#### NOTE 2 SUMMARY OF SIGNIFICANT ACCOUNTING PRINCIPLES

#### a) Presentation of financial statements

The financial statements are prepared in accordance with generally accepted accounting principles and presented in accordance with the legal reporting requirements applicable in Luxembourg relating to Undertakings for Collective Investment.

#### b) Valuation of assets

1) Securities, derivatives and other investments listed on a stock exchange are valued at their latest available published closing price on the valuation day. If the same security, derivative or other investment is quoted on several stock exchanges, the latest available published closing price on the valuation day on the stock exchange that represents the major market for this investment will apply.

In the case of securities, derivatives and other investments thinly traded on a stock exchange and for which a secondary market among securities traders exists with pricing in line with the market, the Management Company may value these securities, derivatives and other investments based on these prices. Securities, derivatives and other investments that are not listed on a stock exchange, but which are traded on another regulated market which is recognised, open to the public and operates in a due and orderly fashion, are valued at the last available price on this market.

- 2) Securities, derivatives and other investments that are not listed at a stock exchange or traded on another regulated market, and for which no appropriate price can be obtained, are valued by the Management Company according to other principles chosen by it in good faith on the basis of the likely sales prices.
- 3) The valuation of derivatives which are not listed on a stock exchange (Over The Counter ("OTC") derivatives) takes place by reference to independent pricing sources. In case only one independent pricing source of a derivative is available, the plausibility of the valuation obtained is verified by means of methods of calculation recognised by the Management Company, based on the market value of the underlying instrument from which the derivative is derived.
- 4) Shares of other Undertakings for Collective Investment in Transferable Securities ("UCITS") and/or UCIs are valued at their last Net Asset Value ("NAV").
- 5) For money market instruments, the valuation price is gradually adjusted to the redemption price, based on the net acquisition price and retaining the ensuing yield. In the event of a significant change in market conditions, the basis for the valuation of different investments is brought into line with the new market yields.
- 6) Securities, money market instruments, derivatives and other investments that are denominated in a currency other than the currency of account of the relevant sub-fund and which are not hedged by means of currency transactions are valued at the middle currency rate (midway between the bid and offer rate) obtained from external price providers.
- 7) Time deposits and fiduciary investments are valued at their nominal value plus accumulated interest.

### Notes to the financial statements as at June 30, 2024 (continued)

8) Cash is valued at nominal value, plus accrued interest.

The net resulting foreign exchange gain or loss are included in the statement of operations and changes in net assets.
