# Investment Manager's Reports

## Emerging Markets Large Cap Core Equity Fund

The Emerging Markets Large Cap Core Equity Fund (the "Fund") invests in large cap companies with increased exposure to companies with smaller relative market capitalisations, lower relative prices, and higher profitability across emerging markets. As of 31 May 2023, the Fund had holdings in approximately 1,290 companies. This reflects our approach of seeking to deliver highly diversified exposure to emerging markets large cap companies.

Over the six-month period ending 31 May 2023, the total return of the Fund in U.S. dollars (the base currency of the Fund) was 0.07%. This compares to a total return of -0.37% for the MSCI Emerging Markets Index (the "Index"). With low relative price (value) stocks outperforming high relative price (growth) stocks, the Fund's emphasis on value stocks contributed positively to performance relative to the Index. The Fund's emphasis on high profitability stocks also contributed positively to relative performance, as these stocks outperformed. The Index has been included for market context purposes only.

## Emerging Markets Sustainability Core Equity Fund

The Emerging Markets Sustainability Core Equity Fund (the "Fund") invests in companies with increased exposure to companies with smaller market capitalisations, lower relative prices, and higher profitability across emerging markets, while also adjusting the composition of the Fund based on environmental and sustainability impact considerations. As of 31 May 2023, the Fund had holdings in approximately 3,560 companies. This reflects our approach of seeking to deliver highly diversified exposure to emerging markets large cap companies.

Over the six-month period ending 31 May 2023, the total return of the Fund in U.S. dollars (the base currency of the Fund) was 1.80%. This compares to a total return of -0.37% for the MSCI Emerging Markets Index (the "Index"). With low relative price (value) stocks outperforming high relative price (growth) stocks, the Fund's emphasis on value stocks contributed positively to performance relative to the Index. The Fund's emphasis on high profitability stocks also contributed positively to relative performance, as these stocks outperformed. The Index has been included for market context purposes only.

## Emerging Markets Value Fund

The Emerging Markets Value Fund (the "Fund") invests in low relative price (value) companies across emerging markets. As of 31 May 2023, the Fund had holdings in approximately 2,910 companies. This reflects our approach of seeking to deliver highly diversified exposure to emerging markets value companies.

Over the six-month period ending 31 May 2023, the total return of the Fund in U.S. dollars (the base currency of the Fund) was 1.37%. This compares to a total return of 0.82% for the MSCI Emerging Markets Value Index (the "Index"). With low relative price (value) stocks outperforming high relative price (growth) stocks, the Fund's greater emphasis on value stocks contributed positively to performance relative to the Index. The Index has been included for market context purposes only.

## Euro Inflation Linked Intermediate Duration Fixed Income Fund

The Euro Inflation Linked Intermediate Duration Fixed Income Fund (the "Fund") invests in EUR inflation linked issues of Eurozone governments with maturities between three and 20 years. As of 31 May 2023, the Fund's (EUR) average real yield to maturity was 0.31%.

Over the six-month period ending 31 May 2023, the total return of the Fund in euro (the base currency of the Fund) was -0.96%. This compares to a return of -0.68% for the blended Index composed of 50% Bloomberg France Government EMU HICP Linked 5-15 Year Bond Index and 50% Bloomberg Germany Government Inflation Linked 5-15 Year Index (the "Index").

Realised real term premiums were broadly negative for both German and French inflation-linked bonds as longer-term inflation-linked bonds underperformed their shorter-term counterparts. German inflation-linked bonds generally outperformed their duration-matched French counterparts. As a result, the Fund's underweight to German inflation-linked bonds and overweight to French inflation-linked bonds with intermediate-term maturities detracted from relative performance. The Index has been included for market context purposes only.

## European Small Companies Fund

The European Small Companies Fund (the "Fund") invests in small cap companies across Europe. As of 31 May 2023, the Fund had holdings in approximately 1,350 companies. This reflects our approach of seeking to deliver highly diversified exposure to European small cap companies.

Over the six-month period ending 31 May 2023, the total return of the Fund in euro (the base currency of the Fund) was 3.13%. This compares to a return of 2.18% for the MSCI Europe Small Cap Index (the "Index"). The Fund's focus on small cap stocks contributed positively to performance relative to the index, as larger small caps held by the index underperformed. The Fund's exclusion of stocks with the lowest profitability and highest relative price also contributed positively to relative performance, as these stocks underperformed. Additionally, the Fund's exclusion of stocks with high asset growth contributed positively to relative performance, as those stocks underperformed. The Index has been included for market context purposes only.

