Federated Hermes Investment Funds Public Limited Company Investment Manager Information

Hermes Investment Management Limited

Responsibility: a core value

Hermes Investment Management Limited is an active asset manager working to deliver excellent, long-term, risk adjusted performance – responsibly. We strive to lead the debate and contribute to the transformation of the investment industry for the benefit of our clients, their stakeholders and, where possible, society at large.

Our agenda and activities are driven by the long term objectives of our clients' beneficiaries and we act in their interests.

Responsibility in practice

We have a comprehensive programme to ensure our responsibility approach and activities are integrated seamlessly in our funds and stewardship service. This includes:

- Delivering sustainable performance within the terms of the mandate and within the clients' risk appetite
- Taking into account all material investment factors including environmental, social and governance (ESG) ensuring that we are informed though not constrained by these considerations
- Acting as a responsible, engaged, long-term steward of investments encompassing constructive dialogue and taking action where necessary
- Engaging with public policy makers and industry bodies to encourage a sustainable economy beyond the timeframe of a specific mandate

At Federated Hermes Limited ("FHL"), the parent company of Hermes Investment Management Limited, we integrate ESG considerations and engagement insights into our investment processes in all of our products, across all asset classes. The public-equities and fixed-income teams supplement fundamental financial analysis with information provided through a range of proprietary ESG and engagement tools. Through these tools, along with additional EOS engagement insights, the teams have access to third-party ESG data, such as MSCI, Sustainalytics, Trucost, ISS, netpurpose and Bloomberg, as well as insights on engagement carried out by EOS with investee companies and the broader investable universe. These sources are a valuable input to the investment process, as well as to the ongoing monitoring of and engagement with companies.

For public markets, FHL's proprietary ESG tools are of particular note:

- Our ESG Dashboard includes our proprietary Quantitative ESG (QESG) Score and identifies stocks
 with positive ESG characteristics and/or stocks demonstrating positive ESG change. The QESG score
 captures how a company manages its ESG risks.
- Our Carbon Tool enables fund managers and engagers to identify carbon risks in portfolios and companies
 that currently exist or may develop in the future. Importantly, the tool incorporates our stewardship activity
 and intelligence and is able to identify companies that are priorities for engagement and their progress
 against environmental objectives.
- The Portfolio Snapshot allows us to observe the aggregate ESG risks across our portfolios relative to their benchmarks. It also examines ESG ratings and controversies and identifies contingent risks. Our portfolio managers use this tool to evaluate a strategy's ESG performance over time. It also provides insights into engagement and the progress made, and our voting choices relative to the benchmark.
- Our Corporate Governance Tool provides a breakdown of corporate governance characteristics, such as
 information on board independence, diversity and audit tenure, etc. This tool compares the governance
 of companies to the expectations we have set and flags any companies that do not meet the expected
 standard.
- Our Environmental Tool assesses both portfolios and companies on their carbon, water and waste
 performance. It also looks to quantify the environmental cost of the impact via the following six lenses;
 carbon, water, waste, air pollutants, land/water pollutants and natural resource use. In addition, we have
 incorporated the temperature alignment of portfolios and companies alongside exposures to carbon
 intensive sectors; namely fossil fuels, mining and thermal coal. This tool also incorporates our stewardship
 activities with a focus on environmental engagement at both portfolio level and company level.

Hermes Investment Management Limited (continued)

Responsibility in practice (continued)

ESG is integrated into the investment strategy and working practices of all of our real-estate portfolios. A consideration of ESG principles is embedded into the property selection and investment process, including through initial screening and due diligence and as part of the investment decision. For our Real Estate team's indirect and international investments, we carry out active engagement on governance matters and on ESG policies and strategies with property developers, property management teams, tenants, lawyers and agents. We include commitments to develop a joint ESG strategy on acquisitions for jointly managed assets.

EOS at FHL which provides stewardship services, is a global market leader in voting and engagement with both companies and public policy makers. The team makes voting recommendations over 13,000 company meetings and actively engages with more than 1,100 (core engagement programme for 2023 is around 317) companies a year at executive and board level on a range of issues including board governance, executive remuneration, risk management, business strategy, corporate culture, carbon, pollution, water stress, labour and community rights. We are also active participants in a wide range of public policy discussions and our Chief Executive, Saker Nusseibeh, founded the 300 Club, an independent forum for discussion and debate about the responsibilities of the investment industry.

Whilst the responsibility for implementation resides with all FHL personnel, the ESG and engagement integration programme is led, coordinated and supported by the FHL Responsibility Office: a head of Responsibility reporting to FHL CEO, a policy and advocacy team and an ESG integration team. The Head of Responsibility also leads EOS at Federated Hermes, Federated Hermes third party stewardship service. This team is further supported by the Responsibility Working Group, which meets quarterly, to have oversight of FHL policy and lead initiatives. The Responsibility Working Group includes investment, product development, marketing, legal, compliance, human resources and responsibility representatives as members.

Federated Investment Counseling

About the Investment Manager

Federated Investment Counseling and other subsidiaries of Federated Hermes combined, advise a variety of equity, fixed-income and money market mutual funds as well as other pooled investment vehicles, private investment companies, and customised separately managed accounts, which totalled approximately \$704.0 billion in assets as of 30 June 2023. Federated Hermes was established in 1955 as Federated Investors, Inc., and is one of the largest investment managers in the United States with over 2,000 employees worldwide. Federated Hermes provides investment products to more than 11,000 investment professionals and institutions. The Investment Manager advises approximately 128 institutional separate accounts, private investment companies, separately managed accounts and other pooled investment vehicles.

Additional information regarding the security selection process

As part of analysis in its security selection process, among other factors, the Investment Manager also evaluates whether environmental, social and governance factors could have positive or negative impact on the risk profiles of many issuers or guarantors in the universe of securities in which the Fund may invest. The Investment Manager may also consider information derived from active engagements conducted by its in-house stewardship team with certain issuers or guarantors on environmental, social and governance topics. This qualitative analysis does not automatically result in including or excluding specific securities but may be used by the Investment Manager as an additional input in its primary analysis.

Voting

Throughout the first half of 2023, for all sub-funds of Federated Hermes Investment Funds plc, we voted at 487 shareholder meetings (5,943 resolutions). At 278 of those meetings we opposed one or more resolutions. We voted with management by exception at 43 meetings and abstained at 2 meeting. We supported management on all resolutions at the remaining 164 meetings.

Federated Hermes Global Emerging Markets Equity Fund

Market Review

The benchmark MSCI Emerging Markets Index returned 4.9% over the period, in US dollar terms (-0.76% in sterling terms), significantly underperforming Developed Markets. Returns in DM were boosted by the performance of the 'Big Tech' companies due to investor excitement over developments in artificial intelligence (AI). As a result, the Nasdaq Index had its best first half performance in four decades, even stronger than during the 1999 NASDAQ bubble.

At a regional level, Latin America was the best performing area, led by Mexico, the region's strongest market, and Brazil (16.8%). These gains came against a backdrop of improving economic data. Brazil benefitted from easing fiscal concerns over newly elected President de Silva. In addition, the disinflation process appears to be underway with falling inflation expectations leading investors to anticipate that Brazil will be the first country in the region to begin cutting interest rates in August. Elsewhere, Peru and Colombia underperformed.

Asia ex-Japan underperformed, led lower by China. Chinese equities were sharply lower in the second quarter as the economic rebound started to cool. Ongoing tensions with the US weakened investor sentiment, though concerns eased after Antony Blinken, the US Secretary of State, unexpectedly held a meeting with President Xi Jinping during his Beijing trip in June. Factory output in China has started to slow due to lacklustre consumer spending and weak demand for exports following interest rate rises in the US and Europe. Taiwan and Korea outperformed, boosted by technology companies as investors rushed to invest in the AI theme. Malaysia and Thailand posted negative returns. India outperformed, supported by some positive macroeconomic data including better industrial production and easing inflation, which meant the central bank kept monetary policy unchanged. Indonesia, where the rupiah appreciated against the US dollar, also outperformed.

Emerging Europe, Middle East and Africa also underperformed. Turkey posted the largest loss in the region as President Recep Tayyip Erdoğan won re-election in May, extending his two-decade rule. South Africa fell given elevated macroeconomic risks including inflation expectations, rate rises, currency weakness and the impact power shortages is having on the economy. Hungary, Poland and Greece were among the top-performing index markets despite rising recessionary fears in Europe. Central European markets began to anticipate interest rate cuts as inflation eased. Hungary cut rates in June. Saudi Arabia also outperformed, the only Middle East energy market to post a positive return YTD.

At a sector level, the period was marked by a wide dispersion in returns, Information Technology and Energy finished at the top, while Health Care and Utilities ended at the bottom. Consumer Discretionary also underperformed as weakness of the major Chinese e-commerce providers weighed on returns.

Investment Strategy

The team initiated several new positions in the first quarter. These included: Suzuki Motor, the parent company of Maruti Suzuki, the largest manufacturer of passenger vehicles in India; Infosys, one of India's leading IT consulting, outsourcing, software and digital services providers; Max Healthcare is the second largest Indian hospital chain in terms of revenue; Centre Testing International a leading third party one stop testing service provider in China; Shenzhen Inovance which manufactures automation control products including motion control systems.

The team sold SBI, which performed well and given an elevated valuation, in a move to rationalise exposure to Indian banks (having trimmed exposure in Q4 2022 following strong share price gains), and Abu Dhabi Commercial Bank considering the alleged fraud at the Adani Group. They exited Container Corp due to limited upside. They sold Credicorp given downside risks related to political uncertainty and social disorder. They also exited Win Semiconductors as the company intends to expand in unrelated businesses in China.

The team opened several new positions in the second quarter. These included: BYD, the largest new energy vehicle manufacturer in the world with a 16% global market share and a 32% share of the domestic Chinese market; a re-opened position in HDFC Bank, the largest independent bank in India; Hong Kong Exchanges & Clearing (HKEX), Hong Kong's principal securities trading platform; China Overseas Property Holdings (COPH) a leading property management services company spun out of China Overseas Land and Investment in 2015; and Lotes, a Taiwanese designer and manufacturer of precision electronic interconnect components and hardware.

Federated Hermes Global Emerging Markets Equity Fund (continued)

Investment Strategy (continued)

They sold FSN E-Commerce, an Indian beauty care e-retailer, on concerns over slowing digital demand as consumers returned to shopping on the high street. The team also exited from the position in Techtronic Industries following a second short seller attack and rising governance concerns. Elsewhere they trimmed Wuxi Lead due to worries over excess capacity in the EV battery space that could result in slowing orders for the company.

Performance Review

The Fund returned -3.02% in sterling terms, net of fees, during the period, underperforming the benchmark MSCI Emerging Markets Index which returned -0.76%, on a relative basis by 228bps. The Fund's overweight allocation to China, which underperformed (-5.5%), associated exposure to the renminbi, which depreciated relative to the US dollar, in addition to stock selection within China, detracted the majority from relative terms (-255bps).

The underweight to outperforming Brazil and stock selection within (not owning Petrobras) also detracted. Stock selection in India was another negative factor. By contrast, the allocation to Taiwan and selection were positives and helped pare losses. Samsung Electronics was the largest individual contributor to relative returns, in a strong period for technology stocks. Shares in the global electronics major tracked higher (26%) given an improving outlook as customer memory chip inventories declined and production cuts at the three global chipmakers took effect, hoisting semiconductor earnings expectations for H2 2023. The Al-related server boom is expected to boost memory demand in the near future, driving up the valuation of stocks with exposure to this end market. Wiwynn, a Taiwanese manufacturer of computer storage devices, rose as data traffic growth, public cloud migration, and new applications such as Al and machine learning are expected to drive long-term cloud capital expenditure growth and infrastructure investments. TSMC, the world's leading semiconductor foundry, rose on expectations for further growth driven by rising generative Al demand, mostly from Nvidia Datacenter GPU.

JD.Com, China's second largest e-commerce provider, fell after the company reported a sharp drop in revenue growth, as Chinese shoppers reined in spending, with management expressing a cautious view over the timing of any recovery. Expectations that a 10 bn yuan (\$1.4 billion) discount campaign to maintain market share, against heightened competition, would negatively impact margins, also weighed on the share price. Hangzhou Tigermed, a Chinese contract drug research and manufacturing company, fell on slowing domestic novel drug R&D outsourcing demand. The weakness of the latter reflected, in turn, weaker biotech R&D spending in 2023. Shares in China Merchants Bank, a leading retail bank, fell on the back of weak macro data and increasing concerns over the debts of local government financing vehicles (LGFVs).

<u>Outlook</u>

The challenges of decarbonisation, deglobalisation, deteriorating demographics, and record-high debt burdens all suggest the 'new normal' for inflation could be higher than default DM central banks' target of 2%. By contrast, most central banks in EM appear to have paused monetary policy tightening, as inflation trends lower, opening the way to looser monetary policy in future. EM should also benefit from a number of other factors including lower valuations, light investor positioning, an improving growth differential compared to DM as well as favourable demographics and an improved focus on supply-side reforms. A number of individual countries could also benefit substantially from the relocation of supply chains, away from China.

Over the medium- to long-term, we anticipate a continued shift in the investment environment, as investors evaluate the impact of an upwards move in the overall inflation rate and the cost of capital . Supply-side constraints in a number of areas such as energy, commodities and labour will likely play an important role in this scenario. The shift will create winners and losers. Emerging markets have a golden opportunity to improve their competitiveness, capitalising on leadership in growth, demographics, manufacturing prowess and resource availability. By contrast, the developed world is still learning to adjust to higher inflation and is distracted by structural challenges that investors are only now considering.

Federated Hermes Global Equity Fund

Market Review

Global equities began the year in positive fashion, posting strong gains in January. Risk aversion declined sharply with sentiment boosted by the reopening of the Chinese economy and signs that inflation was receding from its autumn peaks, reflected in falling bond yields. In addition, excitement around AI, following the launch of ChatGPT in late 2022, drove the Information Technology sector higher.

However, it was not long before the feel-good factor started to dissipate and risk appetite started to deteriorate. Somewhat ironically, this was triggered by positive economic data that highlighted the resilience of the US economy, which raised concerns that inflation would remain 'higher for longer'. The collapse of Silicon Valley Bank and the bailout of Credit Suisse, in March, ensured investors retreated into risk-off mode.

One of the defining characteristics of the period was the lack of market breadth, with returns driven by a small number of tech-focused mega cap stocks. In H1, almost 90% of the MSCI World return was generated by just three sectors (Information Technology, Communication Services and Consumer Discretionary), while over 75% of the return of the S&P 500 can be attributed to just 10 stocks.

Outside of the Al-generated excitement, investors have remained cautious. Inflationary pressures have proved to be more stubborn than anticipated, especially in Europe - with the UK the chief culprit. Hawkish central banks and fears of recession have ensured that our risk aversion indicator has, until the last few weeks of the quarter, consistently remained in 'risk-off' territory. The recent increase in risk appetite has coincided with improving market breadth.

From a factor perspective, Growth has been favoured overall, particularly in Q1 alongside Profitability and Capital Structure. However, there has been little consistency in recent months: the tussle between Growth and Value has continued, while the preference (or not) for sentiment and quality factors has changed at regular intervals, suggesting investors have continued to take a short-term view.

Investment Strategy

Our investment approach remains focused on stock selection, with neutral sector and regional biases. The Global Equity Fund uses systematic fundamental analysis to assess the attractiveness of over 5,000 stocks on a daily basis. This analysis involves a disciplined bottom-up stock-selection process, which is based on well-documented anomalies and trends in investor behaviour. The Fund aims to take advantage of the systematic behavioural biases of market participants, while remaining cognisant of the risks associated with modelling such behaviour.

We determine a stock's fair value using metrics from a company's financial statements. Our modelling incorporates a wide variety of stock characteristics (often referred to as factors) and is designed to proxy expected investment returns and the behaviour of market participants. The Fund's multi-factor approach ensures it remains exposed to a range of styles, and it aims to generate outperformance in all market environments. We closely monitor the performance of each factor and aim to build stock selection models that deliver consistent and sustainable excess returns.

Portfolio modelling is utilised in the portfolio construction process to develop a trade-off between expected return and portfolio risk, allowing for both portfolio constraints and transaction costs. The process is further supplemented by portfolio exposure analysis using our proprietary risk modelling system, MultiFRAME, which allows us to assess the Fund's exposure to any quantifiable risk factor.

Unlike traditional quantitative strategies, we also undertake analysis on a disciplined and subjective stock level basis. The team uses its extensive experience to challenge the output of the investment model and remove trades that are subject to significant non-quantifiable factors or unreliable inputs.

Performance Review

The Fund returned 4.93% during the period, underperforming the benchmark index by 3.64% with the lack of market breadth a significant headwind for relative performance. From a sector viewpoint, the main positive contributors were selection in Industrials and Consumer Staples, while selection in Communication Services, Materials, Utilities and Consumer Discretionary were detractors. The underweight sector position in Information Technology was the largest negative factor for performance. From a regional perspective, selection in Japan was successful, but outweighed by weak selection in North America.

Federated Hermes Global Equity Fund (continued)

Performance Review (continued)

UniCredit, Royal Caribbean and Panasonic contributed the most to relative returns. UniCredit reported strong results in January with its operating profit, capital return and outlook all stronger than expected. Royal Caribbean also reported a robust set of results with new bookings outpacing 2019 levels by a "very wide margin" and lower than expected costs. Panasonic gave a positive strategy update that included plans to boost battery production and invest further in HVAC (heating, ventilation and air conditioning) systems. It also reported decent results that were slightly ahead of expectations.

Meta Platforms and Tesla, which are not held in the Fund, detracted the most from relative returns. Within the portfolio, CVS Health, UGI and City Developments were the largest detractors. CVS Health declined as sentiment towards pharmacy benefit managers (which forms part of its business) was affected by concerns over future regulation. UGI Corp reported solid Q1 results, but its share price declined alongside the Utilities sector and after disappointing earnings in Q2 with the company impacted by warmer weather. City Developments was hit after the Singaporean government announced measures, to cool the property market, that included additional taxes on higher-value properties and an increase in stamp duty.

Outlook

With the exception of the handful of names benefitting from the current AI theme, sentiment towards equities has reflected a number of investor fears. However, measures of risk aversion have started to ease and there are tentative signs that market breadth is improving. The timing is intriguing, with improved investor sentiment contrasting with growing pessimism towards the macro-outlook. With industrial activity weaker than expected, and the labour market beginning to slow, a downturn in the US looks increasingly likely. Moreover, the Federal Reserve's June minutes reinforced the likelihood of two more interest rate hikes this year. Investor optimism may thus be hard to maintain, as the tighter the Fed turns the screw, the harsher the resulting impact on the economy.

Opportunities in this environment continue to favour the mega cap stocks, which provide the safety of strong balance sheets and protected market positions. These names continue to appeal to those investors seeking growth, but also to those favouring quality. This could also lead to a renewed focus on sustainability-focused companies since the latter also exhibit similar qualities. However, with so much uncertainty around, remaining diversified should be important over the coming months.

Federated Hermes Global High Yield Credit Fund

Market Review

The commencement of 2023 brought some much-needed respite following what could only be described as a turbulent and challenging 2022. With the familiar themes still in tow – heightened inflation, central bank tightening and geopolitical tensions – January brought about an improvement in broad sentiment and an up-tick in markets. Unfortunately, any positive momentum was quashed early in the period given the strength of economic data, primarily out of the US, where employment data was proving to be more resilient than expected, giving rise to an expectation of increased scale and pace of rate hikes. This weighed on the market outlook for growth, with the consensus being that global growth would slow and for economies to enter shallow-to-mild recessions.

Following a series of rate hikes across developed markets to the end of March, inflation failed to meaningfully subside, which kept investors alert to any signals that policy rates were going to jump higher – with expectations of a 50 basis points (bps) hike by the Federal Reserve (Fed). However, any intentions were abruptly halted following the demise of Silicon Valley Bank and Signature Bank in the US, prompting alarm around contagion in the US regional banking sector. These concerns were further exacerbated in Europe by a regulator induced acquisition of Credit Suisse by UBS following Credit Suisse's collapse in March, resulting in the write-down of \$17bn of convertible bonds (AT1s). Following one more regional bank failure (First Republic Bank), the situation was quickly contained and the perceived risks dissipated, comforting investors and taking volatility down to new post-pandemic lows. This sanguine backdrop gave central banks the confidence to continue their pursuit of bringing down inflation – which, at the end of the period under review, saw headline inflation coming down from its peak but core inflation remaining sticky and leaving central banks with more to do.

Investment Strategy

With the beginning of the period accommodative for risk assets, and there being an uneasy acceptance of long-running themes that carried over from 2022, the Fund focused on optimising security selection, with trades predominantly targeting small extensions, capital structure pivots and cross-currency switches – mainly EUR to USD. However, as sentiment quickly shifted, markets saw a more cautious tone, and volatility picked up meaningfully, reaching its peak in March as a result of a series of US regional bank collapses, before gradually subsiding to near post-pandemic lows by the end of the period.

Amid this backdrop, we maintained a highly selective approach around adding risk, with a focus on emerging markets versus developed market rotations, and a preference for higher quality where widening in credit spreads (the difference in yield between corporate bonds and their equivalent government-issued bonds) was unjustified in issuers with strong fundamentals. Additionally, early in the period, we pivoted out of cyclical sectors and into defensive sectors, and this view remained core to our search for new opportunities. As volatility carried through until close to the end of the period, we remained constructive on sectoral, regional and issuer selection, continuing to prefer higher quality and seeking out positions that gave us exposure to more senior levels of capital structures.

Performance Review

The Federated Hermes Global High Yield Credit Fund (F Accumulation EUR net) generated a return of 1.52% in H1 2023, underperforming its benchmark by 2.00% on a geometric relative basis.

The Fund's overweight positioning in Capital Goods, sovereign debt and Basic Industry were the top contributors to overall relative performance. In contrast, underweight positioning in Leisure, Real Estate and Energy were the biggest detractors on a sectoral basis. At an individual holdings level, the Fund's overweight positioning in Ard Holdings (Capital Goods), International Consolidated Airlines (Transportation) and Dell (IT) boosted relative performance the most, while its overweight positioning in UBS (Banking), Country Garden Holdings (Real Estate) and Next (Retail) detracted.

