⁽a) Refer to Note 6.

The above expense ratios are an average throughout the year to 30 November 2024. The above Expense Caps represent the expense cap levels at year end 30 November 2024.

⁽b) The Total Expense Ratio ("TER") expresses the sum of all costs, commissions and performance fees (excluding dealing commissions and market costs) charged on an ongoing basis to the Portfolios' assets (operating net expenses) taken retrospectively as a percentage of the Portfolios' assets, and is calculated using the following formula:
Total operating net expenses in CU* /Average portfolios' assets in CU* x 100 = TER %.
The TER is calculated for the Perfol from 1 December 2023 to 30 November 2024. TER's are annualised for Portfolios operating less than one year.

* CU = Currency units in the Portfolio's base currency.

 $^{^{\}mbox{(c)}}$ The expense cap does not include performance fees.

⁽d) The expense cap does not include the GSAMI fee portion paid to external Sub-Investment Advisers.

Goldman Sachs Funds Report of the Management Company II—Portfolio Launches, Closures and Mergers (Unaudited) As at 30 November 2024

There were no Portfolio launches, closures, mergers or name changes during the year.

The Undertakings for Collective Investment in Transferable Securities ("UCITS") IV directive, as amended, requires disclosure of how global exposure on financial derivatives investments are managed. There are three management approaches used:

- a) The Commitment Approach. This approach is generally for those Portfolios that hold less complex positions on financial derivatives investments and for the purposes of hedging or efficient portfolio management.
- b) Relative Value at Risk ("Relative VaR") approach. This approach is generally for those Portfolios where it is possible to identify an appropriate reference benchmark. This method compares the global exposure of the Portfolio relative to that of a reference benchmark.
- c) Absolute Value at Risk ("Absolute VaR") approach. This approach is generally for those Portfolios for which it is not appropriate or possible to determine a reference benchmark (for example, an absolute return portfolio).

The following sections indicate which approach is used for the Portfolios.

For Portfolios managed under a VaR approach, additional information is provided on the VaR model, being the VaR reference Portfolio / Benchmark, the regulatory VaR limit usage and the level of leverage reached.

I. Commitment Approach

The following Portfolios use the commitment approach for calculating global exposure:

Asia Equity Portfolio	US Small Cap Equity Portfolio
Asia Equity Fortiono	03 Small Cap Equity Fortions
All China Equity Portfolio	US Technology Opportunities Equity Portfolio
Emerging Markets Equity ESG Portfolio	Global Clean Energy Infrastructure Equity Portfolio
Emerging Markets Equity Portfolio	Global Infrastructure Equity Portfolio

II. VaR Approach (Continued)

			VaR Limit Utilisation as % of Regulatory VaR Limit ¹								
Portfolios	VaR approach	Regulatory Limit	Lowest	Highest	Average	Reference Portfolio/ Benchmark	Model	Confidence Interval	Holding period	Observation period	Leverage ²
Absolute Return	Absolute	20% of				ICE BofA 3 month	Simulation Based VaR using two-day historical				
Alternative Trend Portfolio	VaR Absolute VaR	NAV 20% of NAV	14%	34% 50%	21%	ICE BofA 3 month US T-Bill	bootstrapping Simulation Based VaR using two-day historical bootstrapping	99%	20 days	1 year	144%

The utilisation percentage represents the lowest, highest and average proportion of the maximum limit used in the reporting period. For example a Portfolio with an average utilisation of 25% and a maximum limit of 200% (Relative VaR), represents an average VaR ratio (Portfolio VaR divided by benchmark VaR) of 50%. A Portfolio with an average utilisation of 25% and a maximum limit of 20% (Absolute VaR), represents an average Portfolio VaR of 5%.

² The sum of notionals approach for financial derivative instruments is used to determine the maximum expected Portfolio leverage. This calculation incorporates the Portfolio's financial derivative instruments, the reinvestment of collateral received (in cash) in relation to operations of efficient portfolio management and any use of collateral in the context of any other operation of efficient portfolio management, e.g. securities lending.

Remuneration Disclosures

Introduction

The following disclosures are made by Goldman Sachs Asset Management B.V. ("GSAM B.V.") in accordance with the AIFMD (2011/61/EU) and UCITS Directive (2014/91/EU) and further guidance included in the ESMA Guidelines on sound remuneration policies under the AIFMD (3 July 2013/ESMA/2013/232) and UCITS Directive (14 October 2016/ESMA/2016/575).

Remuneration Programme Philosophy

Retention of talented employees is critical to executing the The Goldman Sachs Group, Inc.'s ("the firm" or "GS Group") business strategy successfully. Remuneration is, therefore, a key component of the costs the firm incurs to generate revenues, similar to cost of goods sold or manufacturing costs in other industries.

The remuneration philosophy and the objectives of the remuneration programme for the firm are reflected in the Compensation Principles for GS Group, as posted on the Goldman Sachs public website:

http://www.goldmansachs.com/investor-relations/corporate-governance/corporate-governance-documents/compensation-principles.pdf

In particular, effective remuneration practices should:

- (i) Encourage a real sense of teamwork and communication, binding individual short-term interests to the institution's long-term interests:
- (ii) Evaluate performance on a multi-year basis;
- (iii) Discourage excessive or concentrated risk-taking;
- (iv) Allow an institution to attract and retain proven talent;
- (v) Align aggregate remuneration for the firm with performance over the cycle; and
- (vi) Promote a strong risk management & control environment

Compensation Frameworks

The Amended and Restated Firmwide Performance Assessment & Variable Compensation Framework ("Firmwide Compensation Framework") formalises the variable remuneration practices of the firm.

The primary purpose of this Firmwide Compensation Framework is to assist the firm in assuring that its variable compensation programme does not provide "covered employees" (i.e., senior executives as well as other employees of the firm, who, either individually or as part of a group, have the ability to expose the firm to material amounts of risk) with incentives to take imprudent risks and is consistent with the safety and soundness of the firm.

Each business, and each of its underlying business units, maintains a Performance Assessment & Variable Compensation Framework that is specific to the business or business unit, as applicable, and that is consistent with the Firmwide Compensation Framework (collectively, the "Compensation Frameworks").

Integration of GSAM BV and its Remuneration structures

The firm completed the acquisition of GSAM B.V. on 11 April 2022 from NN Group. The NN Group Remuneration Framework remained applicable during the transition year of 2022 and this framework – in addition to the Goldman Sachs Compensation Frameworks and Plans such as the Goldman Sachs NNIP Phantom Unit Investment Plan – was followed until the full integration into Goldman Sachs. From 1 January 2024, and effective over fiscal year 2023 grants, GSAM B.V implemented the Goldman Sachs Asset Management B.V. Compensation Policy, with the purpose of supplementing the firm's remuneration programmes and frameworks in alignment with applicable local laws, rules and regulations.

Remuneration Governance

The Compensation Committee

The Board of Directors of GS Group (the "Group Board") oversees the development, implementation and effectiveness of the firm's global remuneration practices, and it generally exercises this responsibility directly or through delegation to the Compensation Committee of the Group Board (the "Compensation Committee").

The responsibilities of the Compensation Committee include:

- Review and approval of (or recommendation to the Group Board to approve) the firm's variable remuneration structure, including the portion to be paid as share-based awards, all year-end share-based grants for eligible employees and the terms and conditions of such awards.
- Assisting the Group Board in its oversight of the development, implementation and effectiveness of policies and strategies relating
 to the Human Capital Management ("HCM") function, including recruiting, retention, career development and progression,
 management succession (other than that within the purview of the Corporate Governance and Nominating Committee) and
 diversity.
- The Compensation Committee held 10 meetings in 2023 to discuss and make determinations regarding remuneration.
- The members of the Compensation Committee at the end of 2023 were Kimberley D. Harris (Chair), M. Michele Burns, Kevin R. Johnson, Ellen J. Kullman, Lakshmi N. Mittal, and Adebayo O. Ogunlesi (ex-officio). None of the members of the Compensation Committee was an employee of the firm. All members of the Compensation Committee were "independent" within the meaning of the New York Stock Exchange Rules and the Group Board Policy on Director Independence.

External Consultants

The Compensation Committee recognises the importance of using a remuneration consultant that is appropriately qualified and is determined to be independent.

For 2023, the Compensation Committee received the advice of a remuneration consultant from Frederic W. Cook & Co., Inc.

Other Group Stakeholders

In carrying out the responsibilities of the Compensation Committee, the Chair of the Compensation Committee met multiple times with senior management during the year, including the firm's Chief Operating Officer ("COO"), the Executive Vice President, the Global Head of HCM and other members of senior management.

The GSAM B.V. Compensation Committee

The GSAM B.V. Compensation Committee (the "GSAM B.V. Compensation Committee") operates in line with GS Group policies and practices.

The members of the GSAM B.V. Compensation Committee at the end of 2023 were Martijn Canisius (Chair), Anya Radford, Jan van Vulpen, Patrick den Besten and Kameliya Evtimova. The responsibilities of the GSAM B.V. Compensation Committee include:

- Overseeing the development and implementation of the Goldman Sachs Asset Management B.V. remuneration policy ("the GSAM B.V. Compensation Policy") and related practices of GSAM B.V. in accordance with the relevant provisions in and any other applicable law and regulation.
- Supporting the GSAM B.V. Supervisory Compensation Committee with regard to reviewing and approving the remuneration of the GSAM B.V. Board and the highest paid staff members of GSAM B.V. and the senior officers in the independent control functions.
- Preparing appropriate recommendations for holdback of deferred compensation by way of malus and or holdback to GSAM B.V. staff, to be signed-off by the GSAM B.V. Supervisory Compensation Committee.

The GSAM B.V. Compensation Committee held 4 meetings in 2023 in fulfilment of these responsibilities.

GSAM B.V. Supervisory Compensation Committee

The GSAM B.V. Supervisory Compensation Committee oversees the development and implementation of those remuneration policies and practices of GSAM B.V. that are required to supplement the global Compensation Policy of GS Group in accordance with applicable law and regulations.

The GSAM B.V. Supervisory Committee works alongside the GSAM B.V. Compensation Committee. The GSAM B.V. Supervisory Compensation Committee is chaired by Fadi Abuali.

The GSAM B.V. Supervisory Compensation Committee held 3 meetings in 2023 in fulfilment of these responsibilities.

Remuneration Risk Assessment

The GSAM B.V. Head of Reward presented the annual remuneration risk assessment to the GSAM B.V. Compensation Committee, to assist the GSAM B.V. Compensation Committee in its assessment of the effectiveness of GSAM B.V.'s remuneration programme, and particularly, whether the programme is consistent with the principle that variable remuneration does not encourage employees to expose the firm to imprudent risk. This assessment most recently occurred in March 2024, over performance year 2023.

Global Remuneration Determination Process

The firm's global process for setting variable remuneration (including the requirement to consider risk and compliance issues) applies to employees of GSAM B.V. and is subject to oversight by the GSAM B.V. Compensation Committee and the GSAM B.V. Supervisory Compensation Committee and ultimately the Group Board and the Compensation Committee. The firm uses a highly disciplined and robust process for setting variable remuneration across all regions following the processes outlined in the Compensation Frameworks.

In addition, as part of the remuneration determination process, members of the firm's Compliance, Risk, Employment Law Group and Employee Relations functions make arrangements for business and business unit management to take into consideration certain compliance, risk or control matters when determining remuneration of individuals.

Link Between Pay and Performance

In 2023, annual remuneration for employees comprised fixed remuneration (including base salary) and variable remuneration. The firm's remuneration practices provide for variable remuneration determinations to be made on a discretionary basis. Variable remuneration is based on multiple factors and is not set as a fixed percentage of revenue or by reference to any other formula, consistent with the process outlined in the Compensation Frameworks. Firmwide performance is a key factor in determining variable remuneration.

The firm is committed to aligning variable remuneration with performance. In order to do so, the performance of the firm, relevant business, and/or business unit, desk (if applicable) and individual over the past year, as well as over prior years, are taken into account.

The firm believes that multi-year guarantees should be avoided as they risk misaligning remuneration and performance, and guaranteed variable remuneration should be awarded in exceptional circumstances only (for example, for certain new hires).

Selection and remuneration of Identified Staff

GSAM B.V. selects Identified Staff (staff whose professional activities have material impact on the risk profile of GSAM) on the basis of both AIFMD and UCITS (being staff whose professional activities have a material impact on the Dutch licensed AIF(s), and/or the UCITS and/or GSAM based in The Hague). AIFMD and UCITS Identified Staff are selected in accordance with ESMA guidelines 2013/232 and 2016/575. Under its selection methodology, GSAM B.V. considers the categories as detailed in the aforementioned ESMA guidelines and conducts a review of employees who have a material impact and whose total remuneration takes them into the same remuneration bracket as senior managers and risk takers. GSAM B.V. also selected Identified Staff on the basis of the Regulatory Technical Standards on Identified Staff under IFD in 2023. It should be noted that IFD ceased to apply to any entities in The Netherlands during the year.

The applied selection methodology and selection criteria were approved by the GSAM B.V. Compensation Committee.

Performance Measurement

Financial performance is measured at the firmwide, business, business unit, desk and individual level as applicable. Employees are evaluated annually as part of the performance review feedback process. The process reflects evaluation of employee objectives and performance focusing on matters including but not limited to teamwork and collaboration.

Firmwide performance

The following metrics are among the firmwide financial performance measures, considered in determining amounts, although the firm does not use specific measures/targets as part of a formula:

- · Net revenues;
- · Provision for credit losses;
- · Revenues net of provision for credit losses;
- · Compensation and benefits expense;
- · Non-compensation expenses;
- · Pre-tax earnings;
- · Net earnings;
- Ratio of compensation and benefits to revenues net of provision for credit losses;
- · Efficiency ratio;
- · Diluted earnings per share;
- · Return on average common equity;
- · Return on average tangible common equity; and
- Book value per common share.

Business, business unit, desk performance

Additionally, at both the business and business unit level, quantitative and/or qualitative metrics specific to such levels, respectively, and below are used to evaluate the performance of the business/business unit and their respective employees.

Individual performance

Employees are evaluated annually as part of the performance review feedback process.

Performance Management for Identified Staff

The performance management principles applied to Identified Staff ensure that there is focus on financial and non-financial performance, strong leadership behavior and reinforcement of GSAM B.V.'s strategy. The principles also create alignment with the AIF and UCITS risk profile. The performance objectives include both financial and non-financial performance objectives according to the following balance:

- A maximum of 50% financial objectives for non-control functions Identified Staff
- A maximum of 15% financial objectives for control functions
- Control functions will only have financial performance objectives that are not linked to the performance of the business unit they control.

GSAM B.V. promotes robust and effective risk management. This includes risk management of sustainability risks (such as environment, society, governance and people related matters). It supports balanced risk-taking and long-term value creation. This will be supported, among others, by the processes related to determining performance targets that can be linked to variable remuneration. Investment professionals are required and all staff are encouraged to incorporate objectives related to sustainability and the integration of sustainability risks.

Risk Adjustment

Prudent risk management is a hallmark of the firm's culture and sensitivity to risk and risk management are key elements in assessing employee performance, including as part of the performance review feedback process noted above.

The firm takes risk, including conduct risk, into account both on an ex-ante and ex-post basis when setting the amount and form of variable remuneration for employees. As indicated in the Compensation Frameworks, different lines of business have different risk profiles and these are taken into account when determining remuneration. These include Compliance and Operational Risk, Strategic and Business Environment Risk, Credit and Market Risk, Liquidity and Funding Risk and the potential for reputational risk that may emanate from any of the aforementioned risks.

Guidelines are provided to assist compensation managers when exercising discretion during the remuneration process to promote appropriate consideration of the different risks presented by the firm's businesses. Further, to ensure the independence of control function employees, remuneration for those employees is not determined by individuals in revenue-producing positions but rather by the management of the relevant control function.

Consistent with prior years, for 2023 certain employees receive a portion of their variable remuneration as a share-based award that is subject to a number of terms and conditions that could result in forfeiture or recapture. For further details, see "Structure of Remuneration" below.

In the 2023 annual remuneration risk assessment presented to the Compensation Committee, meeting jointly with the Risk Committee of the Group Board, GS Group's CRO confirmed that the various components of the firm's remuneration programmes and policies (for example, process, structure and governance) balanced risk and incentives in a manner that does not encourage imprudent risk-taking. In addition, the CRO stated that the firm has a risk management process that, among other things, is consistent with the safety and soundness of the firm and focuses on our:

- (i) Risk management culture: the firm's culture emphasises continuous and prudent risk management;
- (ii) Risk-taking authority: there is a formal process for identifying employees who, individually or as part of a group, have the ability to expose the firm to material amounts of risk;
- (iii) Upfront risk management: the firm has tight controls on the allocation, utilisation and overall management of risk-taking, as well as comprehensive profit and loss and other management information which provide ongoing performance feedback. In addition, in determining variable remuneration, the firm reviews performance metrics that incorporate ex-ante risk adjustments; and
- (iv) Governance: the oversight of the Group Board, management structure and the associated processes all contribute to a strong control environment and control functions have input into remuneration structure and design.

The GSAM B.V. Compensation Committee has also reviewed the annual compensation-related risk assessment with respect to GSAM B.V.

Structure of Remuneration

Fixed Remuneration

The firm has a global salary approach to ensure consistency in salary levels and to achieve an appropriate balance between fixed and variable remuneration.

Variable Remuneration

For employees with total remuneration and variable remuneration above specific thresholds, variable remuneration is generally paid in a combination of cash and equity-based remuneration. In general, the portion paid in the form of an equity-based award increases as variable remuneration increases and, for Identified Staff, is set to ensure compliance with the applicable rules of the AIFMD and UCITS Directive.

The variable remuneration programme is flexible to allow the firm to respond to changes in market conditions and to maintain its pay-for-performance approach. Variable remuneration is discretionary (even if paid consistently over a period of years).

Equity-Based Remuneration

The firm believes that remuneration should encourage a long-term, firmwide approach to performance and discourage imprudent risk-taking. Paying a significant portion of variable remuneration in the form of equity-based remuneration that delivers over time, changes in value according to the price of shares of common stock (shares) of GS Group and/or the performance of GSAM B.V. funds, and is subject to forfeiture or recapture encourages a long-term, firmwide focus because its value is realised through long-term responsible behaviour and the financial performance of the firm.

To ensure continued alignment to the investment activities of GSAM B.V., Identified Staff and GSAM B.V. staff eligible for equity-based remuneration are generally awarded both GS Group Restricted Stock Units ("RSUs") and Phantom Units under the Goldman Sachs NNIP Phantom Investment Plan ("GSAM B.V. Phantom Unit Plan"), described further below.

The firm imposes transfer restrictions, retention requirements, and anti-hedging policies on RSUs to further align the interests of the firm's employees with those of the firm's shareholders. The firm's retention and transfer restriction policies, coupled with the practice of paying senior employees a significant portion of variable remuneration in the form of share-based awards, leads to a considerable investment in shares of GS Group over time.

- Identified Staff upfront award: For Identified Staff, the upfront part of the award consists of cash and GSAM B.V. Phantom units. These Phantom Units are tied to the performance of funds managed by GSAM B.V. and vest immediately upon grant. A 12 month retention applies over all upfront GSAM B.V. Phantom Unit awards.
- Deferral Policy: The deferred portion of fiscal year 2023 annual variable remuneration was generally awarded in the form of RSUs and GSAM B.V. Phantom Units. An RSU is an unfunded, unsecured promise to deliver a share on a predetermined date. RSUs awarded in respect of fiscal year 2023 generally deliver in three equal instalments on or about each of the first, second and third anniversaries of the grant date, and GSAM B.V. Phantom Units generally vest in three equal instalments on or about each of the first, second and third anniversaries of the grant date, assuming the employee has satisfied the terms and conditions of the award at each such date.
- Transfer Restrictions over RSUs: The firm generally requires certain individuals to hold a material portion of the shares they receive in respect of RSUs granted as part of their year-end remuneration according to the firm's global deferral table. These transfer restrictions apply to the lower of 50% of the shares delivered before reduction for tax withholding, or the number of shares received after reduction for tax withholding. Because combined tax and social security rates in the Netherlands are close to 50%, transfer restrictions apply to substantially all net shares delivered to employees resident in the Netherlands.

An employee generally cannot sell, exchange, transfer, assign, pledge, hedge or otherwise dispose of any RSUs or shares that are subject to transfer restrictions.

- Retention Requirement: For certain individuals the firm requires that the GSAM B.V. Phantom Units awarded in relation to their variable remuneration will remain subject to a 12 month retention period after vesting. All GSAM B.V. Phantom Units awarded to employees designated as Identified Staff are subject to this retention requirement.
- Forfeiture and Recapture Provisions: The RSUs and shares delivered thereunder and GSAM B.V. Phantom Units awarded in relation to variable remuneration are subject to forfeiture or recapture if the Compensation Committee or its delegate(s) determine(s) that during 2023 the employee participated (or otherwise oversaw or was responsible for, depending on the circumstances, another individual's participation) in the structuring or marketing of any product or service, or participated on behalf of the firm or any of its clients in the purchase or sale of any security or other property, in any case without appropriate consideration of the risk to the firm or the broader financial system as a whole (for example, if the employee were to improperly analyse risk or fail sufficiently to raise concerns about such risk) and, as a result of such action or omission, the Compensation Committee or its delegate(s) determine(s) there has been, or reasonably could be expected to be, a material adverse impact on the firm, the employee's business unit or the broader financial system.

This provision is not limited to financial risks and is designed to encourage the consideration of the full range of risks associated with the activities (for example, legal, compliance or reputational). The provision also does not require that a material adverse impact actually occur, but rather may be triggered if the firm determines that there is a reasonable expectation of such an impact.

The Compensation Committee previously adopted guidelines that set forth a formal process regarding determinations to forfeit or recapture awards for failure to consider risk appropriately upon the occurrence of certain pre-determined events (for example, in the event of annual firmwide, business unit and below or individual losses). The review of whether forfeiture or recapture is appropriate includes input from the CRO, as well as representatives from Legal Division, as appropriate. Determinations are made by the Compensation Committee or its delegates, with any determinations made by delegates reported to the Compensation Committee.

All variable remuneration granted to Identified Staff is generally subject to forfeiture or recapture in the event of a "material failure of risk management", or in the event that the employee engages in "serious misconduct", at any time during the seven year period after grant (equity-based awards) or payment (cash).

Additionally, RSUs and shares delivered thereunder and GSAM B.V. Phantom Units awarded in relation to variable remuneration are generally subject to forfeiture or recapture if it is appropriate to hold an Identified Staff accountable in whole or in part for an "adjustment event" that occurred during 2023. This may include conduct which resulted in a material loss of capital or a material relevant regulatory sanction for the firm.

An employee's RSUs and GSAM B.V. Phantom Units may also be forfeited, and shares delivered thereunder recaptured if the employee engages in conduct constituting "cause" at any time before the RSUs are delivered and any applicable transfer restrictions lapse. Cause includes, among other things, any material violation of any firm policy, any act or statement that negatively reflects on the firm's name, reputation or business interests and any conduct detrimental to the firm.

With respect to all of the forfeiture conditions, if the firm determines after delivery or release of transfer restrictions that an RSU or share delivered thereunder or GSAM B.V. Phantom Unit should have been forfeited or recaptured, the firm can require return of any shares delivered or repayment to the firm of the fair market value of the shares or GSAM B.V. Phantom Units when delivered or paid (including those withheld to pay taxes) or any other amounts paid or delivered in respect thereof.

- Hedging: The firm's anti-hedging policy ensures employees maintain the intended exposure to the firm's stock performance. In particular, all employees are prohibited from hedging RSUs, including shares that are subject to transfer restrictions. Employees may hedge only shares that they can otherwise sell. However, no employee may enter into uncovered hedging transactions or sell short any shares. Employees may only enter into transactions or otherwise make investment decisions with respect to shares during applicable "window periods".
- Treatment upon Termination or Change-in-Control: As a general matter, delivery schedules are not accelerated, and transfer restrictions are not removed, when an employee leaves the firm. The limited exceptions include death and "conflicted employment." A change in control alone is not sufficient to trigger acceleration of any deliveries or removal of transfer restrictions; only if the change in control is followed within 18 months by a termination of employment by the firm without "cause" or by the employee for "good reason" will delivery and release of transfer restrictions be accelerated.

Quantitative Disclosures

Remuneration over 2023

Over 2023, GSAM B.V. has awarded a total amount of EUR 124.09 mln to all employees. This amount consists of fixed remuneration of EUR 91.93 mln. and variable remuneration of EUR 32.16 mln. Per 31 December 2023 this concerned 770 employees and 5 board members of GSAM B.V. The majority of employees spend their time on activities that are directly or indirectly related to the management of the funds. There is no remuneration in the form of carried interest. In total GSAM B.V. awarded remuneration exceeding EUR 1 mln. to 2 employees.

From the above mentioned amounts, total remuneration for the board members is EUR 3.01 mln., of which fixed remuneration is EUR 1.58 mln. and variable remuneration is EUR 1.43 mln.

Remuneration paid or awarded for the financial year ended December 31, 2023 comprised fixed remuneration (salaries, allowances and director fees) and variable remuneration. Information of fixed remuneration and variable remuneration is not administered on fund level, resulting in the costs above to be disclosed on aggregated total management company level.

Aggregated fixed and variable remuneration over 2023

The following tables show aggregate quantitative remuneration information for all Identified Staff of GSAM B.V. selected on the basis of AIFMD, UCITs and/or IFD for the performance year 2023*.

Table 1: Aggregated fixed and variable remuneration for the performance year 2023 for Identified Staff

Remuneration information third parties

GSAM B.V. has (partly) outsourced its portfolio management activities to third parties. For each of these parties a Portfolio Management Agreement (PMA) has been arranged. The PMA guarantees efficient and effective services in accordance with the set agreements with these third parties. The services offered by these third parties based on the PMA are evaluated annually by GSAM B.V.

The transparency that GSAM B.V. maintains with regard to the applied compensation policy also includes transparency regarding the compensation policy of third parties who carry out portfolio management activities for GSAM B.V. By doing this GSAM B.V. is aligned with the guidance from the European regulator (ESMA).

