023). The data may differ compared to the previously published report as the most recently available data was taken into account, as the data provider(s) may have retroactively updated some figures. While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

Sustainability Indicator*	Portfolio	Indicator Output
ESG Rating	AAA: 34.51%, AA: 48.56%, A: 15.33%, BBB: 1.07%, BB: 0.00%, B: 0.00%, CCC: 0.00%, Not ratable**: 0.53%, No data coverage**: 0.00%	Investment exposure by ESG Rating: AAA (highest): 0–100% AA: 0–100% A: 0–100% BBB: 0–100% BB: 0–100% B: 0–100% CCC (lowest): 0–100%
Environmental pillar score	6.69	Portfolio aggregate environmental pillar score: 1 (lowest) – 10 (highest)
Social pillar score	5.69	Portfolio aggregate social pillar score: 1 (lowest) – 10 (highest)
Governance pillar score	6.48	Portfolio aggregate governance pillar score: 1 (lowest) – 10 (highest)
ESG controversy flag	Green: 46.60%, Yellow: 33.83%, Orange: 19.04%, Red: 0.00%, Not ratable**: 0.53%, No data coverage**: 0.00%	Investment exposure by ESG controversy flag: Green: 0–100% Yellow: 0–100% Orange: 0–100% Red: 0–100%
CSAM ESG exclusions***	Pre- and post-trade checks are in place to detect investments that breach the ESG exclusions. Any detected breach is escalated and remedied.	This indicator reflects that the portfolio complied with the applicable ESG exclusions as described in the exclusion section of the website (during the entire reference period, CSAM adhered to ESG exclusion criteria, as stated in the CSAM Sustainable Investing Policy).

* None of the Sustainability Indicators were subject to an assurance provided by an auditor or a review by a third party.

** These categories can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

*** Note that the amount of investments that were restricted due to the ESG exclusions depend on the investable universe of the Subfund.

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

At the end of the reference period, the sustainable investments contributed to the Social objectives below:

- Investments that generated at least 50% of their revenues from products and services that contributed to an environmental objective (e.g. alternative energy, carbon & energy efficiency, green building, sustainable water, pollution prevention, sustainable agriculture etc.).

- Investments that generated at least 50% of their revenues from products and services that contribute to a social objective (e.g. nutrition, disease treatments, sanitation, affordable real estate, SME finance, education, connectivity etc.)
- Investments that have an approved commitment to science-based emission targets and an average reduction in carbon emissions intensity of 7% over the last three years

The above criteria were assessed using a quantitative methodology. If there had not been an output from the quantitative assessment (e.g. in the case of missing quantitative ESG data), investments were submitted for confirmation in a case-by-case approach based on a proprietary assessment of the criteria. A central Credit Suisse committee approved such submissions.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

CSAM considered various indicators linked to principal adverse impacts on sustainability factors (PAI Indicators) and further indicators from its exclusion framework to assess whether sustainable investments caused significant harm to any environmental or social investment objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— — *How were the indicators for adverse impacts on sustainability factors taken into account?*

During the reference period, the PAI Indicators applied by CSAM to identify investments which qualify as SFDR Sustainable Investments in line with CS SFDR Sustainable Investment Methodology included a set of criteria and thresholds to determine if an investment passed the DNSH condition as follows:

Investments must not:

1. have a significant negative contribution to climate change. This criterion makes use of an indicator that flags the biggest emitters of greenhouse gas globally and relates to PAI 1, 2, 3 and 15.
2. be subject to norms, values and business conduct exclusions and other investment restrictions which address PAI 4, 10, 14 and 16.
3. be subject to severe ESG controversies which address PAI 7 and 10 where applicable.
4. be strongly lagging its industry peers in overall ESG performance. This criterion has been applied to cover the remainder of the PAI to the extent possible.

— — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainable Investments were aligned with the 'OECD Guidelines for Multinational Enterprises' and the 'UN Guiding Principles on Business and Human Rights'. The alignment was assessed as part of the CS ESG Exclusion framework. Companies that exhibit severe weaknesses in business conduct, particularly with regard to breaches of the 'United Nations Global Compact Principles' (UNGC) and companies placed on the watchlist, but with no immediate exclusion, were flagged not to be considered SFDR Sustainable Investments due to DNSH.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides the exposure to all mandatory PAI from the Commission Delegated Regulation (EU) 2022/1288. The Adverse Sustainability Indicator/Metric values are calculated as an asset weighted average based on quarterly data representing the reference period from 31.05.2023–02.05.2024.

Please note that CSAM may choose or may not be able to consider and/or mitigate all of the herein reported PAI given the Subfund's investment strategy, asset class or the availability of reliable data. Consideration of PAI may be subject to change given evolving data availability and quality. Please refer to the EET for the most recent overview of which PAI are considered at Subfund level.

Please find further information on CSAM PAI Framework online at www.credit-suisse.com/esg.

* Look-through enabled where possible, excl. cash and derivatives. Portfolio Exposure as of 02.05.2024. It does not represent an average for the reference period.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which were neither aligned with the environmental or social characteristics, nor qualified as sustainable investments.

Please refer to the section "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?" for further information.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that did not qualify as sustainable investments.

The proportion of investments used to meet the environmental or social characteristics promoted by this Subfund (category #1 above) was 96.90% of its total net assets.

Within this category the Subfund held a proportion of 25.22% of its total net assets in sustainable investments (category #1A above) and a proportion of 71.68% of its total net assets in other E/S characteristics (category #1B above).

The proportion of investments held by the Subfund in "Other" (category #2 above) was 3.10% of its total net assets.

The data is valid as of 02.05.2024. It does not represent an average for the reference period.

● *In which economic sectors were the investments made?*

Subfund Sectoral Exposure

NACE Sector Code *	Portfolio Exposure **
B. Mining and quarrying	1.55%
C. Manufacturing	49.50%
D. Electricity, gas, steam and air conditioning supply	2.68%
F. Construction	4.28%
G. Wholesale and retail trade; repair of motor vehicles and motorcycles	2.99%
H. Transportation and storage	1.31%
J. Information and communication	12.34%
K. Financial and insurance activities	11.64%
L. Real estate activities	1.06%
M. Professional, scientific and technical activities	4.34%
N. Administrative and support service activities	2.29%
R. Arts, entertainment and recreation	3.42%
Others	2.59%

* Please note that the NACE sector allocation is not used in the Subfund's investment strategy. It is provided for disclosure purposes only. For example, the Subfund's investment strategy makes use of company's revenue exposure in accordance with CSAM's ESG Exclusion framework and does not exclude companies based on their NACE sector allocation.

** Portfolio Exposure as of 02.05.2024. It does not represent an average for the reference period. The "Others" category can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

Subfund Exposure to Fossil Fuels Sub-Sectors

NACE Sector Code *	NACE name	Portfolio Exposure **
B5.1.0	Mining of hard coal	0.00%
B5.2.0	Mining of lignite	0.00%
B6.1.0	Extraction of crude petroleum	1.55%
B6.2.0	Extraction of natural gas	0.00%
B9.1.0	Support activities for petroleum and natural gas extraction	0.00%
C19.2.0	Manufacture of refined petroleum products	2.82%
D35.2.1	Manufacture of gas	0.00%
D35.2.2	Distribution of gaseous fuels through mains	0.00%
D35.2.3	Trade of gas through mains	0.00%
G46.7.1	Wholesale of solid, liquid and gaseous fuels and related products	0.00%

* Please note that the NACE sector allocation is not used in the Subfund's investment strategy. It is provided for disclosure purposes only. For example, the Subfund's investment strategy makes use of company's revenue exposure in accordance with CSAM's ESG Exclusion framework and does not exclude companies based on their NACE sector allocation.

** Portfolio Exposure as of 02.05.2024. It does not represent an average for the reference period.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contri-

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

As of 02.05.2024, the Subfund reports 0.00% exposure to sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

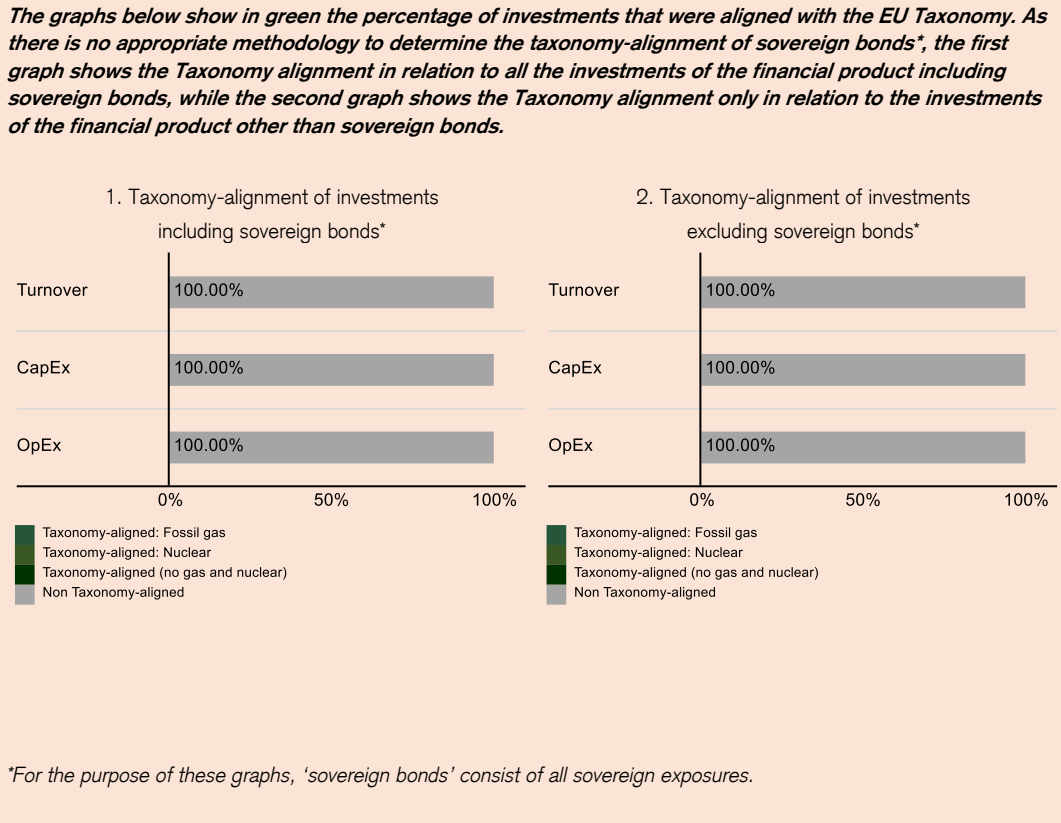

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

tribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The Subfund's reported EU Taxonomy alignment was not subject to assurance or review by a third party.

● **What was the share of investments made in transitional and enabling activities?**

Of the 0.00% of sustainable investments with an environmental objective aligned with the EU Taxonomy as of 02.05.2024, 0.00% were made in transitional activities and 0.00% in enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During the previous reference period the percentage of investments that were aligned with the EU Taxonomy were 0.00% as of 31.05.2023.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As of 02.05.2024, 24.14% of the Subfund's investments were made into sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

As of 02.05.2024, 1.08% of the Subfund's investments were made into socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

As of 02.05.2024, 3.10% of the Subfund's investments were made into "other".

Investments such as cash, derivatives and structured products may have fallen under "other" since such instruments did not contribute to the E/S characteristics of this Subfund. More information about the portfolio exposure to such investments can be found in the financial section of this annual report. Such investments did not have minimum environmental or social safeguards. They may have been used as efficient portfolio management tools, for cash management, for hedging purposes, or as an additional source of return.

Additionally, investments may have fallen under "other" if insufficient ESG-related information was available. This applied in particular to asset classes for which ESG Factors were insufficiently defined or insufficient ESG related information was available. Where possible, minimum environmental or social safeguards have been applied to these underlying securities by ensuring that CSAM ESG exclusions were adhered to.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To attain the environmental or social characteristics promoted by this Subfund, this Subfund applied ESG Exclusions, ESG Integration and Active Ownership.

This Subfund excluded investments in companies of the following three categories:

- Norms-based Exclusions

This Subfund excluded companies that failed to comply with international treaties on controversial weapons such as the Convention on Cluster Munitions, the Chemical Weapons Convention, the Biological Weapons Convention, the Treaty on the Non-Proliferation of Nuclear Weapons (NPT). In addition, it excluded companies that are recommended for exclusions by the Swiss Association for Responsible Investments (SVVK-ASIR) in respect to APM (anti-personnel mines), cluster munitions and nuclear weapons (outside of NPT).

- Values-based Exclusions

This Subfund excluded companies that derived more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment. It excluded companies that derived more than 20% of their revenue from tobacco distribution and conventional weapons support systems and services. In addition, a revenue limit of 20% applied to investments in coal (coal mining and coal-based electricity generation), a revenue limit of 5% applies to investments in arctic oil and gas as well as a revenue limit of 10% applies to investments in oil sands.

- Business-conduct Exclusions

Companies found to systematically violate international norms, where the breaches were particularly severe, or where management was not open to implement necessary reforms, were placed on a watch list, and may have been excluded

from the Credit Suisse-wide investment universe. This process was governed by a dedicated committee that maintained the list of excluded companies and was responsible for ensuring that the list is communicated to investment teams in a timely manner.

- Restrictions related to the Guidelines for Responsible Investing of the Bundesverband Investment and Asset Management's (BVI)

To comply with the BVI guidelines, this Subfund excluded additionally the following companies, countries, and sectors from the investment universe:

- Military hardware: companies that derive more than 10% of their revenue from manufacturing conventional weapons, components, and support systems and services
- Sovereign issuers: serious violations of democratic and human rights based on the assessment as "not free" according to the Freedom House's index (freedomhouse.org/countries/freedom-world/scores)

ESG Factors were integrated into the investment process in the following four main steps:

- Identification of material ESG Factors

First, the Investment Manager used materiality frameworks to identify those ESG Factors that are relevant to the investment strategy. Materiality frameworks are concepts that help to identify sustainability-related issues and opportunities that are likely to affect the financial condition or operating performance of companies within an industry. Material factors have been furthermore assessed based on the Subfund's sector and geographical exposure. Second, the Investment Manager prioritized the material factors that were most relevant to the subsequent investment decisions based on the portfolio's current market exposure.

- ESG security analysis

Based on the identified material ESG Factors, the Investment Manager performed security research across the Subfund's investment universe. The Investment Manager made use of ESG ratings from third-party service providers and combined them with CSAM's proprietary analyses and information. These included, e.g. ESG related news, ESG ratings and scores, ESG-related controversies, and ESG trends.

The ESG data are fully integrated in the portfolio management software. The CSAM sustainable investing team may offer additional support, where needed, and advise on access to other ESG data providers. The outcome of the ESG analysis of individual securities, combined with financial research, enabled the Investment Managers to make ESG-adjusted risk/return assessments. This enabled the Investment Manager to compare securities on an ESG-adjusted basis and to evaluate whether to keep certain securities in the portfolio or to sell them during the security selection and portfolio implementation stage. The ESG security analysis has been updated periodically.

- Security selection and portfolio implementation

Based on the identified material ESG Factors and the ESG-adjusted security analysis, the Investment Manager constructed a portfolio in accordance with the Subfund's investment process and principles. The ESG-adjusted security analysis combined with portfolio construction considerations has been used to determine appropriate portfolio weights that reflected the ESG-adjusted risk/return profile of the analyzed securities.

The research process might make use of dedicated ESG questionnaires with potential follow-up meetings with investee companies in case incomplete data is available from third-party ESG data providers.

- Portfolio monitoring

The Investment Manager monitored the ESG Factors periodically to detect significant changes in the ESG Factors of the underlying securities. They regularly reassessed the portfolio, taking into consideration financial and ESG metrics, and consequently decided whether to increase or decrease positions in the portfolio.

- Engagement

CSAM engaged with investee companies with the aim of increasing its impact on sustainability issues. Selected companies that were able and willing to take action were subject to engagement and CSAM sought to preserve and/or enhance the value of the companies they invested in, through engagement with issuers. The Active Ownership team defined the topics and issues CSAM wanted to discuss with investee companies. The resulting engagement activities for the reference period of this SFDR annex to the annual report were defined using certain criteria and aimed at companies in which CSAM held considerable investments through its funds. More information about the engagement activities and the most current active ownership report of CSAM can be found online at: www.credit-suisse.com/esg.

- Proxy Voting

Voting rights have been exercised for investee companies which have met the criteria for Proxy Voting as explained at www.credit-suisse.com/esg

How did this financial product perform compared to the reference benchmark?

The Subfund did not use a reference benchmark for the purpose of attaining the environmental and/or social characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not applicable.

- ***How did this financial product perform compared with the broad market index?***

Not applicable.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Credit Suisse Investment Partners (Lux) Global Balanced Convertible Bond Fund

Legal entity identifier: 529900P3S70RJYC50P19

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 34.41% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This Subfund promotes environmental, social and governance (ESG) characteristics (within the meaning of Art. 8 of Regulation (EU) 2019/2088).

The Management Company and the Investment Manager applied the Credit Suisse Asset Management (CSAM) Sustainable Investing Policy to this Subfund.

This Subfund promoted the following environmental and social characteristics:

- to invest into companies that comply with international treaties on controversial weapons (norms-based exclusions on direct investments)
- not to invest into companies that derive more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment (values-based exclusions on direct investments)
- not to invest into companies that either derive more than 20% of their revenue from tobacco distribution or conventional weapons support systems and services (values-based exclusions on direct investments)
- not to invest into companies that either derive more than 20% of their revenues from coal (coal mining and coal-based electricity generation) and 5% of their revenues in arctic oil and gas, or 10% of their revenues from oil sands (values-based exclusions on direct investments)
- adherence to, and conducting business activities in accordance with, international norms such as the "United Nations Global Compact Principles" (UNGCP) (business-conduct exclusions on direct investments)
- higher exposure to investments with positive or neutral Fixed Income ESG signal and limit exposure to investments with negative Fixed Income ESG signal within the defined limits
- contribution to good governance and sustainable practices through engagement with investee companies in line with CSAM's Sustainable Investing Policy (Active Ownership)

The extent to which the environmental and/or social characteristics were met is measured by the sustainability indicators shown below.

Derivatives were not used to attain the environmental or social characteristics.

Please find further information on ESG Integration, ESG Exclusions and Active Ownership below in the question "What actions have been taken to meet the environmental and/or social characteristics during the reference period?" and online at www.credit-suisse.com/esg.

● *How did the sustainability indicators perform?*

The table below shows the output of the Sustainability Indicators applicable to this Subfund as of 31.05.2024. While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

Sustainability Indicator*	Portfolio	Indicator Output
ESG Rating	AAA: 13.47%, AA: 27.97%, A: 28.44%, BBB: 12.83%, BB: 4.28%, B: 1.53%, CCC: 0.00%, Not ratable**: 7.01%, No data coverage**: 4.46%	Investment exposure by ESG Rating: AAA (highest): 0–100% AA: 0–100% A: 0–100% BBB: 0–100% BB: 0–100% B: 0–100% CCC (lowest): 0–100%
Environmental pillar score	6.32	Portfolio aggregate environmental pillar score: 1 (lowest) – 10 (highest)
Social pillar score	5.08	Portfolio aggregate social pillar score: 1 (lowest) – 10 (highest)
Governance pillar score	6.04	Portfolio aggregate governance pillar score: 1 (lowest) – 10 (highest)
ESG controversy flag	Green: 53.66%, Yellow: 25.43%, Orange: 6.58%, Red: 0.00%, Not ratable**: 9.86%, No data coverage**: 4.46%	Investment exposure by ESG controversy flag: Green: 0–100% Yellow: 0–100% Orange: 0–100% Red: 0–100%
CSAM ESG exclusions***	Pre- and post-trade checks are in place to detect investments that breach the ESG exclusions. Any detected breach is escalated and remedied.	This indicator reflects that the portfolio complied with the applicable ESG exclusions as described in the exclusion section of the website (during the entire reference period, CSAM adhered to ESG exclusion criteria, as stated in the CSAM Sustainable Investing Policy).
Proprietary fixed income ESG signal	Positive: 38.41%, Neutral: 45.60%, Negative: 1.53%, Not rated**: 0.33%, Not ratable**: 14.14%	Portfolio exposure by proprietary fixed income ESG signal: Positive: 0–100% Neutral: 0–100% Negative: 0–100%

* None of the Sustainability Indicators were subject to an assurance provided by an auditor or a review by a third party.

** These categories can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

*** Note that the amount of investments that were restricted due to the ESG exclusions depend on the investable universe of the Subfund.

● ...and compared to previous periods?

The table below presents data from the previous reference period (as of 31.05.2023). The data may differ compared to the previously published report as the most recently available data was taken into account, as the data provider(s) may have retroactively updated some figures. While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

Sustainability Indicator*	Portfolio	Indicator Output
ESG Rating	AAA: 10.76%, AA: 22.97%, A: 31.01%, BBB: 18.15%, BB: 11.71%, B: 0.95%, CCC: 0.00%, Not ratable**: 1.71%, No data coverage**: 2.73%	Investment exposure by ESG Rating: AAA (highest): 0–100% AA: 0–100% A: 0–100% BBB: 0–100% BB: 0–100% B: 0–100% CCC (lowest): 0–100%
Environmental pillar score	5.81	Portfolio aggregate environmental pillar score: 1 (lowest) – 10 (highest)

CSAM ESG exclusions***	Pre- and post-trade checks are in place to detect investments that breach the ESG exclusions. Any detected breach is escalated and remedied.	This indicator reflects that the portfolio complied with the applicable ESG exclusions as described in the exclusion section of the website (during the entire reference period, CSAM adhered to ESG exclusion criteria, as stated in the CSAM Sustainable Investing Policy).
Proprietary fixed income ESG signal	Positive: 32.56%, Neutral: 57.05%, Negative: 0.95%, Not rated**: 0.00%, Not ratable**: 9.44%	Portfolio exposure by proprietary fixed income ESG signal: Positive: 0–100% Neutral: 0–100% Negative: 0–100%

* None of the Sustainability Indicators were subject to an assurance provided by an auditor or a review by a third party.

** These categories can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

*** Note that the amount of investments that were restricted due to the ESG exclusions depend on the investable universe of the Subfund.

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

At the end of the reference period, the sustainable investments contributed to the Environmental and Social objectives below:

- Investments that generated at least 50% of their revenues from products and services that contributed to an environmental objective (e.g. alternative energy, carbon & energy efficiency, green building, sustainable water, pollution prevention, sustainable agriculture etc.)
- Investments that generated at least 50% of their revenues from products and services that contribute to a social objective (e.g. nutrition, disease treatments, sanitation, affordable real estate, SME finance, education, connectivity etc.)
- Investments in securities whose proceeds pursue a predefined environmental or social objective (e.g. green bonds)
- Investments that have an approved commitment to science-based emission targets and an average reduction in carbon emissions intensity of 7% over the last three years

The above criteria were assessed using a quantitative methodology. If there had not been an output from the quantitative assessment (e.g. in the case of missing quantitative ESG data), investments were submitted for confirmation in a case-by-case approach based on a proprietary assessment of the criteria. A central Credit Suisse committee approved such submissions.

● *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

CSAM considered various indicators linked to principal adverse impacts on sustainability factors (PAI Indicators) and further indicators from its exclusion framework to assess whether sustainable investments caused significant harm to any environmental or social investment objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— *How were the indicators for adverse impacts on sustainability factors taken into account?*

During the reference period, the PAI Indicators applied by CSAM to identify investments which qualify as SFDR Sustainable Investments in line with CS SFDR Sustainable Investment Methodology included a set of criteria and thresholds to determine if an investment passed the DNSH condition as follows:

Investments must not:

1. have a significant negative contribution to climate change. This criterion makes use of an indicator that flags the biggest emitters of greenhouse gas globally and relates to PAI 1, 2, 3 and 15.
2. be subject to norms, values and business conduct exclusions and other investment restrictions which address PAI 4, 10, 14 and 16.
3. be subject to severe ESG controversies which address PAI 7 and 10 where applicable.
4. be strongly lagging its industry peers in overall ESG performance. This criterion has been applied to cover the remainder of the PAI to the extent possible.

— *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainable Investments were aligned with the 'OECD Guidelines for Multinational Enterprises' and the 'UN Guiding Principles on Business and Human Rights'. The alignment was assessed as part of the CS ESG Exclusion framework. Companies that exhibit severe weaknesses in business conduct, particularly with regard to breaches of the 'United Nations Global Compact Principles' (UNGC) and companies placed on the watchlist, but with no immediate exclusion, were flagged not to be considered SFDR Sustainable Investments due to DNSH.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides the exposure to all mandatory PAI from the Commission Delegated Regulation (EU) 2022/1288. The Adverse Sustainability Indicator/Metric values are calculated as an asset weighted average based on quarterly data representing the reference period from 01.06.2023–31.05.2024.

Please note that CSAM may choose or may not be able to consider and/or mitigate all of the herein reported PAI given the Subfund's investment strategy, asset class or the availability of reliable data. Consideration of PAI may be subject to change given evolving data availability and quality. Please refer to the EET for the most recent overview of which PAI are considered at Subfund level.

Please find further information on CSAM PAI Framework online at www.credit-suisse.com/esg.

* Look-through enabled where possible, excl. cash and derivatives. Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which were neither aligned with the environmental or social characteristics, nor qualified as sustainable investments.

Please refer to the section "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?" for further information.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that did not qualify as sustainable investments.

The proportion of investments used to meet the environmental or social characteristics promoted by this Subfund (category #1 above) was 86.23% of its total net assets.

Within this category the Subfund held a proportion of 34.41% of its total net assets in sustainable investments (category #1A above) and a proportion of 51.82% of its total net assets in other E/S characteristics (category #1B above).

The proportion of investments held by the Subfund in "Other" (category #2 above) was 13.77% of its total net assets.

The data is valid as of 31.05.2024. It does not represent an average for the reference period.

● In which economic sectors were the investments made?

Subfund Sectoral Exposure

NACE Sector Code *	Portfolio Exposure **
B. Mining and quarrying	1.46%
C. Manufacturing	34.70%
D. Electricity, gas, steam and air conditioning supply	2.25%
G. Wholesale and retail trade; repair of motor vehicles and motorcycles	7.26%
H. Transportation and storage	2.65%
J. Information and communication	12.60%
K. Financial and insurance activities	15.54%
L. Real estate activities	3.35%
M. Professional, scientific and technical activities	7.85%
N. Administrative and support service activities	1.44%
O. Public administration and defense; compulsory social security	2.84%
Q. Human health and social work activities	0.22%
S. Other service activities	0.82%

Others	7.01%
--------	-------

* Please note that the NACE sector allocation is not used in the Subfund's investment strategy. It is provided for disclosure purposes only. For example, the Subfund's investment strategy makes use of company's revenue exposure in accordance with CSAM's ESG Exclusion framework and does not exclude companies based on their NACE sector allocation.

** Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period. The "Others" category can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

Subfund Exposure to Fossil Fuels Sub-Sectors

NACE Sector Code *	NACE name	Portfolio Exposure **
B5.1.0	Mining of hard coal	0.00%
B5.2.0	Mining of lignite	0.00%
B6.1.0	Extraction of crude petroleum	0.00%
B6.2.0	Extraction of natural gas	0.00%
B9.1.0	Support activities for petroleum and natural gas extraction	0.00%
C19.2.0	Manufacture of refined petroleum products	0.00%
D35.2.1	Manufacture of gas	0.00%
D35.2.2	Distribution of gaseous fuels through mains	0.00%
D35.2.3	Trade of gas through mains	0.00%
G46.7.1	Wholesale of solid, liquid and gaseous fuels and related products	0.00%

* Please note that the NACE sector allocation is not used in the Subfund's investment strategy. It is provided for disclosure purposes only. For example, the Subfund's investment strategy makes use of company's revenue exposure in accordance with CSAM's ESG Exclusion framework and does not exclude companies based on their NACE sector allocation.

** Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contri-

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

As of 31.05.2024, the Subfund reports 0.00% exposure to sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

bution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The Subfund's reported EU Taxonomy alignment was not subject to assurance or review by a third party.

● **What was the share of investments made in transitional and enabling activities?**

Of the 0.00% of sustainable investments with an environmental objective aligned with the EU Taxonomy as of 31.05.2024, 0.00% were made in transitional activities and 0.00% in enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During the previous reference period the percentage of investments that were aligned with the EU Taxonomy were 0.00% as of 31.05.2023.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As of 31.05.2024, 25.97% of the Subfund's investments were made into sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

As of 31.05.2024, 8.44% of the Subfund's investments were made into socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

As of 31.05.2024, 13.77% of the Subfund's investments were made into "other".

Investments such as cash, derivatives and structured products may have fallen under "other" since such instruments did not contribute to the E/S characteristics of this Subfund. More information about the portfolio exposure to such investments can be found in the financial section of this annual report. Such investments did not have minimum environmental or social safeguards. They may have been used as efficient portfolio management tools, for cash management, for hedging purposes, or as an additional source of return.

Additionally, investments may have fallen under "other" if insufficient ESG-related information was available. This applied in particular to asset classes for which ESG Factors were insufficiently defined or insufficient ESG related information was available. Where possible, minimum environmental or social safeguards have been applied to these underlying securities by ensuring that CSAM ESG exclusions were adhered to.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To attain the environmental or social characteristics promoted by this Subfund, this Subfund applied ESG Exclusions, ESG Integration and Active Ownership.

This Subfund excluded investments in companies of the following three categories:

- Norms-based Exclusions

This Subfund excluded companies that failed to comply with international treaties on controversial weapons such as the Convention on Cluster Munitions, the Chemical Weapons Convention, the Biological Weapons Convention, the Treaty on the Non-Proliferation of Nuclear Weapons (NPT). In addition, it excluded companies that are recommended for exclusions by the Swiss Association for Responsible Investments (SVVK-ASIR) in respect to APM (anti-personnel mines), cluster munitions and nuclear weapons (outside of NPT).

- Values-based Exclusions

This Subfund excluded companies that derived more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment. It excluded companies that derived more than 20% of their revenue from tobacco distribution and conventional weapons support systems and services. In addition, a revenue limit of 20% applied to investments in coal (coal mining and coal-based electricity generation), a revenue limit of 5% applies to investments in arctic oil and gas as well as a revenue limit of 10% applies to investments in oil sands.

- Business-conduct Exclusions

Companies found to systematically violate international norms, where the breaches were particularly severe, or where management was not open to implement necessary reforms, were placed on a watch list, and may have been excluded

from the Credit Suisse-wide investment universe. This process was governed by a dedicated committee that maintained the list of excluded companies and was responsible for ensuring that the list is communicated to investment teams in a timely manner.

ESG Factors were integrated into the investment process in the following four main steps:

- Identification of material ESG Factors

Investment managers performed security analysis based on the identified material ESG Factors. To integrate ESG Factors into the security analysis, investment managers derive a ESG-adjusted fundamental convertible bond rating for the issuers in the fund's investment universe by applying a proprietary methodology to systematically combine the issuer's fundamental convertible bond rating (based on a quantitative multi-factor model for convertible bonds) with its ESG rating to derive an ESG-adjusted convertible bond assessment. The ESG-adjusted fundamental convertible bond rating enabled investment managers to compare securities on an ESG-adjusted basis and to evaluate whether to add or keep certain securities in the portfolio during the security selection and portfolio implementation stage. ESG-adjusted fundamental convertible bond ratings were updated as soon as an update of the fundamental convertible bond or ESG rating became available.

- Security selection and portfolio implementation

The ESG-adjusted fundamental convertible bond ratings were used by investment managers in the bottom-up security selection process. The position weights were derived from over- or underweighting as well as excluding securities based on the ESG-adjusted fundamental convertible bond ratings. In this step, investment managers combined ESG-adjusted fundamental convertible bond ratings with established tools of traditional investment management to make better informed investment decisions.

- Portfolio monitoring

Investment managers monitored the ESG Factors daily to detect significant changes in the ESG Factors of underlying securities and regularly reassessed the portfolio to decide whether to increase or decrease positions in the portfolio.

- Engagement

CSAM engaged with investee companies with the aim of increasing its impact on sustainability issues. Selected companies that were able and willing to take action were subject to engagement and CSAM sought to preserve and/or enhance the value of the companies they invested in, through engagement with issuers. The Active Ownership team defined the topics and issues CSAM wanted to discuss with investee companies. The resulting engagement activities for the reference period of this SFDR annex to the annual report were defined using certain criteria and aimed at companies in which CSAM held considerable investments through its funds. More information about the engagement activities and the most current active ownership report of CSAM can be found online at: www.credit-suisse.com/esg.

How did this financial product perform compared to the reference benchmark?

The Subfund did not use a reference benchmark for the purpose of attaining the environmental and/or social characteristics.

- *How does the reference benchmark differ from a broad market index?*

Not applicable.

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

- *How did this financial product perform compared with the reference benchmark?*

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How did this financial product perform compared with the broad market index?*

Not applicable.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Credit Suisse (Lux) Global Dividend Plus Equity Fund (until 07.01.2024)

Legal entity identifier: 529900DW03AQININM567

Credit Suisse (Lux) Global Quality Dividend Equity Fund (as of 08.01.2024)

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made **sustainable investments with a social objective:** ___%

No

It **promoted Environmental/Social (E/S) characteristics**

and while it did not have as its objective a sustainable investment, it had a proportion of 50.86% of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This Subfund promotes environmental, social and governance (ESG) characteristics (within the meaning of Art. 8 of Regulation (EU) 2019/2088).

The Management Company and the Investment Manager applied the Credit Suisse Asset Management (CSAM) Sustainable Investing Policy to this Subfund.

This Subfund promoted the following environmental and social characteristics:

- to invest into companies that comply with international treaties on controversial weapons (norms-based exclusions on direct investments)
- not to invest into companies that derive more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment (values-based exclusions on direct investments)
- not to invest into companies that either derive more than 20% of their revenue from tobacco distribution or conventional weapons support systems and services (values-based exclusions on direct investments)
- not to invest into companies that either derive more than 20% of their revenues from coal (coal mining and coal-based electricity generation) and 5% of their revenues in arctic oil and gas, or 10% of their revenues from oil sands (values-based exclusions on direct investments)
- adherence to, and conducting business activities in accordance with, international norms such as the "United Nations Global Compact Principles" (UNGC) (business-conduct exclusions on direct investments)
- higher exposure to investments that have better ESG profile and fewer ESG controversies over their investment cycle (ESG Integration)
- contribution to good governance and sustainable practices through proxy voting and engagement with investee companies in line with CSAM's Sustainable Investing Policy (Active Ownership)
- lower GHG emission intensity than the benchmark: MSCI World (TR). Tons of CO₂ equivalent emission intensity (GHG scopes 1 & 2) per \$m sales: Fund performance (**54.03**) against benchmark (**98.90**)

The extent to which the environmental and/or social characteristics were met is measured by the sustainability indicators shown below.

Derivatives were not used to attain the environmental or social characteristics.

Please find further information on ESG Integration, ESG Exclusions and Active Ownership below in the question "What actions have been taken to meet the environmental and/or social characteristics during the reference period?" and online at www.credit-suisse.com/esg.

● How did the sustainability indicators perform?

The table below shows the output of the Sustainability Indicators applicable to this Subfund as of 31.05.2024. While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

Sustainability Indicator*	Portfolio	Indicator Output
ESG Rating	AAA: 24.42%, AA: 31.14%, A: 35.94%, BBB: 7.47%, BB: 0.00%, B: 0.00%, CCC: 0.00%, Not ratable**: 1.03%, No data coverage**: 0.00%	Investment exposure by ESG Rating: AAA (highest): 0–100% AA: 0–100% A: 0–100% BBB: 0–100% BB: 0–100% B: 0–100% CCC (lowest): 0–100%
Environmental pillar score	6.45	Portfolio aggregate environmental pillar score: 1 (lowest) – 10 (highest)
Social pillar score	5.16	Portfolio aggregate social pillar score: 1 (lowest) – 10 (highest)
Governance pillar score	6.01	Portfolio aggregate governance pillar score: 1 (lowest) – 10 (highest)
ESG controversy flag	Green: 36.00%, Yellow: 32.32%, Orange: 30.65%, Red: 0.00%, Not ratable**: 1.03%, No data coverage**: 0.00%	Investment exposure by ESG controversy flag: Green: 0–100% Yellow: 0–100% Orange: 0–100% Red: 0–100%

CSAM ESG exclusions***	Pre- and post-trade checks are in place to detect investments that breach the ESG exclusions. Any detected breach is escalated and remedied.	This indicator reflects that the portfolio complied with the applicable ESG exclusions as described in the exclusion section of the website (during the entire reference period, CSAM adhered to ESG exclusion criteria, as stated in the CSAM Sustainable Investing Policy).
------------------------	--	---

* None of the Sustainability Indicators were subject to an assurance provided by an auditor or a review by a third party.

** These categories can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

*** Note that the amount of investments that were restricted due to the ESG exclusions depend on the investable universe of the Subfund.

● ...and compared to previous periods?

The table below presents data from the previous reference period (as of 31.05.2023). The data may differ compared to the previously published report as the most recently available data was taken into account, as the data provider(s) may have retroactively updated some figures. While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

Sustainability Indicator*	Portfolio	Indicator Output
ESG Rating	AAA: 22.70%, AA: 38.41%, A: 25.69%, BBB: 11.59%, BB: 0.00%, B: 0.00%, CCC: 0.00%, Not ratable**: 1.61%, No data coverage**: 0.00%	Investment exposure by ESG Rating: AAA (highest): 0–100% AA: 0–100% A: 0–100% BBB: 0–100% BB: 0–100% B: 0–100% CCC (lowest): 0–100%
Environmental pillar score	6.69	Portfolio aggregate environmental pillar score: 1 (lowest) – 10 (highest)
Social pillar score	5.2	Portfolio aggregate social pillar score: 1 (lowest) – 10 (highest)
Governance pillar score	6.13	Portfolio aggregate governance pillar score: 1 (lowest) – 10 (highest)
ESG controversy flag	Green: 38.84%, Yellow: 23.58%, Orange: 35.96%, Red: 0.00%, Not ratable**: 1.61%, No data coverage**: 0.00%	Investment exposure by ESG controversy flag: Green: 0–100% Yellow: 0–100% Orange: 0–100% Red: 0–100%
CSAM ESG exclusions***	Pre- and post-trade checks are in place to detect investments that breach the ESG exclusions. Any detected breach is escalated and remedied.	This indicator reflects that the portfolio complied with the applicable ESG exclusions as described in the exclusion section of the website (during the entire reference period, CSAM adhered to ESG exclusion criteria, as stated in the CSAM Sustainable Investing Policy).
GHG emission intensity	Fund 77.38 Benchmark (MSCI World (TR)): 122.95	Tons of CO2 equivalent emission intensity (GHG scopes 1 & 2) per \$m sales

* None of the Sustainability Indicators were subject to an assurance provided by an auditor or a review by a third party.

** These categories can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

*** Note that the amount of investments that were restricted due to the ESG exclusions depend on the investable universe of the Subfund.

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

At the end of the reference period, the sustainable investments contributed to the Environmental and Social objectives below:

- Investments that generated at least 50% of their revenues from products and services that contributed to an environmental objective (e.g. alternative energy, carbon & energy efficiency, green building, sustainable water, pollution prevention, sustainable agriculture etc.)
- Investments that generated at least 50% of their revenues from products and services that contribute to a social objective (e.g. nutrition, disease treatments, sanitation, affordable real estate, SME finance, education, connectivity etc.)
- Investments that have an approved commitment to science-based emission targets and an average reduction in carbon emissions intensity of 7% over the last three years

The above criteria were assessed using a quantitative methodology. If there had not been an output from the quantitative assessment (e.g. in the case of missing quantitative ESG data), investments were submitted for confirmation in a case-by-case approach based on a proprietary assessment of the criteria. A central Credit Suisse committee approved such submissions.

● *How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?*

CSAM considered various indicators linked to principal adverse impacts on sustainability factors (PAI Indicators) and further indicators from its exclusion framework to assess whether sustainable investments caused significant harm to any environmental or social investment objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— *How were the indicators for adverse impacts on sustainability factors taken into account?*

During the reference period, the PAI Indicators applied by CSAM to identify investments which qualify as SFDR Sustainable Investments in line with CS SFDR Sustainable Investment Methodology included a set of criteria and thresholds to determine if an investment passed the DNSH condition as follows:

Investments must not:

1. have a significant negative contribution to climate change. This criterion makes use of an indicator that flags the biggest emitters of greenhouse gas globally and relates to PAI 1, 2, 3 and 15.
2. be subject to norms, values and business conduct exclusions and other investment restrictions which address PAI 4, 10, 14 and 16.
3. be subject to severe ESG controversies which address PAI 7 and 10 where applicable.
4. be strongly lagging its industry peers in overall ESG performance. This criterion has been applied to cover the remainder of the PAI to the extent possible.

— *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainable Investments were aligned with the 'OECD Guidelines for Multinational Enterprises' and the 'UN Guiding Principles on Business and Human Rights'. The alignment was assessed as part of the CS ESG Exclusion framework. Companies that exhibit severe weaknesses in business conduct, particularly with regard to breaches of the 'United Nations Global Compact Principles' (UNGC) and companies placed on the watchlist, but with no immediate exclusion, were flagged not to be considered SFDR Sustainable Investments due to DNSH.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides the exposure to all mandatory PAI from the Commission Delegated Regulation (EU) 2022/1288. The Adverse Sustainability Indicator/Metric values are calculated as an asset weighted average based on quarterly data representing the reference period from 01.06.2023–31.05.2024.

Please note that CSAM may choose or may not be able to consider and/or mitigate all of the herein reported PAI given the Subfund's investment strategy, asset class or the availability of reliable data. Consideration of PAI may be subject to change given evolving data availability and quality. Please refer to the EET for the most recent overview of which PAI are considered at Subfund level.

Please find further information on CSAM PAI Framework online at www.credit-suisse.com/esg.

* Look-through enabled where possible, excl. cash and derivatives. Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which were neither aligned with the environmental or social characteristics, nor qualified as sustainable investments.

Please refer to the section "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?" for further information.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that did not qualify as sustainable investments.

The proportion of investments used to meet the environmental or social characteristics promoted by this Subfund (category #1 above) was 98.93% of its total net assets.

Within this category the Subfund held a proportion of 50.86% of its total net assets in sustainable investments (category #1A above) and a proportion of 48.07% of its total net assets in other E/S characteristics (category #1B above).

The proportion of investments held by the Subfund in "Other" (category #2 above) was 1.07% of its total net assets.

The data is valid as of 31.05.2024. It does not represent an average for the reference period.

● *In which economic sectors were the investments made?*

Subfund Sectoral Exposure

NACE Sector Code *	Portfolio Exposure **
B. Mining and quarrying	0.78%
C. Manufacturing	55.50%
D. Electricity, gas, steam and air conditioning supply	6.27%
E. Water supply; sewerage, waste management and remediation activities	1.28%
F. Construction	3.12%
G. Wholesale and retail trade; repair of motor vehicles and motorcycles	2.52%
H. Transportation and storage	0.89%
I. Accommodation and food service activities	1.74%
J. Information and communication	8.75%
K. Financial and insurance activities	15.53%
M. Professional, scientific and technical activities	2.60%
Others	1.03%

* Please note that the NACE sector allocation is not used in the Subfund's investment strategy. It is provided for disclosure purposes only. For example, the Subfund's investment strategy makes use of company's revenue exposure in accordance with CSAM's ESG Exclusion framework and does not exclude companies based on their NACE sector allocation.

** Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period. The "Others" category can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

Subfund Exposure to Fossil Fuels Sub-Sectors

NACE Sector Code *	NACE name	Portfolio Exposure **
B5.1.0	Mining of hard coal	0.00%
B5.2.0	Mining of lignite	0.00%
B6.1.0	Extraction of crude petroleum	0.00%
B6.2.0	Extraction of natural gas	0.00%
B9.1.0	Support activities for petroleum and natural gas extraction	0.00%
C19.2.0	Manufacture of refined petroleum products	0.57%
D35.2.1	Manufacture of gas	0.00%
D35.2.2	Distribution of gaseous fuels through mains	0.00%
D35.2.3	Trade of gas through mains	0.00%
G46.7.1	Wholesale of solid, liquid and gaseous fuels and related products	0.00%

* Please note that the NACE sector allocation is not used in the Subfund's investment strategy. It is provided for disclosure purposes only. For example, the Subfund's investment strategy makes use of company's revenue exposure in accordance with CSAM's ESG Exclusion framework and does not exclude companies based on their NACE sector allocation.

** Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contri-

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

As of 31.05.2024, the Subfund reports 0.00% exposure to sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

bution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The Subfund's reported EU Taxonomy alignment was not subject to assurance or review by a third party.

● **What was the share of investments made in transitional and enabling activities?**

Of the 0.00% of sustainable investments with an environmental objective aligned with the EU Taxonomy as of 31.05.2024, 0.00% were made in transitional activities and 0.00% in enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During the previous reference period the percentage of investments that were aligned with the EU Taxonomy were 0.00% as of 31.05.2023.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As of 31.05.2024, 47.41% of the Subfund's investments were made into sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

As of 31.05.2024, 3.45% of the Subfund's investments were made into socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

As of 31.05.2024, 1.07% of the Subfund's investments were made into "other".

Investments such as cash, derivatives and structured products may have fallen under "other" since such instruments did not contribute to the E/S characteristics of this Subfund. More information about the portfolio exposure to such investments can be found in the financial section of this annual report. Such investments did not have minimum environmental or social safeguards. They may have been used as efficient portfolio management tools, for cash management, for hedging purposes, or as an additional source of return.

Additionally, investments may have fallen under "other" if insufficient ESG-related information was available. This applied in particular to asset classes for which ESG Factors were insufficiently defined or insufficient ESG related information was available. Where possible, minimum environmental or social safeguards have been applied to these underlying securities by ensuring that CSAM ESG exclusions were adhered to.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To attain the environmental or social characteristics promoted by this Subfund, this Subfund applied ESG Exclusions, ESG Integration and Active Ownership.

This Subfund excluded investments in companies of the following three categories:

- Norms-based Exclusions

This Subfund excluded companies that failed to comply with international treaties on controversial weapons such as the Convention on Cluster Munitions, the Chemical Weapons Convention, the Biological Weapons Convention, the Treaty on the Non-Proliferation of Nuclear Weapons (NPT). In addition, it excluded companies that are recommended for exclusions by the Swiss Association for Responsible Investments (SVVK-ASIR) in respect to APM (anti-personnel mines), cluster munitions and nuclear weapons (outside of NPT).

- Values-based Exclusions

This Subfund excluded companies that derived more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment. It excluded companies that derived more than 20% of their revenue from tobacco distribution and conventional weapons support systems and services. In addition, a revenue limit of 20% applied to investments in coal (coal mining and coal-based electricity generation), a revenue limit of 5% applies to investments in arctic oil and gas as well as a revenue limit of 10% applies to investments in oil sands.

- Business-conduct Exclusions

Companies found to systematically violate international norms, where the breaches were particularly severe, or where management was not open to implement necessary reforms, were placed on a watch list, and may have been excluded

from the Credit Suisse-wide investment universe. This process was governed by a dedicated committee that maintained the list of excluded companies and was responsible for ensuring that the list is communicated to investment teams in a timely manner.

- Restrictions related to the Guidelines for Responsible Investing of the Bundesverband Investment and Asset Management's (BVI)

To comply with the BVI guidelines, this Subfund excluded additionally the following companies, countries, and sectors from the investment universe:

- Military hardware: companies that derive more than 10% of their revenue from manufacturing conventional weapons, components, and support systems and services
- Sovereign issuers: serious violations of democratic and human rights based on the assessment as "not free" according to the Freedom House's index (freedomhouse.org/countries/freedom-world/scores)

ESG Factors were integrated into the investment process in the following four main steps:

- Identification of material ESG Factors

First, the Investment Manager used materiality frameworks to identify those ESG Factors that are relevant to the investment strategy. Materiality frameworks are concepts that help to identify sustainability-related issues and opportunities that are likely to affect the financial condition or operating performance of companies within an industry. Material factors have been furthermore assessed based on the Subfund's sector and geographical exposure. Second, the Investment Manager prioritized the material factors that were most relevant to the subsequent investment decisions based on the portfolio's current market exposure.

- ESG security analysis

Based on the identified material ESG Factors, the Investment Manager performed security research across the Subfund's investment universe. The Investment Manager made use of ESG ratings from third-party service providers and combined them with CSAM's proprietary analyses and information. These included, e.g. ESG related news, ESG ratings and scores, ESG-related controversies, and ESG trends.

The ESG data are fully integrated in the portfolio management software. The CSAM sustainable investing team may offer additional support, where needed, and advise on access to other ESG data providers. The outcome of the ESG analysis of individual securities, combined with financial research, enabled the Investment Managers to make ESG-adjusted risk/return assessments. This enabled the Investment Manager to compare securities on an ESG-adjusted basis and to evaluate whether to keep certain securities in the portfolio or to sell them during the security selection and portfolio implementation stage. The ESG security analysis has been updated periodically.

- Security selection and portfolio implementation

Based on the identified material ESG Factors and the ESG-adjusted security analysis, the Investment Manager constructed a portfolio in accordance with the Subfund's investment process and principles. The ESG-adjusted security analysis combined with portfolio construction considerations has been used to determine appropriate portfolio weights that reflected the ESG-adjusted risk/return profile of the analyzed securities.

The research process might make use of dedicated ESG questionnaires with potential follow-up meetings with investee companies in case incomplete data is available from third-party ESG data providers.

- Portfolio monitoring

The Investment Manager monitored the ESG Factors periodically to detect significant changes in the ESG Factors of the underlying securities. They regularly reassessed the portfolio, taking into consideration financial and ESG metrics, and consequently decided whether to increase or decrease positions in the portfolio.

- Engagement

CSAM engaged with investee companies with the aim of increasing its impact on sustainability issues. Selected companies that were able and willing to take action were subject to engagement and CSAM sought to preserve and/or enhance the value of the companies they invested in, through engagement with issuers. The Active Ownership team defined the topics and issues CSAM wanted to discuss with investee companies. The resulting engagement activities for the reference period of this SFDR annex to the annual report were defined using certain criteria and aimed at companies in which CSAM held considerable investments through its funds. More information about the engagement activities and the most current active ownership report of CSAM can be found online at: www.credit-suisse.com/esg.

- Proxy Voting

Voting rights have been exercised for investee companies which have met the criteria for Proxy Voting as explained at www.credit-suisse.com/esg

How did this financial product perform compared to the reference benchmark?

The Subfund did not use a reference benchmark for the purpose of attaining the environmental and/or social characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

Not applicable.

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

- *How did this financial product perform compared with the reference benchmark?*

- *How did this financial product perform compared with the broad market index?*

Not applicable.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Credit Suisse (Lux) Infrastructure Equity Fund

Legal entity identifier: 549300QKPV23DD64PN86

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="radio"/> Yes	<input type="radio"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 52.68% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This Subfund promotes environmental, social and governance (ESG) characteristics (within the meaning of Art. 8 of Regulation (EU) 2019/2088).

The Management Company and the Investment Manager applied the Credit Suisse Asset Management (CSAM) Sustainable Investing Policy to this Subfund.

This Subfund promoted the following environmental and social characteristics:

- to invest into companies that comply with international treaties on controversial weapons (norms-based exclusions on direct investments)
- not to invest into companies that derive more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment (values-based exclusions on direct investments)
- not to invest into companies that either derive more than 20% of their revenue from tobacco distribution or conventional weapons support systems and services (values-based exclusions on direct investments)
- not to invest into companies that either derive more than 20% of their revenues from coal (coal mining and coal-based electricity generation) and 5% of their revenues in arctic oil and gas, or 10% of their revenues from oil sands (values-based exclusions on direct investments)
- adherence to, and conducting business activities in accordance with, international norms such as the "United Nations Global Compact Principles" (UNGCP) (business-conduct exclusions on direct investments)
- higher exposure to investments that have better ESG profile and fewer ESG controversies over their investment cycle (ESG Integration)
- contribution to good governance and sustainable practices through proxy voting and engagement with investee companies in line with CSAM's Sustainable Investing Policy (Active Ownership)

The extent to which the environmental and/or social characteristics were met is measured by the sustainability indicators shown below.

Derivatives were not used to attain the environmental or social characteristics.

Please find further information on ESG Integration, ESG Exclusions and Active Ownership below in the question "What actions have been taken to meet the environmental and/or social characteristics during the reference period?" and online at www.credit-suisse.com/esg.

