Portfolio Manager

UBS Asset Management (UK) Ltd

Features of the Company

UBS (Lux) Institutional SICAV (hereinafter called the "Company") was incorporated on 30 March 2006 as an open-ended investment fund in the form of a "Société d'Investissement à Capital Variable" (SICAV) pursuant to Part I of the Luxembourg law relating to Undertakings for Collective Investment of 17 December 2010 as amended.

The Articles of Association were published in the "Mémorial, Recueil des Sociétés et Associations", hereinafter called "Mémorial", the official gazette of the Grand Duchy of Luxembourg, on 14 April 2006 and deposited at the Commercial and Company Register of the District Court in Luxembourg for inspection. Each amendment will be published in the "Mémorial". Such amendments become legally binding in respect of all shareholders subsequent to their approval by the general meeting of shareholders.

The Company can offer to investors various subfunds ("umbrella construction"), which invest in accordance with the investment policy described in the sales prospectus. The specific details on each subfund are defined in the prospectus, which will be updated on the inception of each new subfund.

With effect from 16 May 2011, the Company has appointed UBS Fund Management (Luxembourg) S.A. as its Management Company.

The Company can issue several share classes for each of the subfunds. In general, all share classes presently in issue are reserved to institutional investors having concluded an agreement (such as, but not limited to a portfolio management agreement) with UBS Asset Management or one of its authorised delegates. This does explicitly not apply to share classes RA and RD which can be offered to the public as well.

Currently, the following share classes are offered:

- Share classes AA, AA-T1, AD-UK, AD-T2, CA, RA and RD, for which the flat fee is directly deducted from the subfund's NAV and covers all expenses.
- Share classes BA, DA and BD-UK, for which the portfolio management and distribution fees are charged outside the Company, directly at the level of the agreement concluded by the investor. The share classes only bear operational and administrative expenses such as administration and Depositary fees.

- Share classes EM and EP for which the flat fee is directly deducted from the subfund's NAV and covers all expenses. These shares will have an issue price of 100 000 (in each subfund's reference currency). This class aims exclusively at financial products (i.e. fund-of-funds or other pooled structures according to various legislations). This share class has a high initial value aiming at facilitating day-to-day operations of these pooled structures.
- Share class FA, for which the portfolio management, distribution, custody and administration fees are charged outside the Company, directly at the level of the agreement concluded by the investor. These shares will have an issue price of 10 000 (in each subfund's reference currency). This class aims exclusively at financial products (i.e. fund-of-funds or other pooled structures according to various legislations). This share class has a high initial value aiming at facilitating day-to-day operations of these pooled structures. In addition, it features the same characteristics as the share class XA.
- Share classes XA, YD and YA, for which the portfolio management, distribution, custody and administration fees are charged outside the Company, directly at the level of the agreement concluded by the investor.

The share classes offered have the following characteristics:

- Share classes AA, BA, FA and XA are reinvesting their dividends and other income, rather than distributing it on a regular basis.
- All share classes will be issued in registered form only. For share classes whose reference currencies are not identical to the currency of account of the subfund ("share classes in foreign currencies"), the fluctuation risk of the reference currency price for those share classes is hedged against the currency of account of the subfund. Provision is made for the amount of the hedging to be between 95% and 105% of the total net assets of the share class in foreign currency. Changes in the market value of the portfolio, as well as in subscriptions and redemptions of share classes in foreign currencies, can result in the hedging temporarily surpassing the aforementioned range. The Company and the Portfolio Manager will then take all the necessary steps to bring the hedging back within the aforementioned limits. The hedging described has no effect on possible currency risks resulting from investments denominated in a currency other than the respective subfund's currency of account.

- Shares in classes with “seeding” in their name are only offered for a limited period of time. At the end of this period, no further subscriptions are permitted unless the Company decides otherwise. However, these shares may still be redeemed in accordance with the conditions for the redemption of shares. Unless the Company decides otherwise, the smallest tradeable unit, the initial issue price and the minimum subscription amount are those of the aforementioned asset classes.