GSAM B.V. annually requests information from third parties in order to be able to evaluate the services and information about the applied remuneration policy by the third party is included in this request. For more information about the remuneration policies of these third parties, please refer to: https://www.gsam.com/responsible-investing/en-INT/professional/about/policies-and-governance – Remuneration policy - Remuneration information delegates.

²⁻ Variable remuneration includes all conditional and unconditional awards in relation to the performance year 2022 as approved by the relevant committees and authorized per October 2022. This includes all payments to be processed through payroll per January 2023, and GSAM B.V. Phantom Unit awards as awarded to Identified Staff as well as all conditional deferred RSUs and GSAM B.V. Phantom Units. A reference to the allocated Funds is not available.

^{*}The Goldman Sachs Group, Inc. financial year for remuneration purposes does not align with the AIFMD / UCITS financial year. As such, 2023 remuneration figures are disclosed.

Goldman Sachs Funds Report of the Management Company V—Securities Financing Transactions Regulation ("SFTR") Disclosures (Unaudited) For the Year Ended 30 November 2024

The Management Company is required to make available an Annual Report for the financial year for each of its Funds, containing certain disclosures as set out in Article 13 of the European Commission Regulation 2015/2365 on transparency of securities financing transactions and of reuse (the "Regulation"). The disclosures set out below are included to meet the requirements of the Regulation.

¹ Total return swaps are typically traded under ISDA master agreements ("ISDAs") which govern various types of swap and FX transactions executed between the Portfolio and each swap counterparty. Under the ISDAs, collateral is calculated daily on an aggregate, net basis across all transactions and therefore, a portion of such collateral is related to derivative transactions which are not in scope for SFTR.

Please refer to Note 6 Securities lending for details on the quality of the non-cash collateral received.

The following information has been provided in accordance with Article 11 of Regulation (EU) 2019/2088 (the "Sustainable Finance Disclosure Regulation" or "SFDR".) For Portfolios of Goldman Sachs Asset Management ("GSAM") that promoted environmental and/or social characteristics during the reference period, information has been made available via the SFDR regulatory technical standards (RTS) (2022/1288) template.

The disclosures provided below refer to a reference period of 1 December 2023 to 30 November 2024 in alignment to the annual reporting period, unless otherwise stated within the periodic disclosure.

Supplementary information as it pertains to the periodic disclosures provided has been made available below.

I Economic Sector and sub-sector classification

The periodic disclosures refer to a combination of sector and sub-sector classification using information from both proprietary sources and third-party data providers.

The investment strategies use the statistical classification of economic activities in the European community, commonly referred to as NACE in which to classify sectors and subsectors.

For this reference period, the calculations are based on the average figure using periodic snapshots, such that the figures are representative of the reference period for which they relate to. Where Portfolios have closed mid-reference period, the calculations have been taken as of the last quarter end before closure date.

II Top investments of the financial products

For this reference period, the calculations are based on the average figure using periodic snapshots, such that the figures are representative of the reference period for which they relate to. Where Portfolios have closed mid-reference period, the calculations have been taken as of the last quarter end before closure date.

Percentage of assets disclosed in the periodic disclosures may not agree to the schedule of investments in the annual report, primarily due to accrued interests and differences in aggregation methodology of investments.

III Asset allocation figures

For this reference period, the calculations are based on the average figure using periodic snapshots, such that the figures are representative of the reference period for which they relate to, unless specifically stated in the periodic disclosure.

IV Sustainability indicators

For this reference period, the calculations are based on the average figure using periodic snapshots, such that the figures are representative of the reference period for which they relate to, unless specifically stated in the periodic disclosure. This approach is in line with the previous reporting period. However, this approach differs to that of the 2022 reporting period, for which the performance of indicators contained within the comparative table for this period have not been restated to reflect the revised methodology applied for this reference period.

V Update to the percentage of investments aligned with E/S characteristics

The pre-contractual disclosures of multiple Portfolios were amended with effect on the 25 November 2024, whereby the expected percentage of investments aligned with E/S characteristics were adjusted as a result of amendments to the methodology assessing asset allocation across all Portfolios. It was also clarified that issuers for which relevant E/S data is not available are included in the "#2 Other" category.

The list of affected Portfolios can be viewed on pages 627-628.

VI Update to SI Commitments

The pre-contractual disclosures of multiple Portfolios were updated with effect on the 25 November 2024 to increase the minimum sustainable investment commitments, as further detailed on page 629.

Periodic disclosure for Portfolios that are not subject to Article 8 or Article 9 of SFDR:

Portfolios	SFDR Category	Taxonomy Regulation
Global Future Economic Security Equity Portfolio	6 (positive)	The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities.
North America Energy & Energy Infrastructure Equity Portfolio	6 (positive)	The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities.
Global Securitised Income Bond Portfolio	6 (negative)	The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities.
US Mortgage Backed Securities Portfolio	6 (positive)	The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities.
Global Multi-Asset Income Portfolio	6 (positive)	The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities.
Global Absolute Return Portfolio	6 (positive)	The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities.
Global Strategic Macro Bond Portfolio	6 (positive)	The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities.
Absolute Return Tracker Portfolio	6 (negative)	The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities.
Alternative Trend Portfolio	6 (negative)	The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities.

Find below an overview of how Article 6 (Positive) and Article 6 (Negative) differ:

Article 6 (Negative)

The Manager does not specifically consider sustainability risks in its investment decision making; however it may have regard to relevant sustainability events or conditions and their potential detrimental impact on specific investments of the Account from time to time.

Article 6 (Positive)

Sustainability risk is defined in the Sustainable Finance Disclosure Regulation as an environmental, social or governance event or condition, that could cause an actual or a potential material negative impact on the value of your portfolio or specific investments that we manage or advise on. The universe of sustainability risks is broad; however examples include physical environmental risks, climate change transition risks, supply chain disruptions, improper labour practices, lack of board diversity and corruption.

Certain GSAM discretionary offerings may be exposed to different sustainability risks from time to time, depending on their investment strategy, asset classes and geographic focus (among other considerations). The Manager may integrate sustainability risks in its investment decision making process through the consideration of certain environmental, social and governance indicators. Sustainability risks may be considered as part of the investment or advisory process as appropriate, by reference to the investment strategy of the Account, alongside other ESG indicators to assess their potential impact on the quality of a particular investment. The Manager may utilise proprietary and/or third-party data and research to assess and monitor sustainability risks that are relevant to the Account.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:

Goldman Sachs Asia Equity Portfolio

Legal entity identifier: CKMUZP6Q1OT0UD6LTF80

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes It made sustainable investments with an It promoted Environmental/Social (E/S) environmental objective: % characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 39.53% of sustainable investments in economic activities that qualify as with an environmental objective in economic activities that qualify as environmentally environmentally sustainable under the **EU Taxonomy** sustainable under the EU Taxonomy in economic activities that do not qualify with an environmental objective in economic as environmentally sustainable under activities that do not qualify as environmentally the EU Taxonomy sustainable under the EU Taxonomy with a social objective It made sustainable investments with a It promoted E/S characteristics, but did not make social objective: % any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- adult entertainment;
- for-profit prisons;
- civilian firearms.

The Portfolio additionally excluded from its investment universe companies the Investment Adviser believes to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators have performed as follows:

- 0% of the companies in the Portfolio were directly engaged in, and/or derived significant revenues from:
- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- adult entertainment;
- for-profit prisons;
- civilian firearms
- 0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	Unit
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above)	0	0	0	%
Companies violating the United Nations Global Compact`s ten principles	Not applicable	0	0	%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Investment Adviser's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Investment Adviser's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	GHG emissions Carbon footprint GHG intensity of investee companies Exposure to companies active in the fossil fuel sector Activities negatively affecting biodiversity-sensitive areas
Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises Unadjusted gender pay gap Board gender diversity Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)

Non-Mandatory Climate PAIs	 Investments in companies without carbon emission reduction initiatives Land degradation, desertification, soil sealing Investments in companies without sustainable land/agriculture practices Natural species and protected areas Deforestation
Non-Mandatory Social PAI	 Rate of accidents Number of days lost to injuries, accidents, fatalities or illness Incidents of discrimination Excessive CEO pay ratio

What were the top investments of this financial product?

What was the proportion of sustainability-related investments?

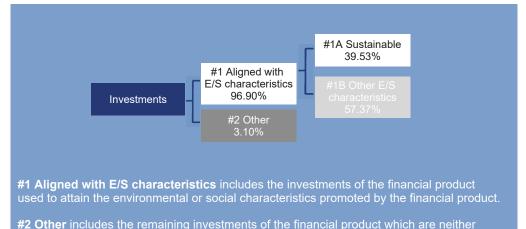

Over the reference period, 96.90% of investments were aligned to the environmental and/or social characteristics promoted by this Portfolio.

What was the asset allocation?

Over the reference period, 96.90% of investments were aligned to the environmental and/or social characteristics promoted by this Portfolio. 3.10% were held in cash, cash equivalents, and derivatives. And while the Portfolio did not have as its objective a sustainable investment, it had a proportion of 39.53% sustainable investments.

Over the reference period, a minimum of 90% of the Portfolio's investments were consistently aligned to the environmental and/or social characteristics described above.

Asset allocation describes the share of investments in specific assets.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- -The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	1 3 3 3 3 3 3 3 3 3 3 3 3 3 3 3 3 3 3 3	
	Yes	
	In fossil gas	In nuclear energy
×	No	

Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

To comply with the EU

Enabling activities directly enable other activities to make a substantial contribution to an environmenal objective. Transitional activities are activities for which low-carbon alternatives are not yet

available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds. 1. Taxonomy-alignment of investments including sovereign 2. Taxonomy-alignment of investments excluding sovereign bonds' Turnover Turnover CapEx CapEx OpEx 0% 20% 40% 60% 80% 100% Taxonomy-aligned: Fossil gas Taxonomy-aligned: Fossil gas Taxonomy-aligned: Nuclear Taxonomy-aligned: Nuclear Taxonomy-aligned (no gas and nuclear) Taxonomy-aligned (no gas and nuclear) ■ Non Taxonomy-aligned Non Taxonomy-aligned This graph represents 100% of the total investments * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it does not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%. As noted above, whether investments made by this product were sustainable investments is determined by reference to the Investment Adviser's Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote. No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- adult entertainment:
- for-profit prisons;
- civilian firearms.

The Portfolio additionally excluded from its investment universe companies the Investment Adviser believes to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators have performed as follows:

- 0% of the companies in the Portfolio were directly engaged in, and/or derived significant revenues from:
- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- adult entertainment;
- for-profit prisons;
- civilian firearms.
- \bullet 0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	Unit
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above)	0	0	0	%
Companies violating the United Nations Global Compact`s ten principles	Not applicable	0	0	%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Investment Adviser's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Investment Adviser's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	GHG emissions Carbon footprint GHG intensity of investee companies Exposure to companies active in the fossil fuel sector Share of non-renewable energy consumption and production Energy consumption intensity per high impact climate sector Activities negatively affecting biodiversity-sensitive areas Emissions to water Hazardous waste and radioactive waste ratio
Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises Unadjusted gender pay gap Board gender diversity Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)

Non-Mandatory Climate PAIs	Investments in companies without carbon emission reduction initiatives Land degradation, desertification, soil sealing Investments in companies without sustainable land/agriculture practices Natural species and protected areas Deforestation
Non-Mandatory Social PAI	 Rate of accidents Number of days lost to injuries, accidents, fatalities or illness Incidents of discrimination Excessive CEO pay ratio

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green
- operational expenditure (OpEx) reflecting green operational activities of investee companies

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it does not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%. As noted above, whether investments made by this product were sustainable investments is determined by reference to the Investment Adviser's Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

sustainable economic activities under

Regulation (EU)

2020/852

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote. No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

the Taxonomy or not

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- alcohol:
- adult entertainment;
- for-profit prisons;
- other weapons (including civilian firearms);
- gambling.

The Portfolio additionally excluded from its investment universe companies the Investment Adviser believes to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

Indicators measure

promoted by the financial product are attained.

how the environmental

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators have performed as follows:

- 0% of the companies invested in by the Portfolio were directly engaged in, and/or derived significant revenues from:
- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco
- alcohol;
- adult entertainment;
- for-profit prisons;
- other weapons (including civilian firearms);
- gambling.
- 0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	Unit
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above)	0	0	0	%
Companies violating the United Nations Global Compact`s ten principles	Not applicable	0	0	%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Investment Adviser's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Investment Adviser's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	 GHG emissions Carbon footprint GHG intensity of investee companies Exposure to companies active in the fossil fuel sector Share of non-renewable energy consumption and production Energy consumption intensity per high impact climate sector Activities negatively affecting biodiversity-sensitive areas Emissions to water Hazardous waste and radioactive waste ratio
Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises Unadjusted gender pay gap Board gender diversity Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)

Non-Mandatory Climate PAIs	Investments in companies without carbon emission reduction initiatives Land degradation, desertification, soil sealing Investments in companies without sustainable land/agriculture practices Non-recycled waste ratio Natural species and protected areas Deforestation
Non-Mandatory Social PAI	Investments in companies without workplace accident prevention policies Rate of accidents Number of days lost to injuries, accidents, fatalities or illness Incidents of discrimination Excessive CEO pay ratio Operations and suppliers at significant risk of incidents of child labour Operations and suppliers at significant risk of incidents of forced or compulsory labour Number of identified cases of severe human rights issues and incidents

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

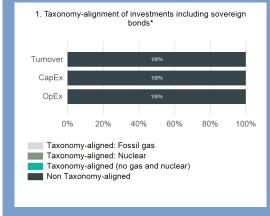

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

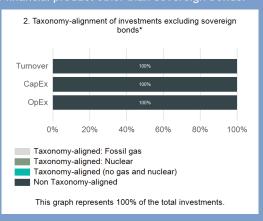

Yes

☐ In fossil gas ☐ In nuclear energy

⋈ No

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed

corresponding to the

best performance.

To comply with the EU

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU)

meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it does not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%. As noted above, whether investments made by this product were sustainable investments is determined by reference to the Investment Adviser's Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote. How did this financial product perform compared with the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

		de sustainable investments with a al objective:%			omoted E/S characteristics, but did not make sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- adult entertainment;
- for-profit prisons;
- civilian firearms.

The Portfolio additionally excluded from its investment universe companies the Investment Adviser believes to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators have performed as follows:

- 0% of the companies invested in by the Portfolio were directly engaged in, and/or derived significant revenues from:
- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco
- adult entertainment;
- for-profit prisons;
- civilian firearms.
- 0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	Unit
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above)	0	0	0	%
Companies violating the United Nations Global Compact`s ten principles	Not applicable	0	0	%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Investment Adviser's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Investment Adviser's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	GHG emissions Carbon footprint GHG intensity of investee companies Exposure to companies active in the fossil fuel sector Share of non-renewable energy consumption and production Energy consumption intensity per high impact climate sector Activities negatively affecting biodiversity-sensitive areas Emissions to water Hazardous waste and radioactive waste ratio
Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises Unadjusted gender pay gap Board gender diversity Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)

Non-Mandatory Climate PAIs	Investments in companies without carbon emission reduction initiatives Land degradation, desertification, soil sealing Investments in companies without sustainable land/agriculture practices Natural species and protected areas Deforestation
Non-Mandatory Social PAI	Investments in companies without workplace accident prevention policies Rate of accidents Number of days lost to injuries, accidents, fatalities or illness Incidents of discrimination Excessive CEO pay ratio Operations and suppliers at significant risk of incidents of child labour Operations and suppliers at significant risk of incidents of forced or compulsory labour Number of identified cases of severe human rights issues and incidents

Asset allocation

What was the proportion of sustainability-related investments?

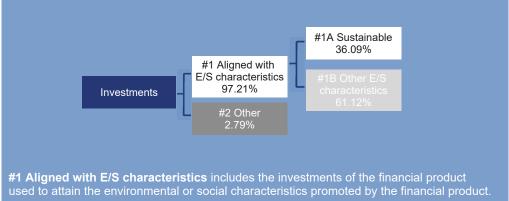

describes the share of investments in specific what was a

Over the reference period, 97.21% of investments were aligned to the environmental and/or social characteristics promoted by this Portfolio.

What was the asset allocation?

Over the reference period, 97.21% of investments were aligned to the environmental and/or social characteristics promoted by this Portfolio. 2.79% were held in cash, cash equivalents, and derivatives. And while the Portfolio did not have as its objective a sustainable investment, it had a proportion of 36.09% sustainable investments.

Over the reference period, a minimum of 90% of the Portfolio's investments were consistently aligned to the environmental and/or social characteristics described above.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable

The category **#1 Aligned with E/S characteristics** covers:

investments.

- -The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil	gas and/or nuclear	energy related	activities
complying with the EU Taxonomy ¹ ?			

	Yes	
	In fossil gas	In nuclear energy
×	No	

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmenal objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed

- -turnover reflecting the share of revenue from green activities of
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green
- operational
 expenditure (OpEx)
 reflecting green
 operational activities of

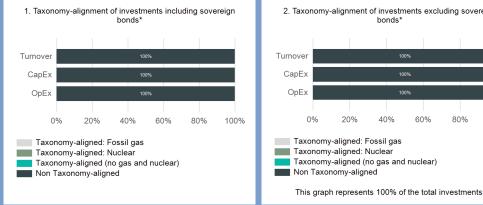

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign

2. Taxonomy-alignment of investments excluding sovereign

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it does not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%. As noted above, whether investments made by this product were sustainable investments is determined by reference to the Investment Adviser's Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote. No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

investment means an

economic activity that environmental or social objective, provided that the investment does not significantly harm any objective and that the investee companies follow good governance

Sustainable

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic

activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

			de sustainable investments with a al objective:%			moted E/S characteristics, but did not make ustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental promoted by the financial product are attained.

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- adult entertainment:
- for-profit prisons;
- civilian firearms.

The Portfolio additionally excluded from its investment universe companies the Investment Adviser believes to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio.

These sustainability indicators have performed as follows:

- 0% of the companies invested in by the Portfolio were directly engaged in, and/or derived significant revenues from:
- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- adult entertainment;
- for-profit prisons;
- civilian firearms.
- 0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles.

... and compared to previous periods ?

Sustainability Indicator November 30, 2023 November 30, 2024 Unit Companies invested in by the 0 % n Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above) Companies violating the United 0 0 % Nations Global Compact's ten principles

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Investment Adviser's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Investment Adviser's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	GHG emissions Carbon footprint GHG intensity of investee companies Exposure to companies active in the fossil fuel sector Share of non-renewable energy consumption and production Energy consumption intensity per high impact climate sector Activities negatively affecting biodiversity-sensitive areas Emissions to water Hazardous waste and radioactive waste ratio
Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises Unadjusted gender pay gap Board gender diversity Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)

Non-Mandatory Climate PAIs	Investments in companies without carbon emission reduction initiatives Land degradation, desertification, soil sealing Investments in companies without sustainable land/agriculture practices Natural species and protected areas Deforestation
Non-Mandatory Social PAI	Investments in companies without workplace accident prevention policies Rate of accidents Number of days lost to injuries, accidents, fatalities or illness Incidents of discrimination Excessive CEO pay ratio Operations and suppliers at significant risk of incidents of child labour Operations and suppliers at significant risk of incidents of forced or compulsory labour Number of identified cases of severe human rights issues and incidents

What was the proportion of sustainability-related investments?

Over the reference period, 97.37% of investments were aligned to the environmental and/or social characteristics promoted by this Portfolio.

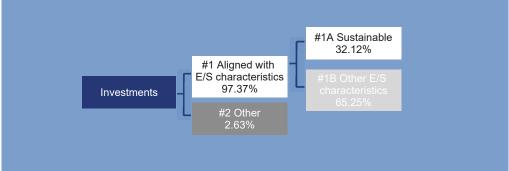

What was the asset allocation?

Over the reference period, 97.37% of investments were aligned to the environmental and/or social characteristics promoted by this Portfolio. 2.63% were held in cash, cash equivalents, and derivatives. And while the Portfolio did not have as its objective a sustainable investment, it had a proportion of 32.12% sustainable investments.

Over the reference period, a minimum of 90% of the Portfolio's investments were consistently aligned to the environmental and/or social characteristics described above.

Asset allocation describes the share of investments in specific

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product
- **#2** Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- -The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes		
	In fossil gas		In nuclear energy
×	No		

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules

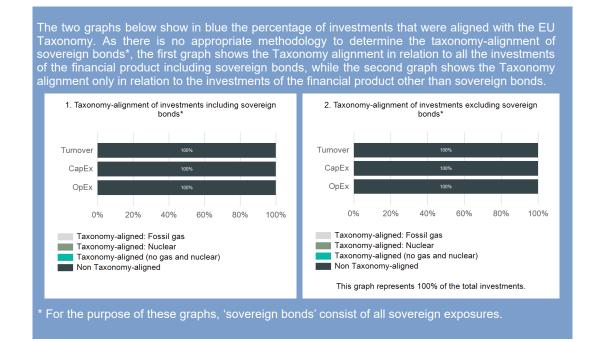

Enabling activities directly enable other activities to make a substantial contribution to an environmenal objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among

others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it does not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%. As noted above, whether investments made by this product were sustainable investments is determined by reference to the Investment Adviser's Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote. No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Goldman Sachs Global Environmental Impact Equity Portfolio

Sustainable investment objective

To what extent was the sustainable investment objective of this financial product met?

Sustainability indicators measure how the sustainable objectives of this financial product are attained. The Portfolio sought to create positive environmental impact by investing in companies that the Investment Advisor considered to be sustainable investments and which provide solutions that drive environmental sustainability, by virtue of their alignment to key themes associated with solving environmental problems. The key themes are represented by companies that, in the Investment Adviser's view, provide, invest in or help create products, services or technologies in areas including but not limited to:

- Clean Energy: present in areas such as solar energy, wind energy, bioenergy, energy storage, grid services and carbon sequestration.
- Resource Efficiency: present in areas such as electric and autonomous vehicles, sustainable manufacturing, logistics and smart cities.
- Sustainable Consumption: present in areas such as agriculture, food, tourism and fashion.
- Circular Economy: present in areas such as recycling and reuse, waste management and single-use substitution.
- · Water Sustainability: present in areas such as water treatment, water distribution and desalination.

Aditionally, the Portfolio has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- · tobacco;
- alcohol
- adult entertainment;
- · for-profit prisons;
- · civilian firearms;
- gambling;
- controversial weapons (including nuclear weapons).

The Portfolio additionally excluded from its investment universe companies the Investment Adviser believes to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the sustainable investment objective of the Portfolio.

These sustainability indicators have performed as follows:

- 100% of companies in the Portfolio demonstrating material alignment to one or more of the key themes according to the Investment Adviser's assessment
- Aggregate contribution of companies held in the Portfolio to environmental impact key performance indicators, as collected on a lagged annual basis:
- Clean energy: 203 Gigawatts of renewable energy capacity installed
- Resource Efficiency: 1.2 billion metric tons of CO2e avoided
- Sustainable Consumption: 225,738 metric tons of waste reduced
- Circular Economy: 45.0 million metric tons of material recycled
- Water Sustainability: 4.6 million megaliters of water saved
- •0% of the companies invested in by the Portfolio were directly engaged in, and/or derived significant revenues from:
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- alcohol;
- adult entertainment;
- for-profit prisons;
- civilian firearms;
- gambling;
- controversial weapons (including nuclear weapons).
- 0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles.
- 100% of companies in the Portfolio determined to meet the Investment Advisor's sustainable impact revenue threshold over the period by which the Portfolio was Article 9.

... and compared to previous periods ?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	Unit
Companies demonstrating material alignment to one or more of the key themes	Not applicable	100	100	%
(as outlined above)				
Clean Energy	Not applicable	180	203	Gigawatts (GW) of renewable energy capacity installed

Sustainable Consumption	Not applicable	755000	255738	Metric tons of waste reduced
Circular Economy	Not applicable	44 million	45 million	Metric tons of material recycled
Water Sustainability	Not applicable	4 million	4.6 million	Megaliters of water saved or treated
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities	0	0	0	%
(as outlined above)			-	
Companies violating the United Nations Global Compact's ten principles	Not applicable	0	0	%
Companies meeting the sustainable impact revenue threshold	Not applicable	100	100	%

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Investment Adviser's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	GHG emissions Carbon footprint GHG intensity of investee companies Exposure to companies active in the fossil fuel sector Share of non-renewable energy consumption and production Energy consumption intensity per high impact climate sector Activities negatively affecting biodiversity-sensitive areas Emissions to water Hazardous waste and radioactive waste ratio
Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises Unadjusted gender pay gap Board gender diversity Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAIs	Investments in companies without carbon emission reduction initiatives Land degradation, desertification, soil sealing Investments in companies without sustainable land/agriculture practices Natural species and protected areas Deforestation
Non-Mandatory Social PAI	 Rate of accidents Number of days lost to injuries, accidents, fatalities or illness Incidents of discrimination Excessive CEO pay ratio

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes	-	
	In fossil gas		In nuclear energy
×	No		

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmenal objective. Transitional activities are activities for which low-carbon

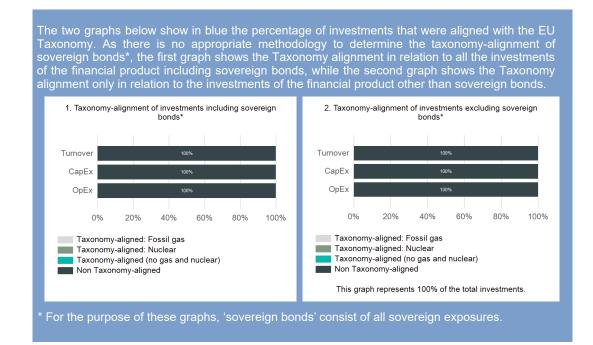

for which low-carbon alternatives are not yet available and among others have greenhouse gas

corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it does not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

The share of socially sustainable investments was 2.77%.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "not sustainable" were cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What actions have been taken to attain the sustainable investment objective during the reference period?