## European Value Fund

The European Value Fund (the "Fund") invests in large cap low relative price (value) companies across Europe. As of 31 May 2023, the Fund had holdings in approximately 210 companies. This reflects our approach of seeking to deliver highly diversified exposure to European large cap value companies.

Over the six-month period ending 31 May 2023, the total return of the Fund in euro (the base currency of the Fund) was 2.40%. This compares to a return of 1.83% for the MSCI Europe Value Index (the "Index"). The Fund's greater emphasis on value stocks contributed positively to performance relative to the index, as deeper value stocks outperformed. The Index has been included for market context purposes only.

## Global Core Equity Fund

The Global Core Equity Fund (the "Fund") invests in companies with increased exposure to companies with smaller market capitalisations,

# Investment Manager's Reports (continued)

## Global Core Equity Fund (continued)

lower relative prices, and higher profitability across developed markets. As of 31 May 2023, the Fund had holdings in approximately 8,410 companies. This reflects our approach of seeking to deliver highly diversified exposure to developed markets companies.

Over the six-month period ending 31 May 2023, the total return of the Fund in U.S. dollars (the base currency of the Fund) was -0.37%. This compares to a total return of 3.92% for the MSCI World Index (the "Index"). The Fund's emphasis on small cap stocks detracted from performance relative to the index, as small cap stocks underperformed large cap stocks. With low relative price (value) stocks underperforming high relative price (growth) stocks, the Fund's emphasis on value stocks also detracted from relative performance. Additionally, the Fund's emphasis on high profitability stocks, particularly within value stocks, detracted from relative performance, as these stocks underperformed. The Index has been included for market context purposes only.

## Global Core Fixed Income Fund

The Global Core Fixed Income Fund (the "Fund") invests in fixed income instruments within the investment grade spectrum and may also invest in fixed income instruments rated BB+ through BB-. As of 31 May 2023, the Fund was diversified across issuers from 21 countries, as well as supranational organisations, and invested in 8 currencies. The weighted average duration of the Fund at the end of May was at 6.32 years, and the Fund had an (GBP) average yield to maturity of 4.92%.

Over the six-month period ending 31 May 2023, the total return of the Fund in British pounds (the base currency of the Fund) was 1.13%. This compares to a return of 1.22% for the Bloomberg Global Aggregate Bond Index (hedged to GBP) (the "Index").

During the period, eligible global developed yield curves were generally flat to inverted in the short-to intermediate-term segments, but upwardly sloped in the 10- to 20-year segment. As such, the Fund increased its allocation to bonds in the zero- to five-year maturity range and the 10- to 20-year maturity range. The Fund remained underweight short-term bonds and overweight intermediate-term bonds denominated in the Australian dollar, euro, and US dollar relative to the Index. Realised term premiums were mixed across global developed markets. The Fund's overweight to intermediate-term bonds and underweight to short-term bonds generally detracted from relative performance. Conversely, the Fund's underweight to bonds denominated in the British pound and euro, with maturities longer than 20-years, contributed positively to relative performance as those bonds were among the worst performers during the period.

Credit spreads were relatively wide during the period, indicating larger expected credit premiums. As such, the Fund focused on corporate bonds rated single-A and BBB and was overweight these securities relative to the Index. Realised credit premiums were positive across global developed markets, as corporate bonds generally outperformed government bonds. As a result, the Fund's overweight to corporate bonds rated BBB and underweight to government bonds contributed positively to relative performance.

The Fund's underweight to bonds denominated in the Japanese yen detracted from relative performance, as these bonds were among the best performers in global developed markets for the period. The Index has been included for market context purposes only.

## Global Short Fixed Income Fund

The Global Short Fixed Income Fund (the "Fund") invests in high-quality fixed income instruments with maturities at or below five years. As of 31 May 2023, the Fund was diversified across issuers from 18 countries, as well as supranational organisations, and invested in 9 currencies. The Fund's (EUR) average yield to maturity was 3.33%.

Over the six-month period ending 31 May 2023, the total return of the Fund in euro (the base currency of the Fund) was 0.66%. This compares to a return of 0.50% for the FTSE World Government Bond Index 1-5 Years (hedged to EUR) (the "Index").