● *How did the sustainability indicators perform?*

The table below shows the output of the Sustainability Indicators applicable to this Subfund as of 31.05.2024. While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

Sustainability Indicator*	Portfolio	Indicator Output
ESG Rating	AAA: 14.92%, AA: 42.72%, A: 37.93%, BBB: 2.88%, BB: 0.00%, B: 1.01%, CCC: 0.00%, Not ratable**: 0.24%, No data coverage**: 0.30%	Investment exposure by ESG Rating: AAA (highest): 0–100% AA: 0–100% A: 0–100% BBB: 0–100% BB: 0–100% B: 0–100% CCC (lowest): 0–100%
Environmental pillar score	6.89	Portfolio aggregate environmental pillar score: 1 (lowest) – 10 (highest)
Social pillar score	6	Portfolio aggregate social pillar score: 1 (lowest) – 10 (highest)
Governance pillar score	6.14	Portfolio aggregate governance pillar score: 1 (lowest) – 10 (highest)
ESG controversy flag	Green: 53.06%, Yellow: 37.90%, Orange: 8.50%, Red: 0.00%, Not ratable**: 0.24%, No data coverage**: 0.30%	Investment exposure by ESG controversy flag: Green: 0–100% Yellow: 0–100% Orange: 0–100% Red: 0–100%
CSAM ESG exclusions***	Pre- and post-trade checks are in place to detect investments that breach the ESG exclusions. Any detected breach is escalated and remedied.	This indicator reflects that the portfolio complied with the applicable ESG exclusions as described in the exclusion section of the website (during the entire reference period, CSAM adhered to ESG exclusion criteria, as stated in the CSAM Sustainable Investing Policy).

* None of the Sustainability Indicators were subject to an assurance provided by an auditor or a review by a third party.

** These categories can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

*** Note that the amount of investments that were restricted due to the ESG exclusions depend on the investable universe of the Subfund.

● ...and compared to previous periods?

The table below presents data from the previous reference period (as of 31.05.2023). The data may differ compared to the previously published report as the most recently available data was taken into account, as the data provider(s) may have retroactively updated some figures. While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

Sustainability Indicator*	Portfolio	Indicator Output
ESG Rating	AAA: 19.91%, AA: 25.48%, A: 45.36%, BBB: 5.23%, BB: 1.38%, B: 2.09%, CCC: 0.00%, Not ratable**: 0.55%, No data coverage**: 0.00%	Investment exposure by ESG Rating: AAA (highest): 0–100% AA: 0–100% A: 0–100% BBB: 0–100% BB: 0–100% B: 0–100% CCC (lowest): 0–100%
Environmental pillar score	6.93	Portfolio aggregate environmental pillar score: 1 (lowest) – 10 (highest)
Social pillar score	5.53	Portfolio aggregate social pillar score: 1 (lowest) – 10 (highest)
Governance pillar score	6.21	Portfolio aggregate governance pillar score: 1 (lowest) – 10 (highest)
ESG controversy flag	Green: 62.97%, Yellow: 24.47%, Orange: 12.00%, Red: 0.00%, Not ratable**: 0.55%, No data coverage**: 0.00%	Investment exposure by ESG controversy flag: Green: 0–100% Yellow: 0–100% Orange: 0–100% Red: 0–100%
CSAM ESG exclusions***	Pre- and post-trade checks are in place to detect investments that breach the ESG exclusions. Any detected breach is escalated and remedied.	This indicator reflects that the portfolio complied with the applicable ESG exclusions as described in the exclusion section of the website (during the entire reference period, CSAM adhered to ESG exclusion criteria, as stated in the CSAM Sustainable Investing Policy).

* None of the Sustainability Indicators were subject to an assurance provided by an auditor or a review by a third party.

** These categories can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

*** Note that the amount of investments that were restricted due to the ESG exclusions depend on the investable universe of the Subfund.

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objective of the SFDR Sustainable Investments were to contribute to a reduction in CO2e emissions. At the end of the reference period, the SFDR Sustainable Investments were either

- certified by LEED's «Platinum» or «Gold», BREEAM's «Very Good», «Excellent» or «Outstanding» or DGNB's «Gold» or «Platin» certification or,
- had an energy star score of >75.

The above criteria were assessed using a quantitative methodology. If there had not been an output from the quantitative assessment (e.g. because an asset has not yet been confirmed by one of the above-mentioned labels and/or the energy star score could not yet be calculated due to an ongoing construction), investments were submitted for confirmation in a case-by-case approach based on estimates from third party providers.

- Investments that generated at least 50% of their revenues from products and services that contributed to an environmental objective (e.g. alternative energy, carbon & energy efficiency, green building, sustainable water, pollution prevention, sustainable agriculture etc.)
- Investments that have an approved commitment to science-based emission targets and an average reduction in carbon emissions intensity of 7% over the last three years

The above criteria were assessed using a quantitative methodology. If there had not been an output from the quantitative assessment (e.g. in the case of missing quantitative ESG data), investments were submitted for

confirmation in a case-by-case approach based on a proprietary assessment of the criteria. A central Credit Suisse committee approved such submissions.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

CSAM considered various indicators linked to principal adverse impacts on sustainability factors (PAI Indicators) and further indicators from its exclusion framework to assess whether sustainable investments caused significant harm to any environmental or social investment objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— — ***How were the indicators for adverse impacts on sustainability factors taken into account?***

At the end of the reference period, i.e. as of 31.05.2024, CSAM applied the PAI indicators 17 (Exposure to fossil fuels through real estate assets) and 18 (Exposure to energy-inefficient real estate assets) to identify investments which qualify as SFDR Sustainable Investments in line with CS SFDR Sustainable Investment Methodology. CSAM formally defined thresholds to ensure that the Subfund's investments do not significantly harm any sustainable investment objective.

— — ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Sustainable Investments were aligned with the 'OECD Guidelines for Multinational Enterprises' and the 'UN Guiding Principles on Business and Human Rights'. The alignment was assessed as part of the CS ESG Exclusion framework. Companies that exhibit severe weaknesses in business conduct, particularly with regard to breaches of the 'United Nations Global Compact Principles' (UNGC) and companies placed on the watchlist, but with no immediate exclusion, were flagged not to be considered SFDR Sustainable Investments due to DNSH.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides the exposure to all mandatory PAI from the Commission Delegated Regulation (EU) 2022/1288. The Adverse Sustainability Indicator/Metric values are calculated as an asset weighted average based on quarterly data representing the reference period from 01.06.2023–31.05.2024.

Please note that CSAM may choose or may not be able to consider and/or mitigate all of the herein reported PAI given the Subfund's investment strategy, asset class or the availability of reliable data. Consideration of PAI may be subject to change given evolving data availability and quality. Please refer to the EET for the most recent overview of which PAI are considered at Subfund level.

Please find further information on CSAM PAI Framework online at www.credit-suisse.com/esg.

16. Investee countries subject to social violations (relative)	0.00	0.00	0.00
Indicators applicable to investments in real estate assets			
Fossil fuels			
17. Exposure to fossil fuels through real estate assets (in percent)	n/a	0.00	0.00
Energy efficiency			
18. Exposure to energy-inefficient real estate assets (in percent)	n/a	0.00	0.00

* Impact: The value represents non-normalized portfolio level exposure to a given PAI indicator. This means that the PAI values use the actual weights of portfolio exposures.

** Eligible Assets: Percentage of AUM of the entire portfolio (including cash) for which the PAI is applicable. As an example, government bonds held by the Subfund cannot be measured against PAI indicators applicable to an investee company.

*** Data coverage: Percentage of AUM of the entire portfolio for which PAI indicator data is available.

**** Flags the companies with exposure to fossil fuels related activities, including extraction, processing, storage and transportation of fossil fuels.

***** The coverage of the PAI 6 are limited to the 9 high impact climate sectors defined by SFDR.

What were the top investments of this financial product?

Largest investments *	NACE Sector code	% Assets	Country
KEYERA CORP	G. Wholesale and retail trade; repair of motor vehicles and motorcycles	4.22	Canada
AENA SME SA	H. Transportation and storage	4.11	Spain
E.ON N	D. Electricity, gas, steam and air conditioning supply	4.05	Germany
ONEOK INC	B. Mining and quarrying	3.98	United States of America
KINDER MORGAN INC	H. Transportation and storage	3.97	United States of America
DIGITAL REALTY TRUST REIT INC	L. Real estate activities	3.93	United States of America
WILLIAMS INC	H. Transportation and storage	3.86	United States of America
VEOLIA ENVIRON. SA	E. Water supply; sewerage, waste management and remediation activities	3.71	France
VINCI SA	F. Construction	3.53	France

* Look-through enabled where possible, excl. cash and derivatives. Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period.

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 31.05.2024

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which were neither aligned with the environmental or social characteristics, nor qualified as sustainable investments.

Please refer to the section "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?" for further information.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that did not qualify as sustainable investments.

The proportion of investments used to meet the environmental or social characteristics promoted by this Subfund (category #1 above) was 99.46% of its total net assets.

Within this category the Subfund held a proportion of 52.68% of its total net assets in sustainable investments (category #1A above) and a proportion of 46.78% of its total net assets in other E/S characteristics (category #1B above).

The proportion of investments held by the Subfund in "Other" (category #2 above) was 0.54% of its total net assets.

The data is valid as of 31.05.2024. It does not represent an average for the reference period.

● In which economic sectors were the investments made?

Subfund Sectoral Exposure

NACE Sector Code *	Portfolio Exposure **
B. Mining and quarrying	3.98%
D. Electricity, gas, steam and air conditioning supply	23.30%
E. Water supply; sewerage, waste management and remediation activities	11.42%
F. Construction	8.52%
G. Wholesale and retail trade; repair of motor vehicles and motorcycles	5.52%
H. Transportation and storage	37.09%
J. Information and communication	4.81%
L. Real estate activities	5.12%
Others	0.24%

* Please note that the NACE sector allocation is not used in the Subfund's investment strategy. It is provided for disclosure purposes only. For example, the Subfund's investment strategy makes use of company's revenue exposure in accordance with CSAM's ESG Exclusion framework and does not exclude companies based on their NACE sector allocation.

*** Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period. The "Others" category can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.*

Subfund Exposure to Fossil Fuels Sub-Sectors

NACE Sector Code *	NACE name	Portfolio Exposure **
B5.1.0	Mining of hard coal	0.00%
B5.2.0	Mining of lignite	0.00%
B6.1.0	Extraction of crude petroleum	3.98%
B6.2.0	Extraction of natural gas	0.00%
B9.1.0	Support activities for petroleum and natural gas extraction	0.00%
C19.2.0	Manufacture of refined petroleum products	0.00%
D35.2.1	Manufacture of gas	0.00%
D35.2.2	Distribution of gaseous fuels through mains	0.39%
D35.2.3	Trade of gas through mains	0.00%
G46.7.1	Wholesale of solid, liquid and gaseous fuels and related products	5.52%

** Please note that the NACE sector allocation is not used in the Subfund's investment strategy. It is provided for disclosure purposes only. For example, the Subfund's investment strategy makes use of company's revenue exposure in accordance with CSAM's ESG Exclusion framework and does not exclude companies based on their NACE sector allocation.*

*** Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period.*

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

As of 31.05.2024, the Subfund reports 0.00% exposure to sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

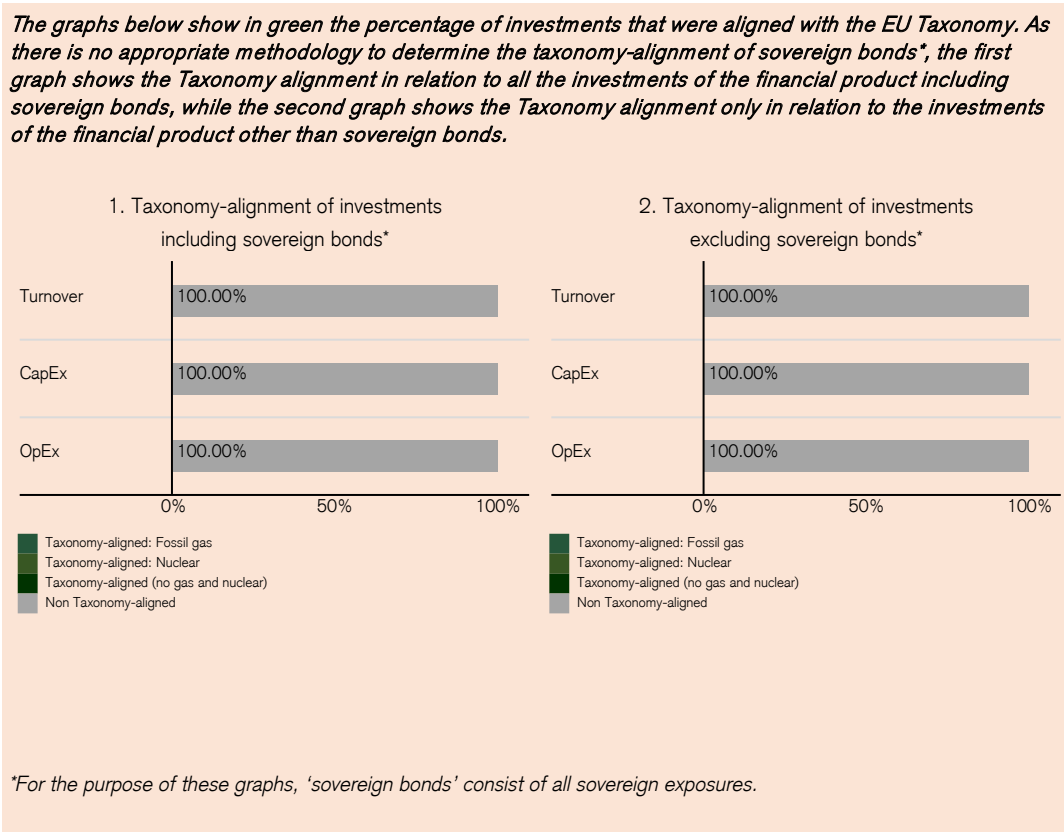

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The Subfund's reported EU Taxonomy alignment was not subject to assurance or review by a third party.

● **What was the share of investments made in transitional and enabling activities?**

Of the 0.00% of sustainable investments with an environmental objective aligned with the EU Taxonomy as of 31.05.2024, 0.00% were made in transitional activities and 0.00% in enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During the previous reference period the percentage of investments that were aligned with the EU Taxonomy were 0.00% as of 31.05.2023.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As of 31.05.2024, 52.68% of the Subfund's investments were made into sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

As of 31.05.2024, 0.00% of the Subfund's investments were made into socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

As of 31.05.2024, 0.54% of the Subfund's investments were made into "other".

Investments such as cash, derivatives and structured products may have fallen under "other" since such instruments did not contribute to the E/S characteristics of this Subfund. More information about the portfolio exposure to such investments can be found in the financial section of this annual report. Such investments did not have minimum environmental or social safeguards. They may have been used as efficient portfolio management tools, for cash management, for hedging purposes, or as an additional source of return.

Additionally, investments may have fallen under "other" if insufficient ESG-related information was available. This applied in particular to asset classes for which ESG Factors were insufficiently defined or insufficient ESG related information was available. Where possible, minimum environmental or social safeguards have been applied to these underlying securities by ensuring that CSAM ESG exclusions were adhered to.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To attain the environmental or social characteristics promoted by this Subfund, this Subfund applied ESG Exclusions, ESG Integration and Active Ownership.

This Subfund excluded investments in companies of the following three categories:

- Norms-based Exclusions

This Subfund excluded companies that failed to comply with international treaties on controversial weapons such as the Convention on Cluster Munitions, the Chemical Weapons Convention, the Biological Weapons Convention, the Treaty on the Non-Proliferation of Nuclear Weapons (NPT). In addition, it excluded companies that are recommended for exclusions by the Swiss Association for Responsible Investments (SVVK-ASIR) in respect to APM (anti-personnel mines), cluster munitions and nuclear weapons (outside of NPT).

- Values-based Exclusions

This Subfund excluded companies that derived more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment. It excluded companies that derived more than 20% of their revenue from tobacco distribution and conventional weapons support systems and services. In addition, a revenue limit of 20% applied to investments in coal (coal mining and coal-based electricity generation), a revenue limit of 5% applies to investments in arctic oil and gas as well as a revenue limit of 10% applies to investments in oil sands.

- Business-conduct Exclusions

Companies found to systematically violate international norms, where the breaches were particularly severe, or where management was not open to implement necessary reforms, were placed on a watch list, and may have been excluded from the Credit Suisse-wide investment universe. This process was governed by a dedicated committee that maintained the list of excluded companies and was responsible for ensuring that the list is communicated to investment teams in a timely manner.

- Restrictions related to the Guidelines for Responsible Investing of the Bundesverband Investment and Asset Management's (BVI)

To comply with the BVI guidelines, this Subfund excluded additionally the following companies, countries, and sectors from the investment universe:

- Military hardware: companies that derive more than 10% of their revenue from manufacturing conventional weapons, components, and support systems and services
- Sovereign issuers: serious violations of democratic and human rights based on the assessment as "not free" according to the Freedom House's index (freedomhouse.org/countries/freedom-world/scores)

ESG Factors were integrated into the investment process in the following four main steps:

- Identification of material ESG Factors

First, the Investment Manager used materiality frameworks to identify those ESG Factors that are relevant to the investment strategy. Materiality frameworks are concepts that help to identify sustainability-related issues and opportunities that are likely to affect the financial condition or operating performance of companies within an industry. Material factors have been furthermore assessed based on the Subfund's sector and geographical exposure. Second, the Investment Manager prioritized the material factors that were most relevant to the subsequent investment decisions based on the portfolio's current market exposure.

- ESG security analysis

Based on the identified material ESG Factors, the Investment Manager performed security research across the Subfund's investment universe. The Investment Manager made use of ESG ratings from third-party service providers and combined them with CSAM's proprietary analyses and information. These included, e.g. ESG related news, ESG ratings and scores, ESG-related controversies, and ESG trends.

The ESG data are fully integrated in the portfolio management software. The CSAM sustainable investing team may offer additional support, where needed, and advise on access to other ESG data providers. The outcome of the ESG analysis of individual securities, combined with financial research, enabled the Investment Managers to make ESG-adjusted risk/return assessments. This enabled the Investment Manager to compare securities on an ESG-adjusted basis and to evaluate whether to keep certain securities in the portfolio or to sell them during the security selection and portfolio implementation stage. The ESG security analysis has been updated periodically.

- Security selection and portfolio implementation

Based on the identified material ESG Factors and the ESG-adjusted security analysis, the Investment Manager constructed a portfolio in accordance with the Subfund's investment process and principles. The ESG-adjusted security analysis combined with portfolio construction considerations has been used to determine appropriate portfolio weights that reflected the ESG-adjusted risk/return profile of the analyzed securities.

The research process might make use of dedicated ESG questionnaires with potential follow-up meetings with investee companies in case incomplete data is available from third-party ESG data providers.

- Portfolio monitoring

The Investment Manager monitored the ESG Factors periodically to detect significant changes in the ESG Factors of the underlying securities. They regularly reassessed the portfolio, taking into consideration financial and ESG metrics, and consequently decided whether to increase or decrease positions in the portfolio.

- Engagement

CSAM engaged with investee companies with the aim of increasing its impact on sustainability issues. Selected companies that were able and willing to take action were subject to engagement and CSAM sought to preserve and/or enhance the value of the companies they invested in, through engagement with issuers. The Active Ownership team defined the topics and issues CSAM wanted to discuss with investee companies. The resulting engagement activities for the reference period of this SFDR annex to the annual report were defined using certain criteria and aimed at companies in which CSAM held considerable investments through its funds. More information about the engagement activities and the most current active ownership report of CSAM can be found online at: www.credit-suisse.com/esg.

- Proxy Voting

Voting rights have been exercised for investee companies which have met the criteria for Proxy Voting as explained at www.credit-suisse.com/esg

How did this financial product perform compared to the reference benchmark?

The Subfund did not use a reference benchmark for the purpose of attaining the environmental and/or social characteristics.

- *How does the reference benchmark differ from a broad market index?*

Not applicable.

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

- *How did this financial product perform compared with the reference benchmark?*

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How did this financial product perform compared with the broad market index?*

Not applicable.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Credit Suisse (Lux) Robotics Equity Fund

Legal entity identifier: 549300IXGN09NFGX1E64

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 25.37% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This Subfund promotes environmental, social and governance (ESG) characteristics (within the meaning of Art. 8 of Regulation (EU) 2019/2088).

The Management Company and the Investment Manager applied the Credit Suisse Asset Management (CSAM) Sustainable Investing Policy to this Subfund.

This Subfund promoted the following environmental and social characteristics:

- to invest into companies that comply with international treaties on controversial weapons (norms-based exclusions on direct investments)
- not to invest into companies that derive more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment (values-based exclusions on direct investments)
- not to invest into companies that either derive more than 20% of their revenue from tobacco distribution or conventional weapons support systems and services (values-based exclusions on direct investments)
- not to invest into companies that either derive more than 20% of their revenues from coal (coal mining and coal-based electricity generation) and 5% of their revenues in arctic oil and gas, or 10% of their revenues from oil sands (values-based exclusions on direct investments)
- adherence to, and conducting business activities in accordance with, international norms such as the "United Nations Global Compact Principles" (UNGCP) (business-conduct exclusions on direct investments)
- higher exposure to investments that have better ESG profile and fewer ESG controversies over their investment cycle (ESG Integration)
- contribution to good governance and sustainable practices through proxy voting and engagement with investee companies in line with CSAM's Sustainable Investing Policy (Active Ownership)

The extent to which the environmental and/or social characteristics were met is measured by the sustainability indicators shown below.

Derivatives were not used to attain the environmental or social characteristics.

Please find further information on ESG Integration, ESG Exclusions and Active Ownership below in the question "What actions have been taken to meet the environmental and/or social characteristics during the reference period?" and online at www.credit-suisse.com/esg.

● *How did the sustainability indicators perform?*

The table below shows the output of the Sustainability Indicators applicable to this Subfund as of 31.05.2024. While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

Sustainability Indicator*	Portfolio	Indicator Output
ESG Rating	AAA: 21.83%, AA: 36.86%, A: 18.15%, BBB: 9.59%, BB: 5.75%, B: 0.00%, CCC: 1.32%, Not ratable**: 0.55%, No data coverage**: 5.94%	Investment exposure by ESG Rating: AAA (highest): 0–100% AA: 0–100% A: 0–100% BBB: 0–100% BB: 0–100% B: 0–100% CCC (lowest): 0–100%
Environmental pillar score	5.15	Portfolio aggregate environmental pillar score: 1 (lowest) – 10 (highest)
Social pillar score	5.92	Portfolio aggregate social pillar score: 1 (lowest) – 10 (highest)
Governance pillar score	6.39	Portfolio aggregate governance pillar score: 1 (lowest) – 10 (highest)
ESG controversy flag	Green: 94.87%, Yellow: 1.32%, Orange: 0.00%, Red: 0.00%, Not ratable**: 0.55%, No data coverage**: 3.26%	Investment exposure by ESG controversy flag: Green: 0–100% Yellow: 0–100% Orange: 0–100% Red: 0–100%
CSAM ESG exclusions***	Pre- and post-trade checks are in place to detect investments that breach the ESG exclusions. Any detected breach is escalated and remedied.	This indicator reflects that the portfolio complied with the applicable ESG exclusions as described in the exclusion section of the website (during the entire reference period, CSAM adhered to ESG exclusion criteria, as stated in the CSAM Sustainable Investing Policy).

* None of the Sustainability Indicators were subject to an assurance provided by an auditor or a review by a third party.

** These categories can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

*** Note that the amount of investments that were restricted due to the ESG exclusions depend on the investable universe of the Subfund.

● ...and compared to previous periods?

The table below presents data from the previous reference period (as of 31.05.2023). The data may differ compared to the previously published report as the most recently available data was taken into account, as the data provider(s) may have retroactively updated some figures. While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

Sustainability Indicator*	Portfolio	Indicator Output
ESG Rating	AAA: 10.08%, AA: 44.96%, A: 19.17%, BBB: 14.52%, BB: 3.98%, B: 0.00%, CCC: 0.00%, Not ratable**: 2.07%, No data coverage**: 5.23%	Investment exposure by ESG Rating: AAA (highest): 0–100% AA: 0–100% A: 0–100% BBB: 0–100% BB: 0–100% B: 0–100% CCC (lowest): 0–100%
Environmental pillar score	5.24	Portfolio aggregate environmental pillar score: 1 (lowest) – 10 (highest)
Social pillar score	5.5	Portfolio aggregate social pillar score: 1 (lowest) – 10 (highest)
Governance pillar score	6.25	Portfolio aggregate governance pillar score: 1 (lowest) – 10 (highest)
ESG controversy flag	Green: 90.34%, Yellow: 2.58%, Orange: 2.06%, Red: 0.00%, Not ratable**: 2.07%, No data coverage**: 2.95%	Investment exposure by ESG controversy flag: Green: 0–100% Yellow: 0–100% Orange: 0–100% Red: 0–100%
CSAM ESG exclusions***	Pre- and post-trade checks are in place to detect investments that breach the ESG exclusions. Any detected breach is escalated and remedied.	This indicator reflects that the portfolio complied with the applicable ESG exclusions as described in the exclusion section of the website (during the entire reference period, CSAM adhered to ESG exclusion criteria, as stated in the CSAM Sustainable Investing Policy).

* None of the Sustainability Indicators were subject to an assurance provided by an auditor or a review by a third party.

** These categories can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

*** Note that the amount of investments that were restricted due to the ESG exclusions depend on the investable universe of the Subfund.

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

At the end of the reference period, the sustainable investments contributed to the Environmental and Social objectives below:

- Investments that generated at least 50% of their revenues from products and services that contributed to an environmental objective (e.g. alternative energy, carbon & energy efficiency, green building, sustainable water, pollution prevention, sustainable agriculture etc.)
- Investments that generated at least 50% of their revenues from products and services that contribute to a social objective (e.g. nutrition, disease treatments, sanitation, affordable real estate, SME finance, education, connectivity etc.)
- Investments that have an approved commitment to science-based emission targets and an average reduction in carbon emissions intensity of 7% over the last three years

The above criteria were assessed using a quantitative methodology. If there had not been an output from the quantitative assessment (e.g. in the case of missing quantitative ESG data), investments were submitted for confirmation in a case-by-case approach based on a proprietary assessment of the criteria. A central Credit Suisse committee approved such submissions.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

CSAM considered various indicators linked to principal adverse impacts on sustainability factors (PAI Indicators) and further indicators from its exclusion framework to assess whether sustainable investments caused significant harm to any environmental or social investment objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— — **How were the indicators for adverse impacts on sustainability factors taken into account?**

During the reference period, the PAI Indicators applied by CSAM to identify investments which qualify as SFDR Sustainable Investments in line with CS SFDR Sustainable Investment Methodology included a set of criteria and thresholds to determine if an investment passed the DNSH condition as follows:

Investments must not:

1. have a significant negative contribution to climate change. This criterion makes use of an indicator that flags the biggest emitters of greenhouse gas globally and relates to PAI 1, 2, 3 and 15.
2. be subject to norms, values and business conduct exclusions and other investment restrictions which address PAI 4, 10, 14 and 16.
3. be subject to severe ESG controversies which address PAI 7 and 10 where applicable.
4. be strongly lagging its industry peers in overall ESG performance. This criterion has been applied to cover the remainder of the PAI to the extent possible.