Generally, the shareholder may convert any time into another subfund or share class of the same subfund. However, the following exceptions apply:

- The conversion is only possible into shares issued; no conversion is possible if the issue of shares by the subfund has been suspended.
- The right to convert shares is subject to compliance with any conditions applicable to the share class or category of share into which conversion is to be effected.
- The conversion of RA and RD shares into other classes of shares is not permitted.
- Conversions can only be made for a definite number of shares.
- Due to technical restrictions conversions from the following classes: AA, CA, BA, DA, YA and XA shares into the following classes: AA-T1 and AD-T2 shares are not possible.
- Conversions into Classes BA, DA, XA and AA-T1 and AD-T2 shares will only be executed at the Company's discretion, under the condition that the investor has signed an agreement with UBS Asset Management.

The entirety of the individual subfunds' net assets forms the total net assets of the Company, which at any time correspond to the share capital of the Company and consist of fully paid-in and non-par-value shares (the “shares”).

At general meetings, the shareholder has the right to one vote per share held, irrespective of the difference in value of shares in the respective subfunds. Shares of a particular subfund carry the right of one vote per share held when voting at meetings affecting this subfund.

The Company is a single legal entity. With respect to the shareholders, each subfund is regarded as being separate from the others. The assets of a subfund can only be used to offset the liabilities which the subfund concerned has assumed.

The Board of Directors of the Company is empowered at any time to establish new subfunds and/or to liquidate existing ones, as well as to establish different share classes with specific characteristics within these subfunds. The sales prospectus will be updated each time a new subfund or an additional equity class is issued.

The Company is unlimited with regard to duration and total assets.

The financial year of the Company ends on 31 December.

The ordinary general meeting takes place annually on 20 March at 10 a.m. at the registered office of the Company. If 20 March is not a business day in Luxembourg, the ordinary general meeting will take place on the next business day.

Only the information contained in the sales prospectus and in one of the documents referred to therein shall be deemed to be valid.

Information on whether a subfund of the Company is listed on the Luxembourg Stock Exchange can be obtained from the Administrative Agent or the Luxembourg Stock Exchange website (www.bourse.lu).

The issue and redemption of shares of the Company are subject to the regulations prevailing in the country concerned.

The annual and semi-annual reports are available free of charge to shareholders at the registered office of the Company and the Depositary.

No subscription may be accepted on the basis of the financial reports. Subscriptions are accepted only on the basis of the current prospectus accompanied by the latest annual report and the latest semi-annual report if available.

The figures stated in this report are historical and not necessarily indicative of future performance.

Independent auditor's report

To the Shareholders of

UBS (Lux) Institutional SICAV

33A, avenue J.F. Kennedy,
L-1855 Luxembourg

Opinion

We have audited the financial statements of UBS (Lux) Institutional SICAV (the "Fund"), which comprise the statement of net assets and the statement of investments in securities and other net assets as at 31 December 2018, and the statement of operations and the statement of changes in net assets for the year then ended, and the notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Fund as at 31 December 2018, and of the results of its operations and changes in its net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

Basis for Opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (the "Law of 23 July 2016") and with International Standards on Auditing ("ISAs") as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" ("CSSF"). Our responsibilities under those Law and standards are further described in the "responsibilities of the "réviseur d'entreprises agréé" for the audit of the financial statements" section of our report. We are also independent of the Fund in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants ("IESBA Code") as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements, and have fulfilled our other ethical responsibilities under those ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information included in the annual report but does not include the financial statements and our report of the "réviseur d'entreprises agréé" thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report this fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund and those charged with governance for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of these financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the “réviseur d’entreprises agréé” for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a report of the “réviseur d’entreprises agréé” that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund’s internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund.
- Conclude on the appropriateness of Board of Directors of the Fund use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund’s ability to continue as a going concern. If we

conclude that a material uncertainty exists, we are required to draw attention in our report of the “réviseur d’entreprises agréé” to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our report of the “réviseur d’entreprises agréé”. However, future events or conditions may cause the Fund to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report of the Portfolio Manager

During the financial year from 1 January 2018 to 31 December 2018, Emerging Markets equities performed negatively with Asia and the Far East leading the fall. Despite positive performance in the first quarter, international trade concerns and continued increases in US dollar strength weighed heavily on Emerging Markets over the first half of 2018. Oil prices reached a four-year high in the third quarter of 2018 and therefore weighed on Emerging Markets sentiment. Geopolitical factors rose in importance towards the end of the year as Turkey's row with the US deepened and the Argentine Peso reached a record low against the US dollar following the agreement of an IMF bailout. The final quarter of 2018 saw improving sentiment surrounding the US-China trade war though this was outweighed by sharp falls in Emerging Markets equities, driven by rising yields and a global equity sell off.