The Investment Adviser has taken actions to ensure that the sustainable investment objective of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective. No reference benchmark has been designated for the purpose of attaining the sustainable investment objective.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with

the Taxonomy or not

				_ '	with a social objective
		ade sustainable investments with a alobjective:%			moted E/S characteristics, but did not make sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- adult entertainment;
- for-profit prisons;
- civilian firearms.

The Portfolio additionally excluded from its investment universe companies the Investment Adviser believes to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators have performed as follows:

0% of the companies invested in by the Portfolio were directly engaged in, and/or derived significant revenues from:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco
- adult entertainment;
- for-profit prisons;
- civilian firearms.
- 0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	Unit
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above)	0	0	0	%
Companies violating the United Nations Global Compact's ten principles	Not applicable	0	0	%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Investment Adviser's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Investment Adviser's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	Exposure to companies active in the fossil fuel sector Activities negatively affecting biodiversity-sensitive areas GHG emissions Carbon footprint GHG intensity of investee companies
Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises Unadjusted gender pay gap Board gender diversity Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)

Non-Mandatory Climate PAIs	 Investments in companies without carbon emission reduction initiatives Land degradation, desertification, soil sealing Investments in companies without sustainable land/agriculture practices Natural species and protected areas Deforestation
Non-Mandatory Social PAI	 Rate of accidents Number of days lost to injuries, accidents, fatalities or illness Incidents of discrimination Excessive CEO pay ratio

What was the proportion of sustainability-related investments?

Over the reference period, 98.08% of investments were aligned to the environmental and/or social characteristics promoted by this Portfolio.

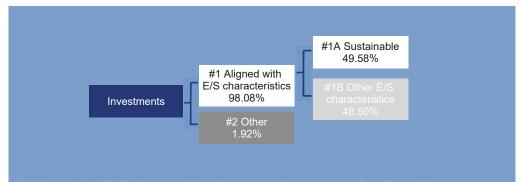

What was the asset allocation?

Over the reference period, 98.08% of investments were aligned to the environmental and/or social characteristics promoted by this Portfolio. 1.92% were held in cash, cash equivalents, and derivatives. And while the Portfolio did not have as its objective a sustainable investment, it had a proportion of 49.58% sustainable investments.

Over the reference period, a minimum of 90% of the Portfolio's investments were consistently aligned to the environmental and/or social characteristics described above.

Asset allocation

describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- -The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

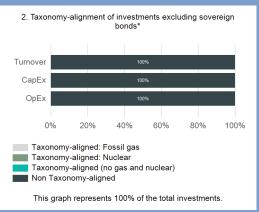

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes	
	In fossil gas	In nuclear energy
×	No	

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

activities are expressed as a share of: -turnover reflecting the

- capital expenditure (CapEx) showing the green investments made by investee

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

¹Fossil gas and/or nuclear related activities will only comple with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU)

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it does not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%. As noted above, whether investments made by this product were sustainable investments is determined by reference to the Investment Adviser's Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote. How did this financial product perform compared with the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

		ade sustainable investments with a all objective:%			noted E/S characteristics, but did not make ustainable investments	

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- alcohol;
- adult entertainment;
- for-profit prisons;
- other weapons (including civilian firearms);
- gambling.

The Portfolio additionally excluded from its investment universe companies the Investment Adviser believes to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators have performed as follows:

- 0% of the companies invested in by the Portfolio were directly engaged in, and/or derived significant revenues from:
- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco
- alcohol;
- adult entertainment;
- for-profit prisons;
- other weapons (including civilian firearms);
- gambling.
- 0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	Unit
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above)	0	0	0	%
Companies violating the United Nations Global Compact`s ten principles	Not applicable	0	0	%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Investment Adviser's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Investment Adviser's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	GHG emissions Carbon footprint GHG intensity of investee companies Exposure to companies active in the fossil fuel sector Share of non-renewable energy consumption and production Energy consumption intensity per high impact climate sector Activities negatively affecting biodiversity-sensitive areas Emissions to water Hazardous waste and radioactive waste ratio
Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises Unadjusted gender pay gap Board gender diversity Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)

Non-Mandatory Climate PAIs	 Investments in companies without carbon emission reduction initiatives Land degradation, desertification, soil sealing Investments in companies without sustainable land/agriculture practices Natural species and protected areas Deforestation
Non-Mandatory Social PAI	 Rate of accidents Number of days lost to injuries, accidents, fatalities or illness Incidents of discrimination Excessive CEO pay ratio

What was the proportion of sustainability-related investments?

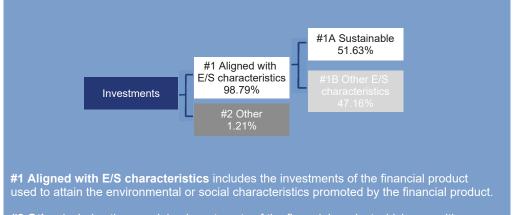

Asset allocation describes the share of investments in specific assets.

Over the reference period, 98.79% of investments were aligned to the environmental and/or social characteristics promoted by this Portfolio.

What was the asset allocation?

Over the reference period, 98.79% of investments were aligned to the environmental and/or social characteristics promoted by this Portfolio. 1.21% were held in cash, cash equivalents, and derivatives. And while the Portfolio did not have as its objective a sustainable investment, it had a proportion of 51.63% sustainable investments.

Over the reference period, a minimum of 90% of the Portfolio's investments were consistently aligned to the environmental and/or social characteristics described above.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- -The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

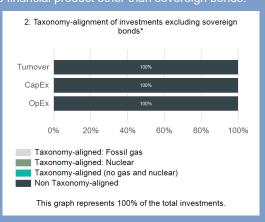

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes	
	In fossil gas	In nuclear energy
×	No	

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

activities to make a substantial contribution to an environmenal objective. **Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have

To comply with the EU

Taxonomy, the criteria for fossil gas include

limitations on emissions and switching to fully

renewable power or low-carbon fuels by the end of 2035. For

nuclear energy, the criteria include comprehensive safety

Enabling activities

and waste management

others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

¹Fossil gas and/or nuclear related activities will only comple the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies

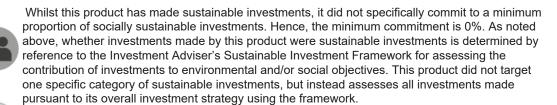

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

What was the share of socially sustainable investments?

Investments included under "other" include cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

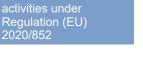

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote. How did this financial product perform compared with the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Sustainable

investment means an

economic activity that

environmental or social objective, provided that the investment does not significantly harm any

objective and that the investee companies follow good governance

		ade sustainable investments with a alobjective:%			noted E/S characteristics, but did not make ustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- adult entertainment;
- for-profit prisons;
- civilian firearms.

The Portfolio additionally excluded from its investment universe companies the Investment Adviser believes to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio.

These sustainability indicators have performed as follows:

- 0% of the companies invested in by the Portfolio were directly engaged in, and/or derived significant revenues from:
- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- adult entertainment;
- for-profit prisons;
- civilian firearms.
- 0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles.

... and compared to previous periods?

Sustainability Indicator November 30, November 30, November 30, Unit 2022 2024 0 % Companies invested in by the 0 0 Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above) Companies violating the Not applicable 0 0 % United Nations Global Compact's ten principles

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Investment Adviser's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Investment Adviser's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	GHG emissions Carbon footprint GHG intensity of investee companies Exposure to companies active in the fossil fuel sector Share of non-renewable energy consumption and production Energy consumption intensity per high impact climate sector Activities negatively affecting biodiversity-sensitive areas Emissions to water Hazardous waste and radioactive waste ratio

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes	
	In fossil gas	In nuclear energy
×	No	

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety

and waste management

rules

Enabling activities directly enable other activities to make a substantial contribution to an environmenal objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

Taxonomy-aligned activities are expressed as a share of:

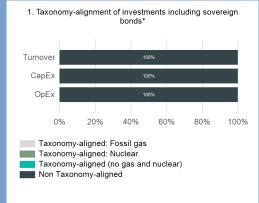

best performance.

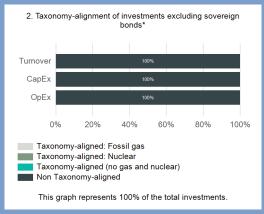

- -turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it does not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%. As noted above, whether investments made by this product were sustainable investments is determined by reference to the Investment Adviser's Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote. No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

activities. That
Regulation does not
include a list of socially
sustainable economic
activities. Sustainable
investments with an
environmental objective
might be aligned with
the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- adult entertainment;
- for-profit prisons;
- civilian firearms.

The Portfolio additionally excluded from its investment universe companies the Investment Adviser believes to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

Sustainability Indicators measure

Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio.

These sustainability indicators have performed as follows:

- 0% of the companies invested in by the Portfolio were directly engaged in, and/or derived significant revenues from:
- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- adult entertainment;
- for-profit prisons;
- civilian firearms.
- 0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles.

... and compared to previous periods ?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	Unit
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above)	0	0	0	%
Companies violating the United Nations Global Compact's ten principles	Not applicable	0	0	%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Investment Adviser's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Investment Adviser's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	GHG emissions Carbon footprint GHG intensity of investee companies Exposure to companies active in the fossil fuel sector Activities negatively affecting biodiversity-sensitive areas
Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises Unadjusted gender pay gap Board gender diversity Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)

Non-Mandatory Climate PAIs	 Investments in companies without carbon emission reduction initiatives Land degradation, desertification, soil sealing Investments in companies without sustainable land/agriculture practices Natural species and protected areas Deforestation
Non-Mandatory Social PAI	 Rate of accidents Number of days lost to injuries, accidents, fatalities or illness Incidents of discrimination Excessive CEO pay ratio

investments constituting

the greatest proportion of investments of the financial product during the reference period which is: 2023-12-01 / 2024-11-30

What was the proportion of sustainability-related investments?

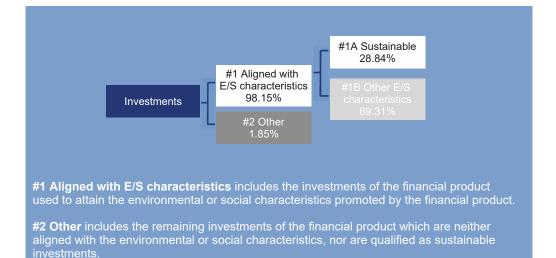

Asset allocation describes the share of investments in specific

Over the reference period, 98.15% of investments were aligned to the environmental and/or social characteristics promoted by this Portfolio.

What was the asset allocation?

Over the reference period, 98.15% of investments were aligned to the environmental and/or social characteristics promoted by this Portfolio. 1.85% were held in cash, cash equivalents, and derivatives. And while the Portfolio did not have as its objective a sustainable investment, it had a proportion of 28.84% sustainable investments.

Over the reference period, a minimum of 90% of the Portfolio's investments were consistently aligned to the environmental and/or social characteristics described above.

The category **#1 Aligned with E/S characteristics** covers:

- -The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Administrative and support service activities	Travel agency tour operator and other reservation service and related activities	1.33%
Cash	Cash	0.83%
Common	EQCORP	2.95%
Financial and insurance activities	Activities auxiliary to financial services and insurance activities	2.11%

Professional scientific and technical activities	Activities of head offices; management consultancy activities	0.20%
	Advertising and market research	0.48%
Real estate activities	Real estate activities	0.52%
Wholesale and retail trade; repair of motor vehicles and motorcycles	Retail trade except of motor vehicles and motorcycles	3.63%

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For

nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmenal objective. **Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

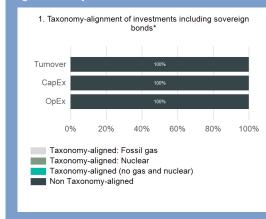

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

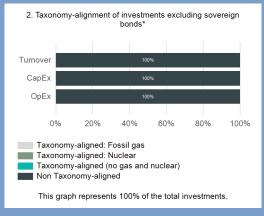

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes☐ In fossil gas☐ In nuclear energy☑ No

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it does not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%. As noted above, whether investments made by this product were sustainable investments is determined by reference to the Investment Adviser's Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Environmental and/or social characteristics

To what extent were the environmental and/or social characteristics promoted by this financial product met?

This Portfolio underwent a name change with effect on the 25th November 2024. The name of the Portfolio has changed from "Goldman Sachs Global Millennials Equity Portfolio" to "Goldman Sachs Global Future Generations Equity ".

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- adult entertainment:
- for-profit prisons;
- civilian firearms.

Over the reference period, the Portfolio additionally excluded from its investment universe companies the Investment Adviser believes to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an

environmental objective

might be aligned with

the Taxonomy or not

Sustainability Indicators measure how the environmental promoted by the financial product are attained.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators have performed as follows:

- 0% of the companies invested in by the Portfolio were directly engaged in, and/or derived significant revenues from:
- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco
- adult entertainment;
- for-profit prisons;
- civilian firearms.
- 0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles.

... and compared to previous periods ?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	Unit
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above)	0	0	0	%
Companies violating the United Nations Global Compact's ten principles	Not applicable	0	0	%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Investment Adviser's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Investment Adviser's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	GHG emissions Carbon footprint GHG intensity of investee companies Exposure to companies active in the fossil fuel sector Share of non-renewable energy consumption and production Energy consumption intensity per high impact climate sector Activities negatively affecting biodiversity-sensitive areas
Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises Unadjusted gender pay gap Board gender diversity Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)

Non-Mandatory Climate PAIs	Investments in companies without carbon emission reduction initiatives Land degradation, desertification, soil sealing Investments in companies without sustainable land/agriculture practices Natural species and protected areas Deforestation

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

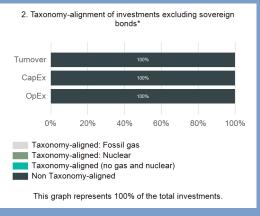

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy1?

	Yes	
	In fossil gas	In nuclear energy
×	No	

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it does not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the nuclear energy, the comprehensive safety and waste management

Enabling activities

directly enable other activities to make a substantial contribution objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among greenhouse gas best performance.

Taxonomy-aligned activities are expressed

- -turnover reflecting the share of revenue from green activities of
- capital expenditure (CapEx) showing the green investments companies, e.g. for a transition to a green
- operational expenditure (OpEx) reflecting green operational activities of

re sustainable

investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU)

What was the share of socially sustainable investments?

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%. As noted above, whether investments made by this product were sustainable investments is determined by reference to the Investment Adviser's Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes It made sustainable investments with an It promoted Environmental/Social (E/S) characteristics and while it did not have as its environmental objective: % objective a sustainable investment, it had a proportion of 24.62% of sustainable investments in economic activities that qualify as with an environmental objective in economic activities that qualify as environmentally environmentally sustainable under the **EU Taxonomy** sustainable under the EU Taxonomy in economic activities that do not qualify with an environmental objective in economic as environmentally sustainable under activities that do not qualify as environmentally the EU Taxonomy sustainable under the EU Taxonomy with a social objective It made sustainable investments with a It promoted E/S characteristics, but did not make social objective: % any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability
Indicators measure
how the environmental
or social characteristics
promoted by the
financial product are
attained.

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- adult entertainment;
- for-profit prisons;
- civilian firearms.

The Portfolio additionally excluded from its investment universe companies the Investment Adviser believes to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators have performed as follows:

- 0% of the companies invested in by the Portfolio were directly engaged in, and/or derived significant revenues from:
- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco
- adult entertainment;
- for-profit prisons;
- civilian firearms.
- 0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	Unit
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above)	0	0	0	%
Companies violating the United Nations Global Compact's ten principles	Not applicable	0	0	%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Investment Adviser's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Investment Adviser's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	Exposure to companies active in the fossil fuel sector Share of non-renewable energy consumption and production Energy consumption intensity per high impact climate sector Activities negatively affecting biodiversity-sensitive areas Emissions to water Hazardous waste and radioactive waste ratio GHG emissions Carbon footprint GHG intensity of investee companies
Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises Unadjusted gender pay gap Board gender diversity Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)

Non-Mandatory Climate PAIs	Investments in companies without carbon emission reduction initiatives Land degradation, desertification, soil sealing Investments in companies without sustainable land/agriculture practices Natural species and protected areas Deforestation
Non-Mandatory Social PAI	Investments in companies without workplace accident prevention policies Rate of accidents Number of days lost to injuries, accidents, fatalities or illness Incidents of discrimination Excessive CEO pay ratio Operations and suppliers at significant risk of incidents of child labour Operations and suppliers at significant risk of incidents of forced or compulsory labour Number of identified cases of severe human rights issues and incidents

What was the proportion of sustainability-related investments?

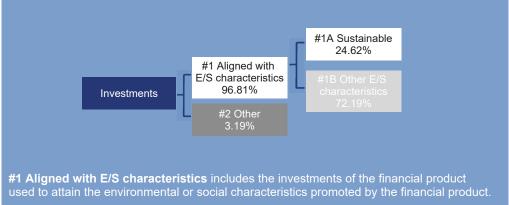

Over the reference period, 96.81% of investments were aligned to the environmental and/or social characteristics promoted by this Portfolio.

What was the asset allocation?

Over the reference period, 96.81% of investments were aligned to the environmental and/or social characteristics promoted by this Portfolio. 3.19% were held in cash, cash equivalents, and derivatives. And while the Portfolio did not have as its objective a sustainable investment, it had a proportion of 24.62% sustainable investments.

Over the reference period, a minimum of 90% of the Portfolio's investments were consistently aligned to the environmental and/or social characteristics described above.

Asset allocation describes the share of investments in specific

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- -The sub-category **#1A Sustainable** covers environmentally and socially sustainable
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes		
	In fossil gas		In nuclear energy
×	No		

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management

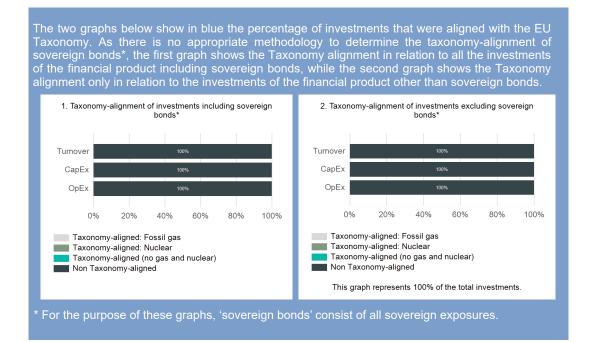

Enabling activities directly enable other activities to make a substantial contribution to an environmenal objective. Transitional activities are activities for which low-carbon alternatives are not yet

available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it does not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%. As noted above, whether investments made by this product were sustainable investments is determined by reference to the Investment Adviser's Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

sustainable economic activities under

Regulation (EU)

2020/852

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote. No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators have performed as follows:

- 0% of the companies invested in by the Portfolio were directly engaged in, and/or derived significant revenues from:
- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco
- adult entertainment;
- for-profit prisons;
- civilian firearms.
- 0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	Unit
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above)	0	0	0	%
Companies violating the United Nations Global Compact's ten principles	Not applicable	0	0	%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Investment Adviser's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Investment Adviser's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	Exposure to companies active in the fossil fuel sector Share of non-renewable energy consumption and production Energy consumption intensity per high impact climate sector Activities negatively affecting biodiversity-sensitive areas Emissions to water Hazardous waste and radioactive waste ratio GHG emissions Carbon footprint GHG intensity of investee companies

Mutual fund	MONEY MARKET	0.73%
	Retail trade except of motor vehicles and motorcycles	12.69%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

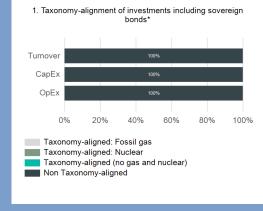

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes	
	In fossil gas	In nuclear energy
×	No	

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

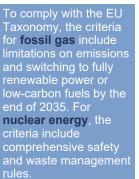

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it does not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%. As noted above, whether investments made by this product were sustainable investments is determined by reference to the Investment Adviser's Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

Enabling activities directly enable other activities to make a substantial contribution to an environmenal objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas

Taxonomy-aligned activities are expressed as a share of:

corresponding to the

best performance.

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green
- operational expenditure (OpEx) reflecting green operational activities o

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Goldman Sachs Japan Equity Portfolio

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? Yes It made sustainable investments with an It promoted Environmental/Social (E/S) characteristics and while it did not have as its environmental objective: % objective a sustainable investment, it had a proportion of 37.11% of sustainable investments in economic activities that qualify as with an environmental objective in economic activities that qualify as environmentally environmentally sustainable under the **EU Taxonomy** sustainable under the EU Taxonomy in economic activities that do not qualify with an environmental objective in economic as environmentally sustainable under activities that do not qualify as environmentally the EU Taxonomy sustainable under the EU Taxonomy with a social objective It made sustainable investments with a It promoted E/S characteristics, but did not make social objective: % any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- adult entertainment:
- for-profit prisons;
- civilian firearms.

The Portfolio additionally excluded from its investment universe companies the Investment Adviser believes to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators have performed as follows:

- 0% of the companies invested in by the Portfolio were directly engaged in, and/or derived significant revenues from:
- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco
- adult entertainment;
- for-profit prisons;
- civilian firearms.
- 0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	Unit
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above)	0	0	0	%
Companies violating the United Nations Global Compact`s ten principles	Not applicable	0	0	%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Investment Adviser's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Investment Adviser's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	 GHG emissions Carbon footprint GHG intensity of investee companies Activities negatively affecting biodiversity-sensitive areas
Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises Unadjusted gender pay gap Board gender diversity Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAIs	 Investments in companies without carbon emission reduction initiatives Land degradation, desertification, soil sealing Investments in companies without sustainable land/agriculture practices Natural species and protected areas Deforestation

Non-Mandatory Social PAI	Rate of accidents
	 Number of days lost to injuries, accidents,
	fatalities or illness
	Incidents of discrimination
	Excessive CEO pay ratio

What was the proportion of sustainability-related investments?

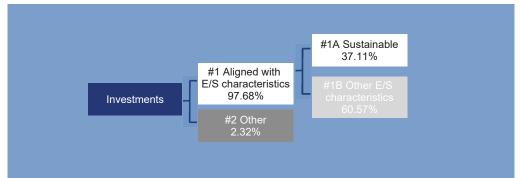

Over the reference period, 97.68% of investments were aligned to the environmental and/or social characteristics promoted by this Portfolio.

What was the asset allocation?

Over the reference period, 97.68% of investments were aligned to the environmental and/or social characteristics promoted by this Portfolio. 2.32% were held in cash, cash equivalents, and derivatives. And while the Portfolio did not have as its objective a sustainable investment, it had a proportion of 37.11% sustainable investments.

Over the reference period, a minimum of 90% of the Portfolio's investments were consistently aligned to the environmental and/or social characteristics described above.

Asset allocation

- **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2** Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- -The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities
directly enable other
activities to make a
substantial contribution
to an environmenal
objective. Transitional
activities are activities
for which low-carbon
alternatives are not yet
available and among
others have
greenhouse gas
emission levels
corresponding to the
best performance.

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

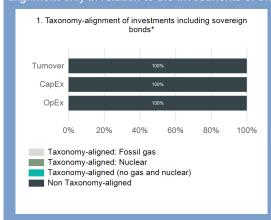

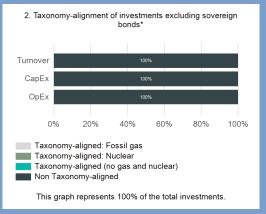

investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes☐ In fossil gas☐ In nuclear energy☑ No

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it does not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

ab ref

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%. As noted above, whether investments made by this product were sustainable investments is determined by reference to the Investment Adviser's Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote. No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

investment means an investment in an economic activity that

economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

Sustainable

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally

sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

		ade sustainable investments with a ial objective:%			noted E/S characteristics, but did not make ustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- alcohol;
- adult entertainment;
- for-profit prisons;
- civilian firearms;
- gambling.

The Portfolio additionally excluded from its investment universe companies the Investment Adviser believes to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio.

These sustainability indicators have performed as follows:

- 0% of the companies invested in by the Portfolio were directly engaged in, and/or derived significant revenues from:
- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- alcohol;
- adult entertainment;
- for-profit prisons;
- civilian firearms;
- gambling.
- 0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	Unit
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above)	0	0	0	%
Companies violating the United Nations Global Compact`s ten principles	Not applicable	0	0	%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Investment Adviser's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Investment Adviser's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	GHG emissions Carbon footprint GHG intensity of investee companies Exposure to companies active in the fossil fuel sector Share of non-renewable energy consumption and production Energy consumption intensity per high impact climate sector Activities negatively affecting biodiversity-sensitive areas Emissions to water Hazardous waste and radioactive waste ratio
Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises Unadjusted gender pay gap Board gender diversity Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)

Non-Mandatory Climate PAIs	 Investments in companies without carbon emission reduction initiatives Land degradation, desertification, soil sealing Investments in companies without sustainable land/agriculture practices Natural species and protected areas Deforestation
Non-Mandatory Social PAI	 Rate of accidents Number of days lost to injuries, accidents, fatalities or illness Incidents of discrimination Excessive CEO pay ratio

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

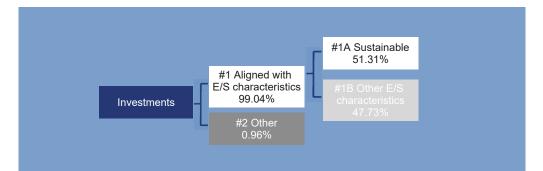

Over the reference period, 99.04% of investments were aligned to the environmental and/or social characteristics promoted by this Portfolio.

What was the asset allocation?

Over the reference period, 99.04% of investments were aligned to the environmental and/or social characteristics promoted by this Portfolio. 0.96% were held in cash, cash equivalents, and derivatives. And while the Portfolio did not have as its objective a sustainable investment, it had a proportion of 51.31% sustainable investments.

Over the reference period, a minimum of 90% of the Portfolio's investments were consistently aligned to the environmental and/or social characteristics described above.

- **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2** Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- -The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes	
	In fossil gas	In nuclear energy
×	No	

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management

directly enable other activities to make a substantial contribution to an environmenal objective. **Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities

Taxonomy-aligned activities are expressed as a share of:

operational activit<u>ies</u> of

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it does not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%. As noted above, whether investments made by this product were sustainable investments is determined by reference to the Investment Adviser's Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote. How did this financial product perform compared with the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Goldman Sachs US Small Cap Equity Portfolio

Environmental and/or social characteristics

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- adult entertainment;
- for-profit prisons;
- civilian firearms.

