BNY Mellon Investment Funds - Annual Report & Accounts

Report of the Authorised Corporate Director (ACD)

This is the annual report for the BNY Mellon Investment Funds ICVC ("the Company") for the year to 30 June 2023.

Equity markets rose over the 12-month period till the end of June 2023, benefiting from an upward surge in the final months of 2022, which continued into 2023, despite some wobbles along the way. Several markets, including the FTSE 100 Index and Germany's Dax Index, set new all-time highs during the period. In contrast, government bond markets weakened, as interest rates rose across the world in an effort to contain inflation.

The rally in equities was largely driven by falling inflation levels in major markets and the rising hope that the pace of interest rate hikes would ease. Additionally, there was increasing confidence that the downturn in the global economy might not be as bad as feared and that a global recession could be avoided. China's loosening of its strict Covid-related restrictions, after nationwide demonstrations against them, also underpinned the upward move in equities. However, markets set back in February and early March, as a mini-banking crisis – the failure of three mid-sized regional banks in the US and the end of Credit Suisse's trading as an independent operation (it was taken over by UBS) – flared up. There was also nervousness towards the end of the period that the US government might technically default, as an agreement to extend its debt ceiling in US Congress seemed difficult to achieve, although ultimately a deal came through at the eleventh hour.

Inflation, and the fight against inflation, continued to dominate the backdrop to markets. While there was some encouragement in the US and several other countries that inflation appeared to have peaked in 2022, it became clear that inflationary pressures had broadened, as witnessed by still stubbornly high core inflation levels in many countries. In the UK, headline inflation fell but not by as much as in the US and the eurozone, as food prices in particular remained elevated. The US Federal Reserve (Fed) and other major central banks continued to emphasise the need to get on top of inflationary pressures and raised interest rates throughout most of the period. Having hiked interest rates by 75 basis points (bps) at four consecutive meetings in 2022, the Fed slowed the pace of its interest rate hikes in December (50 bps), and the subsequent three meetings in 2023 (25 bps each), before leaving rates unchanged in June. The Bank of England (BoE) followed suit, reducing the pace of interest rate hikes to 25 bps in 2023 until the BoE raised rates by 50 bps in June following May's disappointing inflation figure. The European Central Bank (ECB) raised rates by 50 bps in February and March before reducing the pace to 25 bps in May and June. However, the Fed, BoE and ECB all stated that interest rates would likely need to rise in the second half of the year and that it was too early to talk of rate cuts despite the falls in inflation.

The war in Ukraine persisted, with no obvious end in sight. Oil and gas prices, which had initially soared following Russia's invasion of Ukraine, fell during the period on worries about economic growth.

Economic data from most countries was generally sluggish. By early 2023, there were some signs of stabilisation, even mild recovery, leading to talk of 'green shoots' in some circles. The US remained more robust than most other economies, particularly its labour market, with job creation remaining high and unemployment low. However, the annualised growth rate in the US waned in the final quarter of 2022 and the first quarter of 2023. Against expectations, the UK avoided a recession in the final quarter of the year, while the eurozone economy did fall into a technical recession, as it produced two consecutive quarters of marginally negative growth (-0.1%) in the final quarter of 2022 and the first quarter of 2023. China's very tight Covid restrictions affected its growth rate through 2022. Growth rebounded following the easing of restrictions in early 2023, but there were some signs that growth was waning again by the end of June.

Equity markets have continued to face significant challenges, but have nonetheless made headway as hopes have grown that inflation will continue to fall, interest rates will eventually peak and economic growth recover. While inflation has fallen, the latter two are taking longer to occur. However, investors naturally look and discount ahead, so it appears that equities are well supported at current levels. Earnings have also held up better than had been feared, despite materially higher input costs, while valuations in aggregate are not too stretched. For bond markets too, the outlook should improve once interest rates peak – something expected either later this year or early next year.

Significant Events - Mergers

As set out in the circulars to shareholders dated 25 August 2023, Insight Investment Management (Global) Limited, the current investment manager of BNY Mellon Equity Income Booster Fund and BNY Mellon Equity Income Fund (the 'Merging Funds') will be resigning from their role with effect from 14 November 2023. This prompted a strategic review of the Merging Funds following which the ACD has concluded that it would be in the best interest of shareholders of the Merging Funds to merge with BNY Mellon UK Income Fund ('the Receiving Fund'). As well as simplifying and consolidating the equity income funds in our range, we believe the Mergers will benefit the shareholders of the Merging Funds. The investment manager of the Receiving Fund is Newton Investment Management Limited. Both investment managers are FCA regulated and considered leaders in their investment strategies.

Following the passing of those proposals in a shareholder meeting on 29 September 2023, the ACD of the Company merged BNY Mellon Equity Income Booster Fund and BNY Mellon Equity Income Fund (the 'Merging Funds') each a Sub-fund of the Company, with BNY Mellon UK Income Fund ('the Receiving Fund'), also a Sub-fund of the Company, by way of 'domestic' UCTIS merger on 7 October 2023.

Subject to FCA approval, it is the ACDs intention to close the BNY Mellon Sustainable Sterling Bond Fund. The ACD will communicate to investors of this Sub-fund in due course about their available options.

BNY Mellon Investment Funds - Annual Report & Accounts

Market background

12 months to June 2023

Global inflation and rising interest rates, three UK prime ministers, a new King, Europe-wide labour strikes, the ongoing war in Ukraine and a mini-banking crunch in the US. Investment markets were not devoid of opportunity, but it was a rocky 12 months to end of June 2023.

Fixed interest – the debt of companies and governments – fell as interest rates started to climb. A wary atmosphere appeared to spread in markets. This was made worse in the autumn of 2022. UK Prime Minister Liz Truss and her chancellor, Kwasi Kwarteng’s “mini-budget” sparked dramatic moves in UK government debt and sterling. It is unusual to see such large falls in government bonds. The Bank of England was forced to intervene to stabilise the gilt market.

Persistent inflation and a fear of a recession was also growing in the US and across Europe. This all had profound implications for equity markets. Early on in this period there was a resurgence of interest in value stocks – companies that appear to be priced lower than their intrinsic value. Many such companies are considered more mature and less exciting than say, growth areas like technology. Yet such companies tend to be solid and focus on repaying shareholders through dividends.

However, sparked by interest in new technology developments, such as artificial intelligence applications, growth companies came back into fashion.

In March 2023 markets were temporarily shaken by a mini-banking crisis. Three medium-sized regional banks went bankrupt in the US, followed by an “emergency” rescue of Credit Suisse by UBS. The impact of this led to a heightened focus on the financial sector in general towards the end of the review period. While a few of the funds in the BNY Mellon Investment Funds range were exposed to the financials sector, the lasting effects were considered minimal.

Meanwhile, the war in Ukraine seemed as if it would continue indefinitely. Geopolitical tensions between the US and China, particularly in relation to Taiwan, also overshadowed markets.

Throughout the period, the world’s central banks continued to tighten monetary policy. Headline inflation peaked in many places but remains high and a concern. Over much of the year, the UK’s rate of inflation remained higher than all other G7 and eurozone nations, with UK food price inflation most acute.

While the 12-month period was challenging, there were areas of opportunity for active managers. The renewed interest in value stocks and dividends shifted investment focus. And growth stories still captured attention – particularly the buzz around artificial intelligence and technology. Global equity markets, including the UK, Europe and US, showed positive returns over the full 12 months covered by the Annual Report and Accounts.

Highlights

North America

Key events included:

- Inflation fell through the year – from its high in June 2022 of 9.10% to 4.00% by May 2023 as energy – notably gasoline prices – fell markedly.
- The US Federal Reserve raised interest rates significantly during the period, taking them from 1.50% - 1.75% to 5.25% – 5.50%.
- GDP growth slowed from 2.70% annualised in the third quarter of 2022 to 2.20% for the first quarter of 2023.

BNY Mellon Investment Funds - Annual Report & Accounts

Market background

(continued)

Europe (including UK)

- European markets rose over the period even though trends in inflation and interest rates, as well as the war in Ukraine, dominated the backdrop.
- The European Central Bank began to raise interest rates. From 0% in July 2022 to 3.50% by June 2023. Eurozone inflation peaked in October 2022, easing more quickly than in the UK.
- In the UK, interest rates had risen to 5.00% by June (from 1.25% in early July 2022). The Bank of England accelerated the pace of rate hikes after inflation remained high - at 8.70% in May 2023.
- Economic growth was relatively meagre across Europe and the UK.

Asia

- Asian economic performance was stable through mid-year despite the disappointing slowdown in China. This was mainly because of the gradual re-opening impulse across much of Asia which boosted (pent-up) tourism and consumption. Moreover, easing energy prices, a flattish trend in the US dollar and only modest increases in US rates were supportive as well.
- Chinese activity slowed notably through mid-2023 on the downturn in its property sector, heightened fear of financial contagion, weakening confidence in its private tech sector and the dearth of much policy or regulatory easing.
- Countries like Japan and India held up reasonably well. The former benefited from the Bank of Japan's ultra-loose monetary policies and a pick-up in domestic wage growth. Meanwhile, India's economic activity regained momentum as energy prices eased, and as public capex and services exports rose more than expected.
- The tech sector recovery in Korea and Taiwan remained intact as semiconductor prices bottomed, but the drag from China's downturn has slowed the full scope of a broader recovery in these countries.

Fixed Income

- Government bond markets weakened as interest rates continued to head higher. Except for central banks in China and Japan, major global central banks continued to raise rates, causing bond yields to rise and bond prices to fall.
- Corporate bonds generally outperformed government bonds.

Currencies and commodities

- The US dollar weakened mildly over the period.
- Sterling appreciated against other currencies in aggregate, despite hitting an all-time low against the US dollar in late September 2022, following Liz Truss's 'mini-budget'.
- The euro was relatively strong over the period. While it was largely flat against sterling, it rose against the US dollar.
- The Japanese yen was volatile against the US dollar but ended the period lower.
- Commodity indices fell in aggregate. Oil prices were notably weak while copper was volatile, although it produced a positive return.
- Other key industrial metals, such as aluminium, and notably zinc, were weaker on concerns about global demand. Lithium, used in electric-vehicle batteries, soared to an all-time high in November 2022 but fell thereafter to finish the period down.
- The gold price rallied and traded close to all-time highs in May before easing a little.

BNY Mellon Investment Funds - Annual Report & Accounts

Notes applicable to the financial statements of all Sub-funds

for the year ended 30 June 2023

1.1 Accounting policies

(a) Basis of preparation

The financial statements have been prepared using the historical cost convention in accordance with United Kingdom Generally Accepted Accounting Practice (UK GAAP) and the Statement of Recommended Practice 'Financial Statements of UK Authorised Funds' issued by the Investment Association (formerly Investment Management Association) in May 2014 and amended in June 2017 (the SORP).

In applying UK GAAP, the financial statements have been prepared in compliance with Financial Reporting Standard 102 (FRS 102).

As set out in the circulars sent to shareholders dated 25 August 2023, and following the passing of those proposals in a shareholder meeting, the ACD of the Company merged BNY Mellon Equity Income Booster Fund and BNY Mellon Equity Income Fund, each a Sub-fund of the Company, with BNY Mellon UK Income Fund, also a Sub-fund of the Company. Following completion of the mergers, those Sub-funds no longer have any shareholders and therefore the ACD will proceed to terminate those Sub-funds. Additionally, the ACD of the Company has decided to close the BNY Mellon Sustainable Sterling Bond Fund, also a sub-fund of the Company, subject to FCA Approval. The financial statements of those Sub-funds are not prepared on a going concern basis for the year ended 30 June 2023, but are prepared on a break-up basis. Under this basis, all assets are recorded at their estimated realisable amount and all liabilities at their estimated settlement amount. The liquidation costs are borne by the ACD.

The financial statements for the remaining Sub-funds of the Company have been prepared on a going concern basis in accordance with UK GAAP and the SORP. There are no material events that have been identified that may cast significant doubt about the ability of the remaining Sub-funds of the Company to continue as going concern for a period of 12 months from when these financial statements are authorised to issue. The ACD believes that the Company comprising those remaining Sub-funds has adequate resources to continue in operational existence for the foreseeable future and they continue to adopt the going concern basis in preparing the financial statements. In making its assessment, the ACD considers liquidity, declines in global capital markets, investor intention, known redemption levels, expense projections and key service provider's operational resilience.

(b) Valuation of investments

The listed and exchange traded investments of the Sub-funds have been valued at bid market prices net of any accrued interest, at close of business on the last working day of the accounting year.

Investments in Collective Investment Schemes (CIS) managed by the ACD or associates of the ACD are valued at the cancellation price for dual priced Funds and at the single price for single priced Funds. Investments in other CIS are valued at bid price for dual priced funds and at the single price for single priced funds.

In the case of an investment which is not quoted, listed or dealt in on a recognised market, or in respect of which a listed, traded or dealt price or quotation is not available at the time of valuation, the fair value of such investment shall be estimated with care and in good faith by a competent professional person, body, firm or corporation including the Manager's pricing committee, and such fair value shall be determined on the basis of the probable realisation value of the investment. The Manager shall be entitled to adopt an alternative method of valuing any particular asset or liability if it considers that the methods of valuation set out above do not provide a fair valuation of a particular asset or liability.

(c) Foreign exchange

All transactions in foreign currencies are translated into Sterling at the rates of exchange ruling at the date of such transactions. Foreign currency assets and liabilities at the end of the accounting period are translated at the exchange rate at close of business on the last working day of the year.

(d) Revenue

Dividends on equities and UK REITs are recognised when the security is quoted ex-dividend.

Distributions from CIS are recognised as revenue when the units are quoted ex-distribution.

Income from US REITs is recognised when the security is quoted ex-dividend and accounted for as either revenue or capital depending on the nature of the US REIT's distribution, when this is made publicly available.

Interest on debt securities is recognised on an effective interest rate basis. Accrued interest purchased or sold is excluded from the cost of the security and is treated as revenue.

Bank interest is accounted for on an accruals basis.

Premiums received in respect of written call options, where the express purpose is to generate extra revenue, are accrued to the revenue account on a straight line basis over the life of the contract.

Returns from bond futures are apportioned into revenue (implied interest on the underlying bond) and capital components in order to reflect the nature of the financial instrument.

Special dividends are reviewed on a case by case basis in determining whether the amount is capital or revenue in nature, depending on the facts of each particular case. The tax treatment follows the accounting treatment of the principal amount.

Stock dividends (stocks received in lieu of cash dividends) are recognised as revenue. Any excess in value of shares received over the amount of cash forgone is taken to capital.

Underwriting and sub-underwriting contracts and placings may also be entered into. Commissions earned on these transactions are accounted for when the issue underwritten takes place and, to the extent that the shares are taken up, a proportion of the commission is accounted for as capital, otherwise the commission is treated as revenue.

BNY Mellon Investment Funds - Annual Report & Accounts

Notes applicable to the financial statements of all Sub-funds

(continued)

1.1 Accounting policies (continued)

(d) Revenue (continued)

Excess reportable income from underlying offshore reporting funds is recognised as revenue when the related statement of reportable income is made available.

Some Sub-funds have entered into securities lending transactions during the period. The Sub-funds, or the Depositary on behalf of the Sub-funds, receives collateral to cover against the risk of future redelivery not being completed. There is no limit on the property of the Sub-fund which may be the subject of securities lending transactions. Commissions received as a consequence of securities lending for the benefit of the Sub-fund and its shareholders are accounted for within revenue net of associated costs, and are recognised on an accruals basis.

(e) Expenses

All expenses are charged to the revenue property of the Sub-funds, with the exception of the costs associated with the purchase and sale of investments, which have been charged to capital property. All expenses are recognised on an accruals basis.

In order to maintain the ongoing charges of particular Sub-funds at a competitive level with regard to the comparable funds in the market place, BNY Mellon Investment Management EMEA Limited (the "Global Distributor and Promoter") undertook to pay an amount back to the Sub-fund when the ongoing charges exceed an agreed ongoing charges limit. The ongoing charges refunded are accounted for on an accruals basis. Further information on the arrangement is detailed in Note 5 of the accounts of the relevant Sub-funds.

(f) Taxation

Deferred tax is recognised in respect of all timing differences that have originated but not reversed at the balance sheet date where transactions or events have occurred at that date that will result in an obligation to pay less or receive more tax. Deferred tax assets are recognised only to the extent that the ACD considers that it will be more likely than not that there will be taxable profits from which underlying timing differences can be deducted. The charge for UK taxation is based on the results for the year. In general, the tax accounting treatment follows that of the principal amount. The charge for UK taxation is provided at 20% on taxable income for the year less expenses.

Authorised investment companies with variable capital are exempt from tax on capital gains. Therefore any capital return is not included in the taxation reconciliations within the notes to the Sub-funds.

(g) Dilution adjustment

The ACD may make a discretionary dilution adjustment if in its opinion the existing Shareholders (for net purchases) or remaining Shareholders (for net redemptions) might otherwise be adversely affected. The ACD therefore reserves the right to impose a dilution adjustment in the following circumstances:

- where a Sub-fund is in continual decline (a net outflow of investment);
- where a Sub-fund is experiencing large levels of net subscriptions or net redemptions relative to its size;
- in any other circumstances where the ACD believes it will be in the interests of shareholders to make a dilution adjustment.

Where applicable, this is charged to the capital of each Sub-fund.

(h) Over the counter derivatives

Valuation:

The Sub-funds may invest in over-the-counter (OTC) derivatives and the market value of these are based on models which take into account relevant market inputs as well as the time values, liquidity and volatility factors underlying the positions. Amounts due to and from an individual counterparty which fall under a legally enforceable International Swaps and Derivatives Association (ISDA) Master Agreement are netted.

All realised and unrealised gains and losses on derivatives are taken to the Statement of Total Return and are included in the net capital gains/(losses) on investments.

Premiums paid by the Sub-funds:

Credit default swaps are used to manage credit risk and are used to protect capital. Premiums paid by the Sub-funds are taken to capital.

Interest rate swaps are used to manage market price risk, including interest rate risk. The interest received or paid is taken to capital. Interest rate swap options or currency options are written or purchased to protect capital. All returns including the premium are taken to capital. Exchange traded index options are written to enhance the revenue and yield of the Sub-funds. As such the premiums received by the Sub-funds are taken to revenue.

Zero-Coupon Inflation Swaps and Foreign Exchange Options are used to protect capital. Premiums paid by the Sub-funds are taken to capital.

The treatment for any related charges will follow that of the premium.

Please refer to the accounts of the relevant Sub-funds for further information.

1.2 Distribution policies

(a) Basis of distribution

BNY Mellon Global Dynamic Bond Fund, BNY Mellon Global Dynamic Bond Income Fund, BNY Mellon Global High Yield Bond Fund, BNY Mellon Index Linked Gilt Fund, BNY Mellon Inflation-Linked Corporate Bond Fund, BNY Mellon International Bond Fund, BNY Mellon Long Gilt Fund, BNY Mellon Sustainable Global Dynamic Bond Fund, BNY Mellon Sustainable Sterling Bond Fund, Responsible Horizons Strategic Bond Fund and Responsible Horizons UK Corporate Bond Fund invest more than 60% in qualifying investments (as defined by s468L ICTA 1998) and will pay an interest distribution. All other Sub-funds are not more than 60% invested in qualifying investments and, where applicable, will pay a dividend distribution. For the purpose of calculating the distribution, interest on debt securities is computed on an effective yield basis, the same basis on which it is reflected in the financial statements. The distribution is determined based on the individual Sub-fund's net revenue after taxation.

(b) Stock dividends

The ordinary element of stocks received in lieu of cash dividends is recognised as revenue and forms part of the distribution. Any excess in value of shares received over the amount of cash forgone is taken to capital.

(c) Special dividends

Amounts recognised as revenue will form part of the Sub-funds' distribution.

(d) Collective Investment Schemes

All distributions received from holdings in collective investment schemes, including those from accumulation holdings, are treated as revenue and form part of the distribution of the Sub-funds with the exception of the equalisation element, which is treated as capital.

(e) Bond futures streaming

Returns from bond futures are streamed into revenue and capital components. Amounts recognised as revenue from long positions form part of the distribution. Amounts recognised as revenue from short positions reduce the amounts available for distribution.

(f) US REITs dividends

Dividends on US REITs are streamed between capital and revenue components. Amounts recognised as revenue form part of the distribution. Amounts recognised as a return of capital are recognised in the capital of the Sub-funds and are not included as part of the distribution.

(g) Expenses

The annual ACD fees are reimbursed by capital property for revenue distribution calculation purposes in the case of BNY Mellon Asian Income Fund, BNY Mellon Global Dynamic Bond Fund, BNY Mellon Global Dynamic Bond Income Fund, BNY Mellon Global High Yield Bond Fund, BNY Mellon Global Infrastructure Income Fund, BNY Mellon Multi-Asset Balanced Fund, BNY Mellon Real Return Fund, BNY Mellon Sustainable Global Dynamic Bond Fund, BNY Mellon Sustainable Global Equity Fund, BNY Mellon Sustainable Global Equity Income Fund, BNY Mellon Sustainable Real Return Fund, BNY Mellon Sustainable Sterling Bond Fund, BNY Mellon UK Equity Fund and BNY Mellon US Equity Income Fund.

The annual ACD fees and other fees and expenses are reimbursed by capital property for revenue distribution calculation purposes in the case of BNY Mellon Emerging Income Fund, BNY Mellon Equity Income Booster Fund, BNY Mellon Equity Income Fund, BNY Mellon Global Income Fund, BNY Mellon Multi-Asset Income Fund and BNY Mellon UK Income Fund.

The expenses for all other Sub-funds are charged to the revenue property of the Sub-funds, with the exception of the costs associated with the purchase and sale of investments, which are charged to capital property.

(h) Unclaimed distributions

Any unclaimed distributions are repaid to the Sub-funds after six years. Such amounts are treated as capital, and will not form part of the distribution.

(i) Allocation of revenue and expenses

Revenue and non share class specific expenses are allocated each day pro rata to the Net Asset Value (NAV) of assets attributable to each share class. Taxation is computed by reference to the net revenue after expenses attributable to each share class.

BNY Mellon Investment Funds - Annual Report & Accounts

Notes applicable to the financial statements of all Sub-funds

2 Financial instruments

In pursuing their respective objectives, each Sub-fund of the Company holds a number of financial instruments. The Sub-funds' financial instruments, other than derivatives, comprise securities and other investments, cash balances, debtors and creditors that arise directly from its operations, for example, in respect of sales and purchases awaiting settlement, amounts receivable for creations and payable for cancellations and debtors for accrued revenue.

The ACD has delegated the day-to-day administration of the investment programme to the Investment Manager. The Investment Manager is also responsible for ensuring that the Sub-funds are managed within the terms of their investment guidelines and limits set out in the Prospectus. The ACD reserves to itself the investment performance monitoring, product risk monitoring and oversight and the responsibility for the monitoring and oversight of regulatory and operational risk for the Sub-funds. The ACD has appointed a risk manager who has responsibility for the daily risk management process with assistance from key risk management personnel of the Investment Manager, including members of the risk management team, a centralised group which performs an independent risk management function. The risk management team independently monitors investment risk. The risk management team tracks the actual risk management practices being deployed across the different Sub-funds. By breaking down the components of the process, the risk management team has the ability to determine if the appropriate risk management processes are in place for the Sub-funds. This captures the risk management tools employed and how the levels of risk are controlled, ensuring risk/return is considered in portfolio construction and the ongoing review.

The main risks arising from financial instruments and the ACD's policies for managing these risks are summarised below. These policies have been applied throughout the year.

Market price risk

Market price risk is the risk that the value of the Sub-fund's investment holdings will fluctuate as a result of changes in market prices caused by factors other than interest rate or foreign currency movement. Market price risk arises mainly from uncertainty about future prices of financial instruments the Sub-fund might hold. It represents the potential loss the Sub-fund might suffer through holding market positions in the face of price movements. The Sub-fund's investment portfolio is exposed to market price fluctuations, which are monitored by the ACD in pursuance of the investment objective and policy as set out in the Prospectus.

Adherence to investment guidelines and to investment and borrowing powers set out in the Rules of the Collective Investment Schemes Sourcebook of the Financial Conduct Authority mitigates the risk of excessive exposure to any individual security or issuer.

Please see individual Sub-funds' notes to the financial statements for the year end exposure and sensitivity analysis.

Derivative risk

The Sub-funds may also enter into derivative transactions such as forward foreign currency contracts, futures contracts and options contracts. Forward currency contracts are used to manage currency risk arising from holdings of overseas securities or to increase or reduce exposure to a currency pair. Futures are also used to manage market price risk. The Sub-funds may use options as part of a hedging strategy. The purpose of undertaking these contracts is to protect the portfolio as far as possible from a downturn in the markets. Certain Sub-funds may also make use of expanded regulations and use derivatives in pursuit of their investment objectives.

The Sub-funds may also invest in OTC derivatives such as interest rate swaps, credit default swaps and options. Refer to the individual Sub-funds' note to the financial statements for further information.

Global exposure

To evaluate the global exposure of the Sub-funds, the Investment Manager uses either the Commitment or the Value at Risk (VaR) approach.

The Commitment approach converts the Sub-fund's financial derivative instruments position into an equivalent position of the underlying assets based on the market value of the underlying asset. Using the Commitment approach, the Sub-fund must ensure that its global exposure does not exceed its net asset value. It is calculated as the sum of the absolute value of the exposure of each individual derivative after allowing for netting and hedging arrangements.

Value-at-Risk (VaR) is a statistical measurement. It intends to measure the maximum potential loss at a given confidence level (probability) over a specific time period under normal market conditions. All of the positions within the portfolio are taken into account for the VaR calculation, not only derivatives.

Absolute and Relative VaR are calculated daily using a VaR risk model based on at least a year's historical data. This method for calculating VaR contains no standard distribution assumption and assumes that history repeats itself, however past performance is not necessarily a guide to future performance.

Under the Relative VaR approach, the VaR of the Sub-fund is compared to that of a benchmark or reference portfolio.

The Absolute VaR of an Undertakings for Collective Investment in Transferable Securities Scheme (UCITS) cannot be greater than 10% of its NAV when using a 5 day holding period. The Relative VaR of a UCITS cannot be more than two times the VaR of the reference portfolio.

The calculation of the Absolute and Relative VaR is carried out in accordance with the following parameters:

- one-tailed confidence interval of 99%;
- holding period equivalent to 1 day is used for BNY Mellon Global Absolute Return Fund and BNY Mellon Global Multi-Strategy Fund, holding period equivalent to 5 days is used to calculate the VaR for BNY Mellon Inflation-Linked Corporate Bond Fund, Responsible Horizons Strategic Bond Fund and Responsible Horizons UK Corporate Bond Fund, whilst holding period equivalent to 20 days is used for BNY Mellon FutureLegacy 3 Fund, BNY Mellon FutureLegacy 4 Fund, BNY Mellon FutureLegacy 5 Fund, BNY Mellon FutureLegacy 6 Fund, BNY Mellon FutureLegacy 7 Fund, BNY Mellon Global Dynamic Bond Fund, BNY Mellon Global Dynamic Bond Income Fund, BNY Mellon Multi-Asset

- effective observation period (history) of risk factors of 250 business days or greater (ESMA Guidelines require at least 250 business days);
- daily calculation.

A VaR number is defined at a specified probability and a specified time horizon. A 99% five day VaR means that the expectation is that 99% of the time over a five day period the Sub-fund will lose less than this number in percentage terms.

The utilisation method is calculated by dividing the VaR by the VaR limit disclosed in the Prospectus.

The table below lists the Sub-funds that utilise VaR, with the rest of the Sub-funds utilising the Commitment approach.

Foreign currency risk

The base rate currency for all Sub-funds is Sterling and thus foreign currency risk is the risk that the value of the Sub-funds' investment holdings will fluctuate as a result of changes in foreign currency exchange rates.

Some of the Sub-funds' investment portfolios are invested in overseas securities and movements in foreign exchange rates can affect the balance sheet. The ACD may seek to manage exposure to currency movements by using forward exchange contracts or by hedging the Sterling value of investments that are priced in other currencies. Revenue received in other currencies is converted to Sterling on or near the date of receipt. Tables showing the foreign currency risk and sensitivity for currencies with exposure deemed material (above 10% of the NAV), are detailed in the relevant Sub-funds' accounts.

Interest rate risk

Interest rate risk is the risk that the value of the Sub-funds' investment holdings will fluctuate as a result of changes in interest rates.

Some of the Sub-funds invest in fixed and floating rate securities. The revenue of these Sub-funds may be affected by changes to interest rates relevant to particular securities or as a result of the ACD being unable to secure similar returns on the expiry of contracts or sale of securities. Interest rate movements or the expectation of such movements in the future may affect the value of fixed interest securities. Interest receivable on bank deposits or payable on bank overdraft positions will be affected by fluctuations in interest rates. A table showing the interest rate risk is detailed in the relevant Sub-funds' accounts.

2 Financial instruments (continued)

Interest rate risk (continued)

The Sub-funds may also use interest rate swaps to manage interest rate risk. Refer to the derivative risk disclosure in the notes to the financial statements for the individual Sub-funds for further information.

Liquidity risk

The risk of low market liquidity, through reduced trading volumes, affects the ability of the Sub-funds to trade financial instruments at values previously indicated by financial brokers.

The Sub-funds invest primarily in companies incorporated in the major markets of the world, which are typically considered to be operations with high levels of liquidity. From time to time, however, market liquidity may be affected by economic events.

Exposure to hedge funds is gained by using closed ended investment trust structures which can be traded on various exchanges on a daily basis. However, as with all tradeable financial instruments, the level of liquidity available within the wider financial markets has an impact upon the ability to execute a trade on a given day.

To manage these risks, the Investment Manager undertakes research of investment opportunities to select securities congruent with the Sub-fund's investment objective.

All stocks are valued daily. Stocks identified as being illiquid are reviewed for pricing accuracy on a regular basis. Refer to note 1.1(b) in the notes applicable to the financial statements of all Sub-funds for further information.

The Investment Manager monitors the liquidity profile of the Sub-funds on a monthly basis to ensure a high degree of confidence that the Sub-funds' liquidity will meet the expected liquidity requirements. Where a risk is identified, a more in depth review is undertaken to establish its significance and this is analysed by the Risk Management Team and discussed at the Investment Management Oversight Committee. Based on this analysis, the Investment Manager believes the liquidity profile of the Sub-funds are appropriate.

Credit/Counterparty risk

Certain transactions in securities that the Sub-funds enter into expose them to the risk that the counterparty will not deliver the investment for a purchase, or cash for a sale after the Sub-fund has fulfilled its responsibilities. The Sub-funds only buy and sell investments through brokers that have been approved by the ACD as an acceptable counterparty. In addition, limits are set on the exposure to any individual broker that may exist at any time and changes in brokers' financial ratings are reviewed.

Credit risk also occurs with regard to any amounts owed to the Sub-funds by counterparties. Within the structure of the Sub-funds this counterparty credit risk is most likely to occur in OTC positions that are creating positive returns.

To ensure that credit risk is controlled, any OTC position which is guaranteed by a counterparty will only be effected with a counterparty that receives a minimum short term rating of A2 and above from Standard & Poor's. If the issuer is not rated by Standard & Poor's the equivalent credit rating from another major credit rating agency (such as Moody's, Fitch or DBRS) will be used.

At the balance sheet date some of the Sub-funds were invested in bonds. Bonds involve the risk that the bond issuer will be unable to meet its liability to pay interest or redeem the bond. The Sub-funds select bonds taking into account the credit rating of the issuer.

Fair value of financial assets and financial liabilities

There is no material difference between the value of the financial assets and liabilities, as shown in the balance sheet, and their fair value.

Investment Objective

The Sub-fund aims to achieve capital growth and income over the long term (5 years or more).

Investment Policy

The Sub-fund is actively managed and invests approximately 50% of the portfolio in UK equities (company shares) and 50% in international company shares including ordinary shares, preference shares and other equity-related securities. UK companies are defined as those that are either domiciled, incorporated or which have significant business in the UK.

The Sub-fund may also invest in collective investment schemes (including but not limited to another Sub-fund or Sub-funds of the Company or other BNY Mellon funds), money market instruments, deposits, cash and near cash.

Any use of derivatives will be for efficient portfolio management purposes and hedging only. It is not expected that the use of derivatives will materially affect the overall risk profile of the Sub-fund.

Portfolio Summary

Over the 12-month period under review, the Sub-fund's Newton Institutional Shares 1 (Accumulation) share class generated a return of 10.34%, net of fees, against a return of 12.68% for its benchmark a composite index, comprising 50% FTSE All-Share TR Index, 16.67% FTSE World North America TR Index, 16.67% FTSE Europe ex UK TR Index and 16.67% FTSE Asia Pacific TR Index, both in sterling terms. The Sub-fund produced a strong positive return but underperformed its benchmark.

At the stock level, electrical manufacturer Hubbell contributed on good results and a robust outlook. The company operates in industries with favourable secular trends, namely the electrification of US infrastructure. Events organiser Informa also contributed, with the gradual removal of Covid-19 restrictions and a strong rebound in business activity leading to positive earnings momentum. Semiconductor equipment manufacturer Applied Materials was another strong performer, as structural drivers in the form of artificial intelligence (AI) and higher capital expenditure intensity continued to reinforce its long-term appeal.

The Sub-fund's holding in Hipgnosis Songs Fund detracted from returns owing to investors' concerns about the rising cost of servicing its debt. Shares in AIA suffered from broader concerns about the health of the financial sector. China's weak recovery following the relaxation of Covid restrictions also weighed on the stock, despite some encouraging industry-level data on Hong Kong life insurance sales over the first quarter. No exposure to US semiconductor stock NVIDIA also weighed on performance, as its share price surged late in the period on its exposure to AI demand.

Regarding portfolio activity, positions were established in Lonza, SSE and FANUC in the first half of the period. In 2023, the manager purchased French industrial software business Dassault Systemes. The company boasts dominant positions in aerospace, automobiles/electric vehicles and life sciences, and helps its customers create new state-of-the art products and services. The company operates in an attractive growth market and its strong balance sheet means it could potentially pursue new acquisitions. The manager also added Rentokil Initial, which is a world leading commercial pest control company and a market leader in hygiene services.

The holdings in pharmaceutical company GSK, Indian financial HDFC Asset Management and testing and certification business Bureau Veritas were all sold in the first half of the period. A small reduction to Ferguson, one of the Sub-fund's more cyclical industrial stocks, was made more recently. Sales have fallen slightly and earnings risk remains. However, the manager retained a position.

Navigating the policy tightrope between cooling inflation and slowing demand will require balance, and the timing and extent of any economic weakness is being closely watched by investors. However, structural demand trends remain in place, notably in technology and as applies to climate change, and this is being supported by government stimulus and policies. The Sub-fund's focus remains on companies that appear to have more resilient long-term earnings profiles and attractive end-market outlooks.

Shareholders should note that additionally there may be other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which may also have reduced the Sub-fund and share class returns before operating charges.

**The Operating Charges figure is made up of the Annual Management Charge (AMC) and other operating costs. Other operating costs include the costs for other services paid for by the Sub-fund, such as the fees paid to the Fund Accountant, Fund Administrator, Depositary, Custodian, Auditor and Regulator. The Operating Charges figure shown is calculated on an ex-post basis over the period, whereas the Ongoing Charges figure shown in the Key Investor Information Document (KIID) is a calculation as at a point in time, and therefore there could be immaterial differences between the two. The operating charges are annualised for share classes launched during the year.

#The Operating Charges Figure for the period ending 30/06/2023 includes a synthetic OCF due to investments in other funds, in line with IA guidance.

Overseas tax withheld	58	54,090
Total tax (credit)/charge (see Note 6b)	(695)	54,090
b) Factors affecting the tax (credit)/charge		
The tax assessed for the year is lower (30/06/2022: lower) than the standard rate of corporation tax in the UK for an ICVC (20%) (30/06/2022: 20%).		
The differences are explained below:		
Net revenue before taxation	840,695	1,018,546
Corporation tax @ 20%	168,139	203,709
Effects of:		
Corporation tax prior year adjustment	(753)	—

c) Deferred tax		
No deferred tax asset has been recognised in the accounts in relation to tax losses of £19,091,564 (30/06/2022: £18,892,345), as it is unlikely that there will be sufficient taxable profits in the future to utilise these amounts. The deferred tax asset not recognised is £3,818,313 (30/06/2022: £3,778,469).

Total transaction costs	24	25
Total transaction costs as a % of average net assets	0.04%	0.05%

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

Separately identifiable direct transaction costs (commissions & taxes etc) are attributable to the Sub-fund's purchase and sale of equity shares. Additionally for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-fund's investment transactions in money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

For the Sub-fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However additionally there are indirect transaction costs suffered in those underlying funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.05% (30/06/2022: 0.08%).

15 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date (30/06/2022: nil).

16 Securities lending

The revenue arising from the Securities Lending Programme is currently split between the Sub-fund and The Bank of New York Mellon, London Branch in the proportion 81%:19% (30/06/2022: 81%:19%). The 19% paid to The Bank of New York Mellon, London Branch is to cover operational cost, risk and profit. The Bank of New York Mellon London Branch is a related party of the ACD as both entities are affiliates of The Bank of New York Mellon Corporation.

Collateral accepted is non-cash in the form of Sovereign debt rated AA or better from approved Governments only and Supranational debt obligations rated AAA or better, and FTSE 100 DBV (Class F10) as defined in the CREST Reference Manual and equity securities from the following indices: AEX 25 (Netherlands), CAC 40 (France), DAX 30 (Germany), Euro 50 (Eurozone), FTSE 100 (United Kingdom), Nikkei 225 (Japan), SMI 20 (Switzerland), S&P 500 (United States of America).

As at 30 June 2023, £9,440 of investments were subject to securities lending agreements and on behalf of the Sub-fund £10,379 was held in collateral. The collateral is held 0.00% in debt securities and 100.00% in equity securities.

As at 30 June 2022, £19,284 of investments were subject to securities lending agreements and on behalf of the Sub-fund £22,001 was held in collateral. The collateral was held 0.00% in debt securities and 100.00% in equity securities.

Sector:	The Investment Association Asia Pacific ex Japan
Key Dates: Fund Launch	30 November 2005

Investment Objective

The Sub-fund aims to achieve income together with capital growth over the long term (5 years or more).

Investment Policy

The Sub-fund is actively managed and invests at least 75% of the portfolio in equities (company shares) of issuers domiciled, incorporated or with significant business in the Asia Pacific region (including Australia and New Zealand but excluding Japan), including ordinary shares, preference shares and other equity-related securities.

The Sub-fund may also invest in collective investment schemes (including but not limited to another Sub-fund or Sub-funds of the Company or other BNY Mellon funds), money market instruments, deposits, cash and near cash.

Any use of derivatives will be for efficient portfolio management purposes and hedging only. It is not expected that the use of derivatives will materially affect the overall risk profile of the Sub-fund.

Portfolio Summary

Over the 12-month period under review, the Sub-fund's Sterling Income share class generated a return of 2.28%, net of fees, against a return of -3.02% from the FTSE Asia Pacific ex Japan TR Index, in sterling terms.

The Sub-fund produced a positive absolute return and outperformed its comparative benchmark, driven by stock selection and sector allocation.

At the stock level, the Sub-fund benefited most from its positioning in consumer staples and financials. Among the former, the holding in ITC was a major contributor. The Indian company remains favourably positioned with its strong portfolio of brands and extensive distribution network, as well as a combination of expanding margins and stable dividends. In the financials sector, Insurance Australia was the leading contributor after the company highlighted underlying margin improvement over the second half of the year, underpinned by a more favourable pricing environment. Not owning Chinese internet retailer Alibaba and food delivery group Meituan was also beneficial, as concerns surrounding a slowdown in the Chinese economy weakened both stocks.

On the negative side was the Sub-fund's exposure to real estate investment trusts (REITs), notably Link REIT, Parkway Life REIT and Dexus, all of which struggled against a backdrop of rising interest rates.

Regarding portfolio activity, the manager purchased a new holding in Taiwanese group Chroma, which provides customised automated testing equipment and has a leading market position in electric vehicle (EV) power testing. The long-term penetration of EVs and demand for associated power storage should be supportive for the company's outlook. The manager added to the holding in Taiwanese semiconductor company MediaTek on increasing confidence that the downturn in the handset cycle is coming to an end. In financials, the holdings in Singaporean banks United Overseas Bank and DBS were reduced following a period of strong performance, while the position in Bank Mandiri Persero was increased. The manager expects the latter, Indonesia's largest bank by assets, to benefit from longer-term loan growth. In the telecommunications sector, the holding in KT was increased. The South Korean services provider has become a market-leading internet data centre operator, and the company also has a presence in content and financial technology. The manager's view is that growth opportunities from these areas should attract higher margins than the company's core telecommunications business.

Finally, on the disposals side, a holding in Chinese vitamin and dietary supplements business By-health was sold following the announcement of a dividend cut.

The global economy remains in transition. Central banks around the world have taken tough action to combat inflation through repeated interest rate hikes. The manager's view is that interest rates may have to remain higher for longer, as thus far, resilient economies have yet to fully digest their impact. In Asia, China's challenged growth outlook, paired with expectations for monetary stimulus, will dominate the direction of markets, both positively and negatively, and will continue to weigh on investor sentiment.

Against this backdrop of questionable economic growth, geopolitical tensions and an uncertain outlook for earnings, the manager believes the arguments for income investing remain strong. The Sub-fund's yield discipline focuses on valuations, and the investment process seeks to identify better-quality companies backed by cash flows. The manager prefers companies that operate in well-structured industries in which they have a sustainable competitive edge and believes that the Sub-fund's focus on quality companies with strong balance sheets should help it mitigate volatile times ahead.

*Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there may be other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which may also have reduced the Sub-fund and share class returns before operating charges.

**The Operating Charges figure is made up of the Annual Management Charge (AMC) and other operating costs. Other operating costs include the costs for other services paid for by the Sub-fund, such as the fees paid to the Fund Accountant, Fund Administrator, Depositary, Custodian, Auditor and Regulator. The Operating Charges figure shown is calculated on an ex-post basis over the period, whereas the Ongoing Charges figure shown in the Key Investor Information Document (KIID) is a calculation as at a point in time, and therefore there could be immaterial differences between the two. The operating charges are annualised for share classes launched during the year.

6 Taxation

	30/06/2023	30/06/2022
	£	£
a) Analysis of the tax charge		
Indian capital gains tax	2,418,421	(743,583)
Overseas tax withheld	3,604,694	3,259,887
Total tax charge (see Note 6b)	6,023,115	2,516,304
b) Factors affecting the tax charge		
The tax assessed for the year is lower (30/06/2022: lower) than the standard rate of corporation tax in the UK for an ICVC (20%) (30/06/2022: 20%).		
The differences are explained below:		
Net revenue before taxation	33,759,408	30,646,792
Corporation tax @ 20%	6,751,882	6,129,358
Effects of:		
Indian capital gains tax	2,418,421	(743,583)
Movement in unrecognised tax losses	567,543	841,041
Overseas tax withheld	3,604,694	3,259,887
Relief on overseas tax expensed	(57,794)	(59,536)
Revenue not subject to corporation tax	(7,261,631)	(6,910,863)
Total tax charge (see Note 6a)	6,023,115	2,516,304
c) Deferred tax		
No deferred tax asset has been recognised in the accounts in relation to tax losses of £42,964,260 (30/06/2022: £40,126,544), as it is unlikely that there will be sufficient taxable profits in the future to utilise these amounts. The deferred tax asset not recognised is £8,592,852 (30/06/2022: £8,025,309).

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

Separately identifiable direct transaction costs (commissions & taxes etc) are attributable to the Sub-fund's purchase and sale of equity shares. Additionally for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-fund's investment transactions in money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.21% (30/06/2022: 0.26%).

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date (30/06/2022: nil).

Key Dates: Fund Launch	30 November 1990

Investment Objective

The Sub-fund aims to achieve capital growth over the long term (5 years or more).

Investment Policy

The Sub-fund is actively managed and invests at least 75% of the portfolio in equities (company shares) of issuers domiciled, incorporated or with significant business in Asian and Pacific markets (including Australia and New Zealand but excluding Japan), including ordinary shares, preference shares and other equity-related securities.

The Sub-fund will follow the Investment Manager's opportunities investment approach. This means that the Sub-fund invests in the highest conviction investment opportunities (i.e. companies) that the Investment Manager identifies through its investment process.

The Sub-fund may also invest in collective investment schemes (including but not limited to another Sub-fund or Sub-funds of the Company or other BNY Mellon funds), money market instruments, deposits, cash and near cash.

Any use of derivatives will be for efficient portfolio management purposes and hedging only. It is not expected that the use of derivatives will materially affect the overall risk profile of the Sub-fund.

Portfolio Summary

Over the 12-month period under review, the Sterling Income share class of the Sub-fund generated a return of -2.68%, net of fees, against a return of -3.02% for the FTSE AW Asia Pacific ex Japan TR Index. The Sub-fund produced a negative return but was ahead of its benchmark. Both stock and asset allocation had a positive effect on the Sub-fund's relative returns.

At the stock level, Dutch semiconductor-production-equipment manufacturer ASML was the top performer in the Sub-fund. It reported record order backlogs and earnings that exceeded market estimates over the period. Lithium miner Allkem was a positive performer owing to the strong global demand for lithium needed in electric vehicle (EV) batteries, while Delta Electronics also performed well, benefiting from strong earnings momentum.

On the negative side, LONGi Green Energy Technology was weak, with the solar energy product manufacturer affected by concerns around pricing pressure. Chinese battery maker Wuxi Lead Intelligent Equipment underperformed as investors considered the resilience of orders in a recessionary environment and demand challenges for EVs. Meituan fell on concerns about increased competition, notably the news of competitor Douyin rolling out its food delivery service.

Regarding portfolio activity, stakes were purchased in Bank Mandiri Persero, HDFC Life Insurance, NetEase and Meituan in the first half of the period. In 2023, the manager purchased a stake in Sona BLW Precision Forgings, a leading Indian manufacturer of precision-forged auto components. The stock is a clear beneficiary of the growth in two- and four-wheel EVs. A position in ASM International was also added. The company is a market leader in atomic layer deposition, a process used by the semiconductor industry, which is in strong demand. Taiwan's Chroma ATE was another new addition. The company provides customised automated testing equipment and has a leading position in EV power testing. Chroma's power testing revenue is expected to continue to grow strongly.

The holding in LG Chem was sold following its strong relative performance. India's Jubilant FoodWorks was also sold on incremental concerns over the recent change of CEO, capital allocation and governance. The stake in LONGi Green Energy Technology was exited on concerns over diminishing returns given intensifying competition, as the solar photovoltaic wafer industry capacity continues to expand. Chinese battery maker Wuxi Lead Intelligent Equipment was a further sale because of concerns over the possibility of lower growth and lower returns, given industry overcapacity.

Asian equities have been trading at an unusually high discount to developed markets, providing a conducive backdrop if the shorter-term variables prove favourable for Asian markets. In the manager's view, there are attractive long-term opportunities in Asian markets, based on relatively high levels of income growth, rapid increases in product penetration and scope for industry consolidation. There is a unique opportunity, in the manager's opinion, for Asian companies that are exposed to reliable secular growth. Accordingly, the manager believes that Asian investors who can identify the right growth themes and companies could be rewarded over the long term.

*Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there may be other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which may also have reduced the Sub-fund and share class returns before operating charges.

**The Operating Charges figure is made up of the Annual Management Charge (AMC) and other operating costs. Other operating costs include the costs for other services paid for by the Sub-fund, such as the fees paid to the Fund Accountant, Fund Administrator, Depositary, Custodian, Auditor and Regulator. The Operating Charges figure shown is calculated on an ex-post basis over the period, whereas the Ongoing Charges figure shown in the Key Investor Information Document (KIID) is a calculation as at a point in time, and therefore there could be immaterial differences between the two. The operating charges are annualised for share classes launched during the year.

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

Separately identifiable direct transaction costs (commissions & taxes etc) are attributable to the Sub-fund's purchase and sale of equity shares. Additionally for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-fund's investment transactions in money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.10% (30/06/2022: 0.11%).

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date (30/06/2022: nil).

17 Securities lending

The revenue arising from the Securities Lending Programme is currently split between the Sub-fund and The Bank of New York Mellon, London Branch in the proportion 81%:19% (30/06/2022: 81%:19%). The 19% paid to The Bank of New York Mellon, London Branch is to cover operational cost, risk and profit. The Bank of New York Mellon London Branch is a related party of the ACD as both entities are affiliates of The Bank of New York Mellon Corporation.

Collateral accepted is non-cash in the form of Sovereign debt rated AA or better from approved Governments only and Supranational debt obligations rated AAA or better, and FTSE 100 DBV (Class F10) as defined in the CREST Reference Manual and equity securities from the following indices: AEX 25 (Netherlands), CAC 40 (France), DAX 30 (Germany), Euro 50 (Eurozone), FTSE 100 (United Kingdom), Nikkei 225 (Japan), SMI 20 (Switzerland), S&P 500 (United States of America).

As at 30 June 2023, there were no investments subject to securities lending agreements.

As at 30 June 2022, £3,558,218 of investments were subject to securities lending agreements and on behalf of the Sub-fund £3,888,482 was held in collateral. The collateral was held 15.66% in debt securities and 84.34% in equity securities.

The gross earnings and the fees for the year are £3,651 (30/06/2022: £981) and £694 (30/06/2022: £186) respectively.

General Information

Investment Adviser:	Newton Investment Management Limited
Fund Size:	£111.37m
Comparative Index:	MSCI Emerging Markets NR
Sector:	The Investment Association Global Emerging Markets
Key Dates: Fund Launch	4 October 2012

Investment Objective

The Sub-fund aims to achieve income together with capital growth over the long term (5 years or more).

Investment Policy

The Sub-fund is actively managed and invests at least 75% in emerging market equities (company shares), issued by companies listed, traded, located or deriving at least half of their revenue or income from emerging market countries across the world, including ordinary shares, preference shares and other equity-related securities.

The Sub-fund may also invest in collective investment schemes (including but not limited to another Sub-fund or Sub-funds of the Company or other BNY Mellon funds), money market instruments, deposits, cash and near cash.

Emerging market countries are countries which are progressing towards becoming advanced, usually displayed by some development in financial markets, the existence of some form of stock exchange and a regulatory body.

Any use of derivatives will be for efficient portfolio management purposes and hedging only. It is not expected that the use of derivatives will materially affect the overall risk profile of the Sub-fund.

Portfolio Summary

Over the 12-month period under review, the Sterling Income share class of the Sub-fund generated a return of 4.90%, net of fees, against a return of -2.80% from the MSCI Emerging Markets NR Index, both in sterling terms. The Sub-fund produced a positive return and outperformed its comparative benchmark.

Both stock selection and asset allocation contributed to the Sub-fund's positive returns. At the stock level, positioning in the consumer sectors proved the key contributor. A holding in Indian consumer goods company ITC benefited from a recovery in sales volumes, and the stock's defensive attributes appealed in view of the uncertain economic outlook. Not holding Chinese online retail giant Alibaba was beneficial due to negative sentiment over the slowdown in the Chinese economy. The zero weighting in Chinese food delivery group Meituan was a further positive, as its share price retreated on concerns around rising competition from short-form video platforms. Among technology stocks, the holding in Delta Electronics performed well. The Taiwanese company's second-quarter results came in ahead of consensus expectations, driven by the strength of its power electronics division thanks to strong demand growth in electric vehicle (EV) and artificial intelligence servers.

On the negative side, the Sub-fund's position in British American Tobacco detracted from returns due to declining sales of combustible tobacco in the US. Another material detractor was Hong Kong's Link REIT. The surprise announcement of a rights issue unsettled investors. Concerns over the prospects for the commercial real estate market (given rising interest rates) further weighed on sentiment.

Regarding portfolio activity, a position was established in Colgate-Palmolive India, a personal care company with the largest Indian market share in the oral hygiene category. Colgate's competitive advantage comes from brand awareness and solid operations that continue to deliver an impressive return on invested capital despite strong competition from niche operators. The manager added to the holding in Bank Mandiri Persero, Indonesia's largest bank by assets, which is expected to benefit from longer-term loan growth. The holding in Taiwan's Chroma ATE, a leading market player in EV power testing, was also enlarged due to increased conviction regarding its exposure to system-level testing in semiconductors. On the disposals side, the holding in Chinese vitamin and dietary supplements business By-health was sold following the announcement of a dividend cut.

Looking ahead, the global economy remains in transition. Through repeated rounds of interest rate hikes, global central banks have taken tough action to combat inflation. While inflation may have peaked, it is the manager's view that interest rates may have to remain higher for longer, as thus far, resilient economies have yet to fully digest their impact. In Asia, China's challenged growth outlook paired with expectations for policy stimulus will dominate the direction of markets, both positively and negatively, and will continue to weigh on investor sentiment.