In the financial year, the subfund posted negative performance in line with its benchmark, the MSCI Emerging Markets (net div. reinv.). This is a passive subfund which aims to replicate the performance of an index and no active decisions are applied. The performance of the subfund reflects the performance of the benchmark.

Notes to the Financial Statements

Note 1 – Summary of significant accounting policies

The financial statements have been prepared in accordance with the generally accepted accounting principles for investment funds in Luxembourg. The significant accounting policies are summarised as follows:

a) Calculation of the Net Asset Value

The net asset value and the issue and redemption price per share of the different classes of any subfund are expressed in the currency of account of the subfund or the share class concerned and are calculated every business day by dividing the overall net assets of the subfund to which the respective share class is assigned by the number of shares outstanding in the relevant class of this subfund.

However, the net asset value of a share may also be calculated on days on which no shares are issued or redeemed in accordance with the following section. Such net asset value may be published but may only be used for performance calculations and statistics or fee calculations, but in no case as a basis for subscription and redemption orders.

The percentage of the overall net asset value to be assigned to a subfund's share class is determined by the relationship between the shares issued in each class and the total number of shares issued by the subfund. This percentage rate changes in accordance with distributions made and the issue and redemption of shares as follows:

- Each time a distribution is made on shares of the following class "AD-T2", the net asset value and issue and redemption price of shares in this class are reduced by the amount of the distribution (which leads to a reduction in the percentage of the net asset value attributed to the class concerned). Meanwhile the net asset value of the other share classes remains the same (leading to an increase in the percentage of the net asset value attributed to these classes).
- Each time shares are issued or redeemed, the net asset value attributable to the share class concerned is increased or reduced by the amount received or paid out.

b) Valuation principles

- The value of any cash is deemed to be the full amount thereof, unless in any case the same is unlikely to be paid or received in full, in which case the value thereof is arrived at after making such discount as may be

considered appropriate in such case to reflect the true value thereof.

Securities, derivatives and other investments listed on an official stock exchange are valued at the last known market prices. If the same security, derivative or other investment is quoted on several stock exchanges, the last available quotation on the stock exchange that represents the major market for this investment will apply.

- In the case of securities, derivatives and other investments where trading of these assets on the stock exchange is thin but which are traded between securities dealers on a secondary market using standard market price formation methods, the Company can use the prices on this secondary market as the basis for their valuation of these securities and other investments. Securities, derivatives and other investments that are not listed on a stock exchange, but that are traded on another regulated market which is recognised, open to the public and operates regularly, in a due and orderly fashion, are valued at the last available price on this market.
- Securities and other investments that are not listed on a stock exchange or traded on any other regulated market, and for which no reliable and appropriate price can be obtained, will be valued by the Company according to other principles chosen by it in good faith on the basis of the likely sales prices.
- The valuation of derivatives that are not listed on a stock exchange (OTC derivatives) is made by reference to independent pricing sources. In case only one independent pricing source of a derivative is available, the plausibility of the valuation price obtained will be verified by employing methods of calculation recognised by the Company, based on the market value of the underlying instrument from which the derivative has been derived.
- Units or shares of other undertakings for collective investment in transferable securities ("UCITS") and/or undertakings for collective investment ("UCIs") will be valued at their last net asset value. Certain units or shares of other UCITS and/or UCIs may be valued based on an estimate of the value provided by a reliable price provider independent from the target fund's investment manager or investment adviser (Estimated Pricing).
- The value of money market instruments which are not listed on a stock exchange or traded on another regulated market open to the public is based on the appropriate curves. The valuation based on the curves refers to the interest rate and credit spread components. The following principles are applied

in this process: for each money market instrument, the interest rates nearest the residual maturity are interpolated. The interest rate calculated in this way is converted into a market price by adding a credit spread that reflects the underlying borrower. This credit spread is adjusted if there is a significant change in the credit rating of the borrower.