The Portfolio additionally excluded from its investment universe companies the Investment Adviser believes to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio.

These sustainability indicators have performed as follows:

- 0% of the companies invested in by the Portfolio were directly engaged in, and/or derived significant revenues from::
- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco:
- adult entertainment;
- for-profit prisons;
- civilian firearms.
- 0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles.

... and compared to previous periods ?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	Unit
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above)	0	0	0	%
Companies violating the United Nations Global Compact`s ten principles	Not applicable	0	0	%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Investment Adviser's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Investment Adviser's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	GHG emissions Carbon footprint GHG intensity of investee companies Exposure to companies active in the fossil fuel sector Activities negatively affecting biodiversity-sensitive areas
Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises Unadjusted gender pay gap Board gender diversity Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)

Non-Mandatory Climate PAIs	Investments in companies without carbon emission reduction initiatives Land degradation, desertification, soil sealing Investments in companies without sustainable land/agriculture practices Natural species and protected areas Deforestation
Non-Mandatory Social PAI	 Rate of accidents Number of days lost to injuries, accidents, fatalities or illness Incidents of discrimination Excessive CEO pay ratio

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the

end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmenal objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

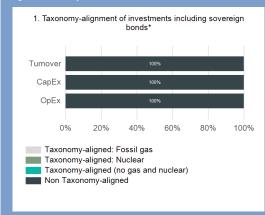

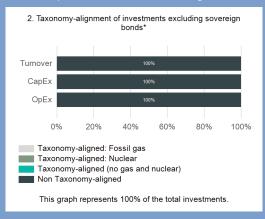

investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

- ☐ In fossil gas
- No.

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

In nuclear energy

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it does not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%. As noted above, whether investments made by this product were sustainable investments is determined by reference to the Investment Adviser's Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote. No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- adult entertainment;
- for-profit prisons;
- civilian firearms.

The Portfolio additionally excluded from its investment universe companies the Investment Adviser believes to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio.

These sustainability indicators have performed as follows:

- 0% of the companies invested in by the Portfolio were directly engaged in, and/or derived significant revenues from:
- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco:
- adult entertainment;
- for-profit prisons;
- civilian firearms.
- 0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	Unit
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above)	0	0	0	%
Companies violating the United Nations Global Compact`s ten principles	Not applicable	0	0	%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Investment Adviser's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Investment Adviser's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	 GHG emissions Carbon footprint GHG intensity of investee companies Exposure to companies active in the fossil fuel sector Activities negatively affecting biodiversity-sensitive areas
Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises Unadjusted gender pay gap Board gender diversity Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)

Non-Mandatory Climate PAIs	Investments in companies without carbon emission reduction initiatives Land degradation, desertification, soil sealing Investments in companies without sustainable land/agriculture practices Natural species and protected areas Deforestation
Non-Mandatory Social PAI	 Rate of accidents Number of days lost to injuries, accidents, fatalities or illness Incidents of discrimination Excessive CEO pay ratio

What were the top investments of this financial product?

Largest investments	Sector	% Assets	Country
MICROSOFT CORPORATION	Information and communication	9.26%	US
ALPHABET INC.	Information and communication	8.77%	US

Wholesale and retail trade; repair of motor vehicles and motorcycles	Retail trade except of motor vehicles and motorcycles	7.44%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil	gas and/or nuc	clear energy relate	d activities
complying with the EU Taxonomy ¹ ?			

	Yes	
	In fossil gas	In nuclear energ
×	No	

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For

nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmenal objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

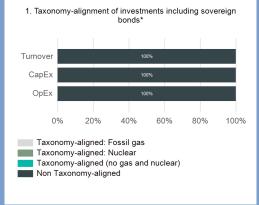

Taxonomy-aligned activities are expressed

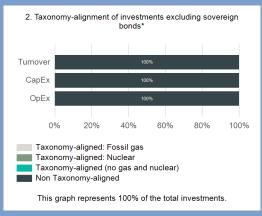

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%. As noted above, whether investments made by this product were sustainable investments is determined by reference to the Investment Adviser's Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

minimum proportion of sustainable investments with an environmental objective that are not

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote. No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for financial products referred to in Article 9 (1), (2) and (3) of Regulation (EU) 2019/2088 and Article 5 of Regulation (EU) 2020/852

Goldman Sachs Global Clean Energy Infrastructure Equity Portfolio

Sustainable investment objective

To what extent was the sustainable investment objective of this financial product met?

This Portfolio was repositioned to meet the requirements for disclosures pursuant to Article 9 of the EU SFDR with effect on the 25th November 2024, having made disclosures pursuant to Article 8 of the EU SFDR for the remainder of the reference period. In particular, the Portfolio now has sustainable investment as its objective.

From 1st December 2023 - 25th November 2024, the Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process by investing in renewable energy companies that contributed to the decarbonisation of the economy by generating, producing, transmitting, and/or distributing renewable energy (the "ESG

Renewable energy companies included companies that were either:

- · classified by the Nomenclature of Economic Activities ("NACE") as Electricity, Gas, Steam and Air Conditioning Supply;
- in the S&P Global Clean Energy Index, the Eagle Global Renewables Infrastructure Index, the Eagle North American Renewables Infrastructure Index or
- · have 50% of their assets committed to or derived from income, earnings, sales or profits of renewable energy electricity generation (wind, solar, hydrogen, geothermal, biomass, etc.), renewable storage, electric transmission and distribution, renewable energy equipment development and manufacturing, electrified transport, biofuel production, carbon capture, or energy efficiency solutions (including smart

With effect on the 25th November 2024, the Portfolio sought to create positive environmental impact by investing in renewable energy companies that the Investment Advisor considered to be sustainable investments and which contribute to the decarbonisation of the economy by generating, producing, transmitting, and/or distributing renewable energy.

Renewable energy companies refers to companies that:

- are in the S&P Global Clean Energy Index, the Eagle Global Renewables Infrastructure Index or
- · have at least 50% of their assets, income, earnings, sales or profits committed to, or derived from, any segment of the clean energy value chain, which would include the following:
- (i) Energy producers/manufacturers include companies that are engaged in the manufacturing and development of clean energy technology, including solar panels, wind turbines, batteries and fuel cells.
- (ii) Clean energy infrastructure companies include companies that primarily own, operate and in some cases develop clean energy and storage assets (solar, wind, hydro, biofuels, hydrogen, biomass, etc.). (iii) Energy users include companies that are enabling increased or more efficient consumption of

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation establishing a list of

environmentally sustainable economic activities. That

Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an the Taxonomy or not.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

renewable energy/electricity by various end-use sectors (residential, commercial, industrial, transport).

• Aggregate contribution of companies held in the Portfolio to environmental impact key performance indicators that include, but are not limited to, installed renewable energy capacity.

How did the sustainability indicators perform?

From 1st December 2023- 25th November 2024, the Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio.

These sustainability indicators have performed as follows:

• Over the reference period, the carbon intensity of the Portfolio measured 1538.5 Tons CO2e per \$M Sales. The carbon intensity of the benchmark, as defined as the Energy & Utilities sleeve of the MSCI All Country World Index (ACWI) measured 3213.05 Tons CO2e per \$M Sales.

Additionally, the Portfolio has consistently achieved a lower average carbon intensity than the benchmark over the reference period. For purposes of assessing the Portfolio's full exposure to carbon emissions and assessing transitional risks, the Investment Adviser takes the sum of scope 1, 2 and 3 carbon emissions.

With effect on the 25th November 2024, this Portfolio implemented new sustainability indicators, as outlined in the previous question.

These sustainability indicators have performed as follows:

- 16.57% of out-of-index companies in the Portfolio with at least 50% of their assets, income, earnings, sales or profits committed to, or derived from, any segment of the clean energy value chain, as defined above.
- Split between % of companies in the Portfolio that are considered to be energy producers / manufacturers, those that are considered to be clean energy infrastructure companies and those that are considered to be energy users.

Energy producers/manufacturers: 20.21% Clean energy infrastructure companies: 50.14%

Energy users: 29.65%

 Aggregate contribution of companies held in the Portfolio to environmental impact key performance indicators that include, but are not limited to, installed renewable energy capacity*

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Investment Adviser's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	GHG emissions Carbon footprint GHG intensity of investee companies Exposure to companies active in the fossil fuel sector Share of non-renewable energy consumption and production Energy consumption intensity per high impact climate sector Activities negatively affecting biodiversity-sensitive areas Emissions to water Hazardous waste and radioactive waste ratio
Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises Unadjusted gender pay gap Board gender diversity Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAIs	 Investments in companies without carbon emission reduction initiatives Land degradation, desertification, soil sealing Investments in companies without sustainable land/agriculture practices Natural species and protected areas Deforestation
Non-Mandatory Social PAI	Rate of accidents Number of days lost to injuries, accidents, fatalities or illness Incidents of discrimination Excessive CEO pay ratio

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2023-12-01 / 2024-11-30

	Manufacture of machinery and equipment n.e.c.	3.36%
	Manufacture of other non- metallic mineral products	0.53%

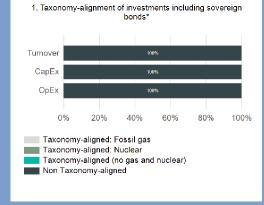

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

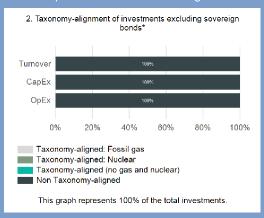

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes	
	In fossil gas	In nuclear energy
[편 1	No	

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include

Enabling activities

directly enable other activities to make a substantial contribution to an environmenal objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

re sustainable

investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU)

Whilst this Portfolio has invested in sustainable investments, it does not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%. As noted above, whether investments made by this product were sustainable investments is determined by reference to the Investment Adviser's Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "not sustainable" were cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Investment Adviser has taken actions to ensure that the sustainable investment objective of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared to the reference sustainable benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

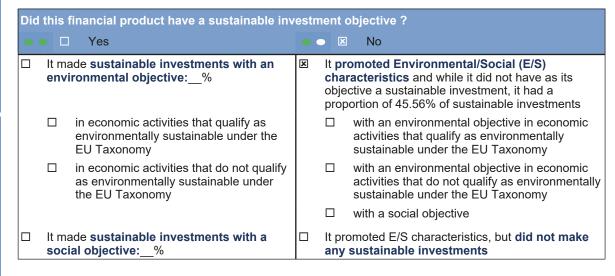

practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
Goldman Sachs Global Infrastructure
Equity Portfolio

Environmental and/or social characteristics

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- adult entertainment;
- for-profit prisons;
- civilian firearms.

The Portfolio additionally excluded from its investment universe companies the Investment Adviser believes to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators have performed as follows:

- 0% of the companies invested in by the Portfolio were directly engaged in, and/or derived significant revenues from:
- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco
- adult entertainment;
- for-profit prisons;
- civilian firearms.
- 0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	Unit
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above)	0	0	0	%
Companies violating the United Nations Global Compact's ten principles	Not applicable	0	0	%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Investment Adviser's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Investment Adviser's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	GHG emissions Carbon footprint GHG intensity of investee companies Exposure to companies active in the fossil fuel sector Activities negatively affecting biodiversity-sensitive areas
Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises Unadjusted gender pay gap Board gender diversity Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)

Non-Mandatory Climate PAIs	 Investments in companies without carbon emission reduction initiatives Land degradation, desertification, soil sealing Investments in companies without sustainable land/agriculture practices Natural species and protected areas Deforestation
Non-Mandatory Social PAI	 Rate of accidents Number of days lost to injuries, accidents, fatalities or illness Incidents of discrimination Excessive CEO pay ratio

What was the proportion of sustainability-related investments?

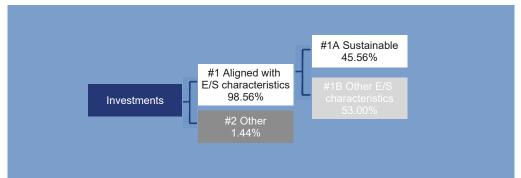

Asset allocation describes the share of investments in specific assets. Over the reference period, 98.56% of investments were aligned to the environmental and/or social characteristics promoted by this Portfolio.

What was the asset allocation?

Over the reference period, 98.56% of investments were aligned to the environmental and/or social characteristics promoted by this Portfolio. 1.44% were held in cash, cash equivalents, and derivatives. And while the Portfolio did not have as its objective a sustainable investment, it had a proportion of 45.56% sustainable investments.

Over the reference period, a minimum of 90% of the Portfolio's investments were consistently aligned to the environmental and/or social characteristics described above.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- -The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Wholesale and retail trade; repair of motor vehicles and motorcycles	Wholesale trade except of motor vehicles and motorcycles	2.68%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or

¹Fossil gas and/or nuclear related activities will only comply 77 the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities
directly enable other
activities to make a
substantial contribution
to an environmenal
objective. Transitional
activities are activities

Taxonomy-aligned activities are expressed as a share of:

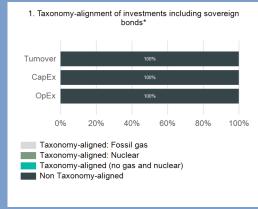

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

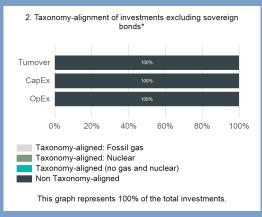

investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

☐ Yes☐ In fossil gas☐ In nuclear energy☑ No

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aliqued with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it does not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%. As noted above, whether investments made by this product were sustainable investments is determined by reference to the Investment Adviser's Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote. No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

				□ with a social objective			
		ade sustainable investments with a ial objective:%		It promoted E/S characteristics, but did not make any sustainable investments			

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- adult entertainment;
- for-profit prisons;
- civilian firearms.

The Portfolio additionally excluded from its investment universe companies the Investment Adviser believes to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio.

These sustainability indicators have performed as follows:

- 0% of the companies invested in by the Portfolio were directly engaged in, and/or derived significant revenues from:
- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- adult entertainment;
- for-profit prisons;
- civilian firearms.
- 0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	Unit
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above)	0	0	0	%
Companies violating the United Nations Global Compact`s ten principles	Not applicable	0	0	%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Investment Adviser's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Investment Adviser's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	 Exposure to companies active in the fossil fuel sector Activities negatively affecting biodiversity-sensitive areas GHG emissions Carbon footprint GHG intensity of investee companies
Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises Unadjusted gender pay gap Board gender diversity Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)

Non-Mandatory Climate PAIs	Investments in companies without carbon emission reduction initiatives Land degradation, desertification, soil sealing Investments in companies without sustainable land/agriculture practices Natural species and protected areas Deforestation
Non-Mandatory Social PAI	Rate of accidents Number of days lost to injuries, accidents, fatalities or illness Incidents of discrimination Excessive CEO pay ratio

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes	
	In fossil gas	In nuclear energy
12	No	

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management

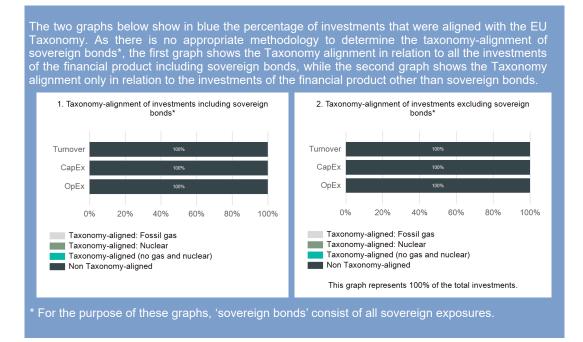

Enabling activities directly enable other activities to make a substantial contribution to an environmenal objective. Transitional activities are activities for which low-carbon

alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it does not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%. As noted above, whether investments made by this product were sustainable investments is determined by reference to the Investment Adviser's Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote. No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any

Sustainable

objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an

				□ with a social objective	
		ade sustainable investments with a ial objective:%		It promoted E/S characteristics, but did not make any sustainable investments	

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities, which over the reference period included but were not limited to:

- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco;
- adult entertainment;
- for-profit prisons;
- civilian firearms.

The Portfolio additionally excluded from its investment universe companies the Investment Adviser believes to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators have performed as follows:

- 0% of the companies invested in by the Portfolio were directly engaged in, and/or derived significant revenues from:
- controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- tobacco
- adult entertainment;
- for-profit prisons;
- civilian firearms.
- 0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	Unit
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above)	0	0	0	%
Companies violating the United Nations Global Compact's ten principles	Not applicable	0	0	%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Investment Adviser's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Investment Adviser's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	GHG emissions Carbon footprint GHG intensity of investee companies Exposure to companies active in the fossil fuel sector Activities negatively affecting biodiversity-sensitive areas
Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises Unadjusted gender pay gap Board gender diversity Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)

Non-Mandatory Climate PAIs	Investments in companies without carbon emission reduction initiatives Land degradation, desertification, soil sealing Investments in companies without sustainable land/agriculture practices Natural species and protected areas Deforestation
Non-Mandatory Social PAI	 Rate of accidents Number of days lost to injuries, accidents, fatalities or illness Incidents of discrimination Excessive CEO pay ratio

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific

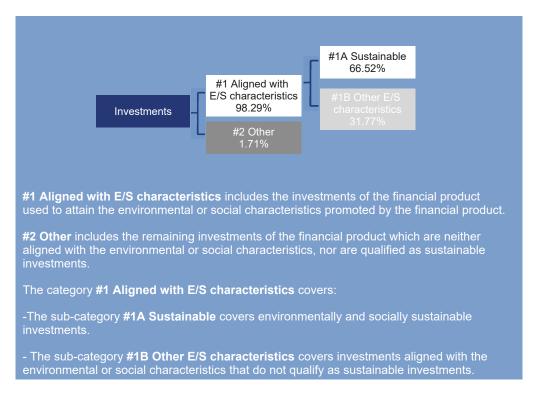

Over the reference period, 98.29% of investments were aligned to the environmental and/or social characteristics promoted by this Portfolio.

What was the asset allocation?

Over the reference period, 98.29% of investments were aligned to the environmental and/or social characteristics promoted by this Portfolio. 1.71% were held in cash, cash equivalents, and derivatives. And while the Portfolio did not have as its objective a sustainable investment, it had a proportion of 66.52% sustainable investments.

Over the reference period, a minimum of 90% of the Portfolio's investments were consistently aligned to the environmental and/or social characteristics described above.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Cash	Cash	0.19%
Common	EQCORP	1.61%
Construction	Civil engineering	3.27%
Electricity gas steam and air conditioning supply	Electricity gas steam and air conditioning supply	21.24%
Information and communication	Information service activities	4.02%
	Telecommunications	2.11%
Manufacturing	Manufacture of chemicals and chemical products	0.73%
Mutual fund	MONEY MARKET	1.12%
Real estate activities	Real estate activities	49.55%
Transporting and storage	Land transport and transport via pipelines	1.87%
	Warehousing and support activities for transportation	6.99%
Water supply; sewerage waste management	Sewerage	1.27%
and remediation activities	Water collection treatment and supply	3.24%
Wholesale and retail trade; repair of motor vehicles and motorcycles	Wholesale trade except of motor vehicles and motorcycles	2.78%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil	gas and/or	nuclear	energy related	activities
complying with the FU Taxonomy ¹ ?				

	Yes	
	In fossil gas	In nuclear energy
×	No	

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include

comprehensive safety and waste management rules.

Enabling activities

directly enable other activities to make a substantial contribution to an environmenal objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

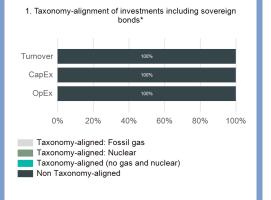

Taxonomy-aligned activities are expressed as a share of:

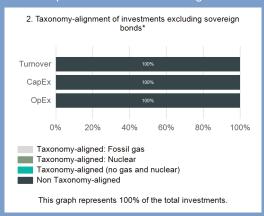

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it does not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

Whilst this product has made sustainable investments, it did not specifically commit to a minimum proportion of socially sustainable investments. Hence, the minimum commitment is 0%. As noted above, whether investments made by this product were sustainable investments is determined by reference to the Investment Adviser's Sustainable Investment Framework for assessing the contribution of investments to environmental and/or social objectives. This product did not target one specific category of sustainable investments, but instead assesses all investments made pursuant to its overall investment strategy using the framework.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash and cash equivalents for liquidity purposes and derivatives (including but not limited to index futures) for efficient portfolio management These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote. No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

the Taxonomy or not

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its quantitative investment process as set forth below (the "ESG Criteria") over the reference period. This consisted of: (i) exclusionary screens; (ii) the use of climate metrics to address climate transition risk as set forth below:

The Portfolio has promoted a transition to a lower carbon economy by managing climate transition risk relative to the Reference Portfolio/Benchmark via proprietary climate metrics.

Over the reference period, as part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of and/or involvement in controversial weapons;
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- production of and/or involvement in tobacco products.

The Portfolio has additionally excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators have performed as follows:

Over the reference period, the climate transition risk of the Portfolio based upon blended emissions measured 84.73 tonnes CO2e per \$mn market cap and 880.32 tonnes CO2e per \$bn market cap on embedded emissions. The climate transition risk of the Reference Portfolio/Benchmark based upon blended emissions measured 136.81 tonnes CO2e per \$mn market cap and 9469.89 tonnes CO2e per \$bn market cap on embedded emissions.

Additionally, the blended and embedded emissions have been consistently less than the Reference Portfolio/Benchmark over the reference period at the time of trade generation.

0% of the companies invested in by the Portfolio were directly engaged in, and/or derived significant revenues from:

- production of and/or involvement in controversial weapons;
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- production of and/or involvement in tobacco products.

0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	GHG emissions Carbon footprint GHG intensity of investee companies Exposure to companies active in the fossil fuel sector Activities negatively affecting biodiversity-sensitive areas
Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises Unadjusted gender pay gap Board gender diversity Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAIs	Investments in companies without carbon emission reduction initiatives Land degradation, desertification, soil sealing Investments in companies without sustainable land/agriculture practices Natural species and protected areas Deforestation
Non-Mandatory Social PAI	 Rate of accidents Number of days lost to injuries, accidents, fatalities or illness Incidents of discrimination Excessive CEO pay ratio

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil	gas and/or nuclear	energy related	activities
complying with the EU Taxonomy ¹ ?			

	Yes	
	In fossil gas	In nuclear energy
×	No	

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other

activities to make a substantial contribution to an environmenal objective. **Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

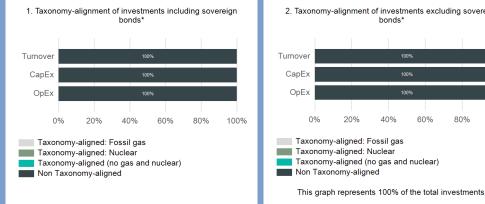

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign

2. Taxonomy-alignment of investments excluding sovereign

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash and cash equivalents for liquidity purposes. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote. No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Environmental and/or social characteristics

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability
Indicators measure
how the environmental or social characteristics promoted by the financial product are attained.

The Investment Acconsiderations into reference period. To climate transition rise relative to the Reference period. The Portfolio has prelative to the Reference period.

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its quantitative investment process as set forth below (the "ESG Criteria") over the reference period. This consisted of: (i) exclusionary screens; (ii) the use of climate metrics to address climate transition risk as set forth below:

The Portfolio has promoted a transition to a lower carbon economy by managing climate transition risk relative to the Reference Portfolio/Benchmark via proprietary climate metrics.

Over the reference period, as part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of and/or involvement in controversial weapons;
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- production of and/or involvement in tobacco products.

The Portfolio has additionally excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators have performed as follows:

Over the reference period, the climate transition risk of the Portfolio based upon blended emissions measured 98.36 tonnes CO2e per \$mn market cap and 803.82 tonnes CO2e per \$bn market cap on embedded emissions. The climate transition risk of the Reference Portfolio/Benchmark based upon blended emissions measured 123.86 tonnes CO2e per \$mn market cap and 9416.22 tonnes CO2e per \$bn market cap on embedded emissions.

Additionally, the blended and embedded emissions have been consistently less than the Reference Portfolio/Benchmark over the reference period at the time of trade generation.

0% of the companies invested in by the Portfolio were directly engaged in, and/or derived significant revenues from:

- production of and/or involvement in controversial weapons;
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- production of and/or involvement in tobacco products.

0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles.

... and compared to previous periods ?

Sustainability Indicator	November 30, 2023	November 30, 2024	Unit

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	GHG emissions Carbon footprint GHG intensity of investee companies Exposure to companies active in the fossil fuel sector Activities negatively affecting biodiversity-sensitive areas
Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises Unadjusted gender pay gap Board gender diversity Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAIs	Investments in companies without carbon emission reduction initiatives Land degradation, desertification, soil sealing Investments in companies without sustainable land/agriculture practices Natural species and protected areas Deforestation
Non-Mandatory Social PAI	 Rate of accidents Number of days lost to injuries, accidents, fatalities or illness Incidents of discrimination Excessive CEO pay ratio

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes	
	In fossil gas	In nuclear energy
×	No	

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed

 -turnover reflecting the share of revenue from green activities of investee companies.

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

re sustainable

investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash and cash equivalents for liquidity purposes. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its quantitative investment process as set forth below (the "ESG Criteria") over the reference period. This consisted of: (i) exclusionary screens; (ii) the use of climate metrics to address climate transition risk as set forth below:

The Portfolio has promoted a transition to a lower carbon economy by managing climate transition risk relative to the Reference Portfolio/Benchmark via proprietary climate metrics.

Over the reference period, as part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of and/or involvement in controversial weapons;
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- production of and/or involvement in tobacco products.

The Portfolio has additionally excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators have performed as follows:

Over the reference period, the climate transition risk of the Portfolio based upon blended emissions measured 89.50 tonnes CO2e per \$mn market cap and 826.82 tonnes CO2e per \$bn market cap on embedded emissions. The climate transition risk of the Reference Portfolio/Benchmark based upon blended emissions measured 116.52 tonnes CO2e per \$mn market cap and 1636.14 tonnes CO2e per \$bn market cap on embedded emissions.