Against this backdrop of uncertain economic growth, geopolitical tensions and an unclear outlook for earnings, the manager believes the arguments for income investing remain strong. The Sub-fund's yield discipline focuses on valuations; the investment process leads to the selection of companies with a competitive edge operating in well-structured industries backed by thematic tailwinds. The Sub-fund's focus on quality companies with strong balance sheets and demonstrable pricing power could help it navigate volatile times ahead.

*Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there may be other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which may also have reduced the Sub-fund and share class returns before operating charges.

**The Operating Charges figure is made up of the Annual Management Charge (AMC) and other operating costs. Other operating costs include the costs for other services paid for by the Sub-fund, such as the fees paid to the Fund Accountant, Fund Administrator, Depositary, Custodian, Auditor and Regulator. The Operating Charges figure shown is calculated on an ex-post basis over the period, whereas the Ongoing Charges figure shown in the Key Investor Information Document (KIID) is a calculation as at a point in time, and therefore there could be immaterial differences between the two. The operating charges are annualised for share classes launched during the year.

Overseas tax withheld	530,858	439,526
Total tax charge (see Note 6b)	829,513	395,440

b) Factors affecting the tax charge

The tax assessed for the year is higher (30/06/2022: lower) than the standard rate of corporation tax in the UK for an ICVC (20%) (30/06/2022: 20%).

The differences are explained below:

Net revenue before taxation	4,070,170	2,604,349
Corporation tax @ 20%	814,034	520,870
Effects of:		
Indian capital gains tax	298,655	(44,086)
Movement in unrecognised tax losses	75,706	98,416
Overseas tax withheld	530,858	439,526

Total transaction costs 17 21

Total transaction costs as a % of average net assets 0.02% 0.03%

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

Separately identifiable direct transaction costs (commissions & taxes etc) are attributable to the Sub-fund's purchase and sale of equity shares. Additionally for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-fund's investment transactions in money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.15% (30/06/2022: 0.24%).

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date (30/06/2022: nil).

17 Securities lending

The revenue arising from the Securities Lending Programme is currently split between the Sub-fund and The Bank of New York Mellon, London Branch in the proportion 81%:19% (30/06/2022: 81%:19%). The 19% paid to The Bank of New York Mellon, London Branch is to cover operational cost, risk and profit. The Bank of New York Mellon London Branch is a related party of the ACD as both entities are affiliates of The Bank of New York Mellon Corporation.

Collateral accepted is non-cash in the form of Sovereign debt rated AA or better from approved Governments only and Supranational debt obligations rated AAA or better, and FTSE 100 DBV (Class F10) as defined in the CREST Reference Manual and equity securities from the following indices: AEX 25 (Netherlands), CAC 40 (France), DAX 30 (Germany), Euro 50 (Eurozone), FTSE 100 (United Kingdom), Nikkei 225 (Japan), SMI 20 (Switzerland), S&P 500 (United States of America).

As at 30 June 2023, there were no investments subject to securities lending agreements.

As at 30 June 2022, £1,001,575 of investments were subject to securities lending agreements and on behalf of the Sub-fund £1,105,043 was held in collateral. The collateral was held 5.24% in debt securities and 94.76% in equity securities.

The gross earnings and the fees for the year are £2,694 (30/06/2022: £110) and £512 (30/06/2022: £21) respectively.

18 Shareholder's funds

The Sub-fund currently has the below share classes in issue. Each share class suffers a different annual ACD charge and Registrations and expense charge which is payable to the ACD and is shown below:

	ACD charge	Registrations and expenses charge
B Shares (Accumulation)	0.85%	0.08%
B Shares (Income)	0.85%	0.08%
Institutional Shares (Income)	1.00%	0.03%

General Information

Investment Adviser:	Insight Investment Management (Global) Limited
Fund Size:	£66.52m
Comparative Index:	FTSE All-Share TR
Sector:	The Investment Association UK Equity Income
Key Dates: Fund Launch	9 February 2013

Investment Objective

The Sub-fund aims to provide income together with the potential for capital growth over the long term (5 years or more).

Investment Policy

The Sub-fund is actively managed and will invest at least 80% of the portfolio in UK listed equity (company shares) and equity-related securities.

In addition, the Sub-fund will employ derivatives strategies for efficient portfolio management purposes only. Specifically, the Sub-fund will utilise a derivatives strategy designed to generate additional income. It is not expected that the use of derivatives will materially affect the overall risk profile of the Sub-fund.

The Sub-fund may also invest in other transferable securities (including those listed outside of the UK), collective investment schemes (including but not limited to another Sub-fund or Sub-funds of the Company), money market instruments, deposits, cash and near cash.

The Sub-fund may invest up to 10% of its assets in collective investment schemes, including those which are managed or operated by the ACD or an associate of the ACD.

Fund Report

Portfolio Summary

Over the 12-month period under review, the Sub-fund's Sterling Income share class returned 6.63%, net of fees, against 7.89% for the FTSE All-Share TR Index. The Sub-fund produced a positive return but underperformed its benchmark.

The Sub-fund benefited from exposure to CRH, which reported positive results amid a strong construction backdrop. The announcement to move its main listing to the US also helped the company. A position in Mercedes-Benz also contributed to performance on the back of strong results, a share buyback and a very attractive valuation. The Sub-fund's non-holding in British American Tobacco also helped performance, as the company's shares performed poorly.

Conversely, a non-holding in 3i hurt performance, as the company's shares performed strongly off the back of healthy growth at its discount retail offering Action. Furthermore, the Sub-fund's exposure to Smiths and Lancashire detracted from performance, with the former giving up gains after a strong run and the latter performing poorly on concerns over insurance pricing.

In terms of activity, the manager sold the holding in Glencore given the share price run and likely limited further upside. The manager also sold the holding in IMI after the company's new management team executed a strong turnaround, which resulted in a robust run in the shares. Conversely, the manager used the Sub-fund's ability to invest outside of the UK and new positions were initiated in Mercedes-Benz, EssilorLuxottica and Cie Financiere Richemont.

The manager selectively added to some cyclical as valuations reached extreme levels, though only in businesses that boasted high returns on capital and strong balance sheets. The Sub-fund remains weighted toward large-cap stocks.

Following the successful EGM on 29 September 2023, the Sub-fund merged into the BNY Mellon UK Income Fund on 7 October 2023.

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

Separately identifiable direct transaction costs (commissions & taxes etc) are attributable to the Sub-fund's purchase and sale of equity shares. Additionally for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.03% (30/06/2022: 0.06%).

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date (30/06/2022: nil).

17 Securities lending

The revenue arising from the Securities Lending Programme is currently split between the Sub-fund and The Bank of New York Mellon, London Branch in the proportion 81%:19% (30/06/2022: 81%:19%). The 19% paid to The Bank of New York Mellon, London Branch is to cover operational cost, risk and profit. The Bank of New York Mellon London Branch is a related party of the ACD as both entities are affiliates of The Bank of New York Mellon Corporation.

Collateral accepted is non-cash in the form of Sovereign debt rated AA or better from approved Governments only and Supranational debt obligations rated AAA or better, and FTSE 100 DBV (Class F10) as defined in the CREST Reference Manual and equity securities from the following indices: AEX 25 (Netherlands), CAC 40 (France), DAX 30 (Germany), Euro 50 (Eurozone), FTSE 100 (United Kingdom), Nikkei 225 (Japan), SMI 20 (Switzerland), S&P 500 (United States of America).

As at 30 June 2023, there were no investments subject to securities lending agreements.

As at 30 June 2022, £1,130,140 of investments were subject to securities lending agreements and on behalf of the Sub-fund £1,244,608 was held in collateral. The collateral was held 7.50% in debt securities and 92.50% in equity securities.

The gross earnings and the fees for the year are £604 (30/06/2022: £3,879) and £115 (30/06/2022: £737) respectively.

General Information

Investment Adviser:	Insight Investment Management (Global) Limited
Fund Size:	£112.45m
Comparative Index:	FTSE All-Share TR
Sector:	The Investment Association UK Equity Income
Key Dates: Fund Launch	9 February 2013

Investment Objective

The Sub-fund aims to provide income together with long term capital growth (5 years or more). The Sub-fund targets a dividend yield in excess of the yield of the FTSE All-Share Index on an annual basis as at the Sub-fund's financial year end. There is no guarantee that the Sub-fund will achieve its objective over this, or any other, period.

Investment Policy

The Sub-fund is actively managed and invests at least 80% of the portfolio in the shares of UK listed equity (company shares).

The Sub-fund may also invest in other transferable securities, collective investment schemes (including but not limited to another Sub-fund or Sub-funds of the Company), cash and near cash, deposits and money market instruments.

The Sub-fund may invest up to 10% of its assets in collective investment schemes, including those which are managed or operated by the ACD or an associate of the ACD.

Any use of derivatives will be for efficient portfolio management purposes only. It is not expected that the use of derivatives will materially affect the overall risk profile of the Sub-fund.

The Sub-fund uses the yield of the FTSE All Share Index as an income target for the Sub-fund to match or exceed on an annual basis. The ACD considers the FTSE All Share Index to be an appropriate target benchmark for income as it is representative of the UK equity market.

Fund Report

(continued)

Portfolio Summary

Over the 12-month period under review, the Sub-fund's Sterling Income share class returned 6.55%, net of fees, against 7.89% for the FTSE All-Share Index TR. The Sub-fund produced a positive return but underperformed its benchmark.

The Sub-fund benefited from exposure to CRH, which reported positive results amid a strong construction backdrop. The announcement to move its main listing to the US also helped the company. A position in Mercedes-Benz also contributed to performance on the back of strong results, and a share buyback. The Sub-fund's non-holding in British American Tobacco also helped performance, as the company's shares performed poorly.

Conversely, a non-holding in 3I hurt performance, as the company's shares performed strongly off the back of healthy growth at its discount retail offering Action. Furthermore, the Sub-fund's exposure to Smiths and Lancashire Holding detracted from performance, with the former giving up gains after a strong run and the latter performing poorly on concerns over insurance pricing.

In terms of activity, the manager sold the holding in Glencore given the share price run and likely limited further upside. The manager also sold the holding in IMI after the company's new management team executed a strong turnaround, which resulted in a robust run in the shares. Conversely, the manager used the Sub-fund's ability to invest outside of the UK and new positions were initiated in Mercedes-Benz, EssilorLuxottica and Cie Financiere Richemont.

The manager selectively added to some cyclical as valuations reached extreme levels, though only in businesses that boasted high returns on capital and strong balance sheets. The Sub-fund remains weighted toward large-cap stocks.

Following the successful EGM on 29 September 2023, the Sub-fund merged into the BNY Mellon UK Income Fund on 7 October 2023.

*Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there may be other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which may also have reduced the Sub-fund and share class returns before operating charges.

**The Operating Charges figure is made up of the Annual Management Charge (AMC) and other operating costs. Other operating costs include the costs for other services paid for by the Sub-fund, such as the fees paid to the Fund Accountant, Fund Administrator, Depositary, Custodian, Auditor and Regulator. The Operating Charges figure shown is calculated on an ex-post basis over the period, whereas the Ongoing Charges figure shown in the Key Investor Information Document (KIID) is a calculation as at a point in time, and therefore there could be immaterial differences between the two. The operating charges are annualised for share classes launched during the year.

6 Taxation

	30/06/2023	30/06/2022
	£	£
a) Analysis of the tax charge		
Overseas tax withheld	36,168	33,587
Total tax charge (see Note 6b)	36,168	33,587
b) Factors affecting the tax charge		
The tax assessed for the year is lower (30/06/2022: lower) than the standard rate of corporation tax in the UK for an ICVC (20%) (30/06/2022: 20%).		
The differences are explained below:		
Net revenue before taxation	4,361,642	4,097,589
Corporation tax @ 20%	872,328	819,518
Effects of:		
Movement in unrecognised tax losses	235,326	304,800
Overseas tax withheld	36,168	33,587
Prior year adjustment to unrecognised tax losses	—	9
Revenue not subject to corporation tax	(1,107,654)	(1,124,327)
Total tax charge (see Note 6a)	36,168	33,587
c) Deferred tax		
No deferred tax asset has been recognised in the accounts in relation to tax losses of £26,148,321 (30/06/2022: £24,971,691), as it is unlikely that there will be sufficient taxable profits in the future to utilise these amounts. The deferred tax asset not recognised is £5,229,664 (30/06/2022: £4,994,338).

13 Related parties

ACD's periodic charge, registrations and expense charge, safe custody charges and activity charges paid to the ACD, BNY Mellon Fund Managers Limited, or its associates, are shown in Notes 3 and 5, and details of shares issued and cancelled by the ACD are shown in the Statement of Change in Net Assets Attributable to Shareholders and Note 8.

The balance due to the ACD at 30 June 2023 in respect of these transactions was £855,101 (30/06/2022: £291,902).

Any investments in or transactions with other BNYM related party entities are individually identified in the portfolio statement and the Securities Lending note respectively.

14 Financial instruments

The risk factors relating to the Sub-fund are discussed more fully in Note 2 of the notes applicable to the financial statements of all the Sub-funds on pages 11 to 14.

Market Price Risk

The value of the Sub-fund's investments which were exposed to market price risk was as follows:

	30/06/2023	30/06/2022
	£	£
Investments held at the balance sheet date	104,481,509	116,473,961

Market Price Sensitivity

The following table illustrates the sensitivity of the return and the net assets to an increase or decrease of 5% (30/06/2022: 5%) in the fair values of the Sub-fund's investments. This level of change is considered to be reasonably possible based on observation of market conditions in the year. The sensitivity analysis is based on the impact of a change to the value of the Sub-fund's investments at each balance sheet date.

Total transaction costs 219 1,177

Total transaction costs as a % of average net assets 0.16% 0.86%

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

Separately identifiable direct transaction costs (commissions & taxes etc) are attributable to the Sub-fund's purchase and sale of equity shares. Additionally for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.03% (30/06/2022: 0.06%).

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date (30/06/2022: nil).

17 Securities lending

The revenue arising from the Securities Lending Programme is currently split between the Sub-fund and The Bank of New York Mellon, London Branch in the proportion 81%:19% (30/06/2022: 81%:19%). The 19% paid to The Bank of New York Mellon, London Branch is to cover operational cost, risk and profit. The Bank of New York Mellon London Branch is a related party of the ACD as both entities are affiliates of The Bank of New York Mellon Corporation.

Collateral accepted is non-cash in the form of Sovereign debt rated AA or better from approved Governments only and Supranational debt obligations rated AAA or better, and FTSE 100 DBV (Class F10) as defined in the CREST Reference Manual and equity securities from the following indices: AEX 25 (Netherlands), CAC 40 (France), DAX 30 (Germany), Euro 50 (Eurozone), FTSE 100 (United Kingdom), Nikkei 225 (Japan), SMI 20 (Switzerland), S&P 500 (United States of America).

As at 30 June 2023, there were no investments subject to securities lending agreements.

As at 30 June 2022, £2,572,709 of investments were subject to securities lending agreements and on behalf of the Sub-fund £2,838,057 was held in collateral. The collateral was held 11.85% in debt securities and 88.15% in equity securities.

The gross earnings and the fees for the year are £3,647 (30/06/2022: £9,407) and £693 (30/06/2022: £1,787) respectively.

18 Shareholder's funds

The Sub-fund currently has the below share classes in issue. Each share class suffers a different annual ACD charge and Registrations and expense charge which is payable to the ACD and is shown below:

	ACD charge	Registrations and expenses charge
B Shares (Accumulation)	0.85%	0.08%
B Shares (Income)	0.85%	0.08%
Institutional Shares W (Accumulation)	0.75%	0.03%
Institutional Shares W (Income)	0.75%	0.03%
Sterling Accumulation Shares	1.50%	0.10%
Sterling Income Shares	1.50%	0.10%

Consequently, the level of net revenue attributable to each share class will differ.

All share classes have the same rights on winding up.

Key Dates: Fund Launch	7 February 2023

Investment Objective

The Sub-fund aims to achieve capital growth and potential for income over the long term (5 years or more) while being managed to a pre-defined level of risk. The Sub-fund will aim to maintain a risk profile classification of 3 from a scale of 1 (lowest) to 10 (highest) which is assessed against the risk ratings scale provided by an external third party risk rating agency.

Investment Policy

To achieve its investment objective, the Sub-fund will invest in a portfolio of UK and international securities across a broad range of asset classes. The Sub-fund may invest directly or indirectly in equities, fixed interest securities, currencies, cash, near cash, deposits, warrants, infrastructure, renewable energy, property, commodities and approved money market instruments. Exposure to these asset classes is expected to be achieved through a combination of transferable securities (such as company shares, convertible bonds, contingent convertible bonds, listed investment trusts, REITs, bonds and structured notes), collective investment schemes (which may include those managed or operated by the ACD or an associate of the ACD) and derivatives. To the extent the Sub-fund gains exposure to property and commodities, such exposure may be through exchange listed securities, other transferable securities and/or collective investment schemes.

Typically, the Sub-fund will maintain, in normal market conditions, an exposure to equities through physical and derivative exposure, of between 10%-50% of the Net Asset Value of the portfolio, which in the Investment Manager's view, is consistent with the Sub-fund's risk profile. Exposure to equities will typically include, but is not limited to, investments in company shares, listed investment trusts, REITs, equity related collective investment schemes, equity related derivative exposures and infrastructure, renewable energy or property held through equity related securities. In order to meet the Sub-fund's investment objective, the Investment Manager will manage the portfolio using both Strategic Asset Allocation (long-term investment allocations) and Tactical Asset Allocation (shorter-term investment allocations).

Any investment in collective investment schemes will not exceed 10% of the Net Asset Value of the portfolio in aggregate. No more than 10% of the Net Asset Value of the Sub-fund will be allocated to investments in contingent convertible bonds.

Corporate and sovereign issuers eligible for investment are expected to demonstrate an ability to generate returns consistent with the Sub-fund's objective and sustainable business practices or sovereign behaviour (as applicable).

Sustainable business practices, in the context of the Sub-fund's corporate investments, are those which positively manage the material impacts of an issuer's operations and products on the environment and society.

Sustainable behaviours, in the context of the Sub-fund's sovereign investments, are those which, in the view of the Investment Manager, positively manage or demonstrate progress in respect of environmental, social and governance (ESG) factors.

All direct investments will be expected to conform to the Investment Manager's sustainability criteria, where environmental, social and governance considerations are an integral part of the criteria.

When determining whether an issuer meets the Investment Manager's sustainability criteria, the Investment Manager considers whether the issuer: (i) engages in sustainable practices in an economic sense (e.g., the issuer's strategy, operations and finances are stable and durable), and (ii) takes appropriate measures to manage any material consequences or impact of its policies and operations in relation to ESG matters (e.g., the issuer's environmental footprint, labour or human rights standards and/or board or government structure, subject to the specific nature of the investment).

The Investment Manager's sustainability criteria incorporate elements of negative screening alongside other general and issuer-level ESG-related analysis of an issuer's activities. Specifically, the Investment Manager seeks to:

– Identify and avoid issuers that participate in specific areas of activity that the Investment Manager deems to be harmful from an environmental or social perspective or which do not follow good governance practices. As an example, the Investment Manager could deem issuers that have large carbon footprints, companies with poor labour standards, or sovereign issuers with poor control of corruption ineligible for investment. The Investment Manager will exclude corporate issuers in breach of the UN Global Compact principles which include principles relating to human rights, labour, environment and anti-corruption. The Investment Manager will also exclude sovereign issuers that in the view of the Investment Manager exhibit material negative management of environmental, social or governance factors.

– Identify and invest in issuers that are proactively seeking to manage environmental and/or social factors well, which in turn should support long-term financial returns. This may also include those issuers that are contributing to the development of solutions that will contribute towards addressing environmental and/or social issues, examples of which could include more efficient or reduced use of natural resources or accessibility to healthcare. Issuers engaged in sustainable practices may also include those that have committed explicitly to improving their environmental and/or social impacts.

When determining whether an issuer meets the Investment Manager's sustainability criteria, the Investment Manager uses a combination of external and internal data, research and ratings which are qualitative and quantitative in nature.

Due to the nature of the individual investment types that the Sub-fund may invest in, the Investment Manager may employ different processes and techniques in its assessment. For example, the process through which the Investment Manager assesses corporate investments may be different to and use different inputs to the approach used for sovereign investments.

Annual Report & Accounts - BNY Mellon FutureLegacy 3 Fund

Fund Report

(continued)

There may be situations where the Sub-fund will invest in an issuer that has been identified as having involvement in potentially harmful activities from an environmental or social perspective. In the case of corporate investments, this may arise for certain issuers whose activities or operations, typically due to a legacy business mix, may have historically created poor environmental or social outcomes, but that are now investing in and positively adapting to future needs (for example, this may include energy companies that are preparing for a transition to a lower carbon world). In the case of sovereign investments, this may arise in respect of issuers that may be demonstrating an improvement in their overall sustainability profile.

Similarly, in some instances, the Sub-fund may invest in a corporate issuer where the Investment Manager determines through engagement with the issuer that prevailing ESG information and data provided by external ESG ratings providers have not fully captured positive environmental or social initiatives of the issuer.

For the avoidance of doubt, cash and liquid near cash assets, money market funds, derivatives and certain types of structured notes (e.g. alternative risk premia strategies, hereafter referred to as 'ARP' strategies) are not required to meet the Investment Manager's sustainability criteria.

The Sub-fund may invest more than 35% of its Net Asset Value in government and public securities issued or guaranteed by a single state, local authority or public international body. In extreme market conditions, the Sub-fund may invest significantly in cash and cash-like securities. Subject to FCA regulations, the relative exposure between these asset classes will be actively managed and will be varied as deemed necessary in order to achieve the investment objective. This may result in the Sub-fund having no exposure to particular asset classes. The Sub-fund may invest in any geographic or economic sectors of the world, including emerging markets.

Derivatives may be used with a view to generating investment returns in pursuit of the Sub-fund's investment objective, and for efficient portfolio management. Derivatives employed for investment purposes are expected to be used regularly and would typically be simple in nature, whilst seeking to remain within the parameters of the overall targeted risk profile of the Sub-fund.

The Investment Manager may use ARP strategies, to implement the investment strategy. ARP strategies seek to gain exposure to risk premia (the return or reward an investor earns to bear risk) that would not usually be directly accessible through traditional investment instruments (for example, by investing directly in equities or bonds).

ARP strategies are typically accessed through systematic, rules-based approaches which often use quantitative techniques and can be implemented through a range of instruments (including structured notes, derivative instruments and collective investment schemes).

No more than 8.5% of the Net Asset Value of the Sub-fund will be allocated to gaining exposure to ARP strategies.

Portfolio Summary

From the Sub-fund's launch on 7 February 2023 to 30 June 2023, the Institutional Shares W (Accumulation) share class of the Sub-fund returned 0.51%, net of fees, compared with 0.21% for the benchmark a composite index, comprising 15% SONIA GBP, 55% ICE BofAML Global Broad Index GBP Hedged and 30% MSCI ACWI GBP NR. The Sub-fund generated a positive return and outperformed its benchmark.

The Sub-fund is an actively managed, multi-asset fund designed to identify and invest in fundamentally strong, sustainable securities. Managed to a predefined level of risk. The Sub-fund will aim to maintain a risk profile classification of 3 from a scale of 1 (lowest) to 10 (highest) which is assessed against the risk ratings scale provided by an external third party risk rating agency. FutureLegacy 3 aims to have circa 30% of its net asset value invested in equities, with the remainder in cash and bonds, both high yield and investment grade. The Sub-fund's holdings include companies and sovereign issuers that meet the manager's sustainability criteria, of which environmental, social and corporate governance considerations are an integral part.

The Sub-fund invests in international markets, which means it is exposed to changes in currency rates. However, the manager believes this high level of diversification is an asset, helping investors to achieve capital growth and align with their sustainability goals over the long-term.

**The Operating Charges figure is made up of the Annual Management Charge (AMC) and other operating costs. Other operating costs include the costs for other services paid for by the Sub-fund, such as the fees paid to the Fund Accountant, Fund Administrator, Depositary, Custodian, Auditor and Regulator. The Operating Charges figure shown is calculated on an ex-post basis over the period, whereas the Ongoing Charges figure shown in the Key Investor Information Document (KIID) is a calculation as at a point in time, and therefore there could be immaterial differences between the two. The operating charges are annualised for share classes launched during the year.

***Share class launched on 7 February 2023.

13 Related parties

As at 30 June 2023, there was one investor holding more than 75% of the voting shares in issue. BNY Mellon Investment Management Seed held 99.99% of the total voting shares in issue and is therefore regarded as a related party. As at the balance sheet date there were no outstanding balances payable or receivable from the investor.

ACD's periodic charge, registrations and expense charge, safe custody charges and activity charges paid to the ACD, BNY Mellon Fund Managers Limited, or its associates, are shown in Notes 3 and 5, and details of shares issued and cancelled by the ACD are shown in the Statement of Change in Net Assets Attributable to Shareholders and Note 8.

The balance due to the ACD at 30 June 2023 in respect of these transactions was £8,716.

Any investments in or transactions with other BNYM related party entities are individually identified in the portfolio statement and the Securities Lending note respectively.

14 Financial instruments

The risk factors relating to the Sub-fund are discussed more fully in Note 2 of the notes applicable to the financial statements of all the Sub-funds on pages 11 to 14.

Market Price Risk

The Sub-fund uses Value at Risk (VaR) to calculate the likelihood of the Sub-fund (including derivatives) falling in value by more than a particular level.

Under normal market conditions, VaR captures the potential fall in the value of the portfolio over a given holding period and to a given level of statistical confidence.

Market Price Risk (continued)

VaR is discussed in more detail, with the relevant disclosures for the financial year, in the notes applicable to the financial statements of all Sub-funds on page 12.

Valuation of financial instruments

The categorisation of financial instruments in the tables below reflect the methodology used to measure their fair value.

	30/06/2023 Assets £	30/06/2023 Liabilities £
Level 1: Quoted prices	6,291,750	(2,408)
Level 2: Observable market data	12,431,663	(37,002)
Level 3: Unobservable data	—	—
	18,723,413	(39,410)

Level 1: Unadjusted quoted price in an active market for an identical instrument.

Level 2: Valuation techniques using observable inputs other than quoted prices within Level 1.

Level 3: Valuation techniques using unobservable inputs.

Derivative risk

The Sub-fund may enter into derivative transactions in the pursuit of its investment objective. Further details about the scope of the Sub-fund's derivative usage can be found in the Prospectus.

Derivatives may be used for efficient portfolio management only.

Counterparty credit risk

Counterparty exposure for non-exchange traded derivatives at 30 June 2023 is as follows:

Counterparty	Forward Currency Contracts £	Total £
Canadian Imperial Bank of Commerce	4,857	4,857
Citigroup Global Markets Limited	814	814
State Street Global Advisors Limited	94,234	94,234
UBS	(19,406)	(19,406)
Total	80,499	80,499

Counterparty exposure has not been disclosed for exchange traded derivatives as the exchange requirements in respect of collateral mean that, in the opinion of the ACD, the counterparty risk is mitigated.

Collateral received from these counterparties in respect of derivative contracts was £nil in the form of cash.

Collateral pledged to these counterparties in respect of derivative contracts was £nil in the form of cash.

Total sales net of transaction costs	4,370				
Derivative transaction costs		1		—	
Total transaction costs		2		5	
Total transaction costs as a % of average net assets		0.01%		0.02%	

The above analysis covers any direct transaction costs suffered by the Sub-fund during the period. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

Separately identifiable direct transaction costs (commissions & taxes etc) are attributable to the Sub-fund's purchase and sale of equity shares. Additionally for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

During the period the Sub-fund utilised derivative instruments. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivative positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.17%.

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date.

17 Securities lending

As at 30 June 2023, there were no investments subject to securities lending agreements.

The gross earnings and the fees for the period are £nil and £nil respectively.

Key Dates: Fund Launch	7 February 2023

Investment Objective

The Sub-fund aims to achieve capital growth and potential for income over the long term (5 years or more) while being managed to a pre-defined level of risk. The Sub-fund will aim to maintain a risk profile classification of 4 from a scale of 1 (lowest) to 10 (highest) which is assessed against the risk ratings scale provided by an external third party risk rating agency.

Investment Policy

To achieve its investment objective, the Sub-fund will invest in a portfolio of UK and international securities across a broad range of asset classes. The Sub-fund may invest directly or indirectly in equities, fixed interest securities, currencies, cash, near cash, deposits, warrants, infrastructure, renewable energy, property, commodities and approved money market instruments. Exposure to these asset classes is expected to be achieved through a combination of transferable securities (such as company shares, convertible bonds, contingent convertible bonds, listed investment trusts, REITs, bonds and structured notes), collective investment schemes (which may include those managed or operated by the ACD or an associate of the ACD) and derivatives. To the extent the Sub-fund gains exposure to property and commodities, such exposure may be through exchange listed securities, other transferable securities and/or collective investment schemes.

Typically, the Sub-fund will maintain, in normal market conditions an exposure to equities through physical and derivative exposure of between 25%-65% of the Net Asset Value of the portfolio, which in the Investment Manager's view, is consistent with the Sub-fund's risk profile. Exposure to equities will typically include, but is not limited to, investments in company shares, listed investment trusts, REITs, equity related collective investment schemes, equity related derivative exposures and infrastructure, renewable energy or property held through equity related securities.

In order to meet the Sub-fund's investment objective, the Investment Manager will manage the portfolio using both Strategic Asset Allocation (long-term investment allocations) and Tactical Asset Allocation (shorter-term investment allocations).

Any investment in collective investment schemes will not exceed 10% of the Net Asset Value of the portfolio in aggregate. No more than 10% of the Net Asset Value of the Sub-fund will be allocated to investments in contingent convertible bonds.

Corporate and sovereign issuers eligible for investment are expected to demonstrate an ability to generate returns consistent with the Sub-fund's objective and sustainable business practices or sovereign behaviour (as applicable).

Sustainable business practices, in the context of the Sub-fund's corporate investments, are those which positively manage the material impacts of an issuer's operations and products on the environment and society.

Sustainable behaviours, in the context of the Sub-fund's sovereign investments, are those which, in the view of the Investment Manager, positively manage or demonstrate progress in respect of environmental, social and governance (ESG) factors.

All direct investments will be expected to conform to the Investment Manager's sustainability criteria, where environmental, social and governance considerations are an integral part of the criteria.

When determining whether an issuer meets the Investment Manager's sustainability criteria, the Investment Manager considers whether the issuer: (i) engages in sustainable practices in an economic sense (e.g., the issuer's strategy, operations and finances are stable and durable), and (ii) takes appropriate measures to manage any material consequences or impact of its policies and operations in relation to ESG matters (e.g., the issuer's environmental footprint, labour or human rights standards and/or board or government structure, subject to the specific nature of the investment).

The Investment Manager's sustainability criteria incorporate elements of negative screening alongside other general and issuer-level ESG-related analysis of an issuer's activities. Specifically, the Investment Manager seeks to:

- Identify and avoid issuers that participate in specific areas of activity that the Investment Manager deems to be harmful from an environmental or social perspective or which do not follow good governance practices. As an example, the Investment Manager could deem issuers that have large carbon footprints, companies with poor labour standards, or sovereign issuers with poor control of corruption ineligible for investment. The Investment Manager will exclude corporate issuers in breach of the UN Global Compact principles which include principles relating to human rights, labour, environment and anti-corruption. The Investment Manager will also exclude sovereign issuers that in the view of the Investment Manager exhibit material negative management of environmental, social or governance factors.

- Identify and invest in issuers that are proactively seeking to manage environmental and/or social factors well, which in turn should support long-term financial returns. This may also include those issuers that are contributing to the development of solutions that will contribute towards addressing environmental and/or social issues, examples of which could include more efficient or reduced use of natural resources or accessibility to healthcare. Issuers engaged in sustainable practices may also include those that have committed explicitly to improving their environmental and/or social impacts.

When determining whether an issuer meets the Investment Manager's sustainability criteria, the Investment Manager uses a combination of external and internal data, research and ratings which are qualitative and quantitative in nature.

Annual Report & Accounts - BNY Mellon FutureLegacy 4 Fund

Fund Report

(continued)

Due to the nature of the individual investment types that the Sub-fund may invest in, the Investment Manager may employ different processes and techniques in its assessment. For example, the process through which the Investment Manager assesses corporate investments may be different to and use different inputs to the approach used for sovereign investments.

There may be situations where the Sub-fund will invest in an issuer that has been identified as having involvement in potentially harmful activities from an environmental or social perspective. In the case of corporate investments, this may arise for certain issuers whose activities or operations, typically due to a legacy business mix, may have historically created poor environmental or social outcomes, but that are now investing in and positively adapting to future needs (for example, this may include energy companies that are preparing for a transition to a lower carbon world). In the case of sovereign investments, this may arise in respect of issuers that may be demonstrating an improvement in their overall sustainability profile.

Similarly, in some instances, the Sub-fund may invest in a corporate issuer where the Investment Manager determines through engagement with the issuer that prevailing ESG information and data provided by external ESG ratings providers have not fully captured positive environmental or social initiatives of the issuer.

For the avoidance of doubt, cash and liquid near cash assets, money market funds, derivatives and certain types of structured notes (e.g. alternative risk premia strategies, hereafter referred to as 'ARP' strategies) are not required to meet the Investment Manager's sustainability criteria.

The Sub-fund may invest more than 35% of its Net Asset Value in government and public securities issued or guaranteed by a single state, local authority or public international body. In extreme market conditions, the Sub-fund may invest significantly in cash and cash-like securities. Subject to FCA regulations, the relative exposure between these asset classes will be actively managed and will be varied as deemed necessary in order to achieve the investment objective. This may result in the Sub-fund having no exposure to particular asset classes. The Sub-fund may invest in any geographic or economic sectors of the world, including emerging markets.

Derivatives may be used with a view to generating investment returns in pursuit of the Sub-fund's investment objective, and for efficient portfolio management. Derivatives employed for investment purposes are expected to be used regularly and would typically be simple in nature, whilst seeking to remain within the parameters of the overall targeted risk profile of the Sub-fund.

The Investment Manager may use ARP strategies, to implement the investment strategy. ARP strategies seek to gain exposure to risk premia (the return or reward an investor earns to bear risk) that would not usually be directly accessible through traditional investment instruments (for example, by investing directly in equities or bonds).

ARP strategies are typically accessed through systematic, rules-based approaches which often use quantitative techniques and can be implemented through a range of instruments (including structured notes, derivative instruments and collective investment schemes).

No more than 8.5% of the Net Asset Value of the Sub-fund will be allocated to gaining exposure to ARP strategies.

Portfolio Summary

From the Sub-fund's launch on 7 February 2023 to 30 June 2023, the Institutional Shares W (Accumulation) share class of the Sub-fund returned 0.28%, net of fees, compared with 0.03% for the benchmark a composite index, comprising 10% SONIA GBP, 45% BAML Global Broad Index GBP Hedged and 45% MSCI ACWI GBP NR. The Sub-fund generated a positive return and outperformed its benchmark.

The Sub-fund is an actively managed, multi-asset fund designed to identify and invest in fundamentally strong, sustainable securities. Managed to a predefined level of risk, the Sub-fund will aim to maintain a risk profile classification of 4 from a scale of 1 (lowest) to 10 (highest) which is assessed against the risk ratings scale provided by an external third party risk rating agency. BNY Mellon FutureLegacy 4 Fund aims to be invested 45% in equities, with the remainder in cash and bonds, both high yield and investment grade. The Sub-fund's holdings include companies and sovereign issuers that meet the manager's sustainability criteria, of which environmental, social and corporate governance considerations are an integral part.

The Sub-fund invests in international markets, which means it is exposed to changes in currency rates. However, the manager believes this high level of diversification is an asset, helping investors to achieve capital growth and align with their sustainability goals over the long term.

13 Related parties

As at 30 June 2023, there was one investor holding more than 75% of the voting shares in issue. BNY Mellon Investment Management Seed held 99.99% of the total voting shares in issue and is therefore regarded as a related party. As at the balance sheet date there were no outstanding balances payable or receivable from the investor.

ACD's periodic charge, registrations and expense charge, safe custody charges and activity charges paid to the ACD, BNY Mellon Fund Managers Limited, or its associates, are shown in Notes 3 and 5, and details of shares issued and cancelled by the ACD are shown in the Statement of Change in Net Assets Attributable to Shareholders and Note 8.

The balance due to the ACD at 30 June 2023 in respect of these transactions was £8,825.

Any investments in or transactions with other BNYM related party entities are individually identified in the portfolio statement and the Securities Lending note respectively.

14 Financial instruments

The risk factors relating to the Sub-fund are discussed more fully in Note 2 of the notes applicable to the financial statements of all the Sub-funds on pages 11 to 14.

Market Price Risk

The Sub-fund uses Value at Risk (VaR) to calculate the likelihood of the Sub-fund (including derivatives) falling in value by more than a particular level.

Under normal market conditions, VaR captures the potential fall in the value of the portfolio over a given holding period and to a given level of statistical confidence.

Annual Report & Accounts - BNY Mellon FutureLegacy 4 Fund

Notes to the Financial Statements

(continued)

14 Financial instruments (continued)

Market Price Risk (continued)

VaR is discussed in more detail, with the relevant disclosures for the financial year, in the notes applicable to the financial statements of all Sub-funds on page 12.

Valuation of financial instruments

The categorisation of financial instruments in the tables below reflect the methodology used to measure their fair value.

	30/06/2023 Assets £	30/06/2023 Liabilities £
Level 1: Quoted prices	9,382,007	(2,696)
Level 2: Observable market data	9,557,435	(30,237)
Level 3: Unobservable data	—	—
	18,939,442	(32,933)

Level 1: Unadjusted quoted price in an active market for an identical instrument.

Level 2: Valuation techniques using observable inputs other than quoted prices within Level 1.

Level 3: Valuation techniques using unobservable inputs.

Derivative risk

The Sub-fund may enter into derivative transactions in the pursuit of its investment objective. Further details about the scope of the Sub-fund's derivative usage can be found in the Prospectus.

Derivatives may be used for efficient portfolio management only.

Counterparty credit risk

Counterparty exposure for non-exchange traded derivatives at 30 June 2023 is as follows:

Counterparty	Forward Currency Contracts £	Total £
Canadian Imperial Bank of Commerce	3,759	3,759
Citigroup Global Markets Limited	(547)	(547)
State Street Global Advisors Limited	67,798	67,798
UBS	(16,803)	(16,803)
Total	54,207	54,207

Counterparty exposure has not been disclosed for exchange traded derivatives as the exchange requirements in respect of collateral mean that, in the opinion of the ACD, the counterparty risk is mitigated.

Collateral received from these counterparties in respect of derivative contracts was £nil in the form of cash.

Collateral pledged to these counterparties in respect of derivative contracts was £nil in the form of cash.

Total transaction costs 2 7

Total transaction costs as a % of average net assets 0.01% 0.04%

The above analysis covers any direct transaction costs suffered by the Sub-fund during the period. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

Separately identifiable direct transaction costs (commissions & taxes etc) are attributable to the Sub-fund's purchase and sale of equity shares. Additionally for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

During the period the Sub-fund utilised derivative instruments. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivative positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.14%.

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date.

17 Securities lending

As at 30 June 2023, there were no investments subject to securities lending agreements.

The gross earnings and the fees for the period are £nil and £nil respectively.

Investment Objective

The Sub-fund aims to achieve capital growth and potential for income over the long term (5 years or more) while being managed to a pre-defined level of risk. The Sub-fund will aim to maintain a risk profile classification of 5 from a scale of 1 (lowest) to 10 (highest) which is assessed against the risk ratings scale provided by an external third party risk rating agency.

Investment Policy

To achieve its investment objective, the Sub-fund will invest in a portfolio of UK and international securities across a broad range of asset classes. The Sub-fund may invest directly or indirectly in equities, fixed interest securities, currencies, cash, near cash, deposits, warrants, infrastructure, renewable energy, property, commodities and approved money market instruments. Exposure to these asset classes is expected to be achieved through a combination of transferable securities (such as company shares convertible bonds, contingent convertible bonds, listed investment trusts, REITs, bonds and structured notes), collective investment schemes (which may include those managed or operated by the ACD or an associate of the ACD) and derivatives. To the extent the Sub-fund gains exposure to property and commodities, such exposure may be through exchange listed securities, other transferable securities and/or collective investment schemes.

Typically, the Sub-fund will maintain, in normal market conditions, an exposure to equities through physical and derivative exposure, of between 40%-80% of the Net Asset Value of the portfolio, which in the Investment Manager's view, is consistent with the Sub-fund's risk profile. Exposure to equities will typically include, but is not limited to, investments in company shares, listed investment trusts, REITs, equity related collective investment schemes, equity related derivative exposures and infrastructure, renewable energy or property held through equity related securities.

In order to meet the Sub-fund's investment objective, the Investment Manager will manage the portfolio using both Strategic Asset Allocation (long-term investment allocations) and Tactical Asset Allocation (shorter-term investment allocations).

Any investment in collective investment schemes will not exceed 10% of the Net Asset Value of the portfolio in aggregate. No more than 10% of the Net Asset Value of the Sub-fund will be allocated to investments in contingent convertible bonds.

Corporate and sovereign issuers eligible for investment are expected to demonstrate an ability to generate returns consistent with the Sub-fund's objective and sustainable business practices or sovereign behaviour (as applicable).

Sustainable business practices, in the context of the Sub-fund's corporate investments, are those which positively manage the material impacts of an issuer's operations and products on the environment and society.

Sustainable behaviours, in the context of the Sub-fund's sovereign investments, are those which, in the view of the Investment Manager, positively manage or demonstrate progress in respect of environmental, social and governance (ESG) factors.

All direct investments will be expected to conform to the Investment Manager's sustainability criteria, where environmental, social and governance considerations are an integral part of the criteria.

When determining whether an issuer meets the Investment Manager's sustainability criteria, the Investment Manager considers whether the issuer: (i) engages in sustainable practices in an economic sense (e.g., the issuer's strategy, operations and finances are stable and durable), and (ii) takes appropriate measures to manage any material consequences or impact of its policies and operations in relation to ESG matters (e.g., the issuer's environmental footprint, labour or human rights standards and/or board or government structure, subject to the specific nature of the investment).

The Investment Manager's sustainability criteria incorporate elements of negative screening alongside other general and issuer-level ESG-related analysis of an issuer's activities. Specifically, the Investment Manager seeks to:

- Identify and avoid issuers that participate in specific areas of activity that the Investment Manager deems to be harmful from an environmental or social perspective or which do not follow good governance practices. As an example, the Investment Manager could deem issuers that have large carbon footprints, companies with poor labour standards, or sovereign issuers with poor control of corruption ineligible for investment. The Investment Manager will exclude corporate issuers in breach of the UN Global Compact principles which include principles relating to human rights, labour, environment and anti-corruption. The Investment Manager will also exclude sovereign issuers that in the view of the Investment Manager exhibit material negative management of environmental, social or governance factors.

- Identify and invest in issuers that are proactively seeking to manage environmental and/or social factors well, which in turn should support long-term financial returns. This may also include those issuers that are contributing to the development of solutions that will contribute towards addressing environmental and/or social issues, examples of which could include more efficient or reduced use of natural resources or accessibility to healthcare. Issuers engaged in sustainable practices may also include those that have committed explicitly to improving their environmental and/or social impacts.

When determining whether an issuer meets the Investment Manager's sustainability criteria, the Investment Manager uses a combination of external and internal data, research and ratings which are qualitative and quantitative in nature.

Annual Report & Accounts - BNY Mellon FutureLegacy 5 Fund

Fund Report

(continued)

Due to the nature of the individual investment types that the Sub-fund may invest in, the Investment Manager may employ different processes and techniques in its assessment. For example, the process through which the Investment Manager assesses corporate investments may be different to and use different inputs to the approach used for sovereign investments.

There may be situations where the Sub-fund will invest in an issuer that has been identified as having involvement in potentially harmful activities from an environmental or social perspective. In the case of corporate investments, this may arise for certain issuers whose activities or operations, typically due to a legacy business mix, may have historically created poor environmental or social outcomes, but that are now investing in and positively adapting to future needs (for example, this may include energy companies that are preparing for a transition to a lower carbon world). In the case of sovereign investments, this may arise in respect of issuers that may be demonstrating an improvement in their overall sustainability profile.

Similarly, in some instances, the Sub-fund may invest in a corporate issuer where the Investment Manager determines through engagement with the issuer that prevailing ESG information and data provided by external ESG ratings providers have not fully captured positive environmental or social initiatives of the issuer.

For the avoidance of doubt, cash and liquid near cash assets, money market funds, derivatives and certain types of structured notes (e.g. alternative risk premia strategies, hereafter referred to as 'ARP' strategies) are not required to meet the Investment Manager's sustainability criteria.

The Sub-fund may invest more than 35% of its Net Asset Value in government and public securities issued or guaranteed by a single state, local authority or public international body. In extreme market conditions, the Sub-fund may invest significantly in cash and cash-like securities. Subject to FCA regulations, the relative exposure between these asset classes will be actively managed and will be varied as deemed necessary in order to achieve the investment objective. This may result in the Sub-fund having no exposure to particular asset classes. The Sub-fund may invest in any geographic or economic sectors of the world, including emerging markets.

Derivatives may be used with a view to generating investment returns in pursuit of the Sub-fund's investment objective, and for efficient portfolio management. Derivatives employed for investment purposes are expected to be used regularly and would typically be simple in nature, whilst seeking to remain within the parameters of the overall targeted risk profile of the Sub-fund.

The Investment Manager may use ARP strategies, to implement the investment strategy. ARP strategies seek to gain exposure to risk premia (the return or reward an investor earns to bear risk) that would not usually be directly accessible through traditional investment instruments (for example, by investing directly in equities or bonds).

ARP strategies are typically accessed through systematic, rules-based approaches which often use quantitative techniques and can be implemented through a range of instruments (including structured notes, derivative instruments and collective investment schemes).

No more than 8.5% of the Net Asset Value of the Sub-fund will be allocated to gaining exposure to ARP strategies.

Portfolio Summary

From the Sub-fund's launch on 7 February 2023 to 30 June 2023, the Institutional Shares W (Accumulation) share class of the Sub-fund returned 0.01%, net of fees, compared with -0.15% for the benchmark: a composite index, comprising 5% SONIA GBP, 35% BofA Global Broad Index GBP Hedged and 60% MSCI ACWI GBP NR. The Sub-fund generated a marginally positive return and outperformed its benchmark.

The Sub-fund is a multi-asset fund designed to identify and invest in fundamentally strong, sustainable securities. Managed to a predefined level of risk, the Sub-fund will aim to maintain a risk profile classification of 5 from a scale of 1 (lowest) to 10 (highest) which is assessed against the risk ratings scale provided by an external third party risk rating agency. FutureLegacy 5 aims to be invested 60% in equities, with the remainder in cash and bonds, both high yield and investment grade. The Sub-fund's holdings include companies and sovereign issuers that meet the manager's sustainability criteria, of which environmental, social and corporate governance considerations are an integral part.

The Sub-fund invests in international markets, which means it is exposed to changes in currency rates. However, the manager believes this high level of diversification is an asset, helping investors to achieve capital growth and align with their sustainability goals over the long term.

13 Related parties

As at 30 June 2023, there was one investor holding more than 75% of the voting shares in issue. BNY Mellon Investment Management Seed held 99.99% of the total voting shares in issue and is therefore regarded as a related party. As at the balance sheet date there were no outstanding balances payable or receivable from the investor.

ACD's periodic charge, registrations and expense charge, safe custody charges and activity charges paid to the ACD, BNY Mellon Fund Managers Limited, or its associates, are shown in Notes 3 and 5, and details of shares issued and cancelled by the ACD are shown in the Statement of Change in Net Assets Attributable to Shareholders and Note 8.

The balance due to the ACD at 30 June 2023 in respect of these transactions was £8,735.

Any investments in or transactions with other BNYM related party entities are individually identified in the portfolio statement and the Securities Lending note respectively.

14 Financial instruments

The risk factors relating to the Sub-fund are discussed more fully in Note 2 of the notes applicable to the financial statements of all the Sub-funds on pages 11 to 14.

Market Price Risk

The Sub-fund uses Value at Risk (VaR) to calculate the likelihood of the Sub-fund (including derivatives) falling in value by more than a particular level.

Under normal market conditions, VaR captures the potential fall in the value of the portfolio over a given holding period and to a given level of statistical confidence.

14 Financial instruments (continued)

Market Price Risk (continued)

VaR is discussed in more detail, with the relevant disclosures for the financial year, in the notes applicable to the financial statements of all Sub-funds on page 12.

Valuation of financial instruments

The categorisation of financial instruments in the tables below reflect the methodology used to measure their fair value.

	30/06/2023 Assets £	30/06/2023 Liabilities £
Level 1: Quoted prices	12,356,245	(2,710)
Level 2: Observable market data	7,004,771	(21,582)
Level 3: Unobservable data	—	—
	19,361,016	(24,292)

Level 1: Unadjusted quoted price in an active market for an identical instrument.

Level 2: Valuation techniques using observable inputs other than quoted prices within Level 1.

Level 3: Valuation techniques using unobservable inputs.

Derivative risk

The Sub-fund may enter into derivative transactions in the pursuit of its investment objective. Further details about the scope of the Sub-fund's derivative usage can be found in the Prospectus.

Derivatives may be used for efficient portfolio management only.

Counterparty credit risk

Counterparty exposure for non-exchange traded derivatives at 30 June 2023 is as follows:

Counterparty	Forward Currency Contracts £	Total £
Canadian Imperial Bank of Commerce	1,474	1,474
Citigroup Global Markets Limited	11,950	11,950
State Street Global Advisors Limited	38,964	38,964
UBS	(12,882)	(12,882)
Total	39,506	39,506

Counterparty exposure has not been disclosed for exchange traded derivatives as the exchange requirements in respect of collateral mean that, in the opinion of the ACD, the counterparty risk is mitigated.

Collateral received from these counterparties in respect of derivative contracts was £nil in the form of cash.

Collateral pledged to these counterparties in respect of derivative contracts was £nil in the form of cash.

Derivative transaction costs		1		—	
Total transaction costs		3		10	
Total transaction costs as a % of average net assets		0.01%		0.05%	

The above analysis covers any direct transaction costs suffered by the Sub-fund during the period. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

Separately identifiable direct transaction costs (commissions & taxes etc) are attributable to the Sub-fund's purchase and sale of equity shares. Additionally for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

During the period the Sub-fund utilised derivative instruments. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivative positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.13%.

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date.

17 Securities lending

As at 30 June 2023, there were no investments subject to securities lending agreements.

The gross earnings and the fees for the period are £nil and £nil respectively.

Comparative Index:	25% ICE BofA Global Broad Index GBP Hedged and 75% MSCI ACWI GBP NR
Sector:	The Investment Association Volatility Managed
Key Dates: Fund Launch	7 February 2023

Investment Objective

The Sub-fund aims to achieve capital growth and potential for income over the long term (5 years or more) while being managed to a pre-defined level of risk. The Sub-fund will aim to maintain a risk profile classification of 6 from a scale of 1 (lowest) to 10 (highest) which is assessed against the risk ratings scale provided by an external third party risk rating agency.

Investment Policy

To achieve its investment objective, the Sub-fund will invest in a portfolio of UK and international securities across a broad range of asset classes. The Sub-fund may invest directly or indirectly in equities, fixed interest securities, currencies, cash, near cash, deposits, warrants, infrastructure, renewable energy, property, commodities and approved money market instruments. Exposure to these asset classes is expected to be achieved through a combination of transferable securities (such as company shares, convertible bonds, contingent convertible bonds, listed investment trusts, REITs, bonds and structured notes), collective investment schemes (which may include those managed or operated by the ACD or an associate of the ACD) and derivatives. To the extent the Sub-fund gains exposure to property and commodities, such exposure may be through exchange listed securities, other transferable securities and/or collective investment schemes.

Typically, the Sub-fund will maintain, in normal market conditions, an exposure to equities through physical and derivative exposure, of between 55%-95% of the Net Asset Value of the portfolio, which in the Investment Manager's view, is consistent with the Sub-fund's risk profile. Exposure to equities will typically include, but is not limited to, investments in company shares, listed investment trusts, REITs, equity related collective investment schemes, equity related derivative exposures and infrastructure, renewable energy or property held through equity related securities.

In order to meet the Sub-fund's investment objective, the Investment Manager will manage the portfolio using both Strategic Asset Allocation (long-term investment allocations) and Tactical Asset Allocation (shorter-term investment allocations).

Any investment in collective investment schemes will not exceed 10% of the Net Asset Value of the portfolio in aggregate. No more than 10% of the Net Asset Value of the Sub-fund will be allocated to investments in contingent convertible bonds.