- Securities, money market instruments, derivatives and other investments that are denominated in a currency other than the currency of account of the relevant subfund and which are not hedged by means of currency transactions are valued at the middle currency rate (midway between the bid and offer rate) known in Luxembourg or, if not available, on the most representative market for this currency.
- Time deposits and fiduciary investments are valued at their nominal value plus accumulated interest.
- The value of swap transactions is calculated by an external service provider, and a second independent valuation is made available by another external service provider. The calculation is based on the net present value of all cash flows, both inflows and outflows. In some specific cases, internal calculations based on models and market data available from Bloomberg and/or broker statement valuations may be used. The valuation methods depend on the respective security and are determined pursuant to the applicable UBS Valuation Policy.

The Company is authorised to apply other generally recognized and auditable valuation criteria in order to achieve an appropriate valuation of the net assets if, due to extraordinary circumstances, a valuation in accordance with the above-mentioned regulations proves to be unfeasible or inaccurate.

In the case of extraordinary circumstances, additional valuations, which will affect the prices of the shares to be subsequently issued or redeemed, may be carried out within one day.

c) *Valuation of forward foreign exchange contracts*

The unrealized gain (loss) of outstanding forward foreign exchange contracts is valued on the basis of the forward exchange rates prevailing at valuation date.

d) *Valuation of financial futures contracts*

Financial futures contracts are valued based on the latest available published price applicable on the valuation date. Realized gains and losses and the changes in unrealized gains and losses are recorded in the statement of operations. The realized gains and losses are calculated in accordance with the FIFO method, i.e. the first contracts acquired are regarded as the first to be sold.

e) *Net realized gains (losses) on sales of securities*

The realized gains or losses on the sales of securities are calculated on the basis of the average cost of the securities sold.

f) *Conversion of foreign currencies*

Bank accounts, other net assets and the valuation of the investments in securities, derivatives and other investments held denominated in currencies other than the reference currency of the different subfunds are converted at the mid closing spot rates on the valuation date. Income and expenses denominated in currencies other than the currency of the different subfunds are converted at the mid closing spot rates at payment date. Gain or loss on foreign exchange is included in the statement of operations.

The cost of securities denominated in currencies other than the reference currency of the different subfunds is converted at the mid closing spot rate on the day of acquisition.

g) *Accounting of securities' portfolio transactions*

The securities' portfolio transactions are accounted for the bank business day following the transaction dates.

h) *Consolidated financial statements*

The consolidated financial statements are expressed in EUR. The various items of the consolidated statement of net assets and the consolidated statement of operations at 31 December 2018 of the investment company are equal to the sum of the corresponding items in the financial statements of subfund converted into EUR at the following exchange rates.

The following exchange rate was used for the conversion of the consolidated financial statements as of 31 December 2018:

Exchange rate	
EUR 1 = USD	1.143150

i) *Receivable on securities sales, Payable on securities purchases*

The account "Receivable on securities sales" can also include receivables from foreign currency transactions. The account "Payable on securities purchases" can also include payables from foreign currency transactions.

j) *Income recognition*

Dividends, net of withholding taxes, are recognized as income on the date upon which the relevant securities are first listed as "ex-dividend". Interest income is accrued on a daily basis.

k) *Swaps*

The Company may enter into interest rate swap contracts, forward rate agreements on interest rates swaptions and credit default swaps, if they are executed with first-class financial institutions that specialize in transactions of this kind.

The valuation methods depend on the respective security and are determined pursuant to the UBS Valuation Policy. This valuation method is approved by the Board of Directors of the Management Company.

Changes in unrealized profits and losses are reflected in the statement of operations under "Unrealized appreciation (depreciation) on Swaps".