At the regional level, the Fund's overweight positioning in the United Kingdom, along with underweight positions in Africa and Asian Developed Markets, were its top contributors to relative performance. In contrast, overweight positioning in North America and an underweight in Asian emerging markets detracted the most.

From a ratings perspective, overweight positioning in BBBs and AAAs positively impacted performance the most, while significant underweights in single-Bs and CCCs detracted the most from relative returns over the period.

Federated Hermes Global High Yield Credit Fund (continued)

Outlook

June saw the Fed pause, not increasing interest rates for the first time in over a year, but with its dot plot signalling two further rate hikes this year. At the same time, the European Central Bank (ECB) raised rates by 25bps, taking its deposit rate up to 3.5%.

Our base case continues to be for a mild recession; however, uncertainty remains high with the probability of non-linear outcomes likely to be pronounced, as evidenced by the recent events exposing weakness in the financial system. Economic data have generally been surprising to the upside, while inflation remains sticky. Broadly, rate cuts are unlikely to happen this year, but further hikes are also difficult given the risk of economic destabilisation. Tail risks (catalysts) have decreased, but are closely monitored as the impact of recession, changes in inflation and geopolitics might affect markets.

Corporate fundamentals remain in a good position as balance sheets, while expected to erode, remain healthy despite slowing earnings growth that has been, so far, sector specific. In fact, our credit analysts identified more positive fundamental changes in sectors than negative, supporting the above view. That said, credit metrics unveil signs of deterioration. Revenue and EBITDA decreased for high yield corporates in the first quarter of 2023 and expanded by the slowest rate in two years. Stickier inflation on the cost side than the revenue side is leading to some margin deterioration across sectors. Meanwhile, leverage for high yield issuers decreased to 3.91x, which is the lowest level since 2012 amid inactive markets. Finally, companies are adopting a more defensive stance given market conditions, and have eliminated debt growth (0% year-on-year) and reduced capital expenditures (-7% quarter-on-quarter).

Defaults increased in June, raising the default rate for high yield bonds to 2.71% in the US, a two-year high, and 1.36% in Europe. The expectation for defaults during 2023 is that they will remain close to long-term averages.

Our near-term outlook favours exposure to high quality bonds, with selective exposure to B/CCC-rated credit. Yields remain attractive and, as rates volatility normalises, we would expect this part of the credit market to outperform. We also favour defensive sectors in 2023, with a preference for Europe versus the US based on relative value. Lastly, we continue to believe that seamless integration of ESG and sustainability considerations, coupled with active engagement, is critical to sustainable long-term performance.

Federated Hermes US SMID Equity Fund

Market Review

The benchmark Russell 2500 Index returned 1.80% in GBP terms and 8.79% in USD terms (unless otherwise stated all subsequent returns are quoted in USD).

Global equity markets rose over the period with developed markets outperforming emerging markets. North America was one of the strongest performing regions over the first half of 2023 with technology stocks benefitting from investor enthusiasm over developments in artificial intelligence (AI). The collapse of three US regional banks in March and April led to a sell-off in the financial sector in both the US and Europe. However, fears of a domino effect were alleviated by the co-ordinated actions of the Federal Reserve (Fed) and large banks to stabilise the financial system. Central banks continued to battle inflation with the Fed raising interest rates three times in the first half of 2023. The Fed paused in June as the annual rate of headline inflation fell sharply to 4.0% while core inflation fell slightly to 5.3% (year-on-year). The Fed are waiting for the effects of their tightening to trickle through the economy, albeit the updated 'dot plotplot' chart indicated further rate hikes later this year. The US economy remained resilient, in the period, despite the higher rates. However, there are tentative signs of cooling in the labour market as unemployment rose to 3.7% in June. This was a larger increase than expected, although the labour market remains tight by historical standards.

During the period, large caps outperformed small caps while, on a style factor basis, growth outperformed value. From a sectoral basis, Technology (21.86%) was the strongest area, closely followed by Industrials (18.61%). By contrast, Financials (-6.61%) was the worst performing sector, which reflected the negative impact from the regional banking crisis. Energy (-3.87).

Investment Strategy

The Fund aims to provide active exposure to a high-returns asset class, which has historically delivered high returns, through a portfolio of high-quality, responsible businesses bought at reasonable valuations. During the period, we continued to add exposure to high-quality companies with attractive upside potential in valuations, and to trim positions where there was an insufficient 'margin of safety' in current valuations. During the period, we exited our residual holdings in Livanova, Jack Henry, Masterbrands and Cargurus. We opened new positions in Champion X, Retail Opportunity Investments Corporation, FTI Consulting and Paylocity.

Champion X are a leading global provider of production optimisation technology (specifically chemicals and artificial lift equipment) to the energy industry. They have a strong market position in a concentrated market, an extensive patent portfolio, industry experience and a strong balance sheet and good cashflow. The majority of Champion X's products are used to improve or optimise the flow rates of existing hydrocarbon assets. This enables their customers to get more oil out of wells and to ensure the safe processing of wastewater. They use market-leading greenhouse gas emissions detection equipment to help their customers identify and monitor their carbon emissions. Our conviction in Champion X, as an investment, is further strengthened by the company's international footprint. The latter is significant since international markets tend to have a higher percentage of offshore and complex well sites which require a greater level of chemical usage, as the wells move into the later part of their lifecycle.

Retail Opportunity Investments Corporation (ROIC) is a real estate investment trust that owns, acquires, and manages grocery-anchored shopping centres, located in key markets on the west coast of the US. ROIC's portfolio comprises nearly 90 shopping centres in markets with strong income and population growth, and high barriers to entry. Management have consistently pursued a strategy of making well-targeted acquisitions resulting in industry-leading metrics in terms of occupancy, organic growth and deal closure. The investment in ROIC provides exposure to both the Real Estate sector and consumer credit. The latter helps to offset the reduction in credit exposure, in the portfolio, which resulted from the trimming of our positions in US regional banks.

FTI consulting is an international consulting firm with a market-leading restructuring practice, which has started to benefit from increased activity. The business is expected to perform strongly in the event of a recession. Paylocity is a leading provider of cloud-based payroll and human capital management (HCM) software solutions for medium sized businesses. Relative to other areas of HR technology, payroll has higher barriers to entry and is more difficult to scale, partly due to the 14,000 different tax jurisdictions in the US and the importance of paying employees accurately and on time. Paylocity is well positioned to gain market share given its strong product suite and industry-leading G2 ratings (a measurement of service quality).

Federated Hermes US SMID Equity Fund (continued)

Investment Strategy (continued)

We reduced our positions in Wintrust Financial and Webster Financial due to the headwinds facing regional banks. We also trimmed from Axon Enterprise, Pulte Group, Colombia Sportswear, Clean Harbors and Service Corps. We added to AMN Healthcare, Bio-Rad, Chart Industries and Littelfuse due to their attractive valuations.

Performance Review

The Fund returned 7.94%, in GBP terms, net of fees (15.57% on a gross basis in USD) during the period, outperforming the benchmark by 6.04%.

The outperformance was primarily driven by sector allocation with stock selection also positive over the period. The overweight positions in both Industrials and Utilities as well as the underweight position in Energy were positive contributors. Stock selection was also strong in the first two sectors. The main detractors for performance included the underweight position in Consumer Discretionary and weak stock selection in Healthcare.

At the individual stock level, Clean Harbors benefited from robust Q4 results and a positive 2023 outlook statement with healthy demand expected for its network of services. Altair Engineering's share price rose, as the company reported a stellar finish to 2022, delivering growth of more than 18% for the full year. Altair benefitted alongside other technology companies as the prospect of a slowdown in the pace of interest rate hikes and as a port in the storm following the banking crisis, boosted technology stocks. PulteGroup, a housebuilder, rose after they reported strong results. Management expressed cautious optimism that this momentum would continue. A low supply of existing homes and a moderation in mortgage rates has boosted investor sentiment towards housebuilders.

Community Bank, Revvity (formerly Perkin Elmer) and Webster Financial were the largest individual detractors over the period. Community Bank and Webster Financial saw their share prices decline, alongside other banks, as a result of the US regional banking crisis. While not immune to volatility, all our US regional bank holdings, have greater diversification, than the failed banks, on both sides of their balance sheet. They also have a more granular deposit base (over 50% insured) and a loan book with exposure to a broader set of end markets. These differences highlight the importance of our investment process. We have always sought granularity in deposit franchises and avoided banks with excessive exposure to any one part of the economy. Elsewhere, Revvity, saw its share price decline following a disappointing set of guarterly results.

Outlook

The economic outlook remains uncertain given the pressures on the Fed to reduce inflation while also trying to avoid tipping the economy into recession. The economic data remains mixed while hawkish rhetoric from the Fed suggests further volatility in markets is possible. Valuations, in many instances, appear to be pricing in a deeply negative economic outcome, which may prove overly pessimistic. We continue to believe that this new environment of tighter liquidity will prove supportive high-quality, cashflow generative companies that this strategy invests in.

Federated Hermes Asia ex-Japan Equity Fund

Market Review

The benchmark MSCI AC Asia ex Japan IMI Index returned 3.8% over the period, in USD terms (-1.79% in GBP terms). Asian equities started the new year on a strong footing thanks to China's reopening and expectations for easier monetary policy. March saw a widespread loss of confidence in US and European banks, which initially weighed on risk assets.

Chinese equities were sharply lower in Q2, as the economic rebound started to cool amid heightened geopolitical tensions. Taiwan and Korea outperformed, helped by technology stocks. India outperformed, supported by positive macroeconomic data including better industrial production and easing inflation, which allowed the central bank to keep a relatively loose monetary policy. Indonesia also outperformed, aided by a strong currency.

At a sector level, the period was marked by a wide dispersion in returns, Information Technology and Industrials finished at the top, while Utilities and Health Care ended at the bottom.

Investment Strategy

Our key overweight remains Korea while our key underweight is India. The overweight to Korean stocks reflects the attractive valuations and improving corporate governance laws. By contrast, Indian stocks remain expensive, hence India is our key underweight. We are moderately overweight China, where we have taken the view that the geopolitical risk is worth taking given the low valuations. We are underweight Taiwan given our belief that the semiconductor cycle for logic has peaked.

In Q1, we sold our small remaining stake in Tencent as well as our holding in China South Publishing & Media Group. We trimmed Baidu, JD.Com and Trip.Com. We added to several existing positions including Samsung Electronics, Haier Smart Home, Yunnan Baiyao, Alibaba, CK Hutchison and E-Mart.

In Q2, we trimmed Sinopharm, Cosco Shipping Ports, Samsung Electronics, Beijing Enterprise Holdings and Kunlun Energy into strength. We also sold the remaining positions in Lite-On Technology and Samsung SDI.

More recently, we sold Posco Holdings following strong performance and cut Hyundai Motor, Hon Hai Precision Industry, Honda Motor and Rohm into strength. Elsewhere we added to our holding in Kunlun Energy on share price weakness.

Performance Review

The Fund returned 0.85% in GBP terms (net of fees) during the period, outperforming the benchmark MSCI AC Asia ex Japan IMI Index, which returned -1.79%, by 2.69%.

Baidu, China's leading search company, rose after the company unveiled its plans to launch a large-scale artificial intelligence (AI)-powered ChatGPT type model called "ERNIE Bot". Sentiment was further helped by the release of strong Q4 2022 earnings, the announcement of a \$5bn share repurchase programme and after the company won permits to offer driverless 'robotaxi' services in Beijing. Samsung Electronics outperformed, given an improving outlook as customer memory chip inventories declined as production cuts at the major global chipmakers take effect. The company also benefitted from improved sentiment relating to artificial intelligence (AI) chip requirements. Honda Motor, an automotive and machinery manufacturer which derives most of its earnings from motorcycle sales in Vietnam and India, outperformed amid a recovery in global production and rising auto sales.

JD. Com, a leading Chinese online e-commerce retailer, fell after announcing a multibillion-dollar consumer discount campaign, highlighting heightened competition. The underweight to Taiwan Semiconductor Manufacturing Company (TSMC) detracted, as investors looked beyond the near-term trading weakness. The latter was evidenced by the release of quarterly revenue figures that were lower than consensus expectations and were accompanied by weak Q1 2023 guidance. Weibo, China's 'Twitter', fell following Q1 2023 results that, despite meeting market expectations and being accompanied by a more generous capital return policy, highlighted a challenging advertising outlook.

Federated Hermes Asia ex-Japan Equity Fund (continued)

Outlook

Should inflation rates in the US remain high or go higher it will continue to hurt all asset prices as interest rates remain elevated. Those stocks that stand to do particularly poorly are high multiple stocks and dividend yielding non-growers, both of which will face tough competition from the higher risk-free rate. Stocks that should do relatively well will likely include cheaper valued stocks, that are growing earnings and dividends. Should the Fed rate raises not keep up with inflation (e.g., to reduce the likelihood of the emergence of mini crises), nominal stock prices will likely rise – with those stocks with the ability to pass on inflation probably doing particularly well.

Federated Hermes Global Equity ESG Fund

Market Review

Global equities began the year in positive fashion, posting strong gains in January. Risk aversion declined sharply with sentiment boosted by the reopening of the Chinese economy and signs that inflation was receding from its autumn peak, reflected in falling bond yields. In addition, excitement around artificial intelligence (AI), following the launch of ChatGPT in late 2022, drove the Information Technology sector higher.

However, it was not long before the feel-good factor started to dissipate and risk appetite began to deteriorate. Somewhat ironically, this was triggered by positive economic data that highlighted the resilience of the US economy, which raised concerns that inflation would remain 'higher for longer'. The collapse of Silicon Valley Bank and the bailout of Credit Suisse, in March, ensured investors retreated into risk-off mode.

One of the defining characteristics of the period was the distinct lack of market breadth, with returns driven by a small number of tech-focused mega cap stocks. In H1, almost 90% of the MSCI World return was generated by just three sectors (Information Technology, Communication Services and Consumer Discretionary), while over 75% of the return of the S&P 500 can be attributed to just 10 stocks.

Outside of the Al-generated excitement, investors have remained cautious. Inflationary pressures have proved to be more stubborn than anticipated, especially in Europe - with the UK the chief culprit. Hawkish central banks and fears of recession have ensured that our risk aversion indicator has, until the last few weeks of the quarter, consistently remained in 'risk-off' territory. The recent increase in risk appetite has coincided with improving market breadth.

From a factor perspective, Growth has been favoured overall, particularly in Q1, alongside Profitability and Capital Structure. However, there has been little consistency in recent months: the tussle between Growth and Value has continued, while the preference (or not) for sentiment and quality factors has changed at regular intervals, suggesting investors have continued to take a short-term view.

Investment Strategy

The investment approach remains focused on stock selection, with neutral sector and regional biases. The Global Equity ESG Fund uses systematic fundamental analysis to assess the attractiveness of over 5,000 stocks on a daily basis. This analysis involves a disciplined bottom-up stock selection process, which is based on well-documented anomalies and trends in investor behaviour. The strategy aims to take advantage of systematic behavioural biases of market participants while remaining cognisant of the risks associated with the modelling of such behaviour.

We determine fair value for a stock by using metrics from a company's financial statements. Our modelling incorporates a wide variety of stock characteristics (often referred to as factors) designed to proxy expected investment returns and the behaviour of market participants. ESG is embedded in the Alpha model, using the team's proprietary QESG Score, which enables the team to identify stocks that have good or improving ESG characteristics. The Fund's multi-factor approach ensures it remains exposed to a range of styles with the aim of generating consistent outperformance over the long term. We closely monitor the performance of each factor with the aim of building stock selection models that deliver consistent and sustainable excess returns.

Portfolio modelling is utilised in the portfolio construction process to trade-off between expected return and portfolio risk, allowing for both portfolio constraints and transaction costs. The process is further supplemented by portfolio exposure analysis using our proprietary risk modelling system, MultiFRAME, which allows us to assess the Fund's exposure to any quantifiable risk factor.

Unlike traditional quantitative strategies, analysis is also completed on a disciplined, subjective, stock-level basis. The team uses its extensive experience to challenge the output of the investment model and remove trades subject to significant non-quantifiable factors or unreliable inputs. The team also works closely with Federated Hermes EOS, our in-house stewardship team, which votes on and engages with companies on our behalf and works with us to further understand the ESG risks and opportunities facing each company.

Federated Hermes Global Equity ESG Fund (continued)

Performance Review

The Fund returned 4.92% during the period, underperforming the benchmark index by 2.67% with the lack of market breadth a significant headwind for relative performance. From a sector viewpoint, the main positive contributors were selection in Industrials, being overweight in Information Technology and underweight in Energy, while selection in Information Technology and Communication Services detracted the most. From a regional perspective, selection in Japan and Emerging Asia was successful, but outweighed by the detraction from selection in North America.

UniCredit, Royal Caribbean, and Panasonic contributed the most to relative returns. UniCredit reported strong results in January with its operating profit, capital return and outlook all stronger than expected. Royal Caribbean also reported a robust set of results with new bookings outpacing 2019 levels by a "very wide margin" and lower than expected costs. Panasonic gave a positive strategy update that included plans to boost battery production and invest further in HVAC (heating, ventilation and air conditioning) systems. It also reported decent results that were slightly ahead of expectations.

Within the portfolio, Nvidia, Aker BP and Alibaba were the largest detractors. Meta Platforms and Tesla, which are not held in the Fund also detracted significantly from relative returns. Semiconductors performed strongly in the period, driven by excitement towards Al. Nvidia was one of the leaders, but we had an underweight to the name having rotated into Advance Micro Devices (which also performed well) at the start of the year. Aker BP underperformed, alongside the Energy sector, with Q4 results that were slightly behind expectations. Alibaba's share price increased sharply, alongside Chinese stocks, in early January – we subsequently started a position in the stock to provide exposure to the reopening of the Chinese economy. The stock later declined and, although it reported better than expected earnings, concerns over the increased investment required to maintain its competitiveness weighed on investor sentiment.

Outlook

With the exception of the handful of names benefitting from the current AI theme, sentiment towards equities has reflected a number of investor fears. However, measures of risk aversion have started to ease and there are tentative signs that market breadth is improving. The timing is intriguing, with improved investor sentiment contrasting with growing pessimism towards the macro-outlook. With industrial activity weaker than expected, and the labour market beginning to slow, a downturn in the US looks increasingly likely. Moreover, the Fed's June minutes reinforced the likelihood of two more interest rate hikes this year. Investor optimism may thus be hard to maintain, as the tighter the Fed turns the screw, the harsher the resulting impact on the economy.

Opportunities in this environment continue to favour the mega cap stocks, which provide the safety of strong balance sheets and protected market positions. These names continue to appeal to those investors seeking growth, but also to those favouring quality. This could also lead to a renewed focus on sustainability-focused companies since the latter also exhibit similar qualities. However, with so much uncertainty around, remaining diversified should be important over the coming months.

Federated Hermes Multi-Strategy Credit Fund

Market Review

The commencement of 2023 brought some much-needed respite following what could only be described as a turbulent and challenging 2022. With the familiar themes still in tow – heightened inflation, central bank tightening and geopolitical tensions – January brought about an improvement in broad sentiment and an up-tick in markets. Unfortunately, any positive momentum was quashed early in the period given the strength of economic data, primarily out of the US, where employment data was proving to be more resilient than expected, giving rise to an expectation of increased scale and pace of rate hikes. This weighed on the market outlook for growth, with the consensus being that global growth would slow and for economies to enter 'shallow-to-mild' recessions.

Following a series of rate hikes across developed markets to the end of March, inflation failed to meaningfully subside, which kept investors alert to any signals that policy rates were going to jump higher – with expectations of a 50 basis points (bps) hike by the Federal Reserve (Fed). However, any intentions were abruptly halted following the demise of Silicon Valley Bank and Signature Bank in the US, prompting alarm around contagion in the US regional banking sector. These concerns were further exacerbated in Europe by a regulator-induced acquisition of Credit Suisse by UBS following Credit Suisse's collapse in March, resulting in the write-down of \$17bn of convertible bonds (AT1s). Following one more regional bank failure (First Republic Bank), the situation was quickly contained and the perceived risks dissipated, comforting investors and taking volatility down to new post-pandemic lows. This sanguine backdrop gave central banks the confidence to continue their pursuit of bringing down inflation – which, at the end of the period under review, saw headline inflation coming down from its peak but core inflation remaining sticky and leaving central banks with more to do.

Investment Strategy

The beginning of the period brought a relatively accommodative backdrop, despite a continuation of the key themes of inflationary pressures, central bank intervention and geopolitical events. Within both high yield and investment grade corporates, we focused on optimising security selection with a preference for higher quality issues and rotating from cyclical to defensive sectors. Given central bank tightening, interest rates remained a key driver throughout the period, and we remained constructive on rates, extending duration (interest rate sensitivity) in issuers we liked.

The initial move tighter in credit market spreads (the difference in yield between corporate bonds and their equivalent government-issued bonds) meant we were able to take advantage within our hedge overlay to focus on re-striking options lower and terming out our options book to the second quarter. As implied volatility continued to fall, reducing the costs of hedging, we moved into outright positioning versus payer spreads. As sentiment turned, and developed markets retreated, we focused on de-risking and took the opportunity to increase duration exposure to be more in line with our constructive view on rates.

Within structured credit, we remained focused on high-quality collateralised loan obligations (CLOs), where the initial positive sentiment in markets allowed us to take some profit on long-held positions and recycle the allocations into new issues in the BBB space. As market volatility picked up, CLOs continued to offer a compelling spread pick-up (the opportunity to attain a higher yield) relative to corporate bonds, particularly towards the front/middle of the yield curve, and especially in Europe.

Performance Review

The Federated Hermes Multi-Strategy Credit Fund (Class F, USD, Accumulating) returned 1.65% in the first half of 2023.

By sector, the period was broadly positive, with the Fund's positioning in Banking, CLOs and Basic Industry the top contributors to absolute performance. The largest detractors were exposure to Real Estate and Financial Services. At an individual holdings level Barclays (Banking), ARD Holdings (Consumer Goods) and Cellnex Telecom (Telecommunications) boosted absolute performance the most, while UBS (Banking), Country Garden Holdings (Real Estate) and Lumen (Telecommunications) detracted.