Corporate and sovereign issuers eligible for investment are expected to demonstrate an ability to generate returns consistent with the Sub-fund's objective and sustainable business practices or sovereign behaviour (as applicable).

Sustainable business practices, in the context of the Sub-fund's corporate investments, are those which positively manage the material impacts of an issuer's operations and products on the environment and society.

Sustainable behaviours, in the context of the Sub-fund's sovereign investments, are those which, in the view of the Investment Manager, positively manage or demonstrate progress in respect of environmental, social and governance (ESG) factors.

All direct investments will be expected to conform to the Investment Manager's sustainability criteria, where environmental, social and governance considerations are an integral part of the criteria.

When determining whether an issuer meets the Investment Manager's sustainability criteria, the Investment Manager considers whether the issuer: (i) engages in sustainable practices in an economic sense (e.g., the issuer's strategy, operations and finances are stable and durable), and (ii) takes appropriate measures to manage any material consequences or impact of its policies and operations in relation to ESG matters (e.g., the issuer's environmental footprint, labour or human rights standards and/or board or government structure, subject to the specific nature of the investment).

The Investment Manager's sustainability criteria incorporate elements of negative screening alongside other general and issuer-level ESG-related analysis of an issuer's activities. Specifically, the Investment Manager seeks to:

- Identify and avoid issuers that participate in specific areas of activity that the Investment Manager deems to be harmful from an environmental or social perspective or which do not follow good governance practices. As an example, the Investment Manager could deem issuers that have large carbon footprints, companies with poor labour standards, or sovereign issuers with poor control of corruption ineligible for investment. The Investment Manager will exclude corporate issuers in breach of the UN Global Compact principles which include principles relating to human rights, labour, environment and anti-corruption. The Investment Manager will also exclude sovereign issuers that in the view of the Investment Manager exhibit material negative management of environmental, social or governance factors.

- Identify and invest in issuers that are proactively seeking to manage environmental and/or social factors well, which in turn should support long-term financial returns. This may also include those issuers that are contributing to the development of solutions that will contribute towards addressing environmental and/or social issues, examples of which could include more efficient or reduced use of natural resources or accessibility to healthcare. Issuers engaged in sustainable practices may also include those that have committed explicitly to improving their environmental and/or social impacts.

When determining whether an issuer meets the Investment Manager's sustainability criteria, the Investment Manager uses a combination of external and internal data, research and ratings which are qualitative and quantitative in nature.

Due to the nature of the individual investment types that the Sub-fund may invest in, the Investment Manager may employ different processes and techniques in its assessment. For example, the process through which the Investment Manager assesses corporate investments may be different to and use different inputs to the approach used for sovereign investments.

Annual Report & Accounts - BNY Mellon FutureLegacy 6 Fund

Fund Report

(continued)

There may be situations where the Sub-fund will invest in an issuer that has been identified as having involvement in potentially harmful activities from an environmental or social perspective. In the case of corporate investments, this may arise for certain issuers whose activities or operations, typically due to a legacy business mix, may have historically created poor environmental or social outcomes, but that are now investing in and positively adapting to future needs (for example, this may include energy companies that are preparing for a transition to a lower carbon world). In the case of sovereign investments, this may arise in respect of issuers that may be demonstrating an improvement in their overall sustainability profile.

Similarly, in some instances, the Sub-fund may invest in a corporate issuer where the Investment Manager determines through engagement with the issuer that prevailing ESG information and data provided by external ESG ratings providers have not fully captured positive environmental or social initiatives of the issuer.

For the avoidance of doubt, cash and liquid near cash assets, money market funds, derivatives and certain types of structured notes (e.g. alternative risk premia strategies, hereafter referred to as 'ARP' strategies) are not required to meet the Investment Manager's sustainability criteria.

The Sub-fund may invest more than 35% of its Net Asset Value in government and public securities issued or guaranteed by a single state, local authority or public international body. In extreme market conditions, the Sub-fund may invest significantly in cash and cash-like securities. Subject to FCA regulations, the relative exposure between these asset classes will be actively managed and will be varied as deemed necessary in order to achieve the investment objective. This may result in the Sub-fund having no exposure to particular asset classes. The Sub-fund may invest in any geographic or economic sectors of the world, including emerging markets.

Derivatives may be used with a view to generating investment returns in pursuit of the Sub-fund's investment objective, and for efficient portfolio management. Derivatives employed for investment purposes are expected to be used regularly and would typically be simple in nature, whilst seeking to remain within the parameters of the overall targeted risk profile of the Sub-fund.

The Investment Manager may use ARP strategies, to implement the investment strategy. ARP strategies seek to gain exposure to risk premia (the return or reward an investor earns to bear risk) that would not usually be directly accessible through traditional investment instruments (for example, by investing directly in equities or bonds).

ARP strategies are typically accessed through systematic, rules-based approaches which often use quantitative techniques and can be implemented through a range of instruments (including structured notes, derivative instruments and collective investment schemes).

No more than 8.5% of the Net Asset Value of the Sub-fund will be allocated to gaining exposure to ARP strategies.

Portfolio Summary

From the Sub-fund's launch on 7 February 2023 to 30 June 2023, the Institutional Shares W (Accumulation) share class of the Sub-fund returned -0.25%, net of fees, compared with -0.33% for the BNY Mellon FutureLegacy 6 Benchmark Index. The Sub-fund generated a negative return but outperformed its benchmark.

The Sub-fund is an actively managed, multi-asset fund designed to identify and invest in fundamentally strong, sustainable securities. Managed to a predefined level of risk, the Sub-fund will aim to maintain a risk profile classification of 6 from a scale of 1 (lowest) to 10 (highest) which is assessed against the risk ratings scale provided by an external third party risk rating agency.

The Sub-fund aims to be invested 75% in equities, with the remainder in bonds, both high yield and investment grade. The Sub-fund's holdings include companies and sovereign issuers that meet the manager's sustainability criteria, of which environmental, social and corporate governance considerations are an integral part.

The Sub-fund invests in international markets, which means it is exposed to changes in currency rates. However, the manager believes this high level of diversification is an asset, helping investors to achieve capital growth and align with their sustainability goals over the long term.

13 Related parties

As at 30 June 2023, there was one investor holding more than 75% of the voting shares in issue. BNY Mellon Investment Management Seed held 99.99% of the total voting shares in issue and is therefore regarded as a related party. As at the balance sheet date there were no outstanding balances payable or receivable from the investor.

ACD's periodic charge, registrations and expense charge, safe custody charges and activity charges paid to the ACD, BNY Mellon Fund Managers Limited, or its associates, are shown in Notes 3 and 5, and details of shares issued and cancelled by the ACD are shown in the Statement of Change in Net Assets Attributable to Shareholders and Note 8.

The balance due to the ACD at 30 June 2023 in respect of these transactions was £8,110.

Any investments in or transactions with other BNYM related party entities are individually identified in the portfolio statement and the Securities Lending note respectively.

14 Financial instruments

The risk factors relating to the Sub-fund are discussed more fully in Note 2 of the notes applicable to the financial statements of all the Sub-funds on pages 11 to 14.

Market Price Risk

The Sub-fund uses Value at Risk (VaR) to calculate the likelihood of the Sub-fund (including derivatives) falling in value by more than a particular level.

Under normal market conditions, VaR captures the potential fall in the value of the portfolio over a given holding period and to a given level of statistical confidence.

Market Price Risk (continued)

VaR is discussed in more detail, with the relevant disclosures for the financial year, in the notes applicable to the financial statements of all Sub-funds on page 12.

Valuation of financial instruments

The categorisation of financial instruments in the tables below reflect the methodology used to measure their fair value.

	30/06/2023 Assets £	30/06/2023 Liabilities £
Level 1: Quoted prices	15,224,998	(1,928)
Level 2: Observable market data	4,362,927	(20,372)
Level 3: Unobservable data	—	—
	19,587,925	(22,300)

Level 1: Unadjusted quoted price in an active market for an identical instrument.

Level 2: Valuation techniques using observable inputs other than quoted prices within Level 1.

Level 3: Valuation techniques using unobservable inputs.

Derivative risk

The Sub-fund may enter into derivative transactions in the pursuit of its investment objective. Further details about the scope of the Sub-fund's derivative usage can be found in the Prospectus.

Derivatives may be used for efficient portfolio management only.

Counterparty credit risk

Counterparty exposure for non-exchange traded derivatives at 30 June 2023 is as follows:

Counterparty	Forward Currency Contracts £	Total £
Canadian Imperial Bank of Commerce	1,249	1,249
Citigroup Global Markets Limited	2,591	2,591
State Street Global Advisors Limited	26,880	26,880
UBS	(10,696)	(10,696)
Total	20,024	20,024

Counterparty exposure has not been disclosed for exchange traded derivatives as the exchange requirements in respect of collateral mean that, in the opinion of the ACD, the counterparty risk is mitigated.

Collateral received from these counterparties in respect of derivative contracts was £nil in the form of cash.

Collateral pledged to these counterparties in respect of derivative contracts was £nil in the form of cash.

Total sales net of transaction costs	3,077				

Total transaction costs 3 12

Total transaction costs as a % of average net assets 0.02% 0.06%

The above analysis covers any direct transaction costs suffered by the Sub-fund during the period. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

Separately identifiable direct transaction costs (commissions & taxes etc) are attributable to the Sub-fund's purchase and sale of equity shares. Additionally for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

During the period the Sub-fund utilised derivative instruments. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivative positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.09%.

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date.

17 Securities lending

As at 30 June 2023, there were no investments subject to securities lending agreements.

The gross earnings and the fees for the period are £nil and £nil respectively.

General Information

Investment Adviser:	Newton Investment Management Limited
Fund Size:	£19.85m
Comparative Index:	10% BAML Global Broad Index GBP Hedged and 90% MSCI ACWI GBP NR
Sector:	The Investment Association Volatility Managed
Key Dates: Fund Launch	7 February 2023

Investment Objective

The Sub-fund aims to achieve capital growth and potential for income over the long term (5 years or more) while being managed to a pre-defined level of risk. The Sub-fund will aim to maintain a risk profile classification of 7 from a scale of 1 (lowest) to 10 (highest) which is assessed against the risk ratings scale provided by an external third party risk rating agency.

Investment Policy

To achieve its investment objective, the Sub-fund will invest in a portfolio of UK and international securities across a broad range of asset classes. The Sub-fund may invest directly or indirectly in equities, fixed interest securities, currencies, cash, near cash, deposits, warrants, infrastructure, renewable energy, property, commodities and approved money market instruments. Exposure to these asset classes is expected to be achieved through a combination of transferable securities (such as company shares, convertible bonds, contingent convertible bonds, listed investment trusts, REITs, bonds and structured notes), collective investment schemes (which may include those managed or operated by the ACD or an associate of the ACD) and derivatives. To the extent the Sub-fund gains exposure to property and commodities, such exposure may be through exchange listed securities, other transferable securities and/or collective investment schemes.

Typically, the Sub-fund will maintain, in normal market conditions, an exposure of between 70%-100% of the Net Asset Value of the portfolio to equities through physical and derivative exposure, which in the Investment Manager's view, is consistent with the Sub-fund's risk profile. Exposure to equities will typically include, but is not limited to, investments in company shares, listed investment trusts, REITs, equity related collective investment schemes, equity related derivative exposures and infrastructure, renewable energy or property held through equity related securities.

In order to meet the Sub-fund's investment objective, the Investment Manager will manage the portfolio using both Strategic Asset Allocation (long-term investment allocations) and Tactical Asset Allocation (shorter-term investment allocations).

Any investment in collective investment schemes will not exceed 10% of the Net Asset Value of the portfolio in aggregate. No more than 10% of the Net Asset Value of the Sub-fund will be allocated to investments in contingent convertible bonds.

Corporate and sovereign issuers eligible for investment are expected to demonstrate an ability to generate returns consistent with the Sub-fund's objective and sustainable business practices or sovereign behaviour (as applicable).

Sustainable business practices, in the context of the Sub-fund's corporate investments, are those which positively manage the material impacts of an issuer's operations and products on the environment and society.

Sustainable behaviours, in the context of the Sub-fund's sovereign investments, are those which, in the view of the Investment Manager, positively manage or demonstrate progress in respect of environmental, social and governance (ESG) factors.

All direct investments will be expected to conform to the Investment Manager's sustainability criteria, where environmental, social and governance considerations are an integral part of the criteria.

When determining whether an issuer meets the Investment Manager's sustainability criteria, the Investment Manager considers whether the issuer: (i) engages in sustainable practices in an economic sense (e.g., the issuer's strategy, operations and finances are stable and durable), and (ii) takes appropriate measures to manage any material consequences or impact of its policies and operations in relation to ESG matters (e.g., the issuer's environmental footprint, labour or human rights standards and/or board or government structure, subject to the specific nature of the investment).

The Investment Manager's sustainability criteria incorporate elements of negative screening alongside other general and issuer-level ESG-related analysis of an issuer's activities. Specifically, the Investment Manager seeks to:

- Identify and avoid issuers that participate in specific areas of activity that the Investment Manager deems to be harmful from an environmental or social perspective or which do not follow good governance practices. As an example, the Investment Manager could deem issuers that have large carbon footprints, companies with poor labour standards, or sovereign issuers with poor control of corruption ineligible for investment. The Investment Manager will exclude corporate issuers in breach of the UN Global Compact principles which include principles relating to human rights, labour, environment and anti-corruption. The Investment Manager will also exclude sovereign issuers that in the view of the Investment Manager exhibit material negative management of environmental, social or governance factors.

- Identify and invest in issuers that are proactively seeking to manage environmental and/or social factors well, which in turn should support long-term financial returns. This may also include those issuers that are contributing to the development of solutions that will contribute towards addressing environmental and/or social issues, examples of which could include more efficient or reduced use of natural resources or accessibility to healthcare. Issuers engaged in sustainable practices may also include those that have committed explicitly to improving their environmental and/or social impacts.

When determining whether an issuer meets the Investment Manager's sustainability criteria, the Investment Manager uses a combination of external and internal data, research and ratings which are qualitative and quantitative in nature.

Due to the nature of the individual investment types that the Sub-fund may invest in, the Investment Manager may employ different processes and techniques in its assessment. For example, the process through which the Investment Manager assesses corporate investments may be different to and use different inputs to the approach used for sovereign investments.

Annual Report & Accounts - BNY Mellon FutureLegacy 7 Fund

Fund Report

(continued)

There may be situations where the Sub-fund will invest in an issuer that has been identified as having involvement in potentially harmful activities from an environmental or social perspective. In the case of corporate investments, this may arise for certain issuers whose activities or operations, typically due to a legacy business mix, may have historically created poor environmental or social outcomes, but that are now investing in and positively adapting to future needs (for example, this may include energy companies that are preparing for a transition to a lower carbon world). In the case of sovereign investments, this may arise in respect of issuers that may be demonstrating an improvement in their overall sustainability profile.

Similarly, in some instances, the Sub-fund may invest in a corporate issuer where the Investment Manager determines through engagement with the issuer that prevailing ESG information and data provided by external ESG ratings providers have not fully captured positive environmental or social initiatives of the issuer.

For the avoidance of doubt, cash and liquid near cash assets, money market funds, derivatives and certain types of structured notes (e.g. alternative risk premia strategies, hereafter referred to as 'ARP' strategies) are not required to meet the Investment Manager's sustainability criteria.

The Sub-fund may invest more than 35% of its Net Asset Value in government and public securities issued or guaranteed by a single state, local authority or public international body. In extreme market conditions, the Sub-fund may invest significantly in cash and cash-like securities. Subject to FCA regulations, the relative exposure between these asset classes will be actively managed and will be varied as deemed necessary in order to achieve the investment objective. This may result in the Sub-fund having no exposure to particular asset classes. The Sub-fund may invest in any geographic or economic sectors of the world, including emerging markets.

Derivatives may be used with a view to generating investment returns in pursuit of the Sub-fund's investment objective, and for efficient portfolio management. Derivatives employed for investment purposes are expected to be used regularly and would typically be simple in nature, whilst seeking to remain within the parameters of the overall targeted risk profile of the Sub-fund.

The Investment Manager may use ARP strategies, to implement the investment strategy. ARP strategies seek to gain exposure to risk premia (the return or reward an investor earns to bear risk) that would not usually be directly accessible through traditional investment instruments (for example, by investing directly in equities or bonds).

ARP strategies are typically accessed through systematic, rules-based approaches which often use quantitative techniques and can be implemented through a range of instruments (including structured notes, derivative instruments and collective investment schemes).

No more than 8.5% of the Net Asset Value of the Sub-fund will be allocated to gaining exposure to ARP strategies.

Portfolio Summary

From the Sub-fund's launch on 7 February 2023 to 30 June 2023, the Institutional Shares W (Accumulation) share class of the Sub-fund returned -0.58%, net of fees, compared with -0.45% for the benchmark a composite index, comprising 10% BAML ICE Global Broad Index GBP Hedged and 90% MSCI ACWI GBP NR. The Sub-fund generated a negative return and underperformed its benchmark.

The Sub-fund is an actively managed, multi-asset fund designed to identify and invest in fundamentally strong, sustainable securities. Managed to a predefined level of risk, the Sub-fund will aim to maintain a risk profile classification of 7 from a scale of 1 (lowest) to 10 (highest) which is assessed against the risk ratings scale provided by an external third party risk rating agency. Typically, the Sub-fund will maintain, in normal market conditions, an exposure of between 70%-100% of the of the Sub-fund to equities through physical and derivative exposure, which in the Manager's view, is consistent with the Sub-fund's risk profile. The Sub-fund's holdings include companies and sovereign issuers that meet the manager's sustainability criteria, of which environmental, social and corporate governance considerations are an integral part.

The Sub-fund invests in international markets, which means it is exposed to changes in currency rates. However, the manager believes this high level of diversification is an asset, which should help investors to achieve capital growth and align with their sustainability goals over the long term.

13 Related parties

As at 30 June 2023, there was one investor holding more than 75% of the voting shares in issue. BNY Mellon Investment Management Seed held 99.98% of the total voting shares in issue and is therefore regarded as a related party. As at the balance sheet date there were no outstanding balances payable or receivable from the investor.

ACD's periodic charge, registrations and expense charge, safe custody charges and activity charges paid to the ACD, BNY Mellon Fund Managers Limited, or its associates, are shown in Notes 3 and 5, and details of shares issued and cancelled by the ACD are shown in the Statement of Change in Net Assets Attributable to Shareholders and Note 8.

The balance due to the ACD at 30 June 2023 in respect of these transactions was £8,404.

Any investments in or transactions with other BNYM related party entities are individually identified in the portfolio statement and the Securities Lending note respectively.

14 Financial instruments

The risk factors relating to the Sub-fund are discussed more fully in Note 2 of the notes applicable to the financial statements of all the Sub-funds on pages 11 to 14.

Market Price Risk

The Sub-fund uses Value at Risk (VaR) to calculate the likelihood of the Sub-fund (including derivatives) falling in value by more than a particular level.

Under normal market conditions, VaR captures the potential fall in the value of the portfolio over a given holding period and to a given level of statistical confidence.

VaR is discussed in more detail, with the relevant disclosures for the financial year, in the notes applicable to the financial statements of all Sub-funds on page 12.

Level 2: Valuation techniques using observable inputs other than quoted prices within Level 1.

Level 3: Valuation techniques using unobservable inputs.

Derivative risk

The Sub-fund may enter into derivative transactions in the pursuit of its investment objective. Further details about the scope of the Sub-fund's derivative usage can be found in the Prospectus.

Derivatives may be used for efficient portfolio management only.

Counterparty credit risk

Counterparty exposure for non-exchange traded derivatives at 30 June 2023 is as follows:

Counterparty	Forward Currency Contracts £	Total £
Canadian Imperial Bank of Commerce	(70)	(70)
Citigroup Global Markets Limited	3,041	3,041
State Street Global Advisors Limited	12,782	12,782
UBS	(7,863)	(7,863)
Total	7,890	7,890

Counterparty exposure has not been disclosed for exchange traded derivatives as the exchange requirements in respect of collateral mean that, in the opinion of the ACD, the counterparty risk is mitigated.

Collateral received from these counterparties in respect of derivative contracts was £nil in the form of cash.

Collateral pledged to these counterparties in respect of derivative contracts was £nil in the form of cash.

Total transaction costs 4 14

Total transaction costs as a % of average net assets 0.02% 0.07%

The above analysis covers any direct transaction costs suffered by the Sub-fund during the period. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

Separately identifiable direct transaction costs (commissions & taxes etc) are attributable to the Sub-fund's purchase and sale of equity shares. Additionally for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.09%.

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date.

17 Securities lending

As at 30 June 2023, there were no investments subject to securities lending agreements.

The gross earnings and the fees for the period are £nil and £nil respectively.

BNY Mellon Global Absolute Return Fund

Annual Report

for the year ended 30 June 2023

Annual Report & Accounts - BNY Mellon Global Absolute Return Fund

Fund Report

for the year ended 30 June 2023

General Information

Investment Adviser:	Insight Investment Management (Global) Limited
Fund Size:	£584.33m
Comparative Index:	SONIA (90-day compounded)
Sector:	The Investment Association Targeted Absolute Return
Key Dates: Fund Launch	9 February 2013

Investment Objective

The Sub-fund seeks to deliver positive returns on an annual basis. The Sub-fund aims to deliver cash SONIA (90-day compounded) before fees on an annual basis and cash SONIA (90-day compounded) +4% per annum before fees on a rolling annualised five year basis (meaning a period of five years, no matter which day you start on). However, a positive return is not guaranteed and a capital loss may occur.

Investment Policy

The policy of the Sub-fund is to gain exposure through a dynamic allocation strategy to a range of asset classes including cash, near cash and deposits, fixed interest securities, equities, property, commodities and infrastructure. Exposure to these assets will be achieved through investment in transferable securities, derivatives, money market instruments, deposits, and collective investment schemes. Investment in property, commodities and infrastructure will be indirect. The Sub-fund may also use derivatives to obtain long and short exposures. Subject to FCA regulations, the relative exposure between these asset classes will be actively managed and will be varied as deemed necessary in order to achieve the investment objective, which may result in the Sub-fund having no exposure to particular asset classes.

The Sub-fund may invest up to 10% of its assets in collective investment schemes, including those which are managed or operated by the ACD or an associate of the ACD.

Derivatives may be used for investment purposes as well as for efficient portfolio management. An investment in derivatives may create leverage and so may result in greater fluctuations in the Net Asset Value of the Sub-fund.

The Sub-fund uses SONIA (90-day compounded) as a target set for the Sub-fund's performance to match or exceed on a rolling 12 month basis before fees. The ACD considers SONIA (90-day compounded) before fees to be an appropriate target over a 12 month period as it is representative of cash.

The Sub-fund uses SONIA (90-day compounded) +4% per annum as a target set for the Sub-fund's performance to match on a rolling annualised five year basis before fees. The ACD considers SONIA (90-day compounded) +4% per annum before fees to be an appropriate target over a rolling annualised five year basis as it is consistent with the risk taken in the Sub-fund.

Fund Report

Portfolio Summary

Over the 12-month review period, the Sub-fund's Institutional Shares W (Accumulation) share class returned 1.39%, net of fees, compared with a return of 2.69% for the SONIA (90-day compounded), both in sterling terms. The Sub-fund produced a positive return but underperformed its comparative benchmark.

It was a difficult start to the period, but risk assets recovered some ground at the end of 2022. US inflation data surprised on the downside in October and November, which allowed the Federal Reserve (Fed) to slow the pace of interest rate hikes. Moving into 2023, subsiding inflationary pressures and a reopening of the Chinese economy provided a further boost to sentiment as hope grew that the global economy would have an easier recovery than originally thought. Towards the end of the period, the Fed were believed to be close to bringing the US tightening cycle to a close.

The Sub-fund's broad equity exposures contributed to performance. The manager gradually increased aggregate equity exposure, as economic activity proved stronger than initially expected. A dividend futures positions in the US and Europe was added towards the end of the period and contributed positively.

Government bond yields rose as central banks aggressively tightened monetary policy, and, although the Sub-fund's light positioning in the first half of the period helped limit losses, government bond exposures were ultimately a notable negative. The Sub-fund's infrastructure holdings were a further negative, impacted by the turbulence created by the UK's 'mini-budget' at the end of September and the rising interest rate environment. Duration positioning and credit exposures were increased into the end of 2022, and both investment grade credit and high yield contributed positively.

Within total return strategies, positions designed to benefit from range-bound conditions in various markets made a strong positive contribution. There were further contributions from positions designed to benefit from upside breakouts in key equity markets and commodity carry trades.

Growth dynamics continue to be challenging. However, with inflation data broadly supportive and overall activity remaining robust enough to allay recession fears, the manager believes stock markets could make further gains, aided by some recovery in the index constituents that have lagged the mega-cap technology subsector. This path is not without risk. Sticky inflation or excessively robust activity would likely see rate expectations ratchet higher. The manager increased equity exposure and held credit positioning steady, as corporate balance sheet strength suggests value can be added even in an economic downturn, as long as a deep recession can be avoided. Duration exposure has remained around its historical average.

[†]The closing net asset value per share figure is based on the bid-market prices at close of business, whilst the highest/lowest share prices are based on mid dealing prices (the price at which shares are sold).

*Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there may be other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which may also have reduced the Sub-fund and share class returns before operating charges.

**The Operating Charges figure is made up of the Annual Management Charge (AMC) and other operating costs. Other operating costs include the costs for other services paid for by the Sub-fund, such as the fees paid to the Fund Accountant, Fund Administrator, Depositary, Custodian, Auditor and Regulator. The Operating Charges figure shown is calculated on an ex-post basis over the period, whereas the Ongoing Charges figure shown in the Key Investor Information Document (KIID) is a calculation as at a point in time, and therefore there could be immaterial differences between the two. The operating charges are annualised for share classes launched during the year.

ACD's periodic charge, registrations and expense charge, safe custody charges and activity charges paid to the ACD, BNY Mellon Fund Managers Limited, or its associates, are shown in Notes 3 and 5, and details of shares issued and cancelled by the ACD are shown in the Statement of Change in Net Assets Attributable to Shareholders and Note 8.

The balance due to the ACD at 30 June 2023 in respect of these transactions was £1,724,731 (30/06/2022: £374,638).

Any investments in or transactions with other BNYM related party entities are individually identified in the portfolio statement and the Securities Lending note respectively.

14 Financial instruments

The risk factors relating to the Sub-fund are discussed more fully in Note 2 of the notes applicable to the financial statements of all the Sub-funds on pages 11 to 14.

Market Price Risk

The Sub-fund uses Value at Risk (VaR) to calculate the likelihood of the Sub-fund (including derivatives) falling in value by more than a particular level.

Under normal market conditions, VaR captures the potential fall in the value of the portfolio over a given holding period and to a given level of statistical confidence.

VaR is discussed in more detail, with the relevant disclosures for the financial year, in the notes applicable to the financial statements of all Sub-funds on page 12.

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

Separately identifiable direct transaction costs (commissions & taxes etc) are attributable to the Sub-fund's purchase and sale of equity shares. Additionally for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

Notes to the Financial Statements

15 Portfolio transaction costs (continued)

For the Sub-fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However additionally there are indirect transaction costs suffered in those underlying funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

During the year the Sub-fund utilised derivative instruments. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivative positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.08% (30/06/2022: 0.11%).

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date (30/06/2022: nil).

17 Securities lending

The revenue arising from the Securities Lending Programme is currently split between the Sub-fund and The Bank of New York Mellon, London Branch in the proportion 81%:19% (30/06/2022: 81%:19%). The 19% paid to The Bank of New York Mellon, London Branch is to cover operational cost, risk and profit. The Bank of New York Mellon London Branch is a related party of the ACD as both entities are affiliates of The Bank of New York Mellon Corporation.

Collateral accepted is non-cash in the form of Sovereign debt rated AA or better from approved Governments only and Supranational debt obligations rated AAA or better, and FTSE 100 DBV (Class F10) as defined in the CREST Reference Manual and equity securities from the following indices: AEX 25 (Netherlands), CAC 40 (France), DAX 30 (Germany), Euro 50 (Eurozone), FTSE 100 (United Kingdom), Nikkei 225 (Japan), SMI 20 (Switzerland), S&P 500 (United States of America).

As at 30 June 2023, £7,177,728 of investments were subject to securities lending agreements and on behalf of the Sub-fund £7,775,783 was held in collateral. The collateral is held 61.11% in debt securities and 38.89% in equity securities.

As at 30 June 2022, £14,153,875 of investments were subject to securities lending agreements and on behalf of the Sub-fund £15,554,800 was held in collateral. The collateral was held 24.19% in debt securities and 75.81% in equity securities.

The gross earnings and the fees for the year are £67,294 (30/06/2022: £57,809) and £12,786 (30/06/2022: £10,984) respectively.

The following table details the value of securities on loan at the year end and the value of the collateral held at the year end for the Sub-fund, by counterparty.

BNY Mellon Global Dynamic Bond Fund

Annual Report

for the year ended 30 June 2023

Annual Report & Accounts - BNY Mellon Global Dynamic Bond Fund

Fund Report

for the year ended 30 June 2023

General Information

Investment Adviser:	Newton Investment Management Limited
Fund Size:	£1,071.44m
Comparative Index:	SONIA (30-day compounded) + 2%
Sector:	The Investment Association Targeted Absolute Return
Key Dates: Fund Launch	28 April 2006

Investment Objective

The objective of the Sub-fund is to maximise the total return, comprising income and capital growth. The Sub-fund is managed to seek a minimum return of cash SONIA (30-day compounded) +2% per annum over five years before fees. In doing so, it aims to achieve a positive return on a rolling three year basis (meaning a period of three years, no matter which day you start on). However, a positive return is not guaranteed and a capital loss may occur.

Investment Policy

The Investment Policy of the Sub-fund is to gain exposure, through a flexible allocation, to a broad range of predominantly (meaning at least 75% of the portfolio) fixed interest securities which may include higher yielding securities. The Sub-fund may also invest in other asset classes such as currencies, cash, near cash and deposits, warrants and approved money market instruments. Exposure to these asset classes is expected to be achieved through investment in a combination of transferable securities (such as bonds, convertible bonds, contingent convertible bonds, debentures, notes, asset backed securities and mortgage backed securities), collective investment schemes (including but not limited to another Sub-fund or Sub-funds of the Company) and derivatives.

The Sub-fund may invest in any geographic or economic sector of the world, including emerging markets.

The Sub-fund may invest more than 35% of its assets in government and public securities (those issued or guaranteed by a single state, local authority or public international body). The Sub-fund may invest in fixed income securities rated below investment grade (BBB-) by Standard & Poor's (or equivalent recognised rating agency). The Sub-fund could invest a significant portion of the portfolio in cash/cash-like securities during extreme market conditions.

Derivatives may be used with a view to generating investment returns in pursuit of the Sub-fund's investment objective, and for efficient portfolio management. It is not expected that the use of derivatives will materially affect the overall risk profile of the Sub-fund.

The Sub-fund uses Sterling cash SONIA (30-day compounded) + 2% per annum over five years before fees as a target set for the Sub-fund's performance to match or exceed. The ACD considers SONIA (30-day compounded) + 2% per annum over five years before fees to be an appropriate target because SONIA (30-day compounded) is representative of cash and the Sub-fund's investment objective is to seek a minimum return of Sterling cash +2% per annum.

Source: Lipper as at 30 June 2023 Total return, including reinvested income gross of UK tax and net of annual charges, based on net asset value. All figures are in GBP terms. The impact of an initial charge (currently not applied) can be material on the performance of your investment. Further information is available on request.

^Full 3 year performance data is not available. For share class launch and closure dates, please refer to the Statistics section on pages 274 to 282.

*Effective 1 October 2021, the benchmark changed from the London Interbank Offered Rate (LIBOR) to the Sterling Overnight Index Average (SONIA). All benchmark past performance prior to this date was calculated against LIBOR.

Past performance is not a guide to future performance. The value of investments and the revenue from them is not guaranteed and can fall as well as rise due to stock market and currency movements. When you sell your investment you may get back less than you originally invested.

Portfolio Summary

Over the 12-month review period, the Sub-fund's Sterling Income share class generated a return of 0.79%, net of fees, compared with a return of 4.99% for the SONIA (30- day compounded) +2% benchmark. The Sub-fund produced a mildly positive return behind that of its benchmark.

The Sub-fund's government bond holdings detracted from returns in aggregate. Longer-dated US Treasuries, as well as a mix of European bonds (notably from Denmark and Spain) proved detrimental as yield curves flattened. However, profits from short positions in bond futures offset some of the losses. Investment grade credit detracted mildly. There were positive returns from the hybrid bonds of Volkswagen and software company Nvidia, but these were partially offset by modest losses on Additional Tier 1 (AT1) holdings in ING and an Asian high yield bond fund. Active currency positioning delivered a negative return, with the Sub-fund sustaining losses on a long position in the Japanese yen. Currency hedging back into sterling, however, was a positive factor.

Conversely, exposure to local currency emerging market bonds benefited returns. This was particularly true of the Sub-fund's holdings in Colombia, as well as exposure to Mexico, Brazil, El Salvador and the Bahamas. However, Bolivian government bonds produced negative returns. High yield credit generated a small contribution to returns, as losses on holdings of Barclays AT1 bonds and Shimao property bonds were more than offset by gains made on other holdings.

Regarding portfolio activity, the duration of the Sub-fund (which measures its sensitivity to interest rates) was steadily increased, predominately by adding longer-dated US Treasuries, European and Australian government bonds, and US Treasury Inflation-Protected Securities. In local currency emerging markets, purchases were made in Peruvian, Mexican and Colombian bonds, and exposure to Brazil was increased. Exposure to hard currency bonds fell as the manager sold holdings in Peruvian and Bolivian bonds. In investment grade credit, bonds issued by Dollar General, Lowes, Hiscox and Orsted were purchased in the first half of the period; Nvidia and Ashtead Capital were purchased in the second half. The manager also added a number of highly rated sterling covered bonds, such as Lloyds and the Commonwealth of Australia.

Sales over the period included energy company Drax and American Express. The Sub-fund's weighting in high yield credit was reduced as the outlook for economic growth and liquidity deteriorated. A number of bonds were sold, including PG&E, Ardagh Metal Packaging, Iceland, Ocado and Callon Petroleum. In currencies, a long euro position and a short US dollar position were established, although much of the long euro position was closed out later in the period. Mexican and Uruguayan peso exposure was increased, while the Philippine peso was shorted. The manager also introduced Australian dollar and Czech koruna long positions late in the period.

The manager believes that economic growth will suffer and inflation will cool in the second half of 2023 as the impact of monetary policy tightening is felt. Against this backdrop, the Sub-fund remains biased toward government bond exposure and continues to maintain a low weighting in high yield bonds. The manager is partial to emerging market currencies in countries where central banks have been proactive in addressing inflation.

Shareholders should note that additionally there may be other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which may also have reduced the Sub-fund and share class returns before operating charges.

**The Operating Charges figure is made up of the Annual Management Charge (AMC) and other operating costs. Other operating costs include the costs for other services paid for by the Sub-fund, such as the fees paid to the Fund Accountant, Fund Administrator, Depositary, Custodian, Auditor and Regulator. The Operating Charges figure shown is calculated on an ex-post basis over the period, whereas the Ongoing Charges figure shown in the Key Investor Information Document (KIID) is a calculation as at a point in time, and therefore there could be immaterial differences between the two. The operating charges are annualised for share classes launched during the year.

*Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there may be other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which may also have reduced the Sub-fund and share class returns before operating charges.

**The Operating Charges figure is made up of the Annual Management Charge (AMC) and other operating costs. Other operating costs include the costs for other services paid for by the Sub-fund, such as the fees paid to the Fund Accountant, Fund Administrator, Depositary, Custodian, Auditor and Regulator. The Operating Charges figure shown is calculated on an ex-post basis over the period, whereas the Ongoing Charges figure shown in the Key Investor Information Document (KIID) is a calculation as at a point in time, and therefore there could be immaterial differences between the two. The operating charges are annualised for share classes launched during the year.

***Share class launched on 24 June 2022.

13 Related parties

ACD's periodic charge, registrations and expense charge, safe custody charges and activity charges paid to the ACD, BNY Mellon Fund Managers Limited, or its associates, are shown in Notes 3 and 5, and details of shares issued and cancelled by the ACD are shown in the Statement of Change in Net Assets Attributable to Shareholders and Note 8.

The balance due to the ACD at 30 June 2023 in respect of these transactions was £6,190,871 (30/06/2022: £7,025,298).

Any investments in or transactions with other BNYM related party entities are individually identified in the portfolio statement and the Securities Lending note respectively.

14 Financial instruments

The risk factors relating to the Sub-fund are discussed more fully in Note 2 of the notes applicable to the financial statements of all the Sub-funds on pages 11 to 14.

Market Price Risk

The Sub-fund uses Value at Risk (VaR) to calculate the likelihood of the Sub-fund (including derivatives) falling in value by more than a particular level.

Under normal market conditions, VaR captures the potential fall in the value of the portfolio over a given holding period and to a given level of statistical confidence.

VaR is discussed in more detail, with the relevant disclosures for the financial year, in the notes applicable to the financial statements of all Sub-funds on page 12.

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

For the Sub-fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

For the Sub-fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However additionally there are indirect transaction costs suffered in those underlying funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

During the year the Sub-fund utilised derivative instruments. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivative positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

15 Portfolio transaction costs (continued)

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.30% (30/06/2022: 0.39%).

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date (30/06/2022: nil).

17 Securities lending

The revenue arising from the Securities Lending Programme is currently split between the Sub-fund and The Bank of New York Mellon, London Branch in the proportion 81%:19% (30/06/2022: 81%:19%). The 19% paid to The Bank of New York Mellon, London Branch is to cover operational cost, risk and profit. The Bank of New York Mellon London Branch is a related party of the ACD as both entities are affiliates of The Bank of New York Mellon Corporation.

Collateral accepted is non-cash in the form of Sovereign debt rated AA or better from approved Governments only and Supranational debt obligations rated AAA or better, and FTSE 100 DBV (Class F10) as defined in the CREST Reference Manual and equity securities from the following indices: AEX 25 (Netherlands), CAC 40 (France), DAX 30 (Germany), Euro 50 (Eurozone), FTSE 100 (United Kingdom), Nikkei 225 (Japan), SMI 20 (Switzerland), S&P 500 (United States of America).

As at 30 June 2023, £69,047,833 of investments were subject to securities lending agreements and on behalf of the Sub-fund £72,731,939 was held in collateral. The collateral is held 72.45% in debt securities and 27.55% in equity securities.

As at 30 June 2022, £85,326,214 of investments were subject to securities lending agreements and on behalf of the Sub-fund £91,866,444 was held in collateral. The collateral was held 46.69% in debt securities, 53.31% in equity securities and 0.00% in cash.

The gross earnings and the fees for the year are £119,762 (30/06/2022: £189,960) and £22,755 (30/06/2022: £36,092) respectively.

The following table details the value of securities on loan at the year end and the value of the collateral held at the year end for the Sub-fund, by counterparty.

General Information

Investment Adviser: Newton Investment Management Limited
Fund Size: £53.29m
Sector: The Investment Association Strategic Bond

Key Dates: Fund Launch 9 May 2016

Investment Objective

The Sub-fund aims to achieve income over the medium term (3-5 years).

Investment Policy

The Sub-fund is actively managed and invests at least 70% of the portfolio in global fixed income securities (bonds) issued by governments, companies and other public entities.

The Sub-fund may also invest in property, commodities, deposits, cash and near cash. Exposure to these asset classes will be achieved through investment in transferable securities (such as bonds, convertible bonds, contingent convertible bonds), money market instruments, warrants, derivatives (including but not limited to currency-related derivatives) and collective investment schemes (including but not limited to another Sub-fund or Sub-funds of the Company or other BNY Mellon funds). To the extent the Sub-fund gains exposure to property and commodities such exposure may be through exchange listed securities, other transferable securities and/or collective investment schemes.

The Sub-fund may also hold high levels of cash and liquid near cash assets (such as, but not limited to, high quality bonds which are close to maturing) during extreme market conditions.

The Sub-fund may invest more than 35% of its assets in government and public securities issued or guaranteed by a single state, local authority or public international body).

The Sub-fund may invest in bonds that are rated below investment grade (BBB-) as rated by Standard & Poor's (or equivalent recognised rating agency).

The Sub-fund may invest in any geographic or economic sector, including emerging markets.

Derivatives may be used for investment purposes as well as for efficient portfolio management and hedging. It is not expected that the use of derivatives will materially affect the overall risk profile of the Sub-fund.

Portfolio Summary

Over the 12-month period under review, the Institutional Shares W (Income) share class of the Sub-fund generated a return of 2.23%. The Sub-fund will not measure its performance against a benchmark because it is not possible to state a comparator that will be relevant at all times.

While the Sub-fund produced positive returns from its holdings in high yield and emerging market bonds, as well as its derivative instruments, this was outweighed by negative returns from its government bond holdings. Government bond holdings detracted from returns in aggregate, notably longer-dated US Treasuries, as well as a mix of European bonds (notably those from Denmark and Spain), especially as yield curves flattened. However, profits from short positions in bond futures offset some of the losses. Investment grade credit proved a mild detractor. There were positive returns from software company Nvidia, but these were offset by modest losses on Additional Tier 1 (AT1) holdings in ING, BNP Paribas and two UK building societies. Active currency positioning delivered a negative return, with notable losses on a long position in the Japanese yen, which outweighed gains on certain emerging market currencies. Currency hedging back into sterling, however, was a positive factor.

Conversely, exposure to local currency emerging market bonds contributed to returns. This was particularly the case from the Sub-fund's holdings in Colombia, as well as exposure to Mexico, Brazil, El Salvador and the Bahamas. However, Bolivian government bonds produced negative returns. High yield credit also produced positive returns; losses on holdings of Barclays, Lloyds, Investec AT1 bonds and Shimao property bonds were more than offset by gains made on other holdings.

Regarding portfolio activity, the duration of the Sub-fund (which measures its sensitivity to interest rates) was steadily increased, predominately by adding longer-dated US Treasuries, European and Australian government bonds, and US Treasury Inflation-Protected Securities. In local currency emerging markets, purchases were made in Peruvian, Mexican and Colombian bonds, and exposure to Brazil was increased. Exposure to hard currency bonds fell as the manager sold holdings of Peruvian and Bolivian bonds. In investment grade credit, covered bonds issued by Lloyds and Nationwide were added late in the period. The Sub-fund's weighting in high yield credit was reduced as the outlook for economic growth and liquidity deteriorated. In currencies, a long euro position and a short US dollar position were established, although much of the long euro position was closed later in the period. Mexican and Uruguayan peso exposure was increased, while the Philippine peso was shorted. The manager also introduced Australian dollar and Czech koruna long positions late in the period.

The manager believes that economic growth will suffer and inflation will cool in the second half of 2023 as the impact of monetary policy tightening is felt. The manager expects higher-quality government and investment grade bonds to outperform high yield bonds and has positioned the Sub-fund to reflect this.

Shareholders should note that additionally there may be other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which may also have reduced the Sub-fund and share class returns before operating charges.

**The Operating Charges figure is made up of the Annual Management Charge (AMC) and other operating costs. Other operating costs include the costs for other services paid for by the Sub-fund, such as the fees paid to the Fund Accountant, Fund Administrator, Depositary, Custodian, Auditor and Regulator. The Operating Charges figure shown is calculated on an ex-post basis over the period, whereas the Ongoing Charges figure shown in the Key Investor Information Document (KIID) is a calculation as at a point in time, and therefore there could be immaterial differences between the two. The operating charges are annualised for share classes launched during the year.

[†]The closing net asset value per share figure is based on the bid-market prices at close of business, whilst the highest/lowest share prices are based on mid dealing prices (the price at which shares are sold).

*Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there may be other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which may also have reduced the Sub-fund and share class returns before operating charges.

**The Operating Charges figure is made up of the Annual Management Charge (AMC) and other operating costs. Other operating costs include the costs for other services paid for by the Sub-fund, such as the fees paid to the Fund Accountant, Fund Administrator, Depositary, Custodian, Auditor and Regulator. The Operating Charges figure shown is calculated on an ex-post basis over the period, whereas the Ongoing Charges figure shown in the Key Investor Information Document (KIID) is a calculation as at a point in time, and therefore there could be immaterial differences between the two. The operating charges are annualised for share classes launched during the year.

The balance due to the ACD at 30 June 2023 in respect of these transactions was £152,390 (30/06/2022: The balance due from the ACD was £28,451).

Any investments in or transactions with other BNYM related party entities are individually identified in the portfolio statement and the Securities Lending note respectively.

14 Financial instruments

The risk factors relating to the Sub-fund are discussed more fully in Note 2 of the notes applicable to the financial statements of all the Sub-funds on pages 11 to 14.

Market Price Risk

The Sub-fund uses Value at Risk (VaR) to calculate the likelihood of the Sub-fund (including derivatives) falling in value by more than a particular level.

Under normal market conditions, VaR captures the potential fall in the value of the portfolio over a given holding period and to a given level of statistical confidence.

VaR is discussed in more detail, with the relevant disclosures for the financial year, in the notes applicable to the financial statements of all Sub-funds on page 12.

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

For the Sub-fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

For the Sub-fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However additionally there are indirect transaction costs suffered in those underlying funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

During the year the Sub-fund utilised derivative instruments. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivative positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

15 Portfolio transaction costs (continued)

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.46% (30/06/2022: 0.63%).

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date (30/06/2022: nil).

17 Securities lending

The revenue arising from the Securities Lending Programme is currently split between the Sub-fund and The Bank of New York Mellon, London Branch in the proportion 81%:19% (30/06/2022: 81%:19%). The 19% paid to The Bank of New York Mellon, London Branch is to cover operational cost, risk and profit. The Bank of New York Mellon London Branch is a related party of the ACD as both entities are affiliates of The Bank of New York Mellon Corporation.

Collateral accepted is non-cash in the form of Sovereign debt rated AA or better from approved Governments only and Supranational debt obligations rated AAA or better, and FTSE 100 DBV (Class F10) as defined in the CREST Reference Manual and equity securities from the following indices: AEX 25 (Netherlands), CAC 40 (France), DAX 30 (Germany), Euro 50 (Eurozone), FTSE 100 (United Kingdom), Nikkei 225 (Japan), SMI 20 (Switzerland), S&P 500 (United States of America).

As at 30 June 2023, £1,382,250 of investments were subject to securities lending agreements and on behalf of the Sub-fund £1,424,982 was held in collateral. The collateral is held 99.93% in debt securities and 0.07% in equity securities.

As at 30 June 2022, £2,530,819 of investments were subject to securities lending agreements and on behalf of the Sub-fund £2,664,027 was held in collateral. The collateral was held 99.99% in debt securities, 0.00% in equity securities and 0.01% in cash.

The gross earnings and the fees for the year are £9,219 (30/06/2022: £9,135) and £1,752 (30/06/2022: £1,736) respectively.

The following table details the value of securities on loan at the year end and the value of the collateral held at the year end for the Sub-fund, by counterparty.

Investment Adviser:	Newton Investment Management Limited
Fund Size:	£258.21m
Comparative Index:	MSCI Emerging Markets NR
Sector:	The Investment Association Global Emerging Markets
Key Dates: Fund Launch	27 July 2015

Investment Objective

The Sub-fund aims to achieve capital growth over the long term (5 years or more).

Investment Policy

The Sub-fund is actively managed and invests at least 75% of the portfolio in equity (company shares) and equity-related securities (these may include, but are not limited to, ETFs, REITs, P Notes and convertible bonds).

The Sub-fund will invest at least 75% of the portfolio in companies listed, traded, located or deriving at least half of their revenue or income from emerging market countries across the world. Emerging market countries are countries, which are progressing towards becoming advanced, usually displayed by some development in financial markets, the existence of some form of stock exchange and a regulatory body.

The Sub-fund will follow the Investment Manager's opportunities investment approach. This means that the Sub-fund invests in the highest conviction investment opportunities (i.e. companies) that the Investment Manager identifies through its investment process.

The Sub-fund may also invest in other transferable securities, collective investment schemes (including but not limited to another Sub-fund or Sub-funds of the Company or BNY Mellon funds), money market instruments, deposits, cash and near cash.

Any use of derivatives will be for efficient portfolio management purposes and hedging only. It is not expected that the use of derivatives will materially affect the overall risk profile of the Sub-fund.

Portfolio Summary

Over the 12-month review period, the Sub-fund's Sterling Income share class generated a return of 0.91%, net of fees, compared with a return of -2.80% for the MSCI Emerging Markets Index NR. The Sub-fund produced a positive return and outperformed its benchmark. Stock selection was the key driver of the Sub-fund's positive relative returns.

At the stock level, semiconductor production equipment manufacturer ASML was boosted by investor confidence in its long-term growth and returns outlook, as well as positive earnings momentum. Automatic test equipment manufacturer Advantest was a strong performer, as it rode a wave of positive sentiment after US chipmaker NVIDIA released guidance that hugely exceeded market expectations. India's HDFC Bank performed well owing to strength in its consumer lending business, which has led to robust earnings growth. Indian jeweller Titan and Brazilian investment company XP also notably contributed.

On the negative side, LONGi Green Energy Technology was a major detractor, owing to concerns about intensifying competition as solar photovoltaic wafer industry capacity continues to expand. Chinese battery maker Wuxi Lead Intelligent Equipment underperformed as investors considered the resilience of orders in a recessionary environment coupled with demand challenges for electric vehicles. China's Meituan fell on concerns about increased competition as news reports suggested that competitor Douyin would be rolling out its food delivery service.

In the first half of the review period, major purchases included Bank Mandiri Persero IDR, ICICI Bank and Raia Drogasil. In 2023, a stake was taken in Sona BLW Precision Forgings, a leading Indian manufacturer of precision-forged auto components. The manager believes the company boasts an engineering and technological advantage that surpasses its peers and thinks it could be a beneficiary of the growth in demand for two- and four-wheel electric vehicles. ASM International (ASMI), which is a market leader in atomic layer deposition (ALD), a type of wafer process equipment, was established as a position. ASMI boasts a leading global market share in ALD. Its customers include logic foundries and memory manufacturers. Bank Rakyat Indonesia Persero IDR, a large Indonesian bank with a focus on microfinance lending, was a further addition. The bank has a strong competitive advantage that should help it to earn superior returns on invested capital.

The Sub-fund's holding in Tencent Music Entertainment was sold, as there are signs that its highly cash-generative social entertainment division will be under increased competitive pressure in the future. LONGi Green Energy was also sold on concerns about diminishing returns given intensifying competition. Wuxi Lead Intelligent Equipment was a further sale owing to concerns about the possibility of lower growth and lower returns given industry overcapacity.

Emerging market equities currently trade at an unusually high discount to developed markets, providing a conducive backdrop if these shorter-term variables prove favourable. The longer-term opportunities in emerging markets are based on relatively high levels of income growth, rapid increases in product penetration, and scope for industry consolidation. There currently exists a unique opportunity for emerging market companies that are exposed to reliable secular growth trends, in the manager's view.

*Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there may be other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which may also have reduced the Sub-fund and share class returns before operating charges.

**The Operating Charges figure is made up of the Annual Management Charge (AMC) and other operating costs. Other operating costs include the costs for other services paid for by the Sub-fund, such as the fees paid to the Fund Accountant, Fund Administrator, Depositary, Custodian, Auditor and Regulator. The Operating Charges figure shown is calculated on an ex-post basis over the period, whereas the Ongoing Charges figure shown in the Key Investor Information Document (KIID) is a calculation as at a point in time, and therefore there could be immaterial differences between the two. The operating charges are annualised for share classes launched during the year.

Investments held at the balance sheet date	248,825,358	212,642,496

Market Price Sensitivity

The following table illustrates the sensitivity of the return and the net assets to an increase or decrease of 5% (30/06/2022: 5%) in the fair values of the Sub-fund's investments. This level of change is considered to be reasonably possible based on observation of market conditions in the year. The sensitivity analysis is based on the impact of a change to the value of the Sub-fund's investments at each balance sheet date.

Interest rate risk

The Sub-fund does not invest in either fixed or floating rate securities and interest rate risk exposure is restricted to interest receivable on bank deposits or payable on bank overdraft positions which will be affected by fluctuations in interest rates (30/06/2022: nil).

Interest rate sensitivity

The Sub-fund does not have material exposure to interest rate risk and hence no sensitivity analysis has been presented (30/06/2022: nil).

Foreign currency risk

The table that follows details the currency profile of the Sub-fund's assets:

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

Separately identifiable direct transaction costs (commissions & taxes etc) are attributable to the Sub-fund's purchase and sale of equity shares. Additionally for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-fund's investment transactions in money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.10% (30/06/2022: 0.10%).

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date (30/06/2022: nil).