Gains or losses on swaps incurred when closed-out or matured are recorded as "Realized gain (loss) on Swaps" in the statement of operations. The Management Company is authorised to apply other generally recognised and auditable valuation criteria in good faith in order to achieve an appropriate determination of the valuation of the net asset value if, due to extraordinary circumstances, a valuation in accordance with the aforementioned regulations proves to be unfeasible or inaccurate.

Note 2 – Expenses paid by the Company

For the management, administration, portfolio management and distribution of the Company (if applicable), as well as for all the tasks of the Depositary, such as the safekeeping and supervision of the Company's assets, the handling of payment transactions and all other tasks listed in the section "Depositary and main paying agent" of the sales prospectus, a maximum flat fee based on the net asset value of the Company is charged to the Company in accordance with the following provisions: this fee is charged to the Company's assets on a pro rata basis upon every calculation of net asset value and paid on a monthly basis (maximum flat fee). The relevant maximum flat fee will only be charged upon launch of the corresponding share classes.

UBS (Lux) Institutional SICAV	Share classes	Maximum flat fee p.a.	Transaction fee
- Emerging Markets Equity Passive*	AA ¹⁾	max. 0.63%	max. 1.00% ⁴⁾
	BA ²⁾	max. 0.18%	max. 1.00% ⁴⁾
	FA ³⁾ and XA ³⁾	none	max. 1.00% ⁴⁾

* Costs in connection to the index license payments may occur and will be charged at subfund's level.

¹⁾ For these share classes, the portfolio management, the depositary and distribution fees are charged at the subfund's level, in addition to operational and administrative expenses, calculated on the average net assets attributable to the relevant share class and payable monthly.

²⁾ For this share class, the portfolio management and distribution fees are charged outside the Company, directly at the level of the agreement concluded by the investor with UBS Asset Management or one of its authorised delegates. Class BA shares only bear operational and administrative expenses. If a shareholder terminates the agreement with UBS Asset Management or one of its authorised delegates, the net asset value of the shares will be redeemed to the shareholder.

³⁾ For these share classes, the fees for portfolio management, distribution, custody and administration are charged outside the Company, directly at the level of the agreement concluded by the investor with UBS Asset Management or one of its authorised delegates. If a shareholder terminates the agreement with UBS Asset Management or one of its authorised delegates, the net asset value of the shares will be redeemed to the shareholder.

⁴⁾ The investors are subject to a transaction fee on all purchases and redemptions of shares. The proceeds of the transaction fee are retained by the subfund to offset trading costs associated with purchase and redemptions to protect the other clients from asset dilution. The transaction fee will be waived in case of a subscription or redemption in kind.

The fee rates mentioned above are those effective at year end.

The maximum flat fee does not include the following fees and additional expenses which are also charged to the Company:

- a) all additional expenses related to management of the Company's assets for the sale and purchase of assets (bid/offer spread, brokerage fees in line with the market, commissions, fees, etc.). These expenses are generally calculated upon the purchase or sale of the respective assets. In derogation hereto, these additional expenses, which arise through the sale

and purchase of assets in connection with the settlement of the issue and redemption of units, are covered by the application of the single swing pricing principle pursuant to the section "Net asset value, issue, redemption and conversion price" of the sales prospectus;

- b) fees of the supervisory authority for the establishment, modification, liquidation and merger of the Company, as well as all fees of the supervisory authorities and any stock exchanges on which the subfunds are listed;
- c) auditor's fees for the annual audit and certification in connection with the establishment, modification, liquidation and merger of the Company, as well as any other fees paid to the auditor for the services it provides in relation to the administration of the Fund and as permissible by law;
- d) fees for legal and tax advisers, as well as notaries, in connection with the establishment, registration in distribution countries, modification, liquidation and merger of the Company, as well as for the general safeguarding of the interests of the Company and its investors, insofar as this is not expressly prohibited by law;
- e) costs for the publication of the Company's net asset value and all costs for notices to investors, including translation costs;
- f) costs for the Company's legal documents (prospectuses, KIID, annual and semi-annual reports, as well as all other documents legally required in the countries of domiciliation and distribution);
- g) costs for the Company's registration with any foreign supervisory authorities, if applicable, including fees, translation costs and fees for the foreign representative or paying agent;
- h) expenses incurred through use of voting or creditors' rights by the Company, including fees for external advisers;
- i) costs and fees related to any intellectual property registered in the Company's name or usufructuary rights of the Company;
- j) all expenses arising in connection with any extraordinary measures taken by the Management Company, Portfolio Manager or Depositary for protecting the interests of the investors;
- k) if the Management Company participates in class-action suits in the interests of investors, it may charge the Company's assets for the expenses arising in connection with third parties (e.g. legal and Depositary costs). Furthermore, the Management Company may charge for all administrative costs, provided these are verifiable and disclosed, and taken into account in the disclosure of the Company's total expense ratio (TER).