On a ratings basis, the Fund's exposure to BBB- and broad BB-rated issues added the most to absolute performance for the period, while single-B and non-rated issuers detracted the most.

From a regional perspective, North America and Western Europe added the most to performance, while only an allocation to Asian emerging markets detracted.

Federated Hermes Multi-Strategy Credit Fund (continued)

Outlook

June saw the Fed pause, and not increasing interest rates for the first time in over a year, but with its dot plot signalling two further rate hikes this year. At the same time the European Central Bank (ECB) raised rates by 25bps, taking its deposit rate up to 3.5%.

Our base case continues to be for a mild recession; however, uncertainty remains high with the probability of non-linear outcomes likely to be pronounced, as evidenced by the recent events exposing weakness in the financial system. Economic data have generally been surprising to the upside, while inflation remains sticky. Broadly, rate cuts are unlikely to happen this year, but further hikes are also difficult given the risk of economic destabilisation. Tail risks (catalysts) have decreased, but are closely monitored as the impact of recession, changes in inflation and geopolitics might affect markets.

Corporate fundamentals remain in a good position as balance sheets, while expected to erode, remain healthy despite slowing earnings growth that has been, so far, sector specific. In fact, our credit analysts identified more positive fundamental changes in sectors than negative, supporting the above view. That said, credit metrics unveil signs of deterioration. Revenue and EBITDA decreased for high yield corporates in the first quarter of 2023 and expanded by the slowest rate in two years. Stickier inflation on the cost side than the revenue side is leading to some margin deterioration across sectors. Meanwhile, leverage for high yield issuers decreased to 3.91x, which is the lowest level since 2012 amid inactive markets. Finally, companies are adopting a more defensive stance given market conditions, and have eliminated debt growth (0% year-on-year) and reduced capital expenditures (-7% quarter-on-quarter).

Defaults increased in June, raising the default rate for high yield bonds to 2.71% in the US, a two-year high, and 1.36% in Europe. The expectation for defaults during 2023 is that they will remain close to long-term averages.

Our near-term outlook favours exposure to high quality bonds, with selective exposure to B/CCC-rated credit. Yields remain attractive and, as rates volatility normalises, we would expect this part of the credit market to outperform. We also favour defensive sectors in 2023, with a preference for Europe versus the US based on relative value. Lastly, we continue to believe that seamless integration of ESG and sustainability considerations, coupled with active engagement, is critical to sustainable long-term performance.

Federated Hermes Global Small Cap Equity Fund

Market Review

Small cap stocks, as represented by the MSCI World Small Cap Index (the benchmark for the Fund) returned 1.85% in GBP terms and 7.64% in USD (all subsequent returns, unless specified, are quoted in USD). This compares to the returns from the equivalent large and mid-cap indices of 16.78% and 8.07% respectively.

In general, global equity markets recorded gains in the first half of the year following the declines of 2022. The collapse of Silicon Valley Bank in March led to a sell-off in the Financials sector in both the US and Europe. Fears of a domino effect were alleviated by the co-ordinated actions of the Federal Reserve (Fed) and large banks to stabilise the financial system. North America was one of the strongest performing regions as enthusiasm around artificial intelligence (AI) boosted technology stocks. In their quest to reduce inflation, central banks continued to raise interest rates. Inflationary pressures showed signs of easing, towards the end of the period, and this led the Fed to pause its rate hiking cycle in June.

The best performing sectors were Information Technology (20.46%) and Industrials (15.35%), while Financials (-3.99%) and Energy (-1.91%) were laggards over the period.

North America (8.85%) was the strongest performing region, while Italy (18.02%) was the strongest individual country. Israel (-5.61%) was the worst performing country and the only region to end the period in negative territory.

Investment Strategy

The Global Small Cap Fund follows a bottom-up, stock-picking strategy. The lead manager aims to invest in high-quality stocks over the long term (defined as 3-5 years+). The portfolio is relatively concentrated with between 50 and 70 holdings. The team believes the number of holdings is adequately concentrated to provide sufficient stock-specific risk for alpha generation while being large enough to achieve the desired broad sector and regional neutrality in portfolio positioning. The team looks for stocks that have high returns on equity and/or high sustainability of revenue and returns. The strategy has historically exhibited a slight growth bias.

The approach is designed to capitalise on alpha generation opportunities among smaller companies by exploiting the inefficiencies which result from a lack of information and investor interest. There is a particular focus on uncovering undervalued quality stocks at prices below their intrinsic value. Macro factors are not taken into consideration directly, but indirectly via assumptions used in valuation models. We do not engage in thematic or momentum investing.

During the period, turnover was within our normal range. We took advantage of price volatility to make a number of incremental portfolio changes. We also exited our residual holdings in Huntington Bancshares, Penta-Ocean and Marr. We initiated a new position in VZ Holding.

VZ Holding is a Swiss-based consultant-led wealth manager. The company has brand and reputational strength as a specialist in retirement consulting and estate planning. The business is seen as an independent operator, which differentiates it from competitors (which are large banks). VZ is a high-quality business which has delivered strong and growing recurring revenues and has a strong balance sheet. We funded this trade by trimming the holdings in Burckhardt and Thule.

Performance Review

The Fund returned 4.06% in GBP, net of fees, over H1 2023 (10.90% gross, in USD), outperforming the benchmark by 2.17%. Sector allocation was the primary driver of the outperformance with stock selection also positive over the period.

The main positives for performance were stock selection in Health Care, Consumer Discretionary and Consumer Staples while the Fund's zero-weight in Energy and underweight in Real Estate were also beneficial. The main detractors included stock selection in Materials and Real Estate as well as the underweight position in the Consumer Discretionary sector. From a regional perspective, stock selection in North America contributed positively to performance and offset the negative impact from stock selection in Europe. Stock selection in Sweden was the second largest contributor after the USA, from a single country perspective, while selection in Japan detracted from performance.

Federated Hermes Global Small Cap Equity Fund (continued)

Performance Review (continued)

At a stock level, the largest contributors were Altair Engineering, Simpson Manufacturing and Clean Harbors. Shares in Altair Engineering rose as the company reported a stellar finish to 2022, delivering growth of more than 18% for the full year. Altair also benefitted alongside other technology companies on the prospect of slower interest rate hikes and was seen as a safe-haven following the regional US banking crisis. Simpson Manufacturing started the year strongly, alongside other housing-related names which also bounced in the first quarter, as valuations were perceived as excessively low by investors. Simpson continued to climb after they reported strong results, which beat expectations, and management raised full-year guidance. Simpson was also helped by lower input costs and improved demand, particularly from new construction. Clean Harbors outperformed following strong Q4 results and a positive 2023 outlook statement from management which highlighted healthy demand for the company's network of waste services. The shares continued to perform strongly as investors acknowledged improving conditions in each of the company's main business streams, and, in particular, its ability to raise prices in its landfill operations.

Community Bank, Wintrust Financial and Azenta were the largest individual detractors. The share prices of Community Bank and Wintrust Financial fell sharply alongside other regional banks following the collapse of three regional US banks, amid fears of contagion in the banking sector. Whilst not immune to volatility, Community Bank and Wintrust Financial have greater diversification than the failed banks, on both sides of their balance sheets. They also have a more granular deposit base (over 50% insured) and a loan book with more exposure to a broader set of end markets. Elsewhere, Azenta fell as its Q1 results and guidance missed expectations and recorded a larger than expected profit loss. The revenue shortfall was driven by inflationary pressures as well as a slower than expected recovery in China and B Medical, which Azenta bought last year. In response, management have stated that they are streamlining manufacturing operations to improve margin performance. However, top-line revenue acceleration is expected to be the more important driver for improved profitability over the next few quarters.

Outlook

Market enthusiasm seen at the start of the year has moderated with uncertainty over the outlook for inflation and monetary policy. The eventual resolution of this uncertainty, alongside the growth prospects for the major economies, will determine the broader outlook for equities. The problems at US banks have caused a marked flight to quality by investors and we believe this will continue to be the case for the immediate future, especially if the dampening impact from higher interest rates grows in magnitude. We believe the portfolio is well positioned for this environment: it has a mix of growth and value-oriented stocks, with a clear tilt towards quality and stability measures. It has a modest positive correlation to inflation and has lower gearing than the benchmark.

Federated Hermes Absolute Return Credit Fund

Market Review

The commencement of 2023 brought some much-needed respite following what could only be described as a turbulent and challenging 2022. With the familiar themes still in tow – heightened inflation, central bank tightening and geopolitical tensions – January brought about an improvement in broad sentiment and an up-tick in markets. Unfortunately, any positive momentum was quashed early in the period given the strength of economic data, primarily out of the US, where employment data was proving to be more resilient than expected, giving rise to an expectation of increased scale and pace of rate hikes. This weighed on the market outlook for growth, with the consensus being that global growth would slow and for economies to enter shallow-to-mild recessions.

Following a series of rate hikes across developed markets to the end of March, inflation failed to meaningfully subside, which kept investors alert to any signals that policy rates were going to jump higher – with expectations of a 50 basis points (bps) hike by the Federal Reserve (Fed). However, any intentions were abruptly halted following the demise of Silicon Valley Bank and Signature Bank in the US, prompting alarm around contagion in the US regional banking sector. These concerns were further exacerbated in Europe by a regulator-induced acquisition of Credit Suisse by UBS following Credit Suisse's collapse in March, resulting in the write-down of \$17bn of convertible bonds (AT1s). Following one more regional bank failure (First Republic Bank), the situation was quickly contained and the perceived risks dissipated, comforting investors and taking volatility down to new post-pandemic lows. This sanguine backdrop gave central banks the confidence to continue their pursuit of bringing down inflation – which, at the end of the period under review, saw headline inflation coming down from its peak but core inflation remaining sticky and leaving central banks with more to do.

Investment Strategy

The beginning of the period brought a relatively accommodative backdrop, despite a continuation of the key themes of inflationary pressures, central bank intervention and geopolitical events. Within both high yield and investment grade corporates, we focused on optimising security selection, with a preference for higher quality issues and rotating from cyclical to defensive sectors. Given central bank tightening, interest rates remained a key driver throughout the period, and we remained constructive on rates, extending duration (interest rate sensitivity) in issuers we liked.

The initial move tighter in credit market spreads (the difference in yield between corporate bonds and their equivalent government-issued bonds) meant we were able to take advantage within our hedge overlay, repositioning options and terming out to later in the first half of the year. In addition, as implied volatility continued to fall reducing the costs of hedging, we moved our option positioning to outright positions. As sentiment turned, and developed markets retreated, we focused on de-risking and took the opportunity to increase duration exposure to be more in line with our constructive view on rates.

Within structured credit, we remained focused on high-quality collateralised loan obligations (CLOs), where the initial positive sentiment in markets allowed us to take some profit on long-held positions and recycle the allocations into new issues in the BBB space. As market volatility picked up, CLOs continued to offer a compelling spread pick-up (the opportunity to attain a higher yield) relative to corporate bonds, particularly towards the front/middle of the yield curve, and especially in Europe.

Performance Review

The Fund returned 0.61% (net F USD accumulating share class) in the first half of 2023.

By sector, the period was broadly positive, with the Fund's allocations to Retail and Automotive the top contributors to absolute returns, while exposure to Real Estate was the largest detractor and an allocation to Insurance also hampered performance.

On an issuer basis, allocations to International Consolidated Airlines, Marks and Spencer and HSBC were key contributors. In contrast, exposure to UBS, Country Garden Holdings and Samhallsbyggnadsbolaget were the largest detractors.

From a regional perspective, North America and Latin America contributed the most to absolute performance, while only Western Europe and Asian emerging markets detracted.

From a rating's perspective, the Fund's exposure to BBB and AAA rated issues added the most to performance through the period, while BBs detracted the most.

Federated Hermes Absolute Return Credit Fund (continued)

Outlook

June saw the Fed pause, not increasing interest rates for the first time in over a year, but with its dot plot signalling two further rate hikes this year. At the same time, the European Central Bank (ECB) raised rates by 25bps, taking its deposit rate up to 3.5%.

Our base case continues to be for a mild recession; however, uncertainty remains high with the probability of non-linear outcomes likely to be pronounced, as evidenced by the recent events exposing weakness in the financial system. Economic data have generally been surprising to the upside, while inflation remains sticky. Broadly, rate cuts are unlikely to happen this year, but further hikes are also difficult given the risk of economic destabilisation. Tail risks (catalysts) have decreased, but are closely monitored as the impact of recession, changes in inflation and geopolitics might affect markets.

Corporate fundamentals remain in a good position as balance sheets, while expected to erode, remain healthy despite slowing earnings growth that has been, so far, sector specific. In fact, our credit analysts identified more positive fundamental changes in sectors than negative, supporting the above view. That said, credit metrics unveil signs of deterioration. Revenue and EBITDA growth decreased for high yield corporates in the first quarter of 2023 and expanded by the slowest rate in two years. Stickier inflation on the cost side than the revenue side is leading to some margin deterioration across sectors. Meanwhile, leverage for high yield issuers decreased to 3.91x, which is the lowest level since 2012 amid inactive markets. Finally, companies are adopting a more defensive stance given market conditions, and have eliminated debt growth (0% year-on-year) and reduced capital expenditures (-7% quarter-on-quarter).

Defaults increased in June, raising the default rate for high yield bonds to 2.71% in the US, a two-year high, and 1.36% in Europe. The expectation for defaults during 2023 is that they will remain close to long-term averages.

Our near-term outlook favours exposure to high quality bonds, with selective exposure to B/CCC-rated credit. Yields remain attractive and, as rates volatility normalises, we would expect this part of the credit market to outperform. We also favour defensive sectors in 2023, with a preference for Europe versus the US based on relative value. Lastly, we continue to believe that seamless integration of ESG and sustainability considerations, coupled with active engagement, is critical to sustainable long-term performance.

Federated Hermes SDG Engagement Equity Fund

Market Review

Small and mid-cap stocks, as represented by the MSCI World ACWI SMID Index (an all-country index which includes emerging markets), returned 1.96% in GBP terms and 7.76% in USD terms (unless otherwise stated, all subsequent returns are quoted in USD). This compares with an increase for the equivalent large cap global index of 15.45% and for the S&P 500 of 16.88%.

In general, global equity markets recorded gains in the first half of the year following the declines of 2022. The collapse of Silicon Valley Bank in March led to a sell-off in the Financials sector in both the US and Europe. Fears of a domino effect were alleviated by the co-ordinated actions of the Federal Reserve (Fed) and large banks to stabilise the financial system. North America was one of the strongest performing regions as enthusiasm around artificial intelligence (AI) boosted technology stocks. In their quest to reduce inflation, central banks continued to raise interest rates. Inflationary pressures showed signs of easing, towards the end of the period, and this led the Fed to pause its rate hiking cycle in June.

The best performing sectors included Information Technology (21.12%) and Industrials (15.71%). In a reversal from last year, Energy (-2.65%) was the worst performing sector, closely followed by Financials (-1.88%).

All regions ended the period in positive territory. Latin America was the best performer, returning 21.76%, whereas Pacific (ex-Japan) was the worst performer, returning 3.15%.

Investment Strategy

The SDG Engagement Fund follows a small and mid-cap investment strategy that aims to produce an above-benchmark investment return whilst also delivering a social return.

The investment team seek to invest in high-quality stocks, with a long-term investment horizon. As part of the investment process, the team also analyses each company's business model in the context of how it meets the UN's Sustainable Development Goals (SDGs) including what further steps each company could take to contribute to those goals.

The team will then engage with the management teams of the respective companies, that have been chosen for inclusion in the fund, to encourage companies to, for example, change business practices, manage their supply chain better, or develop new products, that have been identified, by the team, as necessary to improve progress towards the goals. Furthermore, the team, in collaboration with Hermes Equity Ownership Services (Hermes EOS), the stewardship part of the business, helps to facilitate this by communicating industry best practice, advising on reporting and disclosure, and, where relevant, introducing third parties to assist companies in their efforts.

The investment process is based on bottom-up fundamental analysis. The team believe that excess returns are strongest, and most consistently generated, by concentrating on stock-specific risks and not by taking significant regional or sectoral positions. This is reflected in the Fund's risk profile, which is skewed towards stock selection, to maximise the portfolio's exposure to the team's stock analysis including SDG impact. The investment team has extensive local market knowledge and operates on a regional basis.

Each potential holding is subject to rigorous due diligence which results in both an investment and an engagement thesis. The latter will detail the proposed ongoing engagement activity together with appropriate milestones. This will then be further enhanced and, following discussion with company management, will be formalised into a plan for monitoring. The impact from engagement is measured and reported on a semi-annual basis.

Performance Review

The Fund returned 5.07% in GBP terms, outperforming the benchmark by 3.05%.

Stock selection, sector allocation and currency were all positive contributors, over the period, although stock selection was the primary driver of the outperformance.

Stock selection was particularly positive in Healthcare and Consumer Staples, whilst selection in Information Technology detracted from performance. From a sectoral perspective, the Fund's overweight in Industrials and zero-weight in Energy were both positive factors while the Fund's underweight to Information Technology detracted from relative returns.

Federated Hermes SDG Engagement Equity Fund (continued)

Performance Review (continued)

Regionally, stock selection was most positive in North America while selection in the Pacific ex-Japan area detracted from performance.

At the stock level, the largest contributors were Simpson Manufacturing, Clean Harbors and Eagle Materials. Simpson Manufacturing started the year strongly, alongside other housing-related names which also bounced in the first quarter, as valuations were perceived as excessively low by investors. Simpson continued to climb after they reported strong results, which beat expectations, and management raised full-year guidance. Simpson was also helped by lower input costs and improved demand, particularly from new construction. Clean Harbors outperformed following strong Q4 results and a positive 2023 outlook statement from management which highlighted healthy demand for the company's network of waste services. The shares continued to perform strongly as investors acknowledged improving conditions in each of the company's main business streams, and, in particular, its ability to raise prices in its landfill operations. Eagle Materials climbed following strong quarterly results. Eagle benefitted from a healthy demand from industrial and multi-family residential construction.

Wintrust Financial, Retail Opportunity Investment Corporation and RPM were the top three stock level detractors. The share price of Wintrust Financial fell alongside other regional banks following the collapse of three regional US banks, amid fears of contagion in the banking sector. Whilst not immune to volatility, Wintrust Financial has greater diversification than the failed banks, on both sides of its balance sheet. It also has a more granular deposit base (over 50% insured) and a loan book with more exposure to a broader set of end markets. This highlights the importance of our investment process in differentiating between companies operating in the same sector. Retail Opportunity Investment Corporation fell despite in-line Q4 results and guidance. The market reacted to the impact of a higher interest rate expense which is expected, in the short term, to offset the rental growth rates that were set out in the 2023 guidance. RPM declined after they reported two sets of disappointing quarterly results and management forecast flat growth in the next quarter, compared to the previous year. Management highlighted several headwinds to growth which included slowing overall economic activity, elevated interest rates and customers holding lower inventories.

Outlook

The investor enthusiasm seen at the start of the year has moderated with uncertainty over the outlook for inflation and monetary policy. The eventual resolution of this uncertainty, alongside the growth prospects for the major economies, will determine the broader outlook for equities. The problems at US banks have caused a marked flight to quality and we believe this will continue to be the case for the immediate future, especially if the dampening impact from higher interest rates grows in magnitude. We believe the strategy is well positioned for this environment: it has a mix of growth and value-oriented stocks, with a clear tilt towards quality and stability measures. It has a small positive exposure to inflation, is neutral to oil, and has lower gearing than the benchmark.

Federated Hermes Impact Opportunities Equity Fund

Market Review

The MSCI All Country World IMI Index returned 7.15%, in GBP terms, for the period (13.23% in the fund's USD base currency in gross terms).

Global equities began the year in positive fashion, posting strong gains in January. Risk aversion declined sharply with sentiment boosted by the reopening of the Chinese economy and signs that inflation was receding from its autumn peaks, reflected in falling bond yields. In addition, excitement around AI, following the launch of ChatGPT in late 2022, drove the Information Technology sector higher. However, it was not long before the feel-good factor started to dissipate and risk appetite started to deteriorate. Somewhat ironically, this was triggered by positive economic data that highlighted the resilience of the US economy, which raised concerns that inflation would remain 'higher for-longer'. The collapse of Silicon Valley Bank and the bailout of Credit Suisse, in March, ensured investors retreated into risk-off mode.

One of the defining characteristics of the period was the lack of market breadth with returns driven by a small number of tech-focused mega cap stocks. In H1, almost 90% of the MSCI World return was generated by just three sectors (Information Technology, Communication Services and Consumer Discretionary).

Outside of the Al-generated excitement, investors have remained cautious. Inflationary pressures have proved to be more stubborn than anticipated, especially in Europe - with the UK the chief culprit. Hawkish central banks and fears of recession have ensured that our risk aversion indicator has, until the last few weeks of the quarter, consistently remained in 'risk-off' territory. The recent increase in risk appetite has coincided with improving market breadth.

The best performing sectors, during the period, were Information Technology (20.57%), followed by Financials (14.55%) and then Healthcare (12.21%). Energy (-2.31%), Utilities (-0.59%) and Real Estate (-0.08%) were the worst performing sectors.

All regions had a positive return for the period, the best performers were EM Latin America (19.52%) and North America (15.66%). Asia Pacific and the EMEA also delivered positive returns but lagged other regions.

Investment Strategy

The Federated Hermes Impact Opportunities Equity Fund is a high-conviction global equity strategy. Our approach is to find companies whose products and services address unmet needs in society. Such companies often have structural growth opportunities while also bringing wider benefits that address environmental and social challenges. Through careful stock selection, we aim to create a portfolio capable of generating attractive long-term financial returns alongside delivering clear, positive impacts on society and the planet.

Investors have become increasingly aware that incorporating sustainability and ESG factors into their stock selection will often help them to avoid companies that destroy shareholder value. Our Impact investing strategy goes beyond risk mitigation and invests in companies that are tackling the underserved needs of society and the environment, and as such are exposed to sources of enduring demand.

We take a thematic approach and seek to capture opportunities which are created by mega trends. Through assessing the UN Sustainable Development Goals' underlying targets, we have alighted on nine key impact themes which are investable.

The Fund's overall structure has remained consistent over the period. We added three new positions and sold three positions over the six-month period.