17 Securities lending

The revenue arising from the Securities Lending Programme is currently split between the Sub-fund and The Bank of New York Mellon, London Branch in the proportion 81%:19% (30/06/2022: 81%:19%). The 19% paid to The Bank of New York Mellon, London Branch is to cover operational cost, risk and profit. The Bank of New York Mellon London Branch is a related party of the ACD as both entities are affiliates of The Bank of New York Mellon Corporation.

Collateral accepted is non-cash in the form of Sovereign debt rated AA or better from approved Governments only and Supranational debt obligations rated AAA or better, and FTSE 100 DBV (Class F10) as defined in the CREST Reference Manual and equity securities from the following indices: AEX 25 (Netherlands), CAC 40 (France), DAX 30 (Germany), Euro 50 (Eurozone), FTSE 100 (United Kingdom), Nikkei 225 (Japan), SMI 20 (Switzerland), S&P 500 (United States of America).

As at 30 June 2023, there were no investments subject to securities lending agreements.

As at 30 June 2022, £568,259 of investments were subject to securities lending agreements and on behalf of the Sub-fund £625,240 was held in collateral. The collateral was held 0.00% in debt securities and 100.00% in equity securities.

The gross earnings and the fees for the year are £2,065 (30/06/2022: £1,722) and £392 (30/06/2022: £327) respectively.

Portfolio Summary

Over the 12-month review period, the Sterling Income share class of the Sub-fund generated a return of 12.69%, net of fees, compared with a return of 11.31% for the MSCI All-Country World Index NR. The Sub-fund produced a positive return and was ahead of its benchmark. Stock selection was the key driver of the Sub-fund's positive relative returns.

At the stock level, General Electric was the top-performing position over the year. The stock was supported by encouraging quarterly results that displayed positive momentum in the aerospace division. Electrical manufacturer Hubbell benefited from secular tailwinds in grid and electrification, and in the manager's view, the business is well placed to prosper through a cyclical slowdown. Semiconductor equipment manufacturer Applied Materials was another strong performer, as structural drivers in the form of artificial intelligence (AI) and higher capital expenditure intensity continued to reinforce its long-term appeal. Microsoft and NVIDIA also benefited from their exposure to the AI theme.

In terms of detractors, shares in insurer AIA suffered from broader concerns about the health of the financial sector. China's weak recovery following the relaxation of zero-Covid policies also weighed on the stock, despite some encouraging industry-level data on Hong Kong life insurance sales over the first quarter. Dollar General struggled as the impact of inflation on low-income consumers became increasingly apparent. Roche retreated as coronavirus-related revenues looked set to fall and on a series of pipeline disappointments.

In terms of portfolio activity, positions in SSE, Progressive, Darling Ingredients and Eli Lilly & Co were purchased, among others, in the first half of the period. In the second half, a stake was taken in NVIDIA, a global leader in the design of graphics processing units and AI platforms. The manager believes that NVIDIA is likely to be a key enabler of this next wave of technological development. Shares in life sciences firm Danaher were added. The market is underestimating its long-term sustainable organic growth rate, in the manager's view, and there is scope for better-than-expected margin expansion owing to positive price-cost dynamics and a superior operating culture. A position in French industrial software business Dassault Systemes was added, as it operates in attractive growth markets (aerospace and electric vehicle technology).

The position in Informa, an exhibitions business, was sold in the first half of the period owing to concerns over the economic outlook in China and the impact of rolling Covid-19 restrictions on an important market at that time. Abbott Laboratories was also sold given some concerns around the earnings power of the business after the success of its Covid-related franchise. Other major sales included Nestle, Novartis, Norfolk Southern, Deutsche Post and Volkswagen.

Navigating the policy tightrope between cooling inflation and slowing demand will require balance, and as such, the timing and extent of any economic weakness will be closely watched by investors. However, structural demand trends remain in place, notably in technology and as regards climate change, aided by government stimulus and support. The manager's focus remains on companies that appear to have more resilient long-term earnings profiles and attractive end-market outlooks.

Shareholders should note that additionally there may be other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which may also have reduced the Sub-fund and share class returns before operating charges.

**The Operating Charges figure is made up of the Annual Management Charge (AMC) and other operating costs. Other operating costs include the costs for other services paid for by the Sub-fund, such as the fees paid to the Fund Accountant, Fund Administrator, Depositary, Custodian, Auditor and Regulator. The Operating Charges figure shown is calculated on an ex-post basis over the period, whereas the Ongoing Charges figure shown in the Key Investor Information Document (KIID) is a calculation as at a point in time, and therefore there could be immaterial differences between the two. The operating charges are annualised for share classes launched during the year.

Total tax charge (see Note 6b)	2,136,205	2,787,209
b) Factors affecting the tax charge		
The tax assessed for the year is higher (30/06/2022: higher) than the standard rate of corporation tax in the UK for an ICVC (20%) (30/06/2022: 20%).		
The differences are explained below:		
Net revenue before taxation	5,637,638	8,101,792
Corporation tax @ 20%	1,127,528	1,620,358
Effects of:

ACD's periodic charge, registrations and expense charge, safe custody charges and activity charges paid to the ACD, BNY Mellon Fund Managers Limited, or its associates, are shown in Notes 3 and 5, and details of shares issued and cancelled by the ACD are shown in the Statement of Change in Net Assets Attributable to Shareholders and Note 8.

The balance due to the ACD at 30 June 2023 in respect of these transactions was £787,733 (30/06/2022: £3,921,179).

Any investments in or transactions with other BNYM related party entities are individually identified in the portfolio statement and the Securities Lending note respectively.

14 Financial instruments

The risk factors relating to the Sub-fund are discussed more fully in Note 2 of the notes applicable to the financial statements of all the Sub-funds on pages 11 to 14.

Market Price Risk

The value of the Sub-fund's investments which were exposed to market price risk was as follows:

	30/06/2023	30/06/2022
	£	£
Investments held at the balance sheet date	1,103,049,751	1,041,147,430

Market Price Sensitivity

The following table illustrates the sensitivity of the return and the net assets to an increase or decrease of 5% (30/06/2022: 5%) in the fair values of the Sub-fund's investments. This level of change is considered to be reasonably possible based on observation of market conditions in the year. The sensitivity analysis is based on the impact of a change to the value of the Sub-fund's investments at each balance sheet date.

Total transaction costs 311 434

Total transaction costs as a % of average net assets 0.02% 0.03%

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

Separately identifiable direct transaction costs (commissions & taxes etc) are attributable to the Sub-fund's purchase and sale of equity shares. Additionally for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-fund's investment transactions in money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.04% (30/06/2022: 0.07%).

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date (30/06/2022: nil).

17 Securities lending

The revenue arising from the Securities Lending Programme is currently split between the Sub-fund and The Bank of New York Mellon, London Branch in the proportion 81%:19% (30/06/2022: 81%:19%). The 19% paid to The Bank of New York Mellon, London Branch is to cover operational cost, risk and profit. The Bank of New York Mellon London Branch is a related party of the ACD as both entities are affiliates of The Bank of New York Mellon Corporation.

Collateral accepted is non-cash in the form of Sovereign debt rated AA or better from approved Governments only and Supranational debt obligations rated AAA or better, and FTSE 100 DBV (Class F10) as defined in the CREST Reference Manual and equity securities from the following indices: AEX 25 (Netherlands), CAC 40 (France), DAX 30 (Germany), Euro 50 (Eurozone), FTSE 100 (United Kingdom), Nikkei 225 (Japan), SMI 20 (Switzerland), S&P 500 (United States of America).

As at 30 June 2023, £12,632,371 of investments were subject to securities lending agreements and on behalf of the Sub-fund £13,863,500 was held in collateral. The collateral is held 90.88% in debt securities and 9.12% in equity securities.

As at 30 June 2022, £21,481,493 of investments were subject to securities lending agreements and on behalf of the Sub-fund £24,000,010 was held in collateral. The collateral was held 0.00% in debt securities and 100.00% in equity securities.

The gross earnings and the fees for the year are £42,300 (30/06/2022: £8,330) and £8,037 (30/06/2022: £1,583) respectively.

Fund Size:	£76.36m
Comparative Index:	ICE Bank of America Global High Yield ex Bank Capital & Junior Subordinated GBP (Hedged) TR
Sector:	The Investment Association £ High Yield
Key Dates: Fund Launch	2 October 2000

Investment Objective

The Sub-fund aims to achieve income over the medium term (3-5 years).

Investment Policy

The Sub-fund is actively managed and invests in a portfolio which may include but is not limited to fixed income securities (bonds, convertible bonds, contingent convertible bonds) and other debt instruments (such as floating rate notes and index-linked notes). The Sub-fund will typically invest at least 75% of the Sub-fund's portfolio in bonds rated below investment grade (BBB-) by Standard & Poor's (or equivalent recognised rating agency).

The Sub-fund may also invest in collective investment schemes (including but not limited to another Sub-fund or Sub-funds of the Company or other BNY Mellon funds), derivatives (including but not limited to currency-related derivatives), money market instruments, deposits, cash and near cash.

At least 80% of the portfolio will be in Sterling-denominated bonds or hedged back to Sterling.

The Sub-fund may invest in any geographic or economic sector of the world, including emerging markets.

Derivatives may be used for investment purposes as well as for efficient portfolio management and hedging. It is not expected that the use of derivatives will materially affect the overall risk profile of the Sub-fund.

Fund Report

Portfolio Summary

Over the 12-month period under review, the Sub-fund's Sterling Income share class generated a return of 4.58%, net of fees, versus 7.80% from the ICE Bank of America Global High Yield ex Bank Capital & Junior Subordinated (100% Hedged into sterling) TR Index, both in sterling terms. The Sub-fund produced a positive return but underperformed its comparative benchmark.

The Sub-fund's real estate holdings detracted from returns, while the holding in an Asian high yield corporate bond exchange traded fund lost ground owing to continued negative sentiment surrounding the outlook for China. Among financials, exposure to Additional Tier 1 (AT1) bonds detracted following the Swiss government-aided takeover of Credit Suisse by rival bank UBS. This led to the write-off of the former's AT1 bonds, triggering weakness throughout the AT1 subsector of the corporate bond market. While the AT1 bond market recovered during the second quarter of 2023, this proved insufficient to offset the impact of earlier weakness. Within currency markets, the Sub-fund held a long position in the US dollar, which detracted after the dollar peaked in the autumn months.

By contrast, exposure to emerging market bonds made a positive contribution. During the first half of the period, holdings in hard currency bonds from the Bahamas, Ecuador, the Dominican Republic, and El Salvador all posted strong returns. Subsequently, local currency bonds from Colombia, Brazil, Mexico and Peru performed well. Among the Sub-fund's corporate bond holdings, mining company Vedanta Resources and leather retailer Conceria Pasubio were two of the best-performing high yield securities.

In terms of activity, the new issuance market was subdued over the period. The Sub-fund participated in the new issue of Emerald Debt, issued on behalf of Copeland, an industrial manufacturing company, and a BT hybrid deal, which sits between the company's debt and equity structure. The manager also initiated new positions in technology company Entegris and energy company Civitas Resources. On the disposals side, several holdings were sold to raise cash and to take advantage of tighter spreads. The manager sold holdings in UK retailer Asda and UK public house operator Stonegate, as well as positions in several US-based shale energy producers, including Occidental Petroleum and DCP Midstream. All these bonds had been elevated to investment grade status and were therefore trading at very tight spreads. In emerging markets, the manager increased exposure to Brazil and added to local currency holdings in Mexico and Peru.

The lagged effects of higher interest rates are likely to trigger a slowdown in the world's major developed economies over the second half of 2023. Against this backdrop, the manager is cautious on the outlook for high yield bonds. While default risk remains low, as corporate balance sheets appear robust and there are no near-term debt maturities, there is a risk of recession across major developed economies. Accordingly, the manager believes that a focus on higher credit quality remains prudent and is maintaining a low weighting in CCC rated bonds and lower-rated single-B issues.

Market Price Sensitivity

The following table illustrates the sensitivity of the return and the net assets to an increase or decrease of 5% (30/06/2022: 5%) in the fair values of the Sub-fund's investments. This level of change is considered to be reasonably possible based on observation of market conditions in the year. The sensitivity analysis is based on the impact of a change to the value of the Sub-fund's investments at each balance sheet date.

Total	(202,092)	(202,092)

Counterparty exposure has not been disclosed for exchange traded derivatives as the exchange requirements in respect of collateral mean that, in the opinion of the ACD, the counterparty risk is mitigated.

Collateral received from these counterparties in respect of derivative contracts was £340,000 in the form of cash (30/06/2022: £100,000).

Collateral pledged to these counterparties in respect of derivative contracts was £nil in the form of cash (30/06/2022: £nil).

Interest rate risk

The interest rate risk profile of the Sub-fund's financial assets and liabilities at 30 June 2023 is as follows:

	Floating Rate £	Fixed Rate £	Not Carrying Interest £	Total £
Investment assets	1,552,636	65,852,516	7,703,139	75,108,291
Investment liabilities	—	—	(853,112)	(853,112)
Total	1,552,636	65,852,516	6,850,027	74,255,179

The interest rate risk profile of the Sub-fund's financial assets and liabilities at 30 June 2022 is as follows:

	Floating Rate £	Fixed Rate £	Not Carrying interest £	Total £
Investment assets	2,730,308	81,391,264	7,230,961	91,352,533

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

Separately identifiable direct transaction costs (commissions & taxes etc) are attributable to the Sub-fund's purchase and sale of equity shares. Additionally for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

For the Sub-fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However additionally there are indirect transaction costs suffered in those underlying funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

Notes to the Financial Statements

(continued)

15 Portfolio transaction costs (continued)

During the year the Sub-fund utilised derivative instruments. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivative positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.78% (30/06/2022: 1.03%).

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date (30/06/2022: nil).

17 Securities lending

The revenue arising from the Securities Lending Programme is currently split between the Sub-fund and The Bank of New York Mellon, London Branch in the proportion 81%:19% (30/06/2022: 81%:19%). The 19% paid to The Bank of New York Mellon, London Branch is to cover operational cost, risk and profit. The Bank of New York Mellon London Branch is a related party of the ACD as both entities are affiliates of The Bank of New York Mellon Corporation.

Collateral accepted is non-cash in the form of Sovereign debt rated AA or better from approved Governments only and Supranational debt obligations rated AAA or better, and FTSE 100 DBV (Class F10) as defined in the CREST Reference Manual and equity securities from the following indices: AEX 25 (Netherlands), CAC 40 (France), DAX 30 (Germany), Euro 50 (Eurozone), FTSE 100 (United Kingdom), Nikkei 225 (Japan), SMI 20 (Switzerland), S&P 500 (United States of America).

As at 30 June 2023, £1,820,786 of investments were subject to securities lending agreements and on behalf of the Sub-fund £1,900,971 was held in collateral. The collateral is held 100.00% in debt securities and 0.00% in equity securities.

As at 30 June 2022, £224,711 of investments were subject to securities lending agreements and on behalf of the Sub-fund £233,067 was held in collateral. The collateral was held 100.00% in debt securities and 0.00% in equity securities.

The gross earnings and the fees for the year are £4,786 (30/06/2022: £17,807) and £909 (30/06/2022: £3,383) respectively.

The following table details the value of securities on loan at the year end and the value of the collateral held at the year end for the Sub-fund, by counterparty.

Portfolio Summary

Over the 12-month review period, the Sterling Income share class of the Sub-fund generated a return of 8.24%, net of fees, against a return of 13.46% for the FTSE World TR Index, both in sterling terms. The Sub-fund produced a positive return but underperformed the benchmark.

Muenchener Rueckvevas was the year's top contributor owing to positive earnings momentum that revealed healthy margins and robust capital ratios. Johnson Controls International, a leader when it comes to improving the sustainability of buildings, contributed to returns following impressive quarterly results, despite material currency headwinds. Electrical manufacturer Hubbell also performed well, as it benefited from tailwinds in grid and electrification.

Stock selection at the regional level, as well as sector allocation, detracted from returns. At the stock level, shares in game maker Hasbro underperformed after investors raised concerns about the sustainability of its key 'Magic: The Gathering' division. Dominion Energy detracted after management announced a strategic review of the business and withdrew long-term earnings guidance. Roche retreated; coronavirus-related revenues look set to fall, and the company suffered a series of pipeline disappointments. A lack of positioning in two sizeable index constituents (Apple and NVIDIA) weighed significantly, as they benefited from the marked recovery in the technology sector. Neither stock meets the Sub-fund's strict yield criteria.

Purchases in the first half of the period included Broadcom and Gilead Sciences. In the second half, Brazilian stock exchange B3 - Brasil Bolsa Balcao was purchased. The investment case is based on the development of capital markets in Brazil, with B3 - Brasil Bolsa Balcao set to benefit from its monopoly position. The manager purchased stakes in Indonesian banks Bank Mandiri Persero and Bank Rakyat Indonesia Persero, as the macroeconomic dynamics in Indonesia appear to be attractive and both banks have strong competitive advantages that could help them to earn superior returns on invested capital. A position in Taiwan's MediaTek, a global leader in smartphone silicon processors, was established. The company has a net cash position, has consistently generated strong free cash flow, and has good visibility on its cash dividends. France's Veolia Environnement, which designs and provides water, waste and energy management solutions, was also added. The company is raising prices in its waste management division for the first time in many years.

The manager sold US electronic product manufacturer Hubbell, as continued outperformance had reduced the stock's yield to below the Sub-fund's minimum requirement. The stake in Hewlett-Packard was exited, as despite the company's large order backlog, the cycle for information technology hardware is beginning to turn. Other sales included Hasbro, Informa, TotalEnergies, Emerson Electric and FedEx.

An environment of slower growth, higher interest rates and high inflation represents a relatively favourable backdrop for income stocks, in the manager's view. The Sub-fund is positioned for slower economic growth, with the key overweight sector positions being consumer staples, healthcare and in particular, utilities. This is balanced with an overweight in defensive financials, which could benefit from higher interest rates.

*Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there may be other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which may also have reduced the Sub-fund and share class returns before operating charges.

**The Operating Charges figure is made up of the Annual Management Charge (AMC) and other operating costs. Other operating costs include the costs for other services paid for by the Sub-fund, such as the fees paid to the Fund Accountant, Fund Administrator, Depositary, Custodian, Auditor and Regulator. The Operating Charges figure shown is calculated on an ex-post basis over the period, whereas the Ongoing Charges figure shown in the Key Investor Information Document (KIID) is a calculation as at a point in time, and therefore there could be immaterial differences between the two. The operating charges are annualised for share classes launched during the year.

Overseas tax withheld	15,625,603	11,523,645
Total tax charge (see Note 6b)	15,625,603	11,523,645

b) Factors affecting the tax charge

The tax assessed for the year is lower (30/06/2022: lower) than the standard rate of corporation tax in the UK for an ICVC (20%) (30/06/2022: 20%).

The differences are explained below:

Net revenue before taxation	102,451,656	79,339,682
Corporation tax @ 20%	20,490,331	15,867,936
Effects of:

Overseas tax withheld	15,625,603	11,523,645
Relief on overseas tax expensed	(10,154)	—
Revenue not subject to corporation tax	(25,813,663)	(21,579,019)
Total tax charge (see Note 6a)	15,625,603	11,523,645

c) Deferred tax

No deferred tax asset has been recognised in the accounts in relation to tax losses of £409,540,233 (30/06/2022: £382,872,803), as it is unlikely that there will be sufficient taxable profits in the future to utilise these amounts. The deferred tax asset not recognised is £81,908,047 (30/06/2022: £76,574,561).

Total transaction costs 1,339 1,409

Total transaction costs as a % of average net assets 0.04% 0.04%

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

Separately identifiable direct transaction costs (commissions & taxes etc) are attributable to the Sub-fund's purchase and sale of equity shares. Additionally for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-fund's investment transactions in money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.05% (30/06/2022: 0.06%).

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date (30/06/2022: nil).

General Information

Investment Adviser:	Newton Investment Management North America LLC
Fund Size:	£31.83m
Comparative Index:	S&P Global Infrastructure NR
Sector:	The Investment Association Infrastructure
Key Dates: Fund Launch	7 August 2018

Investment Objective

The Sub-fund aims to achieve income and capital growth over the long term (5 years or more).

Investment Policy

The Sub-fund is actively managed and will invest at least 80% of its assets in a concentrated portfolio of equity (company shares) and equity related securities (common and preferred stock, American depository receipts and global depository receipts) and listed real estate investment trusts ("REITs") of companies located worldwide that are engaged in infrastructure and related operations.

At least 51% of the Sub-fund's portfolio will be allocated to investment in higher yielding companies in order to provide income in the form of dividends to the Sub-fund.

The Sub-fund may seek exposure to traditional infrastructure sectors such as energy, industrials, transportation and utilities as well as non-traditional infrastructure sectors such as telecoms, senior housing, health care and real estate industries.

The Sub-fund may invest in any geographic sector and will invest up to 25% of the portfolio in emerging markets (excluding Russia).

The Sub-fund may also invest up to 10% of the portfolio in collective investment schemes (including but not limited to another Sub-fund or Sub-funds of the Company or other BNY Mellon funds).

Any use of derivatives will be for efficient portfolio management purposes and hedging only, however, the Sub-fund may hold warrants and stock purchase rights where these have been acquired by the Sub-fund as a result of corporate actions. It is not expected that the use of derivatives will materially affect the overall risk profile of the Sub-fund.

Portfolio Summary

Over the 12 months under review, the Sub-fund's Institutional Shares W (Accumulation) share class returned 1.22%, net of fees, against -1.37% for the S&P Global Infrastructure NR Index, both in sterling terms. The Sub-fund generated a positive return and outperformed its comparative benchmark.

On a sector basis, utilities was the top contributor owing to effective stock selection, including a lack of exposure to several underperforming names. Notable gains came from Italian multinational utility company Enel. The company continues to execute its plans to divest non-core assets and remains attractive, in the manager's opinion. The energy sector also contributed to returns owing to favourable stock selection. German logistics company DHL, a division of Deutsche Post, buoyed returns as the company opened a shipping hub at Atlanta's Hartsfield-Jackson International Airport, increasing shipping capacity to North America.

On the downside, the real estate sector detracted most from returns. The Sub-fund's only two holdings, which were both out-of-benchmark, lagged over the period. An out-of-benchmark allocation to the communication services sector also weighed on results. Medical Properties Trust was a top individual detractor. Dominion Energy, a producer and distributor of electricity and natural gas, as well as related services, also detracted due to considerable negative earnings revisions.

The Sub-fund's largest overweight positions were to real estate, communication services, and utilities, while the largest underweights were to industrials and financials. The manager added exposure to utilities through new positions in Dominion Energy, Exelon, NextEra Energy Partners LP and Veolia Environnement. Out-of-benchmark allocations to communication services and real estate were reduced by trimming several existing positions.

The manager believes the outlook for global infrastructure remains positive, and thinks this area remains unique in its ability to mechanically pass through inflationary pressures. The energy transition remains in focus; there looks to be particular opportunity for value creation in this area within Europe. It's possible that Europe may introduce a measure similar to the US Inflation Reduction Act, which was passed last year. Such an event could add material upside to the European utility sector.

Total transaction costs as a % of average net assets 0.18% 0.21%

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

Separately identifiable direct transaction costs (commissions & taxes etc) are attributable to the Sub-fund's purchase and sale of equity shares. Additionally for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.05% (30/06/2022: 0.07%).

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date (30/06/2022: nil).

17 Securities lending

The revenue arising from the Securities Lending Programme is currently split between the Sub-fund and The Bank of New York Mellon, London Branch in the proportion 81%:19% (30/06/2022: 81%:19%). The 19% paid to The Bank of New York Mellon, London Branch is to cover operational cost, risk and profit. The Bank of New York Mellon London Branch is a related party of the ACD as both entities are affiliates of The Bank of New York Mellon Corporation.

Collateral accepted is non-cash in the form of Sovereign debt rated AA or better from approved Governments only and Supranational debt obligations rated AAA or better, and FTSE 100 DBV (Class F10) as defined in the CREST Reference Manual and equity securities from the following indices: AEX 25 (Netherlands), CAC 40 (France), DAX 30 (Germany), Euro 50 (Eurozone), FTSE 100 (United Kingdom), Nikkei 225 (Japan), SMI 20 (Switzerland), S&P 500 (United States of America).

As at 30 June 2023, £1,480,139 of investments were subject to securities lending agreements and on behalf of the Sub-fund £1,657,710 was held in collateral. The collateral is held 0.00% in debt securities and 100.00% in equity securities.

As at 30 June 2022, £4,040,838 of investments were subject to securities lending agreements and on behalf of the Sub-fund £4,497,079 was held in collateral. The collateral was held 10.03% in debt securities and 89.97% in equity securities.

The gross earnings and the fees for the year are £10,253 (30/06/2022: £2,195) and £1,948 (30/06/2022: £417) respectively.

Investment Objective

The Sub-fund seeks to achieve capital growth.

Investment Policy

The policy of the Sub-fund is to gain exposure through a dynamic allocation strategy to a range of asset classes including cash, near cash and deposits, fixed interest securities, equities, property, commodities and infrastructure. Exposure to these assets will be achieved through investment in transferable securities, derivatives, money market instruments, deposits and collective investment schemes. Investment in property, commodities and infrastructure will be indirect. The Sub-fund may also use derivatives to obtain long and short exposures. Subject to FCA regulations, the relative exposure between these asset classes will be actively managed and will be varied as deemed necessary in order to achieve the investment objective, which may result in the Sub-fund having no exposure to particular asset classes.

The Sub-fund may invest up to 10% of its assets in collective investment schemes, including those which are managed or operated by the ACD or an associate of the ACD.

Derivatives may be used for investment purposes as well as for efficient portfolio management. An investment in derivatives may create leverage and may result in greater fluctuations in the Net Asset Value of the Sub-fund.

Portfolio Summary

Over the 12-month review period, the Sub-fund's Sterling Income share class returned 0.90%, net of fees, compared with a return of 1.16% for the IA Mixed Investment 20-60% Shares NR Index, both in sterling terms. The Sub-fund produced a positive return but underperformed its comparative benchmark.

It was a difficult start to the period, but risk assets recovered some ground at the end of 2022. US inflation data surprised on the downside in October and November, which allowed the Federal Reserve (Fed) to slow the pace of interest rate hikes. Moving into 2023, subsiding inflationary pressures and a reopening of the Chinese economy provided a further boost to sentiment as hope grew that the global economy would have an easier recovery than originally thought. Towards the end of the period, the Fed were believed to be close to bringing the US tightening cycle to a close.

The Sub-fund's broad equity exposures contributed to performance. The manager gradually increased aggregate equity exposure, as economic activity proved stronger than initially expected. Dividend future positions in the US and Europe were added towards the end of the period and contributed positively.

Government bond yields rose as central banks aggressively tightened monetary policy, and, although the Sub-fund's light positioning in the first half of the period helped limit losses, government bond exposures were ultimately a notable negative. The Sub-fund's infrastructure holdings were a further negative, impacted by the turbulence created by the UK's 'mini-budget' at the end of September and the rising interest rate environment. Duration positioning and credit exposures were increased into the end of 2022, and both investment grade credit and high yield contributed positively.

Within total return strategies, positions designed to benefit from range-bound conditions in various markets made a strong positive contribution. There were further contributions from positions designed to benefit from upside breakouts in key equity markets and commodity carry trades.

Growth dynamics continue to be challenging. However, with inflation data broadly supportive and overall activity remaining robust enough to allay recession fears, the manager believes stock markets could make further gains, aided by some recovery in the index constituents that have lagged the mega-cap technology subsector. This path is not without risk. Sticky inflation or excessively robust activity would likely see rate expectations ratchet higher. Real rates would likely rise as well, and a slump in activity data could invite risk in a different guise. The manager increased equity exposure and held credit positioning steady, as corporate balance sheet strength suggests value can be added even in an economic downturn, as long as a deep recession can be avoided. Duration exposure has remained around its historical average.

Shareholders should note that additionally there may be other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which may also have reduced the Sub-fund and share class returns before operating charges.

**The Operating Charges figure is made up of the Annual Management Charge (AMC) and other operating costs. Other operating costs include the costs for other services paid for by the Sub-fund, such as the fees paid to the Fund Accountant, Fund Administrator, Depositary, Custodian, Auditor and Regulator. The Operating Charges figure shown is calculated on an ex-post basis over the period, whereas the Ongoing Charges figure shown in the Key Investor Information Document (KIID) is a calculation as at a point in time, and therefore there could be immaterial differences between the two. The operating charges are annualised for share classes launched during the year.

14 Financial instruments

The risk factors relating to the Sub-fund are discussed more fully in Note 2 of the notes applicable to the financial statements of all the Sub-funds on pages 11 to 14.

Market Price Risk

The Sub-fund uses Value at Risk (VaR) to calculate the likelihood of the Sub-fund (including derivatives) falling in value by more than a particular level.

Under normal market conditions, VaR captures the potential fall in the value of the portfolio over a given holding period and to a given level of statistical confidence.

VaR is discussed in more detail, with the relevant disclosures for the financial year, in the notes applicable to the financial statements of all Sub-funds on page 12.

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

Separately identifiable direct transaction costs (commissions & taxes etc) are attributable to the Sub-fund's purchase and sale of equity shares. Additionally for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

For the Sub-fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However additionally there are indirect transaction costs suffered in those underlying funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

During the year the Sub-fund utilised derivative instruments. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivative positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.05% (30/06/2022: 0.08%).

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date (30/06/2022: nil).

17 Securities lending

The revenue arising from the Securities Lending Programme is currently split between the Sub-fund and The Bank of New York Mellon, London Branch in the proportion 81%:19% (30/06/2022: 81%:19%). The 19% paid to The Bank of New York Mellon, London Branch is to cover operational cost, risk and profit. The Bank of New York Mellon London Branch is a related party of the ACD as both entities are affiliates of The Bank of New York Mellon Corporation.

Portfolio Summary

Over the 12-month period under review, the Sterling Income share class of the Sub-fund generated a return of 10.74%, net of fees, against a return of 11.31% from the MSCI AC World NR Index. The Sub-fund produced a strong positive return but underperformed its comparative benchmark.

Electrical manufacturer Hubbell was the top-performing position in the Sub-fund. It benefited from tailwinds in the grid and electrification industry, meaning the business is well placed to prosper through a cyclical slowdown, in the manager's view. Semiconductor equipment manufacturer Applied Materials was another strong performer, as structural drivers in the form of artificial intelligence (AI) and higher capital expenditure intensity continued to reinforce its long-term appeal. Microsoft also benefited from its exposure to the AI theme, with the company continuing to roll out AI capabilities across its platforms.

In terms of detractors, shares in AIA suffered from broader concerns about the health of the financial sector. China's weak economic recovery following the relaxation of Covid restrictions also weighed on the stock, despite some encouraging industry-level data on Hong Kong life insurance sales over the first quarter. Shares in Roche fell, as coronavirus-related revenues look set to fall. The company also suffered a series of pipeline disappointments. Diageo struggled over recessionary concerns and a normalisation of drinking patterns post-Covid.

In terms of portfolio activity, positions in SSE and FANUC were purchased in the first half of the period. In the second half, a stake was taken in NVIDIA, a global leader in the design of graphics processing units and AI platforms. It is the manager's belief that NVIDIA is likely to be a key enabler of this next wave of technological development. Shares in life sciences firm Danaher were added. The manager believes the market is underestimating its long-term, sustainable organic growth rate, and there is scope for better-than-expected margin expansion owing to positive price-cost dynamics and a superior operating culture. A position in French industrial software business Dassault Systemes was added, as the company operates in attractive growth markets (aerospace and electric vehicle technology).

In terms of sales, the Sub-fund's holding in Ferguson, an industrial supplies distributor, was sold owing to a weaker economic outlook. Costco Wholesale was also sold, as the stock's rating appeared high relative to the underlying growth of the company. The position in Abbott Laboratories was exited given some concerns around the earnings power of the business after the success of its Covid-related franchise. With the business going through an investment cycle, the manager felt profits at Suzuki Motor may be depressed in the shorter term and therefore sold the stock.

Navigating the policy tightrope between cooling inflation and slowing demand will require balance, and the timing and extent of any economic weakness will be closely watched by investors. However, structural demand trends remain in place, notably in technology and as relates to climate change, supported by government stimulus and support. The manager's focus remains on companies that appear to have more resilient long-term earnings profiles and attractive end-market outlooks.

Shareholders should note that additionally there may be other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which may also have reduced the Sub-fund and share class returns before operating charges.

**The Operating Charges figure is made up of the Annual Management Charge (AMC) and other operating costs. Other operating costs include the costs for other services paid for by the Sub-fund, such as the fees paid to the Fund Accountant, Fund Administrator, Depositary, Custodian, Auditor and Regulator. The Operating Charges figure shown is calculated on an ex-post basis over the period, whereas the Ongoing Charges figure shown in the Key Investor Information Document (KIID) is a calculation as at a point in time, and therefore there could be immaterial differences between the two. *Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there may be other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which may also have reduced the Sub-fund and share class returns before operating charges.

**The Operating Charges figure is made up of the Annual Management Charge (AMC) and other operating costs. Other operating costs include the costs for other services paid for by the Sub-fund, such as the fees paid to the Fund Accountant, Fund Administrator, Depositary, Custodian, Auditor and Regulator. The Operating Charges figure shown is calculated on an ex-post basis over the period, whereas the Ongoing Charges figure shown in the Key Investor Information Document (KIID) is a calculation as at a point in time, and therefore there could be immaterial differences between the two. The operating charges are annualised for share classes launched during the year.

a) Analysis of the tax charge		
Overseas tax withheld	208,700	132,327
Total tax charge (see Note 6b)	208,700	132,327
b) Factors affecting the tax charge		
The tax assessed for the year is higher (30/06/2022: lower) than the standard rate of corporation tax in the UK for an ICVC (20%) (30/06/2022: 20%).		
The differences are explained below:		
Net revenue before taxation	688,087	978,014
Corporation tax @ 20%	137,617	195,603
Effects of:		
Movement in unrecognised tax losses	54,240	67,567
Overseas tax withheld	208,700	132,327
Revenue not subject to corporation tax	(191,857)	(263,170)
Total tax charge (see Note 6a)	208,700	132,327
c) Deferred tax		
No deferred tax asset has been recognised in the accounts in relation to tax losses of £6,774,844 (30/06/2022: £6,503,643), as it is unlikely that there will be sufficient taxable profits in the future to utilise these amounts. The deferred tax asset not recognised is £1,354,969 (30/06/2022: £1,300,729).

ACD's periodic charge, registrations and expense charge, safe custody charges and activity charges paid to the ACD, BNY Mellon Fund Managers Limited, or its associates, are shown in Notes 3 and 5, and details of shares issued and cancelled by the ACD are shown in the Statement of Change in Net Assets Attributable to Shareholders and Note 8.

The balance due to the ACD at 30 June 2023 in respect of these transactions was £53,525 (30/06/2022: £406,573).

Any investments in or transactions with other BNYM related party entities are individually identified in the portfolio statement and the Securities Lending note respectively.

14 Financial instruments

The risk factors relating to the Sub-fund are discussed more fully in Note 2 of the notes applicable to the financial statements of all the Sub-funds on pages 11 to 14.

Market Price Risk

The value of the Sub-fund's investments which were exposed to market price risk was as follows:

	30/06/2023	30/06/2022
	£	£
Investments held at the balance sheet date	55,201,668	63,996,959

Market Price Sensitivity

The following table illustrates the sensitivity of the return and the net assets to an increase or decrease of 5% (30/06/2022: 5%) in the fair values of the Sub-fund's investments. This level of change is considered to be reasonably possible based on observation of market conditions in the year. The sensitivity analysis is based on the impact of a change to the value of the Sub-fund's investments at each balance sheet date.

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

Separately identifiable direct transaction costs (commissions & taxes etc) are attributable to the Sub-fund's purchase and sale of equity shares. Additionally for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-fund's investment transactions in money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.04% (30/06/2022: 0.07%).

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date (30/06/2022: nil).

17 Securities lending

As at 30 June 2023, there were no investments subject to securities lending agreements.

As at 30 June 2022, there were no investments subject to securities lending agreements.

The gross earnings and the fees for the year are £521 (30/06/2022: £280) and £99 (30/06/2022: £53) respectively.

Comparative Index:	FTSE Actuaries UK Index-Linked Gilts over 5 Years TR
Sector:	The Investment Association UK Index Linked Gilts
Key Dates: Fund Launch	24 February 1998

Investment Objective

The Sub-fund aims to achieve income together with the potential for capital growth over the medium term (3-5 years).

Investment Policy

The Sub-fund is actively managed and invests at least 75% of the portfolio in Sterling-denominated index linked gilts (bonds issued by the UK government).

The Sub-fund may also invest in collective investment schemes (including but not limited to another Sub-fund or Sub-funds of the Company or other BNY Mellon funds), money market instruments, deposits, cash and near cash.

The Sub-fund may invest more than 35% of its assets in government and public securities issued or guaranteed by a single state, local authority or public international body.

Any use of derivatives will be for efficient portfolio management purposes and hedging only. It is not expected that the use of derivatives will materially affect the overall risk profile of the Sub-fund.

Portfolio Summary

Over the 12-month period under review, the Newton Institutional Shares 2 (Accumulation) share class of the Sub-fund generated a return of -16.99%, net of fees, versus -19.98% from the FTSE Actuaries UK Index-Linked Gilts Over 5 Years TR Index. The Sub-fund produced a negative return but outperformed its comparative benchmark.

During the first half of the review period, the Sub-fund derived the most value from relatively short-dated bonds (five- to 10-year maturities) and ultra-long bonds (30-year-plus maturities). Having a shorter overall duration profile than the benchmark in a rising-yield environment was helpful. In the second half of the period, the Sub-fund maintained a lower duration than the benchmark until mid-June, and therefore had less sensitivity to rising real yields. Underweight positions in the longest index-linked Gilts proved beneficial. The Sub-fund benefited from not holding certain index-linked Gilts that were included in the performance benchmark. In contrast, exposure to off-benchmark investment grade credit holdings had a negative impact on returns.

In terms of activity, the Sub-fund remained shorter duration than the benchmark throughout the first half of the period. The benchmark was extremely volatile, particularly at the very long end, as liability-driven investment selling was met with emergency intervention by the Bank of England. The key activity over the opening months of 2023 was a reduction in the Sub-fund's shorter duration position. While the issue of Gilt oversupply and negative real yields (when inflation is higher than the yields on the bonds) was of concern, the Gilt market was viewed as less vulnerable in comparison with other major government bond markets. With so much uncertainty over the health of US banks, and a potential US slowdown possibly putting the brakes on the rate-rising cycle, the manager moved some holdings from shorter-dated into longer-dated Gilts.

Having been generally shorter duration than the benchmark for most of the period, the manager moved the Sub-fund to a longer duration position versus the benchmark as the period ended. Exposure to the over-30-year segment of the index-linked Gilt market (including 2068 bonds) and five- to 10-year index-linked Gilts was increased at the expense of 20- to 30-year Gilts (including the 2050 and 2052 bonds).

In the manager's opinion, the Bank of England's surprise 0.5% interest rate increase in June suggests its Monetary Policy Committee will, even if belatedly, do what it takes to curb core inflation. This should pave the way for lower real yields. Weakness is already evident in the housing market, which is typically a driver of economic growth. Although employment and wage data has so far remained strong, some slowdown in the months ahead is likely; such a backdrop should be favourable for longer-dated bonds.

	£	£
a) Analysis of the tax charge		
Total tax charge (see Note 6b)	—	—
b) Factors affecting the tax charge		
The tax assessed for the year is lower (30/06/2022: lower) than the standard rate of corporation tax in the UK for an ICVC (20%) (30/06/2022: 20%). The differences are explained below:		
Net revenue before taxation	5,533,127	7,309,017
Corporation tax @ 20%	1,106,625	1,461,803
Effects of:

Prior year adjustment to unrecognised tax losses	(109,784)	(81,807)
Total tax charge (see Note 6a)	—	—

c) Deferred tax

No deferred tax asset has been recognised in the accounts in relation to tax losses of £18,436,078 (30/06/2022: £17,715,011), as it is unlikely that there will be sufficient taxable profits in the future to utilise these amounts. The deferred tax asset not recognised is £3,687,216 (30/06/2022: £3,543,002).

The balance due to the ACD at 30 June 2023 in respect of these transactions was £76,175 (30/06/2022: £27,495).

Any investments in or transactions with other BNYM related party entities are individually identified in the portfolio statement and the Securities Lending note respectively.

14 Financial instruments

The risk factors relating to the Sub-fund are discussed more fully in Note 2 of the notes applicable to the financial statements of all the Sub-funds on pages 11 to 14.

Market Price Risk

The value of the Sub-fund's investments which were exposed to market price risk was as follows:

	30/06/2023	30/06/2022
	£	£
Investments held at the balance sheet date	37,446,876	50,338,957

Market Price Sensitivity

The following table illustrates the sensitivity of the return and the net assets to an increase or decrease of 5% (30/06/2022: 5%) in the fair values of the Sub-fund's investments. This level of change is considered to be reasonably possible based on observation of market conditions in the year. The sensitivity analysis is based on the impact of a change to the value of the Sub-fund's investments at each balance sheet date.

	30/06/2023		30/06/2022	
	5% Increase in fair value £	5% Decrease in fair value £	5% Increase in fair value £	5% Decrease in fair value £

Derivative risk

The Sub-fund may enter into derivative transactions in the pursuit of its investment objective. Further details about the scope of the Sub-fund's derivative usage can be found in the Prospectus.

Derivatives may be used for efficient portfolio management only.

Counterparty credit risk

Counterparty exposure for non-exchange traded derivatives at 30 June 2023 is as follows:

Counterparty	Forward Currency Contracts £	Total £
HSBC Bank	4,916	4,916
Total	4,916	4,916

Counterparty exposure for non-exchange traded derivatives at 30 June 2022 is as follows:

Counterparty	Forward Currency Contracts £	Total £
Barclays Bank	9,775	9,775
Canadian Imperial Bank of Commerce	6,048	6,048
Citigroup Global Markets Limited	(148)	(148)

The Bank of New York Mellon	(4,706)	(4,706)
UBS	(4,106)	(4,106)
Total	11,635	11,635

Counterparty exposure has not been disclosed for exchange traded derivatives as the exchange requirements in respect of collateral mean that, in the opinion of the ACD, the counterparty risk is mitigated.

Collateral received from these counterparties in respect of derivative contracts was £nil in the form of cash (30/06/2022: £nil).

Collateral pledged to these counterparties in respect of derivative contracts was £nil in the form of cash (30/06/2022: £nil).

Interest rate risk

The interest rate risk profile of the Sub-fund's financial assets and liabilities at 30 June 2023 is as follows:

	Floating Rate £	Fixed Rate £	Not Carrying Interest £	Total £
Investment assets	36,863,297	583,579	4,916	37,451,792

14 Financial instruments (continued)

Interest rate risk (continued)

The interest rate risk profile of the Sub-fund's financial assets and liabilities at 30 June 2022 is as follows:

	Floating Rate £	Fixed Rate £	Not Carrying interest £	Total £
Investment assets	48,294,002	2,044,955	23,234	50,362,191

Total	48,294,002	2,044,955	11,635	50,350,592

Interest rate sensitivity

Using duration analysis, an increase/decrease of 0.25% (30/6/2022: 0.25%) in interest rates, with all other variables remaining constant, is likely to result in a 4.85% (30/6/2022: 5.07%) decrease/increase respectively in the portfolio valuation.

Foreign currency risk

The table that follows details the currency profile of the Sub-fund's assets:

	30/06/2023 Investments £	30/06/2023 Net Current Assets £	30/06/2023 Total £	30/06/2022 Total £
Australian Dollar	(17,450)	6,749	(10,701)	21,042

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

For the Sub-fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.18% (30/06/2022: 0.16%).

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date (30/06/2022: nil).

Investment Policy

The Sub-fund is actively managed and invests at least 80% of the portfolio in inflation-linked corporate bonds and/or the following other assets which in combination provide the investment characteristics of inflation-linked corporate bonds: corporate bonds; government and public securities; other debt securities; and derivatives (including, but not limited to, inflation and credit derivatives).

The Sub-fund may also invest in collective investment schemes (including but not limited to another Sub-fund or Sub-funds of the Company), other transferable securities, derivatives (including, but not limited to, swaps), money market instruments, deposits, cash and near cash.

Derivatives may be used for investment purposes as well as for efficient portfolio management. It is not expected that the use of derivatives will materially affect the overall risk profile of the Sub-fund.

Portfolio Summary

Over the 12-month period under review, the Sub-fund's Sterling Income share class returned 3.11% against -0.71% for the Investment Association Sterling Strategic Bond NR sector average. The Sub-fund produced a positive return and outperformed its sector average.

Most major central banks continued their aggressive tightening cycle through the second half of 2022, driving global interest rates upwards. There was some evidence that inflation was cooling towards the end of the year, but central bankers remained focused on raising interest rates until consumer price rises feel more under control. In March, a regional banking crisis in the US and UBS's takeover of Credit Suisse in Europe triggered a flight to quality in government bond markets, as well as a reassessment of further interest rate hikes on the part of the central banks. The increase in uncertainty triggered a sharp sell-off in credit markets, with investment grade spreads spiking 40 basis points wider in a matter of days before falling back by month-end. Government bonds fared badly in the second quarter, as hawkish commentary from the US Federal Reserve and European Central Bank, coupled with sticky inflation data, undermined investor sentiment. Meanwhile, credit generally performed well. Gilts once again performed poorly in June as UK inflation data came in higher than was expected.

During the last six months of 2022, duration positioning was a key driver of returns. Credit exposure also delivered positive returns in the final two months of the year. That said, the Sub-fund experienced some underperformance in September, as the UK government's 'mini budget' resulted in significant market volatility. In the first quarter of 2023, duration positioning and country positioning were among the contributors, while the Sub-fund's credit strategy was a key driver of returns during the second quarter.

In terms of activity, duration exposure and the Sub-fund's credit risk were constantly adjusted. The Sub-fund also participated in selective new issues while selling down cyclical bonds, particularly those with significant exposure to the UK economy. Furthermore, by the end of the period, exposure to financials was increased significantly as the manager actively switched from euro-denominated to sterling-denominated bank bonds.

Yields on longer-dated Gilts are still expected to drift higher as market participants adapt to a medium-term future of higher interest rates and an inflation outlook that is less benign than the market has grown accustomed to. Meanwhile, UK inflation valuations are expected to remain rich given market concerns that the Bank of England may not be as committed to hitting its inflation target as other central banks. Therefore, the Sub-fund's bias is towards the shorter end of the yield curve versus those holdings with longer maturities. Demand for investment grade credit appears strong, but recessionary risks remain at the fore.

	£	£
a) Analysis of the tax charge		
Overseas tax withheld	83	5
Total tax charge (see Note 6b)	83	5
b) Factors affecting the tax charge		
The tax assessed for the year is lower (30/06/2022: lower) than the standard rate of corporation tax in the UK for an ICVC (20%) (30/06/2022: 20%).		
The differences are explained below:		
Net revenue before taxation	1,605,573	892,207
Corporation tax @ 20%	321,115	178,441
Effects of:		
Indexation allowance	(45,841)	—
Movement in unrecognised tax losses	45,823	1
Overseas tax withheld	83	5
Relief on overseas tax expensed	—	(1)
Revenue not subject to corporation tax	(14)	(1)
Tax deductible interest distributions	(321,083)	(178,440)
Total tax charge (see Note 6a)	83	5
c) Deferred tax		
No deferred tax asset has been recognised in the accounts in relation to tax losses of £229,114 (30/06/2022: £Nil), as it is unlikely that there will be sufficient taxable profits in the future to utilise these amounts. The deferred tax asset not recognised is £45,823 (30/06/2022: £Nil).

The balance due from the ACD at 30 June 2023 in respect of these transactions was £351,233 (30/06/2022: The balance due to the ACD was £20,596).

Any investments in or transactions with other BNYM related party entities are individually identified in the portfolio statement and the Securities Lending note respectively.

14 Financial instruments

The risk factors relating to the Sub-fund are discussed more fully in Note 2 of the notes applicable to the financial statements of all the Sub-funds on pages 11 to 14.

Market Price Risk

The Sub-fund uses Value at Risk (VaR) to calculate the likelihood of the Sub-fund (including derivatives) falling in value by more than a particular level.

Under normal market conditions, VaR captures the potential fall in the value of the portfolio over a given holding period and to a given level of statistical confidence.

VaR is discussed in more detail, with the relevant disclosures for the financial year, in the notes applicable to the financial statements of all Sub-funds on page 12.

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

For the Sub-fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

During the year the Sub-fund utilised derivative instruments. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivative positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.53% (30/06/2022: 0.59%).

There were no contingent assets or liabilities at the balance sheet date (30/06/2022: nil).

17 Securities lending

The revenue arising from the Securities Lending Programme is currently split between the Sub-fund and The Bank of New York Mellon, London Branch in the proportion 81%:19% (30/06/2022: 81%:19%). The 19% paid to The Bank of New York Mellon, London Branch is to cover operational cost, risk and profit. The Bank of New York Mellon London Branch is a related party of the ACD as both entities are affiliates of The Bank of New York Mellon Corporation.

Collateral accepted is non-cash in the form of Sovereign debt rated AA or better from approved Governments only and Supranational debt obligations rated AAA or better, and FTSE 100 DBV (Class F10) as defined in the CREST Reference Manual and equity securities from the following indices: AEX 25 (Netherlands), CAC 40 (France), DAX 30 (Germany), Euro 50 (Eurozone), FTSE 100 (United Kingdom), Nikkei 225 (Japan), SMI 20 (Switzerland), S&P 500 (United States of America).

As at 30 June 2023, £2,661,580 of investments were subject to securities lending agreements and on behalf of the Sub-fund £2,851,029 was held in collateral. The collateral is held 100.00% in debt securities and 0.00% in equity securities.

As at 30 June 2022, £787,529 of investments were subject to securities lending agreements and on behalf of the Sub-fund £864,165 was held in collateral. The collateral was held 99.97% in debt securities, 0.00% in equity securities and 0.03% in cash.

The gross earnings and the fees for the year are £5,279 (30/06/2022: £3,930) and £1,003 (30/06/2022: £747) respectively.

The following table details the value of securities on loan at the year end and the value of the collateral held at the year end for the Sub-fund, by counterparty.

Comparative Index:	JP Morgan Global Government Bond Index (GBI) (Unhedged) TR
Sector:	The Investment Association Global Government Bond
Key Dates: Fund Launch	1 February 1991

Investment Objective

The Sub-fund aims to achieve income and capital growth over the medium term (3-5 years).

Investment Policy

The Sub-fund is actively managed and invests at least 75% in global fixed income securities (bonds) issued by governments and other public entities.

The Sub-fund may also invest in collective investment schemes (including but not limited to another Sub-fund or Sub-funds of the Company or other BNY Mellon funds), derivatives (including but not limited to currency-related derivatives), convertible bonds, contingent convertible bonds, money market instruments, deposits, cash and near cash.

The Sub-fund may invest more than 35% of its assets in government and public securities issued or guaranteed by a single state, local authority or public international body.

Derivatives may be used for investment purposes as well as for efficient portfolio management and hedging. It is not expected that the use of derivatives will materially affect the overall risk profile of the Sub-fund.

Portfolio Summary

Over the 12-month period under review, the Sterling Income share class of the Sub-fund generated a return of -6.63%, net of fees, versus -7.17% for the Government Bond Index (GBI) (Unhedged) TR Index, both in sterling terms. The Sub-fund produced a negative return but outperformed its comparative benchmark.

Throughout the period, the manager maintained a short duration position versus the benchmark in developed government bond markets. Over the first half of the year, this positioning benefited performance relative to the index given the environment of rapidly rising interest rates. However, the short duration stance detracted from returns, both in absolute and relative terms, during the opening quarter of 2023 amid rising risk aversion and disinflationary expectations resulting from stress in the US banking system.

Regionally, underweight positions relative to the benchmark in the US and the eurozone detracted from performance in early 2023. During the final quarter of the period, short positions in government bond futures partially offset losses on the Sub-fund's government bond holdings. At the individual stock level, emerging market bonds were among the best performers, notably local currency issues in Colombia and Mexico. Active currency positioning detracted, notably a long position in the Japanese yen.

During the first half of the review period, the manager reduced exposure to European government bonds and increased exposure to inflation-linked bonds given high real yields and softening future inflation expectations. Subsequently, investment activity was concentrated on bonds with shorter maturity dates. After the publication of weak US economic data covering December 2022, the manager purchased call options on five-year US Treasuries and added to the Sub-fund's holdings of five-year US Treasury Inflation-Protected Securities. As short-dated yields rose in February, holdings of two-year US Treasuries and short-dated German index-linked bonds were increased.