The Management Company may pay retrocessions in order to cover the distribution activities of the Company.

All taxes levied on the income and assets of the Company, particularly the *taxe d'abonnement*, will also be borne by the Company.

The costs involved in launching new subfunds will be written off over a period of up to five years in the respective subfunds only.

Operational and administrative expenses are allocated among the subfunds, the categories and the classes of shares pro rata to their respective net assets (or in a fair and reasonable manner as determined by the Company).

When investing in shares of funds which are managed by UBS AG or a Company it controls, no issue or redemption commission is chargeable on subscription to or redemption of these shares.

The upper limit for management fees of target funds in which the subfunds' assets are invested amounts to a maximum of 3%, taking into account any trail fees.

If subfunds invest in funds which refund either entirely or partly the fees charged to their assets by means of payment, such payments will be added in full to the assets of the subfunds concerned.

The details of expenses paid by the relevant subfunds are disclosed in the KIID.

Note 3 – Taxe d’abonnement

In accordance with the law and the regulations currently in force, the Company is subject to a subscription tax at the annual rate of 0.01%, payable quarterly and calculated on the basis of the net assets at the end of each quarter.

The taxe d’abonnement is waived for that part of the Company assets invested in units or shares of other undertakings for collective investment that have already paid the taxe d’abonnement in accordance with the statutory provisions of Luxembourg law.

Note 4 – Other income

Other income mainly consist of income resulting from transaction fee on all purchases and redemptions of shares.

Note 5 – Distribution

The general meeting of shareholders of the respective subfund shall decide, upon the proposal of the Board of Directors and after closing the annual accounts per subfund, whether and to what extent distributions are to be paid out by each subfund and/or share class.

The payment of distributions must not result in the net assets of the Company falling below the minimum amount of assets prescribed by law. If a distribution

is made, payment will be effected no later than four months after the end of the financial year.

The Board of Directors is authorized to pay interim dividends and to suspend the payment of distributions.

Note 6 – Commitments on Financial Futures

Commitments on Financial Futures per subfund and respective currency as of 31 December 2018 can be summarised as follows:

Financial Futures

UBS (Lux) Institutional SICAV	Financial Futures on Indices (bought)	Financial Futures on Indices (sold)
- Emerging Markets Equity Passive	6 525 900.00 USD	- USD

The commitments on Financial Futures on bonds or index (if any) are calculated based on the market value of the Financial Futures (Number of contracts*notional contract size*market price of the futures).

Note 7 – Total Expense Ratio (TER)

This ratio was calculated in accordance with the Swiss Funds & Asset Management Association (SFAMA) "Guidelines on the calculation and disclosure of the TER" in the current version and expresses the sum of all costs and commissions charged on an ongoing basis to the net assets (operating expenses) taken retrospectively as a percentage of the net assets.

TER for the last 12 months:

UBS (Lux) Institutional SICAV	Total Expense Ratio (TER)
- Emerging Markets Equity Passive AA	0.74%
- Emerging Markets Equity Passive BA	0.21%
- Emerging Markets Equity Passive FA	0.03%
- Emerging Markets Equity Passive XA	0.03%

Note 8 – Transaction costs

Transaction costs include brokerage fees, stamp duty, local taxes and other foreign charges if incurred during the fiscal year. Transaction fees are included in the cost of securities purchased and sold.