Federated Hermes Impact Opportunities Equity Fund (continued)

Investment Strategy (continued)

We initiated positions in Lenzing, Masimo and Advanced Drainage Systems. Lenzing is a manufacturer of wood-based cellulosic fibres, an alternative to man-made synthetic fibres, such as polyester and nylon. It only uses sustainably sourced wood as an alternative to man-made products, such as polyester, which are difficult to recycle. It also helps combat the threat to biodiversity from cotton farming. The company qualifies for our circular economy theme. Masimo is a global leader in pulse-oximetry, the measurement of oxygen in blood, which can be one of the most accurate indicators of an underlying condition of a patient, whether that be in an acute or chronic form. Our impact case is centred around the additive value that its products & software bring to healthcare systems around the world. US-based Advanced Drainage Systems is a manufacturer of plastic pipe, stormwater and onsite septic wastewater solutions. It is the largest plastic recycling company in North America, ensuring that more than half a billion pounds of plastic is kept out of landfills every year. In addition, their water management solutions are designed to last for decades.

We closed our positions in Blackbaud, Orsted and Bright Horizons. Blackbaud was exited after receiving a takeover bid, which we believed was attractive, but the company rejected. We sold Orsted as we have lower conviction, than before, in the management's strategy and their cautious line between growth and balance sheet conservatism. We also see near-term pressures in their US projects, with the impact of zero or negative internal rate of returns (IRR) on existing onshore projects not yet fully digested by investors. We also closed our position in Bright Horizons due to structural question marks around the business given the shifts in working practices, with WFH and hybrid-working becoming 'the new normal'. The stock rallied 50% YTD on the re-opening of the economy, but new working patterns do not represent a full return to office working, meaning childcare needs have changed. Given the elevated multiple, and relative lack of earnings growth, we decided to sell our small position and invest in better opportunities elsewhere.

The Fund continues to be actively managed, and throughout the period, we trimmed positions that have performed particularly well and topped up other positions where we saw greater upside.

Performance Review

The fund returned 1.33% for the six-month period, to the end June 2023, in GBP terms, underperforming the benchmark by 5.43%. In H1, we saw a tech-led market, with 10 stocks driving over 40% of the MSCI World Index's performance. Against this backdrop our underweight to Information Technology has had the most significant impact on relative returns.

Stock selection in Industrials and an overweight allocation to Healthcare also had a negative impact on performance. Also negative for returns were our holdings in Consumer Staples, our underweight and stock selection in Financials, and our lack of holdings in the Energy sector.

Straumann was the largest single stock contributor to relative returns in the period. Straumann reported strong results and positive FY2023 guidance with management confident of delivering high single-digit growth, despite the challenging macro environment. It also issued a positive update on its digital strategy at the International Dental Show. Ansys reported better than expected earnings and guidance driven by demand for simulation software. Lonza rose, over the period, after a final stage study showed Lilly's experimental drug for Alzheimer's slowed the progress of the disease. If Lonza was the contract manufacturer for Lilly, it would directly benefit from the supply-demand imbalance.

Agilent technologies was the largest single stock detractor from relative returns in the period. The company reported better than expected results across all segments and regions. However, it revised its H2 guidance lower due to stalling biotech spending. We believe this slowdown is temporary and the long-term outlook remains attractive. Abcellera saw share price weakness over the period. We remain positive on the company over the long term with our confidence bolstered by the announcement of several partner programmes in several high-value targets. Not owning Apple detracted from relative returns, as investor sentiment improved on a jump in service revenue, production problems subsiding and a rebound in China after the removal of Covid-19 restrictions.

Federated Hermes Impact Opportunities Equity Fund (continued)

Outlook

H1 2023 has presented a continuation of the tumult of 2022, with distinct periods of risk on and risk off, however, we are encouraged by the cadence of market sentiment towards the end of the half, and the entry rate of returns in early H2 2023. In particular we are pleased to see an increase in market breadth, with returns spreading across sectors, and down the market cap spectrum. Whilst uncertainty remains high, we see the range of macro scenarios narrowing, and the likelihood of recession in key geographies abating. Further, early H2 2023 inflation data has been encouraging across most OECD nations, setting the stage for a long awaiting curtailment in rate increases, from which we expect that the portfolio will be an outsized beneficiary compared to the index.

We maintain our long-term focus on impactful companies, that are exposed to key megatrends that address improving food and water security, health care systems and the resilience of supply chains as well as the issues of climate change and biodiversity loss. We remain confident that companies that provide innovative solutions to the unmet needs of the environment and society will be exposed to enduring sources of demand - providing secular growth opportunities, as well as a positive impact on people and the planet.

Federated Hermes Unconstrained Credit Fund

Market Review

The commencement of 2023 brought some much-needed respite following what could only be described as a turbulent and challenging 2022. With the familiar themes still in tow – heightened inflation, central bank tightening and geopolitical tensions – January brought about an improvement in broad sentient and an up-tick in markets. Unfortunately, any positive momentum was quashed early in the period given the strength of economic data, primarily out of the US, where employment data was proving to be more resilient than expected, giving rise to an expectation of increased scale and pace of rate hikes. This weighed on the market outlook for growth, with the consensus being that global growth would slow and for economies to enter shallow-to-mild recessions.

Following a series of rate hikes across developed markets to the end of March, inflation failed to meaningfully subside, which kept investors alert to any signals that policy rates were going to jump higher – with expectations of a 50 basis points (bps) hike by the Federal Reserve (Fed). However, any intentions were abruptly halted following the demise of Silicon Valley Bank and Signature Bank in the US, prompting alarm around contagion in the US regional banking sector. These concerns were further exacerbated in Europe by a regulator-induced acquisition of Credit Suisse by UBS following Credit Suisse's collapse in March, resulting in the write-down of \$17bn of convertible bonds (AT1s). Following one more regional bank failure (First Republic Bank), the situation was quickly contained and the perceived risks dissipated, comforting investors and taking volatility down to new post-pandemic lows. This sanguine backdrop gave central banks the confidence to continue their pursuit of bringing down inflation – which, at the end of the period under review, saw headline inflation coming down from its peak but core inflation remaining sticky and leaving central banks with more to do.

Investment Strategy

The beginning of the period brought a relatively accommodative backdrop, despite a continuation of the key themes of inflationary pressures, central bank intervention and geopolitical events. Within both high yield and investment grade corporates, we focused on optimising security selection with a preference for higher quality issues and rotating from cyclical to defensive sectors. Given central bank tightening, interest rates remained a key driver throughout the period, and we remained constructive on rates, extending duration (interest rate sensitivity) in issuers we liked.

The initial move tighter in credit market spreads (the difference in yield between corporate bonds and their equivalent government-issued bonds) meant we were able to take advantage within the hedge overlay to focus on re-striking options lower and terming out our options book to the second quarter. As implied volatility continued to fall, reducing the costs of hedging, we moved into outright positioning versus payer spreads. As sentiment turned, and developed markets retreated, we focused on de-risking and took the opportunity to increase duration exposure to be more in line with our constructive view on rates.

Within structured credit, we remained focused on high-quality collateralised loan obligations (CLOs), where the initial positive sentiment in markets allowed us to take some profit on long-held positions and recycle the allocations into new issues in the BBB space. As market volatility picked up, CLOs continued to offer a compelling spread pick-up (the opportunity to attain a higher yield) relative to corporate bonds, particularly towards the front/middle of the yield curve, and especially in Europe.

Performance Review

The Federated Hermes Unconstrained Credit Fund (Class F, USD, Accumulating) returned 1.72% in the first half of 2023.

By sector, the Fund's exposure to Real Estate detracted the most from absolute returns, further hampered by an allocation to Financials. However, the period was broadly positive from a sectoral perspective, with the Fund's allocation to CLOs, Capital Goods and Basic Industry the top contributors to performance. At an individual holdings level ARD Holdings (Consumer Goods), First Eagle Holdings (Financial Services) and Barclays (Banking) boosted absolute performance the most, while UBS (Banking), Country Garden Holdings (Real Estate) and Lumen (Telecommunications) detracted.

From a ratings perspective, the Fund's exposure to BBBs and broad BB-rated issues added the most to performance, while single-B and non-rated issuers detracted the most.

From a regional perspective, North America and Western Europe were the top contributors, while only Asian emerging markets detracted.

Federated Hermes Unconstrained Credit Fund (continued)

Outlook

June saw the Fed pause, not increasing interest rates for the first time in over a year, but with its dot plot signalling two further rate hikes this year. At the same time, the European Central Bank (ECB) raised rates by 25bps, taking its deposit rate up to 3.5%.

Our base case continues to be for a mild recession; however, uncertainty remains high with the probability of non-linear outcomes likely to be pronounced, as evidenced by the recent events exposing weakness in the financial system. Economic data have generally been surprising to the upside, while inflation remains sticky. Broadly, rate cuts are unlikely to happen this year, but further hikes are also difficult given the risk of economic destabilisation. Tail risks (catalysts) have decreased, but are closely monitored as the impact of recession, changes in inflation and geopolitics might affect markets.

Corporate fundamentals remain in a good position as balance sheets, while expected to erode, remain healthy despite slowing earnings growth that has been, so far, sector specific. In fact, our credit analysts identified more positive fundamental changes in sectors than negative, supporting the above view. That said, credit metrics unveil signs of deterioration. Revenue and EBITDA decreased for high yield corporates in the first quarter of 2023 and expanded by the slowest rate in two years. Stickier inflation on the cost side than the revenue side is leading to some margin deterioration across sectors. Meanwhile, leverage for high yield issuers decreased to 3.91x, which is the lowest level since 2012 amid inactive markets. Finally, companies are adopting a more defensive stance given market conditions, and have eliminated debt growth (0% year-on-year) and reduced capital expenditures (-7% quarter-on-quarter).

Defaults increased in June, raising the default rate for high yield bonds to 2.71% in the US, a two-year high, and at 1.36% in Europe. The expectation for defaults during 2023 is that they will remain close to long-term averages.

Our near-term outlook favours exposure to high quality bonds, with selective exposure to B/CCC-rated credit. Yields remain attractive and, as rates volatility normalises, we would expect this part of the credit market to outperform. We also favour defensive sectors in 2023, with a preference for Europe versus the US based on relative value. Lastly, we continue to believe that seamless integration of ESG and sustainability considerations, coupled with active engagement, is critical to sustainable long-term performance.

Federated Hermes Global Emerging Markets SMID Equity Fund

Market Review

The benchmark MSCI Emerging Markets SMID Net TR Index returned 8.1%, in H1 2023, in USD terms (2.23% in sterling terms), ahead of the broader MSCI Emerging Markets index but significantly underperforming the equivalent developed markets (DM) index. Returns in DM were boosted by the performance of the 'Big Tech' companies due to investor excitement over developments in artificial intelligence (AI). As a result, the Nasdaq Index had its best first half performance in four decades, even stronger than during the 1999 NASDAQ bubble.

At a regional level, Latin America was the best performing area, led by Chile, Mexico and Brazil. These gains came against a backdrop of improving economic data. Brazil benefitted from easing fiscal concerns over newly elected President de Silva. In addition, the disinflation process appears to be underway with falling inflation expectations leading investors to anticipate that Brazil will be the first country in the region to being cutting interest rates in August. Elsewhere, Peru and Colombia underperformed.

Asia ex-Japan underperformed, led lower by China. Chinese equities were sharply lower in the second quarter as the economic rebound started to cool. Ongoing tensions with the US weakened investor sentiment, though concerns eased after Antony Blinken, the US Secretary of State, unexpectedly held a meeting with President Xi Jinping during his Beijing trip in June. Factory output in China has started to slow due to lacklustre consumer spending and weak demand for exports following interest rate rises in the US and Europe. Taiwan and Korea outperformed, boosted by technology companies as investors rushed to invest in the AI theme. Thailand and Malaysia posted negative returns. India outperformed, supported by some positive macroeconomic data including better industrial production and easing inflation, which meant the central bank kept monetary policy unchanged. Indonesia, where the rupiah appreciated against the US dollar, also outperformed.

Emerging Europe, Middle East and Africa also underperformed. Turkey posted the largest drawdown across EM markets as President Recep Tayyip Erdogan won re-election in May, extending his two-decade rule. South Africa fell given elevated macroeconomic risks including inflation expectations, rate rises, currency weakness and the impact power shortages is having on the economy. Greece, Poland and Hungary were among the top-performing index markets despite rising recessionary fears in Europe. Central European markets began to anticipate interest rate cuts as inflation eased. Hungary cut rates in June. Saudi Arabia also outperformed.

At a sector level, the period was marked by a wide dispersion in returns, Information Technology and Industrials finished at the top, while Real Estate and Energy ended at the bottom.

Investment Strategy

In the first quarter, the team opened several new positions. These included: Hannon Systems, a South Korean manufacturer of thermal systems for both traditional internal combustion engine (ICEs) and electric vehicles (EVs), Leeno Industrials, a South Korean monopoly producer of pins and socket technology for semiconductor testing; CM Hospitalar (doing business as Viveo), whose core business is the distribution of materials and medicines to Brazilian hospitals and clinics; and Max Healthcare, the second-largest Indian hospital chain in terms of revenue.

They exited Container Corp, starting the process prior to the short seller report due to limited upside, lack of margin of safety in the valuation and upcoming cyclical weakness in global trade. They exited ChaCha Foods, a Chinese producer of nuts and seeds, due to concerns around the pace of moving supply away from Xinjiang and Win Semi. They also trimmed several positions, including InPost, LiveChat, SBI Life and Yamana Gold. They exited Hapvida and Transaction Capital amid a challenged outlook.

The team initiated several new positions in the second quarter. These included: Regional, a Mexican regional bank, which focuses mainly on corporate loans for small and medium companies; Voltronic Power Technology, a Taiwan-listed leading original design manufacturer of uninterruptible power supply products (UPS), solar inverters, and other power devices; Fairfax India, an investment holding company with a variety of public and private equity securities, trading at a significant discount to its book value; and Angelalign Technology, which provides a range of invisible orthodontic solutions and is the clear leader in China's emerging clear aligner market with a 41% share.

They also bought Mabanee, a Kuwait-based real estate development company; Lotes, a Taiwanese designer and manufacturer of precision electronic interconnect components and hardware; and China Overseas Property Holdings (COPH), a leading property management services company spun out of China Overseas Land and Investment in 2015.

Federated Hermes Global Emerging Markets SMID Equity Fund (continued)

Investment Strategy (continued)

We sold FSN E-Commerce, an Indian beauty care e-retailer, on concerns over slowing digital demand as consumers returned to shopping on the high street. We also trimmed Va Tech, Sinbon Electronics and Entegris into strength. We sold UWC, a Malaysia integrated engineering solutions support services provider due to near term earnings pressure on a semiconductor slowdown. We also sold Weimob and trimmed Wuxi Lead due to worries over excess capacity in the EV battery space that could result in slowing orders for the company.

Performance Review

The Fund returned 0.70% in sterling terms, net of fees, during the period, underperforming the benchmark MSCI Emerging Markets SMID Net TR Index which returned 2.23%, on a relative basis by 150bps. Stock selection accounted for the majority of the underperformance. Selection was weakest in Taiwan, South Africa, Korea and Brazil. This eclipsed stronger selection in Mexico and China. The Fund overweight allocation to China, which underperformed and the associated exposure to the renminbi, which depreciated relative to the US dollar, was also a factor. In addition the lack of exposure to outperforming markets, such as Greece and Saudi Arabia, as well as the overweight to the underperforming Malaysia market also negatively impacted returns.

Va Tech Wabag (VTW), an Indian water and sewage treatment provider, was the largest individual contributor, due to its strong operating performance, improved balance sheet and healthy order book. VTW is well positioned to win opportunities for desalination, sewage and other water treatments under India's "Jal Shakti" mission to improve water management and conservation along with overseas opportunities in Saudi Arabia, Egypt and Africa. Sinbon Electronics, a solutions provider of electronics integration based in Taiwan, rose after reporting solid quarterly results that highlighted impressive revenue growth with auto, industrial, medical and the green energy segments as key revenue drivers. Wiwynn, a Taiwanese manufacturer of computer storage devices, rose as data traffic growth, public cloud migration, and new applications such as Al and machine learning are expected to drive long-term cloud capital expenditure growth and infrastructure investments.

Centre Testing, a testing, inspection and certification provider in China, was the largest individual detractor as YTD demand trends have been impacted by slowing economic activity and intensifying competition in certain segments including environmental, food, and medical testing. Auto-related testing trends have also been better than expected, offset by weaker environmental and property-related testing. Hapvida, a Brazilian provider of low-cost health insurance, fell due to near-term financing concerns. There was also uncertainty over the company's ability to comply with growing regulatory demands against the backdrop of a higher interest rate environment. As a result, we we decided to sell the holding. Glodon, a leading software provider to China's construction industry, fell as Q1 2023 revenue growth was below company guidance. Management attributed this disappointment to internal restructuring, fewer promotional discounts, and seasonal fluctuations. The digitalisation rate of the construction industry in China has been lower than for other industries. Management continue to expect to see an improvement in digital trends over time, which should drive up client profitability through increased efficiency.

Outlook

The challenges of decarbonisation, deglobalisation, deteriorating demographics, and record-high debt burdens all suggest the 'new normal' for inflation could be higher than default DM central banks' target of 2%. By contrast, most central banks in EM appear to have paused monetary policy tightening, as inflation trends lower, opening the way to looser monetary policy in future. EM should also benefit from a number of other factors including lower valuations, light investor positioning, an improving growth differential compared to DM as well as favourable demographics and an improved focus on supply-side reforms. A number of individual countries could also could benefit substantially from the relocation of supply chains, away from China.

Federated Hermes Global Emerging Markets SMID Equity Fund (continued)

Outlook (continued)

Over the medium to long term, we anticipate a continued shift in the investment environment, as investors evaluate the impact of an upwards move in the overall inflation rate and the cost of capital. Supply-side constraints in a number of areas such as energy, commodities and labour will likely play an important role in this scenario. The shift will create winners and losers. Emerging markets have a golden opportunity to improve their competitiveness, capitalising on leadership in growth, demographics, manufacturing prowess and resource availability. By contrast, the developed world is still learning to adjust to higher inflation and is distracted by structural challenges that investors are only now considering.

Federated Hermes SDG Engagement High Yield Credit Fund

Market Review

The commencement of 2023 brought some much-needed respite following what could only be described as a turbulent and challenging 2022. With the familiar themes still in tow – heightened inflation, central bank tightening and geopolitical tensions – January brought about an improvement in broad sentiment and an up-tick in markets. Unfortunately, any positive momentum was quashed early in the period given the strength of economic data, primarily out of the US, where employment data was proving to be more resilient than expected, giving rise to an expectation of increased scale and pace of rate hikes. This weighed on the market outlook for growth, with the consensus being that global growth would slow and for economies to enter shallow-to-mild recessions.

Following a series of rate hikes across developed markets to the end of March, inflation failed to meaningfully subside, which kept investors alert to any signals that policy rates were going to jump higher – with expectations of a 50 basis point (bps) hike by the Federal Reserve (Fed). However, any intentions were abruptly halted following the demise of Silicon Valley Bank and Signature Bank in the US, prompting alarm around contagion in the US regional banking sector. These concerns were further exacerbated in Europe by a regulator induced acquisition of Credit Suisse by UBS following its collapse in March, resulting in the write-down of \$17bn of convertible bonds (AT1s). Following one more regional bank failure (First Republic Bank), the situation was quickly contained and the perceived risks dissipated, comforting investors and taking volatility down to new post-pandemic lows. This sanguine backdrop gave central banks the confidence to continue their pursuit of bringing down inflation – which, at the end of the period under review, saw headline inflation coming down from its peak but core inflation remaining sticky and leaving central banks with more to do.

Investment Strategy

We provide a comprehensive bi-annual report on our website featuring in-depth analysis of our engagement activity, including which UN Sustainable Development Goals (SDGs) have been focused on, the scores assigned, the rationale for inclusion and our process around re-evaluation.

With the beginning of the period being accommodative for risk assets, and there being an uneasy acceptance of long-running themes that carried over from 2022, the Fund focused on optimising security selection, with trades predominantly targeting small extensions, capital structure pivots and cross-currency switches — mainly EUR to USD. However, markets then saw a more cautious tone, and sentiment quickly shifted as volatility picked up meaningfully, reaching its peak in March as a result of a series of US regional bank collapses, before gradually subsiding to near post-pandemic lows by the end of the period.

Amid this backdrop, we maintained a highly selective approach around adding risk, with a focus on emerging markets versus developed market rotations, and a preference for higher quality where widening in spreads (the difference in yield between corporate bonds and their equivalent government-issued bonds) was unjustified in issuers with strong fundamentals. Additionally, a pivot out of cyclical sectors into defensive sectors was undertaken early in the period and remained core to the search for new opportunities. As volatility carried through until close to the end of the period, we remained constructive on sectoral, regional and issuer selection, continuing to prefer higher quality, and seeking out positions that give us exposure to more senior levels of capital structures.

Performance review

The Federated Hermes SDG Engagement High Yield Fund (Class F, USD, Accumulating) generated a net return of 2.95% (in US dollar terms) for the first half of 2023, underperforming its benchmark by 1.89%.

The Fund's overweight positioning in Capital Goods, Basic Industry and Utilities were the top contributors to relative performance over the period. In contrast, underweight positioning in Leisure (zero exposure), Financials and Energy were the biggest detractors on a sectoral basis. At the individual holdings level, the Fund's overweight positioning in Ard Holdings (Capital Goods), HCA Healthcare (Health Care) and Telefonica (Telecommunications) boosted relative returns the most, while its overweight positioning in UBS (Banking) and Samhallsbyggnadsbolaget (Real Estate), along with an underweight position in Carnival (Leisure), detracted the most.

On a regional basis, the Fund's overweight positioning in Western Europe and its underweight positioning in Latin America and Africa were its top contributors to relative performance. In contrast, its overweight positioning in North America detracted the most.

From a ratings perspective, the Fund's overweight positioning in BBBs positively impacted relative performance the most, while its significant underweight positioning in single-B issues detracted the most.

Federated Hermes SDG Engagement High Yield Credit Fund (continued)

Outlook

June saw the Fed pause, not increasing interest rates for the first time in over a year, but with its dot plot signalling two further rate hikes this year. At the same time, the European Central Bank (ECB) raised rates by 25bps, taking its deposit rate up to 3.5%.