Additionally, the blended and embedded emissions have been consistently less than the Reference Portfolio/Benchmark over the reference period at the time of trade generation.

0% of the companies invested in by the Portfolio were directly engaged in, and/or derived significant revenues from:

- production of and/or involvement in controversial weapons;
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- production of and/or involvement in tobacco products.

0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles.

re sustainable

investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash and cash equivalents for liquidity purposes. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

the Taxonomy or not

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its quantitative investment process as set forth below (the "ESG Criteria") over the reference period. This consisted of: (i) exclusionary screens; (ii) the use of climate metrics to address climate transition risk as set forth below:

The Portfolio has promoted a transition to a lower carbon economy by managing climate transition risk relative to the Reference Portfolio/Benchmark via proprietary climate metrics.

Over the reference period, as part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of and/or involvement in controversial weapons;
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- production of and/or involvement in tobacco products.

The Portfolio has additionally excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators have performed as follows:

Over the reference period, the climate transition risk of the Portfolio based upon blended emissions measured 58.42 tonnes CO2e per \$mn market cap and 378.80 tonnes CO2e per \$bn market cap on embedded emissions. The climate transition risk of the Reference Portfolio/Benchmark based upon blended emissions measured 95.56 tonnes CO2e per \$mn market cap and 961.91 tonnes CO2e per \$bn market cap on embedded emissions.

Additionally, the blended and embedded emissions have been consistently less than the Reference Portfolio/Benchmark over the reference period at the time of trade generation.

0% of the companies invested in by the Portfolio were directly engaged in, and/or derived significant revenues from:

- production of and/or involvement in controversial weapons;
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- production of and/or involvement in tobacco products.

0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles.

... and compared to previous periods?

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	GHG emissions Carbon footprint GHG intensity of investee companies Exposure to companies active in the fossil fuel sector Activities negatively affecting biodiversity-sensitive areas
Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises Unadjusted gender pay gap Board gender diversity Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAIs	Investments in companies without carbon emission reduction initiatives Land degradation, desertification, soil sealing Investments in companies without sustainable land/agriculture practices Natural species and protected areas Deforestation
Non-Mandatory Social PAI	 Rate of accidents Number of days lost to injuries, accidents, fatalities or illness Incidents of discrimination Excessive CEO pay ratio

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

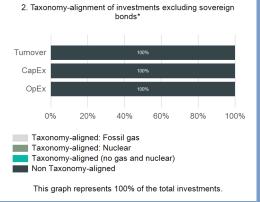

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes	
	In fossil gas	In nuclear energy
×	No	

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

activities are expressed as a share of: -turnover reflecting the

share of revenue from green activities of investee companies.

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green

- operational expenditure (OpEx) reflecting green operational activities of investee companies

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

re sustainable

investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash and cash equivalents for liquidity purposes. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

and remediation activities	Waste collection treatment and disposal activities; materials recovery	0.01%	
Wholesale and retail trade; repair of motor vehicles and motorcycles	Retail trade except of motor vehicles and motorcycles	6.42%	
	Wholesale and retail trade and repair of motor vehicles and motorcycles	0.43%	
	Wholesale trade except of motor vehicles and motorcycles	0.93%	

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil	gas and/or nuclear	energy related	activities
complying with the EU Taxonomy ¹ ?			

	Yes	
	In fossil gas	In nuclear energy
×	No	

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety

and waste management rules

Enabling activities

directly enable other activities to make a substantial contribution to an environmenal objective. **Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

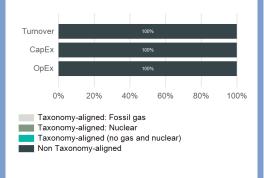

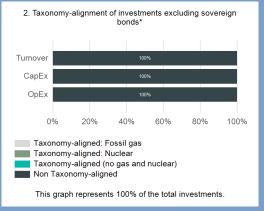

investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash and cash equivalents for liquidity purposes. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote. No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Sustainable

investment means an

economic activity that

environmental or social objective, provided that the investment does not significantly harm any

objective and that the investee companies follow good governance

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852

establishing a list of environmentally sustainable economic

sustainable economic activities. Sustainable investments with an environmental objective might be aligned with

activities. That Regulation does not include a list of socially

the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its quantitative investment process as set forth below (the "ESG Criteria") over the reference period. This consisted of: (i) exclusionary screens; (ii) the use of climate metrics to address climate transition risk as set forth below:

The Portfolio has promoted a transition to a lower carbon economy by managing climate transition risk relative to the Reference Portfolio/Benchmark via proprietary climate metrics.

Over the reference period, as part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of and/or involvement in controversial weapons;
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- production of and/or involvement in tobacco products.

The Portfolio has additionally excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

promoted by the financial product are attained.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators have performed as follows:

Over the reference period, the climate transition risk of the Portfolio based upon blended emissions measured 54.91 tonnes CO2e per \$mn market cap and 913.74 tonnes CO2e per \$bn market cap on embedded emissions. The climate transition risk of the Reference Portfolio/Benchmark based upon blended emissions measured 82.66 tonnes CO2e per \$mn market cap and 3603.36 tonnes CO2e per \$bn market cap on embedded emissions.

Additionally, the blended and embedded emissions have been consistently less than the Reference Portfolio/Benchmark over the reference period at the time of trade generation.

0% of the companies invested in by the Portfolio were directly engaged in, and/or derived significant revenues from:

- production of and/or involvement in controversial weapons;
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- · production of and/or involvement in tobacco products.

0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles.

... and compared to previous periods?

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	GHG emissions Carbon footprint GHG intensity of investee companies Exposure to companies active in the fossil fuel sector Activities negatively affecting biodiversity-sensitive areas
Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises Unadjusted gender pay gap Board gender diversity Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAIs	Investments in companies without carbon emission reduction initiatives Land degradation, desertification, soil sealing Investments in companies without sustainable land/agriculture practices Natural species and protected areas Deforestation
Non-Mandatory Social PAI	 Rate of accidents Number of days lost to injuries, accidents, fatalities or illness Incidents of discrimination Excessive CEO pay ratio

What were the top investments of this financial product?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes	
	In fossil gas	In nuclear energy
×	No	

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management

Enabling activities
directly enable other
activities to make a
substantial contribution
to an environmenal
objective. Transitional
activities are activities
for which low-carbon
alternatives are not yet
available and among
others have
greenhouse gas

Taxonomy-aligned activities are expressed as a share of:

corresponding to the

best performance.

- -turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green
- operational expenditure (OpEx) reflecting green operational activities of investee companies

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash and cash equivalents for liquidity purposes. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote. No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its quantitative investment process as set forth below (the "ESG Criteria") over the reference period. This consisted of: (i) exclusionary screens; (ii) the use of climate metrics to address climate transition risk as set forth below:

The Portfolio has promoted a transition to a lower carbon economy by managing climate transition risk relative to the Reference Portfolio/Benchmark via proprietary climate metrics.

Over the reference period, as part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of and/or involvement in controversial weapons;
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- production of and/or involvement in tobacco products.

The Portfolio has additionally excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators have performed as follows:

Over the reference period, the climate transition risk of the Portfolio based upon blended emissions measured 22.22 tonnes CO2e per \$mn market cap and 436.47 tonnes CO2e per \$bn market cap on embedded emissions. The climate transition risk of the Reference Portfolio/Benchmark based upon blended emissions measured 40.37 tonnes CO2e per \$mn market cap and 493.89 tonnes CO2e per \$bn market cap on embedded emissions.

Additionally, the blended and embedded emissions have been consistently less than the Reference Portfolio/Benchmark over the reference period at the time of trade generation.

0% of the companies invested in by the Portfolio were directly engaged in, and/or derived significant revenues from:

- production of and/or involvement in controversial weapons;
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- · production of and/or involvement in tobacco products.

0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles.

... and compared to previous periods?

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	GHG emissions Carbon footprint GHG intensity of investee companies Exposure to companies active in the fossil fuel sector Activities negatively affecting biodiversity-sensitive areas
Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises Unadjusted gender pay gap Board gender diversity Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAIs	Investments in companies without carbon emission reduction initiatives Land degradation, desertification, soil sealing Investments in companies without sustainable land/agriculture practices Natural species and protected areas Deforestation
Non-Mandatory Social PAI	Rate of accidents Number of days lost to injuries, accidents, fatalities or illness Incidents of discrimination Excessive CEO pay ratio

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy1?

Yes		
In fossil gas		

In nuclear energy

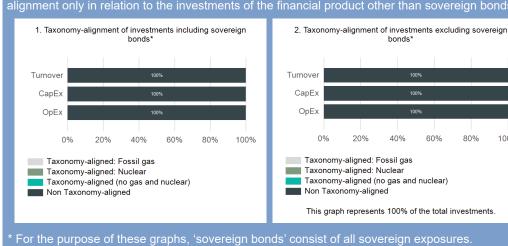

60%

80%

100%

× No

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

To comply with the EU Taxonomy, the criteria for **fossil gas** include and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management

Enabling activities

directly enable other activities to make a substantial contribution objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

-turnover reflecting the share of revenue from green activities of

 capital expenditure (CapEx) showing the green investments made by investee

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU)

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash and cash equivalents for liquidity purposes. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote. How did this financial product perform compared with the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

investment means an

economic activity that environmental or social objective, provided that the investment does not significantly harm any objective and that the investee companies follow good governance

Sustainable

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic

activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

Product name:

Goldman Sachs US Small Cap CORE **Equity Portfolio**

		in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy		with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
				□ with a social objective
		ade sustainable investments with a lal objective:%	×	It promoted E/S characteristics, but did not make any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental promoted by the financial product are attained.

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its quantitative investment process as set forth below (the "ESG Criteria") over the reference period. This consisted of: (i) exclusionary screens; (ii) the use of climate metrics to address climate transition risk as set forth below:

The Portfolio has promoted a transition to a lower carbon economy by managing climate transition risk relative to the Reference Portfolio/Benchmark via proprietary climate metrics.

Over the reference period, as part of the ESG investment process, the Investment Adviser has not invested in companies that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of and/or involvement in controversial weapons:
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- · production of and/or involvement in tobacco products.

The Portfolio has additionally excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators have performed as follows:

Over the reference period, the climate transition risk of the Portfolio based upon blended emissions measured 52.04 tonnes CO2e per \$mn market cap and 546.52 tonnes CO2e per \$bn market cap on embedded emissions. The climate transition risk of the Reference Portfolio/Benchmark based upon blended emissions measured 98.77 tonnes CO2e per \$mn market cap and 7417.66 tonnes CO2e per \$bn market cap on embedded emissions.

Additionally, the blended and embedded emissions have been consistently less than the Reference Portfolio/Benchmark over the reference period at the time of trade generation.

0% of the companies invested in by the Portfolio were directly engaged in, and/or derived significant revenues from:

- production of and/or involvement in controversial weapons;
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- · production of and/or involvement in tobacco products.

0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	Unit
Blended emissions	Portfolio: 81 Benchmark: 111	Portfolio: 70.1 Benchmark: 127.5	Portfolio: 52.04 Benchmark:	tonnes CO2e per \$mn market cap

Embedded emissions	Portfolio: 5,630 Benchmark: 9,959	Portfolio: 2888.3 Benchmark	Portfolio: 546.52 Benchmark:	tonnes CO2e per \$bn market cap
(in relation to the Reference Portfolio/Benchmark)	Bonomian. 0,000	10194.6	7417.66	market sup
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities	0	0	0	%
(as outlined above)				
Companies violating the United Nations Global Compact's ten principles	0	0	0	%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	GHG emissions Carbon footprint GHG intensity of investee companies Exposure to companies active in the fossil fuel sector Activities negatively affecting biodiversity-sensitive areas
Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises Unadjusted gender pay gap Board gender diversity Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAIs	Investments in companies without carbon emission reduction initiatives Land degradation, desertification, soil sealing Investments in companies without sustainable land/agriculture practices Natural species and protected areas Deforestation
Non-Mandatory Social PAI	Rate of accidents Number of days lost to injuries, accidents, fatalities or illness Incidents of discrimination Excessive CEO pay ratio

What were the top investments of this financial product?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

×	No	
	In fossil gas	In nuclear energy
	Yes	

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management

rules.

Enabling activities
directly enable other
activities to make a
substantial contribution
to an environmenal
objective. Transitional
activities are activities
for which low-carbon
alternatives are not yet
available and among
others have
greenhouse gas
emission levels

Taxonomy-aligned activities are expressed

-turnover reflecting the share of revenue from green activities of investee companies.

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy

 operational expenditure (OpEx) reflecting green operational activities of investee companies

re sustainable

investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash and cash equivalents for liquidity purposes. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, the Investment Adviser leveraged the Goldman Sachs Asset Management Global Stewardship Team's engagement initiatives in respect of the Portfolio. The Goldman Sachs Asset Management Global Stewardship Team focuses on proactive, outcomes-based engagement, in an attempt to promote best practices. Engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies. To guide engagement efforts, the Goldman Sachs Asset Management Global Stewardship Team creates a Stewardship Framework, which reflects the Goldman Sachs Asset Management Global Stewardship Team's thematic priorities and guides voting and engagement efforts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote. No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Goldman Sachs Asia High Yield Bond Portfolio

Environmental and/or social characteristics

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusions based on proprietary ESG ratings as set forth below (the "ESG Criteria") over the reference period.

The screening process for the Portfolio generally excluded corporate issuers that have the lowest category of ESG ratings according to the Investment Adviser's proprietary internal scoring system, however, the Portfolio may have exposure of up to 10% in such corporate issuers.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators have performed as follows:

• 0% of corporate issuers in the Portfolio with an ESG rating according to the Investment Adviser's proprietary internal scoring system had an ESG rating of less than or equal to 1.

... and compared to previous periods?

Sustainability Indicator			November 30, 2024	Unit
Corporate issuers with an ESG rating of less than or equal to 1	0.4	0	0	%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters respect for human rights, anti-corruption and anti-bribery

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	GHG emissions Carbon footprint GHG intensity of investee companies Emissions to water
Mandatory Social PAIs	Unadjusted gender pay gap
Non-Mandatory Climate PAIs	Emissions of inorganic pollutants Emissions of air pollutants Investments in companies without carbon emission reduction initiatives Water usage and recycling Investments in companies without water management policies Exposure to areas of high water stress Land degradation, desertification, soil sealing Deforestation
Non-Mandatory Social PAI	 Rate of accidents Number of days lost to injuries, accidents, fatalities or illness Insufficient whistleblower protection Lack of anti-corruption and anti-bribery policies Cases of insufficient action taken to address breaches of standards of anti-corruption and anti-bribery Number of convictions and amount of fines for violation of anti-corruption and anti-bribery laws

Asset allocation

investments in specific assets.

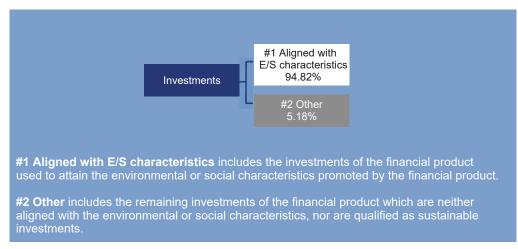

What was the proportion of sustainability-related investments?

Over the reference period, 94.82% of investments were aligned to the environmental and/or social characteristics promoted by this Portfolio.

What was the asset allocation?

Over the reference period, 94.82% of investments were aligned to the environmental and/or social characteristics promoted by this Portfolio. 5.18% were held in cash, derivatives and issuers for which data was lacking and issuers which fell into the lowest ESG category or breached the ESG Criteria after purchased.

Over the reference period, a minimum of 70% of the Portfolio's investments were consistently aligned to the environmental and/or social characteristics described above.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the

end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmenal objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed

- -turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

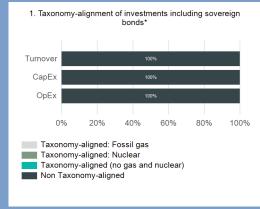

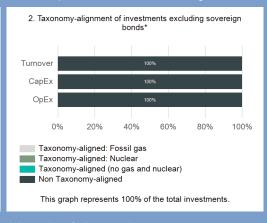

environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

investments with an

- □ In fossil gas □ In nuclear energy
- No

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash for liquidity purposes, derivatives for efficient portfolio management and issuers for which data was lacking and issuers which fell into the lowest ESG category or breach the ESG Criteria after purchased. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Management Company has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Management Company has engaged with corporate issuers in this Portfolio that the Management Company believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Management Company is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer. Where applicable, the Management Company has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Management Company is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Management Company believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future business prospects.

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

To guide engagement at the firmwide-level, the Global Stewardship Team leverages our stewardship framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Goldman Sachs Emerging Markets Corporate Bond Portfolio

Environmental and/or social characteristics

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusions based on proprietary ESG ratings as set forth below (the "ESG Criteria") over the reference period.

The screening process for the Portfolio generally excluded corporate issuers that have the lowest category of ESG ratings according to the Investment Adviser's proprietary internal scoring system, however, the Portfolio may have exposure of up to 10% in such corporate issuers.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators have performed as follows:

• 0.30% of corporate issuers in the Portfolio with an ESG rating according to the Investment Adviser's proprietary internal scoring system had an ESG rating of less than or equal to 1.

... and compared to previous periods?

Sustainability Indicator		November 30, 2023	November 30, 2024	Unit
Corporate issuers with an ESG rating of less than or equal to 1	0	0.71	0.30	%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	GHG emissions Carbon footprint GHG intensity of investee companies Emissions to water
Mandatory Social PAIs	Unadjusted gender pay gap
Non-Mandatory Climate PAIs	Emissions of inorganic pollutants Emissions of air pollutants Investments in companies without carbon emission reduction initiatives Water usage and recycling Investments in companies without water management policies Exposure to areas of high water stress Land degradation, desertification, soil sealing Deforestation
Non-Mandatory Social PAI	 Rate of accidents Number of days lost to injuries, accidents, fatalities or illness Insufficient whistleblower protection Lack of anti-corruption and anti-bribery policies Cases of insufficient action taken to address breaches of standards of anti-corruption and anti-bribery Number of convictions and amount of fines for violation of anti-corruption and anti-bribery laws

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable

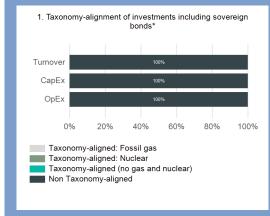

investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

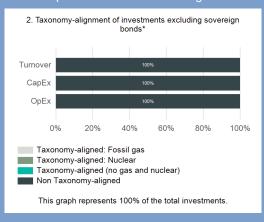

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes
☐ In fossil gas ☐ In nuclear energy
☑ No

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

^{*} For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash for liquidity purposes, derivatives, mutual funds and collateralised securities for efficient portfolio management, and issuers for which data was lacking and issuers which fell into the lowest ESG category or breach the ESG Criteria after purchased. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Management Company has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Environmental and/or social characteristics

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria") over the reference period. This consisted of: (i) exclusions based on proprietary ESG ratings; (ii) portfolio level targets as set forth below.

The screening process for the Portfolio generally excluded corporate issuers that have the lowest category of ESG ratings according to the Investment Adviser's proprietary internal scoring system, however, the Portfolio may have exposure of up to 10% in such corporate issuers.

The Portfolio has achieved a higher environmental score (E-score) relative to the Reference Portfolio/Benchmark.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators have performed as follows:

- 1.40% of corporate issuers in the Portfolio with an ESG rating according to the Investment Adviser's proprietary internal scoring system had an ESG rating of less than or equal to 1.
- Over the reference period, the E-score of the Portfolio according to the Investment Adviser's proprietary ESG scoring system for each issuer was 2.43. The E-score of the Reference Portfolio/Benchmark was 2.34.

	Wholesale trade except of motor vehicles and motorcycles	0.76%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes	·	
	In fossil gas		In nuclear energy
×	No		

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management

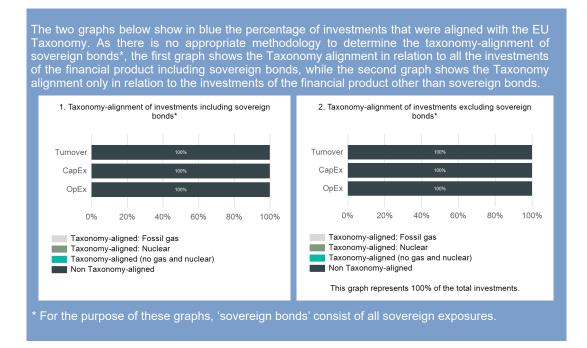

Enabling activities
directly enable other
activities to make a
substantial contribution
to an environmenal
objective. Transitional
activities are activities
for which low-carbon
alternatives are not yet
available and among
others have
greenhouse gas
emission levels
corresponding to the
best performance.

Taxonomy-aligned

activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash for liquidity purposes, derivatives, mutual funds and collateralised securities for efficient portfolio management, and issuers for which data was lacking and issuers which fell into the lowest ESG category or breach the ESG Criteria after purchased. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Management Company has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Management Company has engaged with corporate issuers in this Portfolio that the Management Company believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Management Company is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer. Where applicable, the Management Company has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Management Company is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Management Company believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future business prospects.

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

To guide engagement at the firmwide-level, the Global Stewardship Team leverages our stewardship framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of portfolio level targets as set forth below (the "ESG Criteria") over the reference period.

The Portfolio has achieved a higher environmental score (E-score) relative to the Reference Portfolio/Benchmark.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators have performed as follows:

Over the reference period, the E-score of the Portfolio according to the Investment Adviser's proprietary ESG scoring system for each issuer was 2.54. The E-score of the Reference Portfolio/Benchmark was 2.33.

0% of the companies invested in by the Portfolio were believed by the Investment Adviser to be violating global norms based on the Investment Adviser's proprietary approach to identifying and evaluating global norms violators, save for one company which fell into this category for exclusion subsequent to its investment.

The Investment Adviser may not be able to readily sell securities that are intended for exclusion from the Portfolio based on the Investment Advisor's proprietary approach to identifying and evaluating global norms violators (for example, due to liquidity issues or for other reasons outside of the Investment Manager's control), however, will seek to divest as soon as possible in an orderly manner and in the best interests of Shareholders.

(in relation to the Reference Portfolio/Benchmark)			

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not

The EU Taxonomy is a

include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	 GHG emissions Carbon footprint GHG intensity of investee companies Activities negatively affecting biodiversity-sensitive areas
Non-Mandatory Climate PAIs	Water usage and recyclingNatural species and protected areasDeforestation

What were the top investments of this financial product?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil	gas and/or nuclear	energy related	activities
complying with the EU Taxonomy ¹ ?			

	Yes	
	In fossil gas	In nuclear energ
×	No	

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the

¹Fossil gas and/or nuclear related activities will only comple with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

comprehensive safety and waste management rules.

Enabling activities directly enable other

activities to make a substantial contribution to an environmenal objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

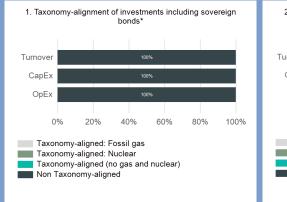

Taxonomy-aligned activities are expressed as a share of:

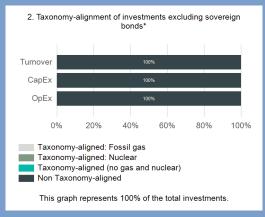

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

[·] For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash for liquidity purposes, derivatives, mutual funds, collateralised securities and fixed income securities issued by companies for efficient portfolio management purposes and issuers for which data was lacking. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Management Company has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Management Company has engaged with corporate issuers in this Portfolio that the Management Company believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Management Company is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer. Where applicable, the Management Company has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Management Company is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Management Company believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

To guide engagement at the firmwide-level, the Global Stewardship Team leverages our stewardship framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of portfolio level targets as set forth below (the "ESG Criteria") over the reference period.

The Portfolio has achieved a higher environmental score (E-score) relative to the Reference Portfolio/Benchmark.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators have performed as follows:

Over the reference period, the E-score of the Portfolio according to the Investment Adviser's proprietary ESG scoring system for each issuer was 2.25. The E-score of the Reference Portfolio/Benchmark was 2.12.

Over the reference period the Portfolio's E-score was consistently higher than the Reference Portfolio/Benchmark save for instances of significant flows which caused the Portfolio's E-score to inadvertently fall below that of the Reference Portfolio/Benchmark, however, the Portfolio was adjusted to bring it back in line with its target.

... and compared to previous periods?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

		-	
	Yes		
	In fossil gas		In nuclear energy
x	No		

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management

Enabling activities

directly enable other activities to make a substantial contribution to an environmenal objective. **Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

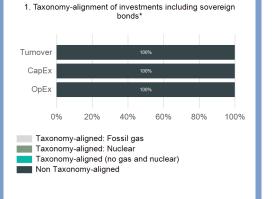

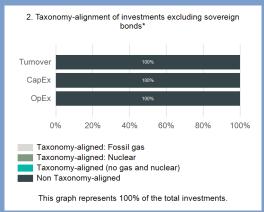

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments including sovereign bonds*

2. Taxonomy-alignment of investments excluding sovereign bonds*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash for liquidity purposes, derivatives, mutual funds, collateralised securities and fixed income securities issued by companies for efficient portfolio management purposes and issuers for which data was lacking. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Management Company has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Management Company has engaged with corporate issuers in this Portfolio that the Management Company believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Management Company is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer. Where applicable, the Management Company has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Management Company is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Management Company believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future business prospects.

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

To guide engagement at the firmwide-level, the Global Stewardship Team leverages our stewardship framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Goldman Sachs Emerging Markets Short Duration Bond Portfolio

Environmental and/or social characteristics

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria") over the reference period. This consisted of: (i) exclusionary screens; (ii) exclusions based on proprietary ESG ratings; (iii) portfolio level targets.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- · production or sale of tobacco;
- production or sale of civilian firearms.

The Portfolio has also excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The screening process for the Portfolio excluded government and corporate issuers that have the lowest category of ESG ratings according to the Investment Adviser's proprietary internal scoring system.