For the financial year ended on 31 December 2018, the fund incurred transaction costs relating to purchase or sale of investments in securities and similar transactions, as follows:

UBS (Lux) Institutional SICAV	Transaction costs
- Emerging Markets Equity Passive	649 740.12 USD

Not all transaction costs are separately identifiable. For fixed income investments, forward currency contracts and other derivative contracts, transaction costs will be included in the purchase and sale price of the investment. Whilst not separately identifiable these transaction costs will be captured within the performance of each fund.

Note 9 – Applicable law, place of performance and authoritative language

The Luxembourg District Court is the place of performance for all legal disputes between the shareholders, the Company and the Depositary. Luxembourg law applies. However, in matters concerning the claims of investors from other countries, the Company and/or the Depositary can elect to make themselves and the Company subject to the jurisdiction of the countries in which the Company shares were bought and sold.

The English version of these financial statements is the authoritative version and only this version was audited from the independent auditor. However, in the case of shares sold to investors from the other countries in which Company shares can be bought and sold, the Company and the Depositary may recognise approved translations (i.e. approved by the Company and the Depositary) into the languages concerned as binding upon themselves and the Company.

Unaudited Information

1) Global Exposure

Risk management

Risk management in accordance with the commitment approach is applied pursuant to the applicable laws and regulatory provisions.

Leverage

Leverage is defined pursuant to the applicable ESMA directives as the total of the notional values of the derivatives used by the respective subfund. According to this definition, leverage may result in artificially increased leverage amounts, as some derivatives that can be used for hedging purposes may be included in the calculation. Consequently, this information does not necessarily reflect the precise actual leverage risk that the investor is exposed to.

UBS (Lux) Institutional SICAV	Global risk calculation method
- Emerging Markets Equity Passive	Commitment approach

2) Remuneration Policy and quantitative disclosure

The Board of Directors of UBS Fund Management (Luxembourg) S.A. has updated the remuneration policy (the "Policy") on 7 December 2018, whose objectives are on one hand; to ensure that the remuneration framework is in line with the applicable laws and regulations, and more specifically with provisions defined under (i) the Articles 111bis and 111ter of the Luxembourg Law of 17 December 2010 on Undertakings for Collective Investment in Transferable Securities as amended from time to time (the UCITS Law) transposing the UCITS Directive 2014/91/EU (the UCITS V Directive), (ii) the Alternative Investment Fund Managers (AIFM) Directive 2011/61/EU, transposed into the Luxembourg AIFM Law dated from 12 July 2013, as amended from time to time, (iii) the ESMA's guidelines on sound remuneration policies under the UCITS Directive - ESMA/2016/575 published on 14 October 2016 and ESMA's guidelines on sound remuneration policies under the AIFMD - ESMA/2016/579 published on 14 October 2016 amending the ESMA's guidelines on sound remuneration policies under the UCITS Directive and AIFMD published on 31 March 2016 - ESMA/2016/411 (the ESMA Guidelines) and (iv) the CSSF Circular 10/437 on Guidelines concerning the remuneration policies in the financial sector issued on 1 February 2010; (v) the Directive 2014/65/EU on markets in financial instruments (MiFID II); (vi) the Commission Delegated Regulation 2017/565/EC of 25 April 2016

supplementing Directive 2014/65/EU (MiFID II Level 2); (vii) the CSSF Circular 14/585, transposing the ESMA Guidelines 2013/606 on remuneration policies and practices (MiFID ESMA Guidelines); and on the other hand, to comply with the UBS AG Remuneration policy framework. The Policy is meant not to encourage excessive risk taking, to contain measures to avoid conflicts of interest, to be consistent with, and promote, sound and effective risk management and to be consistent with the UBS Group business strategy, objectives and values.

Further information in relation to UBS AG Remuneration Policy is available in the UBS Group AG Annual Report and in the Compensation report. More details about the remuneration policy of the Management Company, which describes, but not limited to, how remuneration and benefits are determined, are available at http://www.ubs.com/lu/en/asset_management/investor_information.html

Application of the requirements and remuneration disclosure

In accordance with the Article 151 of the UCITS Law, the Management Company is required to disclose at least annually certain information concerning its remuneration policy and the practices for its identified staff.

The Management Company complies with the aforementioned regulatory provisions in a way and to the extent that is appropriate to its size, internal organization and the nature, scope and complexity of its activities.