Our base case continues to be for a mild recession; however, uncertainty remains high with the probability of non-linear outcomes likely to be pronounced, as evidenced by the recent events exposing weakness in the financial system. Economic data have generally been surprising to the upside, while inflation remains sticky. Broadly, rate cuts are unlikely to happen this year, but further hikes are also difficult given the risk of economic destabilisation. Tail risks (catalysts) have decreased, but are closely monitored as the impact of recession, changes in inflation and geopolitics might affect markets.

Corporate fundamentals remain in a good position as balance sheets, while expected to erode, remain healthy despite slowing earnings growth that has been, so far, sector specific. In fact, our credit analysts identified more positive fundamental changes in sectors than negative, supporting the above view. That said, credit metrics unveil signs of deterioration. Revenue and EBITDA decreased for high yield corporates in the first quarter of 2023 and expanded by the slowest rate in two years. Stickier inflation on the cost side than the revenue side is leading to some margin deterioration across sectors. Meanwhile, leverage for high yield issuers decreased to 3.91x, which is the lowest level since 2012 amid inactive markets. Finally, companies are adopting a more defensive stance given market conditions, and have eliminated debt growth (0% year-on-year) and reduced capital expenditures (-7% quarter-on-quarter).

Defaults increased in June, raising the default rate for high yield bonds to 2.71% in the US, a two-year high, and at 1.36% in Europe. The expectation for defaults during 2023 is that they will remain close to long-term averages.

Our near-term outlook favours exposure to high quality bonds, with selective exposure to B/CCC-rated credit. Yields remain attractive and, as rates volatility normalises, we would expect this part of the credit market to outperform. We also favour defensive sectors in 2023, with a preference for Europe versus the US based on relative value. Lastly, we continue to believe that seamless integration of ESG and sustainability considerations, coupled with active engagement, is critical to sustainable long-term performance.

Hermes Investment Management Limited August 2023

Federated Hermes US High Yield Credit Fund

Market Review

The high-yield market outperformed the investment-grade bond market for the six months ending 30 June 2023. For example, the ICE BofA US High Yield 2% Constrained Index (benchmark) returned 5.42% versus a 2.14% for the ICE BofA US Corporate, Government & Mortgage Index (D0A0), a measure of high-quality performance.

The primary driver of the high-yield market's strong performance was a resilient US economy which was able to shrug off central bank rate increases, bank failures and many leading indicators which signaled potential future economic weakness. Strong labour markets and consumers' willingness to keep spending benefitted economic growth. The high-yield market was able to outperform despite rising default rates and rising interest rates, in the short-to-intermediate-part of the US treasury yield curve. The market benefitted from continued demand for high-yielding fixed income securities, limited new issuance and credit fundamentals which, while modestly weaker, were good enough to keep most issuers in good standing from a credit perspective. These impacts can be seen in the movement of the spread between the Credit Suisse High Yield Bond Index and Treasury securities with similar maturities, which began the period at 499bps, peaked at 547bps in late March as concerns about the banking system escalated, before tightening to 425bps on June 30, 2023.

Within the high-yield market, the strongest performing major industry sectors relative to the benchmark were: Leisure, Retail, Automotive, Technology and Services. The worst performing major industry sectors relative to the benchmark were: Banking, Telecommunications, Media, Consumer Cyclicals and Utilities. From a quality perspective, the more credit sensitive CCC-rated sector lead the way with a total return of 9.96% followed by the B-rated sector with a return of 5.77%. The more interest rate sensitive BB-rated sector trailed with a total return of 4.14%.

Investment Strategy

At the end of the period, the Fund was overweight the Insurance, Technology, Automotive and Media industry sectors. The Fund was underweight the Telecommunications, Real Estate, Basic Industry, Financial Services, Transportation, Retail, Leisure and Healthcare industry sectors. At the end of the period, the fund had a modestly shorter duration (a measure of sensitivity of a bond's price to a change of interest rates) than the benchmark. The fund was also overweight the CCC-rated sector and underweight the BB-rated sector.

Performance Review

The Fund outperformed the benchmark by 31bps for the six months ending 30 June 2023 with a return of 5.74% vs. the benchmark's return of 5.42%. The Fund benefitted from strong security selection especially in the Capital Goods, Technology, Consumer Goods, Healthcare, Services, Insurance and Automotive industry sectors. The fund also gained from its underweight to the poor performing Telecommunications and Banking sectors and its overweight to the strong performing Technology sector. Specific high-yield issuers held by the Fund that positively impacted performance relative to the benchmark included: Ardagh Packaging, Diamond BC BV, Minerva Merger Sub, Madison IAQ and Mozart Debt Merger Sub.

The Fund was negatively impacted by security selection in the Leisure, Media and Retail sectors. The Fund was also negatively impacted by its overweight to the underperforming Media sector and its underweight to the strong performing Leisure sector. Specific high-yield issuers held by the Fund that negatively impacted performance relative to the benchmark included: iHeartCommunications, Enviva, Audacy Capital, Rackspace Technology and Bausch Health. The Fund's total return for the period also reflected actual cash flows, transaction costs and other expenses that were not reflected in the total return of the benchmark.

Federated Hermes US High Yield Credit Fund (continued)

Outlook

Despite the strong year to date performance of the high-yield market, we continue to have a somewhat cautious view about the second half of 2023. Many leading economic indicators point to a weakening of overall economic activity. We believe earnings will continue to decline, as volume weakness persists and companies' ability to raise or maintain prices declines, resulting in weaker margins. We believe defaults will continue to move higher and downgrades will increase relative to upgrades. Also, it appears that global short-rates will continue to move higher as central banks attempt to slow economic growth to combat persistently high inflation. These factors should push spreads higher. The major offset to these factors remains the buoyant employment market, which has provided consumers with the financial wherewithal to maintain spending patterns which, so far, has resulted in economic growth above expectations.

Federated Investment Counseling August 2023

Federated Hermes Sustainable Global Equity Fund

Market Review

The MSCI All Country World Net Index returned 7.8%, in GBP terms. Global equities began the year in a positive fashion, posting strong gains in January. Risk aversion declined sharply with sentiment boosted by the reopening of the Chinese economy and signs that inflation was receding from its autumn peaks, reflected in falling bond yields. In addition, excitement around artificial intelligence (AI), following the launch of ChatGPT in late 2022, drove the Information Technology sector higher. On a more negative note, rising rates were the underlying catalyst for the collapse of Silicon Valley Bank and other regional banks, in the US. In Europe, confidence in Credit Suisse ran out, leading to an arranged takeover by UBS.

One of the defining characteristics of the period was the lack of market breadth with returns driven by a small number of tech-focused mega cap stocks. In H1, almost 90% of the MSCI World return was generated by just three sectors (Information Technology, Communication Services and Consumer Discretionary). Similarly, over 75% of the return of the S&P 500 can be attributed to just 10 stocks.

Outside of the Al-generated excitement, investors have remained cautious. Inflationary pressures have proved to be more persistent than anticipated, especially in Europe. However, the overall performance of equities has confounded the sceptics, and in June we saw an increase in risk appetite which was reflected in improved market breadth.

Investment Strategy

The Federated Hermes Sustainable Global Equity Fund is a high-conviction global equity strategy. It aims to generate attractive financial returns by investing in companies that are helping to create a more sustainable future.

We only invest in companies that make a difference. This is reflected in the strategy's holdings, which are all aligned with, and facilitate progress on, one or several of the UN's Sustainable Development Goals (SDGs). Each investee company stands out on the basis of the strength of their operations and/or their products and services. Both best-in-class and the fastest improving companies are considered for the portfolio. Our analysis is focused on identifying a clear link between the environmental & social performance of the business and the financial return.

Over the period, we started three new holdings: American Tower, HCA Healthcare and Datadog. We also closed out five positions: Verisk, Itron, Baxter International, Sunnova and Ocado.

Our new position in American Tower (AMT) was funded by the disposal of the holding in Verisk. AMT offers consistent, long-term, contracts with embedded inflation protection. The business has low variable costs, high operating leverage and attractive free cash. In addition, it has a well-diversified asset base, offering exposure to high-growth emerging markets alongside a stable domestic business. We also believe that the existing investor analysis of AMT's international business is relatively poor and gives insufficient weight to the improving growth outlook driven by the exposure to emerging markets. The stock has recently underperformed, due to its rate-sensitivity it is often seen as a bond-proxy, and this provided us with a compelling entry point.

We sold our holdings in Itron and Baxter International in February. These were both small positions where our conviction had waned. A lacklustre meeting with Itron in late 2022, led to unanswered questions around capital allocation priorities. Given the overweight in tech within the broader portfolio, we closed the remaining 0.5% position, given the better investment opportunities we saw elsewhere. It was a similar picture with our decision to sell Baxter, where successive disappointments pointed to more structural concerns with the business, rather than temporary/covid lockdown-related issues. On the purchase side, HCA Healthcare had also been seriously affected by the pandemic, but we see an increasing opportunity for them to grow their footprint amidst the structural tailwinds of ageing demographics and increased pressure on public health systems.

We sold our small holdings in Sunnova and Ocado to fund a new position in Datadog. Higher interest rates pose a challenge for Sunnova, and while we expect continued strong demand, it is less clear how that will flow through to profitability. Ocado has also been hit by higher rates, given the financing pressure of their solutions business. Datadog is a leading monitoring and security platform for cloud-based infrastructure and applications. We particularly like this founder-led high-growth company because of its proven unit economics and strong competitive advantage. We observe positive product impact (driving efficiency/collaboration/innovation in enterprises), and room for further improvement. We decided to invest now as we believe the cloud spending environment is gradually becoming more benign, which will drive Datadog's consumption-driven model.

Federated Hermes Sustainable Global Equity Fund (continued)

Performance Review

The Fund returned +8.6% in sterling terms over H1, outperforming the benchmark by 0.74%. Outperformance was driven by both the overweight position and stock selection in Information Technology. The latter was the best performer over the period, delivering a +38.04% return. Stock selection in both Healthcare and Financials were also additive. The outperformance in tech was partly offset by not holding any Communication Services names since sector outperformed by 25.4% over the period. Another detractor was the underweight to Consumer Discretionary, which delivered a strong +23.6% return during H1.

Nvidia, Microsoft, Adobe were the largest individual stock contributors to performance. Chipmaker Nvidia's shares hit record highs over the period, as forecast sales were 53% higher than analysts' estimates, boosted by increased demand for AI processors that are needed in data centres running accelerated computing such as ChatGPT. Microsoft shares climbed over the period, as the company beat earnings expectations due to the strength of its Azure cloud business which saw strong sales growth and increased margins. Microsoft's business model has remained resilient to macroeconomic headwinds and is another beneficiary of the growth in AI given its heavy investments in that area. Adobe also benefited from AI tailwinds on the back of their newly launched generative AI product features and saw their shares rise sharply at the end of the period.

Apple, Thermo Fisher Scientific, AIA were the largest individual detractors from performance. Not owning Apple was a clear negative, as investor sentiment improved following a jump in service revenue, the easing of production problems and as a China rebounded after the removal of lockdown restrictions. Thermo Fisher Scientific declined after posting a fall in in Q1 Covid-19 testing revenue, despite affirming its commitment to long-term organic revenue growth guidance of 7-9% and adjusted EPS growth in the mid-teens. AIA started the period strongly, however shares declined on the news of bank failures which included First Republic Bank as well as the rescue deal for Credit Suisse.

Outlook

Equity markets were strong in H1 2023, driven by increasing hopes of a soft economic landing as well as investor excitement over the potential boost to corporate profits that might come from Al. Market breadth is starting to improve, spreading across sectors and down the market cap spectrum. Overall investor sentiment (as indicated by cash balances) continues to be cautious, but with moderating inflation, and no clear worsening of geopolitics, the market has climbed higher. With a lot of uncertainty remaining, we believe that diversification will be the key to navigating the investment environment over the near-term.

We retain our long-term focus and continue to believe that sustainable companies enjoy a more favourable long-term risk/reward ratio and are more likely to benefit from future policy developments, than other companies. One example is the increasing focus of fiscal expenditure on 'build back better' initiatives. In conclusion, we continue to believe that there is growing awareness of how the key sustainability issues, including climate change, biodiversity, social inclusion and health & wellbeing, provide a source of enduring demand growth for those companies that our held in our portfolio.

Hermes Investment Management Limited August 2023

Federated Hermes Climate Change High Yield Credit Fund

Market Review

The commencement of 2023 brought some much-needed respite following what could only be described as a turbulent and challenging 2022. With the familiar themes still in tow – heightened inflation, central bank tightening and geopolitical tensions – January brought about an improvement in broad sentiment and an up-tick in markets. Unfortunately, any positive momentum was quashed early in the period given the strength of economic data, primarily out of the US, where employment data was proving to be more resilient than expected, giving rise to an expectation of increased scale and pace of rate hikes. This weighed on the market outlook for growth, with the consensus being that global growth would slow and for economies to enter shallow-to-mild recessions.

Following a series of rate hikes across developed markets to the end of March, inflation failed to meaningfully subside, which kept investors alert to any signals that policy rates were going to jump higher – with expectations of a 50 basis points hike by the Federal Reserve (Fed). However, any intentions were abruptly halted following the demise of Silicon Valley Bank and Signature Bank in the US, prompting alarm around contagion in the US regional banking sector. These concerns were further exacerbated in Europe by a regulator-induced acquisition of Credit Suisse by UBS following Credit Suisse's collapse in March, resulting in the write-down of \$17bn of convertible bonds (AT1s). Following one more regional bank failure (First Republic Bank), the situation was quickly contained and the perceived risks dissipated, comforting investors and taking volatility down to new post-pandemic lows. This sanguine backdrop gave central banks the confidence to continue their pursuit of bringing down inflation – which, at the end of the period under review, saw headline inflation coming down from its peak but core inflation remaining sticky and leaving central banks with more to do.

Investment Strategy

The strategy has dual, self-reinforcing investment and climate objectives. It targets investment returns while focussing on companies with strong fundamentals that also demonstrate the potential to decarbonise and transition to a low-carbon world. We use our proprietary framework, the Climate Change Impact (CCI) score, to help assess the progress and impact that potential holdings are making towards decarbonisation. The portfolio had zero exposure to companies that focus on the fossil fuel sector.

With the beginning of the period being accommodative for risk assets, and there being an uneasy acceptance of long-running themes that carried over from 2022, the Fund focused on optimising security selection, with trades predominantly targeting small extensions, capital structure pivots and cross-currency switches – mainly EUR to USD. However, as sentiment quickly shifted, markets saw a more cautious tone, and volatility picked up meaningfully, reaching its peak in March as a result of a series of US regional bank collapses, before gradually subsiding to near post-pandemic lows by the end of the period.

Amid this backdrop, we maintained a highly selective approach around adding risk, with a focus on emerging markets versus developed market rotations, and a preference for higher quality where widening in credit spreads (the difference in yield between corporate bonds and their equivalent government-issued bonds) was unjustified in issuers with strong fundamentals. Additionally, early in the period, we pivoted out of cyclical sectors and into defensive sectors, and this view remained core to our search for new opportunities. As volatility carried through until close to the end of the period, we remained constructive on sectoral, regional and issuer selection, continuing to prefer higher quality and seeking out positions that gave us exposure to more senior levels of capital structures.

Performance Review

The Federated Hermes Climate Change High Yield Credit Fund (F Accumulation USD net) generated a return of 2.56% in H1 2023, underperforming its benchmark by 2.27%.

The Fund's overweight positioning in sovereign debt, Capital Goods and Telecommunication Services were the top contributors to relative performance in the first half of the year. In contrast, underweight positioning in Leisure (zero exposure), Energy and Financials were the biggest detractors on a sectoral basis.

At the individual holdings level, the Fund's overweight positions in HSBC, Ard Holdings and Marks and Spencer (Retail)boosted relative returns the most, while overweight positioning in UBS, and underweight positioning in Carnival and Samhallsbyggnadolaget, detracted the most.

At the regional level, the Fund's overweight positioning in Western Europe and underweight in Asian Emerging Markets and Pacific were the top contributors to relative performance. In contrast, its overweight positioning in North America and the Middle East detracted the most.

Federated Hermes Climate Change High Yield Credit Fund (continued)

Performance Review (continued)

From a ratings perspective, the Fund's overweight positioning in BBBs and AAAs positively impacted its performance through the period, while its significant underweight positioning in Bs detracted the most.

Outlook

June saw the Fed pause, not increasing interest rates for the first time in over a year, but with its dot plot signalling two further rate hikes this year. At the same time, the European Central Bank (ECB) raised rates by 25bps, taking its deposit rate up to 3.5%.

Our base case continues to be for a mild recession; however, uncertainty remains high with the probability of non-linear outcomes likely to be pronounced, as evidenced by the recent events exposing weakness in the financial system. Economic data have generally been surprising to the upside, while inflation remains sticky. Broadly, rate cuts are unlikely to happen this year, but further hikes are also difficult given the risk of economic destabilisation. Tail risks (catalysts) have decreased, but are closely monitored as the impact of recession, changes in inflation and geopolitics might affect markets.

Corporate fundamentals remain in a good position as balance sheets, while expected to erode, remain healthy despite slowing earnings growth that has been, so far, sector specific. In fact, our credit analysts identified more positive fundamental changes in sectors than negative, supporting the above view. That said, credit metrics unveil signs of deterioration. Revenue and EBITDA decreased for high yield corporates in the first quarter of 2023 and expanded by the slowest rate in two years. Stickier inflation on the cost side than the revenue side is leading to some margin deterioration across sectors. Meanwhile, leverage for high yield issuers decreased to 3.91x, which is the lowest level since 2012 amid inactive markets. Finally, companies are adopting a more defensive stance given market conditions, and have eliminated debt growth (0% year-on-year) and reduced capital expenditures (-7% quarter-on-quarter).

Defaults increased in June, raising the default rate for high yield bonds to 2.71% in the US, a two-year high, and 1.36% in Europe. The expectation for defaults during 2023 is that they will remain close to long-term averages.

Our near-term outlook favours exposure to high quality bonds, with selective exposure to B/CCC-rated credit. Yields remain attractive and, as rates volatility normalises, we would expect this part of the credit market to outperform. We also favour defensive sectors in 2023, with a preference for Europe versus the US based on relative value. Lastly, we continue to believe that seamless integration of ESG and sustainability considerations, coupled with active engagement, is critical to sustainable long-term performance.

Hermes Investment Management Limited August 2023

Federated Hermes Emerging Markets Debt Fund

Market Review

The first half of 2023 was a positive period for emerging market debt (EMD), with the headline JPM EM Global Diversified index returning 4.09%. The positive return profile occurred despite the US Federal Reserve's continued rate hikes and China's failure to deliver a strong stimulus plan. The benefits of nearshoring in Mexico, hopes of peaking global interest rates, and moderate political developments globally were part of a host of factors which drove emerging market (EM) asset prices higher. Core inflation in developed markets (DM) is still high, and the fear is that current inflation prints become entrenched into medium-term inflation expectations, which would therefore require more monetary tightening. However, in EM, central banks have largely succeeded in curtailing inflation, as they proactively hiked policy rates ahead of their DM peers. As a result, we think they may adopt a more accommodative stance moving forward.

The Chinese economy somewhat faltered over the period as the 'sugar high' growth spurt after the abandonment of its zero-covid policy has worn off. High frequency data prints point to a two-speed economy with manufacturing and housing still very much in the doldrums, and services still growing, albeit anaemically. A good illustration of the economic woes was the contractionary manufacturing PMI print, which fell to 48.8 in May as new orders dipped. Along with the Real Estate sector woes, a large debt overhang and low consumer confidence have also contributed to the slowing growth trajectory. The policy response so far has been less than ideal and piecemeal in nature. A series of 10 basis point (bps) rate cuts to the main benchmark rate have so far yielded little.

Over the period under review, sovereigns significantly outperformed, with sovereigns, quasi-sovereigns and corporates returning 3.39%, 0.67% and 0.03% respectively. All regions saw positive performance, with Latin America, Asia, Africa, and Europe returning 1.55%, 1.17%, 0.66% and 0.52% respectively. Most EM countries also saw positive performance, with Nigeria (0.28%), Mexico (0.26%) and Argentina (0.24%) leading the way. There were only two main detractors, which were Egypt (-0.32%) and Ecuador (-0.27%). In addition to the JPM EM Global Diversified index, the JPM Corporate EM Broad Diversified index was also positive, up 1.40%, with investment grade (1.0%) lagging high yield (1.9%).

Investment Strategy

In line with our constructive view on EMD, the potential for mean reversion in spreads (the difference in yield between corporate bonds and their equivalent government-issued bonds) and the elevated market implied default rate, we added a number of frontier sovereign credits. Several of our frontier additions were already priced at, or near, recovery values. At these levels, we felt the market was being overly punishing, and thus we added into those names at the turn of the year.

However, as the year progressed, the China recovery petered out and core DM rates continued to increase, we saw some of those distressed names drift slightly lower. In addition, we had a slight underweight holding in Argentina, which marginally detracted from performance, and, due to ESG considerations, we have not been able to hold oil quasi-sovereigns, such as Pemex, which were strong outperformers.

The Fund's slightly higher beta (a measure of volatility) meant it was running at a higher risk level over the period. Our slight underweight positioning in mid-beta countries performed well, while our overweight allocations to high-beta names lagged.

We anticipate a strong recovery in our distressed and frontier positioning, even more so than at the beginning of the year, due to cheaper prices. We are reassured by the IMF's continued engagement with a number of key frontier sovereigns, and current commodity prices still generate fiscal and external surpluses. We see strong opportunity in Mexico in particular, where nearshoring to the US market and high remittances from the US are proving highly beneficial. Also, we believe that our overweight position in El Salvador will benefit the Fund, as well as our overweight in Ecuador, which has lagged and we expect to rally into year end. However, we believe the election and IMF enthusiasm in Argentina is overcooked at this point, and that a slight underweight will pay off relative to the benchmark into year end.

As we approach an inflection point in US rates, and the potential for a more aggressive policy response from Chinese policymakers, we are confident that a number of our positions could perform in the second half of the year.

