Notes to the financial statements

as at 30th June 2015

Note 1 - Significant accounting policies

a) Presentation of the financial statements

The financial statements of the SICAV are established in accordance with the Luxembourg legal and regulatory requirements concerning Undertakings for Collective Investment.

b) Valuation of assets

The value of cash on hand or on deposit, bills and notes due on demand, accounts receivable, prepaid expenses, dividends, and interest declared or due but not yet received consists of the nominal value of these assets, unless it is unlikely that this value will be received, in which event, the value shall be determined by deducting an amount which the SICAV deems adequate to reflect the real value of these assets.

The value of all transferable securities, money-market instruments and financial derivative instruments that are listed on a stock exchange or traded on another regulated market that operates regularly, and is recognised and open to the public, is determined based on the most recent available price.

The value for liquid assets and money market instruments is determined by using an amortised cost method. This involves valuing an investment at its cost and thereafter assuming a constant amortisation to maturity of any discount or premium. All other assets, where practice allows, may be valued in the same manner.

The value of securities representative of an open-ended undertaking for collective investment is determined according to the last official net asset value per unit or according to the last estimated net asset value if it is more recent than the official net asset value, and provided that the SICAV is assured that the valuation method used for this estimate is consistent with that used for the calculation of the official net asset value.

To the extent that

- any transferable securities, money market instruments and/or financial derivative instruments held in the portfolio on the Valuation Day are not listed or traded on a stock exchange or other regulated market that operates regularly and is recognised and open to the public or,
- for transferable securities, money market instruments and/or financial derivative instruments listed and traded on a stock exchange or on other market but for which the price determined is not, in the opinion of the Board of Directors, representative of the real value of these transferable securities, money market instruments and/or financial derivative instruments or,
- for financial derivative instruments traded over-the-counter and/or securities representing undertakings for collective investment, the price determined is not, in the opinion of the Board of Directors, representative of the real value of these financial derivative instruments or securities representing undertakings for collective investment,

the Board of Directors estimates the probable realisation value prudently and in good faith.

c) Acquisition cost of securities in the portfolio

The acquisition cost of the securities held by each sub-fund that are denominated in currencies other than the reference currency of the sub-fund is converted into this currency at the exchange rate prevailing on the date of purchase.

Notes to the financial statements (continued)

as at 30th June 2015

d) Net realised gain / (loss) on sales of securities

The realised gains and losses on sales of securities are calculated on the basis of the average acquisition cost.

Forward foreign exchange contracts are valued at forward rates for the remaining period from valuation date to the maturity of the contracts. Net unrealised gains or losses are recorded in the statement of net assets. Net variation of unrealised gains or losses and net realised gains or losses are recorded in the statement of operations and other changes in net assets.

h) Valuation of futures contracts

Futures contracts are posted off-balance sheet and valued at the last settlement or close price on the stock exchanges or regulated markets. Unrealised gains or losses are recorded in the statement of net assets. Net variation of unrealised gains and losses and net realised gains and losses are recorded in the statement of operations and other changes in net assets.

i) Formation expenses

The formation expenses are amortised on a straight-line basis over a period of five years. If the launch of a sub-fund occurs after the launch date of the SICAV, the formation expenses related to the launch of the new sub-fund is charged to such sub-fund alone and may be amortised over a maximum of five years with effect as from the sub-fund's launch date.

Note 3 - Performance fee

A performance fee is accrued for the Shares classes A, B, C, D, E, F and G, for each Net Asset Value calculation and is paid to the Investment Manager at the end of each quarter.

The performance fee is calculated as follows:

For each quarter in which the performance of the sub-fund exceeds the minimum rate of return (hurdle rate) set as a *prorata temporis* of an annual rate of 3%, a fee of 15% of the outperformance is due, provided that the performance exceeds the hurdle rate calculated on a *prorata temporis* basis, and the final NAV per share is greater than the highest final NAV per share for which a performance fee has been paid (High Watermark Principle); in this case, the performance fee is applied to the difference between the final NAV per share and the higher of the High Watermark and the hurdle rate.

The Board of Directors has decided, with effect as at 1st January 2014, to amend the performance fee of the share classes A, B, C, D, E, F and G of the RAM (LUX) TACTICAL FUNDS II - ASIA BOND TOTAL RETURN FUND (formerly SAMENA (LUX) GLOBAL FUNDS - CREDIT OPPORTUNITIES FUND) sub-fund in order to introduce the principle of crystallisation on redemptions and adjustments on subscriptions so as to limit bias in the performance fee calculation.