During the final quarter of the review period, while the Sub-fund's headline duration remained below the benchmark, overall interest rate risk was increased, predominantly by adding exposure to government bonds in New Zealand, Norway and Canada. Five-year US Treasury call options were also added to the portfolio, as the rise in yields and easing bond market volatility made them less expensive. The manager also increased exposure to local currency emerging market sovereigns through Malaysia but did sell a Chinese renminbi-denominated supranational after yields had declined. In currencies, most of the euro long position was closed out and Mexican peso exposure temporarily hedged following a strong run.

As the impact of monetary policy tightening takes effect on the global economy, a slowdown in growth is likely. However, inflation is set to ease over the second half of the year. Accordingly, the manager is more positive on the outlook for government bonds and will continue to close the portfolio's duration underweight. Turning to foreign exchange markets, the manager continues to favour emerging market currencies in countries where central banks have been proactive in addressing inflation.

[†]The closing net asset value per share figure is based on the bid-market prices at close of business, whilst the highest/lowest share prices are based on mid dealing prices (the price at which shares are sold).

*Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there may be other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which may also have reduced the Sub-fund and share class returns before operating charges.

**The Operating Charges figure is made up of the Annual Management Charge (AMC) and other operating costs. Other operating costs include the costs for other services paid for by the Sub-fund, such as the fees paid to the Fund Accountant, Fund Administrator, Depositary, Custodian, Auditor and Regulator. The Operating Charges figure shown is calculated on an ex-post basis over the period, whereas the Ongoing Charges figure shown in the Key Investor Information Document (KIID) is a calculation as at a point in time, and therefore there could be immaterial differences between the two. The operating charges are annualised for share classes launched during the year.

Total	(1,894,752)	(1,894,752)

Counterparty exposure has not been disclosed for exchange traded derivatives as the exchange requirements in respect of collateral mean that, in the opinion of the ACD, the counterparty risk is mitigated.

Collateral received from these counterparties in respect of derivative contracts was £380,000 in the form of cash (30/06/2022: £370,000).

Collateral pledged to these counterparties in respect of derivative contracts was £4,076,000 in the form of cash (30/06/2022: £2,720,000).

Interest rate risk

The interest rate risk profile of the Sub-fund's financial assets and liabilities at 30 June 2023 is as follows:

	Floating Rate £	Fixed Rate £	Not Carrying Interest £	Total £
Investment assets	59,363,174	235,275,055	3,874,029	298,512,258
Investment liabilities	—	—	(8,112,579)	(8,112,579)
Total	59,363,174	235,275,055	(4,238,550)	290,399,679

The interest rate risk profile of the Sub-fund's financial assets and liabilities at 30 June 2022 is as follows:

	Floating Rate £	Fixed Rate £	Not Carrying interest £	Total £
Investment assets	46,650,092	301,522,140	3,271,856	351,444,088

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

For the Sub-fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

For the Sub-fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However additionally there are indirect transaction costs suffered in those underlying funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

During the year the Sub-fund utilised derivative instruments. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivative positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.19% (30/06/2022: 0.18%).

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date (30/06/2022: nil).

17 Securities lending

The revenue arising from the Securities Lending Programme is currently split between the Sub-fund and The Bank of New York Mellon, London Branch in the proportion 81%:19% (30/06/2022: 81%:19%). Fund Size:	£46.17m
Comparative Index:	FTSE Actuaries UK Conventional Gilts Over 15 years TR
Sector:	The Investment Association UK Gilt
Key Dates: Fund Launch	1 March 1979

Investment Objective

The Sub-fund aims to achieve income together with the potential for capital growth over the medium term (3-5 years).

Investment Policy

The Sub-fund is actively managed and invests in fixed income securities (bonds) issued or guaranteed by the UK Government or the Governments of foreign countries or corporate bodies.

The Sub-fund may also invest in collective investment schemes (including but not limited to another Sub-fund or Sub-funds of the Company or other BNY Mellon funds), money market instruments, deposits, cash and near cash.

The Sub-fund may invest more than 35% of its assets in government and public securities issued or guaranteed by a single state, local authority or public international body.

Any use of derivatives will be for efficient portfolio management purposes and hedging only. It is not expected that the use of derivatives will materially affect the overall risk profile of the Sub-fund.

Portfolio Summary

Over the 12-month period under review, the Newton Institutional Shares 2 (Accumulation) share class of the Sub-fund generated a return of -21.92%, net of fees, versus -24.88% from the FTSE Actuaries UK Conventional Gilts Over 15 Years Index. The Sub-fund produced a negative return but outperformed its comparative benchmark.

Maintaining lower duration versus the benchmark in a rising yield environment was the key factor that enabled the Sub-fund to produce superior relative returns over the period. An underweight position in the longest-dated bonds (those with a maturity of over 30 years) was a positive factor during the first half of the period. Additionally, while off-benchmark holdings of overseas government bonds (in Australia, Denmark, New Zealand and the US) detracted from returns, their losses were much smaller than those of Gilts. During the final quarter of the period under review, an emphasis on the 20- to 30-year segment of the Gilt market, specifically the 2049 issue, detracted from performance both in absolute terms and relative to the Sub-fund's benchmark.

During the first half of the period, the manager switched some low-coupon Gilts into higher-coupon bonds, and in the expectation that interest rates would continue to rise, switched some 2038 Gilts into 2024 securities. Profits were taken on off-benchmark Danish, eurozone and Australian overseas holdings, with the proceeds reinvested into Gilts maturing between 2040 and 2045 at higher yields. The key activity over the opening months of 2023 was a reduction in the Sub-fund's shorter duration position. While the issue of Gilt oversupply and negative real yields (when inflation is higher than the yields on the bonds) was of concern, the Gilt market was viewed as less vulnerable in comparison with other major government bond markets. With so much uncertainty over the health of US banks, and a potential US slowdown possibly putting the brakes on the rate-rising cycle, the manager moved some holdings from shorter-dated into longer-dated Gilts.

Having been generally shorter duration than the benchmark for most of the period, the manager moved the Sub-fund to a longer duration position versus the benchmark as the period ended. Exposure to the over-30-year segment of the Gilt market (including 2071, 2060 and 2036 Gilts) and 10- to 15-year Gilts was increased at the expense of 20- to 30-year Gilts, including the 2049 issue. In the manager's opinion, the Bank of England's surprise 0.5% interest rate increase in June suggests its Monetary Policy Committee will, even if belatedly, do what it takes to curb core inflation. This should pave the way for lower real yields. Weakness is already evident in the housing market, which is typically a driver of economic growth. Although employment and wage data has so far remained strong, some slowdown in the months ahead is likely; such a backdrop should be favourable for longer-dated bonds.

ACD's periodic charge, registrations and expense charge, safe custody charges and activity charges paid to the ACD, BNY Mellon Fund Managers Limited, or its associates, are shown in Notes 3 and 5, and details of shares issued and cancelled by the ACD are shown in the Statement of Change in Net Assets Attributable to Shareholders and Note 8.

The balance due to the ACD at 30 June 2023 in respect of these transactions was £6,327 (30/06/2022: £10,355).

Any investments in or transactions with other BNYM related party entities are individually identified in the portfolio statement and the Securities Lending note respectively.

14 Financial instruments

The risk factors relating to the Sub-fund are discussed more fully in Note 2 of the notes applicable to the financial statements of all the Sub-funds on pages 11 to 14.

Market Price Risk

The value of the Sub-fund's investments which were exposed to market price risk was as follows:

	30/06/2023	30/06/2022
	£	£
Investments held at the balance sheet date	45,204,299	59,038,983

Market Price Sensitivity

The following table illustrates the sensitivity of the return and the net assets to an increase or decrease of 5% (30/06/2022: 5%) in the fair values of the Sub-fund's investments. This level of change is considered to be reasonably possible based on observation of market conditions in the year. The sensitivity analysis is based on the impact of a change to the value of the Sub-fund's investments at each balance sheet date.

	30/06/2023		30/06/2022	
	5% Increase in fair value £	5% Decrease in fair value £	5% Increase in fair value £	5% Decrease in fair value £

Derivative risk

The Sub-fund may enter into derivative transactions in the pursuit of its investment objective. Further details about the scope of the Sub-fund's derivative usage can be found in the Prospectus.

Derivatives may be used for efficient portfolio management only.

Counterparty credit risk

Counterparty exposure for non-exchange traded derivatives at 30 June 2023 is as follows:

Counterparty	Forward Currency Contracts £	Total £
State Street Global Advisors Limited	27,214	27,214
Total	27,214	27,214

Counterparty exposure for non-exchange traded derivatives at 30 June 2022 is as follows:

Counterparty	Forward Currency Contracts £	Total £
Barclays Bank	522	522
Citigroup Global Markets Limited	(333)	(333)
HSBC Bank	(141)	(141)
J.P. Morgan Securities Plc	8,814	8,814

The Bank of New York Mellon	(854)	(854)
UBS	(730)	(730)
Total	8,729	8,729

Counterparty exposure has not been disclosed for exchange traded derivatives as the exchange requirements in respect of collateral mean that, in the opinion of the ACD, the counterparty risk is mitigated.

Collateral received from these counterparties in respect of derivative contracts was £nil in the form of cash (30/06/2022: £nil).

Collateral pledged to these counterparties in respect of derivative contracts was £nil in the form of cash (30/06/2022: £nil).

Interest rate risk

The interest rate risk profile of the Sub-fund's financial assets and liabilities at 30 June 2023 is as follows:

	Floating Rate £	Fixed Rate £	Not Carrying Interest £	Total £
Investment assets	—	45,204,299	27,214	45,231,513

14 Financial instruments (continued)

Interest rate risk (continued)

The interest rate risk profile of the Sub-fund's financial assets and liabilities at 30 June 2022 is as follows:

	Floating Rate £	Fixed Rate £	Not Carrying interest £	Total £
Investment assets	—	59,038,983	14,956	59,053,939
Investment liabilities	—	—	(6,227)	(6,227)
Total	—	59,038,983	8,729	59,047,712

Interest rate sensitivity

Using duration analysis, an increase/decrease of 0.25% (30/6/2022: 0.25%) in interest rates, with all other variables remaining constant, is likely to result in a 4.21% (30/6/2022: 4.49%) decrease/increase respectively in the portfolio valuation.

Foreign currency risk

The table that follows details the currency profile of the Sub-fund's assets:

	30/06/2023 Investments £	30/06/2023 Net Current Assets £	30/06/2023 Total £	30/06/2022 Total £

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

For the Sub-fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.19% (30/06/2022: 0.16%).

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date (30/06/2022: nil).

Fund Report

for the year ended 30 June 2023

General Information

Investment Adviser:	Walter Scott & Partners Limited
Fund Size:	£1,804.62m
Comparative Index:	MSCI World NR Index
Sector:	The Investment Association Global
Key Dates: Fund Launch	24 August 2007

Investment Objective

The Sub-fund aims to achieve capital growth over the long term (5 years or more).

Investment Policy

The Sub-fund will invest in global equities (company shares) issued by companies worldwide, including ordinary shares, preference shares and other equity-related securities.

The Sub-fund can be expected to be fully invested at all times, typically with no more than 5% cash.

The Sub-fund may also invest in collective investment schemes (including but not limited to another Sub-fund or Sub-funds of the Company or other BNY Mellon funds).

Any use of derivatives will be for efficient portfolio management purposes and hedging only. It is not expected that the use of derivatives will materially affect the overall risk profile of the Sub-fund.

Portfolio Summary

Over the 12-month review period, the Sub-fund's Sterling Income share class rose 15.71%, net of fees, versus 13.21% for the MSCI World NR Index. The Sub-fund generated a positive return and outperformed its benchmark.

Global equity markets made good progress over the period despite the presence of several macroeconomic headwinds. Sharply rising inflation and the associated monetary policy responses of central banks worried investors throughout the year. Geopolitical tensions, notably the conflict in Ukraine and US-China relations, also remained firmly in focus.

Over the 12-month period, the Sub-fund experienced strong performance in the healthcare, consumer staples and consumer discretionary sectors. A lack of exposure to energy and a markedly underweight exposure to financials versus the benchmark also contributed. However, the information technology sector proved a drag on performance given the surge in certain high-profile technology companies over the period, some of which the Sub-fund did not own.

From an individual stock perspective, procedure growth and an increase in full-year guidance was positive for robotic surgery pioneer Intuitive Surgical. According to results released in January, fiscal year 2022 was an excellent year for Novo Nordisk. Sales rose and operating profits were up thanks to good GLP-1 and obesity-product sales. LVMH Moët Hennessy Louis Vuitton, a French luxury goods house, was also very strong; demand for luxury products held up well despite concerns about the macroeconomic environment. The company's sales and net profits hit a record high in 2022.

Waters was weak due to growing evidence that the bioprocessing market is going through a period of weak demand and inventory destocking. Waters's instrument sales were impacted by scaled-back demand. AIA, an Asian life insurer, was hit hard by China's Covid restrictions that halted travel between the mainland and Hong Kong, an area which represented a key source of new business for the company. However, with Covid restrictions across Asia now a thing of the past, and with mainland visitors crossing the border into Hong Kong to buy life insurance again, 2023 could mark a return to more consistent growth.

From an activity perspective, Jardine Matheson, Fanuc, Colgate-Palmolive, Johnson & Johnson and SGS were sold. New companies purchased were Lonza, Old Dominion Freight Line, Costco Wholesale and O'Reilly Automotive.

Predictions of an economic slowdown this year have become common, with inflation continuing to chip away at incomes and developed market central banks still in tightening mode, at least for now. There remain lingering fears that these headwinds may ultimately push some countries into a mild recession. However, lower energy and commodity prices are helping to bring down headline inflation, which should help ease the pressure on household budgets.

The manager's attention, as ever, remains focused on the long-term prospects of the companies held in the Sub-fund, and not on making economic and equity market calls based on fleeting conditions. Encouragingly, many leading companies continue to exhibit a level of growth and resilience that belies the challenges of still-elevated input costs, higher interest rates, and demand attrition. However, the manager believes that in time, vulnerable, highly leveraged business models will be exposed. This emphasises the importance of the financial strength and market leadership of the companies held within the Sub-fund.

Total tax charge (see Note 6b)	2,051,556	3,019,763

b) Factors affecting the tax charge

The tax assessed for the year is lower (30/06/2022: higher) than the standard rate of corporation tax in the UK for an ICVC (20%) (30/06/2022: 20%).

The differences are explained below:

Net revenue before taxation	11,032,087	12,029,091
Corporation tax @ 20%	2,206,417	2,405,818
Effects of:		
Movement in unrecognised tax losses	2,484,506	2,439,101
Overseas tax withheld	2,051,556	3,019,763
Revenue not subject to corporation tax	(4,690,923)	(4,844,919)
Total tax charge (see Note 6a)	2,051,556	3,019,763

c) Deferred tax

No deferred tax asset has been recognised in the accounts in relation to tax losses of £64,826,311 (30/06/2022: £52,403,778), as it is unlikely that there will be sufficient taxable profits in the future to utilise these amounts. The deferred tax asset not recognised is £12,965,262 (30/06/2022: £10,480,756).

Total transaction costs as a % of average net assets 0.01% 0.02%

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

Separately identifiable direct transaction costs (commissions & taxes etc) are attributable to the Sub-fund's purchase and sale of equity shares. Additionally for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.05% (30/06/2022: 0.09%).

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date (30/06/2022: nil).

17 Securities lending

The revenue arising from the Securities Lending Programme is currently split between the Sub-fund and The Bank of New York Mellon, London Branch in the proportion 81%:19% (30/06/2022: 81%:19%). The 19% paid to The Bank of New York Mellon, London Branch is to cover operational cost, risk and profit. The Bank of New York Mellon London Branch is a related party of the ACD as both entities are affiliates of The Bank of New York Mellon Corporation.

Collateral accepted is non-cash in the form of Sovereign debt rated AA or better from approved Governments only and Supranational debt obligations rated AAA or better, and FTSE 100 DBV (Class F10) as defined in the CREST Reference Manual and equity securities from the following indices: AEX 25 (Netherlands), CAC 40 (France), DAX 30 (Germany), Euro 50 (Eurozone), FTSE 100 (United Kingdom), Nikkei 225 (Japan), SMI 20 (Switzerland), S&P 500 (United States of America).

As at 30 June 2023, £2,994,210 of investments were subject to securities lending agreements and on behalf of the Sub-fund £3,198,896 was held in collateral. The collateral is held 100.00% in debt securities and 0.00% in equity securities.

As at 30 June 2022, £10,404,483 of investments were subject to securities lending agreements and on behalf of the Sub-fund £11,610,769 was held in collateral. The collateral was held 0.11% in debt securities and 99.89% in equity securities.

The gross earnings and the fees for the year are £40,440 (30/06/2022: £29,819) and £7,684 (30/06/2022: £5,666) respectively.

General Information

Investment Adviser:	Newton Investment Management Limited
Fund Size:	£2,649.33m
Comparative Index:	The Investment Association Mixed Investment 40-85% Shares NR
Sector:	The Investment Association Mixed Investment 40-85% Shares
Key Dates: Fund Launch	4 November 1986

Investment Objective

The Sub-fund aims to achieve a balance between income and capital growth over the long term (5 years or more).

Investment Policy

The Sub-fund is actively managed and invests at least 75% of the portfolio in UK and international securities across a range of global asset classes including, without limitation, equities (company shares), fixed income securities (bonds), infrastructure, renewable energy, property, commodities and near cash. The Sub-fund does not have any restrictions on the portion of the portfolio allocated to any of these asset classes. Exposure to these asset classes will be achieved through investment in transferable securities, money market instruments, warrants, derivatives (including but not limited to currency-related derivatives), convertible bonds, contingent convertible bonds and collective investment schemes (including but not limited to another Sub-fund or Sub-funds of the Company or other BNY Mellon funds). To the extent the Sub-fund gains exposure to alternative asset classes such as infrastructure, renewable energy, property or commodities, such exposure may be through exchange listed securities, other transferable securities and/or collective investment schemes. Any investment in collective investment schemes will not exceed 10% of the portfolio.

The Sub-fund may also invest in deposits and cash. The Sub-fund may invest in bonds rated below investment grade (BBB-) by Standard & Poor's (or equivalent recognised rating agency).

The Sub-fund may invest in any geographic or economic sectors of the world.

Derivatives may be used for investment purposes as well as for efficient portfolio management and hedging. It is not expected that the use of derivatives will materially affect the overall risk profile of the Sub-fund.

Portfolio Summary

Over the 12-month period under review, the Sterling Income share class of the Sub-fund generated a return of 7.39%, net of fees, compared with a return of 3.28% for the UK Investment Association Mixed Investment 40-85% Shares NR Sector, both in sterling terms.

Both stock selection and asset allocation contributed positively to the Sub-fund's returns. At the stock level, the top-performing position was US industrial Hubbell, which performed well on confidence that secular tailwinds in grid and electrification have left the business well-placed to weather any cyclical slowdown. Technology-related stocks were well represented amongst the Sub-fund's top contributors, notably holdings in German business software provider SAP, Microsoft and semiconductor equipment provider Applied Materials. The technology sector rode a wave of positive sentiment after US chipmaker NVIDIA released earnings guidance that greatly exceeded market expectations, driven by surging demand for chips used in generative artificial intelligence (AI) systems. Trane Technologies, a US-based manufacturer of heating, ventilation and air conditioning systems and controls, was another notable contributor, as its second-quarter revenue and earnings exceeded expectations.

On the negative side, the holding in miner Anglo American was weak, as sentiment around economic growth became more discouraging, with lower commodity prices and reduced copper production. The position in Hong Kong-based insurer AIA lost ground. Market confidence in the viability of the financial sector was undermined by the failure of Silicon Valley Bank and Signature Bank in the US, and the subsequent takeover of Credit Suisse by rival Swiss bank UBS, orchestrated by the Swiss regulators.

Regarding portfolio activity, in the first half of the review period, the manager bought holdings in Swiss healthcare manufacturer Lonza, UK electricity network company SSE and Japanese factory automation machinery and robotics group Fanuc. In 2023, a new position was established in Danaher, which has built leading franchises across the life sciences and diagnostics sectors. The manager also added to holdings in US pharmaceutical Eli Lilly & Co and Rentokil Initial, the world's leading commercial pest-control company and a market leader in hygiene services. Demand for Eli Lilly's medicines, that treat diabetes, Alzheimer's and obesity, is expected to grow strongly over future years. In fixed income markets, the manager added to UK government debt with both shorter and longer-dated maturities, as they believe higher inflation is, to some extent, being discounted by investors.

The Sub-fund's holding in US housebuilder Toll Brothers was sold after a period of strong share price performance. While new-build volumes have benefited from a lack of supply in the existing US homes market, the manager's view is that the outlook is uncertain as mortgage interest rates remain high. Other disposals included positions in healthcare group Abbot Laboratories, while the large holding in information services company Wolters Kluwer was reduced following strong performance over recent years. Looking ahead, central banks' focus on containing near-term inflation expectations has resulted in elevated interest rates, the impact of which is increasingly likely to become apparent in the real economy. Accordingly, the manager continued to focus on companies with resilient long-term earnings profiles and attractive end-market outlooks.

*Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there may be other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which may also have reduced the Sub-fund and share class returns before operating charges.

**The Operating Charges figure is made up of the Annual Management Charge (AMC) and other operating costs. Other operating costs include the costs for other services paid for by the Sub-fund, such as the fees paid to the Fund Accountant, Fund Administrator, Depositary, Custodian, Auditor and Regulator. The Operating Charges figure shown is calculated on an ex-post basis over the period, whereas the Ongoing Charges figure shown in the Key Investor Information Document (KIID) is a calculation as at a point in time, and therefore there could be immaterial differences between the two. The operating charges are annualised for share classes launched during the year.

***Share class launched on 5 November 2021.

****Share class launched 4 November 2022.

Total tax charge (see Note 6b)	2,343,960	2,122,214
b) Factors affecting the tax charge		
The tax assessed for the year is lower (30/06/2022: lower) than the standard rate of corporation tax in the UK for an ICVC (20%) (30/06/2022: 20%).		
The differences are explained below:		
Net revenue before taxation	32,674,243	20,176,399
Corporation tax @ 20%	6,534,849	4,035,280
Effects of:		
Movement in unrecognised tax losses	1,436,519	3,979,744
Overseas tax withheld	2,343,960	2,122,214
Revenue not subject to corporation tax	(7,971,368)	(8,015,024)
Total tax charge (see Note 6a)	2,343,960	2,122,214
c) Deferred tax		
No deferred tax asset has been recognised in the accounts in relation to tax losses of £176,990,608 (30/06/2022: £169,808,013), as it is unlikely that there will be sufficient taxable profits in the future to utilise these amounts. The deferred tax asset not recognised is £35,398,122 (30/06/2022: £33,961,603).

14 Financial instruments

The risk factors relating to the Sub-fund are discussed more fully in Note 2 of the notes applicable to the financial statements of all the Sub-funds on pages 11 to 14.

Market Price Risk

The value of the Sub-fund's investments which were exposed to market price risk was as follows:

	30/06/2023	30/06/2022
	£	£
Investments held at the balance sheet date	2,418,575,189	1,942,207,706

Market Price Sensitivity

The following table illustrates the sensitivity of the return and the net assets to an increase or decrease of 5% (30/06/2022: 5%) in the fair values of the Sub-fund's investments. This level of change is considered to be reasonably possible based on observation of market conditions in the year. The sensitivity analysis is based on the impact of a change to the value of the Sub-fund's investments at each balance sheet date.

Derivative risk

The Sub-fund may enter into derivative transactions in the pursuit of its investment objective. Further details about the scope of the Sub-fund's derivative usage can be found in the Prospectus.

Derivatives may be used for efficient portfolio management and hedging only.

Counterparty credit risk

Counterparty exposure for non-exchange traded derivatives at 30 June 2023 is as follows:

	Forward Currency Contracts	Total
	£	£
Counterparty		
State Street Global Advisors Limited	1,063,737	1,063,737
Total	1,063,737	1,063,737

Counterparty exposure for non-exchange traded derivatives at 30 June 2022 is as follows:

	Forward Currency Contracts	Total

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

Separately identifiable direct transaction costs (commissions & taxes etc) are attributable to the Sub-fund's purchase and sale of equity shares. Additionally for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

For the Sub-fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However additionally there are indirect transaction costs suffered in those underlying funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.06% (30/06/2022: 0.08%).

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date (30/06/2022: nil).

17 Securities lending

The revenue arising from the Securities Lending Programme is currently split between the Sub-fund and The Bank of New York Mellon, London Branch in the proportion 81%:19% (30/06/2022: 81%:19%). The 19% paid to The Bank of New York Mellon, London Branch is to cover operational cost, risk and profit. The Bank of New York Mellon London Branch is a related party of the ACD as both entities are affiliates of The Bank of New York Mellon Corporation.

Collateral accepted is non-cash in the form of Sovereign debt rated AA or better from approved Governments only and Supranational debt obligations rated AAA or better, and FTSE 100 DBV (Class F10) as defined in the CREST Reference Manual and equity securities from the following indices: AEX 25 (Netherlands), CAC 40 (France), DAX 30 (Germany), Euro 50 (Eurozone), FTSE 100 (United Kingdom), Nikkei 225 (Japan), SMI 20 (Switzerland), S&P 500 (United States of America).

As at 30 June 2023, £283,140,695 of investments were subject to securities lending agreements and on behalf of the Sub-fund £294,755,890 was held in collateral. The collateral is held 84.60% in debt securities and 15.40% in equity securities.

Fund Report

for the year ended 30 June 2023

General Information

Investment Adviser:	Newton Investment Management Limited
Fund Size:	£543.83m
Comparative Index:	SONIA (30-day compounded) + 3%
Sector:	The Investment Association Targeted Absolute Return
Key Dates: Fund Launch	27 November 2006

Investment Objective

The objective of the Sub-fund is to achieve long-term capital growth over a period of at least 5 years from a portfolio diversified across a range of assets. The Sub-fund is managed to seek a return in excess of cash SONIA (30-day compounded) + 3% per annum over five years before fees. In doing so, it aims to achieve a positive return on a rolling three year basis (meaning a period of three years, no matter which day you start on). However, a positive return is not guaranteed and a capital loss may occur.

Investment Policy

The policy of the Sub-fund is to gain exposure to a diversified range of asset classes including, but not limited to, equities, fixed income, property, commodities, infrastructure, renewable energy, currencies, cash, near cash and deposits. Exposure to these asset classes will be achieved through investment in transferable securities (such as company shares, listed investment trusts, REITs, bonds, structured notes, convertible bonds, contingent convertible bonds), collective investment schemes (including but not limited to another Sub-fund or Sub-funds of the Company), warrants, derivative instruments, forward transactions, deposits and approved money market instruments. Exposure to property, commodities, infrastructure or renewable energy, may be gained through exchange listed securities and/or collective investment schemes.

The Sub-fund may invest more than 35% of its assets in government and public securities issued or guaranteed by a single state, local authority or public international body. The Sub-fund may invest in fixed income securities rated below investment grade (BBB-) by Standard & Poor's (or equivalent recognised rating agency).

Subject to FCA regulations, the relative exposure between asset classes will be actively managed and will be varied as deemed necessary in order to achieve the investment objective. This may result in the Sub-fund having no exposure to particular asset classes. The Sub-fund may invest in any geographic or economic sectors of the world.

Derivatives may be used with a view to generating investment returns in pursuit of the Sub-fund's investment objective, and for efficient portfolio management. It is not expected that the use of derivatives will materially affect the overall risk profile of the Sub-fund.

The Sub-fund uses Sterling cash (SONIA (30-day compounded)) + 3% per annum over five years before fees as a target set for the Sub-fund's performance to match or exceed. The ACD considers SONIA (30-day compounded) + 3% per annum over five years before fees to be an appropriate target because SONIA (30-day compounded) is representative of cash and the Sub-fund's investment objective is to seek a return in excess of Sterling cash + 3% per annum.

Portfolio Summary

Over the 12-month period under review, the Sterling Income share class of the Sub-fund generated a return of 1.81%, net of fees, against 5.99% for SONIA (30-day compounded) +3%. The Sub-fund produced a positive return but was behind its benchmark.

While equities contributed positively to the Sub-fund's returns, bonds and alternatives, in particular, detracted. Hipgnosis Songs Fund, GCP Infrastructure Investments and SDCL Energy Efficiency Income Trust weighed on the Sub-fund's returns in the wake of March's banking crisis and on worries that credit tightening may lead to deflation. However, some holdings in alternatives contributed positively to returns. Pershing Square was a top contributor in the Sub-fund, with the hedge fund's equity selection and interest rate hedge driving strong performance. India's IRB InvIT Fund performed well, with the company enjoying a large rise in toll revenues compared to the equivalent period last year.

Within the fixed interest portion of the Sub-fund, while emerging market bonds performed well, the overall contribution from bonds was negative owing mainly to the Sub-fund's holdings in overseas government bonds, notably long-dated US Treasuries, and certain investment grade and sub-investment grade holdings. The Sub-fund's currency hedging had a positive effect owing to the strength of sterling, particularly against the US dollar.

In equities, at the stock level, US oil company Marathon Petroleum performed well, supported by its strong fundamentals. Ashtead rebounded on its exposure to non-residential construction, while events organiser Informa also contributed, as the gradual removal of Covid restrictions and the strong rebound in business activity led to positive earnings momentum. On the negative side, Star Entertainment detracted after the casino operator was fined by Australian authorities following an investigation into serious operating issues and governance arrangements.

Regarding portfolio activity, within equities, a position was established in UK electricity network company SSE, early in the period, as it should benefit from the decarbonisation of power markets through its renewable energy arm. A position in French industrial software business Dassault Systèmes was added as it operates in attractive growth markets (aerospace and electric vehicle technology). Asset manager Intermediate Capital was added. It is exposed to the attractive long-term structural trend of capital allocation to alternatives, including private debt, real estate and infrastructure. The recent rise in bond yields presented an opportunity to buy UK government 2027 and 2045 bonds, which offer an attractive yield to maturity. More credit exposure was added through a new issue in a British Telecommunications bond, while further market protection was taken through the purchase of short-dated S&P 500 Index, Nasdaq and FTSE 100 Index put options. Major stock sales included Merck & Co., TotalEnergies, General Electric, Travis Perkins and JP Morgan Chase.

Navigating the policy tightrope between cooling inflation and slowing demand will be finely balanced, with the timing and extent of any economic weakness closely watched by investors. However, structural demand trends remain in place, notably in technology and climate change, aided by government stimulus and support. The Manager's focus remains on companies that have more resilient long-term earnings profiles and attractive end-market outlooks.

[†]The closing net asset value per share figure is based on the bid-market prices at close of business, whilst the highest/lowest share prices are based on mid dealing prices (the price at which shares are sold).

*Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there may be other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which may also have reduced the Sub-fund and share class returns before operating charges.

**The Operating Charges figure is made up of the Annual Management Charge (AMC) and other operating costs. Other operating costs include the costs for other services paid for by the Sub-fund, such as the fees paid to the Fund Accountant, Fund Administrator, Depositary, Custodian, Auditor and Regulator. The Operating Charges figure shown is calculated on an ex-post basis over the period, whereas the Ongoing Charges figure shown in the Key Investor Information Document (KIID) is a calculation as at a point in time, and therefore there could be immaterial differences between the two. The operating charges are annualised for share classes launched during the year.

#The Operating Charges Figure for the period ending 30/06/2023 includes a synthetic OCF due to investments in other funds, in line with IA guidance.

14 Financial instruments (continued)

Market Price Risk

The Sub-fund uses Value at Risk (VaR) to calculate the likelihood of the Sub-fund (including derivatives) falling in value by more than a particular level.

Under normal market conditions, VaR captures the potential fall in the value of the portfolio over a given holding period and to a given level of statistical confidence.

VaR is discussed in more detail, with the relevant disclosures for the financial year, in the notes applicable to the financial statements of all Sub-funds on page 12.

Valuation of financial instruments

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

Separately identifiable direct transaction costs (commissions & taxes etc) are attributable to the Sub-fund's purchase and sale of equity shares. Additionally for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

For the Sub-fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However additionally there are indirect transaction costs suffered in those underlying funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

During the year the Sub-fund utilised derivative instruments. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivative positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.42% (30/06/2022: 0.47%).

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date (30/06/2022: nil).

17 Securities lending

The revenue arising from the Securities Lending Programme is currently split between the Sub-fund and The Bank of New York Mellon, London Branch in the proportion 81%:19% (30/06/2022: 81%:19%). The 19% paid to The Bank of New York Mellon, London Branch is to cover operational cost, risk and profit. The Bank of New York Mellon London Branch is a related party of the ACD as both entities are affiliates of The Bank of New York Mellon Corporation.

Collateral accepted is non-cash in the form of Sovereign debt rated AA or better from approved Governments only and Supranational debt

Investment Objective

The Sub-fund aims to achieve a balance between income and capital growth over the long term (5 years or more).

Investment Policy

The Sub-fund is actively managed and invests at least 75% of the portfolio across a range of global asset classes including, without limitation, equities (company shares), fixed income (bonds), infrastructure, renewable energy, property, commodities and near cash. The Sub-fund does not have any restrictions on the portion of the portfolio allocated to any of these asset classes. Exposure to these asset classes will be achieved through investment in transferable securities, money market instruments, warrants, derivatives (including but not limited to currency-related derivatives), convertible bonds, contingent convertible bonds and collective investment schemes (including but not limited to another Sub-fund or Sub-funds of the Company or other BNY Mellon funds). To the extent the Sub-fund gains exposure to alternative asset classes, such as infrastructure, renewable energy, property or commodities, such exposure may be through exchange listed securities, other transferable securities and/or collective investment schemes. Any investment in collective investment schemes will not exceed 10% of the portfolio.

The Sub-fund may also invest in deposits and cash.

The Sub-fund may invest in bonds rated below investment grade (BBB-) by Standard & Poor's (or equivalent recognised rating agency).

The Sub-fund may invest in any geographic or economic sectors of the world.

Derivatives may be used for investment purposes as well as for efficient portfolio management and hedging. It is not expected that the use of derivatives will materially affect the overall risk profile of the Sub-fund.

Portfolio Summary

Over the 12-month period under review, the Newton Institutional Shares 3 (Accumulation) share class of the Sub-fund generated a return of 8.31%, net of fees, compared with a return of 7.69% from the benchmark a composite index, comprising 37.5% FTSE All-Share TR Index, 37.5% FTSE World ex UK TR Index, 20% FTSE Actuaries UK Conventional Gilts All Stocks TR Index and 5% 7-Day Compounded SONIA, both in sterling terms. The Sub-fund produced a positive return and was ahead of its benchmark.

The positive relative performance was derived mainly from strong stock selection, particularly in equities. Electrical manufacturer Hubbell was one of the top performers, producing strong earnings results and raising guidance for 2022. Semiconductor equipment manufacturer Applied Materials was another strong performer, as structural drivers, in the form of artificial intelligence (AI) and higher capital expenditure intensity, continued to reinforce its long-term attractions. Microsoft also benefited from its exposure to the AI theme, with the company continuing to roll out AI across its platform. Sustainable energy manufacturer Trane Technologies benefited from strong demand for its products leading to earnings coming in ahead of expectations. SAP also performed well on increasing cloud-based work and earnings momentum.

On the negative side, shares in AIA suffered from broader concerns about the health of the financial sector. China's weak recovery following the relaxation of zero-Covid policies also weighed on the stock, despite encouraging industry-level data on Hong Kong life insurance sales over the first quarter. Not holding Asia-focused bank HSBC was a negative, as the stock performed well as interest rates moved higher and sentiment around China's post-Covid economic reopening at the start of the year was positive. Certain UK Gilts holdings also detracted from returns.

Regarding portfolio activity, a position in Lonza was established early in the period under review, as the company stands to benefit from growing demand for next-generation biological drugs. A stake was taken in NVIDIA, a global leader in the design of graphics processing units and artificial intelligence platforms. The manager believes that NVIDIA is likely to be a key enabler of the upcoming wave of technology development. A position in French industrial software business Dassault Systemes was added as it operates in attractive growth markets (such as aerospace and electric vehicle technology). Exposure to UK government bonds was raised given the significant sell-off in UK yields and the pound. The manager also added a two-year US Treasury bond, as the yield available approached 5%, with inflation expectations moderating. Additional major purchases included SSE, FANUC, Danaher and Rentokil Initial. Abbott Laboratories was sold, as the manager believes other areas of the healthcare sector may have better long-term growth dynamics. Covid-related revenues have fallen and there have been some issues in the nutrition business which has constrained growth. Additional sales included Sugi Holdings and Toll Brothers.

Navigating the policy tightrope between cooling inflation and slowing demand will be finely balanced, with the timing and extent of any economic weakness closely watched by investors. However, structural demand trends remain in place, notably in technology and climate change, aided by government stimulus and support. The manager's focus remains on companies that have, in the manager's view, more resilient long-term earnings profiles and attractive end-market outlooks.

14 Financial instruments

The risk factors relating to the Sub-fund are discussed more fully in Note 2 of the notes applicable to the financial statements of all the Sub-funds on pages 11 to 14.

Market Price Risk

The value of the Sub-fund's investments which were exposed to market price risk was as follows:

	30/06/2023	30/06/2022
	£	£
Investments held at the balance sheet date	465,369,243	436,593,262

Market Price Sensitivity

The following table illustrates the sensitivity of the return and the net assets to an increase or decrease of 5% (30/06/2022: 5%) in the fair values of the Sub-fund's investments. This level of change is considered to be reasonably possible based on observation of market conditions in the year. The sensitivity analysis is based on the impact of a change to the value of the Sub-fund's investments at each balance sheet date.

Interest rate risk

The interest rate risk profile of the Sub-fund's financial assets and liabilities at 30 June 2023 is as follows:

	Floating Rate	Fixed Rate	Not Carrying	Total
	£	£	Interest	£
			£	
Investment assets	13,121,256	87,689,032	364,558,955	465,369,243
Investment liabilities	—	—	—	—
Total	13,121,256	87,689,032	364,558,955	465,369,243

The interest rate risk profile of the Sub-fund's financial assets and liabilities at 30 June 2022 is as follows:

	Floating Rate	Fixed Rate	Not Carrying	Total
	£	£	interest	£
			£	
Investment assets	4,472,935	79,161,605	352,958,722	436,593,262
Investment liabilities	—	—	—	—
Total	4,472,935	79,161,605	352,958,722	436,593,262

Interest rate sensitivity

Using duration analysis, an increase/decrease of 0.25% (30/6/2022: 0.25%) in interest rates, with all other variables remaining constant, is likely to result in a 0.06% (30/6/2022: 0.04%) decrease/increase respectively in the portfolio valuation.

Total sales net of transaction costs	150,961				

Total transaction costs 72 96

Total transaction costs as a % of average net assets 0.01% 0.02%

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

Separately identifiable direct transaction costs (commissions & taxes etc) are attributable to the Sub-fund's purchase and sale of equity shares. Additionally for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

For the Sub-fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However additionally there are indirect transaction costs suffered in those underlying funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

General Information

Investment Adviser:	Newton Investment Management Limited
Fund Size:	£2,083.61m
Comparative Index:	The Investment Association Flexible Investment NR
Sector:	The Investment Association Flexible Investment
Key Dates: Fund Launch	16 March 1990

Investment Objective

The Sub-fund aims to achieve capital growth and income over the long term (5 years or more).

Investment Policy

The Sub-fund is actively managed and invests at least 75% of the portfolio in UK and international securities across a range of global asset classes including, without limitation, equities (company shares), fixed income (bonds, convertible bonds, contingent convertible bonds), infrastructure, renewable energy, property, commodities and near cash. The Sub-fund does not have any restrictions on the portion of the portfolio allocated to any of these asset classes. Exposure to these asset classes will be achieved through investment in transferable securities, money market instruments, warrants and collective investment schemes (including but not limited to another Sub-fund or Sub-funds of the Company or other BNY Mellon funds). To the extent the Sub-fund gains exposure to alternative asset classes, such as infrastructure, renewable energy, property or commodities, such exposure may be through exchange listed securities, other transferable securities and/or collective investment schemes. Any investment in collective investment schemes will not exceed 10% of the portfolio.

The Sub-fund may also invest in deposits and cash.

The Sub-fund may invest in bonds rated below investment grade (BBB-) by Standard & Poor's (or equivalent recognised rating agency).

The Sub-fund may invest in any geographic or economic sectors of the world.

Any use of derivatives will be for efficient portfolio management purposes and hedging only. It is not expected that the use of derivatives will materially affect the overall risk profile of the Sub-fund.

Portfolio Summary

Over the 12-month period under review, the Sterling Income share class of the Sub-fund generated a return of 6.25%, net of fees, compared with a return of 3.89% for the UK Investment Association Flexible Investment NR Sector average, both in sterling terms. The Sub-fund generated a positive return and outperformed its benchmark.

Asset allocation was the key driver behind the positive relative returns, most especially the underweighting of bonds. However, stock selection in equities was a negative contributor. The holding in Star Entertainment was the Sub-fund's largest detractor after the casino operator was fined by Australian authorities following an investigation into serious operational issues and governance arrangements. No exposure to US semiconductor stock NVIDIA also weighed on performance, as the share price surged on its exposure to artificial intelligence (AI) demand.

On the positive side, Ashtead rebounded on its exposure to non-residential construction, while events organiser Informa also contributed, as the gradual removal of Covid restrictions, and the strong rebound in business activity, led to positive earnings momentum. Semiconductor equipment manufacturer Applied Materials was another strong performer, as structural drivers, in the form of AI and higher capital expenditure intensity, continued to reinforce its long-term attractions. Microsoft also benefited from its exposure to the AI theme, with the company continuing to roll out AI across its platform.

Regarding portfolio activity, positions were established in Lonza, SSE and FANUC in the first half of the review period. On the fixed interest side, following significant strength, exposure to the US dollar was reduced and the duration of the Sub-fund increased by selling the holdings in US government 2026 and 2030 bonds and buying US government 2043 bonds. Exposure to long-dated UK and New Zealand government bonds was also increased. In 2023, the manager purchased French industrial software business Dassault Systemes. The company boasts dominant positions in aerospace, automobiles/electric vehicles and life sciences, and helps its customers create new state-of-the-art products and services. The manager also added Rentokil Initial, which is a world leading commercial pest control company and a market leader in hygiene services. Its earnings are not cyclical, and the business was attractive considering its quality, thematic strength and long-term growth opportunity.

The holdings in Legrand and Assurant were sold in the first half of the period. In 2023, Abbott Laboratories was exited, as Covid-related revenues are in steep decline and there have been some issues in the nutrition business, which have held back growth.

Navigating the policy tightrope between cooling inflation and slowing demand will be finely balanced, with the timing and extent of any economic weakness closely watched by investors. However, structural demand trends remain in place, notably in technology and climate change, aided by government stimulus and support. The manager's focus remains on companies that have, in the manager's view, more resilient long-term earnings profiles and attractive end-market outlooks.

*Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there may be other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which may also have reduced the Sub-fund and share class returns before operating charges.

**The Operating Charges figure is made up of the Annual Management Charge (AMC) and other operating costs. Other operating costs include the costs for other services paid for by the Sub-fund, such as the fees paid to the Fund Accountant, Fund Administrator, Depositary, Custodian, Auditor and Regulator. The Operating Charges figure shown is calculated on an ex-post basis over the period, whereas the Ongoing Charges figure shown in the Key Investor Information Document (KIID) is a calculation as at a point in time, and therefore there could be immaterial differences between the two. The operating charges are annualised for share classes launched during the year.

***Share class launched 5 November 2021.

[#]The Operating Charges Figure for the period ending 30/06/2023 includes a synthetic OCF due to investments in other funds, in line with IA guidance.

a) Analysis of the tax charge		
Overseas tax withheld	2,294,928	2,269,138
Total tax charge (see Note 6b)	2,294,928	2,269,138
b) Factors affecting the tax charge		
The tax assessed for the year is lower (30/06/2022: lower) than the standard rate of corporation tax in the UK for an ICVC (20%) (30/06/2022: 20%).		
The differences are explained below:		
Net revenue before taxation	25,309,287	17,543,950
Corporation tax @ 20%	5,061,857	3,508,790
Effects of:		
Movement in unrecognised tax losses	2,307,329	4,145,402
Overseas tax withheld	2,294,928	2,269,138
Prior year adjustment to unrecognised tax losses	—	1

Total tax charge (see Note 6a)	2,294,928	2,269,138
c) Deferred tax		
No deferred tax asset has been recognised in the accounts in relation to tax losses of £278,575,888 (30/06/2022: £267,039,243), as it is unlikely that there will be sufficient taxable profits in the future to utilise these amounts. The deferred tax asset not recognised is £55,715,178 (30/06/2022: £53,407,849).

ACD's periodic charge, registrations and expense charge, safe custody charges and activity charges paid to the ACD, BNY Mellon Fund Managers Limited, or its associates, are shown in Notes 3 and 5, and details of shares issued and cancelled by the ACD are shown in the Statement of Change in Net Assets Attributable to Shareholders and Note 8.

The balance due from the ACD at 30 June 2023 in respect of these transactions was £608,771 (30/06/2022: £7,767,596).

Any investments in or transactions with other BNYM related party entities are individually identified in the portfolio statement and the Securities Lending note respectively.

14 Financial instruments

The risk factors relating to the Sub-fund are discussed more fully in Note 2 of the notes applicable to the financial statements of all the Sub-funds on pages 11 to 14.

Market Price Risk

The value of the Sub-fund's investments which were exposed to market price risk was as follows:

	30/06/2023	30/06/2022
	£	£
Investments held at the balance sheet date	1,885,368,243	1,634,212,342

Market Price Sensitivity

The following table illustrates the sensitivity of the return and the net assets to an increase or decrease of 5% (30/06/2022: 5%) in the fair values of the Sub-fund's investments. This level of change is considered to be reasonably possible based on observation of market conditions in the year. The sensitivity analysis is based on the impact of a change to the value of the Sub-fund's investments at each balance sheet date.

Derivative risk

The Sub-fund may enter into derivative transactions in the pursuit of its investment objective. Further details about the scope of the Sub-fund's derivative usage can be found in the Prospectus.

Derivatives may be used for efficient portfolio management and hedging only.

Counterparty credit risk

Counterparty exposure for non-exchange traded derivatives at 30 June 2023 is as follows:

	Forward Currency	Total
	Contracts	£
	£	£
Canadian Imperial Bank of Commerce	1,876,340	1,876,340
State Street Global Advisors Limited	2,075,199	2,075,199
Total	3,951,539	3,951,539

The Sub-fund did not have exposure to counterparty credit risk for non-exchange traded derivatives as at 30 June 2022.

Counterparty exposure has not been disclosed for exchange traded derivatives as the exchange requirements in respect of collateral mean that, in the opinion of the ACD, the counterparty risk is mitigated.

Collateral received from these counterparties in respect of derivative contracts was £3,510,000 in the form of cash (30/06/2022: £nil).

Collateral pledged to these counterparties in respect of derivative contracts was £nil in the form of cash (30/06/2022: £nil).

Interest rate risk

The interest rate risk profile of the Sub-fund's financial assets and liabilities at 30 June 2023 is as follows:

	Floating Rate	Fixed Rate	Not Carrying	Total

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

Separately identifiable direct transaction costs (commissions & taxes etc) are attributable to the Sub-fund's purchase and sale of equity shares. Additionally for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

For the Sub-fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However additionally there are indirect transaction costs suffered in those underlying funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

15 Portfolio transaction costs (continued)

During the year the Sub-fund utilised derivative instruments. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivative positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.08% (30/06/2022: 0.10%).

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date (30/06/2022: nil).

17 Securities lending

The revenue arising from the Securities Lending Programme is currently split between the Sub-fund and The Bank of New York Mellon, London Branch in the proportion 81%:19% (30/06/2022: 81%:19%). The 19% paid to The Bank of New York Mellon, London Branch is to cover operational cost, risk and profit. The Bank of New York Mellon London Branch is a related party of the ACD as both entities are affiliates of The Bank of New York Mellon Corporation.

Collateral accepted is non-cash in the form of Sovereign debt rated AA or better from approved Governments only and Supranational debt obligations rated AAA or better, and FTSE 100 DBV (Class F10) as defined in the CREST Reference Manual and equity securities from the following indices: AEX 25 (Netherlands), CAC 40 (France), DAX 30 (Germany), Euro 50 (Eurozone), FTSE 100 (United Kingdom), Nikkei 225 (Japan), SMI 20 (Switzerland), S&P 500 (United States of America).

As at 30 June 2023, £25,946,507 of investments were subject to securities lending agreements and on behalf of the Sub-fund £28,243,576 was held in collateral. The collateral is held 81.28% in debt securities and 18.72% in equity securities.

As at 30 June 2022, £89,548,706 of investments were subject to securities lending agreements and on behalf of the Sub-fund £98,208,679 was held in collateral. The collateral was held 18.97% in debt securities and 81.03% in equity securities.

The gross earnings and the fees for the year are £87,149 (30/06/2022: £138,827) and £16,558 (30/06/2022: £26,377) respectively.

The following table details the value of securities on loan at the year end and the value of the collateral held at the year end for the Sub-fund, by counterparty.

Sector:	The Investment Association Mixed Investment 40-85% Shares
Key Dates: Fund Launch	4 February 2015

Investment Objective

The Sub-fund aims to achieve income together with the potential for capital growth over the long term (5 years or more).

Investment Policy

The Sub-fund is actively managed and invests at least 75% of the portfolio in UK and international securities across a range of global asset classes including, without limitation, equities (company shares), fixed income (bonds), infrastructure, renewable energy, property, commodities and near cash. The Sub-fund will not have any restrictions on the proportion of the portfolio allocated to any of these asset classes. Exposure to these asset classes will be achieved through investment in transferable securities, money market instruments, warrants, derivatives (including but not limited to currency-related derivatives), convertible bonds, contingent convertible bonds and collective investment schemes (including but not limited to another Sub-fund or Sub-funds of the Company or other BNY Mellon funds). To the extent the Sub-fund gains exposure to alternative asset classes, such as infrastructure, renewable energy, property or commodities, such exposure may be through exchange listed securities, other transferable securities and/or collective investment schemes. Any investment in collective investment schemes will not exceed 10% of the portfolio.

The Sub-fund may also invest in deposits and cash.

The Sub-fund may invest in bonds rated below investment grade (BBB-) by Standard & Poor's (or equivalent recognised rating agency).

The Sub-fund may invest in any geographic or economic sectors of the world.

Derivatives may be used for investment purposes as well as for efficient portfolio management and hedging. It is not expected that the use of derivatives will materially affect the overall risk profile of the Sub-fund.

Portfolio Summary

Over the 12-month period under review, the Sterling Income share class of the Sub-fund generated a return of 2.74%, net of fees, compared with a return of 5.88% for the 60% MSCI AC World NR Index and 40% ICE Bank of America Global Broad Market GBP Hedged TR Index benchmark, both in sterling terms. The Sub-fund generated a positive return but underperformed its benchmark.

Alternatives detracted most from the Sub-funds returns over the period. Hipgnosis Songs Fund was a notable detractor during the first half of the review period due to investors' concerns about the cost of servicing its debt. Subsequently, in the aftermath of the financial crisis, the holding weakened further, along with positions in GCP Infrastructure Investments and SDCL Energy Efficiency Income Trust, on concerns over the possibility of constraints on access to capital. The strongest contribution to the Sub-fund's performance came from equities. At the stock level, oil company Marathon Petroleum, events organiser Informa and equipment rental group Ashtead were the top performers. Ashtead has a strong focus on the US, where the implementation of the Inflation Reduction Act has boosted infrastructure investment and construction activity. On the negative side, the holding in Star Entertainment detracted and was subsequently sold, after the Australian casino operator suspended dividend payments.

Regarding portfolio activity, in the first half of the period, the manager bought holdings in UK electricity network company SSE, Japanese factory automation machinery and robotics group Fanuc, and Trane Technologies, a US-based manufacturer of heating, ventilation and air conditioning systems and controls. In 2023, the manager bought shares in semiconductor equipment supplier Applied Materials, owing to the growth potential from artificial intelligence and higher associated capital expenditure. Other notable purchases included new holdings in Taiwan Semiconductor Manufacturing (TSMC), Chicago Mercantile Exchange (CME), National Grid and French pharmaceutical company Sanofi. The manager sold holdings in pharmaceutical group Merck, TotalEnergies and General Electric, after a period of strong performance. The position in US investment bank JPMorgan Chase was also sold, as the decision to add to the holding earlier in the year, during the crisis surrounding the collapse of Silicon Valley Bank, had been beneficial.