Federated Hermes Emerging Markets Debt Fund (continued)

Performance Review

The Federated Hermes Emerging Markets Debt Fund (F Accumulating USD net) generated a return of 1.62% over the first half of 2023, underperforming its benchmark by 2.37%.

The Fund's overweight allocation to corporates contributed the most to relative returns, while its underweight exposure to quasi-sovereign and sovereign detracted the most.

From a regional perspective, all regions detracted from relative returns, with the Middle East detracting the least and Asia, Africa and Europe detracting the most.

From a country perspective, underweight positioning in Ecuador, as well as overweight allocations to Mexico and Peru, contributed the most to relative returns. Underweight positioning in China, as well as overweight holdings in Angola and Egypt, detracted the most.

Outlook

Investors in EMD have been rewarded for holding their nerve following a testing 2022. Returns in local markets have been particularly strong as EM central banks were ahead of the curve as inflation peaked. We are more cautious going into the second half of the year, but still see pockets of opportunity:

- EM central banks will likely start cutting rates in the second half of the year, driving upside in local rates, particularly in countries where real rates are high.
- Even though aggregate EM hard currency valuations do not look particularly attractive, high yield spreads
 are attractive, and implied default rates are excessive. However, in light of our macro themes, we continue
 to see opportunities in mid-beta credits with good income return.
- Several EM countries emerged from elections with a promise of more orthodox economic policies.
- Hydrocarbon prices, which underpin many EM economies, remain robust.

Lastly, we continue to believe that seamless integration of ESG and sustainability considerations, coupled with active engagement, is critical to sustainable long-term performance.

Federated Investment Counseling August 2023

Federated Hermes Biodiversity Equity Fund

Market Review

The MSCI All Country World IMI Net Index returned 7.15%, in sterling terms. Global equities began the year in a positive fashion, posting strong gains in January. Risk aversion declined sharply with sentiment boosted by the reopening of the Chinese economy and signs that inflation was receding from its autumn peaks, reflected in falling bond yields. In addition, excitement around artificial intelligence (AI), following the launch of ChatGPT in late 2022, drove the Information Technology (IT) sector higher. It wasn't all rosy though – rising rates were the underlying catalyst for the collapse of Silicon Valley Bank and several other regional banks in the US; and, in Europe, confidence in Credit Suisse ran out, leading to an arranged takeover by UBS.

The lack of market breadth was noticeable during the period, with indices being driven by a small number of mega cap tech-focused stocks. In the first half of the year, almost 90% of the MSCI World Index's return was driven by IT, Communication Services and Consumer Discretionary, while more than 75% of the return of the S&P 500 can be attributed to just 10 stocks.

Outside of the Al-generated excitement, investors remained cautious. Inflationary pressures proved to be more persistent than anticipated, especially in Europe. However, the overall performance of equities has confounded the sceptics, and, in June, we saw an increase in risk appetite reflected in improving market breadth.

Investment Strategy

The Federated Hermes Biodiversity Equity Fund is a high-conviction global equity strategy. The Fund aims to achieve capital growth over a rolling five-year period by investing in biodiversity champions: companies that are either providing a solution to biodiversity loss or materially mitigating biodiversity risk within sectors and industries which pose an outsized threat to global biodiversity. Names are qualified into the Fund through the combination of a qualitative assessment of their contribution to reducing one or more of six key themes – land pollution, marine pollution and exploitation, unsustainable living, climate change, unsustainable farming, and deforestation – as well as a quantification of their biodiversity impact.

The strategy takes a bottom-up, unconstrained approach to active equities fund management. Stocks are selected for the long term, with a holding period that is intended to be three to five years, as the team believes that the longer a position is held, the more the price reflects the merits of the business and less the noise of distracting short-term price movements.

We believe that companies that include biodiversity within their business strategies and/or as part of the risk mitigation strategies should have better long-term risk adjusted profiles, given the huge systemic risk biodiversity loss poses to the world. With increasing awareness and regulation around biodiversity, companies providing solutions or leading the way should benefit from material tailwinds, such as increased spending by governing bodies and the private sector as the theme comes further into focus.

The unconstrained nature of the team's approach inevitably leads to significant deviations at the sector, country and factor level from the reference index. As a consequence, the Fund is expected to have a high tracking error (ex post and ex ante).

Year to date, we have initiated six new positions in Xylem, Thermo Fisher, SPIE, Advanced Drainage Systems, AXA and SOITEC. We have closed three positions in Hain Celestial, Natura and Stora Enso.

The following were new positions initiated in H1 2023:

Xylem (theme : marine pollution and exploitation)

The business provides solutions to address all stages of the water cycle, from transport and testing to commercial, industrial and residential water usage. Its products aim to increase efficiency, treat wastewater and monitor water infrastructure to identify leaks.

Thermo Fisher (theme: land pollution, marine pollution and exploitation, sustainable living)

The business helps to protect biodiversity through solutions such as genotyping technologies used for conservation efforts, the enabling of vital life science research, and a suite of analytical instruments that enable us to measure and monitor the quality of water and the impact that industries have on the environment.

Federated Hermes Biodiversity Equity Fund (continued)

Investment Strategy (continued)

• SPIE (theme: climate change)

Spie is an engineering services company that provides maintenance and electrical engineering services to the industrials sector, with a 60%+ revenue exposure to energy-transition focused projects. These include deployments focused on energy efficiency in buildings, installation of greenfield renewable infrastructure, and industrial decarbonisation projects.

Advanced Drainage Systems (theme: marine pollution and exploitation, land pollution)

The business is a manufacturer of plastic piping, and stormwater and onsite septic wastewater solutions. It is the largest plastic recycling company in North America, ensuring over half a billion pounds of plastic is kept out of landfills every year.

Soitec (theme: climate change)

Soitec is a global provider of engineered substrates for the semi-conductor industry that enhance the performance and energy efficiency of electronic devices. We see a clear application of this technology to the electric vehicle (EV) space, where power semis produced by SOITEC can improve vehicle range by c.10%, reducing the quantum of rare earth metal content per vehicle, and improving the breakeven economics versus internal combustion engines (ICE).

AXA (theme: sustainable living)

AXA is a global insurer offering life and non-life services. We recognise the role that the Financials sector has to play in affecting biodiversity as the ultimate custodian of trillions of dollars of assets, be they real assets such as forestry and real estate or listed assets such equities and debt. AXA has one of the largest green asset books in the world (sustainably managed forest, real estate, and private equity invested in natural capital assets), is ranked as number two as a risk underwriter and withholds from providing insurance to high risk-bearing sectors such as coal, oil and gas.

The following positions were closed in H1 2023:

Stora Enso (theme: deforestation)

This position was sold, with the proceeds used to increase our preferred position in UPM-Kymenne and consolidate our exposure to the pulp and paper sector. Paper prices have been under pressure due to supply gluts in Europe and demand compression. We remain invested in the space due to through-cycle capital returns of names low on the cost curve, combined with the capacity of forest asset owners in low biodiversity intense regions to mitigate biodiversity loss from this necessary industry. We prefer UPM to Stora Enso due to UPM's leaner footprint within Europe and its better insulation from wood pulp prices.

Natura (theme: deforestation)

Natura was sold after a rally in the share price, following the confirmation of the sale of the Aesop brand to L'Oreal for \$2.25bn. We concluded that, while this substantially de-levered the balance sheet, the uncertain consumer outlook in Brazil and latent questions about the clarity of management's messaging and target setting presented an opportunity for us to consider a full sale of the position.

Hain Celestial (theme: deforestation)

Hain Celestial was sold after disappointing first quarter results, where we felt that, in spite of its compelling valuation versus food peers and potential to rebound in 2024, risk remained skewed to the downside. Chief incremental risks included a pronounced slowdown in the North American market, with the recently appointed CEO committing to re-invest materially in the brands to reinvigorate growth. We concluded that this investment cycle was one which would be protracted, and that we may be able to access the stock at more compelling risk-reward in the future.

Federated Hermes Biodiversity Equity Fund (continued)

Performance Review

The Fund returned -2.46% in GBP terms in H1 2023, underperforming the benchmark by 897bps. The Fund is benchmark agnostic and scopes its focused watchlist of companies meeting the criterion of 'biodiversity champions' at c.200 stocks versus the benchmark's over 9,000 names.

The market had narrow leadership in the first half of 2023, led by the IT sector, with 10 stocks driving more than 40% of the MSCI World Index's performance. Against this backdrop, our underweight allocation to IT had the most significant impact on returns. In addition to this, stock selection in Industrials, Materials and Consumer Discretionary also detracted. Given the Fund's lack of exposure to the sectors with the biggest weights in the index, such as IT, Financials, and Telecommunication Services, it is unrealistic to expect the Fund can outperform the benchmark in periods such as we have witnessed in H1 2023.

Paring back some losses was an underweight allocation to, and stock selection in, Health Care. Also beneficial was not holding any Energy names, as the sector returned -2.31%, as was an underweight to the Financials sector.

Clean Harbors, Itron and Kingspan were the largest individual contributors to performance. Clean Harbours delivered another quarter of strong results, and we believe that its pricing strength is underappreciated, specifically in the environmental services division. Itron reported strong first quarter results, with revenue growth aided by easing supply constraints, which resulted in significantly better-than-expected earnings and guidance that suggested it could meet its 2023 targets by the end of the first half. Kingspan reported strong results and reiterated guidance for 2023, which reassured investors who were sceptical about its ability to deliver given the current slowdown in its end markets.

UPM-Kymmene, Hain Celestial and Aecom were the largest detractors from relative performance, among positions held by the Fund. UPM-Kymmene declined after receiving a broker downgrade as paper and pulp prices normalised. The company benefitted from higher gas prices which pushed paper prices up; this advantage started to dissipate and the stock valuation was elevated against weakening paper prices. Hain Celestial experienced poor Q1 earnings results with slowing growth and the need to inject more cash into reviving its brands. We believe there is a challenging near-term outlook for the branded consumer goods sector, with a shorter cycle in consumer goods businesses and operating footprints that can drive deviations in margins. Aecom was also a detractor from performance, as we feel it was unfairly punished for its US commercial exposure (<10% of the business) and had still not fully recovered from the resolution of the US debt ceiling crisis. We take encouragement from the strong performance of peer Tetra Tech as an indicator of a potential second-half catch-up opportunity for Aecom.

Outlook

The first half of 2023 presented a continuation of the tumult of 2022, with distinct periods of risk-on and risk-off. However, we were encouraged by the cadence of market sentiment towards the end of the period. In particular we are pleased to see an increase in market breadth, with returns spreading across sectors and down the market cap spectrum. While uncertainty remains high, we see the range of macro scenarios narrowing and the likelihood of recession in key geographies abating. Further, early in the second half, inflation data has been encouraging across most Organisation for Economic Co-operation and Development (OECD) nations, setting the stage for a long awaiting curtailment in rate increases, of which we expect the portfolio to be an outsized beneficiary versus the index.

Irrespective of this broadly positive market sentiment, we see significant idiosyncratic opportunities within the businesses themselves to demonstrate fundamental strength, and to drive outperformance. The portfolio, as of the close of June, was valued at a blended H1 2023 P/E of 17.7x versus the MSCI ACWI's 15.0x. Comparatively, consensus growth for the portfolio, on a blended basis over financial years 2023-4, is expected to be 9.3%/17.8% versus the index's 0.3%/9.8%. We expect a degree of upward estimate revision beyond this on the 2023 earnings, reflecting broad conservatism across our coverage set, and therefore we believe our portfolio has significant potential to demonstrate superior growth. We see this as a potential avenue for outperformance.

Hermes Investment Management Limited August 2023

Federated Hermes China Equity Fund

Market Review

The benchmark MSCI China All Shares Net Total Return Index returned -5.36% over the period, in US dollar terms (-10.45% in sterling terms). Chinese equities started the new year on a strong footing thanks to China's reopening and expectations for easier monetary policy. However, China's markets were sharply lower in the second quarter as China's economic rebound started to cool while strong US economic data and sticky inflation forced investors to reassess interest rate expectations.

Investment Strategy

In the first quarter we added to Alibaba, Tencent, GF Securities and Uni-President China positions, cut ZTE, West China Cement, Cosco Shipping Ports, and sold Cocreation Grass. In the second quarter, we added Dada Nexus, iQIYI and Brilliance China Automotive.

Performance Review

The Fund returned -8.42% in sterling terms, net of fees, during the period, outperforming the benchmark MSCI China All Shares Net Total Return Index which returned -10.45%, on a relative basis by 227bps.

The top stock contributor was Foxconn Industrial Internet, a leading provider of intelligent manufacturing integration solutions, which rose on artificial intelligence (AI) server-supply chain optimism, given its role as a key supplier for Nvidia. Sinotruk, a Chinese state-owned truck manufacturer, rose on signs of a strong sales recovery and in anticipation of fiscal stimulus. Baidu, China's leading search company, rose after the company unveiled its plans to launch a large-scale, AI-powered ChatGPT called 'ERNIE Bot'. Sentiment was further helped by Baidu's reporting of strong fourth quarter 2022 earnings, the announcement of a \$5 billion share repurchase programme and the company winning permits to offer driverless robotaxi services in Beijing.

The largest stock detractor was JD. Com, a leading Chinese online e-commerce retailer, which fell after announcing a multi-billion-dollar consumer discount campaign, highlighting heightened competition. Nine Dragons Paper, the largest producer of containerboard in China, fell amid a lacklustre recovery in domestic consumption for packaging and transporting consumer goods and industrial products; rising raw material costs have also impacted profit margins. Weibo, 'China's Twitter', fell following first quarter 2023 results that, despite meeting market expectations and being accompanied by a more generous capital return policy, highlighted a challenging advertising outlook.

Outlook

Concerns about an anaemic post-covid recovery and geopolitical tensions have kept Chinese equities depressed. We believe that risks are more than priced in and in the context of low interest rates we believe that either a consumer sentiment boost or reduction in tension with the US could spur the meaningful outperformance of Chinese equities relative to equities in the rest of the world.

Hermes Investment Management Limited August 2023

Federated Hermes Global Emerging Markets ex-China Equity Fund

Market Review

The benchmark MSCI Emerging Markets ex China Index returned 9.86% over the period, in US dollar terms (3.95% in sterling terms), ahead of the broader MSCI Emerging Markets Index but significantly underperforming developed markets (DM). Returns in DM were boosted by Big Tech and artificial intelligence (AI), propelling the Nasdag Index to its best first half in four decades.

Latin America was the best performing region, led by Mexico and Brazil against a backdrop of improving economic data. Brazil outperformed given easing fiscal concerns under newly elected President de Silva and as the disinflation process continues. Consensus revised inflation expectations lower, leading the market to anticipate interest rate cuts for August, meaning that Brazil would be one of the first countries in the region to start easing. Peru and Chile also outperformed.

Asia ex-Japan also outperformed, led higher by Taiwan and Korea which were boosted as investors rushed to buy Al-related stocks. India posted positive returns, supported by macroeconomic data including better industrial production and easing inflation, which meant the central bank kept monetary policy unchanged. Indonesia, where the Indonesian rupiah appreciated against the US dollar, also ended the period in positive territory.

Emerging Europe, the Middle East and Africa underperformed. Turkey posted the largest loss in the region as President Erdogan won re-election in May, extending his two-decade rule. South Africa fell given elevated macroeconomic risks including inflation expectations, rate rises, currency weakness and the impact power shortages were having on the economy. Hungary, Poland and Greece were among the top-performing index markets, despite rising recessionary fears in Europe. Central European markets began to anticipate rate cuts as inflation eased, and Hungary cut rates in June. Saudi Arabia was the only Middle Eastern energy market to post a positive year-to-date return.

At a sector level, the period was marked by a wide dispersion in returns. Information Technology and Consumer Discretionary finished top, while Utilities and Materials were the worst performers.

Investment Strategy

The team initiated several new positions in the first quarter. These included: Suzuki Motor, the parent company of Maruti Suzuki, the largest manufacturer of passenger vehicles in India; Infosys one of India's leading IT consulting; Max Healthcare the second-largest Indian hospital chain in terms of revenue; Hanon Systems, a South Korean manufacturer of thermal systems for both traditional internal combustion engine and electric vehicles.

They also bought Koh Young Technology, a leading South Korean 3D measurement-based equipment and solutions provider; Tokai Carbon Korea, a subsidiary of Tokai Carbon Japan which manufactures silicon carbide rings and products mostly for the semiconductor industry in Korea. The team initiated a position in CM Hospitalar (doing business as Viveo), it's core business is the distribution of materials and medicines to Brazilian hospitals and clinics; and they added Traxion, a leading logistics and mobility company in Mexico.

In the second quarter, the team re-initiated a position in HDFC Bank (sold in 2021), one of the largest independent banks in India. They also initiated a position in Regional, a Mexican regional bank in the north of the country that focuses mainly on corporate loans for small- and medium-sized companies.

They added Voltronic Power Technology, a Taiwan-listed original design manufacturer of uninterruptible power supply products (UPS), solar inverter and other power devices; Fairfax India, an investment holding company with a variety of public and private equity securities, trading at a significant discount to its book value; Mabanee, a Kuwait-based real estate development company; Lotes, a Taiwanese specialist designer and manufacturer of connectors, CPU sockets and high-speed cables for desktop, notebook, server, and automotive and industrial customers.

They trimmed Sinbon Electronics, Delta Electronics, Samsung and Banco de Chile into strength. They were in the process of selling FSN E-commerce, an Indian beauty care e-retailer, due to slowing digital demand, as the high-street recovers, increased competition and rising expenses.

They exited Container Corp due to limited upside. They sold Credicorp given downside risks related to political uncertainty and social disorder. They exited Win Semiconductors as the company intends to expand in unrelated businesses in China.

Federated Hermes Global Emerging Markets ex-China Equity Fund (continued)

Performance Review

The Fund returned 5.49% in sterling terms, net of fees, over the period, outperforming the benchmark MSCI Emerging Markets ex China Index which returned 3.95%, on a relative basis by 149bps.

Allocation to Taiwan, and stock selection within, contributed the most to relative returns. Non-exposure to Thailand and Saudi Arabia also aided returns, while stock selection in India, Korea and Mexico detracted from relative performance.

By individual stock, leading contributors included Sinbon Electronics, a solutions provider of electronics integration based in Taiwan. The stock rose after reporting solid quarterly results that highlighted impressive revenue growth. Wiwynn, a Taiwanese manufacturer of computer storage devices, also contributed strongly: the stock rose as data traffic growth, public cloud migration, and new applications such as AI and machine learning (e.g. ChatGPT) were expected to drive long-term cloud capital expenditure growth and infrastructure investments. Entegris, a supplier of materials to the semiconductor industry, rose as content-per-wafer growth drove better-than-expected results and outlook.

The largest detractors from relative performance included Hapvida, a Brazilian provider of low-cost health insurance, which fell due to near-term financing concerns and concerns over the company's ability to comply with regulations in a scenario of higher rates for longer. The team exited the position. Chailease, a non-bank leasing company that operates in Taiwan, Mainland China and ASEAN, also detracted, due to a worse-than-expected earnings decline of 19% year-on-year in May, a result of tax rebates and compressed interest spread amid rate hikes. However, the imminent likely end of the rate-hiking cycle, and the low earnings base in the second half of 2022, should provide support in H2 2023. Qatar National Bank fell as earnings were expected to be impacted by the sluggish credit growth in Qatar and tough macroeconomic conditions in Egypt and Turkey where the bank has operations.

Outlook

The challenges of decarbonisation, deglobalisation, deteriorating demographics, and record-high debt burdens suggest the new normal for inflation could be higher than DM central banks' targets of 2%. However, most central banks in EM have hit a pause on rate increases as inflation has been trending lower, opening the way to looser monetary policy. In addition to trough valuations and light investor positioning in EM, the growth differential between emerging and developed markets is forecast to expand, driven by favourable demographics, manufacturing capability, availability of critical resources and focus on supply-side reforms and infrastructure investment. Several emerging markets could benefit substantially from the relocation in supply chains that has already begun.

For the medium to long term, we anticipate a shift in the investment environment, that will likely be decisively different from the last 10 years, as investors evaluate the impact of higher-than-normal inflation and cost of capital, and sticky supply-side constraints (energy, commodities and labour). The shift will create winners and losers. Emerging markets have a golden opportunity to improve their competitiveness, capitalising on leadership in growth, demographics, manufacturing prowess and resource availability. In contrast, the developed world is learning to adjust to high inflation and is distracted by structural challenges investors are only now considering.

Hermes Investment Management Limited August 2023

Federated Hermes Sustainable Global Investment Grade Credit Fund

Market Review

The commencement of 2023 brought some much-needed respite following what could only be described as a turbulent and challenging 2022. With the familiar themes still in tow – heightened inflation, central bank tightening and geopolitical tensions – January brought about an improvement in broad sentiment and an up-tick in markets. Unfortunately, any positive momentum was quashed early in the period given the strength of economic data, primarily out of the US, where employment data was proving to be more resilient than expected, giving rise to an expectation of increased scale and pace of rate hikes. This weighed on the market outlook for growth, with the consensus being that global growth would slow and for economies to enter shallow-to-mild recessions.

Following a series of rate hikes across developed markets to the end of March, inflation failed to meaningfully subside, which kept investors alert to any signals that policy rates were going to jump higher – with expectations of a 50 basis points (bps) hike by the Federal Reserve (Fed). However, any intentions were abruptly halted following the demise of Silicon Valley Bank and Signature Bank in the US, prompting alarm around contagion in the US regional banking sector. These concerns were further exacerbated in Europe by a regulator-induced acquisition of Credit Suisse by UBS following Credit Suisse's collapse in March, resulting in the write-down of \$17bn of convertible bonds (AT1s). Following one more regional bank failure (First Republic Bank), the situation was quickly contained and the perceived risks dissipated, comforting investors and taking volatility down to new post-pandemic lows. This sanguine backdrop gave central banks the confidence to continue their pursuit of bringing down inflation – which, at the end of the period under review, saw headline inflation coming down from its peak but core inflation remaining sticky and leaving central banks with more to do.