During the period, eligible global developed yield curves were generally flat to inverted within the Fund's eligible universe, indicating smaller expected term premiums. As such, the Fund's weighted average duration was shortened from 1.90 years at the beginning of the period to 0.89 year at the end of the period. As of the end of May, the Index's weighted average duration was 2.69 years.

Realised term premiums were mixed across global developed markets. The Fund's overweight to shorter-term bonds denominated in the Canadian dollar and underweight to longer-term bonds denominated in the British pound contributed positively to relative performance. The Fund's overweight to Australian dollar-denominated bonds also contributed positively to relative performance. Conversely, the Fund's underweight to bonds denominated in the Japanese yen detracted from relative performance, as these bonds were among the best performers in global developed markets for the period. The Index has been included for market context purposes only.

## Global Short-Term Investment Grade Fixed Income Fund

The Global Short-Term Investment Grade Fixed Income Fund (the "Fund") invests in fixed income instruments within the investment grade spectrum with maturities at or below five years. As of 31 May 2023, the Fund was diversified across issuers from 23 countries, as well as supranational organisations, and invested in 9 currencies. The Fund's (USD) average yield to maturity was 4.96%.

Over the six-month period ending 31 May 2023, the total return of the Fund in U.S. dollars (the base currency of the Fund) 2.03%. This compares to a return of 2.25% for the Bloomberg Global Aggregate Credit 1-5 Years (hedged to USD) (the "Index").

During the period, eligible global developed yield curves were generally flat to inverted within the Fund's eligible universe, indicating smaller expected term premiums. As such, the Fund's weighted average duration was shortened from 2.58 years at the beginning of the period to 1.87 years at the end of the period. As of the end of May, the Index's weighted average duration was 2.72 years. Realised term premiums were mixed across global developed markets. The Fund's overweight to longer-term bonds denominated in the euro detracted from relative performance. The Fund's underweight to longer-term bonds denominated in the US dollar also detracted from relative performance, as longer-term US dollar-denominated bonds were among the best performers during the period.

# Investment Manager's Reports (continued)

## Global Short-Term Investment Grade Fixed Income Fund (continued)

Credit spreads were relatively wide during the period, indicating larger expected credit premiums. As such, the Fund focused on corporate bonds rated BBB and was overweight these securities relative to the Index. Realised credit premiums were positive across global developed markets, as corporate bonds generally outperformed government bonds. However, this had a negligible impact on relative performance. The Index has been included for market context purposes only.

## Global Small Companies Fund

The Global Small Companies Fund (the "Fund") invests in small cap companies across developed markets. As of 31 May 2023, the Fund had holdings in approximately 6,570 companies. This reflects our approach of seeking to deliver highly diversified exposure to small cap companies in developed markets.

Over the six-month period ending 31 May 2023, the total return of the Fund in U.S. dollars (the base currency of the Fund) was -3.61%. This compares to a return of -2.19% for the MSCI World Small Cap Index (the "Index"). The Fund's exclusion of stocks with the lowest profitability and highest relative price detracted from performance relative to the index, as these stocks outperformed. The Index has been included for market context purposes only.

## Global Sustainability Core Equity Fund

The Global Sustainability Core Equity Fund (the "Fund") invests in companies with increased exposure to companies with smaller market capitalisations, lower relative prices, and higher profitability across developed markets, while also adjusting the composition of the Fund based on environmental and sustainability impact considerations. As of 31 May 2023, the Fund had holdings in approximately 6,310 companies. This reflects our approach of seeking to deliver highly diversified exposure to developed markets companies.

Over the six-month period ending 31 May 2023, the total return of the Fund in U.S. dollars (the base currency of the Fund) was 1.22%. This compares to a total return of 3.92% for the MSCI World Index (the "Index"). The Fund's emphasis on small cap stocks detracted from performance relative to the index, as small cap stocks underperformed large cap stocks. With low relative price (value) stocks underperforming high relative price (growth) stocks, the Fund's emphasis on value stocks also detracted from relative performance. Additionally, the Fund's emphasis on high profitability stocks, particularly within value stocks, detracted from relative performance, as these stocks underperformed. Conversely, the Fund's sustainability considerations contributed positively to performance relative to the Index. The portfolio's underweight to energy stocks contributed positively to relative performance as energy was the worst performing sector. The Index has been included for market context purposes only.