Additionally, the Portfolio has achieved a lower exposure, relative to the Reference Portfolio/Benchmark, to companies with certain pre-defined thresholds for diversity on company boards as measured by percentage of women on the company's board of directors and has achieved a lower weighted average carbon intensity relative to the Reference Portfolio/Benchmark.

How did the sustainability indicators perform?

Goldman Sachs Emerging Markets Short Duration Bond Portfolio

Sustainability Indicators measure

how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	GHG emissions Carbon footprint GHG intensity of investee companies Exposure to companies active in the fossil fuel sector Emissions to water

Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Unadjusted gender pay gap Board gender diversity Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAIs	 Emissions of inorganic pollutants Emissions of air pollutants Investments in companies without carbon emission reduction initiatives Water usage and recycling Investments in companies without water management policies Exposure to areas of high water stress Land degradation, desertification, soil sealing Deforestation
Non-Mandatory Social PAI	Rate of accidents Number of days lost to injuries, accidents, fatalities or illness Insufficient whistleblower protection Lack of anti-corruption and anti-bribery policies Cases of insufficient action taken to address breaches of standards of anti-corruption and anti-bribery Number of convictions and amount of fines for violation of anti-corruption and anti-bribery laws

Asset allocation

describes the share of investments in specific assets.

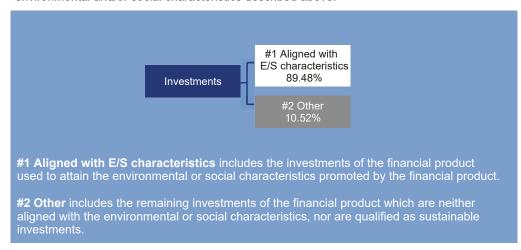

What was the proportion of sustainability-related investments?

Over the reference period, 89.48% of investments were aligned to the environmental and/or social characteristics promoted by this Portfolio.

What was the asset allocation?

Over the reference period, 89.48% of investments were aligned to the environmental and/or social characteristics promoted by this Portfolio. 10.52% were held in cash, derivatives and issuers for which data was lacking and which fell into the lowest ESG category or breached the ESG Criteria after purchased.

Over the reference period, a minimum of 80% of the Portfolio's investments were consistently aligned to the environmental and/or social characteristics described above.

In which economic sectors were the investments made?

Sector	Sub Sector	% of NAV
Accommodation and food service activities	Accommodation	0.21%

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

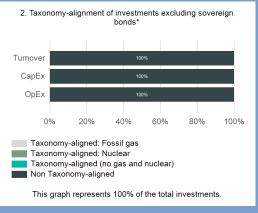

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes	
	In fossil gas	In nuclear energy
×	No	

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

To comply with the EU for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include

Enabling activities

directly enable other activities to make a substantial contribution objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among greenhouse gas corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU)

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash at custodian account level, derivatives for efficient portfolio management and issuers for which data was lacking and issuers which fell into the lowest ESG category or breach the ESG Criteria after purchased. When establishing the alignment of any securitisations or asset-backed commercial paper held in the Portfolio or repurchase agreements in which it may have invested with the E/S characteristics promoted by the Portfolio, the counterparty/issuer was assessed against the ESG Criteria described above and not the underlying collateral. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Management Company has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Management Company has engaged with corporate issuers in this Portfolio that the Management Company believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Management Company is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer. Where applicable, the Management Company has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Management Company is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Management Company believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future business prospects.

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

To guide engagement at the firmwide-level, the Global Stewardship Team leverages our stewardship framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social

objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective

might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria") over the reference period. This consisted of: (i) exclusionary screens; (ii) exclusions based on proprietary ESG ratings; (iii) portfolio level targets.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- · production or sale of tobacco;
- · production or sale of civilian firearms.

The Portfolio has also excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

Additionally, the screening process for the Portfolio excluded government and corporate issuers that have the lowest category of ESG ratings according to the Investment Adviser's proprietary internal scoring system.

Over the reference period, the Portfolio additionally has achieved a lower exposure, relative to the Reference Portfolio/Benchmark, to companies with certain pre-defined thresholds for diversity on company boards as measured by percentage of women on the company's board of directors and has achieved a lower weighted average carbon intensity relative to the Reference Portfolio/Benchmark.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators and have performed as follows:

0% of the companies in the Portfolio were directly engaged in, and/or derived significant revenues from:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- · production or sale of tobacco;
- production or sale of civilian firearms.

0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles.

0% of corporate and sovereign issuers in the Portfolio with an ESG rating according to the Investment Adviser's proprietary internal scoring system had an ESG rating of less than or equal to 1.

• The Portfolio's exposure to companies with less than 10% of women on the company's board of directors was 0.40% and the Reference/Portfolio Benchmark's exposure to companies with less than 10% of women on the company's board of directors was 0.48%.

Over the reference period, the Portfolio consistently achieved a lower exposure, relative to the Reference Portfolio/Benchmark, to companies with less than 10% of women on the companies board of directors.

• The weighted average scope 1 and 2 carbon intensity of all the corporate issuers (where available) in the portfolio was 43.70 TCO2e/Sales (\$mn) and the weighted average scope 1 and 2 carbon intensity of the Reference Portfolio/Benchmark was 63.80 TCO2e/Sales (\$mn).

Over the reference period, the Portfolio consistently achieved a lower weighted average carbon intensity relative to the Reference Portfolio/Benchmark.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	GHG emissions Carbon footprint GHG intensity of investee companies Exposure to companies active in the fossil fuel sector Emissions to water
Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Unadjusted gender pay gap Board gender diversity Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAIs	Emissions of inorganic pollutants Emissions of air pollutants Investments in companies without carbon emission reduction initiatives Water usage and recycling Investments in companies without water management policies Exposure to areas of high water stress Land degradation, desertification, soil sealing Deforestation
Non-Mandatory Social PAI	 Rate of accidents Number of days lost to injuries, accidents, fatalities or illness Insufficient whistleblower protection Lack of anti-corruption and anti-bribery policies Cases of insufficient action taken to address breaches of standards of anti-corruption and anti-bribery Number of convictions and amount of fines for violation of anti-corruption and anti-bribery laws

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

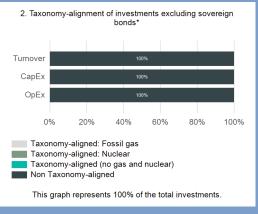

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

		-	
	Yes		
	In fossil gas		In nuclear energy
×	No		

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management

Enabling activities
directly enable other
activities to make a
substantial contribution

greenhouse gas
emission levels
corresponding to the

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash at custodian account level, derivatives for efficient portfolio management and issuers for which data was lacking and issuers which fell into the lowest ESG category or breach the ESG Criteria after purchased. When establishing the alignment of any securitisations or asset-backed commercial paper held in the Portfolio or repurchase agreements in which it may have invested with the E/S characteristics promoted by the Portfolio, the counterparty/issuer was assessed against the ESG Criteria described above and not the underlying collateral. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Management Company has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Management Company has engaged with corporate issuers in this Portfolio that the Management Company believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Management Company is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer. Where applicable, the Management Company has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Management Company is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Management Company believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future business prospects.

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

To guide engagement at the firmwide-level, the Global Stewardship Team leverages our stewardship framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote. How did this financial product perform compared with the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective

might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria") over the reference period. This consisted of: (i) exclusionary screens; (ii) exclusions based on proprietary ESG ratings; (iii) portfolio level targets.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- · production or sale of tobacco;
- production or sale of civilian firearms.

The Portfolio has also excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

Over the reference period, the screening process for the Portfolio excluded government and corporate issuers that have the lowest category of ESG ratings according to the Investment Adviser's proprietary internal scoring system.

Additionally, the Portfolio has achieved a lower exposure, relative to the Reference Portfolio/Benchmark, to companies with certain pre-defined thresholds for diversity on company boards as measured by percentage of women on the company's board of directors and has achieved a lower weighted average carbon intensity relative to the Reference Portfolio/Benchmark.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators and have performed as follows:

0% of the companies invested in by the Portfolio were directly engaged in, and/or derived significant revenues from:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- · production or sale of tobacco;
- · production or sale of civilian firearms.

0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles.

0% of corporate and sovereign issuers in the Portfolio with an ESG rating according to the Investment Adviser's proprietary internal scoring system had an ESG rating of less than or equal to 1.

Over the reference period, the Portfolio's exposure to companies with less than 10% of women on the company's board of directors was 2.96% and the Reference/Portfolio Benchmark's exposure to companies with less than 10% of women on the company's board of directors was 5.19%.

Over the reference period, the Portfolio consistently achieved a lower exposure, relative to the Reference Portfolio/Benchmark, to companies with less than 10% of women on the companies board of directors.

The weighted average scope 1 and 2 carbon intensity of all the corporate issuers (where available) in the portfolio was 99.36 TCO2e/Sales (\$mn) and the weighted average scope 1 and 2 carbon intensity of the Reference Portfolio/Benchmark was 145.05 TCO2e/Sales (\$mn).

Over the reference period, the Portfolio consistently achieved a lower weighted average carbon intensity relative to the Reference Portfolio/Benchmark.

... and compared to previous periods ?

Sustainability Indicator Unit November 30, November 30, November 30, 2023 2024 Companies invested in by the 0 0 0 % Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above) 0 % Companies violating the n 0 United Nations Global Compact's ten principles % Corporate and sovereign 0 n 0 issuers with an ESG rating of less than or equal to 1 Exposure to companies with Portfolio: 2.5 Portfolio: 2.33 Portfolio: 2.96 less than 10% of women on Benchmark: 3.5 Benchmark: 3.88 Benchmark: 5.19 the company board of directors (in relation to the Reference Portfolio/Benchmark) Weighted average scope 1 Portfolio: 135 Portfolio: 121.51 Portfolio: 99.36 TCO2e/Sales and 2 carbon intensity Benchmark: 212 Benchmark: Benchmark: (\$mn) 192.57 145.05 (in relation to the Reference Portfolio/Benchmark)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters respect for human rights, anti-corruption and anti-bribery

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	GHG emissions Carbon footprint GHG intensity of investee companies Exposure to companies active in the fossil fuel sector Emissions to water
Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Unadjusted gender pay gap Board gender diversity Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAIs	Emissions of inorganic pollutants Emissions of air pollutants Investments in companies without carbon emission reduction initiatives Water usage and recycling Investments in companies without water management policies Exposure to areas of high water stress Land degradation, desertification, soil sealing Deforestation
Non-Mandatory Social PAI	Rate of accidents Number of days lost to injuries, accidents, fatalities or illness Insufficient whistleblower protection Lack of anti-corruption and anti-bribery policies Cases of insufficient action taken to address breaches of standards of anti-corruption and anti-bribery Number of convictions and amount of fines for violation of anti-corruption and anti-bribery laws

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes	
	In fossil gas	In nuclear energy
×	No	

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities

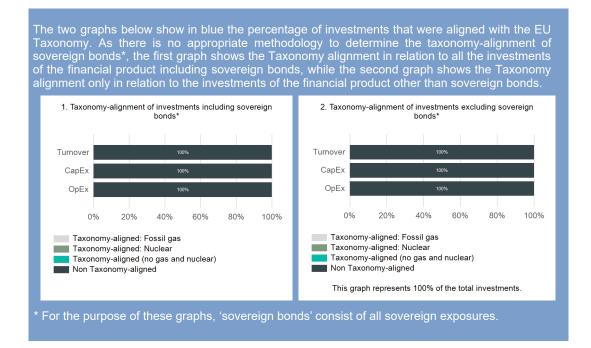

directly enable other activities to make a substantial contribution to an environmenal objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

-turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments

green investments made by investee companies, e.g. for a transition to a green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash for liquidity purposes, derivatives for efficient portfolio management and issuers for which data was lacking and which fell into the lowest ESG category or breach the ESG Criteria after purchased. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Management Company has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Management Company has engaged with corporate issuers in this Portfolio that the Management Company believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Management Company is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer. Where applicable, the Management Company has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Management Company is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Management Company believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future business prospects.

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

To guide engagement at the firmwide-level, the Global Stewardship Team leverages our stewardship framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

Reference

How did this financial product perform compared with the reference benchmark?

benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with

the Taxonomy or not

Environmental and/or social characteristics

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria") over the reference period. This consisted of: (i) exclusionary screens; (ii) exclusions based on proprietary ESG ratings; (iii) portfolio level targets.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- · extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- · production or sale of tobacco;
- · production or sale of civilian firearms.

The Portfolio has also excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

Over the reference period, the screening process for the Portfolio excluded government and corporate issuers that have the lowest category of ESG ratings according to the Investment Adviser's proprietary internal scoring system.

Additionally, the Portfolio additionally has achieved a lower exposure, relative to the Reference Portfolio/Benchmark, to companies with certain pre-defined thresholds for diversity on company boards as measured by percentage of women on the company's board of directors and has achieved a lower weighted average carbon intensity relative to the Reference Portfolio/Benchmark.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators and have performed as follows:

0% of the companies invested in by the Portfolio were directly engaged in, and/or derived significant revenues from:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- · production or sale of tobacco;
- · production or sale of civilian firearms.

0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles.

0% of corporate and sovereign issuers in the Portfolio with an ESG rating according to the Investment Adviser's proprietary internal scoring system had an ESG rating of less than or equal to 1.

The Portfolio's exposure to companies with less than 10% of women on the company's board of directors was 2.05% and the Reference/Portfolio Benchmark's exposure to companies with less than 10% of women on the company's board of directors was 2.51%.

Over the reference period, the Portfolio consistently achieved a lower exposure, relative to the Reference Portfolio/Benchmark, to companies with less than 10% of women on the companies board of directors.

The weighted average scope 1 and 2 carbon intensity of all the corporate issuers (where available) in the portfolio was 131.62 TCO2e/Sales (\$mn) and the weighted average scope 1 and 2 carbon intensity of the Reference Portfolio/Benchmark was 153.36 TCO2e/Sales (\$mn).

Over the reference period, the Portfolio consistently achieved a lower weighted average carbon intensity relative to the Reference Portfolio/Benchmark.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters respect for human rights, anti-corruption and anti-bribery

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	 GHG emissions Carbon footprint GHG intensity of investee companies Exposure to companies active in the fossil fuel sector
Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Unadjusted gender pay gap Board gender diversity Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAIs	 Emissions of inorganic pollutants Emissions of air pollutants Investments in companies without carbon emission reduction initiatives Water usage and recycling Deforestation

Asset allocation

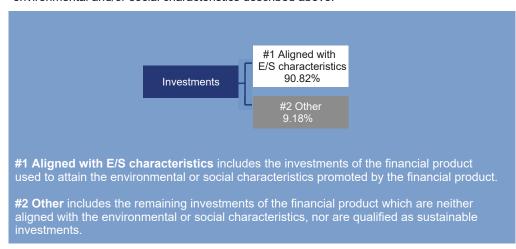

What was the proportion of sustainability-related investments?

Over the reference period, 90.82% of investments were aligned to the environmental and/or social characteristics promoted by this Portfolio.

What was the asset allocation?

Over the reference period, 90.82% of investments were aligned to the environmental and/or social characteristics promoted by this Portfolio. 9.18% were held in cash, derivatives and issuers for which data was lacking and which fell into the lowest ESG category or breached the ESG Criteria after purchased.

Over the reference period, a minimum of 50% of the Portfolio's investments were consistently aligned to the environmental and/or social characteristics described above.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes	
	In fossil gas	In nuclear energy
×	No	

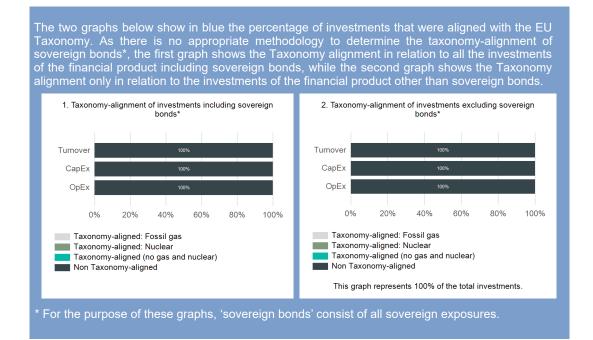

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management

Enabling activities
directly enable other
activities to make a
substantial contribution
to an environmenal
objective. Transitional
activities are activities
for which low-carbon

alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash for liquidity purposes, derivatives, mutual funds and collateralised securities for efficient portfolio management, and issuers for which data was lacking and which fell into the lowest ESG category or breach the ESG Criteria after purchased.

These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Management Company has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Management Company has engaged with corporate issuers in this Portfolio that the Management Company believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Management Company is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer.

Where applicable, the Management Company has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Management Company is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Management Company believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future business prospects.

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

To guide engagement at the firmwide-level, the Global Stewardship Team leverages our stewardship framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

How did this financial product perform compared with the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:

Goldman Sachs Global Credit Portfolio (Hedged)

Legal entity identifier: E4REFXWS2O3T4J05Y122

Environmental and/or social characteristics

Dic	Did this financial product have a sustainable investment objective ?					
	• [Yes	•	No №		
		ade sustainable investments with an ironmental objective:%		It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments		
		in economic activities that qualify as environmentally sustainable under the EU Taxonomy		□ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy		
		in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy		□ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy		
				□ with a social objective		
		ade sustainable investments with a ial objective:%	×	It promoted E/S characteristics, but did not make any sustainable investments		

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria") over the reference period. This consisted of: (i) exclusions based on proprietary ESG ratings; (ii) portfolio level targets as set forth below.

Additionally, the screening process for the Portfolio excluded government and corporate issuers that have the lowest category of ESG ratings according to the Investment Adviser's proprietary internal scoring system.

The Portfolio has achieved a lower exposure, relative to the Reference Portfolio/Benchmark, to companies with certain pre-defined thresholds for diversity on company boards as measured by percentage of women on the company's board of directors.

The Portfolio has achieved a lower weighted average carbon intensity relative to the Reference Portfolio/Benchmark.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators have performed as follows:

0% of corporate and sovereign issuers in the Portfolio with an ESG rating according to the Investment Adviser's proprietary internal scoring system had an ESG rating of less than or equal to 1.

The Portfolio's exposure to companies with less than 10% of women on the company's board of directors was 1.53% and the Reference/Portfolio Benchmark's exposure to companies with less than 10% of women on the company's board of directors was 1.78%.

Over the reference period, the Portfolio's exposure was consistently lower than the Reference Portfolio/Benchmark, save for ESG data changes which inadvertently caused the Portfolio to temporarily no longer adhere to the target, however the Portfolio was adjusted to reduce its exposure and bring it back in adherence with its target.

The weighted average scope 1 and 2 carbon intensity of all the corporate issuers (where available) in the portfolio was 106.87 TCO2e/Sales (\$mn) and the weighted average scope 1 and 2 carbon intensity of the Reference Portfolio/Benchmark was 199.71 TOCe/Sales (\$mn).

Over the reference period, the Portfolio consistently achieved a lower weighted average carbon intensity relative to the Reference Portfolio/Benchmark.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	Unit
Corporate and sovereign issuers with an ESG rating of less than or equal to 1	0	0	0	%
Exposure to companies with less than 10% of women on the company board of directors (in relation to the Reference Portfolio/Benchmark)	Portfolio: 2.6 Benchmark: 2.8	Portfolio: 2.6 Benchmark: 2.8	Portfolio: 1.53 Benchmark: 1.78	%
Weighted average scope 1 and 2 carbon intensity (in relation to the Reference Portfolio/Benchmark)	Portfolio: 126.6 Benchmark: 225	Portfolio: 55.35 Benchmark: 75.80	Portfolio: 106.87 Benchmark: 199.71	TCO2e/Sales (\$mn)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	GHG emissions Carbon footprint GHG intensity of investee companies Emissions to water
Mandatory Social PAIs	Unadjusted gender pay gap
Non-Mandatory Climate PAIs	Emissions of inorganic pollutants Emissions of air pollutants Investments in companies without carbon emission reduction initiatives Water usage and recycling Investments in companies without water management policies Exposure to areas of high water stress Land degradation, desertification, soil sealing Deforestation
Non-Mandatory Social PAI	Rate of accidents Number of days lost to injuries, accidents, fatalities or illness Insufficient whistleblower protection Lack of anti-corruption and anti-bribery policies Cases of insufficient action taken to address breaches of standards of anti-corruption and anti-bribery Number of convictions and amount of fines for violation of anti-corruption and anti-bribery laws

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2023-12-01 / 2024-11-30

Asset allocation

describes the share of investments in specific assets.

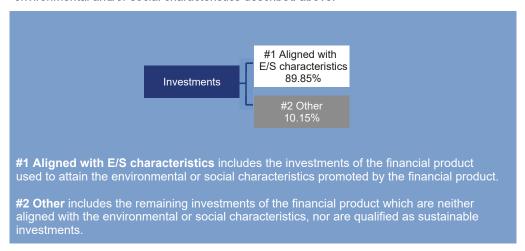

What was the proportion of sustainability-related investments?

Over the reference period, 89.85% of investments were aligned to the environmental and/or social characteristics promoted by this Portfolio.

What was the asset allocation?

Over the reference period, 89.85% of investments were aligned to the environmental and/or social characteristics promoted by this Portfolio. 10.15% were held in cash, derivatives, collateralised securities and issuers for which data was lacking and which fell into the lowest ESG category or breached the ESG Criteria after purchased.

Over the reference period, a minimum of 70% of the Portfolio's investments were consistently aligned to the environmental and/or social characteristics described above.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

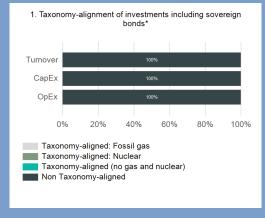

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy1?

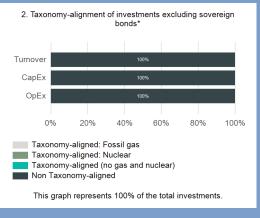

Yes		
In fossil gas		

In nuclear energy

× No

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management

Enabling activities

directly enable other activities to make a substantial contribution to an environmenal objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

-turnover reflecting the green activities of

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a

- operational expenditure (OpEx) reflecting green operational activities of investee companies

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash for liquidity purposes, derivatives and collateralised securities for efficient portfolio management, and issuers for which data was lacking and which fell into the lowest ESG category or breach the ESG Criteria after purchased. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Management Company has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Management Company has engaged with corporate issuers in this Portfolio that the Management Company believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Management Company is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer. Where applicable, the Management Company has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Management Company is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Management Company believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future business prospects.

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

To guide engagement at the firmwide-level, the Global Stewardship Team leverages our stewardship framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

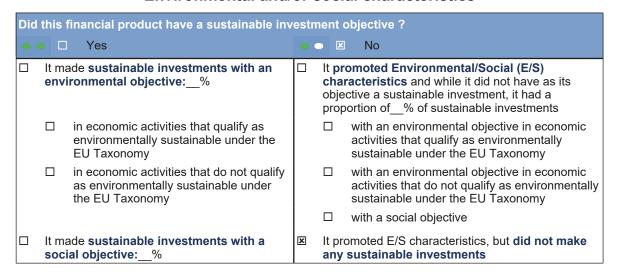

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria") over the reference period. This consisted of: (i) exclusionary screens; (ii) exclusions based on proprietary ESG ratings; (iii) portfolio level targets set forth below.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- · production or sale of tobacco;
- production or sale of civilian firearms.

The Portfolio has also excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

Additionally, the screening process for the Portfolio excluded government and corporate issuers that have the lowest category of ESG ratings according to the Investment Adviser's proprietary internal scoring system.

The Portfolio has achieved a lower exposure, relative to the Reference Portfolio/Benchmark, to companies with certain pre-defined thresholds for diversity on company boards as measured by percentage of women on the company's board of directors.

The Portfolio has achieved a lower weighted average carbon intensity relative to the Reference Portfolio/Benchmark.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators have performed as follows:

0% of the companies invested in by the Portfolio were directly engaged in, and/or derived significant revenues from:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- · production or sale of tobacco;
- · production or sale of civilian firearms.

0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles, save for one company which fell into this category subsequent to its investment and was readily disposed of.

0% of corporate and sovereign issuers in the Portfolio with an ESG rating according to the Investment Adviser's proprietary internal scoring system had an ESG rating of less than or equal to 1.

The Portfolio's exposure to companies with less than 10% of women on the company's board of directors was 049% and the Reference/Portfolio Benchmark's exposure to companies with less than 10% of women on the company's board of directors was 0.81% over the reference period.

Over the reference period, the Portfolio consistently achieved a lower exposure, relative to the Reference Portfolio/Benchmark, to companies with less than 10% of women on the companies board of directors.

The weighted average scope 1 and 2 carbon intensity of all the corporate issuers (where available) in the portfolio was 100.78 TCO2e/Sales (\$mn) and the weighted average scope 1 and 2 carbon intensity of the Reference Portfolio/Benchmark was 153.36 TCO2e/Sales (\$mn).

Over the reference period, the Portfolio consistently achieved a lower weighted average carbon intensity relative to the Reference Portfolio/Benchmark.

... and compared to previous periods ?

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	 GHG emissions Carbon footprint GHG intensity of investee companies Exposure to companies active in the fossil fuel sector
Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Unadjusted gender pay gap Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAIs	 Emissions of inorganic pollutants Emissions of air pollutants Investments in companies without carbon emission reduction initiatives Water usage and recycling Deforestation

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2023-12-01 / 2024-11-30

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

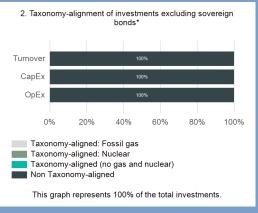

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy1?

	Yes		
	In fossil gas		In nuclear energy
×	No		

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

that do not take into account the criteria for sustainable economic activities under Regulation (EU)

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash for liquidity purposes, derivatives and collateralised securities for efficient portfolio management, and issuers for which data was lacking and which fell into the lowest ESG category or breach the ESG Criteria after purchased. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Management Company has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Management Company has engaged with corporate issuers in this Portfolio that the Management Company believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Management Company is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer. Where applicable, the Management Company has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Management Company is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Management Company believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future business prospects.