— — — **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Sustainable Investments were aligned with the 'OECD Guidelines for Multinational Enterprises' and the 'UN Guiding Principles on Business and Human Rights'. The alignment was assessed as part of the CS ESG Exclusion framework. Companies that exhibit severe weaknesses in business conduct, particularly with regard to breaches of the 'United Nations Global Compact Principles' (UNGC) and companies placed on the watchlist, but with no immediate exclusion, were flagged not to be considered SFDR Sustainable Investments due to DNSH.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides the exposure to all mandatory PAI from the Commission Delegated Regulation (EU) 2022/1288. The Adverse Sustainability Indicator/Metric values are calculated as an asset weighted average based on quarterly data representing the reference period from 01.06.2023–31.05.2024.

Please note that CSAM may choose or may not be able to consider and/or mitigate all of the herein reported PAI given the Subfund's investment strategy, asset class or the availability of reliable data. Consideration of PAI may be subject to change given evolving data availability and quality. Please refer to the EET for the most recent overview of which PAI are considered at Subfund level.

Please find further information on CSAM PAI Framework online at www.credit-suisse.com/esg.

* *Look-through enabled where possible, excl. cash and derivatives. Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period.*

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31.05.2024

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which were neither aligned with the environmental or social characteristics, nor qualified as sustainable investments.

Please refer to the section "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?" for further information.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that did not qualify as sustainable investments.

The proportion of investments used to meet the environmental or social characteristics promoted by this Subfund (category #1 above) was 93.51% of its total net assets.

Within this category the Subfund held a proportion of 25.37% of its total net assets in sustainable investments (category #1A above) and a proportion of 68.14% of its total net assets in other E/S characteristics (category #1B above).

The proportion of investments held by the Subfund in "Other" (category #2 above) was 6.49% of its total net assets.

The data is valid as of 31.05.2024. It does not represent an average for the reference period.

● In which economic sectors were the investments made?

Subfund Sectoral Exposure

NACE Sector Code *	Portfolio Exposure **
C. Manufacturing	57.85%
H. Transportation and storage	1.50%
J. Information and communication	40.11%
Others	0.55%

* Please note that the NACE sector allocation is not used in the Subfund's investment strategy. It is provided for disclosure purposes only. For example, the Subfund's investment strategy makes use of company's revenue exposure in accordance with CSAM's ESG Exclusion framework and does not exclude companies based on their NACE sector allocation.

** Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period. The "Others" category can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

Subfund Exposure to Fossil Fuels Sub-Sectors

NACE Sector Code *	NACE name	Portfolio Exposure **
B5.1.0	Mining of hard coal	0.00%
B5.2.0	Mining of lignite	0.00%
B6.1.0	Extraction of crude petroleum	0.00%
B6.2.0	Extraction of natural gas	0.00%
B9.1.0	Support activities for petroleum and natural gas extraction	0.00%
C19.2.0	Manufacture of refined petroleum products	0.00%
D35.2.1	Manufacture of gas	0.00%
D35.2.2	Distribution of gaseous fuels through mains	0.00%
D35.2.3	Trade of gas through mains	0.00%
G46.7.1	Wholesale of solid, liquid and gaseous fuels and related products	0.00%

* Please note that the NACE sector allocation is not used in the Subfund's investment strategy. It is provided for disclosure purposes only. For example, the Subfund's investment strategy makes use of company's revenue exposure in accordance with CSAM's ESG Exclusion framework and does not exclude companies based on their NACE sector allocation.

** Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

As of 31.05.2024, the Subfund reports 0.00% exposure to sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The Subfund's reported EU Taxonomy alignment was not subject to assurance or review by a third party.

● **What was the share of investments made in transitional and enabling activities?**

Of the 0.00% of sustainable investments with an environmental objective aligned with the EU Taxonomy as of 31.05.2024, 0.00% were made in transitional activities and 0.00% in enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During the previous reference period the percentage of investments that were aligned with the EU Taxonomy were 0.00% as of 31.05.2023.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As of 31.05.2024, 23.36% of the Subfund's investments were made into sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

As of 31.05.2024, 2.01% of the Subfund's investments were made into socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

As of 31.05.2024, 6.49% of the Subfund's investments were made into "other".

Investments such as cash, derivatives and structured products may have fallen under "other" since such instruments did not contribute to the E/S characteristics of this Subfund. More information about the portfolio exposure to such investments can be found in the financial section of this annual report. Such investments did not have minimum environmental or social safeguards. They may have been used as efficient portfolio management tools, for cash management, for hedging purposes, or as an additional source of return.

Additionally, investments may have fallen under "other" if insufficient ESG-related information was available. This applied in particular to asset classes for which ESG Factors were insufficiently defined or insufficient ESG related information was available. Where possible, minimum environmental or social safeguards have been applied to these underlying securities by ensuring that CSAM ESG exclusions were adhered to.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To attain the environmental or social characteristics promoted by this Subfund, this Subfund applied ESG Exclusions, ESG Integration and Active Ownership.

This Subfund excluded investments in companies of the following three categories:

- Norms-based Exclusions

This Subfund excluded companies that failed to comply with international treaties on controversial weapons such as the Convention on Cluster Munitions, the Chemical Weapons Convention, the Biological Weapons Convention, the Treaty on the Non-Proliferation of Nuclear Weapons (NPT). In addition, it excluded companies that are recommended for exclusions by the Swiss Association for Responsible Investments (SVVK-ASIR) in respect to APM (anti-personnel mines), cluster munitions and nuclear weapons (outside of NPT).

- Values-based Exclusions

This Subfund excluded companies that derived more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment. It excluded companies that derived more than 20% of their revenue from tobacco distribution and conventional weapons support systems and services. In addition, a revenue limit of 20% applied to investments in coal (coal mining and coal-based electricity generation), a revenue limit of 5% applies to investments in arctic oil and gas as well as a revenue limit of 10% applies to investments in oil sands.

- Business-conduct Exclusions

Companies found to systematically violate international norms, where the breaches were particularly severe, or where management was not open to implement necessary reforms, were placed on a watch list, and may have been excluded from the Credit Suisse-wide investment universe. This process was governed by a dedicated committee that maintained the list of excluded companies and was responsible for ensuring that the list is communicated to investment teams in a timely manner.

- Restrictions related to the Guidelines for Responsible Investing of the Bundesverband Investment and Asset Management's (BVI)

To comply with the BVI guidelines, this Subfund excluded additionally the following companies, countries, and sectors from the investment universe:

- Military hardware: companies that derive more than 10% of their revenue from manufacturing conventional weapons, components, and support systems and services
- Sovereign issuers: serious violations of democratic and human rights based on the assessment as "not free" according to the Freedom House's index (freedomhouse.org/countries/freedom-world/scores)

- Restrictions related to LuxFLAG ESG label

To comply with the LuxFLAG ESG label, this Subfund excluded additionally the following companies from the investment universe:

- Tobacco, tobacco-related products and supporting services: Companies that derive more than 5% of their annual revenue from production and all companies that derive more than 15% of their annual revenue from sales and distribution are excluded.

ESG Factors were integrated into the investment process in the following four main steps:

- Identification of material ESG Factors

First, the Investment Manager used materiality frameworks to identify those ESG Factors that are relevant to the investment strategy. Materiality frameworks are concepts that help to identify sustainability-related issues and opportunities that are likely to affect the financial condition or operating performance of companies within an industry. Material factors have been furthermore assessed based on the Subfund's sector and geographical exposure. Second, the Investment Manager prioritized the material factors that were most relevant to the subsequent investment decisions based on the portfolio's current market exposure.

- ESG security analysis

Based on the identified material ESG Factors, the Investment Manager performed security research across the Subfund's investment universe. The Investment Manager made use of ESG ratings from third-party service providers and combined them with CSAM's proprietary analyses and information. These included, e.g. ESG related news, ESG ratings and scores, ESG-related controversies, and ESG trends.

The ESG data are fully integrated in the portfolio management software. The CSAM sustainable investing team may offer additional support, where needed, and advise on access to other ESG data providers. The outcome of the ESG analysis of individual securities, combined with financial research, enabled the Investment Managers to make ESG-adjusted risk/return assessments. This enabled the Investment Manager to compare securities on an ESG-adjusted basis and to evaluate whether to keep certain securities in the portfolio or to sell them during the security selection and portfolio implementation stage. The ESG security analysis has been updated periodically.

- Security selection and portfolio implementation

Based on the identified material ESG Factors and the ESG-adjusted security analysis, the Investment Manager constructed a portfolio in accordance with the Subfund's investment process and principles. The ESG-adjusted security analysis combined with portfolio construction considerations has been used to determine appropriate portfolio weights that reflected the ESG-adjusted risk/return profile of the analyzed securities.

The research process might make use of dedicated ESG questionnaires with potential follow-up meetings with investee companies in case incomplete data is available from third-party ESG data providers.

- Portfolio monitoring

The Investment Manager monitored the ESG Factors periodically to detect significant changes in the ESG Factors of the underlying securities. They regularly reassessed the portfolio, taking into consideration financial and ESG metrics, and consequently decided whether to increase or decrease positions in the portfolio.

- Engagement

CSAM engaged with investee companies with the aim of increasing its impact on sustainability issues. Selected companies that were able and willing to take action were subject to engagement and CSAM sought to preserve and/or enhance the value of the companies they invested in, through engagement with issuers. The Active Ownership team defined the topics and issues CSAM wanted to discuss with investee companies. The resulting engagement activities for the reference period of this SFDR annex to the annual report were defined using certain criteria and aimed at companies in which CSAM held considerable investments through its funds. More information about the engagement activities and the most current active ownership report of CSAM can be found online at: www.credit-suisse.com/esg.

- Proxy Voting

Voting rights have been exercised for investee companies which have met the criteria for Proxy Voting as explained at www.credit-suisse.com/esg

How did this financial product perform compared to the reference benchmark?

The Subfund did not use a reference benchmark for the purpose of attaining the environmental and/or social characteristics.

- *How does the reference benchmark differ from a broad market index?*

Not applicable.

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● *How did this financial product perform compared with the reference benchmark?*

● *How did this financial product perform compared with the broad market index?*

Not applicable.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Credit Suisse (Lux) Security Equity Fund

Legal entity identifier: 549300XRZKN86MHX7E55

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="checkbox"/> Yes	<input type="checkbox"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 28.94% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This Subfund promotes environmental, social and governance (ESG) characteristics (within the meaning of Art. 8 of Regulation (EU) 2019/2088).

The Management Company and the Investment Manager applied the Credit Suisse Asset Management (CSAM) Sustainable Investing Policy to this Subfund.

This Subfund promoted the following environmental and social characteristics:

- to invest into companies that comply with international treaties on controversial weapons (norms-based exclusions on direct investments)
- not to invest into companies that derive more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment (values-based exclusions on direct investments)
- not to invest into companies that either derive more than 20% of their revenue from tobacco distribution or conventional weapons support systems and services (values-based exclusions on direct investments)
- not to invest into companies that either derive more than 20% of their revenues from coal (coal mining and coal-based electricity generation) and 5% of their revenues in arctic oil and gas, or 10% of their revenues from oil sands (values-based exclusions on direct investments)
- adherence to, and conducting business activities in accordance with, international norms such as the "United Nations Global Compact Principles" (UNGCP) (business-conduct exclusions on direct investments)
- higher exposure to investments that have better ESG profile and fewer ESG controversies over their investment cycle (ESG Integration)
- contribution to good governance and sustainable practices through proxy voting and engagement with investee companies in line with CSAM's Sustainable Investing Policy (Active Ownership)

The extent to which the environmental and/or social characteristics were met is measured by the sustainability indicators shown below.

Derivatives were not used to attain the environmental or social characteristics.

Please find further information on ESG Integration, ESG Exclusions and Active Ownership below in the question "What actions have been taken to meet the environmental and/or social characteristics during the reference period?" and online at www.credit-suisse.com/esg.

● *How did the sustainability indicators perform?*

The table below shows the output of the Sustainability Indicators applicable to this Subfund as of 31.05.2024. While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

Sustainability Indicator*	Portfolio	Indicator Output
ESG Rating	AAA: 8.40%, AA: 35.04%, A: 22.82%, BBB: 19.74%, BB: 13.30%, B: 0.00%, CCC: 0.41%, Not ratable**: 0.30%, No data coverage**: 0.00%	Investment exposure by ESG Rating: AAA (highest): 0–100% AA: 0–100% A: 0–100% BBB: 0–100% BB: 0–100% B: 0–100% CCC (lowest): 0–100%
Environmental pillar score	5.54	Portfolio aggregate environmental pillar score: 1 (lowest) – 10 (highest)
Social pillar score	4.82	Portfolio aggregate social pillar score: 1 (lowest) – 10 (highest)

CSAM ESG exclusions***	Pre- and post-trade checks are in place to detect investments that breach the ESG exclusions. Any detected breach is escalated and remedied.	This indicator reflects that the portfolio complied with the applicable ESG exclusions as described in the exclusion section of the website (during the entire reference period, CSAM adhered to ESG exclusion criteria, as stated in the CSAM Sustainable Investing Policy).

* None of the Sustainability Indicators were subject to an assurance provided by an auditor or a review by a third party.

** These categories can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

*** Note that the amount of investments that were restricted due to the ESG exclusions depend on the investable universe of the Subfund.

● ...and compared to previous periods?

The table below presents data from the previous reference period (as of 31.05.2023). The data may differ compared to the previously published report as the most recently available data was taken into account, as the data provider(s) may have retroactively updated some figures. While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

Sustainability Indicator*	Portfolio	Indicator Output
ESG Rating	AAA: 5.65%, AA: 35.84%, A: 21.05%, BBB: 28.48%, BB: 6.29%, B: 0.98%, CCC: 0.44%, Not ratable**: 0.97%, No data coverage**: 0.29%	Investment exposure by ESG Rating: AAA (highest): 0–100% AA: 0–100% A: 0–100% BBB: 0–100% BB: 0–100% B: 0–100% CCC (lowest): 0–100%
Environmental pillar score	5.58	Portfolio aggregate environmental pillar score: 1 (lowest) – 10 (highest)
Social pillar score	4.95	Portfolio aggregate social pillar score: 1 (lowest) – 10 (highest)
Governance pillar score	6.21	Portfolio aggregate governance pillar score: 1 (lowest) – 10 (highest)
ESG controversy flag	Green: 82.54%, Yellow: 6.57%, Orange: 9.93%, Red: 0.00%, Not ratable**: 0.97%, No data coverage**: 0.00%	Investment exposure by ESG controversy flag: Green: 0–100% Yellow: 0–100% Orange: 0–100% Red: 0–100%
CSAM ESG exclusions***	Pre- and post-trade checks are in place to detect investments that breach the ESG exclusions. Any detected breach is escalated and remedied.	This indicator reflects that the portfolio complied with the applicable ESG exclusions as described in the exclusion section of the website (during the entire reference period, CSAM adhered to ESG exclusion criteria, as stated in the CSAM Sustainable Investing Policy).

* None of the Sustainability Indicators were subject to an assurance provided by an auditor or a review by a third party.

** These categories can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

*** Note that the amount of investments that were restricted due to the ESG exclusions depend on the investable universe of the Subfund.

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

At the end of the reference period, the sustainable investments contributed to the Social objectives below:

- Investments that generated at least 50% of their revenues from products and services that contribute to a social objective (e.g. nutrition, disease treatments, sanitation, affordable real estate, SME finance, education, connectivity etc.)
- Investments that have an approved commitment to science-based emission targets and an average reduction in carbon emissions intensity of 7% over the last three years

The above criteria were assessed using a quantitative methodology. If there had not been an output from the quantitative assessment (e.g. in the case of missing quantitative ESG data), investments were submitted for confirmation in a case-by-case approach based on a proprietary assessment of the criteria. A central Credit Suisse committee approved such submissions.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

CSAM considered various indicators linked to principal adverse impacts on sustainability factors (PAI Indicators) and further indicators from its exclusion framework to assess whether sustainable investments caused significant harm to any environmental or social investment objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— — **How were the indicators for adverse impacts on sustainability factors taken into account?**

During the reference period, the PAI Indicators applied by CSAM to identify investments which qualify as SFDR Sustainable Investments in line with CS SFDR Sustainable Investment Methodology included a set of criteria and thresholds to determine if an investment passed the DNSH condition as follows:

Investments must not:

1. have a significant negative contribution to climate change. This criterion makes use of an indicator that flags the biggest emitters of greenhouse gas globally and relates to PAI 1, 2, 3 and 15.
2. be subject to norms, values and business conduct exclusions and other investment restrictions which address PAI 4, 10, 14 and 16.
3. be subject to severe ESG controversies which address PAI 7 and 10 where applicable.
4. be strongly lagging its industry peers in overall ESG performance. This criterion has been applied to cover the remainder of the PAI to the extent possible.

— — — **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:**

Sustainable Investments were aligned with the 'OECD Guidelines for Multinational Enterprises' and the 'UN Guiding Principles on Business and Human Rights'. The alignment was assessed as part of the CS ESG Exclusion framework. Companies that exhibit severe weaknesses in business conduct, particularly with regard to breaches of the 'United Nations Global Compact Principles' (UNGC) and companies placed on the watchlist, but with no immediate exclusion, were flagged not to be considered SFDR Sustainable Investments due to DNSH.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides the exposure to all mandatory PAI from the Commission Delegated Regulation (EU) 2022/1288. The Adverse Sustainability Indicator/Metric values are calculated as an asset weighted average based on quarterly data representing the reference period from 01.06.2023–31.05.2024.

Please note that CSAM may choose or may not be able to consider and/or mitigate all of the herein reported PAI given the Subfund's investment strategy, asset class or the availability of reliable data. Consideration of PAI may be subject to change given evolving data availability and quality. Please refer to the EET for the most recent overview of which PAI are considered at Subfund level.

Please find further information on CSAM PAI Framework online at www.credit-suisse.com/esg.

* *Look-through enabled where possible, excl. cash and derivatives. Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period.*

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31.05.2024

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which were neither aligned with the environmental or social characteristics, nor qualified as sustainable investments.

Please refer to the section "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?" for further information.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that did not qualify as sustainable investments.

The proportion of investments used to meet the environmental or social characteristics promoted by this Subfund (category #1 above) was 99.70% of its total net assets.

Within this category the Subfund held a proportion of 28.94% of its total net assets in sustainable investments (category #1A above) and a proportion of 70.76% of its total net assets in other E/S characteristics (category #1B above).

The proportion of investments held by the Subfund in "Other" (category #2 above) was 0.30% of its total net assets.

The data is valid as of 31.05.2024. It does not represent an average for the reference period.

● In which economic sectors were the investments made?

Subfund Sectoral Exposure

NACE Sector Code *	Portfolio Exposure **
C. Manufacturing	37.94%
E. Water supply; sewerage, waste management and remediation activities	3.88%
F. Construction	0.94%
G. Wholesale and retail trade; repair of motor vehicles and motorcycles	2.86%
J. Information and communication	36.77%
M. Professional, scientific and technical activities	11.15%
N. Administrative and support service activities	6.16%
Others	0.30%

* Please note that the NACE sector allocation is not used in the Subfund's investment strategy. It is provided for disclosure purposes only. For example, the Subfund's investment strategy makes use of company's revenue exposure in accordance with CSAM's ESG Exclusion framework and does not exclude companies based on their NACE sector allocation.

** Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period. The "Others"

category can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

Subfund Exposure to Fossil Fuels Sub-Sectors

NACE Sector Code *	NACE name	Portfolio Exposure **
B5.1.0	Mining of hard coal	0.00%
B5.2.0	Mining of lignite	0.00%
B6.1.0	Extraction of crude petroleum	0.00%
B6.2.0	Extraction of natural gas	0.00%
B9.1.0	Support activities for petroleum and natural gas extraction	0.00%
C19.2.0	Manufacture of refined petroleum products	0.00%
D35.2.1	Manufacture of gas	0.00%
D35.2.2	Distribution of gaseous fuels through mains	0.00%
D35.2.3	Trade of gas through mains	0.00%
G46.7.1	Wholesale of solid, liquid and gaseous fuels and related products	0.00%

* Please note that the NACE sector allocation is not used in the Subfund's investment strategy. It is provided for disclosure purposes only. For example, the Subfund's investment strategy makes use of company's revenue exposure in accordance with CSAM's ESG Exclusion framework and does not exclude companies based on their NACE sector allocation.

** Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

As of 31.05.2024, the Subfund reports 0.00% exposure to sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The Subfund's reported EU Taxonomy alignment was not subject to assurance or review by a third party.

● *What was the share of investments made in transitional and enabling activities?*

Of the 0.00% of sustainable investments with an environmental objective aligned with the EU Taxonomy as of 31.05.2024, 0.00% were made in transitional activities and 0.00% in enabling activities.

● *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

During the previous reference period the percentage of investments that were aligned with the EU Taxonomy were 0.00% as of 31.05.2023.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As of 31.05.2024, 23.34% of the Subfund's investments were made into sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

As of 31.05.2024, 5.60% of the Subfund's investments were made into socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

As of 31.05.2024, 0.30% of the Subfund's investments were made into "other".

Investments such as cash, derivatives and structured products may have fallen under "other" since such instruments did not contribute to the E/S characteristics of this Subfund. More information about the portfolio exposure to such investments can be found in the financial section of this annual report. Such investments did not have minimum environmental or social safeguards. They may have been used as efficient portfolio management tools, for cash management, for hedging purposes, or as an additional source of return.

Additionally, investments may have fallen under "other" if insufficient ESG-related information was available. This applied in particular to asset classes for which ESG Factors were insufficiently defined or insufficient ESG related information was available. Where possible, minimum environmental or social safeguards have been applied to these underlying securities by ensuring that CSAM ESG exclusions were adhered to.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To attain the environmental or social characteristics promoted by this Subfund, this Subfund applied ESG Exclusions, ESG Integration and Active Ownership.

This Subfund excluded investments in companies of the following three categories:

- Norms-based Exclusions

This Subfund excluded companies that failed to comply with international treaties on controversial weapons such as the Convention on Cluster Munitions, the Chemical Weapons Convention, the Biological Weapons Convention, the Treaty on the Non-Proliferation of Nuclear Weapons (NPT). In addition, it excluded companies that are recommended for exclusions by the Swiss Association for Responsible Investments (SVVK-ASIR) in respect to APM (anti-personnel mines), cluster munitions and nuclear weapons (outside of NPT).

- Values-based Exclusions

This Subfund excluded companies that derived more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment. It excluded companies that derived more than 20% of their revenue from tobacco distribution and conventional weapons support systems and services. In addition, a revenue limit of 20% applied to investments in coal (coal mining and coal-based electricity generation), a revenue limit of 5% applies to investments in arctic oil and gas as well as a revenue limit of 10% applies to investments in oil sands.

- Business-conduct Exclusions

Companies found to systematically violate international norms, where the breaches were particularly severe, or where management was not open to implement necessary reforms, were placed on a watch list, and may have been excluded from the Credit Suisse-wide investment universe. This process was governed by a dedicated committee that maintained the list of excluded companies and was responsible for ensuring that the list is communicated to investment teams in a timely manner.

- Restrictions related to the Guidelines for Responsible Investing of the Bundesverband Investment and Asset Management's (BVI)

To comply with the BVI guidelines, this Subfund excluded additionally the following companies, countries, and sectors from the investment universe:

- Military hardware: companies that derive more than 10% of their revenue from manufacturing conventional weapons, components, and support systems and services
- Sovereign issuers: serious violations of democratic and human rights based on the assessment as "not free" according to the Freedom House's index (freedomhouse.org/countries/freedom-world/scores)

- Restrictions related to LuxFLAG ESG label

To comply with the LuxFLAG ESG label, this Subfund excluded additionally the following companies from the investment universe:

- Tobacco, tobacco-related products and supporting services: Companies that derive more than 5% of their annual revenue from production and all companies that derive more than 15% of their annual revenue from sales and distribution are excluded.

ESG Factors were integrated into the investment process in the following four main steps:

- Identification of material ESG Factors

First, the Investment Manager used materiality frameworks to identify those ESG Factors that are relevant to the investment strategy. Materiality frameworks are concepts that help to identify sustainability-related issues and opportunities that are likely to affect the financial condition or operating performance of companies within an industry. Material factors have been furthermore assessed based on the Subfund's sector and geographical exposure. Second, the Investment Manager prioritized the material factors that were most relevant to the subsequent investment decisions based on the portfolio's current market exposure.

- ESG security analysis

Based on the identified material ESG Factors, the Investment Manager performed security research across the Subfund's investment universe. The Investment Manager made use of ESG ratings from third-party service providers and combined them with CSAM's proprietary analyses and information. These included, e.g. ESG related news, ESG ratings and scores, ESG-related controversies, and ESG trends.

The ESG data are fully integrated in the portfolio management software. The CSAM sustainable investing team may offer additional support, where needed, and advise on access to other ESG data providers. The outcome of the ESG analysis of individual securities, combined with financial research, enabled the Investment Managers to make ESG-adjusted risk/return assessments. This enabled the Investment Manager to compare securities on an ESG-adjusted basis and to evaluate whether to keep certain securities in the portfolio or to sell them during the security selection and portfolio implementation stage. The ESG security analysis has been updated periodically.

- Security selection and portfolio implementation

Based on the identified material ESG Factors and the ESG-adjusted security analysis, the Investment Manager constructed a portfolio in accordance with the Subfund's investment process and principles. The ESG-adjusted security analysis combined with portfolio construction considerations has been used to determine appropriate portfolio weights that reflected the ESG-adjusted risk/return profile of the analyzed securities.

The research process might make use of dedicated ESG questionnaires with potential follow-up meetings with investee companies in case incomplete data is available from third-party ESG data providers.

- Portfolio monitoring

The Investment Manager monitored the ESG Factors periodically to detect significant changes in the ESG Factors of the underlying securities. They regularly reassessed the portfolio, taking into consideration financial and ESG metrics, and consequently decided whether to increase or decrease positions in the portfolio.

- Engagement

CSAM engaged with investee companies with the aim of increasing its impact on sustainability issues. Selected companies that were able and willing to take action were subject to engagement and CSAM sought to preserve and/or enhance the value of the companies they invested in, through engagement with issuers. The Active Ownership team defined the topics and issues CSAM wanted to discuss with investee companies. The resulting engagement activities for the reference period of this SFDR annex to the annual report were defined using certain criteria and aimed at companies in which CSAM held considerable investments through its funds. More information about the engagement activities and the most current active ownership report of CSAM can be found online at: www.credit-suisse.com/esg.