In fixed income markets, the manager bought short-dated Brazilian government bonds on the view that both inflation and interest rates in Brazil are likely to fall. After rising yields resulted in a more attractive investment proposition, the Sub-fund's exposure to corporate bonds was increased by adding to the existing holding Welltower 2028 bonds. Welltower is a US real estate investment trust that focuses on the growing demand for healthcare infrastructure across the US, Canada and the UK. The manager increased the duration of the Sub-fund through the purchase of long-dated UK government bonds and US Treasury 2028 bonds while adding to the holding in US Treasury 2025 bonds. Looking ahead, central banks' focus on containing near-term inflation expectations has resulted in elevated interest rates, the impact of which is increasingly likely to become apparent in the real economy. Accordingly, the manager continues to focus on companies with resilient long-term earnings profiles and attractive end-market outlooks.

*Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there may be other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which may also have reduced the Sub-fund and share class returns before operating charges.

**The Operating Charges figure is made up of the Annual Management Charge (AMC) and other operating costs. Other operating costs include the costs for other services paid for by the Sub-fund, such as the fees paid to the Fund Accountant, Fund Administrator, Depositary, Custodian, Auditor and Regulator. The Operating Charges figure shown is calculated on an ex-post basis over the period, whereas the Ongoing Charges figure shown in the Key Investor Information Document (KIID) is a calculation as at a point in time, and therefore there could be immaterial differences between the two. The operating charges are annualised for share classes launched during the year.

[#]The Operating Charges Figure for the period ending 30/06/2023 includes a synthetic OCF due to investments in other funds, in line with IA guidance.

*Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there may be other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which may also have reduced the Sub-fund and share class returns before operating charges.

**The Operating Charges figure is made up of the Annual Management Charge (AMC) and other operating costs. Other operating costs include the costs for other services paid for by the Sub-fund, such as the fees paid to the Fund Accountant, Fund Administrator, Depositary, Custodian, Auditor and Regulator. The Operating Charges figure shown is calculated on an ex-post basis over the period, whereas the Ongoing Charges figure shown in the Key Investor Information Document (KIID) is a calculation as at a point in time, and therefore there could be immaterial differences between the two. The operating charges are annualised for share classes launched during the year.

***Share class launched 5 November 2021.

****Share class launched 4 November 2022.

#The Operating Charges Figure for the period ending 30/06/2023 includes a synthetic OCF due to investments in other funds, in line with IA guidance.

13 Related parties

ACD's periodic charge, registrations and expense charge, safe custody charges and activity charges paid to the ACD, BNY Mellon Fund Managers Limited, or its associates, are shown in Notes 3 and 5, and details of shares issued and cancelled by the ACD are shown in the Statement of Change in Net Assets Attributable to Shareholders and Note 8.

The balance due from the ACD at 30 June 2023 in respect of these transactions was £142,322 (30/06/2022: £1,152,880).

Any investments in or transactions with other BNYM related party entities are individually identified in the portfolio statement and the Securities Lending note respectively.

14 Financial instruments

The risk factors relating to the Sub-fund are discussed more fully in Note 2 of the notes applicable to the financial statements of all the Sub-funds on pages 11 to 14.

Market Price Risk

The Sub-fund uses Value at Risk (VaR) to calculate the likelihood of the Sub-fund (including derivatives) falling in value by more than a particular level.

Annual Report & Accounts - BNY Mellon Multi-Asset Income Fund

Notes to the Financial Statements

(continued)

14 Financial instruments (continued)

Market Price Risk (continued)

Under normal market conditions, VaR captures the potential fall in the value of the portfolio over a given holding period and to a given level of statistical confidence.

VaR is discussed in more detail, with the relevant disclosures for the financial year, in the notes applicable to the financial statements of all Sub-funds on page 12.

Valuation of financial instruments

The categorisation of financial instruments in the tables below reflect the methodology used to measure their fair value.

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

Separately identifiable direct transaction costs (commissions & taxes etc) are attributable to the Sub-fund's purchase and sale of equity shares. Additionally for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

For the Sub-fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However additionally there are indirect transaction costs suffered in those underlying funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.35% (30/06/2022: 0.43%).

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date (30/06/2022: nil).

17 Securities lending

The revenue arising from the Securities Lending Programme is currently split between the Sub-fund and The Bank of New York Mellon, London Branch in the proportion 81%:19% (30/06/2022: 81%:19%). The 19% paid to The Bank of New York Mellon, London Branch is to cover operational cost, risk and profit. The Bank of New York Mellon London Branch is a related party of the ACD as both entities are affiliates of The Bank of New York Mellon Corporation.

Collateral accepted is non-cash in the form of Sovereign debt rated AA or better from approved Governments only and Supranational debt obligations rated AAA or better, and FTSE 100 DBV (Class F10) as defined in the CREST Reference Manual and equity securities from the following indices: AEX 25 (Netherlands), CAC 40 (France), DAX 30 (Germany), Euro 50 (Eurozone), FTSE 100 (United Kingdom), Nikkei 225 (Japan), SMI 20 (Switzerland), S&P 500 (United States of America).

As at 30 June 2023, £10,572,817 of investments were subject to securities lending agreements and on behalf of the Sub-fund £10,997,441 was held in collateral. The collateral is held 73.38% in debt securities and 26.62% in equity securities.

Fund Report

for the year ended 30 June 2023

General Information

Investment Adviser:	Newton Investment Management Limited
Fund Size:	£3,369.45m
Comparative Index:	SONIA (30-day compounded) + 4%
Sector:	The Investment Association Targeted Absolute Return
Key Dates: Fund Launch	1 September 1993

Investment Objective

The objective of the Sub-fund is to achieve a rate of return in Sterling terms that is equal to or above a minimum return from cash SONIA (30-day compounded) + 4% per annum over five years before fees. In doing so, it aims to achieve a positive return on a rolling three year basis (meaning a period of three years, no matter which day you start on). However, capital is in fact at risk and there is no guarantee that this will be achieved over that, or any, time period.

Investment Policy

To achieve its investment objective, the Sub-fund will invest in a broad diversified range of asset classes. The Sub-fund may invest directly or indirectly in equities, fixed interest securities, currencies, cash, near cash, deposits, warrants, infrastructure, renewable energy, property, commodities and approved money market instruments. Exposure to these asset classes is expected to be achieved through a combination of transferable securities (such as company shares, convertible bonds, contingent convertible bonds, listed investment trusts, REITs, bonds, structured notes), collective investment schemes (which may include those managed or operated by the ACD or an associate of the ACD) and derivatives. Exposure to infrastructure, renewable energy, property or commodities will be gained through exchange listed securities and/or collective investment schemes.

The Sub-fund does not have any restrictions on the portion of the Sub-fund allocated to any of these asset classes. The Sub-fund may invest in any geographic or economic sectors of the world.

The Sub-fund may invest more than 35% of its assets in government and public securities issued or guaranteed by a single state, local authority or public international body. The Sub-fund may invest in fixed income securities rated below investment grade (BBB-) by Standard & Poor's (or equivalent recognised rating agency).

Derivatives may be used with a view to generating investment returns in pursuit of the Sub-fund's investment objective and for efficient portfolio management. It is not expected that the use of derivatives will materially affect the overall risk profile of the Sub-fund.

The Investment Manager may use alternative risk premia strategies, hereafter referred to as 'ARP' strategies, to implement the investment strategy. ARP strategies seek to gain exposure to risk premia (the return or reward an investor earns to bear risk) that would not usually be directly accessible through traditional investment instruments (for example by investing directly in equities or bonds).

ARP strategies are typically accessed through systematic, rules-based approaches which often use quantitative techniques and can be implemented through a range of instruments (including structured notes, derivative instruments and collective investment schemes).

No more than 8.5% of Net Asset Value of the Sub-fund will be allocated to gaining exposure to ARP strategies.

The Sub-fund uses SONIA (30-day compounded) + 4% per annum over five years before fees as a target set for the Sub-fund's performance to match or exceed. The ACD considers SONIA (30-day compounded)+4% per annum over five years before fees to be an appropriate target because the ACD believes in typical market conditions that it represents a target that will be equal to or greater than UK inflation rates over the same period and is commensurate with the Investment Manager's approach.

Portfolio Summary

Over the 12-month period under review, the Sterling Income share class of the Sub-fund generated a return of -4.33%, net of fees, compared with 7.00% for the SONIA (30-day compounded) + 4%, both in sterling terms. The Sub-fund produced a negative return and was significantly behind its benchmark.

Negative returns in the stabilising layer were the main reason behind the Sub-fund's weakness over the period. This was largely due to the negative contribution from derivative instruments, specifically protection against falling markets, which represented a cost as equity markets rallied. Precious metals (gold) and government bonds also produced mildly negative contributions.

Conversely, the return-seeking core added value, with global equities contributing the most. Strong stock contributors included NVIDIA, which occupies a dominant position as a vendor of hardware components to facilitate artificial intelligence (AI) and was boosted by robust first-quarter results. Microsoft enjoyed the halo effect around AI, and technology more broadly, given its part ownership of AI chatbot ChatGPT. Booking and Ryanair benefited from improved confidence and travel among European consumers. Conversely, the largest detractor was US energy firm Dominion Energy, which was affected by weakness in the oil price.

Also within the core, emerging market debt contributed to returns owing to the perception that bond yields were close to peak levels and a less aggressive inflation outlook. However, alternatives weighed on returns. Weakness was evident in the renewables, infrastructure and property holdings owing to a combination of rising bond yields, collateral calls by UK pension funds employing LDI (liability-driven investing) strategies, and new regulations on fee disclosures. Corporate bonds registered a small negative contribution. Here, exposure to European and UK contingent convertible bonds, including a small position in Credit Suisse, was affected by the unprecedented decision by the Swiss regulator to subordinate bondholders to equity investors in relation to the collapse of Credit Suisse.

Regarding portfolio activity, in the first half of the period, equity exposure was reduced with a preference for maintaining a defensive skew. Corporate bond and emerging market debt exposure was raised, while in the stabilising layer, government bond duration was increased, although it was managed somewhat tactically in recognition of the fact that, given the more inflationary backdrop, bonds are likely to be a less reliable hedging tool than in the past. In the latter half of the review period, the main decision was to simplify the Sub-fund's structure by reducing direct portfolio protection while paring back the equity weighting on the other side. The equity mix within the portfolio progressively became more balanced to enable the Sub-fund to participate more fully as growth stocks returned to favour. The manager also took advantage of lower levels of implied volatility to switch a significant portion of the direct protection into put options on the S&P 500 as a tail-risk hedge, thereby enabling the portfolio to participate more fully in the upside should the market rally persist, while providing powerful additional downside protection through to early 2024, should a more sustained pullback materialise. Finally, within the stabilising layer, the US dollar weighting was bolstered given the appeal of the currency's 'safe-haven' attributes. The Sub-fund's gold position was trimmed.

Markets continue to shrug off worrying signs, notably an inverted yield curve, weaker leading indicators, tightening liquidity conditions and narrow equity market participation. For this reason, the manager believes that a significant insulating layer needs to be in place to protect against any significant market downturn. In the manager's view, it is prudent to wait on the sidelines, rather than materially increase exposure to equities (or other risk assets) which appear overvalued.

*Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there may be other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which may also have reduced the Sub-fund and share class returns before operating charges.

**The Operating Charges figure is made up of the Annual Management Charge (AMC) and other operating costs. Other operating costs include the costs for other services paid for by the Sub-fund, such as the fees paid to the Fund Accountant, Fund Administrator, Depositary, Custodian, Auditor and Regulator. The Operating Charges figure shown is calculated on an ex-post basis over the period, whereas the Ongoing Charges figure shown in the Key Investor Information Document (KIID) is a calculation as at a point in time, and therefore there could be immaterial differences between the two. The operating charges are annualised for share classes launched during the year.

[†]The closing net asset value per share figure is based on the bid-market prices at close of business, whilst the highest/lowest share prices are based on mid dealing prices (the price at which shares are sold).

*Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there may be other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which may also have reduced the Sub-fund and share class returns before operating charges.

**The Operating Charges figure is made up of the Annual Management Charge (AMC) and other operating costs. Other operating costs include the costs for other services paid for by the Sub-fund, such as the fees paid to the Fund Accountant, Fund Administrator, Depositary, Custodian, Auditor and Regulator. The Operating Charges figure shown is calculated on an ex-post basis over the period, whereas the Ongoing Charges figure shown in the Key Investor Information Document (KIID) is a calculation as at a point in time, and therefore there could be immaterial differences between the two. The operating charges are annualised for share classes launched during the year.

#The Operating Charges Figure for the period ending 30/06/2023 includes a synthetic OCF due to investments in other funds, in line with IA guidance.

Market Price Risk

The Sub-fund uses Value at Risk (VaR) to calculate the likelihood of the Sub-fund (including derivatives) falling in value by more than a particular level.

Under normal market conditions, VaR captures the potential fall in the value of the portfolio over a given holding period and to a given level of statistical confidence.

VaR is discussed in more detail, with the relevant disclosures for the financial year, in the notes applicable to the financial statements of all Sub-funds on page 12.

Valuation of financial instruments

The categorisation of financial instruments in the tables below reflect the methodology used to measure their fair value.

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

Separately identifiable direct transaction costs (commissions & taxes etc) are attributable to the Sub-fund's purchase and sale of equity shares. Additionally for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

Notes to the Financial Statements

15 Portfolio transaction costs (continued)

For the Sub-fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However additionally there are indirect transaction costs suffered in those underlying funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

During the year the Sub-fund utilised derivative instruments. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivative positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.16% (30/06/2022: 0.12%).

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date (30/06/2022: nil).

17 Securities lending

The revenue arising from the Securities Lending Programme is currently split between the Sub-fund and The Bank of New York Mellon, London Branch in the proportion 81%:19% (30/06/2022: 81%:19%). The 19% paid to The Bank of New York Mellon, London Branch is to cover operational cost, risk and profit. The Bank of New York Mellon London Branch is a related party of the ACD as both entities are affiliates of The Bank of New York Mellon Corporation.

Collateral accepted is non-cash in the form of Sovereign debt rated AA or better from approved Governments only and Supranational debt obligations rated AAA or better, and FTSE 100 DBV (Class F10) as defined in the CREST Reference Manual and equity securities from the following indices: AEX 25 (Netherlands), CAC 40 (France), DAX 30 (Germany), Euro 50 (Eurozone), FTSE 100 (United Kingdom), Nikkei 225 (Japan), SMI 20 (Switzerland), S&P 500 (United States of America).

As at 30 June 2023, £404,306,717 of investments were subject to securities lending agreements and on behalf of the Sub-fund £420,447,207 was held in collateral. The collateral is held 100.00% in debt securities and 0.00% in equity securities.

As at 30 June 2022, £466,202,859 of investments were subject to securities lending agreements and on behalf of the Sub-fund £478,563,234 was held in collateral. The collateral was held 94.21% in debt securities and 5.79% in equity securities.

The gross earnings and the fees for the year are £556,777 (30/06/2022: £156,179) and £105,788 (30/06/2022: £29,674) respectively.

Investment Adviser:	Newton Investment Management Limited
Fund Size:	£132.22m
Comparative Index:	FTSE World Europe ex UK TR
Sector:	The Investment Association Europe ex UK
Key Dates: Fund Launch	1 June 1987

Investment Objective

The Sub-fund aims to achieve capital growth over the long term (5 years or more).

Investment Policy

The Sub-fund is actively managed and invests at least 75% of its assets in a concentrated portfolio of equities (company shares issued by continental European companies including ordinary shares, preference shares and other equity-related securities that meet the Investment Manager's sustainability criteria, where environmental, social, governance ("ESG") considerations are an integral part of the criteria. Continental European companies are defined as those that are either domiciled, incorporated or which have significant business in continental Europe (excluding the UK). The Sub-fund may invest up to 25% of its assets in companies domiciled, incorporated or that have significant business outside of continental Europe, which may include the UK. The Investment Manager focuses on identifying companies that demonstrate sustainable business practices and an ability to generate returns consistent with the Sub-fund's objective. Sustainable business practices are those which positively manage the material impacts of a company's operations and products on the environment and society.

When determining whether a company engages in sustainable business practices and meets the Investment Manager's sustainability criteria, the Investment Manager considers whether the company (i) engages in sustainable practices in an economic sense (e.g. the company's strategy, operations and finances are stable and durable), and (ii) takes appropriate measures to manage any material consequences or impact of its policies and operations in relation to ESG matters (e.g., the company's environmental footprint, labour standards, board structure).

The Investment Manager's sustainability criteria incorporate elements of negative screening alongside other general and company level ESG-related analysis of a company's activities. Specifically, the Investment Manager, seeks to:

– Identify and avoid companies that participate in specific areas of activity that the Investment Manager deems to be harmful from an environmental or social perspective or which do not follow good governance practices. As an example, the Investment Manager could deem companies that have large carbon footprints or companies with poor labour standards ineligible for investment. It will also exclude companies in breach of the UN Global Compact principles which includes principles relating to human rights, labour, environment and anti-corruption, as well as companies that produce tobacco products. The Sub-fund also adopts a policy of making no direct investment in companies that derive more than 10% of turnover from the sale of tobacco.

– Identify and invest in companies that are proactively seeking to manage environmental and/or social factors well, which in turn should support long-term financial returns. This may also include those companies that are contributing to the development of solutions that will contribute towards addressing environmental and/or social issues, examples of which could include more efficient or reduced use of natural resources or accessibility to healthcare.

Companies engaged in sustainable business practices may also include companies that have committed explicitly to improving their environmental and/or social impacts leading to a transformation of their business models. There may be situations where the Sub-fund will invest in a company that has been identified as having involvement in potentially harmful activities from an environmental or social perspective. This may arise for certain companies whose activities or operations, typically due to a legacy business mix, may have historically created poor environmental or social outcomes, but that are now investing in and positively adapting to future needs (for example, this may include energy companies that are preparing for a transition to a lower carbon world). Similarly, in some instances, the Sub-fund may invest in a company where the Investment Manager determines through engagement with the company, that prevailing ESG information and data provided by external ESG ratings providers have not fully captured positive environmental or social initiatives of the company.

When determining whether a company meets the Investment Manager's sustainability criteria the Investment Manager uses a combination of external and internal data, research and ratings which are qualitative and quantitative in nature.

Further details in relation to the current sustainability criteria may be obtained by contacting the ACD. Investors should be aware that these criteria may change over time.

The Sub-fund will also follow the Investment Manager's opportunities investment approach. This means that the Sub-fund invests in the highest conviction investment opportunities (i.e. companies) that the Investment Manager identifies through its investment process. The Sub-fund will be constructed in a concentrated manner, taking into account the long-term risk versus reward profile of the companies selected for investment.

The Sub-fund may also invest in collective investment schemes (including but not limited to another Sub-fund or Sub-funds of the Company or other BNY Mellon funds), money market instruments, deposits, cash and near cash. The Sub-fund may hold warrants, convertible bonds and partly paid securities where these have been acquired by the Sub-fund as a result of corporate actions.

Any use of derivatives will be for efficient portfolio management purposes and hedging only. It is not expected that the use of derivatives will materially affect the overall risk profile of the Sub-fund.

Portfolio Summary

Over the 12-month period under review, the Sterling Income share class of the Sub-fund generated a return of 18.03%, net of fees, compared with a return of 19.64% for the FTSE World Europe ex UK TR Index. The Sub-fund generated a strong positive return but underperformed its comparative benchmark, mainly due to stock selection.

At the stock level, holdings in Mowi and Orsted detracted. 2023 earnings guidance from the latter, a Danish wind farm operator, came in below expectations. Subsequently, concerns around project returns and cost inflation continued to weigh on the shares. In the pharmaceutical sector, a position in Roche detracted as a series of drug pipeline disappointments raised concerns about the Swiss group's research and development capabilities, which had historically been considered a source of strength. A zero weighting in large index constituent LVMH, a perceived beneficiary of China's economic reopening, also detracted. The Sub-fund does not own the stock given concerns surrounding several of the company's products, namely alcohol and animal furs. With the risk of disruption posed by artificial intelligence in the spotlight, the holding in Universal Music detracted despite solid first quarter results, as investors anticipated a slowdown in revenue growth.

On the positive side, a holding in Irish bank AIB was the top performer, underpinned by the positive implications of rising interest rates on income. French reinsurance company SCOR, a new holding added in the first half of the review period, was also a notable contributor. A reassuring trading update was followed by the release of first-quarter earnings that comfortably exceeded consensus forecasts. Industria de Diseno Textil (Inditex), owner of the Zara clothing chain, performed well too; investors were encouraged by the Spanish retailer's strong trading momentum.

Regarding portfolio activity, a holding in French group Publicis Groupe, a provider of advertising and communication services, was established following share price weakness. The company has invested heavily in its digital capability, and from a sustainability perspective, the manager believes Publicis Groupe has credible carbon emission reduction targets. Among financials, ING Groep was added to the portfolio. ING Groep has one of the stronger deposit franchises in Europe, which could enable the Dutch banking services group to generate a return on equity above its peers. From a sustainability standpoint, ING Groep leads its sector in terms of disclosures on net-zero targets. Other notable additions included Irish packaging group Smurfit Kappa, a leader in the manufacturing of corrugated cardboard, a product that offers better biodegradability and recyclability compared with plastic and glass. On the disposals side, a deteriorating trading outlook led the manager to sell the holding in French payment services business Worldline, while global logistics company DHL was sold after a period of strong performance.

While headline inflation is declining from peak levels, core inflation remains stickier than economic forecasters had anticipated, particularly in the UK. The impact of higher interest rates on economic growth will be closely monitored by investors. In this environment, the manager will maintain a clear focus on companies with more resilient long-term earnings profiles, robust end-market prospects and attractive sustainability characteristics.

a) Analysis of the tax charge		
Overseas tax withheld	225,356	461,669
Total tax charge (see Note 6b)	225,356	461,669
b) Factors affecting the tax charge		
The tax assessed for the year is lower (30/06/2022: higher) than the standard rate of corporation tax in the UK for an ICVC (20%) (30/06/2022: 20%).		
The differences are explained below:		
Net revenue before taxation	2,077,302	2,072,616
Corporation tax @ 20%	415,460	414,523
Effects of:		
Movement in unrecognised tax losses	280,391	333,420
Overseas tax withheld	225,356	461,669
Revenue not subject to corporation tax	(695,851)	(747,943)
Total tax charge (see Note 6a)	225,356	461,669
c) Deferred tax		
No deferred tax asset has been recognised in the accounts in relation to tax losses of £41,893,544 (30/06/2022: £40,491,587), as it is unlikely that there will be sufficient taxable profits in the future to utilise these amounts. The deferred tax asset not recognised is £8,378,709 (30/06/2022: £8,098,317).

The balance due to the ACD at 30 June 2023 in respect of these transactions was £311,469 (30/06/2022: £200,760).

Any investments in or transactions with other BNYM related party entities are individually identified in the portfolio statement and the Securities Lending note respectively.

14 Financial instruments

The risk factors relating to the Sub-fund are discussed more fully in Note 2 of the notes applicable to the financial statements of all the Sub-funds on pages 11 to 14.

Market Price Risk

The value of the Sub-fund's investments which were exposed to market price risk was as follows:

	30/06/2023	30/06/2022
	£	£
Investments held at the balance sheet date	132,570,352	114,050,953

Market Price Sensitivity

The following table illustrates the sensitivity of the return and the net assets to an increase or decrease of 5% (30/06/2022: 5%) in the fair values of the Sub-fund's investments. This level of change is considered to be reasonably possible based on observation of market conditions in the year. The sensitivity analysis is based on the impact of a change to the value of the Sub-fund's investments at each balance sheet date.

Derivative risk

The Sub-fund may enter into derivative transactions in the pursuit of its investment objective. Further details about the scope of the Sub-fund's derivative usage can be found in the Prospectus.

Derivatives may be used for efficient portfolio management only.

Counterparty credit risk

Counterparty exposure for non-exchange traded derivatives at 30 June 2023 is as follows:

	Forward Currency	Total
	Contracts	£
	£	£
State Street Global Advisors Limited	(137,370)	(137,370)
Total	(137,370)	(137,370)

The Sub-fund did not have exposure to counterparty credit risk for non-exchange traded derivatives as at 30 June 2022.

Counterparty exposure has not been disclosed for exchange traded derivatives as the exchange requirements in respect of collateral mean that, in the opinion of the ACD, the counterparty risk is mitigated.

Collateral received from these counterparties in respect of derivative contracts was £nil in the form of cash (30/06/2022: £nil).

Collateral pledged to these counterparties in respect of derivative contracts was £nil in the form of cash (30/06/2022: £nil).

Interest rate risk

The Sub-fund does not invest in either fixed or floating rate securities and interest rate risk exposure is restricted to interest receivable on bank deposits or payable on bank overdraft positions which will be affected by fluctuations in interest rates (30/06/2022: nil).

Interest rate sensitivity

The Sub-fund does not have material exposure to interest rate risk and hence no sensitivity analysis has been presented (30/06/2022: nil).

Foreign currency risk

The table that follows details the currency profile of the Sub-fund's assets:

Total transaction costs as a % of average net assets 0.03% 0.08%

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

Separately identifiable direct transaction costs (commissions & taxes etc) are attributable to the Sub-fund's purchase and sale of equity shares. Additionally for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-fund's investment transactions in money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.04% (30/06/2022: 0.08%).

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date (30/06/2022: nil).

17 Securities lending

As at 30 June 2023, there were no investments subject to securities lending agreements.

As at 30 June 2022, there were no investments subject to securities lending agreements.

The gross earnings and the fees for the year are £nil (30/06/2022: £3,537) and £nil (30/06/2022: £672) respectively.

18 Shareholder's funds

Annual Report

for the year ended 30 June 2023

Annual Report & Accounts - BNY Mellon Sustainable Global Dynamic Bond Fund

Fund Report

for the year ended 30 June 2023

General Information

Investment Adviser:	Newton Investment Management Limited
Fund Size:	£307.08m
Comparative Index:	SONIA (30-day compounded) + 2%
Sector:	The Investment Association Targeted Absolute Return
Key Dates: Fund Launch	30 January 2020

Investment Objective

The Sub-fund aims to achieve income and capital growth over the medium term (3-5 years). The Sub-fund is managed to seek a minimum return of cash SONIA (30-day compounded) + 2% per annum over five years before fees. In doing so, it aims to achieve a positive return on a rolling three year basis (meaning a period of three years, no matter which day you start on). However, a positive return is not guaranteed and a capital loss may occur.

Investment Policy

The Sub-fund is actively managed and invests at least 75% of the portfolio in global fixed interest securities (bonds) issued by governments, other public entities and companies (together the "issuers") that meet the Investment Manager's sustainability criteria, where governance and governance ("ESG") considerations are an integral part of the criteria. The Investment Manager focuses on identifying issuers that demonstrate sustainable business practices and an ability to generate returns consistent with the Sub-fund's objective. Sustainable business practices are those which positively manage the material impacts of an issuer's operations and products on the environment and society.

When determining whether an issuer meets the Investment Manager's sustainability criteria, the Investment Manager considers whether the issuer: (i) engages in sustainable business practices in an economic sense (e.g., the issuer's strategy, operations and finances are stable and durable), and (ii) takes appropriate measures to manage any material consequences or impact of its policies and operations in relation to ESG matters (e.g., the issuer's environmental footprint, labour standards, board structure).

The Investment Manager's sustainability criteria incorporate elements of negative screening alongside other general and issuer level ESG-related analysis of an issuer's activities. Specifically, the Investment Manager, seeks to:

Identify and avoid issuers that participate in specific areas of activity that the Investment Manager deems to be harmful from an environmental or social perspective or which do not follow good governance practices. As an example, the Investment Manager could deem issuers that have large carbon footprints or companies with poor labour standards ineligible for investment. It will also exclude issuers in breach of the UN Global Compact principles which includes principles relating to human rights, labour, environment and anti-corruption, as well as companies that produce tobacco products. The Sub-fund also adopts a policy of making no direct investment in companies that derive more than 10% of turnover from the sale of tobacco.

Identify and invest in issuers that are proactively seeking to manage environmental and/or social factors well, which in turn should support long-term financial returns. This may also include those issuers that are contributing to the development of solutions that will contribute towards addressing environmental and/or social issues, examples of which could include more efficient or reduced use of natural resources or accessibility to healthcare.

Issuers engaged in sustainable business practices may also include companies that have committed explicitly to improving their environmental and/or social impacts leading to a transformation of their business models. There may be situations where the Sub-fund will invest in an issuer that has been identified as having involvement in potentially harmful activities from an environmental or social perspective. This may arise for certain issuers whose activities or operations, typically due to a legacy business mix, may have historically created poor environmental or social outcomes, but that are now investing in and positively adapting to future needs (for example, this may include energy companies that are preparing for a transition to a lower carbon world). Similarly, in some instances, the Sub-fund may invest in an issuer where the Investment Manager determines through engagement with the issuer that prevailing ESG information and data provided by external ESG ratings providers have not fully captured positive environmental or social initiatives of the issuer.

When determining whether an issuer meets the Investment Manager's sustainability criteria the Investment Manager uses a combination of external and internal data, research and ratings which are qualitative and quantitative in nature.

The Sub-fund may also invest in deposits, cash and near cash. Exposure to these asset classes will be achieved through investment in money market instruments, warrants, derivatives (including but not limited to currency related derivatives), transferable securities (such as bonds, convertible bonds, contingent convertible bonds, debentures, notes, asset backed securities and mortgage backed securities) and collective investment schemes (including but not limited to another Sub-fund or Sub-funds of the Company or other BNY Mellon funds).

The Sub-fund may invest in any geographic or economic sector of the world, including emerging markets.

The Sub-fund may invest more than 35% of its assets in government and public securities (those issued or guaranteed by a single state, local authority or public international body).

The Sub-fund may invest in bonds rated below investment grade (BBB-) by Standard & Poor's (or equivalent recognised rating agency).

The Sub-fund could invest a significant portion of the portfolio in cash/cash-like securities during extreme market conditions.

Further details in relation to the current sustainability criteria may be obtained by contacting the ACD. Investors should be aware that these criteria may change over time.

Derivatives may be used for investment purposes as well as for efficient portfolio management and hedging. It is not expected that the use of derivatives will materially affect the overall risk profile of the Sub-fund.

The Sub-fund uses sterling cash SONIA (30-day compounded) + 2% per annum over five years before fees as a target set for the Sub-fund's performance to match or exceed. The ACD considers SONIA (30-day compounded) + 2% per annum over five years before fees to be an

appropriate target because, while it does not take ESG factors into account, SONIA (30-day compounded) is representative of cash and the Sub-fund's investment objective is to seek a minimum return of sterling cash + 2% per annum.

Portfolio Summary

Over the 12-month period under review, the Institutional Shares W (Accumulation) share class of the Sub-fund generated a return of 2.01%, compared with a return of 4.99% for the SONIA (30-day compounded) +2% benchmark, both in sterling terms. The Sub-fund produced a positive return but underperformed its comparative benchmark.

Emerging market sovereign bonds contributed to returns. The greatest contribution came from the Sub-fund's holdings in local currency emerging market government bonds, particularly those from Colombia. Sovereign bonds in Mexico, Brazil and Peru also contributed, although the Sub-fund's Bolivian exposure detracted from returns. Currency hedging back into the Sub-fund's base currency (sterling, which strengthened over the period) was beneficial to returns. The small amount of derivative instruments (call and put options) added value as well.

The Sub-fund's government bond and investment grade bond holdings produced negative returns. Long-dated US Treasuries detracted, most notably the 2045 bond, as interest rates continued to rise. As yield curves flattened, the largest detractors were long-dated securities held across the US, Denmark, Spain and Australia. Investment grade credit suffered from its high correlation with government bonds.

In the first half of the period, the manager gradually increased duration and exposure to developed market government bonds. Long-dated US Treasuries and European government bonds, as well as US Treasury Inflation-Protected Securities, were added. The Sub-fund's weighting in high yield credit was cut via a number of reductions as the outlook for economic growth and liquidity deteriorated. In local currency emerging markets, Peruvian and Mexican bonds were purchased. The manager continued to increase duration as 2023 began. This was achieved largely by adding exposure to various government bond markets, including the US, the UK and Norway. Duration was also added through purchases of emerging market sovereign bonds. Purchases in this area included long-dated hard currency Brazilian bonds and local currency Brazil, Bahamas and Uruguay securities. Exposure to hard currency Bolivian bonds was exited. Slightly offsetting this, the manager initiated short positions in Australian three-year and US two-year government bond futures. Investment grade credit exposure was raised through highly rated sterling covered bonds, such as Lloyds Bank and the Commonwealth Bank of Australia. Sales included Dollar General, American Express and Volkswagen.

Turning to currencies, the manager moved the Sub-fund from a long US dollar position to a short one late in 2022, increasing the short through 2023. Exposure to the euro was raised, although this long euro position was later reduced on profit-taking. Mexican and Uruguayan peso exposure was also increased, while the Philippine peso was shorted. Australian dollar and Czech koruna long positions were introduced later in the period.

It is the manager's belief that economic growth will suffer and inflation will cool in the second half of 2023 as the impact of monetary policy tightening is felt. Against this backdrop, the Sub-fund remains biased towards government bond exposure, and will maintain a low weighting in high yield bonds. The manager favours emerging market currencies in countries where central banks have been proactive in addressing inflation.

[†]The closing net asset value per share figure is based on the bid-market prices at close of business, whilst the highest/lowest share prices are based on mid dealing prices (the price at which shares are sold).

*Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there may be other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which may also have reduced the Sub-fund and share class returns before operating charges.

**The Operating Charges figure is made up of the Annual Management Charge (AMC) and other operating costs. Other operating costs include the costs for other services paid for by the Sub-fund, such as the fees paid to the Fund Accountant, Fund Administrator, Depositary, Custodian, Auditor and Regulator. The Operating Charges figure shown is calculated on an ex-post basis over the period, whereas the Ongoing Charges figure shown in the Key Investor Information Document (KIID) is a calculation as at a point in time, and therefore there could be immaterial differences between the two. The operating charges are annualised for share classes launched during the year.

The balance due to the ACD at 30 June 2023 in respect of these transactions was £299,232 (30/06/2022: The balance due from the ACD was £196,560).

Any investments in or transactions with other BNYM related party entities are individually identified in the portfolio statement and the Securities Lending note respectively.

14 Financial instruments

The risk factors relating to the Sub-fund are discussed more fully in Note 2 of the notes applicable to the financial statements of all the Sub-funds on pages 11 to 14.

Market Price Risk

The Sub-fund uses Value at Risk (VaR) to calculate the likelihood of the Sub-fund (including derivatives) falling in value by more than a particular level.

Under normal market conditions, VaR captures the potential fall in the value of the portfolio over a given holding period and to a given level of statistical confidence.

VaR is discussed in more detail, with the relevant disclosures for the financial year, in the notes applicable to the financial statements of all Sub-funds on page 12.

Total transaction costs		12		—	
Total transaction costs as a % of average net assets		0.01%		0.00%	

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

For the Sub-fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

During the year the Sub-fund utilised derivative instruments. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivative positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.27% (30/06/2022: 0.29%).

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date (30/06/2022: nil).

17 Securities lending

As at 30 June 2023, there were no investments subject to securities lending agreements.

As at 30 June 2022, there were no investments subject to securities lending agreements.

The gross earnings and the fees for the year are £nil (30/06/2022: £nil) and £nil (30/06/2022: £nil) respectively.

Fund Report

for the year ended 30 June 2023

General Information

Investment Adviser:	Newton Investment Management Limited
Fund Size:	£8.68m
Comparative Index:	MSCI Emerging Markets NR
Sector:	The Investment Association Global Emerging Markets
Key Dates: Fund Launch	16 December 2021

Investment Objective

The Sub-fund aims to achieve capital growth over the long term (5 years or more).

Investment Policy

The Sub-fund is actively managed and invests at least 75% of the portfolio in equity (company shares) and equity-related securities (these may include, but are not limited to, ETFs, REITs, P Notes and convertible bonds) that meet the Investment Manager's sustainability criteria, where environmental, social and governance ("ESG") considerations are an integral part of the criteria.

The Sub-fund will invest at least 75% of the portfolio in companies listed, traded, located or deriving at least half of their revenue or income from emerging market countries across the world.

The Investment Manager focuses on identifying companies that demonstrate sustainable business practices and an ability to generate returns consistent with the Sub-fund's objective. Sustainable business practices are those which positively manage the material impacts of a company's operations and products on the environment and society.

When determining whether a company engages in sustainable business practices and meets the Investment Manager's ESG and sustainability criteria, the Investment Manager considers whether the company (i) engages in such practices in an economic sense (e.g. the company's strategy, operations and finances are stable and durable), and (ii) takes appropriate measures to manage any material consequences or impact of its policies and operations in relation to ESG matters (e.g., the company's environmental footprint, labour standards, board structure).

The Investment Manager's sustainability criteria incorporate elements of negative screening alongside other general and company level ESG-related analysis of a company's activities. Specifically, the Investment Manager, seeks to:

Identify and avoid companies that participate in specific areas of activity that the Investment Manager deems to be harmful from an environmental, or social perspective or which do not follow good governance practices. As an example, the Investment Manager could deem companies that have large carbon footprints or companies with poor labour standards ineligible for investment. It will also exclude companies in breach of the UN Global Compact principles which includes principles relating to human rights, labour, environment and anti-corruption, as well as companies that produce tobacco products. The Sub-fund also adopts a policy of making no direct investment in companies that derive more than 10% of turnover from the sale of tobacco.

Identify and invest in companies that are proactively seeking to manage environmental and/or social factors well, which in turn should support long-term financial returns. This may also include those companies that are contributing to the development of solutions that will contribute towards addressing environmental and/or social issues, examples of which could include more efficient or reduced use of natural resources or accessibility to healthcare.

Companies engaged in sustainable business practices may also include companies that have committed explicitly to improving their environmental and/or social impacts leading to a transformation of their business models. There may be situations where the Sub-fund will invest in a company that has been identified as having involvement in potentially harmful activities from an environmental or social perspective. This may arise for certain companies whose activities or operations, typically due to a legacy business mix, may have historically created poor environmental or social outcomes but that are now investing in and positively adapting to future needs (for example, this may include energy companies that are preparing for a transition to a lower carbon world). Similarly, in some instances, the Sub-fund may invest in a company where the Investment Manager determines through engagement with the company, that prevailing ESG information and data provided by external ESG ratings providers have not fully captured positive environmental, or social initiatives of the company.

When determining whether a company meets the Investment Manager's sustainability criteria the Investment Manager uses a combination of external and internal data, research and ratings which are qualitative and quantitative in nature.

Further details in relation to the current sustainability criteria may be obtained by contacting the ACD. Investors should be aware that these criteria may change over time.

The Sub-fund may also invest in collective investment schemes (including but not limited to another Sub-fund or Sub-funds of the Company or other BNY Mellon funds), derivatives (including but not limited to equity and currency-related derivatives), money market instruments, deposits, cash and near cash.

Derivatives may be used for investment purposes as well as for efficient portfolio management and hedging. It is not expected that the use of derivatives will materially affect the overall risk profile of the Sub-fund.

Portfolio Summary

Over the 12-month period under review, the Sub-fund's Institutional Shares W (Accumulation) share class returned 0.05%, net of fees, compared with a return of -2.80% for the MSCI Emerging Markets NR Index, both in sterling terms. The Sub-fund produced a marginally positive return and outperformed its benchmark. Both stock selection and asset allocation contributed to the Sub-fund's superior relative returns.

At the stock level, Infineon Technologies was the Sub-fund's top performer, supported by a robust set of first-quarter results in which margin expansion proved the highlight. Thanks to sustained strength in the automotive and industrial segments, guidance for the second quarter and full year was subsequently raised. Semiconductor production equipment manufacturer ASML was boosted by investor confidence in its long-term growth and returns outlook, as well as positive earnings momentum. Brazilian industrial electronic equipment manufacturer WEG performed well, benefiting from demand for its energy efficiency technology. The zero weighting in Alibaba Group contributed to returns, as the share price of the e-commerce stock slumped. A zero weighting in China's Meituan also contributed. The stock fell on concerns around rising competition, as a news report suggested that competitor Douyin would be rolling out its food-delivery service.

On the negative side, LONGi Green Energy Technology was a major detractor, owing to concerns about intensifying competition as solar photovoltaic wafer industry capacity continues to build out. Chinese battery maker Wuxi Lead Intelligent Equipment underperformed as investors considered the resilience of orders in a recessionary environment and demand challenges for electric vehicles. Drug research and development company Pharmaron Beijing also weighed on returns. The share price came under pressure in the wake of US banking stress, with concerns over the possibility of a constraint on access to capital for its smaller biotechnology customer base.

Regarding portfolio activity, a stake was taken in Sona BLW Precision Forgings, which is a leading Indian manufacturer of precision-forged auto components. In the manager's view, the company boasts an engineering and technological advantage that surpasses its peers and could be a clear beneficiary of the growth in two and four-wheel electric vehicles. A new position was established in Taiwan's Chroma ATE. The company provides customised automated testing equipment and has a leading market position in electric vehicle power testing globally. Chroma ATE's power-testing revenue is expected to continue to grow strongly.

The holding in Chinese battery maker Wuxi Lead Intelligent Equipment was sold owing to the manager's concerns over the possibility of lower growth and lower returns, given the industry's overcapacity. LONGi Green Energy Technology was also sold on concerns over diminishing returns given intensifying competition. The holding in ICICI Prudential Life Insurance was switched into HDFC Life.

Emerging market equities currently trade at an unusually high discount to developed markets, providing a conducive backdrop if shorter-term variables prove favourable. In the manager's view, the longer-term opportunities in emerging markets are based on relatively high levels of income growth, rapid increases in product penetration, and scope for industry consolidation. The manager believes that there seems to be a unique opportunity for emerging market companies that are exposed to reliable secular growth trends.

Total tax charge (see Note 6b)	18,441	12,128
b) Factors affecting the tax charge		
The tax assessed for the year is higher (30/06/2022: higher) than the standard rate of corporation tax in the UK for an ICVC (20%) (30/06/2022: 20%).		
The differences are explained below:		
Net revenue before taxation	58,080	56,960
Corporation tax @ 20%	11,616	11,392
Effects of:		
Indian capital gains tax	660	(1,014)
Movement in unrecognised tax losses	11,411	6,419
Overseas tax withheld	17,781	13,142
Relief on overseas tax expensed	(60)	(17)
Revenue not subject to corporation tax	(22,967)	(17,794)
Total tax charge (see Note 6a)	18,441	12,128
c) Deferred tax		
No deferred tax asset has been recognised in the accounts in relation to tax losses of £89,152 (30/06/2022: £32,097), as it is unlikely that there will be sufficient taxable profits in the future to utilise these amounts. The deferred tax asset not recognised is £17,830 (30/06/2022: £6,419).

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

Separately identifiable direct transaction costs (commissions & taxes etc) are attributable to the Sub-fund's purchase and sale of equity shares. Additionally for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-fund's investment transactions in money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.11% (30/06/2022: 0.18%).

Key Dates: Fund Launch	22 January 2018

Investment Objective

The Sub-fund aims to achieve capital growth and income over the long term (5 years or more).

Investment Policy

The Sub-fund is actively managed and invests at least 75% of its assets in a concentrated portfolio of global equities (company shares) that meet the Investment Manager's sustainability criteria, where environmental, social and governance ("ESG") considerations are an integral part of the criteria. The Investment Manager focuses on identifying companies that demonstrate sustainable business practices and an ability to generate returns consistent with the Sub-fund's objective. Sustainable business practices are those which positively manage the material impacts of a company's operations and products on the environment and society.

When determining whether a company engages in sustainable business practices and meets the Investment Manager's sustainability criteria, the Investment Manager considers whether the company (i) engages in such practices in an economic sense (e.g. the company's strategy, operations and finances are stable and durable), and (ii) takes appropriate measures to manage any material consequences or impact of its policies and operations in relation to ESG matters (e.g., the company's environmental footprint, labour standards, board structure).

The Investment Manager's sustainability criteria incorporate elements of negative screening alongside other general and company level ESG-related analysis of a company's activities. Specifically, the Investment Manager, seeks to:

Identify and avoid companies that participate in specific areas of activity that the Investment Manager deems to be harmful from an environmental or social perspective or which do not follow good governance practices. As an example, the Investment Manager could deem companies that have large carbon footprints or companies with poor labour standards ineligible for investment. It will also exclude companies in breach of the UN Global Compact principles which includes principles relating to human rights, labour, environment and anti-corruption, as well as companies that produce tobacco products. The Sub-fund also adopts a policy of making no direct investment in companies that derive more than 10% of turnover from the sale of tobacco.

Identify and invest in companies that are proactively seeking to manage environmental and/or social factors well, which in turn should support long-term financial returns. This may also include those companies that are contributing to the development of solutions that will contribute towards addressing environmental and/or social issues, examples of which could include more efficient or reduced use of natural resources or accessibility to healthcare.

Companies engaged in sustainable business practices may also include companies that have committed explicitly to improving their environmental and/or social impacts leading to a transformation of their business models. There may be situations where the Sub-fund will invest in a company that has been identified as having involvement in potentially harmful activities from an environmental or social perspective. This may arise for certain companies whose activities or operations, typically due to a legacy business mix, may have historically created poor environmental or social outcomes, but that are now investing in and positively adapting to future needs (for example, this may include energy companies that are preparing for a transition to a lower carbon world). Similarly, in some instances, the Sub-fund may invest in a company where the Investment Manager determines through engagement with the company, that prevailing ESG information and data provided by external ESG ratings providers have not fully captured positive environmental or social initiatives of the company.

When determining whether a company meets the Investment Manager's sustainability criteria the Investment Manager uses a combination of external and internal data, research and ratings which are qualitative and quantitative in nature.

Further details in relation to the current sustainability criteria may be obtained by contacting the ACD. Investors should be aware that these criteria may change over time.

The Sub-fund may also invest in collective investment schemes (including but not limited to another Sub-fund or Sub-funds of the Company or other BNY Mellon funds), derivatives (including but not limited to currency related derivatives), money market instruments, deposits, cash and near cash.

The Sub-fund may invest in any geographic or economic sector, including emerging markets.

Derivatives may be used for investment purposes as well as for efficient portfolio management and hedging. It is not expected that the use of derivatives will materially affect the overall risk profile of the Sub-fund.

Portfolio Summary

Over the 12-month period under review, the Institutional W (Accumulation) share class of the Sub-fund generated a return of 9.78%, net of fees, compared with a return of 11.31% for the MSCI AC World NR Index, both in sterling terms. The Sub-fund generated a positive return but underperformed its benchmark, largely owing to stock selection, although regional asset allocation had a positive impact on returns.

At the stock level, US electricity and gas supplier CMS Energy was the weakest performer. Utilities underperformed the broader equity market indices, and along with real estate companies, was the only major sector to post a loss over the 12-month review period. Among consumer staples, US food and renewable fuel processor Darling Ingredients lost ground after third-quarter earnings fell short of market expectations. Nonetheless, the long-term outlook for renewable diesel and sustainable aviation fuel improved following the passing of the Inflation Reduction Act in the US, which should prove supportive of the company's bioenergy division. Having been on a strong run of performance following China's economic reopening, Hong Kong-based insurer AIA was caught up in broader concerns around the health of the financial sector, triggered by the failure of Silicon Valley Bank and Signature Bank in the US, and the rescue of troubled Swiss banking group Credit Suisse.

Ingersoll Rand, a US provider of industrial solutions, was the top performer, as the secular shift towards energy-efficient upgrades, and the reshoring of manufacturing facilities, overrode concerns about the cyclicity of the company's earnings. Among technology stocks, SAP performed well after the German business software supplier announced the sale of its stake in US management software company Qualtrics. Heating and air conditioning manufacturer Trane Technologies was also a notable contributor, as second-quarter earnings came in ahead of market expectations.

Regarding activity, new positions were added in leading global clinical research group ICON and life insurer Ping An Insurance of China in the first half of the period. In the second half, the manager purchased a holding in Roper Technologies, which designs and develops software. The company's sustainability characteristics are strong, while its product mix has shifted to higher-growth software and network-driven businesses. Hermes International, a France-based company which designs, manufactures, and sells luxury products, was added, as it displays key sustainability characteristics through its policy of sourcing sensitive raw materials responsibly. Further purchases included holdings in semiconductor companies NVIDIA and Taiwan Semiconductor Manufacturing, as well as industrial and healthcare equipment company Danaher.

The Sub-fund's holding in Abbot Laboratories was sold on concerns about the company's earnings prospects following the Covid-19 pandemic. The manager also exited positions in Norwegian sustainable technology group Tomra Systems, telecommunications conglomerate Verizon Communications, and software group Intuit. Elsewhere, holdings in investment bank JP Morgan and CMS Energy were reduced.

The immediate outlook for global equity markets is likely to be shaped by any lagged impact from higher interest rates. The manager will continue to seek out businesses with attractive sustainability credentials and quality characteristics.

**The Operating Charges figure is made up of the Annual Management Charge (AMC) and other operating costs. Other operating costs include the costs for other services paid for by the Sub-fund, such as the fees paid to the Fund Accountant, Fund Administrator, Depositary, Custodian, Auditor and Regulator. The Operating Charges figure shown is calculated on an ex-post basis over the period, whereas the Ongoing Charges figure shown in the Key Investor Information Document (KIID) is a calculation as at a point in time, and therefore there could be immaterial differences between the two. The operating charges are annualised for share classes launched during the year.

*Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there may be other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which may also have reduced the Sub-fund and share class returns before operating charges.

**The Operating Charges figure is made up of the Annual Management Charge (AMC) and other operating costs. Other operating costs include the costs for other services paid for by the Sub-fund, such as the fees paid to the Fund Accountant, Fund Administrator, Depository, Custodian, Auditor and Regulator. The Operating Charges figure shown is calculated on an ex-post basis over the period, whereas the Ongoing Charges figure shown in the Key Investor Information Document (KIID) is a calculation as at a point in time, and therefore there could be immaterial differences between the two. The operating charges are annualised for share classes launched during the year.

a) Analysis of the tax charge		
Overseas tax withheld	109,260	119,883
Total tax charge (see Note 6b)	109,260	119,883
b) Factors affecting the tax charge		
The tax assessed for the year is lower (30/06/2022: lower) than the standard rate of corporation tax in the UK for an ICVC (20%) (30/06/2022: 20%).		
The differences are explained below:		
Net revenue before taxation	1,024,306	1,036,851
Corporation tax @ 20%	204,861	207,370
Effects of:		
Movement in unrecognised tax losses	3,440	4,814
Overseas tax withheld	109,260	119,883
Revenue not subject to corporation tax	(208,301)	(212,184)
Total tax charge (see Note 6a)	109,260	119,883
c) Deferred tax		
No deferred tax asset has been recognised in the accounts in relation to tax losses of £114,497 (30/06/2022: £97,293), as it is unlikely that there will be sufficient taxable profits in the future to utilise these amounts. The deferred tax asset not recognised is £22,899 (30/06/2022: £19,459).

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

Separately identifiable direct transaction costs (commissions & taxes etc) are attributable to the Sub-fund's purchase and sale of equity shares. Additionally for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-fund's investment transactions in money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.04% (30/06/2022: 0.07%).

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date (30/06/2022: nil).

General Information

Investment Adviser:	Newton Investment Management Limited
Fund Size:	£198.35m
Comparative Index:	FTSE World TR
Sector:	The Investment Association Global Equity Income
Key Dates: Fund Launch	18 July 2019

Investment Objective

The Sub-fund aims to achieve income together with the potential for capital growth over the long term (5 years or more).

Investment Policy

The Sub-fund is actively managed and invests at least 75% of the portfolio in equities (company shares) issued by companies located anywhere in the world (including ordinary shares, preference shares and other equity-related securities) that meet the Investment Manager's sustainability criteria, where environmental, social and governance ("ESG") considerations are an integral part of the criteria.

The Sub-fund aims to invest in shares with income prospects, meaning a yield (this is the income from an investment, usually stated as a percentage of the value of the investment) in excess of the FTSE World TR Index (the "Index") at the time of purchase. There is no guarantee that the Sub-fund will achieve its investment objective.

The Investment Manager focuses on companies that demonstrate sustainable business practices and an ability to generate returns consistent with the Sub-fund's objective. Sustainable business practices are those which positively manage the material impacts of a company's operations and products on the environment and society.

When determining whether a company engages in sustainable business practices and meets the Investment Manager's ESG and sustainability criteria, the Investment Manager considers whether the company (i) engages in such practices in an economic sense (e.g. the durability of the company's strategy, operations and finances are stable and durable), and (ii) takes appropriate measures to manage any material consequences or impact of its policies and operations in relation to ESG matters (e.g., the company's environmental footprint, labour standards, board structure).