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

To guide engagement at the firmwide-level, the Global Stewardship Team leverages our stewardship framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

How did this financial product perform compared with the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Reference benchmarks are

benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

ractices.

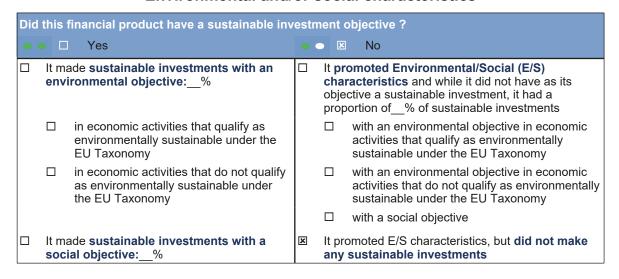

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria") over the reference period. This consisted of: (i) exclusionary screens; (ii) exclusions based on proprietary ESG ratings; (iii) portfolio level targets set forth below.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- · production or sale of tobacco;
- · production or sale of civilian firearms.

The Portfolio has also excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

Additionally, the screening process for the Portfolio excluded government and corporate issuers that have the lowest category of ESG ratings according to the Investment Adviser's proprietary internal scoring system.

The Portfolio has achieved a lower exposure, relative to the Reference Portfolio/Benchmark, to companies with certain pre-defined thresholds for diversity on company boards as measured by percentage of women on the company's board of directors.

The Portfolio has achieved a lower weighted average carbon intensity relative to the Reference Portfolio/Benchmark.

Principal adverse

significant negative impacts of investment decisions on

sustainability factors

and employee matters, respect for human

rights, anti-corruption

relating to

matters.

impacts are the most

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators have performed as follows:

0% of the companies invested in by the Portfolio were directly engaged in, and/or derived significant revenues from:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- · production or sale of tobacco;
- · production or sale of civilian firearms.

0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles, save for one company which fell into this category subsequent to its investment and was readily disposed of.

0% of corporate and sovereign issuers in the Portfolio with an ESG rating according to the Investment Adviser's proprietary internal scoring system had an ESG rating of less than or equal to 1.

The Portfolio's exposure to companies with less than 10% of women on the company's board of directors was 0.70% and the Reference/Portfolio Benchmark's exposure to companies with less than 10% of women on the company's board of directors was 0.81% over the reference period.

Over the reference period, the Portfolio consistently achieved a lower exposure, relative to the Reference Portfolio/Benchmark, to companies with less than 10% of women on the companies board of directors.

The weighted average scope 1 and 2 carbon intensity of all the corporate issuers (where available) in the portfolio was 58.03 TCO2e/Sales (\$mn) and the weighted average scope 1 and 2 carbon intensity of the Reference Portfolio/Benchmark was 153.36 TCO2e/Sales (\$mn).

Over the reference period, the Portfolio consistently achieved a lower weighted average carbon intensity relative to the Reference Portfolio/Benchmark.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

Over the re

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

DALCATECODY	PAI
PAI CATEGORY	PAI
Mandatory Climate PAIs	 GHG emissions Carbon footprint GHG intensity of investee companies Exposure to companies active in the fossil fuel sector
Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Unadjusted gender pay gap Board gender diversity Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAIs	 Emissions of inorganic pollutants Emissions of air pollutants Investments in companies without carbon emission reduction initiatives Water usage and recycling Deforestation

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes	
	In fossil gas	In nuclear energy
×	No	

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds. 1. Taxonomy-alignment of investments including sovereign 2. Taxonomy-alignment of investments excluding sovereign Turnover Turnover CapEx CapEx OpEx OpEx 0% 20% 40% 60% 80% 100% 100% Taxonomy-aligned: Fossil gas Taxonomy-aligned: Fossil gas Taxonomy-aligned: Nuclear Taxonomy-aligned: Nuclear Taxonomy-aligned (no gas and nuclear) Taxonomy-aligned (no gas and nuclear) ■ Non Taxonomy-aligned Non Taxonomy-aligned This graph represents 100% of the total investments For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include

comprehensive safety

and waste management

Enabling activities
directly enable other
activities to make a
substantial contribution
to an environmenal
objective. Transitional
activities are activities
for which low-carbon
alternatives are not yet
available and among
others have
greenhouse gas
emission levels
corresponding to the
best performance.

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash for liquidity purposes, derivatives and collateralised securities for efficient portfolio management, and issuers for which data was lacking and which fell into the lowest ESG category or breach the ESG Criteria after purchased. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Management Company has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Management Company has engaged with corporate issuers in this Portfolio that the Management Company believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Management Company is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer. Where applicable, the Management Company has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Management Company is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Management Company believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future business prospects.

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

To guide engagement at the firmwide-level, the Global Stewardship Team leverages our stewardship framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable
investment means an
investment in an
economic activity that
contributes to an
environmental or social
objective, provided that
the investment does not
significantly harm any
environmental or social

objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

the Taxonomy or not

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria") over the reference period. This consisted of: (i) exclusions based on proprietary ESG ratings; (ii) portfolio level targets as set forth below.

The screening process for the Portfolio generally excluded government and corporate issuers that have the lowest two categories of ESG ratings according to the Investment Adviser's proprietary internal scoring system provided, however, the Portfolio may have exposure of up to 30% in such government and corporate issuers.

The Portfolio has achieved a lower exposure, relative to the Reference Portfolio/Benchmark, to companies with certain pre-defined thresholds for diversity on company boards as measured by percentage of women on the company's board of directors.

The Portfolio has achieved a lower weighted average carbon intensity relative to the Reference Portfolio/Benchmark.

Principal adverse

decisions on sustainability factors

impacts are the most significant negative impacts of investment

environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators have performed as follows:

3.68% of corporates and sovereigns in the Portfolio with an ESG rating according to the Investment Adviser's proprietary internal scoring system of less than or equal to 2.

The Portfolio's exposure to companies with less than 10% of women on the company's board of directors was 4.13% and the Reference/Portfolio Benchmark's exposure to companies with less than 10% of women on the company's board of directors was 5.55% over the reference period.

Over the reference period, the Portfolio consistently achieved a lower exposure, relative to the Reference Portfolio/Benchmark, to companies with less than 10% of women on the companies board of directors.

The weighted average scope 1 and 2 carbon intensity of all the corporate issuers (where available) in the portfolio was 177.65 TCOe2/Sales (\$mn) and the weighted average scope 1 and 2 carbon intensity of the Reference Portfolio/Benchmark was 260.31 TCOe2/Sales (\$mn).

Over the reference period, the Portfolio consistently achieved a lower weighted average carbon intensity relative to the Reference Portfolio/Benchmark.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	 GHG emissions Carbon footprint GHG intensity of investee companies Emissions to water
Mandatory Social PAIs	Unadjusted gender pay gapBoard gender diversity
Non-Mandatory Climate PAIs	 Emissions of inorganic pollutants Emissions of air pollutants Investments in companies without carbon emission reduction initiatives Water usage and recycling Investments in companies without water management policies Exposure to areas of high water stress Land degradation, desertification, soil sealing Deforestation
Non-Mandatory Social PAI	Rate of accidents Number of days lost to injuries, accidents, fatalities or illness Insufficient whistleblower protection Lack of anti-corruption and anti-bribery policies Cases of insufficient action taken to address breaches of standards of anti-corruption and anti-bribery Number of convictions and amount of fines for violation of anti-corruption and anti-bribery laws

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy relat	ed activities
complying with the EU Taxonomy ¹ ?	

	Yes	
	In fossil gas	In nuclear energy
×	No	

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management

Enabling activities

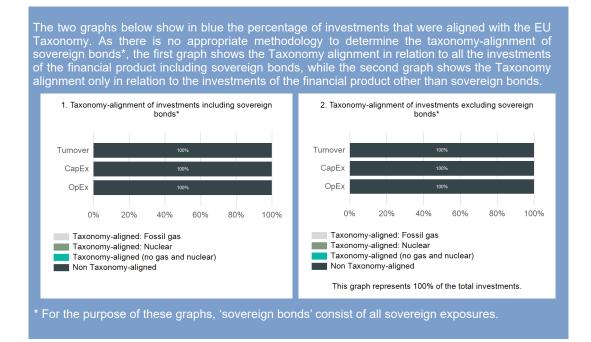

directly enable other activities to make a substantial contribution to an environmenal objective. **Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have

greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash for liquidity purposes, derivatives and mutual funds for efficient portfolio management and issuers for which data was lacking and which fell into the two lowest ESG category or breach the ESG Criteria after purchased. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Management Company has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Management Company has engaged with corporate issuers in this Portfolio that the Management Company believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Management Company is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer. Where applicable, the Management Company has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Management Company is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Management Company believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future business prospects.

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

To guide engagement at the firmwide-level, the Global Stewardship Team leverages our stewardship framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

Environmental and/or social characteristics

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth (the "ESG Criteria") over the reference period. This consisted of: (i) exclusionary screens; (ii) exclusions based on proprietary ESG ratings as set forth below.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- · production or sale of tobacco;
- production or sale of civilian firearms.

The Portfolio has also excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

Additionally, the screening process for the Portfolio excluded government and corporate issuers that have the lowest category of ESG ratings according to the Investment Adviser's proprietary internal scoring system.

Sustainability Indicators measure how the environmental

promoted by the financial product are attained.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators have performed as follows:

0% of the companies invested in by the Portfolio were directly engaged in, and/or derived significant revenues from:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- · production or sale of tobacco;
- · production or sale of civilian firearms.

0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles.

0.55% of corporate and sovereign issuers in the Portfolio with an ESG rating according to the Investment Adviser's proprietary internal scoring system had an ESG rating of less than or equal to 1.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	Unit
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above)	0	0	0	%
Companies violating the United Nations Global Compact`s ten principles	0	0	0	%
Corporate and sovereign issuers with an ESG rating of less than or equal to 1	0	0.52	0.55	%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	GHG emissions Carbon footprint GHG intensity of investee companies Exposure to companies active in the fossil fuel sector Emissions to water
Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Unadjusted gender pay gap Board gender diversity Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAIs	Emissions of inorganic pollutants Emissions of air pollutants Investments in companies without carbon emission reduction initiatives Water usage and recycling Investments in companies without water management policies Exposure to areas of high water stress Land degradation, desertification, soil sealing Deforestation
Non-Mandatory Social PAI	Rate of accidents Number of days lost to injuries, accidents, fatalities or illness Insufficient whistleblower protection Lack of anti-corruption and anti-bribery policies Cases of insufficient action taken to address breaches of standards of anti-corruption and anti-bribery Number of convictions and amount of fines for violation of anti-corruption and anti-bribery laws

	Wholesale trade except of motor vehicles and motorcycles	3.07%

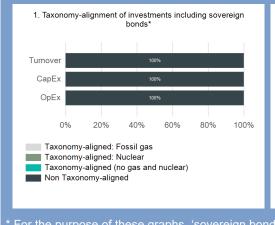

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

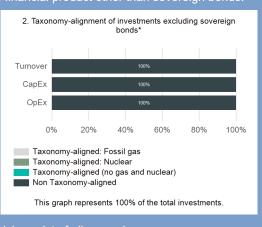

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy1?

	Yes	
	In fossil gas	In nuclear energy
×	No	

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the comprehensive safety and waste management

To comply with the EU

Enabling activities directly enable other activities to make a substantial contribution to an environmenal objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among greenhouse gas

Taxonomy-aligned activities are expressed as a share of:

corresponding to the

best performance.

-turnover reflecting the share of revenue from green activities of investee companies

- capital expenditure (CapEx) showing the green investments

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the

meaning of the EU Taxonomy was therefore also 0%.
Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU)

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash for liquidity purposes, derivatives for efficient portfolio management and issuers for which data was lacking and which fell into the lowest ESG category or breach the ESG Criteria after purchased. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Management Company has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Management Company has engaged with corporate issuers in this Portfolio that the Management Company believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Management Company is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer. Where applicable, the Management Company has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Management Company is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Management Company believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future business prospects.

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

To guide engagement at the firmwide-level, the Global Stewardship Team leverages our stewardship framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria") over the reference period. This consisted of: (i) exclusionary screens; (ii) exclusions based on proprietary ESG ratings; (iii) portfolio level targets.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- · production or sale of tobacco;
- · production or sale of civilian firearms.

The Portfolio has also excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

Over the reference period, the screening process for the Portfolio excluded government and corporate issuers that have the lowest category of ESG ratings according to the Investment Adviser's proprietary internal scoring system.

Additionally, the Portfolio additionally has achieved a lower exposure, relative to the Reference Portfolio/Benchmark, to companies with certain pre-defined thresholds for diversity on company boards as measured by percentage of women on the company's board of directors and has achieved a lower weighted average carbon intensity relative to the Reference Portfolio/Benchmark.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators and have performed as follows:

0% of the companies invested in by the Portfolio were directly engaged in, and/or derived significant revenues from:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- · production or sale of tobacco;
- · production or sale of civilian firearms.

0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles.

0% of corporate and sovereign issuers in the Portfolio with an ESG rating according to the Investment Adviser's proprietary internal scoring system had an ESG rating of less than or equal to 1.

Over the reference period, the Portfolio's exposure to companies with less than 10% of women on the company's board of directors was 0.77% and the Reference/Portfolio Benchmark's exposure to companies with less than 10% of women on the company's board of directors was 1.35%.

Over the reference period, the Portfolio consistently achieved a lower exposure, relative to the Reference Portfolio/Benchmark, to companies with less than 10% of women on the companies board of directors.

The weighted average scope 1 and 2 carbon intensity of all the corporate issuers (where available) in the portfolio was 45.34 TCO2e/Sales (\$mn) and the weighted average scope 1 and 2 carbon intensity of the Reference Portfolio/Benchmark was 64.12 TCO2e/Sales (\$mn).

Over the reference period, the Portfolio consistently achieved a lower weighted average carbon intensity relative to the Reference Portfolio/Benchmark.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters respect for human rights, anti-corruption and anti-bribery

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	GHG emissions Carbon footprint GHG intensity of investee companies Exposure to companies active in the fossil fuel sector Emissions to water
Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Unadjusted gender pay gap Board gender diversity Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAIs	Emissions of inorganic pollutants Emissions of air pollutants Investments in companies without carbon emission reduction initiatives Water usage and recycling Investments in companies without water management policies Exposure to areas of high water stress Land degradation, desertification, soil sealing Deforestation
Non-Mandatory Social PAI	Rate of accidents Number of days lost to injuries, accidents, fatalities or illness Insufficient whistleblower protection Lack of anti-corruption and anti-bribery policies Cases of insufficient action taken to address breaches of standards of anti-corruption and anti-bribery Number of convictions and amount of fines for violation of anti-corruption and anti-bribery laws

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes	
	In fossil gas	In nuclear energy
×	No	

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For

nuclear energy, the criteria include comprehensive safety and waste management

Enabling activities

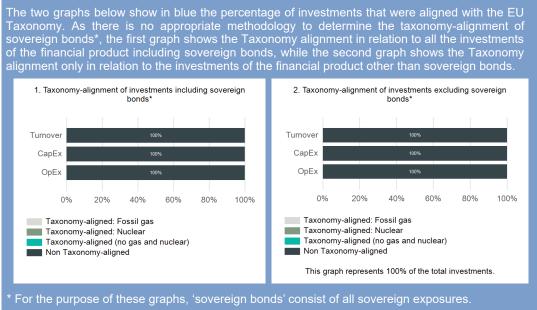

directly enable other activities to make a substantial contribution to an environmenal objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas

emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- as a share of:
 -turnover reflecting the share of revenue from green activities of
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash for liquidity purposes, derivatives, mutual funds and collateralised securities for efficient portfolio management, and issuers for which data was lacking and which fell into the lowest ESG category or breach the ESG Criteria after purchased.

These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Management Company has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Management Company has engaged with corporate issuers in this Portfolio that the Management Company believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Management Company is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer. Where applicable, the Management Company has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Management Company is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Management Company believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future business prospects.

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

To guide engagement at the firmwide-level, the Global Stewardship Team leverages our stewardship framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

How did this financial product perform compared with the reference benchmark?

What was the proportion of sustainability-related investments?

Over the reference period, 86.19% of investments were aligned to the environmental and/or social characteristics promoted by this Portfolio.

What was the asset allocation?

Over the reference period, 86.19% of investments were aligned to the environmental and/or social characteristics promoted by this Portfolio. 13.81% were held in cash at custodian account level, derivatives and issuers for which data was lacking and issuers which fell into the lowest ESG category or breached the ESG Criteria after purchased.

Over the reference period, a minimum of 50% of the Portfolio's investments were consistently aligned to the environmental and/or social characteristics described above.

In which economic sectors were the investments made?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

The two graphs below show in blue the percentage of investments that were aligned with the EU

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes	
	In fossil gas	In nuclear energy
×	No	

Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds. 1. Taxonomy-alignment of investments including sovereign 2. Taxonomy-alignment of investments excluding sovereign bonds* Turnover Turnover CapEx CapEx OpEx OpEx 0% 100% 20% 40% 60% 80% 100% 0% 20% 40% 60% 80% Taxonomy-aligned: Fossil gas Taxonomy-aligned: Fossil gas Taxonomy-aligned: Nuclear Taxonomy-aligned: Nuclear Taxonomy-aligned (no gas and nuclear) Taxonomy-aligned (no gas and nuclear) Non Taxonomy-aligned Non Taxonomy-aligned This graph represents 100% of the total investments

What was the share of investments made in transitional and enabling activities?

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management

Enabling activities

directly enable other activities to make a substantial contribution to an environmenal objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

re sustainable

investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash at custodian account level, derivatives for efficient portfolio management and issuers for which data was lacking and issuers which fell into the lowest ESG category or breach the ESG Criteria after purchased. When establishing the alignment of any securitisations or asset-backed commercial paper held in the Portfolio or repurchase agreements in which it may have invested with the E/S characteristics promoted by the Portfolio, the counterparty/issuer was assessed against the ESG Criteria described above and not the underlying collateral. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Management Company has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Management Company has engaged with corporate issuers in this Portfolio that the Management Company believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Management Company is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer. Where applicable, the Management Company has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Management Company is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Management Company believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future business prospects.

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

To guide engagement at the firmwide-level, the Global Stewardship Team leverages our stewardship framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

How did this financial product perform compared with the reference benchmark?

Environmental and/or social characteristics

sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria") over the reference period. This consisted of: (i) exclusionary screens; (ii) exclusions based on proprietary ESG ratings; (iii) portfolio level targets set forth below.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- · production or sale of tobacco;
- · production or sale of civilian firearms.

The Portfolio has also excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

Additionally, the screening process for the Portfolio excluded government and corporate issuers that have the lowest category of ESG ratings according to the Investment Adviser's proprietary internal scoring system.

The Portfolio has achieved a lower exposure, relative to the Reference Portfolio/Benchmark, to companies with certain pre-defined thresholds for diversity on company boards as measured by percentage of women on the company's board of directors.

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators have performed as follows:

•0% of the companies invested in by the Portfolio were directly engaged in, and/or derived significant revenues from:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- · production or sale of tobacco;
- · production or sale of civilian firearms.

0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles.

0% of corporate and sovereign issuers in the Portfolio with an ESG rating according to the Investment Adviser's proprietary internal scoring system had an ESG rating of less than or equal to 1.

Over the reference period, the Portfolio's exposure to companies with less than 10% of women on the company's board of directors was 0.34% and the Reference Portfolio/Benchmark's exposure to companies with less than 10% of women on the company's board of directors was 0.43%.

Over the reference period, the Portfolio consistently achieved a lower exposure, relative to the Reference Portfolio/Benchmark, to companies with less than 10% of women on the companies board of directors.

The weighted average scope 1 and 2 carbon intensity of all the corporate issuers (where available) in the portfolio was 141.95 TCO2e/Sales (\$mn) and the weighted average scope 1 and 2 carbon intensity of the Reference Portfolio/Benchmark was 236.34 TCO2e/Sales (\$mn).

Over the reference period, the Portfolio consistently achieved a lower weighted average carbon intensity relative to the Reference Portfolio/Benchmark.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	GHG emissions Carbon footprint GHG intensity of investee companies Exposure to companies active in the fossil fuel sector
Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Unadjusted gender pay gap Board gender diversity Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAIs	Emissions of inorganic pollutants Emissions of air pollutants Investments in companies without carbon emission reduction initiatives Water usage and recycling Deforestation

What were the top investments of this financial product?

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

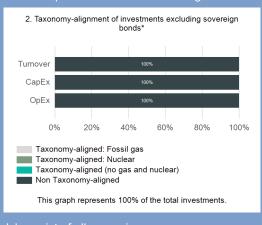

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes	
	In fossil gas	In nuclear energy
×	No	

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

^{*} For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

Taxonomy-aligned activities are expressed

To comply with the EU

Taxonomy, the criteria for fossil gas include

and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety

Enabling activities

directly enable other activities to make a

substantial contribution to an environmenal objective. **Transitional**

activities are activities for which low-carbon alternatives are not yet

available and among

 operational activities of

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

investee companies.

are sustainable investments with an environmental objective that do not take into account the criteria for

environmentally sustainable economic activities under Regulation (EU)

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash for liquidity purposes, derivatives and other collateralised securities for efficient portfolio management, and issuers for which data was lacking and which fell into the lowest ESG category or breach the ESG Criteria after purchased. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Management Company has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Management Company has engaged with corporate issuers in this Portfolio that the Management Company believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Management Company is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer. Where applicable, the Management Company has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Management Company is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Management Company believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future business prospects.

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

To guide engagement at the firmwide-level, the Global Stewardship Team leverages our stewardship framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

Goldman Sachs ESG-Enhanced Global Multi-Asset Balanced Portfolio

Environmental and/or social characteristics

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of exclusionary screens as set forth how the environmental below (the "ESG Criteria").

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by making no direct investments in transferable securities of companies that are, in the opinion of the Investment

• production of, and/or involvement in controversial weapons;

• extraction, and/or generation of thermal coal; extraction of oil sands; extraction of Arctic oil and gas;

Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- · production or sale of tobacco;
- for-profit prisons:
- · production or sale of civilian firearms;
- gambling-related business activities;
- · production and/or distribution of palm oil;
- predatory lending
- · adult entertainment.

The Portfolio has also excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

The Portfolio has limited exposure to issuers in which it is directly invested with carbon intensity above a level the Investment Adviser deems appropriate.

Additionally, the Portfolio promoted certain environmental and social characteristics by investing a portion of assets in certain Permitted Funds that themselves promote environmental/social characteristics such as by incorporating revenue-based exclusionary thresholds on activities such as tobacco, gambling, controversial weapons, coal extraction, and coal generation), and/or promoting certain ESG themes, and/or environmental and social characteristics including, but not limited to, climate risk, governance, and employee matters.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators have performed as follows:

- •0% of the companies invested in by the Portfolio were directly engaged in, and/or derived significant revenues from:
- production of, and/or involvement in controversial weapons;
- •extraction, and/or generation of thermal coal; extraction of oil sands; extraction of Arctic oil and gas;
- production or sale of tobacco;
- ·for-profit prisons;
- production or sale of civilian firearms;
- gambling-related business activities;
- production and/or distribution of palm oil;
- predatory lending
- adult entertainment
- •0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles.
- •0% of the direct investments in companies in the Portfolio exceeded a carbon emissions scope 1 and 2 intensity of 10,000 CO2t per \$mm sales.
- •Over the reference period, the Portfolio allocated an average of 82.5% of net assets to Permitted Funds that themselves promoted E/S characteristics.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	Unit
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above)	N/A	N/A	0	%
Companies violating the United Nations Global Compact`s ten principles	N/A	N/A	0	%
Direct investments in companies exceeding carbon emissions scope 1 and 2 intensity score (as outlined above)	N/A	N/A	0	%
Net assets allocated to Permitted Funds	78.8	78.4	82.5	%

Principal adverse impacts are the most significant negative impacts of investment decisions on

sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The consideration of investments made by the Portfolio as sustainable investments was determined by reference to the Investment Adviser's Sustainable Investment Framework, which includes an assessment as to whether the investment contributes to an environmental and/or social objective. Under this framework, an investment is considered to be contributing to an environmental and/or social objective via either a product or operational contribution.

Product contribution considers either i) the proportion of an issuer's revenue dedicated to an environmentally and/or socially sustainable impact category, ii) the alignment of a product to an environmental and/or social Sustainable Development Goal (SDG), iii) best-in-class scoring of an issue(r) as against environmental and/or social opportunities themes defined by an external data provider, or iv) the percentage of taxonomy aligned revenue of the issuer. Due to availability of reliable data, the taxonomy aligned revenue route will only be used as data improves.

Operational contribution takes a thematic approach, looking at the promotion of climate transition (environmental) within the operational framework of the issuer, inclusive growth (social) within the operational framework of the issuer, operational alignment to an environmental or social SDG, or the application of a best-in-class proprietary environmental and social score.

This Portfolio did not target a specific category of sustainable investments but assessed all investments made pursuant to its overall investment strategy using the Sustainable Investment Framework. Hence, the sustainable investments made by this Portfolio may contribute to a variety of environmental and/or social objectives of the sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Issuers that were classified as contributing to a sustainable investment were also required to meet the do no significant harm (DNSH) criteria of the Investment Adviser's Sustainable Investment Framework. Any issuers that do not meet the DNSH test will not qualify as a sustainable investment. A proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory indicators relating to investee companies for adverse impacts on sustainability factors ("PAIs") set out in the regulatory technical standards supplementing SFDR.

Additionally, all issuers with a very severe controversy are considered to be causing significant harm and excluded from qualifying as a sustainable investment.

How were the indicators for adverse impacts on sustainability factors taken into account?

This Portfolio considered principal adverse impacts on sustainability factors across environmental and social pillars. The PAIs were taken into account through the application of the DNSH principle outlined above for the determination of sustainable investments as well as qualitatively through the Portfolio's investment approach.