Considering the total size of funds under management, both UCITS and AIFs although a significant portion is not complex or risky investment, UBS Fund Management (Luxembourg) S.A. judges that the proportionality principle may not be applicable at the level of the company but at the level of the Identified staff.

By application of the proportionality principle for the Identified staff, the following requirements on pay-out processes for Identified staff are not applied:

- The payment of variable remuneration in instruments related mainly to the funds in relation to which they perform their activities;
- Deferral requirements;
- Retention periods;
- Incorporation of ex-post risk factors (i.e. malus or clawback arrangements);

Unaudited Information

The deferral requirements remain however applicable when the employee's total annual compensation is exceeding the threshold defined under the UBS Group Compensation Framework; the variable compensation will be treated in line with the plan rules defined under the UBS Group Compensation Framework.

There is no remuneration paid to identified staff of delegates from the Management Company.

Remuneration disclosure

For the fiscal year ending 31 December 2018, the aggregate total remuneration paid by UBS Fund Management (Luxembourg) S.A. to all its staff amounted to EUR 21 472, of which EUR 1 461 represented the variable remuneration. The Management Company employed an average of 34.7 staff (full time equivalent) during this period.

The aggregate total remuneration paid by the Management Company to its Identified Staff amounted to EUR 4 130.

Please further note that due to the roles of Management Company staff, this remuneration was calculated in proportion of the net assets of the Fund out of the net assets of all the funds under the governance of UBS Fund Management (Luxembourg) S.A. (including both AIF and UCITS funds).

3) Transparency of securities financing transactions and their reuse

No securities financing transactions or total return swaps within the meaning of Regulation (EU) 2015/2365 of the European Parliament and of the Council of 25 November 2015 on transparency of securities financing transactions and of reuse and amending Regulation (EU) No 648/2012 ("SFTR") were used in the investment fund's financial year. As a result, no disclosures within the meaning of Article 13 of said Regulation need to be made to investors in the annual report.

Unaudited Information

4) Facts and conditions

Valid as at 31 December 2018

All information subject to change at any time.

Keys to and explanations of the tables can be found on the following pages.

Flat fee

The flat fee covers all costs incurred in connection with asset management, distribution and fund administration (including fund management company, administrator and depositary), with the exception of the costs specified below, which are additionally charged to the subfunds. TTC (transaction and tax costs) and Other costs.

TTC (transaction and tax costs)

Estimated transaction and tax costs of transactions not created through subscriptions and redemptions. These costs also include well-founded estimates of implicit costs (e.g. bid/ask – difference).

Other costs

Costs charged directly to the subfunds (e.g. audit costs, supervisory fees, licence fees).

TER target funds

Total expense ratio (TER) of the underlying target funds as defined by the SFAMA.

Audited TER

Total expense ratio (TER) as defined by the SFAMA.

S / R method

Method used in subscriptions and redemptions of subfund units.

1) NAV

Issue price = redemption price = NAV (NAV = net asset value).

2) Dil. protection = Protection against dilution

- Issue price = NAV plus protection against dilution
- Redemption price = NAV minus protection against dilution
- Difference with NAV (= protection against dilution) always in favour of the subfund, in full, i.e. in favour of performance for investors.

3) SSP (Single Swinging Pricing)

- Issue price = redemption price = NAV plus swing factor if net subscriptions on the day of trading
- Issue price = redemption price = NAV minus swing factor if net redemptions on the day of trading
- Difference with NAV always in favour of the subfund, in full, i.e. in favour of performance for investors.
- The swing factors are geared to the brokerage charged by third-party brokers, taxes and duties as well as the difference calculated between the bid/ask rates of transactions resulting in subscriptions or redemptions. A UBS committee comprising financial experts monitors the market on an ongoing basis and adjusts the swing factors where necessary. If the swing factors for net subscriptions and net redemptions are different, the mean is used.

S / R - In basis points

Difference between the issue (= subscription) price or redemption price and the NAV as a percentage of the NAV (application of dilution protection or swing factor).

Cut-off time

Point at which subscription and redemption of shares close.