## Global Sustainability Fixed Income Fund

The Global Sustainability Fixed Income Fund (the "Fund") invests in fixed income instruments within the investment grade spectrum with maturities at or below 20 years. As of 31 May 2023, the Fund was diversified across issuers from 20 countries, as well as supranational organisations, and invested in 10 currencies. The weighted average duration of the Fund at the end of May was 6.33 years, and the Fund had an (GBP) average yield to maturity of 4.87%.

Over the six-month period ending 31 May 2023, the total return of the Fund in British pounds (the base currency of the Fund) was 1.23%. This compares to a return of 1.22% for the Bloomberg Global Aggregate Bond Index (hedged to GBP) (the "Index").

During the period, eligible global developed yield curves were generally flat to inverted in the short- to intermediate-term segments, but upwardly sloped in the 10- to 20-year segment. As such, the Fund increased its allocation to bonds in the zero- to five-year maturity range and the 10- to 20-year maturity range. The Fund remained underweight short-term bonds and overweight intermediate-term bonds denominated in the Australian dollar, euro, and US dollar relative to the Index. Realised term premiums were mixed across global developed markets. The Fund's overweight to intermediate-term bonds and underweight to short-term bonds generally detracted from relative performance. Conversely, the Fund's underweight to bonds denominated in the British pound and euro, with maturities longer than 20-years, contributed positively to relative performance as those bonds were among the worst performers during the period.

Credit spreads were relatively wide during the period, indicating larger expected credit premiums. As such, the Fund focused on corporate bonds rated single-A and BBB and was overweight these securities relative to the Index. Realised credit premiums were positive across global developed markets, as corporate bonds generally outperformed government bonds. As a result, the Fund's overweight to corporate bonds rated BBB and underweight to government bonds contributed positively to relative performance.

The Fund's underweight to bonds denominated in the Japanese yen detracted from relative performance, as these bonds were among the best performers in global developed markets for the period. The Index has been included for market context purposes only.

## Global Sustainability Short Fixed Income Fund

The Global Sustainability Short Fixed Income Fund (the "Fund") invests in high-quality fixed income instruments with maturities at or below five years. As of 31 May 2023, the Fund was diversified across issuers from 21 countries, as well as supranational organisations, and invested in 10 currencies. The Fund's (GBP) average yield to maturity was 4.96%.

Over the six-month period ending 31 May 2023, the total return of the Fund in British pounds (the base currency of the Fund) was 1.28%. This compares to a return of 1.56% for the Bloomberg Global Aggregate Bond Index 1-5 Years (hedged to GBP) (the "Index").

During the period, eligible global developed yield curves were generally flat to inverted within the Fund's eligible universe, indicating smaller expected term premiums. As such, the Fund's weighted average duration was shortened from 2.89 years at the beginning of the period to 1.80 years at the end of the period. As of the end of May, the Index's weighted average duration was 2.72 years. Realised term premiums were mixed across global developed markets. The Fund's overweight to longer-term bonds denominated in the British pound and euro and exclusion of bonds denominated in the Chinese yuan and underweight to bonds denominated in the Japanese yen detracted from relative performance.

# Investment Manager's Reports (continued)

## Global Sustainability Short Fixed Income Fund (continued)

Credit spreads were relatively wide during the period, indicating larger expected credit premiums. As such, the Fund focused on corporate bonds rated single-A and BBB and was overweight these securities relative to the Index. Realised credit premiums were positive across global developed markets, as corporate bonds generally outperformed government bonds. As a result, the Fund's overweight to corporate bonds and underweight to government bonds contributed positively to relative performance. The Index has been included for market context purposes only.

## Global Targeted Value Fund

The Global Targeted Value Fund (the "Fund") invests in small and mid cap low relative price (value) companies across developed markets. As of 31 May 2023, the Fund had holdings in approximately 4,400 companies. This reflects our approach of seeking to deliver highly diversified exposure to small and mid cap developed markets value companies.

Over the six-month period ending 31 May 2023, the total return of the Fund in U.S. dollars (the base currency of the Fund) was -6.35%. This compares to a total return of -5.21% for the MSCI World SMID Value Index (the "Index"). The Fund's greater emphasis on small cap stocks detracted from performance relative to the index, as small cap stocks underperformed large cap stocks. The Fund's greater emphasis on value stocks also detracted from relative performance, as deeper value stocks underperformed. The Index has been included for market context purposes only.