In regard to the consideration of the PAIs as part of the DNSH assessment of an issuer, as noted above a proprietary quantitative or qualitative threshold for significant harm has been set for the mandatory PAIs relating to investee companies, and is assessed using information from an external data provider. These thresholds for significant harm have been set on a relative or absolute basis against each PAI depending on the Investment Adviser's assessment of the worst performing investments with respect to those PAIs. Where data is not available for a specific PAI a suitable proxy metric has been identified. If both PAI and proxy PAI data (where relevant) is not available and/or applicable to complete the DNSH assessment on an issuer, such issuer is generally excluded from qualifying as a sustainable investment.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Portfolio leveraged Goldman Sachs Asset Management's proprietary approach to identifying and evaluating companies which, amongst other factors, are not considered to be aligned with global norms as further described below. Following this assessment, any companies which are considered to be in violation of these global norms (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights) were excluded from qualifying as a sustainable investment.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	 GHG emissions Carbon footprint GHG intensity of investee companies Exposure to companies active in the fossil fuel sector Share of non-renewable energy consumption and production Energy consumption intensity per high impact climate sector Activities negatively affecting biodiversity-sensitive areas Emissions to water Hazardous waste and radioactive waste ratio
Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises Unadjusted gender pay gap Board gender diversity Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2023-12-01 / 2024-11-30

Asset allocation describes the share of investments in specific assets

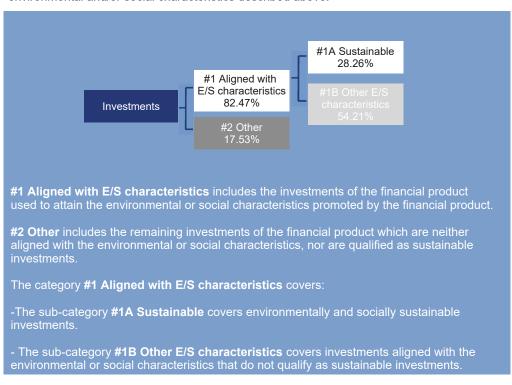

What was the proportion of sustainability-related investments?

Over the reference period, 82.47% of investments were aligned to the environmental and/or social characteristics promoted by this Portfolio.

What was the asset allocation?

Over the reference period, 82.47% of investments were aligned to the environmental and/or social characteristics promoted by this Portfolio. 17.53% were held in derivatives (such as equity and bond futures), exchange traded funds and other mutual funds. And while the Portfolio did not have as its objective a sustainable investment, it had a proportion of 28.26% sustainable investments.

Over the reference period, a minimum of 70% of the Portfolio's investments were consistently aligned to the environmental and/or social characteristics described above.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

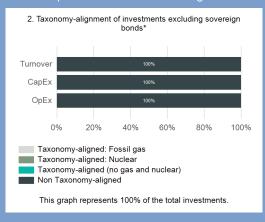

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes	
	In fossil gas	In nuclear energy
×	No	

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

^{*} For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management

Enabling activities directly enable other

activities to make a substantial contribution to an environmenal objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed

-turnover reflecting the share of revenue from green activities of

- capital expenditure (CapEx) showing the

green investments made by investee companies, e.g. for a transition to a green

- operational
expenditure (OpEx)
reflecting green
operational activities of
investee companies.

re sustainable

investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Whilst this Portfolio has invested in sustainable investments, it does not specifically commit to a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Hence, the minimum commitment is 0%.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include derivatives (such as equity and bond futures), exchange traded funds and other mutual funds. These investments were typically limited in their use within the long term asset allocation to strategies in which application of ESG policies are not possible (such as alternatives). Other exposure may have also arisen for either efficient portfolio management purposes, such as equitizing cash flows or expressing short term tactical views. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

				\square with a social objective		
		ade sustainable investments with a alobjective:%	×	It promoted E/S characteristics, but did not make any sustainable investments		

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Portfolio has promoted certain environmental and social characteristics by investing a portion of assets in certain Permitted Funds that: incorporate revenue-based exclusionary thresholds (incorporating revenue-based exclusionary thresholds on activities such as tobacco, gambling, controversial weapons, coal extraction, and coal generation), and/or promoting certain ESG themes, and/or environmental and social characteristics including, but not limited to, climate risk, governance, and employee matters.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators have performed as follows:

 Over the reference period, the Portfolio allocated an average of 72.7% of net assets to Permitted Funds that themselves promoted E/S characteristics.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	Unit
Net assets allocated to Permitted Funds	45.3	70.7	72.7	%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	GHG emissions Carbon footprint GHG intensity of investee companies Exposure to companies active in the fossil fuel sector
Mandatory Social PAIs	 Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Unadjusted gender pay gap Board gender diversity
Non-Mandatory Climate PAIs	Emissions of inorganic pollutants Emissions of air pollutants Investments in companies without carbon emission reduction initiatives Water usage and recycling Land degradation, desertification, soil sealing Investments in companies without sustainable land/agriculture practices Deforestation
Non-Mandatory Social PAI	 Rate of accidents Number of days lost to injuries, accidents, fatalities or illness

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include derivatives (such as equity and bond futures), exchange traded funds and other mutual funds which did not apply environmental, social and governance considerations as part of their investment policy (article 6). These investments may be used broadly as part of the long term asset allocation as well as efficient portfolio management purposes, including equitizing cash flows and expressing short term tactical views. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

How did this financial product perform compared with the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	 GHG emissions Carbon footprint GHG intensity of investee companies Activities negatively affecting biodiversity-sensitive areas
Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises Unadjusted gender pay gap Board gender diversity
Non-Mandatory Climate PAIs	 Investments in companies without carbon emission reduction initiatives Land degradation, desertification, soil sealing Investments in companies without sustainable land/agriculture practices Non-recycled waste ratio Deforestation
Non-Mandatory Social PAI	 Investments in companies without workplace accident prevention policies Rate of accidents Number of days lost to injuries, accidents, fatalities or illness

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmenal objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

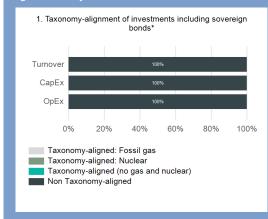

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

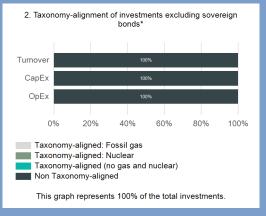

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

☐ Yes☐ In fossil gas☐ In nuclear energy☑ No

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include derivatives (such as equity and bond futures), exchange traded funds and other mutual funds which did not apply environmental, social and governance considerations as part of their investment policy (article 6). These investments may be used broadly as part of the long term asset allocation as well as efficient portfolio management purposes, including equitizing cash flows and expressing short term tactical views. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

How did this financial product perform compared with the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Reference

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective? It made sustainable investments with an It promoted Environmental/Social (E/S) environmental objective: % characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments in economic activities that qualify as with an environmental objective in economic environmentally sustainable under the activities that qualify as environmentally **EU Taxonomy** sustainable under the EU Taxonomy in economic activities that do not qualify with an environmental objective in economic as environmentally sustainable under activities that do not qualify as environmentally the EU Taxonomy sustainable under the EU Taxonomy with a social objective It promoted E/S characteristics, but did not make It made sustainable investments with a social objective: % any sustainable investments

Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental or social characteristics promoted by the financial product are attained. The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consists of portfolio level targets as set forth below (the "ESG Criteria") over the reference period.

The Portfolio has achieved a higher environmental score (E-score) relative to the Reference Portfolio/Benchmark.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators have performed as follows:

Over the reference period, the E-score of the Portfolio according to the Investment Adviser's proprietary ESG scoring system for each issuer was 2.48. The E-score of the Reference Portfolio/Benchmark was 2.16.

Over the reference period, the Portfolio consistently achieved a higher environmental score (E-score) relative to the Reference Portfolio/Benchmark.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	 November 30, 2024	Unit
Enviromental score (E-score)		 Portfolio: 2.48 Benchmark: 2.16	E-score
(in relation to the Reference Portfolio/Benchmark)			

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	GHG emissionsCarbon footprintGHG intensity of investee companies
Non-Mandatory Climate PAIs	 Emissions of inorganic pollutants Emissions of air pollutants Investments in companies without carbon emission reduction initiatives Water usage and recycling Deforestation

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash for liquidity purposes, derivatives, mutual funds, collateralised securities and fixed income securities issued by companies for efficient portfolio management purposes and issuers for which data was lacking. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

sustainable economic activities under Regulation (EU) 2020/852

that do not take into account the criteria for environmentally

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Management Company has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Management Company has engaged with corporate issuers in this Portfolio that the Management Company believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Management Company is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer. Where applicable, the Management Company has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Management Company is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Management Company believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future business prospects.

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

To guide engagement at the firmwide-level, the Global Stewardship Team leverages our stewardship framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Environmental and/or social characteristics

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth (the "ESG Criteria") over the reference period. This consisted of: (i) exclusionary screens; (ii) exclusions based on proprietary ESG ratings as set forth below.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- production or sale of tobacco;
- · production or sale of civilian firearms.

The Portfolio has also excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

Additionally, the screening process for the Portfolio has generally excluded government and corporate issuers that have the lowest category of ESG ratings according to the Investment Adviser's proprietary internal scoring system, however, the Portfolio may have exposure of up to 10% in such issuers.

might be aligned with the Taxonomy or not Sustainability Indicators measure

how the environmental

promoted by the financial product are attained.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators have performed as follows:

0% of the companies invested in by the Portfolio were directly engaged in, and/or derived significant revenues from:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- · production or sale of tobacco;
- · production or sale of civilian firearms.

0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles.

0% of the companies invested in by the Portfolio were believed by the Investment Adviser to be violating global norms based on the Investment Adviser's proprietary approach to identifying and evaluating global norms violators, save for one company which fell into this category for exclusion subsequent to its investment.

The Investment Adviser may not be able to readily sell securities that are intended for exclusion from the Portfolio based on the Investment Advisor's proprietary approach to identifying and evaluating global norms violators (for example, due to liquidity issues or for other reasons outside of the Investment Manager's control), however, will seek to divest as soon as possible in an orderly manner and in the best interests of Shareholders.

0.99% of corporate and sovereign issuers in the Portfolio with an ESG rating according to the Investment Adviser's proprietary internal scoring system had an ESG rating of less than or equal to 1 over the reference period.

... and compared to previous periods?

November 30, **Sustainability Indicator** November 30, November 30, Unit 2022 2023 2024 0 0 0 % Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above) 0 0 0 % Companies violating the United Nations Global Compact`s ten principles % Corporate and sovereign 0 0 0.99 issuers with an ESG rating of less than or equal to 1

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	GHG emissions Carbon footprint GHG intensity of investee companies Exposure to companies active in the fossil fuel sector
Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Unadjusted gender pay gap Board gender diversity Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAIs	 Emissions of inorganic pollutants Emissions of air pollutants Investments in companies without carbon emission reduction initiatives Water usage and recycling Deforestation

available and among

corresponding to the

best performance.

greenhouse gas emission levels

comprehensive safety and waste management

-turnover reflecting the share of revenue from green activities of investee companies.

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green

- operational expenditure (OpEx) reflecting green operational activities o investee companies.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

re sustainable

investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash for liquidity purposes, derivatives and collateralised securities for efficient portfolio management, and issuers for which data was lacking and which fell into the lowest ESG category or breach the ESG Criteria after purchased. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Management Company has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Management Company has engaged with corporate issuers in this Portfolio that the Management Company believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Management Company is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer. Where applicable, the Management Company has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Management Company is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Management Company believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future business prospects.

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

To guide engagement at the firmwide-level, the Global Stewardship Team leverages our stewardship framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote. How did this financial product perform compared with the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

investment means an economic activity that

objective, provided that the investment does not significantly harm any objective and that the investee companies follow good governance

Sustainable

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic

activities. That Regulation does not include a list of socially activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not

			de sustainable investments with a al objective:%	×		moted E/S characteristics, but did not make sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental promoted by the financial product are attained.

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process as set forth below (the "ESG Criteria") over the reference period. This consisted of: (i) exclusionary screens; (ii) exclusions based on proprietary ESG ratings; (iii) portfolio level targets set forth below.

As part of the ESG investment process, the Investment Adviser has adhered to the ESG Criteria by avoiding investment in debt securities issued by corporate and sovereign issuers that are, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenues from the following activities:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- production or sale of tobacco;
- · production or sale of civilian firearms.

The Portfolio has also excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

Additionally, the screening process for the Portfolio has generally excluded government and corporate issuers that have the lowest category of ESG ratings according to the Investment Adviser's proprietary internal scoring system, however, the Portfolio may have exposure of up to 10% in such issuers.

The Portfolio has achieved a lower exposure, relative to the Reference Portfolio/Benchmark, to companies with certain pre-defined thresholds for diversity on company boards as measured by percentage of women on the company's board of directors.

The Portfolio has achieved a lower weighted average carbon intensity relative to the Reference Portfolio/Benchmark.

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators have performed as follows:

0% of the companies invested in by the Portfolio were directly engaged in, and/or derived significant revenues from:

- production of, and/or involvement in controversial weapons (including nuclear weapons);
- extraction, production or generation of certain fossil fuels (including thermal coal and oil sands);
- · production or sale of tobacco;
- · production or sale of civilian firearms.

0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles.

0% of the companies invested in by the Portfolio were believed by the Investment Adviser to be violating global norms based on the Investment Adviser's proprietary approach to identifying and evaluating global norms violators.

0.02% of corporate and sovereign issuers in the Portfolio with an ESG rating according to the Investment

Adviser's proprietary internal scoring system had an ESG rating of less than or equal to 1.

The Portfolio's exposure to companies with less than 10% of women on the company's board of directors was 0.50% and the Reference/Portfolio Benchmark's exposure to companies with less than 10% of women on the company's board of directors was 0.81% over the reference period.

Over the reference period, the Portfolio's exposure was consistently lower than the Reference Portfolio/Benchmark, save for ESG data changes which inadvertently caused the Portfolio to temporarily no longer adhere to the target, however the Portfolio was adjusted to reduce its exposure and bring it back in adherence with its target.

The weighted average scope 1 and 2 carbon intensity of all the corporate issuers (where available) in the portfolio was 58.50 TCO2e/Sales (\$mn) and the weighted average scope 1 and 2 carbon intensity of the Reference Portfolio/Benchmark was 153.36 TCO2e/Sales (\$mn).

Over the reference period, the Portfolio consistently achieved a lower weighted average carbon intensity relative to the Reference Portfolio/Benchmark.

... and compared to previous periods?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	Unit

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	GHG emissions Carbon footprint GHG intensity of investee companies Exposure to companies active in the fossil fuel sector

Mandatory Social PAIs	Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Unadjusted gender pay gap Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
Non-Mandatory Climate PAIs	 Emissions of inorganic pollutants Emissions of air pollutants Investments in companies without carbon emission reduction initiatives Water usage and recycling Deforestation

What was the proportion of sustainability-related investments?

Over the reference period, 70.53% of investments were aligned to the environmental and/or social characteristics promoted by this Portfolio.

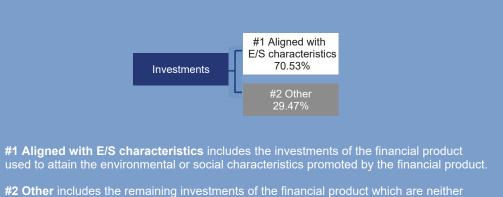

What was the asset allocation?

Over the reference period, 70.53% of investments were aligned to the environmental and/or social characteristics promoted by this Portfolio. 29.47% were held in cash, derivatives, collateralised securities and issuers for which data was lacking and which fell into the lowest ESG category or breached the ESG Criteria after purchased.

Over the reference period, a minimum of 50% of the Portfolio's investments were consistently aligned to the environmental and/or social characteristics described above.

Asset allocation describes the share of investments in specific

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes	
	In fossil gas	In nuclear energy
×	No	

The two graphs below show in blue the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management

Enabling activities directly enable other activities to make a substantial contribution to an environmenal objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas

Taxonomy-aligned activities are expressed as a share of:

corresponding to the

best performance.

- -turnover reflecting the share of revenue from green activities of
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green
- operational expenditure (OpEx) reflecting green operational activities of investee companies

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU)

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include cash for liquidity purposes, derivatives, mutual funds and collateralised securities for efficient portfolio management, and issuers for which data was lacking and which fell into the lowest ESG category or breach the ESG Criteria after purchased. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Management Company has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the companies and issuers represented in the Portfolio was a key part of the investment process.

The Management Company has engaged with corporate issuers in this Portfolio that the Management Company believed to have low ESG credentials or involvement in sustainability related controversies, with the objective to encourage issuers to improve their ESG practices relative to peers. The Management Company is permitted to invest in a corporate issuer prior to or without engaging with such corporate issuer. Where applicable, the Management Company has engaged with sovereign issuers in this Portfolio that have a low E-score with the objective to encourage sovereigns to improve their overall environmental performance and to encourage enhanced disclosures of climate related metrics. The Management Company is permitted to invest in a sovereign issuer, where applicable, prior to or without engaging with such sovereign issuer.

The Global Stewardship Team focus on proactive, outcomes-based engagement, in an attempt to promote best practices. The engagements conducted by the Global Stewardship Team were designed to complement the engagements conducted by our investment teams. The Fixed Income Team regularly engaged with companies including in one-on-one and investor group settings to corporate issuers that the Management Company believed to have had low ESG credentials, with the objective to encourage issuers to improve their ESG practices relative to peers. Engagement with management teams was an important component of the fixed income research process, which often informed investment selection. It gave a unique insight into management quality, business model, financial performance and strategy and future business prospects.

The engagement initiatives were continually reviewed, enhanced, and monitored to ensure they incorporated current issues, evolving views about key environmental, social, and governance topics and sustainability-related controversies.

To guide engagement at the firmwide-level, the Global Stewardship Team leverages our stewardship framework, which reflects thematic priorities and guides voting and engagement efforts, and will include environmental, social and governance matters that are considered to be principal in terms of potential adverse impacts.

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote. How did this financial product perform compared with the reference benchmark?

No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability Indicators measure how the environmental promoted by the financial product are attained.

The Investment Adviser has implemented an approach to Environmental, Social and Governance (ESG) considerations into its fundamental investment process which consisted of exclusionary screens as set forth below (the "ESG Criteria").

As part of the ESG investment process, the Portfolio has adhered to the ESG Criteria by making no investments in companies that were, in the opinion of the Investment Adviser, directly engaged in, and/or deriving significant revenue from the following activities:

- · controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- · tobacco;
- · alcohol;
- · adult entertainment:
- · for-profit prisons;
- · civilian firearms;
- gambling.

The Portfolio has also excluded from its investment universe companies the Investment Adviser believed to be violating the United Nations Global Compact's ten principles (which are widely recognised corporate sustainability principles that meet fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption).

Principal adverse

relating to

impacts are the most significant negative impacts of investment sustainability factors

environmental, social

respect for human rights, anti-corruption and anti-bribery

How did the sustainability indicators perform?

The Portfolio used sustainability indicators to measure the attainment of the environmental and/or social characteristics promoted by the Portfolio. These sustainability indicators have performed as follows:

0% of the companies invested in by the Portfolio were directly engaged in, and/or derived significant revenues from:

- · controversial weapons (including nuclear weapons);
- extraction and/or production of certain fossil fuels (including thermal coal, oil sands, arctic oil and gas);
- · tobacco;
- · alcohol;
- · adult entertainment;
- · for-profit prisons;
- · civilian firearms;
- gambling

0% of the companies in the Portfolio were believed by the Investment Adviser to be violating the United Nations Global Compact ten principles.

... and compared to previous periods?

Sustainability Indicator	November 30, 2022	November 30, 2023	November 30, 2024	Unit
Companies invested in by the Portfolio that were directly engaged in, and/or derived significant revenue from excluded activities (as outlined above)	0	0	0	%
Companies violating the United Nations Global Compact's ten principles	0	0	0	%

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Over the reference period, the Portfolio did not commit to a minimum proportion of sustainable investments.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Over the reference period, the Portfolio considered principal adverse impacts on sustainability factors (PAIs) across the environmental and/or social pillars. PAIs are taken into account qualitatively through the application of the binding ESG criteria outlined in the prospectus. On a non-binding and materiality basis, PAIs are also considered through firm-wide and investment team specific engagement. The PAIs considered by this Portfolio included:

PAI CATEGORY	PAI
Mandatory Climate PAIs	Exposure to companies active in the fossil fuel sector

Mandatory Social PAIs	 Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises Exposure to controversial weapons (antipersonnel mines, cluster munitions, chemical weapons and biological weapons)
-----------------------	---

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 2023-12-01 / 2024-11-30

Largest investments	Sector	% Assets	Country
AMAZON.COM INC.	Wholesale and retail trade; repair of motor vehicles and motorcycles	3.55%	US

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Over the reference period, the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy and therefore its alignment with the Taxonomy was 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy1?

	1 7 0	•	
	Yes		
	In fossil gas		In nuclear energ
×	No		

Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully low-carbon fuels by the end of 2035. For nuclear energy, the comprehensive safety

To comply with the EU

Enabling activities

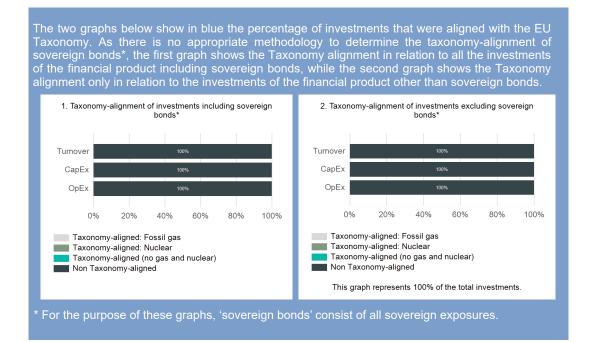

directly enable other activities to make a substantial contribution objective. Transitional activities are activities for which low-carbon alternatives are not yet available and among

others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:

- -turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

What was the share of investments made in transitional and enabling activities?

As the Portfolio did not invest in any "sustainable investments" within the meaning of the EU Taxonomy, the minimum share of investments in transitional and enabling activities within the meaning of the EU Taxonomy was therefore also 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

There have been no changes compared with previous reference periods.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Over the reference period, the Portfolio has promoted environmental and social characteristics but did not make any sustainable investments. As a consequence, the Portfolio did not invest in a minimum share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

This question is not applicable as the Portfolio did not make socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Investments included under "other" include derviatives and cash, allocated at the discretion of the underlying managers. These investments were used to achieve the investment objective of the Portfolio but neither promote the environmental or social characteristics of the Portfolio, nor qualify as sustainable investments.

These financial instruments were not subject to any minimum environmental or social safeguards.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Investment Adviser has taken actions to ensure that the environmental and/or social characteristics of the Portfolio were met during the reference period. The sustainability indicators of the Portfolio were measured and evaluated on an ongoing basis.

GSAM used proprietary firm and third-party systems to monitor compliance with binding environmental or social characteristics of the Portfolio contained within the investment guidelines in line with the GSAM Investment Guidelines Policy.

Breaches or errors regarding investment guidelines (including breaches or errors regarding the binding environmental or social characteristics and minimum sustainable investment commitments of the Portfolio) were handled in accordance with the Management Company's Policy on Breaches and Errors and the Policy on GSAM Error Handling which also requires that employees promptly report any incidents (whether resulting from action or inaction) to their GSAM supervisors as well as GSAM Compliance. The information gathered in the incident reporting process is to ensure that clients are appropriately compensated, to assist in improving business practices and help prevent further occurrences.

Additionally, assessing and promoting effective stewardship among the investee companies represented in the multi-managed Portfolio was a key part of the investment process. Given the multi-manager Portfolio nature, the Investment Adviser assessed the level of active engagement the external managers had with underlying portfolio companies on ESG issues as reflected in each manager's stewardship resources, activities, and reports. On an annual basis a due diligence questionnaire was sent to underlying managers which included questions focused on engagement activities and their results.

How did this financial product perform compared with the reference benchmark?

Reference benchmarks are indexes to measure whether the financial products attains the environmental or social characteristics that they promote. No reference benchmark has been designated for the purpose of attaining the environmental or social characteristics promoted by the Portfolio.

Goldman Sachs Funds Additional Information (Unaudited)

Offering Documents

This material is provided at your request for informational purposes only and does not constitute a solicitation in any jurisdiction in which such a solicitation is unlawful or to any person to whom it is unlawful. It only contains selected information with regards to the Fund and does not constitute an offer to buy shares in the Fund. Prior to an investment, prospective investors should carefully read the latest Key Information Document (KID) as well as the offering documentation, including but not limited to the Fund's prospectus which contains inter alia a comprehensive disclosure of applicable risks. The relevant articles of association, prospectus, supplement, KID and latest annual/semi-annual report are available free of charge from the Fund's paying and information agent and/or from your financial adviser.

Distribution of Shares

Shares of the Fund may not be registered for public distribution in a number of jurisdictions (including but not limited to any Latin American, African or Asian countries). Therefore, the shares of the Fund must not be marketed or offered in or to residents of any such jurisdictions unless such marketing or offering is made in compliance with applicable exemptions for the private placement of collective investment schemes and other applicable jurisdictional rules and regulations.

Investment Advice and Potential Loss

Financial advisers generally suggest a diversified portfolio of investments. The Fund described herein does not represent a diversified investment by itself. This material must not be construed as investment or tax advice. Prospective investors should consult their financial and tax adviser before investing in order to determine whether an investment would be suitable for them. An investor should only invest if he/she has the necessary financial resources to bear a complete loss of this investment.

Past performance does not guarantee future results, which may vary. The value of investments and the income derived from investments will fluctuate and can go down as well as up. A loss of principal may occur.

Index Benchmarks

References to indices, benchmarks or other measures of relative market performance over a specified period of time are provided for your information only and do not imply that the portfolio will achieve similar results. The index composition may not reflect the manner in which a portfolio is constructed. While an adviser seeks to design a portfolio which reflects appropriate risk and return features, portfolio characteristics may deviate from those of the benchmark.

Confidentiality

No part of this material may, without Goldman Sachs' prior written consent, be (i) copied, photocopied or duplicated in any form, by any means, or (ii) distributed to any person that is not an employee, officer, director, or authorised agent of the recipient.