- Proxy Voting

Voting rights have been exercised for investee companies which have met the criteria for Proxy Voting as explained at www.credit-suisse.com/esg

How did this financial product perform compared to the reference benchmark?

The Subfund did not use a reference benchmark for the purpose of attaining the environmental and/or social characteristics.

- *How does the reference benchmark differ from a broad market index?*

Not applicable.

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● *How did this financial product perform compared with the reference benchmark?*

● *How did this financial product perform compared with the broad market index?*

Not applicable.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Credit Suisse (Lux) Small and Mid Cap Alpha Long/Short Fund

Legal entity identifier: 5299009KMH01GXQ3WA07

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="checkbox"/> Yes	<input type="checkbox"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 0.00% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Management Company and the Investment Manager applied the Credit Suisse Asset Management (CSAM) Sustainable Investing Policy to this Subfund. This Subfund promoted the following environmental and social characteristics:

- to invest into companies that comply with international treaties on controversial weapons (norms-based exclusions on direct investments)
- not to invest into companies that derive more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment (values-based exclusions on direct investments)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

- not to invest into companies that either derive more than 20% of their revenues from coal (coal mining and coal-based electricity generation) and 5% of their revenues in arctic oil and gas, or 10% of their revenues from oil sands (values-based exclusions on direct investments)
- adherence to, and conducting business activities in accordance with, international norms such as the “United Nations Global Compact Principles” (UNGC) (business-conduct exclusions on direct investments)
- higher exposure to investments that have better ESG profile and fewer ESG controversies over their investment cycle (ESG Integration)
- contribution to good governance and sustainable practices through proxy voting and engagement with investee companies in line with Credit Suisse Asset Management’s Sustainable Investing Policy (Active Ownership)

The extent to which the environmental and/or social characteristics were met is measured by the sustainability indicators shown below.

Please find further information on ESG Integration, ESG Exclusions and Active Ownership below in the question “What actions have been taken to meet the environmental and/or social characteristics during the reference period?” and online at www.credit-suisse.com/esg.

● How did the sustainability indicators perform?

The table below shows the output of the Sustainability Indicators applicable to this Subfund as of 31.05.2024. It shows long positions, which represent actual holdings, and short positions, which represent commitments to sell. While the sustainability indicators have been monitored continuously during the reference period (please note that the reference period for this Subfund was shortened, due to its re-classification, on 31.12.2022, from an Art. 6 to an Art. 8 Subfund in context of the Regulation (EU) 2019/2088). The data below does not represent an average for the reference period.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

Sustainability Indicator*	Portfolio:	Long**	Short**	Indicator Output
ESG Rating	AAA:	21.53%	-16.74%	Investment exposure by ESG Rating: AAA (highest): 0–100% AA: 0–100% A: 0–100% BBB: 0–100% BB: 0–100% B: 0–100% CCC (lowest): 0–100%

	Not ratable:	n/a	n/a	
No data coverage:	1.15%	-0.14%		
CSAM ESG exclusions***	Pre- and post-trade checks are in place to detect investments that breach the ESG exclusions. Any detected breach is escalated and remedied.			This indicator reflects that the portfolio complied with the applicable ESG exclusions as described in the exclusion section of the website (during the entire reference period, CSAM adhered to ESG exclusion criteria, as stated in the CSAM Sustainable Investing Policy)

* None of the Sustainability Indicators were subject to an assurance provided by an auditor or a review by a third party.

** Figures shown are in % of the Subfund exposure. Long exposures are expressed with positive values and short exposures are expressed with negative values (except for the ESG pillar scores). Short positions are implemented via index futures as well as CFDs (contract for differences), which adhere to the UCITS rules.

*** Note that the amount of investments that were restricted due to the ESG exclusions depend on the investable universe of the fund.

● **...and compared to previous periods?**

The table below shows the output of the Sustainability Indicators applicable to this Subfund as of 31.05.2023. It shows long positions, which represent actual holdings, and short positions, which represent commitments to sell. While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

CSAM ESG exclusions***	Pre- and post-trade checks are in place to detect investments that breach the ESG exclusions. Any detected breach is escalated and remedied.			This indicator reflects that the portfolio complied with the applicable ESG exclusions as described in the exclusion section of the website (during the entire reference period, CSAM adhered to ESG exclusion criteria, as stated in the CSAM Sustainable Investing Policy)

* None of the Sustainability Indicators were subject to an assurance provided by an auditor or a review by a third party.

** Figures shown are in % of the Subfund exposure. Long exposures are expressed with positive values and short exposures are expressed with negative values (except for the ESG pillar scores). Short positions are implemented via index futures as well as CFDs (contract for differences), which adhere to the UCITS rules.

*** Note that the amount of investments that were restricted due to the ESG exclusions depend on the investable universe of the fund.

● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

The Subfund did not make any sustainable investments.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Credit Suisse Asset Management (CSAM) considered various indicators linked to principal adverse impacts on sustainability factors (PAI Indicators) and further indicators from its exclusion framework to assess whether sustainable investments caused significant harm to any environmental or social investment objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— — *How were the indicators for adverse impacts on sustainability factors taken into account?*

During the reference period, the PAI Indicators applied by CSAM to identify investments which qualify as SFDR Sustainable Investments in line with CS SFDR Sustainable Investment Methodology included a set of criteria and thresholds to determine if an investment passed the DNSH condition as follows:

Investments must not:

1. have a significant negative contribution to climate change. This criterion makes use of an indicator that flags the biggest emitters of greenhouse gas globally and relates to PAI 1, 2, 3 and 15.
2. be subject to norms, values and business conduct exclusions and other investment restrictions which address PAI 4, 10, 14 and 16.
3. be subject to severe ESG controversies which address PAI 7 and 10 where applicable.
4. be strongly lagging its industry peers in overall ESG performance. This criterion has been applied to cover the remainder of the PAI to the extent possible.

— — — *Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

Sustainable Investments were aligned with the 'OECD Guidelines for Multinational Enterprises' and the 'UN Guiding Principles on Business and Human Rights'. The alignment was assessed through the CS business conduct framework as part of the CS ESG Exclusion framework.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides the exposure to all mandatory PAI from the Commission Delegated Regulation (EU) 2022/1288. The Adverse Sustainability Indicator/Metric values are calculated as an average based on quarterly data representing the reference period from 01.06.2023 - 31.05.2024.

Please note that CSAM may choose or may not be able to consider and/or mitigate all of the herein reported PAI given the Subfund's investment strategy, asset class or the availability of reliable data. Consideration of PAI may be subject to change given evolving data availability and quality. Please refer to the EET for the most recent overview of which PAI are considered at Subfund level.

Please refer to the CSAM ESG website (www.credit-suisse.com/esg) to get further information on the CSAM PAI framework including potential limitations in the methodology to consider PAI.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which were neither aligned with the environmental or social characteristics, nor qualified as sustainable investments.

Please refer to the section “What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?” for further information.

The proportion of investments used to meet the environmental or social characteristics promoted by this Subfund (category #1 above) was 93.08% of its total net assets. This figure is considering long positions only. The data is valid as of 31.05.2024. It does not represent an average for the reference period.

● In which economic sectors were the investments made?

Subfund Sectoral Exposure

NACE Sector Code *	% Portfolio Exposure **	
	Long	Short
AGRICULTURE, FORESTRY AND FISHING	0.74	0.00
MINING AND QUARRYING	0.36	-0.33
MANUFACTURING	43.79	-34.91

G46.7.1	Wholesale of solid, liquid and gaseous fuels and related products	0.00	-0.03

* Please note that the NACE sector allocation is not used in the Subfund's investment strategy. It is provided for disclosure purposes only. For example, the Subfund's investment strategy makes use of company's revenue exposure in accordance with CSAM's ESG Exclusion framework and does not exclude companies based on their NACE sector allocation.

** Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period. Figures shown are in % of the Subfund exposure. Long exposures are expressed with positive values and short exposures are expressed with negative values. Short positions are implemented via index futures as well as CFDs (contract for differences), which adhere to the UCITS rules.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contri-

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

As of 31.05.2024, the Subfund reports 0.00% exposure to sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

bution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The Subfund's reported EU Taxonomy alignment was not subject to assurance or review by a third party.

● **What was the share of investments made in transitional and enabling activities?**

Of the 0.00% of sustainable investments with an environmental objective aligned with the EU Taxonomy as of 31.05.2024, 0.00% were made in transitional activities and 0.00% in enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During the previous reference period the percentage of investments that were aligned with the EU Taxonomy were 0.00% as of 31.05.2023.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As of 31.05.2024, 26.62% of the Subfund's investments were made into sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

As of 31.05.2024, 1.63% of the Subfund's investments were made into socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

As of 31.05.2024, 6.23% of the Subfund's investments were made into "other".

Investments such as cash, derivatives and structured products may have fallen under "other" since such instruments did not contribute to the E/S characteristics of this Subfund. More information about the portfolio exposure to such investments can be found in the financial section of this annual report. Such investments did not have minimum environmental or social safeguards. They may have been used as efficient portfolio management tools, for cash management, for hedging purposes, or as an additional source of return.

Additionally, investments may have fallen under "other" if insufficient ESG-related information was available. This applied in particular to asset classes for which ESG Factors were insufficiently defined or insufficient ESG related information was available. Where possible, minimum environmental or social safeguards have been applied to these underlying securities by ensuring that CSAM ESG exclusions were adhered to.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To attain the environmental or social characteristics promoted by this Subfund, this Subfund applied ESG Exclusions, ESG Integration and Active Ownership.

This Subfund excluded investments in companies of the following three categories:

- Norms-based Exclusions

This Subfund excluded companies that failed to comply with international treaties on controversial weapons such as the Convention on Cluster Munitions, the Chemical Weapons Convention, the Biological Weapons Convention, the Treaty on the Non-Proliferation of Nuclear Weapons (NPT). In addition, it excluded companies that are recommended for exclusions by the Swiss Association for Responsible Investments (SVVK-ASiR) in respect to APM (anti-personnel mines), cluster munitions and nuclear weapons (outside of NPT).

- Values-based Exclusions

This Subfund excluded companies that derived more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment. It excluded companies that derived more than 20% of their revenue from tobacco distribution and conventional weapons support systems and services. In addition, a revenue limit of 20% applied to investments in coal (coal mining and coal-based electricity generation), a revenue limit of 5% applies to investments in arctic oil and gas as well as a revenue limit of 10% applies to investments in oil sands.

- Business-conduct Exclusions

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

Companies found to systematically violate international norms, where the breaches were particularly severe, or where management was not open to implement necessary reforms, were placed on a watch list, and may have been excluded from the Credit Suisse-wide investment universe. This process was governed by a dedicated committee that maintained the list of excluded companies and was responsible for ensuring that the list is communicated to investment teams in a timely manner.

ESG Factors were integrated into the investment process in the following four main steps:

- Identification of material ESG Factors

First, the Investment Manager used materiality frameworks to identify those ESG Factors that are relevant to the investment strategy. Materiality frameworks are concepts that help to identify sustainability-related issues and opportunities that are likely to affect the financial condition or operating performance of companies within an industry. Material factors have been furthermore assessed based on the Subfund's sector and geographical exposure. Second, the Investment Manager prioritized the material factors that were most relevant to the subsequent investment decisions based on the portfolio's current market exposure.

- ESG security analysis

Based on the identified material ESG Factors, the Investment Manager performed security research across the Subfund's investment universe. The Investment Manager made use of ESG ratings from third-party service providers and combined them with CSAM's proprietary analyses and information. These included, e.g. ESG related news, ESG ratings and scores, ESG-related controversies, and ESG trends.

The outcome of the ESG analysis of individual securities, combined with financial research, enabled the Investment Managers to make ESG-adjusted risk/return assessments. The Investment Manager was able to compare securities on an ESG-adjusted basis and to evaluate whether to keep certain securities in the portfolio or to sell them during the security selection and portfolio implementation stage. The ESG security analysis has been updated periodically.

- Security selection and portfolio implementation

Based on the identified material ESG Factors and the ESG-adjusted security analysis, the Investment Manager constructed a portfolio in accordance with the Subfund's investment process and principles. The ESG-adjusted security analysis combined with portfolio construction considerations has been used to determine appropriate portfolio weights that reflected the ESG-adjusted risk/return profile of the analyzed securities.

- Portfolio monitoring

The Investment Manager monitored the ESG Factors periodically to detect significant changes in the ESG Factors of the underlying securities. They regularly reassessed the portfolio, taking into consideration financial and ESG metrics, and consequently decided whether to increase or decrease positions in the portfolio.

- Engagement

CSAM engaged with investee companies with the aim of increasing its impact on sustainability issues. Selected companies that were able and willing to take action were subject to engagement and CSAM sought to preserve and/or enhance the value of the companies they invested in, through engagement with issuers. The Active Ownership team defined the topics and issues CSAM wanted to discuss with investee companies. The resulting engagement activities for the reference period of this SFDR annex to the annual report were defined using certain criteria and aimed at companies in which CSAM held considerable investments through its funds. More information about the engagement activities and the most current active ownership report of CSAM can be found online at: www.credit-suisse.com/esg.

- Proxy Voting

Voting rights have been exercised for investee companies which have met the criteria for proxy voting as explained at www.credit-suisse.com/esg.

When applying the CSAM Sustainable Investing Policy, CSAM makes use of financial derivative instruments to implement the investment strategy of the Subfund and to attain its environmental and/or social characteristics. In such cases, the principles of the CSAM Sustainable Investing Policy are applied in the same way to derivatives as to direct investments with the exception of Active Ownership, which cannot be exercised.

How did this financial product perform compared to the reference benchmark?

The Subfund did not use a reference benchmark for the purpose of attaining the environmental and/or social characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

Not applicable.

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

- *How did this financial product perform compared with the reference benchmark?*

- *How did this financial product perform compared with the broad market index?*

Not applicable.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Credit Suisse (Lux) Small and Mid Cap Germany Equity Fund

Legal entity identifier: 549300CSW06IDY57VS53

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 33.31% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This Subfund promotes environmental, social and governance (ESG) characteristics (within the meaning of Art. 8 of Regulation (EU) 2019/2088).

The Management Company and the Investment Manager applied the Credit Suisse Asset Management (CSAM) Sustainable Investing Policy to this Subfund.

This Subfund promoted the following environmental and social characteristics:

- to invest into companies that comply with international treaties on controversial weapons (norms-based exclusions on direct investments)
- not to invest into companies that derive more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment (values-based exclusions on direct investments)
- not to invest into companies that either derive more than 20% of their revenue from tobacco distribution or conventional weapons support systems and services (values-based exclusions on direct investments)
- not to invest into companies that either derive more than 20% of their revenues from coal (coal mining and coal-based electricity generation) and 5% of their revenues in arctic oil and gas, or 10% of their revenues from oil sands (values-based exclusions on direct investments)
- adherence to, and conducting business activities in accordance with, international norms such as the "United Nations Global Compact Principles" (UNGCP) (business-conduct exclusions on direct investments)
- higher exposure to investments that have better ESG profile and fewer ESG controversies over their investment cycle (ESG Integration)
- contribution to good governance and sustainable practices through proxy voting and engagement with investee companies in line with CSAM's Sustainable Investing Policy (Active Ownership)

The extent to which the environmental and/or social characteristics were met is measured by the sustainability indicators shown below.

Derivatives were not used to attain the environmental or social characteristics.

Please find further information on ESG Integration, ESG Exclusions and Active Ownership below in the question "What actions have been taken to meet the environmental and/or social characteristics during the reference period?" and online at www.credit-suisse.com/esg.

● *How did the sustainability indicators perform?*

The table below shows the output of the Sustainability Indicators applicable to this Subfund as of 31.05.2024. While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

Sustainability Indicator*	Portfolio	Indicator Output
ESG Rating	AAA: 22.88%, AA: 28.61%, A: 44.81%, BBB: 1.43%, BB: 0.00%, B: 0.00%, CCC: 0.00%, Not ratable**: 0.04%, No data coverage**: 2.24%	Investment exposure by ESG Rating: AAA (highest): 0–100% AA: 0–100% A: 0–100% BBB: 0–100% BB: 0–100% B: 0–100% CCC (lowest): 0–100%
Environmental pillar score	5.70	Portfolio aggregate environmental pillar score: 1 (lowest) – 10 (highest)
Social pillar score	5.08	Portfolio aggregate social pillar score: 1 (lowest) – 10 (highest)
Governance pillar score	6.72	Portfolio aggregate governance pillar score: 1 (lowest) – 10 (highest)
ESG controversy flag	Green: 72.81%, Yellow: 16.83%, Orange: 8.09%, Red: 0.00%, Not ratable**: 0.04%, No data coverage**: 2.24%	Investment exposure by ESG controversy flag: Green: 0–100% Yellow: 0–100% Orange: 0–100% Red: 0–100%
CSAM ESG exclusions***	Pre- and post-trade checks are in place to detect investments that breach the ESG exclusions. Any detected breach is escalated and remedied.	This indicator reflects that the portfolio complied with the applicable ESG exclusions as described in the exclusion section of the website (during the entire reference period, CSAM adhered to ESG exclusion criteria, as stated in the CSAM Sustainable Investing Policy).

* None of the Sustainability Indicators were subject to an assurance provided by an auditor or a review by a third party.

** These categories can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

*** Note that the amount of investments that were restricted due to the ESG exclusions depend on the investable universe of the Subfund.

● ...and compared to previous periods?

The table below presents data from the previous reference period (as of 31.05.2023). The data may differ compared to the previously published report as the most recently available data was taken into account, as the data provider(s) may have retroactively updated some figures. While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

Sustainability Indicator*	Portfolio	Indicator Output
ESG Rating	AAA: 14.35%, AA: 39.24%, A: 32.59%, BBB: 8.55%, BB: 1.40%, B: 0.00%, CCC: 0.00%, Not ratable**: 0.24%, No data coverage**: 3.64%	Investment exposure by ESG Rating: AAA (highest): 0–100% AA: 0–100% A: 0–100% BBB: 0–100% BB: 0–100% B: 0–100% CCC (lowest): 0–100%
Environmental pillar score	5.70	Portfolio aggregate environmental pillar score: 1 (lowest) – 10 (highest)

Governance pillar score	6.59	Portfolio aggregate governance pillar score: 1 (lowest) – 10 (highest)
ESG controversy flag	Green: 72.46%, Yellow: 17.82%, Orange: 5.84%, Red: 0.00%, Not ratable**: 0.24%, No data coverage**: 3.64%	Investment exposure by ESG controversy flag: Green: 0–100% Yellow: 0–100% Orange: 0–100% Red: 0–100%
CSAM ESG exclusions***	Pre- and post-trade checks are in place to detect investments that breach the ESG exclusions. Any detected breach is escalated and remedied.	This indicator reflects that the portfolio complied with the applicable ESG exclusions as described in the exclusion section of the website (during the entire reference period, CSAM adhered to ESG exclusion criteria, as stated in the CSAM Sustainable Investing Policy).

* None of the Sustainability Indicators were subject to an assurance provided by an auditor or a review by a third party.

** These categories can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

*** Note that the amount of investments that were restricted due to the ESG exclusions depend on the investable universe of the Subfund.

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Although this Subfund did not target any minimum proportion of sustainable investment, at the end of the reference period, the sustainable investments contributed to the following Environmental and Social objectives:

- Investments that generated at least 50% of their revenues from products and services that contributed to an environmental objective (e.g. alternative energy, carbon & energy efficiency, green building, sustainable water, pollution prevention, sustainable agriculture etc.)
- Investments that generated at least 50% of their revenues from products and services that contribute to a social objective (e.g. nutrition, disease treatments, sanitation, affordable real estate, SME finance, education, connectivity etc.)
- Investments that have an approved commitment to science-based emission targets and an average reduction in carbon emissions intensity of 7% over the last three years

The above criteria were assessed using a quantitative methodology. If there had not been an output from the quantitative assessment (e.g. in the case of missing quantitative ESG data), investments were submitted for confirmation in a case-by-case approach based on a proprietary assessment of the criteria. A central Credit Suisse committee approved such submissions.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

This Subfund did not target any minimum proportion of sustainable investments. CSAM considered various indicators linked to principal adverse impacts on sustainability factors (PAI Indicators) and further indicators from its exclusion framework to assess whether sustainable investments caused significant harm to any environmental or social investment objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— — ***How were the indicators for adverse impacts on sustainability factors taken into account?***

During the reference period, the PAI Indicators applied by CSAM to identify investments which qualify as SFDR Sustainable Investments in line with CS SFDR Sustainable Investment Methodology included a set of criteria and thresholds to determine if an investment passed the DNSH condition as follows:

Investments must not:

1. have a significant negative contribution to climate change. This criterion makes use of an indicator that flags the biggest emitters of greenhouse gas globally and relates to PAI 1, 2, 3 and 15.
2. be subject to norms, values and business conduct exclusions and other investment restrictions which address PAI 4, 10, 14 and 16.
3. be subject to severe ESG controversies which address PAI 7 and 10 where applicable.
4. be strongly lagging its industry peers in overall ESG performance. This criterion has been applied to cover the remainder of the PAI to the extent possible.

— — — ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Sustainable Investments were aligned with the 'OECD Guidelines for Multinational Enterprises' and the 'UN Guiding Principles on Business and Human Rights'. The alignment was assessed as part of the CS ESG Exclusion framework. Companies that exhibit severe weaknesses in business conduct, particularly with regard to breaches of the 'United Nations Global Compact Principles' (UNGC) and companies placed on the watchlist, but with no immediate exclusion, were flagged not to be considered SFDR Sustainable Investments due to DNSH.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides the exposure to all mandatory PAI from the Commission Delegated Regulation (EU) 2022/1288. The Adverse Sustainability Indicator/Metric values are calculated as an asset weighted average based on quarterly data representing the reference period from 31.12.2022–31.05.2024.

Please note that CSAM may choose or may not be able to consider and/or mitigate all of the herein reported PAI given the Subfund's investment strategy, asset class or the availability of reliable data. Consideration of PAI may be subject to change given evolving data availability and quality. Please refer to the EET for the most recent overview of which PAI are considered at Subfund level.

Please find further information on CSAM PAI Framework online at www.credit-suisse.com/esg.

* Look-through enabled where possible, excl. cash and derivatives. Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which were neither aligned with the environmental or social characteristics, nor qualified as sustainable investments.

Please refer to the section "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?" for further information.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that did not qualify as sustainable investments.

The proportion of investments used to meet the environmental or social characteristics promoted by this Subfund (category #1 above) was 97.73% of its total net assets.

Within this category the Subfund held a proportion of 33.31% of its total net assets in sustainable investments (category #1A above) and a proportion of 64.42% of its total net assets in other E/S characteristics (category #1B above).

The proportion of investments held by the Subfund in "Other" (category #2 above) was 2.27% of its total net assets.

The data is valid as of 31.05.2024. It does not represent an average for the reference period.

● In which economic sectors were the investments made?

Subfund Sectoral Exposure

NACE Sector Code *	Portfolio Exposure **
C. Manufacturing	48.70%
D. Electricity, gas, steam and air conditioning supply	0.52%
E. Water supply; sewerage, waste management and remediation activities	0.88%
G. Wholesale and retail trade; repair of motor vehicles and motorcycles	5.67%
H. Transportation and storage	4.95%
J. Information and communication	19.31%
K. Financial and insurance activities	3.02%
L. Real estate activities	5.64%
M. Professional, scientific and technical activities	1.31%
N. Administrative and support service activities	2.03%
Q. Human health and social work activities	3.74%
R. Arts, entertainment and recreation	4.19%
Others	0.04%

* Please note that the NACE sector allocation is not used in the Subfund's investment strategy. It is provided for disclosure purposes only. For example, the Subfund's investment strategy makes use of company's revenue exposure in accordance with CSAM's ESG Exclusion framework and does not exclude companies based on their NACE sector allocation.

** Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period. The "Others" category can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

Subfund Exposure to Fossil Fuels Sub-Sectors

NACE Sector Code *	NACE name	Portfolio Exposure **
B5.1.0	Mining of hard coal	0.00%
B5.2.0	Mining of lignite	0.00%
B6.1.0	Extraction of crude petroleum	0.00%
B6.2.0	Extraction of natural gas	0.00%
B9.1.0	Support activities for petroleum and natural gas extraction	0.00%
C19.2.0	Manufacture of refined petroleum products	2.86%
D35.2.1	Manufacture of gas	0.00%
D35.2.2	Distribution of gaseous fuels through mains	0.00%
D35.2.3	Trade of gas through mains	0.00%
G46.7.1	Wholesale of solid, liquid and gaseous fuels and related products	0.00%

* Please note that the NACE sector allocation is not used in the Subfund's investment strategy. It is provided for disclosure purposes only. For example, the Subfund's investment strategy makes use of company's revenue exposure in accordance with CSAM's ESG Exclusion framework and does not exclude companies based on their NACE sector allocation.

** Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contri-

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

As of 31.05.2024, the Subfund reports 0.00% exposure to sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

bution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The Subfund's reported EU Taxonomy alignment was not subject to assurance or review by a third party.

● **What was the share of investments made in transitional and enabling activities?**

Of the 0.00% of sustainable investments with an environmental objective aligned with the EU Taxonomy as of 31.05.2024, 0.00% were made in transitional activities and 0.00% in enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During the previous reference period the percentage of investments that were aligned with the EU Taxonomy were 0.00% as of 31.05.2023.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As of 31.05.2024, 32.84% of the Subfund's investments were made into sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

As of 31.05.2024, 0.47% of the Subfund's investments were made into socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

As of 31.05.2024, 2.27% of the Subfund's investments were made into "other".

Investments such as cash, derivatives and structured products may have fallen under "other" since such instruments did not contribute to the E/S characteristics of this Subfund. More information about the portfolio exposure to such investments can be found in the financial section of this annual report. Such investments did not have minimum environmental or social safeguards. They may have been used as efficient portfolio management tools, for cash management, for hedging purposes, or as an additional source of return.

Additionally, investments may have fallen under "other" if insufficient ESG-related information was available. This applied in particular to asset classes for which ESG Factors were insufficiently defined or insufficient ESG related information was available. Where possible, minimum environmental or social safeguards have been applied to these underlying securities by ensuring that CSAM ESG exclusions were adhered to.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To attain the environmental or social characteristics promoted by this Subfund, this Subfund applied ESG Exclusions, ESG Integration and Active Ownership.

