What is this product?

Type

This product is a UCITS.

Term

The fund has no maturity date. The fund company has the right to terminate the management of the fund. More information can be found in the fund's prospectus.

Objectives

Investment objective The fund aims to increase the value of your investment over time and to outperform its benchmark.

Investment policy The fund is actively managed and invests in stocks globally, primarily in the biotech sector.

Investment decisions are based on in-depth (fundamental) analysis. The focus is on companies' business models, earning capacity, management and market positions. The return is determined by how much the fund's holdings increase or decrease in value during your holding period.

The fund promotes sustainability characteristics, and is therefore classified as Article 8 according to the EU regulation SFDR (Sustainable Finance Disclosure Regulation). The fund follows the fund company's sustainability policy, which is available at www.sebgroup.lu/funds.

Benchmark Nasdaq Biotechnology Index

The majority of the sub-fund's holdings may be constituents of the benchmark, but rather differ in weighting. The sub-fund's investment strategy does not aim to limit the extent to which the sub-fund's holdings deviate from the benchmark.

Subscription and Redemption You can normally buy and sell units in the fund every Luxembourg bank day, except December 24 and 31.

Distribution Policy The unit class is non-distributing.

Intended retail investor

This fund may be suitable for you who intends to keep your investment for at least 5 years, and who understands that the money invested in the fund can both increase and decrease in value. It is therefore not certain that you will get back all the invested capital. In order to invest in the fund, it is not required that you have any special prior knowledge or experience of mutual funds or financial markets.

Practical information

Depository Skandinaviska Enskilda Banken AB (publ), Luxembourg Branch.

Annual report, semi-annual report, prospectus, latest unit value and other practical information is available in the language of this document, free of charge, at www.sebgroup.lu/funds.

What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets.

We have classified this product as 5 out of 7, which is a medium-high risk class.

This rates the potential losses from future performance at a medium-high level.

Be aware of currency risk if you invest in a share class denominated in a currency that is different from the official currency of the country where the share class is being marketed. You will then receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

The figures shown include all the costs of the product itself, but possibly not the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product/a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment in the product/a suitable benchmark between 31 March 2015 and 31 March 2020.

Moderate: this type of scenario occurred for an investment in the product/a suitable benchmark between 30 April 2016 and 30 April 2021.

Favourable: this type of scenario occurred for an investment in the product/a suitable benchmark between 31 October 2012 and 31 October 2017.

Recommended holding period		5 years	
Example Investment		10,000 EUR

What happens if SEB Investment Management AB is unable to pay out?

According to law, the fund's assets may not be stored by the fund company. Instead, each fund must have a specific depositary that takes care of the safekeeping of the fund's assets. In the unlikely event that the fund company goes bankrupt, the management of the fund is taken over by the depositary. In such a scenario, there is no arranged compensation or guarantee scheme for investors in the fund.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment. If the fund is included as part of another product, e.g. unit linked insurance, there may be other costs for that product.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 EUR is invested.

Example Investment 10,000 EUR	if you exit after 1 year	if you exit after 5 years (recommended holding period)
Total Costs	167 EUR	1,028 EUR
Annual cost impact*	1.7%	1.7%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 5.1% before costs and 3.4% after costs. We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	0.00% , we do not charge an entry fee, but the person selling you the product may do so.	0 EUR

Ongoing costs		If you exit after 1 year
Management fees and other administrative or operating costs	1.56% of the value of your investment per year. This is an estimate based on actual costs over the last year.	156 EUR
Transaction costs	0.11% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	11 EUR
Incidental costs taken under specific conditions		If you exit after 1 year
Performance fees	There is no performance fee for this product.	0 EUR

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

The fund has no requirement for a minimum holding period, but since it invests in equities, it is suitable for a medium to long-term investment horizon. You should be prepared to hold your investment in the fund for at least 5 years. You normally have the opportunity to sell your fund units all bank days in Luxembourg except December 24 and 31 without any extra fee.
