UBAM - Angel Japan Small Cap Equity, a sub-fund of UBAM

Class: APHC CHF (Capitalisation) LU0447831776

UBAM is a SICAV managed by UBP Asset Management (Europe) S.A.

Objectives and investment policy

The Fund seeks to grow your capital and generate income primarily by investing in Japanese equities.

It is an actively managed, concentrated portfolio of stocks mainly denominated in Japanese Yen.

The Fund invests in stocks that we believe will rise in value over the long term. It invests in stocks that fit into one or more of the following themes: small & mid-sized companies; low valuations; fallen angels (stocks that have fallen sharply in value but that we believe will recover); and stocks that could rise in value due to mergers or acquisitions.

The minimum market capitalization of selected companies will be JPY 10 billion.

The Fund's value is calculated and expressed in Japanese Yen.

The currency risk in relation to the base currency JPY is mainly hedged.

Investors in the Fund can subscribe and redeem units on any business day in Luxembourg except days where the decisive market is closed: Japan (JP)

Details of the closing days are available here:

<https://www.ubp.com/en/our-offices/ubp-asset-management-europe-sa>.

The recommended holding period is five years.

As an equity fund, its holdings can move in line with or return less than the broad stock market, so investors should be aware that the value of their holdings could fall and that they may not get back their initial investment.

Any income received by the Fund is reinvested (capitalisation share class).

Risk and reward profile

With lower risk,

With higher risk,

This indicator represents the annual historical volatility of the Fund over a 5-year period.

Risk category 6 reflects a very high potential gain and/or loss in the portfolio's value.

This is due to investments in equities on the Japanese market.

Historical data such as that used to calculate the synthetic indicator cannot be considered as a reliable indication of the Fund's future risk profile.

The risk category associated with the Fund is not guaranteed and may change over time.

The lowest risk category does not mean "risk free".

Your initial investment is not guaranteed.

Significant risk(s) for the Fund not taken into account in this indicator include the following:

Liquidity risk: Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Fund's returns because the Fund may be unable to transact at advantageous times or prices.

Counterparty risk: As the Fund uses over-the-counter derivatives, there is a risk that the counterparty to the transactions will wholly or partially fail to honour its contractual obligations. This may result in a financial loss to the Fund.

Full details of risks are disclosed in the chapter "Risk Factors" in the prospectus.