## Global Ultra Short Fixed Income Fund

The Global Ultra Short Fixed Income Fund (the "Fund") invests in fixed income instruments within the investment grade spectrum with maturities up to two years. As of 31 May 2023, the Fund was diversified across issuers from 20 countries, as well as supranational organisations, and invested in 8 currencies. The Fund's (GBP) average yield to maturity was 5.03%.

Over the six-month period ending 31 May 2023, the total return of the Fund in British pounds (the base currency of the Fund) was 1.70%. This compares to a return of 1.90% for the ICE BofA British Pound 1-Month Deposit Offered Rate Constant Maturity Index (the "Index").

During the period, eligible global developed yield curves were generally flat to inverted within the Fund's eligible universe, indicating smaller expected term premiums. As such, the Fund's weighted average duration was shortened from 0.86 year at the beginning of the period to 0.63 year at the end of the period. As of the end of May, the Index's weighted average duration was 0.08 year.

Realised term premiums were mixed across global developed markets but were generally negative within the ultrashort-term segment, as longer-term securities generally underperformed shorter-term securities. As a result, the Fund's inclusion of securities with maturities longer than one-month was the primary detractor from relative performance.

Realised credit premiums were positive across global developed markets, as corporate bonds generally outperformed government bonds. However, the Fund's inclusion of corporate bonds also generally detracted from relative performance due to their longer maturities relative to the Index. The Index has been included for market context purposes only.

## Global Value Fund

The Global Value Fund (the "Fund") invests in large cap low relative price (value) companies across developed markets. As of 31 May 2023, the Fund had holdings in approximately 750 companies. This reflects our approach of seeking to deliver highly diversified exposure to large cap value companies in developed markets.

Over the six-month period ending 31 May 2023, the total return of the Fund in U.S. dollars (the base currency of the Fund) was -3.09%. This compares to a return of -4.28% for the MSCI World Value Index (the "Index"). Compositional differences stemming from different value definitions between the Fund and the Index contributed positively to performance relative to the Index. The Index has been included for market context purposes only.

## Pacific Basin Small Companies Fund

The Pacific Basin Small Companies Fund (the "Fund") invests in small cap companies across Pacific Basin markets. As of 31 May 2023, the Fund had holdings in approximately 3,190 companies. This reflects our approach of seeking to deliver highly diversified exposure to Pacific Basin small cap companies.

Over the six-month period ending 31 May 2023, the total return of the Fund in U.S. dollars (the base currency of the Fund) was 2.08%. This compares to a total return of 2.73% for the MSCI Pacific Small Cap Index (the "Index"). The Fund's inclusion of Korea and Taiwan contributed positively to performance relative to the Index, as these stocks outperformed. Despite this, valuation timing differences between the Fund and the Index detracted from relative performance, resulting in underperformance. The Index has been included for market context purposes only.

## Sterling Inflation Linked Intermediate Duration Fixed Income Fund

The Sterling Inflation Linked Intermediate Fund (the "Fund") invests in sterling inflation linked issues of the U.K. government with maturities between three and 20 years. As of 31 May 2023, the Fund's (GBP) average real yield to maturity was 0.63%.

Over the six-month period ending 31 May 2023, the total return of the Fund in British pounds (the base currency of the Fund) was -3.53%. This compares to the return of -4.05% for the Bloomberg UK Government Inflation Linked 5-15 Year Bond Index (the "Index").

Realised real term premiums were broadly negative for British pound inflation-linked bonds as longer-term inflation-linked bonds underperformed their shorter-term counterparts. As a result, the Fund's inclusion of inflation-linked bonds with maturities shorter than five years contributed positively to performance relative to the 5- to 15-year Index. The Index has been included for market context purposes only.

# Investment Manager's Reports (continued)

## U.S. Core Equity Fund

The U.S. Core Equity Fund (the "Fund") invests in U.S. companies with increased exposure to companies with smaller market capitalisations, lower relative prices, and higher profitability. As of 31 May 2023, the Fund had holdings in approximately 1,930 companies. This reflects our approach of seeking to deliver highly diversified exposure to U.S. companies.