This Subfund excluded investments in companies of the following three categories:

- Norms-based Exclusions

This Subfund excluded companies that failed to comply with international treaties on controversial weapons such as the Convention on Cluster Munitions, the Chemical Weapons Convention, the Biological Weapons Convention, the Treaty on the Non-Proliferation of Nuclear Weapons (NPT). In addition, it excluded companies that are recommended for exclusions by the Swiss Association for Responsible Investments (SVVK-ASIR) in respect to APM (anti-personnel mines), cluster munitions and nuclear weapons (outside of NPT).

- Values-based Exclusions

This Subfund excluded companies that derived more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment. It excluded companies that derived more than 20% of their revenue from tobacco distribution and conventional weapons support systems and services. In addition, a revenue limit of 20% applied to investments in coal (coal mining and coal-based electricity generation), a revenue limit of 5% applies to investments in arctic oil and gas as well as a revenue limit of 10% applies to investments in oil sands.

- Business-conduct Exclusions

Companies found to systematically violate international norms, where the breaches were particularly severe, or where management was not open to implement necessary reforms, were placed on a watch list, and may have been excluded

from the Credit Suisse-wide investment universe. This process was governed by a dedicated committee that maintained the list of excluded companies and was responsible for ensuring that the list is communicated to investment teams in a timely manner.

ESG Factors were integrated into the investment process in the following four main steps:

- Identification of material ESG Factors

First, the Investment Manager used materiality frameworks to identify those ESG Factors that are relevant to the investment strategy. Materiality frameworks are concepts that help to identify sustainability-related issues and opportunities that are likely to affect the financial condition or operating performance of companies within an industry. Material factors have been furthermore assessed based on the Subfund's sector and geographical exposure. Second, the Investment Manager prioritized the material factors that were most relevant to the subsequent investment decisions based on the portfolio's current market exposure.

- ESG security analysis

Based on the identified material ESG Factors, the Investment Manager performed security research across the Subfund's investment universe. The Investment Manager made use of ESG ratings from third-party service providers and combined them with CSAM's proprietary analyses and information. These included, e.g. ESG related news, ESG ratings and scores, ESG-related controversies, and ESG trends.

The ESG data are fully integrated in the portfolio management software. The CSAM sustainable investing team may offer additional support, where needed, and advise on access to other ESG data providers. The outcome of the ESG analysis of individual securities, combined with financial research, enabled the Investment Managers to make ESG-adjusted risk/return assessments. This enabled the Investment Manager to compare securities on an ESG-adjusted basis and to evaluate whether to keep certain securities in the portfolio or to sell them during the security selection and portfolio implementation stage. The ESG security analysis has been updated periodically.

- Security selection and portfolio implementation

Based on the identified material ESG Factors and the ESG-adjusted security analysis, the Investment Manager constructed a portfolio in accordance with the Subfund's investment process and principles. The ESG-adjusted security analysis combined with portfolio construction considerations has been used to determine appropriate portfolio weights that reflected the ESG-adjusted risk/return profile of the analyzed securities.

The research process might make use of dedicated ESG questionnaires with potential follow-up meetings with investee companies in case incomplete data is available from third-party ESG data providers.

- Portfolio monitoring

The Investment Manager monitored the ESG Factors periodically to detect significant changes in the ESG Factors of the underlying securities. They regularly reassessed the portfolio, taking into consideration financial and ESG metrics, and consequently decided whether to increase or decrease positions in the portfolio.

- Engagement

CSAM engaged with investee companies with the aim of increasing its impact on sustainability issues. Selected companies that were able and willing to take action were subject to engagement and CSAM sought to preserve and/or enhance the value of the companies they invested in, through engagement with issuers. The Active Ownership team defined the topics and issues CSAM wanted to discuss with investee companies. The resulting engagement activities for the reference period of this SFDR annex to the annual report were defined using certain criteria and aimed at companies in which CSAM held considerable investments through its funds. More information about the engagement activities and the most current active ownership report of CSAM can be found online at: www.credit-suisse.com/esg.

- Proxy Voting

Voting rights have been exercised for investee companies which have met the criteria for Proxy Voting as explained at www.credit-suisse.com/esg

How did this financial product perform compared to the reference benchmark?

The Subfund did not use a reference benchmark for the purpose of attaining the environmental and/or social characteristics.

● *How does the reference benchmark differ from a broad market index?*

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

- *How did this financial product perform compared with the reference benchmark?*

- *How did this financial product perform compared with the broad market index?*

Not applicable.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Credit Suisse (Lux) Small Cap Switzerland Equity Fund

Legal entity identifier: 549300PVSK436FY7VK92

The Subfund is liquidated since 04.04.2024.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●● <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of ___% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input checked="" type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This Subfund promotes environmental, social and governance (ESG) characteristics (within the meaning of Art. 8 of Regulation (EU) 2019/2088).

The Management Company and the Investment Manager applied the Credit Suisse Asset Management (CSAM) Sustainable Investing Policy to this Subfund.

This Subfund promoted the following environmental and social characteristics:

Sustainability indicators measure how the environmental or social characteristics promoted by the

financial product are attained.

- to invest into companies that comply with international treaties on controversial weapons (norms-based exclusions on direct investments)
- not to invest into companies that derive more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment (values-based exclusions on direct investments)
- not to invest into companies that either derive more than 20% of their revenue from tobacco distribution or conventional weapons support systems and services (values-based exclusions on direct investments)
- not to invest into companies that either derive more than 20% of their revenues from coal (coal mining and coal-based electricity generation) and 5% of their revenues in arctic oil and gas, or 10% of their revenues from oil sands (values-based exclusions on direct investments)
- adherence to, and conducting business activities in accordance with, international norms such as the “United Nations Global Compact Principles” (UNGCP) (business-conduct exclusions on direct investments)
- contribution to good governance and sustainable practices through proxy voting and engagement with investee companies in line with CSAM’s Sustainable Investing Policy (Active Ownership)

Derivatives were not used to attain the environmental or social characteristics.

Please find further information on ESG Exclusions and Active Ownership below in the question “What actions have been taken to meet the environmental and/or social characteristics during the reference period?” and online at www.credit-suisse.com/esg.

● ***How did the sustainability indicators perform?***

The Subfund is liquidated since 04.04.2024.

● ***...and compared to previous periods?***

The table below presents data from the previous reference period (as of 31.05.2023). The data may differ compared to the previously published report as the most recently available data was taken into account, as the data provider(s) may have retroactively updated some figures. While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

Sustainability Indicator*	Portfolio	Indicator Output
CSAM ESG exclusions***	Pre- and post-trade checks are in place to detect investments that breach the ESG exclusions. Any detected breach is escalated and remedied.	This indicator reflects that the portfolio complied with the applicable ESG exclusions as described in the exclusion section of the website (during the entire reference period, CSAM adhered to ESG exclusion criteria, as stated in the CSAM Sustainable Investing Policy).

* None of the Sustainability Indicators were subject to an assurance provided by an auditor or a review by a third party.

*** Note that the amount of investments that were restricted due to the ESG exclusions depend on the investable universe of the Subfund.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The Subfund is liquidated since 04.04.2024.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The Subfund is liquidated since 04.04.2024.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

During the reference period, the PAI Indicators applied by CSAM to identify investments which qualify as SFDR Sustainable Investments in line with CS SFDR Sustainable Investment Methodology included a set of criteria and thresholds to determine if an investment passed the DNSH condition as follows:

Investments must not:

1. have a significant negative contribution to climate change. This criterion makes use of an indicator that flags the biggest emitters of greenhouse gas globally and relates to PAI 1, 2, 3 and 15.
2. be subject to norms, values and business conduct exclusions and other investment restrictions which address PAI 4, 10, 14 and 16.
3. be subject to severe ESG controversies which address PAI 7 and 10 where applicable.
4. be strongly lagging its industry peers in overall ESG performance. This criterion has been applied to cover the remainder of the PAI to the extent possible.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Sustainable Investments were aligned with the 'OECD Guidelines for Multinational Enterprises' and the 'UN Guiding Principles on Business and Human Rights'. The alignment was assessed as part of the CS ESG Exclusion framework. Companies that exhibit severe weaknesses in business conduct, particularly with regard to breaches of the 'United Nations Global Compact Principles' (UNGC) and companies placed on the watchlist, but with no immediate exclusion, were flagged not to be considered SFDR Sustainable Investments due to DNSH.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Subfund is liquidated since 04.04.2024.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 31.05.2024

The Subfund is liquidated since 04.04.2024.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● *What was the asset allocation?*

The Subfund is liquidated since 04.04.2024.

● *In which economic sectors were the investments made?*

The Subfund is liquidated since 04.04.2024.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Subfund is liquidated since 04.04.2024.

● *Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?*

Yes

In fossil gas

In nuclear energy

No

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

- *What was the share of investments made in transitional and enabling activities?*

The Subfund is liquidated since 04.04.2024.

- *How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?*

The Subfund is liquidated since 04.04.2024.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Subfund is liquidated since 04.04.2024.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

The Subfund is liquidated since 04.04.2024.

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

The Subfund is liquidated since 04.04.2024.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To attain the environmental or social characteristics promoted by this Subfund, this Subfund applied ESG Exclusions and Active Ownership.

This Subfund excluded investments in companies of the following three categories:

- Norms-based Exclusions

This Subfund excluded companies that failed to comply with international treaties on controversial weapons such as the Convention on Cluster Munitions, the Chemical Weapons Convention, the Biological Weapons Convention, the Treaty on the Non-Proliferation of Nuclear Weapons (NPT). In addition, it excluded companies that are recommended for exclusions by the Swiss Association for Responsible Investments (SVVK-ASIR) in respect to APM (anti-personnel mines), cluster munitions and nuclear weapons (outside of NPT).

- Values-based Exclusions

This Subfund excluded companies that derived more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment. It excluded companies that derived more than 20% of their revenue from tobacco distribution and conventional weapons support systems and services. In addition, a revenue limit of 20% applied to investments in coal (coal mining and coal-based electricity generation), a revenue limit of 5% applies to investments in arctic oil and gas as well as a revenue limit of 10% applies to investments in oil sands.

- Business-conduct Exclusions

Companies found to systematically violate international norms, where the breaches were particularly severe, or where management was not open to implement necessary reforms, were placed on a watch list, and may have been excluded from the Credit Suisse-wide investment universe. This process was governed by a dedicated committee that maintained the list of excluded companies and was responsible for ensuring that the list is communicated to investment teams in a timely manner.

- Engagement

CSAM engaged with investee companies with the aim of increasing its impact on sustainability issues. Selected companies that were able and willing to take action were subject to engagement and CSAM sought to preserve and/or enhance the value of the companies they invested in, through engagement with issuers. The Active Ownership team defined the topics and issues CSAM wanted to discuss with investee companies. The resulting engagement activities for the reference period of this SFDR annex to the annual report were defined using certain criteria and aimed at companies in which CSAM held considerable investments through its funds. More information about the engagement activities and the most current active ownership report of CSAM can be found online at: www.credit-suisse.com/esg.

- Proxy Voting

Voting rights have been exercised for investee companies which have met the criteria for Proxy Voting as explained at www.credit-suisse.com/esg

How did this financial product perform compared to the reference benchmark?

The Subfund did not use a reference benchmark for the purpose of attaining the environmental and/or social characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

Not applicable.

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

- *How did this financial product perform compared with the reference benchmark?*

- *How did this financial product perform compared with the broad market index?*

Not applicable.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Credit Suisse (Lux) Systematic Index Fund Balanced CHF

Legal entity identifier: 529900WN5XCO7RIPP877

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

●● <input type="checkbox"/> Yes	●● <input checked="" type="checkbox"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 14.14% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This Subfund promotes environmental, social and governance (ESG) characteristics (within the meaning of Art. 8 of Regulation (EU) 2019/2088).

This Subfund has an indirect investment policy consisting of investments in index-linked investment instruments (over 50%) and investment funds (collectively, "Target Funds"). It promoted the following environmental and social characteristics:

- 1 - ESG approach for investments in Target Funds:

- promoted for fund investments a majority of Target Funds that demonstrated an “ESG Integration”, “Sustainable Thematic”, or “Impact Investing” approach according to the proprietary classification system described in the Credit Suisse Sustainable Investment Framework.
- Met the minimum proportions for investments which are E/S aligned Investments

2 - ESG Exclusion criteria applied at the level of the Credit Suisse sponsored Target Fund applying the Credit Suisse Asset Management Sustainable Investing Policy (“CS ESG Target Funds”):

- promoted to invest into companies that comply with international treaties on controversial weapons (Norms-based Exclusions on direct investments)
- promoted not to invest into companies that derive more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment (Value-based Exclusions on direct investments)
- promoted not to invest into companies that derive more than 20% of their revenue from tobacco distribution, conventional weapons support systems or coal (coal mining and coal-based electricity generation) (Value-based Exclusions on direct investments).
- promoted adherence to, and conducting business activities in accordance with, international norms such as the “United Nations Global Compact Principles” (UNGC) (Business-conduct Exclusions on direct investments)

3 - Active Ownership for investments in CS ESG Target Funds:

- promoted contribution to sustainable practices through engagement under CSAM’s centralized engagement approach at the level of the relevant CS ESG Target Funds, in line with CSAM’s fiduciary duty (Active Ownership).

The Subfund invested into CS ESG Target Funds as well as Target Funds sponsored by a third party. For third party sponsored Target Funds for which underlying fund positions were not available to CSAM at time of production of the annual report, CSAM was not able to calculate and report the ESG metrics on a look-through basis. Affected are the calculations of the following metrics and sections: top investments of this financial product, SFDR sustainable investments, principal adverse impacts on sustainability factors, Subfund Sectoral Exposure and Subfund Exposure to Fossil Fuels Sub-Sectors. The underlying assets of the Target Fund assets where no look-through was available are not included in the calculations. Furthermore, Active Ownership activities (Engagement & Proxy Voting) and portfolio monitoring are performed in line with the respective fund sponsor frameworks, but not in line with CSAM’s sustainable investing policy. CSAM is not performing any look-through on the investments of the third party Target Funds, but considers third party ESG ratings given to the Target Fund. CSAM is using this third party ESG rating to calculate the sustainability indicator (i.e. ESG Classification of target funds) and the portion of the investments aligned with E/S characteristics.

The extent to which the environmental and/or social characteristics were met is measured by the sustainability indicators shown below. It did not use a reference benchmark for the purpose of attaining the environmental and/or social characteristics.

Please find further information on ESG Integration and Active Ownership below in the question “What actions have been taken to meet the environmental and/or social characteristics during the reference period?” and online at www.credit-suisse.com/esg.

● *How did the sustainability indicators perform?*

The table below shows the output of the Sustainability Indicators applicable to this Subfund as of 31.05.2024. While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

Sustainability Indicator*	Portfolio	Indicator Output
Target funds ESG classification	Traditional: 1.99%, Avoid harm: 15.63%, ESG Aware: 74.56%, Sustainable Thematic: 0.00%, Impact: 0.00%, No Sustainable: 4.33%, Not ratable: 2.33%, No data coverage: 1.15%	Portfolio exposure by ESG Classification of Target Funds: Traditional: 0%–100% Avoid harm: 0%–100% ESG Aware: 0%–100% Sustainable Thematic: 0%–100% Impact: 0%–100% No sustainable: 0%–100%

* None of the Sustainability Indicators were subject to an assurance provided by an auditor or a review by a third party.

● *...and compared to previous periods?*

The table below presents data from the previous reference period (as of 31.05.2023). The data may differ compared to the previously published report as the most recently available data was taken into account, as the data provider(s) may have retroactively updated some figures. While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

Sustainability Indicator*	Portfolio	Indicator Output
Target funds ESG classification	Traditional: 1.29% Avoid harm: 22.05% ESG Aware: 70.76% Sustainable Thematic: 0.00% Impact: 0.00% No sustainable: 0.00% Not ratable: 0.76% No data coverage: 5.14%	Portfolio exposure by ESG Classification of Target Funds: Traditional: 0%–100% Avoid harm: 0%–100% ESG Aware: 0%–100% Sustainable Thematic: 0%–100% Impact: 0%–100% No sustainable: 0%–100%

* None of the Sustainability Indicators were subject to an assurance provided by an auditor or a review by a third party.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Although this Subfund did not target any minimum proportion of sustainable investment, at the end of the reference period, the sustainable investments contributed to the following Environmental and Social objectives:

- Investments that generated at least 50% of their revenues from products and services that contributed to an environmental objective (e.g. alternative energy, carbon & energy efficiency, green building, sustainable water, pollution prevention, sustainable agriculture etc.)
- Investments that generated at least 50% of their revenues from products and services that contribute to a social objective (e.g. nutrition, disease treatments, sanitation, affordable real estate, SME finance, education, connectivity etc.)
- Investments in securities whose proceeds pursue a predefined environmental or social objective (e.g. green bonds)
- Investments that have an approved commitment to science-based emission targets and an average reduction in carbon emissions intensity of 7% over the last three years
- Investments that cumulatively generated at least 50% of their revenues from products and services that contributed to an environmental or social objective (the investments were allocated to the respective objective that contributed the higher share of revenue)

The above criteria were assessed using a quantitative methodology. If there had not been an output from the quantitative assessment (e.g. in the case of missing quantitative ESG data), investments were submitted for confirmation in a case-by-case approach based on a proprietary assessment of the criteria. A central Credit Suisse committee approved such submissions.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

This Subfund did not target any minimum proportion of sustainable investments. CSAM considered various indicators linked to principal adverse impacts on sustainability factors (PAI Indicators) and further indicators from its exclusion framework to assess whether sustainable investments caused significant harm to any environmental or social investment objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

During the reference period, the PAI Indicators applied by CSAM to identify investments which qualify as SFDR Sustainable Investments in line with CS SFDR Sustainable Investment Methodology included a set of criteria and thresholds to determine if an investment passed the DNSH condition as follows:

Investments must not:

1. have a significant negative contribution to climate change. This criterion makes use of an indicator that flags the biggest emitters of greenhouse gas globally and relates to PAI 1, 2, 3 and 15.
2. be subject to norms, values and business conduct exclusions and other investment restrictions which address PAI 4, 10, 14 and 16.
3. be subject to severe ESG controversies which address PAI 7 and 10 where applicable.
4. be strongly lagging its industry peers in overall ESG performance. This criterion has been applied to cover the remainder of the PAI to the extent possible.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Sustainable Investments were aligned with the 'OECD Guidelines for Multinational Enterprises' and the 'UN Guiding Principles on Business and Human Rights'. The alignment was assessed as part of the CS ESG Exclusion framework. Companies that exhibit severe weaknesses in business conduct, particularly with regard to breaches of the 'United Nations Global Compact Principles' (UNGC) and companies placed on the watchlist, but with no immediate exclusion, were flagged not to be considered SFDR Sustainable Investments due to DNSH.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

This Subfund did not consider principal adverse impacts on sustainability factors as defined by Regulation (EU) 2019/2088 and its Commission Delegated Regulation (EU) 2022/1288.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 31.05.2024

Largest investments *	NACE Sector code	% Assets	Country

* Look-through enabled where possible, excl. cash and derivatives. Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which were neither aligned with the environmental or social characteristics, nor qualified as sustainable investments.

Please refer to the section "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?" for further information.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that did not qualify as sustainable investments.

The proportion of investments used to meet the environmental or social characteristics promoted by this Subfund (category #1 above) was 90.19% of its total net assets.

Within this category the Subfund held a proportion of 14.14% of its total net assets in sustainable investments (category #1A above) and a proportion of 76.05% of its total net assets in other E/S characteristics (category #1B above).

The proportion of investments held by the Subfund in "Other" (category #2 above) was 9.81% of its total net assets.

The data is valid as of 31.05.2024. It does not represent an average for the reference period.

● In which economic sectors were the investments made?

Subfund Sectoral Exposure

NACE Sector Code *	Portfolio Exposure **
B. Mining and quarrying	0.63%
C. Manufacturing	20.29%
D. Electricity, gas, steam and air conditioning supply	1.27%
E. Water supply; sewerage, waste management and remediation activities	0.08%
F. Construction	0.61%
G. Wholesale and retail trade; repair of motor vehicles and motorcycles	2.92%
H. Transportation and storage	0.94%
I. Accommodation and food service activities	0.29%
J. Information and communication	8.10%
K. Financial and insurance activities	13.25%
L. Real estate activities	3.18%
M. Professional, scientific and technical activities	0.71%
N. Administrative and support service activities	0.86%

O. Public administration and defense; compulsory social security	12.37%
P. Education	0.00%
Q. Human health and social work activities	0.43%
R. Arts, entertainment and recreation	0.07%
S. Other service activities	0.04%
Others	33.96%

* Please note that the NACE sector allocation is not used in the Subfund's investment strategy. It is provided for disclosure purposes only. For example, the Subfund's investment strategy makes use of company's revenue exposure in accordance with CSAM's ESG Exclusion framework and does not exclude companies based on their NACE sector allocation.

** Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period. The "Others" category can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

Subfund Exposure to Fossil Fuels Sub-Sectors

NACE Sector Code *	NACE name	Portfolio Exposure **
B5.1.0	Mining of hard coal	0.00%
B5.2.0	Mining of lignite	0.00%
B6.1.0	Extraction of crude petroleum	0.18%

G46.7.1	Wholesale of solid, liquid and gaseous fuels and related products	0.10%

* Please note that the NACE sector allocation is not used in the Subfund's investment strategy. It is provided for disclosure purposes only. For example, the Subfund's investment strategy makes use of company's revenue exposure in accordance with CSAM's ESG Exclusion framework and does not exclude companies based on their NACE sector allocation.

** Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contri-

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

As of 31.05.2024, the Subfund reports 0.00% exposure to sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

bution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The Subfund's reported EU Taxonomy alignment was not subject to assurance or review by a third party.

● **What was the share of investments made in transitional and enabling activities?**

Of the 0.00% of sustainable investments with an environmental objective aligned with the EU Taxonomy as of 31.05.2024, 0.00% were made in transitional activities and 0.00% in enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During the previous reference period the percentage of investments that were aligned with the EU Taxonomy were 0.00% as of 31.05.2023.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As of 31.05.2024, 12.56% of the Subfund's investments were made into sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

As of 31.05.2024, 1.58% of the Subfund's investments were made into socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

As of 31.05.2024, 9.81 % of the Subfund's investments were made into "other".

Investments such as cash, derivatives and structured products may have fallen under "other" since such instruments did not contribute to the E/S characteristics of this Subfund. More information about the portfolio exposure to such investments can be found in the financial section of this annual report. Such investments did not have minimum environmental or social safeguards. They may have been used as efficient portfolio management tools, for cash management, for hedging purposes, or as an additional source of return.

Additionally, investments may have fallen under "other" if insufficient ESG-related information was available. This applied in particular to asset classes for which ESG Factors were insufficiently defined or insufficient ESG related information was available. Where possible, minimum environmental or social safeguards have been applied to these underlying securities by ensuring that CSAM ESG exclusions were adhered to.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To attain the environmental or social characteristics promoted by this Subfund, this Subfund applied ESG Exclusions, ESG Integration and Active Ownership.

For CS ESG Target Funds, this Subfund excluded investments in companies of the following three categories:

- Norms-based Exclusions

This Subfund excluded companies that failed to comply with international treaties on controversial weapons such as the Convention on Cluster Munitions, the Chemical Weapons Convention, the Biological Weapons Convention, the Treaty on the Non-Proliferation of Nuclear Weapons (NPT). In addition, it excluded companies that are recommended for exclusions by the Swiss Association for Responsible Investments (SVVK-ASIR) in respect to APM (anti-personnel mines), cluster munitions and nuclear weapons (outside of NPT).

- Values-based Exclusions

This Subfund excluded companies that derived more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment. It excluded companies that derived more than 20% of their revenue from tobacco distribution and conventional weapons support systems and services. In addition, a revenue limit of 20% applied to investments in coal (coal mining and coal-based electricity generation), a revenue limit of 5% applies to investments in arctic oil and gas as well as a revenue limit of 10% applies to investments in oil sands.

- Business-conduct Exclusions

Companies found to systematically violate international norms, where the breaches were particularly severe, or where management was not open to implement necessary reforms, were placed on a watch list, and may have been excluded

from the Credit Suisse-wide investment universe. This process was governed by a dedicated committee that maintained the list of excluded companies and was responsible for ensuring that the list is communicated to investment teams in a timely manner.

For CS ESG Target Funds, this Subfund conducted the following Active Ownership activities:

- Engagement

CSAM engaged with investee companies with the aim of increasing its impact on sustainability issues. Selected companies that were able and willing to take action were subject to engagement and CSAM sought to preserve and/or enhance the value of the companies they invested in, through engagement with issuers. The Active Ownership team defined the topics and issues CSAM wanted to discuss with investee companies. The resulting engagement activities for the reference period of this SFDR annex to the annual report were defined using certain criteria and aimed at companies in which CSAM held considerable investments through its funds. More information about the engagement activities and the most current active ownership report of CSAM can be found online at: www.credit-suisse.com/esg.

- Proxy Voting

Voting rights have been exercised for investee companies which have met the criteria for Proxy Voting as explained at www.credit-suisse.com/esg

For investments in third party Target Funds and CS ESG Target Funds, ESG Factors were integrated into the investment process in the following four main steps:

- Identification of material ESG Factors

The Investment Manager used materiality frameworks to identify those ESG Factors that are relevant to the given multi asset investment strategy. Materiality frameworks are concepts that help to identify sustainability related issues and opportunities that are likely to affect the financial condition or operating performance of potential investee companies within an industry. Materiality of ESG Factors included in the investment process may change over time.

- ESG security analysis

Based on the identified material ESG Factors, investment managers made use of ESG ratings from third-party service providers and combined them with CSAM's proprietary analyses and information. These included, e.g. ESG related news, ESG ratings and scores, ESG-related controversies, and ESG trends.

- Security selection and portfolio implementation

The Investment Manager aimed to select target funds that demonstrated the "ESG Integration", "Sustainable Thematic", or "Impact Investing" approach according to the proprietary classification system described in the Credit Suisse Sustainable Investment Framework.

- Portfolio monitoring

Investment managers monitored the ESG Factors periodically to detect significant changes in the ESG Factors of target funds. They regularly reassessed the portfolio, taking into consideration financial and ESG metrics, and consequently decided whether to readjust the portfolio.

How did this financial product perform compared to the reference benchmark?

The Subfund did not use a reference benchmark for the purpose of attaining the environmental and/or social characteristics.

- *How does the reference benchmark differ from a broad market index?*

Not applicable.