Investment Strategy

With the beginning of the period accommodative for risk assets, and there being an uneasy acceptance of long-running themes that carried over from 2022, the Fund focused on optimising security selection, with trades predominantly targeting small extensions, capital structure pivots and cross-currency switches — mainly EUR to USD. However, as sentiment quickly shifted, markets saw a more cautious tone, and volatility picked up meaningfully, reaching its peak in March as a result of a series of US regional bank collapses, before gradually subsiding to near post-pandemic lows by the end of the period.

Amid this backdrop, we maintained a highly selective approach around adding risk, with a focus on emerging markets versus developed market rotations, and a preference for higher quality where widening in credit spreads (the difference in yield between corporate bonds and their equivalent government-issued bonds) was unjustified in issuers with strong fundamentals. Additionally, early in the period, we pivoted out of cyclical sectors and into defensive sectors, and this view remained core to our search for new opportunities. As volatility carried through until close to the end of the period, we remained constructive on sectoral, regional and issuer selection, continuing to prefer higher quality and seeking out positions that gave us exposure to more senior levels of capital structures.

Performance Review

The Federated Hermes Sustainable Investment Grade Credit Fund (Class F, USD, Accumulating) returned 0.57% in since inception, underperforming its benchmark by 0.32%.

By sector, the Fund's underweight positioning in Banking, and overweight positions in Insurance and Basic Industry were the top contributors to relative performance. In contrast, underweight positioning in Financial Services, Utilities and Energy were the greatest detractors. At the individual holdings level, the Fund's underweight positioning in HSBC (Banking), and overweight positions in Caixabank (Banking) and ABN Amro (Banking) boosted relative returns the most, while allocations to United Utilities Group (Utilities), UBS (Banking), and BT Group (Telecommunications) were the largest detractors.

At the regional level, the Fund's overweight allocations to Western Europe, North America and Asia Pacific were the top contributors to relative performance. Underweight exposure to Asian developed markets was the largest detractor.

From a ratings perspective, overweight positioning in BBBs and BBs positively impacted relative performance, while a significant overweight in AAAs and AAs detracted the most over the period.

Federated Hermes Sustainable Global Investment Grade Credit Fund (continued)

Outlook

June saw the Fed pause, not increasing interest rates for the first time in over a year, but with its dot plot signalling two further rate hikes this year. At the same time, the European Central Bank (ECB) raised rates by 25bps, taking its deposit rate up to 3.5%.

Our base case continues to be for a mild recession; however, uncertainty remains high with the probability of non-linear outcomes likely to be pronounced, as evidenced by the recent events exposing weakness in the financial system. Economic data have generally been surprising to the upside, while inflation remains sticky. Broadly, rate cuts are unlikely to happen this year, but further hikes are also difficult given the risk of economic destabilisation. Tail risks (catalysts) have decreased, but are closely monitored as the impact of recession, changes in inflation and geopolitics might affect markets.

Corporate fundamentals remain in a good position as balance sheets, while expected to erode, remain healthy despite slowing earnings growth that has been, so far, sector specific. In fact, our credit analysts identified more positive fundamental changes in sectors than negative, supporting the above view. That said, credit metrics unveil signs of deterioration. Revenue and EBITDA decreased for high yield corporates in the first quarter of 2023 and expanded by the slowest rate in two years. Stickier inflation on the cost side than the revenue side is leading to some margin deterioration across sectors. Meanwhile, leverage for high yield issuers decreased to 3.91x, which is the lowest level since 2012 amid inactive markets. Finally, companies are adopting a more defensive stance given market conditions, and have eliminated debt growth (0% year-on-year) and reduced capital expenditures (-7% quarter-on-quarter).

Defaults increased in June, raising the default rate for high yield bonds to 2.71% in the US, a two-year high, and 1.36% in Europe. The expectation for defaults during 2023 is that they will remain close to long-term averages.

Our near-term outlook favours exposure to high quality bonds, with selective exposure to B/CCC-rated credit. Yields remain attractive and, as rates volatility normalises, we would expect this part of the credit market to outperform. We also favour defensive sectors in 2023, with a preference for Europe versus the US based on relative value. Lastly, we continue to believe that seamless integration of ESG and sustainability considerations, coupled with active engagement, is critical to sustainable long-term performance.

^{*} Federated Hermes Biodiversity Equity Fund launched on 21 March 2022.

^{**} Euro and US Dollar denominated sub-funds are converted to Sterling in the company total column using the period end exchange rates of 1.16165 and 1.21445 respectively. Please note that the figures for "Purchase of financial assets" and "Proceeds from sales of financial assets" on the Cash Flow Statement differ from the figures used in the Schedule of Significant Portfolio Movements, as the Cash Flow Statement is adjusted for any receivable or payable for financial assets at the period end.

1. **Incorporation and Principal Activity**

Federated Hermes Investment Funds Public Limited Company (the "Company") was incorporated on 23 October 2008 under the laws of Ireland as an open-ended umbrella type investment company with variable capital and limited liability, having segregated liability between its sub-funds, in which different sub-funds may be created from time to time. The Company was authorised as an Undertaking for Collective Investment in Transferable Securities on 24 November 2008 by the Central Bank of Ireland in accordance with the provisions of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended ("the UCITS Regulations"), and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 (the "Central Bank UCITS Regulations").

As at 30 June 2023 there were 24 sub-funds launched with the following share classes:

1. Incorporation and Principal Activity (continued)

Investment Objective, Investment Policy and Dealing Information

Federated Hermes Global Emerging Markets Equity Fund - The investment objective of the sub-fund is to achieve long-term capital appreciation.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its objective over a rolling period of any five years, by investing at least 80% in a diversified portfolio of equity securities and equity related securities of, or relating to companies in, or companies that derive a large proportion of their revenues from, global emerging markets. The sub-fund will invest at least 67% of its assets in companies listed or traded on a Regulated Market worldwide.

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the MSCI Emerging Markets Index.

Federated Hermes Global Equity Fund - The investment objective of the sub-fund is to provide long-term capital appreciation.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its investment objective over a rolling period of any five years, by investing in a portfolio of equity securities quoted or traded on Regulated Markets worldwide, and the sub-fund will invest at least 67% of its assets in these securities. In addition, the sub-fund will invest at least 80% in equity securities that are component securities of the MSCI World Index or equity securities of companies listed in the countries referenced in this index. The MSCI World Index is a free float-adjusted market capitalisation weighted index that is designed to measure the equity market performance of developed markets.

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the MSCI World Index.

1. Incorporation and Principal Activity (continued)

Investment Objective, Investment Policy and Dealing Information (continued)

Federated Hermes Sustainable European Equity Fund* - The investment objectives of the sub-fund are to: (i) achieve long-term capital growth over a rolling five-year period; and (ii) have a reduced environmental footprint compared to the Benchmark (MSCI Europe Index).

The sub-fund is an Article 9 fund for the purpose of regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability related disclosures in the financial services sector (SFDR). A minimum of 2% of the sub-fund's investments will be aligned with the environmental objectives of climate change mitigation and climate change adaptation under the Taxonomy Regulation.

The sub-fund will seek to achieve its objective by investing at least 80% in a diversified portfolio of equity securities and/or equity related securities of, or relating to, companies in, or companies that derive a large proportion of their revenues from, the developed and emerging European market region. These companies will be listed and/or traded on a Regulated Market worldwide.

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this Fund is the MSCI Europe Index.

*The Fund is closed to further subscription and is in the process of being terminated.

Federated Hermes Global High Yield Credit Fund - The investment objective of the sub-fund is to generate a high level of income.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its objective over a rolling period of any five years, by investing at least 80% in a diversified portfolio of debt securities. The sub-fund may take long positions and/or generate Synthetic Short Exposure through the use of FDIs. The securities in which the sub-fund may invest will be selected on a global basis.

The Valuation Point of the sub-fund is close of business in the relevant market on each Dealing Day provided that if any of the relevant markets are not open on a Dealing Day, the value of the relevant investments at the close of business on the previous Dealing Day shall be used.

The comparator benchmark for this sub-fund is the ICE BofA Merrill Lynch Global High Yield Constrained Index.

1. Incorporation and Principal Activity (continued)

Investment Objective, Investment Policy and Dealing Information (continued)

Federated Hermes Sustainable Europe ex-UK Equity Fund* - The investment objectives of the sub-fund are to: (i) achieve long-term capital growth over a rolling five-year period; and (ii) have a reduced environmental footprint compared to the Benchmark (MSCI Europe ex UK Index).

The sub-fund is an Article 9 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability related disclosures in the financial services sector (SFDR). A minimum of 2% of the sub-fund's investments will be aligned with the environmental objectives of climate change mitigation and climate change adaptation under the Taxonomy Regulation.

The sub-fund will seek to achieve its objective by investing at least 80% in a diversified portfolio of equity securities and equity-related securities of, or related to companies in, or companies that derive substantial revenues from, the developed and emerging European market region, but excluding the United Kingdom.

These companies will be listed and/or traded on a Regulated Market worldwide.

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund the MSCI Europe ex-UK Index.

*The Fund is closed to further subscription and is in the process of being terminated.

Federated Hermes US SMID Equity Fund - The investment objective of the sub-fund is to provide long term capital appreciation.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its objective over a rolling period of any five years, by investing at least 80% in equity and/ or equity-related securities of, or relating to, small and mid-capitalisation companies domiciled in the US, or companies that derive a large proportion of their income from US activities, and that the Investment Manager has identified as being, in its view, undervalued. These companies will be listed or traded on a Regulated Market worldwide (primarily in the US or Canada).

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the Russell 2500 Index.

1. Incorporation and Principal Activity (continued)

Investment Objective, Investment Policy and Dealing Information (continued)

Federated Hermes Asia ex-Japan Equity Fund - The investment objective of the sub-fund is to achieve long term capital appreciation.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its objective over a rolling period of any five years, by investing at least 80% in a portfolio of equity and equity-related securities of, or relating to, companies in, or companies that derive a substantial proportion of their revenues from, the Asia ex-Japan region. These companies will be listed or traded on a Regulated Market worldwide.

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the MSCI All Country Asia ex-Japan Investable Market Index.

Federated Hermes Global Equity ESG Fund - The investment objective of the sub-fund is to achieve long-term capital appreciation by investing in worldwide equity securities with favourable environmental, social and governance ("ESG") characteristics.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its investment objective over a rolling period of any five years, by investing in a portfolio of equity securities quoted or traded on Regulated Markets worldwide, and the sub-fund will invest at least 67% of its assets in these securities. In addition, the sub-fund will invest at least 80% in equity securities that are component securities of the MSCI All Country World Index or equity securities of companies listed in the countries referenced in the MSCI All Country World Index. The MSCI All Country World Index is a free float adjusted market capitalisation weighted index that is designed to measure the equity market performance of developed and emerging markets.

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the MSCI All Country World Index.

1. Incorporation and Principal Activity (continued)

Investment Objective, Investment Policy and Dealing Information (continued)

Federated Hermes Multi-Strategy Credit Fund - The investment objective of the sub-fund is to generate a high level of income targeting a high proportion of high yield returns while exhibiting lower volatility relative to the global high yield market.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its objective over a rolling period of any five years, by investing at least 80% in a diversified portfolio of debt securities. The sub-fund may take long positions and/or generate Synthetic Short Exposure through the use of FDIs. The securities in which the sub-fund may invest will be selected on a global basis.

The Valuation Point of the sub-fund is close of business in the relevant market on each Dealing Day provided that if any of the relevant markets are not open on a Dealing Day, the value of the relevant investments at the close of business on the previous Dealing Day shall be used.

Federated Hermes Global Small Cap Equity Fund - The investment objective of the sub-fund is to provide long-term capital appreciation.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its investment objective over a rolling period of any five years, by investing at least 80% in equity and/or equity-related securities of, or relating to, small capitalisation companies domiciled in, or that derive a large proportion of their income from, developed markets. The sub-fund may (but is under no obligation to) invest in component securities of the MSCI World Small Cap Index or in securities of companies listed in the countries referenced in this index. The MSCI World Small Cap Index measures the performance of small capitalisation companies across developed markets.

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the MSCI World Small Cap index.

1. Incorporation and Principal Activity (continued)

Investment Objective, Investment Policy and Dealing Information (continued)

Federated Hermes Absolute Return Credit Fund - The investment objective of the sub-fund is to target a positive investment return (absolute return) over a rolling 12 month period irrespective of market conditions, but there is no guarantee that this will be achieved and your capital is in fact at risk.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its objective by investing at least 80% in a diversified portfolio of debt securities. The sub-fund may take long positions and/or generate Synthetic Short Exposure through the use of FDIs. The securities in which the sub-fund may invest will be selected on a global basis.

The Valuation Point of the sub-fund is close of business in the relevant market on each Dealing Day provided that if any of the relevant markets are not open on a Dealing Day, the value of the relevant investments at the close of business on the previous Dealing Day shall be used.

Federated Hermes SDG Engagement Equity Fund - The investment objective of the sub-fund is to provide long-term capital appreciation alongside positive societal impact.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its investment objective over a rolling period of any five years, by investing at least 80% in equity and/or equity-related securities of, or relating to, small and mid-capitalisation companies domiciled in, or that derive their income from, developed and emerging markets. These companies will be listed and/or traded on a Regulated Market worldwide.

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the MSCI All Country World SMID Index.

1. Incorporation and Principal Activity (continued)

Investment Objective, Investment Policy and Dealing Information (continued)

Federated Hermes Impact Opportunities Equity Fund - The investment objective of the sub-fund is to achieve long term capital appreciation by investing in companies which will benefit from meeting the world's environmental and social challenges.

The sub-fund is an Article 9 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). A minimum of 2% of the Fund's investments will be aligned with the environmental objectives of climate change mitigation and climate change adaptation under the Taxonomy Regulation.

The sub-fund will seek to achieve its investment objective over a rolling period of any five years, by investing in a portfolio of equity securities quoted and/or traded on Regulated Markets worldwide, and the sub-fund will invest at least 67% of its assets in these securities.

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the MSCI All Country World Investable Market Index.

Federated Hermes Unconstrained Credit Fund - The investment objective of the sub-fund is to generate capital growth and a high level of income over the long term.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its objective over a rolling period of any five years, by investing at least 80% in a diversified portfolio of debt securities. The sub-fund will manage and adapt its market exposures dependent on market conditions, and the view of where markets will move to in the short, medium and long term. The sub-fund may take long positions and/or generate Synthetic Short Exposure through the use of FDIs. The Investment Manager may choose to reduce the market-related risks within the sub-fund by using FDIs to create a Synthetic Short Exposure to credit indices. In other market conditions, the Investment Manager can also seek to exploit divergent views on two companies in the same sector in a market-neutral way (creating neither a long or short exposure): it can either purchase the bond or use FDIs to generate a long exposure to one company while also using FDIs to generate a Synthetic Short Exposure in the other company. For example, this may be done when the Investment Manager believes an Investment Grade company has targeted for acquisition a Below Investment Grade company. In this way, the Investment Manager would use FDIs to reduce market related risks with the sub-fund then benefitting from the increase or decrease in the value of the companies (as the case may be). The securities in which the sub-fund may invest will be selected on a global basis.

The Valuation Point of the sub-fund is close of business in the relevant market on each Dealing Day provided that if any of the relevant markets are not open on a Dealing Day, the value of the relevant investments at the close of business on the previous Dealing Day shall be used.

1. Incorporation and Principal Activity (continued)

Investment Objective, Investment Policy and Dealing Information (continued)

Federated Hermes Global Emerging Markets SMID Equity Fund - The investment objective of the sub-fund is to achieve long term capital appreciation.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its objective over a rolling period of any five years, by investing at least 80% in a diversified portfolio of equity securities and equity related securities of, or relating to small and mid capitalisation companies in, or companies that derive a large proportion of their revenues from, global emerging markets. The sub-fund will invest at least 67% of its assets in companies listed or traded on a Regulated Market worldwide. The sub-fund will follow a long only equity strategy.

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the MSCI Emerging Markets SMID Cap Index.

Federated Hermes SDG Engagement High Yield Credit Fund - The investment objective of the sub-fund is to provide total return, through a combination of income and capital growth over a rolling period of any five years, whilst delivering positive societal impact.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its objective by investing at least 80% in a diversified portfolio of Below Investment Grade debt securities on a global basis. The portfolio will be actively managed where all holdings within the sub-fund will have both an investment and an engagement thesis. Each holding will also be aligned with at least one of the United Nations Sustainable Development Goals (the "UN SDGs"). The sub-fund may take long positions and/or generate Synthetic Short Exposure through the use of FDIs.

The Valuation Point will be close of business in the relevant market on each Dealing Day provided that if any of the relevant markets are not open on a Dealing Day, the value of the relevant Investments at the close of business on the previous Dealing Day shall be used.

The comparator benchmark for this sub-fund is the ICE BofA Merrill Lynch Global HY Constrained Index.

1. Incorporation and Principal Activity (continued)

Investment Objective, Investment Policy and Dealing Information (continued)

Federated Hermes US High Yield Credit Fund - The investment objective of the sub-fund is to generate a high level of income.

The sub-fund is an Article 6 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities, as defined under the Taxonomy Regulation (EU) 2020/852.

The sub-fund will seek to achieve its objective by investing in a diversified portfolio of debt securities, with at least 80% invested in Below Investment Grade securities.

The Valuation Point of the sub-fund is close of business in the relevant market on each Dealing Day provided that if any of the relevant markets are not open on a Dealing Day, the value of the relevant investments at the close of business on the previous Dealing Day shall be used.

The comparator benchmark for this sub-fund is the ICE BofA Merrill Lynch US High Yield Constrained Index.

Federated Hermes Sustainable Global Equity Fund - The investment objectives of the sub-fund are to: (i) achieve capital growth over a rolling five year period; and (ii) have a reduced environmental footprint compared to the Benchmark

The sub-fund is an Article 9 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). A minimum of 2% of the Fund's investments will be aligned with the environmental objectives of climate change mitigation and climate change adaptation under the Taxonomy Regulation.

The sub-fund will seek to achieve its objective by investing at least 80% in a diversified portfolio of equity and equity-related securities. These companies will be listed or traded on a Regulated Market worldwide.

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the MSCI All Country World Index.

1. Incorporation and Principal Activity (continued)

Investment Objective, Investment Policy and Dealing Information (continued)

Federated Hermes Climate Change High Yield Credit Fund - The investment objectives of the sub-fund are to (i) provide total return, (through a combination of income and capital growth) over a rolling period of any five years; and (ii) delivering a carbon footprint lower than the Benchmark through investment in debt securities of companies that are adapting their business models to reduce their environmental impact on Climate Change.

The sub-fund is an Article 9 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). A minimum of 1% of the sub-fund's investments will be aligned with the environmental objectives of climate change mitigation and climate change adaptation under the Taxonomy Regulation.

The sub-fund will seek to achieve its objective over a rolling period of any five years, by investing at least 80% in a diversified portfolio of debt securities. The sub-fund may take long positions and/or generate Synthetic Short Exposure through the use of Financial Derivative Instruments ("FDIs"). The securities in which the sub-fund may invest will be selected on a global basis by reference to the Investment Manager's proprietary Climate Change Impact ("CCI") scoring system that indicate how far the underlying company has reduced its carbon footprint in order to reduce the impact of climate change. The Investment Manager invests on a global basis, however investment in debt securities issued by companies that derive a large proportion of their revenues from global emerging markets will be limited to those denominated in the currencies of OECD countries and will be capped at 20% of the sub-fund.

The Valuation Point of the sub-fund is 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the ICE BofA Global High Yield Constrained USD Hedged Index.

Federated Hermes Emerging Markets Debt Fund - The investment objective of the Fund is to deliver capital growth and a high level of income.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its objective over a rolling five year period, by investing at least 80% in a diversified portfolio of foreign currency denominated debt securities issued by governments, government agencies and other quasi-governmental institutions issued in or by global emerging market countries, or issued by emerging market companies.

Exposure to global emerging markets will be primarily obtained by the sub-fund through foreign currency sovereign and corporate bonds, but the Sub-fund may invest opportunistically into locally denominated debt securities to a maximum of 20%. The sub-fund may invest up to 100% into Below Investment Grade securities, however it will typically invest no more than 75% in such securities during periods of normal market activity. From time to time, the sub-fund may invest into debt securities issued by supranational institutions.

The Valuation Point of the sub-fund is close of business in the relevant market on each Dealing Day provided that if any of the relevant markets are not open on a Dealing Day, the value of the relevant investments at the close of business on the previous Dealing Day shall be used.

The comparator benchmark for this sub-fund is the JP Morgan EMBIGD Global Diversified.

1. Incorporation and Principal Activity (continued)

Investment Objective, Investment Policy and Dealing Information (continued)

Federated Hermes Biodiversity Equity Fund - The investment objectives of the sub-fund are: (i) to achieve capital growth over a rolling five year period; and (ii) to invest in companies that are helping to protect and restore biodiversity or are reducing the threat to biodiversity through their measurable contribution to reducing one or more of land pollution, marine pollution and exploitation, unsustainable living, climate change, unsustainable farming, or deforestation.

The sub-fund is an Article 9 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). A minimum of 2% of the sub-fund's investments will be aligned with the environmental objectives of climate change mitigation, climate change adaptation and the protection and restoration of biodiversity and ecosystems under the Taxonomy Regulation.

The sub-fund will seek to achieve its investment objectives by investing at least 80% in a diversified portfolio of equity and equity-related securities listed or traded on a Regulated Market worldwide. The sub-fund may invest up to 30% of its net assets in emerging markets.

The Valuation Point will be 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the MSCI All Country World Investable Market Index.

Federated Hermes China Equity Fund - The investment objectives of the sub-fund is to achieve capital growth over a rolling period of any five years.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its objective by investing at least 80% in a diversified portfolio of Equity and Equity related of, or relating to, companies in, or companies that derive a substantial proportion of their revenues from China or Hong Kong. These companies will be listed or traded on a Regulated Market worldwide. The Investment Manager will seek exposure to securities which it expects to rise in value (known as a long-only strategy).

The Valuation Point will be 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the MSCI China All Shares Index.

1. Incorporation and Principal Activity (continued)

Investment Objective, Investment Policy and Dealing Information (continued)

Federated Hermes Global Emerging Markets ex-China Equity Fund - The investment objective of the sub-fund is to achieve capital growth over a rolling period of five years.