Over the six-month period ending 31 May 2023, the total return of the Fund in U.S. dollars (the base currency of the Fund) was -2.00%. This compares to a total return of 2.12% for the Russell 3000 Index (the "Index"). The Fund's emphasis on small cap stocks detracted from performance relative to the Index, as small cap stocks underperformed large cap stocks. With low relative price (value) stocks underperforming high relative price (growth) stocks, the Fund's emphasis on value stocks also detracted from relative performance. Additionally, the Fund's emphasis on high profitability stocks, particularly within value stocks, detracted from relative performance, as these stocks underperformed. The Index has been included for market context purposes only.

## U.S. Small Companies Fund

The U.S. Small Companies Fund (the "Fund") invests in U.S. small companies. As of 31 May 2023, the Fund had holdings in approximately 1,860 companies. This reflects our approach of seeking to deliver highly diversified exposure to U.S. small companies.

Over the six-month period ending 31 May 2023, the total return of the Fund in U.S. dollars (the base currency of the Fund) was -7.14%. This compares to a total return of -6.74% for the Russell 2000 Index (the "Index"). The Fund's exclusion of stocks with the lowest profitability and highest relative price detracted from performance relative to the Index, as those stocks outperformed. The Index has been included for market context purposes only.

## World Allocation 20/80 Fund

The World Allocation 20/80 Fund (the "Fund") invests in equity securities of companies across developed and emerging markets and fixed income securities of issuers in developed markets. The equity component of the Fund will generally have increased exposure to companies with smaller market capitalisations, lower relative prices, and higher profitability. The fixed income component generally invests in high quality fixed income issues with maturities at or below five years. The aggregate exposure to equity and fixed income securities is approximately 20% and 80%, respectively.

As of 31 May 2023, the equity component of the Fund had holdings in approximately 13,930 companies. This reflects our approach of seeking to deliver highly diversified holdings in developed and emerging markets companies.

Over the six-month period ending 31 May 2023, the total return of the World Allocation 20/80 Fund in British pounds (the base currency of the Fund) was 0.43%. This compares to a return of 0.90% for the 20% MSCI All Country World Index / 80% FTSE World Government Bond Index 1-5 Years (the "Index"). The Fund's emphasis on small cap stocks detracted from performance relative to the Index, as small cap stocks underperformed large cap stocks. With low relative price (value) stocks underperforming high relative price (growth) stocks, the Fund's emphasis on value stocks also detracted from relative performance. The Index has been included for market context purposes only.

As of 31 May 2023, the fixed income component of the World Allocation 20/80 Fund was diversified across approximately 1,020 bonds from 23 different countries.

During the period, eligible global developed yield curves were generally flat to inverted within the Fund's eligible universe, indicating smaller expected term premiums. As such, the Fund focused on shorter-term British pound- and euro-denominated bonds, resulting in a decrease in the Fund's weighted average duration from 1.84 years at the beginning of the period to 1.08 years at the end of the period. As of the end of May, the Index's weighted average duration was 2.69 years. Realised term premiums were mixed across global developed markets. The Fund's underweight to longer-term bonds and overweight to shorter-term bonds denominated in the British pound and euro contributed positively to relative performance, as realised term premiums were generally negative in those markets. Realised credit premiums were positive across global developed markets, as corporate bonds generally outperformed government bonds. As a result, the Fund's inclusion of corporate bonds also contributed positively to relative performance. Conversely, the Fund's underweight to bonds denominated in the Japanese yen detracted from relative performance, as these bonds were among the best performers in global developed markets for the period. The Index has been included for market context purposes only.

## World Allocation 40/60 Fund

The World Allocation 40/60 Fund (the "Fund") invests in equity securities of companies across developed and emerging markets and fixed income securities of issuers in developed markets. The equity component of the Fund will generally have increased exposure to companies with smaller market capitalisations, lower relative prices, and higher profitability. The fixed income component generally invests in fixed income instruments with maturities at or below twenty years within the investment grade spectrum and may also invest in securities rated BB+ through BB-. The aggregate exposure to equity and fixed income securities is approximately 40% and 60%, respectively.

As of 31 May 2023, the equity component of the World Allocation 40/60 Fund had holdings in approximately 15,350 companies. This reflects our approach of seeking to deliver highly diversified exposure to developed and emerging markets companies.