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● *How did this financial product perform compared with the reference benchmark?*

● *How did this financial product perform compared with the broad market index?*

Not applicable.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Credit Suisse (Lux) Systematic Index Fund Growth CHF

Legal entity identifier: 5299006YX9UBOXXFQY69

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="checkbox"/> Yes	<input type="checkbox"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 19.83% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This Subfund promotes environmental, social and governance (ESG) characteristics (within the meaning of Art. 8 of Regulation (EU) 2019/2088).

This Subfund has an indirect investment policy consisting of investments in index-linked investment instruments (over 50%) and investment funds (collectively, "Target Funds"). It promoted the following environmental and social characteristics:

- 1 - ESG approach for investments in Target Funds:

- promoted for fund investments a majority of Target Funds that demonstrated an “ESG Integration”, “Sustainable Thematic”, or “Impact Investing” approach according to the proprietary classification system described in the Credit Suisse Sustainable Investment Framework.
- Met the minimum proportions for investments which are E/S aligned Investments

2 - ESG Exclusion criteria applied at the level of the Credit Suisse sponsored Target Fund applying the Credit Suisse Asset Management Sustainable Investing Policy (“CS ESG Target Funds”):

- promoted to invest into companies that comply with international treaties on controversial weapons (Norms-based Exclusions on direct investments)
- promoted not to invest into companies that derive more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment (Value-based Exclusions on direct investments)
- promoted not to invest into companies that derive more than 20% of their revenue from tobacco distribution, conventional weapons support systems or coal (coal mining and coal-based electricity generation) (Value-based Exclusions on direct investments).
- promoted adherence to, and conducting business activities in accordance with, international norms such as the “United Nations Global Compact Principles” (UNGC) (Business-conduct Exclusions on direct investments)

3 - Active Ownership for investments in CS ESG Target Funds:

- promoted contribution to sustainable practices through engagement under CSAM’s centralized engagement approach at the level of the relevant CS ESG Target Funds, in line with CSAM’s fiduciary duty (Active Ownership).

The Subfund invested into CS ESG Target Funds as well as Target Funds sponsored by a third party. For third party sponsored Target Funds for which underlying fund positions were not available to CSAM at time of production of the annual report, CSAM was not able to calculate and report the ESG metrics on a look-through basis. Affected are the calculations of the following metrics and sections: top investments of this financial product, SFDR sustainable investments, principal adverse impacts on sustainability factors, Subfund Sectoral Exposure and Subfund Exposure to Fossil Fuels Sub-Sectors. The underlying assets of the Target Fund assets where no look-through was available are not included in the calculations. Furthermore, Active Ownership activities (Engagement & Proxy Voting) and portfolio monitoring are performed in line with the respective fund sponsor frameworks, but not in line with CSAM’s sustainable investing policy. CSAM is not performing any look-through on the investments of the third party Target Funds, but considers third party ESG ratings given to the Target Fund. CSAM is using this third party ESG rating to calculate the sustainability indicator (i.e. ESG Classification of target funds) and the portion of the investments aligned with E/S characteristics.

The extent to which the environmental and/or social characteristics were met is measured by the sustainability indicators shown below. It did not use a reference benchmark for the purpose of attaining the environmental and/or social characteristics.

Please find further information on ESG Integration and Active Ownership below in the question “What actions have been taken to meet the environmental and/or social characteristics during the reference period?” and online at www.credit-suisse.com/esg.

● *How did the sustainability indicators perform?*

The table below shows the output of the Sustainability Indicators applicable to this Subfund as of 31.05.2024. While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

Sustainability Indicator*	Portfolio	Indicator Output
Target funds ESG classification	Traditional: 2.75%, Avoid harm: 4.27%, ESG Aware: 85.04%, Sustainable Thematic: 0.00%, Impact: 0.00%, No Sustainable: 4.27%, Not ratable: 2.60%, No data coverage: 1.08%	Portfolio exposure by ESG Classification of Target Funds: Traditional: 0%–100% Avoid harm: 0%–100% ESG Aware: 0%–100% Sustainable Thematic: 0%–100% Impact: 0%–100% No sustainable: 0%–100%

* None of the Sustainability Indicators were subject to an assurance provided by an auditor or a review by a third party.

● *...and compared to previous periods?*

The table below presents data from the previous reference period (as of 31.05.2023). The data may differ compared to the previously published report as the most recently available data was taken into account, as the data provider(s) may have retroactively updated some figures. While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

Sustainability Indicator*	Portfolio	Indicator Output
Target funds ESG classification	Traditional: 1.80% Avoid harm: 6.60% ESG Aware: 84.10% Sustainable Thematic: 0.00% Impact: 0.00% No sustainable: 0.00% Not ratable: 2.33% No data coverage: 5.17%	Portfolio exposure by ESG Classification of Target Funds: Traditional: 0%–100% Avoid harm: 0%–100% ESG Aware: 0%–100% Sustainable Thematic: 0%–100% Impact: 0%–100% No sustainable: 0%–100%

* None of the Sustainability Indicators were subject to an assurance provided by an auditor or a review by a third party.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Although this Subfund did not target any minimum proportion of sustainable investment, at the end of the reference period, the sustainable investments contributed to the following Environmental and Social objectives:

- Investments that generated at least 50% of their revenues from products and services that contributed to an environmental objective (e.g. alternative energy, carbon & energy efficiency, green building, sustainable water, pollution prevention, sustainable agriculture etc.)
- Investments that generated at least 50% of their revenues from products and services that contribute to a social objective (e.g. nutrition, disease treatments, sanitation, affordable real estate, SME finance, education, connectivity etc.)
- Investments in securities whose proceeds pursue a predefined environmental or social objective (e.g. green bonds)
- Investments that have an approved commitment to science-based emission targets and an average reduction in carbon emissions intensity of 7% over the last three years
- Investments that cumulatively generated at least 50% of their revenues from products and services that contributed to an environmental or social objective (the investments were allocated to the respective objective that contributed the higher share of revenue)

The above criteria were assessed using a quantitative methodology. If there had not been an output from the quantitative assessment (e.g. in the case of missing quantitative ESG data), investments were submitted for confirmation in a case-by-case approach based on a proprietary assessment of the criteria. A central Credit Suisse committee approved such submissions.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

This Subfund did not target any minimum proportion of sustainable investments. CSAM considered various indicators linked to principal adverse impacts on sustainability factors (PAI Indicators) and further indicators from its exclusion framework to assess whether sustainable investments caused significant harm to any environmental or social investment objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

During the reference period, the PAI Indicators applied by CSAM to identify investments which qualify as SFDR Sustainable Investments in line with CS SFDR Sustainable Investment Methodology included a set of criteria and thresholds to determine if an investment passed the DNSH condition as follows:

Investments must not:

1. have a significant negative contribution to climate change. This criterion makes use of an indicator that flags the biggest emitters of greenhouse gas globally and relates to PAI 1, 2, 3 and 15.
2. be subject to norms, values and business conduct exclusions and other investment restrictions which address PAI 4, 10, 14 and 16.
3. be subject to severe ESG controversies which address PAI 7 and 10 where applicable.
4. be strongly lagging its industry peers in overall ESG performance. This criterion has been applied to cover the remainder of the PAI to the extent possible.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Sustainable Investments were aligned with the 'OECD Guidelines for Multinational Enterprises' and the 'UN Guiding Principles on Business and Human Rights'. The alignment was assessed as part of the CS ESG Exclusion framework. Companies that exhibit severe weaknesses in business conduct, particularly with regard to breaches of the 'United Nations Global Compact Principles' (UNGC) and companies placed on the watchlist, but with no immediate exclusion, were flagged not to be considered SFDR Sustainable Investments due to DNSH.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

This Subfund did not consider principal adverse impacts on sustainability factors as defined by Regulation (EU) 2019/2088 and its Commission Delegated Regulation (EU) 2022/1288.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 31.05.2024

Largest investments *	NACE Sector code	% Assets	Country
UBS LFS MSCI SWITZ IMI SOCIAL RESP	Others	15.88	Switzerland
UBS CMCI COMPOSITE SF UCITS ETF US	Others	4.27	Global

* Look-through enabled where possible, excl. cash and derivatives. Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which were neither aligned with the environmental or social characteristics, nor qualified as sustainable investments.

Please refer to the section "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?" for further information.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that did not qualify as sustainable investments.

The proportion of investments used to meet the environmental or social characteristics promoted by this Subfund (category #1 above) was 89.31% of its total net assets.

Within this category the Subfund held a proportion of 19.83% of its total net assets in sustainable investments (category #1A above) and a proportion of 69.47% of its total net assets in other E/S characteristics (category #1B above).

The proportion of investments held by the Subfund in "Other" (category #2 above) was 10.69% of its total net assets.

The data is valid as of 31.05.2024. It does not represent an average for the reference period.

● In which economic sectors were the investments made?

Subfund Sectoral Exposure

NACE Sector Code *	Portfolio Exposure **
B. Mining and quarrying	0.80%
C. Manufacturing	27.68%
D. Electricity, gas, steam and air conditioning supply	1.68%
E. Water supply; sewerage, waste management and remediation activities	0.08%
F. Construction	0.78%
G. Wholesale and retail trade; repair of motor vehicles and motorcycles	3.76%
H. Transportation and storage	1.02%
I. Accommodation and food service activities	0.33%
J. Information and communication	10.62%
K. Financial and insurance activities	14.86%
L. Real estate activities	3.17%
M. Professional, scientific and technical activities	0.90%
N. Administrative and support service activities	1.04%

O. Public administration and defense; compulsory social security	3.48%
P. Education	0.00%
Q. Human health and social work activities	0.45%
R. Arts, entertainment and recreation	0.08%
S. Other service activities	0.04%
Others	29.24%

* Please note that the NACE sector allocation is not used in the Subfund's investment strategy. It is provided for disclosure purposes only. For example, the Subfund's investment strategy makes use of company's revenue exposure in accordance with CSAM's ESG Exclusion framework and does not exclude companies based on their NACE sector allocation.

** Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period. The "Others" category can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

Subfund Exposure to Fossil Fuels Sub-Sectors

NACE Sector Code *	NACE name	Portfolio Exposure **
B5.1.0	Mining of hard coal	0.00%
B5.2.0	Mining of lignite	0.00%
B6.1.0	Extraction of crude petroleum	0.24%
B6.2.0	Extraction of natural gas	0.01%
B9.1.0	Support activities for petroleum and natural gas extraction	0.13%
C19.2.0	Manufacture of refined petroleum products	2.00%
D35.2.1	Manufacture of gas	0.00%
D35.2.2	Distribution of gaseous fuels through mains	0.12%
D35.2.3	Trade of gas through mains	0.00%
G46.7.1	Wholesale of solid, liquid and gaseous fuels and related products	0.12%

* Please note that the NACE sector allocation is not used in the Subfund's investment strategy. It is provided for disclosure purposes only. For example, the Subfund's investment strategy makes use of company's revenue exposure in accordance with CSAM's ESG Exclusion framework and does not exclude companies based on their NACE sector allocation.

** Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contri-

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

As of 31.05.2024, the Subfund reports 0.00% exposure to sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

bution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The Subfund's reported EU Taxonomy alignment was not subject to assurance or review by a third party.

● **What was the share of investments made in transitional and enabling activities?**

Of the 0.00% of sustainable investments with an environmental objective aligned with the EU Taxonomy as of 31.05.2024, 0.00% were made in transitional activities and 0.00% in enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During the previous reference period the percentage of investments that were aligned with the EU Taxonomy were 0.00% as of 31.05.2023.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As of 31.05.2024, 17.57% of the Subfund's investments were made into sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

As of 31.05.2024, 2.26% of the Subfund's investments were made into socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

As of 31.05.2024, 10.69% of the Subfund's investments were made into "other".

Investments such as cash, derivatives and structured products may have fallen under "other" since such instruments did not contribute to the E/S characteristics of this Subfund. More information about the portfolio exposure to such investments can be found in the financial section of this annual report. Such investments did not have minimum environmental or social safeguards. They may have been used as efficient portfolio management tools, for cash management, for hedging purposes, or as an additional source of return.

Additionally, investments may have fallen under "other" if insufficient ESG-related information was available. This applied in particular to asset classes for which ESG Factors were insufficiently defined or insufficient ESG related information was available. Where possible, minimum environmental or social safeguards have been applied to these underlying securities by ensuring that CSAM ESG exclusions were adhered to.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To attain the environmental or social characteristics promoted by this Subfund, this Subfund applied ESG Exclusions, ESG Integration and Active Ownership.

For CS ESG Target Funds, this Subfund excluded investments in companies of the following three categories:

- Norms-based Exclusions

This Subfund excluded companies that failed to comply with international treaties on controversial weapons such as the Convention on Cluster Munitions, the Chemical Weapons Convention, the Biological Weapons Convention, the Treaty on the Non-Proliferation of Nuclear Weapons (NPT). In addition, it excluded companies that are recommended for exclusions by the Swiss Association for Responsible Investments (SVVK-ASIR) in respect to APM (anti-personnel mines), cluster munitions and nuclear weapons (outside of NPT).

- Values-based Exclusions

This Subfund excluded companies that derived more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment. It excluded companies that derived more than 20% of their revenue from tobacco distribution and conventional weapons support systems and services. In addition, a revenue limit of 20% applied to investments in coal (coal mining and coal-based electricity generation), a revenue limit of 5% applies to investments in arctic oil and gas as well as a revenue limit of 10% applies to investments in oil sands.

- Business-conduct Exclusions

Companies found to systematically violate international norms, where the breaches were particularly severe, or where management was not open to implement necessary reforms, were placed on a watch list, and may have been excluded

from the Credit Suisse-wide investment universe. This process was governed by a dedicated committee that maintained the list of excluded companies and was responsible for ensuring that the list is communicated to investment teams in a timely manner.

For CS ESG Target Funds, this Subfund conducted the following Active Ownership activities:

- Engagement

CSAM engaged with investee companies with the aim of increasing its impact on sustainability issues. Selected companies that were able and willing to take action were subject to engagement and CSAM sought to preserve and/or enhance the value of the companies they invested in, through engagement with issuers. The Active Ownership team defined the topics and issues CSAM wanted to discuss with investee companies. The resulting engagement activities for the reference period of this SFDR annex to the annual report were defined using certain criteria and aimed at companies in which CSAM held considerable investments through its funds. More information about the engagement activities and the most current active ownership report of CSAM can be found online at: www.credit-suisse.com/esg.

- Proxy Voting

Voting rights have been exercised for investee companies which have met the criteria for Proxy Voting as explained at www.credit-suisse.com/esg

For investments in third party Target Funds and CS ESG Target Funds, ESG Factors were integrated into the investment process in the following four main steps:

- Identification of material ESG Factors

The Investment Manager used materiality frameworks to identify those ESG Factors that are relevant to the given multi asset investment strategy. Materiality frameworks are concepts that help to identify sustainability related issues and opportunities that are likely to affect the financial condition or operating performance of potential investee companies within an industry. Materiality of ESG Factors included in the investment process may change over time.

- ESG security analysis

Based on the identified material ESG Factors, investment managers made use of ESG ratings from third-party service providers and combined them with CSAM's proprietary analyses and information. These included, e.g. ESG related news, ESG ratings and scores, ESG-related controversies, and ESG trends.

- Security selection and portfolio implementation

The Investment Manager aimed to select target funds that demonstrated the "ESG Integration", "Sustainable Thematic", or "Impact Investing" approach according to the proprietary classification system described in the Credit Suisse Sustainable Investment Framework.

- Portfolio monitoring

Investment managers monitored the ESG Factors periodically to detect significant changes in the ESG Factors of target funds. They regularly reassessed the portfolio, taking into consideration financial and ESG metrics, and consequently decided whether to readjust the portfolio.

How did this financial product perform compared to the reference benchmark?

The Subfund did not use a reference benchmark for the purpose of attaining the environmental and/or social characteristics.

- *How does the reference benchmark differ from a broad market index?*

Not applicable.

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● *How did this financial product perform compared with the reference benchmark?*

● *How did this financial product perform compared with the broad market index?*

Not applicable.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Credit Suisse (Lux) Systematic Index Fund Yield CHF

Legal entity identifier: 529900VZB3DOZO1UN459

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input type="checkbox"/> Yes	<input type="checkbox"/> <input checked="" type="radio"/> No
<input type="checkbox"/> It made sustainable investments with an environmental objective : ___% <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy 	<input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 9.19% of sustainable investments <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/> It made sustainable investments with a social objective : ___%	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This Subfund promotes environmental, social and governance (ESG) characteristics (within the meaning of Art. 8 of Regulation (EU) 2019/2088).

This Subfund has an indirect investment policy consisting of investments in index-linked investment instruments (over 50%) and investment funds (collectively, "Target Funds"). It promoted the following environmental and social characteristics:

- 1 - ESG approach for investments in Target Funds:

- promoted for fund investments a majority of Target Funds that demonstrated an “ESG Integration”, “Sustainable Thematic”, or “Impact Investing” approach according to the proprietary classification system described in the Credit Suisse Sustainable Investment Framework.
- Met the minimum proportions for investments which are E/S aligned Investments

2 - ESG Exclusion criteria applied at the level of the Credit Suisse sponsored Target Fund applying the Credit Suisse Asset Management Sustainable Investing Policy (“CS ESG Target Funds”):

- promoted to invest into companies that comply with international treaties on controversial weapons (Norms-based Exclusions on direct investments)
- promoted not to invest into companies that derive more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment (Value-based Exclusions on direct investments)
- promoted not to invest into companies that derive more than 20% of their revenue from tobacco distribution, conventional weapons support systems or coal (coal mining and coal-based electricity generation) (Value-based Exclusions on direct investments).
- promoted adherence to, and conducting business activities in accordance with, international norms such as the “United Nations Global Compact Principles” (UNGC) (Business-conduct Exclusions on direct investments)

3 - Active Ownership for investments in CS ESG Target Funds:

- promoted contribution to sustainable practices through engagement under CSAM’s centralized engagement approach at the level of the relevant CS ESG Target Funds, in line with CSAM’s fiduciary duty (Active Ownership).

The Subfund invested into CS ESG Target Funds as well as Target Funds sponsored by a third party. For third party sponsored Target Funds for which underlying fund positions were not available to CSAM at time of production of the annual report, CSAM was not able to calculate and report the ESG metrics on a look-through basis. Affected are the calculations of the following metrics and sections: top investments of this financial product, SFDR sustainable investments, principal adverse impacts on sustainability factors, Subfund Sectoral Exposure and Subfund Exposure to Fossil Fuels Sub-Sectors. The underlying assets of the Target Fund assets where no look-through was available are not included in the calculations. Furthermore, Active Ownership activities (Engagement & Proxy Voting) and portfolio monitoring are performed in line with the respective fund sponsor frameworks, but not in line with CSAM’s sustainable investing policy. CSAM is not performing any look-through on the investments of the third party Target Funds, but considers third party ESG ratings given to the Target Fund. CSAM is using this third party ESG rating to calculate the sustainability indicator (i.e. ESG Classification of target funds) and the portion of the investments aligned with E/S characteristics.

The extent to which the environmental and/or social characteristics were met is measured by the sustainability indicators shown below. It did not use a reference benchmark for the purpose of attaining the environmental and/or social characteristics.

Please find further information on ESG Integration and Active Ownership below in the question “What actions have been taken to meet the environmental and/or social characteristics during the reference period?” and online at www.credit-suisse.com/esg.

● *How did the sustainability indicators perform?*

The table below shows the output of the Sustainability Indicators applicable to this Subfund as of 31.05.2024. While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

Sustainability Indicator*	Portfolio	Indicator Output
Target funds ESG classification	Traditional: 1.19%, Avoid harm: 25.95%, ESG Aware: 66.32%, Sustainable Thematic: 0.00%, Impact: 0.00%, No Sustainable: 4.29%, Not ratable: 1.01%, No data coverage: 1.24%	Portfolio exposure by ESG Classification of Target Funds: Traditional: 0%–100% Avoid harm: 0%–100% ESG Aware: 0%–100% Sustainable Thematic: 0%–100% Impact: 0%–100% No sustainable: 0%–100%

* None of the Sustainability Indicators were subject to an assurance provided by an auditor or a review by a third party.

● *...and compared to previous periods?*

The table below presents data from the previous reference period (as of 31.05.2023). The data may differ compared to the previously published report as the most recently available data was taken into account, as the data provider(s) may have retroactively updated some figures. While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

Sustainability Indicator*	Portfolio	Indicator Output
Target funds ESG classification	Traditional: 0.77% Avoid harm: 35.44% ESG Aware: 58.29% Sustainable Thematic: 0.00% Impact: 0.00% No sustainable: 0.00% Not ratable: 0.40% No data coverage: 5.10%	Portfolio exposure by ESG Classification of Target Funds: Traditional: 0%–100% Avoid harm: 0%–100% ESG Aware: 0%–100% Sustainable Thematic: 0%–100% Impact: 0%–100% No sustainable: 0%–100%

* None of the Sustainability Indicators were subject to an assurance provided by an auditor or a review by a third party.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

Although this Subfund did not target any minimum proportion of sustainable investment, at the end of the reference period, the sustainable investments contributed to the following Environmental and Social objectives:

- Investments that generated at least 50% of their revenues from products and services that contributed to an environmental objective (e.g. alternative energy, carbon & energy efficiency, green building, sustainable water, pollution prevention, sustainable agriculture etc.)
- Investments that generated at least 50% of their revenues from products and services that contribute to a social objective (e.g. nutrition, disease treatments, sanitation, affordable real estate, SME finance, education, connectivity etc.)
- Investments in securities whose proceeds pursue a predefined environmental or social objective (e.g. green bonds)
- Investments that have an approved commitment to science-based emission targets and an average reduction in carbon emissions intensity of 7% over the last three years
- Investments that cumulatively generated at least 50% of their revenues from products and services that contributed to an environmental or social objective (the investments were allocated to the respective objective that contributed the higher share of revenue)

The above criteria were assessed using a quantitative methodology. If there had not been an output from the quantitative assessment (e.g. in the case of missing quantitative ESG data), investments were submitted for confirmation in a case-by-case approach based on a proprietary assessment of the criteria. A central Credit Suisse committee approved such submissions.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

This Subfund did not target any minimum proportion of sustainable investments. CSAM considered various indicators linked to principal adverse impacts on sustainability factors (PAI Indicators) and further indicators from its exclusion framework to assess whether sustainable investments caused significant harm to any environmental or social investment objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

During the reference period, the PAI Indicators applied by CSAM to identify investments which qualify as SFDR Sustainable Investments in line with CS SFDR Sustainable Investment Methodology included a set of criteria and thresholds to determine if an investment passed the DNSH condition as follows:

Investments must not:

1. have a significant negative contribution to climate change. This criterion makes use of an indicator that flags the biggest emitters of greenhouse gas globally and relates to PAI 1, 2, 3 and 15.
2. be subject to norms, values and business conduct exclusions and other investment restrictions which address PAI 4, 10, 14 and 16.
3. be subject to severe ESG controversies which address PAI 7 and 10 where applicable.
4. be strongly lagging its industry peers in overall ESG performance. This criterion has been applied to cover the remainder of the PAI to the extent possible.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Sustainable Investments were aligned with the 'OECD Guidelines for Multinational Enterprises' and the 'UN Guiding Principles on Business and Human Rights'. The alignment was assessed as part of the CS ESG Exclusion framework. Companies that exhibit severe weaknesses in business conduct, particularly with regard to breaches of the 'United Nations Global Compact Principles' (UNGC) and companies placed on the watchlist, but with no immediate exclusion, were flagged not to be considered SFDR Sustainable Investments due to DNSH.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

This Subfund did not consider principal adverse impacts on sustainability factors as defined by Regulation (EU) 2019/2088 and its Commission Delegated Regulation (EU) 2022/1288.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: 31.05.2024

Largest investments *	NACE Sector code	% Assets	Country
UBS LFS SBI FOREIGNAAA-BBB1-5ESG	Others	8.21	Global

* Look-through enabled where possible, excl. cash and derivatives. Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which were neither aligned with the environmental or social characteristics, nor qualified as sustainable investments.

Please refer to the section "What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?" for further information.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that did not qualify as sustainable investments.

The proportion of investments used to meet the environmental or social characteristics promoted by this Subfund (category #1 above) was 92.27% of its total net assets.

Within this category the Subfund held a proportion of 9.19% of its total net assets in sustainable investments (category #1A above) and a proportion of 83.08% of its total net assets in other E/S characteristics (category #1B above).

The proportion of investments held by the Subfund in "Other" (category #2 above) was 7.73% of its total net assets.

The data is valid as of 31.05.2024. It does not represent an average for the reference period.

● In which economic sectors were the investments made?

Subfund Sectoral Exposure

NACE Sector Code *	Portfolio Exposure **
B. Mining and quarrying	0.51%
C. Manufacturing	13.94%
D. Electricity, gas, steam and air conditioning supply	0.91%
E. Water supply; sewerage, waste management and remediation activities	0.09%
F. Construction	0.47%
G. Wholesale and retail trade; repair of motor vehicles and motorcycles	2.26%
H. Transportation and storage	0.88%
I. Accommodation and food service activities	0.26%
J. Information and communication	5.99%
K. Financial and insurance activities	11.95%
L. Real estate activities	3.13%
M. Professional, scientific and technical activities	0.54%
N. Administrative and support service activities	0.75%

O. Public administration and defense; compulsory social security	20.63%
P. Education	0.00%
Q. Human health and social work activities	0.42%
R. Arts, entertainment and recreation	0.07%
S. Other service activities	0.04%
Others	37.15%

* Please note that the NACE sector allocation is not used in the Subfund's investment strategy. It is provided for disclosure purposes only. For example, the Subfund's investment strategy makes use of company's revenue exposure in accordance with CSAM's ESG Exclusion framework and does not exclude companies based on their NACE sector allocation.

** Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period. The "Others" category can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

Subfund Exposure to Fossil Fuels Sub-Sectors

NACE Sector Code *	NACE name	Portfolio Exposure **
B5.1.0	Mining of hard coal	0.00%
B5.2.0	Mining of lignite	0.00%
B6.1.0	Extraction of crude petroleum	0.13%
B6.2.0	Extraction of natural gas	0.02%
B9.1.0	Support activities for petroleum and natural gas extraction	0.09%
C19.2.0	Manufacture of refined petroleum products	0.90%
D35.2.1	Manufacture of gas	0.00%
D35.2.2	Distribution of gaseous fuels through mains	0.08%
D35.2.3	Trade of gas through mains	0.00%
G46.7.1	Wholesale of solid, liquid and gaseous fuels and related products	0.09%

* Please note that the NACE sector allocation is not used in the Subfund's investment strategy. It is provided for disclosure purposes only. For example, the Subfund's investment strategy makes use of company's revenue exposure in accordance with CSAM's ESG Exclusion framework and does not exclude companies based on their NACE sector allocation.

** Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contri-

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

As of 31.05.2024, the Subfund reports 0.00% exposure to sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

bution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The Subfund's reported EU Taxonomy alignment was not subject to assurance or review by a third party.

● **What was the share of investments made in transitional and enabling activities?**

Of the 0.00% of sustainable investments with an environmental objective aligned with the EU Taxonomy as of 31.05.2024, 0.00% were made in transitional activities and 0.00% in enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During the previous reference period the percentage of investments that were aligned with the EU Taxonomy were 0.00% as of 31.05.2023.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As of 31.05.2024, 8.17% of the Subfund's investments were made into sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

As of 31.05.2024, 1.02% of the Subfund's investments were made into socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

As of 31.05.2024, 7.73% of the Subfund's investments were made into "other".

Investments such as cash, derivatives and structured products may have fallen under "other" since such instruments did not contribute to the E/S characteristics of this Subfund. More information about the portfolio exposure to such investments can be found in the financial section of this annual report. Such investments did not have minimum environmental or social safeguards. They may have been used as efficient portfolio management tools, for cash management, for hedging purposes, or as an additional source of return.

Additionally, investments may have fallen under "other" if insufficient ESG-related information was available. This applied in particular to asset classes for which ESG Factors were insufficiently defined or insufficient ESG related information was available. Where possible, minimum environmental or social safeguards have been applied to these underlying securities by ensuring that CSAM ESG exclusions were adhered to.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To attain the environmental or social characteristics promoted by this Subfund, this Subfund applied ESG Exclusions, ESG Integration and Active Ownership.

For CS ESG Target Funds, this Subfund excluded investments in companies of the following three categories:

- Norms-based Exclusions

This Subfund excluded companies that failed to comply with international treaties on controversial weapons such as the Convention on Cluster Munitions, the Chemical Weapons Convention, the Biological Weapons Convention, the Treaty on the Non-Proliferation of Nuclear Weapons (NPT). In addition, it excluded companies that are recommended for exclusions by the Swiss Association for Responsible Investments (SVVK-ASIR) in respect to APM (anti-personnel mines), cluster munitions and nuclear weapons (outside of NPT).

- Values-based Exclusions

This Subfund excluded companies that derived more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment. It excluded companies that derived more than 20% of their revenue from tobacco distribution and conventional weapons support systems and services. In addition, a revenue limit of 20% applied to investments in coal (coal mining and coal-based electricity generation), a revenue limit of 5% applies to investments in arctic oil and gas as well as a revenue limit of 10% applies to investments in oil sands.

- Business-conduct Exclusions

Companies found to systematically violate international norms, where the breaches were particularly severe, or where management was not open to implement necessary reforms, were placed on a watch list, and may have been excluded

from the Credit Suisse-wide investment universe. This process was governed by a dedicated committee that maintained the list of excluded companies and was responsible for ensuring that the list is communicated to investment teams in a timely manner.

For CS ESG Target Funds, this Subfund conducted the following Active Ownership activities:

- Engagement

CSAM engaged with investee companies with the aim of increasing its impact on sustainability issues. Selected companies that were able and willing to take action were subject to engagement and CSAM sought to preserve and/or enhance the value of the companies they invested in, through engagement with issuers. The Active Ownership team defined the topics and issues CSAM wanted to discuss with investee companies. The resulting engagement activities for the reference period of this SFDR annex to the annual report were defined using certain criteria and aimed at companies in which CSAM held considerable investments through its funds. More information about the engagement activities and the most current active ownership report of CSAM can be found online at: www.credit-suisse.com/esg.

- Proxy Voting

Voting rights have been exercised for investee companies which have met the criteria for Proxy Voting as explained at www.credit-suisse.com/esg

For investments in third party Target Funds and CS ESG Target Funds, ESG Factors were integrated into the investment process in the following four main steps:

- Identification of material ESG Factors

The Investment Manager used materiality frameworks to identify those ESG Factors that are relevant to the given multi asset investment strategy. Materiality frameworks are concepts that help to identify sustainability related issues and opportunities that are likely to affect the financial condition or operating performance of potential investee companies within an industry. Materiality of ESG Factors included in the investment process may change over time.

- ESG security analysis

Based on the identified material ESG Factors, investment managers made use of ESG ratings from third-party service providers and combined them with CSAM's proprietary analyses and information. These included, e.g. ESG related news, ESG ratings and scores, ESG-related controversies, and ESG trends.

- Security selection and portfolio implementation

The Investment Manager aimed to select target funds that demonstrated the "ESG Integration", "Sustainable Thematic", or "Impact Investing" approach according to the proprietary classification system described in the Credit Suisse Sustainable Investment Framework.

- Portfolio monitoring

Investment managers monitored the ESG Factors periodically to detect significant changes in the ESG Factors of target funds. They regularly reassessed the portfolio, taking into consideration financial and ESG metrics, and consequently decided whether to readjust the portfolio.

How did this financial product perform compared to the reference benchmark?

The Subfund did not use a reference benchmark for the purpose of attaining the environmental and/or social characteristics.

- *How does the reference benchmark differ from a broad market index?*

Not applicable.

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● *How did this financial product perform compared with the reference benchmark?*

● *How did this financial product perform compared with the broad market index?*

Not applicable.

ANNEX IV

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Credit Suisse (Lux) Thematic Opportunities Equity Fund

Legal entity identifier: 5493008BTRBH1C6EUB09

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

<p><input checked="" type="radio"/> <input type="checkbox"/> Yes</p> <p><input type="checkbox"/> It made sustainable investments with an environmental objective: ___%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made sustainable investments with a social objective: ___%</p>	<p><input type="radio"/> <input checked="" type="checkbox"/> No</p> <p><input checked="" type="checkbox"/> It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 52.62% of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <p><input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments</p>
---	--

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

This Subfund promotes environmental, social and governance (ESG) characteristics (within the meaning of Art. 8 of Regulation (EU) 2019/2088).

The Management Company and the Investment Manager applied the Credit Suisse Asset Management (CSAM) Sustainable Investing Policy to this Subfund.

This Subfund promoted the following environmental and social characteristics:

- to invest into companies that comply with international treaties on controversial weapons (norms-based exclusions on direct investments)
- not to invest into companies that derive more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment (values-based exclusions on direct investments)
- not to invest into companies that either derive more than 20% of their revenue from tobacco distribution or conventional weapons support systems and services (values-based exclusions on direct investments)
- not to invest into companies that either derive more than 20% of their revenues from coal (coal mining and coal-based electricity generation) and 5% of their revenues in arctic oil and gas, or 10% of their revenues from oil sands (values-based exclusions on direct investments)
- adherence to, and conducting business activities in accordance with, international norms such as the "United Nations Global Compact Principles" (UNGCC) (business-conduct exclusions on direct investments)
- higher exposure to investments that have better ESG profile and fewer ESG controversies over their investment cycle (ESG Integration)
- contribution to good governance and sustainable practices through proxy voting and engagement with investee companies in line with CSAM's Sustainable Investing Policy (Active Ownership)

The extent to which the environmental and/or social characteristics were met is measured by the sustainability indicators shown below.

Derivatives were not used to attain the environmental or social characteristics.

Please find further information on ESG Integration, ESG Exclusions and Active Ownership below in the question "What actions have been taken to meet the environmental and/or social characteristics during the reference period?" and online at www.credit-suisse.com/esg.

● *How did the sustainability indicators perform?*

The table below shows the output of the Sustainability Indicators applicable to this Subfund as of 31.05.2024. While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

Sustainability Indicator*	Portfolio	Indicator Output
ESG Rating	AAA: 16.47%, AA: 26.80%, A: 27.11%, BBB: 13.84%, BB: 6.39%, B: 2.87%, CCC: 0.59%, Not ratable**: 1.55%, No data coverage**: 4.39%	Investment exposure by ESG Rating: AAA (highest): 0–100% AA: 0–100% A: 0–100% BBB: 0–100% BB: 0–100% B: 0–100% CCC (lowest): 0–100%

CSAM ESG exclusions***	Pre- and post-trade checks are in place to detect investments that breach the ESG exclusions. Any detected breach is escalated and remedied.	This indicator reflects that the portfolio complied with the applicable ESG exclusions as described in the exclusion section of the website (during the entire reference period, CSAM adhered to ESG exclusion criteria, as stated in the CSAM Sustainable Investing Policy).

* None of the Sustainability Indicators were subject to an assurance provided by an auditor or a review by a third party.

** These categories can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

*** Note that the amount of investments that were restricted due to the ESG exclusions depend on the investable universe of the Subfund.

● ...and compared to previous periods?

The table below presents data from the previous reference period (as of 31.05.2023). The data may differ compared to the previously published report as the most recently available data was taken into account, as the data provider(s) may have retroactively updated some figures. While the sustainability indicators have been monitored continuously during the reference period, the data below does not represent an average for the reference period.

More information about the data sources and applied methodologies for each Sustainability Indicator can be found online at: www.credit-suisse.com/esg.

Sustainability Indicator*	Portfolio	Indicator Output

CSAM ESG exclusions***	Pre- and post-trade checks are in place to detect investments that breach the ESG exclusions. Any detected breach is escalated and remedied.	This indicator reflects that the portfolio complied with the applicable ESG exclusions as described in the exclusion section of the website (during the entire reference period, CSAM adhered to ESG exclusion criteria, as stated in the CSAM Sustainable Investing Policy).

* None of the Sustainability Indicators were subject to an assurance provided by an auditor or a review by a third party.

** These categories can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

*** Note that the amount of investments that were restricted due to the ESG exclusions depend on the investable universe of the Subfund.

● What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

At the end of the reference period, the sustainable investments contributed to the Environmental and Social objectives below:

- Investments that generated at least 50% of their revenues from products and services that contributed to an environmental objective (e.g. alternative energy, carbon & energy efficiency, green building, sustainable water, pollution prevention, sustainable agriculture etc.)
- Investments that generated at least 50% of their revenues from products and services that contribute to a social objective (e.g. nutrition, disease treatments, sanitation, affordable real estate, SME finance, education, connectivity etc.)
- Investments that have an approved commitment to science-based emission targets and an average reduction in carbon emissions intensity of 7% over the last three years

The above criteria were assessed using a quantitative methodology. If there had not been an output from the quantitative assessment (e.g. in the case of missing quantitative ESG data), investments were submitted for confirmation in a case-by-case approach based on a proprietary assessment of the criteria. A central Credit Suisse committee approved such submissions.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

CSAM considered various indicators linked to principal adverse impacts on sustainability factors (PAI Indicators) and further indicators from its exclusion framework to assess whether sustainable investments caused significant harm to any environmental or social investment objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— — ***How were the indicators for adverse impacts on sustainability factors taken into account?***

During the reference period, the PAI Indicators applied by CSAM to identify investments which qualify as SFDR Sustainable Investments in line with CS SFDR Sustainable Investment Methodology included a set of criteria and thresholds to determine if an investment passed the DNSH condition as follows:

Investments must not:

1. have a significant negative contribution to climate change. This criterion makes use of an indicator that flags the biggest emitters of greenhouse gas globally and relates to PAI 1, 2, 3 and 15.
2. be subject to norms, values and business conduct exclusions and other investment restrictions which address PAI 4, 10, 14 and 16.
3. be subject to severe ESG controversies which address PAI 7 and 10 where applicable.
4. be strongly lagging its industry peers in overall ESG performance. This criterion has been applied to cover the remainder of the PAI to the extent possible.

— — — ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Sustainable Investments were aligned with the 'OECD Guidelines for Multinational Enterprises' and the 'UN Guiding Principles on Business and Human Rights'. The alignment was assessed as part of the CS ESG Exclusion framework. Companies that exhibit severe weaknesses in business conduct, particularly with regard to breaches of the 'United Nations Global Compact Principles' (UNGC) and companies placed on the watchlist, but with no immediate exclusion, were flagged not to be considered SFDR Sustainable Investments due to DNSH.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The following table provides the exposure to all mandatory PAI from the Commission Delegated Regulation (EU) 2022/1288. The Adverse Sustainability Indicator/Metric values are calculated as an asset weighted average based on quarterly data representing the reference period from 01.06.2023–31.05.2024.

Please note that CSAM may choose or may not be able to consider and/or mitigate all of the herein reported PAI given the Subfund's investment strategy, asset class or the availability of reliable data. Consideration of PAI may be subject to change given evolving data availability and quality. Please refer to the EET for the most recent overview of which PAI are considered at Subfund level.

Please find further information on CSAM PAI Framework online at www.credit-suisse.com/esg.

* Look-through enabled where possible, excl. cash and derivatives. Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period.

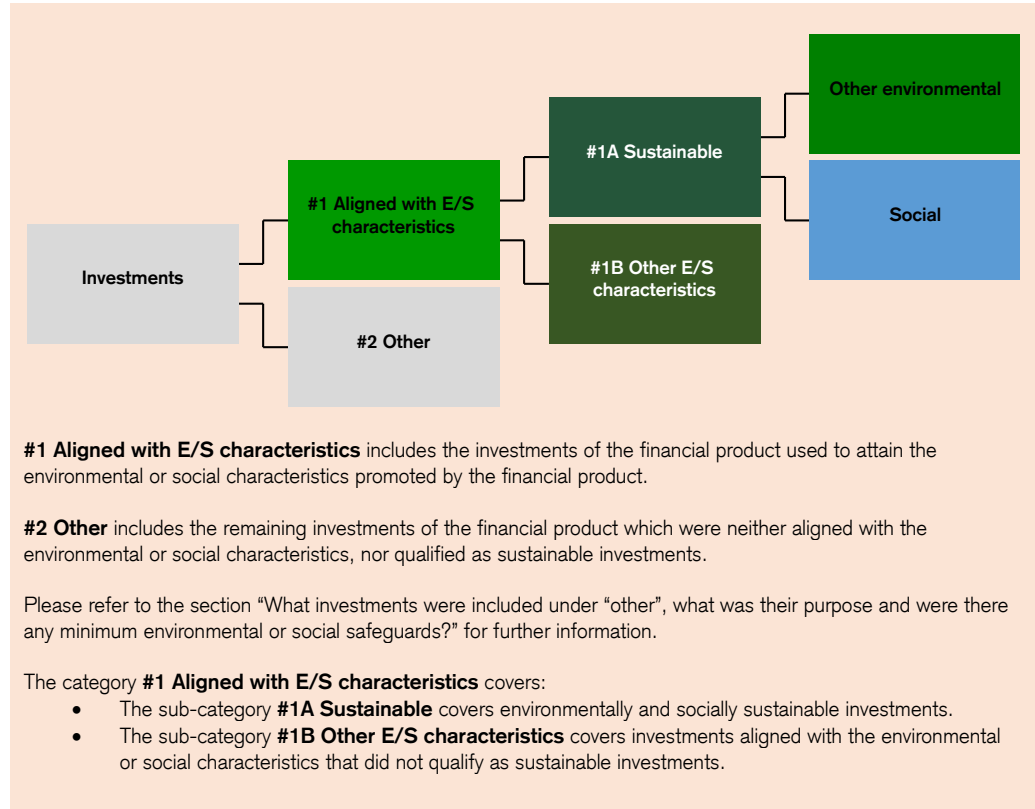

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: 31.05.2024

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

● What was the asset allocation?

The proportion of investments used to meet the environmental or social characteristics promoted by this Subfund (category #1 above) was 96.10% of its total net assets.

Within this category the Subfund held a proportion of 52.62% of its total net assets in sustainable investments (category #1A above) and a proportion of 43.48% of its total net assets in other E/S characteristics (category #1B above).

The proportion of investments held by the Subfund in "Other" (category #2 above) was 3.90% of its total net assets.

The data is valid as of 31.05.2024. It does not represent an average for the reference period.

● In which economic sectors were the investments made?

Subfund Sectoral Exposure

NACE Sector Code *	Portfolio Exposure **
A. Agriculture, forestry and fishing	0.35%
B. Mining and quarrying	4.88%
C. Manufacturing	38.69%
D. Electricity, gas, steam and air conditioning supply	7.78%
E. Water supply; sewerage, waste management and remediation activities	3.03%
F. Construction	2.65%
G. Wholesale and retail trade; repair of motor vehicles and motorcycles	2.16%
H. Transportation and storage	4.66%
J. Information and communication	21.45%
K. Financial and insurance activities	0.87%
L. Real estate activities	1.22%
M. Professional, scientific and technical activities	4.01%
N. Administrative and support service activities	1.59%

P. Education	3.68%
Q. Human health and social work activities	1.45%
Others	1.55%

* Please note that the NACE sector allocation is not used in the Subfund's investment strategy. It is provided for disclosure purposes only. For example, the Subfund's investment strategy makes use of company's revenue exposure in accordance with CSAM's ESG Exclusion framework and does not exclude companies based on their NACE sector allocation.

** Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period. The "Others" category can show a negative value. This can be caused by negative committed cash positions and the use of certain types of derivatives (such as FX or OTC Collateral) due to trade settlement timing.

Subfund Exposure to Fossil Fuels Sub-Sectors

NACE Sector Code *	NACE name	Portfolio Exposure **
B5.1.0	Mining of hard coal	0.00%
B5.2.0	Mining of lignite	0.00%
B6.1.0	Extraction of crude petroleum	0.58%
B6.2.0	Extraction of natural gas	0.00%
B9.1.0	Support activities for petroleum and natural gas extraction	0.81%
C19.2.0	Manufacture of refined petroleum products	0.00%
D35.2.1	Manufacture of gas	0.00%
D35.2.2	Distribution of gaseous fuels through mains	0.75%
D35.2.3	Trade of gas through mains	0.00%
G46.7.1	Wholesale of solid, liquid and gaseous fuels and related products	1.13%

* Please note that the NACE sector allocation is not used in the Subfund's investment strategy. It is provided for disclosure purposes only. For example, the Subfund's investment strategy makes use of company's revenue exposure in accordance with CSAM's ESG Exclusion framework and does not exclude companies based on their NACE sector allocation.

** Portfolio Exposure as of 31.05.2024. It does not represent an average for the reference period.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contri-

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

As of 31.05.2024, the Subfund reports 0.00% exposure to sustainable investments with an environmental objective aligned with the EU Taxonomy.

● Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

bution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies.

- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g., for a transition to a green economy.

- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

The Subfund's reported EU Taxonomy alignment was not subject to assurance or review by a third party.

● **What was the share of investments made in transitional and enabling activities?**

Of the 0.00% of sustainable investments with an environmental objective aligned with the EU Taxonomy as of 31.05.2024, 0.00% were made in transitional activities and 0.00% in enabling activities.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

During the previous reference period the percentage of investments that were aligned with the EU Taxonomy were 0.00% as of 31.05.2023.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As of 31.05.2024, 35.64% of the Subfund's investments were made into sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of socially sustainable investments?

As of 31.05.2024, 16.98% of the Subfund's investments were made into socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

As of 31.05.2024, 3.90% of the Subfund's investments were made into "other".

Investments such as cash, derivatives and structured products may have fallen under "other" since such instruments did not contribute to the E/S characteristics of this Subfund. More information about the portfolio exposure to such investments can be found in the financial section of this annual report. Such investments did not have minimum environmental or social safeguards. They may have been used as efficient portfolio management tools, for cash management, for hedging purposes, or as an additional source of return.

Additionally, investments may have fallen under "other" if insufficient ESG-related information was available. This applied in particular to asset classes for which ESG Factors were insufficiently defined or insufficient ESG related information was available. Where possible, minimum environmental or social safeguards have been applied to these underlying securities by ensuring that CSAM ESG exclusions were adhered to.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

To attain the environmental or social characteristics promoted by this Subfund, this Subfund applied ESG Exclusions, ESG Integration and Active Ownership.

This Subfund excluded investments in companies of the following three categories:

- Norms-based Exclusions

This Subfund excluded companies that failed to comply with international treaties on controversial weapons such as the Convention on Cluster Munitions, the Chemical Weapons Convention, the Biological Weapons Convention, the Treaty on the Non-Proliferation of Nuclear Weapons (NPT). In addition, it excluded companies that are recommended for exclusions by the Swiss Association for Responsible Investments (SVVK-ASIR) in respect to APM (anti-personnel mines), cluster munitions and nuclear weapons (outside of NPT).

- Values-based Exclusions

This Subfund excluded companies that derived more than 5% of their revenue from conventional weapons and firearms, tobacco production, gambling, or adult entertainment. It excluded companies that derived more than 20% of their revenue from tobacco distribution and conventional weapons support systems and services. In addition, a revenue limit of 20% applied to investments in coal (coal mining and coal-based electricity generation), a revenue limit of 5% applies to investments in arctic oil and gas as well as a revenue limit of 10% applies to investments in oil sands.

- Business-conduct Exclusions

Companies found to systematically violate international norms, where the breaches were particularly severe, or where management was not open to implement necessary reforms, were placed on a watch list, and may have been excluded

from the Credit Suisse-wide investment universe. This process was governed by a dedicated committee that maintained the list of excluded companies and was responsible for ensuring that the list is communicated to investment teams in a timely manner.

- Restrictions related to LuxFLAG ESG label

To comply with the LuxFLAG ESG label, this Subfund excluded additionally the following companies from the investment universe:

- Tobacco, tobacco-related products and supporting services: Companies that derive more than 5% of their annual revenue from production and all companies that derive more than 15% of their annual revenue from sales and distribution are excluded.

ESG Factors were integrated into the investment process in the following four main steps:

- Identification of material ESG Factors

First, the Investment Manager used materiality frameworks to identify those ESG Factors that are relevant to the investment strategy. Materiality frameworks are concepts that help to identify sustainability-related issues and opportunities that are likely to affect the financial condition or operating performance of companies within an industry. Material factors have been furthermore assessed based on the Subfund's sector and geographical exposure. Second, the Investment Manager prioritized the material factors that were most relevant to the subsequent investment decisions based on the portfolio's current market exposure.

- ESG security analysis

Based on the identified material ESG Factors, the Investment Manager performed security research across the Subfund's investment universe. The Investment Manager made use of ESG ratings from third-party service providers and combined them with CSAM's proprietary analyses and information. These included, e.g. ESG related news, ESG ratings and scores, ESG-related controversies, and ESG trends.

The ESG data are fully integrated in the portfolio management software. The CSAM sustainable investing team may offer additional support, where needed, and advise on access to other ESG data providers. The outcome of the ESG analysis of individual securities, combined with financial research, enabled the Investment Managers to make ESG-adjusted risk/return assessments. This enabled the Investment Manager to compare securities on an ESG-adjusted basis and to evaluate whether to keep certain securities in the portfolio or to sell them during the security selection and portfolio implementation stage. The ESG security analysis has been updated periodically.

- Security selection and portfolio implementation

Based on the identified material ESG Factors and the ESG-adjusted security analysis, the Investment Manager constructed a portfolio in accordance with the Subfund's investment process and principles. The ESG-adjusted security analysis combined with portfolio construction considerations has been used to determine appropriate portfolio weights that reflected the ESG-adjusted risk/return profile of the analyzed securities.

The research process might make use of dedicated ESG questionnaires with potential follow-up meetings with investee companies in case incomplete data is available from third-party ESG data providers.

- Portfolio monitoring

The Investment Manager monitored the ESG Factors periodically to detect significant changes in the ESG Factors of the underlying securities. They regularly reassessed the portfolio, taking into consideration financial and ESG metrics, and consequently decided whether to increase or decrease positions in the portfolio.

- Engagement

CSAM engaged with investee companies with the aim of increasing its impact on sustainability issues. Selected companies that were able and willing to take action were subject to engagement and CSAM sought to preserve and/or enhance the value of the companies they invested in, through engagement with issuers. The Active Ownership team defined the topics and issues CSAM wanted to discuss with investee companies. The resulting engagement activities for the reference period of this SFDR annex to the annual report were defined using certain criteria and aimed at companies in which CSAM held considerable investments through its funds. More information about the engagement activities and the most current active ownership report of CSAM can be found online at: www.credit-suisse.com/esg.

- Proxy Voting

Voting rights have been exercised for investee companies which have met the criteria for Proxy Voting as explained at www.credit-suisse.com/esg

How did this financial product perform compared to the reference benchmark?

The Subfund did not use a reference benchmark for the purpose of attaining the environmental and/or social characteristics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- *How does the reference benchmark differ from a broad market index?*

Not applicable.

- *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

- *How did this financial product perform compared with the reference benchmark?*

- *How did this financial product perform compared with the broad market index?*

Not applicable.

ESG Notes

The figures contained in this section are not audited. Where Environmental, Social and Governance ("ESG") related information, statements and scorings are made in this report, we may have, partially or entirely, relied on publicly available information, internally developed data and/or information obtained from other third-party sources which we believe to be reliable. Our ability to verify such objectives may be limited by the reliability of the data available in respect of the underlying assets and the status of the regulations in relation to tracking and providing such data. We have not independently verified any information obtained from these public and third-party sources and cannot make any representations or warranties as to its accuracy, completeness, or reliability. It is possible that the data from ESG data providers may be incorrect, unavailable, or not fully updated. This is especially true where we have limited access to data from external parties regarding the underlying elements of an investment, for example due to a lack of look-through data. Such data gaps could result in an incorrect assessment of a sustainability practice and/or related sustainability risks and opportunities. We cannot make any guarantee about the content or completeness of such ESG disclosures, which remain subject to change and cannot be relied upon. In particular, we shall not be liable for any errors or omissions in connection with any ESG data herein, or for any direct, indirect, special, punitive, consequential or any other damages (including lost profits). In the absence of a standardized, industry wide ESG classification system, we have developed our own ESG framework (the "CS Sustainable Investment Framework"). Therefore, investors should note that the ESG classification of the Subfunds reflect our opinion and is based on the CS Sustainable Investment Framework which classification may vary from the classification made by third parties. The fact that a Subfund follows the CS Sustainable Investment Framework does not necessarily mean that it meets the investors overall investment objectives, nor their sustainability preferences. Given that sustainability regulation and guidelines are still developing, we may need to review certain ESG classifications/descriptions as industry practices change and as more regulatory guidance becomes available. The ESG-performance of a portfolio might also differ from its financial performance and we cannot make any representation as to the correlation between financial and ESG performance. Sustainability-related practices also differ by region, industry and ESG issue and are continually evolving. Consequently, sustainability-related practices may change over time. Similarly, new local sustainability requirements may result in additional compliance costs, disclosure obligations or other restrictions on the Subfunds. Our view on the appropriate classification may also evolve over time, including in response to regulatory guidance or changes in industry approach to classification. A change to the relevant classification may require further actions to be taken, e.g., further disclosures or new processes to capture data which may lead to additional costs.