The sub-fund is an Article 8 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). 0% of the sub-fund's investments will be aligned with the environmental objectives under the Taxonomy Regulation. The "do no significant harm" principle applies only to those investments underlying the sub-fund that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of the sub-fund do not take into account the EU criteria for environmentally sustainable economic activities.

The sub-fund will seek to achieve its objective, by investing at least 80% in a diversified portfolio of equity securities and equity related securities of, or relating to companies in, or companies that derive a large proportion of their revenues from, global emerging markets, excluding China. The sub-fund will invest at least 67% of its assets in companies listed or traded on a Regulated Market worldwide.

The Valuation Point will be 12 noon (Irish time) on each Dealing Day.

The comparator benchmark for this sub-fund is the MSCI Emerging Markets ex-China Index.

Federated Hermes Sustainable Global Investment Grade Credit Fund - The investment objectives of the subfund are to: (i) generate a total return (through a combination of income and capital growth) over a rolling five-year period; and (ii) have a reduced environmental footprint compared to the Benchmark.

The sub-fund is an Article 9 fund for the purpose of Regulation (EU) 2019/2088 of the European Parliament and the Council on sustainability-related disclosures in the financial services sector (SFDR). A minimum of 1% of the sub-fund's investments will be aligned with the environmental objectives of climate change mitigation and climate change adaptation under the Taxonomy Regulation (EU) 2020/852.

The sub-fund will seek to achieve its investment objectives by investing at least 90% in a diversified portfolio of Investment Grade corporate debt securities (as referenced in the Categories of Investments section below). The sub-fund will manage and adapt its market exposures depending on market conditions and the view of where markets will move to in the short, medium and long term. The sub-fund may take long positions and/ or generate Synthetic Short Exposure through the use of FDIs. The Investment Manager may seek to exploit divergent views on two companies in the same sector in a market-neutral way (creating neither a long nor short exposure): it can either purchase the bond or use FDIs to generate a long exposure to one company while also using FDIs to generate a Synthetic Short Exposure in the other company. For example, this may be done when the Investment Manager believes an Investment Grade company has targeted for acquisition a Below Investment Grade company. In this way, the Investment Manager would use FDIs to reduce market-related risks with the Fund then benefitting from the increase or decrease in the value of the companies (as the case may be). The securities in which the Fund may invest will be selected on a global basis. However, investment in debt securities issued by companies that derive a large proportion of their revenues from global emerging markets will be limited to those denominated in the currencies of OECD countries.

The Valuation Point of the sub-fund is close of business in the relevant market on each Dealing Day provided that if any of the relevant markets are not open on a Dealing Day, the value of the relevant investments at the close of business on the previous Dealing Day shall be used.

The comparator benchmark for this sub-fund is the ICE BofA Global Corporate Index.

Please refer to the Prospectus and sub-funds Supplements for full information.

2. Significant Accounting Policies

The significant accounting policies applied in the preparation of these Financial Statements are set out below.

Basis of Preparation

The condensed interim financial statements have been prepared in accordance with IAS 34 'Interim Financial Reporting', and should be read in conjunction with the annual financial statements for the financial year ended 31 December 2022, which were prepared in accordance with International Financial Reporting Standards.

Foreign exchange translation

(a) Functional and presentation currency

Items included in the Company's Financial Statements are measured using the currency of the primary economic environment in which it operates ("the functional currency"). The functional currency of the Federated Hermes Global High Yield Credit Fund, the Federated Hermes Sustainable European Equity Fund and the Federated Hermes Sustainable Europe ex-UK Equity Fund is Euro, which reflects the fact that a large number of the investments in their portfolios are denominated in Euro. The functional currency of all other sub-funds is US Dollar which reflects the fact that a large number of the investments in their portfolios are denominated in US Dollar. All sub-funds denominated in Euro and US Dollar have been converted to Sterling in the total columns. The presentation currency of the Company is Sterling.

(b) Transactions and balances

Foreign currency transactions are translated into the functional currency of each sub-fund using the exchange rates prevailing at the dates of the transactions. Assets and liabilities are translated into the functional currency of each sub-fund using exchange rates in effect at the Balance Sheet date.

Foreign exchange gains and losses resulting from the settlement of transactions and from the translation at period end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the Income Statement.

Translation differences on financial instruments held at fair value through profit or loss are reported as part of net gain/(loss) on financial assets and liabilities at fair value through profit or loss in the Income Statement.

(c) Foreign exchange adjustments on aggregation

For the purpose of aggregating the Financial Statements of the sub-funds, Euro and US Dollar denominated sub-funds in the Financial Statements have been translated to Sterling at the average rate of exchange for the financial period on the Income Statement and at the financial period end rate on the Balance Sheet. The exchange adjustment arising from the difference between the average rate and the period end rate, in addition to the notional exchange adjustment arising from the translation of the opening net assets are shown in the Statement of Changes in Net Assets. The method of translation has no effect on the Net Asset Value per share attributable to the individual sub-funds.

The notional adjustment translation of the Cash Flow movements at the average rate opposed to the financial period end rate is shown in the Cash Flow Statement.

3. Cash and Cash Equivalents

Substantially all of the cash assets of the sub-funds are held with The Northern Trust Company (TNTC), which is a 100% indirect wholly owned subsidiary of Northern Trust Corporation which has a Standard & Poor's credit rating of A+ and A2 from Moody's.

Northern Trust Fiduciary Services (Ireland) Limited has appointed TNTC as its Global Sub-Custodian.

3. Cash and Cash Equivalents (continued)

The cash held with TNTC at 30 June 2023 and 31 December 2022 is detailed in the table below:

	30 June 2023	31 December 2022
Federated Hermes Global Emerging Markets Equity Fund	\$85,521,035	\$76,496,524

Federated Hermes Global Emerging Markets ex-China Equity Fund	\$1,748,657	\$2,304,848
Federated Hermes Sustainable Global Investment Grade Credit Fund**	\$4,921,824	
	£424,871,586	£349,217,452

^{*} Federated Hermes Sustainable European Equity Fund and Federated Hermes Sustainable Europe ex-UK Equity Fund were closed to further subscription on 26 June 2023 and are in the process of being terminated.

Please note that within the cash and cash equivalents balance there is a restricted cash amount of \$6,463,162 (31 December 2022: \$6,463,162) that is applied pro rata to each fund by reference to its individual liability and is set aside for a potential IRS liability for underpaid US Withholding tax, whereby the treaty rate of 15% was being claimed by the Fund instead of the standard rate of 30%, covering a period from January 2013 to March 2018. The Fund has not recorded a liability in the financial statements, as it is not probable that the Fund will have to settle the liability, as per the advice from the Fund's US tax advisors. The Fund has submitted a self-declaration and this is under consideration with the IRS at the date of this report. It is uncertain as to when the IRS will opine on the self-declaration as no set timelines are provided.

Federated Hermes Limited, the parent of Hermes Fund Managers Ireland Limited (the "Manager"), has agreed to absorb any potential US withholding tax liability on Federated Hermes Global Equity Fund. If no such liability is to be paid, Federated Hermes Limited can claim the restricted cash balance attributable to the Federated Hermes Global Equity Fund. With the exception of the Federated Hermes Global Equity Fund, the Fund retains the rights to and ownership of the restricted cash held.

The standard US withholding rate of 30% has been applied since March 2018.

For a breakdown of the restricted cash by sub-fund, please refer to note 14.

^{**} Fund launched on 20 March 2023.

4. Cash Collateral for Derivative Positions

Where derivatives are held on a sub-fund, the sub-funds may pledge/receive collateral as required with the derivative counterparty. The collateral pledged and received at 30 June 2023 and 31 December 2022 is detailed in the following tables:

30 June 2023

	Federated Hermes Global High Yield Credit Fund	Federated Hermes Multi- Strategy Credit Fund	Federated Hermes Absolute Return Credit Fund	Federated Hermes Unconstrained Credit Fund

^{**} Federated Hermes Sustainable European Equity Fund and Federated Hermes Sustainable Europe ex-UK Equity Fund were closed to further subscription on 26 June 2023 and are in the process of being terminated.

Management fees of £44,635,444 (30 June 2022: £51,541,414) were charged during the financial period and fees of £7,139,648 (31 December 2022: £14,241,771) were payable at period end.

For Federated Hermes Biodiversity Equity Fund, the Investment Manager commits to donating 5% (minus any tax cost) of the annual management fee received (net of rebates and retrocessions) to charities that it believes are helping in the drive to protect and restore biodiversity.

^{***} The Federated Hermes Sustainable Global Investment Grade Credit Fund launched on 20 March 2023.

5. Fees and Other Expenses (continued)

(b) Advisory Fees (voting and engagement services)

The fee payable to the Advisor on all Share Classes is 0.008% per annum calculated on the value of the subfund at the Commencement Date and each quarter thereafter, payable quarterly in arrears commencing on the Commencement Date. VAT will be added where appropriate.

(c) Administration Fees

The Company has engaged the services of Northern Trust International Fund Administration Services (Ireland) Limited, an indirect wholly-owned subsidiary of Northern Trust Corporation, to provide administration services for a fee.

The sub-funds are subjected to an annual Administrator fee (plus any applicable value added tax) of up to 0.04% of the Net Asset Value of each sub-fund accrued and calculated daily and payable monthly in arrears.

Administration fees of £1,391,128 (30 June 2022: £1,512,257) were charged during the financial period and fees of £558,413 (31 December 2022: £634,526) were payable at period end.

(d) Depositary and Sub-Custodian Fees

Northern Trust Fiduciary Services (Ireland) Limited acts as a Depositary of the Company. The Depositary is a Private Limited Company incorporated in Ireland on 5 July 1990 and is an indirect wholly-owned subsidiary of Northern Trust Corporation.

The sub-funds are subjected to an annual Depositary fee (plus any applicable value added tax) of up to 0.0110% of the Net Asset Value of each sub-fund. The Company will also pay other costs to the Depositary such as out-of-pocket expenses and sub-custodial fees and expenses.

In addition, the Depositary and any relevant Sub-Custodian shall be entitled to recover safekeeping and transaction charges as set out in the Depositary Agreement.

Depositary fees of £473,805 (30 June 2022: £539,005) were charged during the financial period and fees of £193,659 (31 December 2022: £226,062) were payable at period end.

Sub-Custody fees of £1,734,647 (30 June 2022: £2,180,325) were charged during the financial period and fees of £549,315 (31 December 2022: £872,481) were payable at period end.

(e) Directors' Fees

The Company shall pay to the Directors such annual fees for acting as Directors of the Company as the Directors may from time to time agree, provided however that the annual fees of each Director shall not exceed €50,000 without the approval of the Board of Directors. Directors' fees will total not more than €110,000 on a per annum basis. No other remuneration will be payable by the Company to the Directors except for out-of-pocket expenses reasonably incurred by them. Gregory Dulski, Joseph Kagan and Sylvie McLaughlin do not receive Director's fees from the Company.

Directors fees of £18,391 (30 June 2022: £17,245) were charged during the financial period and fees of £17,663 were payable at period end (31 December 2022: £201).

(f) Director Support Services

Director Support Services fees of €Nil (30 June 2022: €Nil) were charged during the period and fees of €Nil were payable at period end (31 December 2022: €Nil).

(g) Other Fees and Expenses

In addition, each sub-fund will pay the costs and expenses incurred in its operation, including, without limitation, stamp duties, taxes, the fees and expenses of the auditors, listing fees, legal expenses, the costs of printing and distributing reports, accounts and any Prospectus, any costs incurred as a result of a change in law or the introduction of any new law (including any costs incurred as a result of compliance with any applicable code, whether or not having the force of law).

5. Fees and Other Expenses (continued)

(g) Other Fees and Expenses (continued)

All fees and expenses will be charged to the sub-fund in respect of which they were incurred, or where an expense is not considered by the Directors to be attributable to any one sub-fund, the expense will normally be allocated to classes of all sub-funds pro rata to the Net Asset Value of the relevant sub-funds. Details of each of the fees payable at the period end in respect of each sub-fund are disclosed in the Balance Sheet on pages 246 to 252. Details of each of the fees incurred for the period in respect of each sub-fund are disclosed in the Income Statement on pages 259 to 265.

(h) Transaction Costs

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or financial liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument. Transaction costs for the period of £5,619,007 (30 June 2022: £7,692,348) are expensed in the Income Statement as part of the net fair value gain/loss on financial assets and liabilities at fair value through profit or loss. Only transaction costs which are separately identifiable are disclosed. These include identifiable brokerage charges and commissions, identifiable transaction related taxes and other market charges and separately identifiable transaction costs related to Financial Derivative Instruments.

6. Related Party Disclosures

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions.

(a) Management

The Company has appointed Hermes Fund Managers Ireland Limited as manager (the "Manager"). The Manager has delegated the investment management of the Company to Hermes Investment Management Limited, who also acts as distributor of the Company, and to Federated Investment Counseling. Hermes Investment Management Limited is a wholly-owned subsidiary of Federated Hermes Limited which was wholly owned by Federated Hermes, Inc at the period-end date. Federated Investment Counseling is an indirect subsidiary of Federated Hermes. Inc.

Hermes Investment Management Limited is incorporated under the laws of England and Wales and was established on 1 February 1990. Federated Investment Counseling is a US domiciled company regulated by the US Securities and Exchange Commission, to act as an investment adviser. The investment management fee rates for each of the sub-funds are disclosed in note 5(a).

Out of the directors of the Company who served during the financial period, Joseph Kagan and Gregory Dulski are employees of Federated Hermes Limited and Sylvie McLaughlin is an employee of Hermes Fund Managers Ireland Limited.

6. Related Party Disclosures (continued)

^{*} Federated Hermes SDG Engagement Equity Fund and Federated Hermes China Equity Fund only.

The Company has the power to redeem the remaining holding of any Shareholder who redeems his/her Minimum Holding of Shares to below the Minimum Holding or its foreign currency equivalent.

Every Shareholder will have the right to require the Company to redeem his/her Shares in the sub-fund on any Dealing Day (save during any period when the calculation of the Net Asset Value is suspended in the circumstances set out in the Prospectus) on furnishing to the Administrator a redemption request. All redemption requests are dealt with on a forward pricing basis, i.e. by reference to the price for Shares calculated at the Valuation Point on the relevant Dealing Day. The request for redemption of Shares must be received before 9.30 am (Irish time) on the relevant Dealing Day.

All the Shares of the sub-fund may be redeemed at the discretion of the Directors if, after the first anniversary of the first issue of Shares of the sub-fund, the Net Asset Value of the sub-fund falls below £250,000,000 for any period of time.

The movement in the number of redeemable participating shares during the financial period ended 30 June 2023 was as follows:

Federated Hermes Global Emerging

8. Fair Value Measurement

The Company categorises investments using the following hierarchy as defined by IFRS 13:

- Level I Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities. The type of investments which would generally be included would include equities, american depositary receipts, REITS, warrants and derivatives listed on a securities exchange.
- Level II Quoted prices in markets that are not considered to be active or financial instruments priced
 using inputs other than quoted prices and for which all significant inputs are observable, either directly
 or indirectly (including quoted prices for similar investments in active markets, interest rates and yield
 curves, credit risks, etc.). The type of investments which would generally be included in this category
 would include corporate bonds, government bonds, asset backed securities, floating rate notes, P-Notes,
 bank debt and certain over-the-counter derivatives.
- Level III Prices or valuations that require inputs that are both significant to the fair value measurement
 and unobservable (including the Investment Manager's own assumptions and assumptions used by the
 Board of Directors about what market participants would use in determining the fair value of investments).
 The type of investments which would generally be included in this category would include private or debt
 securities issued by private entities and investments priced by the Investment Manager. The inputs or
 methodology used for valuing securities are not necessarily an indication of the risks associated with
 investing in those securities.

The tables below set out the fair value measurements using IFRS 13 fair value hierarchies:

10. Connected Persons

The Central Bank UCITS Regulations require that any transaction carried out with a UCITS by a management company or depositary to the UCITS, the delegates or sub-delegates of the management company or depositary and any associated or group company of such a management company, depositary, delegate or sub-delegate ("connected persons") must be carried out as if negotiated at arm's length. Transactions must be in the best interests of the shareholders.

The Board of Directors are satisfied that there are arrangements (evidenced by written procedures) in place, to ensure that the obligations set out in Regulation 43(1) of the Central Bank UCITS Regulations are applied to all transactions with connected persons, and are satisfied that transactions with connected persons entered into during the period complied with the obligations set out in Regulation 43(1) of the Central Bank UCITS Regulations.

11. Soft Commission Arrangements

There were no soft commission arrangements affecting the Company during the financial period ended 30 June 2023 or financial year ended 31 December 2022.

12. Taxation

Under current law and practice the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis, it is not chargeable to Irish tax on its income or gains.

However, Irish tax may arise on the happening of a "chargeable event". A chargeable event includes any distribution payments to shareholders or any encashment, redemption, cancellation or transfer of redeemable participating shares.

No Irish tax will arise on the Company in respect of chargeable events in respect of:

- (a) a shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Company; and
- (b) certain exempted Irish tax resident shareholders who have provided the Company with the necessary signed statutory declarations.

Dividends, interest and capital gains (if any) received on investments made by the Company may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its shareholders.

13. Net Asset Value Per Redeemable Participating Share

The Net Asset Value per redeemable participating share of each sub-fund of the Company is determined by dividing the value of the net assets of the sub-fund by the total number of redeemable participating shares in issue.

14. Contingent liabilities and outstanding commitments

Contingent liabilities at the balance sheet date related to restricted cash held to settle any potential US Withholding tax liability per sub-fund. These were as follows:

	WHT as at 30	WHT as at 31

^{*} Fund launched on 20 March 2023.

17. Efficient Portfolio Management

The Company may, on behalf of each sub-fund, employ (subject to the conditions and within the limits laid down by the Central Bank) techniques and instruments relating to transferable securities and money market instruments, provided that such techniques and instruments are used for efficient portfolio management purposes. Such techniques and instruments may also, on behalf of each sub-fund, include foreign exchange transactions which alter the currency characteristics of transferable securities held by the Company. The Company may also, on behalf of each sub-fund, employ (subject to the conditions and within the limits laid down by the Central Bank) techniques and instruments intended to provide protection against exchange risks in the context of the management of its assets and liabilities.

The actual techniques employed by the relevant sub-funds are as follows:

- Northern Trust hedging across all portfolios
- Currency Hedging within the credit portfolios
- · Rates hedging within the credit portfolios
- Market exposure management within the credit portfolios (Options on Index and Index positions)

Realised gains and losses on financial instruments used for efficient portfolio management are included in the Income Statement.

Federated Hermes Investment Funds Public Limited Company Notes to the Financial Statements for the financial period ended 30 June 2023 (continued)

18. Significant Events During The Period

On 17 February 2023, Federated Hermes Absolute Return Credit Fund Supplement was updated to clarify the use of Climate Change Impact ("CCI") scores during the investment process.

On 17 February 2023, Federated Hermes Biodiversity Equity Fund Supplement was updated with exclusion increased from 5% to 10% for companies that receive revenues from alcohol distribution.

Federated Hermes Sustainable Global Investment Grade Credit Fund launched on 20 March 2023.

On 21 March 2023, the Class Y USD Accumulating Share class and the Class Y JPY Accumulating Hedged Share class of the Federated Hermes SDG Engagement High Yield Credit Fund were listed on Euronext Dublin.

The Federated Hermes Emerging Markets Debt Fund Supplement was updated on 19 April 2023 to reflect changes to the sustainability indicators and the policy on assessing companies for good governance, as outlined in the SFDR disclosures.

On 24 May 2023, all of the Sustainable Finance Disclosure Regulation (the "SFDR") Annex II disclosures were updated to include new data points detailing each sub-funds' exposure to environmentally sustainable economic activities in the Gas and Nuclear sectors, as defined under the EU Taxonomy Regulation.

Federated Hermes Sustainable European Equity Fund and Federated Hermes Sustainable Europe ex-UK Equity Fund were closed on 26 June 2023. Final redemption day was on 26 June 2023.

On the 26 May 2023 Mr. Jordan Patel was appointed as the deputy fund manager on the Federated Hermes Biodiversity Equity Fund.

On 2 June 2023 Ms. Kathryn Glass and Mr. Thomas Scherr were appointed as co-portfolio managers on the Federated Hermes US High Yield Credit Fund.

On 20 June 2023, a notice was sent out to inform shareholders in the Federated Hermes Climate Change High Yield Credit Fund of our intention to hold an EGM on 13 July 2023 to propose changes to the investment objective and benchmark.

There have been no other significant events during the financial period which may have had an impact on the financial statements for the financial period ended 30 June 2023.

19. Subsequent Events

On 13 July 2023, the resolution to change the investment objective and benchmark of the Federated Hermes Climate Change High Yield Credit Fund was approved by shareholders. The effective date of the changes will be on or around 1 November 2023, subject to the approval of the Central Bank.

Up to the date of approval of these financial statements there have been no other significant events affecting the Company subsequent to the period end, which would impact on the financial statements for the financial period ended 30 June 2023.

20. Approval Of Financial Statements

The Financial Statements were approved by the Board of Directors on 16 August 2023 for filing with the Central Bank of Ireland and circulation to shareholders.

The above represents aggregate purchases and sales of a security exceeding 1 per cent of the total value of purchases and aggregate sales of a security exceeding 1 per cent of sales for the period. If there were fewer than 20 purchases/sales that exceed 1 per cent during the period the largest 20 purchases/sales are disclosed.

Federated Hermes Investment Funds Public Limited Company Unaudited Securities Financing Transaction Regulation Disclosures

The Securities Financing Transaction Regulation (Regulation (EU) 2015/2365) ("SFTR") came into effect on 12 January 2016. The aim of the SFTR is to improve the transparency of securities financing transactions ("SFTs") in the shadow banking sector, giving regulators access to detailed information to enable them to monitor risks in that sector on an ongoing basis.

The SFTR divides SFTs into four categories:

- Repurchase transactions;
- Securities or commodities lending or borrowing transactions;
- Buy-sell back or sell-buy back transactions; and
- Margin lending transactions, which is defined broadly to capture any extension of credit 'in connection with the purchase, sale, carrying or trading of securities'.

The Company does not currently employ repurchase/reverse repurchase agreements and securities lending for the purposes of efficient portfolio management.

No sub-fund employed SFTs at the period end date of 30 June 2023.