Over the six-month period ending 31 May 2023, the total return of the Fund in British pounds (the base currency of the Fund) was -0.63%. This compares to a return of 0.54% for the 40% MSCI All Country World Index / 60% FTSE World Government Bond Index 1-5 Years (the "Index"). The Fund's emphasis on small cap stocks detracted from performance relative to the Index, as small cap stocks underperformed large cap stocks. With low relative price (value) stocks underperforming high relative price (growth) stocks, the Fund's emphasis on value stocks also detracted from relative performance. The Index has been included for market context purposes only.

As of 31 May 2023, the fixed income component of the World Allocation 40/60 Fund was diversified across approximately 1,480 bonds from 24 different countries.

During the period, eligible global developed yield curves were generally flat to inverted within the Fund's eligible universe, indicating smaller expected term premiums. As such, the Fund focused on shorter-term British pound- and euro-denominated bonds, resulting in

# Investment Manager's Reports (continued)

## World Allocation 40/60 Fund (continued)

a decrease in the Fund's weighted average duration from 2.07 years at the beginning of the period to 1.26 years at the end of the period. As of the end of May, the Index's weighted average duration was 2.69 years. Realised term premiums were mixed across global developed markets. The Fund's underweight to longer-term bonds and overweight to shorter-term bonds denominated in the British pound and euro contributed positively to relative performance, as realised term premiums were generally negative in those markets. Realised credit premiums were positive across global developed markets, as corporate bonds generally outperformed government bonds. As a result, the Fund's inclusion of corporate bonds also contributed positively to relative performance. Conversely, the Fund's underweight to bonds denominated in the Japanese yen detracted from relative performance, as these bonds were among the best performers in global developed markets for the period. The Index has been included for market context purposes only.

## World Allocation 60/40 Fund

The World Allocation 60/40 Fund (the "Fund") invests in equity securities of companies across developed and emerging markets and fixed income securities of issuers in developed markets. The equity component of the Fund will generally have increased exposure to companies with smaller market capitalisations, lower relative prices, and higher profitability. The fixed income component generally invests in fixed income instruments with maturities at or below twenty years within the investment grade spectrum and may also invest in securities rated BB+ through BB-. The aggregate exposure to equity and fixed income securities is approximately 60% and 40%, respectively.

As of 31 May 2023, the equity component of the Fund had holdings in approximately 10,730 companies. This reflects our approach of seeking to deliver a highly diversified exposure to developed and emerging markets companies.

Over the six-month period ending 31 May 2023, the total return of the World Allocation 60/40 Fund in British pounds (the base currency of the Fund) was -1.91%. This compares to a return of 0.17% for the 60% MSCI All Country World Index / 40% FTSE World Government Bond Index 1-5 Years (the "Index"). The Fund's emphasis on small cap stocks detracted from performance relative to the Index, as small cap stocks underperformed large cap stocks. With low relative price (value) stocks underperforming high relative price (growth) stocks, the Fund's emphasis on value stocks also detracted from relative performance. The Index has been included for market context purposes only.

As of 31 May 2023, the fixed income component of the World Allocation 60/40 Fund was diversified across approximately 1,290 bonds from 24 different countries as well as supranational organisations.

During the period, eligible global developed yield curves were generally flat to inverted within the Fund's eligible universe, indicating smaller expected term premiums. As such, the Fund focused on shorter-term British pound- and euro-denominated bonds, resulting in a decrease in the Fund's weighted average duration from 2.70 years at the beginning of the period to 1.88 years at the end of the period. As of the end of May, the Index's weighted average duration was 2.69 years. Realised term premiums were mixed across global developed markets. The Fund's underweight to longer-term bonds and overweight to shorter-term bonds denominated in the British pound and euro contributed positively to relative performance, as realised term premiums were generally negative in those markets. Realised credit premiums were positive across global developed markets, as corporate bonds generally outperformed government bonds. As a result, the Fund's inclusion of corporate bonds also contributed positively to relative

and euro contributed positively to relative performance, as realised term premiums were generally negative in those markets. Realised credit premiums were positive across global developed markets, as corporate bonds generally outperformed government bonds. As a result, the Fund's inclusion of corporate bonds also contributed positively to relative performance. Conversely, the Fund's underweight to bonds denominated in the Japanese yen detracted from relative performance, as these bonds were among the best performers in global developed markets for the period. The Index has been included for market context purposes only.