The Investment Manager's sustainability criteria incorporate elements of negative screening alongside other general and company level ESG-related analysis of a company's activities. Specifically, the Investment Manager, seeks to:

Identify and avoid companies that participate in specific areas of activity that the Investment Manager deems to be harmful from an environmental or social perspective or which do not follow good governance practices. As an example, the Investment Manager could deem companies that have large carbon footprints or companies with poor labour standards ineligible for investment. It will also exclude companies in breach of the UN Global Compact principles which includes principles relating to human rights, labour, environment and anti-corruption, as well as companies that produce tobacco products. The Sub-fund also adopts a policy of making no direct investment in companies that derive more than 10% of turnover from the sale of tobacco.

Identify and invest in companies that are proactively seeking to manage environmental and/or social factors well, which in turn should support long-term financial returns. This may also include those companies that are contributing to the development of solutions that will contribute towards addressing environmental and/or social issues, examples of which could include more efficient or reduced use of natural resources or accessibility to healthcare.

Companies engaged in sustainable business practices may also include companies that have committed explicitly to improving their environmental and/or social impacts leading to a transformation of their business models. There may be situations where the Sub-fund will invest in a company that has been identified as having involvement in potentially harmful activities from an environmental or social perspective. This may arise for certain companies whose activities or operations, typically due to a legacy business mix, may have historically created poor environmental or social outcomes, but that are now investing in and positively adapting to future needs (for example, this may include energy companies that are preparing for a transition to a lower carbon world). Similarly, in some instances, the Sub-fund may invest in a company where the Investment Manager determines through engagement with the company, that prevailing ESG information and data provided by external ESG ratings providers have not fully captured positive environmental or social initiatives of the company.

When determining whether a company meets the Investment Manager's sustainability criteria the Investment Manager uses a combination of external and internal data, research and ratings which are qualitative and quantitative in nature.

Further details in relation to the current sustainability criteria may be obtained by contacting the ACD. Investors should be aware that these criteria may change over time.

The Sub-fund typically invests directly in the shares of fewer than 70 companies.

The Sub-fund may also invest in collective investment schemes (including but not limited to another Sub-fund or Sub-funds of the Company or other BNY Mellon funds), derivatives (including but not limited to currency-related derivatives), money market instruments, deposits, cash and near cash.

The Sub-fund is not constrained by any Index weightings and will not concentrate on any particular country, sector or market capitalisation. The Sub-fund may also invest in emerging markets, meaning countries which are progressing toward becoming advanced, usually displayed by some development in financial markets, the existence of some form of stock exchange and a regulatory body.

Derivatives may be used for investment purposes as well as for efficient portfolio management and hedging. It is not expected that the use of derivatives will materially affect the risk profile of the Sub-fund.

Portfolio Summary

Over the 12-month period under review, the Institutional Shares W (Accumulation) share class of the Sub-fund generated a return of 10.32%, net of fees, compared with a return of 13.46% for the FTSE World TR Index, both in sterling terms. The Sub-fund generated a positive return but underperformed its comparative benchmark, largely due to sector allocation.

Positioning in the technology sector was the main factor that detracted from the Sub-fund's relative performance. The technology sector rode a wave of positive sentiment after US chipmaker NVIDIA released earnings guidance that greatly exceeded market participants' expectations, driven by a surge in demand for chips used in generative artificial intelligence (AI) systems. A lack of holdings in NVIDIA, Apple and Microsoft proved negative, as these three stocks rose sharply and outperformed equity market indices. They are ineligible for inclusion in the Sub-fund as they don't meet its strict yield discipline. Positions in several healthcare stocks also detracted. Pharmaceutical group Organon, a spin-off from Merck, disappointed; the company has been prevented from using its excess free cash flow to supplement growth through acquisitions by the rising cost of debt, and as a result, the holding was sold. Roche declined after reporting that two of its late-stage Alzheimer's treatment studies had failed.

Inditex was the top-performing holding in the Sub-fund over the period; the Spanish clothing retailer reported earnings ahead of market expectations. Insurer Muenchener Rueckve was also a strong performer, as the company's second-quarter results revealed strong margins and robust capital ratios. The Sub-fund's holding in Broadcom was a beneficiary of AI-related demand for semiconductors. The company also sealed a major deal with Apple to supply the iPhone manufacturer with 5G components.

In the first half of the period, the manager purchased positions in Taiwanese electronics company MediaTek, Broadcom and Italian utility Enel. In 2023, the manager added Brazilian stock exchange operator B3 - Brasil Bolsa Balcao to the portfolio. In the consumer discretionary sector, a new position was added in French advertising and communication services business Publicis Groupe, which has invested heavily in its digital capability. The manager also purchased a new holding in Taiwan's Chroma ATE. The company provides customised automated testing equipment and has a leading market position in electric power testing. From an environmental, social and corporate governance perspective, Chroma ATE has an established climate change policy and is careful to disclose its environmental impact, including carbon emissions. Additional purchases in the period included French reinsurance company SCOR and Veolia Environnement, which designs and provides water, waste and energy management solutions.

The manager sold Hewlett Packard, as despite the company's large order backlog, the cycle for information technology hardware appears to be turning. The holding in events organiser Informa was also sold after a period of strong performance was reflected in its share price.

It is the manager's belief that to combat inflated consumer prices, interest rates will have to remain higher for longer, providing a favourable backdrop for selected income stocks well placed to raise their dividends and help protect investors from the impacts of inflation.

6 Taxation

	30/06/2023	30/06/2022
	£	£
a) Analysis of the tax charge		
Overseas tax withheld	940,456	441,512
Total tax charge (see Note 6b)	940,456	441,512
b) Factors affecting the tax charge		
The tax assessed for the year is lower (30/06/2022: lower) than the standard rate of corporation tax in the UK for an ICVC (20%) (30/06/2022: 20%).		
The differences are explained below:		
Net revenue before taxation	5,752,547	2,824,706
Corporation tax @ 20%	1,150,509	564,941
Effects of:		
Movement in unrecognised tax losses	180,580	110,626
Overseas tax withheld	940,456	441,512
Relief on overseas tax expensed	(565)	—
Revenue not subject to corporation tax	(1,330,524)	(675,567)
Total tax charge (see Note 6a)	940,456	441,512
c) Deferred tax		
No deferred tax asset has been recognised in the accounts in relation to tax losses of £1,708,346 (30/06/2022: £805,447), as it is unlikely that there will be sufficient taxable profits in the future to utilise these amounts. The deferred tax asset not recognised is £341,669 (30/06/2022: £161,089).

Foreign currency sensitivity

The following tables illustrate the sensitivity of the return and net assets of the Sub-fund to a 5% (30/06/2022: 5%) strengthening or weakening of its base rate currency against other currencies to which there is significant exposure to. This level of change is considered to be a reasonable illustration based on observation of current market conditions. The sensitivity analysis assumes all other variables are held constant.

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

Separately identifiable direct transaction costs (commissions & taxes etc) are attributable to the Sub-fund's purchase and sale of equity shares. Additionally for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-fund's investment transactions in money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

For the Sub-fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However additionally there are indirect transaction costs suffered in those underlying funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

Fund Report

for the year ended 30 June 2023

General Information

Investment Adviser:	Newton Investment Management Limited
Fund Size:	£380.50m
Comparative Index:	SONIA (30-day compounded) + 4%
Sector:	The Investment Association Targeted Absolute Return
Key Dates: Fund Launch	24 April 2018

Investment Objective

The Sub-fund seeks to achieve a rate of return in Sterling terms that is equal to or above the return from cash SONIA (30-day compounded) + 4% per annum over five years before fees. In doing so, it aims to achieve a positive return on a rolling three year basis (meaning a period of three years, no matter which day you start on). However, capital is in fact at risk and there is no guarantee that this will be achieved over that, or any, time period.

Investment Policy

To achieve its investment objective, the Sub-fund will invest predominantly, meaning at least 75%, in a portfolio of UK and international securities across a broad diversified range of asset classes.

The Sub-fund may invest directly or indirectly in equities, fixed interest securities, currencies, cash, near cash, deposits, warrants, infrastructure, renewable energy, property, commodities and approved money market instruments. Exposure to these asset classes is expected to be achieved through a combination of transferable securities (such as company shares, convertible bonds, contingent convertible bonds, listed investment trusts, REITs, bonds, structured notes), collective investment schemes (which may include those managed or operated by the ACD or an associate of the ACD) and derivatives. Exposure to infrastructure, renewable energy, property or commodities may be gained through exchange listed securities and/or collective investment schemes.

Issuers eligible for investment are expected to demonstrate an ability to generate returns consistent with the Sub-fund's objective and sustainable business practices. Sustainable business practices, in the context of the Sub-fund's corporate investments are those which positively manage the material impacts of an issuer's operations and products on the environment and society. Sustainable behaviours, in the context of the Sub-fund's sovereign investments, are those which, in the view of the Investment Manager, positively manage or demonstrate progress in respect of ESG factors.

All direct investments will be expected to conform to the Investment Manager's sustainability criteria, where environmental, social and, governance (ESG) considerations are an integral part of the criteria.

When determining whether an issuer meets the Investment Manager's sustainability criteria, the Investment Manager considers whether the issuer: (i) engages in such practices in an economic sense (e.g., the issuer's strategy, operations and finances are stable and durable), and (ii) takes appropriate measures to manage any material consequences or impact of its policies and operations in relation to ESG matters (e.g., the issuer's environmental footprint, labour, or human rights standards and/or board or government structure, subject to the specific nature of the investment).

The Investment Manager's sustainability criteria incorporate elements of negative screening alongside other general and issuer level ESG-related analysis of an issuer's activities. Specifically, the Investment Manager, seeks to:

Identify and avoid issuers that participate in specific areas of activity that the Investment Manager deems to be harmful from an environmental or social perspective or which do not follow good governance practices. As an example, the Investment Manager could deem issuers that have large carbon footprints or companies with poor labour standards, or sovereign issuers with poor control of corruption ineligible for investment. The Investment Manager will exclude corporate issuers in breach of the UN Global Compact principles which includes principles relating to human rights, labour, environment and anti-corruption, as well as companies that produce tobacco products. The Sub-fund also adopts a policy of making no direct investment in companies that derive more than 10% of turnover from the sale of tobacco. The Investment Manager will also exclude sovereign issuers that in the view of the Investment Manager exhibit material negative management of environmental, social or governance factors.

Identify and invest in issuers that are proactively seeking to manage environmental and/or social factors well, which in turn should support long-term financial returns. This may also include those issuers that are contributing to the development of solutions that will contribute towards addressing environmental and/or social issues, examples of which could include more efficient or reduced use of natural resources or accessibility to healthcare.

Issuers engaged in sustainable business practices may also include those companies that have committed explicitly to improving their environmental and/or social impacts.

When determining whether an issuer meets the Investment Manager's sustainability criteria, the Investment Manager uses a combination of external and internal data, research and ratings which are qualitative and quantitative in nature.

The Sub-fund may invest more than 35% of its assets in government and public securities issued or guaranteed by a single state, local authority or public international body. Subject to FCA regulations, the relative exposure between these asset classes will be actively managed and will be varied as deemed necessary in order to achieve the investment objective. This may result in the Sub-fund having no exposure to particular asset classes. The Sub-fund may invest in any geographic or economic sectors of the world.

Derivatives may be used with a view to generating investment returns in pursuit of the Sub-fund's investment objective, and for efficient portfolio management. It is not expected that the use of derivatives will materially affect the overall risk profile of the Sub-fund.

The Investment Manager may use alternative risk premia strategies, hereafter referred to as 'ARP' strategies, to implement the investment strategy. ARP strategies seek to gain exposure to risk premia (the return or reward an investor earns to bear risk) that would not usually be directly accessible through traditional investment instruments (for example by investing directly in equities or bonds).

Annual Report & Accounts - BNY Mellon Sustainable Real Return Fund

Fund Report

(continued)

Due to the nature of the individual investment types that the Sub-fund may invest in, the Investment Manager may employ different processes and techniques in its assessment. For example, the process through which the Investment Manager assesses corporate investments may be different to and use different inputs to the approach used for sovereign investments.

There may be situations where the Sub-fund will invest in an issuer that has been identified as having involvement in potentially harmful activities from an environmental or social perspective. In the case of corporate investments, this may arise for certain issuers whose activities or operations, typically due to a legacy business mix, may have historically created poor environmental or social outcomes, but that are now investing in and positively adapting to future needs (for example, this may include energy companies that are preparing for a transition to a lower carbon world). In the case of sovereign investments, this may arise in respect of issuers that may be demonstrating an improvement in their overall sustainability profile.

Similarly, in some instances, the Sub-fund may invest in a corporate issuer where the Investment Manager determines through engagement with the issuer that prevailing ESG information and data provided by external ESG ratings providers have not fully captured positive environmental or social initiatives of the issuer.

The Investment Manager is dependent upon information and data from third parties (which may include providers of research reports, screenings, ratings and/or analysis such as index providers and consultants). Such information or data may be incomplete, inaccurate or inconsistent.

The Sub-fund may invest more than 35% of its assets in government and public securities issued or guaranteed by a single state, local authority or public international body. Subject to FCA regulations, the relative exposure between these asset classes will be actively managed and will be varied as deemed necessary in order to achieve the investment objective. This may result in the Sub-fund having no exposure to particular asset classes. The Sub-fund may invest in any geographic or economic sectors of the world.

For the avoidance of doubt, cash and liquid near cash assets, money market funds and derivatives are not required to meet the Investment Manager's sustainability criteria.

Derivatives may be used with a view to generating investment returns in pursuit of the Sub-fund's investment objective, and for efficient portfolio management. It is not expected that the use of derivatives will materially affect the overall risk profile of the Sub-fund.

The Investment Manager may use alternative risk premia strategies, hereafter referred to as 'ARP' strategies, to implement the investment strategy. ARP strategies seek to gain exposure to risk premia (the return or reward an investor earns to bear risk) that would not usually be directly accessible through traditional investment instruments (for example by investing directly in equities or bonds).

ARP strategies are typically accessed through systematic, rules-based approaches which often use quantitative techniques and can be implemented through a range of instruments (including structured notes, derivative instruments and collective investment schemes).

No more than 8.5% of Net Asset Value of the Sub-fund will be allocated to gaining exposure to ARP strategies.

The Sub-fund uses SONIA (30-day compounded) + 4% per annum over five years before fees as a target set for the Sub-fund's performance to match or exceed. The ACD considers SONIA (30-day compounded) + 4% per annum over five years before fees to be an appropriate target because, whilst it does not take ESG factors into account, the ACD believes in typical market conditions that it represents a target that will be equal to or greater than UK inflation rates over the same period and is commensurate with the Investment Manager's approach.

Further details in relation to the current sustainability criteria may be obtained by contacting the ACD and is available on the ACD's website at www.bnymellonim.com/orl. Investors should be aware that these criteria may change over time.

Portfolio Summary

Over the 12-month period under review, the Sub-fund's Institutional Shares W (Accumulation) share class generated a return of -7.22%, net of fees, compared with a return of 7.00% for the SONIA 30-day compounded) +4%, both in sterling terms. The Sub-fund produced a negative return behind that of its benchmark.

Negative returns in the stabilising layer were the main reason behind the Sub-fund's weakness over the period. This was largely due to a negative contribution from derivative instruments, specifically protection against falling markets, which represented a cost as equity markets rallied. Precious metals (particularly gold) and government bonds also produced mildly negative contributions.

Conversely, the return-seeking core added value, with global equities contributing most significantly. Strong stock contributors included NVIDIA, which occupies a dominant position as a vendor of hardware components to facilitate artificial intelligence (AI) and which was boosted by robust first-quarter results. Microsoft enjoyed the halo effect around AI and technology more broadly given its part ownership of AI chatbot ChatGPT. Booking Holdings benefited from improved confidence and travel among European consumers. On the negative side, Alibaba and Comerica detracted from returns. Also within the core, emerging market debt contributed to returns owing to the perception that bond yields were close to peak levels, as well as a less aggressive inflation outlook.

However, alternatives weighed on returns. Weakness was evident in the renewables and infrastructure holdings owing to a combination of rising bond yields, collateral calls by UK pension funds employing liability-driven investing strategies, and new regulations on fee disclosures. Exposure to European and UK contingent convertible bonds, was affected by the unprecedented decision by the Swiss regulator to subordinate bond holders to equity investors in relation to Credit Suisse's takeover by UBS.

Regarding portfolio activity, in the first half of the period, equity exposure was reduced. UK investment grade credit and emerging market debt exposure was raised, while in the stabilising layer, government bond duration was increased. Later, in the return-seeking core, new positions were initiated in Muenchener Rueckve and Enphase Energy. Late in the period, efforts were made to simplify the Sub-fund's structure by reducing direct portfolio protection while paring back the gross equity weighting on the other side. This resulted in the Sub-fund's equity weighting ending the period broadly unchanged. Within the stabilising layer, the manager boosted the US dollar weighting given the appeal of the currency's safe-haven attributes. The position in gold was trimmed.

Markets continue to shrug off worrying signs, notably an inverted yield curve, weaker leading indicators, tightening liquidity conditions and narrow equity market participation. For this reason, it is the manager's belief that a significant insulating layer needs to be in place to protect against any significant market downturn. It is prudent, in the manager's view, to wait on the sidelines rather than materially increasing exposure to equities (or other risk assets) that appear overvalued against a discount rate that is rising.

[†]The closing net asset value per share figure is based on the bid-market prices at close of business, whilst the highest/lowest share prices are based on mid dealing prices (the price at which shares are sold).

*Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there may be other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which may also have reduced the Sub-fund and share class returns before operating charges.

**The Operating Charges figure is made up of the Annual Management Charge (AMC) and other operating costs. Other operating costs include the costs for other services paid for by the Sub-fund, such as the fees paid to the Fund Accountant, Fund Administrator, Depositary, Custodian, Auditor and Regulator. The Operating Charges figure shown is calculated on an ex-post basis over the period, whereas the Ongoing Charges figure shown in the Key Investor Information Document (KIID) is a calculation as at a point in time, and therefore there could be immaterial differences between the two. The operating charges are annualised for share classes launched during the year.

#The Operating Charges Figure for the period ending 30/06/2023 includes a synthetic OCF due to investments in other funds, in line with IA guidance.

ACD's periodic charge, registrations and expense charge, safe custody charges and activity charges paid to the ACD, BNY Mellon Fund Managers Limited, or its associates, are shown in Notes 3 and 5, and details of shares issued and cancelled by the ACD are shown in the Statement of Change in Net Assets Attributable to Shareholders and Note 8.

The balance due to the ACD at 30 June 2023 in respect of these transactions was £443,647 (30/06/2022: The balance due from the ACD was £385,727).

Any investments in or transactions with other BNYM related party entities are individually identified in the portfolio statement and the Securities Lending note respectively.

14 Financial instruments

The risk factors relating to the Sub-fund are discussed more fully in Note 2 of the notes applicable to the financial statements of all the Sub-funds on pages 11 to 14.

14 Financial instruments (continued)

Market Price Risk

The Sub-fund uses Value at Risk (VaR) to calculate the likelihood of the Sub-fund (including derivatives) falling in value by more than a particular level.

Under normal market conditions, VaR captures the potential fall in the value of the portfolio over a given holding period and to a given level of statistical confidence.

VaR is discussed in more detail, with the relevant disclosures for the financial year, in the notes applicable to the financial statements of all Sub-funds on page 12.

Valuation of financial instruments

The categorisation of financial instruments in the tables below reflect the methodology used to measure their fair value.

	30/06/2023	30/06/2023
	Assets	Liabilities

Level 3: Unobservable data	—	—
	514,865,116	(14,424,786)

Level 1: Unadjusted quoted price in an active market for an identical instrument.

Level 2: Valuation techniques using observable inputs other than quoted prices within Level 1.

Level 3: Valuation techniques using unobservable inputs.

Derivative risk

The Sub-fund may enter into derivative transactions in the pursuit of its investment objective. Further details about the scope of the Sub-fund's derivative usage can be found in the Prospectus.

Derivatives may be used for efficient portfolio management only.

Total transaction costs	270	168
Total transaction costs as a % of average net assets	0.05%	0.03%

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

Separately identifiable direct transaction costs (commissions & taxes etc) are attributable to the Sub-fund's purchase and sale of equity shares. Additionally for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

Notes to the Financial Statements

(continued)

15 Portfolio transaction costs (continued)

For the Sub-fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However additionally there are indirect transaction costs suffered in those underlying funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

During the year the Sub-fund utilised derivative instruments. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivative positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.20% (30/06/2022: 0.17%).

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date (30/06/2022: nil).

17 Securities lending

As at 30 June 2023, there were no investments subject to securities lending agreements.

As at 30 June 2022, there were no investments subject to securities lending agreements.

The gross earnings and the fees for the year are £nil (30/06/2022: £nil) and £nil (30/06/2022: £nil) respectively.

18 Shareholder's funds

The Sub-fund currently has the below share classes in issue. Each share class suffers a different annual ACD charge and Registrations and expense charge which is payable to the ACD and is shown below:

	ACD charge	Registrations and expenses charge
B Shares (Accumulation)	0.85%	0.08%
Institutional Shares (Accumulation)	1.00%	0.03%
Institutional Shares W (Accumulation)	0.75%	0.03%

Newton Institutional Shares 5 (Income)	0.50%	0.03%
Newton X Shares (Accumulation)	0.00%	0.03%
U Shares (Accumulation)	0.65%	0.03%

Consequently, the level of net revenue attributable to each share class will differ.

All share classes have the same rights on winding up.

Investment Objective

The Sub-fund aims to achieve income and capital growth over the medium term (3-5 years).

Investment Policy

The Sub-fund is actively managed and invests at least 75% of the portfolio in fixed income securities (bonds) issued by governments, public entities and companies that meet the Investment Manager's sustainability criteria, where environmental, social and governance ("ESG") considerations are an integral part of the criteria. The Investment Manager focuses on identifying issuers that demonstrate sustainable business practices and an ability to generate returns consistent with the Sub-fund's objective. Sustainable business practices are those which positively manage the material impacts of a company's operations and products on the environment and society. The bonds selected will be denominated in sterling or hedged back to sterling.

When determining whether an issuer meets the Investment Manager's sustainability criteria, the Investment Manager considers whether the issuer: (i) engages in such practices in an economic sense (e.g., the issuer's strategy, operations and finances are stable and durable), and (ii) takes appropriate measures to manage any material consequences or impact of its policies and operations in relation to ESG matters (e.g., the issuer's environmental footprint, labour standards, board structure).

The Investment Manager's sustainability criteria incorporate elements of negative screening alongside other general and issuer level ESG-related analysis of an issuer's activities. Specifically, the Investment Manager, seeks to:

Identify and avoid issuers that participate in specific areas of activity that the Investment Manager deems to be harmful from an environmental or social perspective or which do not follow good governance practices. As an example, the Investment Manager could deem issuers that have large carbon footprints or companies with poor labour standards ineligible for investment. It will also exclude issuers in breach of the UN Global Compact principles which includes principles relating to human rights, labour, environment and anti-corruption, as well as companies that produce tobacco products. The Sub-fund also adopts a policy of making no direct investment in companies that derive more than 10% of turnover from the sale of tobacco.

Identify and invest in issuers that are proactively seeking to manage environmental and/or social factors well, which in turn should support long-term financial returns. This may also include those issuers that are contributing to the development of solutions that will contribute towards addressing environmental and/or social issues, examples of which could include more efficient or reduced use of natural resources or accessibility to healthcare.

Issuers engaged in sustainable business practices may also include companies that have committed explicitly to improving their environmental and/or social impacts leading to a transformation of their business models. There may be situations where the Sub-fund will invest in an issuer that has been identified as having involvement in potentially harmful activities from an environmental or social perspective. This may arise for certain issuers whose activities or operations, typically due to a legacy business mix, may have historically created poor environmental or social outcomes, but that are now investing in and positively adapting to future needs (for example, this may include energy companies that are preparing for a transition to a lower carbon world). Similarly, in some instances, the Sub-fund may invest in an issuer where the Investment Manager determines through engagement with the issuer that prevailing ESG information and data provided by external ESG ratings providers have not fully captured positive environmental or social initiatives of the issuer.

When determining whether an issuer meets the Investment Manager's sustainability criteria the Investment Manager uses a combination of external and internal data, research and ratings which are qualitative and quantitative in nature.

The Sub-fund may also invest in collective investment schemes (including but not limited to another Sub-fund or Sub-funds of the Company or other BNY Mellon funds), derivatives (including but not limited to currency related derivatives), convertible bonds, contingent convertible bonds, money market instruments, deposits, cash and near cash.

The Sub-fund may invest up to 50% in bonds rated below investment grade (BBB-) by Standard & Poor's (or equivalent recognised rating agency).

The Sub-fund may invest more than 35% of its assets in government and public securities issued or guaranteed by a single state, local authority or public international body.

Derivatives may be used for investment purposes as well as for efficient portfolio management and hedging. It is not expected that the use of derivatives will materially affect the overall risk profile of the Sub-fund.

Portfolio Summary

Over the 12-month period under review, the Sub-fund's Institutional W (Accumulation) share class returned -3.29%, net of fees, versus -4.89% for the benchmark, a composite index, comprising 1/3 ICE Bank of America Sterling Non Gilt TR Index, 1/3 ICE Bank of America Global High Yield Constrained TR Index (hedged to Sterling) and 1/3 ICE Bank of America UK Gilts All-Stocks TR Index, both in sterling terms. Although the Sub-fund outperformed its benchmark, returns were negative over the period.

The main source of the Sub-fund's relative outperformance was the significant underweight exposure to UK Gilts, which underperformed other major government bond markets, especially during the second half of the period. UK inflation remained stubbornly high, with the headline rate running significantly above comparative figures in the eurozone and the US. As a result, the Bank of England (BoE) announced an interest rate hike of 50 basis points (bps) in June, to 5%, exceeding the 25bps consensus estimate. Consequently, market participants priced in a more aggressive rate-tightening cycle for the BoE, with UK interest rates expected to remain higher for longer than in other developed economies.

During the first half of the review period, the manager raised cash balances on the view that a combination of elevated interest rates and persistent inflationary pressures would limit upside in bond markets. Overall, cash exposure made a positive contribution to returns relative to the benchmark. The Sub-Fund also held off-benchmark exposure to various overseas government bond markets, notably the US and New Zealand, which outperformed Gilts over the period.

Despite a positive contribution from several holdings, including Vodafone and data centre operator Iron Mountain, positioning in sub-investment grade bonds detracted overall. This was partially attributable to the exclusion of bonds issued by heavy carbon emitters on the grounds of sustainability. The manager also reduced sub-investment grade exposure over the first half of the period in anticipation that the asset class would face headwinds from weakening economic growth as a consequence of successive interest rate increases. However, yields on sub-investment grade bonds fell and credit spreads tightened due to the scarcity of new issuance.

Elsewhere, overweight exposure to investment grade corporate bonds, including 3i, Anglian Water, Coventry Building Society, Fresenius Medical Care and Sprint Capital, proved a slight negative relative to the benchmark.

Looking ahead, the BoE's 0.5% interest rate hike in June suggests the Monetary Policy Committee will, even if belatedly, do what it takes to curb inflation. However, Gilt issuance for 2023 is expected to remain very high. The BoE has started selling Gilts as part of its tighter monetary policy, which could well continue to weigh on investor sentiment, particularly at the long end of the market. With the lagged effect of elevated interest rates likely to slow global economic growth over the second half of 2023, the manager remains cautious on the outlook for sub-investment grade bonds and is likely to maintain a highly selective approach to investing in the asset class.

Subject to FCA approval, it is the ACDs intention to close the BNY Mellon Sustainable Sterling Bond Fund. The ACD will communicate to investors of this Sub-fund in due course about their available options.

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

For the Sub-fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.52% (30/06/2022: 0.58%).

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date (30/06/2022: nil).

General Information

Investment Adviser:	Newton Investment Management Limited
Fund Size:	£189.07m
Comparative Index:	FTSE All-Share TR
Sector:	The Investment Association UK All Companies
Key Dates: Fund Launch	8 February 2002

Investment Objective

The Sub-fund aims to achieve capital growth over the long term (5 years or more).

Investment Policy

The Sub-fund is actively managed and invests at least 70% of its assets in a concentrated portfolio of equities (company shares) issued by UK companies, including ordinary shares, preference shares and other equity-related securities that meet the Investment Manager's sustainability criteria, where environmental, social and governance ("ESG") considerations are an integral part of the criteria. UK companies are defined as those that are either domiciled, incorporated or which have significant business in the UK. The Investment Manager focuses on identifying companies that demonstrate sustainable business practices and an ability to generate returns consistent with the Sub-fund's objective. Sustainable business practices are those which positively manage the material impacts of a company's operations and products on the environment and society.

When determining whether a company engages in sustainable business practices and meets the Investment Manager's sustainability criteria, the Investment Manager considers whether the company (i) engages in sustainable practices in an economic sense (e.g. the company's strategy, operations and finances are stable and durable), and (ii) takes appropriate measures to manage any material consequences or impact of its policies and operations in relation to ESG matters (e.g., the company's environmental footprint, labour standards, board structure).

The Investment Manager's sustainability criteria incorporate elements of negative screening alongside other general and company level ESG-related analysis of a company's activities. Specifically, the Investment Manager, seeks to:

– Identify and avoid companies that participate in specific areas of activity that the Investment Manager deems to be harmful from an environmental or social perspective or which do not follow good governance practices. As an example, the Investment Manager could deem companies that have large carbon footprints or companies with poor labour standards ineligible for investment. It will also exclude companies in breach of the UN Global Compact principles which includes principles relating to human rights, labour, environment and anti-corruption, as well as companies that produce tobacco products. The Sub-fund also adopts a policy of making no direct investment in companies that derive more than 10% of turnover from the sale of tobacco.

– Identify and invest in companies that are proactively seeking to manage environmental and/or social factors well, which in turn should support long-term financial returns. This may also include those companies that are contributing to the development of solutions that will contribute towards addressing environmental and/or social issues, examples of which could include more efficient or reduced use of natural resources or accessibility to healthcare.

Companies engaged in sustainable business practices may also include companies that have committed explicitly to improving their environmental and/or social impacts leading to a transformation of their business models. There may be situations where the Sub-fund will invest in a company that has been identified as having involvement in potentially harmful activities from an environmental or social perspective. This may arise for certain companies whose activities or operations, typically due to a legacy business mix, may have historically created poor environmental or social outcomes, but that are now investing in and positively adapting to future needs (for example, this may include energy companies that are preparing for a transition to a lower carbon world). Similarly, in some instances, the Sub-fund may invest in a company where the Investment Manager determines through engagement with the company, that prevailing ESG information and data provided by external ESG ratings providers have not fully captured positive environmental or social initiatives of the company.

When determining whether a company meets the Investment Manager's sustainability criteria the Investment Manager uses a combination of external and internal data, research and ratings which are qualitative and quantitative in nature.

Further details in relation to the current sustainability criteria may be obtained by contacting the ACD. Investors should be aware that these criteria may change over time.

The Sub-fund will also follow the Investment Manager's opportunities investment approach. This means that the Sub-fund invests in the highest conviction investment opportunities (i.e. companies) that the Investment Manager identifies through its investment process. The Sub-fund will be constructed in a concentrated manner, taking into account the long-term risk versus reward profile of the companies selected for investment.

The Sub-fund may also invest in collective investment schemes (including but not limited to another Sub-fund or Sub-funds of the Company or other BNY Mellon funds), money market instruments, deposits, cash and near cash. The Sub-fund may hold warrants, convertible bonds and partly paid securities where these have been acquired by the Sub-fund as a result of corporate actions.

Any use of derivatives will be for efficient portfolio management purposes and hedging only. It is not expected that the use of derivatives will materially affect the overall risk profile of the Sub-fund.

Portfolio Summary

Over the 12-month period under review, the Sterling Income share class of the Sub-fund generated a return of 8.95%, net of fees, against 7.89% for the FTSE All-Share TR Index. The Sub-fund produced a positive return and outperformed its benchmark. Sector allocation was the key driver of the Sub-fund's positive relative returns, particularly an overweight exposure to industrials.

At the stock level, the position in industrial equipment rental company Ashtead performed well owing to improved sentiment around demand in the US, and underpinned by its strong pipeline of major projects that should be less correlated with the typical construction cycle. Another large contributor was Rentokil Initial, which raised its medium-term guidance for organic revenue growth as well as its dividend as demand for pest control services grew. The Sub-fund also benefited significantly from the avoidance of British American Tobacco, GSK and Vodafone.

Conversely, one of the weakest-performing positions was online cards and gifts retailer Moonpig, as investors worried about the squeeze on discretionary spending within the UK economy. Media company Ascential's share price fell sharply on weak earnings momentum. Not holding HSBC was a detriment; it rode a wave of optimism regarding China early in the year and benefited from rising interest rates.

In the first half of the period, major purchases included Weir and Experian. In 2023, a stake was taken in Spectris, which provides customers with expert insight through its advanced instruments and test equipment. The manager believes Spectris has the potential to exceed its revenue guidance for 2023, as price increases are coming through and the company has had strong new orders. Danaher, which has built leading franchises across the life sciences and diagnostics sectors, was another new addition. A separation of its environmental business later this year may allow investors to focus on the higher-growth segments of its operations. It is the manager's belief that Danaher will benefit from continued innovation in the life sciences industry.

Testing, certification and inspection specialist Intertek was sold. Although it has an attractive business model, the manager harboured some concerns about margin pressure in the current market environment and therefore decided to sell the holding. The manager also decided to dispose of the holding in recruitment company Hays owing to the uncertain economic outlook and unproven track record of some of its new management team. The position in biotechnology company Abcam was exited; the manager's conviction in the stock has lessened since it moved its listing to the US. The holding in Alphabet was also exited. While it retains its appeal, the risk-versus-reward profile has become more challenging, in the manager's view, considering the evolving potential for artificial intelligence disruption.

The manager will continue to focus on investing in high-quality companies with earnings resilience, demonstrable pricing power and strong balance sheets that should be able to withstand whatever the macroeconomic backdrop brings. The Sub-fund remains aligned with its long-term themes, focusing on companies with sustainable business practices and valuation discipline.

*Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there may be other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which may also have reduced the Sub-fund and share class returns before operating charges.

**The Operating Charges figure is made up of the Annual Management Charge (AMC) and other operating costs. Other operating costs include the costs for other services paid for by the Sub-fund, such as the fees paid to the Fund Accountant, Fund Administrator, Depositary, Custodian, Auditor and Regulator. The Operating Charges figure shown is calculated on an ex-post basis over the period, whereas the Ongoing Charges figure shown in the Key Investor Information Document (KIID) is a calculation as at a point in time, and therefore there could be immaterial differences between the two. The operating charges are annualised for share classes launched during the year.

	£	£
a) Analysis of the tax charge		
Overseas tax withheld	1,453	13,182
Total tax charge (see Note 6b)	1,453	13,182
b) Factors affecting the tax charge		
The tax assessed for the year is lower (30/06/2022: lower) than the standard rate of corporation tax in the UK for an ICVC (20%) (30/06/2022: 20%).		
The differences are explained below:		
Net revenue before taxation	1,634,474	2,212,915
Corporation tax @ 20%	326,895	442,583
Effects of:		
Movement in unrecognised tax losses	525,151	676,523
Overseas tax withheld	1,453	13,182
Revenue not subject to corporation tax	(852,046)	(1,119,106)
Total tax charge (see Note 6a)	1,453	13,182
c) Deferred tax		
No deferred tax asset has been recognised in the accounts in relation to tax losses of £66,102,293 (30/06/2022: £63,476,541), as it is unlikely that there will be sufficient taxable profits in the future to utilise these amounts. The deferred tax asset not recognised is £13,220,459 (30/06/2022: £12,695,308).

ACD's periodic charge, registrations and expense charge, safe custody charges and activity charges paid to the ACD, BNY Mellon Fund Managers Limited, or its associates, are shown in Notes 3 and 5, and details of shares issued and cancelled by the ACD are shown in the Statement of Change in Net Assets Attributable to Shareholders and Note 8.

The balance due to the ACD at 30 June 2023 in respect of these transactions was £381,118 (30/06/2022: £481,576).

Any investments in or transactions with other BNYM related party entities are individually identified in the portfolio statement and the Securities Lending note respectively.

14 Financial instruments

The risk factors relating to the Sub-fund are discussed more fully in Note 2 of the notes applicable to the financial statements of all the Sub-funds on pages 11 to 14.

Market Price Risk

The value of the Sub-fund's investments which were exposed to market price risk was as follows:

	30/06/2023	30/06/2022
	£	£
Investments held at the balance sheet date	185,861,088	198,864,668

Market Price Sensitivity

The following table illustrates the sensitivity of the return and the net assets to an increase or decrease of 5% (30/06/2022: 5%) in the fair values of the Sub-fund's investments. This level of change is considered to be reasonably possible based on observation of market conditions in the year. The sensitivity analysis is based on the impact of a change to the value of the Sub-fund's investments at each balance sheet date.

Interest rate risk

The Sub-fund does not invest in either fixed or floating rate securities and interest rate risk exposure is restricted to interest receivable on bank deposits or payable on bank overdraft positions which will be affected by fluctuations in interest rates (30/06/2022: nil).

Interest rate sensitivity

The Sub-fund does not have material exposure to interest rate risk and hence no sensitivity analysis has been presented (30/06/2022: nil).

Foreign currency risk

The table that follows details the currency profile of the Sub-fund's assets:

	30/06/2023	30/06/2023	30/06/2023	30/06/2022
	Investments	Net Current	Total	Total
	£	Assets	£	£

Total	22,993,169	415,679	23,408,848	33,288,563

Foreign currency sensitivity

The following tables illustrate the sensitivity of the return and net assets of the Sub-fund to a 5% (30/06/2022: 5%) strengthening or weakening of its base rate currency against other currencies to which there is significant exposure to. This level of change is considered to be a reasonable illustration based on observation of current market conditions. The sensitivity analysis assumes all other variables are held constant.

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

Separately identifiable direct transaction costs (commissions & taxes etc) are attributable to the Sub-fund's purchase and sale of equity shares. Additionally for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-fund's investment transactions in money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.05% (30/06/2022: 0.08%).

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date (30/06/2022: nil).

Sector:	The Investment Association UK All Companies
Key Dates: Fund Launch	1 May 1985

Investment Objective

The Sub-fund aims to achieve capital growth and income over the long term (5 years or more).

Investment Policy

The Sub-fund is actively managed and invests at least 70% of the portfolio in UK equities (company shares), including ordinary shares, preference shares and other equity-related securities. UK companies are defined as those that are either domiciled, incorporated or which have significant business in the UK.

The Sub-fund may also invest in other transferable securities (including but not limited to shares of non-UK companies), collective investment schemes (including but not limited to another Sub-fund or Sub-funds of the Company or other BNY Mellon funds), money market instruments, deposits, cash and near cash.

Any use of derivatives will be for efficient portfolio management purposes and hedging only. It is not expected that the use of derivatives will materially affect the overall risk profile of the Sub-fund.

Portfolio Summary

Over the 12-month period under review, the Sterling Income share class of the Sub-fund generated a return of 9.20%, net of fees, against a return of 7.89% for the FTSE All-Share TR Index. The Sub-fund produced a positive return and outperformed its benchmark. This was largely due to sector allocation, notably overweight exposure to industrials.

At the stock level, the position in industrial equipment rental company Ashtead performed well owing to its exposure to non-residential construction, an area of its business which is growing strongly. It was also helped by improved sentiment about demand in the US. Another large contributor was Rentokil Initial, which raised its medium-term guidance for organic revenue growth, as well as its dividend, as demand for pest control services grew. The holding in 3i also performed well after it released expectations-beating full-year results, attributable in large part to its stake in Action.

Conversely, not holding HSBC was a detriment; it rode a wave of optimism regarding China early in the year and benefited from rising interest rates. Media company Ascential's share price fell sharply on weak earnings momentum, while the holding in Anglo American detracted; commodity prices weakened as China's economic recovery grew more uncertain.

In the first half of the period, major purchases included Weir, Direct Line, Kerry Group, Prudential and Experian. In 2023, a stake was taken in Spectris, which provides customers with expert insight through its advanced instruments and test equipment. The manager believes Spectris has the potential to exceed its revenue guidance for 2023, as price increases are coming through and the company has had strong new orders. In the healthcare sector, the manager initiated a holding in pharmaceutical firm GSK, with the market seemingly placing little value on its current portfolio and its growth prospects, notably its HIV treatments and vaccines. A position in Convatec, a medical device company focusing on chronic conditions, was a further addition. New management has made significant investments in replenishing the product portfolio and increasing output.

The small holding in builders' merchant Travis Perkins was sold owing to concerns about the resilience of consumer demand in an environment of weaker economic growth. Direct Line was also sold, as it suffered from rising claims in both its motor and household businesses, leading to weak profitability. Capital ratios look stretched on this basis, and the company lacks the ability to pay a dividend. A holding in Alphabet was also exited. While it retains its appeal, the risk-versus-reward profile has become more challenging, in the manager's view, considering the evolving potential for artificial intelligence disruption. Further sales included Britvic, Alcon, Abcam, Moonpig and BP.

The manager will continue to focus on investing in high-quality companies with earnings resilience, demonstrable pricing power and strong balance sheets that should be able to withstand whatever the macroeconomic backdrop brings. The Sub-fund remains aligned with its long-term themes, focusing on companies with sustainable business practices and valuation discipline.

*Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there may be other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which may also have reduced the Sub-fund and share class returns before operating charges.

**The Operating Charges figure is made up of the Annual Management Charge (AMC) and other operating costs. Other operating costs include the costs for other services paid for by the Sub-fund, such as the fees paid to the Fund Accountant, Fund Administrator, Depositary, Custodian, Auditor and Regulator. The Operating Charges figure shown is calculated on an ex-post basis over the period, whereas the Ongoing Charges figure shown in the Key Investor Information Document (KIID) is a calculation as at a point in time, and therefore there could be immaterial differences between the two. The operating charges are annualised for share classes launched during the year.

b) Factors affecting the tax (credit)/charge		
The tax assessed for the year is lower (30/06/2022: lower) than the standard rate of corporation tax in the UK for an ICVC (20%) (30/06/2022: 20%).		
The differences are explained below:		
Net revenue before taxation	10,904,124	12,123,414
Corporation tax @ 20%	2,180,825	2,424,683
Effects of:

14 Financial instruments

The risk factors relating to the Sub-fund are discussed more fully in Note 2 of the notes applicable to the financial statements of all the Sub-funds on pages 11 to 14.

Market Price Risk

The value of the Sub-fund's investments which were exposed to market price risk was as follows:

	30/06/2023	30/06/2022
	£	£
Investments held at the balance sheet date	566,778,936	572,292,734

Market Price Sensitivity

The following table illustrates the sensitivity of the return and the net assets to an increase or decrease of 5% (30/06/2022: 5%) in the fair values of the Sub-fund's investments. This level of change is considered to be reasonably possible based on observation of market conditions in the year. The sensitivity analysis is based on the impact of a change to the value of the Sub-fund's investments at each balance sheet date.

Total transaction costs 139 701

Total transaction costs as a % of average net assets 0.02% 0.11%

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

Separately identifiable direct transaction costs (commissions & taxes etc) are attributable to the Sub-fund's purchase and sale of equity shares. Additionally for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-fund's investment transactions in money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.05% (30/06/2022: 0.07%).

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date (30/06/2022: nil).

17 Securities lending

The revenue arising from the Securities Lending Programme is currently split between the Sub-fund and The Bank of New York Mellon, London Branch in the proportion 81%:19% (30/06/2022: 81%:19%). The 19% paid to The Bank of New York Mellon, London Branch is to cover operational cost, risk and profit. The Bank of New York Mellon London Branch is a related party of the ACD as both entities are affiliates of The Bank of New York Mellon Corporation.

Collateral accepted is non-cash in the form of Sovereign debt rated AA or better from approved Governments only and Supranational debt obligations rated AAA or better, and FTSE 100 DBV (Class F10) as defined in the CREST Reference Manual and equity securities from the following indices: AEX 25 (Netherlands), CAC 40 (France), DAX 30 (Germany), Euro 50 (Eurozone), FTSE 100 (United Kingdom), Nikkei 225 (Japan), SMI 20 (Switzerland), S&P 500 (United States of America).

As at 30 June 2023, £7,780,362 of investments were subject to securities lending agreements and on behalf of the Sub-fund £8,562,997 was held in collateral. The collateral is held 19.61% in debt securities and 80.39% in equity securities.

As at 30 June 2022, £19,849,310 of investments were subject to securities lending agreements and on behalf of the Sub-fund £21,958,503 was held in collateral. The collateral was held 36.77% in debt securities and 63.23% in equity securities.

The gross earnings and the fees for the year are £23,054 (30/06/2022: £30,764) and £4,380 (30/06/2022: £5,845) respectively.

The following table details the value of securities on loan at the year end and the value of the collateral held at the year end for the Sub-fund, by counterparty.

Sector:	The Investment Association UK Equity Income
Key Dates: Fund Launch	1 June 1987

Investment Objective

The Sub-fund aims to achieve income over an annual period together with capital growth over the long term (5 years or more).

Investment Policy

The Sub-fund is actively managed and invests at least 70% of the portfolio in UK equities (company shares), including ordinary shares, preference shares and other equity-related securities. UK companies are defined as those that are either domiciled, incorporated or which have significant business in the UK.

The Sub-fund may also invest in collective investment schemes (including but not limited to another Sub-fund or Sub-funds of the Company or other BNY Mellon funds), money market instruments, deposits, cash and near cash.

Any use of derivatives will be for efficient portfolio management purposes and hedging only. It is not expected that the use of derivatives will materially affect the overall risk profile of the Sub-fund.

Portfolio Summary

Over the 12-month period under review, the Sterling Income share class of the Sub-fund generated a return of 10.81%, net of fees, against a return of 7.89% for the FTSE All-Share TR Index, both in sterling terms. The Sub-fund produced a positive return and outperformed its benchmark. Stock selection, and particularly sector allocation, contributed to the Sub-fund's higher total return.

At the stock level, insurer SCOR was the top-performing stock after the company reiterated targets around margins and growth. Comments around dividend trajectory also reassured investors. An unchanged dividend policy represented a further positive. The underweight position in BP was beneficial; energy-related stocks generally performed poorly as oil and gas prices fell in 2023. Other key contributors included Mercedes-Benz, Publicis and Ping An Insurance of China, none of which were held by the benchmark index.

Not holding index constituent HSBC was a detriment; it rode a wave of optimism regarding China early in the year and benefited from rising interest rates. As a defensive stock, British American Tobacco, which had performed well through much of the year, was less in favour during the market rally in 2023 and therefore underperformed. A lack of positioning in Compass was a further detractor, as the contract caterer announced a share-buyback programme and raised its full-year profit guidance, which benefited the index's return.

In the first half of the period, purchases were made in Inchcape, SCOR, Ping An Insurance of China, and ITV, among others. In 2023, a stake in Coats, which is the world's leading producer of industrial thread, was established. The company is undergoing a credible cost-cutting programme. In the healthcare sector, the manager initiated a holding in pharmaceutical firm GSK. In the manager's view it appears attractive, with the market seemingly placing underestimating its current portfolio and growth prospects, notably its HIV treatments and vaccines. RS, which is a high-quality distributor of components primarily into industrial end-markets, was also added. Under new management, RS has become a less cyclical business.

As the outlook for housing deteriorated, the manager sold the holding in plumbing and heating products distributor Ferguson. Concerns around management strategy and high levels of debt led to the sale of transport group National Express. Distribution and outsourcing company Bunzl was sold following good performance. Chinese insurer Ping An Insurance of China was sold following a strong share price recovery as the market's worries about Covid-19 subsided. Further sales included Smith & Nephew, Sage, CRH and Roche.

The manager believes the UK market is trading on a substantial discount versus its own history and relative to international markets. Furthermore, the dividend yield of the market is forecast to be more than 4%, which is above its long-term average. The Sub-fund is now positioned to take advantage of an improving economic situation; hence, it is overweight versus the index in banks, industrials and housebuilders. It remains underweight higher-multiple companies where the market is paying a high price for stability.

*Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there may be other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which may also have reduced the Sub-fund and share class returns before operating charges.

**The Operating Charges figure is made up of the Annual Management Charge (AMC) and other operating costs. Other operating costs include the costs for other services paid for by the Sub-fund, such as the fees paid to the Fund Accountant, Fund Administrator, Depositary, Custodian, Auditor and Regulator. The Operating Charges figure shown is calculated on an ex-post basis over the period, whereas the Ongoing Charges figure shown in the Key Investor Information Document (KIID) is a calculation as at a point in time, and therefore there could be immaterial differences between the two. The operating charges are annualised for share classes launched during the year.

Overseas tax withheld	1,065,044	729,451
Total tax charge (see Note 6b)	1,065,044	729,451

b) Factors affecting the tax charge

The tax assessed for the year is lower (30/06/2022: lower) than the standard rate of corporation tax in the UK for an ICVC (20%) (30/06/2022: 20%).

The differences are explained below:

Net revenue before taxation	42,221,583	31,153,576
Corporation tax @ 20%	8,444,317	6,230,715
Effects of:		
Movement in unrecognised tax losses	2,568,853	2,546,870
Overseas tax withheld	1,065,044	729,451
Prior year adjustment to unrecognised tax losses	—	(16)

Total tax charge (see Note 6a)	1,065,044	729,451

c) Deferred tax

No deferred tax asset has been recognised in the accounts in relation to tax losses of £402,668,499 (30/06/2022: £389,824,237), as it is unlikely that there will be sufficient taxable profits in the future to utilise these amounts. The deferred tax asset not recognised is £80,533,700 (30/06/2022: £77,964,847).

ACD's periodic charge, registrations and expense charge, safe custody charges and activity charges paid to the ACD, BNY Mellon Fund Managers Limited, or its associates, are shown in Notes 3 and 5, and details of shares issued and cancelled by the ACD are shown in the Statement of Change in Net Assets Attributable to Shareholders and Note 8.

The balance due to the ACD at 30 June 2023 in respect of these transactions was £536,349 (30/06/2022: The balance due from the ACD was £1,234,152).

Any investments in or transactions with other BNYM related party entities are individually identified in the portfolio statement and the Securities Lending note respectively.

14 Financial instruments

The risk factors relating to the Sub-fund are discussed more fully in Note 2 of the notes applicable to the financial statements of all the Sub-funds on pages 11 to 14.

Market Price Risk

The value of the Sub-fund's investments which were exposed to market price risk was as follows:

	30/06/2023	30/06/2022
	£	£
Investments held at the balance sheet date	1,276,555,989	1,062,504,711

Market Price Sensitivity

The following table illustrates the sensitivity of the return and the net assets to an increase or decrease of 5% (30/06/2022: 5%) in the fair values of the Sub-fund's investments. This level of change is considered to be reasonably possible based on observation of market conditions in the year. The sensitivity analysis is based on the impact of a change to the value of the Sub-fund's investments at each balance sheet date.

	30/06/2023		30/06/2022

Level 1: Unadjusted quoted price in an active market for an identical instrument.

Level 2: Valuation techniques using observable inputs other than quoted prices within Level 1.

Level 3: Valuation techniques using unobservable inputs.

Interest rate risk

The Sub-fund does not invest in either fixed or floating rate securities and interest rate risk exposure is restricted to interest receivable on bank deposits or payable on bank overdraft positions which will be affected by fluctuations in interest rates (30/06/2022: nil).

Interest rate sensitivity

The Sub-fund does not have material exposure to interest rate risk and hence no sensitivity analysis has been presented (30/06/2022: nil).

Foreign currency risk

The table that follows details the currency profile of the Sub-fund's assets:

	30/06/2023	30/06/2023	30/06/2023	30/06/2022
	Investments	Net Current	Total	Total

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

Separately identifiable direct transaction costs (commissions & taxes etc) are attributable to the Sub-fund's purchase and sale of equity shares. Additionally for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-fund's investment transactions in money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

For the Sub-fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However additionally there are indirect transaction costs suffered in those underlying funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

General Information

Investment Adviser:	Newton Investment Management North America LLC
Fund Size:	£284.40m
Comparative Index:	S&P 500 NR
Sector:	The Investment Association North America
Key Dates: Fund Launch	4 December 2018

Investment Objective

The Sub-fund aims to achieve income and capital growth over the long term (5 years or more).

Investment Policy

The Sub-fund is actively managed and will invest at least 70% in equity (company shares) and equity-related securities (such as common and preferred stock, American depository receipts and global depository receipts), listed real estate investment trusts ("REITs") and master limited partnerships ("MLP's"), issued by large capitalisation companies located in the US. This includes securities of companies which at the time of purchase have a market capitalisation of US\$2 billion or above.

The Sub-fund may invest up to 30% of the portfolio in equity or equity-related securities of companies (which will be listed or traded on Eligible Markets) located in the US which are smaller in capitalisation or in equity or equity-related securities or companies which neither have their registered office in the US nor carry out a predominant part of their economic activities in the US.