## World Allocation 80/20 Fund

The World Allocation 80/20 Fund (the "Fund") invests in equity securities of companies across developed and emerging markets and fixed income securities of issuers in developed markets. The equity component of the Fund will generally have increased exposure to companies with smaller market capitalisations, lower relative prices, and higher profitability. The fixed income component generally invests in fixed income instruments with maturities at or below twenty years within the investment grade spectrum and may also invest in securities rated BB+ through BB-. The aggregate exposure to equity and fixed income securities is approximately 80% and 20%, respectively.

As of 31 May 2023, the equity component of the Fund had holdings in approximately 15,460 companies. This reflects our approach of seeking to deliver highly diversified exposure to developed and emerging markets companies.

Over the six-month period ending 31 May 2023, the total return of the World Allocation 80/20 Fund in British pounds (the base currency of the Fund) was -2.37%. This compares to a return of -0.21% for the 80% MSCI All Country World Index / 20% FTSE World Government Bond Index 1-5 Years (the "Index"). The Fund's emphasis on small cap stocks detracted from performance relative to the Index, as small cap stocks underperformed large cap stocks. With low relative price (value) stocks underperforming high relative price (growth) stocks, the Fund's emphasis on value stocks also detracted from relative performance. The Index has been included for market context purposes only.

As of 31 May 2023, the fixed income component of the World Allocation 80/20 Fund was diversified across approximately 1,040 bonds from 24 different countries as well as supranational organisations.

During the period, eligible global developed yield curves were generally flat to inverted in the short-to intermediate-term segments, but upwardly sloped in the 10- to 20-year segment. As such, the Fund increased its allocation to bonds in the zero- to three-year maturity range and the 10- to 20-year maturity range. Overall, the weighted average duration of the Fund decreased from 4.51 years at the beginning of the period to 4.08 years at the end of the period, but remained longer than that of the Index. As of the end of May, the Index's weighted average duration was 2.69 years. Realised term premiums were mixed across global developed markets. The Fund's underweight to longer-term bonds and overweight to shorter-term bonds denominated in the British pound and euro contributed positively to relative performance, as realised term premiums were generally negative in those markets. Realised credit premiums were positive across global developed markets, as corporate bonds generally outperformed government bonds. As a result, the Fund's inclusion of corporate bonds also contributed positively to relative

performance. Conversely, the Fund's underweight to bonds denominated in the Japanese yen detracted from relative performance, as these bonds were among the best performers in global developed markets for the period. The Index has been included for market context purposes only.

## World Equity Fund

The World Equity Fund (the "Fund") invests in companies with increased exposure to companies with smaller market capitalisations, lower relative prices, and higher profitability across developed and emerging markets.

As of 31 May 2023, the Fund had holdings in approximately 13,160 companies. This reflects our approach of delivering highly diversified exposure to developed and emerging markets companies.

Over the six-month period ending 31 May 2023, the return of the Fund in British pounds (the base currency of the Fund) was -4.20%. This compares to a return of -0.60% for the MSCI All Country World Index (the "Index"). The Fund's emphasis on small cap stocks detracted from performance relative to the Index, as small cap stocks underperformed large cap stocks. With low relative price (value) stocks underperforming high relative price (growth) stocks, the Fund's emphasis on value stocks also detracted from relative performance. The Index has been included for market context purposes only.

## World Sustainability Equity Fund\*

The World Sustainability Equity Fund (the "Fund") invests in companies with increased exposure to companies with smaller market capitalisations, lower relative prices, and higher profitability across developed and emerging markets, while also adjusting the composition of the Fund based on environmental and sustainability impact considerations.

As of 31 May 2023, the Fund had holdings in approximately 3,080 companies. This reflects our approach of delivering highly diversified exposure to developed and emerging markets companies.

Since April 1, 2023, the first full month since the Fund's inception, through 31 May 2023, the return of the Fund in British pounds (the base currency of the Fund) was -2.52%. This compares to a return of 0.11% for the MSCI All Country World Index (the "Index"). The Fund's emphasis on small cap stocks detracted from performance relative to the Index, as small cap stocks underperformed large cap stocks. With low relative price (value) stocks underperforming high relative price (growth) stocks, the Fund's emphasis on value stocks also detracted from relative performance. The Index has been included for market context purposes only.

\* The World Sustainability Equity Fund launched on 28 March 2023.