The Sub-fund may also invest up to 10% of the portfolio in collective investment schemes (including but not limited to another Sub-fund or Sub-funds of the Company or other BNY Mellon funds) and derivatives (including but not limited to currency-related derivatives).

Derivatives may be used for investment purposes as well as for efficient portfolio management and hedging. It is not expected that the use of derivatives will materially affect the overall risk profile of the Sub-fund.

Portfolio Summary

Over the 12-month review period, the Sub-fund's F Shares (Accumulation) share class returned 5.55%, net of fees, compared with a return of 13.66% for the S&P 500 NR Index, both in sterling terms. The Sub-fund generated a positive return but underperformed its benchmark.

On a sector basis, energy and real estate contributed most to performance, while financials and information technology (IT) detracted. In the energy sector, positive stock selection and overweight positioning in the oil, gas and consumable fuels segment contributed. The Sub-fund's lack of positioning in real estate also buoyed results. Conversely, overweight positioning and challenging stock selection in financials, particularly in the insurance segment, weighed on results. Reinsurers lagged, owing to the start of the Atlantic hurricane season. In IT, lack of exposure to Apple and Nvidia detracted. Casino and gaming company International Game Technology was a top contributor, and a position in electric utility Constellation Energy also proved additive.

During the period, the largest overweight exposures were to financials, energy, and healthcare, while the largest underweights were to IT, the consumer discretionary sector and consumer staples. The manager increased the Sub-fund's overweight to energy through new positions in Occidental Petroleum, Schlumberger and Shell. An underweight to consumer discretionary was reduced by initiating a position in Wynn Resorts. The manager reduced exposure to utilities by exiting positions in AES and NextEra Energy, and reduced exposure to industrials by exiting positions in Hubbell and Norfolk Southern.

Looking ahead, the manager expects segments of the market should continue digesting the backlog of demand brought on by the pandemic and thinks companies may start reporting more "normalised" earnings and guidance. Furthermore, companies with more traditional business models could become more attractive, supported by several drivers, including onshoring, automation, electrical infrastructure and efforts that alleviate supply constraints. This new perspective should place greater emphasis on profitable and sound business models. Finally, the manager expects the remainder of 2023 to feature a market conducive to the long-standing philosophy of focusing on opportunities at the intersection of valuation, fundamentals and catalyst-driven business momentum. As always, pockets of near-term volatility will be used to try to identify attractive relative opportunities. The manager continues to be constructive on areas of the market that appear capable of providing positive relative value and robust balance sheets through uncertain times.

6 Taxation

	30/06/2023	30/06/2022
	£	£
a) Analysis of the tax charge		
Overseas tax withheld	776,590	446,804
Total tax charge (see Note 6b)	776,590	446,804
b) Factors affecting the tax charge		
The tax assessed for the year is lower (30/06/2022: lower) than the standard rate of corporation tax in the UK for an ICVC (20%) (30/06/2022: 20%).		
The differences are explained below:		
Net revenue before taxation	4,973,320	2,777,090
Corporation tax @ 20%	994,664	555,418
Effects of:		
Capitalised income subject to tax	15,843	3,687
Movement in unrecognised tax losses	244,411	102,862
Overseas tax withheld	776,590	446,804

Any investments in or transactions with other BNYM related party entities are individually identified in the portfolio statement and the Securities Lending note respectively.

14 Financial instruments

The risk factors relating to the Sub-fund are discussed more fully in Note 2 of the notes applicable to the financial statements of all the Sub-funds on pages 11 to 14.

Market Price Risk

The value of the Sub-fund's investments which were exposed to market price risk was as follows:

	30/06/2023	30/06/2022
	£	£
Investments held at the balance sheet date	271,714,318	172,234,275

Market Price Sensitivity

The following table illustrates the sensitivity of the return and the net assets to an increase or decrease of 5% (30/06/2022: 5%) in the fair values of the Sub-fund's investments. This level of change is considered to be reasonably possible based on observation of market conditions in the year. The sensitivity analysis is based on the impact of a change to the value of the Sub-fund's investments at each balance sheet date.

Interest rate risk

The Sub-fund does not invest in either fixed or floating rate securities and interest rate risk exposure is restricted to interest receivable on bank deposits or payable on bank overdraft positions which will be affected by fluctuations in interest rates (30/06/2022: nil).

Interest rate sensitivity

The Sub-fund does not have material exposure to interest rate risk and hence no sensitivity analysis has been presented (30/06/2022: nil).

Foreign currency risk

The table that follows details the currency profile of the Sub-fund's assets:

	30/06/2023	30/06/2023	30/06/2023	30/06/2022

Total	271,714,318	(1,200,684)	270,513,634	169,019,292

Foreign currency sensitivity

The following tables illustrate the sensitivity of the return and net assets of the Sub-fund to a 5% (30/06/2022: 5%) strengthening or weakening of its base rate currency against other currencies to which there is significant exposure to. This level of change is considered to be a reasonable illustration based on observation of current market conditions. The sensitivity analysis assumes all other variables are held constant.

15 Portfolio transaction costs (continued)

Separately identifiable direct transaction costs (commissions & taxes etc) are attributable to the Sub-fund's purchase and sale of equity shares. Additionally for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

For the Sub-fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However additionally there are indirect transaction costs suffered in those underlying funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.02% (30/06/2022: 0.05%).

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date (30/06/2022: nil).

17 Securities lending

The revenue arising from the Securities Lending Programme is currently split between the Sub-fund and The Bank of New York Mellon, London Branch in the proportion 81%:19% (30/06/2022: 81%:19%). The 19% paid to The Bank of New York Mellon, London Branch is to cover operational cost, risk and profit. The Bank of New York Mellon London Branch is a related party of the ACD as both entities are affiliates of The Bank of New York Mellon Corporation.

Collateral accepted is non-cash in the form of Sovereign debt rated AA or better from approved Governments only and Supranational debt obligations rated AAA or better, and FTSE 100 DBV (Class F10) as defined in the CREST Reference Manual and equity securities from the following indices: AEX 25 (Netherlands), CAC 40 (France), DAX 30 (Germany), Euro 50 (Eurozone), FTSE 100 (United Kingdom), Nikkei 225 (Japan), SMI 20 (Switzerland), S&P 500 (United States of America).

As at 30 June 2023, £2,970,271 of investments were subject to securities lending agreements and on behalf of the Sub-fund £3,206,242 was held in collateral. The collateral is held 99.88% in debt securities and 0.12% in equity securities.

As at 30 June 2022, £433,533 of investments were subject to securities lending agreements and on behalf of the Sub-fund £488,264 was held in collateral. The collateral was held 0.00% in debt securities and 100.00% in equity securities.

The gross earnings and the fees for the year are £1,507 (30/06/2022: £5,049) and £286 (30/06/2022: £959) respectively.

The following table details the value of securities on loan at the year end and the value of the collateral held at the year end for the Sub-fund, by counterparty.

Sector:	The Investment Association North America
Key Dates: Fund Launch	31 October 1986

Investment Objective

The Sub-fund aims to achieve capital growth over the long term (5 years or more).

Investment Policy

The Sub-fund will invest at least 80% in equity (company shares) and equity-related securities (such as common and preferred stock, American depository receipts, global depository receipts) and real estate investment trusts ("REITs") listed or traded on Eligible Markets located in the United States.

The Sub-fund may also invest up to 10% of the portfolio in exchange traded funds (ETFs) listed or traded on Eligible Markets located worldwide in order to provide exposure to equity markets.

The Sub-fund may invest up to 20% of the portfolio in equity or equity-related securities of companies (which will be listed or traded on Eligible Markets) which are neither located in the United States nor exercising a significant part of their activities in the United States, including up to 5% of the portfolio in issuers located in emerging market countries.

The Sub-fund may also invest up to 10% of the portfolio in collective investment schemes (including but not limited to another Sub-fund or Sub-funds of the Company or other BNY Mellon funds).

Any use of derivatives will be for efficient portfolio management purposes and hedging only. It is not expected that the use of derivatives will materially affect the overall risk profile of the Sub-fund.

Portfolio Summary

Over the 12 months under review, the Sterling Income share class of the Sub-fund returned 15.41%, net of fees, compared with 13.63% for the Russell 3000 TR Index, both in sterling terms. The Sub-fund produced a positive return and outperformed its benchmark.

The healthcare and real estate sectors contributed most to returns, while consumer discretionary and materials detracted. Healthcare contributed owing to favourable stock selection in the healthcare equipment & supplies and biotechnology industries. In real estate, a lack of exposure to specialised real estate investment trusts and favourable stock selection in real estate management and development boosted results. NVIDIA, which designs chips used in artificial intelligence (AI), data centres and PC gaming, was a top contributor. Utilisation of NVIDIA's chips increased meaningfully owing to the boom in generative AI. A position in Apple also boosted performance, owing to investor optimism about the company's growth initiatives.

Conversely, the consumer discretionary sector detracted owing to unfavourable stock selection in hotels, restaurants and leisure, as well as positioning and stock selection in specialty retail. In materials, overweight positioning and unfavourable stock selection in chemicals weighed on results. Mercury Systems, a defense electronics supplier, detracted owing to weak orders and difficult supply chain conditions. Nitrogen fertiliser and ammonia producer CF Industries also weighed on results, as global nitrogen prices have fallen owing to lower natural gas prices.

The manager raised the Sub-fund's exposure to information technology (IT) and consumer discretionary during the period and trimmed exposure to industrials and financials. An underweight to IT was reduced through new positions in Apple and BILL.com. An overweight to consumer discretionary was increased by initiating positions in Burlington Stores, Restaurant Brands International, RH and Ross Stores. The Sub-fund's underweight to financials was increased by exiting positions in Affirm Holdings and SVB Financial. Lastly, the manager reduced exposure to industrials by exiting positions in API, Array Technologies, Lyft and Mercury Systems.

In the manager's opinion, small- and mid-cap companies remain attractively priced relative to their own history and compared with large-cap companies. Current earnings risk may encourage relatively defensive near-term positioning. On the other hand, it may provide attractive entry points for small- and mid-cap companies throughout the coming year.

**The Operating Charges figure is made up of the Annual Management Charge (AMC) and other operating costs. Other operating costs include the costs for other services paid for by the Sub-fund, such as the fees paid to the Fund Accountant, Fund Administrator, Depositary, Custodian, Auditor and Regulator. The Operating Charges figure shown is calculated on an ex-post basis over the period, whereas the Ongoing Charges figure shown in the Key Investor Information Document (KIID) is a calculation as at a point in time, and therefore there could be immaterial differences between the two. The operating charges are annualised for share classes launched during the year.

6 Taxation

	30/06/2023	30/06/2022
	£	£
a) Analysis of the tax charge		
Overseas tax withheld	41,768	124,236
Total tax charge (see Note 6b)	41,768	124,236
b) Factors affecting the tax charge		
The tax assessed for the year is higher (30/06/2022: higher) than the standard rate of corporation tax in the UK for an ICVC (20%) (30/06/2022: 20%).		
The differences are explained below:		
Net (expense)/revenue before taxation	(189,648)	175,341
Corporation tax @ 20%	(37,930)	35,068
Effects of:		
Capitalised income subject to tax	—	22,588
Movement in unrecognised tax losses	97,625	114,478
Overseas tax withheld	41,768	124,236
Prior year adjustment to unrecognised tax losses	—	(3,625)
Revenue not subject to corporation tax	(59,695)	(168,509)
Total tax charge (see Note 6a)	41,768	124,236
c) Deferred tax		
No deferred tax asset has been recognised in the accounts in relation to tax losses of £7,911,582 (30/06/2022: £7,423,456), as it is unlikely that there will be sufficient taxable profits in the future to utilise these amounts. The deferred tax asset not recognised is £1,582,316 (30/06/2022: £1,484,691).

	£	£
Investments held at the balance sheet date	39,033,972	42,452,500

Market Price Sensitivity

The following table illustrates the sensitivity of the return and the net assets to an increase or decrease of 5% (30/06/2022: 5%) in the fair values of the Sub-fund's investments. This level of change is considered to be reasonably possible based on observation of market conditions in the year. The sensitivity analysis is based on the impact of a change to the value of the Sub-fund's investments at each balance sheet date.

Interest rate risk

The Sub-fund does not invest in either fixed or floating rate securities and interest rate risk exposure is restricted to interest receivable on bank deposits or payable on bank overdraft positions which will be affected by fluctuations in interest rates (30/06/2022: nil).

Interest rate sensitivity

The Sub-fund does not have material exposure to interest rate risk and hence no sensitivity analysis has been presented (30/06/2022: nil).

Foreign currency risk

The table that follows details the currency profile of the Sub-fund's assets:

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

Separately identifiable direct transaction costs (commissions & taxes etc) are attributable to the Sub-fund's purchase and sale of equity shares. Additionally for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

15 Portfolio transaction costs (continued)

For the Sub-fund's investment in collective investment scheme holdings there will potentially be dealing spread costs applicable to purchases and sales. However additionally there are indirect transaction costs suffered in those underlying funds, throughout the holding period for the instruments, which are not separately identifiable and do not form part of the analysis above.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.03% (30/06/2022: 0.05%).

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date (30/06/2022: nil).

17 Securities lending

The revenue arising from the Securities Lending Programme is currently split between the Sub-fund and The Bank of New York Mellon, London Branch in the proportion 81%:19% (30/06/2022: 81%:19%). The 19% paid to The Bank of New York Mellon, London Branch is to cover operational cost, risk and profit. The Bank of New York Mellon London Branch is a related party of the ACD as both entities are affiliates of The Bank of New York Mellon Corporation.

Collateral accepted is non-cash in the form of Sovereign debt rated AA or better from approved Governments only and Supranational debt obligations rated AAA or better, and FTSE 100 DBV (Class F10) as defined in the CREST Reference Manual and equity securities from the following indices: AEX 25 (Netherlands), CAC 40 (France), DAX 30 (Germany), Euro 50 (Eurozone), FTSE 100 (United Kingdom), Nikkei 225 (Japan), SMI 20 (Switzerland), S&P 500 (United States of America).

As at 30 June 2023, £3,108,853 of investments were subject to securities lending agreements and on behalf of the Sub-fund £3,330,869 was held in collateral. The collateral is held 99.95% in debt securities and 0.05% in equity securities.

As at 30 June 2022, £3,315,203 of investments were subject to securities lending agreements and on behalf of the Sub-fund £3,643,349 was held in collateral. The collateral was held 31.68% in debt securities and 68.32% in equity securities.

The gross earnings and the fees for the year are £5,436 (30/06/2022: £9,141) and £1,033 (30/06/2022: £1,737) respectively.

The following table details the value of securities on loan at the year end and the value of the collateral held at the year end for the Sub-fund, by counterparty.

General Information

Investment Adviser:	Insight Investment Management (Global) Limited
Fund Size:	£18.06m
Comparative Index:	IA Sterling Strategic Bond NR
Sector:	The Investment Association Sterling Strategic Bond
Key Dates: Fund Launch	24 August 2021

Investment Objective

The Sub-fund seeks to generate a return through a combination of income and capital returns, whilst taking environmental, social and governance ("ESG") factors into account.

Investment Policy

To achieve its investment objective, the Sub-fund will typically invest at least 80% of its assets in Sterling denominated (or hedged back to sterling) fixed or floating global fixed income securities (bonds) and asset backed securities, issued by governments, companies and other public entities either directly or via derivatives. The Sub-fund may also invest in collective investment schemes (including but not limited to another Sub-fund or Sub-funds of the Company), cash and near cash, money market instruments (including deposits and loans), other transferable securities (such as commercial paper, convertibles and certificates of deposit), equity linked securities (such as warrants and preference stock).

When making investment decisions, the Investment Manager will formally take environmental, social and governance ("ESG") factors into account and will assess the overall suitability of an issuer based on an ESG rating. The Sub-fund will seek to obtain exposure to issuers with stronger ESG ratings and may invest in securities where proceeds will be used to finance new and existing projects with environmental benefits. In addition, the Investment Manager may screen out issuers who are involved in industries/sectors which have weaker ESG profiles, for example as a result of high climate change risks, demonstrate severe breaches of internationally accepted norms or where revenue is derived from products that are considered unsuitable, including tobacco, defence, gambling and coal extraction.

For the avoidance of doubt, cash and liquid near cash assets, money market funds and derivatives are not required to meet the Investment Manager's ESG criteria.

When assessing the suitability of an issuer based on the Investment Manager's ESG criteria, the Investment Manager uses a combination of external and internal data, research and ratings which are qualitative and quantitative in nature. The Investment Manager is dependent upon information and data from third parties (which may include providers of research reports, screenings, ratings and/or analysis such as index providers and consultants). Such information or data may be incomplete, inaccurate or inconsistent.

Further details in relation to the current ESG criteria may be obtained by contacting the ACD and is available on the ACD's website at <https://www.bnymellonim.com/rh>. Investors should be aware that these criteria may change over time.

The Sub-fund may invest in any geographic or economic sector of the world, including emerging markets.

The Sub-fund may invest in bonds rated below investment grade (BBB-) by Standard & Poor's (or equivalent recognised rating agency) or if unrated will be deemed to be of equivalent quality in the opinion of the Investment Manager.

Derivatives may be used for investment purposes as well as for Efficient Portfolio Management.

Fund Report

(continued)

Portfolio Summary

Over the 12-month period under review, the Sub-fund's Institutional Shares W (Accumulation) share class returned 3.30%, net of fees, against -0.71% for the IA Sterling Strategic Bond NR Sector. The Sub-fund produced a positive return and outperformed its sector average.

The path of inflation, tighter monetary policy, a contained banking crisis in the US and Europe, and geopolitical tensions represented the key areas of concern for investors over the last 12 months. Consequently, government bond yields and corporate credit spreads experienced extraordinary volatility during the period. Notably, UK investment grade spreads widened significantly in September 2022 after the government announced an unfunded fiscal package. Government bond yields plunged (and so bond prices rose) in the first quarter of 2023 following the banking crisis. By June, market participants began to expect a continuation of rate rises as opposed to the cuts that had previously been anticipated for late 2023 and 2024. Government bond yields rose as rate expectations adjusted.

In the first half of the period under review, duration, yield curve positioning and country selection proved positive contributors. However, currency exposure was mixed, with short positions against sterling benefiting due to the fallout from the UK's ill-fated 'mini-budget' announcement in September. However, a long position in the US dollar hindered performance during the fourth quarter of 2022. Moving into 2023, duration, yield curve positioning and country selection detracted from performance, while security selection and positioning in emerging markets contributed.

Regarding credit positioning, the Sub-fund had a neutral position. However, the manager feels the outlook could be improving on lower inflation, a slowdown in interest rate rises, and a more encouraging growth picture relative to recent expectations.

At the end of June 2023, 12.5% of the Sub-fund was invested in impact bonds (compared with 8.3% for a representative global credit index). More generally, the weighted average environmental, social, and corporate governance (ESG) score was 2.3, compared with a representative global credit index at 2.7. (The lower the score, within the 1-5 range, the better the ESG performance. These scores are derived from Insight's Prime ESG rating methodology.) Furthermore, the carbon intensity was 28% of a representative global credit index (carbon intensity measures how much carbon dioxide is generated by issuers relative to revenue). The manager aims to invest in a higher percentage of impact bonds than a specified index, as well as have a lower ESG score, in order to fulfil a commitment to responsible investing and sustainability.

Going forward, the manager expects upward pressure on government bonds to subside but does not expect interest rate cuts in 2023. In the manager's view, the next phase of the cycle is likely to involve less growth and lower margins; accordingly, the Sub-fund is positioned with a quality bias and a preference for more defensive sectors.

*Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there may be other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which may also have reduced the Sub-fund and share class returns before operating charges.

**The Operating Charges figure is made up of the Annual Management Charge (AMC) and other operating costs. Other operating costs include the costs for other services paid for by the Sub-fund, such as the fees paid to the Fund Accountant, Fund Administrator, Depositary, Custodian, Auditor and Regulator. The Operating Charges figure shown is calculated on an ex-post basis over the period, whereas the Ongoing Charges figure shown in the Key Investor Information Document (KIID) is a calculation as at a point in time, and therefore there could be immaterial differences between the two. The operating charges are annualised for share classes launched during the year.

***Share class launched on 24 August 2021.

12 Related parties

As at 30 June 2023, there was one investor holding more than 75% of the voting shares in issue. BNY Mellon Investment Management Seed held 99.54% of the total voting shares in issue and is therefore regarded as a related party. As at the balance sheet date there were no outstanding balances payable or receivable from the investor. (30/06/2022: BNY Mellon Investment Management Seed held 99.47% of the total voting shares in issue and was therefore regarded as a related party).

ACD's periodic charge, registrations and expense charge, safe custody charges and activity charges paid to the ACD, BNY Mellon Fund Managers Limited, or its associates, are shown in Notes 3 and 5, and details of shares issued and cancelled by the ACD are shown in the Statement of Change in Net Assets Attributable to Shareholders and Note 8.

The balance due to the ACD at 30 June 2023 in respect of these transactions was £18,437 (30/06/2022: £36,723).

Any investments in or transactions with other BNYM related party entities are individually identified in the portfolio statement and the Securities Lending note respectively.

13 Financial instruments

The risk factors relating to the Sub-fund are discussed more fully in Note 2 of the notes applicable to the financial statements of all the Sub-funds on pages 11 to 14.

Market Price Risk

The Sub-fund uses Value at Risk (VaR) to calculate the likelihood of the Sub-fund (including derivatives) falling in value by more than a particular level.

Under normal market conditions, VaR captures the potential fall in the value of the portfolio over a given holding period and to a given level of statistical confidence.

VaR is discussed in more detail, with the relevant disclosures for the financial year, in the notes applicable to the financial statements of all Sub-funds on page 12.

Valuation of financial instruments

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

For the Sub-fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

During the year the Sub-fund utilised derivative instruments. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivative positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.43% (30/06/2022: 0.31%).

15 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date (30/06/2022: nil).

16 Securities lending

As at 30 June 2023, there were no investments subject to securities lending agreements.

As at 30 June 2022, there were no investments subject to securities lending agreements.

The gross earnings and the fees for the year are £nil (30/06/2022: £nil) and £nil (30/06/2022: £nil) respectively.

Fund Report

for the year ended 30 June 2023

General Information

Investment Adviser:	Insight Investment Management (Global) Limited
Fund Size:	£22.33m
Comparative Index:	Markit iBoxx Sterling Collateralized & Corporate TR GBP
Sector:	The Investment Association £ Corporate Bond
Key Dates: Fund Launch	3 November 1997

Investment Objective

The Sub-fund seeks to generate a return through a combination of income and capital returns, whilst taking environmental, social and governance (“ESG”) factors into account.

The Sub-fund targets the outperformance of the Markit iBoxx Sterling Collateralized & Corporate Index after fees on any rolling three year period (meaning a period of three years, no matter which day you start on). However, performance is not guaranteed and a capital loss may occur.

Investment Policy

To achieve its investment objective, the Sub-fund will typically invest at least 80% of its assets directly or indirectly in Sterling denominated (or hedged back to Sterling) investment grade corporate bond securities and asset backed securities. Investment may be in both fixed and variable rate debt instruments.

When making investment decisions, the Investment Manager will formally take environmental, social and governance (“ESG”) factors into account and will assess the overall suitability of an issuer based on an ESG score. The Sub-fund will seek to obtain exposure to issuers with strong ESG scores and will therefore tilt the portfolio to issuers with higher scores. In addition, the Investment Manager may therefore screen out issuers who are involved in industries/sectors which have weak ESG scores, for example as a result of high carbon risks, demonstrate severe breaches of internationally accepted norms or where revenue is derived from products that are considered unsuitable including tobacco, defence, gambling and coal extraction.

Further details in relation to the current ESG criteria may be obtained by contacting the ACD. Investors should be aware that these criteria may change over time.

The Sub-fund may also invest in sub-investment grade corporate bond and other fixed income securities (such as government bonds), collective investment schemes (including but not limited to another Sub-fund or Sub-funds of the Company), cash and near cash, money market instruments (including deposits and loans), other transferable securities (such as commercial paper and certificates of deposit) and derivatives.

Derivatives may be used for investment purposes as well as for efficient portfolio management. An investment in derivatives may create leverage and so may result in greater fluctuations in the Net Asset Value of the Sub-fund.

When selecting investments for the Sub-fund and commensurate with the Investment Manager’s approach, the Markit iBoxx GBP Collateralized & Corporate Index is considered an appropriate target for the purposes of monitoring the risk taken in the Sub-fund.

The ACD considers the UK Investment Association’s Sterling Corporate Bond NR Sector to be an appropriate comparator to compare the Sub-fund’s performance because it includes a broad representation of similar Sterling denominated funds that invest in corporate bonds.

Annual Report & Accounts - Responsible Horizons UK Corporate Bond Fund

Fund Report

(continued)

Portfolio Summary

Over the 12-month period under review, the Sub-fund's Sterling Income share class returned -4.36% against -6.91% for the Markit iBoxx Sterling Collateralized & Corporate TR GBP Index. The Sub-fund generated a negative return but outperformed its benchmark.

The 12-month period under review beginning in July 2022 was a historically weak period for fixed income markets. The path of inflation, stricter monetary policy, a banking crisis in the US and Europe, recession fears, and geopolitical tensions comprised some key areas of focus for market participants. Consequently, government bond yields and corporate credit spreads experienced extraordinary volatility during the period. Notably, UK investment grade spreads widened significantly in September 2022 after the government announced an unfunded fiscal package. Government bond yields plunged (and bond prices rose) in the first quarter of 2023 following the collapse of three US regional banks.

Directional credit risk positions; security selection; positions in high yield cash bonds and European investment grade corporate bonds; and interest rate positioning emerged as the Sub-fund's main performance drivers during the 12-month period. Conversely, portfolio hedges, sector allocation and credit default swap index hedges were among the factors that detracted at times.

Over the last year, the manager participated in several new issues in the primary market while adding or increasing exposure to sterling-denominated covered bonds, credit default swaps, positions in high-quality senior banks, long-maturity bonds in non-cyclical companies, and euro-denominated corporate hybrid bonds in the secondary market. At the same time, banking sector positions were trimmed. By the end of the review period, the Sub-fund had a small overweight position in credit, and had rotated from euro-denominated bank bonds into corresponding UK bonds. The manager also added a long position in US investment grade index total return swaps versus US investment grade credit default swaps.

At the end of June 2023, 24.2% of the Sub-fund was invested in impact bonds (versus the benchmark's 16.7%). Its weighted average environmental, social and corporate governance (ESG) score was 2.2 compared with the benchmark's 2.5. (The lower the score within the 1-5 range, the better the ESG performance. These scores are derived from Insight's Prime ESG rating methodology.) Furthermore, the Sub-fund's carbon intensity was 67% of the benchmark's score (carbon intensity measures how much carbon dioxide is generated by issuers relative to revenue). The manager aims to invest in a higher percentage of impact bonds than the benchmark (and thereby lower the Sub-fund's ESG score) to fulfil a commitment to responsible investing and sustainability.

The manager believes valuations in UK and European investment grade credit remain attractive but is cautious in relation to high yield bonds. The continuation of spread decompression (when lower quality credit spreads widen relative to higher quality credit spreads) looks likely given the current environment, which is underpinned by recessionary risks.

The demand for investment grade credit is strong, as institutional and retail investors are attracted by high yields. Any material spread weakness could provide an investment opportunity, but the manager remains mindful of the uncertainty surrounding inflation, monetary policy and market volatility.

*Direct transaction costs comprise commission and taxes, principally applicable to equity investment purchases and sales. Shareholders should note that additionally there may be other transaction costs such as dealing spread and underlying costs with regard to Collective Investment Scheme holdings which may also have reduced the Sub-fund and share class returns before operating charges.

**The Operating Charges figure is made up of the Annual Management Charge (AMC) and other operating costs. Other operating costs include the costs for other services paid for by the Sub-fund, such as the fees paid to the Fund Accountant, Fund Administrator, Depositary, Custodian, Auditor and Regulator. The Operating Charges figure shown is calculated on an ex-post basis over the period, whereas the Ongoing Charges figure shown in the Key Investor Information Document (KIID) is a calculation as at a point in time, and therefore there could be immaterial differences between the two. The operating charges are annualised for share classes launched during the year.

a) Analysis of the tax charge/(credit)		
Overseas tax withheld	7	(183)
Total tax charge/(credit) (see Note 6b)	7	(183)
b) Factors affecting the tax charge/(credit)		
The tax assessed for the year is lower (30/06/2022: lower) than the standard rate of corporation tax in the UK for an ICVC (20%) (30/06/2022: 20%).		
The differences are explained below:		
Net revenue before taxation	875,715	515,776
Corporation tax @ 20%	175,143	103,155
Effects of:		
Movement in unrecognised tax losses	(175,143)	(103,155)
Overseas tax withheld	7	(183)
Total tax charge/(credit) (see Note 6a)	7	(183)

c) Deferred tax

No deferred tax asset has been recognised in the accounts in relation to tax losses of £3,407,208 (30/06/2022: £4,282,925). Although the potential deferred tax asset has been reduced, no asset has been recognised as excess management expenses displace deductions for interest distributions. The deferred tax asset not recognised is £681,442 (30/06/2022: £856,585).

ACD's periodic charge, registrations and expense charge, safe custody charges and activity charges paid to the ACD, BNY Mellon Fund Managers Limited, or its associates, are shown in Notes 3 and 5, and details of shares issued and cancelled by the ACD are shown in the Statement of Change in Net Assets Attributable to Shareholders and Note 8.

The balance due to the ACD at 30 June 2023 in respect of these transactions was £75,230 (30/06/2022: £26,301).

Any investments in or transactions with other BNYM related party entities are individually identified in the portfolio statement and the Securities Lending note respectively.

14 Financial instruments

The risk factors relating to the Sub-fund are discussed more fully in Note 2 of the notes applicable to the financial statements of all the Sub-funds on pages 11 to 14.

Market Price Risk

The Sub-fund uses Value at Risk (VaR) to calculate the likelihood of the Sub-fund (including derivatives) falling in value by more than a particular level.

Under normal market conditions, VaR captures the potential fall in the value of the portfolio over a given holding period and to a given level of statistical confidence.

VaR is discussed in more detail, with the relevant disclosures for the financial year, in the notes applicable to the financial statements of all Sub-funds on page 12.

Total transaction costs		1		—	
Total transaction costs as a % of average net assets		0.00%		0.00%	

The above analysis covers any direct transaction costs suffered by the Sub-fund during the year. However it is important to understand the nature of other transaction costs associated with different investment asset classes and instrument types.

For the Sub-fund's investment transactions in debt and money market instruments any applicable transaction charges form part of the dealing spread for these instruments. Transactions in money market instruments to manage the Sub-fund's daily liquidity position are excluded from the analysis.

During the year the Sub-fund utilised derivative instruments. The settlement values for opening and closing derivative positions are not comparable to principal values for transactions in direct holding investments and therefore purchase and sale amounts for derivative transactions are not quantified in the analysis above. Transaction costs for derivative positions will be either suffered as direct costs or form part of the dealing spread for the instruments. Any direct costs are identified in the analysis above.

Dealing spread costs suffered by the Sub-fund vary considerably for the different asset/instrument types depending on a number of factors including transaction value and market sentiment.

At the balance sheet date the average portfolio dealing spread (difference between bid and offer prices of all investments expressed as a percentage of the offer price value) was 0.64% (30/06/2022: 0.70%).

16 Contingent asset/liabilities

There were no contingent assets or liabilities at the balance sheet date (30/06/2022: nil).

17 Securities lending

The revenue arising from the Securities Lending Programme is currently split between the Sub-fund and The Bank of New York Mellon, London Branch in the proportion 81%:19% (30/06/2022: 81%:19%). The 19% paid to The Bank of New York Mellon, London Branch is to cover operational cost, risk and profit. The Bank of New York Mellon London Branch is a related party of the ACD as both entities are affiliates of The Bank of New York Mellon Corporation.

Collateral accepted is non-cash in the form of Sovereign debt rated AA or better from approved Governments only and Supranational debt obligations rated AAA or better, and FTSE 100 DBV (Class F10) as defined in the CREST Reference Manual and equity securities from the following indices: AEX 25 (Netherlands), CAC 40 (France), DAX 30 (Germany), Euro 50 (Eurozone), FTSE 100 (United Kingdom), Nikkei 225 (Japan), SMI 20 (Switzerland), S&P 500 (United States of America).

As at 30 June 2023, there were no investments subject to securities lending agreements.

As at 30 June 2022, £805,252 of investments were subject to securities lending agreements and on behalf of the Sub-fund £832,269 was held in collateral. The collateral was held 100.00% in debt securities and 0.00% in equity securities.

The gross earnings and the fees for the year are £381 (30/06/2022: £1,830) and £72 (30/06/2022: £348) respectively.

18 Shareholder's funds

The Sub-fund currently has the below share classes in issue. Each share class suffers a different annual ACD charge and Registrations and expense charge which is payable to the ACD and is shown below:

	ACD charge	Registrations and expenses charge
B Shares (Accumulation)	0.45%	0.08%
B Shares (Income)	0.45%	0.08%
F Shares (Accumulation)	0.25%	0.03%

There were no events that occurred after 30 June 2023 which would require disclosure or adjustment to the financial statements of the Company.

BNY Mellon Investment Funds - Annual Report & Accounts

Statement of the Authorised Corporate Director's Responsibilities and Directors' Statement

Statement of the Authorised Corporate Director's Responsibilities

The rules of the Financial Conduct Authority's Collective Investment Schemes Sourcebook (COLL) requires the Authorised Corporate Director (ACD) to prepare financial statements for each annual accounting period, which give a true and fair view of the financial position of the Company as at the end of the year, and of the net revenue and expenses and the net gains or losses on the property of the Company for the year then ended.

In preparing the financial statements the ACD is required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- comply with the disclosure requirements of the Collective Investment Schemes Sourcebook issued by the Financial Conduct Authority and the Prospectus;
- comply with applicable accounting standards;
- keep proper accounting records that enable it to demonstrate that the financial statements as prepared comply with the above requirements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in operation for the foreseeable future.

For the reasons stated in Note 1.1 (a), the financial statements of BNY Mellon Equity Income Booster Fund, BNY Mellon Equity Income Fund and BNY Mellon Sustainable Sterling Bond Fund have not been prepared on a going concern basis.

The ACD is responsible for the management of the Company in accordance with its Instrument of Incorporation, Prospectus and the Regulations.

The ACD is responsible for taking reasonable steps for the prevention and detection of fraud and other irregularities.

Directors' Statement

In accordance with the requirements of the rules in the Financial Conduct Authority's Collective Investment Schemes Sourcebook, we hereby certify the Report on behalf of the Directors of BNY Mellon Fund Managers Limited.

BNY Mellon Investment Funds - Annual Report & Accounts

Statement of the Depositary's Responsibilities and report of the Depositary to the shareholders of BNY Mellon Investment Funds ('the Company') for the year ended 30 June 2023

The Depositary must ensure that the Company is managed in accordance with the Financial Conduct Authority's Collective Investment Schemes Sourcebook, the Open-Ended Investment Companies Regulations 2001 (SI 2001/1228) ('the OEIC Regulations'), as amended, the Financial Services and Markets Act 2000, as amended, (together "the Regulations"), the Company's Instrument of Incorporation and Prospectus (together "the Scheme documents") as detailed below.

The Depositary must in the context of its role act honestly, fairly, professionally, independently and in the interests of the Company and its Investors.

The Depositary is responsible for the safekeeping of all custodial assets and maintaining a record of all other assets of the Company in accordance with the Regulations.

The Depositary must ensure that:

- The Company's cash flows are properly monitored and that cash of the Company is booked into the cash accounts in accordance with the Regulations;
- the sale, issue, redemption and cancellation of shares are carried out in accordance with the Regulations;
- the value of shares of the Company are calculated in accordance with the Regulations;
- any consideration relating to transactions in the Company's assets is remitted to the Company within the usual time limits;
- the Company's income is applied in accordance with the Regulations; and
- the instructions of the Authorised Fund Manager ("the AFM") are carried out (unless they conflict with the Regulations).

The Depositary also has a duty to take reasonable care to ensure that the Company is managed in accordance with the Regulations and the Scheme documents in relation to the investment and borrowing powers applicable to the Company.

Having carried out such procedures as we consider necessary to discharge our responsibilities as Depositary of the Company, it is our opinion, based on the information available to us and the explanations provided, that in all material respects the Company, acting through the AFM:

- (i) has carried out the issue, sale, redemption and cancellation, and calculation of the price of the Company's shares and the application of the Company's income in accordance with the Regulations and the Scheme documents of the Company; and
- (ii) has observed the investment and borrowing powers and restrictions applicable to the Company.

BNY Mellon Investment Funds - Annual Report & Accounts

Independent Auditor's Report to the Shareholders of BNY Mellon Investment Funds

Opinion

We have audited the financial statements of BNY Mellon Investment Funds ("the Company") comprising each of its sub-funds for the year ended 30 June 2023, which comprise the Statement of Total Return, the Statement of Change in Net Assets Attributable to Shareholders, the Balance Sheet, the related notes and the Distribution Tables, and the accounting policies of the Company, which include a summary of significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards including FRS 102 'The Financial Reporting Standard applicable to the UK and Republic of Ireland' (United Kingdom Generally Accepted Accounting Practice).

In our opinion, the financial statements:

- give a true and fair view of the financial position of the Company comprising each of its sub-funds as at 30 June 2023 and of the net revenue/expense and the net capital gains/losses on the scheme property of the Company comprising each of its sub-funds for the year then ended; and
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report below. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the Financial Reporting Council's (the FRC) Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of matter

We draw attention to Note 1.1(a) of the financial statements which explains that the ACD intends to terminate the BNY Mellon Equity Income Booster Fund, BNY Mellon Equity Income Fund and BNY Mellon Sustainable Sterling Bond Fund and therefore does not consider it to be appropriate to adopt the going concern basis of accounting in preparing the financial statements for these sub-funds. Accordingly, the financial statements for these sub-funds, have been prepared on a break-up basis as described in Note 1.1(a). Our opinion is not modified in respect of this matter.

Conclusions relating to going concern

The financial statements for the BNY Mellon Equity Income Booster Fund, BNY Mellon Equity Income Fund and BNY Mellon Sustainable Sterling Bond Fund have been prepared on a break-up basis as disclosed in Note 1.1(a).

In auditing the financial statements of the remaining sub-funds, we have concluded that the ACD's use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the remaining sub-funds' ability to continue as a going concern for a period of 12 months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the ACD with respect to going concern are described in the relevant sections of this report. However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the Company's ability to continue as a going concern.

Other information

The other information comprises the information included in the Annual Report other than the financial statements and our auditor's report thereon. The ACD is responsible for the other information contained within the Annual Report.

Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in this report, we do not express any form of assurance conclusion thereon.

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of the other information, we are required to report that fact.

We have nothing to report in this regard.

Opinions on other matters prescribed by the rules of the Collective Investment Schemes Sourcebook of the Financial Conduct Authority (the 'FCA')

In our opinion:

- the financial statements have been properly prepared in accordance with the Statement of Recommended Practice relating to Authorised Funds, the rules of the Collective Investment Schemes Sourcebook of the FCA and the Instrument of Incorporation; and;
- there is nothing to indicate that adequate accounting records have not been kept or that the financial statements are not in agreement with those records; and
- the information given in the ACD's report for the financial year for which the financial statements are prepared is consistent with the financial statements.

Matters on which we are required to report by exception

We have nothing to report in respect of the following matter in relation to which the Collective Investment Schemes Sourcebook of the FCA requires us to report to you if, in our opinion:

- we have not received all the information and explanations which, to the best of our knowledge and belief, are necessary for the purposes of our audit.

Responsibilities of the ACD

As explained more fully in the ACDs responsibilities statement set out on page 1028, the ACD is responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the ACD determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the ACD is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the ACD either intends to wind up or terminate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Explanation as to what extent the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect irregularities, including fraud. The risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below. However, the primary responsibility for the prevention and detection of fraud rests with both those charged with governance of the entity and management.

Our approach was as follows:

- We obtained an understanding of the legal and regulatory frameworks that are applicable to the Company and determined that the most significant are United Kingdom Generally Accepted Accounting Practice (UK GAAP), Investment Management Association's Statement of Recommended Practice (IMA SORP), the FCA Collective Investment Schemes Sourcebook, the OEIC Regulations, the Company's Instrument of Incorporation and the Prospectus.
- We understood how the Company is complying with those frameworks through discussions with the ACD and the Company's administrators and a review of the Company's documented policies and procedures.
- We assessed the susceptibility of the Company's financial statements to material misstatement, including how fraud might occur by considering the risk of management override, specifically management's propensity to influence revenue and amounts available for distribution. We identified a fraud risk in relation to incomplete or inaccurate income recognition through incorrect classification of special dividends between revenue and capital and the resulting impact to amounts available for distribution. We tested the appropriateness of management's classification of material special dividends as either a capital or revenue return.
- Based on this understanding we designed our audit procedures to identify non-compliance with such laws and regulations. Our procedures involved review of the reporting to the ACD with respect to the application of the documented policies and procedures and review of the financial statements to test compliance with the reporting requirements of the Company.
- Due to the regulated nature of the Company, the Statutory Auditor considered the experience and expertise of the engagement team to ensure that the team had the appropriate competence and capabilities which included the use of specialists where appropriate to identify non-compliance with the applicable laws and regulations.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at <https://www.frc.org.uk/auditorsresponsibilities>. This description forms part of our auditor's report.

Use of our report

This report is made solely to the Company's Shareholders, as a body, pursuant to Paragraph 4.5.12 of the rules of the Collective Investment Schemes Sourcebook of the FCA. Our audit work has been undertaken so that we might state to the Company's Shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's Shareholders as a body, for our audit work, for this report, or for the opinions we have formed.

BNY Mellon Investment Funds - Annual Report & Accounts

Investor Information (Unaudited)

General

BNY Mellon Investment Funds (the Company) is an open-ended investment company with variable capital, incorporated in England and Wales under registered number IC 27 and authorised by the Financial Conduct Authority, with effect from 13 April 1999. BNY Mellon Fund Managers Limited is the ACD. The FCA registered number for the ACD is 122007.

The Company has been established as an “umbrella company” with different Sub-funds. The assets of each Sub-fund of the Company are treated as separate from those of every other Sub-fund and will be invested in accordance with that Sub-fund’s own investment objective and policy. For the avoidance of doubt, and as at the date of this annual report, the Company is a UK protected cell company under the Open-Ended Investment Companies Regulations 2001, as amended (OEIC Regulations).

As an umbrella company, the Sub-funds of the Company are segregated portfolios of assets and, accordingly, the assets of each Sub-fund belong exclusively to that Sub-fund and shall not be used to discharge directly or indirectly the liabilities of, or claims against, any other person or body, including the Company, or any other Sub-fund, and shall not be available for any such purpose. Any liability incurred on behalf of or attributable to any Sub-fund shall be discharged solely out of the assets of that Sub-fund.

While provisions of the OEIC Regulations provide for segregated liability between Sub-funds, the concept of segregated liability is relatively new. Accordingly, where claims are brought by local creditors in foreign courts or under foreign law contracts, it is not yet known how those foreign courts will react to the relevant OEIC Regulations. There remains a possibility that a creditor might seek to attach or seize assets of one Sub-fund in satisfaction of an obligation owed in relation to another Sub-fund in a jurisdiction which would not recognise the principle of segregation of liability between Sub-funds.

Each Sub-fund will be charged with the liabilities, expenses, costs and charges of the Company attributable to that Sub-fund and within the Sub-funds charges will be allocated between share classes in accordance with the terms of issue of those share classes.

Any assets, liabilities, expenses, costs or charges not attributable to a particular Sub-fund may be allocated by the ACD in a manner which is fair to shareholders as a whole but they will normally be allocated to all Sub-funds pro rata to the value of the net assets of the relevant Sub-funds. If there is any such re-allocation the ACD will advise shareholders in the next succeeding annual report to shareholders.

Shareholders are not, however, liable for the debts of the Company. A shareholder is not liable to make any further payment to the Company after payment of the purchase price of the Shares.

Remuneration Disclosure

BNY Mellon Fund Managers Limited (BNYMFM) as Authorised Corporate Director (ACD) delegates portfolio management in respect of the Sub-funds of the Company to Insight Investment Management (Global) Limited (IIM(G)L), Newton Investment Management Limited (NIML), Newton Investment Management North America LLC (NIMNA) and Walter Scott & Partners Limited (WS&P) (collectively “the Investment Managers”). The Investment Manager is paid a fee for the investment services provided from the annual management charge collected by the ACD from each of the Sub-funds which is disclosed in the Prospectus available at <http://www.bnymellonim.com>. IIM(G)L, NIML and WS&P are within a consolidation group, BNY Mellon Investment Management Europe Holdings Limited (IMEH), which makes aggregate disclosures of the amount of remuneration paid to certain categories of staff as part of the Pillar 3 Disclosure derived from the EU Capital Requirements Directive (CRD). The categories of staff included within the Pillar 3 remuneration disclosure includes senior management, risk-takers, staff in control functions and any employee receiving total remuneration in the same bracket as senior management and whose professional activities have a material impact on the firm’s risk profile. NIMNA is not part of the IMEH consolidation group and is not required to make similar disclosures under the laws and regulations applicable in its home jurisdiction. During the financial year to 30 June 2023, NIMNA managed three Sub-funds which constitutes 1.52% of the total net asset value of the Company and represents a very small proportion of the total assets managed by NIMNA. The Directors have therefore concluded that, in applying principles of proportionality, a remuneration disclosure in respect of NIMNA either at aggregate level or expressed as the remuneration paid specifically in respect of the Sub-fund calculated on a pro-rata basis is not necessary.

The total amount of fixed and variable remuneration for the year ending 30 June 2023 of the 6 directors and 1 senior manager of the UCITS Manager is disclosed below.

Client classification notice:

Under the FCA's Conduct of Business rules we are required to classify our investors. We have classified you as a Retail Client unless otherwise notified. This means that you will have the maximum amount of protection available for complaints and compensation, and will receive information in a straightforward way. However, some clients, such as professional investors, may not necessarily have the same rights under the Financial Ombudsman Service and the Financial Services Compensation Scheme. Further details may be found on our website – www.bnymellonim.com under Client Classification.

The ACD makes available the daily prices of shares on its website: www.bnymellonim.com. The ACD has dispensed with the requirement to convene Annual General Meetings of the Company. However, Extraordinary General Meetings will continue to take place as and when required.

Dilution Adjustment

As set out in the Prospectus, the ACD may make a dilution adjustment when calculating the price of a share. In deciding whether to make a dilution adjustment at any valuation point, the ACD will take into account the number of shares to be created or cancelled. Where the number of shares to be created exceeds the number of shares to be cancelled, the dilution adjustment to the share price will be upwards. Where the number of shares to be cancelled exceeds the number of shares to be created, the dilution adjustment to the share price will be downwards.

Comparative Table - Prices

Highest and Lowest prices shown in the Statistics of the Sub-funds represent the 12pm MID price as released to market.

Equalisation

Equalisation applies only to units purchased during the distribution period (Group 2 units). It is the average amount of revenue included in the purchase price of all Group 2 units and is refunded to holders of these units as a return of capital.

⁴The SRRI rating of Euro Accumulation Shares changed from 5 to 6, effective December 2022, all other share classes are rated 5.

⁵The SRRI rating changed from 5 to 6, effective March 2023 and returned back from 6 to 5, effective May 2023.

⁶The SRRI rating of all share classes changed from 5 to 6, effective December 2022.

⁷The SRRI rating changed from 3 to 4, effective January 2023.

⁸The SRRI rating changed from 5 to 6, effective May 2023.

⁹The SRRI rating of all share classes changed from 5 to 6, effective October 2022.

¹⁰The SRRI rating of Euro Accumulation Shares changed from 5 to 6, effective September 2022. All other share classes changed from 5 to 6, effective December 2022.

¹¹The SRRI rating changed from 5 to 6, effective February 2023.

¹²The SRRI rating of Institutional Shares W (Accumulation) USD is 6, all other share classes are rated 5.

We have calculated the risk and reward category, as shown above, using a method of calculation derived from EU rules. It is based on the rate at which the value of the Sub-fund has moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the Sub fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment.

Please note that these amendments are not due to a change in the investment objectives of the Sub-fund, but are due to market movements during the reporting period:

Sub-funds in category 3 have in the past shown moderately low volatility. With a Sub-fund of category 3, you have a moderately low risk of losing money but your chance for gains is also moderately low.

Sub-funds in category 4 have in the past shown moderate volatility. With a Sub-fund of category 4, you have a moderate risk of losing money but your chance for gains is also moderate.

Sub-funds in category 5 have in the past shown moderately high volatility. With a Sub-fund of category 5, you have a moderately high risk of losing money but your chance for gains is also moderately high.

Sub-funds in category 6 have in the past shown relatively high volatility. With a Sub-fund of category 6, you have a relatively high risk of losing money but your chance for gains is also relatively high.

For further information on the risks that may not be fully captured by the risk and reward indicator, please refer to the current Key Investor Information Document (KIID).

Securities Lending

The following notes apply to all Sub-funds which engaged in securities lending activity during the year.

Collateral received from counterparties in respect of securities lending transactions consists of the following:

- (1) Debt obligations and securities issued or guaranteed by the following governments, agencies and instrumentalities where rated either (i) AA or better by Standard & Poor's or (ii) AA or better by Fitch or (iii) Aa2 or better by Moody's Rating Agencies respectively: Australia; Austria; Belgium; Canada; Denmark; Finland; France; Germany; Ireland; Italy; Japan; Luxembourg; Netherlands; New Zealand; Norway; Portugal; Spain; Sweden; Switzerland; United Kingdom; United States of America;
- (2) Debt obligations where rated either (i) AAA or better by Standard & Poor's or (ii) AAA or better by Fitch or (iii) Aaa2 or better by Moody's Rating Agencies respectively for the following Supranational issuers: European Bank for Reconstruction and Development; European Investment Bank; European Union; Inter-American Development Bank; International Bank for Reconstruction and Development; International Finance Corporation;
- (3) Equity securities from the following indices: AEX 25 (Netherlands), CAC 40 (France), DAX 30 (Germany), Euro 50 (Eurozone), FTSE 100 (United Kingdom), Nikkei 225 (Japan), SMI 20 (Switzerland), S&P 500 (United States of America);
- (4) FTSE100 DBV (Class F10) as defined in the CREST Reference Manual; and
- (5) Unstripped British Government Stock (Class UBG) as defined in the CREST Reference Manual

Securities lending collateral is not reinvested.

The collateral is held in pooled accounts.

The maturity tenor analysis shown in the following pages for each Sub-fund has been based on the respective transaction contractual maturity date. Securities on loan have an open maturity tenor as they are callable or terminable on a daily basis.

All securities lending transactions entered into by a Sub-fund are subject to a written legal agreement between the Sub-fund and the Lending Agent, and separately between the Lending Agent and the approved borrowing counterparty. Collateral received in exchange for securities lent is delivered to an account in the name of the Depository on behalf of the Sub-fund. Collateral received is segregated from the assets belonging to the Sub-fund's Depository or the Lending Agent.

The total income earned from securities lending transactions is split between the relevant Sub-fund and The Bank of New York Mellon, London Branch. The Sub-fund receives 81% while The Bank of New York Mellon, London Branch receives 19% of such income with all operational costs borne out of the The Bank of New York Mellon's, London Branch share. Income earned during the year by each Sub-fund from securities lending transactions is disclosed as part of Revenue in the Statement of Total Return in the financial statements of each Sub-fund.

At the period end, the following Sub-funds did not engage in securities lending activity; BNY Mellon FutureLegacy 3 Fund, BNY Mellon FutureLegacy 4 Fund, BNY Mellon FutureLegacy 5 Fund, BNY Mellon FutureLegacy 6 Fund, BNY Mellon FutureLegacy 7 Fund, BNY Mellon Global Dynamic Bond Fund, BNY Mellon Global Dynamic Bond Income Fund, BNY Mellon Global Emerging Markets Opportunities Fund, BNY Mellon Global High Yield Bond Fund, BNY Mellon Global Infrastructure Income Fund, BNY Mellon Index Linked Gilt Fund, BNY Mellon International Bond Fund, BNY Mellon Long Gilt Fund, BNY Mellon Multi-Asset Income Fund, BNY Mellon Sustainable Global Dynamic Bond Fund, BNY Mellon Sustainable Global Emerging Markets Fund, BNY Mellon Sustainable Global Equity Fund, BNY Mellon Sustainable Global Equity Income Fund, BNY Mellon Sustainable Real Return Fund, BNY Mellon Sustainable Sterling Bond Fund, BNY Mellon US Equity Income Fund, Responsible Horizons Strategic Bond Fund and Responsible Horizons UK Corporate Bond Fund.
